

CONFERENCE PROCEEDINGS

8th International Conference on Silicon in Agriculture

Sheraton New Orleans Hotel
New Orleans, Louisiana USA
May 23-26, 2022

8th International Conference on Silicon in Agriculture

**Sheraton New Orleans Hotel
New Orleans, Louisiana, USA**

May 23-26, 2022

ORGANIZING COMMITTEE

Dr. Brenda Tubana, Chair

Dr. James Villegas

Dr. Lawrence Datnoff

Louisiana State University AgCenter, Baton Rouge, LA

Dr. Fabrício A. Rodrigues

Viçosa Federal University, Department of Plant Pathology, Viçosa, MG, Brazil

PLENARY SPEAKER

Dr. Scott Johnson, Western Sydney University, Australia

KEYNOTE SPEAKERS

Dr. Prakash Nagabovanalli, University of Agricultural Sciences, Bangalore, India

Dr. Clístenes Nascimento, Federal University of Pernambuco, Recife, Brazil

Dr. Miroslav Nikolic, University of Belgrade, Belgrade, Serbia

Dr. Olivia Reynolds, Charles Sturt University, Australia

Dr. Wendy Zellner, The University of Toledo, Ohio, USA

CONFERENCE SERVICE COMMITTEE

Dr. Marilyn Dalen

Diego Mayorga

Hector Fajardo

Hector Mendoza

Krizzia Guardado

Andrew Bratton

Marlon Marcondes

Soil Fertility Team

Foreword

We would like to welcome everyone to New Orleans, Louisiana, USA, the site of the 8th International Conference on Silicon in Agriculture (ICSA). After 23 years, the conference is once again hosted in the US. Since then, the conference is held every three years and has become the venue for the silicon scientific community and industry to meet and share the latest information on silicon research in agriculture as well as foster camaraderie among the participants from around the world. We also discuss issues and research opportunities, and collaborations. The 8th ICSA theme “Innovate and Integrate Silicon Research for Sustainable Agriculture” reflects our awareness as a community of the evolving needs and challenges in agriculture.

The conference proceedings consist of 53 research abstracts in oral (25) and poster (28) presentations. We have research topics on the role of silicon in alleviating biotic and abiotic stress in plants and updates on the analytical procedures for determining silicon in soils and plants. The presentations on the implications of silicon in agricultural systems and climate change are well in tune with the conference theme. Elucidating the function of silicon at the plant cellular level and the introduction of new silicon sources are the focus of several presentations. Graduate students are presenting highlights of their research through the 5-minute rapid oral and poster presentations. All these outcomes indicate our resiliency and determination to continue our work, despite all challenges encountered and set-backs during the peak of the worldwide COVID-pandemic.

We would like to thank our sponsors for their generous financial support and for working with us to ensure the success of this conference. We thank you all for your patience. Indeed, this conference has been long overdue, and the 8th ICSA organizing committee could not be more delighted to finally open the conference to everyone.

Sincerely,

8th ICSA Organizing Committee

TABLE OF CONTENTS

CONTENT	PAGE
1 Conference Program	1
2 Meeting Space Layout	6
3 Abstracts	8
Plenary: Plant Silicon Interaction between Organisms and Implications for Agroecosystem, Dr. Scott Johnson	8
Program Theme I: Role in Biotic and Abiotic Stress	9
Program Theme II: Chemistry and Analysis of Silicon in Soils and Plants....	28
Program Theme III: Plant Growth, Development and Metabolism	38
Program Theme IV: Agricultural Systems, Climate Change, and Ecology.....	48
Program Theme V: Biostimulant, Soil Amendments, Fertilizers: What's New in the Industry.....	55
4 List of Authors	62

CONFERENCE PROGRAM

May 23, 2022

5:00 – 6:30	PM	Early Registration Sponsors Table Set-up Posters Set-up	Rhythms I Lagniappe Rhythms I
6:30 – 10:00	PM	Reception	Waterbury Ballroom

May 24, 2022

7:00 – 9:00	AM	Continental Breakfast Registration Sponsors Table Set-up Posters Set-up Upload Presentations	Waterbury Ballroom Rhythms I Lagniappe Rhythms I Waterbury Ballroom
9:00 – 9:10	AM	Conference Opening Dr. Brenda Tubana President ISSAG	Waterbury Ballroom
9:10 – 9:25	AM	Welcome Remarks Dr. Michael Salassi LSU AgCenter Associate Vice President Program Leader for Plant and Soil Sciences	Waterbury Ballroom
9:25 – 10:00	AM	Plant Silicon Interactions between Organisms and the Implication for Agroecosystems Dr. Scott Johnson Plenary Speaker	Waterbury Ballroom
10:00 – 10:30	AM	Break/Poster Viewing/Exhibit	
10:30 – 1:55 PM		Program Theme I: Role in Biotic and Abiotic Stress <i>Moderator: Dr. Miroslav Nikolic</i> <i>Timekeeper: Dr. Jelena Pavlovic</i>	Waterbury Ballroom
10:30 – 11:00	AM	Keynote: Silicon-Facilitated Plant Defense Against Biotic Stress: Recent Advances Dr. Olivia Reynolds Charles Sturt University	
11:00 – 11:20	AM	Silicon Alleviates Antimony Phytotoxicity in Giant Reed Dr. Marek Vaculik Comenius University in Bratislava	
11:20 – 11:40	AM	The Effect of Foliar Application of Silicon on the Expression of Genes Involved in Plant Response to Stress Dr. Anna Konieczny INTERMAG	

11:40 – 12:00	AM	Effect of Silicon Application on Orange Rust Control in Different Sugarcane Varieties Dr. Bruno Nicchio Federal University of Uberlandia	
12:00 – 1:00	PM	Lunch	Lagniappe
1:00 – 1:20	PM	Effect of Soil Silicon Amendment on Rice Insect Pest Complex in Louisiana Dr. James Villegas LSU AgCenter	
1:20 – 1:35	PM	Benefits of Silicon Fertilization in Contrasting Sugarcane Cultivars to Drought-Tolerance Subjected to Late Water Deficit Dr. Monica Camargo Agência Paulista de Tecnologia dos Agronegócios	
1:40 – 1:55	PM	Program Theme I Panel Discussion <i>Moderator: Dr. Miroslav Nikolic</i> <i>Timekeeper: Dr. Jelena Pavlovic</i>	
1:55 -3:00	PM	5-Minute Rapid Oral Competition (Graduate Students) <i>Moderator: Dr. Brenda Tubana</i> <i>Timekeeper: Dr. Marilyn Dalen</i>	Waterbury Ballroom
3:00 – 3:30	PM	Break	
3:30 – 4:30	PM	Poster General Session Poster Graduate Student Presentation	Rhythms I
4:30 – 6:30	PM	Big Easy Ghost Tour <i>Coordinator: Dr. James Villegas</i>	Meeting Place: Waterbury Ballroom
7:00 – 10:00	PM	Cultural Night <i>Hosts: Drs. Henk-Maarte Laane & Brenda Tubana</i> <i>Music: Dr. Jazz and the New Orleans Sounds</i>	Waterbury Ballroom

May 25, 2022

7:00 – 8:00	AM	Continental Breakfast	Waterbury Ballroom
8:00 – 9:45		Program Theme II: Chemistry and Analysis of Silicon in Soils and Plants <i>Moderator: Dr. James Villegas</i> <i>Timekeeper: Dr. Marilyn Dalen</i>	Waterbury Ballroom
8:00 – 8:30	AM	Keynote: Extraction and Estimation of Si in Soils and plants: Downsides and Front-Line Appraisals Dr. Nagabovanalli B. Prakash University of Agricultural Sciences	

8:30 – 8:50	AM	The Correlation between Amorphous Content and Soluble Silica of Calcium Silicate Slags Using X-Ray Diffraction and Colorimetric Analysis Jessica Lyza Edward C. Levy Corporation	
8:50 – 9:10	AM	Effect of Slag Based Gypsum on Silicon Availability, Uptake and Yield of Rice, Maize, and Groundnut in India Dr. Prabhudev Dhumgond University of Agricultural Sciences	
9:10 – 9:30	AM	Condensed Silica as a New Source for Si-Fertilizer with Huge Potentials Tor S. Hansen Elkem Materials	
9:30 – 9:45	AM	Program Theme II Panel Discussion <i>Moderator: Dr. James Villegas</i> <i>Timekeeper: Dr. Marilyn Dalen</i>	
9:45 – 10:15	AM	Break/Poster Viewing/Exhibit	
10:15 – 12:00		Program Theme III: Plant Growth, Development and Metabolism <i>Moderator: Dr. Fabricio Rodrigues</i> <i>Timekeeper: Dr. Marilyn Dalen</i>	Waterbury Ballroom
10:15 – 10:45	AM	Keynote: Beyond Biosilicification and the Cell Wall: How Does Silicon Function as a Plant Nutrient? Dr. Wendy Zellner The University of Toledo	
10:45 – 11:05	AM	Genes Related to Silicon Transport and Accumulation in Selected Crops Dr. Boris Bokor Comenius University in Bratislava	
11:05 – 11:25	AM	Silicon Fertilization and Paddy Field Dr. Chanchal Malhotra Baba Mastnath University	
11:25 – 11:45	AM	Elucidating Silicon Responses with <i>Nicotiana tabacum</i> Dr. Scott Leisner The University of Toledo	
11:45 – 12:00	AM	Program Theme III Panel Discussion <i>Moderator: Dr. Fabricio Rodrigues</i> <i>Timekeeper: Dr. Marilyn Dalen</i>	

12:00 – 1:00	PM	Lunch	Lagniappe
1:00 – 2:35		Program Theme IV: Agricultural Systems, Climate Change and Ecology <i>Moderator: Dr. Brenda Tubana</i> <i>Timekeeper: Krizzia Guardado</i>	Waterbury Ballroom
1:00 – 1:30	PM	Keynote: Silicon Soil-Plant Dynamics in Nutrient-Poor Environment Dr. Miroslav Nikolic University of Belgrade	
1:30 – 1:45	PM	Soil Application of Calcium Silicate Slag and the Effects on Soil pH, Crop Yield and Quality of Corn, Potatoes, Tomatoes and Cucumbers Grown in Michigan Soils Dr. Patrick McGinnity Edward C. Levy Corporation	
1:45 – 2:00	PM	The Effect of Particle Size on the Solubility and Release of Monosilicic Acid from Silicate Slag and Silicon Uptake by Wheat (<i>Triticum aestivum</i>) Dr. Wooiklee Paye New Mexico State University	
2:00 – 2:15	PM	The Effects of Stabilized Silicic Acid on Fish and Shrimps Dr. Henk-Maarte Laane ReXil Agro	
2:15 – 2:30	PM	Silica Uptake and Effects in Forest Tree Plants Tommy Landberg Stockholm University	
2:30 – 2:40	PM	Program Theme IV Panel Discussion <i>Moderator: Dr. Brenda Tubana</i> <i>Timekeeper: Krizzia Guardado</i>	
2:40 – 2:55	PM	Break/Poster Viewing/Exhibit	
2:55 – 4:30		Program Theme V: Biostimulant, Soil Amendment, and Fertilizer: What's New in the Industry <i>Moderator: Dr. Wendy Zellner</i> <i>Timekeeper: Krizzia Guardado</i>	Waterbury Ballroom
2:55 – 3:25	PM	Keynote: Crop Response to Silicon Fertilization in Northeastern Brazil Dr. Clistenes Nascimento Federal University of Pernambuco	

3:25 – 3:40	PM	Questions and Answers About Root Silicification Dr. Alexander Lux Comenius University in Bratislava	
3:40 – 3:55	PM	Alkali-Enhanced Biochar as a Soil Amendment for Providing Plant-Available Si Dr. Jim Wang LSU AgCenter	
3:55 – 4:10	PM	Magnesium Silicate and Its Potential Use for Agricultural Production in Colombia Dr. Carlos Gauggel Mg12 ZOMAC SAS	
4:10 – 4:25	PM	A New Alternative Source for Si-Fertilizer by Using Ground SiMn-Slag Tor S. Hansen Eramet Norway	
4:25 – 4:35	PM	Program Theme V Panel Discussion <i>Moderator: Dr. Wendy Zellner</i> <i>Timekeeper: Krizzia Guardado</i>	
4:35 – 5:30	PM	Business Meeting Presiding, Dr. Brenda Tubana ISSAG (Financial Report, Board Members Nomination) Recognition, Dr. Lawrence Datnoff Graduate Student Winners, Dr. Clistenes Nascimento Appointment New President & Site of 9 th ICSA	Waterbury Ballroom
5:30 – 6:30	PM	ISSAG Officers and Board Members Meeting	TBA
6:30	PM	Dinner in the Big Easy (on your own)	

May 26, 2022

7:00 – 8:00	AM	Continental Breakfast	Waterbury Ballroom
8:30 AM – 7:00 PM	PM	Tour to Baton Rouge Coordinator: Dr. Brenda Tubana LSU AgCenter Soil Fertility Team	Hotel Front Parking Area
8:00 – 8:30	AM	Bus Boarding	
8:30	AM	Depart	
10:00 – 11:30	AM	LSU AgCenter Sugar Research Station Dr. Collins Kimbeng, Sugarcane Breeding & Genetics Dr. Michael Pontiff, Plant Breeder	
12:00 – 2:30	PM	Lunch @ LSU AgCenter Botanic Garden at Burden Dr. Jeff Kuehny, Resident Director	
3:00 – 5:00	PM	Baton Rouge Downtown	
5:00	PM	Depart for New Orleans	
7:00	PM	Arrive at Sheraton New Orleans Hotel Dinner (on your own)	

Phosphorus Deficiency Induced Silicon Mobilization in Grapevine Rhizosphere: A Field Study

5-Minute Rapid Oral, 2:25 – 2:30 PM
Poster Competition #7-GS, Rhythms I

ABSTRACT

Silicon (Si) uptake by crops is well studied and Si transporters have been characterized in various crop species, including grapevine. However, information on the rhizosphere mobilization of Si is still lacking and virtually no information is available on grapevine. Our previous study showed that grapevine is a phosphorus (P)-efficient species with a high root capacity to mobilize P from the rhizosphere by the released of organic anions (mainly citrate). The field experiment was established in 12-y-old vineyard with the cultivar ‘Chardonnay’, grafted on 5BB rootstock under extremely low P conditions (Olsen P < 3 mg kg⁻¹). Four own-designed rhizotrons (80 cm depth) were installed in a vineyard enabling easy access to the new intact roots. The following treatments were performed: –P/–Si, +P/–Si, –P/+Si (soil application) and –P/+Si (foliar application). The samples of rhizosphere and bulk soils, root exudates from intact root tips and vine tissues (root and leaves) were collected at different growth stages according to Eichhorn-Lorentz (E-L) system: flowering (E-L stage 23), berries pea-size (E-L stage 31), and veraison (E-L stage 35). In addition to Si and P concentrations in the tissues, the expressions of *VvALMT*, *VvMATE* (encoding efflux transporters for malate and citrate, respectively), and *VvNIP2.1* (encoding Si influx transporter) were also determined. Phosphate fertilization decreased, while low soil P and Si fertilization increased Si availability in the rhizosphere. At the flowering stage, –P plants accumulated more Si than the P-fertilized ones and was comparable to the Si-fertilized plants. Foliar application of Si was less effective in comparison with soil application unless at the veraison stage. The leaf Si concentrations showed a clear seasonal pattern being the highest at the veraison stage. Exudation rate of citrate also showed a clear seasonal pattern and was significantly higher in the –P/–Si than in +P/–Si plants, which was followed by an increased Si availability in the vine rhizosphere. Overall, low P conditions induced Si accumulation in the leaves due to increased exudation of organic anions that can also mobilize Si in the rhizosphere, thereby increasing Si uptake by grapevine.

Keywords: Transporters, Root exudates, Uptake
