- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

## Message from the chairs

We are glad to welcome you at the 30<sup>th</sup> edition of the Real-Time Networks and Systems Conference – RTNS 22. This year’s edition is a hybrid event, mixing physical and virtual attendance. It is meant to be the first step towards a return to normal after more than two years of hard restrictions that prevented the organization of physical gatherings around the world due to the COVID-19 pandemic.

RTNS’ spirit always was to provide a forum for friendly interaction between members of the real-time networks and systems community. We are delighted that, after two long years of waiting, RTNS will once again provide the opportunity to interact, exchange ideas and build new collaborations in a face-to-face setting.

The physical event of the conference will take place in Paris, France. However, for the first time in its history, RTNS will host a mix of on-site and online presentations. This creates many organizational challenges that the local organization team have been taking heads-on. We hope the arrangements made will allow everyone to interact, irrespective of whether they join physically or virtually.

A few years ago, RTNS went through a disruptive set of changes, moving the organization of the conference from winter to summer. It took a couple of years to adapt, but the number of submissions is back on an increasing trend for the last three years. RTNS had a total of 43 papers submitted this year, roughly a 23% increase on last year’s results. The origin of the submissions shows that RTNS is an internationally recognized conference. It received submissions from the USA, Germany, France , Canada, Belgium, Italy, China, Denmark, Sweden, Austria, UK, India, Singapore, Portugal, Finland, Japan and the Netherlands. Each submitted paper received a minimum of 3 reviews and, in 93% of the cases, received at least 4 reviews. The papers were then discussed online between the reviewers until a consensus was reached. Out of the 43 originally submitted papers, one was withdrawn, 21 were accepted and 21 rejected.

The accepted papers will be presented over two days in sessions covering a wide range of topics such as real-time networks, real-time systems scheduling and verification, mixed criticality systems, HW architectures, WCET analysis and optimization, and benchmarking.

Finally, we must acknowledge that RTNS 2022 would not be possible without the help and sustained effort of many people. We would like to thank the General co-chairs Liliana Cucu-Grosjean and Yasmina Abdeddaïm, and the Local organization Committee (Christine Anocq, Chiara Daini, Ismail Hawila, Mohamed Amine Khelassi, Marwan Wehaiba El Khazen, and Kevin Zagalo) for all their efforts to organize an hybrid conference, which involves all the combined difficulties of organizing a physical and virtual event. We must thank our Publicity Chair, Georg von der Brüggen, and our Web Chair, Kevin Zagalo, for their help to disseminate the information about the conference. We thank the program committee for the thorough reviews and productive discussions, and the steering committee for their invaluable advices and support. We finally thank Audrey Queudet for providing an inspiring keynote at the conference, and, of course, we thank all the authors for their submissions and their valuable contributions published in these proceedings.

Geoffrey Nelissen, Eindhoven University of Technology, the Netherlands  
Laurent Pautet, Télécom Paris, France

## Organizers

### General co-chairs

Yasmina Abdeddaïm, Université Gustave Eiffel, LIGM, CNRS, France  
Liliana Cucu-Grosjean, Inria Paris, France

### PC co-chairs

Geoffrey Nelissen, Eindhoven University of Technology, Netherlands  
Laurent Pautet, Télécom Paris, France

### Publicity chair

Georg von der Brüggen, TU Dortmund, Germany

### Local organization Committee

Christine Anocq, Inria Paris, France  
Chiara Daini, Inria Paris, France  
Ismail Hawila, Inria Paris, France  
Mohamed Amine Khelassi, Université Gustave Eiffel, LIGM, CNRS, Inria Paris, France  
Marwan Wehaiba El Khazen, Inria Paris, France  
Kevin Zagalo, Inria Paris, France

### Web chair

Kevin Zagalo, Inria Paris, France

### Multimedia chair

Mohamed Amine Khelassi, Université Gustave Eiffel, LIGM, CNRS, Inria Paris, France

### Steering Committee

Sanjoy Baruah, Washington University in St. Louis, USA  
Liliana Cucu-Grosjean, Inria Paris, France  
Robert I. Davis, University of York, United Kingdom  
Sébastien Faucou, Université de Nantes, France  
Joël Goossens, Université Libre de Bruxelles (ULB), Belgium  
Emmanuel Grolleau, LIAS, ISAE-ENSMA, France  
Isabelle Puaut, IRISA, Université de Rennes I, France  
Jean-Luc Scharbarg, Université de Toulouse, France

## Program Committee

Luca Abeni, Scuola Superiore Sant'Anna, Pisa, Italy  
Sebastian Altmeyer, University of Augsburg, Germany  
Jim Anderson, The University of North Carolina at Chapel Hill, USA  
Bjorn Andersson, Carnegie Mellon University, USA  
Mohammad Ashjaei, Mälardalen University, Sweden  
Muhammad Ali Awan, CISTER Research Centre, ISEP-IPP, Portugal  
Sanjoy Baruah, Washington University in St. Louis, USA  
Iain Bate, University of York, UK  
Enrico Bini, University of Turin, Italy  
Alessandro Biondi, Scuola Superiore Sant'Anna, Pisa, Italy  
Gedare Bloom, University of Colorado, USA  
Marc Boyer, ONERA, France  
Georg von der Brüggen, TU Dortmund, Germany  
Nicola Capodiecì, University of Modena and Reggio Emilia, Italy  
Hugues Cassé, IRIT / Université de Toulouse, France  
Tam Chantem, Virginia Tech, USA  
Jian-Jia Chen, TU Dortmund, Germany  
Maryline Chetto, Université de Nantes, France  
Dakshina Dasari, Robert Bosch GmbH, Germany  
Jérôme Ermont, IRIT / INP-ENSEEIH / Université de Toulouse, France  
Nathan Fisher, Wayne State University, USA  
Julien Forget, Université de Lille, France  
Emmanuel Grolleau, LIAS, ISAE-ENSMA, Université de Poitiers, France  
Nan Guan, City University of Hong Kong, Hong Kong  
Zhishan Guo, University of Central Florida, USA  
Mathieu Jan, CEA LIST, France  
Angeliki Kritikakou, Université de Rennes / IRISA, France  
Giuseppe Lipari, Université de Lille, France  
Ahlem Mifdaoui, Université de Toulouse / ISAE, France  
Nicolas Navet, Université du Luxembourg, Luxembourg  
Luis Miguel Pinho, ISEP, Portugal  
Christine Rochange, IRIT / Université de Toulouse, France  
Benjamin Rouxel, University of Amsterdam, Netherlands  
Jean-Luc Scharbarg, Université de Toulouse – IRIT – INP/ENSEEIH, France  
Frank Singhoff, Lab-STICC / Université de Bretagne Occidentale, France  
Ye-Qiong Song, LORIA – Université de Lorraine, France

## Secondary Reviewers

Shareef Ahmed, Abdullah Al Arafat, Joshua Bakita, Zhenyu Bai, Vijay Banerjee, Konstantinos Bletsas, Paolo Burgio, Thomas Carle, Tiago Carvalho, Daniel Casini, Roberto Cavicchioli, Kuan-Hsun Chen, Théo Docquier, Uchenna Ezeobi, Ashkan Farhangi, Nitish Gupta, Qingqiang He, Doug Healy, Md Sanzid Bin Hossain, Oana Hotescu, Sena Hounsinou, Tingting Hu, Ishfaq Hussain, Omolade Ikumapayi, Ching-Chi Lin, Oumaima Matoussi, Patrick Meumeu-Yomsi, Filippo Muzzini, Sims Osborne, Syed Aftab Rashid, Jan Reineke, Maxime Samson, Ikram Senoussaoui, Pascal Sotin, Pedro Souto, Stephen Tang, Hossein Tabatabaee, Niklas Ueter, Tilmann Unte, Sergey Voronov

# Table of Contents

Message from the Chairs..... iii

Program Committee ..... v

## • *Session 1: Scheduling and Timing Analysis*

Functional Uncertainty in Real-Time Safety-Critical Systems

*Sanjoy Baruah, Alan Burns and David Griffin* ..... 1

Analysis of Federated Scheduling for Integer-Valued Workloads

*Marion Sudvarg and Chris Gill* ..... 12

Data-Age Analysis for Multi-Rate Task Chains under Timing Uncertainty

*Pourya Gohari, Mitra Nasri and Jeroen Voeten* ..... 24

Simulation Intervals for Uniprocessor Real-Time Schedulers with Preemption Delay

*Joël Goossens and Damien Masson* ..... 36

## • *Session 2: Networks I*

Real-Time Traffic Guarantees in Heterogeneous Time-Sensitive Networks

*Mohammadreza Barzegaran, Niklas Reusch, Luxi Zhao, Silviu S. Craciunas and Paul Pop* ..... 46

Egress-TT Configurations for TSN Networks

*Pierre-Julien Chaine, Marc Boyer, Claire Pagetti and Franck Wartel* ..... 58

HERMES: Heuristic Multi-Queue Scheduler for TSN Time-Triggered Traffic with Zero Reception

Jitter Capabilities

*Daniel Bujosa, Mohammad Ashjaei, Alessandro V. Papadopoulos, Thomas Nolte and Julián Proenza* ..... 70

## • *Session 3: Mixed Criticality*

Compensating Adaptive Mixed Criticality Scheduling

*Robert I. Davis, Alan Burns and Iain Bate* ..... 81

Scheduling Constrained-Deadline Tasks in Precise Mixed-Criticality Systems on a Varying-Speed Processor

*Tianning She, Zhishan Guo and Kecheng Yang* ..... 94

Mixed Criticality on Multi-Cores Accounting for Resource Stress and Resource Sensitivity	
<i>Robert I. Davis and Iain Bate</i> .....	103
Efficient Schedulability Analysis of Semi-Clairvoyant Sporadic Task Systems with Graceful Degradation	
<i>Akanksha Chaudhari and Sanjoy Baruah</i> .....	116
• <b><i>Session 4: Hardware Platforms</i></b>	
A Closer Look at Intel Resource Director Technology (RDT)	
<i>Parul Sohal, Michael Bechtel, Renato Mancuso, Heechul Yun and Orran Krieger</i> .....	127
A Coq Framework for More Trustworthy DRAM Controllers	
<i>Felipe Lisboa Malaquias, Mihail Asavoaie and Florian Brandner</i> .....	140
• <b><i>Session 5: WCET and Energy Optimization</i></b>	
Winston: Revisiting Iterative Compilation for WCET Minimization	
<i>Valentin Pasquale and Isabelle Puaut</i> .....	151
Approximating WCET and Energy Consumption for Fast Multi-Objective Memory Allocation	
<i>Shashank Jadhav and Heiko Falk</i> .....	162
• <b><i>Session 6: Simulation and Traces Analysis</i></b>	
Runtime Verification of AUTOSAR Timing Extensions	
<i>Max Jonas Friese, Hannes Kallwies, Martin Leucker, Martin Sachenbacher, Hendrik Streichhahn and Daniel Thoma</i> .....	173
RT-Bench: An Extensible Benchmark Framework for the Analysis and Management of Real-Time Applications	
<i>Mattia Nicoletta, Shahin Roozkhosh, Denis Hoornaert, Andrea Bastoni and Renato Mancuso</i> .....	184
Approximating WCRT through the Aggregation of Short Simulations with Different Initial Conditions: Application to TSN	
<i>Patrick Keller and Nicolas Navet</i> .....	196
• <b><i>Session 7: Networks II</i></b>	
AVB-Aware Routing and Scheduling for Critical Traffic in Time-Sensitive Networks with Preemption	
<i>Aldin Berisa, Luxi Zhao, Silviu S. Craciunas, Mohammad Ashjaei, Saad Mubeen, Masoud Daneshtalab and Mikael Sjödin</i> .....	207
A Configuration Framework for Multi-Level Preemption Schemes in Time Sensitive Networking	
<i>Mubarak Adetunji Ojewale, Patrick Meumeu Yomsi and Luis Almeida</i> .....	219
Searching for Upper Delay Bounds in FIFO Multiplexing Feedforward Networks	
<i>Alexander Scheffler, Jens Schmitt and Steffen Bondorf</i> .....	230
