		Journal	I		
Journal Name Journal of Physiotherapy	Category REHABILITATION - SCIE	7.000	Publisher Australian Physiotherapy Association	Language English	e Aims and Scope Journal of Physiotherapy is the official journal of the Australian Physiotherapy Association. The journal's mission is to publish significant research which has important implications for physiotherapy (also known as physical therapy). Our vision is for the journal to be the pre-eminent international publication of the science and practice of physiotherapy.
					In January 2008 Journal of Physiotherapy became the first physiotherapy journal to conform to the ICMJE requirement wherein randomised trials are registered with a recognised Trial Registry.
					The journal prioritises systematic reviews and reports of clinical trials, economic analyses, experimental studies, qualitative studies, epidemiological studies, and observational studies.
Exceptional Children Annals of Physical and Rehabilitation	REHABILITATION - SSCI REHABILITATION - SCIE		SAGE Elsevier France	English English	In January 2014 the journal became the first core physiotherapy / physical therapy journal to make Editorials and peer-reviewed original research freely-available. Exceptional Children, an official journal of The Council for Exceptional Children, publishes original research and analyses that focus on the education and development of exceptional infants, toddlers, children, youth, and adults. This includes descriptions of research, research reviews, methodological reviews of the literature, data-based position papers, policy analyses, and registered reports. Academic and scholarly abstracted journal publishing worldwide clinical and basic research in the field of Physical and Rehabilitation Medicine.
Medicine					Annals of Physical and Rehabilitation Medicine publishes original peer-reviewed clinical and research articles, epidemiological studies, new methodological clinical approaches, review articles, editorials and guidelines.
					Annals of Physical and Rehabilitation Medicine covers all areas of Rehabilitation and Physical Medicine; such as: methods of evaluation of motor, sensory, cognitive and visceral impairments; acute and chronic musculoskeletal disorders and pain; disabilities in adult and children; processes of rehabilitation in orthopaedic, rhumatological, neurological, cardiovascular, pulmonary and urological diseases.
Journal of Orthopaedic & Sports Physical Therapy	REHABILITATION - SCIE	4.751	JOSPT, Inc.	English	The Journal of Orthopaedic & Sports Physical Therapy®, Inc. (JOSPT®, Inc.) publishes scientifically rigorous, clinically relevant content for members of the health care community to advance musculoskeletal and sports-related practice globally.
					When the JOSPT senior editorial team considers manuscripts, they ask three fundamental questions:
					Does the work advance the musculoskeletal rehabilitation field? Are the methods robust?
					3. How will the work help clinicians and patients or athletes make decisions in practice tomorrow?
					JOSPT prioritizes research with a clear clinical message and potential for immediate impact in musculoskeletal rehabilitation practice. JOSPT welcomes submissions covering issues in musculoskeletal health and rehabilitation from fields including physical therapy, orthopaedics, pain, epidemiology, and sports medicine. JOSPT does not publish basic science, cadaver, or animal research.
					With an impact factor of 4.751, JOSPT is among the highest ranked physical therapy journals in Journal Citation Reports, Science Edition (2021), published June 30, 2021. JOSPT ranks third of 68
Journal of NeuroEngineering and Rehabilitation	REHABILITATION - SCIE	4.262	BMC	English	Journal of NeuroEngineering and Rehabilitation provides a forum for researchers and clinicians interested in understanding the way neuroscience and biomedical engineering are continuing to reshape physical medicine and rehabilitation and human movement augmentation. JNER hosts the
Archives of Physical Medicine and Rehabilitation	REHABILITATION - SCIE	3.966	WB Saunders- Elsevier	English	introduction of new methods and the discussion of their clinical implications, and offers an The Archives of Physical Medicine and Rehabilitation publishes original, peer-reviewed research and clinical reports on important trends and developments in physical medicine and rehabilitation and related fields. This international journal brings researchers and clinicians authoritative information on the therapeutic utilization of physical, behavioral and pharmaceutical agents in providing comprehensive care for individuals with chronic illness and disabilities.
Neurorehabilitation and Neural Repair	REHABILITATION - SCIE	3.919	SAGE	English	The Journal will consider for publication original articles and reviews on both basic science and clinical research relevant to recovery from neural injury. Examples of appropriate topics include cortical remodeling, mechanisms of sprouting and regeneration, the development of cell lines for transplantation and trophic factor replacement, strategies to promote functional recovery in human regions, design of automa processes in payalogic rehabilitation, the multidisciplinary measurement.

Neural Systems and Rehabilitation Engineering	SCIE			5	and neural aspects of biomedical engineering, including functional electrical stimulation, acoustic dynamics, human performance measurement and analysis, nerve stimulation, electromyography, motor control and stimulation; and hardware and software applications for rehabilitation engineering and assistive devices.
Journal of Neurologic Physical Therapy	REHABILITATION - SCIE	3.649	Lippincott Williams & Wilkins	English	The articles in this journal are peer reviewed in accordance with the requirements set forth in the IEEE PSPB Operations Manual (sections 8.2.1.C & 8.2.2.A). Each published article was reviewed by a minimum of two independent reviewers using a single-blind peer review process, where the identities of the reviewers are not known to the authors. Articles will be screened for placiarism before accentance. The Journal of Neurologic Physical Therapy (JNPT) is the primary peer-reviewed, indexed resource for advancing neurologic physical therapy practice through the dissemination of definitive evidence, translation of clinically relevant knowledge, and integration of theory into education, practice, and research.
Supportive Care in Cancer	REHABILITATION - SCIE	3.603	Springer	English	The Journal of Neurologic Physical Therapy (JNPT) is an indexed resource for dissemination of research-based evidence related to neurologic physical therapy intervention. High standards of quality are maintained through a rigorous, double-blinded, peer-review process and adherence to standards recommended by the International Committee of Medical Journal Editors. With an international editorial board made up of preeminent researchers and clinicians, JNPT publishes Supportive Care in Cancer provides members of the Multinational Association of Supportive Care in Cancer (MASCC) and all other interested individuals, groups and institutions with the most recent scientific and social information on all aspects of supportive care in cancer patients. It covers primarily medical, technical and surgical topics concerning supportive therapy and care which may supplement or substitute basic cancer treatment at all stages of the disease.
Journal of Occupational Rehabilitation	REHABILITATION - SSCI	3.489	Springer/Plenum	English	Nursing. rehabilitative. psychosocial and spiritual issues of support are also included. The Journal of Occupational Rehabilitation is an international forum for the publication of peer-reviewed original papers on the rehabilitation, reintegration, and prevention of disability in workers. The journal offers investigations involving original data collection and research synthesis (i.e., scoping reviews, systematic reviews, and meta-analyses). Papers derive from a broad array of fields including rehabilitation medicine, physical and occupational therapy, health psychology and psychiatry, orthopedies, oncology, occupational and insurance medicine, neurology, social work,
Clinical Rehabilitation	REHABILITATION - SCIE	3.477	SAGE	English	ereonomics. biomedical engineering, health economics, rehabilitation engineering, business Clinical Rehabilitation is a highly ranked, peer reviewed scholarly journal. It is a multi-professional journal covering the whole field of disability and rehabilitation, publishing research and discussion articles which are scientifically sound, clinically relevant and sometimes provocative.
					The journal acts as a forum for the international dissemination and exchange of information amongst the large number of professionals involved in rehabilitation.
					The leading journal in its field, Clinical Rehabilitation combines clinical application of scientific results and theoretical aspects in an ideal form. It gives high priority to articles describing effectiveness of therapeutic interventions and the evaluation of new techniques and methods.
					Essential reading, Clinical Rehabilitation covers:
Journal of Geriatric Physical Therapy	REHABILITATION - SCIE	3.381	Lippincott Williams & Wilkins	English	Journal of Geriatric Physical Therapy is the leading source of clinically applicable evidence for achieving optimal health, wellness, mobility, and physical function across the continuum of health status for the aging adult.
Brazilian Journal of Physical Therapy	REHABILITATION - SCIE	3.377	Associacao Brasileira Pesquisa Pos-	English	The mission of the Academy of Gariatis Physical Therapy is building a community that advances. The Brazilian Journal of Physical Therapy (BJPT) is the official publication of the Brazilian Society of Physical Therapy Research and Graduate Studies (ABRAPG-Ft). It publishes original research articles on topics related to the areas of physical therapy and rehabilitation sciences, including
Physiotherapy	REHABILITATION - SCIE	3.358	Graduacao Elsevier Science	English	clinical. basic or applied studies on the assessment, prevention, and treatment of movement Physiotherapy aims to publish original research and facilitate continuing professional development for physiotherapists and other health professions worldwide. Dedicated to the advancement of physiotherapy through publication of research and scholarly work concerned with, but not limited to, its scientific basis and clinical application, education of practitioners, management of services and policy.
					We are pleased to receive articles reporting original scientific research, systematic reviews or meta- analyses, theoretical or debate articles, brief reports and technical reports. All papers should

Disability & Society	REHABILITATION - SSCI	3.314	Routledge Journals, Taylor & Francis	English	Disability & Society is an international disability studies journal providing a focus for debate about such issues as human rights, discrimination, definitions, policy and practices. It appears against a background of constant change in the ways in which disability is viewed and responded to.
					The journal publishes articles that represent a wide range of perspectives including the importance of the voices of disabled people.
					Disability & Society invites papers where definitions of disability are acknowledged to be relative and segregated approaches are seen as inadequate and unacceptable - placing greater emphasis on inclusion. Perspectives are also invited which critique ways in which policy intentions may or may not have the desired effects in the everyday lives of disabled people.
Research in Developmental Disabilities Games for Health	REHABILITATION - SSCI REHABILITATION -	3.230 3.204	Pergamon- Elsevier Science Mary Ann	English English	Disability scholars engage and identify with other oppressed groups and the journal leads the way in forging new naths for disabilities studies. Research in Developmental Disabilities is an international journal aimed at publishing original research of an interdisciplinary nature that has a direct bearing on the understanding or remediation of problems associated with developmental disabilities. Articles will be primarily empirical studies, although an occasional position paper or review will be accepted. The aim of the journal will be to publish articles on all expects of days lowers the difficulties using recovery recovery methods. Our Games for Health Journal is the first peer-reviewed journal dedicated to advancing the impact of
Journal	SSCI		Liebert, Inc.		game research, technologies, and applications on human health and well-being. This ground-breaking publication delivers original research that directly impacts this emerging, widely-recognized, and increasingly adopted area of healthcare.
					Games are rapidly becoming an important tool for improving health behaviors ranging from healthy lifestyle habits and behavior modification, to self-management of illness and chronic conditions to motivating and supporting physical activity. Games are also increasingly used to train healthcare professionals in methods for diagnosis, medical procedures, patient monitoring, as well as for responding to epidemics and natural disasters. Games for Health Journal is a must for anyone interested in the research and design of health games that integrate well-tested, evidence-based behavioral health strategies to help improve health behaviors and to support the delivery of care.
Pediatric Physical Therapy	REHABILITATION - SCIE	3.049	Lippincott Williams & Wilkins	English	Games for Health Iournal coverage includes: Pediatric Physical Therapy is the first and only peer-reviewed journal devoted to this discipline. The Journal provides a forum for scientific and professional exchange among researchers and practitioners throughout the world that represent subspecialties of the discipline, including early intervention, neonatology, pediatric sports and fitness, school physical therapy, acute care for seriously ill children, and the prevention of primary and secondary conditions that lead to disabling conditions.
					Official Journal of APTA Pediatrics, an Academy of the American Physical Therapy Association, The Dutch Association for Pediatric Physical Therapy, Physiotherapia Paediatrica, The New Zealand Society of Physiotherapists Pediatric Special Interest Group, and The Pediatric Division of the Canadian Physiotherapy Association.
					Pediatric Physical Therapy is an indexed international journal, that publishes peer reviewed research related to the practice of physical therapy for children with movement disorders. The editorial board is comprised of an international panel of researchers and clinical scholars that oversees a rigorous peer review process. The journal serves as the official journal for the pediatric physical therapy professional organizations in the Netherlands, Switzerland, New Zealand, Canada, and the United States. The journal includes articles that support evidenced based practice of physical therapy for children with neuromuscular, musculoskeletal, cardiorespiratory and developmental conditions that
Focus on Autism and Other Developmental Disabilities	REHABILITATION - SSCI	3.042	SAGE	English	Focus on Autism and Other Developmental Disabilities addresses issues concerning individuals with autism and other developmental disabilities and their families. Manuscripts reflect a wide range of disciplines, including education, psychology, psychiatry, medicine, physical therapy, occupational
Disability and Rehabilitation	REHABILITATION - SSCI; REHABILITATION -	3.033	Taylor & Francis	English	therapy, speech/language pathology, social work, and related areas. The iournal's editorial staff Disability and Rehabilitation is an international multidisciplinary journal publishing on all aspects of disability and rehabilitation.
	SCIE				Disability and Rehabilitation aims to encourage a better understanding of disability and to promote rehabilitation science, practice and policy aspects of the rehabilitation process. The journal provides an important forum for the dissemination and exchange of ideas amongst global health practitioners and researchers.
					Disability and Rehabilitation covers a range of topics such as:

Rehabilitation in practice Rehabilitation Policy Assessment procedures

Physical Therapy & Rehabilitation Journal	REHABILITATION - SCIE	3.021	Oxford University Press	English	PTJ: Physical Therapy & Rehabilitation Journal (PTJ) engages and inspires an international readership on topics related to physical therapy and rehabilitation. As the leading international journal for research in physical therapy and related fields, PTJ publishes innovative and highly relevant content for both clinicians and scientists and uses a variety of interactive approaches to communicate that content, with the expressed purpose of improving patient care.
International Journal of Language & Communication Disorders	REHABILITATION - SSCI; REHABILITATION - SCIE	3.020	Wiley	English	Established in 1921 as Physical Therapy and rebranded as PTJ: Physical Therapy & Rehabilitation The International Journal of Language & Communication Disorders (IJLCD) is the official journal of the Royal College of Speech & Language Therapists. The Journal welcomes submissions on all aspects of speech, language, communication disorders and speech and language therapy. It provides a forum for the exchange of information and discussion of issues of clinical or theoretical relevance in the above areas.
Language Speech and Hearing Services in Schools	REHABILITATION - SSCI	2.983	American Speech- Language- Hearing Association	English	The Journal. established in 1966. publishes a range of articles. including Research Reports. Reviews. LSHSS publishes peer-reviewed research and other scholarly articles pertaining to the practice of audiology and speech-language pathology in the schools, focusing on children and adolescents. The journal is an international outlet for clinical research and is designed to promote development and analysis of approaches concerning the delivery of services to the school-aged population. LSHSS seeks to advance evidence-based practice by disseminating the results of new studies as well as providing a forum for critical reviews and meta-analyses of previously published work.
Adapted Physical Activity Quarterly	REHABILITATION - SCIE	2.929	Human Kinetics	English	The broad field of audiology and speech-language pathology as practiced in schools, including aural rehabilitation; augmentative and alternative communication; childhood apraxia of speech; classroom Adapted Physical Activity Quarterly (APAQ) is the major journal of peer-reviewed research in adapted physical activity. APAQ provides the latest scholarly inquiry related to physical activity for individuals with disabilities. It is also viewed as one of the major journals in the rehabilitation area. The journal is multidisciplinary and not confined to the use of particular methodologies. In fact, it encourages diversity of topics and approaches. APAQ is the journal of the International Federation of Adapted Physical Activity. The journal encourages the submission of manuscripts addressing salient issues in adapted physical activity.
					APAQ publishes with person-first, nonsexist language, according to the guidelines of the Publication Manual of the American Psychological Association, 6th ed. (2010).
					Mission APAQ is an international, peer-reviewed, multidisciplinary journal designed to stimulate and communicate scholarly inquiry relating to physical activity that is adapted in order to enable and enhance performance and participation in people with disability. Physical activity implies fine, gross, functional, and interpretive movement including physical education, recreation, exercise, sport, and dance. The focus of adaptation may be the activity or task that is to be performed, environment and facilities, equipment, instructional methodology, and/or rules governing the performance setting. Among the populations considered are persons with motor, intellectual, sensory, and mental or other disabilities across the life span. Disciplines from which scholarship to this aim may originate include, but are not limited to, physical education, teacher preparation, human development, motor behavior and learning, biomechanics, exercise and sport physiology, and exercise and sport psychology. Scientific inquiry may originate from quantitative or qualitative inquiry, as well as from multimethod designs.
Journal of Rehabilitation Medicine	REHABILITATION - SCIE	2.912	Foundation for Rehabilitation Information	English	Is an international peer-review journal published in English, with around 10 issues published per year. All articles published in JRM are totally Open Access from the first day.
					Original articles, reviews, case reports, short communications, special reports and letters to the editor are published, as well as editorials and book reviews. The journal strives to provide its readers with a variety of topics, including: functional assessment and intervention studies, clinical studies in various patient groups, methodology in physical and rehabilitation medicine, epidemiological studies on disabling conditions and reports on vocational and sociomedical aspects of rehabilitation.
Research in Autism Spectrum Disorders	REHABILITATION - SSCI	2.881	Elsevier Science	English	The journal is read by a wide group of healthcare professionals including specialists in rehabilitation medicine, neurology clinical neurophysiology general medicine, psychologists physiotheranists. Research in Autism Spectrum Disorders (RASD) publishes high quality empirical articles and reviews that contribute to a better understanding of Autism Spectrum Disorders (ASD) at all levels of description; genetic, neurobiological, cognitive, and behavioral. The primary focus of the journal is to bridge the gap between basic research at these levels, and the practical questions and difficulties that are faced by autistic individuals with ASD and their families, as well as carers, educators and clinicians. In addition, the journal encourages submissions on topics that remain under-researched in the field. We know shamefully little about the causes and consequences of the significant language and general intellectual impairments that are very common among the autism community. We know even less about the challenges that autistic women face and less still about the needs of autistic

even less about the challenges that autistic women face and less still about the needs of autistic

European Journal of Physical and Rehabilitation Medicine	REHABILITATION - SCIE	2.874	Edizioni Minerva Medica	English	The European Journal of Physical and Rehabilitation Medicine, a bi-monthly, open access, international peer-reviewed scientific journal on Physical and Rehabilitation Medicine after pathological events, founded in 1965, is indexed in Current Contents/Clinical Medicine, EMBASE, PubMed/MEDLINE, Science Citation Index Expanded (SCIE), Scopus and has an impact factor of 2.874. The aim of the European Journal of Physical and Rehabilitation Medicine (EJPRM) is to improve the clinical approach to patients in need of Physical and Rehabilitation Medicine in all phases of treatment (acute, post-acute and chronic) and whatever the original disease. The EJPRM is the official journal of the Italian Society of Physical and Rehabilitation Medicine (ESPRM), European Union of Medical Specialists - Physical and Rehabilitation Medicine (ESPRM) and is published in association with the International Society of Physical and Rehabilitation Medicine (ISPRM). The EJPRM is published in association with most of the main European and international bodies of Physical and Rehabilitation Medicine and publishes some of their position papers. Moreover, the EJPRM favors an evidence-based clinical practice approach in Physical and
Learning Disabilities Research & Practice	REHABILITATION - SSCI	2.861	Wiley	English	Learning Disabilities Research & Practice (LDRP) publishes articles addressing the nature and characteristics of children and adults with learning disabilities and/or attention decificts, program development, assessment, and instruction not limited to academic subjects. LDRP provides
Journal of Learning Disabilities	REHABILITATION - SSCI	2.859	SAGE	English	valuable information to professionals involved in a variety of disciplines including special education. The Journal of Learning Disabilities (JLD), a multidisciplinary, international publication, presents work and comments related to learning disabilities. Initial consideration of a manuscript depends upon (a) the relevance and usefulness of the content to the readership; (b) how the manuscript compares to other articles dealing with similar content on pertinent variables (e.g., sample size,
Aphasiology	REHABILITATION - SSCI; REHABILITATION - SCIE	2.773	Routledge Journals, Taylor & Francis	English	Aphasiology is concerned with all aspects of language impairment and disability and related disorders resulting from brain damage. It provides a forum for the exchange of knowledge and the dissemination of current research and expertise in all aspects of aphasia and related topics, from all disciplinary perspectives.
Spinal Cord	REHABILITATION - SCIE	2.772	Springer Nature	English	Aphasiology includes papers on clinical, psychological, linguistic, social and neurological perspectives of aphasia, and attracts contributions and readership from researchers and practitioners Spinal Cord is a specialised, international journal that has been publishing spinal cord related manuscripts since 1963. It appears monthly, online and in print, and accepts contributions on spinal cord anatomy, physiology, management of injury and disease, and the quality of life and life circumstances of people with a spinal cord injury. Spinal Cord is multi-disciplinary and publishes contributions across the entire spectrum of research ranging from basic science to applied clinical research. It focuses on high quality original research, systematic reviews and narrative reviews.
Journal of Head Trauma Rehabilitation Journal of Applied Research in Intellectual Disabilities	REHABILITATION - SSCI; REHABILITATION - SCIE REHABILITATION - SSCI		Lippincott Williams & Wilkins Wiley	English English	Spinal Cord's sister journal Spinal Cord Series and Cases: Clinical Management in Spinal Cord Disorders publishes high quality case reports, small case series, pilot and retrospective studies perspectives, Pulse survey articles, Point-couterpoint articles, correspondences and book reviews. It snecialises in material that addresses all asnects of life for nersons with sninal cord inituries or The Journal of Head Trauma Rehabilitation is a leading, peer-reviewed resource that provides up-to- date information on the clinical management and rehabilitation of persons with traumatic brain injuries. Six issues each year aspire to the vision of "knowledge informing care" and include a wide range of articles, topical issues, commentaries and special features. It is the official iournal of the JARID is an international, peer-reviewed journal which draws together findings derived from original applied research in intellectual disabilities. The journal is an important forum for the dissemination of ideas to promote valued lifestyles for people with intellectual disabilities. It reports on research from the UK and overseas by authors from all relevant professional disciplines. It is aimed at an international multi-disciplinest readership.
					international, multi-disciplinary readership. The topics it covers include community living, quality of life, challenging behaviour,

communication, sexuality, medication, ageing, supported employment, family issues, mental health, physical health, autism, economic issues, social networks, staff stress, staff training, epidemiology

Scandinavian Journal of Occupational Therapy	REHABILITATION - SSCI; REHABILITATION - SCIE	2.611	Taylor & Francis	English	The Scandinavian Journal of Occupational Therapy is a well-established and internationally recognized journal that aims to provide a forum for occupational therapy and occupational science research worldwide and especially the Nordic countries. The journal welcomes contributions mirroring a wide range of societal levels, from the individual to the surrounding contexts of society.
					Scandinavian Journal of Occupational Therapy welcomes original research articles such as:
					 Theoretical and conceptual frameworks Instrument development and psychometrics Development, evaluation and implementation of interventions Development of the profession and the subject occupational therapy and occupational science
					Scandinavian Journal of Occupational Therapy accepts the following types of articles:
					Full length research articles Case reports
Journal of Mental Health Research in Intellectual Disabilities	REHABILITATION - SSCI	2.586	Routledge Journals, Taylor & Francis	English	The Journal of Mental Health Research in Intellectual Disabilities, the official research journal of NADD, is an international, peer-reviewed interdisciplinary journal with the purpose of reporting original scientific and scholarly contributions to advance knowledge about mental health issues among persons with intellectual and developmental disabilities. The journal addresses issues related to the full range of mental health concerns including neuro-developmental disorders /autism spectrum disorders, severe behavior problems, criminality, substance abuse, and genetic phenotypes across the life span. The journal seeks to publish empirically-based research such as epidemiological
B.1.170	P				or observational studies, studies of prognosis and diagnosis, related to the development and/or
Rehabilitation Psychology	REHABILITATION - SSCI	2.564	Educational Publishing Foundation-APA	English	Rehabilitation Psychology ® is a quarterly peer-reviewed journal that is dedicated to the advancement of the science and practice of rehabilitation psychology. Rehabilitation Psychology is the official scientific journal of APA's Division 22 (Rehabilitation Psychology).
					Rehabilitation psychology is a specialty within psychology that focuses on the study and application of psychological knowledge and skills on behalf of individuals with disabilities and chronic health conditions in order to maximize their health and welfare, independence and choice, functional abilities, and social role participation, across the lifespan.
					Rehabilitation psychologists consider the entire network of biological, psychological, social, environmental, and political factors that affect the functioning of persons with disabilities or chronic conditions. Given the breadth of rehabilitation psychology, the journal's scope is broadly defined.
Disability and Health Journal	REHABILITATION - SSCI; REHABILITATION - SCIE	2.554	Elsevier Science	English	The journal publishes a wide range of original research articles, including experimental, observational, survey, mechanistic, epidemiological, qualitative, and psychometric studies. Clinical trials, early phase research (e.g., intervention development, proof-of-concept studies, and feasibility Disability and Health Journal is a scientific, scholarly, and multidisciplinary journal for reporting original contributions that advance knowledge in disability and health. Topics may be related to global health, quality of life, and specific health conditions as they relate to disability. Such contributions include: • Reports of empirical research on the characteristics of persons with disabilities, environment,
					health outcomes, and determinants of health • Reports of empirical research on the Systematic or other evidence-based reviews and tightly conceived theoretical interpretations of research literature
					 Reports of empirical research on the Evaluative research on new interventions, technologies, and programs Reports of empirical research on the Reports on issues or policies affecting the health and/or quality of life for persons with disabilities, using a scientific base.
					Disability and Health Journal describes and analyzes health and health related states using
Journal of Fluency Disorders	REHABILITATION - SSCI; REHABILITATION - SCIE	2.538	Elsevier Science	English	Now recognized as the only publication devoted specifically to fluency, the Journal of Fluency Disorders provides comprehensive coverage of clinical, experimental, and theoretical aspects of stuttering, including the latest remediation techniques. As the official journal of the International Fluency Association, the journal features full-length research and clinical reports; methodological, the provided and philosophical articles projects and applied and philosophical articles projects and projects are projects are projects are projects and projects are projects and projects are projects and projects are projects are projects are projects and projects are projects and projects are projects are projects are projects are projects are projects are projects and projects are projects are projects are projects are projects are projects and projects are projects ar

European Journal of Cancer Care	REHABILITATION - SCIE; REHABILITATION - SSCI	2.520	Wiley	English	The European Journal of Cancer Care aims to encourage comprehensive, multiprofessional cancer care across Europe and internationally. It publishes original research reports, literature reviews, guest editorials, letters to the Editor and special features on current issues affecting the care of cancer patients. The Editor welcomes contributions which result from team working or collaboration between different health and social care providers, service users, patient groups and the voluntary sector in the areas of:
					 Primary, secondary and tertiary care for cancer patients Multidisciplinary and service-user involvement in cancer care Rehabilitation, supportive, palliative and end of life care for cancer patients Policy, service development and healthcare evaluation in cancer care Psychosocial interventions for patients and family members International perspectives on cancer care
Musculoskeletal Science and Practice	REHABILITATION - SCIE	2.520	Elsevier	English	Musculoskeletal Science & Practice, international journal of musculoskeletal physiotherapy, is a peer-reviewed international journal (previously Manual Therapy), publishing high quality original research, review and Masterclass articles that contribute to improving the clinical understanding of appropriate care processes for musculoskeletal disorders. The journal publishes articles that influence or add to the body of evidence on diagnostic and therapeutic processes, patient centered care, guidelines for musculoskeletal therapeutics and theoretical models that support developments in assessment, diagnosis, clinical reasoning and interventions.
					Papers published in Musculoskeletal Science & Practice are of international relevance and have an over-arching applied clinical focus or serve to inform clinical approaches.
					The journal publishes papers that show depth, rigour, originality and high quality presentation which inform the evidence base relating to mechanisms of function/dysfunction; treatment methods; best clinical practice; clinical reasoning and decision making processes; assessment and clinical
AJIDD-American Journal on Intellectual and Developmental Disabilities	REHABILITATION - SSCI	2.500	American Association on Intellectual Developmental Disabilities	English	The American Journal on Intellectual and Developmental Disabilities (AJIDD) is among the top three journals in the special education and rehabilitation fields according to the latest industry impact factor rankings. The AJIDD reports current and critical research in biological, behavioral, and educational sciences. It is a singular, multidisciplinary resource in the causes, treatment, and prevention of intellectual disabilities. The premier journal in its field for more than 100 years, the
Disability and Rehabilitation: Assistive Technology	REHABILITATION - SSCI	2.500	Taylor & Francis	English	Disability and Rehabilitation: Assistive Technology along with Disability and Rehabilitation seek to encourage a better understanding of all aspects of disability and to promote rehabilitation science, practice and policy aspects of the rehabilitation process. Taken together, both journals represent an important forum for the dissemination and exchange of ideas amongst global health practitioners and researchers.
					The mission of Disability and Rehabilitation: Assistive Technology is to advance the practice and science of interdisciplinary and integrative assistive technology service delivery and product design internationally so that persons with disabilities, chronic illnesses, and challenges to the performance of activities and participation in life roles, achieve enhanced functioning and life quality.
					Assistive technology focuses on both equipping individuals with the most appropriate technologies and also removing barriers to functioning that exist in the environment. Topics range from everyday/mainstream to specialized devices, and include: exoskeletons and robotics; smart homes; information and communication technologies and computerized systems; ergonomics; universal design; ambient assistive technology; tele-rehabilitation; job and environmental accommodations; and methods of service delivery.
Research and Practice for Persons with Severe Disabilities	REHABILITATION - SSCI	2.486	SAGE	English	Research and Practice for Persons with Severe Disabilities (RPSD), published in association with TASH, is a critically acclaimed and widely read scientific journal in the field of disabilities. RPSD publishes breakthrough articles on such topics as inclusion, augmentative and alternative communication, supported living, supported employment, early childhood issues, self-advocacy, positive behavioral supports, disability rights and issues of concern to families. This journal is the
International Journal of Speech-Language Pathology	REHABILITATION - SSCI; REHABILITATION - SCIE	2.484	Taylor & Francis	English	International Journal of Speech-Language Pathology is an international journal which promotes discussion on a broad range of current clinical and theoretical issues. Submissions may include experimental, review and theoretical discussion papers, with studies from either quantitative and/or qualitative frameworks. Articles may relate to any area of child or adult communication or dysphagia, furthering knowledge on issues related to etiology, assessment, diagnosis, intervention, or theoretical frameworks. Articles can be accompanied by supplementary audio and video files that

Assistive Technology	REHABILITATION - SSCI	2.431	Taylor & Francis	English	Assistive Technology is an applied, scientific publication in the multi-disciplinary field of technology for people with disabilities. The journal's purpose is to foster communication among individuals working in all aspects of the assistive technology arena including researchers, developers, clinicians, educators and consumers. The journal will consider papers from all assistive technology applications. Only original papers will be accepted. Technical notes describing preliminary techniques, procedures, or findings of original scientific research may also be submitted. Letters to the Editor are welcome. Books for review may be sent to authors or publisher. All submitted manuscripts are subject to initial appraisal by the Editor, and, if found suitable for further
Journal of Intellectual Disability Research	REHABILITATION - SSCI	2.424	Wiley	English	The Journal of Intellectual Disability Research is devoted exclusively to the scientific study of intellectual disability and publishes papers reporting original observations in this field. JIDR also publishes scientific research on autism where the populations studied have an intellectual disability (or autism, where results are reported on participants with both autism and intellectual disability). Submissions are welcomed from any academic discipline contributing to the scientific study of intellectual disability, on research drawing from several disciplines, or on any topic of relevance to the lives of individuals with intellectual disability. Research questions should be of broad relevance to the scientific field of intellectual disability. Studies using well-reported and robust research methods, including qualitative methods, are welcomed. Papers using systematic literature review
American Journal of Speech-Language Pathology	REHABILITATION - SCIE; REHABILITATION - SSCI	2.408	American Speech- Language- Hearing Association	English	AJSLP publishes peer-reviewed research and other scholarly articles on all aspects of clinical practice in speech-language pathology. The journal is an international outlet for clinical research pertaining to screening, detection, diagnosis, management, and outcomes of communication and swallowing disorders across the lifespan as well as the etiologies and characteristics of these disorders. Because of its clinical orientation, the journal disseminates research findings applicable to diverse aspects of clinical practice in speech-language pathology. AJSLP seeks to advance evidence-based practice by disseminating the results of new studies as well as providing a forum for critical reviews and meta-analyses of previously published work.
Journal of Electromyography and Kinesiology	REHABILITATION - SCIE	2.368	Elsevier Science	English	Journal of Electromyography & Kinesiology is the primary source for outstanding original articles on the study of human movement from muscle contraction via its motor units and sensory system to integrated motion through mechanical and electrical detection techniques. As the official publication of the International Society of Electrophysiology and Kinesiology, the journal is dedicated to publishing the best work in all areas of electromyography and kinesiology, including: control of movement, muscle fatigue, muscle and nerve properties, joint biomechanics and electrical stimulation. Applications in rehabilitation, sports & exercise, motion analysis, ergonomics, alternative & complimentary medicine, measures of human performance and technical articles on electromyographic signal processing are welcome.
Physical Therapy in Sport	REHABILITATION - SCIE	2.365	Churchill Livingstone	English	Physical Therapy in Sport is an international peer-reviewed journal that provides a forum for the publication of research and clinical practice material relevant to the healthcare professions involved in sports and exercise medicine, and rehabilitation. The journal publishes material that is indispensable for day-to-day practice and continuing professional development. Physical Therapy in Sport covers topics dealing with the diagnosis, treatment, and prevention of injuries, as well as more general areas of sports and exercise medicine and related sports science. The journal publishes original research, case studies, reviews, masterclasses, papers on clinical
Physical & Occupational Therapy in Pediatrics	REHABILITATION - SSCI; REHABILITATION - SCIE	2.360	Taylor & Francis	English	The highly acclaimed Physical & Occupational Therapy in Pediatrics (POTP) delivers vital information to all therapists involved in developmental and physical rehabilitation of infants, children and youth. Designed for PT and OT pediatric professionals in hospitals, rehabilitation centers, schools, and health and human services agencies, the journal provides the latest clinical research and practical applications that no professional will want to miss. Current clinical advances and research findings are important for all therapists, and each issue of this journal brings therapists the latest discoveries in therapy as related to their work with children. With an emphasis on implications and applications for therapy practice, the journal includes case reports, and reviews/critiques of new measures.

Highlights of the journal include:

- \bullet Editorials and Commentaries a forum in which the Editors, Editorial Board members, and invited therapists present perspectives on important issues
- · Original research reports
- Evidence to Practice Commentary featuring additional perspectives from an expert in the field on a particular issue raised in one of the articles
- Perspectives, theories and models for practice.
- Systematic reviews of research for a focused clinical question
- Appraisal of new tests and measures

Brain Injury	REHABILITATION - SSCI; REHABILITATION - SCIE	2.311	Taylor & Francis	English	Brain Injury publishes critical information relating to research and clinical practice, adult and pediatric populations. The journal covers a full range of relevant topics relating to clinical, translational, and basic science research. Manuscripts address emergency and acute medical care, acute and post-acute rehabilitation, family and vocational issues, and long-term supports. Coverage includes assessment and interventions for functional, communication, neurological and psychological disorders.
Developmental Neurorehabilitation	REHABILITATION - SCIE	2.308	Taylor & Francis	English	Developmental Neurorehabilitation aims to enhance recovery, rehabilitation and education of people with brain injury, neurological disorders, and other developmental, physical and intellectual disabilities. Although there is an emphasis on childhood, developmental disability can be considered from a lifespan perspective. This perspective acknowledges that development occurs throughout a person's life and thus a range of impairments or diseases can cause a disability that can affect development at any stage of life.
					Examples of topics appropriate for Developmental Neurorehabilitation include:
					The longitudinal consequences of neurological insult during childhood and the impact of such injury in later life Childhood neurological disorders and treatment, encompassing factors of lifespan, neurological recovery and intervention at experimental, clinical and theoretical levels Behavioral interventions focused on improving challenging behavior, communication, social skills, adaptive behavior, educational outcomes, and other factors known to influence independence and quality of life Studies investigating diagnosis and assessment instruments for early screening or diagnosis as well as behavioral, social and language characteristics Studies describing characteristics and individual differences of people with brain injury, neurological disorders, and other developmental, physical and intellectual disabilities as well as the factors related to these characteristics
					In order to best serve clinicians and researchers, we seek to include an equal representation of basic and clinical research on development, recovery and rehabilitation. We wish to actively pursue the
PM&R	REHABILITATION - SCIE	2.298	Wiley	English	PM&R is the official scientific journal of AAPM&R. The Academy launched this peer-reviewed journal in 2009 specifically for the physical medicine and rehabilitation physician. PM&R was selected for MEDLINE indexing later that year.
Journal of Speech, Language, and Hearing Research	REHABILITATION - SSCI; REHABILITATION - SCIE	2.297	American Speech- Language- Hearing Association	English	The goal of the publication is to advance education and impact the specialty through the timely delivery of clinically relevant and evidence-based research and review information. Topics include: acute and chronic musculoskeletal disorders and pain. neurologic conditions involving the central JSLHR publishes peer-reviewed research and other scholarly articles on the normal and disordered processes in speech, language, hearing, and related areas such as cognition, oral-motor function, and swallowing. The journal is an international outlet for both basic research on communication processes and clinical research pertaining to screening, diagnosis, and management of communication disorders as well as the etiologies and characteristics of these disorders. JSLHR seeks to advance evidence-based practice by disseminating the results of new studies as well as providing a forum for critical reviews and meta-analyses of previously published work.
Journal of Communication Disorders	REHABILITATION - SSCI; REHABILITATION - SCIE	2.288	Elsevier Science	English	The broad field of communication sciences and disorders, including speech production and perception; anatomy and physiology of speech and voice; genetics, biomechanics, and other basic The Journal of Communication Disorders publishes original articles on topics related to disorders of speech, language and hearing. Authors are encouraged to submit reports of experimental or descriptive investigations (research articles), review articles, tutorials or discussion papers, or letters to the editor ("short communications"). Please note that we do not accept case studies unless they
Physiotherapy Theory and Practice	REHABILITATION - SCIE	2.279	Taylor & Francis	English	The aim of Physiotherapy Theory and Practice is to provide an international, peer-reviewed forum for the publication, dissemination, and discussion of recent developments and current research in physiotherapy/physical therapy. The journal accepts original quantitative and qualitative research reports, theoretical papers, systematic literature reviews, clinical case reports, and technical clinical
American Journal of Occupational Therapy	REHABILITATION - SSCI	2.246	American Occupational Therapy Association	English	The primary mission of AJOT is to publish peer-reviewed research examining the effectiveness and efficiency of occupational therapy practice so that occupational therapy professionals can make informed, evidence-based decisions about best practice. In addition, the journal aims to publish (1) research documenting the reliability and validity of occupational therapy instruments; (2) studies demonstrating a relationship between occupational engagement and the facilitation of community participation and health; and (3) articles that provide a forum for scholars to debate professional issues that affect education, practice, and research.

Augmentative and Alternative Communication	REHABILITATION - SSCI	2.214	Taylor & Francis	English	As the official journal of the International Society for Augmentative and Alternative Communication (ISAAC), Augmentative and Alternative Communication (AAC) publishes scientific articles related to the field of augmentative and alternative communication (AAC) that report research concerning assessment, treatment, rehabilitation, and education of people who use or have the potential to use AAC systems; or that discuss theory, technology, and systems development relevant to AAC. The broad range of topic included in the Journal reflects the development of this field internationally. Manuscripts submitted to AAC should fall within one of the following categories, AND MUST COMPLY with associated page maximums listed on page 3 of the Manuscript Preparation Guide.
					 Research articles (full peer review), These manuscripts report the results of original empirical research, including studies using qualitative and quantitative methodologies, with both group and single-case experimental research designs (e.g., Binger et al., 2008; Petroi et al., 2014). Technical, research, and intervention notes (full peer review): These are brief manuscripts that address methodological, statistical, technical, or clinical issues or innovations that are of relevance to the AAC community and are designed to bring the research community's attention to areas that have been minimally or poorly researched in the past (e.g., research note: Thunberg et al., 2016; intervention notes: Laubscher et al., 2019). Systematic research reviews and meta-analyses (full peer review): These papers identify, select, synthesize, and appraise all high quality research evidence relevant to a particular research question and consider implications for evidence-based practice and directions for future research (e.g., Allen et al., 2017; Sievers et al. 2018). Tutorials (full peer review): This type of manuscript explains theories, ideas, concepts, or practices that may be new to AAC researchers and practitioners, but have important implications for
American Journal of Physical Medicine &	REHABILITATION - SCIE	2.159	Lippincott Williams &	English	the field (e.g., Holyfield et al., 2019; Mitteer et al., 2020). The mission of the American Journal of Physical Medicine & Rehabilitation is to promote excellence in education, scientific research and evidence-based clinical practice.
Rehabilitation			Wilkins		American Journal of Physical Medicine & Rehabilitation focuses on the practice, research and educational aspects of physical medicine and rehabilitation. Monthly issues keep physiatrists up-to-date on the optimal functional restoration of patients with disabilities, physical treatment of neuromuscular impairments, the development of new rehabilitative technologies, and the use of electrodiagnostic studies. The Journal publishes cutting-edge basic and clinical research, clinical case reports and in-depth topical reviews of interest to rehabilitation professionals.
					Topics include prevention, diagnosis, treatment, and rehabilitation of musculoskeletal conditions, brain injury, spinal cord injury, cardiopulmonary disease, trauma, acute and chronic pain,
International Journal of Osteopathic Medicine	REHABILITATION - SCIE	2.149	Elsevier Science	English	The International Journal of Osteopathic Medicine is a peer-reviewed journal that provides for the publication of high quality research articles and review papers that are as broad as the many disciplines that influence and underpin the principles and practice of osteopathic medicine. Particular emphasis is given to basic science research, clinical epidemiology and health social science in relation to osteopathy and neuromusculoskeletal medicine.
					The Editorial Board encourages submission of articles based on both quantitative and qualitative research designs. The Editorial Board also aims to provide a forum for discourse and debate on any aspect of osteopathy and neuromusculoskeletal medicine with the aim of critically evaluating existing practices in regard to the diagnosis, treatment and management of patients with neuromusculoskeletal disorders and somatic dysfunction. All manuscripts submitted to the IJOM are subject to a blinded review process. The categories currently available for publication include reports of original research, review papers, commentaries and articles related to clinical practice, including case reports. Further details can be found in the IJOM Instructions for Authors. Manuscripts are accepted for publication with the understanding that no substantial part has been, or will be published elsewhere.
					New section - Osteopathic Education: Papers which focus on osteopathic education in the clinical/practice environment and in academia are welcomed for a new section of the International Journal of Osteopathic Education. Papers from academics involved in the teaching of students in the classroom are welcomed alongside those from clinical staff involved in the education of osteopaths in practice, through post-qualifying education and training initiatives. It is essential that the avidance base to education is developed and this is

and training initiatives. It is essential that the evidence-base to education is developed and this is reflected in papers submitted for publication. In alignment with the journal's overall Aims and

NeuroRehabilitation Topics in Stroke	REHABILITATION - SSCI; REHABILITATION - SCIE		IOS Press	English English	NeuroRehabilitation, an international, interdisciplinary, peer-reviewed journal, publishes manuscripts focused on scientifically based, practical information relevant to all aspects of neurologic rehabilitation. We publish unsolicited papers detailing original work/research that covers the full life span and range of neurological disabilities including stroke, spinal cord injury, traumatic brain injury, neuromuscular disease and other neurological disorders. We also publish thematically organized issues that focus on specific clinical disorders, types of therapy and age groups. Proposals for thematic issues and suggestions for issue editors are welcomed. Readers are encouraged to submit original research which includes experimental investigations or case reports. Reviews of rehabilitation literature will be published as well. Manuscripts are given blind, peer review, and Topics in Stroke Rehabilitation is the leading journal devoted to the study and dissemination of
Rehabilitation	SCIE		Francis		interdisciplinary, evidence-based, clinical information related to stroke rehabilitation. The journal's scope covers physical medicine and rehabilitation, neurology, neurorehabilitation, neural engineering and therapeutics, neuropsychology and cognition, optimization of the rehabilitation system, robotics and biomechanics, pain management, nursing, physical therapy, cardiopulmonary fitness, mobility, occupational therapy, speech pathology and communication. There is a particular focus on stroke recovery, improving rehabilitation outcomes, quality of life, activities of daily living, motor control, family and care givers, and community issues. The journal reviews and reports clinical practices, clinical trials, state-of-the-art concepts, and new developments in stroke research and patient care. Both primary research papers, reviews of existing literature, and invited editorials, are included. Sharply-focused, single-issue topics, and the latest in clinical research, provide in-depth knowledge.
Journal of Intellectual & Developmental Disability	REHABILITATION - SSCI	2.093	Routledge Journals, Taylor & Francis	English	Journal of Intellectual and Developmental Disability (formerly the Australia and New Zealand Journal of Developmental Disabilities) is the official journal of the Australasian Society for Intellectual Disability (ASID). JIDD is an international, multidisciplinary journal in the field of intellectual and developmental disability. JIDD publishes substantive original research from both established and newer academic disciplines (such as sociology and geography) that address the situation and concerns of people with intellectual disabilities, and their families and staff. It accepts research into commonly associated developmental and neurodevelopmental disabilities only when
Chiropractic & Manual Therapies	REHABILITATION - SCIE	2.073	BMC	English	Chiropractic & Manual Therapies publishes manuscripts on all aspects of evidence-based information that is clinically relevant to chiropractors, manual therapists and related health care professionals.
Journal of Intellectual Disabilities	REHABILITATION - SSCI	2.049	SAGE	English	Chiropractic & Manual Therapies is an open access journal that aims to provide chiropractors, manual therapists and related health professionals with clinically relevant, evidence-based information. Chiropractic and other manual therapies share a relatively broad diagnostic practice and treatment scope, emphasizing the structure and function of the body's musculoskeletal framework (especially the spine). The practices of chiropractic and manual therapies are closely associated with treatments including manipulation, which is a key intervention. The range of services provided can also include massage, mobilisation, physical therapies, dry needling, lifestyle and dietary counselling plus a variety of other associated therapeutic and rehabilitation approaches. The principal aim of the journal is to provide a peer-reviewed medium for the exchange of best practice, knowledge and research between academic and professional disciplines from education, social and health settings to bring about advancement of services for people with intellectual disabilities.
					The idea of a practice-led journal is both exciting and timely. This journal serves as a medium for all those involved with people with intellectual disabilities to submit and publish papers on issues relevant to promoting services for people with intellectual disabilities.
					The editorial committee and advisory board membership will be multi-professional to reflect the multidisciplinary nature of service provision for people with intellectual disabilities. Manuscripts submitted for publication must be highly relevant to practitioners and presented in a scholarly fashion.
					I. I 2005 I

In January 2005 Journal of Learning Disabilities was renamed Journal of Intellectual Disabilities. Within the UK the term 'learning disability' is still a relatively new term that is used to describe a group of people with significant developmental delay resulting in arrested or incomplete achievement of the 'normal' milestones of human development. Elsewhere in the world terms such mental retardation and mental handicap are also used, but such terms are felt to portray negative imagery concerning people with disability. Therefore changing the name of our Journal was fraught with problems. This is because we wanted the Journal to have a title that had international meaning,

Journal of Early Intervention	REHABILITATION - SSCI	2.023	SAGE	English	The Journal of Early Intervention (JEI) publishes articles related to research and practice in early intervention for infants and young children with special needs and their families. Early intervention is defined broadly as procedures that facilitate the development of infants and young children who have special needs or who are at risk for developmental disabilities. The childhood years in which early intervention might occur begin at birth, or before birth for some prevention programs, and extend through the years in which children traditionally begin elementary school.
					Authors are strongly encouraged to submit the following types of manuscripts to JEI: (a) research
Journal of Hand Therapy	REHABILITATION - SCIE	1.950	Hanley & Belfus Elsevier	- English	reports that have clear relevance for early intervention practices, (b) scholarly reviews that have implications for practice, (c) policy analyses that contain implications for the practice of early. The Journal of Hand Therapy is designed for hand therapists, occupational and physical therapists, and other hand specialists involved in the rehabilitation of disabling hand problems. The Journal
Intellectual and Developmental Disabilities	REHABILITATION - SSCI	1.940	American Association on Intellectual Developmental Disabilities	English	functions as a source of education and information by publishing scientific and clinical articles. Journal of Intellectual and Developmental Disability (formerly the Australia and New Zealand Journal of Developmental Disabilities) is the official journal of the Australasian Society for Intellectual Disability (ASID). JIDD is an international, multidisciplinary journal in the field of intellectual and developmental disability. JIDD publishes substantive original research from both established and newer academic disciplines (such as sociology and geography) that address the situation and concerns of people with intellectual disabilities, and their families and staff. It accepts research into commonly associated developmental and neurodevelopmental disabilities only when
Psychiatric Rehabilitation Journal	REHABILITATION - SSCI	1.935	APA	English	Psychiatric Rehabilitation Journal ® (PRJ) is a quarterly journal publishing original, peer-reviewed scholarly work that advances the evidence for and understanding of psychosocial treatment and recovery of people with psychiatric disabilities, consistent with the principles and values of psychiatric rehabilitation and person-centered care. Manuscripts published in PRJ have implications for the interdisciplinary practice of psychiatric rehabilitation.
					PRJ gives priority to impactful research that is directly applicable to the development,
					administration, and delivery of psychiatric rehabilitation services.
					Topics within the purview of PRJ include but are not limited to:
					 studies of the development, refinement, or evaluation of psychiatric rehabilitation interventions including case studies, open pilot studies, quasi-experimental designs, and randomized controlled trials; research exploring relevant domains of functioning or targets of psychiatric rehabilitation
					intervention; • research on the development or psychometric evaluation of instruments designed to measure
					constructs relevant to psychiatric rehabilitation; • research on special populations of people with psychiatric disabilities, including disparities in

Physical Medicine and Rehabilitation Clinics of North America	REHABILITATION - SCIE	1.784	WB Saunders- Elsevier	English	• policy development • service design Physical Medicine and Rehabilitation Clinics updates you on the latest trends in patient management, keeps you up to date on the newest advances, and provides a sound basis for choosing treatment options. Each issue focuses on a single topic in physical and rehabilitation medicine and is presented under the direction of an experienced editor. Topics include brain injury rehabilitation, electrodiagnosis, geriatric rehabilitation, musculoskeletal medicine, neuromuscular medicine, pain management, spine medicine, sports medicine/ortho rehabilitation, and stroke/neurologic rehabilitation.

OTJR-Occupation Participation and Health	REHABILITATION - SSCI	1.768	SAGE	English	The aim of OTJR: Occupation, Participation and Health is to advance knowledge and science in occupational therapy and related fields, nationally and internationally, through the publication of scholarly literature and research. The journal publishes research that advances the understanding of occupation as it relates to participation and health. The following topics should guide authors seeking to publish in the journal:
					The relationship of occupation to health, well-being and/or quality of life The influence of body systems or body function on occupational performance and/or social participation The psychometric properties of measures or methodologies that advance understanding of performance, occupation, and participation The outcomes or effects of interventions that influence performance, occupation, health, and/or
Journal of Deaf Studies and Deaf Education	REHABILITATION - SSCI	1.763	Oxford University Press	English	The Journal of Deaf Studies and Deaf Education is a peer-reviewed scholarly journal integrating and coordinating basic and applied research relating to individuals who are deaf, including cultural, developmental, linguistic, and educational topics.
Seminars in Speech and Language	REHABILITATION - SCIE	1.761	Thieme Medical	English	JDSDE addresses issues of current and future concern to allied fields, encouraging interdisciplinary discussion. The journal promises a forum that is timely, of high quality, and accessible to researchers, educators, and lav audiences. Instructions for contributors appear at the back of each Seminars in Speech and Language is a topic driven review journal that covers the entire spectrum of speech language pathology. In each issue, a leading specialist covers diagnostic procedures, screening and assessment techniques, treatment protocols, as well as short and long-term management practices in areas such as apraxia, communication, stuttering, autism, dysphagia, attention, phonological intervention, memory as well as other disorders.
Journal of Music Therapy	REHABILITATION - SSCI	1.742	Oxford University Press	English	The Journal of Music Therapy seeks to advance research, theory, and practice in music therapy through the dissemination of scholarly work. Its mission is to promote scholarly activity in music therapy and to foster the development and understanding of music therapy and music-based interventions. To this end, the journal publishes all types of research, including quantitative, qualitative, historical, philosophical, theoretical, and musical, and may include discipline, profession, and foundational research topics. The journal strives to present a variety of research approaches and topics, to promote critical inquiry, and to serve as a resource and forum for researchers, educators, and clinicians in music therapy and related professions.
					The Journal of Music Therapy publishes research articles that advance the science and practice of music therapy. All papers for publication are selected on the basis of their quality and contribution
Brain Impairment	REHABILITATION - SCIE	1.727	Cambridge University Press	English	The journal addresses topics related to the aetiology, epidemiology, treatment and outcomes of brain impairment with a particular focus on the implications for functional status, participation, rehabilitation and quality of life. Disciplines reflect a broad multidisciplinary scope and include neuroscience, neurology, neuropsychology, psychiatry, clinical psychology, occupational therapy, physiotherapy, speech pathology, social work, and nursing. Submissions are welcome across the full
Journal of Developmental and Physical Disabilities	REHABILITATION - SSCI	1.710	Springer/Plenum	English	The Journal of Developmental and Physical Disabilities is an interdisciplinary forum for the publication of original research and clinical reports from a variety of fields serving persons with developmental and physical disabilities. Submissions from researchers, clinicians, and related professionals in the fields of psychology, rehabilitation, special education, kinesiology, counseling, social work, psychiatry, nursing, and rehabilitation medicine are considered. Investigations utilizing group comparisons as well as single-case experimental designs are of primary interest. In addition, case studies that are of particular clinical relevance or that describe innovative evaluation and intervention techniques are welcome. All research and clinical reports should contain sufficient procedural detail so that readers can clearly understand what was done, how it was done, and why the strategy was selected. Rigorously conducted replication studies utilizing group and single-case designs are welcome irrespective of results obtained. In addition, systematic reviews, meta-analyses, and theoretical discussions that contribute substantially to understanding the problems and strengths of persons with developmental and physical disabilities are considered for publication. Authors are
Journal of Disability Policy Studies	REHABILITATION - SSCI	1.696	SAGE	English	The Journal of Disability Policy Studies addresses compelling, variable issues in ethics, policy, and law related to individuals with disabilities. A major focus is quantitative and qualitative policy research. Articles have implications in fields such as education, law, sociology, public health, family studies, medicine, social work, and public administration. Occasional special series discuss current problems or areas needing more in-depth research, for example, disability and aging, policy
Rehabilitation Nursing	REHABILITATION - SSCI; REHABILITATION - SCIE	1.625	Lippincott Williams & Wilkins	English	Rehabilitation Nursing is a refereed, award-winning publication and is the official journal of the Association of Rehabilitation Nurses. Its purpose is to provide rehabilitation professionals with high-quality articles with a primary focus on rehabilitation nursing. Topics range from administration and research to education and clinical topics, and nursing perspectives, with continuing education opportunities in every issue.

Canadian Journal of Occupational Therapy-Revue Canadienne d	REHABILITATION - SSCI; REHABILITATION - SCIE	1.614	SAGE	English	The mission of The Canadian Journal of Occupational Therapy is to provide a forum for leading-edge occupational therapy scholarship that advances theory, practice, research, and policy. The vision is to be a high-quality scholarly journal that is at the forefront of the science of occupational therapy and a destination journal for the top scholars in the field, globally. Consistent with its mission and which the principal content of the insural desirts amplified findings and theoretical/occupantual
Rehabilitation Counseling Bulletin	REHABILITATION - SSCI	1.614	SAGE	English	Rehabilitation Counseling Bulletin (RCB) publishes articles on rehabilitation counseling with a major emphasis on data-based research reports, although other types of contributions to professional knowledge in rehabilitation counseling will be considered. Examples include articles that explain an innovative technique or application, point/ counterpoint debates on a current controversy challenging the profession, or insightful essays on an important issue. Contributions of these kinds may be considered for a special section of RCB. Article topics cover a wide range—from ethical dilemmas related to counseling clients with HIV/AIDS to clinical problem solving in micro-case management.
Education and Training in Autism and Developmental Disabilities	REHABILITATION - SSCI	1.578	Council for Exceptional Children	English	Education and Training in Autism and Developmental Disabilities focuses on the education and welfare of persons with autism and developmental disabilities. ETADD invites research and expository manuscripts and critical review of the literature. Major emphasis is on identification and assessment, educational programming, characteristics, training of instructional personnel, habilitation, prevention, community understanding and provisions, and legislation.
International Journal of Disability, Development and Education	REHABILITATION - SSCI	1.543	Routledge Journals, Taylor & Francis	English	Three reviewers evaluate each manuscript anonymously. Criteria for acceptance include the Founded in 1954, the International Journal of Disability, Development and Education (IJDDE) is a multi-disciplinary peer-reviewed journal with an international focus. It provides a single source of information on the education and development of persons with disabilities. IJDDE aims to publish the very best research and review articles concerned with all aspects of education, human development, special education and rehabilitation.
					The content of IJDDE reflects a variety of topics, disciplines, research methods and cultural perspectives. Various orientations are represented, including education and special education, psychology, allied health, social work and psychiatry. Contributions from developed and developing countries ensure a truly international perspective.
Annals of Dyslexia	REHABILITATION - SSCI	1.515	Springer	English	Annals of Dyslexia is an interdisciplinary, peer-reviewed journal dedicated to the scientific study of dyslexia, its comorbid conditions; and theory-based practices on remediation, and intervention of dyslexia and related areas of written language disorders including spelling, composing and mathematics. Primary consideration for publication is given to original empirical studies, significant
Education and Treatment of Children	REHABILITATION - SSCI	1.491	Springer Nature	English	Education and Treatment of Children (ETC) disseminates information about behavioral assessments or interventions for children and youth who are at-risk for or experiencing emotional or behavioral problems. Publications should directly improve the effectiveness of services provided by educators, parents, child-care providers, or mental health professionals for children with emotional or behavioral problems. Therefore, authors must compose their manuscripts in a clear, concise style that will be readily understood by both scientists and practitioners.
					Submissions appropriate for publication in ETC include experimental research (Original Articles), data-based case studies (Brief Reports), literature reviews (Reviews), issue-oriented papers (Commentaries), and book reviews. All submissions should emphasize impact of the paper on the practical concerns of professionals serving children and youth who are at-risk for or experiencing
Topics in Language Disorders	REHABILITATION - SSCI	1.484	Lippincott Williams & Wilkins	English	Topics in Language Disorders (TLD) is a double-blind peer-reviewed topical journal that has dual purposes: (1) to serve as a scholarly resource for researchers and clinicians who share an interest in spoken and written language development and disorders across the lifespan, with a focus on interdisciplinary and international concerns; and (2) to provide relevant information to support
International Journal of Rehabilitation Research	REHABILITATION - SSCI; REHABILITATION - SCIE	1.479	Lippincott Williams & Wilkins	English	International Journal of Rehabilitation Research is a quarterly, peer-reviewed, interdisciplinary forum for the publication of research into functioning, disability and contextual factors experienced by persons of all ages in both developed and developing societies. The wealth of information offered makes the journal a valuable resource for researchers, practitioners, and administrators in such fields as rehabilitation medicine, outcome measurement nursing, social and vocational rehabilitation/case management, return to work, special education, social policy, social work and social welfare, sociology, psychology, psychiatry assistive technology and environmental factors/disability. Areas of interest include functioning and disablement throughout the life cycle; rehabilitation programmes for persons with physical, sensory, mental and developmental disabilities; measurement of functioning and disability; special education and vocational rehabilitation; equipment access and transportation;
Infants & Young Children	REHABILITATION - SSCI	1.475	Lippincott Williams & Wilkins	English	information technology; independent living; consumer, legal, economic and sociopolitical aspects of Infants & Young Children is an interdisciplinary journal focusing on children with disabilities or at risk for disability age birth to five years and their families. Of special interest are articles involving innovative interventions, summaries of important research developments and their implications for practice, updates for high priority topic areas, balanced presentations of controversial issues, and articles that address issues involving policy, professional training, new conceptual models, and empirical studies.

Sexuality and Disability	REHABILITATION - SSCI	1.463	Springer	English	Sexuality and Disability is an international forum for the publication of peer-reviewed original interdisciplinary scholarly papers that address the psychological and medical aspects of sexuality in relation to rehabilitation. Publishing timely research articles, review articles, case studies, clinical practice reports, brief research reports, survey data reports, and book and film reviews, the journal offers the latest developments in the area of sexuality as it relates to a wide range of disabilities and conditions. Contributions address: clinical and research progress; community programs; independent-living programs; guidelines for clinical practice; special grand-rounds topics; consumer issues; and contemporary developments in special programs in sex education and counseling for people with disabilities. The journal features special issues with internationally renowned guest editors focusing on current topics in sexual health. By publishing research, best-practice, evidence-based, and
Kinesiology	REHABILITATION - SCIE; REHABILITATION - SSCI	1.452	University of Zagreb	English	Kinesiology – International Journal of Fundamental and Applied Kinesiology (print ISSN 1331-1441, online ISSN 1848-638X) publishes twice a year scientific papers and other written material from kinesiology (a scientific discipline which investigates art and science of human movement; in the meaning and scope close to the idiom "sport sciences") and other adjacent human sciences focused on sport and exercise, primarily from anthropology (biological and cultural alike), medicine, sociology, psychology, natural sciences and mathematics applied to sport in its broadest sense, history, and others. Contributions of high scientific interest, including also results of theoretical analyses and their practical application in physical education, sport, physical recreation and kinesitherapy, are accepted for publication. The following sections define the scope of the journal: Sport and sports activities, Physical education, Recreation/leisure, Kinesiological anthropology,
Occupational Therapy International	REHABILITATION - SSCI; REHABILITATION - SCIE	1.448	Wiley-Hindawi	English	Training methods. Biology of sport and exercise. Sports medicine and physiology of sport Occupational Therapy International is a peer-reviewed, open access journal which publishes original research articles and review articles reflecting the practice of occupational therapy worldwide. Priority for publication will be given to research articles that provide recommendations for evidence-based occupational therapy practice and demonstrate the effectiveness of a specific occupational therapy intervention.
					Topics of interest include:
					Reliability and validity of clinical instruments used by occupational therapists Assistive technology Community rehabilitation Cultural issues related to occupational therapy practice or education Health promotion, wellness and occupational therapy interventions at the population level Surveys related to occupational therapy practice or education
Journal of Manipulative and Physiological Therapeutics	REHABILITATION - SCIE	1.437	Mosby-Elsevier	English	The Journal of Manipulative and Physiological Therapeutics (JMPT) is an international and interdisciplinary journal dedicated to the advancement of conservative health care principles and practices. The JMPT is the premier biomedical publication in the chiropractic profession and publishes peer reviewed, research articles and the Journal's editorial board includes leading researchers from around the world.
Arts in Psychotherapy	REHABILITATION - SSCI	1.404	Pergamon- Elsevier Science	English	The Arts in Psychotherapy is a dynamic, contemporary journal publishing evidence-based research, expert opinion, theoretical positions, and case material on a wide range of topics intersecting the fields of mental health and creative arts therapies. It is an international peer-reviewed journal publishing 5 issues annually. Papers are welcomed from researchers and practitioners in the fields of art, dance/movement, drama, music, and poetry psychotherapy, as well as expressive and creative arts therapy, neuroscience, psychiatry, education, allied health, and psychology that aim to engage high level theoretical concepts with the rigor of professional practice. The journal welcomes contributions that present new and emergent knowledge about the role of the arts in healthcare, and
Journal of Back and Musculoskeletal Rehabilitation	REHABILITATION - SCIE	1.398	IOS Press	English	The Journal of Back and Musculoskeletal Rehabilitation mainly focuses on presenting relevant information about the interdisciplinary approach to musculoskeletal rehabilitation for clinicians who treat patients with back and musculoskeletal pain complaints. It provides readers with both 1) a general fund of knowledge on the assessment and management of back and musculoskeletal disorders and 2) new information considered to be state-of-the-art in the field. The intended audience is multidisciplinary as well as multi-specialty.
					In each issue clinicians can find information which they can use in their patient setting the very next day. Manuscripts are provided from a range of health care providers including those in physical medicine, orthopedic surgery, rheumatology, neurosurgery, physical therapy, osteopathy, chiropractic and nursing on topics ranging from chronic pain to sports medicine. Diagnostic decision trees, treatment algorithms, and emerging and state of the art technologies for polyhilitation are

treatment algorithms, and emerging and state-of-the-art technologies for rehabilitation are encouraged in each manuscript. Controversial topics are discussed in commentaries and rebuttals.

Clinical Linguistics & Phonetics	REHABILITATION - SSCI;	1.346	Taylor & Francis	English	Clinical Linguistics & Phonetics encompasses the following:
Nordic Journal of Music Therapy	REHABILITATION - SCIE REHABILITATION - SSCI	1.255		English	Linguistics and phonetics of disorders of speech and language Contribution of data from communication disorders to theories of speech production and perception Research on communication disorders in multilingual populations, and in under-researched populations, and languages other than English Pragmatic aspects of speech and language disorders Clinical dialectology and sociolinguistics Childhood, adolescent and adult disorders of communication Linguistics and phonetics of hearing impairment, sign language and lip-reading Nordic Journal of Music Therapy (NJMT) is published in collaboration with GAMUT - The Grieg Academy Music Therapy Research Centre (NORCE Norwegian Research Centre and University of
					Bergen), in co-operation with university programs and organizations of music therapy in the Nordic and Baltic countries.
					The Nordic Journal of Music Therapy serves the international community of music therapy by being an avenue for publication of scholarly articles, texts on practice, theory and research, dialogues and discussions, reviews and critique. Publication of the journal is based on the collaboration between the music therapy communities in the five Nordic countries of Denmark, Finland, Iceland, Norway and Sweden and the three Baltic Countries of Estonia, Latvia and Lithuania. This international but still regional foundation offers a platform for development of communication with the broader international community of music therapy. Scholars from all over the world are welcomed to write in the journal.
					Any kind of scholarly articles related to the field of music therapy are welcomed. The Nordic Journal of Music Therapy does not step aside from active engagement in the
British Journal of Occupational Therapy	REHABILITATION - SSCI; REHABILITATION - SCIE	1.243	SAGE	English	BJOT's chief aim is to publish peer-reviewed articles with international relevance that advance knowledge in research, practice, education, and policy in occupational therapy so that researchers, practitioners and service users have strong evidence on which to base decisions.
					The journal publishes evidence on the effectiveness, benefit, and value of occupational therapy as well as interdisciplinary and related research that is relevant to occupational therapy, worldwide.
Rehabilitation	REHABILITATION - SCIE	1.129	Georg Thieme Verlag KG	German	The Editorial Poord's appeared strategy is to feath an internationally relatent received and reviews in [translated from German] The journal Die Rehabilitation is aimed at employees in facilities, research institutions and providers of rehabilitation. It reports on the medical, legal, political and social foundations and framework conditions of rehabilitation and on international developments in this field. The focus is on contributions to
					 Rehabilitation practice (medical, professional and social rehabilitation, quality management, new concepts and care models for the use of ICF, movement therapy, etc.), Rehabilitation research (results relevant to practice, methods and assessments, development of guidelines, socio-medical questions), public health, social medicine Health system research and the resulting problems.
Turkish Journal of Physical Medicine and Rehabilitation	REHABILITATION - SCIE	1.078	Baycinar Medical	Multi- language	The Turkish Journal of Physical Medicine and Rehabilitation (Formerly published as Türkiye Fiziksel Tip ve Rehabilitasyon Dergisi) is the official journal of the Turkish Society of Physical Medicine and Rehabilitation. The journal is an international open-access, double-blind peer-reviewed periodical journal bringing the latest developments in all aspects of physical medicine and rehabilitation, and related fields. The journal publishes original articles, review articles, editorials, case reports (limited), letters to the editors. The target readership includes academic members, specialists,
Physiotherapy Canada	a REHABILITATION - SCIE	1.037	University of Toronto Press	English	Physiotherapy Canada is the official, scholarly, refereed journal of the Canadian Physiotherapy Association (CPA), giving direction to excellence in clinical science and reasoning, knowledge translation, therapeutic skills and patient-centred care.
					Founded in 1923, Physiotherapy Canada meets the diverse needs of national and international readers and serves as a key repository of inquiries, evidence and advances in the practice of physiotherapy.
					Physiotherapy Canada publishes the results of qualitative and quantitative research including

systematic reviews, meta analyses, meta syntheses, public/health policy research, clinical practice guidelines, and case reports. Key messages, clinical commentaries, brief reports and book reviews

In addition to delivering authoritative, original scientific articles and reports of significant clinical studies, Physiotherapy Canada's editorials and abstracts are presented in both English and French, expanding the journal's reach nationally and internationally. Key messages form an integral part of each research article, providing a succinct summary for readers of all levels. This approach also

support knowledge translation to clinical practice.

Disorders Quarterly	SSCI	0.760	SAGE	English	communication — from oral language development to literacy. The journal also offers assessment of and interventions for communicative disorders across the lifespan. It includes research reports, a clinical forum that reports theoretical applications in clinical and educational settings, short tutorials on specific topics or clinical procedures, and media reviews. This journal is a member of COPE.
International Journal of Developmental Disabilities	REHABILITATION - SSCI	0.973	Taylor & Francis	English	Articles for Communication Disorders Quarterly (CDQ) are accepted for review on a continual basis. The editor of CDQ welcomes submissions of previously unpublished applied and clinical research relating to typical and atypical communication stores the lifespan. This includes assessment of and interventions for communicative disorders in infants toddlers voung children school-age children The IJDD publishes scientific articles on work dealing with different approaches to the habilitation problems of people with an intellectual disability. The Journal covers the entire spectrum of intellectual disabilities, and is concerned with definitions, IQ, genetic predisposition, evaluation of abilities, learning interventions, challenging behaviour, medication, attitudes to death and bereavement, sexuality, legal aspects, WHO, NICE and other governmental guidelines, care in the community, advocacy, stress and coping strategies for families and carers - though this is not an exhaustive list. The unifying theme is that all of these aspects should be of practical help for those with intellectual disabilities or those earing for persons with intellectual disabilities. Emphasis is placed on the practical implications of the work of educationists, instructors, nurses, occupational and other therapists, psychiatrists, psychologists and social workers, whether taking place in a hospital setting or in community care.
Hong Kong Journal of Occupational Therapy	REHABILITATION - SCIE	0.917	SAGE	English	The Journal accepts contributions from anywhere in the world but they must be written in acceptable The Hong Kong Journal of Occupational Therapy (HKJOT) is the official peer-reviewed, open-access publication of the Hong Kong Occupational Therapy Association.
					The Journal's aims are to promote the development of theory and practice in occupational therapy (OT), and facilitate documentation and communication among educators, researchers and practitioners. The Journal also works to advance availability, use, support and excellence of OT on behalf of the Association to the public, and maintain professional standards to promote better understanding of OT.
					The HKJOT welcomes papers that are important and will impact on the OT profession, of the following types:
					Review articles—systematic reviews or meta-analyses of new or updated assessments and interventions in OT. Research papers—studies about OT instrument development and testing, surveillances of occupational dysfunction, OT student and graduate opinion surveys, efficacy and effectiveness of OT interventions in the form of preliminary single group studies to multicentre randomized controlled trials, and basic science research. Case reports—creative designs of assistive devices to innovative and new treatments of rare dysfunctions with detailed documentation.

American Annals of the Deaf	REHABILITATION - SSCI	0.872	Gallaudet University Press	English	The American Annals of the Deaf is a professional journal dedicated to quality in education and related services for deaf or hard of hearing children and adults. First published in 1847, the Annals is the oldest and most widely read English-language journal dealing with deafness and the education of deaf persons. The Annals is the official organ of the Council of American Instructors of the Deaf (CAID) and of the Conference of Educational Administrators of Schools and Programs for the Deaf (CEASD) and is directed and administered by a Joint Annals Administrative Committee made up of members of the executive committees of both of these organizations.
					For more than 170 years the Annals has focused primarily on the education of deaf students and on information for professionals associated with the educational development of these students. At the same time, the Annals historically has extended its range of topics beyond education and incorporated the broad interests of educators in the general welfare of deaf children and adults to represent the diversity of its professional readership. Among the topics covered in its pages are:
					Communication methods and strategies Language development Mainstreaming and residential schools Parent-child relationships Teacher training and teaching skills

Topics in Geriatric Rehabilitation	REHABILITATION - SSCI	0.622	Lippincott Williams & Wilkins	English	Topics in Geriatric Rehabilitation, (TGR) is a peer-reviewed quarterly publication that preser clinical, basic, and applied research, as well as theoretic information, consolidated into a clinically relevant form. TGR is a leading resource for the healthcare professional practicing in the area of
Hand Therapy	REHABILITATION - ESCI	n/a	SAGE	English	eeriatric rehabilitation. TGR provides useful treatment information written by and for specialists in Hand Therapy is a peer-reviewed journal aimed at hand therapists and surgeons, occupational therapists and physiotherapists and other hand specialists. Its purpose is to publish original articles and short reports on the theory and practice of hand therapy and related fields. Suitable material is not limited to the practice of physiotherapy and occupational therapy for the hand, but includes related fields where these are a matter of interest to those in the practice of hand therapy.
Turkish Journal of Physiotherapy Rehabilitation-Turk Fizyoterapi ve Rehabilitasyon	REHABILITATION - ESCI	n/a	Turkish Physiotherapy Association	English	Turkish Journal of Physiotherapy and Rehabilitation (TJPR) is an Turkish Journal of Physiotherapy at Rehabilitation aims to transfer effective practice, study and research of physiotherapy and rehabilitation into scientific publications, to propagate them nationally and internationally, and so, to contribute to the scientific area.
Rehabilitasyon Dergisi					Turkish Journal of Physiotherapy and Rehabilitation is intended to health professionals and researchers. Therefore, besides the medical issues related with physiotherapy and rehabilitation (orthopedics, neurology, rheumatology, pediatrics, obstetrics and gynecology, cardiopulmonary, etc.), it covers a wide range of topics such as ergotherapy, social services, health management, ergonomics, biomedical and rehabilitation engineering, functional limitation and disability. The journal welcomes manuscripts from the above-mentioned disciplines and topics.
Manuelle Medizin	REHABILITATION - ESCI	n/a	Springer Heidelberg	Multi- language	To maintain the compatibility of the journal with international scientific standards [Translated from German] Manuelle Medizin – European Journal of Manual Medicine deals with all aspects of manual medicine and its neighboring areas. It provides information on current developments in the field and addresses orthopedists, rheumatologists, internists, traumatologists as well as general practitioners and physiotherapists. Through its interdisciplinary approach the journal offers a wide scientific basis for current developments of manual medicine. Freely submitted original papers allow the presentation of important clinical studies and serve scientific exchange.

Acta Balneologica	REHABILITATION - ESCI	n/a	Wydawnictwo Aluna	Multi- language	Acta Balneologica is the scientific journal of the Polish Association of Balneology and Physical Medicine. It was created in 1905. The articles published in the quarterly journal include peer-reviewed original papers, review papers, and case studies concerning spa medicine (balneology, bioclimatology, balneochemistry, hydrogeology) and physical medicine (physiotherapy, cryotherapy, kinesiotherapy, pressotherapy, and rehabilitation). The journal is unique for its subject matter not only in Poland, but also in Europe. Poland not only has its own spa act, but also treats balneology and physical medicine as a separate branch of medical knowledge with its own curriculum. Consequently, our journal is attractive for authors and readers in Poland and abroad.
Manuelle Therapie	REHABILITATION - ESCI	n/a	Georg Thieme Verlag KG	Multi- language	Every year, Acta Balneologica provides media patronage for many scientific medical events. The journal is addressed not only to doctors and rehabilitation and physiotherapy specialists who use knowledge from the field of balneology and physical medicine in their work, but also to heads of hospital departments, hospital directors, spa and sanatorium managers, managers of public and [Translated from German] In the spring of 1996, the discussions during the IFOMT Congress in Lillehammer (International Federation of Orthopedic Manipulative Therapists) made it clear that manual therapists lacked a platform for the regular exchange of professional advances and discussions. During the discussions, it quickly became clear that this goal could best be pursued through a magazine. The idea for Manual Therapy was born.
					Since then, musculoskeletal physiotherapy has evolved enormously - away from the pure "lie down, I'll mobilize your thoracic spine" to a comprehensive, multidimensional, evidence-based therapy approach in which manual techniques still play a role, but no longer the "Main Act" are. In terms of content, the magazine "manuelletherapie" was always up to date. However, what remained consistently "90s" was their title. In 2021 it was therefore high time for an update.
					From the 1/2021 issue, the manual therapy magazine will therefore be called MSK - Muskuloskelettale Physiotherapie - Musculoskelettal Physiotherapy.
					This is what MSK stands for:
					 MSK is aimed at physiotherapists who treat patients with disorders in the area of the musculoskeletal system. MSK continuously trains physiotherapists who are interested in manual therapy and is the science

Digital technologies are increasingly being applied to assist and enable individuals in many different ways, and the range of papers submitted to the journal strongly represents this shift to the digital. Innovation in the development and application of enabling technologies is at the heart of this agenda and the journal strongly encourages papers that report and demonstrate the use, evaluation and

REHABILITATION -European Journal of Routledge English The European Journal of Physiotherapy is an international journal covering all aspects of Physiotherapy ESCI Journals, Taylor physiotherapy with special focus on: · Physiotherapy in lifestyle-related health problems & Francis · Functioning, activity and participation · Behavioral medicine in physiotherapy · Disability and health in areas of pain · Physical activity in health promotion and rehabilitation The journal covers Original articles either as full-length report or as Short communications reporting preliminary data from original work, Case reports, reporting new and important clinical observations or experiences of a novel treatment, all types of Review articles, Focus papers, Debate articles, and Short commentaries for the EJPT relevant topics, as well as Letters to the editor. The journal also aims at maintaining a broad and interdisciplinary approach in order to reflect collaboration with practitioners and scholars from other disciplines. · Evaluating and criticizing interventions and methods used in health promotion, lifestyle change, rehabilitation, pain related conditions, and physical activity research · Analyzing and debating research focused on topics in functioning, activity and participation Journal of Exercise REHABILITATION -Korean Society English The Journal of Exercise Rehabilitation is the official journal of the Korean Society of Exercise Rehabilitation **ESCI** of Exercise Rehabilitation, and is published six times a year. Supplementary issues may be published. Its official Rehabilitation abbreviation is "J Exerc Rehabil". It was launched in 2005. The title of the first volume was Journal of the Korean Society of Exercise Rehabilitation (pISSN 1976-6319). The journal title was changed to Journal of Exercise Rehabilitation from Volume 9 Number 2, 2013. The effects of exercise rehabilitation are very broad and in some cases exercise rehabilitation has different treatment areas than traditional rehabilitation. Exercise rehabilitation can be presented as a solution to new diseases in modern society and it can replace traditional medicine in economically disadvantaged areas. Exercise rehabilitation is very effective in overcoming metabolic diseases and also has no side effects. Furthermore, exercise rehabilitation shows new possibility for neuropsychiatric diseases, such as depression, autism, attention deficit hyperactivity disorder, schizophrenia, etc. The purpose of the Journal of Exercise Rehabilitation is to identify the effects of exercise rehabilitation on a variety of diseases and to identify mechanisms for exercise rehabilitation treatment. The Journal of Exercise Rehabilitation aims to serve as an intermediary for objective and scientific validation on the effects of exercise rehabilitation worldwide. The types of manuscripts include research articles, review articles, and articles invited by the Editorial Board. The Journal of Exercise Rehabilitation contains 6 sections: Basic research on exercise rehabilitation, Clinical research on exercise rehabilitation, Exercise rehabilitation pedagogy. Exercise rehabilitation education. Exercise rehabilitation psychology, and Exercise Rehabilitation REHABILITATION -SAGE English Rehabilitation Process and Outcome is a peer reviewed, open access journal that covers all aspects of Process and Outcome ESCI the rehabilitation process, and looks at the conceptual and classification issues, interventions, and measurement development related to rehabilitation outcomes research.

are also welcome.

The journal's broad scope includes rehabilitation of hearing, speech and language, vocational rehabilitation, recovery from physical trauma, injury and management of long term conditions are also included. Further scientific contributions in the area of learning and developmental disabilities

Measuring progress, outcomes of treatment, and quality of life will be addressed. The journal is

Occupational Therapy in Health Care	REHABILITATION - ESCI	n/a	Taylor & Francis	English	Occupational Therapy in Health Care is a journal of contemporary practice in occupational therapy. It provides occupational therapy practitioners with a forum to stay up-to-date on current methods and theories in the field. Focused on everyday practice, the journal addresses the concerns of new and experienced therapists, presenting innovations in client evaluations and treatments, current research findings, critical reviews of current textbooks, descriptions of novel programs and descriptions of fieldwork innovations.
					An essential guide to the changing trends in health care, social services, and education, Occupational Therapy in Health Care provides occupational therapy practitioners with a forum to stay up-to-date on current methods and theories in the field. Focused on everyday practice, the journal addresses the concerns of new and experienced therapists, presenting innovations in client evaluations and treatments, current research findings, clinical experiences, and developments in therapeutic techniques. The journal is an invaluable resource for practitioners, academics, and students, providing descriptions of programs, treatment strategies, examination of clinical decision- making, demonstrations of practice models in present use, and more.
					Occupational Therapy in Health Care emphasizes practice-related articles and reports, features regular reviews of OT-related books and software, discusses educational strategies, and deals with the theoretical and philosophical issues that provide the foundation for occupational therapy evaluation and treatment approaches. Each issue of the journal includes:
					Instructional Insight—highlights innovative teaching strategies, programs and issues. This regular feature has a structured format and can be accessed here. This column is edited by Dr. Ellen Kolodner.
Journal of Vocational Rehabilitation	REHABILITATION - ESCI	n/a	IOS Press	English	For over 30 years, the Journal of Vocational Rehabilitation (JVR) has provided a forum for discussion and dissemination of information about the major areas that constitute vocational rehabilitation. In recent years, however, more and more emphasis has been placed on the role of the rehabilitation counselor, special educator, psychologist, occupational therapist, and others in research and disseminator of work programs. Popular areas of interest have been, though not limited to, supported employment, customized employment, transition from school to work, return-to-work, and other topics related to employment for people with all disabilities. JVR emphasizes publishing articles that provide evidence-based practices for employment specialists, rehabilitation counselors, psychologists, educators, and other professionals in providing direct services to people with disabilities. Original
Physiotherapy Research International	REHABILITATION - ESCI	n/a	Wiley	English	Physiotherapy Research International is an international peer reviewed journal dedicated to the exchange of knowledge that is directly relevant to specialist areas of physiotherapy theory, practice, and research. Our aim is to promote a high level of scholarship and build on the current evidence base to inform the advancement of the physiotherapy profession. We publish original research on a wide range of topics e.g. Primary research testing new physiotherapy treatments; methodological research; measurement and outcome research and qualitative research of interest to researchers, clinicians and educators. Further, we aim to publish high quality papers that represent the range of cultures and settings where physiotherapy services are delivered.
					We attract a wide readership from physiotherapists and others working in diverse clinical and academic settings. We aim to promote an international debate amongst the profession about current best evidence based practice. Papers are directed primarily towards the physiotherapy profession, but can be relevant to a wide range of professional groups. The growth of interdisciplinary research is also key to our aims and scope, and we encourage relevant submissions from other professional groups.

International Journal Scandinavian Journal of Disability Research	REHABILITATION - REHABILITATION - ESCI	n/a n/a	University of Stockholm University Press	English English	The International Journal of Telerehabilitation (IJT) is a biannual journal dedicated to advancing Scandinavian Journal of Disability Research is an international peer-reviewed journal, which aims to disseminate innovative, high quality, social research on disability. The journal's defining characteristic is a focus on the relationship between people with disabilities and their environments. The scope is multi-disciplinary, incorporating research from a variety of perspectives including, Education, Sociology, History, Cultural Studies and others.
					The journal recognises that a wide range of methodological and theoretical perspectives can be valuable, but asks that contributions acknowledge the political debates around disability, for example the UN Convention on the Rights of Persons with Disabilities and the Disability Movement. Empirical work is very welcome, but it should also contain discussion of the conceptual and/or practical implications of the findings highlighted. Finally, the journal invites work from a broad range of international contexts that take debates out of the familiar contexts of the Global North.
Topics in Spinal Cord Injury Rehabilitation	REHABILITATION - ESCI	n/a	Thomas Land	English	Scandinavian Iournal of Disability Research will be of interest to nolicy-makers, disability activists As the leading resource for peer-reviewed state-of-the-science information on spinal cord injury and disease, Topics in Spinal Cord Injury Rehabilitation (TSCIR) is an interdisciplinary journal devoted to the study and dissemination of practical and theoretical information related to the subject of spinal cord injury rehabilitation. The information contained within TSCIR represents the entire translational spectrum, ranging from basic science to clinical trials, and has proven invaluable for the entire SCI care team, including physicians, therapists, nurses, psychologists, social workers, case managers and others, as well as researchers, policy-makers and industry partners.
					The journal reports on clinical practices, state-of-the-art concepts, and new developments in spinal cord injury patient care and research. Both primary research papers and comprehensive reviews of existing literature are included. A unique feature of TSCIR is that each issue includes research

Alter: European Journal of Disability Research	REHABILITATION - ESCI	n/a	Elsevier Masson	English	ALTER is a peer-reviewed European journal which looks at disability and its variations. It is aimed at everyone who is involved or interested in this field. ALTER is an emblematic Latin word for all forms of difference, leaving open the question of their nature and expression.
					An inter-disciplinary journal First and foremost, interdisciplinarity means remaining open to all human and social sciences: sociology, anthropology, psychology, psychoanalysis, history, demography, epidemiology, economics, law, etc. It also means a connection between the different forms of knowledge - academic and fundamental - applied and relating to the experience of disability.
Disciple	DELIADILITATION		Parel de	E. Lal	A cross-disciplinary journal Research on disability and its variations constitutes a transversal axis which opens the review up to a multitude of approaches and problematic. It covers matters ranging from the individual to the environment, from impairment to participation, from discrimination to the exercise of citizenship
Physical & Occupational Therapy in Geriatrics	REHABILITATION - ESCI	n/a	Routledge Journals, Taylor & Francis	English	This comprehensive journal is recognized for its useful balance of research and clinical practice articles. For more than 25 years Physical & Occupational Therapy in Geriatrics has functioned as a forum for rehabilitation health care professionals and scientists to share research that advances preventative, clinical, educational and therapeutic practices. The issues addressed in the journal focus on current, emerging and innovative areas of care and prevention that cross the healthcare continuum that support evidence-informed management of the older client including: health and wellness; prevention of aging-related functional decline and injury; innovative programming; clinical and technological advances; policy, and the knowledge, skills and attitudes needed for working with older clients.

issues have focused on:

Physical & Occupational Therapy in Geriatrics is innovative and timely. In addition to the wealth of information found in each scheduled issue, occasional thematic issues devoted to critical issues or professional challenges will become frequently used references in personal libraries. Past thematic

Research and Practice in Intellectual and Developmental Disabilities	REHABILITATION - ESCI	n/a	Routledge Journals, Taylor & Francis	English	PURPOSE Research and Practice in Intellectual and Developmental Disabilities's (RAPIDD's) purpose is to disseminate research, encourage its translation and relevance to practice and policy, and generate informed debate on contemporary issues that matter to the quality of life of people with intellectual disability and their families. Research and Practice in Intellectual and Developmental Disabilities will inform the design and delivery of support that is important for people with intellectual disability and their families to facilitate social inclusion and engagement. Its focus is also the practices and structural adjustments necessary to enable mainstream services and communities to be inclusive and respond appropriately to people with intellectual disability.
					Research and Practice in Intellectual and Developmental Disabilities will provide a forum to identify pressing research questions, practice and policy issues. The Australian context and the pursuit of a more inclusive society for people with intellectual and developmental disabilities are the core focus of the journal. Also of interest are comparative perspectives that explore similarities and differences with other contexts and groups of people with disability. The journal publishes original research, concise reviews of contemporary research or literature, critical or descriptive analysis of policy and programs, evaluative case studies illustrating application of research to practice, as well as conceptual papers that bring new ideas or theoretical perspectives to the field of intellectual and developmental disability.
Arteterapia-Papeles de Arteterapia y Educacion Artistica para la Inclusion	REHABILITATION - ESCI	n/a	Universidad Complutense Madrid	Spanish	The journal will establish a means of constructive dialogue between the different perspectives of [Translated from Spanish] This scientific publication is a pioneer in the Spanish language, both in Spain and Latin America, on studies that address various aspects of art therapy (clinical, educational, social and cultural) and those areas that seek greater social inclusion through artistic media and artistic education.
