# REVIEW OF BUSINESS AND ECONOMIC CONDITIONS

---

UNIVERSITY OF ALASKA, INSTITUTE OF SOCIAL, ECONOMIC AND GOVERNMENT RESEARCH    MAR. 1972, Vol. IX, No. 1

---

## AGE AND SEX CHARACTERISTICS OF ALASKA'S POPULATION

### INTRODUCTION

Knowledge of the state's population distribution and age and sex characteristics is basic to understanding Alaska today and to planning its future. Accordingly, the results of the 1970 census are of critical importance to the state's policy makers, especially in the areas of education, employment, and health and welfare.

Some of the 1970 census information is presented in published form by the U.S. Bureau of the Census and is available from them on request. Other data are contained on computer tapes that are provided by the Bureau of the Census to the Institute of Social, Economic and Government Research (ISEGR) at the University of Alaska. The institute, which in early 1971 was designated as a Census Summary Tape Processing Center for Alaska, has been utilizing the summary tapes both for institute research and to fill requests for census information from public agencies and private sources. Of the six sets of summary tapes to be made available by the Bureau of the Census, the institute will receive four or five sets; two of these, the first count and the second count tapes, have been received so far.

The first count tapes were used by ISEGR in the December 1971 issue of the *Alaska Review of Business and Economic Conditions* (Vol. VIII, No. 5) in which was published the article, "Alaska's Population and School Enrollments," compiled by

Dr. Peter Lin. Dr. Lin's piece contained tables that presented data on Alaska's population in historical perspective, population growth and population density as compared to other regions of the United States, and population by ethnic groups for Alaska's census divisions and major towns and cities. That article also contained information concerning births and deaths and infant deaths for the state's white and Native populations, and enrollment data for Alaska's elementary and secondary schools and institutions of higher learning.

This issue of the *Review* presents data taken from the second count tapes. Much the same information as was contained in the first count tapes is contained in the second count tapes, but in much greater detail. For example, whereas the first count tapes provided only enough information that Alaska's Native population — Indians, Eskimos, and Aleuts — could be estimated, the second count tapes provide the exact numbers, by sex, of Alaska Natives counted by the census for the state as a whole and for each of the 29 census divisions. These figures reflect that there are a total of 50,654 Natives in the state, broken down into 16,276 Indians, 6,851 Aleuts, and 27,797 Eskimos. In addition, the second count tapes provide more detailed age breakdowns than did the first count tapes. According to these figures, the median age in Alaska is 22.1, while the average age is 25.1.

During the preparation of the first count tapes, it became apparent that there were some errors in the 1970 census population count for the Anchorage

Victor Fischer — Director of the Institute of Social, Economic  
and Government Research

Compiled by: James D. Babb, Jr.  
Institute Editor

Census Division, the Bethel Census Division, and the Yukon-Koyukuk Census Division. These errors resulted in a population total of only 300,382 for the state, as recorded in the Master Enumeration Districts List (MEDLists) compiled by the Bureau of the Census and used by it as the basis for all subsequent publications and analysis. This figure of 300,382 represents a shortage of 2,265 people as compared to the official corrected 1970 population count of 302,647.

The second count computer tapes provided by the Bureau of the Census contain the same errors as the first. The totals and detailed statistics are therefore based on a count of 300,382 rather than on the corrected total of 302,647. While a distribution of error could have been made to correct the totals by division, the age, sex, and race characteristics of the omitted individuals are not available. Therefore, no detailed corrections are possible at this time. Table I shows the corrected population count for census divisions, census division subdivisions, and places that have so far been authenticated. There may be others.

It also should be noted that the 1970 census data are not directly comparable to the 1960 census information because of an expansion of census divisions from 24 districts in 1960 to 29 divisions in 1970, and also because of minor boundary changes. Thus, as an aid, a table of contrast between the 1960 census districts and the 1970 census divisions is shown in Table 2, and, in Figures 1 and 2, maps show Alaska's five major regions and the 1960 census districts and the 1970 census divisions, respectively. Also, in Tables 4 and 6, the data are recorded approximately on the basis of the 1960 census districts for the purpose of making comparisons between 1960 and 1970 population movements.

This *Review* is divided into two sections, a main body and an appendix. The main body consists of the text and the tables calculated from the second count tapes. The appendix consists of tables taken directly from the second count computer print-outs.

As stated previously Table 1 shows the *official* corrected figures for the 1970 census count. Table 2 is a table of contrast between the 1960 census districts and the 1970 census divisions. Table 3 shows total populations by race for the state and for the 29 census divisions; Table 4 shows the 1970 total populations by race for the state and as allocated to the 24 census districts of 1960. Tables 5 and 6 show the same information as do Tables 3 and 4, but the information is further broken down by sex. Table 7 gives population figures by race for Alaska's five major regions for 1960 and 1970. Table 8 shows the percentage breakdown by race for the five regions, and Table 9 gives the percentage increase or decrease by race for the five regions between 1960 and 1970. Table 10 gives comparative estimates of the components of net change in population for Alaska, the Far West, Mountain States, and the Total United States between 1960 and 1970.

The tables in the appendix, reproduced directly from the computer print-out, show the population of the state and the 29 census divisions by age and sex.

TABLE 1  
Corrected Population Count

Area	Population as shown in MEDList and first count	Corrected population
Alaska	300,382	302,647
Anchorage Census Division	124,542	126,333
Greater Anchorage borough:		
Anchorage city (part)	42,582	42,634
Richardson reservation	8,960	10,751
Fort Richardson (U)	8,960	10,751
Bethel Census Division	7,579	7,767

Some census divisions such as Anchorage and Fairbanks, are broken down into "Urban" and "Rural" areas and will have two tables. Detailed ethnic breakdowns are not provided; only "Total," "White," "Negro," and "Other" are shown, and in this instance, the "Other" category includes Alaska Natives along with Chinese, Japanese, Filipino and other ethnic groups. However, a rough approximation of the number of Natives in each census division can be made by comparing the "Other" column in the appendix tables with the detailed breakdowns of non-white and non-Negro numbers in Tables 3 through 6 in the main body of the text.

The information contained in these tables indicates that, according to the 1970 census, Alaska's total population increased by 74,215 people between 1960 and 1970, an increase of 32.8 per cent. Of the

major ethnic groups in Alaska, the population increase was greatest among whites, who went from 174,546 people in 1960 to 236,767 in 1970, an increase of 35.6 per cent. Next greatest increase was among Negroes, who went from 6,771 people in 1960 to 8,911 in 1970, an increase of 31.6 per cent. The Aleut and Eskimo population increased by 24.7 per cent, going from an estimated 25,571 in 1960 to 34,378 in 1970. Indians showed the smallest population increase during the ten-year period, going from 14,444 in 1960 to 16,276 in 1970, an increase of 12.7 per cent.

Among regions, the Southcentral Region showed the largest increase, 48.8 per cent in total population, going from 108,851 in 1960 to 162,001 in 1970. The Northwest Region had the smallest increase, going from 11,784 in 1960 to 12,846 in 1970, an increase of only 9 per cent.

	Interior	56,479	47,389	2,884	4,419	68	1,145	1,213	574
	Northwest	12,846	2,069	46	37	5	10,619	10,624	70

Notes: <sup>a</sup>Alaska's five major regions, as identified and used in this publication, are based on the work of Dr. George W. Rogers & Dr. Richard Cooley (*Alaska's Population and Economy: Regional Growth, Development, and Future Outlook*, Vol. I, Institute of Business (Social), Economic, and Government Research, University of Alaska, 1963, pp. 2-8).

<sup>b</sup>Aleuts and Eskimos were not counted separately in 1960, and their combined population was estimated for that year. Hence, for 1960, no separate counts of Aleuts and Eskimos are shown in this table.

<sup>c</sup>Includes Chinese, Japanese, and Filipinos.

<sup>d</sup>The correct population total for the state is 302,647. The detailed distributions are not available.

SOURCE: 1960 population figures are from U.S. Bureau of the Census, U.S. Census of Population: 1960. General Population figures are from the 1970 census of population, second count.

Notes: <sup>a</sup>See footnote a, Table 7.

<sup>b</sup>See footnote b, Table 7.

<sup>c</sup>See footnote c, Table 7.

SOURCE: Computed from Table 7.

**TABLE 9**  
**Percentage Change in Alaska's Population by Race**  
**and Region Between 1960-1970**

Region <sup>a</sup>	All Races	White	Negro	Indian	Aleut & Eskimo	Other <sup>b</sup>
STATE TOTAL <sup>c</sup>	32.8	35.6	31.6	12.7	24.7	42.8
Southeast	20.2	30.9	2.0	-3.3	-48.2	20.3
Southcentral	48.8	47.3	39.4	77.5	81.5	78.0
Southwest	26.1	36.5	134.0	1.6	21.7	42.2
Interior	15.0	13.4	18.6	20.0	81.0	3.6
Northwest	9.0	-9.6	-52.1	184.6	14.1	-7.9

Notes: <sup>a</sup>Alaska's five major regions, as identified and used in this publication, are based on the work of Dr. George W. Rogers & Dr. Richard Cooley (Alaska's Population and Economy; Regional Growth, Development, and Future Outlook, Vol. I, Institute of Business (Social), Economic, and Government Research, University of Alaska, 1963, pp. 2-8).

<sup>b</sup>Includes Chinese, Japanese, and Filipinos.

<sup>c</sup>Based on the uncorrected population of 300,382; if based on the corrected population of 302,647, the percentage increase of all races for the total state would be 33.8 per cent.

SOURCE: Computed from Table 7.

**TABLE 10**  
**Comparative Estimates of Components of Net Change in Population**  
**Alaska, Far West, Mountain States and Total United States**  
**For The Ten-Year Period 1960-1970**

Region	Net Increase		Natural Increase		Net Total Migration	
	Number	Percent <sup>a</sup>	Number	Percent of Total Net Increase	Number	Percent of Total Net Increase
Alaska	76,006	33.6	60,000	78.9	16,000	21.1
Far West	5,318,043	25.8	2,654,000	49.9	2,665,000	50.1
Mountain	689,767	16.0	626,000	90.8	65,000	9.4
United States	23,861,597	13.3	20,841,000	87.3	3,020,000	12.7

Note: <sup>a</sup>Base is 1960 total population; the Bureau of the Census source used (see below) lists Alaska as having a population of 302,172, rather than the corrected total of 302,647. If that total were used, the net increase would be 33.8; if the uncorrected population of 300,382 were used, the net increase would be 32.8 per cent.

AVAILABLE 1970 CENSUS SECOND COUNT  
SUMMARY TAPE INFORMATION

Ninety-three tables, containing some thirty-five hundred data cells, of final complete-count population and housing data for the State of Alaska are now available on computer tapes and in printout form at the Institute of Social, Economic and Government Research. The data cover the State of Alaska as a whole as well as all census divisions, minor civil divisions, and major communities in the state. Maps showing the

above mentioned geographic designations are also available on request. Inquiries should be directed to:
