Emergence of data communication networks and the evolution of global data communication via the Internet have provided a potential platform for researchers around the globe to disseminate their research findings to the global community. The special issue "Research on Computing and Communication Sciences" to be published by the International Journal of Computer and Communication Technology (IJCCT) aims at disseminating the research contributions of various authors from around the world among the potential researchers in the said field. A significant response was received for the said special issue, and after rigorous peer review, as many as 12 research articles were selected for publication. On behalf of the editorial board, we sincerely thank all the authors for their overwhelming response and wish them good luck in their future endeavors.

Subject Coverage

- Artificial Intelligence and Expert Systems
- Big Data Analytics

- Technologies Cellular and Mobile Communication
- Cloud Computing Technologies
- Computer and Information Security
- Computer Architecture
- Computer Graphics and Video Processing
- Database Management Systems
- Data Mining
- IoT and Blockchain
- Machine Learning
- Natural Language Processing
- Next Generation Communication Technologies
- Operating Systems & Networking
- Pervasive Computing and Cyber-Physical Systems
- Signal Processing
- Smart Internet of Everything
- Social Network Analysis
- Soft Computing

We also sincerely thank the publication team of IJCT for their constant effort to improvise this special issue. Mrs. Soma Mitra, Secretary, Interscience Research Network, deserves special thanks for her guidance and support in making this issue successful.
