Document status and date:

Published: 01/04/2023

Document Version:

Publisher's PDF, also known as Version of Record (includes final page, issue and volume numbers)

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

The authors regret that the Standard Deviation (*SD*) for those who failed their challenge ($n = 19,693$) was erroneously reported in the Abstract (page 1) and Table 2 of the Results section (page 6) as 3013 steps. The correct Standard Deviation that should have been reported there is 2993 steps. Furthermore, in the Results section under header 3.3 *Exploratory Analyses* (page 6) we erroneously state that exploratory analyses were performed on a subsample of 29,001 participants. The correct number that should have been reported there is 29,002

participants. The authors would like to apologise for any inconvenience caused.

Declaration of competing interest

Erika Litvin Bloom is employed as Lead Scientist by WayBetter Inc. and receives salary support and stock options from the company.
