Preface

BORNEO BUSINESS RESEARCH CONFERENCE

The Borneo Business Research Conference (BBRC) is an annual event organized by the Faculty of Economics and Business (FEB), Universiti Malaysia Sarawak (UNIMAS). The Borneo Business Research Conference (BBRC 2023) will be held physically at RAIA Hotel and Convention Centre in Kuching on 23rd August 2023, in conjunction with the UNIMAS Innovation and Technology Exposition 2023 (InTEX23). The theme of the conference this year is "Circular Economy and Business Resilience," which is timely and parallel with the commitment of the Malaysian government to ensuring sustainable economic growth. This conference serves as a platform not only for postgraduate students but also for research academics and practitioners to explore and share new ways of thinking in research to address economic and business challenges amidst the global economic and business uncertainties today. This is aligned with the objective of the conference, which is to disseminate research findings and establish a network for collaboration among researchers and practitioners.

All entries will be reviewed by our qualified line-up of reviewers with expertise in a wide range of economic and business fields. To recognize the efforts and dedication of our researchers, BBRC comes up with the best paper awards and special awards from our supporting partner, Emerald Publishing, for outstanding papers. Selected good-quality papers will be considered for publication in our reputable, Scopus-indexed journal, The International Journal of Business and Society (IJBS), and our MyCite and ACI-indexed journal, The International Journal of Service Management and Sustainability (IJSMSust), with the normal review process.

Foreword from Vice Chancellor (UNIMAS)

Assalamualaikum Warahmatullahi Wabarakatuh and
Greetings from Universiti Malaysia Sarawak

Alhamdulillah, with the blessing of Allah S.W.T. and a great pleasure indeed, I welcome all respected guests and participants to the Borneo Business Research Conference (BBRC 2023), which is being held in conjunction with the UNIMAS Innovation and Technology Exposition (InTEX 2023). I sincerely thank the Faculty of Economics and Business, UNIMAS for organizing this conference.

This year's conference theme is "Circular Economy and Business Resilience", which encapsulates a forward-thinking perspective on how businesses can thrive in today's complex economic environment and contribute to a sustainable and resilient future. Businesses that embrace circularity concepts can reap multiple benefits, including increased resource security and the creation of new economic opportunities, allowing them to achieve Sustainable Growth.

In today's world, where the impacts of climate change, resource scarcity, and societal expectations profoundly shape business landscapes, our scholarly deliberations on circular economy and business resilience are both timely and critical. The research, insights, and conversations that will emerge from this conference can contribute significantly to shaping strategies, policies, and practices that lead us toward a more sustainable and resilient future.

I invite all participants to engage in robust discussions, share experiences, and explore novel ideas to discover innovative solutions that propel us toward a more resilient global economy. Let us seize this opportunity to challenge conventional wisdom, envision new possibilities, and contribute to the ongoing transformation of the business terrain.

The academicians, postgraduates and undergraduates are strongly encouraged to hold mutually enriching discussions that spark contemplation, stimulate curiosity, forge important connections, and provide a genuinely inspirational experience at BBRC 2023 and UNIMAS InTEX 2023.

Once again, my heartiest congratulations to ALL, especially the conference organizers, for putting on a successful event.

Wabillahi taufik walhidayah wassalamualaikum warahmatullahi wabarakatuh. Thank you.

PROFESSOR DATUK DR. MOHAMAD KADIM BIN SUAIDI
Vice Chancellor
Universiti Malaysia Sarawak (UNIMAS)

Foreword from Dean of Faculty of Economics and Business

Assalamualaikum w.b.t and Salam Sejahtera, Peace be Upon You.

It is with great pleasure that I extend a warm welcome to all participants of the Borneo Business Research Conference (BBRC 2023), in conjunction with the UNIMAS Innovation and Technology Exposition (INTEX 2023). As the Dean of the Faculty of Economics and Business at Universiti Malaysia Sarawak (UNIMAS), I take great pride in introducing this esteemed conference that provides a valuable platform for scholarly deliberations and groundbreaking concepts in the field of business research.

The Borneo Business Research Conference 2023 aspires to bring together researchers, academicians, practitioners, and students from various usiness and industry backgrounds. This year, we are fortunate to host the conference alongside the UNIMAS INTEX 2023, which further amplifies the prospects for research collaboration and the sharing of knowledge among participants.

The conference theme, "Circular Economy and Business Resilience" reflects the dynamic nature of the contemporary business environment in the 21st century. With rapid advancements in technology and the increasing digitalization of economies, it is imperative for us to examine and grasp the implications of these transformations on businesses and economics not only in Borneo but also on a broader scale. This conference serves as an avenue for participants to deeply explore these emerging trends in business and economics, seeking out innovative strategies to navigate challenges and seize the opportunities they bring forth.

Throughout this conference, participants will actively participate in lively discussions and share the latest research discoveries across diverse business domains. These domains encompass economics, accounting, finance, entrepreneurship, management, marketing, and sustainable development. With a diverse range of sessions, including keynote speeches, panel discussions and paper presentations workshops, our primary goal is to establish a comprehensive learning atmosphere that nurtures intellectual development and inspires the exploration of innovative concepts.

As we gather in the beautiful city of Unity, Kuching, Sarawak, we are surrounded by a rich cultural heritage and breathtaking natural beauty. This conference offers a special chance to immerse ourselves in the warm hospitality of Sarawak and foster new bonds and partnerships with fellow researchers and practitioners.

My heartfelt appreciation goes out to the organizing committee, dedicated researchers, and enthusiastic participants whose efforts have brought this conference to life. Through their hard work and dedication, they have ensured that this event becomes a truly enriching experience for everyone involved.

PROFESSOR DR. ROSSAZANA BT AB RAHIM
Dean of Faculty of Economics and Business (FEB)
Universiti Malaysia Sarawak (UNIMAS)

Foreword from Chairman of the BBRC 2023

Assalamualaikum wrt wbt and Salam Sejahtera.

It is with great pleasure and enthusiasm that I welcome all delegates to this remarkable Borneo Business Research Conference (BBRC 2023) with the theme "Circular Economy and Business Resilience". This year, the Borneo Business Research Conference 2023 is held in conjunction with the UNIMAS Innovation and Technology Exposition (InTEX 2023).

As the Conference Chair, I am honoured to be part of this significant event that brings together researchers and practitioners from academia as well as industry to discuss and share research findings along the conference theme, including but not limited to: circular economy, accounting, banking and finance, microeconomics, macroeconomics, digital economy, financial technology, entrepreneurship, corporate governance, international business, marketing, management, quality and productivity, and hospitality and tourism.

On behalf of the 2023 organising committees, I would like to express my sincerest gratitude to Professor Dr. Lo May Chuin for providing us with the platform to host BBRC 2023 in conjunction with InTEX23. I would like to extend my utmost appreciation to Dr. James Foo, Chief Operating Officer Petroleum Sarawak Berhad (PETROS), as the Keynote Speaker for InTEX23 and BBRC 2023, Mr. William Loh from Emerald Publishing as our supporting partner, and conference participants who have contributed their time, expertise, and unwavering commitment to making this conference a successful event.

My special thanks go to the Dean of the Faculty of Economics and Business, Professor Dr. Rossazana binti Ab Rahim, and the Deputy Dean of Research and Commercialization, Associate Professor Dr. Dayang Affizah binti Awang Marikan, for their guidance and support in ensuring the successful delivery of the BBRC 2023.

I could not thank enough our co-organiser, Universiti Teknologi Mara (UiTM) Cawangan Sarawak, the BBRC 2023 organising committees, and The Postgraduate Association of Faculty of Economics and Business (PAFEB), as the backbone of the conference, for their tireless efforts and dedication in making the BBRC 2023 a reality. I would also like to thank all parties that are not mentioned here who have directly or indirectly contributed to the preparation of the BBRC 2023.

I hope BBRC 2023 will provide positive impacts to all the delegates through innovative ideas, impactful initiatives, and lasting connections that will ripple beyond these walls and catalyse change in research directions among researchers and practitioners.

DR. MUHAMMAD ASRAF ABDULLAH
Chairman of the BBRC 2023

Foreword from Tan Sri Datuk Amar (DR.) Hamid Bin Bugo

Assalamualaikum and greetings to all,

I am pleased to extend my warm regards to all those participating in the Borneo Business Research Conference (BBRC) 2023, a platform that brings together active minds to explore the critical alignment between the “Circular Economy and Business Resilience”. As the Chairman of Petroleum Sarawak Berhad (PETROS), I am both honoured and privileged to be given the opportunity to share my thoughts on a theme that resonates deeply with the commitment of our Federal and Sarawak governments to sustainable economic growth and development.

In an era where economic progress and environmental responsibility are no longer viewed as disparate goals, the concept of a circular economy emerges as a foundation for innovation and transformative change. The essence of this paradigm shift lies in harnessing the impact of circularity, where resources are sustained, waste is minimised, and economic systems thrive in harmony with nature. This concept finds itself in parallel with our national vision to build a resilient and sustainable future for our people and our planet.

The Malaysian government's policy of fostering a circular economy aligns with our values at PETROS. It is imperative to integrate sustainability into our strategies as we navigate the evolving landscape of the energy sector as well as the necessary energy transition to combat climate change. It is heartening to witness the synergy between our mission to responsibly manage Sarawak's oil and gas resources, reduce carbon emissions and the broader efforts to champion circular practices across industries. As for business resilience, we must comprehend that, "Our current economic system has two fundamental weaknesses: it is based on unlimited growth on a finite planet, and it benefits a small number of people, not everyone." (Net Positive by Paul Polman and Andrew Winston).

Businesses that only take care of their shareholders and not the other stakeholders cannot be resilient or sustained, as can be seen by examples of companies like Unilever. In reality, however, a circular economy and business resilience can only be achieved if we can translate policies into habits. A simple example, such as the habit of wasting food, water, energy, and other resources, if corrected, can immediately have a significant impact. Similarly, the habit of planting a tree a month by each person will go a long way to saving the world through its impact on climate change. And talking about habits, it is all about education—one that starts at kindergarten, not at university. The intellectual exchange and shared experiences fostered here are pivotal to driving the transformation we all aspire to achieve for Sarawak and beyond. I am confident that this conference will help to unfold a roadmap towards a more resilient and sustainable business landscape.

Let me end with a question: What can you, as a person, do in your everyday life to help achieve sustainability all around?

I extend my heartfelt gratitude to the Faculty of Economics and Business, University Malaysia Sarawak (UNIMAS), that organized this year's Borneo Business Research Conference 2023 for championing this important dialogue and providing a platform for us to learn, share, grow, and collectively contribute to a brighter, more sustainable future for generations to come. My thanks also go to those who have worked hard behind the scenes to prepare this conference.

I wish you all a successful and impactful conference.

ABSTRACT

Community-Driven University For A Sustainable World

Impact of Malaysian export to RCEP countries: A Quantile Regression Study.

Md. Mahbubur Rahman* and Dayang Affizzah Awang Merikan*

**Faculty of Economic and Business, Universiti Malaysia Sarawak, 94300 Kota Samarahan, Sarawak Malaysia*

ABSTRACT

International trade plays a vital role in enhancing the economic growth and development of a country which acts as a mechanism to bound different countries together in a trade bloc. It is thus important to understand the performance of the countries while acknowledging the determinants for the trade flow of the pact. This paper employs a quantile regression approach to test the effects of export led growth on economic growth at the different conditional economic growth distribution from 2000 to 2020 in Malaysia. The key finding of this study is that Openness of Malaysia is found to be insignificant throughout the quantiles which signifies that through this sample period, Trade Share of Malaysia has no effect on the country's distribution of export towards the RCEP countries. On the other hand, GDP of Malaysia, GDP of other RCEP countries and Trade Share of RCEP members tend to affect export of Malaysia which is understandable. Empirically, an additional 1 percent of country j 's (RCEP) GDP will significantly increase export distribution of Malaysia in the range of 1.12 percent to 0.60 percent. However, the significance declines throughout the quantiles from 0.59 percent at quantile 0.30 to 0.60 percent at .90 quantile and at .70 (higher quantiles) it increases from 0.78. The significance of country i 's GDP (Malaysia) grow stronger throughout the quantiles. The effect of GDP of country i to Malaysia's export distribution are between the ranges of 1.84 percent to 1.22 percent. Despite being positively related to the export distribution, the significance is getting greater from median to higher quantiles. This means that an increase in GDP of country i (Malaysia) for 1 percent will cause an increase in export of about 1.22 percent at quantile 0.90. As for Trade Share of country j (RCEP Countries), it aligns with the traditional trade theory, which is statistically significant with positive coefficient. An increase of 1 percent openness of country j 's there is a 0.28 percent increase of export of country i (Malaysia). Trade Share of country j (RCEP countries) is found to be less significant at higher distribution of export of 1.27 percent at quantile 0.10 in relation to 0.0021 percent at quantile 0.90. For robustness, this study further provides comprehensive analysis on the degree of income and trade convergence and factors affecting trade flow of Malaysia developed by Phillip and Sul (2007). The empirical findings discover the absence of a homogeneous convergence clubs. Three converging group, one outlier and three diverging group are detected in terms of Export while GDP Per Capita conveyed similar pattern which are four converging groups with an addition of diverging group. Which implies that the RCEP members experience weak convergence between them which illustrate relatively substantial dissimilarity in its structure of the economy as a whole. Despite the dissimilarity, the speed of convergence indicates that possible catching up within the members countries, in converging towards a similar transition path of economics growth. Thus, indicating further realization of economic corporation and stronger integration among the RCEP members now and in the future. On the other hand, Trade Share convergence displays slight difference from export convergence, two converging group and one diverging group pattern. Interestingly from Quantile Regression analysis, Openness of Malaysia is found to be insignificant throughout the quantiles which signifies that through this sample period, Trade Share of Malaysia has no effect on the country's distribution of export towards the RCEP countries. On the other hand, GDP of Malaysia, GDP of other RCEP countries and Trade Share of RCEP members tend to affect export of Malaysia.

Keywords: Convergence, Quantile regression, Export, GDP Per Capita, Openness.
