MOTIVATION

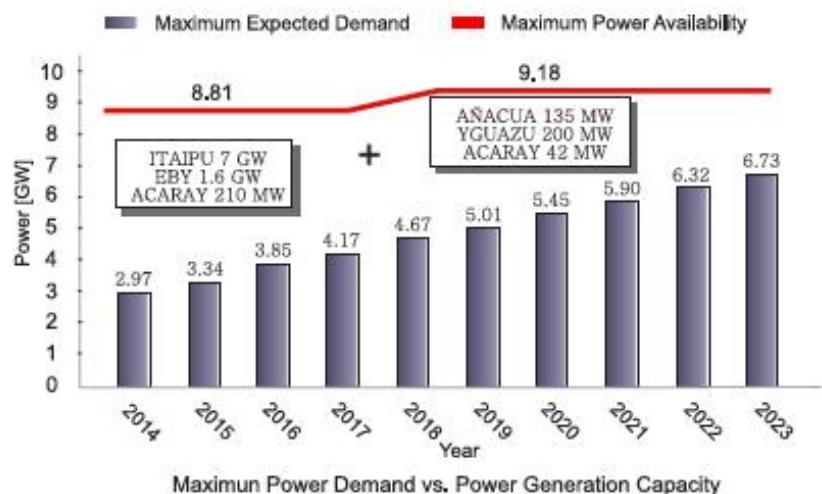

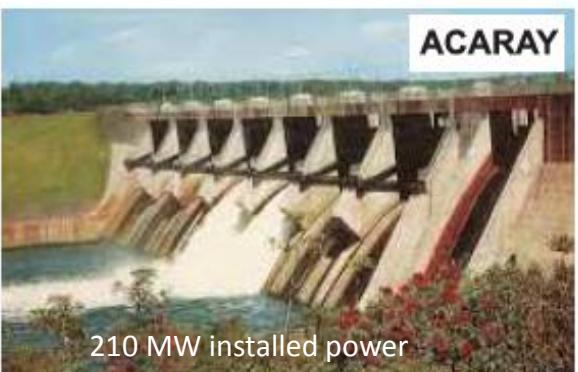

Energy matrix structure in Paraguay

Source: Vice Ministry of mines and energy
"National energy balance 2012"

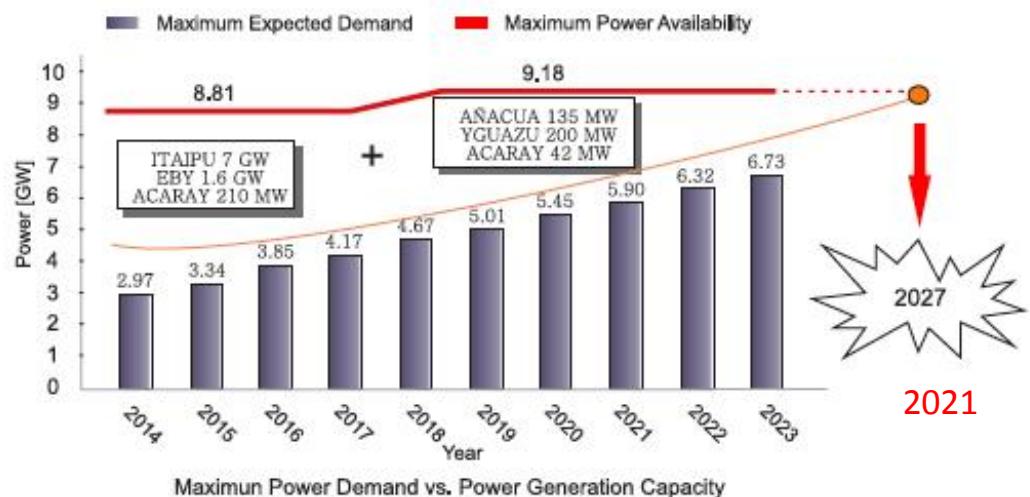

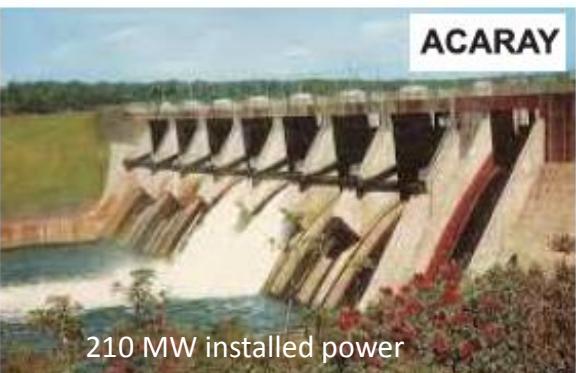

- Wind farms 
- Solar plants 
- Distributed generation 

MOTIVATION

- The main electric energy resource of Py is hydroelectric power plants.
- The average annual growth in electricity use is quantified around 8%.

MOTIVATION

- Probably in 2027 power demand could exceed the power generation capacity.
- Causing a serious problem of availability of electric energy.

LABORATORY OF POWER AND CONTROL SYSTEMS

- ✓ Funds
 - 1 PhD program (1st Ed. 2017): **200,000 US\$**
 - 1 MSc program (1st Ed. 2015-2017): **200,000 US\$**
 - 7 Research Projects: **1,750,000 US\$**
- ✓ > 10 partners in **7 countries**: UTalca, USevilla, ETS, ...

The
University
Of
Sheffield.

UNIVERSIDAD
DE MÁLAGA

IEEE-PES FIUNA

✓ LSPyC
www.dspyc.com.py

✓ Created in 2009.

✓ Staff

- 6 full time professors.
- 2 PhD students.
- 10 MSc students.
- 10 junior researchers.
- 1 administrative.

RESEARCH THEMES

- Advanced Control of power converters for renewable energy applications and machines and drives:
 - Predictive control, parameter estimation, modelling, fault tolerant control.
 - Sensorless control.
 - Nonlinear control.
- Electric Machines and Drives and Power Converters:
 - Multiphase induction machine
 - Matrix converters Multilevel inverters.
- Renewables:
 - Solar (PV) and Eolic.
 - Grid interconnection.
 - Active power filters.

Content Index

1. Motivation

- Concluded Projects

2. Control of Multiphase Drives

3. Matrix Converters

4. Active Power Filters

MULTIPHASE DRIVES

Fault-tolerance is one of the most interesting feature of wind energy conversion systems (WECS).

The ability to maintain operation even after an open-phase fault, allows for the system operators to maintain energy production, providing tangible economic benefits.

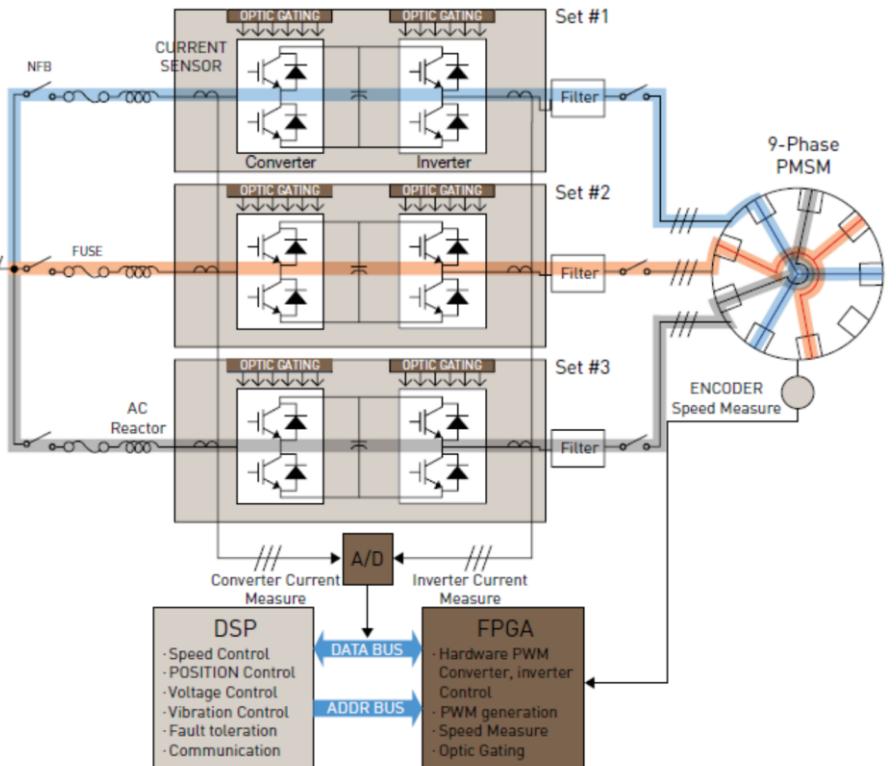

Recently, the use of **multiphase drives for WECS** have been proposed due to their inherent fault tolerance capability and the capacity to manage higher power ratings.

MULTIPHASE DRIVES: APPLICATIONS

Industry Applications

High Speed Elevator: 9-phase PMSM

Aerodynamic DESIGN

600_{RISE} m 9
3-phase motor x 3Set
MULTI MOTOR

World Best Speed 1,080 mpm

MULTIPHASE DRIVES: APPLICATIONS

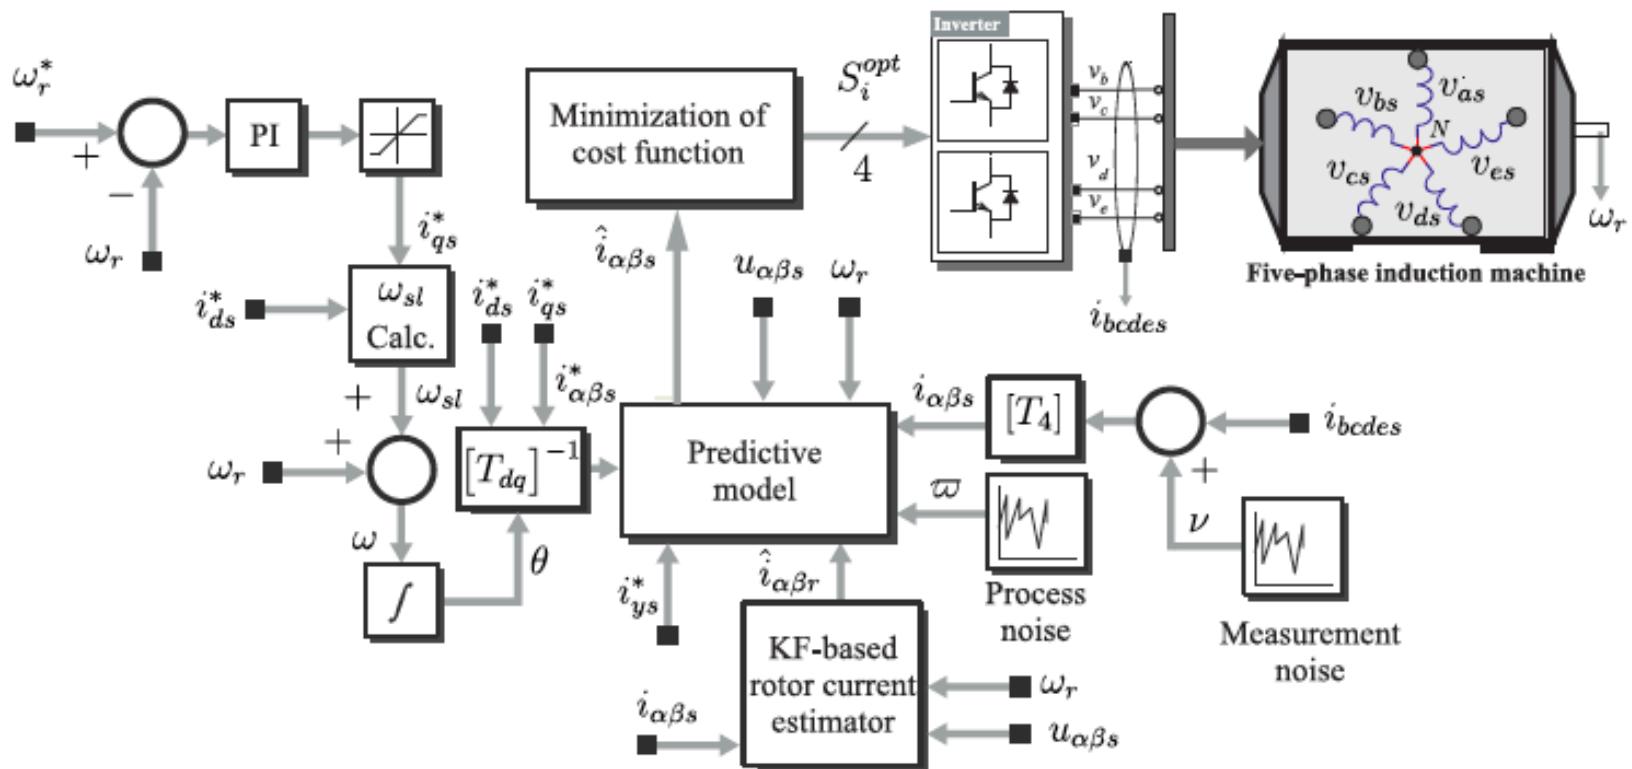

Industry Applications

Submarines:

- 12-Phase PM
- 13-Phase PM

FCS-MPC IN MULTIPHASE DRIVES
