TABLE OF CONTENTS

PART I	Introduction	
Chapter 1	General introduction and thesis outline	11
PART II	Clinical and radiological characteristics	
Chapter 2	Project Y: The search for clues explaining phenotype variability in MS	27
Chapter 3	From polygenic odds to lifetime risk in multiple sclerosis	49
Chapter 4	Association of volumetric MRI measures and disability in MS patients of the same age: Descriptions from a birth year cohort	57
PART III	Blood biomarkers	
Chapter 5	Neuroaxonal and glial markers in patients of the same age with multiple sclerosis	85
Chapter 6	Adipokines in multiple sclerosis patients are related to clinical and radiological measures	111
Chapter 7	Associations of arachidonic acid-derived lipid mediators with disease severity in patients with relapsing and progressive multiple sclerosis	137
PART IV	Impact of exposure to environmental factors	
Chapter 8	The association between weight during early life and multiple sclerosis onset in a nationwide Dutch birth year cohort	169
Chapter 9	The role of diet composition in multiple sclerosis onset and course: Results from a nationwide retrospective birth year cohort	185
PART V	General discussion and appendices	
Chapter 10	Summary, general discussion and future perspectives	217
Appendices	Nederlandse samenvatting	240
	List of publications	248
	Author affiliations	250
	Dankwoord	254
	Biography	261
