

COMPTES RENDUS GEOSCIENCE

Volume 351 (2019) – No. 7 – October–November

Cover illustration: Vietnamese spinels from Luc Yen and An Phu mining districts. Spinels (Spl) in a calcitic (Cal) marble, Cong Troi. Left: octahedral spinel associated with calcite (Cal). Right: gem crystals of pink spinel in a calcitic (Cal) marble. Photographs: Vincent Pardieu. From Fallick, A.E., et al., 2019. Remarkably uniform oxygen isotope systematics for co-existing pairs of gem-spinel and calcite in marble, with special reference to Vietnamese deposits. *C. R. Geoscience* 351 (1), 27–36.

Review Paper

Internal Geophysics (Volcanology)

- Developments in the stratigraphy of the Deccan Volcanic Province, peninsular India
Omkar Verma and Ashu Khosla 461

Hydrology, Environment

- Comparison of hydrological models for use in climate change studies: A test on 241 catchments in West and Central Africa
Kiswendsida Samiratou Ouermi, Jean-Emmanuel Paturel, Julien Adounpke, Agnidé Emmanuel Lawin, Bi Tié Albert Goula and Ernest Amoussou 477

Stratigraphy, Sedimentology (Palaeoenvironment)

- Use of the magnetic, geochemical, and sedimentary records in establishing paleoclimate change in the environment of Sebkhâ: Case of the Sebkhâ Mhabeul in southeastern Tunisia
Mariem Ben Ameer, Sameh Masmoudi, Abdelhakim Abichou, Mounir Medhioub and Chokri Yaich... 487
- The Cretaceous marine onlap on Palaeozoic deposits (Smara–Lâayoune Basin, South Morocco). Comparison with neighbouring regions
Mohamed Abioui, Serge Ferry, Danièle Grosheny, Nourrissaid Içame, Emmanuel Robert and Mohammed Benssaou 498

Tectonics, Tectonophysics

- A new 3D laser-scanning and GPS combined measurement system
Liang Li, Xingyan Cao, Qiang He, Jie Sun, Bingsong Jia and Xiang Dong 508

History of Sciences

- Une lettre de Humboldt à Thénard (1805)
Jean-Paul Poirier 517
