

BARRIERS TO ACCESSING AND USING WEB
ARCHIVES IN LATIN AMERICA

WEB ARCHIVES IN LATIN AMERICA

ECONOMIC BARRIERS

- Cost of web archiving services
- Infrastructure for storing large amounts of data

- 
- Lack of digital librarians and training at universities and memory institutions
 - Lack of awareness of web archiving

**SOCIAL
BARRIERS**

The Spanish Wikipedia entry for web archiving was created in 2023. The same entry in English was created in 2006.

In all of the Scopus database, 10 papers (out of 900) on web archiving have Latin American authors.

SWITZERLAND	5
INDONESIA	4

TECHNICAL BARRIERS

The screenshot shows a web application interface with a pink header bar containing window control icons (close, copy, minimize). Below the header is a navigation menu with tabs: Settings, Metadata (selected), Groups, Sharing, Crawling History, Notes, and Seed Scope. The main content area is a metadata form with a 'Done' button in the top right corner. The form consists of several rows, each with a label on the left, an input field in the middle, and a 'Save' button on the right. The labels are: Title, Creator, Subject, Description, Publisher, Contributor, Date, Type, and Format. The 'Title' row also includes a 'Grab Title' button next to the 'Save' button. At the bottom of the form is a navigation bar with left and right arrow buttons and a pink highlight under the left arrow.

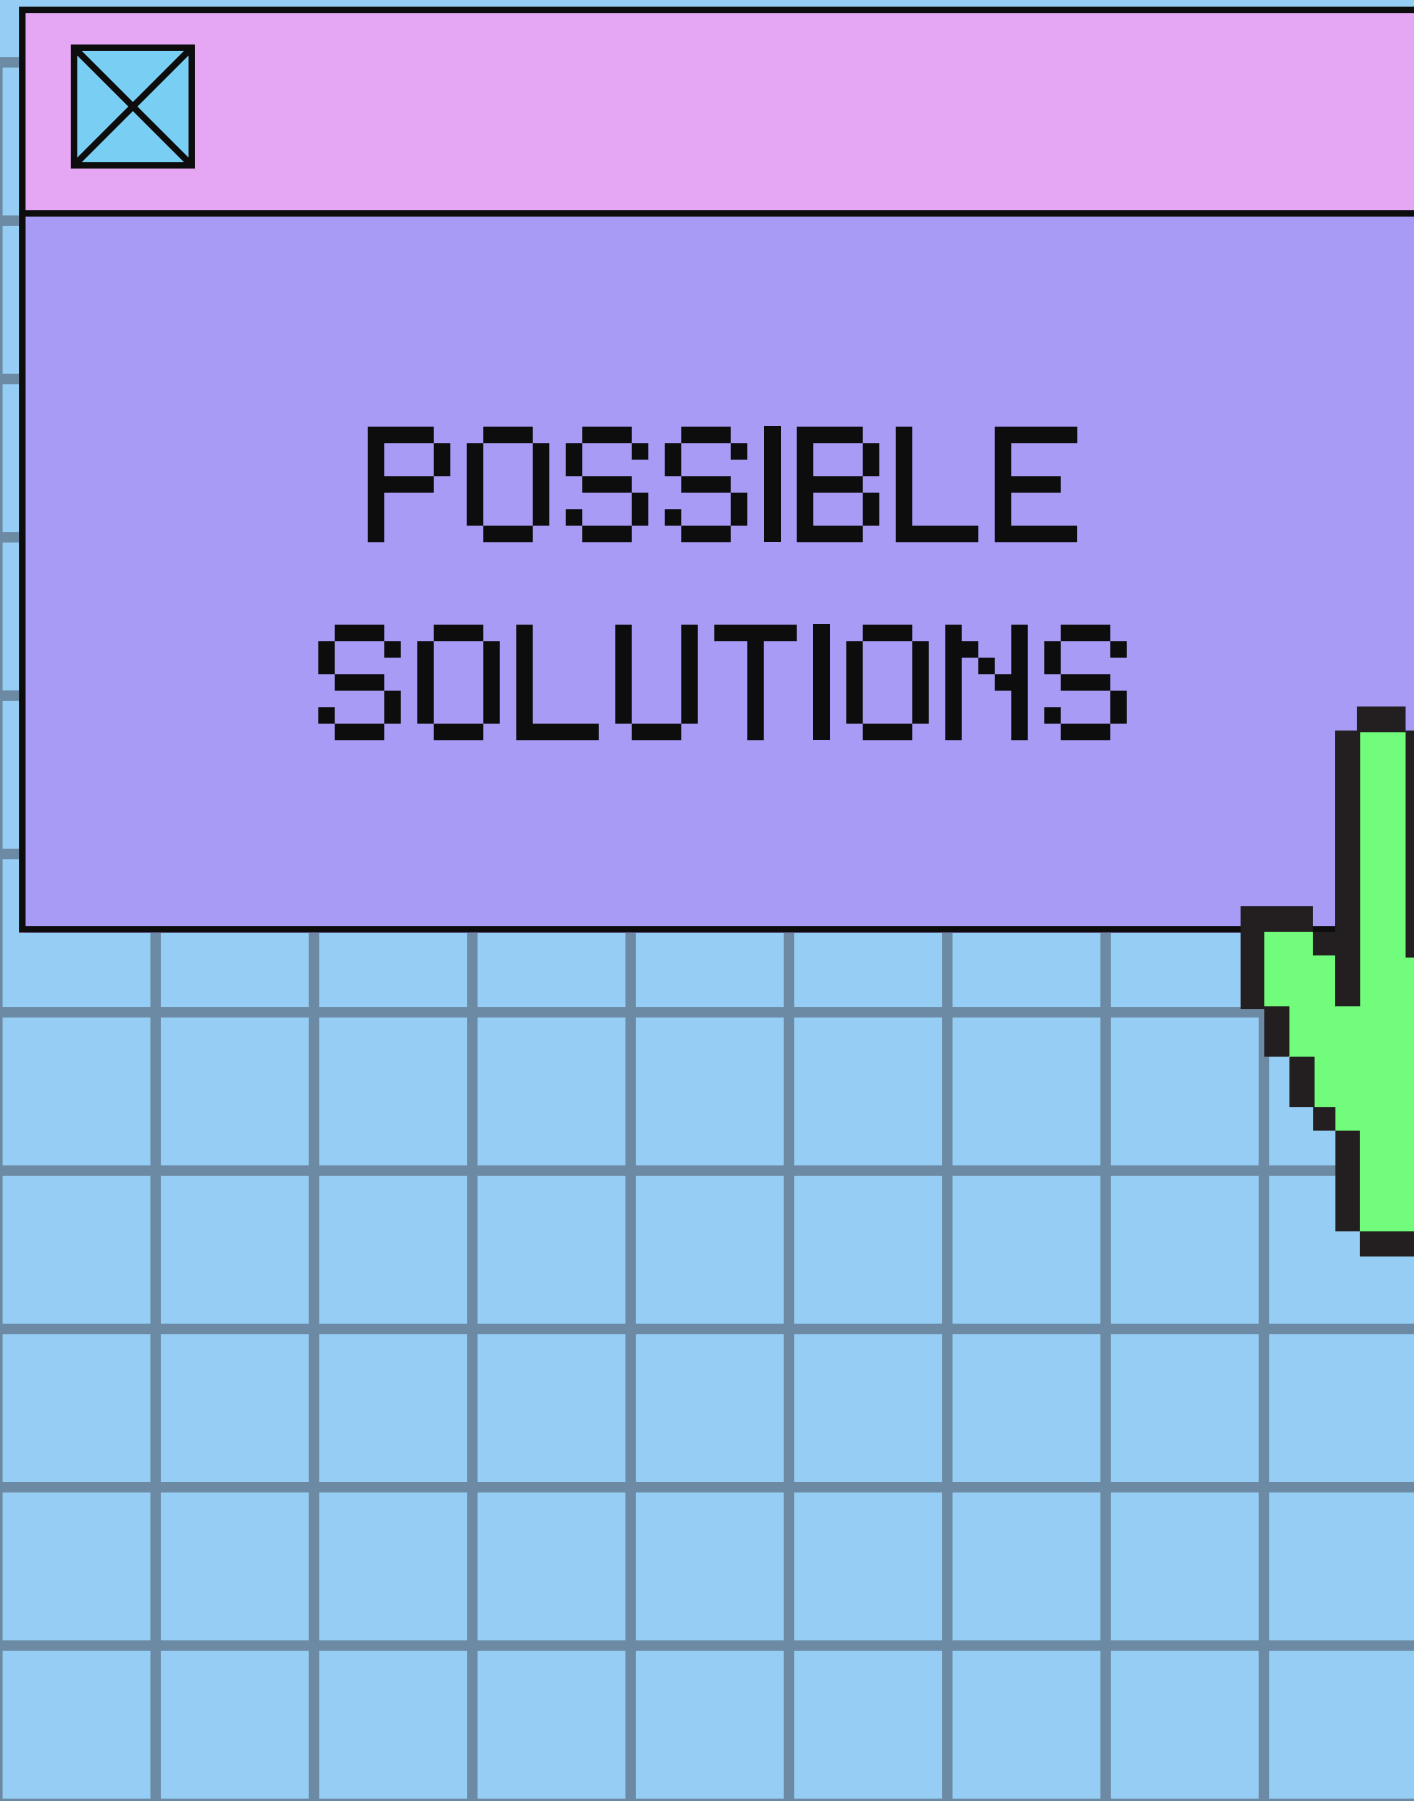

- Default metadata fields in web archives are in English
- Lack of support for the creation of multilingual collections

RISKS

- Dependence on the Internet Archive and foreign institutions to preserve Latin American web history
- Digital divide between the Global North and South in archiving and preservation
