# FOREWORD

**Arkas Viddy, S.E, M.M, Ph.D**  
**Director of Politeknik Negeri Nunukan, Indonesia**

Assalamu'alaikum warahmatullahi wabarakatuh  
Bismillahirrahmanirrahim

It is an honor for me to be here today at the Technology and Innovation International Conference (TECHON) 2023, centered around the theme of "Empowering TVET Towards Accelerating Digital Transformation." I would like to extend my warmest gratitude for welcoming Politeknik Negeri Nunukan to this prestigious event. It gives us great pleasure to join you at this conference.

We are all currently dealing with the challenges of the digital transition; thus, this event holds crucial and significant importance. The world is undergoing a rapid digital revolution, driven by the increasing adoption of emerging technologies such as artificial intelligence, big data, and the Internet of Things.

This is where TVET comes in. TVET, or Technical and Vocational Education and Training, is an education system that equips students with the skills and knowledge needed to work in specific trades or occupations. TVET is essential for building a skilled workforce that can support the digital economy. It can also help bridge the skills gap and improve the employability of our graduates.

At Politeknik Negeri Nunukan, we are committed to providing our students with the best possible TVET education. We have a strong focus on innovation and technology and continuously work to update our curriculum to meet the demands of the digital economy.

We also prioritise collaboration with industry partners to ensure that our graduates are equipped with the skills and knowledge required to succeed in the workplace. I firmly believe that TVET plays a vital role in the digital economy, as it is key to building a skilled workforce capable of supporting economic growth and development.

I am confident that this conference will provide a valuable platform for sharing ideas and experiences on how to empower TVET towards accelerating digital transformation. I would like to express my gratitude to the organisers of TECHON 2023 for their hard work and dedication in making this event possible. I would also like to thank all of you for your participation.

I wish you all a successful conference for TECHON 2023.

Thank you and Wabillahitaufik Walhidayah Wassalamualaikum Warahmarullahi Wabarakatuh.

# FOREWORD

**Dr. Riam A/P Chau Mai**  
**Director of Research, Innovation & Technology**  
**Transfer Centre,**  
**Department of Polytechnic and Community College**  
**Education (DPCCE), Malaysia**

Greetings from the Department of Polytechnic and Community College Education (DPCCE).

My sincere gratitude to all participants and committee members of the 7th Technology and Innovation International Conference, TECHON 2023. On behalf of the DPCCE. It is an honor to be part of this prestigious international technology and innovation conference with the trending theme, "Empowering TVET Towards Accelerating Digital Transformation". We hope that participants will find it useful, exciting and inspiring, as it is our aim to provide a platform for discussing issues, challenges, opportunities and findings of digitalization in TVET education. The theme specifically highlighted the significance of Technical and Vocational Education and Training in digital age. Therefore, experts are expected to share their knowledge and team up to create innovative solutions that benefit humanity globally. Likewise, this conference also serves as a catalyst for the acceleration of digital transformation and inspires individuals and organizations to strive for excellence in the field of technology and innovation.

Undoubtedly, technological advancements have significantly changed our society in recent years, and it is essential to keep up with the pace of change. TECHON provides an excellent opportunity to exchange knowledge, ideas and experiences, especially in the context of accelerating digital transformation and finding solutions to the challenges created by the pandemic. Fostering a culture of innovation in our society is crucial and TECHON is a platform to inspire and encourage this. By working together and sharing ideas, we can contribute to the government's agenda to move towards a developed nation in the field of TVET.

Many thanks and appreciation to the organizing committee, Politeknik Mukah for their invaluable contributions in bringing together 150 participants from around the world. To keynote speakers, reviewers, session panels, authors, and presenters, your contributions are significant, and we acknowledge and express our gratitude for all your efforts. Let us continue to work towards a better future and strive for progress in all areas of our lives.

Thank you.

# FOREWORD

**Hisamudin bin Mohd Tamim  
Director of Politeknik Mukah, Sarawak, Malaysia**

Assalamu'alaikum warahmatullahi wabarakatuh

Alhamdulillah, I am honored to deliver the foreword speech for the Technology and Innovation International Conference (TECHON) 2023 with the theme "Empowering TVET Towards Accelerating Digital Transformation." I would like to take this opportunity to express our deepest appreciation and gratitude to all stakeholders and sponsors for the trust given to the organisers in organising TECHON 2023. Congratulations to the Research and Innovation Centre, JPPKK, in collaboration with Politeknik Negeri Nunukan, Indonesia, Politeknik Negeri Sambas, Politeknik Negeri Jakarta, Politeknik Negeri Pontianak, Politeknik Negeri Sriwijaya, EMAA Business School Morocco, and IANA Miricle Training & Consultation Centre as the co-organisers for their commitment and efforts in ensuring the successful organisation of TECHON 2023. This conference is timely and relevant as it comes at a time when the world is undergoing rapid digital transformation.

The digital transformation is having a profound impact on all aspects of our lives, from the way we work to the way we learn. In order to remain relevant and competitive in this new era, it is essential that we equip our students with the skills and knowledge they need to thrive in the digital economy. The conference highlights the empowerment of TVET with the priority of implementing high-impact programs that incorporate digitisation in developing human capital and a skilled workforce to meet the current industry needs. The combination of engineering, information technology, and entrepreneurship contributes to the development of Industrial Revolution 4.0.

TVET plays a vital role in this process. TVET institutions can provide students with the technical and vocational skills they need to succeed in the digital workplace. They can also help students develop soft skills, such as critical thinking and problem-solving, that are essential for success in today's economy.

I would like to extend a special thank you to our sponsors, The Ministry of Education, Innovation & Talent Development Sarawak, and Business Events Sarawak. Their generous support and sponsorship have been instrumental in making TECHON 2023 a reality. The Ministry of Education, Innovation & Talent Development Sarawak's commitment to education and innovation, and Business Events Sarawak's dedication to fostering business events and conferences in the region have significantly contributed to the success of this conference. Without their support, we would not have been able to bring together esteemed speakers, participants, and organisations from around the world to share their knowledge and expertise.

We recognize the importance of sponsors in the success of conferences like TECHON. Their contributions go beyond financial support. Sponsors play a crucial role in providing resources, expertise, and networking opportunities, all of which enhance the quality and impact of the conference. We are truly grateful for the Ministry of Education, Innovation & Talent Development Sarawak and Business Events Sarawak for their sponsorship, as it has enabled us to create a platform for meaningful discussions, collaboration, and the exchange of ideas.

Once again, thank you to all the sponsors, stakeholders, co-organisers, and participants for their invaluable contributions. Your support and dedication have made TECHON 2023 possible, and we look forward to an engaging and fruitful conference that will shape the future of TVET and digital transformation.

Thank you and Wabillahitaufik Walhidayah Wassalamualaikum Warahmarullahi Wabarakatuh.

## Enhancing Classroom Experience Through The Use of Design Thinking Approach

**Dr. Samira Raki**

**Assistant Professor, EMAA Business School, Morocco**

### Abstract

Design thinking is a human-centered approach to innovation that uses the designer's toolkit to merge people's needs, technological possibilities, and corporate success requirements. It has been employed in numerous domains and industries. In education, design thinking plays a growing role in solving wicked education-related problems to meet the global quest of teaching 21st century skills. Therefore, this talk will address the importance and use of design thinking in different educational settings. This talk will also shed lights on different tools and methods utilized in design thinking.

TECHNOLOGY &  
INNOVATION

## Transforming PolyCC Students into Future Ready Professionals Through Digitalization

**Dr. Riam A/P Chau Mai**

**Director of Research, Innovation & Technology Transfer Centre  
Department of Polytechnic and Community College Education (DPCCE), Malaysia**

### Abstract

Malaysia is now in the process of preparing its human resources for the Fourth Industrial Revolution in order to reduce the current consumption gap in a number of key industries particularly the aftermath. The government has acknowledged the importance of the TVET sector in developing skilled workers and generating revenue to support Malaysia in reaching its goal of becoming a high-income nation. Because of its potential to raise the employment rate, TVET will be essential in luring highly skilled workers. TVET not only ensures employment, but also has the potential to make an employee into a business owner.

The new technologies of the Fourth Industrial Revolution (4IR), such as artificial intelligence, the Internet of Things, digitalisation, and automation, have forced Malaysia to change its Higher Education system to prepare students for jobs that require new skills. This change could cause education and business to rethink how to improve, reskill, and scale up talents in the workplace to work together with humanistic values and smart machines.

In a bid to produce future-ready digital talent, PolyCC's recently launched its TVET digital framework and way forward in meeting up the talent and initiative in TVET transformation programmes. The PolyCC TVET digital framework will be focusing on two (2) core strategies, seven (7) strategies, twenty-one (21) initiatives and five (5) basic principles as guidance in implementing the TVET digital transformation systematically by the year 2025 utilising the RMK 12 budget. The framework will be a backbone for other relevant aspects of digitalisation in PolyCC strategic planning as well as an alternative way in meeting TVET education challenges and eventually successfully generating professionals who are prepared for the future.

## Economic Development, Strategies and Performance in Border Zone of Indonesia Malaysia (Case of Tarakan District North Kalimantan)

**Arkas Viddy (Associate Professor)  
Director of Politeknik Negeri Nunukan, Indonesia**

### Abstract

The purpose of this study is to identify the economic development and strategies in Border Zone of Indonesia Malaysia called Tarakan District of North Kalimantan. The local government located in Border Zone has huge barriers or constraint because several reasons such as the distance from the central government, the economic influence from the neighborhood country, smuggling risk etc. For these reasons, it needs to be explored not only the economic development and strategies but also the achievement of economic regional development or performance. The unit analysis are all the local government regional organisation called OPD which consist of 30 OPD and it is supported by secondary data in the five latest data collected from those OPD, while Porter Chain Value as an instrument analysis. It is found that the economic development should base on Medium-Long Term Development Planning called RJPMD and it is mentioned several flagship program and then followed up by regional work planning called RKPD each year, while regional budget should base on RKPD. It is also found the Tarakan District development strategy is Smart City which consist of smart government, smart mobility, smart economy, smart environment, smart living and smart people. It is found the performance of Tarakan District economic development is greater not only North Kalimantan Province government but also Central Government Performance.
