| May 15 | Classes Begin |
| May 15 | Last day to register, add a course, <br> or change from audit to credit |
| May 16 | Last day to drop without a mark of <br> "W" or change from credit to audit |
| May 22 | Last day to drop a May Intersession <br> class wth a "W" |
| May 25 | Last day to officially withdraw from <br> the May Intersession <br> May 25 |
| May 26 | Last day of classes for the May <br> Intersession |

Summer Session 2023-10 Week (48 Class
Days)

| Days) | Description |
| :--- | :--- |
| Date | Classes Begin |
| May 30 | Last day to register, add a course, <br> or change from audit to credit |
| June 1 | Last day to drop without a mark of <br> "W" or change from credit to audit |
| June 7 | Independence Day Holiday |
| July 4 | Last day to drop a 10 Week class <br> with a "W" |
| July 14 | Last day to officially withdraw from <br> the 10 Week session |
| Aug. 3 | Last day of classes for the 10 Week <br> session |
| Aug. 4 | Last Day of Class |
| Aug. 4 |  |

Summer Session 2023 - First 5 Week ( 24
Class Days)

| Date | Description |
| :--- | :--- |
| May 30 | Classes Begin |
| May 31 | Last day to register, add a course, <br> or change from audit to credit |
| June 1 | Last day to drop without a mark of <br> "W" or change from credit to audit <br> Last day to drop a First 5 Week <br> class with a "W" |
| June 21 | Last day to officially withdraw from <br> the First 5 Week session |
| June 29 | Last day of classes for the First 5 <br> Week session |
| June 30 |  |

Summer Session 2023 - Second 5 Week (24 Class Days)

| Date | Description |
| :--- | :--- |
| July 3 | Classes Begin |
| July 5 | Last day to register, add a course, <br> or change from audit to credit |
| July 6 | Last day to drop without a mark of <br> "W" or change from credit to audit |
| July 26 | Last day to drop a Second 5 Week <br> class with a "W" |
| Aug. 3 | Last day to officially withdraw from <br> the Second 5 Week session |
| Aug. 4 | Last day of classes for the Second 5 <br> Week session |

## Summer Session 2023-8 Week (37 Class Days)

Date
May 30
June 1

June 5

July 4
July 7 Last day to drop an 8 Week session

July 19

July 20
Description
Classes Begin
Last day to register, add a course,
or change from audit to credit
Last day to drop without a mark of
"W" or change from credit to audit
Independence Day Holiday
Last day to drop an 8 Week session
class with a "W"
Last day to officially withdraw from
the 8 Week session
Last day of classes for the 8 Week
session

Fall 2023/August Intersession August Intersession 2023-(10 Class Days; includes Saturday)

| Date | Description |
| :---: | :---: |
| August 7 | Classes Begin |
| August 7 | Last day to register, add a course, or change from audit to credit |
| August 8 | Last day to drop without a mark of "W" or change from credit to audit |
| August 14 | Last day to drop an August Intersession class with a "W" |
| August 17 | Last day to officially withdraw from the August Intersession |
| August 17 | Last day of classes for the August Intersession |
| August 18 | Final Exams |
| Fall 2023 - (73 Class Days; 43 MWF, 30 TT) |  |
| Date | Description |
| August 21 | Classes Begin |
| August 25 | Last day to register, add a course, or change from audit to credit |
| September 1 | Last day to drop without a mark of "W" or change from credit to audit |

| September 4 | Labor Day Holiday |
| :--- | :--- |
| October 16-17 | Fall Break |
| October 30 | Advanced Registration for Spring <br> 2023 begins for currently enrolled <br> students |
| November 17 | Last day to drop a full semester <br> class with a "W" |
| November 22 | Thanksgiving Break (student break; <br> University offices will be open) |
| November 23-24 | Thanksgiving Holiday |
| December 7 | Last day to officially withdraw from <br> all classes |
| December 7 | Last day of classes for fall semester |
| December 8 | Reading Day |
| December 11-15 | Final Exams |
| December 16 | Commencement |

## 2024 Academic Calendar

January 2024/January Intersession January Intersession 2024-(10 Class Days; includes two Saturdays)

| Date | Description |
| :---: | :---: |
| January 2 | Classes Begin |
| January 2 | Last day to register, add a course, or change from audit to credit |
| January 3 | Last day to drop without a mark of "W" or change from credit to audit |
| January 9 | Last day to drop a January <br> Intersession class with a "W" |
| January 12 | Last day to officially withdraw from the January Intersession |
| January 12 | Last day of classes for the January Intersession |
| January 13 | Final Exams |
| Spring 2024-(73 Class Days; 43 MWF, 30 TT) |  |
| Date | Description |
| January 15 | Martin Luther King Day |
| January 16 | Classes Begin |

## Board of Trustees

The trustees of the University of Arkansas System are appointed by the governor of Arkansas to 10 -year overlapping terms. The board sets policy for the University of Arkansas as well as other universities, colleges and institutes within the system.

## Morril Harriman, chair

Morril Harriman of Little Rock is an attorney with the Mitchell Williams law firm. He served as Governor Mike Beebe's chief of staff from 2007 to 2015. Prior to that, Harriman served 16 years in the Arkansas Senate. He earned both his bachelor and law degrees from the University of Arkansas. His term expires in 2024.

## Sheffield Nelson, vice chair

Sheffield Nelson of Little Rock is a senior partner at Jack Nelson and Jones.Sheffield Nelson of Little Rock is a retired president and chief executive office of Arkla Gas. He has served on the board of the Arkansas Department of Higher Education and the Arkansas Game and Fish Commission. Nelson earned his undergraduate degree from Arkansas State Teachers College, now the University of Central Arkansas, and his Juris Doctor degree from the University of Arkansas. His term expires in 2025.

## Kelly Eichler, secretary

Kelly Eichler of Little Rock is the public policy director for Gov. Asa Hutchinson. She previously served as a deputy prosecutor for Pulaski County and on the Arkansas Board of Corrections. She earned a bachelor's degree from the University of Arkansas and a law degree from the University of Arkansas at Little Rock Bowen School of Law. Her term expires in 2026.

## Ted Dickey, assistant secretary

Ted Dickey is a general partner at CapRocq Core real estate fund and an adviser to Innovate Arkansas, a technology entrepreneurship initiative. Dickey previously spent six years in corporate finance at Stephens Inc. He earned his bachelor's degree and was elected Phi Beta Kappa the University of Arkansas before earning his Juris Doctor at the $U$ of $A$ School of Law. He served on the $U$ of $A$ Technology Park Board and was appointed to the Arkansas Ethics Commission. His term expires in 2030.

## Tommy Boyer

Tommy Boyer, of Fayetteville, graduated from the University of Arkansas, Fayetteville in 1964, where he was also an All-American basketball player. He retired from the Eastman Kodak Company in 1989, and founded Micro Images in Amarillo, Texas. Within two years, Micro Images had become the largest Kodak document imaging systems broker and reseller in the United States. Boyer was inducted into the Arkansas Business Hall of Fame in 2013 and the Arkansas Sports Hall of Fame in 2000. His term expires in 2027.

## Steve Cox

Steve Cox of Jonesboro graduated from the University of Arkansas in 1982 after having earned All Southwest Conference and All America honors during his football career as a punter and kicker, later playing in the NFL for the Cleveland Browns and Washington Redskins. He rose through the ranks of banking before becoming a managing partner at Rainwater and Cox LLC, which oversees ownership and management of an array of commercial, hotel and agricultural properties. His term expires in 2028.

## Ed Fryar

Edward Fryar Jr. of Rogers is a graduate and former professor of the University of Arkansas. He earned degrees in economics and agricultural economics and was a professor of agricultural economics for more than 13 years. He co-founded Ozark Mountain Poultry in Rogers in 2000, which grew from 15 employees to more than 1,800 before selling it in 2018. He was inducted into the Arkansas Agriculture Hall of Fame in 2019. His term expires in 2029.

## Jeremy Wilson

Jeremy Wilson of Bentonville is a graduate of the University of Arkansas with more than 25 years of business experience in the state. In 2012, he cofounded NewRoad Capital Partners, a private equity firm. He is also founder and chair of NOWDiagnostics, a leader in innovative diagnostic health testing. His term expires in 2031.

## Nathaniel Todd

Retired Col. Nathaniel "Nate" Todd is director of the Arkansas Department of Veterans Affairs and previously served as the chief financial officer for the Central Arkansas Veterans Health Care System in North Little Rock. Prior to his retirement from military service after a 37 -year career, he served as the director of health financial policy in the office of the U.S. Army Surgeon General. He is from Pine Bluff and is a fellow of the American College of Healthcare Executives. His term expires in 2032.

## Kevin Crass

Kevin Crass is a senior partner in the litigation practice group at Friday, Eldredge \& Clark LLP in Little Rock. He is a graduate of Ouachita Baptist University and the UA Little Rock Bowen School of Law. He served on the Board of the 8th Circuit Court of Appeals Bar Association and the Federal Practice Committee for the United States District Court for the Eastern District of Arkansas. He currently serves on the Board of Visitors of UA Little Rock, is the chair of the War Memorial Stadium Commission, and a past chair of the Little Rock Regional Chamber of Commerce. His term expires in 2033.

## Administrative Officers

## System Administration

President, University of Arkansas System — Donald Bobbitt, B.S., Ph.D.

## Chancellor and Vice Chancellors

Chancellor, University of Arkansas - Charles F. Robinson II, B.A., M.A., Ph.D.

Provost and Executive Vice Chancellor for Academic Affairs - Terry Martin, B.S.E.E., M.S.E.E., Ph.D.

Vice Chancellor for Economic Development - Mike Malone, B.A., M.A
Executive Vice Chancellor for Finance and Administration - Ann Bordelon, B.S.B.A.

Vice Chancellor for Government and Community Relations - Randy Massanelli, B.S.B.A.

Vice Chancellor for Intercollegiate Athletics — Hunter R. Yurachek, B.S., M.A.

Interim Vice Chancellor for Research and Innovation — Margaret Sova McCabe, B.A., J.D.

Vice Chancellor for Student Affairs - Jeremy Battjes, B.S.E., M.Ed., Ed.D.

Vice Chancellor for University Advancement - Scott Varaday, B.A., M.S.F.S, J.D.

## Deans and Vice Provosts

Dean of Honors College - Lynda Coon, B.A., M.A., Ph.D.
Interim Dean of Dale Bumpers College of Agricultural, Food and Life Sciences - J.F. Meullenet, B.S., M.S., Ph.D.

Dean of Fay Jones School of Architecture and Design - Peter MacKeith, B.A., M.Arch.

Interim Dean of Fulbright College of Arts and Sciences - Kathryn Ann Sloan, B.A., M.A., M.B.A., Ph.D.

Interim Dean of Sam M. Walton College of Business - Brent Williams, Ph.D.

Dean of College of Education and Health Professions - Kate Mamiseishvili, B.A., M.A., Ph.D.

Dean of College of Engineering — Kimberly LaScola Needy, B.S.I.E., M.S.I.E., Ph.D.

Dean of Graduate School and International Education - Ed Pohl, B.S. M.S.R.E., M.S.S.E., M.S.E.M., Ph.D.

Dean of School of Law - Cynthia Nance, B.S., J.D., M.A.
Dean of Students - Melissa Harwood-Rom, B.A., M.F.A., M.S.Ag.E.
Dean of University Libraries - Jason J. Battles, B.A., M.A., M.L.S.
Dean of Admissions and Vice Provost for Enrollment Services - Suzanne McCray, B.A., M.A., Ph.D.

Vice Provost for Academic Affairs - Jim Gigantino, B.A., Ph.D.
Vice Provost for Distance Education - Cheryl Murphy, B.A., M.A., Ed.D.
Vice Provost for Faculty Affairs - Anna Zajicek, B.S., M.S., Ph.D.
Vice Provost for Planning — Colleen Briney, B.A., M.S.

## University Profile

## Vision

The University of Arkansas represents the best of public higher education, advancing Arkansas while building a better world.

## Mission

The University of Arkansas is determined to build a better world by providing transformational opportunities and skills, promoting an inclusive and diverse culture, nurturing creativity, and solving problems through research and discovery, all in service to Arkansas.

Since 1871, our fundamental purpose as a land-grant institution and state flagship remains unchanged - to serve the state of Arkansas as a partner, resource and catalyst by:

- Providing access to a comprehensive and internationally competitive public education, and fostering student success across a wide spectrum of disciplines.
- Utilizing research, discovery and creative activity to improve the quality of life, develop solutions to the challenges we face and drive the state's economy.
- Contributing service and expertise through outreach, engagement and collaboration.

## History

The University of Arkansas was founded in 1871 and will celebrate its 150 th anniversary during the calendar year of 2021. The university opened its doors to students on January 22, 1872. Under the Morrill Land-Grant College Act of 1862, federal land sales provided funds for the new university, which was charged with teaching "agricultural and the mechanic arts," "scientific and classical studies," and "military tactics" to Arkansas scholars.

Statewide elections, held to establish bonds to help finance the university, eventually determined the school's location. Washington County and the city of Fayetteville submitted the highest bid, a total of \$130,000, to which was added a $\$ 50,000$ state appropriation for the benefit of the institution and $\$ 135,000$ from the sale of federal lands for the university's first endowment. With \$12,000 of this money, the university purchased a 160-acre farm, the homestead of William and Martha Mcllroy, and established its campus on a hilltop looking out upon the Ozark Mountains.

There were few facilities and little money that first academic year, but the eight students and three faculty members who gathered for classes in 1872 showed the same dedication to learning and commitment to excellence that has carried the University of Arkansas into the 21st century. Over the past 150 years, the university has developed into a mature institution with 10 schools and colleges, more than 1,100 full-time faculty members, and more than 30,000 students. Its graduates number more than 200,000 and their names are engraved in the sidewalks of campus, a lasting tribute to alumni that is unique in America.

The University of Arkansas serves as the major provider of graduatelevel instruction in Arkansas. The research and scholarly endeavors of its faculty make it an economic and cultural engine for the state. And its public service activities reach every county in Arkansas, throughout the nation, and around the world. Find out more about the university's history (http://www.uark.edu/about/history.php) or browse our timeline (http:// uark.edu/about/time-line.php).

## Today at the University of Arkansas Campus

Students pursue a broad spectrum of academic programs leading to baccalaureate, master's, doctoral, and professional degrees, not only in traditional disciplines within arts, humanities, social sciences, and natural sciences, but also in the core professional areas of agricultural, food and life sciences; architecture; business; education; engineering; nursing; human environmental sciences; and law.

The University of Arkansas houses more than 200 academic programs and offers bachelor's degrees in more than 75 areas of study. Students may also pursue a wide range of graduate degrees, including the Master's, the Educational Specialist, the Doctor of Education, and the Doctor of Philosophy.

The Carnegie Foundation categorizes the University of Arkansas as a research institution with "highest research activity," placing the university among a small percentage of colleges and universities nationwide and in a class by itself within the state of Arkansas. U.S. News and World Report consistently ranks the university among the top tier of institutions of higher education. Faculty members perform cutting-edge research for which they annually win prestigious grants and awards, and the university encourages undergraduates to participate in the research process. Such opportunities enhance the learning process by providing handson experience in lab and research techniques, by developing students' abilities to implement, experiment, discover and teach, and by fostering a mentoring relationship early in students' academic careers.

Research programs involving both faculty and students serve as vital sources of information on the economic and social needs of Arkansas. In many fields, research performed at the University of Arkansas reaches beyond the state to provide insight and guidance on issues of national and international concern. The university provides extensive technical and professional services to varied groups and individuals throughout the state, helping to further Arkansas' economic growth. The university operates nationally respected self-paced (correspondence) courses; it assists other institutions in developing educational programs; it offers graduate programs, both cooperatively and singly, throughout the state; and it makes specialized campus resources such as computing services and library holdings available to other institutions in the state.

Classes at the university maintain a low average ratio of students to instructor, although individual classes may range from a large generallecture class of 200 to a focused special-topics class of 4 or 5 students. University of Arkansas students are given the tools and encouragement needed to excel. Over the last 15 years, more than 200 undergraduate Arkansas students have become Rhodes, Gates Millennium, Madison, Marshall, Goldwater, Fulbright, Boren, Gilman and Truman scholars. More than 100 graduate students have received National Science Foundation Graduate Research Fellowships. Find out more about the university's numbers (http://www.uark.edu/about/by-the-numbers.php).

# Academic Resources and Facilities 

The University of Arkansas provides a variety of resources for students to enhance their ability to attend college, improve their studies in class, and aid their academic research as they advance through their curricula.

The programs and services listed at left provide advice, tools and inspiration for high school students; individual tutoring for students on campus and infrastructure such as libraries and technology support that offer University of Arkansas students ongoing support throughout their college careers.

## Center for Multicultural and Diversity Education

The Center for Multicultural and Diversity Education provides academic, cultural and social programs intended to promote inclusiveness, foster achievement and assist in the development and advancement of a diverse student body.

The center is located on the fourth floor of the Arkansas Union in Room 404, and can be contacted at 479-575-8405 or by visiting multicultural.uark.edu (http://multicultural.uark.edu).

## Information Technology Services

Information Technology Services, or IT Services as most people refer to it, provides technology solutions that support and enable teaching, learning, research and discovery for students, faculty and staff at the University of Arkansas.

Supported services include student information systems, learning management systems, cloud storage, email and collaboration tools, research computing resources, software, internet access and the campus network. Learn more about everything IT Services provides at its.uark.edu (https://its.uark.edu/).

New members of the university community can get started with technology using the Get Started with Tech guide (https://its.uark.edu/getstarted/).

Tech support is available 7 days a week at the IT Help Desk in the Arkansas Union, by phone at 479-575-2905 or online at help.uark.edu (https://help.uark.edu/).

## Reasonable Accommodation for Students with Disabilities

The Center for Educational Access, 209 Arkansas Union, is the central campus resource for students who require reasonable accommodations in order to access the programs, services and activities offered through the University of Arkansas. The center's staff work in partnership with the individual student to communicate and facilitate any accommodation needs to faculty and staff. Accommodation determination is based in part on medical or psychological documentation provided to the Center for Educational Access by the student. Students must meet with one of the center's staff for an access plan meeting to discuss their needs and provide such documentation before any accommodations can be granted.

To register for services or for more information, contact the Center for Educational Access, University of Arkansas, 209 ARKU, Fayetteville, AR 72701, phone 479-575-3104 ; e-mail: ada@uark.edu; Web: Center for Educational Access (http://cea.uark.edu/) (online request for services available).

## Student Success Center

Trevor Francis
Director of Student Services
479-575-7627
tafranc@uark.edu (tafranc@uark.edu)
Student Success Center website (https://success.uark.edu/)
The Student Success Center is the embodiment of the $U$ of A's commitment to each and every student. The program provides help to individual students through tutoring, supplemental instruction, online chat, courses that teach students about college, and a writing and communication studio, among other resources. The center is based in the Cordia Harrington Center for Excellence, just north of Old Main.

## TRIO Student Support Services

The TRIO Student Support Services program is designed to provide a powerful combination of programs and services to students who are firstgeneration, and/or modest-income, and/or individuals with disabilities. The services provided by TRIO place an emphasis on individual assessment, counseling, advising, and skill building. Some of these services include: academic/financial/personal counseling, financial scholarships, social etiquette instruction, career and graduate school preparation, academic/ cultural enrichment, assistance with tutoring, and mentorship. The overarching goal of the University of Arkansas Student Support Services program is to empower students, assist them in achieving academic excellence, and seeing them through to graduation.

Student Support Services is a department in the Division of Student Affairs. The office is located on the Garden Level of Gregson Hall. For more details, call Student Support Services at 479-575-3546 or visit the Student Support Services website (https://success.uark.edu/about-us/ trio/).

## Talent Search Programs

## College Project Talent Search, Educational Talent Search, and University Access Talent Search

Talent Search is an early intervention/educational opportunity program. Serving students in grades 6-12, the program promotes skills and disseminates information necessary for successfully entering college and completing a baccalaureate degree. Emphasizing personal/career development, financial literacy, technological/academic skills, and ACT readiness through a developmental curriculum of college preparatory workshops, students are prepared for the rigors of higher education. Campus visits, academic monitoring/advising, and guidance in the completion of college and financial aid applications are key components for participants and their families. Summer enrichment and campusbased events are also hosted as funding permits.

Talent Search is a federal TRIO program funded by the U.S. Department of Education. The University of Arkansas has three Talent Search grant projects which serve distinct target areas in Benton, Carroll, Crawford, Sebastian and Washington counties in Arkansas, and McDonald County,

Missouri. At least two-thirds of students served by the programs must be low-income and in the first generation of their family to attend college. They exhibit academic potential and attend one of the 37 target schools served. For additional information and a full listing of target schools, visit the Talent Search website (http://talentsearch.uark.edu/).

The Talent Search Programs office is located at the university's Uptown Campus East, 1083 E. Sain Street, UPTE 128, Fayetteville, Arkansas. Call 479-575-3553 for more information.

## Testing Services

The Office of Testing Services is a unit of the Division of Academic Affairs housed within the Graduate School and International Education.

The office's mission is to provide high quality testing services for students, graduates, professionals, and those from the surrounding community.
The Office of Testing Services is certified by the National College Testing Association.

The Office of Testing Services administers such national tests as:

- ACT Assessment
- Accuplacer
- Law School Admission Test (LSAT)
- Graduate Management Admission Test (GMAT)
- Graduate Record Examination (GRE)
- College-Level Examination Program (CLEP)

National testing companies determine testing dates and deadlines. The Office of Testing Services also offers a number of institutional tests such as the Test of English as a Foreign Language (TOEFL) and the Spoken Language Proficiency Test (SLPT). These tests are scheduled at various times as demand dictates. Test fees vary depending on the test.

To obtain information about exam dates and deadlines, contact the Office of the Testing Center at 97 N. Razorback Road (https:// campusmap.uark.edu/?pnl_disp=Y\&bldg_code=TEST\&parklot=Y-Student-Faculty\%2FStaff-Parking_Meters-ADA_Parking-Remote), Fayetteville, or call 479-575-3948.

Find out more at the Testing Services website (http://test.uark.edu/).

## University Libraries

The library system of the University of Arkansas, Fayetteville, includes the David W. Mullins Library, the main research facility on campus, and four branch libraries:

- The Robert A. and Vivian Young Law Library (http://law.uark.edu/ library/)
- The Fine Arts Library (http://libinfo.uark.edu/FAL/)
- The Chemistry and Biochemistry Library (http://libinfo.uark.edu/ chemistry/)
- The Physics Library (http://libinfo.uark.edu/physics/)

The spacious Helen Robson Walton Reading Room is Mullins Library's most popular quiet study area, but group study space and graduate student study space is also available. More than 200 databases and thousands of electronic journals are accessible from anywhere with a University ID. Librarians onsite assist in locating and using library resources, or students may send questions by email, phone, or 24/7 chat.

Subject librarians (http://libinfo.uark.edu/info/specialists.asp) are also available for one-on-one research consultations tailored to individual research questions, whether onsite, over the phone, or even remotely by video software. Librarians conduct orientation sessions on research methods and software throughout the semester and the Quality Writing Center (http://qwc.uark.edu/) has a satellite location inside Mullins Library.

With 2.1 million volumes and more than 56,000 journal titles, students will find research material for every subject. Other resources in the collections include several thousand maps, manuscripts, and more than 33,000 audio and visual materials, including music scores, recordings, and movies, available through the Performing Arts and Media (http://libraries.uark.edu/ AV/default.asp) Department on the lower-level of Mullins Library.

A full-service computer commons (GACL) is located on the lobby level of Mullins, complete with printing stations and state-of-the-art scanners. Laptops and iPads are available to check-out to take advantage of wireless access anywhere in the library. Visit the University Libraries website (http://libinfo.uark.edu/) to learn more about services and collections, or access My Library (https://library.uark.edu/patroninfo~S1/) to check accounts, renew books, request holds, or save catalog searches.

Items not owned by the University Libraries may be obtained through Interlibrary Loan (http://libinfo.uark.edu/ill/default.asp). Requested items in electronic format will be sent directly to desktops, usually within 24 hours; physical items are held for pickup at the main service desk on the Lobby Level. The University Libraries have had official status as a United States government depository since 1907, and the Government Documents Department has been a depository for Arkansas state publications since 1993. The University Libraries' map collection and GIS (http://libinfo.uark.edu/GIS/default.asp) (geographic information systems) program, including a public GIS workstation equipped with ArcGIS Desktop Suite, are also available.

In Special Collections, students can read rare books from around the world; consult the largest book collection related to Arkansas; handle historic letters, diaries, magazines, and old photographs in the archives; and watch old black and white films made in or about the state. A number of digital collections and exhibits (http://libinfo.uark.edu/eresources/ digitalcollections.asp) are available through the Special Collections website (http://libinfo.uark.edu/SpecialCollections/). Special Collections also holds the University Archives, the Arkansas Collection, and the Arkansas Architectural Archives.

To stay up-to-date on the Libraries' programs, resources, and events, follow @UARKLibraries on Facebook, Twitter, Instagram, and Pinterest. For information concerning collections and services, please inquire at 479-575-4104 or refer@uark.edu. For any other questions, please contact the Dean's Office at 479-575-6702.

## Faculty

Allen, Amy L., M.L.I.S. (University of Alabama), B.A. (University of Arkansas), Assistant Librarian, 2008, 2010.
Daniels, Donna E., M.L.S., B.A. (Western Michigan University), Associate Librarian, 1982.
Dean, Jason W., M.S. (Syracuse University), B.B.S. (Hardin-Simmons University), Assistant Librarian, 2013.
Fritz, Angela I., Ph.D. (Loyola University), M.A. (University of WisconsinMadison), B.A. (University of Iowa), Associate Librarian, 2014.
Ganson, Judy, M.P.A. (University of California-Riverside), M.S.
(University of Illinois-Urbana-Champaign), B.A. (Purdue University), Associate Librarian, 2001.

Gibeault, Michelle J., M.S. (University of North Carolina), B.A. (University of California, Berkeley), Assistant Librarian, 2013.
Gibson, Tess, M.A. (University of South Dakota), M.L.S. (Emporia State University), B.A. (Baker University), Associate Librarian, 2005, 2011.
Gilbertson, Mary A., M.L.S. (University of North Texas), B.A. (University of Arkansas), A.A. (NorthWest Arkansas Community College), Associate Librarian, 2001, 2008.
Hackstadt, Angela, M.L.I.S. (University of Alabama), B.A. (University of Arkansas), Assistant Professor, .
Johnson, Normastel Mosby, M.L.S. (Simmons College), B.A. (Vanderbilt University), Associate Librarian, 1989.
Jones, Phillip J., M.S. (University of Illinois-Urbana-Champaign), M.A. (University of California-Irvine), B.A. (University of California-Santa Barbara), Associate Librarian, 2003.
Juhl, Beth, M.L.S. (Columbia University), B.A. (University of Texas at Austin), Librarian, 1993, 1999.
King, Michele S., M.L.S., B.F.A. (University of Oklahoma), Associate Librarian, 1987.
Kirkwood, Patricia Elaine, M.S. (University of Illinois-Urbana-
Champaign), B.S. (Pacific Lutheran University), Associate Librarian, 2004.
Kulczak, Deborah E., M.L.S., B.A. (Kent State University), Librarian, 1988, 2013.
Laincz, Jozef, Ph.D. (University of Arkansas), Magister, B.S. (Comenius University Bratislava), Assistant Librarian, 2015.
Lehman, Kathleen A., M.L.I.S. (University of Wisconsin-Milwaukee),
M.A.T. (Webster University), B.A. (University of Iowa), Assistant Librarian, 2010.

Lennertz, Lora, M.I.S. (University of Arkansas), M.L.I.S., B.A. (University of Illinois-Urbana-Champaign), Librarian, 1991, 2011.
McKee, Elizabeth Chadbourn, M.L.S. (University of Oklahoma), B.A. (University of Arkansas), Librarian, 1974.
Parker, Martha A., M.L.I.S. (University of North Carolina at Greensboro), B.A. (Queens University of Charlotte), A.A. (Central Piedmont Community College), Assistant Librarian, 2012.
Parker-Gibson, Necia T., M.L.I.S. (Louisiana State University), B.S.A. (University of Arkansas), Librarian, 1991, 2014.
Parsch, Janet H., M.P.A. (University of Arkansas), M.A., B.A. (University of Wisconsin-Madison), Librarian, 1983.
Pollock, Chad Aaron, M.A. (University of Missouri-Columbia), M.Div. (Baylor University), B.A. (Ouachita Baptist University), Assistant Librarian, 2011.

Rogers, Marilyn L., M.L.S. (Louisiana State University), B.A.
(Northwestern State University), Assistant Librarian, 1987.
Salisbury, Luti, M.Sc. (Loughborough University of Technology), B.Sc. (University of Guyana), Distinguished Professor, 1992, 2015.
Spiegel, Sarah E., M.S. (University of Illinois-Urbana-Champaign), B.A. (Bryn Mawr College), Assistant Librarian, 2007, 2009.
Stankus, Tony, M.L.S. (University of Rhode Island), B.A. (College of the Holy Cross), Distinguished Professor, 2007, 2014.
Szakasits, Monika, J.D. (Baylor University), B.A. (Sam Houston State University), Associate Librarian, 2004.
Williams, Colleen C., J.D. (Washington University in St. Louis), B.A. (Western Washington University), Associate Librarian, 2006, 2009.
Youngblood, Joshua Cobbs, M.A. (Florida State University), B.A. (University of Louisiana at Monroe), Assistant Librarian, 2011.
Zou, Tim Jiping, Ph.D., M.S. (University of Illinois-Urbana-Champaign), B.A. (Shandong University), Librarian, 2004, 2010.

## Upward Bound Programs

Upward Bound and Upward Bound Math and Science

Upward Bound (http://ub.uark.edu/) and Upward Bound Math and Science are early intervention programs that help low-income and potential first-generation college students prepare for higher education. These programs bring high school students in grades $9-12$ to the University of Arkansas campus on weekends and during the summer to receive instruction in mathematics, laboratory sciences, composition, literature, and foreign languages. The programs also provide academic and social support through tutoring, counseling, mentoring, cultural enrichment, financial literacy, field trips, college planning, and financial aid assistance. For students just completing their senior year of high school, Upward Bound provides a summer residential bridge program that enables participants to earn up to six hours of college credit. Funding is provided through grants from the U.S. Department of Education.

## Veterans Upward Bound

Veterans Upward Bound (http://vub.uark.edu/) is designed to identify and serve the unique needs of veterans who are low-income and potential first-generation college students, who have the academic potential and desire to enter and succeed in a program of higher education. Eligible veterans must have completed a minimum of 180 days of active duty in the military and hold any discharge other than dishonorable, or discharged because of a service connected disability, a member or a reserve component of the U.S. Armed Forces called to active duty for a period of more than 30 days, or a member of a reserve component of the U.S. Armed Forces who served on active duty in support of a contingency operation on or after September 11, 2001. Services include Accuplacer testing, tutoring, guidance counseling, assistance in filing financial aid and VA benefit forms, academic/career advisement, test preparation for entrance exams, and courses in English, Spanish, math, science, and computer technology. Courses are offered days and evenings each semester. Funding is provided through a grant from the U.S. Department of Education. Call 479-575-2442 for more information.

The Upward Bound and Veterans Upward Bound offices are located at the university's Uptown Campus West, 1001 E. Sain St., Fayetteville.

## Online Education

Cheryl Murphy
Vice Provost for Distance Education
Global Campus
800-952-1165
globalcampus@uark.edu
U of A ONLINE (https://online.uark.edu/)
Academic colleges and schools at the University of Arkansas provide flexible learning options through distance education and online learning options for undergraduate and graduate students. Traditional online courses, self-paced online (correspondence) courses, and online degree programs remove the barriers of time and distance. Support units provide the web-based resources and services necessary for distance and online students to reach their educational and professional goals.

## Global Campus

The Global Campus (http://globalcampus.uark.edu/) serves as a portal for online, distance and professional education programs and courses provided by the University of Arkansas. Experienced staff members collaborate with the university's academic colleges and other academic units to develop and facilitate quality courses and programs that help students reach educational and professional goals.

## State Authorization and Distance Education Beyond Arkansas

The University of Arkansas, Fayetteville delivers online education programs and courses throughout the United States and internationally. All programs have been approved by the Arkansas Department of Higher Education. Many states have prescribed an "authorization" process for out-of-state institutions delivering online programs to its state residents to ensure quality post-secondary education, to preserve the integrity of an academic degree and to instill greater consumer protection for its student citizens.

Authorization (sometimes referred to as "registration," "licensure," "approval," etc.) indicates that certain minimum standards have been met by the institution under the laws and regulations of that state. Authorization does not constitute an endorsement of any institution, course or degree program. Credits earned at an institution may not transfer to all other institutions.

The University of Arkansas, Fayetteville, through the Global Campus, has taken steps to protect its students and operations through nationwide compliance and has been granted authorizations, exemptions and waivers from many states. In other states, the University of Arkansas, Fayetteville can operate without such authorization because the state's laws do not pertain to a public institution, to an accredited institution or to the University of Arkansas activities in that state. More specific information about state authorization can be found at the University of Arkansas Online Web page (http://online.uark.edu/about/state-authorization.html). The Global Campus supports the university's development and delivery of online and distance education.

## Student Affairs

The Division of Student Affairs supports students in pursuing knowledge, earning a degree, finding meaningful careers, exploring diversity, and connecting with the global community. We provide students housing, dining, health care resources, and create innovative programs that educate and inspire. We enhance the University of Arkansas experience and help students succeed, one student at a time.

The Office of the Vice Chancellor for Student Affairs provides leadership for the division and serves as a liaison to other administrative offices, faculty, and student governing groups. The office is a central source of information concerning university policies and procedures affecting student life and co-curricular programs and services.

The Office of the Dean of Students under the Vice Chancellor for Student Affairs emphasizes student advocacy while broadening the development of services and programs that address a range of student and campus needs. Departments in the Division of Student Affairs are dedicated to developing exceptional programs and services that enhance the University of Arkansas experience and enrich the quality of student life on campus. Staff members are available and willing to assist with any issue or question that a student, staff, or faculty member may have regarding student and campus life at the University of Arkansas. The office is available for the clarification of university policies and procedures, confidential consultation, personal and family crisis assistance for students, and referral to all campus and community services. The office also seeks to assist students and faculty members in cases of emergency or extenuating circumstances. Student Affairs staff members are firmly committed to addressing the challenges and individual needs of the University of Arkansas family.

## Arkansas Union

The Arkansas Union is the community center of campus; serving students, faculty, staff, alumni, and guests. Through its facilities, programs, and services, the Arkansas Union is the place to build relationships, enrich academics, and experience campus life to the fullest. But more importantly, the Arkansas Union plays a pivotal role in putting University of Arkansas students first. It is home to essential student needs, such as food service, computer technology, student accounts, banking, and the Campus Card Office. The Arkansas Union provides social and educational programming space, as well as lounge and study areas. Additionally, recreational opportunities are available in the Arkansas Union, through the satellite fitness center, cinema, and Student Technology Center. Located inside the Arkansas Union are:

## Retail Outlets

- ATMs (various banks)
- Hill Coffee Company
- Ozark Catering Company
- Club Red Convenience Store
- Where the Wild Greens AR
- Passport Office
- PMC - Drop-Off Copy Center
- Razorback Shop
- U.S. Post Office
- Union Hair Care

## Union Food Court

- Chick-fil-A
- Rustic Italian
- True Burger
- Paper Lantern

## Facilities

- Anne Kittrell Art Gallery
- Computer Lab and Help Desk
- Verizon Ballroom
- International Connections Lounge
- Student Technology Center
- Meeting rooms
- Conference rooms
- Union Living Room
- Union Information Center
- Union Theatre
- University Recreation Fitness Center
- UP Theater

## Student Services

- Academic Initiatives and Integrity
- Arkansas Union Administration \& Event Services
- Associated Student Government
- Campus Card Office
- Career Development Center
- Center for Community Engagement
- Center for Educational Access
- Multicultural Center
- New Student and Family Programs
- Student Activities
- Treasurer's Office and Student Accounts
- University Productions

## Campus Life Center for Community Engagement

The purpose of the Center for Community Engagement is to promote civic engagement and leadership by connecting University of Arkansas students, faculty, and staff with nonprofit organizations in the Northwest Arkansas area and beyond.

In order to serve this purpose, the center maintains uark.givepulse.com (http://volunteer.uark.edu/), which enables the University of Arkansas community to search for agencies and volunteer opportunities. It allows users to log volunteer hours, or "impacts," and earn opportunities for community recognition, such as the Presidential Volunteer Service Award and Chancellor's Community Service Award. Northwest Arkansas agencies and University of Arkansas registered student organizations also utilize the site to post service opportunities and recruit volunteers. Over 350 organizations and subgroups are registered on the site, such as Habitat for Humanity, Uark Cardinal Nights, and Potter's House Thrift.

## Volunteer Action Center

The Center for Community Engagement also houses the Volunteer Action Center, a student-led volunteer coordination board with 45 members who
are dedicated to active service in the community. Each year the Volunteer Action Center provides meaningful service opportunities through events and ongoing projects that engage the university and Northwest Arkansas communities. The Volunteer Action Center sponsors programs and events including the Jane B. Gearhart Full Circle Food Pantry, Make a Difference Day, Dream B.I.G. (Believing in Girls) Mentoring Program, VAC Literacy Program, and Razorback Food Recovery. The Jane B. Gearhart Full Circle Campus Food Pantry is a nationally recognized program; the pantry serves students, staff and their families. Requests and more information can be found at fullcircle.uark.edu (http://service.uark.edu/foodprograms/ jane-b-gearhart-full-circle-food-pantry/).

Get involved in the following ways:

- Drop by the Center for Community Engagement, Arkansas Union, Room A643, and chat with the office's great staff and students.
- Look for service opportunities on uark.givepulse.com (http:// volunteer.uark.edu/) and log your hours. Just ten hours makes you a VAC member.
- Participate in events hosted by Volunteer Action Center and the Center for Community Engagement throughout the year.
- Become a Volunteer Action Center board member or weekly program volunteer. Applications are accepted each semester.

## Greek Life

The Charles and Cappy Whiteside Greek Life Leadership Center facilitates the educational process and provides resources related to programs that strengthen the growth and development of students affiliated with fraternities and sororities on campus. The overall mission is to strengthen the academic, cultural, moral, and social development of students in Greek organizations; provide training in strengths-based leadership and other personal and social skills; promote involvement in extracurricular activities and community service projects; and promote Greek Life as a productive and viable lifestyle on campus. The Greek Life Leadership Center coordinates programs such as Recruitment, Greek Getaway, Greek Life Facilitators, and Greek Summit in collaboration with the Interfraternity Council, the National Pan-Hellenic Council, the Panhellenic Council, and the United Greek Council.

The Interfraternity Council (IFC), National Pan-Hellenic Council (NPHC), Panhellenic Council (PC) and United Greek Council (UGC) govern 16 national sororities and 19 fraternities. The officers and representatives of each council work with the staff of the Greek Life Leadership Center to provide positive programs and strengths-based leadership opportunities to the members of the Greek organizations. The Charles and Cappy Whiteside Greek Life Leadership Center is in Walton Hall 101; phone 479-575-5001 or fax 479-575-3531; Web: uagreeks.uark.edu.

## New Student \& Family Programs

The Office of New Student \& Family Programs connects students and their families to the University of Arkansas campus and community by providing diverse, innovative programs and resources that support a successful collegiate experience. The department supports and collaborates on the following major initiatives:

- Extended Orientation Programs: R.O.C.K. Camp, R.O.C.K. Camp Adventure, Hog W.I.L.D. (Welcome, Involvement, Leadership and Diversity) Welcome Weeks, and Help-A-Hog
- Parent \& Family Programs: Family Weekend, Spring Family Reunion, Regional Razorback Family Networks, and the Parent \& Family Association
- Leadership \& Late Night Programs: UARK Cardinal Nights, Emerging Leaders, Student Leader of the Month, and Diversity Leadership Institute
- Transition Initiatives: New Student Welcome, Alpha Lambda Delta First Year Honor Society, A-Week, and First-Yer Leadership Summit

By providing transitional support for incoming students, their parents, and family members, our programs effectively promote the students' academic growth and support the mission of the university.

New Student \& Family Programs is located in the Arkansas Union, Room A688; phone 479-575-5002; Web: nsfp.uark.edu (http://nsfp.uark.edu/).

## Office of Student Activities

With a students-first philosophy, the Office of Student Activities provides an environment for involvement, empowerment, and collaboration through student organizations, programmatic experiences, and shared governance. The office maximizes the UA experience by advocating for all students, promoting intercultural understanding, and developing citizens who are prepared to positively impact their communities.

The Office of Student Activities, located in the Arkansas Union A665, is the central location for student organizations and activities for the university. The office can be reached at 479-575-5255 or visit the office's website at osa.uark.edu (http://osa.uark.edu/). The Office of Student Activities is responsible for the oversight and administration of the following areas:

## Student Organizations

All student organizations must register annually with the Office of Student Activities. The Office of Student Activities provides student organizations with assistance and services to help them succeed. The office also assists student organizations in event planning, provides information on facility reservations and fundraising, trademark forms, mailboxes, and locker space, and offers educational workshops for students and advisers. A limited number of offices are also awarded annually in the Arkansas Union to organizations. In partnership with SOOIE, the Student Organization Outreach and Involvement Experience, fall and spring involvement fairs are offered to help registered student organizations connect with interested students.

Types of registered student organizations (RSOs):

- Governing - An organization whose primary purpose is to serve as a governing body for a large or specific constituency of students.
- Honorary/Service - An organization that requires a minimum grade point average as a prerequisite to membership and/or is affiliated with a national service or honorary organization.
- International/Cultural - An organization whose primary purpose is to provide a forum in which participants create awareness for a specific culture through educational, social, and recreational activities.
- Professional - An organization whose primary purpose is to provide a forum for participants to discuss and develop professional careers and/or is affiliated with a national or regional association.
- Religious - An organization whose primary purpose is to provide information and activities associated with one or more religions.
- Special Interest - An organization whose primary purpose is to provide an organized format for the practice and/or pursuit of a special or common interest.
- Greek organizations are also RSOs, but register through the Greek Life Office. These are organizations with Greek letters that are
members of the National Interfraternity Council, the Panhellenic Council, National Pan-Hellenic Council, or the United Greek Council.

## Student Government

As a result of a student-led process that saw the passage of both legislation and a student referendum, student governance at the University of Arkansas is now organized under the Associated Students Supreme Constitution into two, co-equal governing bodies: the Associated Student Government and the Graduate and Professional Student Congress. Both bodies are a part of the practice of shared governance at the university.

The Associated Student Government and is an undergraduate studentled organization that enables its members to have an active voice in the decisions and policy that directly affect undergraduate students at the university. Students involved in Associated Student Government have the opportunity to positively impact the quality of student life, work with and allocate student fees, provide a voice for student concerns as well as oversee programs and policies for undergraduate students. Through the executive, legislative, and judicial branches of student government students have the opportunity to work for and among their peers to make a difference on all levels of the university. Involvement levels and time commitment vary upon duties. Visit the ASG website at asg.uark.edu (http://asg.uark.edu/) or the ASG office (Arkansas Union A669) to find out more.

As its name indicates, the Graduate and Professional Student Congress serves students who have earned a baccalaureate degree and are completing coursework for graduate certificates or degrees as well as professional practice doctoral programs. The congress works to advocate for the collective welfare of its constituents, manage and distribute student fee monies, represent the common interests of its constituents, and to speak with one voice the opinions of its members. Through its executive and legislative branches, the congress seeks to improve the lives, careers, and research of all graduate-professional students at the university. Involvement levels and time commitments vary upon duties. Visit the Graduate and Professional Student Congress website at gpsc.uark.edu (https://gpsc.uark.edu/) or the its office (Arkansas Union A647) to find out more.

## University Programs

University Programs is a volunteer student organization responsible for planning and coordinating more than 100 events annually for the campus community. University Programs provides students with cultural and educational experiences, entertainment, and fun. Eight committees, all made up of students, select, schedule and produce events such as concerts, movies, lectures, fine arts performances, gallery exhibitions, and daytime programs. Being a part of University Programs gives the student committee members leadership training and real opportunities to gain practical planning experience. Supported by a student activity fee, University Programs events are free to students.

For further information, visit the University Programs website at up.uark.edu (http://up.uark.edu/).

## University Career Development Center

The University Career Development Center (CDC) educates and empowers students to fulfill their career goals. All $U$ of $A$ students are welcome to take advantage of the center's valuable resources:

Career Advising: Career Counselors in the CDC are available to assist students who may need help selecting a college major, seeking career information, researching or exploring careers, preparing for their job search, or considering graduate school.

Career and Strength-Awareness Assessments: The STRONG Interest Assessment, FOCUS 2 and TypeFocus are career assessments that can help students make career decisions based on their interests and values. StrengthsQuest is an assessment which helps individuals discover their talents and strengths. After discovering their talents, the Career Center assists students in learning how to use their talents to achieve academic, career, and personal success.

Career Fairs: In partnership with academic areas on campus, the CDC hosts a number of career fairs each year to provide opportunities for students to connect with employers and to learn more about companies and organizations. These connections could lead to valuable internships or full-time employment.

Job Search Preparation: The CDC offers resume critiques, interview skills training, mock interviews, networking opportunities, career presentations and several professional development events throughout the academic year to prepare students for internships, co-ops or full-time jobs.

Cooperative Education Opportunities: Cooperative Education is a program that enables students to gain professional work experience in paid, degree-related positions. Co-op students earn credit, a competitive wage and valuable "real world" work experience.

Handshake: Handshake is the ultimate job and internship search tool for current UA students and recent graduates. Apply for 4000+ jobs or internships, view career fairs and events, schedule career advising appointments, and research companies all through Handshake.

Online Resources: Through the CDC's website, students have access to a multitude of resources including Optimal Resume which contains hundreds of resume templates, cover letter examples, and interview questions for students to practice and enhance their interviewing skills. Students can also view 1000+CandidCareer short videos featuring various careers and advice from professionals in the field or view our "What Can I Do With This Major?" pages featuring common careers and helpful job search sites for each UA major. These are just a few of the many resources which can be found at career.uark.edu.

## Career Track Razorbacks (formerly Professional Development

 Institute): This nationally recognized program creates opportunities for UA students to develop professional career-building skills. Participation in this program can help students gain the valuable skills which give them the competitive advantage in their job or graduate school search.For more information, check out career.uark.edu (http://career.uark.edu/).
The University Career Development Center is conveniently located in Arkansas Union Room 607, or call 479-575-2805.

## Pat Walker Health Center

Pat Walker Health Center supports students along their academic journey by providing access to professional and quality medical care, mental health care, and substance use and support services.

As a department of the Division of Student Affairs, the health center strives to enrich academic and personal development by creating an
inclusive environment that promotes positive behavior and healthy lifestyle changes.

Students are strongly encouraged to maintain health insurance coverage. A university-sponsored student health insurance policy is available to all students, student spouses and dependent children. Enrollment and cost information can be found at health.uark.edu (https://health.uark.edu/ billing-insurance/insurance.php).

Pat Walker Heath Center works to provide affordable and convenient services for the campus community. While the health center has a variety of programs and some services that are covered by the student health and wellness fee, there are charges associated with medical and psychiatry services. The services that have charges associated may be covered by your health insurance policy, however, you are not required to have insurance to use medical and mental health services. For more information about health center billing and charges, go to the Billing and Insurance (https://health.uark.edu/billing-insurance/) page.

## Medical Care

Pat Walker Health Center offers high-quality and affordable medical care through its signature clinics and programs. All medical services are performed by board-certified physicians and advanced practice registered nurses. Appointments can be scheduled online via the Patient Portal at myhealth.uark.edu, or by calling 479-575-4451.

- Primary Care Clinic offers illness and injury diagnosis and treatment, integrated behavioral health services, laboratory services, minor surgery, nurse triage, nutrition consultations, orthopedic consultations, routine wellness physical exams, screening for infectious diseases, and X-rays.
- Allergy, Immunization and Travel Clinic offers allergy shots, immunizations, international travel consultations and tuberculosis screenings.
- GYN (Women's) Clinic provides comprehensive gynecological services and personalized health care for the university community using best practices.

## Mental Health

Counseling and Psychological Services (CAPS) helps students navigate the pressures of college life and beyond with various evidence-based mental health services and programs. CAPS is staffed with licensed psychologists, counselors and social workers who work to help address common mental health issues and concerns that impact student success, such as anxiety, depression and stress.

CAPS offers services such as individual counseling, group counseling, psychiatry, emergency services, and case management. Although psychiatry services have charges associated that can be billed to insurance, most CAPS services and resources are covered by the student health and wellness fee. To learn more about CAPS services and programs, go to the Mental Health (https://health.uark.edu/mentalhealth/) page.

## 24-hour emergency mental health services are available for all students.

To access CAPS services or 24-hour emergency services, call 479-575-5276.

## Substance Education, Assessment and Recovery

Pat Walker Health Center's Substance Education, Assessment and Recovery (SEAR) program provides direct individual and group interventions to university students with alcohol, cannabis, and other substance related concerns. SEAR offers a variety of research-based prevention, early intervention, and recovery support services and programs.

SEAR frequently partners with campus groups to promote a learning environment that supports healthy behavior choices, as well as raise awareness about the risks associated with alcohol abuse and illicit drug use.

To learn more about SEAR's services and programs, go to the Substance Use \& Support (https://health.uark.edu/sear/) page.

## Accreditation

Pat Walker Health Center is accredited by Accreditation Association for Ambulatory Health Care.

CAPS is accredited by the International Association of Counseling Services.

The health center is located at 525 N. Garland Ave. If you have questions about specific services, call 479-575-4451 or go to health.uark.edu (http:// health.uark.edu/).

## Housing and Dining University Housing

University Housing is committed to providing a safe, comfortable, convenient and reasonably priced living and learning environment that promotes student success.

## Success on Campus

National research shows that academic success in the first year and beyond is directly linked to residing in an on-campus residence environment. The University of Arkansas recognizes the benefits that students receive from living on campus their first year.

## Freshman Residency Requirement

All single students who are admitted to the university with a freshman classification and under 21 years of age are required to live on campus in a residence hall, or in their parent or legal guardian's permanent home.

Students who are admitted to the University of Arkansas as transfer students from another post-secondary institution, and who have completed at least 24 credit hours at that institution are not required to live on campus.

Requests for a newly admitted freshmen to live somewhere other than with parents or a legal guardian in their permanent home will not be approved under most circumstances.

Students planning to live with their parents or legal guardian in their permanent home should complete the Living with Parent Notification form prior to attending an orientation session.

Students requesting an exemption from the University of Arkansas Freshmen Residency Requirement (https://housing.uark.edu/live-here/for-incoming-students.php) should send all required paperwork to University Housing at least three weeks prior to attending an orientation session.

This ensures the student receives approval or denial prior to attending orientation

Failure to do so could cause long delays in the orientation process. Students who need a Living with Parent Notification Form or who wish to apply for an exemption to the university's requirement for single freshmen to live on campus may refer to the information on the Housing website (https://housing.uark.edu/live-here/for-incoming-students.php), call University Housing at 479-575-3951 or email housing@uark.edu.

## Residence Hall Leadership

Residence halls are managed by a full-time coordinator for residence education, or CRE, who has completed a master's degree program in higher education, counseling or a related degree. This individual is selected for his or her academic credentials and interest in helping others as well as his or her ability to work well with college students.

In addition, every area or floor is staffed by a resident assistant, or RA, who is an upper-class student with the knowledge to answer students' questions and help students find their own answers.

Counselors-in-residence (doctoral graduate assistants) provide shortterm counseling for students (https://housing.uark.edu/services/mentalhealth.php) living in the residence halls in response to personal, social, academic, and developmental needs.

## Living Learning Communities

University Housing offers several innovative Living Learning Communities (https://housing.uark.edu/programs/living-learning-communities/), or LLCs, for students. These communities enhance student's academic success.

In an LLC, students get to live with peers who have similar interests, majors, or career plans. Living Learning Communities do not cost extra. LCC members have the opportunity to participate in fun experiences that connect learning in and out of the classroom.

Some of the initiatives include faculty-led events, major specific academic learning teams, more general thematic learning communities and other programs that assist students in their academic endeavors.

## Living Facility Options

Living options include traditional halls, suites and apartments with designations of single-gender or co-ed. Rooms are available for visually or hearing-impaired students as well as those who are physically challenged (https://housing.uark.edu/live-here/housing-contracts.php\#disabilityaccommodation).

Residence hall entry/exit doors are secured and/or monitored 24 hours a day. Some entries are unlocked to accommodate offices housed in our facilities and classes that are held in our classrooms. Most, but not all, of these areas have interior doors that secure the living floors.

Residents are provided access via an electronic access system. Students should be careful not to allow non-residents to follow them into their residence hall. Residents are provided access via a fob issued when they check-in. Students are responsible for escorting all visitors and guests at all times.

## Campus Dining

Each of the three separate dining facilities (https://housing.uark.edu/ live-here/dining-rates.php) on campus is managed by Campus Dining Services and provides a natural setting for socializing with friends and
enjoying a wide variety of high quality, nutritious meals. All students living in a residence hall, except those residing in summer school housing, are required to have a meal plan. There are several meal plans available to meet the needs of both on-campus and off-campus students.

Learn more about Campus Dining Services online at campus dining services (http://dineoncampus.com/razorbacks/).

## Inclusion and Leadership Center for Multicultural and Diversity Education

The Center for Multicultural and Diversity Education provides academic, cultural and social programs intended to promote inclusiveness, foster achievement and assist in the development and advancement of a diverse student body.

The center is located on the fourth floor of the Arkansas Union in Room 404, and can be contacted at 479-575-8405 or by visiting multicultural.uark.edu (http://multicultural.uark.edu).

## Student Support Services

The TRIO Student Support Services program is designed to provide a powerful combination of programs and services to students who are firstgeneration, and/or modest-income, and/or individuals with disabilities. The services provided by TRIO place an emphasis on individual assessment, counseling, advising, and skill building. Some of these services include: academic/financial/personal counseling, financial scholarships, social etiquette instruction, career and graduate school preparation, academic/ cultural enrichment, assistance with tutoring, and mentorship. The overarching goal of the University of Arkansas Student Support Services program is to empower students, assist them in achieving academic excellence, and seeing them through to graduation.

Student Support Services is a department in the Division of Student Affairs. The office is located on the Garden Level of Gregson Hall. For more details, call Student Support Services at 479-575-3546 or visit the Student Support Services website (https://success.uark.edu/about-us/ trio/).

## Talent Search

Talent Search is an early intervention/educational opportunity program. Serving students in grades 6-12, the program promotes skills and disseminates information necessary for successfully entering college and completing a baccalaureate degree. Emphasizing personal/career development, financial literacy, technological/academic skills, and ACT readiness through a developmental curriculum of college preparatory workshops, students are prepared for the rigors of higher education. Campus visits, academic monitoring/advising, and guidance in the completion of college and financial aid applications are key components for participants and their families. Summer enrichment and campusbased events are also hosted as funding permits.

Talent Search is a federal TRIO program funded by the U.S. Department of Education. The University of Arkansas has three Talent Search grant projects which serve distinct target areas in Benton, Carroll, Crawford, Sebastian and Washington counties in Arkansas, and McDonald County, Missouri. At least two-thirds of students served by the programs must be low-income and in the first generation of their family to attend college. They exhibit academic potential and attend one of the 37 target schools served. For additional information and a full listing of target schools, visit the Talent Search website (http://talentsearch.uark.edu/).

The Talent Search Programs office is located at the university's Uptown Campus East, 1083 E. Sain Street, UPTE 128, Fayetteville, Arkansas.
Call 479-575-3553 for more information.

## Upward Bound

## Upward Bound and Upward Bound Math and Science

Upward Bound (http://ub.uark.edu/) and Upward Bound Math and Science are early intervention programs that help low-income and potential first-generation college students prepare for higher education. These programs bring high school students in grades $9-12$ to the University of Arkansas campus on weekends and during the summer to receive instruction in mathematics, laboratory sciences, composition, literature, and foreign languages. The programs also provide academic and social support through tutoring, counseling, mentoring, cultural enrichment, financial literacy, field trips, college planning, and financial aid assistance. For students just completing their senior year of high school, Upward Bound provides a summer residential bridge program that enables participants to earn up to six hours of college credit. Funding is provided through grants from the U.S. Department of Education.

## Veterans Upward Bound

Veterans Upward Bound (http://vub.uark.edu/) is designed to identify and serve the unique needs of veterans who are low-income and potential first-generation college students, who have the academic potential and desire to enter and succeed in a program of higher education. Eligible veterans must have completed a minimum of 180 days of active duty in the military and hold any discharge other than dishonorable, or discharged because of a service connected disability, a member or a reserve component of the U.S. Armed Forces called to active duty for a period of more than 30 days, or a member of a reserve component of the U.S. Armed Forces who served on active duty in support of a contingency operation on or after September 11, 2001. Services include Accuplacer testing, tutoring, guidance counseling, assistance in filing financial aid and VA benefit forms, academic/career advisement, test preparation for entrance exams, and courses in English, Spanish, math, science, and computer technology. Courses are offered days and evenings each semester. Funding is provided through a grant from the U.S. Department of Education. Call 479-575-2442 for more information.

The Upward Bound and Veterans Upward Bound offices are located at the university's Uptown Campus West, 1001 E. Sain St., Fayetteville.

## Student Life

## Reasonable Accommodations for Students with Disabilities

The Center for Educational Access, 209 Arkansas Union, is the central campus resource for students who require reasonable accommodations in order to access the programs, services and activities offered through the University of Arkansas. The center's staff work in partnership with the individual student to communicate and facilitate any accommodation needs to faculty and staff. Accommodation determination is based in part on medical or psychological documentation provided to the Center for Educational Access by the student. Students must meet with one of the center's staff for an access plan meeting to discuss their needs and provide such documentation before any accommodations can be granted.

To register for services or for more information, contact the Center for Educational Access, University of Arkansas, 209 ARKU, Fayetteville, AR 72701, phone 479-575-3104 ; e-mail: ada@uark.edu; Web: Center for

Educational Access (http://cea.uark.edu/) (online request for services available).

## Off-Campus Student Services

## Off-Campus Student Services (OCSS)

Off-Campus Student Services (formerly Off Campus Connections) provides friendly and helpful resources, services and programs for off-campus undergraduates. Off-campus students are defined as undergraduates not living in a residence hall, fraternity, or sorority house. For information, visit the Off-Campus Student Services website (http:// occ.uark.edu/), make an appointment with a staff member in Arkansas Union Room 632, email iliveoff@uark.edu, or call 479-575-7351.

OCSS emphasizes two major priorities:

- Freshman Commuter Programs
- Off-Campus Living Education and Services

The University of Arkansas has more than 16,000 undergraduates living off-campus. Some off-campus students live near the university while others commute from hours away. Some students take advantage of online classes or majors and seldom visit campus. It is important that students living off-campus feel as welcome at the university as students living on-campus. Ongoing communication with off-campus students is important, so they know how to be an active part of the campus community as their schedule and other commitments allow. Additional challenges are faced by off-campus students and they need support from those who understand the differences they face.

Freshman Commuters are first-time, full-time, degree-seeking students who live at home with a parent or guardian during their first year of college. Off-Campus Student Services reaches out to more than 500 freshman commuters each summer and fall to share campus and academic resources, to provide opportunities to meet other cohort members, and to share mentorship and connection opportunities.

Finding a place to live is a basic need for many students after their freshman year. To help meet the needs of those students looking for housing near campus, OCSS provides the official, searchable off-campus housing website: offcampushousing.uark.edu (https:// offcampushousing.uark.edu/). The website is free for student use, and properties on the site have an interest in student tenants. Off-Campus Living Fairs and educational resources are also offered on the site to prepare those who are planning to live on their own for the first time in our local community. Students can search for a roommate or someone to sublease when they plan to study abroad.

Off-Campus Meal Plans have proven important to student success. Meal plans of various prices have been designed to meet off-campus students' needs for eating while on campus for class, work, or other activities. Meal plans are available for purchase through a link provided on the OffCampus Student Services website (http://occ.uark.edu/). Around 4,000 meal plans are purchased each year are by off-campus students. Having a meal plan encourages students to eat regular meals so they can better focus on academics. Meal plans are charged to a student's account, so costs may be covered with scholarships, financial aid awards, or paid out with tuition payments.

A friendly and comfortable Commuter Lounge - with a refrigerator, microwave, television, study tables and office spaces - is located on the Sixth Floor West of the Arkansas Union. Timely tips and information about jobs, deadlines, campus, and community life are shared through
a weekly electronic newsletter published and emailed to off-campus undergraduates throughout the fall and spring semesters.

Off-Campus Student Services' desire is for each student living off-campus to feel an important part of the University of Arkansas, earn at least one degree, and have their name forever inscribed on the historic Senior Walk.

## Office of Student Standards and Conduct

It is the vision of the Office of Student Standards and Conduct to foster a campus community that values citizenship, personal and civic responsibility, peer accountability, and care/concern for the university and surrounding communities.

The mission of the Office of Student Standards and Conduct (OSSC) is to create a safe and inclusive community by upholding the Code of Student Life, which promotes responsibility, accountability, and student learning through;

- Educational opportunities and outreach.
- The adjudication of Code of Student Life violations.
- Providing a consistent, fair, equitable, educational, student conduct process.
- The development of ethics and adherence to personal values.
- Education on the norms and values of the University of Arkansas.

Students who are interested in involvement with the All-University Conduct Board should contact the Director of OSSC at judicial@uark.edu. The All-University Conduct Board comprises faculty, staff, and students and is responsible for the adjudication of cases of alleged student misconduct as outlined in the Code of Student Life. This board is an advanced leadership opportunity for students who would like to gain valuable experience working with faculty and staff on an impartial peer review board.

For more information regarding the Code of Student Life, please see the Student Handbook at handbook.uark.edu (http://handbook.uark.edu/). The Office of Student Standards and Conduct is located in Pomfret B 110, phone 479-575-5170; Web: ethics.uark.edu (http://ethics.uark.edu/).

## Veteran and Military-Affiliated Student Center

The University of Arkansas Veteran and Military-Affiliated Student Center contributes to the academic and professional success of current and prospective student veterans and their dependents by providing innovative resources and support; assisting with military educational benefits; and by serving as a central "Rally Point" for a seamless collaboration among various departments within the University of Arkansas, the U.S. Department of Veterans Affairs, and the diverse network of community partners supporting veterans.

Veterans and dependents of service members may be eligible to receive monthly educational assistance from the Veterans Administration while enrolled at the University of Arkansas. For more information, including eligibility for veterans educational benefits and scholarship opportunities, contact the Veteran and Military-Affiliated Student Center at vric@uark.edu or 479-575-8742. Students may also visit the center at the Garland Center Shops, suites 115 and 116 or online at veteranscenter.uark.edu (http://veteranscenter.uark.edu/).

## Student Media

The Office of Student Media administers and advises the official student media outlets of the university. These outlets are:

- The Arkansas Traveler, the student newspaper
- The Razorback, the University of Arkansas yearbook
- The Hill, the student magazine
- UATV, the student television station
- KXUA, the student radio station
- Main Hill Media, the student advertising agency

All provide a forum for student expression, entertainment, news and information of interest to the campus community. Other than a small professional support staff, these groups are entirely staffed by student employees and volunteers, including editors and station managers. For more information, visit the Student Media page (https:// studentmedia.uark.edu/) or contact Student Media at 479-575-3406.

## Division of Economic Development

## David Edward Snow

Executive Director
desnow@uark.edu
Division of Economic Development Website (https://economicdevelopment.uark.edu/)
The Division of Economic Development works to expand economic opportunity and prosperity in Arkansas through talent development, innovative research and technologies, community service, and place-making strategies. As the state's flagship university and a land-grant institution, the University of Arkansas is committed to engaging, collaborating and providing outreach to the residents, businesses, and governmental and civic entities of the state to make sustained advances in economic capacity and quality of place.

Affiliated units of the division include:

- Office of Entrepreneurship and Innovation
- Office of Industry Engagement
- Technology Ventures
- World Trade Center
- Arkansas Research and Technology Park
- Corporate and Foundation Relations
- Arkansas Small Business and Technology Center

## Division of Research and Innovation

John R. English
Vice Chancellor for Research and Innovation
479-575-5901
jre@uark.edu
Division of Research and Innovation Website (https://research.uark.edu/)
Research programs are the means by which the university contributes to the generation of knowledge as well as to the preservation and dissemination of it. With nationally recognized programs in many areas and funding from government, industry, and other private sources, the research effort of the university is strong and diversified and provides special learning opportunities for students as discoveries are made.

In addition to the extensive work performed by faculty through individual and team efforts in academic departments, special programs of research are conducted by the university divisions described below.

Graduate students are likely to be involved in research conducted by these research units, but the university encourages undergraduates as well to pursue research in their areas of academic interest. Students who wish to engage in research of any kind should seek the guidance of their advisers and professors to identify research teams and projects. In addition to the extensive work performed by faculty through individual and team efforts in academic departments, special programs of research are conducted by faculty members and staff in many associated university research centers. The university invites students to learn more about these centers and the research opportunities they offer by visiting the websites or by contacting the individuals listed below.

Units connected to the Division of Research and Innovation include:

- Office of Development for Research
- Office of Innovation and Industry Partnerships
- Office of Research Compliance
- Office of Scholarly Communications
- Office of Sponsored Research
- University of Arkansas Press

## Undergraduate Catalog

This catalog of studies is a comprehensive reference for your years of study - a list of degrees and courses offered at the University of Arkansas. In addition, it gives you valuable information such as suggested and required degree plans and information about costs, scholarships and financial assistance, and campus resources. Read it with pleasure and with care.

Take every opportunity to consult your academic adviser to ensure that you are taking advantage of courses and university resources that will help you reach your educational and career goals and graduate on time. If you are not sure where to find your academic adviser, contact the dean's office of your college; the phone numbers are listed under Contact Information (p. 6). If you are exploring majors and undecided yet, contact the advising office in the Fulbright College of Arts and Sciences at 479-575-3307.

Remember, the University of Arkansas is committed to your success. The faculty and staff are here to support you as you work to achieve your goals. Ask for help and advice whenever you need it.

The University of Arkansas is committed to the policy of providing educational opportunities to all qualified students regardless of their economic or social status and will not discriminate on the basis of race, color, sex, creed, sexual orientation, disability, veteran's status, age, marital or parental status, or national origin.

## Undergraduate Programs of Study

The academic units of the University of Arkansas include the following colleges, schools and military departments:

- The Dale Bumpers College of Agricultural, Food and Life Sciences (p. 124), which includes the School of Human Environmental Sciences (p. 202)
- The Fay Jones School of Architecture and Design (p. 238)
- The Fulbright College of Arts and Sciences (p. 273), which includes the School of Art (p. 300), the School of Journalism and Strategic Media (p. 466), and the School of Social Work (p. 567)
- The Sam M. Walton College of Business (p. 612)
- The College of Education and Health Professions (p. 698), which includes the Eleanor Mann School of Nursing (p. 750)
- The College of Engineering (p. 826)
- Graduate School (http://catalog.uark.edu/graduatecatalog/), which includes the Graduate School of Business (http://catalog.uark.edu/ graduatecatalog/business/)
- School of Law (http://catalog.uark.edu/lawcatalog/)
- Honors College (p. 92)
- Global Campus (http://globalcampus.uark.edu/)
- Departments of Army ROTC (p. 887) and Air Force ROTC (p. 887)

The Global Campus serves as a portal for online, distance and professional education programs and courses provided by the University of Arkansas. Experienced staff members collaborate with the university's academic colleges and schools and other academic units to develop and facilitate quality, cutting-edge courses and programs.

The School of Law and the Graduate School offer professional and graduate degrees. See the Graduate Catalog and the Law School Catalog for more information.

## Accreditations

The University of Arkansas, Fayetteville, is accredited by the Higher Learning Commission.

Some colleges and programs are also accredited by other agencies, associations, or professional organizations, including those listed below.

## Dale Bumpers College of Agricultural, Food and Life Sciences

The Bachelor of Science in Human Environmental Sciences (B.S.H.E.S.) degree program in human nutrition and dietetics is accredited by the Accreditation Council for Education in Nutrition and Dietetics of the Academy of Nutrition and Dietetics. The Jean Tyson Child Development Study Center is accredited by the National Association for the Education of Young Children (NAEYC).
The Bachelor of Science in Agricultural, Food and Life Sciences (B.S.A.) in food science is accredited by the Institute of Food Technologists. Teacher education programs in agriculture and birth through kindergarten are coordinated with educational programs in the College of Education and Health Professions and are accredited by the Council for the Accreditation of Educator Preparation (CAEP).

## Fay Jones School of Architecture and Design

The Bachelor of Architecture (B.Arch.) program is accredited by the National Architectural Accrediting Board (NAAB), and the Bachelor of Landscape Architecture (B.L.A.) program is accredited by the Landscape Architecture Accreditation Board of the American Society of Landscape Architects (LAAB). The Bachelor of Interior Design (B.I.D.) degree is accredited by the Council for Interior Design Accreditation (CIDA) and is also coordinated with design programs in Fulbright College of Arts and Sciences and accredited by the National Association of Schools of Art and Design.

## Fulbright College of Arts and Sciences

The Bachelor of Arts in Studio Art, the Bachelor of Arts (B.A.) in Art History, the Bachelor of Fine Arts (B.F.A.) in Studio Art, the Bachelor of Fine Arts (B.F.A.) in Graphic Design, the Bachelor of Fine Arts (B.F.A.) in Art Education, the Master of Art (M.A.) in Art Education, and the Master of Fine Arts (M.F.A.) in Art are accredited by the National Association of Schools of Art and Design. The Accrediting Council on Education in Journalism and Mass Communications has accredited the Bachelor of Arts (B.A.) degree program in journalism and the Bachelor of Arts (B.A.) degree in Advertising \& Public Relations. The Bachelor of Arts (B.A.), Bachelor of Music (B.M.), and Master of Music (M.M.) degree programs, along with the graduate certificates in Music Education for Special Needs Students and Advanced Performance in the Department of Music are accredited by the National Association of Schools of Music. The Doctor of Philosophy (Ph.D.) degree program in clinical psychology is accredited by the American Psychological Association. The Bachelor of Social Work (B.S.W.) and the Master of Social Work (M.S.W.) degree programs are accredited by the Council of Social Work Education. The Bachelor of Arts (B.A.) in Theatre and the Master of Fine Arts (M.F.A.) degree programs are accredited by the National Association of Schools of Theatre.

## Sam M. Walton College of Business

The Sam M. Walton College of Business offers degree programs for undergraduate students and for graduate students at both the master's and doctoral levels and has been a member of and accredited by AACSB International, the Association to Advance Collegiate Schools of Business, since 1931. The accounting program was separately accredited in 1986 at both the bachelor's and master's levels. The master's in business administration program was approved in 1963. Accreditation by AACSB and membership in that organization signifies the college's commitment to AACSB goals of promoting and achieving the highest standards of business education.

## College of Education and Health Professions

The teacher education programs in the College of Education and Health Professions are accredited by theCouncil for the Accreditation of Educator Preparation (CAEP). The Master of Science degree program in communication sciences and disorders is accredited by the American Speech-Language-Hearing Association (ASHA). The Bachelor of Science in Nursing (B.S.N.) degree program is accredited by the Commission on Collegiate Nursing Education (CCNE) and is approved by the Arkansas State Board of Nursing. The Master of Science in Nursing (M.S.N.) and the Doctor of Nursing Practice (D.N.P.), are also accredited by the Commission on Collegiate Nursing Education (CCNE), along with the graduate certificate in Nursing Education. The Bachelor of Science (B.S.) degree program in public health is accredited by the Council on Education for Public Health. The Master of Science degree in counseling and the doctor of philosophy in counselor education and supervision are accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). The Master of Athletic Training (M.AT) is accredited by the Commission on Accreditation of Athletic Training Education (CAATE). The Doctor of Occupational Therapy (O.T.D.) has reached the candidacy status of accreditation with the Accreditation Council for Occupational Therapy Education (ACOTE).

## College of Engineering

The College of Engineering offers the following programs accredited by the Engineering Accreditation Commission of ABET (visit http:// www.abet.org for more information): Bachelor of Science in Biological Engineering (B.S.B.E.), Bachelor of Science in Biomedical Engineering (B.S.B.M.E.), Bachelor of Science in Chemical Engineering (B.S.Ch.E.), Bachelor of Science in Civil Engineering (B.S.C.E.), Bachelor of Science in Computer Engineering (B.S.Cmp.E.), Bachelor of Science in Electrical Engineering (B.S.E.E.), Bachelor of Science in Industrial Engineering (B.S.I.E.), and the Bachelor of Science in Mechanical Engineering (B.S.M.E.). The College of Engineering also offers a Bachelor of Science in Computer Science (B.S.C.S.) that is accredited by the Computing Accreditation Commission of ABET (visit http://www.abet.org for more information).

## School of Law

The degree programs in the School of Law on the Fayetteville campus are accredited by both the American Bar Association Section of Legal Education and Admissions to the Bar..

## Undergraduate Certificate Programs

Brewing Science (p. 187)
Child Advocacy Studies Training (p. 567)
Cybersecurity and Data Management (p. 663)
Diversity, Equity and Inclusion Management (p. 674)

Equine Management (p. 166)
Geospatial Technologies (p. 428)
Poultry Science (p. 200)
STEM Education (p. 822)
Following is a list of major programs of undergraduate study - grouped by college and school - offered at the University of Arkansas, followed by a list of minors and certificates offered by each college and school.

## Majors

## Dale Bumpers College of Agricultural, Food and Life Sciences

Agricultural Business (p. 131)
Agricultural Education, Communication and Technology (p. 144)
Animal Science (p. 158)
Crop Science (http://catalog.uark.edu/
undergraduatecatalog/collegesandschools/
dalebumperscollegeofagriculturalfoodandlifesciences/
cropmanagementcpmg/)
Environmental, Soil, and Water Science (http://
catalog.uark.edu/undergraduatecatalog/collegesandschools/
dalebumperscollegeofagriculturalfoodandlifesciences/
environmentalsoilandwaterscienceesws/)
Food Science (p. 180)
Horticulture, Landscape and Turf Sciences (p. 189)
Poultry Science (p. 195)

## School of Human Environmental Sciences

Apparel Merchandising and Product Development (p. 212)
Birth Through Kindergarten (p. 218)
Food, Nutrition and Health (p. 221)
Hospitality Management (p. 225)
Human Development and Family Sciences (p. 227)
Human Nutrition and Dietetics (p. 234)

## Fay Jones School of Architecture and Design

Architecture (p. 250)
Architectural Studies (p. 243)
Interior Architecture and Design (p. 258)
Landscape Architecture (p. 263)

## Fulbright College of Arts and Sciences

Advertising and Public Relations (p. 281)
Anthropology (p. 294)
Arabic (http://catalog.uark.edu/undergraduatecatalog/ collegesandschools/jwilliamfulbrightcollegeofartsandsciences/ worldlanguagesliteraturesandcultureswllc/\#bainarabictext)
Art (Studio Art) (p. 300)
Art History (p. 300)
Biology (p. 330)
Chemistry (p. 342)
Classical Studies (p. 355)
Communication (p. 357)
Criminology (p. 364)
Data Science (p. 95)
Earth Science (p. 393)
Economics (p. 399) (Bachelor of Arts)
English (p. 405)
French (p. 590)
Geography (p. 418)
Geology (p. 424)

German (p. 590)
Graphic Design (p. 300)
History (p. 436)
Interdisciplinary Studies (p. 455)
International and Global Studies (p. 457)
Italian (p. 590)
Journalism (http://catalog.uark.edu/
undergraduatecatalog/collegesandschools/
jwilliamfulbrightcollegeofartsandsciences/journalism-strategic-media/
\#combinationjournalismpoliticalsciencedegreetext)
Mathematics (p. 468)
Music (p. 485)
Philosophy (p. 525)
Physics (p. 529)
Political Science (p. 551)
Psychology (p. 561)
Social Work (p. 567)
Sociology (p. 575)
Spanish (p. 590)
Theatre (p. 581)

## Combined Majors

Combined majors specify a certain number of credit hours from each field of study to full degree requirements.

Asian Studies (p. 329)
Journalism/Political Science (http://catalog.uark.edu/ undergraduatecatalog/collegesandschools/ jwilliamfulbrightcollegeofartsandsciences/journalism-strategic-media/ \#combinationjournalismpoliticalsciencedegreetext)

## Second (or dependent) Majors

A second (or dependent) major may be earned in a degree program when a student already is pursuing a first major that is authorized to be given independently.

African and African American Studies (p. 288)
Latin American and Latino Studies (p. 466)
Middle East Studies (p. 483)

## Sam M. Walton College of Business

Accounting (p. 689)
Business, General (p. 670)
Business, International (p. 620)
Data Science (p. 95)
Economics (p. 634)
Finance (p. 641)
Information Systems (p. 658)
Innovation and Entrepreneurship (p. 685)
Management (p. 670)
Marketing (p. 676)
Retail (p. 676)
Supply Chain Management (p. 667)

## College of Education and Health Professions

Career and Technical Education (p. 704)
Childhood Education (p. 711)
Communication Sciences and Disorders (p. 727)
Drama Education (p. 741)
Educational Studies (p. 745)
Elementary Education (p. 765)

English Education (p. 771)
Exercise Science (p. 777)
French Education (p. 780)
German Education (p. 786)
Human Resource Development (p. 792)
Nursing (p. 750)
Public Health (p. 795)
Recreation and Sport Management (p. 799)
Social Studies Education (p. 806)
Spanish Education (p. 812)
Special Education (p. 818)
Teaching K-12 Physical Education and Health (p. 822)

## College of Engineering

Biological Engineering (p. 834)
Biomedical Engineering (p. 839)
Chemical Engineering (p. 881)
Civil Engineering (p. 844)
Computer Engineering (p. 849)
Computer Science (p. 849)
Data Science (p. 95)
Electrical Engineering (p. 860)
Industrial Engineering (p. 867)
Mechanical Engineering (p. 874)

## Undeclared Major

Degree-seeking students who are undecided about their choice of a major field of study should enroll in the college or school that best reflects their current academic interest. Advisors in each academic unit can provide guidance to students who are undecided about their choice of a major field of study. Each college has its own rules concerning the point at which a student must declare a major.

Dale Bumpers College of Agriculture and Food Life Sciences (AFLS) - Undergraduate students are expected to officially declare a major prior to earning 30 college credit hours. Advisors in each academic unit can provide guidance regarding majors and career opportunities to students with undeclared status and transfer students who have not declared a major. An administrative advising hold, to be released after meeting with an academic advisor, will be placed on undeclared students' records each term until a major has been declared to encourage thoughtful consideration and selection of majors.

Faye Jones School of Architecture and Design (ARCH) Undergraduate students must elect one of the three academic departments upon acceptance into the School. Undeclared status is not an option.

Fulbright College of Arts and Sciences (ARSC) - Undergraduate students are expected to officially declare a major prior to earning 30 college credit hours. The Fulbright College Advising Center will provide enhanced advising services specific to exploratory students regarding major and career decisions. An administrative advising hold, to be released after meeting with an academic advisor, will be placed on undeclared students' records each term until a major has been declared to encourage thoughtful consideration and selection of majors.

College of Education and Health Professions (COEHP) -
Undergraduate students are admitted into pre-majors in selected fields, including Communication Disorders (PCDIS), Nursing (PNURS), Elementary Education (PELED), and Human Resource

Development (PHRWD). Students must apply to the majors associated with their pre-major in certain semesters, and should work with their advisors to determine the most appropriate time to make this application. Students are admitted directly to programs in Recreation and Sport Management, Educational Studies, Kinesiology, and Public Health. Students may also be admitted to the College as an undeclared student and should work with an academic advisor to declare a major or pre-major prior to earning 30 credit hours.

College of Engineering (ENGR) - All undergraduate engineering students are classified as pre-engineering students until they have successfully completed the two semester freshman engineering sequence and achieved a C or better in MATH 2554, Calculus 1.

Walton College of Business (WCOB) - Students pursuing a degree in Walton College are classified as pre-business until all core-business requirements are fulfilled.

## Minors

Each college and school of the University of Arkansas can determine whether to offer minors within their respective departments and whether to allow a student to pursue a minor in another college or school. Most, but not all, minors are offered in fields in which a major is also offered. Students should check with academic advisers in their college or school to determine the eligibility and requirements of a minor. They are listed below.

## Interdisciplinary

Nanotechnology (p. 122) (administered by the Provost's Office)
Sustainability (p. 272) (administered by the Fay Jones School of
Architecture and Design)
Urban and Regional Planning (p. 123) (administered by the departments of Landscape Architecture and Political Science)

## Dale Bumpers College of Agricultural, Food and Life Sciences

Agricultural Business (p. 131)
Agricultural Communications (p. 144)
Agricultural Education (p. 144)
Agricultural Leadership (p. 154)
Agricultural Systems Technology Management (p. 144)
Animal Science (p. 158)

## Honors Studies

Interested students should write to the Director of Honors Program in the appropriate college.

The honors program in the Dale Bumpers College of Agricultural, Food and Life Sciences provides students with opportunities for intellectual enrichment beyond the traditional undergraduate experience. This is accomplished through honors courses, completion of an undergraduate capstone honors project or thesis, and other significant activities including interactions with students in honors programs in other colleges. The results of the student's original research or creative project may be published in Discovery, the undergraduate research journal of the Bumpers College, or Inquiry, the university-wide journal of undergraduate research and creative activity. In support of these efforts, participants in the Honors Program are eligible to receive an honors stipend in support of their research projects. The transcript and diploma of each honors graduate will designate the student as an honors graduate of the college. At the college commencement ceremony, each honors graduate will wear special regalia and have the title of their honors thesis and their mentors' names listed in the graduation program. Students must maintain a cumulative grade-point average of 3.50 and subscribe to the Statement of Ethical Standards to remain in the program. For additional information, see the Bumpers College (p. 124) section of this catalog

The Fay Jones School of Architecture and Design provides opportunities for students of superior academic and creative ability to enhance and enrich their professional and liberal education by participating in the School's honors programs. For additional information, please see the Fay Jones School of Architecture and Design (p.238) section of this catalog.

To create an intellectual environment that will challenge the best of students, the Fulbright College of Arts and Sciences provides a comprehensive program of honor studies. From the first year to the senior year, an honors student is provided the opportunity to study with other superior students in small distinctive classes taught by highly motivated and skilled faculty members. There are also opportunities for independent study so that students learn to work on their own and to develop their abilities and interests in ways that are not normally possible in regular college course work. Students participating in a program of honors studies also receive special academic counseling to satisfy their future career objectives. Students are offered every opportunity to achieve a high level of intellectual maturity and accomplishment. For additional information, see the Fulbright College (p. 273) section of this catalog.

The honors program in the Sam M. Walton College of Business is offered to high-achieving students interested in obtaining an outstanding business education at the University of Arkansas. Students who participate in the program will take honors classes in the University Core and pre-business curriculum as well as honors colloquia in the Walton College offered exclusively to honors students. The subject matter of these colloquia varies from year to year and focuses on current business issues. Honors students complete a thesis in the senior year. Students in the honors program are entitled to register on the first day of registration week, have exclusive access to an honors computer lab and study area, and will be given priority consideration in such programs as the Arkansas Cooperative Education Program. For further information, see the Walton College (p. 612) section of this catalog.

The honors program in the College of Education and Health Professions enables undergraduate students who have demonstrated potential
for outstanding scholarship achievement an opportunity to broaden and deepen their liberal and professional education. Honors students participate in honors seminars, leadership skills development and a required undergraduate thesis/project. Students are provided opportunities to enhance their learning experience through critical thinking, leadership skills development and independent study. For additional information, see the College of Education and Health Professions (p. 698) section of this catalog.

The College of Engineering has established an honors program to challenge superior students with a more in-depth academic program and research experience and to provide a structure for working more closely with faculty members and other students in a team environment. An honors program is highly recommended for individuals planning academic or research-related careers that require considerable critical and original independent thinking. Students must formally apply for admission to the Engineering Honors Program. Once accepted into the program, honors students take a minimum of 12 hours of honors courses (a minimum of 6 of these 12 hours must be in engineering), participate in undergraduate research and write an undergraduate thesis, and must fulfill any additional departmental requirements. To graduate with honors, a student must hold a cumulative GPA of 3.50 or better for all course work, computed at graduation. For more information, see the College of Engineering (p. 826) chapter of this catalog.

## Campuswide Academic Honor Societies

For other academic honor societies, see the various school and college sections of this catalog.

Golden Key is an academic honor society open to selected juniors and seniors who have a minimum grade-point average of 3.50 .

Order of Omega honor society is exclusive to members of the Greek community on the university campus. Selection of members is based upon leadership in the inter-Greek activities, academic honors, and contributions to the University community. A 2.50 GPA is necessary for membership consideration.

Phi Eta Sigma is an academic honor society for freshman students. Membership is selected in the spring each year, and the only requirement is a minimum GPA of 3.50 or better for the first semester of the freshman year.

Phi Kappa Phi is a national honor society whose primary objective is the recognition and encouragement of superior scholarship in all academic disciplines. Junior and senior undergraduate students who have a minimum GPA of 3.85 are eligible for membership. Also eligible are graduate students, registered for one year, who have a minimum GPA of 3.85 .

Tau Alpha Upsilon is an honor society that honors outstanding students who live in the University of Arkansas Residence Hall system.

Who's Who, a general honor society, honors students who have excelled in scholarship, leadership and campus activities throughout their college careers. Membership requirements are a minimum cumulative GPA of 2.00 , completion of 85 credit hours, and at least two full semesters attendance at the University of Arkansas, Fayetteville, prior to application.

## Campuswide Leadership Honor Societies

Blue Key is a service-oriented honor fraternity that recognizes
outstanding scholarship, leadership and involvement in campus activities.

Applicants must be classified as juniors and meet a minimum GPA of 2.75 for membership consideration.

Cardinal Key is a junior service-oriented honor society whose membership selection is based on scholarship, leadership, and community and campus activities. A 3.00 GPA requirement must be met in order to be considered for membership at the end of the sophomore year.

Cardinal XXX is a service-oriented honor society whose membership consists of a select group of sophomores. Membership selection is based on scholarship, leadership, and community and campus service. A 3.00 GPA is required for consideration, and selection is made at the end of the freshman year.

Gamma Beta Phi is a service-oriented honor society established to recognize and encourage excellence in education. Membership in the organization is open to students who are in the top 20 percent of their class.

Mortar Board is a senior honor society that considers outstanding scholarship, leadership, and service to the campus and community when selecting members. Applicants must have a 3.00 GPA in order to be eligible for consideration.

## Reserve Officers' Training Corps

A true job training program, ROTC is offered at the University of Arkansas through both the U.S. Air Force and the U.S. Army. Each department provides a unique, career-oriented set of courses relevant to future leadership positions within its particular branch. In addition to studying Aerospace Education or Military Science, students interact with one another in a practical setting as they examine and apply the dynamics of leadership, management, ethics, communication, and teamwork. Participants are given the background and comprehensive building blocks to become commissioned officers in the U.S. military, if qualified. Physical activities and summer orientation programs are enhanced with continually updated curricula. Classes are taught by military personnel, ensuring realistic perspectives on the military professions.

In the finest traditions of the University of Arkansas and the ROTC programs, students are challenged to grow, develop and assume responsibilities throughout their academic years. Underlying that teaching is a foundation of service, integrity and excellence - expected and demanded of all officer candidates. Scholarships and details of the two programs are found in the ROTC chapter of this catalog. Army ROTC is located in the Army ROTC building, 479-575-4251 or toll free 1-866-891-5538, armyrotc.uark.edu (http://armyrotc.uark.edu/). Air Force ROTC is located in 319 Memorial Hall, 479-575-3651, afrotc.uark.edu (http://afrotc.uark.edu/).

## Cooperative Education Program

Cooperative Education is a unique program offered by the Office of Career Services that allows students to alternate between going to school and working in their chosen vocation. In addition, the program allows employers the opportunity to train and evaluate future employees before offering them positions.

Employment assignments are diversified to provide students with a variety of experiences related to their major field and with work of increasing difficulty and responsibility. Although the primary objective is to supplement theoretical knowledge with practical experience, students
earn full-time pay while on work assignments. This benefit produces welcome income while the students are still pursuing a degree.

Positions are available to students in many disciplines, primarily engineering, architecture, landscape architecture, business, agriculture, natural science and mathematics. Co-op students must be in good academic standing, must be at least 18 years of age, must be making normal progress toward a degree, and must meet the specific requirements of their college. (For example: the College of Engineering and Dale Bumpers College of Agricultural, Food and Life Sciences require completion of the freshman year; Fulbright College of Arts and Sciences requires 45 credit hours and a 2.5 grade-point average; the Walton College of Business requires completion of pre-business program requirements; and the Fay Jones School of Architecture requires completion of the junior year.) In addition, employers may establish their own academic criteria for selecting students.

For further information, contact the Career Development Center, 607 Arkansas Union, 479-575-2805.

## Study Abroad

The university encourages the expansion of students' educational experiences through study abroad. Student exchange programs have been established with Kansai University and Shimane University (Japan), Hankuk University (Korea), Al-Akhawayn University (Morocco), University of Graz (Austria), University of Essex (England), University of Maine (France), and Carlos III University of Madrid (Spain). Other UA study abroad programs include summer/semester/year-long programs in Austria, England, Scotland, Ireland, France, Germany, Italy, Mexico, and Spain. A limited number of scholarships and travel grants are available each year for these programs.

For more information about study, work, and travel abroad, contact the Office of Study Abroad, 722 W. Maple, 479-575-7582. Students in the Dale Bumpers College of Agricultural, Food and Life Sciences may contact Dr. Andrew Proctor, Director of International Agricultural Programs, Bumpers College Dean's Office, E-108 AFLS Building, 479-575-2252, aproctor@uark.edu. Students in the Walton College of Business may contact the Undergraduate Programs Office at 479-575-4622. Students in the College of Engineering may contact the Assistant Dean for International Programs at 479-575-7236.

## Graduate and Professional Study

The University of Arkansas is the major center for comprehensive graduate-level instruction in the state, offering students the opportunity to continue their studies or to specialize in a particular field through the Graduate School. The university offers a wide range of graduate degrees, including the master's, the Educational Specialist, the Doctor of Education, and the Doctor of Philosophy. Non-degree graduate certificates are also offered. Information about graduate programs may be found in the Graduate School Catalog or at grad.uark.edu (http:// grad.uark.edu/).

The School of Law on the Fayetteville campus offers a juris doctor degree program for qualified students with a bachelor's degree, and it offers the nation's only master's program in agricultural law for students with a law degree. Further information concerning professional study may be obtained by contacting the School of Law dean's office for a copy of the current catalog: University of Arkansas School of Law, Leflar Law Center, 107 Waterman Hall, Fayetteville, AR 72701, 479-575-3102 or at law.uark.edu (http://law.uark.edu/).

## Pre-Law

The University of Arkansas School of Law does not prescribe a specific pre-law curriculum and does not require any single "pre-law major." Prospective students are encouraged to select baccalaureate majors best suited to individual interests and abilities, and writing courses are often very valuable.

A baccalaureate degree is required for admission to the University of Arkansas School of Law, except for those students in the Dale Bumpers College of Agricultural, Food and Life Sciences or the Fulbright College of Arts and Sciences who are admitted to the special six-year program. All applicants for admission are required to take the Law School Admission Test.

## Other Pre-Professional Programs

Fulbright College offers pre-professional programs and advisers in law, medicine, dentistry, optometry, chiropractic, physical therapy, pharmacy, physician assistant, and occupational therapy. The Dale Bumpers College of Agricultural, Food and Life Sciences coordinates the preveterinary medicine program.

## The Academic Common Market

The Academic Common Market is an interstate agreement among Southern states for sharing uncommon academic programs. Participating states are able to make arrangements for their residents who qualify for admission to enroll as in-state students for fee purposes.

The Common Market concept recognizes that it is impractical for every state to attempt development of programs in every field of knowledge. Each Southern state has programs which are not offered in some of the other states and which can accommodate additional students. Through the sharing of such programs, the market assists in eliminating unnecessary duplication and in increasing access to programs which meet the educational needs of the citizens of the South.

To enroll as an Academic Common Market student, you must:

1. Be accepted for admission into a program to which your state has obtained access for its residents through the Academic Common Market. Applications for admission should be made directly to the institution offering the program.
2. Obtain certification of residency from the Common Market coordinator for certification information.

The opportunities presently available at the University of Arkansas, Fayetteville, at in-state rates to residents of Southern states through the Academic Common Market are listed in the column to the right.

## Professional Licensure Disclosure Policy

In compliance with federal regulation 34 CFR 668.43 (a) (5) (v) and 34 CFR 668.43 (c), the University will disclose to a student whether the student's declared degree or certificate program leads to the ability to obtain a professional license in the state of the student's self-reported location. Disclosure will occur prior to the student making a financial commitment to the institution. To facilitate this timeline, notification will be made following the student's initial enrollment in courses in a term to which the student has been admitted or readmitted to the university.

Once enrolled in a program, if the institution makes a later determination that the program does not meet educational requirements for licensure or certification in the state where the student is located, the University of Arkansas will provide notice directly to the student within 14 calendar days of making that determination.

General disclosures on professional licensure status in each state will be maintained on the University of Arkansas website.

For the purpose of this policy, the following definitions apply:
Location means the state in which the student reports they will be physically located while completing the student's program of study, also known as the reported "local" or "campus" address. Location will be designated in the first term of enrollment in coursework and will be updated upon receipt and processing of any formal notification by the student to the university of a change in location.

Financial commitment to the institution means the payment of or agreement to pay registration related tuition, fees, and charges.

## Enrollment Services

## Mission

Enrollment Services seeks to enroll a diverse group of capable students, who will engage and excel at the University of Arkansas, and to assist these students in achieving their academic and career goals.

The mission of the Enrollment Services Division of the University of Arkansas is to enroll and graduate students who will engage fully in academic and service programs, develop intellectually and personally, and contribute to the campus, the state, and the global community. Encouraging academic engagement from a diverse group of communities will create a dynamic educational environment that will promote a broad learning experience for the entire campus community. To carry out this mission, the Enrollment Services Division is comprised of nine professional and service-oriented offices: Admissions, Center for Learning and Student Success, Financial Aid, Graduation and Retention, Nationally Competitive Awards, Orientation, Registrar, Scholarships, and UAConnect. Through collaborative efforts, Enrollment Services strives to:

- Promote the University of Arkansas and the pursuit of higher education;
- Foster initiatives that support diversity as a key goal of the University of Arkansas community;
- Attract, admit, and prepare new and returning students for enrollment on campus while working with academic affairs to ensure planned and sustainable growth in accordance with institutional priorities;
- Accurately and efficiently reduce financial obstacles through federal, state, institutional scholarship and aid programs;
- Commit to preparing traditional and non-traditional students, including returning adult learners, for academic achievement and success in life;
- Assist future, current, and former students as they navigate administrative requirements to achieve their academic goals;
- Ensure accuracy for registration and academic records;
- Commit to retaining students who enroll at the University of Arkansas and assisting them through academic transitions on their path to graduation;
- Prepare students to be nationally competitive;
- Craft and maintain policy that facilitates effective administration to support Division goals, including coherence of policy across all divisions;
- Develop innovations in the use of technology and information systems aimed at supporting a research engine for best practices in enrollment services and data-based decision making;
- Increase state and global knowledge by achieving a net increase in Arkansas residents holding bachelor's, master's, and doctoral degrees;
- Support the university's pursuit to become a nationally recognized research institution that puts students first.

## Orientation

All new undergraduate students are expected to participate in an orientation experience. The orientation program is designed to introduce every aspect of the university community to our students, enabling them to establish a bond with the institution and those here to support them. A significant aspect of this experience will be to provide students with information about the learning opportunities, resources, policies, support systems, and student activities at the University. New freshmen must attend orientation before enrolling in classes. For more information on New Student Orientation, go to orientation.uark.edu (http:// orientation.uark.edu/).

## Academic Bankruptcy

Students returning to the University of Arkansas after an absence of five or more years may be eligible to declare academic bankruptcy if they meet the following criteria:

1. Must have been enrolled previously at the University of Arkansas, Fayetteville, as an undergraduate student and be returning as an undergraduate student.
2. Must not have been enrolled at the university during the previous five years.
3. Students who have attended another institution since their last attendance at the university must meet requirements for transfer
students (2.00 GPA on all coursework attempted more than five years after last enrollment at the University of Arkansas, Fayetteville) to be eligible for readmission.
4. Must submit an application for readmission and official transcripts of all college work attempted since last attendance at the University of Arkansas by the application deadlines and submit a Declaration of Academic Bankruptcy form (http://registrar.uark.edu/1621.php) to the Office of the Registrar. The following are the conditions of academic bankruptcy:
a. Students will forfeit all credit hours previously awarded by the University of Arkansas, Fayetteville. This includes course work completed at the university (regardless of grades earned), courses accepted in transfer, credit by examination, and any selfpaced (correspondence) course work awarded.
b. A new calculation of GPA and credit hours will begin when the student returns to the University of Arkansas.
c. The transcript will reflect the student's complete record (including all previous college work) with an added notation of "Academic Bankruptcy Declared."
d. Courses taken at another institution within five years of the last University of Arkansas enrollment will not be accepted for transfer. Coursework completed more than five years after last attending the University of Arkansas may be accepted in transfer, subject to university transfer credit policies. For purposes of this policy, University of Arkansas self-paced (correspondence) coursework will be treated in the same manner as transfer work.
e. For the university to provide appropriate advising and (as required by Arkansas Act 1052) appropriate assessment, a student may be required to submit ACT, SAT, or ACT COMPASS test scores prior to registration for classes if, as a result of academic bankruptcy, that student is returning to the university as a freshman with fewer than 24 transfer hours.

## Admission

## Undergraduate Admission

Any person who intends to register for a course at the University of Arkansas must first be admitted to the university. Students returning to the university after an absence of a fall or spring semester must also complete an application.

The University of Arkansas offers a variety of services to students with physical or learning disabilities through the Center for Educational Access. Students with any type of physical or learning disability are strongly encouraged to contact the CEA in Room 209 of the Arkansas Union or call 479-575-3104 (TDD/Voice) to learn more about specific services and the overall accessibility of the university.

The university reserves the right to modify admission requirements. Application forms and the most current information about admission requirements are available from the Office of Admissions. Please send all application materials and supporting documents to the following address:

## Office of Admissions

232 Silas H. Hunt Hall
1 University of Arkansas
Fayetteville, AR 72701
479-575-5346 or 1-800-377-8632
admissions.arkansas.edu (http://admissions.uark.edu) uofa@uark.edu

## When to Apply

Students interested in applying to the University of Arkansas for the fall semester are encouraged to apply by the November 1 priority deadline. By applying early, students take advantage of scholarship, housing, and orientation privileges; however, regular fall applications will be accepted until August 1 prior to the start of term. Applicants for freshman scholarships are encouraged to apply for admissions by November 1 and complete the separate scholarship application by the priority scholarship deadline, November 15. Applicants for entering transfer scholarships should submit completed applications to the Office of Admissions and the Office of Academic Scholarships no later than April 1, for the fall semester, and October 1, for the spring semester.

## Deadlines for Admission Consideration

Applications and required transcripts must be received in the Office of Admissions by the following deadlines to be accepted for the respective enrollment periods:

- Fall - August 1
- Spring - December 20

Students who are unable to submit their applications by the deadline may be denied admission and considered for admission for the following term.

International students should refer to "International Students" in this section for application deadlines, procedures, and requirements.

## Graduate School

Applications for admission to the University of Arkansas Graduate School and an official copy of transcripts of the applicant's academic record at each college and university attended since high school graduation, and official test score on the Graduate Record Examination (GRE) or other national standard test, must be submitted to the graduate school admissions office and approved in advance of registration. The transcripts will become a part of the student's permanent file at the University. Applications may be obtained by writing to the Graduate and International Admissions Office, 213 Gearhart Hall, 1 University of Arkansas, Fayetteville, AR 72701; by calling 479-575-6246; by emailing gradinfo@uark.edu; or by applying at apply.uark.edu (http:// apply.uark.edu).

Additional information and procedures for making application to the Graduate School are included in the Graduate School Catalog (http:// catalog.uark.edu/graduatecatalog/admissions/).

## Admission to Graduate Standing

To be admitted to graduate standing, a student must have 1) earned a baccalaureate degree from a regionally accredited U.S. institution or from an institution with substantially equivalent requirements for a baccalaureate degree and must have a GPA of 3.0 or better on the last 60.0 credit hours of attempted coursework prior to receiving the baccalaureate degree and 2) present satisfactory scores on the Graduate Record Examination (GRE) or other national standard test.

Admission to graduate standing does not admit a student to a specific program of study leading to a graduate degree. Therefore, in addition to satisfying the general requirements of the Graduate School, the applicant must also comply with the specific requirements and have the approval of the department in which graduate study is desired.

For more details, go to the Graduate School Catalog (http:// catalog.uark.edu/graduatecatalog/admissions/).

## How to Apply

1. Submit a completed application for undergraduate admission and the non-refundable application fee to the Office of
Admissions. You may apply for admission online at apply.uark.edu (http://apply.uark.edu).
2. Request that all required transcripts be sent to the Office of Admissions. Only official transcripts will be accepted. Transcripts are not considered official unless submitted in a sealed, stamped envelope, or sent via electronic data interchange from the previous institution. Questionable or unreadable transcripts may be refused. High school transcripts are required of all entering freshmen and transfer students with fewer than 24 transferable semester hours. A preliminary admission will be provided to high school seniors on the basis of sixth- or seventh-semester transcripts.
College transcripts must be provided from each college or university attended. Transcripts must be sent directly to the Office of Admissions from each institution attended, in an official sealed school envelope, or sent via electronic data interchange.
3. All new freshmen and transfer students with fewer than 24 transferable credit hours must submit ACT or SAT scores. Non-traditional students applying three or more years after high school graduation have the option of submitting the ACT COMPASS or The College Board Accuplacer to satisfy testing requirements. The University of Arkansas will not accept test scores taken more than five years prior to enrollment. Test scores should be sent directly to the university by the testing agency. The university's institutional codes are: ACT-0144; SAT-6866.
4. All students born after January 1, 1957, must submit immunization health records to the Pat Walker Health Center after admission. Immunization proof is required prior to first registration. See the Health Center's immunization page (http:// health.uark.edu/immunizations/).
5. English Proficiency: Applicants whose native language is not English must submit a Test of English as a Foreign Language (TOEFL) score of at least 550 (paper based), 79 (internet based), or a minimum score of 6.5 on the IELTS (writing) taken within the preceding two years. Students who have completed grades 10-12 at a U.S. accredited high school and have a satisfactory ACT English subscore may request a review for waiver of this requirement. Students transferring from an accredited U.S. institution (or institution in a country where English is the native language) with at least 24 transferable credit hours and successful completion of English Composition I and II with a grade of "C" or above will not be required to submit the TOEFL or IELTS for admission consideration. For more information about the TOEFL, you may write to TOEFL Services, ETS, PO Box 899, Princeton, New Jersey 08541, or visit ets.org/toefl (http://www.ets.org/toefl/).
6. The university shall admit only those applicants whose enrollment will not be detrimental to the quality of life and the educational programs of the university. The Admissions and Appellate Board has final authority to interpret university admission or transfer policy and to grant a variance. An applicant who has withheld pertinent information regarding educational background or who has falsified information or credentials may be denied admission to the university or, if enrolled, may be immediately withdrawn.

## International Students

All degree-seeking international undergraduate students must present officially certified academic credentials, evidence of adequate financial support, and, for those applicants whose first language is not English, evidence of meeting the university's English Language Proficiency requirement. This requirement may be satisfied by:

1. Presenting a valid minimum score of of 550 on the Institutional Test of English as a Foreign Language (TOEFL), a 79 on the Internet based Test of English as a Foreign Language (TOEFL), a minimum score of 6.5 on the International English Language Testing System Academic (IELTS), a 58 on the Pearson Test of English (PTEAcademic), a 3.9 on the International Test of English ProficiencyAcademic (iTEP), or a 176 on the Cambridge Assessment English C1 Advanced (C1 Advanced), an ACT English subscore of 19, or an SAT Evidence Based Reading and Writing subscore of 500 at the time of application.
2. Demonstrating completion of grades 10-12 at a U.S. accredited high school.
3. Presenting with at least 24 transferable credit hours from an accredited U.S. institution (or institution in a country where English is the native language) and completion of English Composition I and II with a grade of "C" or above.
4. Receiving a wavier on a case by case basis from the Director of International Admissions by providing evidence of alternate English language competency including but not limited to Duolingo (DET) exam scores, prior successful coursework at a high school, college, or university in an English speaking country, or successful participation in West African Senior Examination Certificate (WASSCE) programs, International General Certificate of Secondary Education (IGSCE) programs, or International Baccalaureate (IB).

Degree-seeking applicants who meet the academic and financial requirements but who do not meet the English proficiency requirement of the University of Arkansas may be offered conditional admission to their intended degree programs and admission as a non-degree undergraduate student to complete an Intensive English course sequence at the University of Arkansas. Students may fulfill the English proficiency requirement and be granted full admission to the University of Arkansas upon successful completion of ELAC 0603 University Connections Intensive English Level VI with a grade average of "B" or better.

An entering degree-seeking freshman who has completed secondary school at either U.S. or foreign institutions must have a) the equivalent of a final cumulative GPA of at least 3.0 (or its equivalent) and b) competency equivalent to that developed by taking four years of English and three years each of mathematics, natural sciences, and social studies, and an additional three units of electives chosen from English, speech, foreign languages, mathematics, natural sciences, or social studies in U.S. high schools.

A student transferring with fewer than 24 semester hours of postsecondary coursework at either U.S. or foreign institutions must a) have a cumulative GPA of at least a 2.00 (or its equivalent) on all postsecondary coursework attempted, and b) meet the requirements specified for entering freshmen. A student transferring from either a U.S. or foreign post-secondary institution with at least 24 semester hours must have the equivalent of a cumulative GPA of at least 2.00 on all post-secondary course work attempted.

Non-degree seeking applicants, regardless of citizenship, whose first language is not English must present evidence of meeting the English Language Proficiency Requirement by one of these three methods:

1. Presenting a valid minimum score of 527 on the Institutional Test of English as a Foreign Language (TOEFL), a 71 on the Internet based Test of English as a Foreign Language (TOEFL), a minimum score of 6.0 on the International English Language Testing System Academic (IELTS), an ACT English subscore of 19, or an SAT Evidence Based Reading and Writing subscore of 500 or an equivalent test as approved by the Office of International Admissions at the time of application.
2. Be currently enrolled in "good standing" as a degree-seeking student at another college or university in a country where the native language is English or have had enrollment in such a college or university within the last 12 calendar months from the time of application and their status at the end of the previous enrollment was "good standing."
3. Be approved by the Director of the Office of International Admissions for a waiver of the English Language Requirement based on the applicant's academic or professional background.

A non-refundable international application fee is required for all international applicants. All applications and supporting documents must be submitted by May 31 for the fall semester; October 31 for the spring semester; and March 1 for the summer sessions.

Any international student returning to the university after an absence of a full semester (fall or spring) or more must submit an application for readmission. For these students, the application deadlines are August 15 for the fall term and January 1 for the spring term. It should be noted that a student previously enrolled at the University of Arkansas who takes a full term of courses elsewhere and then seeks readmission to the university returns as a transfer student and must meet university admission requirements for international transfer students, submit a photocopy of the l-20 issued by the transferring institution, and submit a new financial statement. An application fee is not required for returning students.

For specific admission requirements and application materials pertaining to students on F-1, J-1, or any non-immigrant visas, applicants should write directly to:

```
International Admission Office
340 N. Campus Drive
213 Gearhart Hall
1 University of Arkansas
Fayetteville, Arkansas }7270
1-479-575-6246
iao@uark.edu
```

Please see the section Placement and Proficiency Tests (http:// catalog.uark.edu/undergraduatecatalog/enrollmentservices/ placementandproficiencytests/) for university policy regarding English language use by non-native speakers.

## New Freshmen

Applications are reviewed on an individual basis with consideration given to the applicant's overall grade-point average (GPA) and standardized test scores. New freshmen and those transfer students with fewer than 24 transferable credit hours should have completed or be in the process of completing the following college preparatory curriculum in high school:

## 16 Units Total

- English - 4 units
- Mathematics - $\mathbf{4}$ units (Units must be equivalent to or higher level than Algebra I)
- Social Studies - 3 units
- Natural Sciences - 3 units
- 1 unit general sciences and 2 units lab sciences (Choose two courses from biology, chemistry, and physics laboratory. Two years of principles of technology will meet one unit of natural sciences [physics]. Two years of applied biology/chemistry will meet one unit of natural sciences [biology].)
- Others - 2 units
- Oral Communication - $1 / 2$ unit
- Physical Education - $1 / 2$ unit
- Health and Safety $-1 / 2$ unit
- Fine Art - $1 / 2$ unit

Arkansas residents who have taken these course requirements and who have an overall high school GPA of 3.00 or better and an ACT score of 20 or an equivalent 930 SAT or 1020 Redesigned SAT score or better meet the minimum admission requirements. Out-of-state applicants must meet minimum admission requirements and may be required to meet higher standards, depending on demand. Students not meeting minimum admission requirements are still encouraged to apply and will be reviewed for possible admission by the Admissions and Appellate Board.

## Accelerated Admission

Superior high school students who have completed a rigorous college preparatory curriculum may seek admission to the freshman class at the end of their junior year of high school. Applicants for accelerated admission must complete certain required subjects during three years of high school study, submit letters of recommendation, and submit an ACT or SAT score equivalent to at least the 90th percentile of the university's previous entering class. Additional information and application materials may be obtained at the Office of Admissions, by calling 1-800-377-8632, or visiting admissions.uark.edu (http://admissions.uark.edu).

## Non-Degree Seeking Students

Applicants who are not interested in working toward a degree while taking classes may, under certain conditions, be approved to do so upon submitting an application for admission. Degree-seeking students attending part-time or as an "undeclared major" should not confuse their status with this special, non-degree seeking category. Students who are admitted provisionally and placed in a non-degree seeking status until they earn a minimum 2.0 GPA on 12 credit hours should also not confuse their status with this special category. The Office of Admissions reserves the right to determine the proper category of admission and to determine what credentials may be required.

Classification as a special student permits enrollment in credit classes (or as an auditor) on a space-available basis; however, special students are not eligible for financial aid, and the university incurs no particular obligation to provide academic advisement.

Admission as a special, non-degree seeking student is not intended to serve as a means of access to regular, degree-seeking status nor is it intended for a person who has earned unsatisfactory grades in previous high school or college course work. Students who have been denied regular undergraduate admission are not eligible for this status. All special students are subject to the same regulations concerning scholastic
probation, suspension, and dismissal as other undergraduate students. Students who have previously been assessed developmental course requirements or high school course deficiencies will retain that status as a special non-degree student.

Non-degree seeking students must meet course prerequisites and should be prepared to verify to the department by official documentation that university course prerequisites have been met, if appropriate. Students planning to enroll in any upper-division education courses should verify admission to the Teacher Education Program prior to registration. A non-degree seeking student may not enroll for more than nine hours of courses in a term without approval of the student's academic dean. No more than 24 semester hours earned while in a non-degree seeking status will apply to a degree at the university.

Unless otherwise specified, students with non-degree seeking status who wish to be admitted into a degree program at the University of Arkansas must apply for admission as such prior to the beginning of the term for which the change of status is requested. All requirements for admission to regular status must then be met, except for students in the provisional non-degree-seeking status.

## When to Apply

Non-degree seeking students must meet the same application deadlines as other students. See the Deadlines for Admission Consideration (p. 36) on the previous page for deadlines.

## How to Apply

The following students may be considered for non-degree seeking status:

1. Visiting students who attend other colleges or universities and wish to enroll at the university to earn credits that they plan to transfer back to their home institution. It is the student's responsibility to verify with his or her college that courses taken here will be acceptable as transfer credit.
Application procedure: Submit a completed application, a nonrefundable application fee, and a letter of good standing verifying eligibility to return to the home institution.
2. Students who want to take courses of special interest for personal or professional development but who are not interested in working toward a degree. Applicants in this category are normally expected to have been out of high school for five or more years.
Application procedure: Submit a completed application and nonrefundable application fee. Students who have been out of high school less than five years should submit a transcript and test scores verifying that admission requirements have been met.
The application fee is not required for residents of Arkansas who are 60 years and older and wish to participate in the senior tuition waiver program (https://admissions.uark.edu/apply/seniorcitizens.php). (http://admissions.uark.edu/apply/seniorcitizens.php)
3. Students who already have a college degree and who want to take credited classes but not earn credit toward another degree at this time. Credits earned under this classification will not count toward a graduate degree.
Application procedure: Submit a completed application and nonrefundable application fee. Students who wish to enroll for successive terms should submit a transcript showing their degree.
4. Dually enrolled high school students. Dually enrolled high school students must have at least a 20 ACT score and a 3.00 high school GPA to enroll. Dually enrolled high school students are ineligible to enroll in remedial courses.

Application procedure: Submit a completed application, a nonrefundable application fee, ACT or SAT scores, and a high school transcript. Admissions applications should be submitted at least one month in advance of the term.

Dually enrolled high school seniors who plan to enroll in the fall as regular freshmen must submit a separate application for regular admission for the fall.

## Placement and Proficiency Tests

ACT, SAT, and College Board Accuplacer scores are used to determine placement in university courses. Students whose scores indicate the need for additional preparation may be placed in courses designed to prepare them for college-level work. (See Arkansas Requirements for Developmental Course Placement (p. 49).) Credit earned in such courses does not count toward degrees in all colleges. (See Courses That Do Not Count Toward Degrees (p. 49).)

## Course Placement Freshman Composition Placement

ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013) and ENGL 0001 Writing Lab

- Below 19 on the English section of the ACT and high school GPA less than 3.20
- Below 490 on the Evidence-Based Reading and Writing section of the SAT and high school GPA less than 3.20
- Below 255 on the Accuplacer Next-Generation Writing section and high school GPA less than 3.20

ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013)

- ACT English scores of 19-27, or
- SAT Evidence-Based Reading and Writing scores of 490-620, or
- Accuplacer Next-Generation Writing section score of 255 or higher, or
- High school GPA of 3.20 or higher

ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013) or ENGL 1013H Honors Composition I

- ACT English scores of 28-29, or
- SAT Evidence-Based Reading and Writing scores of 630-680

Students with ACT English scores of 30 or greater or SAT EvidenceBased Reading and Writing scores of 690 or greater may enroll in ENGL 1013H and ENGL 1023H or elect exemption. Some degree programs require credit in composition, and students should confer with their advisors before exempting.

## Math Placement Test

All students have the opportunity to take the online mathematics placement assessment. To take the assessment, or for more information regarding it and its requirements, visit the University of Arkansas Mathematical Sciences website (http://math.uark.edu/).

## Arkansas State Requirements for Developmental Course Placement

Arkansas law specifies that all first-time entering freshmen enrolled in a bachelor's degree program will be placed in either college-level credit courses in English and mathematics or remedial courses in English
composition, reading, and mathematics on the basis of their scores on specified tests.

Students will be required to register for these courses during their first term at the university and, if necessary, in subsequent terms until passing grades have been earned in all required courses. Students who need further information or clarification are encouraged to discuss their course placement with their academic advisor or dean. Students may place out of these prescribed remedial courses with appropriate scores on the relevant subject placement tests offered through the appropriate university department.

## Reading

Students who score

- below 19 on the Reading section of the ACT
- below 470 on the Evidence-Based Reading and Writing section of the SAT
- Below 252 on the Accuplacer Next-Generation Reading section
must enroll in PLSC 2003, HIST 2003, or HIST 2013 (AP or IB credit or concurrent/transfer credit for one of these courses will also satisfy the remediation requirement). Students are exempt from reading remediation if they have a 3.0 or higher final high school GPA (based on the Arkansas standard of weighted credit for AP, IB, and concurrent enrollment only). All students, however, will be required to complete coursework as indicated by their degree plan.

## English

Students may place out of ENGL 0001 by:

- earning a high school GPA of 3.20 or higher
- earning a score of 255 or higher on the Accuplacer Next-Generation Writing test
- or by demonstrating college-level writing skills on a required essay administered during the first week of class (students in ENGL 1013 who exhibit writing challenges in their first essay may be asked to enroll concurrently in ENGL 0001)

## Math

Students who score

- below 19 on the mathematics section of the ACT
- below 510 on the Math section of the SAT, below 255 on the Qualitative Reasoning, Algebra, and Statistics (QAS) of the Accuplacer Next-Generation, below 235 on the Advanced Algebra and Functions (AAF) of the Accuplacer Next-Generation, or below 30 on the ALEKS
- and report a high school GPA below 3.70
- Students with the above scores must enroll in MATH 1203 and MATH 0002L or MATH 1313 and MATH 0131L. All new first-year freshman students are encouraged to take the ALEKS online mathematics placement assessment. To take the assessment, or for more information regarding it and its requirements, visit the University of Arkansas Mathematical Sciences website (http://math.uark.edu/).

Students who earn a 46 or higher on the Math Placement Test (https:// fulbright.uark.edu/departments/math/undergraduate/placement/aleksppl.php) offered through ALEKS may enroll in MATH 1203.

## Courses That Do Not Count Toward a Degree

The following courses do not count toward degree credit in any college or school: ENGL 0001, MATH 0001L, MATH 0002L and MATH 0131L.

The following courses do not count toward any degree in the College of Engineering: MATH 1203, MATH 1213, MATH 1284C, and ENGL 2003.

## Speech Communication Exemption Examination

Students who have had speech in high school and/or experience in public speaking may elect to take this test for exemption from or credit in COMM 1313. Both the written and oral (a five-minute impromptu speech) examinations must be passed to receive exemption or credit.

## World Language Placement Examinations

Students with previous world language experience in French, German, or Spanish are encouraged to take language placement examinations offered during summer orientation. Those test scores will be used by academic advisors to determine an appropriate world language placement level. Students who omit one or more course in the basic language sequence will receive credit for omitted courses when they have validated their high placement by passing with a " $C$ " or better the course into which they were placed. Conversation courses $(3033,4033)$ and selfpaced (correspondence) courses may not be used to validate such prior knowledge.

## General Chemistry Placement Examinations

These tests will be offered throughout the year. Students who performed at above average levels in high school chemistry may find it to their advantage to enroll directly in the second semester of general chemistry. This examination is designed to provide guidance in making this course selection. Students who place into the second semester of general chemistry and earn a grade of "C" or better in the course will also receive credit for the first semester of the course.

## English Language Use by Non-Native Speakers

Non-native speakers of English admitted to undergraduate study at the University of Arkansas are required to present an acceptable writing score on one of the following tests: Internet based TOEFL (iBT), IELTS PTE Academic, or ELPT. Depending on exam scores, a student may be required to take one or more English Language and Culture (ELAC) course prior to the beginning of classes in their first term of study. Non-native speakers in the following categories are exempt from this requirement:

1. Undergraduate students who transfer at least 24 hours of credit from U.S. institutions, including courses that meet the freshman composition requirement;
2. Undergraduate students who have completed grades 10 through 12 in and graduated from a U.S. high school and have obtained an ACT English section score of 19 or above or a SAT verbal score of 500 or above;
3. Undergraduate students with a TOEFL iBT writing score of 28 or IELTS writing score of 6.5 or PTE Academic writing score of 77 or ELPT writing score of 81 .

Diagnostic and placement testing is designed to test students' ability to use English effectively in an academic setting, and its purpose is to promote the success of non-native speakers in completing their chosen course of study at the University of Arkansas. Test results provide the basis for placement into English Language and Culture (ELAC) support courses or course sequences. Courses are offered by the Graduate School and International Education for those students whose language skills are diagnosed as insufficient for college-level work at the level to which they have been admitted (undergraduate or graduate study). Credit in ELAC courses may count toward University of Arkansas degrees. Nonnative speakers assessed as having language competence sufficient for their level of study will not be required to enroll in ELAC courses.

Undergraduate and graduate students assessed ELAC courses are required to complete these courses during their first semester of enrollment at the university.

## Readmission

Any former student who wishes to return to the University of Arkansas after missing a fall or spring semester should complete an application for admission. Students enrolled in University of Arkansas self-paced (correspondence) courses during their absence must be readmitted. A non-refundable application fee is required for former students.

## When to Apply

An early readmission will enable a student to register during priority registration. The student should submit an application and all appropriate credentials at least one month prior to the time of registration. Registration dates and procedures are found on the Schedule of Classes (http:// registrar.uark.edu/465.php).

## Deadlines for Admission Consideration

Applications and required transcripts must be received in the Office of Admissions by the following deadlines to be accepted for the respective enrollment periods:

- Fall - August 1
- Spring - December 20

Students who are unable to submit their applications by the deadline may be denied admission and considered for admission for the following term.

## Requirements

1. Students must be academically eligible to return to the university and are readmitted with the same academic status as held during their last attendance. Course work taken at another institution will not affect a student's probationary status or university GPA. Students may change degree programs on re-admission to the University of Arkansas regardless of academic status, except for students entering the College of Engineering. A student who is not in good standing may not enter the College of Engineering. Students who have not satisfied their initial provisions of admission (but are still eligible to return) will be required to satisfy those conditions upon their return.
2. Students who have attended another institution while away from the University of Arkansas will be considered returning transfer students and must have either a 2.00 GPA on all college work attempted and/ or a 2.00 GPA on all course work attempted since last attending the University of Arkansas. Official transcripts of all course work attempted since last attendance at the university must be submitted. (See Admission of Transfer Students.)
3. Students who previously attended or currently attend the university as special, non-degree seeking students and wish to return as degreeseeking candidates must apply for admission as freshmen or transfer students, furnishing all appropriate admission credentials, including any required test scores. All requirements for admission to regular status must be met. (See appropriate section of this catalog for requirements.)
4. Former students who are submitting petitions to either the Academic Standards Committee or the Admission and Appellate Board to request readmission must have on file all required documents by the application deadlines. (See the Academic Standards Committee Calendar (https://registrar.uark.edu/academic-dates/administrativecalendar/) for deadlines for "Petitions to Be Submitted.")

## School of Law

A baccalaureate degree is required for admission to the University of Arkansas School of Law, except for those students in the Fulbright College of Arts and Sciences or in the Dale Bumpers College of Agricultural, Food and Life Sciences who are admitted to the special six-year program. All applicants for admission are required to take the LSAT. (See the Fulbright College Pre-Law Program (p. 276) or the Dale Bumpers College of Agricultural, Food and Life Sciences (p. 131).)

For complete details concerning admission to the University of Arkansas School of Law, see the Admission page (p. 36) or write to Office of Admissions, Leflar Law Center, University of Arkansas, Fayetteville, AR 72701; or by calling 479-575-3102. Applications can be submitted online at apply.uark.edu/ (http://apply.uark.edu/).

## Transfer Students

## Transfer Admission Requirements

Applicants who have attended other colleges or universities after high school graduation are considered transfer students. Applicants must submit official transcripts of all previous college courses attempted, whether or not credit was earned and regardless of whether the applicant wishes to transfer any credit to the University of Arkansas. Transcripts from each institution attended should be sent directly to the Office of the Registrar. All transfer students must meet the following requirements:

1. Have a cumulative GPA of at least 2.00 on all course work attempted;
2. Be eligible to return to the last institution attended. Grade-point average is calculated on all coursework attempted.

Students who have completed fewer than 24 transferable semester hours must, in addition to the above requirements, meet all requirements for freshman admission (see Admission of Entering Freshmen (p. 38)). Test scores and transcripts are also evaluated to determine whether State of Arkansas requirements for developmental course placement have been met. (See Registration (p. 49).) For policies regarding transfer of credit from other institutions, see Academic Regulations (p. 89).

## Financial Aid and Scholarships

## Financial Aid

The University of Arkansas annually awards nearly $\$ 180$ million of financial aid and scholarships to students. Financial aid is divided into categories of grants, work, loans, and scholarships. Unless otherwise specified, a student needs to complete only two forms to apply for federal aid: the Free Application for Federal Student Aid (FAFSA), which analyzes the ability of the student's family to pay for college, and the university's application for admission. These forms collect information used by the

Office of Financial Aid in determining awards. In some cases, copies of the parents' and/or student's tax return transcripts and verification documents are needed.

The Financial Aid Office (http://finaid.uark.edu/) is part of Enrollment Services and is housed in Silas Hunt Hall, Room 114

## Scholarships

The University of Arkansas Academic Scholarship Office awards scholarships totaling more than $\$ 12$ million for students each year. This total does not include funds that support external scholarships held by U of A students such as Governor's Scholarships, Arkansas Academic Challenge Scholarships, or non-resident tuition waivers. Scholarships funded by the university fall into three broad categories distinguished fellowships, academic scholarships, and special interest/ skills scholarships. Interested students should consult the Academic Scholarships Office (http://scholarships.uark.edu/) website for the most up-to-date information.

The Academic Scholarship Office (http://scholarships.uark.edu/) is part of Enrollment Services and is housed in Silas Hunt Hall, Room 114.

## College and Departmental Scholarships

The following college and departmental scholarships are available to both entering and currently enrolled students at the University of Arkansas. Complete addresses and phone numbers of the colleges, schools, or departments listed below may be found in the respective college or school sections of this catalog.

## Fay Jones School of Architecture and Design

The Fay Jones School of Architecture and Design offers a limited number of scholarships at various amounts to entering freshman in any of the degree programs offered by the School. Several scholarships are renewable annually to the recipient who maintains all the requirements of the scholarship.

Many upper level scholarships are available to continuing students. Applications are available in the fall, and recipients are selected in the spring for the following academic year. Find out more information about the Fay Jones School's scholarship applications (http://fayjones.uark.edu/ admissions/).

## Fulbright College of Arts and Sciences

The Fulbright College of Arts and Sciences offers many outstanding scholarship opportunities. For comprehensive information about these awards, call 479-575-5219 or visit the Fulbright College's scholarships page (http://fulbright.uark.edu/deans-office/offices-and-services/ scholarships-and-fellowships/).

Three college-wide scholarships merit special attention: Through the Sturgis Fellowship Program, Fulbright College offers premier scholarships worth $\$ 70,000$ over four years to exceptionally talented students with the intellectual potential to become future leaders in society. In addition, all honors students are eligible to apply for research and study abroad funding through the Sturgis Grants Program. For information or an application, contact the Director of Honors Studies at 479-575-2509.

The King Fahd Center for Middle East and Islamic Studies offers substantial four-year and two-year renewable scholarships to superior
students majoring in Middle East Studies. The program also offers competitive funding for language study in Morocco, Tunisia, and Egypt. Funding for summer study abroad and research projects is considered on a case-by-case basis. Scholarship applications and information about the program can be obtained by contacting mest@uark.edu or calling 479-575-4157.

In honor of the Fulbright commitment to international education, the college offers the J.W. and Elizabeth W. Fulbright Endowed Scholarship, which supports a year of study abroad. To qualify, students must display an interest in one of the following fields: literature, history (including theatre, art, and music history), jurisprudence, philosophy, archaeology, comparative languages, and those aspects of the social sciences that employ philosophical or historical approaches. For more information about these opportunities, call 479-575-5219 or visit the Fulbright College's scholarships page (http://fulbright.uark.edu/deans-office/offices-and-services/scholarships-and-fellowships/).

## Dale Bumpers College of Agricultural, Food and Life Sciences

Scholarships for students seeking rewarding careers involving food, family, or the environment are made possible by generous gifts from many firms and individuals. The criteria for these scholarships include academics, financial need, interests, organizational involvement, and leadership. Bumpers College scholarships include the Division of Agriculture Land Grant Scholars Endowment Program which offers renewable scholarships to high achieving students; The Dale Bumpers Distinguished Scholars Program which provides an annual scholarship to an outstanding transfer student, an outstanding Ph.D. graduate student, and an outstanding M.S. graduate student; and International Study Abroad scholarships for students expanding their experiences around the world.

Information and application procedures for the more than 200 Bumpers College and departmental scholarships are available at the Bumpers College scholarship page (https://bumperscollege.uark.edu/futurestudents/scholarships.php) or by contacting the Associate Director of Scholarship at 479-575-2252, or via email to dbcafls@uark.edu.

## Sam M. Walton College of Business

The Boyer Fellowship is offered to Walton College students who have achieved at an outstanding level both in and out of the classroom. High grades and standardized test scores are required along with a strong academic curriculum and exceptional academic performance. Applicants for the Boyer Fellowship also must demonstrate financial need, be an Arkansas resident, and graduate from an Arkansas high school

Other scholarships are available through the departments of accounting, information systems, economics, finance, management, marketing, and supply chain management, as well as through the Walton College's general scholarship program. Scholarships are primarily awarded on the basis of academic achievement and/or financial need.

For further information on Walton College scholarships, contact the Undergraduate Programs Office at 479-575-4622.

## College of Education and Health Professions

Thanks to the generosity of our donors, the College of Education and Health Professions offers several scholarship opportunities. These gifts allow us to support the university's mission of recruiting
and retaining high-achieving students who enrich and diversify the academic environment. Scholarships are available for both graduate and undergraduate students. Please visit the College's scholarship webpage (https://coehp.uark.edu/students/scholarships.php) for more information.

## College of Engineering

The College of Engineering awards numerous scholarships and fellowships beginning with the sophomore year to continuing students, transfer students, and graduate students. Most scholarships are based primarily on academic performance. However, some scholarships are also awarded on the basis of financial need and diversity. Scholarships are available from both the college and its individual departments.

College scholarships are available to any engineering student while departmental scholarships are intended for students enrolled in a particular discipline of engineering. Students must be admitted to the University of Arkansas and accepted into the College of Engineering to qualify and receive either a college or departmental scholarship. The college has a one-step application process that allows students to be considered for all college level scholarships and departmental scholarships.

For more information concerning scholarship and diversity opportunities, please see the college's scholarship website (https://coehp.uark.edu/ students/scholarships.php).

## Music and Band

The Department of Music offers scholarships (both music scholarships and band scholarships) for talented students who sing or play instruments. All scholarships are based on musical ability, academic achievement, and potential contribution to music department ensembles. Scholarships are renewable for up to five years (ten semesters), as long as the student meets the conditions specified on the scholarship letter or contract.

Music and band scholarships are available to music majors and to students majoring in other areas who participate in certain ensembles. All scholarships require an audition. To set up an audition, contact the music department at 479-575-4701 or the band office at 479-575-4100.

## Financial Aid

The University of Arkansas annually awards nearly $\$ 180$ million of financial aid and scholarships to students. Financial aid is divided into categories of grants, work, loans, and scholarships. Students need to complete the Free Application for Federal Student Aid (FAFSA), which analyzes the ability of the student's family to pay for college, as well as the various scholarship applications offered through the Academic Scholarship Office, the university's colleges and departments, and the Arkansas Alumni Association. These forms collect information used by the Office of Financial Aid and the university's scholarship committees in determining awards. In some cases, copies of the parents' and/or student's tax return transcripts and other verification documents are needed.

## Determining Financial Need

To determine financial need, a student must complete the FAFSA. Students release their information to the University of Arkansas by completing the college release section with the University of Arkansas Title IV Code of 001108.

There is a priority date of March 1 for the submission of the FAFSA for the approaching school year for new students. Federally funded financial aid will be awarded on the basis of need as reflected by the FAFSA.

The Student Aid Report from the FAFSA (consisting of several pages) will be sent directly to the student by the Central Processing Service. A student needs to be enrolled or accepted for enrollment before a financial aid award may be generated. To continue receiving financial aid, the student needs to make satisfactory progress toward a degree, as defined by the University of Arkansas, and complete the FAFSA each year. (See Satisfactory Academic Progress below.)

## Application Procedure

1. Apply for admission to the university, if not currently enrolled or admitted.
2. Complete the Free Application for Federal Student Aid (FAFSA) and submit it to the federal processor by mail or online. You may submit the FAFSA at the Federal Student Aid website (http:// www.fafsa.ed.gov/).

To receive priority consideration for financial aid, all forms and applications need to be submitted by March 1. Students are encouraged to apply even if they miss this priority date. Funds will be available after the priority date.

A student has a couple of choices concerning processing his or her FAFSA. These include mailing the form to the Federal Student Aid Programs or submitting it electronically on the Federal Student Aid website (http://www.FAFSA.ed.gov/). The processing time for electronic applications is three days, and processing time for mailed applications is four to six weeks.

## Satisfactory Academic Progress

Federal regulation requires that a student must be making satisfactory academic progress regardless of whether he or she has previously received Title IV aid. All students enrolled at the University of Arkansas who receive financial aid through the Title IV Assistance Programs must meet satisfactory academic progress requirements as defined below to be eligible for further aid. Satisfactory academic progress is deemed to have been made by any undergraduate student who meets both the quantitative and qualitative requirements indicated below.

## Quantitative Requirements

There are two quantitative requirements that the student must meet in order to remain eligible to apply for federal financial assistance. First, the student must pass, at a minimum, $67 \%$ of the credits attempted while attending the university. For the purpose of the $67 \%$ rule, grades of 'W' and 'l' are not considered passing grades and the completion percentage is truncated after the first decimal place and rounded to the nearest whole number. In addition, the student will remain eligible to apply for aid as long as the number of credits required for the student's published degree plan.

A transfer student may have earned credits at another school that will count toward his or her degree at the University of Arkansas. Class credits transferred to the University of Arkansas and classes taken for remediation at the University of Arkansas are used in both the 67\% and $150 \%$ calculation.

The determination of each student's meeting the quantitative requirements for satisfactory academic progress will be made annually following the conclusion of the spring semester. If a student fails to pass at least $67 \%$ of the credits attempted or has attempted more the $150 \%$
of the number of credits required for graduation, then the student must appeal for reinstatement of financial aid eligibility.

## Qualitative Requirements

A student is deemed to have met the qualitative requirements for satisfactory academic progress for financial aid purposes provided the student's cumulative GPA is 2.0 or greater. By default, students who do not have any university credit will pass the qualitative requirement. The determination of each student's meeting the qualitative requirement for satisfactory academic progress will be made annually following the conclusion of the spring semester.

## Additional Information About SAP Calculations

Dual majors and degrees are calculated at $150 \%$ of the total unit requirements of the primary plan. Changing of major will mean future SAP calculations will use the new primary plan or degree but all previous completed and attempted hours will still be used in SAP calculations. All transfer hours will be added into calculations as completed and attempted. Once an undergraduate degree is earned, students are only eligible for direct loans whether the degree is indicated by graduation or not. For second degrees, the calculation will monitor progress from the date of the previous degree (excluding technical certificates and associate degrees).

## Graduate and Law Students

Satisfactory academic progress for graduate and law students is determined as described above with one exception. In order to meet the quantitative requirement that students pass at least $67 \%$ of credits attempted, graduate and law students must pass each course with a grade of $C$ or better while attending the university at the graduate level.

## Satisfactory Academic Policy Appeals

When a student loses federal aid eligibility because they failed to make satisfactory progress, they may appeal that result because of their injury or illness, the death of a relative, or other special circumstances. Their appeal must explain why they failed to make satisfactory progress and what has changed in their situation that will allow them to make satisfactory progress at the next evaluation. The only way to regain aid eligibility without a successful SAP appeal is by meeting the SAP criteria above.

Students who fail to meet the above requirements will be notified that their financial aid has been denied. Each student denied aid will automatically be given an option to appeal to the Student Aid Committee. The Committee will review each appeal on an individual basis to determine whether there are circumstances beyond the student's control that prevented him or her from maintaining satisfactory progress. The decision of the Committee is final in appeal matters.

## Scholarships

The Academic Scholarship Office is a part of Enrollment Services and is housed in Silas Hunt Hall, Room 114.

The Academic Scholarship Office awards over 4,000 scholarships totaling more than $\$ 12$ million for students each year. This total does not include funds that support external scholarships held by UA students such as Governor's Scholarships, Arkansas Academic Challenge Scholarships, or non-resident tuition waivers. Scholarships funded by the university fall into three broad categories: prestigious fellowships, academic scholarships, and special interest/skills scholarships. Interested students should consult
the Academic Scholarships Office (http://scholarships.uark.edu/) website for the most up-to-date information.

## Scholarships for New Students

## Endowed Fellowships

The University of Arkansas offers approximately 90 endowed fellowships per year. The fellowships are given in one of four different programs: Honors College Fellowships, established in 2002; Bodenhamer Fellowships, established in 1998; Sturgis Fellowships, established in 1985; and Boyer Fellowships, established in 2000. The endowed fellowships are among the most competitive in the nation and are awarded to the top 1-2 percent of students. U of A Fellowships are awarded competitively. Students who wish to apply should visit the Honors College website (http:// honorscollege.uark.edu/).

|  | Annual Award | Eligibility Criteria | Application Procedure | Renewal Criteria |
| :--- | :--- | :--- | :--- | :--- |

## Academic Scholarships

A number of academic scholarships also are awarded to entering freshmen. Selection criteria may include national test scores (ACT or SAT), gradepoint average, National Merit recognition, quality and quantity of courses taken, application materials, and other pertinent factors. For online information, go to scholarships.uark.edu (http://scholarships.uark.edu/). Transfer student scholarships are awarded to students transferring from two-year colleges in Arkansas in conjunction with the Arkansas Association of Two Year Colleges' (AATYC) Academic All-Star program. Nominations are submitted to the AATYC and recognized at their annual conference. Additional transfer student scholarships are also available. See scholarships.uark.edu (http:// scholarships.uark.edu/).

| Name | Annual Award | Eligibility Criteria | Application Procedure | Renewal Criteria |
| :---: | :---: | :---: | :---: | :---: |
| Chancellor's Merit Scholarship | Up to $\$ 10,000$, plus the amount of either a Corporate or a UofA National Merit Scholarship, per year toward the direct cost of education, includes partial out-of-state tuition differential | National Merit finalists. Exceptional academic performance. Competitively awarded. | Apply for admission. <br> Complete Entering Freshman <br> Scholarship Application (http://scholarships.uark.edu) <br> Priority Deadline: November 15 | Cumulative 2.75 GPA and 30 hours earned by the end of the second semester of each award year. 4 years or 8 semesters total (5 years for the Bachelor of Architecture and Bachelor of Landscape Architecture). |
| Chancellor's Scholarship | Up to $\$ 8,000$ per year toward direct cost of education, including tuition, fees and double-occupancy room and board in UA residence hall or Greek housing. | Applications are competitive and typically come from the top 5 percent of the applicant pool. National Merit Semifinalists and Semifinalists are also considered. Competitively awarded. | Apply for admission. <br> Complete Entering Freshman <br> Scholarship Application <br> (http://scholarships.uark.edu) <br> Priority Deadline: November 15 | Criteria same as for <br> Chancellor's Merit <br> Scholarship (see above). |
| Chancellor's Community Scholarship | \$5,000 per year | Top applicants in the applicant pool who also have a demonstrable commitment to community service. | Apply for admission. <br> Complete Entering Freshman <br> Scholarship Application (http://scholarships.uark.edu) <br> Priority Deadline: November 15 | Criteria same as for Chancellor's Merit Scholarship (see above). |
| Honors College Academy Scholarship | \$4,000 per year | Top applicants from the applicant pool with a minimum 27 ACT and 3.50 GPA. Competitively awarded. | Apply for admission. <br> Complete Entering Freshman <br> Scholarship Application (http://scholarships.uark.edu) <br> Priority Deadline: November 15 | Criteria same as for <br> Chancellor's Merit <br> Scholarship (see above). |
| New Arkansan Non-Resident Tuition Scholarship Award | Partial out-of-state tuition differential. Variable amount based on hours enrolled. No scholarship application is required. | Renewable with completion of 24 hours per academic year and 2.75 minimum GPA. Up to 4 years (5 years for students in the Architecture program). |
| Freshman Success Scholarship | \$2,000 non-renewable | Students who have demonstrated outstanding academic achievement. Competitively awarded. | Apply for admission. <br> Complete Entering Freshman <br> Scholarship Application (http://scholarships.uark.edu) <br> Priority Deadline: November 15 | Non-renewable |
| Freshman Academic Scholarship | \$1,000 non-renewable | Students who have demonstrated outstanding academic achievement. Competitively awarded. | Apply for admission. <br> Complete Entering Freshman <br> Scholarship Application (http://scholarships.uark.edu) <br> Priority Deadline: November 15 | Non-renewable |
| University of Arkansas Leadership Award | \$2,000 per year | Students who have demonstrated outstanding academic achievement and leadership potential. Competitively awarded. | Apply for admission. <br> Complete Entering Freshman <br> Scholarship Application <br> (http://scholarships.uark.edu) <br> Priority Deadline: November 15 | Criteria same as for Chancellor's Merit Scholarship (see above). |

| Silas Hunt Distinguished Scholarship | Variable awards of \$5,000 or \$8,000 | Students who have demonstrated outstanding academic leadership qualities and potential and are from under-represented communities, which include but are not limited to: underrepresented ethnic and minority groups; students with interest in fields of study that do not attract members of their ethnicity or gender; under-represented counties in Arkansas; or firstgeneration college students. Competitively awarded. | Apply for admission. Complete Entering Freshman Scholarship Application (http://scholarships.uark.edu) Priority Deadline: November 15 | Criteria same as for Chancellor's Merit Scholarship (see above). |
| :---: | :---: | :---: | :---: | :---: |
| Razorback Bridge Scholarship | \$3,500 per year | Students who have demonstrated outstanding academic leadership qualities and potential and are from under-represented communities, which include but are not limited to: underrepresented ethnic and minority groups; students with interest in fields of study that do not attract members of their ethnicity or gender; under-represented counties in Arkansas; or firstgeneration college students. Competitively awarded. | Apply for admission. Complete Entering Freshman Scholarship Application (http://scholarships.uark.edu) Priority Deadline: November 15 | Criteria same as for Chancellor's Merit Scholarship (see above). |
| University Enrichment Scholarship | \$2,000 non-renewable | Students who have demonstrated outstanding academic leadership qualities and potential and are from under-represented communities, which include but are not limited to: underrepresented ethnic and minority groups; students with interest in fields of study that do not attract members of their ethnicity or gender; under-represented counties in Arkansas; or firstgeneration college students. Competitively awarded. | Apply for admission. Complete Entering Freshman Scholarship Application (http://scholarships.uark.edu) Priority Deadline: November 15 | Non-renewable |
| Jewel Minnis Scholarship | \$2,000 non-renewable | Students who have demonstrated outstanding academic achievement. Competitively awarded. | Apply for admission. Complete Entering Freshman Scholarship Application (http://scholarships.uark.edu) Priority Deadline: November 15 | Non-renewable |
| Arkansas Academic All Star Transfer Scholarship | AATYC Academic All Star receives annual award that pays tuition and tuition related fees up to $\$ 5,000$ per semester. | Awarded to students named the "Academic All-Star" by their Arkansas two-year college. | Students nominated as AATYC Academic All Star by their two-year college. Scholarship application is not required. | Maintain 2.75 cumulative $U$ of A GPA after each semester. Renewable up to five semesters. |

| Chancellor's Transfer Scholarship | \$3,000 per year | Arkansas residents with strong academic performance at Arkansas two-year colleges. Competitively awarded. | Deadline: April 1 for fall semester and October 15 for spring semester | Cumulative 2.75 GPA and 24 hours per year of eligibility. Renewable for one year. |
| :---: | :---: | :---: | :---: | :---: |
| Phi Theta Kappa Transfer Scholarship | \$2,500 per year | Awarded to top applicants from two-year colleges who are members of Phi Theta Kappa. Competitively awarded. | Deadline: April 1 for fall semester and October 15 for spring semester. Provide Phi Theta Kappa membership documentation. | Cumulative 2.75 GPA and 24 hours per year of eligibility. Renewable for one year. |
| Transfer Scholarship | \$2,000 per year. Renewable for one year. | Strong academic performance at another 2year or 4-year college or university. Competitively awarded. | Deadline: April 1 for fall semester and October 15 for spring semester | Cumulative 2.75 GPA and 24 hours per year of eligibility. Renewable for one year. |

## UA Scholarships - General Information

The following regulations govern the general university freshman scholarships described below:

1. November 15 is the priority scholarship deadline for entering freshmen. Applicants must apply to the university by November 1 to be considered for these scholarships.
2. An "entering freshman" is defined as a student who has not enrolled in another post-secondary institution in a fall or spring semester following graduation from high school.
3. Eligibility for renewal of the Chancellor's Scholarship and general university scholarships is determined at the end of the second semester each award year. Students may "catch up" in summer terms by taking classes at their own expense on the Fayetteville campus.
4. These scholarships are generally awarded per academic year to cover the fall and spring terms, up to an eight-semester maximum for most students, or a ten-semester maximum for students in the Bachelor of Architecture and Bachelor of Landscape Architecture programs, each of which is a five-year program. Renewal criteria are evaluated every two semesters.

## Special Scholarships and Conditions ACT 1185

Arkansas income taxpayers who earn a minimum of $\$ 5,500$ in wages and, with their dependents, reside in a bordering state in a county or parish contiguous to an Arkansas county in which a public institution of higher education is located may enroll at the University of Arkansas and receive the non-resident tuition award under the provisions of ACT 1185 of 1995 , Section 34 . The availability of funds may vary each year, and the students must provide certain documentation. Please contact the Academic Scholarship Office at 479-575-4464 for more information.

## Arkansas Alumni Association Scholarships

Thanks to the generosity of our donors, the Arkansas Alumni Association awards over one million dollars annually through a pool of scholarships. Each alumni scholarship has specific criteria based on the donors' wishes; including, but not limited to, academic achievement, service to the school and community, leadership ability, first-generation college-going and specific major and career choices. Some take into consideration financial need and unique personal backgrounds. All current and prospective students are encouraged to apply each year. Most Association-level scholarships are designated for incoming freshmen and are meritbased. Additional Alumni Association, Alumni Chapters and Alumni Societies scholarships are also available. For more information, visit the Arkansas Alumni Association's website (https://www.arkansasalumni.org/ scholarships/).

## Air Force and Army ROTC

The Air Force and Army Reserve Officers' Training Corps programs offer a number of scholarship opportunities for entering freshmen and oncampus students. See the Reserve Officers' Training Corps section of this catalog for detailed information.

## Military Benefits

The University of Arkansas is approved by the Arkansas Department of Higher Education and the U.S. Department of Veterans Affairs to participate in military educational benefit programs for veterans, current military members, reservists, national guard, and dependents of veterans who are working toward a degree. For more information regarding programs and eligibility please contact the university's Veterans Resources and Information Center (VRIC) at 479-575-8742 or http:// veteranscenter.uark.edu. (http://veteranscenter.uark.edu)

## Military Student Scholarships

The University of Arkansas provides three different scholarships to current and former military service members and the dependents of service members. The military service member scholarship provides 35 one-year scholarships in the amount of $\$ 4,000$ to support current and former service members. The military dependents scholarship provides 10 one-year scholarships in the amount of $\$ 1,500$ to support dependents of service members. The military book scholarship provides 10 one-semester scholarships (each fall and spring semester) in the amount of $\$ 500$ to support service members and dependents with book expenses. Students should contact the Academic Scholarship Office at 479-575-4464 or http://scholarships.uark.edu for further information.

## Registration

Undergraduate students, including students not declaring a major, must enroll in one of six academic units: the Fulbright College of Arts and Sciences; the Dale Bumpers College of Agricultural, Food and Life Sciences, the Sam M. Walton College of Business, the College of Education and Health Professions, the College of Engineering, or the Fay Jones School of Architecture and Design. Information regarding registration periods and procedures is found on the Registrar's website (http://registrar.uark.edu/).

## Registration Periods

Students must register during one of the formal registration periods. Currently enrolled students are expected to register during the priority registration held each semester for the following semester. New freshmen are expected to register during orientation. New freshmen not already registered during orientation should register during the open registration period that immediately precedes the beginning of classes each semester. New transfer students should contact their academic college for advising and registration information. There is a late registration period of five days at the beginning of fall and spring semesters, a one-day late registration period at the beginning of intersessions and a one- or two-day late registration period at the beginning of the summer sessions, but students may find that many classes are filled.

## Student Addresses

It is the responsibility of all students to maintain and correct their addresses with the university and to report any change of address promptly either in writing to the Office of the Registrar or on the Student Information System (http://isis.uark.edu/). Failure to do so may result in undelivered official correspondence and announcements. Emergency contact information is also required.

Important academic announcements are frequently sent to the students through university-assigned email accounts. Students must check this account frequently to avoid missing critical notices.

## Identification Cards

Identification cards are made at orientation and at the ID Card Office during the year. Several privileges on campus require an ID card, and it can be used as a debit card for purchases at various locations throughout the campus. Part-time students are also eligible for a card.

## Academic Advising

Academic advising is an active, ongoing exchange between the advisers and students, grounded in teaching and learning. Advising is based on students gaining accurate and appropriate information and direction to help make their educational experience relevant, coherent, and meaningful. It is a process that assists students in connecting with the University of Arkansas, making thoughtful decisions related to their academic experiences, and maximizing their educational and career opportunities. Quality academic advising is essential to achieving the university's vision. (Academic Advising Council Mission Statement, 2010)

While procedures may vary among schools and colleges, all successful academic advising should include the following:

- A mutual respect between adviser and student with the student possessing final responsibility for successful completion of a degree.
- Respect for students' ethnic and racial heritage, age, gender, culture, national origin, sexual orientation, and religion, as well as their physical, learning, and psychological abilities.
- A developmental and educational process that occurs over time.
- Consideration of individual students' interests, abilities, and needs.
- A collaborative effort to connect students to campus resources and services.
- Reasonable availability and accessibility to advisers.
- Interpretation of University of Arkansas, college, and departmental rules and courses.
- A student's understanding of the purpose and nature of the university core courses.
- Recommendation of appropriate courses.
- A student's understanding of and progress toward academic requirements.
- General information regarding career options and opportunities, with appropriate referrals as necessary.
- An understanding of and adherence to laws and regulations that relate to academic advising.
- Adherence to the highest principles of ethical behavior.

The University of Arkansas is committed to developing each student to his or her fullest potential. To this end, programs in each college have been established to improve the academic achievement and persistence of students on academic warning and of other students in need of academic assistance. Such assistance is provided through a variety of instructional and informational services.

## Courses That Do Not Count toward a Degree

The following courses do not count toward degree credit in any college or school: ENGL 0001 Writing Lab, MATH 0001L College Algebra Laboratory I, MATH 0002L College Algebra Laboratory II and MATH 0131L Quantitative Reasoning Laboratory.

The following courses do not count toward any degree in the College of Engineering: MATH 1203 College Algebra (ACTS Equivalency $=$ MATH 1103), MATH 1213 Plane Trigonometry (ACTS Equivalency = MATH 1203), MATH 1284C Precalculus Mathematics (ACTS Equivalency = MATH 1305), and ENGL 2003 Advanced Composition.

## Adding and Dropping Courses

A currently enrolled student who has registered during the advance registration period should make any necessary or desired schedule adjustments such as adding or dropping courses or changing course sections during the schedule-adjustment period of the same semester. Students may add courses during the first five class days of a fall or spring semester. Students who drop classes will have their fees adjusted according to Fayetteville Policies and Procedures 330.0 - Tuition and Fee Adjustment Policy for Dropping Classes (https://vcfa.uark.edu/policies/ fayetteville/avcf/3300.php). Drops and withdrawals are two different functions. In a drop process, the student remains enrolled. The result of the withdrawal process is that the student is no longer enrolled for the term. Fee adjustment deadlines for an official withdrawal are noted in Fayetteville Policies and Procedures 518.0 - Tuition and Fee Adjustment Policy for Official Withdrawal (https://vcfa.uark.edu/policies/fayetteville/ avct/5180.php).

A student may drop a full-semester course during the first 10 class days of a fall or spring semester without having the drop shown on the official academic record. After the first 10 class days, and before the drop deadline of the semester, a student may drop a course, but a mark of "W," indicating the drop, will be recorded. A student may not drop a
full-semester course after the Friday of the thirteenth week of classes in a fall or spring semester. Drop-add deadlines for partial semesters, intersessions, and summer sessions are listed on the semester calendars located on the Office of the Registrar's website (http://registrar.uark.edu/).

## Audit Registration

Students wishing to audit a class should contact the instructor teaching that class and request permission to audit. If the instructor approves the audit, the academic department will register the student in that class as an audit. Auditing of a class is allowed on a space-available basis, and a student must pay fees for that class. The instructor shall notify the student of the requirements for receiving the mark of "AU" for the course being audited. The instructor and the student's dean may drop a student from a course being audited if the student is not satisfying the requirements specified by the instructor. The student is to be notified if this action is taken. The only grade or mark that may be awarded is "AU."

## Enrollment Status and Course Load

The enrollment status of undergraduate students is based on the number of hours enrolled in a term. The university recognizes full-time status as carrying a minimum of 12 semester hours in a regular (fall and spring) and summer term. Students should be aware that the minimum number of hours is insufficient for completion of a four-year degree program in eight academic semesters (four years). Since most university degree programs require a minimum of 120 semester hours, or 30 hours per year, a student should earn 15 hours per semester to complete most degree programs in four years (eight semesters). The university offers degree-completion plans; see the Office of the Registrar's website (http:// registrar.uark.edu/425.php) or the Academic Regulations (p. 67) section of this catalog.

The chart below shows the enrollment status for each term, based on hours enrolled.

| Term | Hours | Enrollment Status |
| :--- | :--- | :--- |
| Fall, Spring, Summer | $1-5$ | Less than half-time |
|  | $6-8$ | Half-time |
|  | $9-11$ | Three-quarter time |
|  | 12 or more | Full-time |

## Number of Hours Allowed per Semester

The number of hours in which a student is allowed to register includes self-paced (correspondence) courses taken through Global Campus.

1. Undergraduate students who wish to enroll in more than 18 hours in a regular term must be approved by their academic dean's office. Enrollment in an intersession is limited to a maximum of one lecture or lab course, with the exception of co-requisite courses, for a maximum of four hours.
2. Undergraduate students who wish to enroll in more than 21 hours in a regular term must get a recommendation from their academic dean's office and be approved by the Academic Standards Committee. (http://registrar.uark.edu/student-records/academic-standards-committee-petition.php)
3. Undergraduate students who wish to take more than 7 hours in one five-week summer session or more than 14 hours total in the summer term must get a recommendation from their academic dean's office
and be approved by the Academic Standards Committee. (http:// registrar.uark.edu/student-records/academic-standards-committeepetition.php)
4. For students with severe injury or illness of a temporary or permanent nature, less than 12 hours may be certified on a semester-bysemester basis as full-time with the approval of the student's dean and the concurrence of a physician or licensed examiner.

## Pass Fail

## Registration for Grades of Pass-Fail for Undergraduates

Undergraduate students in some programs may register to take certain courses on a pass-fail basis. In such cases, a mark of "P" (passed) or a grade of "F" (failed) will be recorded. The grade will remain either "P" or "F" and may not be changed at a later date.

Students in the Fulbright College of Arts and Sciences, the Fay Jones School of Architecture, and the Dale Bumpers College of Agricultural, Food and Life Sciences are eligible to enroll for certain courses on a passfail basis under the following conditions:

1. Students should contact the instructor teaching that class and request permission to enroll for a pass-fail grade. Instructors may deny this request when it is not consistent with course goals or methods (e.g., if there is significant group work or other types of collaboration by students). If the instructor approves, students should then seek approval from their adviser. (Students in Agricultural, Food and Life Sciences must also have the approval of their academic dean.)
2. That the student has attained sophomore rank or higher.
3. That the student is not on academic probation and has achieved a cumulative grade-point average of at least 2.00.
4. That such enrollment is limited to one course per semester.
5. That the total enrollment on a pass-fail basis be limited to no more than 18 hours in any student's degree program.
6. That the courses involved are general electives and are not required as part of the student's program, including major, minor, concentration, etc., or State Minimum Core requirements. Courses being used to fulfill any specific program requirement or to complete a State Minimum Core requirement are excluded from the pass/fail grading option and must be taken as a regularly graded course.
7. Registration for pass-fail credit must be completed prior to the final date for changing registration by adding a course.

Instructors can submit only a "P" or "F" grade on the final grade roster for a student approved for the pass-fail option. In order to receive a "P" the student must earn a grade of "C-minus" or above in the course. The "P" mark will not be counted in grade point average but will increment hours earned; the "F" grade will be counted in the grade point average.

Students in the College of Education and Health Professions may enroll in courses on a pass-fail basis under the same conditions but only in courses offered by the Fulbright College of Arts and Sciences or the College of Education and Health Professions. Walton College of Business and College of Engineering students may not take courses on a pass-fail basis.

## Student Classification

Definitions of undergraduate student classification are as follows:

| Classification | Course Hours Passed |
| :--- | :--- |
| Freshman | Less than 30 hours |
| Sophomore | 30 or more hours but less than 60 |
| Junior | 60 or more hours but less than 90 |
| Senior | 90 or more hours |

## Withdrawal from the University

Withdrawing from the University of Arkansas means withdrawing from all classes that have not been completed up to that time. A student who leaves the university voluntarily before the end of the fall or spring semester must withdraw from all classes on the student registration system or notify the Office of the Registrar in writing. Withdrawal may occur anytime during the semester through the last day of classes. Withdrawal deadlines for summer sessions are listed on the semester calendars located on the Office of the Registrar's website (http:// registrar.uark.edu/). Students who do not withdraw officially from a class they fail to complete will receive an "F" in that class. Students with holds on their registration should contact the Office of the Registrar for assistance in processing their official withdrawal from the university.

A currently enrolled student who has registered during the advance registration period should make any necessary or desired schedule adjustments such as adding or dropping courses or changing course sections during the schedule-adjustment period of the same semester. Students who drop classes will have their fees adjusted according to Fayetteville Policies and Procedures 330.0 - Tuition and Fee Adjustment Policy for Dropping Classes (https://vcfa.uark.edu/policies/fayetteville/ avcf/3300.php). Drops and withdrawals are two different functions. In a drop process, the student remains enrolled. The result of the withdrawal process is that the student is no longer enrolled for the term. Fee adjustment deadlines for an official withdrawal are noted in Fayetteville Policies and Procedures 518.0 - Tuition and Fee Adjustment Policy for Official Withdrawal (https://vcfa.uark.edu/policies/fayetteville/ avcf/5180.php).

## Fee and Cost Estimates

Educational expenses will vary according to a student's course of study, personal needs, and place of residence. Student progress or general course of action in pursuit of higher education at the University of Arkansas is determined during the application and acceptance process. At the conclusion of the application and acceptance process, the progress or general course of action for each student will be assigned a category, called a career.

The career categories at the University of Arkansas - in order of magnitude by the cost of tuition per credit hour - are Agricultural \& Food Law, Law, Graduate, and Undergraduate. Students concurrently enrolled in multiple careers will be assigned one primary career for all tuition billing purposes, called a billing career, based on the order of magnitude listed above. The Office of the Registrar is responsible for assigning the appropriate billing career. Students pursing an Undergraduate career will also be classified by undergraduate program.

The undergraduate programs of the Walton College of Business, College of Engineering, College of Education and Health Professions' plan of Nursing, and the Fay Jones School of Architecture and Design's undergraduate program of Architecture have specific tuition rates, while all other undergraduate programs are the Undergraduate tuition rate. Similar to career, although a student may be concurrently enrolled in multiple undergraduate programs, the Office of the Registrar will assign
each student only one primary undergraduate program for tuition billing purposes based on the order of magnitude by the cost of tuition per credit hour. All fees, charges, and costs quoted in this catalog are subject to change without notice. A survey tool for tuition and fee estimation is available at the Treasurer's website (http://treasurer.uark.edu/Tuition.asp? pagestate=Estimate).

Financial obligations to the University of Arkansas must be satisfied by the established deadlines. E-check (electronic check) and credit/debit payments are made online on UAConnect (http://uaconnect.uark.edu). If you pay with a debit or credit card, there is a convenience fee charged of 1.8 percent.

Acceptance of payment for fees does not imply academic acceptance to the university.

## Estimated Expenses

Estimated Necessary Expenses for an Academic Year
Estimates of necessary expenses listed below are for the 2022-23 academic year for a typical undergraduate student taking 30 credit hours per academic year at the University of Arkansas.

| Name | Undergraduate <br> Resident | Undergraduate Non- <br> Resident |
| :--- | :--- | :--- |
| Tuition* $^{\text {R }}$ | $\$ 7,666.00$ | $\$ 26,690.00$ |
| University Fees** | $\$ 2,082.00$ | $\$ 2,082.00$ |
| Books | $\$ 1,154.00$ | $\$ 1,154.00$ |
| Personal Expenses | $\$ 3,176.00$ | $\$ 3,176.00$ |
| Transportation | $\$ 2,640.00$ | $\$ 2,640.00$ |
| Room |  |  |
| Board*** $^{* * *}$ | $\$ 8,366.00$ | $\$ 8,366.00$ |
| TOTAL*** $^{* * *}$ | $\$ 4,924.00$ | $\$ 4,924.00$ |
|  | $\$ 30,008.00$ | $\$ 49,032.00$ |

* The standard undergraduate in-state tuition rate is $\$ 255.51$ per credit hour. Students enrolled in College of Business courses are charged $\$ 339.83$ per credit hour in-state tuition. Students in the School of Architecture and Design are charged $\$ 304.407$ per credit hour in-state tuition. Students enrolled in College of Engineering courses are charged $\$ 309.17$ per credit hour in-state tuition. Nursing students are charged $\$ 329.22$ per credit hour instate tuition.
** University fees per year include the following student-initiated and student-approved fees:
- Student Activity fee calculated at $\$ 2.78 /$ credit hour $-\$ 87.60$
- Student Health fee, calculated at $\$ 7.47 /$ credit hour - $\$ 230.70$
- Media fee, calculated at $\$ 0.90 /$ credit hour - $\$ 27.00$
- Transit fee, calculated at $\$ 3.15 /$ credit hour - $\$ 108.60$
- Network Infrastructure and Data Systems fee at $\$ 12.10 /$ credit hour - \$363.00
- Facilities Fee, calculated at $\$ 23.35 /$ credit hour — $\$ 700.50$
- College of Arts and Sciences Fee at $\$ 14.41 /$ credit hour \$432.30
- Library Fee, calculated at $\$ 4.41 /$ credit hour - $\$ 132.30$
*** Weighted average expenses for living in a residence hall, double occupancy, with an unlimited meal plan. Actual room and board fees vary.
**** Budget amounts were adjusted for rounding to accommodate UAConnect budgetary rules.

When paying tuition, room and board, and associated fees, anticipated financial aid for a current semester may be deducted when it is listed as anticipated aid on the student's account. Students receiving financial aid are strongly encouraged to have sufficient personal funds available to purchase books and to meet necessary expenses for at least one month at the start of school as some aid funds may not be available for disbursement.

The latest information regarding costs and other aspects of university life may be obtained by calling or writing the Office of Admissions, 200 Hunt Hall, University of Arkansas, Fayetteville, AR 72701. In Arkansas call 1-800-377-8632; from outside of Arkansas call 479-575-5346.

## Fee Adjustments

A currently enrolled student who has registered during the advance registration period should make any necessary or desired schedule adjustments such as adding or dropping courses or changing course sections during the schedule-adjustment period of the same semester. Students who drop classes will have their fees adjusted according to Fayetteville Policies and Procedures 330.0 - Tuition and Fee Adjustment Policy for Dropping Classes (https://vcfa.uark.edu/policies/fayetteville/ avcf/3300.php). Drops and withdrawals are two different functions. In a drop process, the student remains enrolled. The result of the withdrawal process is that the student is no longer enrolled for the term. Fee adjustment deadlines for an official withdrawal are noted in Fayetteville Policies and Procedures 518.0 - Tuition and Fee Adjustment Policy for Official Withdrawal (https://vcfa.uark.edu/policies/fayetteville/ avcf/5180.php).

## Student Invoices

Students who pre-register for a semester will be invoiced approximately six weeks prior to the first day of classes. The Treasurer's Office will send out an email notification when the student invoices are available on UAConnect. Students should log into UAConnect (http:// uaconnect.uark.edu), navigate to the Treasurer's Office tile, and click the 'Student Invoice' link.

## Late Fees

Students are required to pay all charges by the posted payment deadline. Students who fail to pay all charges or who fail to execute an installment payment plan by the deadline may be assessed a late payment fee equal to the outstanding balance, not to exceed $\$ 75.00$.

Any student with an outstanding balance, to include registration-related fees and/or housing charges, by the last payment deadline will be assessed an additional late payment fee equal to the outstanding balance, not to exceed $\$ 75.00$.

The late fee will not be waived because an invoice was not received.

## Disbursement of Refunds

Disbursement of refunds due to overpayments by scholarships, loans, and/or grants will begin approximately five days prior to the start of classes.

The University of Arkansas has partnered with BankMobile to deliver financial aid and other school refunds to the University of Arkansas
students. For more information visit the BankMobile page (http:// bankmobiledisbursements.com/refundchoicessso/).

## Addresses

Students may create a check address, which will be used specifically for overpayment checks. This address may be created in addition to the local and permanent addresses. If a check address is not created, the default address will be the permanent address. The student may change their address in the Student Center section of UAConnect (https:// uaconnect.uark.edu/).

## Military Service

## Students Called into Active Military Service

When a student or student's spouse is activated for full-time military service and is required to cease attending the University of Arkansas without completing and receiving a grade in one or more courses, they shall receive compensation for the resulting monetary loss as provided by Fayetteville Policy 504.2. The student must cease attendance because 1) the student is activated or deployed by the military or 2) the student's spouse is activated or deployed by the military and the student or student's spouse has dependent children residing in the household.

To be eligible for the compensation, the student must provide, prior to activation or deployment for military service, an original or official copy of the military activation or deployment orders to the university's Veterans Resource and Information Center. A student whose spouse is a service member shall provide proof of registration with the Defense Enrollment Eligibility Reporting System (DEERS) of the Department of the Defense that establishes that dependent children reside in the household of the student and the service member.

Upon leaving the University of Arkansas because of active duty or deployment, the student may choose one of three compensatory options. The student may officially withdraw and receive full adjustment and refund of tuition and non-consumable fees for the term involved; the student can remain enrolled and arrange for a mark of "Incomplete" for each class and finish the courses 12 months after deactivation; or the student may receive free tuition and fees for one semester after deactivation. For more detailed information, read Fayetteville Policy 504.2 (http://vcfa.uark.edu/ policies/fayetteville/avcf/5042.php).

## Other General Fees

## Fee Information

## General Fees*

| Title | Description | Amount** |
| :---: | :---: | :---: |
| Facilities Fee | Provides support dedicated specifically to campus facilities needs, including major projects and deferred maintenance. | \$23.35 |
| Media Fee | The university's student publications, specifically the Arkansas Traveler newspaper and the Razorback yearbook, are partially funded by the media fee. Students reserving a copy are provided with a Razorback yearbook. | \$0.90 |
| Network Infrastructure And Data Systems Fee | Provides support for the development and operation of the campus network, including electronic equipment, servers with software, and cabling. The network systems serve computer labs, academic and administrative buildings, residence halls and off-campus access facilities. Data systems will enable Web-based access to the university's information systems for students, faculty, and staff. Also provides support for upgrades and replacement of the student information system. | \$12.10 |
| Student Activity Fee | Empowers the Associated Student Government (ASG) to make funding available to over 300 Registered Student Organizations and program activities on campus to develop lasting friendships and leadership abilities and provide all students with a unique opportunity to participate in cultural social, educational, and recreational events throughout the year. | \$2.92 |
| Student Health Fee | Covers wellness and health promotion educational programs and healthy student behavior programs to maintain health and safety. Covers individual consultations with a certified wellness coach, consultation with a registered dietician and consultation with an orthopedic specialist from the community. Student Health Fee also covers sexual assault counseling, prevention and advocacy services. The Student Health Fee als covers several mental health services, such as 24hour mental health emergency care, the cost for two intake assessments with a mental health clinician per semester, most group counseling sessions, case management/referral services, psychiatric nurse consultations, refill requests and outreach/advocacy. | \$7.69 |
| Transit Fee | Helps fund the Razorback Bus Transit System, which services the campus and neighboring community year round. | \$3.62 |

Library Fee
Provides additional support for library \$4.41 materials acquisition

* Assessed each academic semester for which the student is enrolled: fall, spring, and summer
** Per Credit Hour

## Program/Service Specific Fees

Some individual services at the university assess fees related to their respective service, such as the cost of administering national tests, late payments or choosing to park on campus.

## Program/Service

Specific Fees
The Arkansas Non-Resident Tuition Scholarship
Award Fee will be assessed for undergraduate nonresidents (including transfer students) and international students who enter after the summer of 2013 and who are receiving the Non-Resident Tuition Award. The fee will be $50,70,80$ or 90 percent of the difference between the in-state and out-of-state tuition per semester as long as students are receiving the award. Non-resident and international students receiving the award prior to the 2011-12 academic year are exempt as are non-resident students who are not receiving the award. To view eligibility requirements, please view the Academic Scholarship Office website at http://scholarships.uark.edu/nrta/index.php (http:// scholarships.uark.edu/nrta/)

## Teaching Equipment and Laboratory

 Enhancement FeesThese fees provide and maintain state-of-the-art classroom equipment and instructional laboratory equipment. These fees vary, based upon the student's college of enrollment.

During the regular fall, spring and summer academic semesters, these fees are assessed on a per credit hour basis (see chart below).

| College or School | Per Credit Hour Fee |
| :--- | :--- |
| Bumpers College Agricultural, Food <br> and Life Sciences | $\$ 25.70$ |
| Fay Jones School of Architecture | $\$ 32.60$ |
| Fulbright College of Arts and <br> Sciences | $\$ 14.41$ |
| Walton College of Business | $\$ 23.50$ |

| College of Education and Health <br> Professions | $\$ 17.04$ |
| :--- | ---: |
| College of Engineering | $\$ 35.87$ |

## Other General Fees

Checks tendered to the university are deposited immediately. The university does not accept postdated checks. Checks returned for "insufficient funds" (NSF checks) are generally presented for payment only once. Each check returned by a bank for any reason will be assessed a returned check fee. The university may, at its discretion, verify available bank funds for any checks written for payment of indebtedness before accepting a check.

The University of Arkansas reserves the right to withhold transcripts or priority registration privileges, to refuse registration, and to withhold diplomas for students or former students who have not fulfilled their financial obligations to the university. These services may also be denied students or former students who fail to comply with the rules governing the audit of student organization accounts or to return property entrusted to them.

Requests for exceptions to university's fees, charges, and refund policies must be made in writing. Instructions for submitting requests for exceptions to the various fees, charges, and refund policies of the university may be obtained as follows:

- For residence life and dining services fees, charges, and refund policies contact University Housing Assistant Director for Business, housing@uark.edu or (479) 575-3951.
- For parking services fees, charges, and refund policies contact: Parking and Transit, Administrative Services Building, 155 Razorback Road, (479) 575-3507.
- For other fees, charges, and refunds, contact the Treasurer's Office, 214 Arkansas Union, Attention: Treasurer, (479) 575-5651.

Students receiving financial aid are strongly encouraged to have sufficient personal funds available to purchase books and to meet necessary expenses for at least one month at the start of school as some aid funds may not be available for disbursement.

Students are allowed to have automobiles at the university, although parking is quite limited. There is a parking permit and registration fee for each vehicle, varying in cost depending upon the parking option selected.

## Resident Status

## Student Residence Status for Tuition and Fee Purposes

Board Policy 520.8 (May 26, 2022, revised)

## Determination of Residence Status

## I. Purpose

The purpose of this policy is to establish guidelines to classify students for the purpose of assessing tuition and fees as either "instate" or "out-of-state." These guidelines seek to balance fairness and equity to the students enrolled at campuses within the University of Arkansas System and to the citizens of Arkansas, who support the educational services provided by the University.
II. Initial Classifications; Definitions and Criteria
a. Pursuant to this policy, a student shall be admitted to the University in an "in-state" or "out-of-state" status for tuition and fee purposes. Except as otherwise provided under this policy or
state law, to be classified as "in-state" for tuition and fee purposes at the time of admission, a student must have established a bona fide domicile in Arkansas and must have resided continuously in this state in that bona fide domiciliary status for at least six consecutive months prior to submission of the student's application for admission.
b. A bona fide domicile is a home of apparent true, fixed, and permanent nature, a place of actual residing for all purposes of living that may be distinguished from a temporary sojourn in this state as a student. The person claiming domicile in Arkansas must provide evidence of permanent connection with the State of Arkansas and demonstrate the expectation of remaining in this state beyond graduation. For purposes of implementing this policy, each campus shall provide standards that will be applied in making the determination of residence.
c. Except as otherwise provided under this policy, the domicile of an adult student (18 years of age or older, unmarried and a nondependent as described below) or emancipated minor student shall be based on the student's own domicile.
d. Except as otherwise provided under this policy, the domicile of an unemancipated minor student (less than 18 years of age) or an unmarried dependent who has not attained the age of 24 shall be the domicile of the student's parents or surviving parent, or such other person legally standing in the place of a parent to the student with whom the student in fact makes a home, and who has been making substantial contributions to the support of the student for at least six consecutive months prior to the term or semester for which the tuition and fees are paid.
e. A student who cannot satisfy the criteria for Arkansas domicile will be classified as an "out-of-state" student and will pay tuition and fees accordingly.
f. A student holding a temporary visa will be classified as a foreign student and an "out-of-state" student for purposes of tuition and fees. A student who has been granted permanent visa and has been domiciled in Arkansas for six consecutive months following receipt of the permanent visa shall be classified as an "in state" student for tuition purposes.
g. The six-month period required in paragraph II(A) of this policy shall be waived for persons, their spouses, and their unmarried children (who have not yet attained the age of 24) who move to Arkansas ${ }^{1}$ with attendance at the University only a by-product of the primary purpose of establishing domicile in this state.
h. An unmarried student who has not reached the age of 24 years and who has one parent residing in Arkansas (for at least six consecutive months immediately prior to the beginning of the term or semester in which the tuition and fees are to be paid) shall be considered an "in-state" student for tuition and fee purposes, even if that student resided outside the state with the other parent before coming to Arkansas to attend the University.
i. Marriage is recognized as emancipation for any minor student.
j. The spouse of a person continuously domiciled in Arkansas (for at least six consecutive months immediately prior to the beginning of the term or semester in which the tuition and fees are to be paid) upon request shall be classified as "in-state" for tuition and fee purposes.

## III. Reclassifications

a. The initial classification of a student will not prejudice a different classification for following terms or semesters. However, a student's prior domicile is assumed to continue until the student
clearly establishes a bona fide domicile in Arkansas (see 4Procedures below).
b. A student previously classified as "out-of-state" may be reclassified as "in-state" for tuition and fee purposes if the student has established a bona fide domicile in Arkansas and has resided continuously in this state in that bona fide domiciliary status for at least six consecutive months prior to seeking reclassification by the University.
i. In order for an adult student or an emancipated minor student to establish a bona fide domicile in Arkansas for tuition purposes, the student must have left the parental home, must have established in this state a home of a permanent character as manifested objectively by good faith acts, and must have the expectation of remaining in this state beyond graduation.
c. The single fact of presence in Arkansas for at least six months of attendance as a student enrolled in the University of Arkansas, or any other educational institution, neither constitutes nor necessarily precludes reclassification as one domiciled in Arkansas but will be a factor to be considered.

## IV. Procedures

a. Each student is responsible for registering under a proper classification for tuition and fee purposes. It is the duty of the student to bring any question about residency classification status to the attention of the campus classification review officer in a timely fashion in order that the question may be settled before registration.
b. A student seeking "in-state" status shall have the burden of establishing that the requirements and standards set out in this policy have been satisfied. Persuasive evidence to that effect must be presented in writing and verified under oath by the student. Mere claims of local domicile and duration of stay are of little weight. A student who knowingly gives erroneous information in an attempt to establish "in-state" status for tuition purposes may be subject to discipline, up to and including dismissal from the University.
c. All disputed classifications for student tuition and fee purposes, whether at initial enrollment or subsequent enrollments, and all disputed reclassifications will be decided initially on each campus by a classification review officer designated by each Chancellor.
d. The Chancellor of each campus will designate a campus classification appeal officer to receive petitions from decisions made by the campus classification review officer. Each campus classification appeal officer may, in his/her discretion, make investigations, receive evidence, and conduct informal hearings. After considering the case, the campus classification appeal officer will render a decision and notify the affected student of the decision in writing. Any decision of the campus classification appeal officer may be appealed to the Vice President for Academic Affairs of the University of Arkansas System, who shall recommend final disposition to the President of the University.
e. Written notice of the appeals procedure will be provided to each student raising a question about the student's status with the campus residency classification review officer.
f. Determination of domicile will be based on a review of all pertinent facts, evidence, and circumstances which collectively show, in an objective and clear manner, the actual domicile of the student.

1 For the purpose of this policy, dependents are the spouse and unmarried children who are legal dependents as defined by the IRS.

## Reclassification Deadlines

Students who have established a bona fide domicile in Arkansas following initial classification as a non-resident must request reclassification if they want their status recognized for fee purposes. Applications and appropriate documentation must be received by the Office of the Registrar no later than the fifth class day (second class day of a summer session) of the term for which in-state fee assessment is requested. Applications received after the deadline will be considered for the next term. All fees are to be paid by published due dates. Students who receive a favorable decision after payment will be provided a refund of out-of-state fees paid. Please direct questions about residence classification review procedures to the Office of the Registrar, 146 Silas H. Hunt Hall.

## Resident Status of Native Americans

(Board Policy 520.1, "Waiver of Non-Resident Tuition for Native Americans.")

Native American people in other states belonging to tribes that formerly lived in Arkansas before relocation, and whose names are on the rolls in tribal headquarters, shall be classified as in-state students of Arkansas for tuition and fee purposes, on all campuses of the University of Arkansas. Tribes so identified include the Caddo, Cherokee, Chickasaw, Choctaw, Creek, Delaware, Kickapoo, Osage, Peoria, Quapaw, Shawnee, and Tunica.

## Resident Status of Members of the Armed Forces and Their Dependents

(Board Policy 520.7, "Fees for Members of Armed Forces and Dependents.")

For the purpose of tuition and fees applicable for all programs of study, including distance learning programs, effective July 1, 2017, all campuses of the University of Arkansas System shall classify a student as in-state or resident, if the student meets any of the following criteria regardless of his or her residence:

1. A veteran who was honorably discharged or released from a period of not less than ninety (90) days of active duty in the United States Armed Forces within three (3) years before the date of enrollment in a program of study;
2. A dependent ${ }^{1}$ or spouse of a veteran under Paragraph 1.
3. A member of the armed forces.
4. A spouse of a member of the armed forces.
5. A Reserve Officers' Training Corps cadet who has an executed armed forces service contract.
6. A dependent of a member of the active duty armed forces, when the member of the armed forces:
a. is stationed in the State of Arkansas pursuant to permanent change of station (PCS) military orders;
b. is continuously domiciled in Arkansas for at least six consecutive months before entering active military service and who maintains Arkansas as the permanent home of record while on active military duty, or
c. demonstrates a change of bona fide domicile from another state to Arkansas at least 12 consecutive months prior to separation, discharge, or retirement from active military duty. This provision is
forfeited if the military person does not return to Arkansas within 36 months after separation, discharge, or retirement from active duty.
7. A veteran using educational assistance under either Chapter 30 (Montgomery G.I. Bill-Active Duty Program) or Chapter 33 (Post-9/11 G.I. Bill), of Title 38 of the United States Code, who lives in the State of Arkansas while attending a school located in the State of Arkansas (regardless of his/her formal state of residence) and enrolls in the school within three years of discharge or release from a period of active duty service of 90 days or more.
8. Anyone using transferred Post-9/11 G.I. Bill benefits (38 U.S.C. §3319) who lives in the State of Arkansas while attending a school located in the State of Arkansas (regardless of his/her formal state of residence) and enrolls in the school within three years of the transferor's discharge or release from a period of active duty service of 90 days or more.
9. Anyone described in paragraphs 7 and 8 while he or she remains continuously enrolled (other than during regularly scheduled breaks between courses, semesters, or terms) at the same school. The person so described must have enrolled in the school prior to the expiration of the three year period following discharge or release as described in paragraphs 7 and 8 and must be using educational benefits under either chapter 30 or chapter 33, of title 38 of the United States Code.
10. Anyone using benefits under the Marine Gunnery Sergeant John David Fry Scholarship (38 U.S.C. §§3311(b)(9)) who lives in the State of Arkansas while attending a school located in the State of Arkansas (regardless of his/her formal state of residence).
11. Anyone using transferred Post $9 / 11$ G.I. Bill benefits ( 38 U.S.C. § 3319) who lives in Arkansas while attending a school located in Arkansas (regardless of his/her formal state of residence) and the transferor is a member of the uniformed service who is serving on active duty..
12. A member of the armed forces or "covered individual" as identified in Section 702 of the Veterans Access, Choice and Accountability Act of 2014.

This system-wide policy and procedure has been amended as necessary for compliance with the requirements of 38 U.S.C. 3679 , as amended, and Ark. Code Ann. § 6-60-205.
${ }^{1}$ For the purpose of this policy, dependents are unmarried children who are legal dependents of the military person as defined by the IRS.

## Resident Status of Students from Texarkana, Texas, and Bowie County, Texas <br> (Board Policy 520.10)

In accordance with the reciprocity agreement described in H.C.R. 32, signed by the governor of Arkansas on February 12, 1965, Board Policy 520.10 states, "Residents of Texarkana, Texas, and Bowie County, Texas, will be classified as in-state students for university fee purposes at the University of Arkansas."

## Room and Board

Campus Housing
(Rates are subject to change)
Single freshmen under 21 years of age are required to live in University of Arkansas residence halls or with their parents, unless permission to live
off-campus has been obtained through University Housing. Permission to reside off-campus is granted on a semester basis and must be obtained prior to enrolling or prior to the semester in which off-campus residency is desired.

Specific questions concerning on-campus housing may be directed to University Housing at 479-575-3951, by email at housing@uark.edu or by visiting the University Housing website (http://housing.uark.edu/).

Summer rates for a room in a university residence hall during summer sessions are available through the Housing office. Charges start on the requested move-in day and run through the date of check-out.

## Dining

Specific questions concerning on-campus meal plans may be directed to University Housing 479-575-3951 or visit the Dining on Campus website (http://www.dineoncampus.com/razorbacks/).

## Fraternities and Sororities

Specific questions concerning sorority and fraternity living may be directed to the Office of Greek Affairs 479-575-5001.

## Off-Campus Housing

Students eligible to live off-campus may contact local real estate offices for rental information or check the Off-Campus Housing website (http:// offcampushousing.uark.edu/).

## Senior Citizens

## Waiver of Tuition and Fees for Senior Citizens

Arkansas residents who are 60 years of age or older and show proper proof of age may choose to have tuition and fees waived for on-campus courses under the senior citizen waiver of fees. Admission and enrollment under these conditions is open only on a "space available" basis in existing classes, and students choosing to use this waiver may not register until just prior to the beginning of the term.

## Tuition Fees

Students classified as "in-state" for fee payment purposes are assessed tuition. Students classified as "out-of-state" for fee payment purposes are assessed additional non-resident tuition.

Official policies of the University of Arkansas Board of Trustees provide the basis for classifying students as either "in-state" or "out-of-state" for purposes of paying student fees. Board policies relating to residency status for fee payment purposes are included at the end of this chapter of the catalog. Out-of-state students who question their residency classification are encouraged to contact the Registrar's Office, 146 Silas H. Hunt Hall, for more information about residency classification review procedures.

The Arkansan Non-Resident Tuition Scholarship Award Fee will be assessed for undergraduate non-residents (including transfer students) and international students who are receiving the Non-Resident Tuition Award. The fee will be $10,20,30$ or 50 percent of the difference between the in-state and out-of-state tuition per semester as long as students are receiving the award. To view eligibility requirements, please view the Academic Scholarship Office website (http://scholarships.uark.edu/nrta/).

## Academic Year

Undergraduate students are assessed tuition of $\$ 255.51$ per credit hour. Students with out-of-state residency status are assessed tuition of $\$ 899.68$ per credit hour.

Undergraduate students enrolled in developmental instruction courses are charged tuition of $\$ 134.55$ per credit hour in-state and $\$ 672.54$ per credit hour for out-of-state students.

Undergraduate students enrolled in the Walton College of Business courses are charged tuition of $\$ 339.83$ per credit hour in-state and \$1,258.00 per credit hour for out-of-state students.

Undergraduate students enrolled in the Fay Jones School of Architecture and Design are charged tuition of $\$ 304.07$ per credit hour in-state and $\$ 1,058.74$ per credit hour for out-of-state students.

Undergraduate nursing students are assessed tuition of \$329.22 per credit hour. Students with out-of-state residency status are assessed tuition of $\$ 1,141.85$ per credit hour.

Undergraduate students enrolled in College of Engineering courses are charged tuition of $\$ 309.17$ per credit hour in-state and $\$ 1,076.52$ per credit hour for out-of-state students.

Undergraduate students enrolled in Global Campus self-paced online correspondence courses are charged tuition of $\$ 135.00$ per credit hour.

## Academic Regulations Academic Integrity

As a core part of its mission, the University of Arkansas provides students with the opportunity to further their educational goals through programs of study and research in an environment that promotes freedom of inquiry and academic responsibility. Accomplishing this mission is only possible when intellectual honesty and individual integrity prevail. Each University of Arkansas student is required to be familiar with and abide by the university's Academic Integrity Policy (http://honesty.uark.edu/policy/) at honesty.uark.edu (http://honesty.uark.edu/). Students with questions about how these policies apply to a particular course or assignment should immediately contact their instructor.

## Attendance Policy for Students

Attendance and Engagement: Education at the university level requires students' active involvement in the learning process. Therefore, students have the responsibility to attend classes and to actively engage in all learning assignments or opportunities provided in their classes. Students should treat class attendance as mandatory. Instructors have the responsibility to provide a written policy on student attendance that is tied to course objectives and included in a course syllabus.

Excusable Absences: There may be times, however, when illness, family crises, or university sponsored activities require a student to be absent from class. In these situations, the student is responsible for making timely arrangements with the instructor to make up work missed. The make-up work should be completed in a timeframe that has been arranged with the instructor. Such arrangements should be made in writing and prior to the absence, when possible.

Examples of absences that should be considered excusable include those resulting from: 1) student illness, 2) serious illness or death of a member of the student's immediate family or other family crisis, 3) University sponsored activities for which the student's attendance is required
by virtue of scholarship or leadership/participation responsibilities, 4) religious observances (see Religious Observances policy tab), 5) jury duty or subpoena for a court appearance, and 6) military duty. The instructor has the right to require that the student provide appropriate documentation for any absence for which the student wishes to be excused.

## Religious Observances

When students seek to be excused from class for religious reasons, they are expected to provide their instructors with a schedule of religious holidays that they intend to observe, in writing, before the completion of the first week of classes. The Semester Calendar (http:// registrar.uark.edu/academic-dates/academic-semester-calendar/) on the Office of the Registrar's website will inform students of the university calendar of events, including class meeting and final examination dates, so that before they enroll they can take into account their calendar of religious observances. Scheduling should be done with recognition of religious observances where possible. However, faculty members are expected to allow students to make up work scheduled for dates during which they observe the holidays of their religion.

## Final Examination Policy

Each faculty member is required to give final examinations at times specified in the final examination schedule. (Comprehensive examinations are not the only ones which qualify as "final exams." Generally, exams should not be given during the last class period.) Whenever circumstances make necessary a deviation from the announced schedule, clearance for such deviation must be obtained from the appropriate dean and the Provost and Vice Chancellor for Academic Affairs.

During finals week, students are required to sit for no more than two final exams in a single calendar day period. Students with three or more finals in a single calendar day period have the right to an alternative exam date(s) for each exam exceeding two. They must submit a formal request for an alternative date in writing, along with an official copy of their class schedule for verification purposes, to the professors of those classes involved to see if one will voluntarily move the exam. If voluntary accommodation is not achieved, instructors of classes with lower enrollments for the final exam will have to accommodate individual students affected before classes with higher enrollments. This process is the same when there is a final exam scheduling conflict (two or more final exams scheduled on the same date and at the same time).

Requests must be submitted on or before the last day to drop a full semester class or classes with a mark of "W." Professors will provide the student with an alternative exam date and time no later than one week after the last day to drop a full semester class or classes with a mark of "W." All rescheduled final exams are to take place during the university designated final exam dates and times. If a student has an objection to the alternative exam date/time, she or he may appeal to the instructor's department chair.

It is the policy of the university to minimize student participation in extracurricular activities during the final examination period. No meetings, social activities, athletic events, or other extracurricular activities that require student participation will be scheduled on Reading Day or during the final examination period. Any exceptions to this policy must receive prior approval from the Provost and Vice Chancellor for Academic Affairs.

Academic Policy 1500.20 (https://provost.uark.edu/policies/150020.php)

## Grades And Marks

Final grades for courses are "A," "B," "C," "D," and "F" (except for courses taken in the Fay Jones School of Architecture).

| Grade/Mark | Given For | Grade Points |
| :--- | :--- | :--- |
| A | Outstanding <br> achievement | 4 |
| B | Good achievement | 3 |
| C | Average achievement | 2 |
| D | Poor but passing work | 1 |
| F | Failure, unsatisfactory <br> work | 0 |
| XF | Failure, academic <br> dishonesty | 0 |
| I | Incomplete course <br> requirements | N/A |
| AU | Audit, officially <br> registered | N/A |
| CR | Credit without grade <br> points | N/A |
| R | Registered, no credit | N/A |
| S | Satisfactory work in <br> courses w/o credit | N/A |
| W | Withdrawal | N/A |
| P | Passing with C- or <br> better | N/A |
| PD | Passing with a D | N/A |
| NC | No Credit | N/A |

No credit is earned for courses in which a grade of " $F$ " is recorded. A final grade of " $F$ " shall be assigned to a student who is failing on the basis of work completed and who has not completed all requirements. The instructor may change an "F" so assigned to a passing grade if warranted by satisfactory completion of all requirements. Students who fail to present an acceptable reason for not having completed all course requirements including the final examination will receive the grade they would have received had they failed such requirements. In the case of an "XF" grade given for reasons of academic dishonesty, upon graduation or completion of the period of suspension, the student may request that the " $X$ " be removed from the transcript by submitting a written request to the Provost/Vice Chancellor for Academic Affairs.

A mark of "l" may be assigned when a legitimate circumstance has prevented the student from completing all course requirements and the work completed at the time of assigning the "l" is of passing quality. It is the discretion of the instructor that determines what qualifies as a legitimate circumstance. It is recommended that the instructor, prior to the assignment of an "l" mark, document the legitimate circumstance and conditions for completing course requirements. An "l" so assigned may be changed to a grade provided all course requirements have been completed within 12 months after the end of the term in which the "l" was assigned. If the instructor does not report the grade within the 12-month period, the "l" shall be changed to an " $F$." When a mark of "l" is changed to a final grade, the grade points and academic standing are appropriately adjusted on the student's official academic records.

A mark of "AU" (Audit) is given to a student who officially registers in a course for audit purposes (see Registration for Audit (p.50)).

A mark of "CR" (Credit) is given for a course (for example, practice teaching, certain seminars, certain honors colloquia, and courses where credit is earned by examination) for which the university allows credit toward a degree, but for which no grade points are earned.

A mark of " R " (Registered) is given to a student who is registered in a course for no credit or grade points. This is typically used at the undergraduate level for Study Abroad or other situations where a placeholder mark is needed.

A mark of "S" (Satisfactory) is assigned in courses such as special problems and research when a final grade is inappropriate. The mark " S " is not assigned to courses or work for which credit is given (and thus no grade points are earned for such work). If credit is awarded upon the completion of such work, a grade or mark may be assigned at that time, and, if a grade is assigned, grade points will be earned

A mark of "W" (Withdrawal) will be given for courses from which students withdraw after the first 10 days of the semester and before the drop deadline of the semester.

A mark of " $P$ " (Passing) is given to a student who officially registers in a course for Pass/Fail credit according to university policy (see Pass Fail policy (http://catalog.uark.edu/undergraduatecatalog/ orientationandregistration/passfail/)). A "P" grade counts as credit hours but does not affect the grade-point average.

A mark of "PD" (Passing with a D) is given to a student only when allowed as an option by university policy during extenuating circumstances, such as the COVID-19 crisis in spring and summer 2020. A "PD" grade counts as credit hours but does not affect the grade-point average.

A mark of "NC" (No Credit) is given to a student in situations where registration in the course allows for this grade and only when allowed as an option by university policy during extenuating circumstances, such as the COVID-19 crisis in spring and summer 2020. An "NC" grade does not count as credit hours nor does it affect the grade-point average.
"I," "AU," "CR," "R," "S," and "W" marks will not be counted in the gradepoint average. Grades of plus and minus are assigned grade-point values in the Fay Jones School of Architecture and Design (p. 238). The gradepoint average is computed by dividing the total number of grade points by the total number of credit hours attempted in courses for which grades (rather than marks) are given. Students who utilized grade renewal or grade forgiveness in retaking courses (prior to fall Semester 1986 and after fall 1996) have only the last grade used in computing grade-point averages.

## Undergraduate Grade Exclusion Policy

Under the Grade Exclusion Policy, undergraduate students may improve their University of Arkansas (UA) undergraduate cumulative gradepoint average (GPA) by requesting that the university exclude up to 9 credit hours in courses taken at the UA in which a grade of "D" or "F" was received. The excluded courses will no longer be used to compute the UA GPA. Students must file a petition with the Office of the Registrar to use grade exclusion indicating which course(s) they choose to grade exclude. The petition must be completed and approved prior to graduation. Undergraduate students who return to the UA for an additional degree(s) may use grade exclusion only for courses taken after their most recent undergraduate UA degree was awarded. Other stipulations are:

1. Undergraduate students may select up to 9 hours of any combination of UA courses with posted grades of "D" or "F" to be excluded from their cumulative grade point average calculation.
2. Excluded courses cannot be used to satisfy degree requirements. Credit hours earned for a "D" grade in an excluded course will no longer count towards the student's degree.
3. Grade exclusions must be posted before the undergraduate degree has been conferred.
4. The course and grade that is being excluded will remain on the student's transcript with a notation indicating that the UA Grade Exclusion Policy has been applied.
5. Grade exclusion cannot be removed or applied to another course once it has been posted.
6. Grade exclusion for courses in which academic misconduct has been committed is allowable only in accordance with the university's academic integrity policy.
7. Grade exclusion may result in a recalculation of a student's academic standing, but it does not retroactively result in a refund of tuition or fees, nor does it change a student's semester academic honors for previous semesters.
8. Excluded courses and hours will continue to be counted in calculations of satisfactory progress for financial aid eligibility.
9. Students considering grade exclusion should be aware that many graduate schools, professional schools, employers or other institutions, in considering admission or employment, recalculate the GPA and include all courses attempted. This means that if the cumulative GPA has been raised because of grade exclusion, then the recalculated GPA will be lower
10. The Grade Exclusion Policy begins with the Fall 2020 semester, but may apply to courses taken before this term as long as the student has not earned an undergraduate degree from the UA or as long as the courses subject to exclusion were taken after the last UA undergraduate degree was awarded.
11. Grade forgiveness hours will be combined with grade exclusion hours when considering the credit hour limit under this policy. Therefore, any hours previously approved for grade forgiveness prior to fall 2020 will count toward the maximum 9 -hour credit limit for grade exclusion.
Thus, a student who has used 3 hours of grade forgiveness may use up to 6 hours of grade exclusion.
Grade Exclusion Form for Current Students (https://forms.uark.edu/ xfp/form/446/)

Grade Exclusion Form for Former Students (https://forms.uark.edu/ xfp/form/426/)

## Academic Bankruptcy

Students returning to the University of Arkansas after an absence of five or more years may be eligible to declare academic bankruptcy if they meet the following criteria:

1. Must have been enrolled previously at the University of Arkansas, Fayetteville, as an undergraduate student and be returning as an undergraduate student.
2. Must not have been enrolled at the university during the previous five years.
3. Students who have attended another institution since their last attendance at the university must meet requirements for transfer students (2.00 GPA on all coursework attempted more than five years
after last enrollment at the University of Arkansas, Fayetteville) to be eligible for readmission.
4. Must submit an application for readmission and official transcripts of all college work attempted since last attendance at the University of Arkansas by the application deadlines and submit a Declaration of Academic Bankruptcy form (http://registrar.uark.edu/1621.php) to the Office of the Registrar. The following are the conditions of academic bankruptcy:
a. Students will forfeit all credit hours previously awarded by the University of Arkansas, Fayetteville. This includes course work completed at the university (regardless of grades earned), courses accepted in transfer, credit by examination, and any selfpaced (correspondence) course work awarded.
b. A new calculation of GPA and credit hours will begin when the student returns to the University of Arkansas.
c. The transcript will reflect the student's complete record (including all previous college work) with an added notation of "Academic Bankruptcy Declared."
d. Courses taken at another institution within five years of the last University of Arkansas enrollment will not be accepted for transfer. Coursework completed more than five years after last attending the University of Arkansas may be accepted in transfer, subject to university transfer credit policies. For purposes of this policy, University of Arkansas self-paced (correspondence) coursework will be treated in the same manner as transfer work.
e. For the university to provide appropriate advising and (as required by Arkansas Act 1052) appropriate assessment, a student may be required to submit ACT, SAT, or ACT COMPASS test scores prior to registration for classes if, as a result of academic bankruptcy, that student is returning to the university as a freshman with fewer than 24 transfer hours.

## Academic Probation, Suspension and Dismissal

A student's academic status at the university is determined at the end of each regular term of enrollment (fall, spring, or summer) on the basis of the student's cumulative and/or term grade-point average (GPA) and number of hours attempted. The student's academic status governs his or her re-enrollment status and determines any conditions associated with re-enrollment or denial of enrollment for a subsequent term. Normally, students are notified of their status individually by the university shortly after the end of each term. However, this policy statement is the formal notification to all students of the conditions that determine academic status and the consequences for each term, regardless of individual notification.

Good Status: Upon initial admission and during a student's first term of enrollment, except for students conditionally admitted on academic probation, the student is in good status. A student remains in, or returns to, good academic status at the end of any regular term (spring, summer, fall) when the cumulative GPA is at or above the required minimum of 2.0 .

Academic Probation: When a student's cumulative grade-point average at the end of any fall, spring, or summer term is less than a 2.00 with more than three cumulative hours attempted, the student will be placed on academic probation.

First-Year Freshmen: First-year freshmen who have less than a 2.00 cumulative grade-point average at the end of their first semester of enrollment are considered at risk. During the first six weeks of their
second semester, these at risk students must, at a minimum, consult with an academic adviser to develop a plan to get off of probation before being eligible to register for their third semester courses.

Removal from Academic Probation: When a student's cumulative GPA at the end of any fall, spring, or summer term is a 2.00 or above, he or she will be removed from academic probation.

Continuing on Academic Probation: The semester grade point average a student on academic probation must earn to continue on academic probation and avoid academic suspension depends on the cumulative grade hours attempted as outlined in the academic probation chart below.

## Academic Probation Chart

| Cumulative | Placed on | Continued on | Removed From |
| :--- | :--- | :--- | :--- |
| Hours | Probation If | Probation If <br> Attempted <br> (excludes <br> grades of W) | Cumulative GPA Semester GPA <br> Is: | | Probation If |
| :--- |
| Cumulative GPA |

Academic Suspension: A student on academic probation who does not earn the minimum required term GPA will be academically suspended. No student may be academically suspended who has not spent the prior term of enrollment on academic probation. A student on academic suspension will be on academic leave from the university for one major semester (spring or fall) and all contiguous summer and intersessions from the close of the term which resulted in the academic suspension. Thus, a student academically suspended at the end of the spring semester would not be eligible to enroll until the next spring semester; a student academically suspended at the end of the summer semester would not be eligible to enroll until the following spring term; and a student academically suspended at the end of a fall semester would not be eligible to enroll until the next fall semester. The first enrollment when returning from academic suspension may not be in an intersession.

Students who sit out for one major semester after the term of the academic suspension may apply for readmission to the university. A student who does not earn credit from another institution may be readmitted on academic probation following academic suspension. A student who earns credit from another institution(s) during or subsequent to the academic suspension must apply to the university for admission as a transfer student and, if readmitted, will be on academic probation following academic suspension. A student readmitted on academic probation after academic suspension must make a semester gradepoint average of at least 2.00 for each semester, (fall, spring, or summer) until he or she is removed from probation. Failure to do so will result in academic dismissal.

Academic Dismissal: A student who returns to the university after an academic suspension is continued on academic probation following suspension and must make a semester grade-point average of at least 2.00 for each fall, spring, or summer term until he or she is removed from academic probation. Failure to do so will result in academic dismissal.

Returning after Academic Dismissal: Students who sit out for at least one full academic year and submit at least 12 hours of general education core classes or upper-level classes with at least a 3.0 gradepoint average in this coursework will be eligible for automatic readmission
from their first academic dismissal. This can be done by taking self-paced courses through the Global Campus (http://globalcampus.uark.edu/) ${ }^{1}$ at the University of Arkansas or by courses taken at another regionally accredited institution of higher education. Students meeting these requirements must complete a petition to the Academic Standards Committee (http://registrar.uark.edu/student-records/academic-standards-committee-petition.php) and submit official transcripts for all work attempted since being academically dismissed. The petition is to be submitted to the Office of the Registrar (http://registrar.uark.edu/) before applying (http://admissions.uark.edu/) for readmission.

Students who do not meet these conditions, and students who have been academically dismissed more than once, must petition to the Academic Standards Committee (http://registrar.uark.edu/student-records/academic-standards-committee-petition.php) to be considered for readmission. It is strongly recommended that students meet with an academic adviser to develop a plan for returning from academic dismissal. Students approved for readmission from academic dismissal must reapply (http:// admission.uark.edu/) for admission.

A student who reenters the university by favorable action of the Academic Standards Committee after an academic dismissal is continued on academic probation after academic dismissal and must make a semester grade-point average of at least 2.00 for each semester until the cumulative GPA reaches 2.00 and he or she is removed from academic probation. Failure to do so will result in academic dismissal.

Individual colleges or programs have the discretion to set academic admission and continuation standards for specific programs that are higher then university standards.
${ }^{1}$ Students who are not in good academic standing at the University of Arkansas may be enrolled in no more than six hours of self-paced Global Campus courses at any one time.

## Waiver of Academic Policies

The Academic Standards Committee (http://registrar.uark.edu/student-records/academic-standards-committee-petition.php), composed of faculty and students, serves as a referral body for matters of academic probation, suspension, dismissal, and other rules and regulations related to academic progress and graduation. Petitions for waiver of academic rules and information on the petitioning process may be obtained on the Office of the Registrar's website (http://registrar.uark.edu/418.php). Students should note petitioning deadlines.

## Advanced-Standing Programs Credit for Prior Learning

There are two ways undergraduate students enrolled at the University of Arkansas, Fayetteville, may establish undergraduate credit for prior learning in courses offered by the university: either through the University of Arkansas Credit for Prior Learning (see the next section), or through approved national testing programs, such as the College Level Examination Program (CLEP), the Advanced Placement Program (AP), or the International Baccalaureate Program (IB).

Credit established by prior learning must be evaluated in terms of the specific program the student wishes to pursue. The decision regarding the appropriate application of such credit to a degree program will be made in each college or school. Credit established by prior learning will be applied to a degree program in the same manner as credit established in
any other way. If credit is earned by examination, the mark of CR will be entered in the student's record. Grades are not assigned.

In certain instances, however, instead of actually receiving credit in semester hours, a student may receive advanced standing and be authorized to enroll for advanced courses in the subject matter area.

Credit by examination may not be used to satisfy minimum residency requirements as established by each college or school. Credit by examination is recorded only for students currently enrolled at the University of Arkansas, Fayetteville.

## U of A Credit for Prior Learning Program

The following conditions apply to the departmental programs for credit by examination:

1. The student must apply for such credit using forms available in the academic dean or department office. Permission to take the examination or submit the required assessment must be obtained from the faculty of the department offering the course. The faculty of each department is responsible for designating the courses in that department that may be challenged by examination or assessment. A list of courses designated as such is available on the University of Arkansas Registrar's website.
2. The appropriate department or college offering the course will design and evaluate the examination or assessment. The Office of Testing Services or an approved remote proctoring service may administer such examination or assessment if approved by the department or college offering the course.
3. The appropriate department or college offering the course may designate non-credit course content approved by that unit and offered through Global Campus as part of the Credit for Prior Learning Program. Units may administer an examination or assessment after a student completes the non-credit course content. The student may apply for credit for such an examination or assessment after (1) having been admitted to the University of Arkansas, Fayetteville, (2) earning a minimum of three credit hours with a minimum 2.0 GPA, and (3) submission of a request for such credit five years from the date which they completed the examination or assessment.
4. A passing grade on the examination or assessment must be " B " or above. A second attempt for credit for prior learning in that course will not be permitted.
5. A fee will be assessed for course credit earned through the Credit for Prior Learning Program.

## National Testing Programs

When credit by a national examination is granted, the student's academic record will list the score used as a basis for credit as well as the type of examination used to establish credit, such as CLEP subject examination or general examination, AP examination or IB examination.

Credit is awarded on the basis of official score reports, which must be sent by the national testing service directly to the Office of the Registrar, 141 Uptown East, University of Arkansas, Fayetteville, AR 72701.
Minimum score requirements as established by the University of Arkansas, Fayetteville, must be met to receive credit.

## College Level Examination Program (CLEP)

The University of Arkansas is a CLEP testing center and is authorized to administer CLEP examinations both on a national basis and on an institutional basis. However, CLEP examinations may be taken at scheduled times at any national test center, and the results sent to the

University of Arkansas. The test center code number and score recipient code number for the University of Arkansas is 6866. For information or to make application, write to the Office of Testing Services, 97 N. Razorback Road, Fayetteville, AR 72701, or telephone 479-575-3948.

Approval has been granted by the appropriate governing body, upon recommendation of the academic department, to award credit in the following courses by the use of CLEP examinations. Minimum scores for the paper-based version and the new computer-based version were established by the departments of the subject areas concerned.

Please note that minimum scores for credit for computer-based CLEP exams may differ from paper-based CLEP examinations.

| CLEP <br> Examination | UA Course | Paper-based text (pre July 2001) | Computerbased test (Effective July 2001) | Maximum Credit Allowed |

## Advanced Placement Program (AP)

The Advanced Placement (AP) Program of the College Entrance Examination Board gives students the opportunity to pursue college-level studies while still in high school and, with an appropriate score on an AP exam, to receive advanced placement and/or credit upon entering the University. The AP examinations are offered annually by high schools that participate in this program. The appropriate UA governing body, upon recommendation of the academic department, has authorized credit and/ or placement for students who present qualifying scores in the AP courses listed below.

Note: While changes surrounding the administration of AP exams occurred during the COVID-19 pandemic, the University of Arkansas has not changed its policies regarding course credit for these exams. All AP exams, whether taken online or onsite, are accepted.

## Symbols for placement and credit:

- $\mathrm{P}=$ placement;
- $\mathrm{Pq}=$ qualified placement (student may be placed in an advanced course, with credit awarded for prerequisite courses upon satisfactory completion, subject to departmental review.);
- $\mathrm{C}=$ credit;
- $\mathrm{Cq}=$ qualified credit (placement and credit subject to departmental review);
- $\mathrm{E}=$ Exempt.

* Students must pass a departmental test to receive credit
** To receive credit for courses preceding the course for which AP credit has been granted, students must enroll in and complete with a grade of "C"or higher, that course which follows in sequence the course for which AP credit was granted.
*** At most, 3 hours credit allowed for AP Statistics.

## International Baccalaureate

The International Baccalaureate (IB) program is a comprehensive and rigorous two-year high school curriculum offered in the United States and in 72 countries around the world. The IB program provides students with a balanced education, facilitates geographic and cultural mobility, and promotes international understanding through a shared academic experience. The IB program gives students the opportunity to pursue college-level studies while in upper secondary school and to receive credit for final examinations upon entering the University.

The IB examinations are offered annually, usually in May, by high schools participating in this program. Students seeking credit for examinations must request that a final, official IB transcript of certificate or diploma results be sent by mail to the Office of the Registrar, 146 Silas H. Hunt Hall, University of Arkansas, Fayetteville AR 72701. These materials may be requested from International Baccalaureate North America, 200 Madison Avenue, Suite 2007, New York, NY 10016, telephone: 212-696-4464.

Approval has been granted by appropriate academic departments to award credit in the following courses. The minimum scores were established by the departments of the subject areas concerned.

Note: While changes surrounding the administration of IB exams occurred during the COVID-19 pandemic, the University of Arkansas has not changed its policies regarding course credit for these exams. All IB exams, whether taken online or onsite, are accepted.

## Eight-Semester Degree Completion Policy

The University of Arkansas is committed to helping all of its students identify and achieve their educational goals. The many University of Arkansas programs of study and activities provide opportunities to students to follow varied career and learning paths and enjoy educational experiences of different kinds. Plans for degree completion are available in the Catalog of Studies and from colleges, schools, and departments. Academic advising services in each college and school assist students in making plans for their own degree completion and in carrying them out consistent with students' abilities, circumstances, and preferences.

The Eight-Semester Degree Completion Program (DCP), makes it possible for qualified degree-seeking freshmen to express their intention - and assume the associated obligations - to complete identified bachelor's degree programs of study in four academic years. The list of majors and degrees designed to be completed in eight semesters and for which the DCP is available is maintained by each college and school. It may be accessed from the DCP website and is published in the Catalog of Studies. Colleges, schools and individual departments can provide this list as well. Before registering for their first semester of study, all freshmen entering the university must accept participation, decline participation, or acknowledge ineligibility for participation in the DCP by signing the Participation Document. New freshmen will be notified regarding how to view the Participation Document online and learn more about registering for a Degree Completion Program. A student's participation or nonparticipation in the DCP will not affect scholarship eligibility.

Students who are admissible to the DCP and who choose to participate have the responsibility for meeting all requirements specified by the university and their degree completion plan and the responsibility for complying with the DCP policy. The university is responsible for providing academic support and for ensuring that students can complete university, program and course requirements within eight consecutive semesters. The university will also provide students with timely notifications to the student's official university e-mail address regarding advising, registration, and other requirement completion information.

A student may choose at any time to discontinue participation in the DCP without penalty. Students are encouraged to discuss such choices with an authorized academic adviser for the program of study. Participation and subsequent withdrawal from the DCP will not jeopardize the student's opportunity to complete the degree program, to do so in a timely manner, or to complete another degree program or major by fulfilling program requirements.

In some circumstances it may be in a student's best interest to decline participation or withdraw from the DCP. Examples include students who are not prepared to choose a major before enrolling for the first semester and students who feel that a full semester class load of 15 or 16 hours will be too heavy given other responsibilities. Other students may plan to study abroad for a semester in an institution where the required courses are not offered or to participate in a semester-long internship program not included in the program plan. A decision or need to work or participate in certain time-intensive curricular and extra-curricular activities such as band and intercollegiate athletics may make it impossible to schedule all requirements in some programs. A student may be required to withdraw
from the DCP as a result of illness or other personal circumstances that make it impossible to do his or her best work, continue as a full-time student, or complete requirements in the time available. There are also a number of acts and events that may or will cause the DCP agreement to be voided; these are identified below in the section "Student acts and other events that will or may void the degree completion plan agreement."

## Requirements for Admission to the EightSemester Degree Completion Program (DCP):

1. Participants must begin their program of study in the fall semester as first-time, full-time freshmen and must be committed to be full-time students able to enroll in and successfully complete at least 31-36 hours each academic year.
2. Participants must have chosen a major included in the DCP, must meet all admission requirements for the chosen program of study including applicable program grade point average and other grade requirements, and must have been admitted to programs requiring formal program admission.
3. Participants must be qualified to begin enrollment in the fall semester without being required to take remedial courses in math, English, or reading or other course prerequisites to entry-level courses in the chosen program of study

## Requirements for Continuance and Completion of the Eight-Semester Degree Completion Program:

1. Students must follow exactly the degree completion plan for the chosen major and must meet all the specified requirements in their degree plan each semester unless an alternative is approved by an authorized academic adviser for their program or unless they have already met the requirement.
2. Students must be continuously enrolled in and successfully complete at least 31-36 semester credit hours of appropriate course work each academic year as outlined in their degree completion plan.
3. Students must make satisfactory academic progress as defined by the university and degree program and must maintain the grade point average required by the university and the program of study.
4. Students must monitor their own progress in meeting the requirements identified in their degree completion plan, consistent with the program plan.
5. Students must register for classes at the first/earliest assigned time during their designated registration period each semester for the following term. For courses required for graduation, students must accept any available course or class section that does not conflict with other required courses. Students should understand that special scheduling accommodations cannot be guaranteed for work or other activities including athletics and band.
Students must seek assistance from an authorized academic adviser for their chosen program of study if they are unable to identify or register for any course(s) required for that semester in their degree program. For situations in which an authorized academic adviser for the program cannot identify a required course for the student to take, the adviser must notify the department chair and dean for the student's program of study that it has not been possible for the student to complete registration for a required course for the next semester of enrollment. Notification must be made in writing immediately following the unsuccessful attempt to register. Consistent with the terms of the degree completion program, the chairperson or dean will identify an alternate course, in writing, to fulfill graduation
requirements or will provide an override to allow the student to enroll in the required course(s).
Students must complete registration no later than the last official day of class for the fall or spring term preceding the next term of enrollment, unless the identification of an appropriate course to complete the student's registration is still in progress.
6. Students must have prior written approval by an authorized academic adviser before enrolling in any course at another institution (such as concurrent enrollment, enrollment during a summer term, or study abroad) if the student wishes to transfer the course and have the course included in the coursework submitted for the degree completion plan.
7. Students must confer with an authorized academic adviser for their program before withdrawing from a required course as such a withdrawal will void the DCP agreement.
8. Students must at all times maintain an accurate local address, and telephone number in official university records. Students may make changes to such information in the Student Information System Self Service component as needed and should make them immediately following any change. Students may also make changes by written notice to the Registrar.
9. Students must respond in a timely way to any official notice or message from an authorized academic adviser and to any official notice regarding registration, degree progress, financial obligations or aid, or any other university requirement.
10. Students must make timely application for all necessary financial assistance, consistent with deadlines.
11. Students must meet all university degree requirements (including formal application for graduation consistent with deadlines and requirements as established by the Registrar for the semester in which the student is scheduled for graduation).

## Student Acts and Other Events That Will or May Void the Degree Completion Plan Agreement:

1. Withdrawing from ("dropping") a required course
2. Receiving a failing grade in a required course or receiving a grade below that required by the program
3. Changing one's major or degree program
4. Withdrawing from the University of Arkansas
5. Failure to meet any degree requirement(s) as specified and in the time specified
6. Unauthorized non-payment or delayed payment of any tuition or fees
7. Incurring a disciplinary action affecting the student's enrollment
8. Failing to comply with any other requirement of the Eight-Semester Degree Completion Policy.

## Appeal Process

A student may appeal the voiding of the DCP to the dean of the college or school in which the student is enrolled. The appeal process requires that the student submit a statement of the basis for the appeal to the dean in writing within 30 days following notification of the voiding of the program, with a copy to an authorized academic adviser for the program. The dean will notify the student and the adviser of the outcome of the appeal within 60 days after receiving the statement.

The university provides semester-by-semester plans to help students complete their degrees in a timely manner. Immediately following are links to plans that qualify for the university's Eight-Semester Degree

Completion Policy. Below them are plans that do not qualify for the eight-semester policy but which also provide a road map to finishing most degrees in four years. Following those are plans for professional programs that usually take five years.

## Four-Year Plans

The following plans do not qualify for the Eight-Semester Degree Completion Policy, usually because they require a summer internship or field course, and, therefore, take nine semesters, or they have specific mid-program admission requirements that exempt the program. However the plans below do offer students a road map to complete their degree in four years.

- Agricultural Education Communication and Technology B.S.A. with Agricultural Education Concentration (http://catalog.uark.edu/ plangrids/aec-bsa-agri-education-concentration/)
- Agricultural Education Communication and Technology B.S.A. with Agricultural Communication Concentration (http://catalog.uark.edu/ plangrids/aec-bsa-agri-communications-concentration/)
- Agricultural Education Communication and Technology B.S.A. with Agricultural Leadership Concentration (http://catalog.uark.edu/ plangrids/aec-bsa-agri-leadership-concentration/)
- Agricultural Education Communication and Technology B.S.A. with Agricultural Systems Technology Management Concentration (http://catalog.uark.edu/plangrids/aec-bsa-agri-systems-technologyconcentration/)
- Apparel Merchandise and Product Development B.S.H.E.S. (http://catalog.uark.edu/plangrids/ apparelmerchandisingproductdevelopment/)
- Food Science B.S.A. with Food Technology Concentration (p. 182)
- Food Science B.S.A. with Food and Culinary Sciences Concentration (p. 184)
- Food Science B.S.A. with Food Science Concentration (p. 180)
- Geology B.S. (p. 425)
- Geology B.S. with Geophysics Concentration (p. 426)
- Horticulture, Landscape and Turf Sciences B.S.A. (p. 190)
- Interior Architecture and Design B.I.D. (p. )
- Interdisciplinary Studies B.A. (http://catalog.uark.edu/plangrids/ interdisciplinary_studies_ba/)
- Recreation and Sport Management B.S. (p. )

## Five-Year Plans

The following plans do not qualify for the Eight-Semester Degree Completion Policy, in part because they are intended to be five-year professional programs. However, these plans offer students a road map to complete their degree in five years.

- Architecture B.Arch. (p. )
- Landscape Architecture B.L.A. (p. )

## University Course Requirements

The University of Arkansas requires every undergraduate degree program to include common coursework across the university's undergraduate majors. This coursework satisfies the Arkansas state minimum core (p. 81) for a college degree and the university's general education learning outcomes (p. 72).

Many of the courses that satisfy the state minimum core also fulfill many of the university's general education learning outcomes, although some majors specify courses beyond the state minimum to meet their specific general education learning outcomes.

## General Education

The University of Arkansas' general education program provides a rigorous liberal education developed and fostered across a student's entire educational experience. The program's curriculum prepares students for the challenges and opportunities of the 21st century by strengthening critical and ethical thinking skills, improving communication, and enhancing understanding of human and cultural diversity.

Furthermore, the general education program is designed to help students complement their major program of study with an understanding of artistic, humanistic, and scientific contexts for use throughout their lifetime as engaged global citizens.

Eleven learning outcomes reflect the six learning goals of the general education program. For each learning outcome, a series of learning indicators detail specific knowledge, skills, and attitudes to be developed in students.

## Goals

Each undergraduate major leading to a degree requires coursework that together meet the state minimum requirements (p. 81) and the university's general education learning outcomes.

The general education program is divided into six thematic goals for students:

GOAL 1: Strengthen written, oral, and multimodal communication abilities.

The two learning outcomes associated with this goal are for students to be able to write clear, correct, and effective prose as well as to be able to communicate with a variety of audiences in writing and speaking.

GOAL 2: Build core skills of quantitative literacy.
The learning outcome under this goal is for students to have the ability and habit of mind to seek quantitative information and be able to apply it, using critical reasoning and analysis to solve algebraic problems and interpret results.

GOAL 3: Develop a working knowledge of how scholars and artists think and act in fundamental areas of study.

The four learning outcomes under this goal are for students to articulate and apply the following:

- Concepts from the fine arts or performing arts
- Aesthetic, humane, and ethical sensibilities of the humanities
- Principles of human interactions of individuals, groups, and institutions
- Through experiment and observation, the basic principles that govern natural phenomena

GOAL 4: Expand diversity awareness, intercultural competency, and global learning.

The two learning outcomes for this goal are for students to learn to interact appropriately within intercultural contexts and develop familiarity with concepts of diversity in the United States.

GOAL 5: Demonstrate critical thinking and ethical reasoning.
The learning outcome for this goal is for students to demonstrate essential principles of critical thinking and ethical reasoning and apply them to the evaluation and construction of rational and moral arguments.

GOAL 6: Gain the ability to synthesize, integrate, and apply knowledge developed throughout the undergraduate years.

The learning outcome for this goal is for students to be able to reflect upon and explain how they use the skills and abilities embodied in Goals 1 through 5 in completing an integrative project during their junior or senior year.

## Goal 1

Strengthen written, oral, and multimodal communication abilities.
The two learning outcomes associated with this goal are for students to be able to write clear, correct, and effective prose as well as to be able to communicate with a variety of audiences in writing and speaking.

## Learning Outcome 1.1

Upon reaching this goal, students will be able to write clear, correct, and effective prose, crafted to achieve a range of purposes and address a variety of audiences, incorporating and citing sources gathered from primary (observational) or secondary (bibliographic) research.

Learning Indicators for Learning Outcome 1.1: To successfully achieve this outcome, students will complete these five indicators:

- Focus primarily on how to generate written texts, receiving explicit instruction in how to analyze audiences and rhetorical situations, how to follow the examples of model texts, and how to revise.
- Complete at least four substantial writing assignments and produce at least 5000 words of prose.
- Incorporate specific feedback into their writing, in order to help them revise and edit for clarity, force, and correctness.
- Critically analyze the effectiveness of written prose.
- Incorporate and cite sources gathered from primary (observational) or secondary (bibliographic) research in their writing.

Courses: The following courses meet the general education requirements for Learning Outcome 1.1:

| Course | Additional Outcomes | State Minimum Core |
| :--- | :--- | :--- |
| ENGL 1013 or | No | English |
| ENGL 1013H |  |  |
| ENGL 1023 or | No | English |
| ENGL 1023H |  |  |

## Learning Outcome 1.2

Upon reaching this goal, students will be able to communicate with a variety of audiences not only in writing but also by speaking and using a range of electronic and digital modes.

Learning Indicators for Learning Outcome 1.2: To successfully achieve this outcome, students will complete these five indicators:

- Engage primarily in learning how to generate written, spoken, or multimedia presentations, receiving explicit instruction in how to analyze audiences and rhetorical situations, how to follow the example of model presentations, and how to revise.
- Complete at least 12 pages of prose collected in at least three assignments or at least three oral or multi-media presentations that last a total of at least 20 minutes or some combination of written, oral, or multi-media presentations that constitute a commensurate amount of student work.
- Integrate effective content to be presented in a written, oral, or multimedia presentation that is appropriate to a specific context, audience, and purpose.
- Incorporate specific feedback into written, oral, or multi-media presentations, revising and editing them for clarity, force, and correctness.
- Incorporate and cite sources gathered from primary (observational) or secondary (bibliographic) research in written, oral, or multi-media presentations.

Courses: Any of the following courses will meet the general education requirements for Learning Outcome 1.2. Some majors may specify which course or courses to take:

| - Incorporate and cite sources gathered from primary (observational) or secondary (bibliographic) research in written, oral, or multi-media presentations. |  |  | ARHS 4993 or ARHS 4993H | No | No |
| :---: | :---: | :---: | :---: | :---: | :---: |

## Goal 2

Build core skills of quantitative literacy.
The learning outcome under this goal is for students to have the ability and habit of mind to seek quantitative information and be able to apply it, using critical reasoning and analysis to solve algebraic problems and interpret results.

## Learning Outcome 2.1

Upon reaching this goal, students will have the ability and habit of mind to search out quantitative information, critique it, reflect upon it, and apply it in their public, personal, and professional lives; formulate decisions and problem solving based on critical reasoning and analysis; synthesize quantitative information from a variety of sources to solve problems and interpret results; perform and solve basic function operations, and solve algebraic problems using appropriate vocabulary.

Learning indicators for Learning Outcome 2.1: To successfully achieve this outcome, students will complete these five indicators:

- Employ college-level algebraic concepts and tools
- Apply these tools to other subject areas and real-life problems
- Formulate and solve quantitative problems in mathematical terms, using appropriate tools and methods
- Use mathematical computation involving integers, rational numbers, algebraic expressions, decimals, ratios, percentages, roots, and powers
- Express quantitative and logical ideas with precision, using the language and notation of mathematics

Students who receive a score of at least 60 on the University of Arkansas Math Placement Test, or a score of at least 26 on the math component of the ACT exam, or a score of at least 600 on the math component of the old SAT or 620 on the math component of the new SAT have demonstrated successful completion of the learning indicators identified for learning outcome 2.1.

Courses: Any of the following courses will meet the general education requirements for Learning Outcome 2.1. Some majors may specify which course to take:

| Course | Additional Outcomes | State Minimum Core |
| :--- | :--- | :--- |
| MATH 1203 | No | Mathematics |
| MATH 1313 | No | Mathematics |

## Goal 3

Develop a working knowledge of how scholars and artists think and act in fundamental areas of study.

The four learning outcomes under this goal are for students to articulate and apply the following:

- Concepts from the fine arts or performing arts
- Aesthetic, humane, and ethical sensibilities of the humanities
- Principles of human interactions of individuals, groups, and institutions
- Through experiment and observation, the basic principles that govern natural phenomena

## Learning Outcome 3.1

Upon reaching this goal, students will be able to articulate and apply concepts from one of the fine or performing arts.

Learning Indicators for Learning Outcome 3.1: To successfully achieve this outcome, students will complete at least three of these five indicators:

- Synthesize the development over time of the fundamental concepts, principles, theories, and methods, creative practices and techniques of the visual and/or performing arts.
- Develop an understanding of how historical, social, cultural, and personal forces shape artistic communication and how the arts in turn share the diverse cultures of past and present societies.
- Respond critically to a variety of works in the arts, connecting the individual work in the creative discipline being introduced to other aspects of human thought and endeavor.
- Through written, oral, and/or graphic techniques of communication, analyze and interprets works of fine and performing arts using appropriate critical language, and identifying the visual, sensory, environmental, and psychological characteristics that they observe.
- Understand and use materials and resources available for participation in the arts in various roles.

Courses: The following courses are available to satisfy Learning Outcome 3.1. Some majors may specify which course to take:

| Course | Additional Outcomes | State Minimum Core |
| :---: | :---: | :---: |
| ARCH 1003 | 4.1 | Fine Arts |
| ARHS 1003 or ARHS 1003H | No | Fine Arts |
| ARHS 2913 | No | No |
| ARHS 2923 | No | No |
| COMM 1003 or COMM 1003H | 4.2 | Fine Arts |
| DANC 1003 | 3.2 | Fine Arts or Humanities |
| ENGL 2023 | 3.2 | Fine Arts or Humanities |
| LARC 1003 | 4.1, 4.2 and 5.1 | Fine Arts |
| MLIT 1003 or MLIT 1003H | No | Fine Arts |
| MLIT 1013 or MLIT 1013H | 1.2 | Fine Arts |
| MLIT 1333 | 4.2 | Fine Arts |
| PHIL 4403 | No | No |
| THTR 1003 | 3.2 | Fine Arts or Humanities |
| THTR 1013 or THTR 1013H | 3.2 | Fine Arts or Humanities |
| THTR 1223 | No | No |

## Learning Outcome 3.2

Upon reaching this goal, students will be able to articulate a minimum of three vital concepts of aesthetic, humane, and ethical sensibilities embodied in the humanities.

Learning Indicators for Learning Outcome 3.2: To successfully achieve this outcome, students will complete at least three of these five Indicators:

- Identify fundamental concepts, structures, themes, and principles of the discipline being introduced
- Analyze texts and other created artifacts using theories and methods of the discipline
- Produce a reasonable short essay about the material introduced in the course
- Interpret texts and other created artifacts within multiple historical, intellectual, and cultural contexts
- Draw connections among cultural achievements of various groups of people of different ethnicities, religious backgrounds, racial origins, and sexual identities

Courses: The following courses are available to satisfy Learning Outcome 3.2. Some majors may specify which course to take:

| Course | Additional Outcomes | State Minimum Core |
| :---: | :---: | :---: |
| AAST 2023 | 4.2 | Humanities |
| ANTH 1033 | 4.1 | Humanities |
| ANTH 4013 | 1.2, 3.3, 4.1, 5.1 and 6.1 | No |
| ARAB 2013 | 4.1 | Humanities |
| ARAB 2016 or ARAB 2016H | 4.1 | Humanities |
| ARCH 1013 | 4.2 | Humanities |
| CLST 1003 or CLST 1003H | 4.1 and 5.1 | Humanities |
| CLST 1013 | 4.1 and 5.1 | Humanities |
| CLST 3013 or <br> CLST 3013H | 4.1 | No |
| CLST 3023 | 1.2 and 4.2 | No |
| COMM 1233 | 4.2 | Humanities |
| DANC 1003 | 3.1 | Fine Arts or Humanities |
| ENGL 1213 | No | Humanities |
| ENGL 2023 | 3.1 | Fine Arts or Humanities |
| FREN 2003 | 4.1 | Humanities |

| PHIL 2303 | No | Humanities |
| SEED 4103 | No | Humanities |
| SEED 4203 | No | No |
| SEED 4443 | No | No |
| SPAN 2003 | 4.1 | No |
| THTR 1003 | 3.1 | Humanities |
| THTR 1013 or | 3.1 | Fine Arts or Humanities |
| THTR 1013H | 4.1 | Fine Arts or Humanities |
| WLIT 1113 | 4.1 | Humanities |
| WLIT 1123 |  |  |

## Learning Outcome 3.3

Upon reaching this goal, students will be able to articulate and use the basic principles of human interactions - of individuals, groups, and institutions - in a variety of contexts.

Learning Indicators for Learning Outcome 3.3: To successfully achieve this outcome, students will complete at least three of these five indicators:

- Articulate the key concepts, principles, and overarching themes to a social science discipline.
- Apply social scientific reasoning and techniques.
- Analyze theories, data, and methods of a social science discipline to explain individual, group, and institutional interactions.
- Apply critical thinking and use scientific reasoning to evaluate claims about the social world.
- Integrate and use evidence-based theories to explain various types of human interaction through written and oral communication.

Courses: The following courses are available to satisfy Learning
Outcome 3.3. Some majors may specify which courses to take:

| Course | Additional Outcomes | State Minimum Core |
| :--- | :--- | :--- |
| AGEC 1103 or | No | Social Sciences |
| AGEC 1103H |  |  |
| AGEC 2103 or | No | Social Sciences |
| AGEC 2103H |  | No |
| AGLE 3153 | No | Social Sciences |
| ANTH 1023 | 4.1 | No |
| ANTH 4013 | $1.2,3.2,4.1,5.1$ and |  |
|  | 6.1 | No |
| CIED 2083 | No | Social Sciences |
| COMM 1023 or | 4.1 |  |
| COMM 1023H |  | Social Sciences |
| ECON 2013 | No | Social Sciences |
| ECON 2023 | No | Social Sciences |
| ECON 2143 | No | Social Sciences |
| EDST 2003 | No | No |
| ENGL 2173 | No | Social Sciences |
| HDFS 1403 or | $4.1,4.2$ and 5.1 |  |
| HDFS 1403H |  | Social Sciences |
| HDFS 2413 | 4.1 and 4.2 |  |

| HDFS 2603 | 4.2 and 5.1 | Social Sciences |
| :---: | :---: | :---: |
| HIST 1113 or HIST 1113H | 3.2 and 4.1 | Humanities or Social Sciences |
| HIST 1123 or HIST 1123H | 3.2 and 4.1 | Humanities or Social Sciences |
| HIST 2003 | 3.2 and 4.2 | Humanities, Social <br> Sciences or U.S. <br> History/Government |
| HIST 2013 | 3.2 and 4.2 | Humanities, Social <br> Sciences or U.S. <br> History/Government |
| HIST 2093 | 4.1 and 5.1 | Social Sciences |
| HUMN 1114H | 4.1 and 5.1 | Social Sciences |
| HUMN 2114H | 4.1 and 5.1 | Fine Arts or Social Sciences |
| INST 2813 or INST 2813H | 4.1 and 5.1 | Social Sciences |
| PLSC 2003 | 4.2 | Social Sciences or U.S. History/Government |
| PLSC 2013 | 4.1 | Social Sciences |
| PLSC 2203 | No | Social Sciences |
| PLSC 2813 or PLSC 2813H | 4.1 and 5.1 | Social Sciences |
| PSYC 2003 | No | Social Sciences |
| RESM 2853 or RESM 2853H | 4.1 | Social Sciences |
| SOCI 2013 or SOCI 2013H | 4.1 and 4.2 | Social Sciences |
| SOCI 2033 | 4.1 and 4.2 | Social Sciences |
| STEM 2003 | 1.2 | Social Sciences |

## Learning Outcome 3.4

Upon reaching this goal, students will be able to articulate and use, through experiment and observation, the basic principles that govern natural phenomena.

Learning Indicators for Outcome 3.4: To successfully achieve this outcome, students will complete at least three of these five indicators:

- Identify the fundamental concept(s) unifying a scientific discipline
- Apply the principles of scientific theory and technique
- Evaluate the credibility and use of scientific information
- Make evidence-based arguments to support conclusions
- Integrate and organize information, concepts, and applications relevant in more than one scientific discipline

Courses: The following courses with corequisite laboratories are available to satisfy Learning Outcome 3.4. Some majors may specify which courses to take:

| Course | Additional Outcomes | State Minimum Core |
| :--- | :--- | :--- |
| ANTH 1013/ | 4.2 | Science |
| ANTH 1011L |  |  |
| ASTR 2003/ No Science <br> ASTR 2001L   <br> BIOL 1524 No Science <br> BIOL 1543/BIOL 1541L No Science <br> BIOL 1584 No Science |  |  |

| BIOL 1603/BIOL 1601L | No | Science |
| :---: | :---: | :---: |
| BIOL 1613/BIOL 1611L | No | Science |
| BIOL 2213/BIOL 2211L | No | Science |

## Goal 4

Expand diversity awareness, intercultural competency, and global learning.

The two learning outcomes for this goal are for students to learn to interact appropriately within intercultural contexts and develop familiarity with concepts of diversity in the United States.

## Learning Outcome 4.1

Upon reaching this goal, students will have developed knowledge and abilities to interact appropriately within intercultural contexts and engaging with complex global systems and issues.

Learning Indicators for Learning Outcome 4.1: To successfully achieve this outcome, students will complete at least three of these five indicators:

- Examine and interpret an intercultural experience from both one's own and another's worldview.
- Articulate the essential tenets of a cultural worldview other than one's own through an analysis of its components, including but not limited to
history, values, communication styles, politics, economy, and beliefs and practices.
- Identify and participate in cultural differences in verbal and nonverbal communication.
- Identify and analyze significant global challenges and opportunities in the human and natural world.
- Identify and analyze the historical and/or contemporary interrelationships among multiple global cultures.

Courses: The following courses are available to satisfy Learning Outcome 4.1. Some majors may specify which course to take:

| Course | Additional Outcomes | State Minimum Core |
| :---: | :---: | :---: |
| AGEC 2303 | No | No |
| AMPD 1013 | No | No |
| ANSC 4662 | No | No |

## Learning Outcome 4.2

Upon reaching this goal, students will have developed familiarity with concepts of diversity in the United States.

Learning Indicators for Learning Outcome 4.2: To successfully achieve this outcome, students will complete at least three of these five indicators:

- Identify and describe examples of historical and present day issues related to diversity and inclusion in the United States.
- Explain the historical and/or contemporary construction of difference through analysis of power structures, privilege, and explicit or implicit prejudice, and their roles in fostering discrimination and inequalities in the United States, whether cultural, legal, political, or social.
- Describe the advantages of inclusion by identifying and analyzing notions of inclusivity and pathways for cultivating inclusion at all levels of society, whether cultural, legal, political, or social.
- Analyze the historical and/or contemporary development of group agency and assess its role in addressing discrimination and inequalities in the United States.
- Demonstrate problem-solving and change management skills for achieving social equity.

Courses: The following courses are available to satisfy Learning Outcome 4.2. Some majors may specify which course to take:

| Course | Additional Outcomes | State Minimum Core |
| :---: | :---: | :---: |
| AAST 2023 | 3.2 | Humanities |
| AMPD 4053 | No | No |
| ANTH 1013/ <br> ANTH 1011L | 3.4 | Science |

## Goal 5

## Demonstrate critical thinking and ethical reasoning.

## Learning Outcome 5.1

Upon reaching this goal, students will be able to demonstrate essential principles of critical thinking and ethical reasoning and apply them to the evaluation and construction of rational and moral arguments.

Learning Indicators for Learning Outcome 5.1: To successfully achieve this outcome, students will complete at least three of these five indicators:

- Identify and describe key concepts and principles related to critical thinking.
- Explain and contrast competing ethical theories, each of which articulates at least one principle for ethical decision-making
- Use recognized principles of critical thinking or ethical reasoning to analyze, evaluate, and respond to rational and moral argumentation presented orally and/or in writing.
- Describe key fallacies and identify them in context.
- Demonstrate the use of recognized principles of critical thinking or ethical reasoning to construct complex rational and moral arguments orally and/or in writing.

Courses: The following courses are available to satisfy Learning
Outcome 5.1. Some majors may specify which course to take:

| Course | Additional Outcomes | State Minimum Core |
| :---: | :---: | :---: |
| AGED 4003 | 1.2 | No |
| AMPD 4093 | No | No |

## Goal 6

Gain the ability to synthesize, integrate, and apply knowledge developed throughout the undergraduate years.

## Learning Outcome 6.1

Upon reaching this goal, students will be able to reflect upon and explain how they use the skills and abilities embodied in Goals 1 through 5 in completing an integrative project in their major during their junior or senior year.

Learning Indicators for Learning Outcome 6.1: To successfully achieve this outcome, students will:

1. Produce a significant written paper, as defined by his or her major, or an equivalent project incorporating performance and/or multi-modal text and/or images
2. Explain in an additional document of at least 1,250 words the degree to which the completed assignment involves at least three of the following sets of skills and abilities:

- Written, oral, and/or multimodal communication abilities
- Quantitative literacy
- Characteristics of inquiry and action in the major and in one of the Learning Outcomes under Goal 3 besides the disciplinary area of the major
- Diversity awareness and/or intercultural competency
- Critical thinking and/or ethical reasoning

Courses: The following courses are available to satisfy Learning Outcome 6.1. Each major program may specify which course or courses to take:

| Course | Additional Outcomes | State Minimum Core |

4 If not selected to meet another category.

## Rationale for U of A State Minimum Requirements

In order to prepare its students for lives of the highest individual quality and the greatest potential contribution to the making of a better world, the University of Arkansas has developed a comprehensive program of general education. Although the basic skills, knowledge, methodologies, and judgments derived from experience in the core area set forth here may provide the basis for a major or professional concentration, the aims of these core requirements are not career specific. Rather, the following areas are designed to develop the tools for critical thinking and effective communication, an understanding of our richly diverse human heritage, the flexibility to adapt successfully to a rapidly changing world, a capacity for lifelong learning, and an enthusiasm for creativity.

## English/Communication (6 hours)

Courses offered in this area are designed to develop the ability to organize ideas and to communicate them in grammatically correct written English with clarity, precision, and syntactical maturity.

ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013) and ENGL 0001 Writing Lab

[^0]- Below 490 on the Evidence-Based Reading and Writing section of the SAT and high school GPA less than 3.20
- Below 255 on the Accuplacer Next-Generation Writing section and high school GPA less than 3.20

ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013)

- ACT English scores of 19-27, or
- SAT Evidence-Based Reading and Writing scores of 490-620, or
- Accuplacer Next-Generation Writing section score of 255 or higher, or
- High school GPA of 3.20 or higher

ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013) or ENGL 1013H Honors Composition I

- ACT English scores of 28-29, or
- SAT Evidence-Based Reading and Writing scores of 630-680

Students with ACT English scores of 30 or greater or SAT EvidenceBased Reading and Writing scores of 690 or greater may enroll in ENGL 1013H and ENGL 1023H or elect exemption. Some degree programs require credit in composition, and students should confer with their advisors before exempting.

## Fine Arts/Humanities (6 hours)

Courses presented in this area are drawn from the study of human thought, emotion, values, culture, and aesthetics. They are designed to develop the capacity for reflection, an appreciation of our own diverse culture and a tolerance of those foreign to us, and a heightened aesthetic and ethical sensibility. The courses are not performance-based, but offer students a basis for the gradual acquisition of broad cultural literacy.

## Mathematics (3 hours)

Courses offered in this area are designed to develop the student's ability to understand the diverse mathematical concepts that shape our increasingly technical culture. Core mathematics courses presuppose the ability to apply mathematical techniques at the level of high school algebra and geometry. The specific course(s) selected will depend upon each student's curriculum, but no course below college algebra may be used to fulfill core requirements.

## Science (8 hours)

A primary goal of these courses is to develop an appreciation of the basic principles that govern natural phenomena and the role of experiment and observation in revealing these principles. Students should acquire an understanding of the relationship between hypothesis, experiment, and theory, and develop the skills common to scientific inquiry, including the ability to frame hypotheses and defend conclusions based on the analysis of data. These courses are designed to prepare a student for informed citizenship by illustrating the importance of science and technology to the present and future quality of life and the ethical questions raised by scientific and technological advances.

## Social Science (9 hours)

The purpose of the social science core is to introduce students to the breadth of inquiry in the social sciences - such as the study of ideas, the behavior of individuals, groups, institutions, and their interactions. The core should expose students to the history of and the challenges encountered in our complex, culturally diverse world.

## American History or Government (3 hours)

Under Arkansas law, no undergraduate degree may be granted to any student who has not passed a college course in American history or civil government. Courses offered by the University of Arkansas, any one of which will meet this requirement, are HIST 2003, HIST 2013, and PLSC 2003.

## Graduation Rates

In accordance with the Student Right-to-Know and Campus Security Act of 1990, the following table is a summary of the institution's six-year graduation rates. The top numbers reflect those degree-seeking freshmen who enrolled in 2016 and graduated by 2022; the Student Athlete numbers are the cohort who enrolled in 2016 and graduated by 2022. They will be updated to the new cohort in fall 2022.

| Year | Total Graduates Men | Total Graduates Women | Total Graduates Overall | Percent of Total Men | Percent of Total Women | Percent Overall |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| All Degree-Seeking Freshmen |  |  |  |  |  |  |
| The graduation rate for all firsttime, full-time, degree-seeking new freshmen. | 2,216 | 2,722 | 4,938 | 65.6\% | 72.1\% | 69.2\% |
| Student Athletes <br> Who Received <br> Athletically Related <br> Aid |  |  |  |  |  |  |
| The graduation rate for all firsttime, full-time, degree-seeking new freshmen who received athletic aid during the first year of enrollment. |  |  |  | 59\% | 65\% | 62\% |
| Student-Athlete Graduation Success Rate |  |  |  |  |  |  |

| The Student- | 86\% | 90\% | 88\% |

## Honors and Scholars

## Dean's and Chancellor's List

After the end of each semester, all colleges and schools in the university publish an honor roll of the names of the undergraduate students who achieve a 3.75 to 4.00 grade-point average. This honor roll is the Dean's List.

In addition, a Chancellor's List is published each semester that recognizes those undergraduate students who achieve a 4.00 grade-point average.

Selection for the Dean's List and Chancellor's List will be evaluated as follows:

- Students must complete a minimum of 12 semester hours normally required to graduate and these hours must be graded with the standard letter grading basis
- Students will be allowed $P$ grades during the semester only in course hours that exceed the 12 -hour letter grade requirement, i.e., a student in 15 hours may have up to 3 hours of $P$ grades)

Students who earn any PD or NC grades during the semester will not be eligible for the Dean's or Chancellor's List

## First-Ranked Senior Scholars

A first-ranked senior scholar must have a cumulative grade-point average of 4.00 on all course work completed up through the term prior to their
graduation term, and must have applied for graduation for a semester to be a member of the appropriate class and must have completed all courses required for the baccalaureate degree at the University of Arkansas, Fayetteville, or in a program of study approved by the Director of Honors or other designee in the college in which the student is enrolled. In determining the cumulative grade-point average for the purposes of such awards, grade forgiveness/exclusion is not accepted. Due to the disruption caused by COVID-19, P grades will be allowed during the spring and summer 2020 terms. Students earning PD or NC grades during these terms will not be eligible for first-ranked senior scholar status.

## Senior Scholar

Selected graduating seniors who are among those with the highest gradepoint average up through the term prior to their graduation term and who have completed at least half of their degree work at the University of Arkansas are recognized by each undergraduate college as a Senior Scholar.

## Graduation Honors

For detailed, discipline-specific information, see the honors section for each college or school major. Students must be members of the Honors College to earn the distinction of graduating cum laude, magna cum laude or summa cum laude. The honors program in the college or school of major sets specific requirements for graduating with honors including a minimum of 12 honors credit hours and the completion of an undergraduate thesis. A combination of honors credit hours, thesis quality, and GPA requirements lead to Latin designation of cum laude, magna cum laude or summa cum laude.

## Requirements for Graduation

## State Minimum Core Requirements

In addition to the requirements listed below, undergraduate students must successfully complete 35 hours of courses in the State Minimum Core. Find more on the State Minimum Core page (p. 81).

## Enrollment Requirement

To ensure the opportunity to engage with faculty and peers in their area of study at the University of Arkansas, students must fulfill the $U$ of $A$ Enrollment Requirement:

1. Earn a minimum of 30 semester hours at the University of Arkansas, Fayetteville campus. This includes UA faculty-led study abroad classes, online/on-campus classes, and courses offered through the Global Campus; and all other courses paid toward Fayetteville campus tuition and fees;
2. These 30 semester hours are to be upper-division semester hours required for the completion of a degree program;
3. Additional hours in residence can be required for completing a minor;
4. Hours earned in another school or college at the University of Arkansas, Fayetteville, may be used to satisfy this requirement - with appeal of appropriate faculty curriculum committee;
5. Appeals to the standards identified in this policy should be made to the Academic Standards Committee.

## Minimum Credits

All students awarded a baccalaureate degree must have a minimum of 120 credit hours. Individual programs may require additional hours. Courses not marked in the course description as eligible to be repeated for degree credit may be included in this total only once.

## Minimum Grade-Point Average

No student will be allowed to graduate if the student has earned below a 2.00 GPA in credit earned at this institution. No student will be allowed to graduate if that student's academic standing is other than good standing.

## Freshman Course Requirement

University Perspectives is an innovative required one-hour freshman course designed to enhance student success. A "flipped" class, it will have an online component in addition to in-class interaction. The course will emphasize the transition to the university and university-level work by addressing topics such as critical thinking and civic engagement. Other units intended to enhance overall student success include - but are not limited to - note-taking, time management, and academic integrity. All freshmen must complete UNIV 1001 by the end of the first academic year.

## Application for Graduation

Students who plan to graduate must file an official application to do so. Applications should be filed for the term in which degree requirements will be completed. A graduation fee will be required at the time of application.

To ensure that students will be certified for graduation in a timely manner, the following graduation application deadlines have been established:

| Date | Description |
| :--- | :--- |
| October 1 | for students graduating in Fall |
| March 1 | for students graduating in Spring |
| July 1 | for students graduating in Summer |

Students must apply by the established deadline for that term. Any student missing the deadline may apply to graduate in a subsequent term.

A student who fails to complete the degree during the intended semester must contact the Office of the Registrar to renew the application for the term in which the degree requirements will be completed.

## Other Graduation Requirements

Individual colleges and schools may have special graduation requirements, in addition to degree program requirements. Consult the college or school section in this catalog for statements of additional requirements.

## Degree Program Requirements

A student's degree program requirements are normally those specified in the catalog for the student's first year of enrollment. However, students may choose to meet the program requirements specified in a catalog for a later year and, under some circumstances, students may be required to meet degree program requirements incorporated into the curriculum at a level beyond that at which the student is enrolled.

Students who transfer from institutions with articulation agreements with the university may also be allowed to meet the university program requirements in effect during their first year of enrollment in those institutions, subject to the time limits described below and the availability of course work. Students who transfer to a different degree program may be required to meet the program requirements specified in the catalog for the year of entry into that program. Students who are not enrolled for a period of two years or longer may be required to reenter under program requirements in the current catalog. Students who wish to be granted a degree on the basis of requirements specified in a catalog more than
seven years old may be required to petition the college or school to be allowed to do so.

Students are expected to keep themselves informed regarding program requirements and changes.

## Additional Bachelor's Degree

A student seeking two or more undergraduate degrees from the University of Arkansas must meet the graduation requirements for each degree, including all university, college or school, and departmental requirements as stated in the catalog. When two or more undergraduate degrees are being completed concurrently, or while being continuously enrolled at the University of Arkansas, course work for the first degree may be used to satisfy requirements for the second degree. Students must apply to graduate individually for each degree. A student earning two or more bachelor's degrees in a single academic year will have their name appear only once on Senior Walk.

A student who previously completed a bachelor's degree from the University of Arkansas, or from any other institution, must complete at least 30 hours of additional, not necessarily subsequent, course work in residence from the University of Arkansas. More than 30 hours of course work may be required to satisfy all university, college or school, and departmental requirements.

## Student Grievances and Appeals

## Informal Resolution

Undergraduate students who wish to seek further review of an academic or non-academic decision or action by the University or a University employee (in an official capacity) that the student contends was in violation of written campus policies, or constitutes unfair or unequal application of such policies, should first seek to resolve such concerns through informal discussions. In particular, grievances regarding academic matters should generally begin with informal discussions with the student's instructor or with the faculty member supervising a course. If such informal discussions do not reach a satisfactory resolution, then the student may pursue a grievance following the steps in this policy. Undergraduate students should be free of retaliation from university employees for filing a grievance under this policy or the grade appeal policy or through participation in the investigation of a grievance as a witness of such a claim. Undergraduate students who seek further review of a claim of retaliation shall also follow the steps in this policy.

## Applicability of Policy

This policy applies to undergraduate students enrolled in traditional courses as well as online courses. This policy does not apply to matters which are covered by other campus policies or appeal procedures, including, but not limited to, the following:

- grade appeals (see description of process below);
- allegations of discrimination or harassment (including sexual harassment) under the university's non-discrimination policy;
- allegations of failure to provide reasonable accommodations for a disability;
- financial aid;
- enforcement of campus parking regulations;
- violations of the Code of Student Life or the university's Academic Dishonesty Policy; or
- violations of the university's Research Misconduct Policy.

In particular, matters involving allegations of unlawful harassment (including sexual harassment), discrimination and/or retaliation should be reported to the university's Office of Equal Opportunity and Compliance, and matters involving alleged failure to provide reasonable accommodations for a disability should be pursued through the grievance process described on the university's Center for Educational Access website. Additional information about each of the above policies is available on the university's website and through the Office of the Dean of Students.

Furthermore, this grievance process is intended to address alleged violations of university policy with respect to individual students, rather than disagreements with existing policies. Questions regarding the applicability of this grievance policy to a particular issue will be determined by the dean of students, in consultation with the provost and other university officials, as necessary.

## Formal Grievance Process

If efforts to resolve a grievance informally are not successful, no later than 60 calendar days following the decision or action that the student seeks to have reviewed, the student shall put the grievance in writing, clearly and succinctly stating the facts relating to the grievance and which policies the student contends have been violated or misapplied. For an academically related grievance, the written grievance shall be submitted to the academic unit chair, head or his or her designee; if the concern relates to the chair, then the written grievance may be submitted to the Dean who may appoint an alternate official to consider the grievance. For a non-academic matter, the grievance should be considered by an administrator with authority over the relevant area. The administrator considering the grievance will review the material provided by the student, and may, at the administrator's discretion, gather any additional information that will be helpful to a decision, whether in writing or through meeting with the student or other persons involved. The administrator reviewing the grievance shall make a decision, in writing, within 10 working days after receiving the student's grievance (excluding the day of receipt), or as soon as possible thereafter. The decision will explain the basis for the decision, remedial steps required, if any, and the procedure for requesting an appeal.

## Appeals

If the student believes the grievance decision is in error, then that person may, within 10 working days after the date of the written decision, appeal the decision to the relevant dean (for an academic matter) or to the relevant vice chancellor or a designee (for non-academic matters). The administrator considering the appeal will review the material provided by the student, the grievance decision, any other material which has been assembled regarding the matter, and any applicable university policies and may, at his or her discretion, gather any additional information that will be helpful to a decision, whether in writing or through meeting or consulting with any individuals deemed necessary in the administrator's discretion. The administrator reviewing the appeal shall make a decision, in writing, within 10 working days of receiving the student's grievance, or as soon as possible thereafter. The appeal decision shall be final.

## External Complaint Resolution

If a grievance cannot be resolved internally within the university, a student may file a complaint with the appropriate authority. Students of
the University of Arkansas, residing in Arkansas or attending from out-of-state, must file complaints in writing with the Arkansas Division of Higher Education (ADHE), 423 Main Street, Suite 400, Little Rock, AR 72201, within 20 days of completing the institution's grievance process.
As required by ADHE, the grievant must provide a statement from the institution verifying that the institution's appeal process has been followed. ADHE inquiries are limited to courses/degree programs certified by the Arkansas Higher Education Coordinating Board (AHECB) under Ark. Code § 6\#61\#301 and to matters related to the criteria for certification. Students may also contact the Higher Learning Commission (http:// catalog.uark.eduttps://www.hlcommission.org/), which is the university's regional accrediting body, at 230 S . LaSalle St., Suite 7-500, Chicago, IL 60604, or at info@hlcommission.org or 1-800-621-7440. This information is provided pursuant to 34 CFR $\S 668.43(b)$.

## Grade Appeal Structure for Undergraduate Students

If a student questions the fairness or accuracy of a grade, there is recourse through a student grade appeal structure. Disagreements shall be heard that allege the instructor's policy was not applied consistently to all students, differed substantially from the announced policy, or that a policy was not announced. All grievances concerning course grades must be filed within one calendar year of the end of the term in which the grade that is being appealed was assigned. The procedures are:

The student should first discuss the matter with the instructor involved, doing so as soon as possible after receiving the grade. The instructor should be willing to listen, to provide explanation, and to be receptive to changing the grade if the student provides convincing argument for doing so. The student's questions may be answered satisfactorily during this discussion.

If the student chooses to pursue the grievance and submits an appeal, the student shall take the appeal in written form to the appropriate department or unit chairperson of the program in which the course was instructed. The appeal should present the basis of the appeal and merits of the grievance with evidence the student may have to support the appeal. If that person determines the case has no merit, that person will inform the student and the instructor. If that person believes the complaint may have merit, that person will discuss it with the instructor. In the case that the department or unit chairperson is the instructor, the student should submit an appeal in written form to the appropriate dean of the college in which the course was instructed.

If the matter remains unresolved, it will be referred to an ad hoc committee composed of programmatic or departmental faculty. This committee would be appointed by the department or unit chairperson and should have at least three faculty representing the program or department in which the course was instructed. In the case where there are fewer than three faculty within the program or department to serve on the committee, faculty members from a closely related discipline will be appointed to serve. In the case where the department or unit chairperson is the instructor of the grievance, the ad hoc committee would be appointed by the appropriate dean of the college in which the course was instructed. The instructor whose grade is being challenged shall not serve on this ad hoc committee. The committee will examine available written information on the dispute, will be available to meet with the student and with the instructor, and will meet with others as it sees fit.

If the ad hoc faculty committee majority determines, through its inquiries and deliberations, that the grade should not be changed, the committee should communicate this conclusion to the student, the faculty member,
and the chairperson. If the ad hoc faculty committee majority determines that the grade should be changed, the committee will request that the instructor make the change and provide the instructor with a written explanation. Should the instructor decline, he or she must provide an explanation for refusing in writing to the ad hoc faculty committee.

If the ad hoc faculty committee, after considering the instructor's written explanation, concludes it would be unjust to allow the original grade to stand, it may then recommend to the department chairperson, or dean in the case where the department chairperson is the faculty whose grade is being challenged that the grade be changed. That individual (department chair or dean) will provide the instructor with a copy of the recommendation and will ask the instructor to implement it. If the instructor continues to decline, the chairperson or dean is then obligated to change the grade, notifying the instructor and the student of this action. Only the chairperson or dean has the authority to effect a grade change over the objection of the instructor who assigned the original grade, and only after the foregoing procedures have been followed.

## Reporting Sexual Misconduct

For allegations of sexual misconduct, including, but not limited to, sexual harassment or acts of sexual assault, domestic violence, dating violence, stalking and other forms of sex/gender discrimination, the University has designated a Title IX Coordinator with overall responsibility for oversight of the University's compliance with its obligations under Title IX. All complaints or any concerns about sexual conduct should be submitted to the university's Title IX Coordinator, the Department of Education's Assistant Secretary for Civil Right, or both:

Aisha Kenner<br>Title IX Coordinator<br>405 Administration Building<br>University of Arkansas<br>Fayetteville, AR 72701<br>Office: 479-575-7111<br>Cell: 479-409-9972<br>Email: akenner@uark.edu<br>Alternate email for Title IX: titleix@uark.edu

ocr@ed.gov

## Student Privacy

## Annual Notice of Student Rights Under the Family Educational Rights and Privacy Act (FERPA)

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. They are as follows:

1. The right to inspect and review the student's education records, with some exceptions under the Act, within 45 days of the day the university receives a request for access. Students should submit to the Office of the Registrar written requests that identify the record(s) they wish to inspect. The university official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the university official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.
2. The right to request the amendment of the student's education records that the student believes are inaccurate or misleading. Students should write the university official responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading. A sample form, which may be used in making this request, is contained in the appendix to UA Systemwide Policies and Procedures 515.1 (http://www.uasys.edu/ policies/ua-system-policies/).

If the university decides not to amend the record as requested by the student, the university will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing and is also contained in UA Systemwide Policies and Procedures 515.1 (http://www.uasys.edu/policies/ua-system-policies/).
3. The right to withhold consent of disclosure of directory information, defined as the following information: the student's name; date of birth; address; telephone number; email address; major field of study; classification by year; number of hours in which enrolled and number completed; participation in officially recognized activities and sports; weight and height of members of athletic teams; dates of attendance including withdrawal dates; degrees, honors, and awards received, including type and date granted; and photograph.

This information will be subject to public disclosure unless the student restricts such information through the appropriate settings in UAConnect, the student information system, or informs the Office of the Registrar in writing that he or she does not want this information designated as directory information.
4. The right to consent to disclosures of personally identifiable information contained in the student's education records, except to the extent that FERPA authorizes disclosure without consent.

One exception, which permits disclosure without consent, is disclosure to school officials with legitimate educational interests. A school official is a person employed by the university in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the university has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an educational record to fulfill his or her professional responsibility. Upon request, the university also discloses education records without consent to officials for another school in which a student seeks or intends to enroll.

Postsecondary institutions may also disclose personally identifiable information from education records, without consent, to appropriate parties, including parents of an eligible student, in connection with a health or safety emergency. Under this provision, colleges and universities may notify parents when there is a health or safety emergency involving their son or daughter, even if the parents do not claim the student as a dependent.

There are several other exceptions to FERPA's prohibition against non-consensual disclosure of personally identifiable information from education records, some of which are briefly mentioned below. Under certain conditions (specified in the FERPA regulations), a school may
non-consensually disclose personally identifiable information from education records:

- to authorized representatives of the Comptroller General of the United States, the Attorney General of the United States, the U.S. Secretary of Education, and State and local educational authorities for audit or evaluation of Federal or State supported education programs, or for the enforcement of or compliance with Federal legal requirements that relate to those programs;
- to the National Student Clearinghouse for enrollment and degree reporting;
- to organizations conducting studies for or on behalf of the school making the disclosure for the purposes of administering predictive tests, administering student aid programs, or improving instruction;
- to officials of another school where the student seeks or intends to enroll, or where the student is already enrolled if the disclosure is for purposes related to the student's enrollment or transfer;
- to comply with a judicial order or a lawfully issued subpoena;
- to the victim of an alleged perpetrator of a crime of violence or a non-forcible sex offense concerning the final results of a disciplinary hearing with respect to the alleged crime; and
- to any third party the final results of a disciplinary proceeding related to a crime of violence or non-forcible sex offense if the student who is the alleged perpetrator is found to have violated the school's rules or policies. The disclosure of the final results only includes: the name of the alleged perpetrator, the violation committed, and any sanction imposed against the alleged perpetrator. The disclosure must not include the name of any other student, including a victim or witness, without the written consent of that other student.

5. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the university to comply with the requirements of FERPA. The name and address of the office that administers FERPA is as follows:

Family Policy Compliance Office
U.S. Department of Education

400 Maryland Avenue, SW
Washington DC 20202-4605
6. UA System Policy and Procedure 515.1 (http://www.uasys.edu/ policies/ua-system-policies/) serves as a supplement to the campus FERPA policy.
7. FERPA applies to students at the University of Arkansas at the point of their enrollment into courses.

## Photographic and Video Images

The university is proud to publish and display photographic and video images of $U$ of $A$ students, their activities and accomplishments. Any student who does not wish to be represented in such photographic and video images by the university should choose to withhold photos on the FERPA option on the university's student information system.

## Transfer of Credit

The following policies control the granting of credit for course work taken at other institutions:

1. Transfer credits are subject to a two-stage evaluation process. First, the eligibility of the hours for transfer is evaluated by the Office of the Registrar based upon decisions of appropriate faculty,
the Arkansas Course Transfer System (http://acts.adhe.edu/ studenttransfer.aspx), and the Transfer Course Equivalency Guide (https://courseequivalency.uark.edu/). Credits found to be eligible for general transfer may not count toward the minimum requirements for every degree at the University of Arkansas. The second step in the evaluation, performed by the academic dean's office or department responsible for the program of study, determines which hours evaluated will satisfy degree program requirements.
2. Grades earned at other institutions are not calculated in the student's grade-point average earned at the university.
3. General transfer credit is awarded for courses in which a grade of "C" or higher has been earned. Course work must be applicable to a baccalaureate degree; credit is not granted for course work that is remedial or technical in nature.
4. Students can petition to have up to six hours of "D" grades transfer for degree credit to the University of Arkansas. Students must have a 2.00 GPA on a 4.00 scale to be considered, and courses must meet core or elective requirements in the student's degree program. Courses outside the degree program and courses in the major cannot be considered for transfer. The Admissions and Appellate Committee makes all decisions regarding "D" transfers. Petitions can be obtained from the Office of the Registrar.
5. In the case of course work taken at institutions not fully accredited by a regional accrediting agency, transfer credit may be denied altogether or may be granted provisionally subject to successful completion of specified courses at the university. Normally, credit is provisionally granted only if the institution is a candidate for regional accreditation.
6. The State Minimum Core (SMC): Act 98 of 1989 requires each institution of higher learning in Arkansas to identify a minimum core of general education courses that shall be fully transferable between state-supported institutions. Under guidelines from the State Board of Higher Education, the SMC consists of 35 hours distributed among the following education areas: English, U.S. history or government, mathematics, science, fine arts and humanities, and social sciences. Students transferring credit with grades of "C" or better from the approved SMC of another state-supported institution in Arkansas may expect to have all these hours applied toward their degree at the University of Arkansas.
7. Transfer credit policy under Arkansas Act 182 from 2009 requires a four-year public institution of higher education in Arkansas to accept all credits earned from students earning an Associate of Arts, Associate of Science or Associate of Arts in Teaching degree from a state-supported public institution in Arkansas.

Major stipulations of Act 182 are outlined below:

- The transfer degree contains the curriculum that is approved by the Arkansas Higher Education Coordinating Board.
- The four-year public institution of higher education is to admit a transfer student to junior status in a baccalaureate degree program at the four-year public institution of higher education.
- A four-year public institution of higher education receiving a transfer student shall not require additional lower division coursework if the additional course is considered a general education lower division course.
- The receiving four-year public institution of higher education may only require the additional lower division course if the additional lower division course is:
- A prerequisite for courses in the transfer student's baccalaureate degree program;
- A discipline-specific course that is required by the transfer student's baccalaureate degree program and the student has not completed a course at the two-year public institution of higher education that is comparable to the discipline-specific course at the four-year public institution of higher education in the Arkansas Course Transfer System;
- A requirement of an independent licensing or accrediting body
- Act 182 does not remove the requirement that a transfer student must meet total baccalaureate degree program credit hour and course requirements in order to be eligible for a baccalaureate degree.
- The receiving four-year public institution of higher education shall determine whether to accept a grade of " $D$ " for academic course credit for a student transferring from a two-year public institution of higher.

Students should be prepared to submit course descriptions and syllabi of transfer work if there is any question concerning acceptance of credit toward a degree program. The university reserves the right to revise credit for advanced standing after the student has been in residence.

Please refer to the appropriate college or school section of this catalog for additional information concerning acceptance into specific degree programs.

## Military Transfer Credit

The University of Arkansas accepts transfer credit based upon completed military training as evaluated by the American Council of Education (ACE) guidelines and recommendations. The evaluation must be presented to the university on an official transcript from ACE, or a Joint Services Transcript (JST). Equivalencies for military credit as recommended by ACE are evaluated by departmental faculty and may not be exactly the same as ACE. University of Arkansas equivalencies for ACE credit are displayed on the website of the Office of the Registrar in the Transfer Credit section (http://registrar.uark.edu/transfer-and-test-credit/). Students may elect to receive 6 hours of general military science credit for basic training as evaluated by presentation of the military DD214 with honorable discharge. Officer training would qualify the student for 6 additional hours of general military science credit. The same training may not be presented for both general military science credit and ACE credit.

More information on transfer credit can be found online by going to the Office of the Registrar website (http://registrar.uark.edu/410.php).

## Arkansas Course Transfer System (ACTS)

The Arkansas Course Transfer System (ACTS) is a postsecondary education resource service coordinated by the Arkansas Department of Higher Education (ADHE) that provides comparable course information to facilitate student transfer within Arkansas public colleges and universities. The ACTS database contains faculty-generated comparable course information for a number of courses offered at public institutions in Arkansas. Comparable courses within ACTS are guaranteed to transfer for full credit to any Arkansas public institution. Course transferability is not guaranteed for courses listed in ACTS as "No Comparable Course." Find out more at the Arkansas Course Transfer System website (http:// acts.adhe.edu/studenttransfer.aspx). Questions regarding ACTS may be directed to an academic adviser or the Office of the Registrar.

The chart below provides the University of Arkansas course equivalents for each of the ACTS courses offered on the campus. The ACTS course numbers are also identified in the course title of the equivalent $U$ of $A$
course. For instance, the course title for the university's ANTH 1023 Introduction to Cultural Anthropology is listed as:

## ANTH 1023 Introduction to Cultural Anthropology (ACTS Equivalency = ANTH 2013).

Both this chart and the information in the course description are designed to assist students with identifying $U$ of $A$ courses that are guaranteed to transfer between Arkansas public institutions.

## Colleges and Schools

Five colleges and six schools offer academic programs leading to undergraduate degrees.

- The Dale Bumpers College of Agricultural, Food and Life Sciences (p. 124), which includes the School of Human Environmental Sciences (p. 202)
- The Fay Jones School of Architecture and Design (p. 238)
- The Fulbright College of Arts and Sciences (p. 273), which includes the School of Art (p. 300), the School of Journalism and Strategic Media (p. 466), and the School of Social Work (p. 567)
- The Sam M. Walton College of Business (p. 612)
- The College of Education and Health Professions (p. 698), which includes the Eleanor Mann School of Nursing (p. 750)
- The College of Engineering (p. 826)

Freshmen and current students in all of the colleges and schools may also be eligible for admission to the Honors College. Students may also enroll in courses offered through the University of Arkansas Global Campus. Last, there are also two interdisciplinary minors that are administered outside these colleges and schools but which use the resources of more than one of them.

## Honors College

## Mission and Objectives

The Honors College at the University of Arkansas brings together high-achieving students and the university's top faculty members to share transformative learning experiences. Founded in 2002 with a large portion of the $\$ 300$ million gift from the Walton Family Charitable Support Foundation, the Honors College has a substantial endowment for undergraduate research, service learning and international education.

The Honors College prepares University of Arkansas students to be leaders with intellectual, economic, cultural and ethical impact in the widest scope of fields. To achieve this mission, the Honors College collaborates with honors programs across campus to provide a flexible, interdisciplinary honors curriculum that fosters creative and critical thinking and inspires action. The Honors College encompasses the honors programs from each undergraduate college or school.

## Honors Courses

The Honors College offers small, seminar-style courses taught by top professors and campus and community leaders that address topics such as blockchain, gene editing, cancer, presidential elections, climate change and the gothic style in art, architecture and literature. Retro Readings courses revisit classic texts and concepts, from the Bible and Quran to Dante's Divine Comedy. Other Honors College courses introduce students to undergraduate research, support domestic and international internship opportunities, and prepare students to apply to professional and graduate schools and nationally competitive awards.

Honors courses are also offered within each undergraduate college or school on a wide range of topics. Registration for honors courses is restricted to honors students or other students who meet the honors criteria and who have been approved by the Honors College or the honors program offering the course. For more information visit the Honors College website at honorscollege.uark.edu; also see the honors sections for the college or school major.

## Facilities and Resources

The Honors College is housed in a 21,000 -square-foot addition to Gearhart Hall, a historic Collegiate Gothic structure located in the heart of campus. Honors students enjoy a spacious lounge, study areas and rooms for group discussions. A 216 -seat auditorium below provides space for lectures, film screenings and other events.

Hotz Honors Hall, situated in the heart of the northwest housing area, provides housing for 400 first-year honors students in spaces designed to foster community. Hotz offers a large room for relaxation on the main floor, a computer lounge, music room, conference rooms and a small theater. Each floor is equipped with study areas, alcoves for TV viewing and video gaming, and spa-style bathrooms. The Honors College offers special programming for Hotz residents and upper-level honors students in nearby dorms.

## Degrees Offered

Honors programs are offered in all disciplines, tailored to students' academic interests, with interdisciplinary collaborations encouraged. The college or school of major confers honors degrees. Only Honors College students can earn the distinction of graduating cum laude, magna cum laude or summa cum laude.

## Other Programs <br> Honors College Grants

Each year the Honors College awards more than $\$ 1$ million in study abroad and undergraduate research grants, which are available to honors students who submit competitive proposals and meet all other requirements. Honors College faculty and staff work closely with the Office of Study Abroad and International Exchange to help honors students find programs that best meet their academic and professional goals. Honors College grants support domestic and international research, internships, community engagement, study abroad and travel to an archive or conference. Deadlines and application instructions are available on the Honors College website at honorscollege.uark.edu (http:// honorscollege.uark.edu/).

## Nationally Competitive Awards

The Honors College coordinates with the Office of Nationally Competitive Awards to provide assistance to all students who are applying for national and international graduate fellowships and scholarships (i.e. Marshall, Rhodes, Schwarzman, Truman, Udall, Gates Cambridge, Rotary, Fulbright, and National Science Foundation). For more information, refer to the Enrollment Services section of this catalog.

## College Admission Requirements

To apply for honors, students should visit the Honors College website at honorscollege.uark.edu (http://honorscollege.uark.edu/) and click on Apply. There they can review admission requirements and the honors program requirements in their college. Honors-eligible new freshmen should fill out the Honors College Application, available online. To register for honors classes in their first semester, they should apply before attending freshman orientation.

New transfer students and current students should contact the honors program director or assistant director in their college to determine eligibility and, for some programs, which form of honors (four-year or departmental) would best meet their needs. Then they should fill out the Honors College Application form. The list of honors program directors and both honors application forms are available online at honorscollege.uark.edu (http://honorscollege.uark.edu/).

The chart below contains basic requirements for each of the honors programs. For detailed information, see the individual honors program sections for each college or school in this catalog. Note that honors admission is based on the highest composite ACT or SAT score, not on superscores. In calculating GPA, extra weight is given only for Advanced Placement and International Baccalaureate courses.

| College or School | New Freshmen | Current Students |
| :--- | :--- | :--- |
| Bumpers College of | Minimum 28 ACT | 3.5 cumulative |
| Agricultural, Food and | composite or 1310 SAT University of Arkansas |  |
| Life Scences | and 3.75 high school | GPA |
|  | GPA are eligible for |  |

|  | school GPA can submit |  |
|  | an essay and academic |  |
|  | resume for application |  |
|  | review. |  |

| Fay Jones School of Architecture | Minimum 28 ACT composite or 1310 SAT and 3.75 high school GPA are eligible for automatic admission. Students with a 3.9 high school GPA can submit an essay and academic resume for application review. | 3.5 cumulative University of Arkansas GPA |
| :---: | :---: | :---: |
| Fulbright College of Arts and Sciences | Minimum 28 ACT composite or 1310 SAT and 3.75 high school GPA are eligible for automatic admission. Students with a 3.9 high school GPA can submit an essay and academic resume for application review. | 3.5 cumulative <br> University of Arkansas GPA |
| Walton College of Business | Minimum 28 ACT composite or 1310 SAT and 3.75 high school GPA are eligible for automatic admission. Students with a 3.9 high school GPA can submit an essay and academic resume for application review. | 3.75 cumulative University of Arkansas GPA |
| College of Education and Health Professions | Minimum 28 ACT composite or 1310 SAT and 3.75 high school GPA are eligible for automatic admission. Students with a 3.9 high school GPA can submit an essay and academic resume for application review. | 3.5 cumulative University of Arkansas GPA |
| College of Engineering | Minimum 28 ACT composite or 1310 SAT and 3.75 high school GPA are eligible for automatic admission. Students with a 3.9 high school GPA can submit an essay and academic resume for application review. | 3.5 cumulative University of Arkansas GPA |

## Fellowships and Scholarships

The Honors College administers the most prestigious new freshman awards at the University of Arkansas. The Bodenhamer, Sturgis and Honors College Fellowships provide from $\$ 80,000$ in support over a fouryear period, are highly competitive and require an in-depth application process and interview. For more details, visit the Honors College website at honorscollege.uark.edu (http://honorscollege.uark.edu/) and click on Future Students.

The Academic Scholarship Office awards scholarships to a variety of students. Students do not have to be in the Honors College to receive these scholarships. For additional information, visit the Academic Scholarship Office website at scholarships.uark.edu (http:// scholarships.uark.edu/) and see the chapter on Financial Aid and Scholarships in this catalog.

## Student Organizations

All honors students are eligible to apply for the Honors College Ambassadors program. This group supports the honors community by participating in campus recruiting events and meeting with prospective students. The Honors College Student Advisory Council offers a select group of student leaders an opportunity to make a real impact on the Honors College.

## College Academic Regulations

The college or school of major sets specific requirements for graduating with honors including a minimum of 12 honors credit hours and the completion of an undergraduate thesis. A combination of honors credit hours, thesis quality, and GPA requirements lead to Latin designation of cum laude, magna cum laude or summa cum laude.

## Courses

HNRS 102VH. Honors College Introduction to Research. 1-6 Hour.
The Honors College Introduction to Research functions as part of a bridge program between secondary education and the university. The main purpose is to introduce students to the full range of research activities available at an R-1 institution and to do so under the guidance of both STEM and non-STEM honors faculty members. Prerequisite: Departmental consent. Pre- or Corequisite: Honors standing or membership in the Honors College Path Program. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HNRS 204VH. Honors International Research Internship Foundations. 1-6 Hour.
The Honors College International Research Internship Foundations hours are intended for undergraduates who undertake an international research internship, usually with funding from the Honors College. An on-campus faculty mentor will supervise the preparatory work in advance of the time spent abroad. Pre- or Corequisite: Honors standing. Prerequisite: Departmental consent. (Typically offered: Irregular) May be repeated for degree credit.

HNRS 205VH. Honors Domestic Internship Foundations. 1-6 Hour. The Honors College Domestic Internship Foundations hours are intended for undergraduates who undertake a domestic internship, usually with funding from the Honors College. An on-campus faculty mentor will approve any needed preparatory work in advance of the internship. Prerequisite: Departmental consent. Pre- or Corequisite: Honors standing. (Typically offered: Irregular) May be repeated for degree credit.

HNRS 3001H. Honors College Forum. 1 Hour.
The Honors College Forum centers on contemporary issues sparking intense national and international media scrutiny. Faculty experts partner with honors students in a seminar-style, discussion format. Topics vary by semester. Pre- or Corequisite: Honors standing. (Typically offered: Fall and Spring) May be repeated for degree credit.

## HNRS 3011H. Honors College Retro Readings. 1 Hour.

Honors College Retro Readings centers on classic authors read through a contemporary lens. Faculty experts partner with honors students from all undergraduate colleges in a seminar-style discussion format. Topics vary by semester. Pre- or Corequisite: Honors standing. (Typically offered: Fall and Spring) May be repeated for degree credit.

## HNRS 3501H. Honors Trajectory Exploration. 1 Hour.

Introduces students to areas of professional life with a special emphasis on emerging and competitive fields or areas of competency. Courses mix theoretical bases of an area with cutting-edge application by practitioners. Prerequisite: Departmental consent. Pre- or corequisite: Honors standing. (Typically offered: Fall and Spring)

## HNRS 3513 H . Honors College Special Topics. 3 Hours.

Honors College Special Topics center on either issues of contemporary interest or on a fresh approach to a well-established area of study. In either case, these courses are marked by their interdisciplinary approach, seminar-style discussion format, and students delivering one or more academic products showing both their understanding of the topic and of interdisciplinary approaches. Topics vary by semester. May be repeated for degree credit. Pre- or corequisite: Honors standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

## HNRS 3801H. Honors College Catapult. 1 Hour.

This course is designed to place ambitious, high-achieving students on a trajectory toward nationally competitive awards and/or graduate and professional programs of study. Students in the course will prepare their academic resume, construct a personal statement, and answer essay prompts as each component may relate to nationally competitive awards and graduate or professional school admission. Additional topics include studying for advanced tests such as the Graduate Record Exam (GRE), building a graduate or professional school timeline, and preparing for interviews. Learning outcomes will be achieved through active engagement in writing and compilation exercises, research, and discussion. Prerequisite: Honors standing. (Typically offered: Spring)

## HNRS 3901H. Honors Med School. 1 Hour.

Introduces students to the process of applying to medical school while dispelling several common myths about the practice of medicine. Seminar participants also explore pressing issues facing doctors these days, including the opioid crisis, the increasing elderly population, and the rise of corporate healthcare. Prerequisite: Departmental consent. Pre- or Corequisite: Honors standing. (Typically offered: Spring)

## HNRS 3911H. Honors Law School. 1 Hour.

Introduces students to the process of applying to law school while dispelling several common myths about the practice of law. Seminar participants also explore pressing issues facing lawyers and the variety of careers open to them, including criminal and civil and governmental and public interest practice. Prerequisite: Departmental consent. Pre- or corequisite: Honors standing. (Typically offered: Spring)

HNRS 4013H. Honors College Signature Seminar. 3 Hours.
The Honors College Signature Seminar Series features leading scholars who will offer courses bridging multiple colleges and having broad appeal. These signature seminars will develop from the current research of the faculty who offer them, thereby inviting honors students into their scholarly world at a very high level. The goal of the signature seminar series is to spark undergraduate research projects and to stimulate career trajectories, including nationally competitive fellowships and/or admittance to graduate and professional programs. Topics vary by semester. Eligible students must be in good standing in the Honors College. Pre- or Corequisite: Honors standing. Prerequisite: Departmental consent. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.
HNRS 402VH. Honors College Research. 1-6 Hour.
The Honors College Research hours are intended for undergraduates who have already begun their research on campus and will travel domestically for a significant period of time to enhance and extend this research. An on-campus faculty mentor and a research mentor on-site are required. Prerequisite: Departmental consent. Pre- or Corequisite: Honors standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HNRS 403VH. Honors College International Research. 1-6 Hour.
The Honors College International Research hours are intended for undergraduates who have already begun their research on campus and will travel abroad for a significant period of time to enhance and extend this research. An on-campus faculty mentor and a research mentor on-site are required. Prerequisite: Departmental consent. Pre or corequisite: Honors standing. (Typically offered: Irregular)

HNRS 404VH. Honors International Research Internship. 1-6 Hour.
The Honors College International Research Internships are intended for upperlevel undergraduates who undertake an international research internship, usually with funding from the Honors College. An on-campus faculty mentor and a research mentor on-site are required. Prerequisite: Departmental consent. Pre- or corequisite: Honors standing. (Typically offered: Irregular) May be repeated for degree credit.
HNRS 405VH. Honors Domestic Internship. 1-6 Hour.
The Honors College Domestic Internship hours are intended for upper-level undergraduates who undertake a domestic internship, usually with funding from the Honors College. An on-campus faculty mentor will approve any needed preparatory work in advance of the internship. (Typically offered: Irregular) May be repeated for degree credit.

## Interdisciplinary Studies

## Mission and Objectives

The University of Arkansas provides several options for students to pursue education more broadly than one field of undergraduate study might allow, including interdisciplinary and multidisciplinary programs. These programs allow broader instruction and research opportunities, especially in emerging fields that haven't reached the academic breadth to constitute a full academic department or in cases in which collaboration between one or more departments allows faculty from each existing department to contribute to the interdisciplinary or multidisciplinary major. In the Catalog of Studies (http://catalog.uark.edu/catalogofstudies/), requirements for each interdisciplinary program are listed in the chapter of the college or school that oversees the program.

One interdisciplinary major - Data Science (p. 95) - and two interdisciplinary minors — Nanotechnology (p. 122) and Planning (p. 123) - are not administered by a single academic department. The minor in Nanotechnology is administered by the Materials Science and Engineering Program. The minor in Planning is jointly administered by the departments of Landscape Architecture and Political Science. The requirements for completing each minor are at their respective links.

Data scientists make sense of huge sets of data to help businesses, governments, nonprofits and other organizations make smarter decisions. The university's interdisciplinary Bachelor of Science in Data Science will prepare students for a successful career in data science with a strategic skill set, including the ability to:

- Use and apply state-of-the-art technologies for data representation, retrieval, manipulation, storage, governance, understanding, analysis, privacy, and security.
- Develop descriptive, predictive and prescriptive models to abstract complex systems and organizational problems, and to use computational methods to draw data-supported conclusions.
- Use foundational knowledge and apply critical thinking skills to identify and solve problems, make decisions, and visualize data, all with an awareness of societal and ethical impacts.
- Adapt analytics concepts to interpret and communicate findings and implications to senior decision-makers.
- Work effectively in an interdisciplinary team and transfer findings between knowledge domains and to others with no domain experience.
- Communicate using technical and non-technical language in writing and verbally.

Three colleges at the university - the College of Engineering, the Fulbright College of Arts and Sciences, and the Sam M. Walton College of Business - contribute expertise to the overall major while providing deeper insight into the concentrations they offer, including:

- Accounting Analytics
- Bioinformatics
- Biomedical and Healthcare Informatics
- Business Data Analytics
- Computational Analytics
- Cybersecurity Analytics
- Data Science Statistics
- Geospatial Data Analytics
- Music Industry Data Analytics
- Operations Analytics
- Social Data Analytics
- Supply Chain Analytics

## Requirements for B.S. in Data Science with Accounting Analytics Concentration

Below are the general requirements for a Bachelor of Science degree with a major in Data Science, followed by specific requirements for the Accounting Analytics Concentration. Below those is a recommended eight-semester plan to achieve those requirements in a timely fashion.

## Requirements for B.S. in Data Science

Each student in Data Science is required to complete 120 hours of coursework including the state minimum core (p. 81). To be eligible for graduation, all students must complete at least 60 hours of Data Science (DTSC) Core required classes at the University of Arkansas. Each student in Data Science is also required to complete an additional 20-21 hours (depending on the student's chosen concentration) of required and elective concentration courses to meet the requirements for a concentration.

Additional opportunities are available to enhance the educational experience of students in these areas. Students should consult their academic adviser for recommendations.

## Total Units in Sequence:

${ }^{1}$ Students have demonstrated successful completion of the learning indicators identified for learning outcome 2.1, by meeting the prerequisites for MATH 2554.
${ }^{2}$ Students must complete the State Minimum Core requirements (https://nam03.safelinks.protection.outlook.com/?url=https\%3A\%2F \%2Fnextcatalog.uark.edu\%2Fundergraduatecatalog\%2Fgened \%2Fstateminimum\%2F\&data=02\%7C01\%7Cagriffin\%40uark.edu \%7Ce4e632415f9b49eda9bf08d7f5c20b91\%7C79c742c4e61c4fa5be89a3cb566a \%2F1XG8924jwOx8pTlw8IWNAGp0s\%3D\&reserved=0) as outlined in the Catalog of Studies. The courses that meet the state minimum core also fulfill many of the university's General Education requirements (https://nam03.safelinks.protection.outlook.com/?url=https\%3A\%2F \%2Fnextcatalog.uark.edu\%2Fundergraduatecatalog\%2Fgened \%2Fgeneraleducation\%2F\&data=02\%7C01\%7Cagriffin\%40uark.edu \%7Ce4e632415f9b49eda9bf08d7f5c20b91\%7C79c742c4e61c4fa5be89a3cb566a \%2BDWRVEfAqIMsYNX4KXEgX2JdEJJY7Go\%3D\&reserved=0), although there are additional considerations to satisfy the general education learning outcomes. Students are encouraged to consult with their academic adviser when making course selections.
${ }^{3}$ Students are required to complete 40 hours of upper-division courses (3000-4000 level). It is recommended that students consult with their adviser when making course selections.
${ }^{4}$ Data Science Statistics and Computational Analytics Concentration students are advised to select STAT 3013/STAT 3003 to meet the prerequisites required in the concentration.

## Requirements for B.S. in Data Science with Bioinformatics Concentration

Below are the general requirements for a Bachelor of Science degree with a major in Data Science, followed by specific requirements for the Bioinformatics Concentration. Below those is a recommended eightsemester plan to achieve those requirements in a timely fashion.

## Requirements for B.S. in Data Science

Each student in Data Science is required to complete 120 hours of coursework including the state minimum core (p. 81). To be eligible for graduation, all students must complete at least 60 hours of Data Science (DTSC) Core required classes at the University of Arkansas. Each student in Data Science is also required to complete an additional 20-21 hours (depending on the student's chosen concentration) of
required and elective concentration courses to meet the requirements for a concentration.

Additional opportunities are available to enhance the educational experience of students in these areas. Students should consult their academic adviser for recommendations.

## Total Units in Sequence:

${ }^{1}$ Students have demonstrated successful completion of the learning indicators identified for learning outcome 2.1, by meeting the prerequisites for MATH 2554.
2 Students must complete the State Minimum Core requirements (p. 81) as outlined in the Catalog of Studies. The courses that meet the state minimum core also fulfill many of the university's General Education requirements (p. 72), although there are additional considerations to satisfy the general education learning outcomes. Students are encouraged to consult with their academic adviser when making course selections.
${ }^{3}$ Students are required to complete 40 hours of upper-division courses (3000-4000 level). It is recommended that students consult with their adviser when making course selections.
${ }^{4}$ Data Science Statistics and Computational Analytics Concentration students are advised to select STAT 3013/STAT 3003 to meet the prerequisites required in the concentration.

## Requirements for B.S. in Data Science with Biomedical and Healthcare Concentration

Below are the general requirements for a Bachelor of Science degree with a major in Data Science, followed by specific requirements for the Biomedical and Healthcare Concentration. Below those is a recommended eight-semester plan to achieve those requirements in a timely fashion.

## Requirements for B.S. in Data Science

Each student in Data Science is required to complete 120 hours of coursework including the state minimum core ( p .81 ). To be eligible for graduation, all students must complete at least 60 hours of Data Science (DTSC) Core required classes at the University of Arkansas. Each student in Data Science is also required to complete an additional 20-21 hours (depending on the student's chosen concentration) of required and elective concentration courses to meet the requirements for a concentration.

Additional opportunities are available to enhance the educational experience of students in these areas. Students should consult their academic adviser for recommendations.

| MATH 2603 or MATH 2803 is a pre-req for CSCE 4133 . |
| 2 Students have demonstrated successful completion of the learning |
| indicators identified for learning outcome 2.1, by meeting the |
| prerequisites for MATH 2554. |
| 3 Students must complete the State Minimum Core requirements |
| (p. 81) as outlined in the Catalog of Studies. The courses that meet |
| the state minimum core also fulfill many of the university's General |
| Education requirements (p. 72), although there are additional |
| considerations to satisfy the general education learning outcomes. |
| Students are encouraged to consult with their academic adviser when |
| making course selections. |
| 4tudents are required to complete 40 hours of upper-division courses |
| (3000-4000 level). It is recommended that students consult with their |
| adviser when making course selections. |
| 5 Data Science Statistics and Computational Analytics Concentration |
| students are advised to select STAT 3013/STAT 3003 to meet the |
| prerequisites required in the concentration. |

## Requirements for B.S. with Cybersecurity Data Analytics Concentration

Below are the general requirements for a Bachelor of Science degree with a major in Data Science, followed by specific requirements for the Cybersecurity Data Analytics Concentration. Below those is a recommended eight-semester plan to achieve those requirements in a timely fashion.

## Requirements for B.S. in Data Science

Each student in Data Science is required to complete 120 hours of coursework including the state minimum core (p. 81). To be eligible for graduation, all students must complete at least 60 hours of Data Science (DTSC) Core required classes at the University of Arkansas. Each student in Data Science is also required to complete an additional 20-21 hours (depending on the student's chosen concentration) of required and elective concentration courses to meet the requirements for a concentration.

Additional opportunities are available to enhance the educational experience of students in these areas. Students should consult their academic adviser for recommendations.

${ }^{1}$ Students have demonstrated successful completion of the learning indicators identified for learning outcome 2.1, by meeting the prerequisites for MATH 2554.
2 Students must complete the State Minimum Core requirements (p. 81) as outlined in the Catalog of Studies. The courses that meet the state minimum core also fulfill many of the university's General Education requirements (p. 72), although there are additional considerations to satisfy the general education learning outcomes. Students are encouraged to consult with their academic adviser when making course selections.
${ }^{3}$ Students are required to complete 40 hours of upper-division courses (3000-4000 level). It is recommended that students consult with their adviser when making course selections.
${ }^{4}$ Data Science Statistics and Computational Analytics Concentration students are advised to select STAT 3013/STAT 3003 to meet the prerequisites required in the concentration.

## Requirements for B.S. in Data Science with Music Industry Data Analytics Concentration Requirements for B.S. in Data Science

Each student in Data Science is required to complete 120 hours of coursework including the state minimum core (p. 81). To be eligible for graduation, all students must complete at least 60 hours of Data Science (DTSC) Core required classes at the University of Arkansas. Each student in Data Science is also required to complete an additional 20-21 hours (depending on the student's chosen concentration) of required and elective concentration courses to meet the requirements for a concentration.

Additional opportunities are available to enhance the educational experience of students in these areas. Students should consult their academic adviser for recommendations.

## Faculty

Alverson, Andrew James, Ph.D. (University of Texas at Austin), M.S. (lowa State University), B.S. (Grand Valley State University), Associate Professor, Department of Biological Sciences, 2012, 2018.
Barrett, David A., Ph.D., M.A. (University of Arkansas), B.A. (Hendrix College), Instructor, Department of Philosophy, 2014.
Cothren, Jackson David, Ph.D., M.S. (The Ohio State University),
B.S. (United States Air Force Academy), Professor, Department of

Geosciences, Leica Geosystems Chair in Geospatial Imaging, 2004, 2020.

Cronan, Timothy P., Ph.D. (Louisiana Tech University), M.S. (South Dakota State University), B.S. (University of Southwestern Louisiana), Professor, Department of Information Systems, M.D. Matthews Endowed Chair in Information Systems, 1979.
Cummings, Michael, Ph.D. (University of Minnesota), J.D. and M.P.A. (Brigham Young University), B.S. (Utah Valley), Assistant Professor, Department of Strategic, Entrepreneurship and Venture Innovation, 2017.
Fugate, Brian, Ph.D., M.B.A., B.S. (University of Tennessee), Professor, J.B. Hunt Transport Department of Supply Chain Management, Oren Harris Chair in Transportation, 2015, 2018.
Gauch, John Michael, Ph.D. (University of North Carolina at Chapel Hill), M.Sc., B.Sc. (Queen's University, Canada), Professor, Department of Computer Science and Computer Engineering, 2008.
Gruenewald, Jeffrey A., Ph.D. (Michigan State University), Professor, Department of Sociology and Criminology, 2019, 2022.
Harris, Casey Taggart, Ph.D., M.A. (Pennsylvania State University), B.S. (Texas A\&M University), Professor, Department of Sociology and Criminology, 2011, 2023.
Keiffer, Elizabeth, Ph.D., M.A. (University of Arkansas), B.S. (East Central University), Teaching Assistant Professor, Department of Information Systems, 2016, 2019.
Nakarmi, Ukash, Ph.D. (University at Buffalo), M.S. (Oklahoma State University), Assistant Professor, Department of Computer Science and Computer Engineering, 2020.
Pohl, Edward A., Ph.D., M.S.R.E. (University of Arizona), M.S.S.E. (Air Force Institute of Technology), M.S.E.M. (University of Dayton), B.S.E.E. (Boston University), Professor, Department of Industrial Engineering, Twenty-First Century Professorship in Engineering, 2004, 2013.
Rao, Raj R., Ph.D. (University of Georgia), M.S. (University of Texas), M.Sc., B.E. (Birla Institute of Technology and Sciences, India), Professor, Department of Biomedical Engineering, 2016.
Richardson, Vernon J., Ph.D. (University of Illinois-Urbana-Champaign), M.B.A., B.S. (Brigham Young University), Distinguished Professor, William Dillard Department of Accounting, G. William Glezen Jr. Endowed Chair in Accounting, 2005, 2016.
Ridge, Jason, Ph.D., M.A., B.A. (Oklahoma State University), Associate Professor, Department of Strategic, Entrepreneurship and Venture Innovation, 2015, 2017.
Robinson, Samantha, Ph.D., M.S., B.S. (University of Arkansas), Teaching Associate Professor, Department of Mathematical Sciences, Julia A. Hicks Chair, 2015, 2022.
Rosales, Claudia, Ph.D., M.S. (University of Cincinnati), B.S.
(Universidad Rafael Landivar), Assistant Professor, J.B. Hunt Transport Department of Supply Chain Management, 2021.
Rossetti, Manuel D., Ph.D., P.E., M.S.I.E. (The Ohio State University), B.S.I.E. (University of Cincinnati), University Professor, Department of Industrial Engineering, 1999, 2022.
Schubert, Karl, Ph.D. (University of Arkansas), M.S.Ch.E. (University of Kentucky), B.S.Ch.E (University of Arkansas), Professor of Practice, Department of Industrial Engineering, 2016.
Sullivan, Kelly M., Ph.D. (University of Florida), M.S.I.E., B.S.I.E.
(University of Arkansas), Associate Professor, Department of Industrial Engineering, 2012, 2019.
Wu, Xintao, Ph.D. (George Mason University), M.E. (Chinese Academy of Space Technology), B.S. (University of Science and Technology of China), Professor, Department of Computer Science and Computer Engineering, Charles D. Morgan/Acxiom Graduate Research Chair, 2014, 2019.

## Courses

DASC 1003. Introduction to Data Science. 3 Hours.
Introduction to Data Science is a course providing an overview of Data Science and preparation of Data Science First Year students for the Data Science program and for choosing one of the Data Science program concentrations. Corequisite: MATH 2554 or MATH 2554 C or MATH 2445. Prerequisite: Students must be a DTSCBS or DTSCFR major. (Typically offered: Fall)

## DASC 1003H. Honors Introduction to Data Science. 3 Hours.

Introduction to Data Science is a course providing an overview of Data Science and preparation of Data Science First Year students for the Data Science program and for choosing one of the Data Science program concentrations. Corequisite: MATH 2554 or MATH 2554C or MATH 2445. Prerequisite: Students must have honors standing and be a DTSCBS or DTSCFR major. (Typically offered: Fall) This course is equivalent to DASC 1003.

## DASC 1011. Success in Data Science Studies. 1 Hour.

This course provides preparation for Data Science First Year students for the Data Science program and for learning about University campus resources for students. This course is focused on students who are not MATH 2554 Calculus I or MATH 2445 Calculus I with Review ready. Prerequisite: Students must be a Data Science Major. (Typically offered: Fall)

## DASC 1104. Programming Languages for Data Science. 4 Hours.

Programming Languages for Data Science provides a semester-long introduction to basic concepts, tools, and languages for computer programming using Python and R , two powerful programming languages used by data scientists. This class will introduce students to computer programming and provide them with the basic skills and tools necessary to efficiently collect, process, analyze, and visualize datasets. Students will gain hands-on experience with de novo programming in R and Python, finding and utilizing packages, and working in both interactive (Jupyter and RStudio) and non-interactive (Unix) environments. Corequisite: Lab component. Prerequisite: Students must be a DTSCBS or DTSCFR major. (Typically offered: Fall)
DASC 1204. Introduction to Object Oriented Programming for Data Science. 4 Hours.
Introduction to Object Oriented Programming for Data Science, introduces objectoriented programming in JAVA. It covers object-oriented programming elements and techniques in JAVA, such as primitive types and expressions, basic I/O, basic programming structures, abstract data type, object class and instance, Methods, Java File I/O, object inheritance, collections and composite objects, advanced input / output: streams and files, and exception handling. Students will gain hands-on programming experience using JAVA. Corequisite: Lab component. Prerequisite: DASC 1104 and must be a DTSCBS or DTSCFR major. (Typically offered: Spring)

DASC 1223. Role of Data Science in Today's World. 3 Hours.
Role of Data Science in Today's World is a survey course providing an overview of the Data Science Curriculum and an introduction to the essential elements of data science: data collection and management; summarizing and visualizing data; basic ideas of statistical inference; predictive analytics and machine learning. Students will continue their hands-on experience using the Python and R programming languages and Jupyter notebooks.Prerequisite: DASC 1003 and DASC 1104 and must be a DTSCBS or DTSCFR major. (Typically offered: Spring)
DASC 1223H. Honors Role of Data Science in Today's World. 3 Hours.
Role of Data Science in Today's World is a survey course providing an overview of the Data Science Curriculum and an introduction to the essential elements of data science: data collection and management; summarizing and visualizing data; basic ideas of statistical inference; predictive analytics and machine learning. Students will continue their hands-on experience using the Python and R programming languages and Jupyter notebooks. Prerequisite: DASC 1003, DASC 1104, honors standing and must be a DTSCBS or DTSCFR major. (Typically offered: Spring)
This course is equivalent to DASC 1223.

DASC 188V. Special Topics in Data Science. 1-6 Hour.
Special Topics in Data Science is a course for data science topics not covered in other courses. Corequisite: Lab component. Prerequisite: Students must be a DTSCBS or DTSCFR major and Instructor Permission Only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

DASC 188VH. Honors Special Topics in Data Science. 1-6 Hour.
Special Topics in Data Science is a course for data science topics not covered in other courses. Corequisite: Lab component. Prerequisite: Students must be a DTSCBS or DTSCFR major, have honors standing and by instructor permission only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.
This course is equivalent to DASC 188 V .

## DASC 2103. Data Structures \& Algorithms. 3 Hours.

Data Structures \& Algorithms focuses on fundamental data structures and associated algorithms for computing and data analytics. Topics include the study of data structures such as linked lists, stacks, queues, hash tables, trees, and graphs, recursion, their applications to algorithms such as searching, sorting, tree and graph traversals, divide-and-conquer, greedy algorithms, and dynamic programming, and the theory of NP-completeness. Students will gain hands-on experience using Python or Java. Prerequisite: DASC 1204 and must be a DTSCBS major. (Typically offered: Spring)

DASC 2113. Principles and Techniques of Data Science. 3 Hours.
Principles and Techniques in Data Science is an intermediate semester-long data science course that follows an overview of data science in today's world. This class bridges between introduction to data science and upper division data science courses as well as methods courses in other concentrations. This class equips students with essential basic elements of data science, ranging from database systems, data acquisition, storage and query, data cleansing, data wrangling, basic data summarization and visualization, and data estimation and modeling. Students will gain hands-on experience using Python and various packages in Python. Corequisite: Lab component. Prerequisite: MATH 2564 and student must be a DTSCBS major. (Typically offered: Fall)
DASC 2133. Data Privacy \& Ethics. 3 Hours.
Data Privacy and Ethics (DASC 2133) explores the intersection of ethics and contemporary (big) data analytics. In particular, we will discuss how data analytics impacts ethical issues like privacy, autonomy, transparency, discrimination, data ownership, and justice, while also investigating its impact on the cohesiveness of society and democracy. Pre- or Corequisite: DASC 1001 and must be a DTSCBS or DTSCFR major. (Typically offered: Fall)

DASC 2203. Data Management and Data Base. 3 Hours.
Data Management and Data Base focuses on the investigation and application of data science database concepts including DBMS fundamentals, database technology and administration, data modeling, SQL, data warehousing, and current topics in modern database management. Prerequisite: MATH 2564, DASC 1204 and students must be a DTSCBS major. (Typically offered: Spring)

## DASC 2213. Data Visualization and Communication. 3 Hours.

Data Visualization and Communication is a seminar providing an essential element of data science: the ability to effectively communicate data analytics findings using visual, written, and oral forms. Students will gain hands-on experience using data visualization software and preparing multiple formats of written reports (technical, social media, policy) that build a data literacy and communication toolkit for interdisciplinary work. In essence, this is a course emphasizing finding and telling stories from data, including the fundamental principles of data analysis and visual presentation conjoined with traditional written formats. Prerequisite: DASC 1104 and DASC 1222 and students must be a DTSCBS major. (Typically offered: Fall)

## DASC 2594. Multivariable Math for Data Scientists. 4 Hours.

Multivariable Mathematics for Data Scientists provides an in depth look at the multivariate calculus and linear algebra necessary for a successful understanding of modeling for data science. Students will gain an understanding of the mathematical and geometric concepts used in optimization and scientific computation using mathematical and computational techniques. At the end of the course, students will be equipped with the calculus and linear algebra skills and knowledge to be successful in courses in optimization and advanced data science methods. Corequisite: Lab component. Prerequisite: MATH 2564 and DASC 1104 and student must be a DTSCBS major. (Typically offered: Fall)

## DASC 290V. Special Topics in Data Science. 1-6 Hour.

Special Topics in Data Science is a course for data science topics not covered in other courses. Prerequisite: Students must be a DTSCBS or DTSCFR major and Instructor Permission Only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

## DASC 290VH. Honors Special Topics in Data Science. 1-6 Hour.

Special Topics in Data Science is a course for data science topics not covered in other courses. Prerequisite: Honors standing and students must be a DTSCBS or DTSCFR major and Instructor Permission Only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.
This course is equivalent to DASC 290 V .
DASC 3103. Cloud Computing and Big Data. 3 Hours.
Cloud Computing and Big Data covers: introduction to distributed data computing and management, MapReduce, Hadoop, cloud computing, NoSQL and NewSQL systems, Big data analytics and scalable machine learning, real-time streaming data analysis. Students will gain hands-on experience using Amazon AWS, MongoDB, Hive, and Spark. Prerequisite: DASC 2594 and DASC 2203 and student must be a DTSCBS major. (Typically offered: Fall)

## DASC 3103H. Honors Cloud Computing and Big Data. 3 Hours.

Cloud Computing and Big Data covers: introduction to distributed data computing and management, MapReduce, Hadoop, cloud computing, NoSQL and NewSQL systems, Big data analytics and scalable machine learning, real-time streaming data analysis. Students will gain hands-on experience using Amazon AWS, MongoDB, Hive, and Spark. Prerequisite: DASC 2594, DASC 2203, honors standing and student must be a DTSCBS major. (Typically offered: Fall) This course is equivalent to DASC 3103.

## DASC 3203. Optimization Methods in Data Science. 3 Hours.

Optimization Methods in Data Science is an advanced mathematical course providing the foundations and concepts of optimization that are essential elements of machine learning algorithms in data science, ranging from mathematical optimization to convex optimization to unconstrained and constrained optimization to nonlinear optimization to stochastic optimization. Students will gain hands-on experience using Python and various optimization packages in Python. Prerequisite: DASC 2113 and DASC 2594 and student must be a DTSCBS major. (Typically offered: Spring)

## DASC 3213. Statistical Learning. 3 Hours.

Statistical Learning is a course providing an in depth look at the theory and practice of applied linear modeling for data science: including model building, selection, regularization, classification and prediction. Students will gain hands-on experience using statistical software to learn from data using applied linear models. Prerequisite: DASC 1104 and ((MATH 3013 and STAT 3003) or (INEG 2314 and INEG 2323)) and student must be a DTSCBS major. (Typically offered: Spring)

DASC 3223. Cyber Crime and Cyber Terrorism. 3 Hours.
Cyber Crime and Cyber Terrorism (CCCT) is an overview of the study of cybercrime and cyber terrorism for students of data science, criminology, and law discussing crimes committed via Internet, ranging from various white-collar financial crimes to the spread of viruses, malicious code, stalking, bullying, and web-based exploitation. Criminological, social-psychological explanations will be examined and the investigative and legal strategies employed to combat cyber-crime and cyber terrorism will be discussed. Prerequisite: DASC 2113 and must be a DTSCBS major. (Typically offered: Fall)

## DASC 390V. Special Topics in Data Science. 1-6 Hour.

Special Topics in Data Science is a course for data science topics not covered in other courses. Prerequisite: Student must be a DTSCBS or DTSCFR major and by Permission Only. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

DASC 390VH. Honors Special Topics in Data Science. 1-6 Hour.
Special Topics in Data Science is a course for data science topics not covered in other courses. Prerequisite: Student must have honors standing, be a DTSCBS or DTSCFR major and by permission only. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
This course is equivalent to DASC 390V
DASC 400VH. Honors Thesis in Data Science. 1-3 Hour.
Honors Thesis in Data Science (DASC 400VH) is a course to develop an Honors Thesis in Data Science. The Honors Thesis can be an independent thesis or can be related to the Data Science Practicum I and II Courses Project. Prerequisite Student must be a DTSCBS major, have honors standing, and by Permission Only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

## DASC 4113. Machine Learning. 3 Hours.

Machine learning covers: logistic regression, ensemble methods, support vector machines, kernel methods, neural networks, Bayesian inference, reinforcement learning, learning theory, and their applications in text, image, and web data processing. Students will gain hands-on experience of developing machine learning algorithms using Python and scikit-learn. Prerequisite: DASC 2103 and DASC 3203 and student must be a DTSCBS major. (Typically offered: Fall)

DASC 4113H. Honors Machine Learning. 3 Hours.
Machine learning covers: logistic regression, ensemble methods, support vector machines, kernel methods, neural networks, Bayesian inference, reinforcement learning, learning theory, and their applications in text, image, and web data processing. Students will gain hands-on experience of developing machine learning algorithms using Python and scikit-learn. Prerequisite: DASC 2103, DASC 3203, honors standing and student must be a DTSCBS major. (Typically offered: Fall) This course is equivalent to DASC 4113.

DASC 4123. Social Problems in Data Science and Analytics. 3 Hours.
This course explores the ways data analytics and data science are impacted by or intersect with issues of social justice, poverty and economic inequality, racial and ethnic relations, gender, crime, education, health and healthcare, and other contemporary social problems. Prerequisite: DASC 1222 and student must be a DTSCBS major. (Typically offered: Fall)

DASC 4533. Information Retrieval. 3 Hours.
Information Retrieval is a course providing expertise in processing unstructured data as a key component of data science. It covers text processing, file structures, ranking algorithms, query processing, and web search. Students will gain handson experience developing their own search engine from scratch, using Python, C, C++, or Java on a Linux server and making their search engine web accessible. Note: Prior user-level knowledge of Linux for file and directory management and remote login is required for this course. Corequisite: Lab component. Prerequisite: DASC 2103 and student must be a DTSCBS major. (Typically offered: Irregular)

DASC 4892. Data Science Practicum I. 2 Hours
Application of data science, analytics, business intelligence, data mining, machine learning, and data visualization to existing problems. Data Science techniques using current and relevant software and problem-solving methods are applied to current problems for presentation to management. This is the first semester of the required full-year multi-college interdisciplinary practicum using real-world data to solve realworld problems. Prerequisite: DASC 2113, DASC 2213, DASC 3203, ((STAT 3013 and STAT 3003) or (INEG 2314 and INEG 2323)), and student must be a DTSCBS major. Pre- or Corequisite: DASC 3213, DASC 4113, and DASC 4123. (Typically offered: Fall)

## DASC 4892H. Honors Data Science Practicum I. 2 Hours.

Application of data science, analytics, business intelligence, data mining, machine learning, and data visualization to existing problems. Data Science techniques using current and relevant software and problem-solving methods are applied to current problems for presentation to management. This is the first semester of the required full-year multi-college interdisciplinary practicum using real-world data to solve realworld problems. Prerequisite: DASC 2113, DASC 2213, DASC 3203, ((STAT 3013 and STAT 3003) or (INEG 2314 and INEG 2323)), honors standing and the student must be a DTSCBS major. Pre- or Corequisite: DASC 3213, DASC 4113, and DASC 4123. (Typically offered: Fall)
This course is equivalent to DASC 4892.
DASC 490V. Special Topics in Data Science. 1-6 Hour.
Special Topics in Data Science is a course for data science topics not covered in other courses. Prerequisite: Students must be a DTSCBS major and Instructor Permission Only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

## DASC 490VH. Honors Special Topics in Data Science. 1-6 Hour.

Special Topics in Data Science is a course for data science topics not covered in other courses. Prerequisite: Honors standing and students must be a DTSCBS major and Instructor Permission Only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.
This course is equivalent to DASC 490 V .
DASC 4993. Data Science Practicum II. 3 Hours.
Application of data science, analytics, business intelligence, data mining, machine learning, and data visualization to existing problems. Data Science techniques using current and relevant software and problem-solving methods are applied to current problems for presentation to management. This is the second semester of the required full-year multi-college interdisciplinary practicum using real-world data to solve real-world problems. Corequisite: Lab component. Prerequisite: DASC 4892 with a grade of C or better and student must be a DTSCBS major. (Typically offered: Spring)

## DASC 4993H. Honors Data Science Practicum II. 3 Hours.

Application of data science, analytics, business intelligence, data mining, machine learning, and data visualization to existing problems. Data Science techniques using current and relevant software and problem-solving methods are applied to current problems for presentation to management. This is the second semester of the required full-year multi-college interdisciplinary practicum using real-world data to solve real-world problems. Corequisite: Lab component. Prerequisite: DASC 4892 with a grade of $C$ or better, and student must be a DTSCBS major, and have honors standing. (Typically offered: Spring)
This course is equivalent to DASC 4993.

## English Language and Cultural Studies (ELAC)

Christa Hestekin
Associate Dean of the Graduate School and International Education Chair of English Language and Cultural Studies Program
213 Gearhart Hall
479-575-3416

Email: chesteki@uark.edu (chesteki@uark.ed)
English Language and Cultural Studies Website (https://elac.uark.edu/)
A unit of the Graduate School and International Education, the English Language and Cultural Studies program supports international graduate and undergraduate students as well as visiting and exchange students/ scholars by providing supplementary English language and culture courses. Program faculty support student success and assist students transition to the University of Arkansas.

## Courses

ELAC 000V. University Connections Intensive English. 1-9 Hour.
This class is part of the Intensive English Program designed for students who are in their first semester of the University Connections three-semester program. Not for degree credit. Prerequisite: Language assessment required. (Typically offered: Irregular)

## ELAC 0011. Writing Workshop: Grammar through Editing. 1 Hour.

This class is designed to assist upper-intermediate to advanced non-native speakers of English improve their academic writing at the sentence level. Students' writing is analyzed for grammatical accuracy; students develop strategies for editing their writing more independently and learn to produce clearer, more grammatically correct writing. Not for degree credit. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / UofA ELPT (writing) / TOEFL Alternative. (Typically offered: Fall and Spring)

ELAC 0103. University Connections Intensive English Level I. 3 Hours.
Students new to English will be introduced to the letters and sounds of the alphabet, fundamental grammar structures for conversation and writing, and essential vocabulary on themes (relevant to community, individual and academic entities), and cultural distinctions in the American university system. Applied language instruction and assignments will be supplemented by and supported with practical training in educational technology and investigation through special topics. (Typically offered: Fall, Spring and Summer)

## ELAC 0203. University Connections Intensive English Level II. 3 Hours.

Based on placement or successful completion of Level I (ELAC 0103) coursework, emerging learners continue to develop reading-for-learning and writing-forcommunication strategies; extend vocabulary on themes relating to community, individual and academic development, and cultural distinctions of the United States; and focus on advancing grammar structures for conversation and writing. Applied language instruction and assignments will be supplemented by and supported with practical training in educational technology and investigation through special topics. (Typically offered: Fall, Spring and Summer)

## ELAC 0303. University Connections Intensive English Level III. 3 Hours.

 Based on placement or successful completion of Level II (ELAC 0203) coursework, intermediate learners extend reading-for-learning and writing-for-communication strategies to more academic contexts; extend vocabulary and word form knowledge (on themes relating to community, individual and academic development, and cultural distinctions of the United States); and focus on applying advanced grammar structures to conversation and writing. Applied language instruction and assignments will be supplemented by and supported with practical training in educational technology and investigation through special topics. (Typically offered: Fall, Spring and Summer)ELAC 0403. University Connections Intensive English Level IV. 3 Hours. Based on placement or successful completion of Level III (ELAC 0303) coursework, intermediate learners continue to develop strategies for comprehension and communication in all language skills; to extend vocabulary to concepts related to social, environmental and global themes in academics; and to explore the cultural distinctions of the United States. Advancing grammar structures for conversation and writing extend to sophisticated forms of support and persuasion. Applied language instruction and assignments will be supplemented by and supported with practical training in educational technology and investigation through special topics. (Typically offered: Fall, Spring and Summer)

## ELAC 0503. University Connections Intensive English Level V. 3 Hours.

Based on placement or successful completion of Level IV (ELAC 0403) coursework, this course incorporates critical thinking and processing skills for improved reading and listening comprehension, and accuracy and efficacy in writing and speaking. Vocabulary development advances with social, environmental and global themes.
Applied language instruction and assignments will be supplemented by and supported with practical training in educational technology and investigation through special topics. (Typically offered: Fall, Spring and Summer)
ELAC 0603. University Connections Intensive English Level VI. 3 Hours. Following placement or successful completion of Level V (ELAC 0503) coursework, highly effective writing skills and reading comprehension are solidified and integrated intensely at this advanced level. Through extended reading, writing and presentation assignments, students improve their ability to recognize and deliver main ideas, distinguish and produce persuasive support, and respond to content in a range of contexts. Applied language instruction and assignments will be supplemented by and supported with practical training in educational technology and investigation through special topics. (Typically offered: Fall, Spring and Summer)

ELAC 1023. Academic Writing Across Disciplines. 3 Hours.
The class is designed to improve the academic writing and critical thinking skills for non-native speakers of English in all fields. Through focused instruction and extensive practice, students will improve their academic lexicon, grammatical accuracy, discourse organization and fluency in formal academic writing. Not for degree credit in the Fulbright College of Arts and Sciences. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / UofA ELPT (writing) / TOEFL Alternative. (Typically offered: Fall and Spring)

## ELAC 1033. English Language through Mass Media. 3 Hours.

Students expand their communicative language skills through the study of news and media. By analyzing the messages and methods used in a variety of sources, students improve their listening, speaking, reading and writing skills. Students develop critical thinking skills as they evaluate and synthesize ideas from the texts. Not for degree credit in the Fulbright College of Arts and Sciences. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / UofA ELPT (writing) / TOEFL Alternative. (Typically offered: Fall and Spring)
ELAC 2012. English Phonology for Non-Native Speakers. 2 Hours. In this course students study the basic principles of phonetics and phonology of English in order to develop their ability to produce the standard American accents. Not for degree credit in the Fulbright College of Arts and Sciences. (Typically offered: Fall and Spring)

## ELAC 2023. Business English Communications. 3 Hours.

This is a course for non-native English speakers to develop their oral communication skills for professional business settings. From informal dialogues to formal business presentations, students learn appropriate verbal and non-verbal communication strategies and develop confidence to communicate effectively and comprehensibly. Not for degree credit in the Fulbright College of Arts and Sciences. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / UofA ELPT (writing) / TOEFL Alternative. (Typically offered: Fall and Spring)

ELAC 2043. Seminar in United States Culture, Communication, and Institutions. 3 Hours.
Through an in-depth study of American life, culture, communicative style and institutions, non-native speakers of English improve their oral and written communication skills. Not for degree credit in the Fulbright College of Arts and Sciences. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / UofA ELPT (writing) / GRE Analytical Writing / GMAT Analytical Writing / TOEFL Alternative. (Typically offered: Fall and Spring)

## ELAC 2053. Academic Presentations. 3 Hours.

For advanced non-native speakers of English to build skills and strategies for delivering effective, clear presentations in academic and professional settings. Students learn about organization, best use of visual aids, connecting with an audience, facilitating questions and answers, and intercultural issues that affect perception and comprehensibility. Not for degree credit in the Fulbright College of Arts and Sciences. Prerequisite: At the request of an instructor or through TOEFL (iBT) exam, spoken portion of the International English Language Testing System (IELTS), or the University of Arkansas Spoken Language Proficiency Test (SLPT). (Typically offered: Fall and Spring)

## Nanotechnology (NANO)

Matthew B. Leftwich
Director

mleftwi@uark.edu

## Nanotechnology Minor Faculty Coordinators and Curriculum Committee

- Gregory Salamo, Distinguished Professor, Physics
- Min Zou, Professor, Mechanical Engineering
- Jin-Woo Kim, Professor, Biological and Agricultural Engineering
- Raj Rao, Professor, Biological and Agricultural Engineering
- Karthik Nayani, Assistant Professor, Chemical Engineering
- Jingyi Chen, Professor, Chemistry and Biochemistry
- Fisher Yu, Professor, Electrical Engineering
- Steve Tung, Professor, Mechanical Engineering
- Po-Hao Adam Huang, Associate Professor, Mechanical Engineering
- Keisha Bishop Walters, Department Head and Professor, Chemical Engineering

The Nanotechnology minor is an interdisciplinary program that provides students with foundational knowledge and skills related to the emerging field of nanotechnology, including hands-on experience in several major areas of nanotechnology, such as synthesis of nanomaterials, nanoscale imaging, nanostructure assembly and manipulation, device and system integration, and performance evaluation. The Nanotechnology minor draws faculty expertise and coursework from the College of Engineering and the Fulbright College of Arts and Sciences and utilizes state-of-the-art equipment and facilities at the Institute for Nanoscience and Engineering. The Nanotechnology minor is intended to prepare participating students for a career in which nanotechnology is playing an increasingly important role, and increase students' research competitiveness for graduate studies. The Nanotechnology minor is designed to be accessible to students majoring in engineering, physics, or chemistry and biochemistry. It is open to all students who have the necessary prerequisites to enroll in the courses that constitute the minor.

## Requirements for the Nanotechnology Minor

Students wishing to participate in the Nanotechnology minor must declare participation formally. The students are required to meet with the faculty
coordinator of an individual department who will help the student to develop a list of courses suitable for the minor and a schedule for taking those courses. Examples of model programs for each participating department are given below.

Students need to take a total of 15 credit hours, which includes 6 credit hours of required courses and 9 credit hours of elective courses and must earn a grade of " C " or better for all courses used to fulfill the requirements of the Nanotechnology minor.

## Required Research Courses

Nanotechnology Research (Independent Study or Honors Thesis in
nanotechnology)
Students can choose from the following courses:
BENG 450V Special Problems
BENG 451VH Honors Thesis
BMEG 450VH Honors Thesis
BMEG 460V Individual Study
or BMEG 460Ydthors Individual Study
CHEG 488V Special Problems
CHEM 400V Chemistry Research
or CHEM 400Vdthors Chemistry Research
ELEG 488V Special Problems
MEEG 4903H Honors Mechanical Engineering Research
MEEG 492V Individual Study in Mechanical Engineering or MEEG 49:Honors Individual Study in Mechanical Engineering
PHYS 306V Projects
PHYS 399VH Honors
PHYS 498V Senior Thesis

## Elective Courses

A minimum of 9 hours of elective courses selected from the following: 9
BENG 3113 Measurement and Control for Biological Systems
or BENG 31 •Honors Measurement and Control for Biological Systems
BENG 3733 Transport Phenomena in Biological Systems
BENG 4743 Food and Bio-Product Systems Engineering
BENG 4123 Biosensors \& Bioinstrumentation
BENG 4743 Food and Bio-Product Systems Engineering
BMEG 3634 Biomaterials
BMEG 3824 Biomolecular Engineering
BMEG 4243 Advanced Biomaterials and Biocompatibility
BMEG 4873
CHEG 3713 Chemical Engineering Materials Technology
CHEG 5043 Colloid and Interface Science
CHEM 4123 Advanced Inorganic Chemistry I
CHEM 4213 Instrumental Analysis
CHEM 4283 Energy Conversion and Storage
CHEM 5443 Physical Chemistry of Materials
ELEG 4203 Semiconductor Devices
ELEG 4303 Introduction to Nanomaterials and Devices
MEEG 4303 Materials Laboratory
MEEG 4313 Introduction to Tribology
MEEG 5263 Introduction to Micro Electro Mechanical Systems
MEEG 5343 Computational Material Science

| PHYS 3213 | Electronics in Experimental Physics |

Urban and Regional Planning (PLAN)

Noah Billig, Landscape Architecture
WALK 304
nsbillig@uark.edu

## Requirements for Urban and Regional Planning Minor

A student who is interested in the Urban and Regional Planning minor should notify either the Departments of Landscape Architecture or Political Science and consult with their academic advisor. The minor consists of 18 hours of required and elective courses and subdivided into three
tiers: core courses, tier-one electives and tier-two electives. The minor's required and elective courses include:

## Required Core Courses:

| PLSC 4103 | Introduction to Urban Planning | 3 |
| :---: | :---: | :---: |
| LARC 5493 | Environmental Land Use Planning | 3 |
| Tier-One Electives |  | 6-12 |
| Select 6-12 hours from the following: |  |  |
| LARC-approved design studio focused on planning (may only count once) |  |  |
| LARC Advocacy Module focused on planning |  |  |
| ANTH 5113 | Anthropology of the City |  |
| PLSC 4173 | Community Development |  |
| PLSC 390V | Special Topics |  |
| HDFS 4603 | Environmental Sociology |  |
| GEOS 4073 | Urban Geography |  |
| PLSC 3253 | Urban Politics |  |
| LARC 4753 | Incremental Sprawl Repair |  |
| LARC 402V | Special Studies |  |
| SOCI 3153 | Urban Sociology |  |

Tier-Two Electives (up to six hours of electives may come from 0-6 the following options)

| LARC 4033 | Landscape Architecture Theory |
| :--- | :--- |
| GEOS 3043 | Sustaining Earth |
| GEOS 4393 | American Public Lands \& Policy |
| GEOS 4693 | Environmental Justice |
| LARC 5053 | Historic Landscape Preservation |
| ANTH 4443 | Cultural Resource Management I |
| ANTH 4603 |  |
| ENSC 3223 | Ecosystems Assessment |
| ENSC 3221L | Ecosystems Assessment Laboratory |
| ENSC 3933 | Environmental Ethics |
| ENSC 3413 | Principles of Environmental Economics |
| PLSC 4283 | Federalism and Intergovernmental Relations |
| ARCH 5493 | History of Urban Form |
| SCMT 3443 | DELIVER: Transportation and Distribution |

## Total Hours

## Dale Bumpers College of Agricultural, Food and Life Sciences

## Mission and Vision

The vision of the Dale Bumpers College of Agricultural, Food and Life Sciences is to lead Arkansas and the world by delivering pre-eminent programs in agricultural, food and life sciences that produce leaders through education, research and outreach.

The mission of the Dale Bumpers College of Agricultural, Food and Life Sciences is to improve the quality of life for Arkansans by preparing students for successful careers, conducting impactful research, promoting an inclusive and diverse culture, and sharing knowledge to promote viable
food and agricultural systems, sustainable environments, healthy families and vibrant communities.

## History and Organization

As the state's land-grant university, the University of Arkansas has the responsibility for leadership in teaching, research, and service in the agricultural and human environmental sciences. This responsibility is shared with the Division of Agriculture.

The Bumpers College is an integral component of the University of Arkansas and addresses the teaching responsibility of the land-grant university. Its roots lie in the First Morrill Act of 1862, which created the land-grant system by providing a grant of land to each state for the establishment of a college "where the leading objective shall be, without excluding other scientific and classical studies and including military tactics, to teach such branches of learning as are related to agriculture and the mechanical arts in such manner as the legislatures of the state may prescribe to promote the liberal and practical education of the industrial classes in the several pursuits and professions of life." Agricultural sciences have been taught at the University of Arkansas almost from the beginning of the institution in 1872. The university conferred the first degrees in agriculture in 1904.

Early instruction and outreach efforts focused on improving rural life for men, women, and children. Farm wives were interested in beautifying the home, food preparation and safety, and gardening. Foods and nutrition, bacteriology, chemistry, and other related subjects held a common scientific interest for both agriculture and home economics, so it naturally evolved that studies in home economics should develop within the realm of agricultural education. Domestic science classes were offered as early as 1909, and a department of home economics was established in 1913. The department was elevated to school status in 1994, and its name was changed to the School of Human Environmental Sciences.

The passage of the Hatch Act in 1887 and subsequent legislation made possible the Agricultural Experiment Station, the research component of the Division of Agriculture. Most faculty who teach in the Bumpers College also hold appointments in the Experiment Station and are able to incorporate active research into their teaching.

The dissemination of university research in agriculture and human environmental sciences is carried out by personnel in the Cooperative Extension Service, created by the Smith-Lever Act of 1914. Many Extension specialists also hold adjunct faculty status and bring their expertise to the teaching program.

It is this blending of teaching, research, and service functions that create a unique learning environment in the college. As students learn to relate basic areas of science to human needs, they study in laboratory-based classes and are taught in research facilities supported by the Division of Agriculture. Similarly, students are encouraged to intern with professionals in industry and governmental agencies, including the Cooperative Extension Service.

In recognition of the land-grant mission of the university and its commitment to serve the entire state, the Dale Bumpers College of Agricultural, Food and Life Sciences has worked cooperatively with numerous community colleges to facilitate the "seamless" transfer of students to the Bumpers College. Coordinated advising, recruiting, and curricula development are working goals of the Bumpers College and students interested in transferring while enrolled at a community college
should contact a member of the student services team in the Waldrip Student Center at 479-575-2252 or aflsdean@uark.edu.

## Facilities and Resources

The Dale Bumpers College of Agricultural, Food and Life Sciences is composed of nine academic departments and the School of Human Environmental Sciences. The college offers both undergraduate and graduate level degrees.

The Agricultural, Food and Life Sciences Building houses the Dean's Office, the Department of Agricultural Education, Communications and Technology, and the Department of Animal Science and serves as the headquarters for the college academic functions. There are six other buildings on campus operated by the college including the Agriculture Building, Human Environmental Sciences Building, Rosen Center, Plant Science Building, Agricultural Annex, and the Center of Excellence for Poultry Science. Additionally, the Don Tyson Center for Agricultural Sciences, the Food Science Building, Altheimer Laboratory, Abernathy Agriscience and Technology Center, the Crop Science Research Center, the Pauline Whitaker Animal Science Arena, and the Dorothy E. King Equine Science facilities are located at the Research and Extension Center north of the main campus. These serve as additional teaching laboratories or classroom facilities. Also, the Jean Tyson Child Development Study Center is managed by the college to provide instructional training for the child development program.

Most classrooms are equipped with "class capture" technology to allow students to view lectures online and to aid distance education courses. Students can receive academic assistance through resources provided by the Waldrip Student Center located in the Agriculture Building in room 205. Students can also seek assistance through the campus-wide Cordia Harrington Center for Excellence.

## College Scholarships

In addition to the scholarships awarded by the university, there are a number of scholarships available to students in agricultural and human environmental sciences made possible by generous gifts from many firms and individuals. To be considered for a college scholarship, students must first be admitted to the university. Most scholarships require students to be enrolled full-time, at least 12 credit hours per semester. A college scholarship application, which serves as an application to all available scholarships offered by the college and/or individual departments, must be submitted each year. For additional information, please see the Bumpers College Scholarship website (https:// bumperscollege.uark.edu/future-students/scholarships.php). Students may also explore outside scholarship options and should reference the University of Arkansas' Guide to Outside Scholarships for guidance. In addition, outside scholarship opportunities are shared with students by the college and some departments periodically through email and newsletter communications. For more information on scholarships, send questions to bumpschl@uark.edu.

## Student Organizations

Agricultural Business Club provides opportunities to socialize and fosters academic achievements. Students of all majors are welcome to join.

Agricultural Communicators of Tomorrow (ACT) allows members to gain professional and personal experiences in the agricultural communications industry. Members will have the opportunity to showcase their work within the chapter and at national conferences, create relationships with leaders in the profession, and work with college faculty
to strengthen their skill set in communications. Members will also have the chance to participate in fundraisers, chapter functions, and monthly meetings. Students from all majors are welcome to join.

Agricultural Systems and Technology Club is primarily for Ag Systems students, although it's open to all students who have an interest in technical types of things. The purpose of the club is to learn about opportunities for careers and internships, assist in Ag Systems activities, and have fun while doing so.

Association for American Textile Chemists and Colorists (AATCC) is an organization open to all students interested in the fashion industry.

Cattlemen's Association at the University of Arkansas is a professional and social club that focuses on the promotion, education, and advocacy of the cattle industry in Arkansas. All majors are welcome.

Collegiate 4-H provides leadership and service through the 4-H organization. Members will develop leadership and personal qualities while giving volunteer assistance to the Cooperative Extension Service (CES) in Arkansas, local 4-H clubs, the surrounding communities and within schools. This organization promotes positive learning while serving others, providing opportunities for educational fellowship and assisting with departmental community involvement. No previous 4-H experience is required to be a part of this organization. All majors welcome.

Collegiate FFA prepares members for leadership and cooperative roles in their professional careers; open to all majors.

Collegiate Farm Bureau is an opportunity for students to serve as ambassadors for agriculture. The $U$ of $A$ chapter members serve as the voice of agriculture on campus and in surrounding Fayetteville by promoting agriculture through professional networking, civic engagement, and community service. Students of all majors are welcome to join.

Crop, Soil and Environmental Science Club promotes stewardship of soil, water, and vegetation and sponsors projects and hands-on activities in a "living laboratory" setting to strengthen academic learning.

Food Science Club is comprised primarily of food science undergraduate and graduate students, but it is open to all students across campus.

Horticulture Club is for those interested in horticulture including floriculture, ornamentals, turf, small fruits and vegetables.

Isely-Baerg Entomology Club is open to those who wish to stimulate interest in the field of entomology, perform outreach programs for the public and to promote and encourage professional exchange of ideas in the field of entomology.

## Minorities in Agriculture, Natural Resources Related Sciences

 (MANRRS) promotes and implements initiatives that foster inclusion and advancement of members of ethnic/cultural groups under-represented in the agricultural and natural sciences and related fields in all phases of career preparation and participation.Block and Bridle Club is for students who are interested in any phase of animal science. Students with interests in horses, cattle, sheep, dogs, cats, or swine will find this club a good place to become involved.

Phi Upsilon Omicron is the professional honor society for human environmental sciences students. To be eligible for invitation to membership, a student must rank in the upper 35 percent of the class and be recognized for character and leadership.

Plant Pathology Graduate Student Association (PPGSA) is open to graduate students interested in plant pathology or related fields.

Poultry Science Club is open to all students interested in any phase of the poultry industry or related fields.

Poultry Science Graduate Student Association is open to all graduate students interested in any phase of the poultry industry or related fields.

Pre-Vet Club is for students interested in veterinary medicine and is especially designed for those students in the pre-veterinary medicine curriculum.

Professional Convention Managers Association provides students an opportunity to network with fellow event-passionate students, gain valuable education and experience, and participate in the planning, coordination and execution of events.

Student Dietetic Association (SDA) is open to any student interested in the field of dietetics. Activities are designed to inform members of the field of dietetics and to spread information to the public. Membership provides an excellent opportunity to interact with dietetics professionals and a change to work with the community.

Turf Club is a student organization open to all students interested in turfgrass management.

There are also numerous general organizations on the university campus, and students of the Dale Bumpers College of Agricultural, Food and Life Sciences participate in most of them. These include fraternities, sororities, honor and scholarship organizations, religious and music groups, sports organizations, and others.

Alpha Tau Alpha is a national honorary professional fraternity for those preparing to become teachers of agricultural education. Its mission is to develop a true professional spirit in the teaching of agriculture, to help train teachers of agriculture who shall be leaders in their communities, and to foster a fraternal spirit among students in teacher training in agricultural education.

Gamma Sigma Delta is the honor fraternity for graduating seniors, graduate students, faculty, and alumni of the Dale Bumpers College of Agricultural, Food and Life Sciences. Seniors must rank in the upper 25 percent of their class to be eligible for membership, but not more than 15 percent of the class may be elected for membership. The highest-ranking sophomore and the highest-ranking senior are recognized annually by the society.

## Academic Advising

Bumpers College advising mission is to enhance the educational experience and maximize opportunities for students. Therefore, we are committed to a strong, effective academic advising program. Advising plays a significant role in the developmental process of educating students for lifelong learning. The advising relationship is a partnership between student and advisor and is dependent on effective communication and regular contact. This partnership has shared responsibilities which culminate in student.

## Selection of a Major

A student who elects to major in some area of study in the college should plan the program with a Bumpers College adviser. While exploring students are welcome, early selection of a major will permit better planning and proper sequencing of courses. The student and Bumpers College adviser work closely to ensure that curriculum requirements are
met in a timely fashion. A student uncertain about a major will be advised as an exploring major (EXPL) through the Bumpers College Student Services Office located in the Waldrip Student Center office (AGRI 205).

## Degrees Offered

All entering students (including freshmen, international and transfer students) admitted to the University of Arkansas, Fayetteville, are eligible to pursue a degree program in the Dale Bumpers College of Agricultural, Food and Life Sciences. Undergraduate degrees offered are as follows:

- The Bachelor of Science in Agricultural, Food and Life Sciences (B.S.A.)
- The Bachelor of Science in Human Environmental Sciences (B.S.H.E.S.)

## Graduate Studies

The Graduate School of the university, in cooperation with the Dale Bumpers College of Agricultural, Food and Life Sciences, offers the Master of Science degree in each of its nine departments and in the School of Human Environmental Sciences, and an interdisciplinary Master of Science degree across three departments. Five doctoral degrees across the College and in addition, two interdisciplinary doctoral degrees. More detailed information regarding individual programs may be obtained by contacting the administrative office of each department, or by consulting the Graduate School Catalog.

## Accreditations

The degree program in nutrition is accredited by the Accreditation Council for Education in Nutrition and Dietetics of the Academy of Nutrition and Dietetics. The Jean Tyson Child Development Study Center is accredited by the National Association for the Education of Young Children (NAEYC). The Bachelor of Science in Agricultural, Food and Life Sciences (B.S.A.) in food science is accredited by the Institute of Food Technologists. Teacher education programs in agriculture and family and consumer sciences are coordinated with educational programs in the College of Education and Health Professions and are accredited by the National Council for Accreditation of Teacher Education (NCATE).

## Study Abroad

An educational experience outside the U.S. has become an integral component for today's student in higher education. The ability to compete and perform in the global arena requires an understanding of world cultures, economic systems, religions, trends, governments and politics. Students in the Bumpers College are encouraged to engage in study abroad that will lead to life-long partnerships, cultural awareness and understanding of the global dimensions of their majors. The college years provide the best opportunity for students to gain this understanding and experience through faculty-led study tours; summer, semester or yearlong study abroad; and international internships or research experiences which closely relate to their career goals.

The mission of the International Programs Office is to provide structured international experiences that enhance the marketability of students for career and academic opportunities through faculty driven, sustainable initiatives. The office serves to support faculty, students, international partners, and university leadership to increase opportunities for students to engage in faculty-led programs, internships, exchange programs, and study abroad activities that include research. The International Programs Office works closely with the UA Study Abroad Office and seeks opportunities for students to engage in international career preparation and workforce ready development. In 2022-2023, the International

Programs Office provided $\$ 29,000$ to support students and faculty, and 120 Bumpers College students are scheduled to study abroad. For more information, visit our website at bumpersinternational.uark.edu (http:// bumpersinternational.uark.edu).

Graduate opportunities are available for study in agricultural economics, agribusiness and related subjects via the UA's TransAtlantic Master of Science program at Ghent University, Belgium. Second language capability is helpful, but not required.

Bumpers College students interested in a study abroad program or internships with full-time status usually can maintain their scholarships while abroad. Limited funding is available for travel grants through Bumpers and Honors colleges.

## College Admission Requirements

All students seeking admission to the Dale Bumpers College of Agricultural, Food and Life Sciences must meet the general requirements for admission to the university. Students transferring from other colleges at the University of Arkansas or from other institutions are expected to meet the same entrance standard.

## College Academic Requirements

## All students must satisfy the following

 university graduation requirements1. Complete a minimum of 120 semester hours.
2. Fulfill State Minimum Core of 35 hours. Go to the State Minimum Core page ( p .81 ) for a list of courses that meet the requirements. Check requirements for each major as some majors require specific core courses as prerequisites to upper level courses.
3. Earn a grade-point average of 2.00 ("C" average) on all work attempted at the University of Arkansas.
4. All students must meet the university enrollment requirements found on the Academic Regulations (p. 86) page.

## Specific Degree Requirements

1. To fulfill the residency requirements of the degree of Bachelor of Science in Agricultural, Food and Life Sciences, students must complete a minimum of 40 hours of courses at the 3000-level or above. In addition, a minimum of 9 hours of broadening electives (Bumpers College courses taken outside the departmental code) must be completed.
2. To fulfill the residency requirements of the degree of Bachelor of Science in Human Environmental Sciences, students must complete a minimum of 40 hours within the School of Human Environmental Sciences at the University of Arkansas.
3. In addition to university requirements students must meet other defined degree requirements specific to each major and concentration. Bumpers College courses outside of the major may be included in degree requirements.
4. General electives will vary by major. Electives may be selected to meet the requirements for a minor; however, all elective credits are subject to approval of the academic adviser.

## Rules Applying to Course Work Used for Degree Credit

1. No credit will be given for duplicate coursework.
2. A maximum of six hours of internship and six hours of special problems may be counted for degree credit.
3. A total of six semester hours of elective credits in university band, chorus, judging teams, drama, debate, physical education, etc., may be counted toward a degree.
4. All transfer course work to be applied toward the degree must be an approved course listed in the transfer equivalency guide maintained by the Registrar's office. For courses not listed in the guide, petitions can be submitted to the Registrar's office by the student and his or her academic adviser.
5. All study abroad courses must be approved in advance in the student's academic department and by the Study Abroad Office if the credits earned in the courses are to be applied toward a degree.
6. Former students of the college who are readmitted after an absence of one year may be expected to meet the curriculum requirements in effect at the time of their readmission. Students should consult their academic adviser for degree planning before registering for classes.
7. Students interested in earning an additional bachelor's degree should refer to the university requirements (p. 86).

## Honors and Scholars

After the end of each semester, all colleges and schools in the university publish an honor roll of the names of the undergraduate students who achieve a 3.75 to 4.00 grade-point average. Students are eligible for the honor roll if they are carrying at least 12 semester hours normally required for graduation by their college for their respective year. This honor roll is the Dean's List.

In addition, a Chancellor's List is published each semester to recognize those undergraduate students who achieve a 4.00 grade-point average. Students must also be carrying at least 12 semester hours normally required for graduation to be eligible for the chancellor's list.

## Requirements to Graduate with Honors

Students who have demonstrated exceptional academic performance in baccalaureate degree while completing the Honors Program in the Bumpers College will be recognized at graduation by the honors designations of cum laude, magna cum laude, or summa cum laude. To earn such designation, students must meet the following criteria:

1. Must have completed at least one-half of his or her degree work at the University of Arkansas.
2. Must have at least a 3.5 GPA on University of Arkansas course work, computed at graduation.
3. Must successfully complete the Bumpers College Honors Program, which includes a minimum of 9 hours of honors course work, 6 hours of honors thesis, and a completed honors capstone research or creative project culminating in a written thesis documenting the project.
4. For cum laude, the student must achieve a cumulative $U$ of $A$ GPA of 3.5 to 3.74 .
5. For magna cum laude, the student must achieve a cumulative $U$ of $A$ GPA of 3.75 to 3.89 .
6. For summa cum laude, the student must achieve a cumulative $U$ of $A$ GPA of 3.9 to 4.00 .

These criteria may be evaluated and changed periodically by the College of Agricultural, Food and Life Sciences.

## Requirements to Graduate with Distinction

Students who have not completed the Bumpers College Honors Program, but have demonstrated excellent academic performance in baccalaureate degree programs in the Bumpers College will be recognized at graduation
by the designation of "with distinction," "with high distinction," and "with highest distinction." To earn this designation, students must meet the following criteria:

1. Must have completed at least one-half of his or her degree work at the University of Arkansas.
2. Must have at least a 3.5 GPA on University of Arkansas course work, computed at graduation.
3. For "with distinction," the student must achieve a cumulative $U$ of $A$ GPA of 3.5 to 3.74 .
4. For "with high distinction," the student must achieve a cumulative $U$ of A GPA of 3.75 to 3.89 .
5. For "with highest distinction," the student must achieve a cumulative $U$ of A GPA of 3.9 to 4.00 .

These criteria may be evaluated and changed periodically by the College of Agricultural, Food and Life Sciences.

## Grading System

The Dale Bumpers College of Agricultural, Food and Life Sciences assigns numerical values to the different grades. These values are used for courses when grade-point averages are calculated.

The grading system assigns values as follows:

| Grade | Value |
| :--- | :--- |
| A | 4.00 |
| B | 3.00 |
| C | 2.00 |
| D | 1.00 |
| F | 0.00 |

- Human Development and Family Sciences (p. 227) (HDFS-M)
- Human Nutrition (p. 221) (NUTR-M)

## Minors in Other Colleges

Students in the Dale Bumpers College of Agricultural, Food and Life Sciences may pursue an academic minor in any other college at the University of Arkansas. These minors usually consist of 15 to 20 hours of course work. For requirements regarding minors, check the catalog under the department offering the minor. Students must notify the Bumpers College Dean's Office (AFLS E202) of their intention to pursue a minor.

## Special (Non-Degree Seeking) Students

While most students enrolled in the Dale Bumpers College of Agricultural, Food and Life Sciences work toward a degree, students who desire additional education of a specific nature but who do not wish to fulfill all requirements for a degree may enroll as special students. It is recommended that students declare a minor by the end of their sophomore year.

## Other Programs

## Pre-veterinary Medicine

Because Arkansas does not have a college of veterinary medicine, the Arkansas General Assembly has authorized funds for education in veterinary medicine at out-of-state institutions. The State Board of Higher

Education is the designated agent for the State of Arkansas, and the Student Loan Authority is authorized to administer the program. Terms and conditions prescribed by the Student Loan Authority are as follows: the grant will cover only out-of-state tuition, and the student will pay his or her own fees and expenses. Additional information regarding this program can be found at: www.adhe.edu (http://www.adhe.edu/)

Contracts have been negotiated with the Board of Control for Southern Regional Education for education in veterinary medicine at Louisiana State University and at Tuskegee University. Arrangements have also been made with the University of Missouri and Oklahoma State University. Under the provisions of the legislation, only citizens of Arkansas are eligible. They must enroll in and complete the pre-veterinary medicine curriculum to satisfy the admission requirements of these colleges of veterinary medicine.

Arkansas Act 881, passed in 2011, established a loan repayment program for Arkansas residents who attend Mississippi State University College of Veterinary Medicine. The loan repayment program will assist Arkansas residents with the repayment of federally funded student loans incurred while attending veterinary school at Mississippi State University. Beginning in April 2012, participants in the program will be required to practice in the state of Arkansas for up to five consecutive years with a minimum of 30 percent of their practice devoted to food or mixed animal medicine in rural areas of Arkansas. This may include corporate or private veterinary practice.

The pre-veterinary medicine program at the University of Arkansas is administered in the departments of Animal Science and Poultry Science of the Dale Bumpers College of Agricultural, Food and Life Sciences. There are faculty in these departments who help counsel and advise students regarding their pre-veterinary medicine program. There are also faculty veterinarians who provide some insight into the practice of veterinary medicine and are knowledgeable about many of the considerations encountered in establishing a practice upon graduation. Some of these veterinarians have been in private practice; others have been involved in full-time agricultural research since graduation from veterinary medicine and graduate school. Because there is a wide cross-section of experience among these faculty, students find their counsel valuable in planning a future in veterinary medicine.

While it is possible to complete requirements for admission to some colleges of veterinary medicine in two years, most students take three years or more to complete the requirements, and most complete a B.S. degree before being admitted. Students who carefully plan their work may complete a B.S. degree by transferring hours earned in the first two years at an accredited college of veterinary medicine back to the University of Arkansas, provided they complete certain degree requirements at the university prior to entering a school or college of veterinary medicine. These students must complete a minimum of 94 hours of a 120-hour program of prescribed courses. This will require three years and one or two 6 -week summer terms for most students. Therefore, students should inform their advisers early in their program that they wish to be in a prevet degree program.

The Bumpers College of Agricultural, Food and Life Sciences is ready to assist students in fulfilling their pre-veterinary medicine requirements whether they desire to complete them in a two-year span or over three or four years. The supporting departments at the university, including chemistry, English, and biological sciences, all offer quality courses that give a student an excellent background for the pursuit of a degree in veterinary medicine.

To earn the professional degree, a student must complete the preveterinary medicine requirements and the four-year prescribed curriculum in one of the colleges of veterinary medicine.

Required Examinations: All required examinations are given on campus and administered by testing services ( 97 N . Razorback Road, phone: 479-575-3948, email: testing@uark.edu). Exams must be taken by late summer of the year prior to entering vet school. Students interested in taking examinations should contact testing services to schedule an examination date. All contract schools accept the Graduate Records Exam (GRE), which is given frequently.

Applications: Students applying to Louisiana State University, Oklahoma State University, Tuskegee University, Mississippi State University and University of Missouri must fill out a Veterinary Medical College Application Service (VMCAS) form, available at their online site (www.aavmc.org (http://www.aavmc.org)). Students must complete the application and have it submitted by September 15th of the year prior to beginning studies. Since requirements for the various veterinary schools periodically change, it is important that students check with their advisers about specific school requirements as they progress through the preveterinary requirements.

All students should contact the Coordinator of Veterinary Medicine, Dale Bumpers College of Agricultural, Food, and Life Sciences, AFLS B114, University of Arkansas, Fayetteville, AR 72701, phone 479-575-4351 in the spring prior to making fall application for admission to a veterinary school to verify that they can complete the requirements for the school they wish to attend. Pre-professional requirements and specific requirements for admission to colleges of veterinary medicine at Louisiana State University, Oklahoma State University, University of Missouri, Mississippi State University and Tuskegee University are listed with information on the Web at www.aavmc.org.

## Bumpers College Honors Program

The mission of Bumpers College Honors Program is to provide students with opportunities to participate in academic, research and creative activities beyond the traditional undergraduate experience. This is accomplished through honors courses, completion of an undergraduate honors thesis, and other significant activities. Students must maintain a GPA of 3.50 and subscribe to the Statement of Ethical Standards to remain in the program.

## Statement of Ethical Standards:

"As a member of the Bumpers College Honors Program, I pledge to uphold the ethical standards of honesty and trustworthiness in all academic and research/creative activities. I recognize that it is a privilege to be a member of the University of Arkansas Honors College and will dedicate my efforts to ensure that the highest levels of ethical standards are maintained."

## Student Eligibility Requirements

There are several avenues by which qualified candidates can become eligible to participate in the Bumpers College Honors Program. Students will receive an invitation to participate in the Honors Program if they are incoming freshmen with an ACT of at least 28 or a high school GPA of at least 3.50. Transfer students will be invited if they transfer no more than 62 hours with a college GPA of at least 3.50 . Currently enrolled freshman and sophomore students who have completed less than 62 hours with a college GPA of 3.50 or greater may apply for admission to the Honors Program through the Honors College website (http://
honorscollege.uark.edu/). Students wishing to join the Honors Program after completing 62 hours of college credit may petition for admission by submitting a plan of study to the Bumpers College Honors Program Director documenting how they propose to incorporate the Honors Program requirements into their remaining degree requirements.

To be eligible for continued participation in the Honors Program, students must maintain a cumulative 3.5 GPA and actively work toward earning an Honors degree designation. Students will be considered academically ineligible when:

- A student's cumulative GPA is below 3.5 for two consecutive terms or
- A student's cumulative GPA is below 3.0 for one term.

Students are required to prepare a proposal for study and identify an honors mentor who mutually agrees to the topic proposed by the end of 90 hours of course credit completion.

## Honors Orientation

All entering freshman honors students are required to complete AFLS 1023H. This course will cover the requirements of UNIV 1001 and provides an overview of the Bumpers College Honors Program, program requirements, research and creative project requirements, and to introduce all honors students to potential undergraduate student mentors as a part of the Honors Mentor/Mentee program.

## Honors Curriculum

Graduation with Honors Distinction from the College requires that each student must complete 15 credit hours. Each student must complete at least 9 credit hours of Honors courses, three of which must include AFLS 3413H. In addition, each student must complete at least 3 credit hours of thesis hours with a faculty mentor on the student's honors committee and thesis culminating their program. In addition to honors courses taken within Bumpers College, students are also encouraged to take Honors courses in other colleges as well.

Students are encouraged to complete 6 credit hours of Honors courses during their freshman year. This will qualify students for research and international program funding from the Honors College.

## Honors Project

All honor students are required to develop and complete an honors thesis or creative project appropriate for their degree and interests to graduate from the Honors Program. Traditional research projects, such as laboratory and field studies and surveys are encouraged and welcomed in addition to novel methods of research that may be accomplished at sites other than on campus or on research stations. Creative projects are also allowed with the approval of the student's Honors Committee and a final written document is required. The thesis or creative project should consist of at least one semester of proposal preparation, one semester of data collection or creative design, and one semester of thesis preparation. Honors students are encouraged to develop proposals for funding of their projects, as well as to conduct and present their results.

The student's Honors Mentor and Honors Committee prior to graduation from the Honors Program will approve the honors thesis or creative project. Upon approval and graduation, an original copy of the honors document will be submitted to the University Library. Publication of the thesis in an appropriate venue is encouraged. Creative and research thesis project guidelines are available on the Bumpers College Honors Program website (http://bumpershonors.uark.edu/).

To support their research or creative projects, participants in the Honors Program are eligible to apply for undergraduate research grants from the Arkansas Student Undergraduate Research Fellowships (SURF) program awarded by the state, the University Honors College, and from the Bumpers College. The results of the student's original research or creative project can be published in Discovery, the undergraduate research journal of the Bumpers College or Inquiry: The University Journal of Undergraduate Research and Creative Activity. Honors students can also apply to the Honors College for Study Abroad and conference grants and to the Bumpers College Study Abroad program. Students who have fulfilled the requirements of the Bumpers College Honors Program will be recognized as graduating with Honors Program Distinction. The transcript and diploma will designate the student as an honors program graduate of the college. At the college commencement ceremony, each honors graduate will wear special regalia, have the title of his or her honors thesis and mentor's name listed in the graduation program, and be recognized separately as part of the Bumpers College Honors Program graduates.

## Honors Graduation

Honors students enrolled in the Honors Program will be expected to perform at very high levels of achievement, earning credentials beyond the classroom experiences. Therefore, they will be eligible for several privileges during commencement not accorded to other students in the College.

Bumpers College honors students will graduate as members of the Honors Program at the College Commencement each spring. Separate regalia consisting of appropriate honors hood, stole, braid, tassel, and/ or mortarboard will distinguish all students in the Honors Program. Students graduating from the Honors Program will be further distinguished from students receiving traditional College and University recognition of scholastic achievement (distinction, high distinction, or highest distinction) by graduating cum Laude with Honors Distinction, Magna cum Laude with Honors Distinction, or Summa cum Laude with Honors Distinction if cumulative grade point averages of 3.5 to $3.74,3.75$ to 3.89 , or above 3.9 are maintained, respectively.

Incentives for student participation in the Honors Program include:

- Transcripts of honors students will specify that they are graduates of the College Honors Program.
- Honors students may request project support by applying for a grant from Bumpers College Undergraduate Research and Creative Project Grant Program.
- Honors students have the benefit of working one-on-one with faculty members on research or creative projects.
- Honors students will be eligible to apply for competitive scholarships supporting undergraduate honors studies or research (i.e., SURF grants).
- Honors students will receive all other rights and privileges as outlined in the Honors College benefits.

## Courses

## AFLS 1023H. Bumpers College Honors Program Perspectives. 3 Hours.

This course is intended to meet the requirements of UNIV 1001 and provide Bumpers College Honors students with an overview of the Honors Program as well as provide insight into research and creative project development and expectations. Pre- or Corequisite: Honors standing. (Typically offered: Fall)

## AFLS 1600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

AFLS 2600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)
AFLS 3413H. Honors Proposal Development and Research Methods. 3 Hours. This course will include creative process, ethics, proposal writing, literature review, qualitative and quantitative/experimental design, scientific theory and methods, data collection, and analysis. At the end if this course, students will have developed a proposal for their Honors thesis. The course also offers an opportunity for students to present their proposals orally as preparation for their proposal meeting. Prerequisite: Sophomore, junior or senior standing. (Typically offered: Fall and Spring)
AFLS 3600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)
AFLS 3993. Professional Growth and Critical Career Skills. 3 Hours. The MERIT Profile will be utilized to identify students behavioral and character profiles so they may "know themselves" based upon strengths and tendencies. Throughout the term, students will be engaged in topics to help them identify their core values and strengths and develop their weaknesses. Course topics will include; adjusting to mistakes, cast off the negatives, verifying your values, scheduling priorities, building character, framing decisions/choices, personal improvement plans, and more. Upon course completion students should be able to utilize personal leadership approaches, strategic thinking and behavior, critical thinking and problem identification techniques and verbal and written communication to effectively convey their suitability specific feasible careers. Prerequisite: Junior standing. (Typically offered: Fall)

## AFLS 400VH. Honors Thesis. 1-6 Hour.

(Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

## AFLS 401V. Special Topics in AFLS. 1-6 Hour.

Studies of selected topics not covered in other courses. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
AFLS 401VH. Honors Special Topics. 1-6 Hour.
Studies of selected topics not covered in other courses. Must be in the Honors program to register for this course. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
This course is equivalent to AFLS 401V.
AFLS 403V. Special Problems. 1-6 Hour.
Individual study or research for advanced undergraduates. Corequisite: Instructor consent. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
AFLS 403VH. Honors Special Problems. 1-6 Hour.
Individual study or research for advanced undergraduates. Corequisite: Instructor consent and honors standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
This course is equivalent to AFLS 403V.
AFLS 4600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

## Agricultural Economics and Agribusiness (AEAB)

John D Anderson<br>Department Head<br>217 Agriculture Building<br>479-575-2256

Department of Agricultural Economics and Agribusiness Website (http:// agribus.uark.edu/)

The Department of Agricultural Economics and Agribusiness offers a major with three concentrations that lead to a Bachelor of Science in Agriculture degree. The department also offers a minor in Agricultural Business and a minor in International Economic Development. The minor in Agricultural Business can be completed $100 \%$ online.

The agricultural business major provides education suited to career opportunities in farm management, agricultural business management, and agricultural marketing in both the domestic and international areas.

Managers of farms and agricultural businesses are continually required to make organizational and operational decisions. The basic skills and knowledge needed for making sound decisions are provided by the agricultural business curriculum. Students may elect to specialize in areas compatible with their personal objectives, depending on the extent of accounting and business orientation desired.

Students educated in agricultural business are in demand for positions in agricultural industries, farm operation, marketing agencies, agricultural service organizations, state and federal agencies, and numerous other positions. For those who go on to graduate school, teaching and research positions are available with land-grant colleges as well as with other institutions. Three concentrations are available to meet career objectives:

1. Agricultural Business Management and Marketing (ABMM)
2. Pre-Law, for students preparing to attend law school (PRLW)
3. Agricultural Economics, which emphasizes quantitative and analytical skills to prepare students for graduate school (AGEC).

## Requirements for B.S.A. in Agricultural Business with Agricultural Economics Concentration

## Total Hours

${ }^{1}$ Course is a Departmental Communications requirement.
${ }^{2}$ For any student majoring in Agricultural Business, the 21 hours of Agribusiness Prerequisite Core courses must be completed before a student can enroll in upper division courses in the following areas: Agribusiness Core, Concentration Requirements, and Capstone Experience.
${ }^{3}$ Satisfies 3 hours of State Minimum Core Mathematics.
${ }^{4}$ Satisfies 3 hours of State Minimum Core Social Sciences.

## Additional Requirements for Pre-Law Concentration (18 hours):

AGEC 3523 Environmental and Natural Resources Law
or AGEC 4123 Legal Issues in Animal Agriculture
Select 15 hours from at least two of the following areas:
Area 1
BLAW 2013 The Legal Environment of Business (ACTS Equivalency $=$ BLAW 2003)
BLAW 3033 Commercial Law
Area 2
COMM 2303 Advanced Public Speaking
COMM 3383 Persuasion
COMM 3443 Introduction to Rhetorical Theory
COMM 4113 Legal Communication
Area 3
PHIL 2003 Introduction to Philosophy (ACTS Equivalency = PHIL 1103)
PHIL 2103 Introduction to Ethics (ACTS Equivalency = PHIL 1003)

PHIL 2203 Logic (ACTS Equivalency = PHIL 1003)
PHIL 3103 Ethics and the Professions
PHIL 4143 Philosophy of Law
Area 4
PLSC 3103 Public Administration
PLSC 4153 Public Policy
PLSC 3243 The Judicial Process
PLSC 4193 Administrative Law
PLSC 4253 The U.S. Constitution I

PLSC 4263 The U.S. Constitution II
Area 5
AGEC (any upper level)

## Total Hours

${ }^{1}$ AGEC courses in the Policy Group are strongly recommended. Policy Group courses include: AGEC 3413, AGEC 3523, AGEC 4123,
AGEC 4163, AGEC 4603, AGEC 4613, and AGEC 4623.

## 3/3 Program - Agriculture

Exceptional students in the pre-law concentration in the Dale Bumpers College of Agricultural, Food and Life Sciences may enroll in the School of Law in their fourth year provided that all requirements have been met. Students must have:

- Completed all university, college, and major course requirements for the pre-law concentration;
- Completed 12 hours in the specialization list for pre-law;
- Earned a cumulative GPA of at least 3.50 without grade renewal; and
- Received an LSAT score of at least 159.

A student admitted to this program may substitute School of Law course work for the remaining total hours required for the bachelor's degree in agricultural business.

It is a requirement of the School of Law's accrediting standards that no student be admitted to the School of Law until they have completed at least three-fourths of the work necessary for the baccalaureate degree. The requirements embodied in the $3 / 3$ programs satisfy this requirement.

## Agricultural Business B.S.A. with Pre-Law Concentration

## Eight-Semester Degree Program

Students wishing to follow the degree plan in Agricultural Economics and Agribusiness should see the Eight-Semester Degree Policy (p. 67) in the Academic Regulations chapter for university requirements of the program. The Agricultural Economics and Agribusiness major has three concentrations: Agricultural Business Management and Marketing, PreLaw, and Agricultural Economics.

${ }^{1}$ Students have demonstrated successful completion of the learning indicators identified for learning outcome 2.1, by meeting the prerequisites for MATH 1203 or MATH 1313.
2 The Fine Arts Elective courses which satisfy General Education Outcome 3.1 include: ARCH 1003, ARHS 1003, COMM 1003, DANC 1003, LARC 1003, MLIT 1003, MLIT 1003H, MLIT 1013, MLIT 1013H, MLIT 1333, THTR 1003, THTR 1013, or THTR 1013H.
${ }^{3}$ The Humanities Elective courses which satisfy General Education Outcome 3.2 include: AAST 2023, ANTH 1033, ARCH 1013, CLST 1003, CLST 1003H, CLST 1013, COMM 1233, DANC 1003, ENGL 1213, ENGL 2023, GNST 2003, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2003, HIST 2013, HUMN 1124H, HUMN 2213, LALS 2013, MRST 2013, MUSY 2003, MUSY 2003H, PHIL 2003, PHIL 2003C, PHIL 2003H, PHIL 2103, PHIL 2103C, PHIL 2303, THTR 1003, THTR 1013, THTR 1013H, WLIT 1113, WLIT 1123, or intermediate-level world language (usually 2003-level).
${ }^{4}$ Students must complete 40 hours of upper division courses (3000-4000 level). It is recommended that students consult with their academic adviser when making course selections.

## Minor in Agricultural Business (AGBS-M)

The Agricultural Business Minor will consist of 21 semester hours to include:

## Core Requirements (9 hours) ${ }^{1}$

| AGEC 1103 | Principles of Agricultural Microeconomics | 3 |
| :---: | :---: | :---: |
| or ECON 2023 | Principles of Microeconomics (ACTS Equivalency = ECON 2203) |  |
| AGEC 2303 | Introduction to Agribusiness | 3 |
| or AGEC 2103 | Principles of Agricultural Macroeconomics |  |
| or ECON 2013 | Principles of Macroeconomics (ACTS Equivalency = ECON 2103) |  |
| ASTM 2903 | Agricultural and Human Environmental Sciences Applications of Microcomputers | 3 |
| or ISYS 1123 | Business Application Knowledge - Computer Competency |  |

Select two of the following Core Electives (6 hours): 6
AGEC 2143 Agribusiness Financial Records or ACCT 201Accounting Principles
AGEC 2403 Quantitative Tools for Agribusiness
or STAT 230 Brinciples of Statistics (ACTS Equivalency $=$ MATH 2103)
or BUSI 103Data Analysis and Interpretation
AGEC 3303 Food and Agricultural Marketing
AGEC 3313 Agribusiness Sales
AGEC 3373 Futures and Options Markets
AGEC 3403 Farm Business Management
AGEC 3503 Agricultural Law I
AGEC 4143 Agricultural Finance
Select two of the following Controlled Electives (6 hours): 6
Any upper division AGEC course not already used
POSC 4213 Integrated Poultry Management Systems
Approved substitutions ${ }^{2}$
Total Hours
${ }^{1}$ For any student minoring in Agricultural Business, all 9 hours of Core Requirements must be completed before enrolling in upper division Core Elective or Controlled Elective courses.
2 Additional upper-division courses in the Sam M. Walton College of Business may be substituted with approval, provided prerequisites for those courses have been satisfied outside the minor. A minimum of six hours of upper-division AGEC courses without substitution is required for the minor.

A student planning to minor in Agricultural Business should contact the program adviser for consultation and more detailed information.

## Minor in International Economic Development (INDV-M)

## Course Requirements

| Successfully complete four of the following five courses: | 12 |  |
| :--- | :--- | :--- |
| AGEC 4163 | Agricultural and Rural Development |  |
| AGEC 4623 | International Agricultural Trade and Commercial <br> Policy |  |

## Courses

AGEC 1103. Principles of Agricultural Microeconomics. 3 Hours.
Introduction to agricultural economics, including a survey of the role and characteristics of agriculture businesses in our economic system. Basic economic concepts concerning price determination, profit maximization, and resource use are emphasized. The use of economic principles as applied to the production and marketing decisions made by managers of agricultural firms is demonstrated. Credit will be allowed for only one of AGEC 1103 or ECON 2023 or ECON 2023H. Pre- or Corequisite: MATH 1203. (Typically offered: Fall, Spring and Summer) This course is cross-listed with ECON 2023.

AGEC 1103H. Honors Principles of Agricultural Microeconomics. 3 Hours. Introduction to agricultural economics, including a survey of the role and characteristics of agriculture businesses in our economic system. Basic economic concepts concerning price determination, profit maximization, and resource use are emphasized. The use of economic principles as applied to the production and marketing decisions made by managers of agricultural firms is demonstrated. Credit will be allowed for only one of AGEC 1103 or ECON 2023 or ECON 2023H. Pre- or Corequisite: MATH 1203. (Typically offered: Fall and Spring)
This course is cross-listed with ECON 2023, AGEC 1103.
AGEC 2103. Principles of Agricultural Macroeconomics. 3 Hours.
Applications of economics principles to problems of agricultural production, distribution, and income; including a study of the interrelationship between agriculture and other segments of the economy; and the dynamic forces in the economy which affect agriculture. Credit will be allowed for only one of AGEC 2103 or AGEC 2103H or ECON 2013 or ECON 2013H. Pre- or Corequisite: MATH 1203. (Typically offered: Fall and Spring)
This course is cross-listed with ECON 2013.

## AGEC 2103H. Honors Principles of Agricultural Macroeconomics. 3 Hours.

Applications of economics principles to problems of agricultural production, distribution, and income; including a study of the interrelationship between agriculture and other segments of the economy; and the dynamic forces in the economy which affect agriculture. Credit will be allowed for only one of AGEC 2103 or AGEC 2103H or ECON 2013 or ECON 2013H. Pre- or Corequisite: MATH 1203. Prerequisite: Honors standing. (Typically offered: Fall and Spring)
This course is cross-listed with ECON 2013, AGEC 2103.
AGEC 2143. Agribusiness Financial Records. 3 Hours.
Principles of small agricultural business management accounting practices are taught to allow students to gain hands-on experience with financial record keeping for a business. Resulting financial statements are analyzed to determine opportunities for enhancing financial efficiency. Prerequisite: (ASTM 2903 or ISYS 1123) and (AGEC 1103 or ECON 2023 or ECON 2143). (Typically offered: Fall)

## AGEC 2303. Introduction to Agribusiness. 3 Hours.

Introduction to agribusiness issues as they relate to the food processing, wholesale and retail sectors of the agricultural industry. Coverage of methods and tools agribusiness managers use to evaluate business opportunities. Case studies serve to communicate concepts of product distribution, design, promotion and pricing in the development of a marketing plan. Prerequisite: AGEC 1103 or ECON 2023. (Typically offered: Fall, Spring and Summer)

## AGEC 2403. Quantitative Tools for Agribusiness. 3 Hours.

Introduction to quantitative methods used in agricultural economics and agribusiness with an emphasis on skills and techniques that will enhance the ability of students to perform in upper division coursework. Provides an overview of statistical and optimization methods used in research problems, economic theory, and applied decision making activities. Prerequisite: (AGEC 1103 or ECON 2023 or ECON 2143) and MATH 2043 (or higher MATH course from the University Core excluding MATH 2183). (Typically offered: Fall)

## AGEC 3303. Food and Agricultural Marketing. 3 Hours.

Surveys consumer trends in food markets and the marketing activities of the food and fiber system. Emphasizes marketing concepts for both commodities and differentiated food products. Topics include applied consumer and price theory; marketing management; structure and performance of the food system; and current agricultural marketing topics. Prerequisite: AGEC 1103 or ECON 2023 or ECON 2143. (Typically offered: Fall, Spring and Summer)

## AGEC 3313. Agribusiness Sales. 3 Hours.

Principles of professional sales and sales management techniques used in food and agricultural firms; develop a professional sales presentation; study current agribusiness industry professional sales persons and sales practices and techniques. Prerequisite: AGEC 1103 or AGEC 2103 or ECON 2013 or ECON 2023 or ECON 2143 or equivalent. (Typically offered: Spring)

## AGEC 3373. Futures and Options Markets. 3 Hours.

Theory and mechanics of commodity futures and options markets including trading, margin, fees, etc. Price relationships between cash, futures and options. Fundamental and technical price analysis. Price risk management strategies for producers and users of agricultural commodity marketing plan. Speculative and hedging simulation exercises. Prerequisite: AGEC 1103 or ECON 2023. (Typically offered: Fall)

## AGEC 3403. Farm Business Management. 3 Hours.

Application of economic principles for the profitable organization and operation of the farm business. Focuses upon agricultural production management decision-making tools: budgeting techniques (enterprise, partial, cash flow), balance sheet, income statement, cash flow, investment analysis and risk management. Recommended: AGEC 1103 (or ECON 2023), AGEC 2143, and ASTM 2903. (Typically offered: Fall, Spring and Summer)

## AGEC 3413. Principles of Environmental Economics. 3 Hours.

An introductory, issues-oriented course in the economics of the environment. The course will focus on what is involved in how society makes decisions about environmental quality. The environmental issues important to the State of Arkansas and the United States will be emphasized. Prerequisite: AGEC 1103 or ECON 2023. (Typically offered: Spring)
This course is cross-listed with ENSC 3413.

## AGEC 3413H. Honors Principles of Environmental Economics. 3 Hours.

 An introductory, issues-oriented course in the economics of the environment. The course will focus on what is involved in how society makes decisions about environmental quality. The environmental issues important to the State of Arkansas and the United States will be emphasized. Corequisite: Drill component. Prerequisite: AGEC 1103 or ECON 2023. (Typically offered: Spring) This course is cross-listed with AGEC 3413, ENSC 3413.AGEC 3503. Agricultural Law I. 3 Hours.
Examination of those areas of law especially applicable to agriculture. Fundamentals of contract law, torts law, and property law will accompany discussion of major areas of agricultural law; acquisition and disposal of farmland; farm tenancies; rights and limitations in the use and ownership of farmland; water law; environmental protection; protection of the productivity of agricultural land; and the law of sales and secured transactions in an agricultural context. (Typically offered: Fall)
AGEC 3523. Environmental and Natural Resources Law. 3 Hours.
Principles of environmental and natural resources law relevant to agriculture, food and the environmental sciences; legal principles relating to regulation of water, air, hazardous substances, land, wildlife, livestock, and water rights. Principles of civil and criminal liabilities and other developing legal and regulatory issues relating to agriculture and natural resources. (Typically offered: Spring Even Years)
AGEC 400V. Special Problems. 1-6 Hour.
Special studies and readings conducted under the direct supervision of staff members to satisfy the requirements of individual students. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
AGEC 401V. Internship in Agribusiness. 1-6 Hour.
A supervised practical work experience in an agribusiness firm or a governmental or industrial organization having direct impact on agriculture in order to gain professional competence and insight to employment opportunities. Prerequisite: junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 8 hours of degree credit.
AGEC 402V. Special Topics. 1-3 Hour.
Studies of selected topics in agricultural economics not available in other courses. (Typically offered: Irregular) May be repeated for degree credit.

## AGEC 4041. Agribusiness Capstone. 1 Hour.

The purpose of this course is to provide students with an opportunity to apply and integrate knowledge from previous coursework in general education and agribusiness. This course is designed for students to demonstrate mastery of a number of subjects within the agribusiness discipline. Students will provide evidence of integrated knowledge through a variety of means including oral presentations, creation of a 1250-word reflective essay, and applying problem solving and critical thinking skills. Prerequisite: Senior standing. (Typically offered: Fall and Spring)

## AGEC 4113. Agricultural Prices and Forecasting. 3 Hours.

Price theory and techniques for predicting price behavior of general economy and price behavior of individual agricultural products will be analyzed. Provides practice in the application of economics and statistics to agricultural price analysis. Prerequisite: ((AGEC 1103 or ECON 2023) and (AGEC 2403 or STAT 2303 or BUSI 1033) and (MATH 2043 or higher, excluding MATH 2183)). (Typically offered: Spring)

## AGEC 4123. Legal Issues in Animal Agriculture. 3 Hours.

An issues-oriented course focusing on the legal issues involved in the production of poultry, swine and livestock. Emphasis will center on the laws, regulations and policy arguments involved in animal confinement, antibiotic use, humane slaughter and veterinary medicine, along with other related issues. The wide range of regulation from local to state to federal, depending on the issue will be studied and discussed. (Typically offered: Spring Odd Years)
This course is cross-listed with ANSC 4123, POSC 4123.

## AGEC 4143. Agricultural Finance. 3 Hours.

Methods and procedures whereby agricultural firms acquire and utilize funds required for their successful operation. Emphasis is placed upon role of finance and financial planning and consideration is given to an understanding of financial firms serving agriculture. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013) and (AGEC 2143 or ACCT 2013). (Typically offered: Fall)

## AGEC 4163. Agricultural and Rural Development. 3 Hours.

Examination of agricultural and rural development issues in less developed countries. Alternative agricultural production systems are compared, development theories examined, and consideration given to the planning and implementation of development programs. Prerequisite: AGEC 1103 (or ECON 2023). (Typically offered: Fall)

AGEC 4163H. Honors Agricultural and Rural Development. 3 Hours.
Examination of agricultural and rural development issues in less developed countries. Alternative agricultural production systems are compared, development theories examined, and consideration given to the planning and implementation of development programs. Prerequisite: AGEC 1103 (or ECON 2023) and honors standing. (Typically offered: Fall)
This course is equivalent to AGEC 4163.
AGEC 4243. Agribusiness Strategy. 3 Hours.
Addresses problems of strategy formulation in agribusiness emphasizing current problems and cases in agriculture. Surveys modern and classic perspectives on strategy with applications to agribusiness. Examines the development of firm level strategies within the structure and competitive environment of agricultural firms and industries. Prerequisite: MATH 2043 and (AGEC 1103 or ECON 2023 or ECON 2143) and (AGEC 3403 or AGEC 2143 or ACCT 2013). (Typically offered: Spring)

## AGEC 4303. Agribusiness Marketing Management. 3 Hours.

Marketing concepts will be developed and applied to the global food and fiber system. The course will use both commodity and product marketing principles and economic theory to analyze varied marketing situations. Case studies will be used to demonstrate the role that demand analysis and consumer behavior play in market management. Prerequisite: AGEC 2303 and AGEC 3303. (Typically offered: Fall and Summer)

AGEC 4313. Agricultural Business Management. 3 Hours.
The planning, organizing, leading and controlling functions of management as they relate to agricultural business firms. Marketing of value-added products, budgeting, organizational structure, cost control, financial statements, capital budgeting and employee supervision and motivation. Case studies are used to teach communication and decision-making skills. Senior standing recommended. Prerequisite: (AGEC 2143 or ACCT 2013) and AGEC 2303. (Typically offered: Fall)

AGEC 4323. AgriBusiness Entrepreneurship. 3 Hours.
Agribusiness entrepreneurship is the process of bringing food or rural-based products and services from conceptualization to market. The course presents the opportunities, problems and constraints facing individuals and firms operating in rural or isolated markets while emphasizing the steps in conceptualization, development, marketing, and delivery-selling of agribusiness rural products. Prerequisite: AGEC 1103 or equivalent. (Typically offered: Spring)

AGEC 4373. Basis Trading: Applied Price Risk Management. 3 Hours. This course provides students an opportunity to gain a detailed working knowledge of how basis trading concepts and practices are applied to agricultural markets and to develop a skill set that can be put immediately into practice in any basis trading operation. Prerequisite: AGEC 3373 or consent of instructor. (Typically offered: Spring and Summer)

AGEC 4383. Basis Trading: Case Study. 3 Hours.
This course provides an opportunity to apply principles learned in AGEC 4373 to grain merchandising using the case study approach. The course will involve in-class meetings supplemented with faculty-directed group-based learning experiences involving professional grain merchandisers. Group activities will follow the traditional case study method. Prerequisite: AGEC 4373. (Typically offered: Fall)

AGEC 4403. Advanced Farm Business Management. 3 Hours.
Principles and procedures of decision making as applied to the allocation of resources in the farm business for profit maximization. Emphasis is placed on use of principles of economics and their application to the decision making process. Includes exercises on the application of principles to specific farm management problems. Senior standing recommended. Prerequisite: AGEC 3403 and (ASTM 2903 or equivalent) and (AGEC 2143 or ACCT 2013). (Typically offered: Fall)

AGEC 4403H. Honors Advanced Farm Business Management. 3 Hours. Principles and procedures of decision making as applied to the allocation of resources in the farm business for profit maximization. Emphasis is placed on use of principles of economics and their application to the decision making process. Includes exercises on the application of principles to specific farm management problems. Senior standing recommended. Prerequisite: AGEC 3403, (ASTM 2903 or equivalent), (AGEC 2143 or ACCT 2013) and honors standing. (Typically offered: Fall)
This course is equivalent to AGEC 4403.
AGEC 4603. Food Economics and Health. 3 Hours.
This course provides an advanced overview of selected topics in food economics, food and nutrition policy and the interface between nutrition programs and health policy. Students will develop an understanding of economic and policy concepts of food, nutrition, and health. The course emphasizes analytical tools that can be applied to study issues in food, nutrition, and health facing the US and world populations. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2403 or BUSI 1033 or STAT 2303 or MATH 2043 or MATH 3083 or MATH 3013). (Typically offered: Spring)

AGEC 4613. Political Economy of Agriculture and Food. 3 Hours. Agricultural and food policies are studied from domestic and international perspectives. Laws, regulations, decisions and actions by governments and other institutions are examined in terms of rationale, content, and consequences. Economic and political frameworks are used to assess policies in terms competitive structure, operation, and performance of farming and food systems. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013) and (PSYC 2003 or SOCI 2013 or HDFS 2603). (Typically offered: Fall)

AGEC 4623. International Agricultural Trade and Commercial Policy. 3 Hours. Analysis of agricultural market competition and performance in a global economy. The impact of domestic and international agricultural policies on domestic and international markets and welfare. Economic principles applied to the interaction of economic events in the world food economy. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013). (Typically offered: Spring)

# Agricultural Education, Communications and Technology (AECT) 

George W. Wardlow<br>Head of the Department<br>E108 Agricultural Food and Life Sciences Building<br>479-575-2035

Agricultural Education, Communications and Technology Website (http:// aeed.uark.edu/)

The department of agricultural education, communications and technology offers a degree program with four concentrations that lead to a Bachelor of Science in Agriculture. Students may choose one of four areas of concentration, or, with adviser's approval, select courses from more than one concentration area.

- The Agricultural Education concentration is designed for students who wish to receive initial teacher licensure to teach agricultural science in public schools.
- The Agricultural Communications concentration is designed to produce graduates with both technical knowledge about the food and fiber industry and the communication skills needed to convey the story of agriculture to consumers, policy makers, and the public. Interpersonal and group communication, public relations, graphic design, electronic communication, communications campaign planning, and writing for the media are emphasized in this program.
- The Agricultural Systems Technology Management concentration is for students who are planning a professional career related to technical operations and management in the agricultural industry. Graduates assume positions of leadership and responsibility in such areas as agricultural services and sales, agricultural management, agricultural production systems, product service, product testing, and service management. The program focuses on preparing students as problem solvers in the application, management and/or marketing of agricultural technology.
- The Agricultural Leadership concentration incorporates interdisciplinary coursework that focuses on leadership and ethics in food and fiber systems, with courses offered from multiple disciplines. Interdisciplinary courses benefit students by offering different insights to problem solving, fostering collaboration with students from other majors, and reinforcing the importance of teamwork.

Students with this major are in constant demand due to the rapidly changing educational needs of the agricultural and natural resources industries. Graduates with this degree have a broad knowledge of agricultural disciplines. They are prepared as agricultural technology transfer specialists to enter a variety of careers in formal and nonformal teaching roles in either the public or private sector as agricultural educators, extension agents, industry-based trainers, information specialists, or technology-management specialists.

The department also offers programs for four minors: Agricultural Education, Agricultural Communications, Agricultural Systems Technology Management, and Agricultural Leadership.

## Requirements for a Major in Agricultural Education, Communication and Technology (AECT)

The state minimum core (p. 81) and discipline specific general education (p. 72) requirements:
(Course work that meets state minimum core requirements is in bold.)

## Additional Requirements for the Agricultural Education Concentration

Complete an evaluation for internship. Students must also meet the following criteria to be cleared for the internship:

1. Obtain a " $C$ " or better in the following pre-education core courses: AGED 1123, CIED 3023/CIED 4023, and CIED 3033.
2. Obtain a " $C$ " or better in concentration education courses: AGED 3133, ACOM 3143, AGED 4213, AGED 4233, and AGED 4843L .
3. Complete and submit the online application to teacher education through the university-wide Office of Teacher Education and pay the Teacher Education Application Fee (http://catalog.uark.edu/undergraduatecatalog/feeandcosts/ othergeneralfees/). Apply to the Office of Teacher Education (https:// teacher-education.uark.edu/) by Jan. 15 prior to the fall semester of the junior year. For more information, contact the Teacher Education Office in GRAD 336. Complete degree with a cumulative GPA of 2.5 or higher. The degree must be posted to your University of Arkansas transcript at the Registrar's Office prior to certification. For more information, please contact the Office of Teacher Education in Peabody Hall (PEAH) 109.
4. Obtain departmental clearance for GPA requirements, course work requirements, an interview, and/or other requirements. Obtain clearance through an Arkansas Department of Education background check. Note: Another background check will be required prior to graduation in order to be eligible for licensure.
5. Student is aware that he/she is responsible for meeting enrollment requirements for any scholarships received and is responsible for enrolling in the proper number of hours to meet graduation requirements.

## Other Certification Requirements

A. Pass Pedagogy Assessment during Internship (Minimum: Average of 2.0 or better on each Danielson (TESS) Domain)
B. Subject Matter Test Agriculture

- Test Code 0700 — Minimum Score: 150
C. Criminal Background Check

${ }^{3}$ The Social Science Elective courses which satisfy General Education Outcomes 3.3 and 4.1 include:
ANTH 1023, COMM 1023, HDFS 1403, HDFS 2413, HIST 1113, HIST 1113H, HIST 1123,
HIST 1123H, HIST 2093, HUMN 1114H, HUMN 2114H, INST 2013, INST 2813,
INST 2813H, PLSC 2013, PLSC 2813, PLSC 2813H, RESM 2853, SOCI 2013, SOCI 2013H, or SOCI 2033.
${ }^{4}$ Students must complete 40 hours of upper division courses (3000-4000 level). It is recommended that students consult with their academic adviser when making course selections.

## Minor in Agricultural, Food and Life Sciences Communications (ACOM-M)

The Agricultural, Food and Life Sciences Communications Minor will consist of 18 hours to include the following:

| ACOM 2143 | Introduction to Agricultural Communications and <br> Leadership | 3 |
| :--- | :--- | :--- |
| ACOM 3143 | Communicating Agriculture to the Public |  |
| or ACOM 3143 Honors Communicating Agriculture to the Public |  |  |$\quad 3$

## Minor in Agricultural Education (AGED-M)

The Agricultural Education Minor will consist of 20 hours to include the following:

| AGED 3162 | Curriculum Development and Assessment <br> Techniques in AGED | 2 |
| :--- | :--- | ---: |
| AGED 3161L | Curriculum Development and Assessment <br> Techniques in Career and Technical Education <br> Laboratory | 1 |
| AGED 4233 | Program Development | 3 |
| AGED 4213 | Teachers as Professionals | 3 |
| CIED 3033 | Classroom Learning Theory | 3 |
| CIED 4023 | Teaching in Inclusive Secondary Settings | 3 |
| AGED 475V | Internship in Agricultural Education | 2 |
| AGED 4843L | Methods in Agricultural Laboratories | 3 |
| Total Hours |  | $\mathbf{2 0}$ |

Teacher Education Requirements: To gain teacher certification, students must apply during the Fall semester of their sophomore year. We recognize not all programs can follow this timeline, but applying early will allow ample time to complete the requirements for clearance through Teacher Education.

## Minor in Agricultural Leadership (AGLE-M)

The Agricultural Leadership Minor will consist of 18 semester hours to include:

| AGLE 2143 | Introduction to Agricultural Communications and <br> Leadership | 3 |
| :--- | :--- | :--- |
| AGLE 3153 | Leadership Development in Agriculture |  |

Select 9 hours from the following:
AGEC 3313 Agribusiness Sales
AGLE 4163 Leadership Analysis Through Film
AGED 3133 Instructional and Presentation Strategies

| AGLE 3943 | Professional Development in Agricultural <br> Communications and Leadership |
| :--- | :--- |
| AGED 4443 | Principles of Technological Change |
| EXED 4183 |  |

A student planning to minor in Agricultural Leadership should contact the program adviser for consultation and more detailed information.

## Minor in Agricultural Systems Technology Management (ASTM-M)

The Agricultural Systems Technology Management Minor will consist of 18 hours to include the following:

| ASTM 1613 | Fundamentals of Agricultural Systems Technology | 3 |
| :---: | :---: | :---: |
| ASTM 2903 | Agricultural and Human Environmental Sciences Applications of Microcomputers | 3 |
| Select 12 hours from the following: |  | 12 |
| ASTM 1611L | Fundamentals of Agricultural Systems Technology Laboratory |  |
| ASTM 2123 | Metals and Welding |  |
| ASTM 3153 | Surveying in Agriculture and Forestry |  |
| ASTM 3102 <br> \& ASTM 3101 | Small Power Units/Turf Equipment and Small Power Units/Turf Equipment Laboratory |  |
| ASTM 3173 | Electricity in Agriculture |  |
| ASTM 4203 | Mechanized Systems Management |  |
| ASTM 4973 | Irrigation |  |
| ENSC 3603 | GIS for Environmental Science |  |

## Total Hours

A student planning to minor in Agricultural Systems Technology Management must notify the program adviser for consultation and more detailed information.

## Faculty

Cox, Casandra Kay, M.S., B.S. (University of Arkansas), Instructor, 2003.
Doss, Will, Ph.D. (Texas Tech University), M.S., B.S., (Texas A\&M University), Assistant Professor, 2022.
Estepp, Chris, Ph.D. (University of Florida), M.Ed., B.S. (Texas A\&M University), Associate Professor, 2019.
Estes, Hanna, M.S., B.S. (University of Arkansas), Instructor, 2014. Estes, Stuart, M.S., B.S. (University of Arkansas), Instructor, 2021. Graham, Donna Lucas, Ph.D. (University of Maryland-College Park), M.Ed., B.S. (University of Arkansas), University Professor, 1985, 2017.

Johnson, Donald M., Ph.D. (University of Missouri-Columbia), M.A., B.S. (Western Kentucky University), University Professor, 1993, 2021.

Koparan, Cengiz, Ph.D., M.S. (Clemson University), M.B.M. (Cambridge College), B.S. (Ankara University), Assistant Professor, 2023.

Miller, Jefferson Davis, Ph.D., M.A. (Oklahoma State University), B.A. (Northeastern State University), Professor, 2001, 2012.
Rice, Lanny, M.S. (University of Arkansas), Instructor, 2012.
Rucker, Kathryn Jill, Ph.D., M.B.A., B.S. (Oklahoma State University), Associate Professor, 2013, 2018.

Vehige, Grace, M.S. (Texas Tech University), B.S. (University of Arkansas), Instructor, 2023.
Wardlow, George W., Ph.D. (The Ohio State University), M.Ed., B.S. (University of Missouri-Columbia), Professor, 1992, 1998.

Whitehead, Isabel M., M.S. (University of Arkansas), B.S. (Sul Ross State University), Instructor, 2018.

## Agricultural Communications Courses

ACOM 2143. Introduction to Agricultural Communications and Leadership. 3 Hours.
A survey of agricultural communications and leadership theories and practices for students in the ACOM and AGLE concentrations and minors and anyone seeking a basic understanding of these disciplines. The course provides an overview of the history, philosophy, and theories of the disciplines and introduces students to career options, skills and practical competencies required of agricultural communicators and leaders. (Typically offered: Fall)
This course is cross-listed with AGLE 2143.

## ACOM 3143. Communicating Agriculture to the Public. 3 Hours.

An overview of public communications theory and practices in the agricultural, food, and life sciences with a particular focus on technical writing, public relations and media relations writing, campaign planning, public speaking, and various mass media communication techniques, including print, broadcast, electronic, and social media. (Typically offered: Fall, Spring and Summer)
ACOM 3143H. Honors Communicating Agriculture to the Public. 3 Hours. An overview of public communications theory and practices in the agricultural, food, and life sciences with a particular focus on technical writing, public relations and media relations writing, campaign planning, public speaking, and various mass media communication techniques, including print, broadcast, electronic, and social media. Prerequisite: Honors standing. (Typically offered: Fall, Spring and Summer) This course is equivalent to ACOM 3143.

ACOM 3243. Ag Reporting and Feature Writing. 3 Hours.
This course will provide students an exposure to writing, interviewing, and editing news on agricultural issues in agricultural industry publications. Students will gain practical experience with journalistic interviewing, news writing, feature writing, digital photography, and writing for broadcast on agricultural issues. This course is designed for students with at least six hours of upper division courses. Pre- or Corequisite: JOUR 1033 and lab component. (Typically offered: Fall Odd Years)

ACOM 3943. Professional Development in Agricultural Communications and Leadership. 3 Hours.
Overview of professional and technical skills needed to succeed in internships and jobs in the field of agricultural communications. (Typically offered: Fall Even Years) This course is cross-listed with AGLE 3943.

ACOM 400V. Special Problems in Agricultural Communications. 1-6 Hour. Individual study or research for advanced undergraduates in the field of agricultural communication. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
This course is cross-listed with AGED 400V, AGLE 400V.
ACOM 401V. Special Topics. 1-4 Hour.
Studies of selected topics in agricultural communications not covered in other courses. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.

ACOM 4143. Electronic Communications in Agriculture. 3 Hours.
An overview of communication technology in the agricultural, food and life sciences. (Typically offered: Spring Even Years)

ACOM 4243. Graphic Design in AFLS. 3 Hours.
This course provides students with graphic design and software skills specific to industries in Agriculture, Food, and Life Sciences. Students will learn to use industry-standard software (InDesign, Photoshop, Illustrator, Microsoft Excel, etc.) to prepare text and graphics and package them for use in print production. Prerequisite: ASTM 2903 or ISYS 1123 or equivalent. (Typically offered: Fall, Spring and Summer)

## ACOM 4343. Communication Campaigns in Agriculture. 3 Hours.

Students will develop understanding of the principles, practices and applications of social marketing, integrated marketing communications, advertising and public relations as they pertain to developing communication campaign strategies for the agricultural industry. Students will develop a communication campaign for an agricultural company and/or entity focused on a specific product or service. Prerequisite: Junior standing or higher, ACOM 4243, ACOM 3243, ACOM 3143, and (ACOM 2143 or AGLE 2143), or instructor permission. (Typically offered: Spring Odd Years)

## ACOM 4543. Ag Publications. 3 Hours.

Students produce a magazine through classroom study mirroring a professional magazine staff and are provided an opportunity for their writing, advertisements, photographs and artwork to be published in the magazine. By using computer applications, students integrate various skills including writing, editing and layout in agricultural publications. Prerequisite: JOUR 1033. (Typically offered: Spring Even Years)

## ACOM 4643. Agricultural Video Production. 3 Hours.

The goal of this course is for students to develop a practical understanding of video production with an emphasis on short-form videos commonly used in education and marketing in the agricultural, food and life sciences industry. The course content covers both theory and practical application and will include training with industrystandard video equipment and editing software. (Typically offered: Spring Even Years)

## ACOM 475V. Internship in Ag Communications. 1-6 Hour.

A supervised practical work experience in ag communications which is designed to give the student an insight into the role of ag communications employees and an opportunity to gain professional competence in this area. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit. This course is cross-listed with AGLE 475V, ASTM 475V, EXED 475V.

## Agricultural Education Courses

AGED 1123. Foundations of Agricultural Education. 3 Hours.
A preparatory course evaluating the historical foundations of agricultural education with an introduction to the psychological, sociological and philosophical foundations of education. This course will encourage reflective practice through understanding of educational trends, classroom environment creation and utilization, and effective program planning. (Typically offered: Fall)

AGED 3111. Student Management. 1 Hour.
To guide students in the development of realistic, proactive classroom management strategies that establish a safe culture of student learning and academic success. Prerequisite: Instructor Consent. (Typically offered: Spring)

## AGED 3133. Instructional and Presentation Strategies. 3 Hours.

Methods and techniques in teaching agriculture at the secondary level. Lecture/ laboratory 4 hours per week. Corequisite: Lab component. (Typically offered: Spring)

AGED 3161L. Curriculum Development and Assessment Techniques in Career and Technical Education Laboratory. 1 Hour.

To supply students with opportunities to apply skills in creating curricula, lesson plans, and assessment strategies for courses in career and technical education. Materials created as a result of this course will apply principles learned in AGED 3162, and will align with anticipated courses to be taught by the student during his/her teaching internship. Pre- or Corequisite: AGED 3162. (Typically offered: Fall)

AGED 3162. Curriculum Development and Assessment Techniques in AGED. 2 Hours.
To supply students with the necessary information and skills to select and apply appropriate teaching techniques, curricula, resources, and assessment strategies when designing a course in career and technical education. (Typically offered: Fall)

AGED 4003. Issues in Agriculture. 3 Hours.
Lecture and discussion on local, regional, national and international issues related to agricultural policy, ethics, environment, society, and science. Designed for students with at least six hours of upper division agricultural science courses. Prerequisite: Junior standing. (Typically offered: Fall)

AGED 400V. Special Problems in Agricultural and Extension Education. 1-6 Hour.

Individual study or research for advanced undergraduates in the field of agricultural and extension education. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
This course is cross-listed with AGLE 400V, ACOM 400V.

## AGED 401V. Special Topics. 1-3 Hour.

Studies of selected topics in agricultural or extension education not covered in other courses. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.

## AGED 4113. Undergraduate Researchers Improving Student Experience. 3

 Hours.To engage students in the social sciences in action research that serves to solve a problem or answer a question within the student's academic field through scientific inquiry. All students will work with professionals, commonly outside of the university, within their discipline to conduct their action research in order to solve a problem experienced by that professional. Students may work in teams or individually to complete the overall purpose of the course. (Typically offered: Spring)

AGED 4213. Teachers as Professionals. 3 Hours.
To expose students to the roles and responsibilities of professional teachers. Students will understand the characteristics common to professionals and apply these to the teaching setting. Real-world examples of "grey-area" situations will allow students to evaluate issues holistically and determine appropriate solutions following the ethical and professional guidelines of the teaching discipline. This course will also guide students in the development of realistic, proactive classroom management strategies that establish a safe culture of student learning and academic success, a major component of teacher professionalism. Additionally, students will prepare resumes and engage in mock interviews to enhance their professional dispositions as they consider employment opportunities. Prerequisite: Instructor consent. (Typically offered: Spring)

AGED 4233. Program Development. 3 Hours.
Teachers of agricultural education need an understanding of the skills needed to successfully manage leadership and experiential learning components of the agricultural education model. This course is designed to teach principles and concepts of leadership, program organization, youth organization management, supervised agricultural experience, and advisory committees. This course is a portion of pre-professional studies required for certification in agricultural education. Prerequisite: AGED 3133 and instructor consent. (Typically offered: Spring)

## AGED 4443. Principles of Technological Change. 3 Hours.

This course introduces a structured approach for dealing with the organizational and human aspects of technology transition, including the key concepts of resistance and change management, organizational change, communications, and processes by which professional change agents influence the introduction, adoption, and diffusion of technological change. This course may be offered as a web-based course. Prerequisite: Junior standing. (Typically offered: Fall Odd Years)

## AGED 475V. Internship in Agricultural Education. 1-6 Hour.

Scheduled practical field experiences under the supervision of a professional practitioner in off-campus secondary school systems. Emphasis includes classroom preparation, teaching, and student evaluation. Successful completion of a criminal background check required before a student can begin internship. Prerequisite: Admission into Clinical Practice. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

## AGED 4843L. Methods in Agricultural Laboratories. 3 Hours.

Methods and management techniques in all types of agricultural laboratories that may be in a secondary agricultural science program. Emphasis on management of students and facilities, equipment, and materials. Laboratory 6 hours per week. (Typically offered: Spring)

## Agricultural Leadership Courses

AGLE 2143. Introduction to Agricultural Communications and Leadership. 3 Hours.
A survey of agricultural communications and leadership theories and practices for students in the ACOM and AGLE concentrations and minors and anyone seeking a basic understanding of these disciplines. The course provides an overview of the history, philosophy, and theories of the disciplines and introduces students to career options, skills and practical competencies required of agricultural communicators and leaders. (Typically offered: Fall)
This course is cross-listed with ACOM 2143.

## AGLE 3153. Leadership Development in Agriculture. 3 Hours.

Identification of styles and roles of leadership; development of leadership techniques and skills required in working with organizations; dynamics of group action; methods of resolving conflict; ethical considerations for leaders; and personal skills development. (Typically offered: Fall, Spring and Summer)

## AGLE 3153H. Honors Leadership Development in Agriculture. 3 Hours.

Identification of styles and roles of leadership; development of leadership techniques and skills required in working with organizations; dynamics of group action; methods of resolving conflict; ethical considerations for leaders; and personal skills development. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer)
This course is equivalent to AGLE 3153.

## AGLE 3943. Professional Development in Agricultural Communications and

 Leadership. 3 Hours.Overview of professional and technical skills needed to succeed in internships and jobs in the field of agricultural communications. (Typically offered: Fall Even Years) This course is cross-listed with ACOM 3943.

AGLE 400V. Special Problems in Agricultural Leadership. 1-6 Hour. Individual study or research for advanced undergraduates in the field of agricultural and extension education. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
This course is cross-listed with AGED 400V, ACOM 400V.

## AGLE 401V. Special Topics. 1-4 Hour.

Studies of selected topics in agricultural or extension education not covered in other courses. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.

## AGLE 4153. Survey of Leadership Theory in Agriculture. 3 Hours.

An interdisciplinary analysis of current issues in the practice of leadership in a contemporary and changing society, particularly as they affect agricultural organizations and issues. Discussions of leadership theory, roles of leaders, skills for effective leadership, diversity issues, and followership will challenge students to think critically about leadership, enhance personal leadership performance and potential, and prepare for or expand leadership roles, and to become innovative and productive in dealing with challenges facing agricultural organizations today. Prerequisite: AGLE 3153. (Typically offered: Fall)

AGLE 4163. Leadership Analysis Through Film. 3 Hours.
Clemens (1999) stated, "Films are a catalyst." They make you laugh, cry, cheer, and think. Flaum (2002) stated leadership is best learned in the leadership moment. Moreover, the principles of Andragogy advocate adult learners best learning when there is a practical application of the learning subject. Therefore, this course builds upon the study of leadership theory by allowing students to analyze, reflect, synthesize, and apply leadership theories, models and concepts in the context of film. The course materials encourage students to reflect, synthesize, analyze, and apply the information learned from major leadership theories and apply them to various scenarios and situations demonstrated in selected films. Prerequisite: AGLE 3153 or AGLE 4153 or graduate standing or instructor consent. (Typically offered: Spring and Summer)

## AGLE 475V. Internship in Ag Leadership. 1-6 Hour.

A supervised practical work experience in Ag Leadership which is designed to give the student an insight into the role of ag leadership employees and an opportunity to gain professional competence in this area. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
This course is cross-listed with ACOM 475V, ASTM 475V, EXED 475V.

## Agricultural Systems Technology Management Courses

ASTM 1611L. Fundamentals of Agricultural Systems Technology Laboratory. 1 Hour.
Study of basic mathematical and physical science concepts important in the mechanization of agriculture. Laboratory required for agricultural education, communication and technology majors enrolled in ASTM 1613, optional for others enrolled in ASTM 1613. Corequisite: ASTM 1613. (Typically offered: Fall)

ASTM 1613. Fundamentals of Agricultural Systems Technology. 3 Hours. Introduction to basic physical concepts important in agricultural technical systems: applied mechanics, power and machinery management, structures and electrification, and soil and water conservation. Lecture 3 hours per week. (Typically offered: Fall)
ASTM 2123. Metals and Welding. 3 Hours.
An introduction to agricultural mechanics shop work to include hot and cold metal work, arc welding, and gas welding and cutting. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. (Typically offered: Fall and Spring)

## ASTM 2903. Agricultural and Human Environmental Sciences Applications of Microcomputers. 3 Hours.

Lecture and laboratory assignments covering the contemporary use of microcomputers in agricultural, food and life sciences. Emphasis placed on learning to use selected, appropriate Microsoft (Windows, Word, Excel, PowerPoint and Access), email/Internet, and collaboration software packages. (Typically offered: Fall, Spring and Summer)

## ASTM 3101L. Small Power Units/Turf Equipment Laboratory. 1 Hour.

Testing, evaluation, and maintenance of engines, hydrostatic power transmission systems, and equipment commonly used in the turf and landscaping industries. Corequisite: ASTM 3102. Prerequisite: MATH 1203 or higher. (Typically offered: Spring)
ASTM 3102. Small Power Units/Turf Equipment. 2 Hours.
Principles of operation, adjustment, repair, maintenance, and trouble shooting of small air-cooled engines and power units, including various engine systems, service and maintenance of turf equipment and machinery. Lecture 2 hours per week. Corequisite: ASTM 3101L. Prerequisite: MATH 1203 or higher. (Typically offered: Spring)

ASTM 3153. Surveying in Agriculture and Forestry. 3 Hours.
Techniques and procedures normally used in determining areas and characterizing the topography of agricultural and forest lands. Includes basic concepts of surveying; use and care of level, transit, distance measuring equipment; topographic mapping and public land surveys. (Typically offered: Fall)

ASTM 3173. Electricity in Agriculture. 3 Hours.
Principles of electricity; wiring of home, farmstead and other agricultural structures; selection of electric motors and their care and application in the broad field of agriculture; lighting and special uses of electricity such as heating and electrical controls. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Spring)

## ASTM 400V. Special Problems. 1-6 Hour.

Individual research or study in electrification, irrigation, farm power, machinery, or buildings. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ASTM 402V. Special Topics in Agricultural Mechanization. 1-4 Hour.
Topics not covered in other courses or a more intensive study of special topics in agricultural mechanization. (Typically offered: Irregular) May be repeated for degree credit.

## ASTM 4203. Mechanized Systems Management. 3 Hours.

Selection, sizing, and operating principles of agricultural machinery systems, including power sources. Cost analysis and computer techniques applied to planning and management of mechanized systems. Corequisite: Lab component. Prerequisite: MATH 1203 or higher. (Typically offered: Fall Even Years)

## ASTM 475V. Internship in Ag Systems. 1-6 Hour.

A supervised practical work experience in Ag Systems Technology Management which is designed to give the student an insight into the role of ag systems employees and an opportunity to gain professional competence in this area. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
This course is cross-listed with ACOM 475V, AGLE 475V, EXED 475V.

## ASTM 4973. Irrigation. 3 Hours.

Methods of applying supplemental water to soils to supply moisture essential for plant growth, sources of water, measurement of irrigation water, pumps, conveyance structure, economics, and irrigation for special crops. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Spring)

## Extension Education Courses

## EXED 475V. Internship in Extension. 1-6 Hour.

A supervised practical work experience in Cooperative Extension which is designed to give the student an insight into the role of Extension employees and an opportunity to gain professional competence in this area. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
This course is cross-listed with ACOM 475 V , AGLE 475 V , ASTM 475 V .

## Animal Science (ANSC)

Michael L. Looper
Head of the Department
B114 Agricultural, Food, and Life Sciences Building
479-575-4351
Animal Science Website (http://animal-science.uark.edu/)
The animal science major offers three areas of concentration designed to provide the scientific and technical education to prepare students for positions of leadership and responsibility. Students gain valuable experience pertaining to the production of beef and dairy cattle, swine, horses, sheep, and companion animals. In addition, extensive study is
offered in the specialized areas of animal health, breeding and genetics, meat science, nutrition, and physiology.

Students majoring in animal science are prepared for a variety of careers. Pre-veterinary, pre-medical, and pre-professional course requirements may be fulfilled while meeting degree requirements. Specific career opportunities include positions and services related to the production, merchandising, processing and distribution of meat, milk, and related products. Additional opportunities include field persons, farm and herd managers, and other agribusiness-related positions. With additional academic training, animal science majors may become extension livestock specialists, nutritionists, geneticists, and physiologists.

The Animal Enterprise Concentration is a science-based degree program designed for students desiring a broader general background in animal science and offers students the greatest degree of flexibility in adapting their degree program to a wide variety of career paths. It offers a larger list of elective classes and opportunity to minor in other disciplines.

The Pre-Professional Science Concentration is designed primarily for students who intend to compete for admission to professional schools, advanced post-graduate degree programs, or other career paths that require a strong background and understanding of basic and applied sciences.

The Equine Systems Concentration is designed for students who desire a sound science-based background in Animal Science, but desire a more intense study of equine management and equine science.

Students should consult an animal science adviser for specific course selections in the elective areas. With appropriate advising, students have an opportunity to complete at least one minor within the 120-hour degree program.

## Requirements for B.S.A. in Animal Science with Animal Enterprise Concentration <br> Requirements for a Major in Animal Science

| Choose 1-3 hours from the following: | $1-3$ |  |

| Third Year |  | Units |
| :---: | :---: | :---: |
|  | Fall | Spring |
| General Elective | 3 |  |
| ANSC 3433 Fundamentals of Reproductive Physiology | 3 |  |
| ANSC 3143 Principles of Animal Nutrition \& ANSC 3141L Animal Nutrition Laboratory | 4 |  |
| ANSC 3123 Principles of Genetics (OR ANET Concentration Elective) ${ }^{\text {must take ANSC } 3123 \text { if not }}$ planning to take ANSC 3133 in Spring Year 3 | 3 |  |
| ANSC 3723 Horse and Livestock Merchandising | 3 |  |
| Social Science State Minimum Core Elective (Satisfies General Education Outcomes 3.3 and $4.1)^{4}$ |  | 3 |
| Communication Intensive Elective (Satisfies General Education Outcome 5.1) ${ }^{1}$ |  | 3 |
| ANSC 3033 Animal Physiology |  | 3 |
| ANSC 3133 Animal Breeding and Genetics (OR ANET Concentration Elective ) must take ANSC 3133 if ANSC 3123 not taken in Fall Year 3 |  | 3 |

ANET Concentration Elective and/or General Elective
Year Total:

| Fourth Year | Fall | Units <br> Spring |
| :--- | ---: | ---: |
| ANSC Core Elective and/or General Elective | 4 |  |
| ANSC 4553 Forage-Ruminant Relations (OR | 3 |  |
| ANET Concentration Elective) |  |  |

${ }^{1}$ Recommend COMM 1313 or AGED 4003 to satisfy General Education Outcomes 1.2 and 5.1. See academic adviser for complete list of Communication Intensive courses. COMM 1313 is required for most Schools of Veterinary Medicine.The Fine Arts Elective courses which satisfy General Education Outcome 3.1 include:
ARCH 1003, ARHS 1003, COMM 1003, DANC 1003, LARC 1003, MLIT 1003, MLIT 1003H, MLIT 1013, MLIT 1013H, MLIT 1333, THTR 1003, THTR 1013, or THTR 1013H.
${ }^{2}$ The Fine Arts Elective courses which satisfy General Education Outcome 3.1 include:
ARCH 1003, ARHS 1003, COMM 1003, DANC 1003, LARC 1003, MLIT 100 MLIT 1013, MLIT 1013H, MLIT 1333, THTR 1003, THTR 1013, or THTR 1013H.
${ }^{3}$ The Humanities Elective courses which satisfy General Education Outcomes 3.2 and 5.1 include:
 or PHIL 2103C.
${ }^{4}$ The Social Science Elective courses which satisfy General Education Outcomes 3.3 and 4.1 include: ANTH 1023, COMM 1023, HDFS 1403, HDFS 2413, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2093, HUMN 1114H, HUMN 2114H, INST 2813, INST 2813H, PLSC 2013, PLSC 2813, PLSC 2813H, RESM 2853, SOCI 2013, SOCI 2013H, or SOCI 2033.
${ }^{5}$ Must take ANSC 3282 or ANSC 3761L if not planning to take ANSC 3072 or ANSC 3761L in Spring Year 2
${ }^{6}$ Must take ANSC 3282 or ANSC 3761L if Fine Arts/Humanities taken in Fall Year 2
${ }^{7}$ Only choose ANSC 3761L if 1st hour taken in Fall Year 2
${ }^{8}$ Must take ANSC 4553 if not planning to take ANSC 4163 in Spring Year 4

4 Requirements for B.S.A. in Animal Science with Pre-Professional Science Concentration Requirements for a Major in Animal Science

State minimum core (p. 81) and discipline specific general education requirements:
(Course work that meets state minimum core requirements is in bold.)
University Requirements
UNIV 1001 University Perspectives
Communications
ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013)
ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023)
Communication Intensive Electives (6 hrs) (See student degree audit for approved course list) COMM 1313 is required for most Schools of Veterinary Medicine; Recommend AGED 3143,
AGED 4003, or COMM 1313 to fulfill Learning Outcome 1.2.
Recommend AGED 4003 or COMM 1313 to fulfill Learning Outcome 5.1.
U.S. History or Government 3

HIST 2003 History of the American People to 1877 (ACTS Equivalency = HIST 2113)
or HIST 201‘History of the American People, 1877 to Present (ACTS Equivalency $=$ HIST 2123)
or PLSC 200American National Government (ACTS Equivalency = PLSC 2003)
Mathematics
MATH 1203 College Algebra (ACTS Equivalency = MATH 1103)

Biological Sciences
BIOL 1543 Principles of Biology (ACTS Equivalency =
\& BIOL 1541L BIOL 1014 Lecture) and Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab)
BIOL 2013 General Microbiology (ACTS Equivalency $=$ BIOL
\& BIOL 2011L 2004 Lecture)
and General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab)
\& ANSC 241 thd Domestic Animal Microbiology Laboratory

## Chemical and Physical Sciences

## CHEM 1073 Fundamentals of Chemistry (ACTS Equivalency

\& CHEM 1071L= CHEM 1214 Lecture) and Fundamentals of Chemistry Laboratory (ACTS Equivalency = CHEM 1214 Lab)
or CHEM 110 Rhiversity Chemistry I (ACTS Equivalency = CHEM \& CHEM 11011414 Lecture)
and University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab)
Select 4 hours from the following:
CHEM 1123 University Chemistry II (ACTS Equivalency =
\& CHEM 1121LCHEM 1424 Lecture) and University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab)

CHEM 2613 Organic Physiological Chemistry (ACTS \& CHEM 2611LEquivalency = CHEM 1224 Lecture) and Organic Physiological Chemistry Laboratory (ACTS Equivalency = CHEM 1224 Lab)
CHEM 3603 Organic Chemistry I
\& CHEM 3601Land Organic Chemistry I Laboratory
ENTO 1023 Insects, Science and Society \& ENTO 1021L and Insects, Science and Society Lab ENSC 1003 Environmental Science \& ENSC 1001L and Environmental Science Laboratory PHYS 2013 College Physics I (ACTS Equivalency = PHYS \& PHYS 2011L 2014 Lecture)
and College Physics I Laboratory (ACTS
Equivalency = PHYS 2014 Lab)
Fine Arts and Humanities
Select 3 hours Fine Arts and 3 hours Humanities from State
Minimum Core (see student degree audit for course list).
Social Sciences
Select 9 hours Social Sciences courses from State Minimum Core (see student degree audit for course list).
Animal Science Core Requirements (31 hours)

| ANSC 1033 | Introductory Animal Sciences | 3 |
| :--- | :--- | :--- |
| ANSC 1781 | Career Preparation and Development | 1 |
| ANSC 2113 | Introduction to Animal Evaluation and Handling | 4 |
| \& ANSC 2111L | and Introduction To Animal Evaluation and <br>  <br>  <br> Handling Lab |  |
| ANSC 3123 | Principles of Genetics | 3 |
| or ANSC 3133 Animal Breeding and Genetics |  |  |
| ANSC 3143 | Principles of Animal Nutrition |  |
| \& ANSC 3141L | and Animal Nutrition Laboratory |  |
| ANSC 3213 | Behavior of Domestic Animals | 4 |
| ANSC 3033 | Animal Physiology | 3 |
| ANSC 3433 | Fundamentals of Reproductive Physiology | 3 |
| ANSC 4993 | Animal Science Capstone | 3 |

Select 4 hours from the following:

| ANSC 4252 | Cow-Calf Management |
| :--- | :--- |
| ANSC 4262 | Swine Production |
| ANSC 4272 | Sheep Production |
| ANSC 4282 | Horse Production |
| ANSC 4452 | Milk Production |
| ANSC 4482 | Companion Animal Management |
| ANSC 4652 | Stocker-Feedlot Cattle Management |
| ANSC 4662 | Comparative Studies in Panamanian and US |
|  | Agricultural Practices |

ANSC 410V Special Topics in Animal Sciences ((Study Abroad to New Zealand or Australia))
Concentration Requirements
General Electives - Students may need to take up to 12 hours of
additional 3000 or above level courses to fulfill the 40 hour upper division requirements.

## Total Hours

## Requirements for Pre-Professional Science Concentration

|  |  |  |
| :---: | :---: | :---: |
| CHEM 3613 <br> \& CHEM 3611L | Organic Chemistry II and Organic Chemistry II Laboratory | 4 |
| CHEM 3813 | Elements of Biochemistry | 3 |

## Minor in Animal Science (ANSC-M)

A minor in Animal Science prepares students for jobs in the animal industries. A student planning to minor in animal science must consult with an Animal Science adviser. The minor consists of 20 hours to include the following:

| Category $\mathbf{1}$ (6 hours) |  |  |
| :--- | :--- | :--- |
| ANSC 1033 | Introductory Animal Sciences | 3 |
| ANSC 2113 | Introduction to Animal Evaluation and Handling | 3 |
| Category 2 |  | 6 |

${ }^{1}$ Recommend COMM 1313 or AGED 4003 to satisfy General Education Outcomes 1.2 and 5.1. See academic adviser for complete list of Communication Intensive courses. COMM 1313 is required for most Schools of Veterinary Medicine.
2 The Fine Arts elective courses which satisfy General Education Outcome 3.1 include:
ARCH 1003, ARHS 1003, COMM 1003, DANC 1003, LARC 1003, MLIT 100
MLIT 1013, MLIT 1013H, MLIT 1333, THTR 1003, THTR 1013, or THTR 1013H.
${ }^{3}$ The Humanities Elective courses which satisfy General Education Outcomes 3.2 and 5.1 include:
CLST 1003, CLST 1003H, CLST 1013, HUMN 1124H, PHIL 2003, PHIL 200 or PHIL 2103C.
${ }^{4}$ The Social Science Elective courses which satisfy General Education Outcomes 3.3 and 4.1 include: ANTH 1023, COMM 1023, HDFS 1403, HDFS 2413, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2093, HUMN 1114H, HUMN 2114H, INST 2813, INST 2813H, PLSC 2013, PLSC 2813, PLSC 2813H, RESM 2853, SOCI 2013, SOCI 2013H, or SOCI 2033.
${ }^{5}$ ANSC 3123 must be taken if ANSC 3133 not taken in Spring Year 3
${ }^{6}$ ANSC 3133 must be taken if ANSC 3123 will not be taken in Fall Year 4

## Minor in Equine Science (EQSC-M)

A minor in Equine Science prepares students for jobs in the equine industry. A student planning to minor in Equine Science should meet with an Animal Science adviser for more information. The Equine Science minor is only available to students outside of the ANSC major.

The minor consists of 20hours to include the following:

| Core Requirements | 14 |
| :--- | :--- |
| ANSC 1033 | Introductory Animal Sciences |
| ANSC 3033 | Animal Physiology |
| ANSC 3133 | Animal Breeding and Genetics |
| or ANSC 34 iffundamentals of Reproductive Physiology |  |
| ANSC 3143 | Principles of Animal Nutrition |
| ANSC 4282 | Horse Production |
| Core Equine Electives: |  |
| ANSC 2303L | Introduction to Horsemanship |
| ANSC 3072 | Equine Selection and Evaluation |
| ANSC 3723 | Horse and Livestock Merchandising | 9 hours of online content based on research and best practices in equine care and management. It is designed to provide undergraduate students with a microcertificate in specific equine knowledge areas - general equine care and management, successful equine sales options, and equine behavior. This microcertificate will be open to undergraduates pursuing an Animal Science degree, those outside of the field of Animal Science but with an interest in horses and county extension agents.

Requirements: To receive the undergraduate Equine Management Microcertificate, students are required to take 9 hours of coursework in Animal Science within the Bumpers College of Agricultural, Food and Life Sciences. There are no prerequisites for enrolling in the Equine Management Microcertificate courses.

## Required Courses:

| ANSC 2003 | Introduction to Equine Industry | 3 |
| :--- | :--- | :--- |
| ANSC 3723 | Horse and Livestock Merchandising | 3 |

| Total Hours |  | 9 |

## Faculty

Coffey, Ken, Ph.D. (University of Missouri-Columbia), M.S. (University of Kentucky), B.S. (University of Tennessee), Professor, 1996, 2003.
Gadberry, M. Shane, Ph.D., M.S., B.S. (University of Arkansas), Professor, 2006, 2019.
Huang, Yan, Ph.D. (University of Wyoming), M.S. (Dankook University), B.S. (China Agricultural University), Assistant Professor, 2015.

Jennings, John A., Ph.D. (University of Missouri), M.S. (University of Arkansas), B.S. (Southwest Missouri State University), Professor, 1998.
Kegley, Beth, Ph.D., M.S. (North Carolina State University), B.S. (Virginia Polytech Institute and State University), Professor, 1996, 2007.
Kutz, Bryan Richard, M.S. (Western Kentucky University), B.S.
(Oklahoma State University), A.S. (Northern Oklahoma College), Instructor, 1997.
Littlejohn, Brittni P., Ph.D. (Texas A\&M University), Assistant Professor, 2019.

Looney, Charles R., Ph.D. (Louisiana State University), Professor, 2019. Looper, Michael L., Ph.D. (Oklahoma State University), M.S., B.S. (University of Arkansas), Professor, 2011.
Maxwell, Charles, Ph.D. (University of Wisconsin-Madison), M.S., B.S. (University of Georgia), Professor, 1996.
Philipp, Dirk, Ph.D. (Texas Tech University), M.S., B.S. (University of Leizig, Germany), Associate Professor, 2007, 2015.
Pohlman, Fred W., Ph.D. (Kansas State University), M.S. (University of Tennessee), B.S. (University of Missouri-Columbia), Professor, 1997, 2009.

Powell, Jeremy G., Ph.D. (University of Arkansas), D.V.M. (Oklahoma State University), B.S. (University of Arkansas), Professor, 2009, 2013.
Rivera, Daniel J., Ph.D. (New Mexico State University), M.S. (West Texas A\&M University), Associate Professor, 2021.
Rorie, Rick, Ph.D. (Louisiana State University), M.S., B.S. (University of Arkansas), Professor, 1989, 2003.
Rumley, Elizabeth R., LL.M. (University of Arkansas), J.D. (University of Toledo), B.A. (Michigan State University), Instructor, 2012.
Russell, Mark, Ed.D. (Texas Tech University), M.S., B.S. (Colorado State University), Assistant Professor, 2010.
Thomas, Lauren, D.V.M. (Oklahoma State University), B.S. (University of Arkansas), Teaching Assistant Professor, 2016.
Vierck, Kelly, Ph.D. (Texas Tech University), M.S. (Kansas State University), B.S. (Oklahoma State University), Assistant Professor, 2020.
Ward, Heidi, Ph.D. (University of Oklahoma), D.V.M. (Oklahoma State University), B.S. (University of Oklahoma), Assistant Professor, 2015.
Yazwinski, Tom, Ph.D. (North Carolina State University), M.S. (University of Maine), B.S. (University of Vermont), University Professor, 1977, 2004.
Zhao, Jiangchao, Ph.D. (University of Wisconsin-Madison), M.S., B.S.
(China Agricultural University), Associate Professor, 2015, 2019.

## Courses

ANSC 1001L. Introductory to Animal Sciences Laboratory. 1 Hour.
Study of facilities used in production, processing, and management in animal agriculture. Identification, selection evaluation and testing of livestock, meat, and milk. Laboratory 3 hours per week. (Typically offered: Fall and Spring)

ANSC 1033. Introductory Animal Sciences. 3 Hours.
Students will be introduced to biological sciences associated with modern systems of care and management of livestock. Foundation sciences include topics in genetics, nutrition, reproduction, and animal health. The importance of livestock, equine, and companion animals and their allied industries will also be discussed. (Typically offered: Fall and Spring)

ANSC 1033H. Honors Introductory Animal Sciences. 3 Hours.
Students will be introduced to biological sciences associated with modern systems of care and management of livestock. Foundation sciences include topics in genetics, nutrition, reproduction, and animal health. The importance of livestock, equine, and companion animals and their allied industries will also be discussed. Prerequisite: Honors standing. (Typically offered: Fall and Spring)
This course is equivalent to ANSC 1033.
ANSC 1062. Sustainable Integrated Small Animal Farming. 2 Hours.
Practical information on small scale animal production, including practical strategies for farm planning, issues of economic and environmental sustainability, best management practices, biosecurity, disease prevention, and farm safety will be presented. (Typically offered: Spring)
This course is cross-listed with POSC 1062.
ANSC 1781. Career Preparation and Development. 1 Hour.
Course will cover concepts necessary for preparing for a career in the animal sciences and allied industries. Concepts of goal setting, effective written and verbal communications, interpersonal skills, professional behaviors, presentation skills, portfolio and resume development will be presented. (Typically offered: Fall)
ANSC 2003. Introduction to Equine Industry. 3 Hours.
Examination of careers and business opportunities in the equine industry. Students will gain the opportunity to identify high quality horses through evaluation of conformation and locomotion. Students will also gain skill at oral presentation and be knowledgeable of costs and responsibilities associated with horse ownership. (Typically offered: Spring)
ANSC 2111L. Introduction To Animal Evaluation and Handling Lab. 1 Hour. Laboratory component stressing fundamental concepts of animal structure, composition, and behavior, and animal handling as they relate to animal production, safety, well-being, and handler safety. One 3-hour lab weekly. Corequisite: ANSC 2113 (only for students majoring in Animal Science). Pre- or Corequisite: ANSC 1033. (Typically offered: Fall and Spring)

ANSC 2113. Introduction to Animal Evaluation and Handling. 3 Hours.
Fundamental concepts of the interrelationship of animal growth, structure, function, and animal handling as they relate to animal production, safety, well-being, and handler safety. Corequisite: ANSC 2111L (only for students majoring in Animal Science). Pre- or Corequisite: ANSC 1033. (Typically offered: Fall and Spring)
ANSC 2252L. Introduction to Livestock and Meat Evaluation. 2 Hours.
Develop an understanding between live animal evaluation and carcass composition. Comparative judging including meat evaluation, classification and selection of beef cattle, sheep and swine. (Typically offered: Spring)

ANSC 2303L. Introduction to Horsemanship. 3 Hours.
A study of modern horsemanship training techniques involving the psychology and ethology (reason for the behavior) of equine social behavior and how it pertains to learning patterns; application of fundamental behavioral concepts in training of horses, and modification of desirable and undesirable behavioral patterns. Prerequisite: Instructor consent. (Typically offered: Fall and Spring)

## ANSC 2333. Introduction to Animal Health. 3 Hours.

This course will cover the fundamental principles of animal health and disease prevention. Course discussion will include sanitation, disinfection, immunization, nutrition, housing and husbandry, causes of diseases, parasitism, clinical signs of disease, prevention and treatment options for diseases. Prerequisite: BIOL 1543 and sophomore standing. (Typically offered: Fall)

## ANSC 2411L. Domestic Animal Microbiology Laboratory. 1 Hour

This course is designed for students working on their Poultry Science, Anima Science, and/or Food Science degrees. Students enrolled in this course will learn how to collect samples aseptically from live birds and meat samples, transport samples, and culture samples on a variety of different microbiological media. In addition, students will have the opportunity to visit one of the microbiology labs in the local poultry production facilities. Students will learn how to handle samples, stain bacterial cells, and identify unknown bacteria from field samples. A lab period will be assigned to teaching students on how to use bacteria in food production by teaching students how to prepare and sample yogurt. Corequisite: ANSC 2413. (Typically offered: Fall)
This course is cross-listed with POSC 2411L.

## ANSC 2413. Domestic Animal Microbiology. 3 Hours.

Basic concepts of domestic animal and poultry microbiology including diversity, genetics, metabolism, growth, control of growth, pathogenesis, and immunology.

Corequisite: ANSC 2411L. Prerequisite: (BIOL 1543 and BIOL 1541L) and (CHEM 1073 and ((CHEM 1071L or CHEM 1103) or (CHEM 1123 and
CHEM 1121L)). (Typically offered: Fall)
This course is cross-listed with POSC 2413.

## ANSC 3003. Applied Animal Parasitology. 3 Hours.

The economically important parasites of domestic animals with emphasis on their host relationships and management considerations. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Fall Even Years)

ANSC 3013. Parasitisms of Domesticated Non-Herbivores. 3 Hours.
Course will provide applied instruction and appreciation for the parasitisms of our domesticated swine, chickens, turkeys, dogs and cats. (Typically offered: Fall Odd Years)

ANSC 3033. Animal Physiology. 3 Hours.
Fundamental aspects of central nervous, musculoskeletal, reproductive, digestive, immune, cardiovascular, respiratory and renal systems will be covered. The normal structure and function of these systems will be emphasized. Lecture 3 hours per week. Prerequisite: BIOL 1543 and (CHEM 1123 or CHEM 1073). (Typically offered: Spring)

## ANSC 3072. Equine Selection and Evaluation. 2 Hours.

Students will learn criteria for evaluation and selection of breeding and show animals and will gain expertise in the evaluation of breed types and show ring characteristics. Includes field trips to various breed operations. Students in this class will be well prepared to participate in equine judging team activities. Prerequisite: Instructor consent. (Typically offered: Spring)

## ANSC 3123. Principles of Genetics. 3 Hours.

Fundamentals of heredity, with special emphasis on the improvement of farm animals. Lecture 3 hours per week. Prerequisite: BIOL 1543 and MATH 1203 or higher. (Typically offered: Fall)
This course is cross-listed with POSC 3123.
ANSC 3133. Animal Breeding and Genetics. 3 Hours.
Application of the principles of genetics to the breeding of farm animals. Lecture 3 hours per week. Corequisite: Drill component. Prerequisite: MATH 1203 or higher. (Typically offered: Spring)

## ANSC 3141L. Animal Nutrition Laboratory. 1 Hour.

Animal Nutrition Laboratory (FA) Practical and quantitative approach to animal nutrition; use of various methods of feedstuff evaluation including ration balancing for domestic animals. Laboratory 2 hours per week. Corequisite: ANSC 3143 for ANSC majors only. Prerequisite: MATH 1203. (Typically offered: Fall)

ANSC 3143. Principles of Animal Nutrition. 3 Hours.
Scientific approach to animal nutrition involving the mechanisms through which feed nutrients are utilized by farm animals. Lecture 3 hours per week. Corequisite: ANSC 3141L (only a corequisite for students majoring in Animal Science). Prerequisite: ANSC 1033. (Typically offered: Fall)

ANSC 3213. Behavior of Domestic Animals. 3 Hours
Behavior associated with domestication. Effects of selective breeding, physical and social environments, and developmental stage on social organization, aggressive behavior, sexual behavior, productivity, and training of domestic animals. (Typically offered: Fall)

## ANSC 3282. Livestock Judging and Selection. 2 Hours.

Comparative judging, including grading, classification, and selection of beef cattle, swine, sheep and horses. Oral and written discussion. Laboratory 6 hours per week. Prerequisite: ANSC 1033 or ANSC 2252L. (Typically offered: Fall)

ANSC 3291. Livestock Junior Judging Team Activity. 1 Hour.
Training for membership on judging teams, through participation. (Typically offered: Spring)

ANSC 3333. Diseases of Livestock. 3 Hours.
Introductory study of the diseases of farm animals with emphasis on fundamental principles of disease, body defense mechanisms, hygiene, and sanitation. Prerequisite: BIOL 1543 and ANSC 2333. (Typically offered: Spring)

ANSC 3433. Fundamentals of Reproductive Physiology. 3 Hours.
Principles of mammalian reproductive physiology with emphasis on farm animals. Lecture 3 hours per week. Pre- or Corequisite: ((CHEM 1073 and CHEM 1071L) or (CHEM 1123 and CHEM 1121L) or (CHEM 2613 and CHEM 2611L) or (CHEM 3603 and CHEM 3601L)) and junior standing. Prerequisite: BIOL 1543. (Typically offered: Fall)

ANSC 3491L. Artificial Insemination in Cattle. 1 Hour.
Experience with artificial insemination technique in cattle including estrus detection, semen storage and handling, insemination equipment maintenance and technique. Laboratory 4 hours per week. The course is offered the second 8 weeks of the spring semester. Pre- or Corequisite: ANSC 3433 or instructor consent. (Typically offered: Fall)

## ANSC 3513H. Honors Current Approaches in Agricultural Laboratory Research. 3 Hours.

A laboratory course to introduce students to current laboratory research techniques used in agricultural and life sciences. Hands-on laboratory exercises will emphasize current cellular and molecular research techniques, laboratory notebook keeping, data interpretation, and presentation of results. Prerequisite: BIOL 1543 and honors standing. (Typically offered: Spring Even Years)
This course is cross-listed with POSC 3513H.
ANSC 3613. Meat Science. 3 Hours.
The study of meat science and muscle biology. Topics will include animal/tissue growth and development and the relationship to meat quality. Meat processing, preservation, and meat safety concerns will also be considered. Lecture 3 hours per week. (Typically offered: Spring)

## ANSC 3723. Horse and Livestock Merchandising. 3 Hours.

Various types of merchandising programs for specific livestock enterprises will be presented. Students will evaluate the effectiveness of merchandising programs including how to organize, advertise, and manage a purebred auction sale of livestock. (Typically offered: Fall)

ANSC 3753. Equine Assisted Activities and Therapies. 3 Hours.
Animal Science 3753 introduces students to the field of equine assisted activities and therapies. A variety of approaches, therapeutic settings and client populations will be addressed with an emphasis on equine behavior. Students will gain experience in the practical application of an equine assisted therapy program. (Typically offered: Fall)

## ANSC 3761L. Ranch Horse Riding. 1 Hour.

This course is designed for students to have the opportunity to practice and/or compete in ranch horse competition as well as experience horseback ranch work. The class will consist mostly of hands-on participation at the Whitaker Arena as well as various competition and ranch sites around the region and country. Students will learn the value of the horse in livestock production as well as the competition portion of the equine industry. The Ranch Horse Team is a flagship for the University of Arkansas, Bumper's College Department of Animal Science. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

## ANSC 3773. Equine Behavior. 3 Hours.

Students will be introduced to equine behavior and its application to equine management and training. Course will cover identifying behaviors, senses and memory of the horse, horse-human interaction, how horses learn, the application of classical conditioning and equine welfare. (Typically offered: Summer)
ANSC 400V. Special Problems. 1-6 Hour.
Special problems in the animal sciences for advanced undergraduate students. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

## ANSC 401V. Internship in Animal Sciences. 1-6 Hour.

Supervised work experience with private or government organizations Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

## ANSC 4072. Advanced Equine Selection and Evaluation. 2 Hours.

Advanced evaluation and selection of breeding and show animals, evaluation of breed types and show characteristics. Field trips to breeding operations. Competitive Judging team members come from this course and participation in competitive events will be required. Prior equine evaluation is not necessary, but instructor consent is required. Some Saturday activities. Prerequisite: ANSC 3072 or instructor consent. (Typically offered: Fall)

## ANSC 410V. Special Topics in Animal Sciences. 1-4 Hour.

Topics not covered in other courses or a more intensive study of specific topics in animal sciences. (Typically offered: Irregular) May be repeated for degree credit.

ANSC 410VH. Honors Special Topics in Animal Sciences. 1-4 Hour.
Topics not covered in other courses or a more intensive study of specific topics in animal sciences. Prerequisite: Honors standing. (Typically offered: Irregular) May be repeated for degree credit.
This course is equivalent to ANSC 410 V .

## ANSC 4123. Legal Issues in Animal Agriculture. 3 Hours.

An issues-oriented course focusing on the legal issues involved in the production of poultry, swine and livestock. Emphasis will center on the laws, regulations and policy arguments involved in animal confinement, antibiotic use, humane slaughter and veterinary medicine, along with other related issues. The wide range of regulationfrom local to state to federal, depending on the issue- will be studied and discussed. (Typically offered: Spring Odd Years)
This course is cross-listed with AGEC 4123, POSC 4123.

## ANSC 4142. Advanced Animal Handling Techniques. 2 Hours.

This course is designed to familiarize students with handling techniques of a variety of animals, including cattle, sheep, horses, pigs, dogs, and others. Students will learn and practice handling, restraint, and common husbandry procedures with a variety of domestic species. The course will provide valuable preparation for careers in livestock management, vet medicine, animal-based research, and other fields in animal science. Prerequisite: Junior standing or consent. (Typically offered: Fall and Spring)

ANSC 4163. Companion Animal Nutrition. 3 Hours.
This course is designed to focus on the digestive anatomy, physiology, and nutrient metabolism of non-herbivorous companion animals, primarily dogs and cats. Topics discussed will also include an overview of the pet food industry, its regulations and commonly utilized ingredients. Students will gain a deeper understanding of nutrition as it relates to life stages and various disease states that can affect both dogs and cats. This course will require a Saturday trip to one or two off campus facilities. Prerequisite: ANSC 3143 or POSC 4343. (Typically offered: Spring) This course is cross-listed with POSC 4163.

## ANSC 4173. Thoroughbred Horse Industry. 3 Hours.

This course is designed to give you an overview of the Thoroughbred breed and industry. Students will gain an understanding of the Thoroughbred industry, it's history, and modern practices. Students will also gain an understanding of career potential in the Thoroughbred industry. Prerequisite: Instructor consent and Junior or Senior standing. (Typically offered: Spring Odd Years)

## ANSC 4181. Kentucky Thoroughbred Tour. 1 Hour.

An overview of the Thoroughbred industry in central Kentucky through visiting major racetracks, world-class Thoroughbred breeding facilities, major equine veterinary practices, world class equine sales facilities, equine rehabilitation and retirement facilities, equine nutritional research facilities, and visit with horse trainers, veterinarians and farm managers. Successful completion of all course requirements and the tours will enable students to obtain 1 credit in animal science, network in the equine industry and critically assess potential careers. Prerequisite: Instructor consent. (Typically offered: Summer Odd Years)

## ANSC 4252. Cow-Calf Management. 2 Hours.

Systems of cow-calf management including the practical application of the principles of breeding, feeding, and management to commercial and purebred beef cattle under Arkansas conditions. Prerequisite: Must be a student in the Bumpers College of Agricultural, Food and Life Sciences, ANSC 1033 and Junior standing or higher. (Typically offered: Fall)

## ANSC 4262. Swine Production. 2 Hours.

Methods in producing purebred and commercial swine with specific emphasis on the management programs needed for profitable pork production in Arkansas. Prerequisite: Must be a student in Bumpers College of Agricultural, Food and Life Sciences, ANSC 1033 and Junior standing or higher. (Typically offered: Fall Even Years)

## ANSC 4272. Sheep Production. 2 Hours.

Purebred and commercial sheep management emphasizing the programs of major importance in lamb and wool production in Arkansas. Prerequisite: Must be a student in Bumpers College of Agricultural, Food and Life Sciences, ANSC 1033 and Junior standing or higher. (Typically offered: Spring)

## ANSC 4282. Horse Production. 2 Hours.

Production, use and care of horses and ponies including breeding, feeding, handling, and management. Lecture 1 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: Junior standing or higher. (Typically offered: Spring)
ANSC 4291. Livestock Senior Judging Team Activity. 1 Hour.
Training for membership on judging teams, through participation. (Typically offered: Fall)

## ANSC 4303. Comparative Veterinary Anatomy. 3 Hours.

Study of structures and principles of anatomy of major domestic species. The dog, horse, and cow will be used as models for anatomical structures and the application of anatomical knowledge in animal science; focus on veterinary applications. 3 hours of lecture each week. Spring semesters. Corequisite: Lab component. Prerequisite: ANSC 1033 or BIOL 1543, junior standing or instructor consent. (Typically offered: Fall and Spring)

## ANSC 4452. Milk Production. 2 Hours.

Principles of breeding, feeding, and management of dairy cattle will be studied. Prerequisite: Must be a student in the Bumpers College of Agricultural, Food and Life Sciences, ANSC 1033 and Junior standing or higher. (Typically offered: Fall Odd Years)

## ANSC 4482. Companion Animal Management. 2 Hours.

The study and application of principles of domestication, nutrition, reproduction, parasitology, diseases, behavior, and husbandry management to companion animals. Dogs, cats, and exotic animals will be the species of primary interest. Practical problems of care and management of these species will be solved.
Prerequisite: BIOL 1543 or equivalent or consent of instructor. (Typically offered: Spring)

## ANSC 4553. Forage-Ruminant Relations. 3 Hours.

Chemical, physical, and botanical characteristics of forage plants, the dynamics of grazing, intake, digestion, behavior, and nutrient cycling at the plant-animal interface. CSES 1203 recommended. Corequisite: Lab component. Prerequisite: ANSC 3143. (Typically offered: Fall Even Years)

## ANSC 4613. Muscle Growth and Development. 3 Hours

This is an undergraduate level course offering detailed insights into skeletal muscle morphological, physiological, cellular, and molecular factors affecting muscle structure and function, with special emphasis on cellular and molecular regulation of muscle growth and development, such as myo-, fibro-, and adipo-genesis. And the relationship between the properties of skeletal muscle and meat quality. ANSC 3033 and(or) CHEM 3813 are recommended as a prerequisite(s). (Typically offered: Fall) This course is cross-listed with POSC 4613.

## ANSC 4652. Stocker-Feedlot Cattle Management. 2 Hours.

Production and management systems for stocker and feed-lot cattle including practical applications of forage systems, feeding, health management and economics of production of these livestock. Prerequisite: Must be a student in the Bumpers College of Agricultural, Food and Life Sciences, ANSC 1033 and Junior standing or higher. (Typically offered: Fall)

## ANSC 4662. Comparative Studies in Panamanian and US Agricultural Practices. 2 Hours.

An experiential-learning course with an embedded trip to Panama designed to give students an overview of the agricultural industry and the impact of Panamanian history, culture and geography on agriculture and how this contrasts with practices in the US. Students will participate in a study tour to Panama where they will engage in learning experiences that explore the agriculture, history, and culture of this country. They will have the opportunity to visit and learn from successful producers of livestock and agricultural staples as well as tour the Panama canal and learn about Panamanian culture and history. Prerequisite: Instructors consent and approval from Study Abroad office. (Typically offered: Spring)

## ANSC 4923. Brain \& Behavior. 3 Hours.

Covers cellular through neural systems, major brain functions and comparative neuroanatomy. Topics include ion channels, membrane and action potentials, synaptic integration, neurotransmitters, major brain regions of mammals and birds, sensory systems and the autonomic nervous systems, neuroendocrine system, and control by the brain of critical functions and behavior. Lecture 3 hours per week. Prerequisite: (ANSC 3033 or POSC 3033) or PSYC 2003 or BIOL 2213 or BIOL 2443 or BIOL 2533. (Typically offered: Fall)
This course is cross-listed with POSC 4923.

## ANSC 4993. Animal Science Capstone. 3 Hours.

The purpose of this course is to provide students with an opportunity to apply and integrate knowledge from previous coursework in general education and animal science. This course is a multiple experience/ exercise capstone course and is designed for students to demonstrate mastery of a particular subject within Animal Science. Students will provide evidence of integrated knowledge through a variety of means including oral presentations, creation of a 1250-word reflective essay, writing a research abstract and applying problem solving and critical thinking skills. Prerequisite: Senior standing. (Typically offered: Fall and Spring)

## Crop, Soil and Environmental Sciences (CSES)

Jeff Edwards

Department Head
115 Plant Science Building
479-575-2354

## Crop, Soil and Environmental Sciences Website

Courses in the Department of Crop, Soil and Environmental Sciences provide fundamental and applied studies in two majors:

- Crop Science (http://catalog.uark.edu/ undergraduatecatalog/collegesandschools/ dalebumperscollegeofagriculturalfoodandlifesciences/ cropmanagementcpmg/)
- Environmental, Soil and Water Science (http:// catalog.uark.edu/undergraduatecatalog/collegesandschools/ dalebumperscollegeofagriculturalfoodandlifesciences/ environmentalsoilandwaterscienceesws/)

Areas studied within the Crop Science major include crop science, production agriculture, plant breeding and genetics, crop and forage production, pest management (weeds, insects, and plant diseases), and soil fertility. The Environmental, Soil and Water Science major includes courses in areas such as environmental science, water quality, soil science, soil and water conservation, and the sustainable productivity of natural resources.

Many graduates from both majors also choose to continue their education in graduate programs in a wide variety of disciplines both related and complementary to the B.S.A. degrees.

## Crop Science (CPSC)

Jeff Edwards
Professor and Head
115 Plant Science Building
479-575-2354

Opportunities for employment and post-graduate study are numerous for graduates of the Department of Crop, Soil, and Environmental Sciences. Crop Science graduates become involved in crop production or find employment in public agencies providing support services for agriculture (e.g., Extension Service, State Plant Board, Natural Resources Conservation Service), or as consultants serving production agriculture, in the agrichemical and seed industries and in agricultural research programs.

The crop science major includes courses in crop management, production agriculture, plant breeding and genetics, crop and forage production, pest management (weeds, insects, and plant diseases), and soil fertility.

## Requirements for a Major in Crop Science (CPSC)

State minimum core (p. 81) and discipline specific general education requirements (p. 72).
(Course work that meets state minimum core requirements is in bold.)

| University Requirements |  |
| :---: | :---: |
| UNIV 1001 U | University Perspectives ${ }^{1}$ |

ENGL 1023 Composition II (ACTS Equivalency
= ENGL 1023) (If exempt, see adviser for communication courses.) (Satisfies General Education Outcome 1.1)
COMM 1313 Public Speaking (ACTS Equivalency = SPCH 1003) (Satisfies General Education Outcomes 1.2 and 5.1)
AGEC 1103 Principles of Agricultural Microeconomics (Satisfies General Education Outcome 3.3)
U.S. History or Government Core Elective (Satisfies General Education Outcome 4.2) ${ }^{5}$
Year Total:
Second Year $\quad$ Fall Units

Satisfies General Education Outcome 3.4:
CHEM 1103 University Chemistry I (ACTS
Equivalency = CHEM 1414 Lecture)
\& CHEM 1101L University Chemistry I Laboratory
(ACTS Equivalency $=$ CHEM 1414 Lab)
or CHEM 1073 and CHEM 1071L
Social Sciences State Minimum Core Elective
(Satisfies General Education Outcome 3.3) ${ }^{4}$
Fine Arts or Humanities State Minimum Core
Elective (Satisfies General Education Outcome 3.1 or 3.2) ${ }^{1,2}$
Crop Science Elective ${ }^{4,5}$
Crop Science Elective ${ }^{4,5}$
CHEM 1123 University Chemistry II (ACTS
Equivalency = CHEM 1424 Lecture)
\& CHEM 1121L University Chemistry II Laboratory
(ACTS Equivalency = CHEM 1424 Lab)
or CHEM 2613 and CHEM 2611L
ASTM 2903 Agricultural and Human Environmental Sciences Applications of Microcomputers or STAT 2303 Principles of Statistics (ACTS Equivalency $=$ MATH 2103)
Social Sciences State Minimum Core Elective (Satisfies General Education Outcomes 3.3 and 4.1) ${ }^{4}$

Fine Arts or Humanities State Minimum Core Elective (Satisfies General Education Outcome 3.1 or 3.2) ${ }^{1,2}$
Crop Science Elective ${ }^{4,5}$
Year Total:

Units

3

3
${ }^{4}$ Students must complete 40 hours of upper division courses (3000-4000 level). It is recommended that students consult with their academic adviser when making course selections.
${ }^{5}$ See student degree audit for approved course list.

## Environmental, Soil and Water Science (ESWS)

Mary C. Savin
ESWS Coordinator
115 Plant Science Building
479-575-5740
Opportunities for employment and post-graduate study are numerous for graduates of the Department of Crop, Soil, and Environmental Sciences. Environmental, Soil, and Water Science graduates find jobs with environmental consulting companies, environmental education organizations, state agencies (e.g., Extension Service, Department of Environmental Quality, Health Department), federal agencies (e.g., Environmental Protection Agency, Natural Resources Conservation Service), municipalities and local environmental services (e.g., waste management and recycling, water and wastewater treatment facilities, parks and tourism departments), a wide variety of private businesses, and environmental research.

The Environmental, Soil, and Water Science major includes courses in areas such as environmental science, water quality, soil science, soil and water conservation, and the sustainable productivity of natural resources.

## Requirements for a Major in Environmental, Soil, and Water Science (ESWS)

State minimum core (p. 81) and discipline specific general education (p. 72) requirements:
(Course work that meets state minimum core requirements is in bold.)
University Requirements 1

| UNIV 1001 | University Perspectives (Counts as General Elective) |
| :---: | :---: |
| Communication |  |
| Choose from English Core course (6 hours) |  |
| COMM 1313 | ```Public Speaking (ACTS Equivalency = SPCH 1003)``` |
| CSES 3023 | Crop, Soil, and Environmental Sciences Colloquium |
| or ACOM 31 Communicating Agriculture to the Public |  |
| U.S. History and Government |  |
| Choose 3 hours U.S. History/Government from state minimum core |  |
| Mathematics |  |
| MATH 1203 | $\begin{aligned} & \text { College Algebra (ACTS Equivalency }=\text { MATH } \\ & \text { 1103) } \end{aligned}$ |
| MATH 1213 | Plane Trigonometry (ACTS Equivalency = MATH 1203) (Higher level MATH is encouraged for students with an ACT of 26 or higher and considering graduate school.) |
| Sciences |  |

| BIOL 1543 \& BIOL 1541L | Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture) <br> and Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab) |
| :---: | :---: |
| BIOL 2013 <br> \& BIOL 2011L | General Microbiology (ACTS Equivalency $=$ BIOL 2004 Lecture) <br> and General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab) |
| BIOL 3863 <br> \& BIOL 3861L <br> or ENSC 322 <br> \& ENSC 322 | General Ecology and General Ecology Laboratory <br> 2 2Bcosystems Assessment <br> 2敌 Ecosystems Assessment Laboratory |
| CSES 1203 | Introduction to Plant Sciences |
| CHEM 1103 <br> \& CHEM 1101L | University Chemistry I (ACTS Equivalency = LCHEM 1414 Lecture) <br> and University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab) |
| CHEM 1123 <br> \& CHEM 1121L | University Chemistry II (ACTS Equivalency = LCHEM 1424 Lecture) <br> and University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab) |
| CHEM 2613 \& CHEM 2611L <br> or CHEM 36 <br> \& CHEM 360 | Organic Physiological Chemistry (ACTS <br> LEquivalency = CHEM 1224 Lecture) <br> and Organic Physiological Chemistry Laboratory <br> (ACTS Equivalency = CHEM 1224 Lab) <br> GOBrganic Chemistry I <br> Oadd Organic Chemistry I Laboratory |
| GEOS 1113 <br> \& GEOS 1111L | Physical Geology (ACTS Equivalency $=$ GEOL L1114 Lecture) <br> and Physical Geology Laboratory (ACTS <br> Equivalency = GEOL 1114 Lab) |
| PHYS 2013 <br> \& PHYS 2011L | ```College Physics I (ACTS Equivalency = PHYS 2014 Lecture) and College Physics I Laboratory (ACTS Equivalency = PHYS 2014 Lab)``` |
| Fine Arts and Hum | umanities |
| Select 3 hours | Fine Arts from state minimum core |
| Select 3 hours | Humanities from state minimum core |
| Social Sciences |  |
| Select 9 hours | Social Sciences from state minimum core |
| ESWS Requireme | ents* |
| Environmental Sc | cience Core |
| CSES 2203 | Soil Science |
| CSES 2201L | Soil Science Laboratory |
| ENSC 1003 | Environmental Science |
| ENSC 1001L | Environmental Science Laboratory |
| ASTM 2903 | Agricultural and Human Environmental Sciences Applications of Microcomputers |
| ENSC 3003 | Introduction to Water Science |
| STAT 2303 P | $\begin{aligned} & \text { Principles of Statistics (ACTS Equivalency }=\text { MATH } \\ & \text { 2103) } \end{aligned}$ |
| Soil Science Core |  |
| Select one of the following: |  |
| CSES 3214 | Soil Resources and Nutrient Cycles (with Lab Component) |
| CSES 4224 | Soil Fertility (with Lab Component) |

| CSES 4253 | Soil Classification and Genesis (with Lab <br> Component) |
| :--- | :--- |
| CSES 4553 | Wetland Soils |

Natural Resources Core
Select 9 hours from the following two groups: 9
Environmental Science**
ASTM $3153 \quad$ Surveying in Agriculture and Forestry

CSES 2013 Pest Management
CSES 355V Soil Profile Description (1 hour, may take twice)
CSES 462V Internship (1-6 credit hours)
CSES 4553 Wetland Soils
ENSC 3103 Plants and Environmental Restoration
ENSC 3263 Soil and Water Conservation
ENSC 3603 GIS for Environmental Science
ENSC 4021L
ENSC 4401 Professional Certification Preparation
GEOS 3043 Sustaining Earth
GEOS 3543 Geospatial Applications and Information Science
Environmental Studies (0-3 hours)
AGEC 3413 Principles of Environmental Economics
AGEC 3503 Agricultural Law I
AGEC 3523 Environmental and Natural Resources Law
ENSC 3933 Environmental Ethics
SOCI 4603 Environmental Sociology
General Electives 16-17

Total Hours 120
*Courses within major cannot be taken for duplicate credit.
**One 3-hr study abroad course, either Experiential Learning in Indian Agriculture (Jan) or Sustainability in the Eurozone Agro-Food Chain (May), which are both taken under AFLS $401 \mathrm{~V} / 401 \mathrm{VH}$, can be substituted for 3 hours of Natural Resources core.

## Environmental, Soil, and Water Science B.S.A. <br> Eight-Semester Degree Program

Students wishing to follow the degree plan should see the Eight-Semester Degree Policy (p. 67) for university requirements of the program.

| First Year | FallUnits <br> Spring |  |
| :--- | ---: | ---: |
| ENGL 1013 Composition I (ACTS Equivalency | 3 |  |

9
Outcome 1.1)

Satisfies General Education Outcomes 3.4 and 5.1:

ENSC 1003 Environmental Science
\& ENSC 1001L Environmental Science Laboratory
Satisfies General Education Outcome 3.4:
BIOL 1543 Principles of Biology (ACTS
Equivalency = BIOL 1014 Lecture)
\& BIOL 1541L Principles of Biology Laboratory
(ACTS Equivalency = BIOL 1014 Lab)
MATH 1203 College Algebra (ACTS Equivalency
= MATH 1103) (Satisfies General Education
Outcome 2.1)
UNIV 1001 University Perspectives
Fine Arts or Humanities State Minimum Core
Elective (Satisfies General Education Outcome 3.1 or 3.2) ${ }^{1,2}$
ENGL 1023 Composition II (ACTS Equivalency
= ENGL 1023) (Satisfies General Education Outcome 1.1)
CSES 1203 Introduction to Plant Sciences
Social Sciences State Minimum Core Elective
(Satisfies General Education Outcome 3.3)
CHEM 1103 University Chemistry I (ACTS
Equivalency = CHEM 1414 Lecture)
\& CHEM 1101L University Chemistry I Laboratory
(ACTS Equivalency = CHEM 1414 Lab)
Year Total:
Second Year

General Elective as Broadening Elective (could 3
apply toward a minor)
GEOS 1113 Physical Geology (ACTS Equivalency
= GEOL 1114 Lecture)
\& GEOS 1111L Physical Geology Laboratory
(ACTS Equivalency = GEOL 1114 Lab)
U.S. History or Government State Minimum Core

Elective (Satisfies General Education Outcome 4.2)

COMM 1313 Public Speaking (ACTS Equivalency
= SPCH 1003) (Satisfies General Education Outcomes 1.2 and 5.1)
MATH 1213 Plane Trigonometry (ACTS Equivalency = MATH 1203)
CHEM 1123 University Chemistry II (ACTS
Equivalency = CHEM 1424 Lecture)
\& CHEM 1121L University Chemistry II Laboratory
(ACTS Equivalency = CHEM 1424 Lab)
Fine Arts or Humanities State Minimum Core
Elective (Satisfies General Education Outcome 3.1 or 3.2) ${ }^{1,2}$
Social Sciences State Minimum Core Elective 3
(Satisfies General Education Outcome 3.3)
ENSC 3003 Introduction to Water Science
ASTM 2903 Agricultural and Human Environmental 3
Sciences Applications of Microcomputers
Year Total:

| Third Year | Units |  |
| :---: | :---: | :---: |
|  | Fall | Spring |
| CSES 2203 Soil Science | 4 |  |
| \& CSES 2201L Soil Science Laboratory |  |  |
| PHYS 2013 College Physics I (ACTS Equivalency = PHYS 2014 Lecture) | 4 |  |
| \& PHYS 2011L College Physics I Laboratory (ACTS Equivalency = PHYS 2014 Lab) |  |  |
| Water Science or Natural Resources Core | 3 |  |
| Select one of the following: | 3-4 |  |
| General Electives as AFLS Broadening Electives (Could apply toward a minor) ${ }^{4}$ |  |  |
| CHEM 3603 Organic Chemistry I |  |  |
| BIOL 2013 General Microbiology (ACTS |  |  |
| Equivalency = BIOL 2004 Lecture) |  |  |
| \& BIOL 2011L General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab) |  |  |
| CHEM 2613 Organic Physiological Chemistry (ACTS Equivalency = CHEM 1224 Lecture) |  |  |
| \& CHEM 2611L Organic Physiological Chemistry |  |  |
| Social Sciences State Minimum Core Elective (Satisfies General Education Outcomes 3.3 and $4.1)^{3}$ |  |  |
| Water Science or Soil Science Core (For Water <br> Science: Recommended: ENSC 3003; Soil <br> Science: Pre-at least CSES 2203) |  |  |
|  |  |  |
|  |  |  |
| Year Total: 14 |  |  |
| Fourth Year |  | Units |
|  | Fall | Spring |
| Select one of the following: <br> CSES 3023 Crop, Soil, and Environmental <br> Sciences Colloquium (Satisfies General <br> Education Outcome 6.1) <br> ACOM 3143 Communicating Agriculture to the Public |  |  |
|  |  |  |
|  |  |  |
| Select one of the following: <br> ENSC 3223 Ecosystems Assessment <br> \& ENSC 3221L Ecosystems Assessment <br> Laboratory <br> BIOL 3863 General Ecology <br> \& BIOL 3861L General Ecology Laboratory |  |  |
|  |  |  |
|  |  |  |
|  |  |  |
| Statistics or Natural Resources Core 3 |  |  |
| Soil Science or Natural Resources Core 3-4 |  |  |
| Natural Resources Core or General Elective (Could apply elective toward a minor) ${ }^{4}$ |  |  |
| Natural Resources Core or General Elective ${ }^{4}$ |  |  |
| Statistics or Natural Resources Core 3 |  |  |
| General Elective ${ }^{4}$ |  |  |
| General Elective as Broadening Elective (Could apply toward a minor) ${ }^{4}$ |  |  |
| General Elective (May wish to take another elective. Could apply toward a minor) ${ }^{4}$ |  |  |
| Year Total: | 16 | 13 |

Total Units in Sequence:
${ }^{1}$ The Fine Arts Elective courses which satisfy General Education Outcome 3.1 include: ARCH 1003, ARHS 1003, COMM 1003, DANC 1003, LARC 1003, MLIT 1003, MLIT 1003H, MLIT 1013, MLIT 1013H, MLIT 1333, THTR 1003, THTR 1013, or THTR 1013H.
${ }^{2}$ The Humanities Elective courses which satisfy General Education Outcome 3.2 include: AAST 2023, ANTH 1033, ARCH 1013, CLST 1003, CLST 1003H, CLST 1013, COMM 1233, DANC 1003, ENGL 1213, GNST 2003, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2003, HIST 2013, HUMN 1124H, HUMN 2213, LALS 2013, MRST 2013, MUSY 2003, MUSY 2003H, PHIL 2003, PHIL 2003C, PHIL 2003H, PHIL 2103, PHIL 2103C, PHIL 2303, THTR 1003, THTR 1013, THTR 1013H, WLIT 1113, WLIT 1123, or intermediate-level world language (usually 2003-level).
${ }^{3}$ The Social Science Elective courses which satisfy General Education Outcomes 3.3 and 4.1 include: ANTH 1023, COMM 1023, HDFS 1403, HDFS 2413, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2093, HUMN 1114H, HUMN 2114H, INST 2813, INST 2813H, PLSC 2013, PLSC 2813, PLSC 2813H, RESM 2853, SOCI 2013, SOCI 2013H, or SOCI 2033.
${ }^{4}$ Students must complete 40 hours of upper division courses (3000-4000 level). It is recommended that students consult with their academic adviser when making course selections.

## Minor in Crop Biotechnology (CPBT-M)

A student planning to minor in Crop Biotechnology must notify the program adviser for consultation and more detailed information. The Crop Biotechnology Minor consists of 16 hours of courses and to include the following:

## Core Courses

| PLPA 4333 | Biotechnology in Agriculture | 3 |
| :---: | :---: | :---: |
| Genetics |  |  |
| CSES 400V | Special Problems (two 2-hour courses taken in two different semesters) | 4 |
| Select one of the following: |  | 3 |
| BIOL 2323 | General Genetics |  |
| $\begin{aligned} & \text { ANSC/POSC } \\ & 3123 \end{aligned}$ | Principles of Genetics |  |
| Controlled Electives |  |  |
| Select two of the following: |  | 6 |
| BIOL 4303 |  |  |
| CHEM 3813 | Elements of Biochemistry |  |
| CSES 4103 | Plant Breeding |  |
| Total Hours |  | 16 |

## Minor in Crop Science (CPSC-M)

A student planning to minor in Crop Science must notify the program adviser for consultation and more detailed information. The Crop Science Minor consists of 18 semester hours of 2000 -level courses or above, including the following:

| CSES 2103 | Crop Science | 3 |
| :--- | :--- | :--- |
| CSES 2203 | Soil Science | 3 |

Select 12 hours with at least 4 hours coming from Group A:
Group A
CSES 3312 Cotton Production
CSES 3322 Soybean Production
CSES 3332 Rice Production
CSES 3342 Cereal Grain Production
Group B
CSES 3214 Soil Resources and Nutrient Cycles
CSES 4013 Advanced Crop Science
CSES 4103 Plant Breeding
CSES 4133 Ecology and Morphology of Weedy and Invasive Plants
CSES 4143 Principles of Weed Control
CSES 4224 Soil Fertility
Total Hours

## Faculty

Bacon, Robert Keith, Ph.D. (Purdue University), M.S., B.S.A., (University of Arkansas), Professor, 1984, 1993.
Barber, Thomas, Ph.D., M.S., B.S. (University of Arkansas), Professor, 2007, 2016.
Bourland, Fred, Ph.D. (Texas A\&M University), M.S., B.S.A. (University of Arkansas), Professor, 1988.
Brye, Kristofor R., Ph.D., M.S. (University of Wisconsin-Madison), B.S. (University of Wisconsin-Stevens Point), University Professor, 2001, 2020.

Burgos, Nilda Roma, Ph.D., M.S. (University of Arkansas), B.S. (Visayas State College of Agriculture-Philippines), Professor, 1998, 2010.
Butts, Thomas R., Ph.D. (University of Nebraska-Lincoln), Assistant Professor, 2019.
Counce, Paul Allen, Ph.D. (University of Georgia), M.S. (Purdue
University), B.S. (University of Tennessee-Martin), Professor, 1983, 2003.
Daniels, Michael B., Ph.D., M.S. (University of Arkansas), B.S.
(Pennsylvania State University), Professor, 1996, 2006.
De Guzman, Christian T., Ph.D. (Louisiana State University), B.S.
(University of Philippines, Los Banos), Assistant Professor, 2020.
Espinoza, Leonel A., Ph.D., M.S. (University of Florida), B.S. (lowa State University), Associate Professor, 2003, 2007.
Gbur, Edward E., Ph.D., M.S. (The Ohio State University), B.S. (Saint Francis University), Professor, 1987, 1998.
Hardke, Jarrod T., Ph.D. (Louisiana State University), B.S.A. (University of Arkansas), Professor, 2013, 2020.
Kelley, Jason, Ph.D., M.S. (Oklahoma State University), B.S. (Kansas State University), Professor, 2003, 2019.
Lee, Jung Ae, Ph.D., M.S. (University of Georgia), M.A., B.A., (Ewha Womans University), Assistant Professor, 2016.
Mason, Richard Esten, Ph.D., B.A. (Texas A\&M University), Associate Professor, 2010, 2016.
Mauromoustakos, Andy, Ph.D., M.S. (Oklahoma State University), B.S. (Oral Roberts University), Professor, 1989, 2002.
Miller, David M., Ph.D. (University of Georgia), M.S., B.S. (Purdue University), Professor, 1988, 2001.
Mozaffari, Morteza, Ph.D. (University of Delaware), M.S., B.S. (University of Massachusetts), Assistant Professor, 2002.
Mozzoni, Leandro, Ph.D. (University of Arkansas), M.S. B.S. (Rosario National University), Associate Professor, 2017.
Norsworthy, Jason Keith, Ph.D., M.S. (University of Arkansas), B.S. (Louisiana Tech University), Distinguished Professor, 2006, 2019.

Pereira, Andy, Ph.D. (lowa State University), M.S. (Indian Agricultural Research Institute, India), B.Sc.Ag. (Govind Ballabh Pant University of Agriculture and Technology, India), Professor, Anheuser-Busch and Arkansas Wholesalers Professorship in Molecular Genetics, 2011. Poncet, Aurelie, Ph.D. (Auburn University), M.S. (Montpellier SupAgro, France), M.S. Minor: (AgroTIC), B.S. (Montpellier SupAgro, France), Assistant Professor, 2020.
Purcell, Larry C., Ph.D. (University of Florida), M.S., B.S. (University of Georgia), Distinguished Professor, Ben J. Altheimer Chair for Soybean Research, 1993, 2017.
Roberts, Trenton L., Ph.D. (University of Arkansas), M.S. (University of Arizona), B.S. (Oklahoma State University), Associate Professor, 2010, 2017.

Savin, Mary Cathleen, Ph.D., M.S. (University of Rhode Island), B.S. (University of Notre Dame), Professor, 2002, 2011.
Scott, Robert C., Ph.D. (Mississippi State University), M.S., B.S. (Oklahoma State University), Professor, 2002, 2008.
Sha, Xueyan, Ph.D. (Louisiana State University), Professor, 2012. Shakiba, Ehsan, Ph.D., M.S. (University of Arkansas), M.S., B.S. (Azad University, Iran), Assistant Professor, 2015.
Slaton, Nathan A., Ph.D., M.S. (University of Arkansas), B.S. (Murray State University), Professor, 2001, 2009.
Srivastava, Vibha, Ph.D. (Jawaharlal Nehru University, New Delhi), M.S. (Govind Ballabh Pant University of Agriculture and Technology), B.S. (D.E.I. University), Professor, 2001, 2012.

Thompson, Gary A., Ph.D. (Purdue University), M.S. (University of Wisconsin), Professor, 2020.
Wood, Lisa S., Ph.D., M.S., B.S. (University of Arkansas), Clinical Associate Professor, 2012, 2019.

## Courses

CSES 1203. Introduction to Plant Sciences. 3 Hours.
An introduction to basics of agricultural crop plant structure, growth, and production. (Typically offered: Fall and Spring)

## CSES 2013. Pest Management. 3 Hours.

Introduction to basic principles of pest management as they relate to vertebrate animals, insects, plant disease and weeds. Selected pests are studied with emphasis on current management approaches and alternative pest control. (Typically offered: Spring)

CSES 2101L. Crop Science Laboratory. 1 Hour.
A series of laboratory experiments designed to reinforce principles of plant growth and development, reproduction, classification, and the utilization of plant products. Emphasis is placed on major crop plant species. Experiments are conducted by individuals or by teams. Laboratory consists of a single, 2-hour period each week. Required for Crop Management majors. Corequisite: CSES 2103. (Typically offered: Spring)

## CSES 2103. Crop Science. 3 Hours.

Principles of crop growth, development, and utilization and how these principles relate to production. Emphasis on major agronomic crop species. Lecture 3 hours per week. (Typically offered: Spring)
CSES 2201L. Soil Science Laboratory. 1 Hour.
Field and laboratory exercises related to the study of the physical, chemical, and biological properties of soils. Laboratory mandatory for all crop management and environmental, soil, and water science majors and optional for others. Laboratory 2 hours per week. Pre- or Corequisite: CSES 2203. (Typically offered: Fall and Spring)

CSES 2203. Soil Science. 3 Hours.
Origin, classification, and physical, chemical, and biological properties of soils. Lecture 3 hours, discussion 1 hour per week. Corequisite: Drill component. Prerequisite: MATH 1203 or higher (to include MATH 1213, MATH 1284C, MATH 1514, MATH 2213, MATH 2043, MATH 2053, MATH 2445, MATH 2514, MATH 2554, MATH 2564, or MATH 2574) and CHEM 1103 or CHEM 1073. (Typically offered: Fall and Spring)
CSES 3023. Crop, Soil, and Environmental Sciences Colloquium. 3 Hours. A communication-intensive course covering topics in agronomy and environmental, soil, and water science with particular emphasis on spoken communication but also including written communication, group activities, professionalism, ethics, problem solving, and information retrieval. A student-oriented class with collaborative participation. Colloquium workshop: 3 hours per week. Prerequisite: COMM 1313 and Junior or Senior standing only. (Typically offered: Fall)
CSES 3214. Soil Resources and Nutrient Cycles. 4 Hours.
Integration of the fundamental concepts of the biological, chemical, and physical properties of soil systems and their roles in managing soil resources. Lecture 3 hours, laboratory 3 hours per week. Pre- or Corequisite: BIOL 2013 and BIOL 2011L. Corequisite: Lab component. Prerequisite: CSES 2203. (Typically offered: Spring Odd Years)

CSES 3312. Cotton Production. 2 Hours.
Principles and techniques associated with production of cotton. Recitation 2 hours per week. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Fall Even Years)
CSES 3322. Soybean Production. 2 Hours.
An overview of the history and utilization of soybean as well as the physiological and environmental basis for the development of economical soybean production practices. Recitation 2 hours per week. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Spring Odd Years)

## CSES 3332. Rice Production. 2 Hours.

A study of the principles and practices involved in rice culture worldwide with major emphasis on the United States. Recitation 2 hours per week. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Fall Odd Years)
CSES 3342. Cereal Grain Production. 2 Hours.
An overview of the botany, production, cultural practices, soil \& climatic adaptation and utilization of the major cereal grain crops. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Spring Even Years)
CSES 355V. Soil Profile Description. 1-2 Hour.
Training for soil profile description writing and membership of judging teams. (Typically offered: Fall) May be repeated for up to 8 hours of degree credit.

## CSES 3703. Precision Agriculture for Crops. 3 Hours.

This course will provide students with a practical understanding of precision agriculture and crop/ecosystem monitoring with remote and proximal sensing technology. Prerequisite: MATH 1203 and CSES 1203. (Typically offered: Spring)

CSES 400V. Special Problems. 1-6 Hour.
Work on special problems in crop, soil and environmental sciences or related field. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
CSES 4013. Advanced Crop Science. 3 Hours.
Fundamental concepts of crop physiology, crop improvement, seed science, and crop production systems. Recitation 3 hours per week. Prerequisite: CSES 2103 and CSES 2203. (Typically offered: Spring)
CSES 402V. Special Topics. 1-3 Hour.
Studies of selected topics in crop, soil and environmental sciences not available in other courses. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

CSES 4103. Plant Breeding. 3 Hours.
Basic principles involved in plant breeding programs to improve crop plants and seed programs. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: ANSC 3123 or BIOL 2323. (Typically offered: Fall Even Years)

CSES 4133. Ecology and Morphology of Weedy and Invasive Plants. 3 Hours.
Study of weeds as economic pests occurring in both agricultural and nonagricultural situations and including poisonous plants and other specific weed problems. Gross morphological plant family characteristics which aid identification, habitat of growth and distribution, ecology, competition, and allelopathy are discussed. Lecture 2 hours, laboratory 2 hours a week. Corequisite: Lab component. Prerequisite: CSES 2103 or HORT 2003. (Typically offered: Fall)

CSES 4143. Principles of Weed Control. 3 Hours.
Advanced concepts and technology used in modern weed control practices and study of the chemistry and specific activity of herbicides in current usage. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: CHEM 1073 and CHEM 1071L. (Typically offered: Spring)

## CSES 4224. Soil Fertility. 4 Hours.

Study of the soil's chemical, biological and physical properties, and human modification of these properties, as they influence the uptake and utilization of the essential nutrients by plants. Lecture 3 hours, laboratory 2 hours per week. Preor Corequisite: CHEM 1123 and CHEM 1121L or (CHEM 1073 and CHEM 1071L and CHEM 2613 and CHEM 2611L). Corequisite: Lab component. Prerequisite: CSES 2201L and CSES 2203. (Typically offered: Fall)
CSES 4253. Soil Classification and Genesis. 3 Hours.
Lecture and field evaluation of soil properties and their relation to soil genesis and soil classification with emphasis on soils of Arkansas. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: CSES 2203 and CSES 2201L. (Typically offered: Fall Odd Years)

## CSES 4553. Wetland Soils. 3 Hours.

This course explains the chemical, physical, and morphological characteristics of wetland soils and describes the techniques for identifying wetland soils using field indicatiors and monitoring equipment. This course also explains principles of wetland creation, restoration, and mitigation - all key components in assuring the sustainability of valuable wetland resources. Prerequisite: CSES 2203 and CSES 2201L or CSES 355V. (Typically offered: Spring Odd Years)

## CSES 462V. Internship. 1-6 Hour.

Supervised practical work experience in agronomy and environmental science to develop and demonstrate professional competence. Faculty approval of project proposal prior to enrollment and written and oral reports after the project is complete are required. Prerequisite: Instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

## Entomology and Plant Pathology (ENPL)

Ken Korth
Department Head
217 Plant Science Building
479-575-5191
Entomology and Plant Pathology Website (http://entomology.uark.edu/)
The Department of Entomology and Plant Pathology offers three undergraduate minors:

- Entomology
- Plant Pathology
- As well as an interdisciplinary Pest Management (http:// catalog.uark.edu/undergraduatecatalog/collegesandschools/
dalebumperscollegeofagriculturalfoodandlifesciences/ pestmanagementpmgt/) minor.

Full degree programs are offered only at the graduate level.
Entomology is the branch of science concerned with the study of insects and related organisms. It involves studies of their biology, structure, identification, economic significance, and population management. The major emphasis of the curriculum is understanding insect biology and applying that knowledge in an integrated approach to insect-pest management.

Plant pathology is the study of interrelationships of plants with the abiotic and biotic agents that affect plant health and productivity. The goal of the discipline is to minimize the impact of plant diseases on agricultural production and human health. Scientific training within the department focuses on the nature, cause, and management of plant diseases.

Undergraduate students interested in graduate work in entomology or plant pathology should pursue one of the minors here or the Pest Management minor.

## Minor in Entomology (ENTO-M)

A student planning to minor in Entomology must notify the ENTO program adviser for consultation and more detailed information. The Entomology Minor consists of 15 semester hours of courses in Entomology, including the following:

## Core Requirements

ENTO 3013 Introduction to Entomology
Core Electives
Students must complete at least 12 credits of additional ENTO courses selected with the approval of the Entomology program adviser. Examples of available electives include:

| ENTO 1023 | Insects, Science and Society |
| :--- | :--- |
| ENTO 1021L | Insects, Science and Society Lab |
| ENTO 3011L | Introduction to Insect Identification Lab |
| ENTO 4013 | Insect Behavior and Chemical Ecology |
| ENTO 4024 | Insect Diversity and Taxonomy |
| ENTO 4043 | Honey Bee Biology and Beekeeping |
| ENTO 4053 | Insect Ecology |
| ENTO 4123 | Insect Pest Management |
| ENTO 4133 | Advanced Applied Entomology |
| ENTO 400V | Special Problems |
| ENTO 410V | Special Topics |

Total Hours

## Minor in Plant Pathology (PLPA-M)

A student planning to minor in plant pathology should notify the Department of Entomology and Plant Pathology and consult an adviser. A minor in Plant Pathology consists of 19 hours to include the following:
$\left.\begin{array}{lll}\text { PLPA 3003 } & \text { Principles of Plant Pathology } \\ \text { \& PLPA 3001L } & \text { and Principles of Plant Pathology Laboratory }\end{array}\right] 4$

| BIOL 4233 | Genomics and Bioinformatics |
| :--- | :--- |
| BIOL 4353 | Ecological Genetics/Genomics |
| BIOL 4753 |  |
| PLPA 4333 | Biotechnology in Agriculture |

Total Hours

## Graduate Faculty

Bateman, Nick, Ph.D. (Mississippi State University), B.S. (University of Arkansas-Monticello), Assistant Professor, 2016.
Bluhm, Burt H., Ph.D., M.S. (Purdue University), B.S. (University of Oklahoma), Associate Professor, 2008, 2014.
Cartwright, Richard D., Ph.D. (University of California at Davis), M.S., B.S. (University of Arkansas), Extension Professor, 1993, 2005.

Correll, Jim, Ph.D., M.S. (University of California-Berkeley), B.S. (Pennsylvania State University), Distinguished Professor, 1989, 2018.
Dowling, Ashley Patrick Gregg, Ph.D. (University of Michigan-Ann Arbor), B.S. (University of Arizona), Professor, 2008, 2019.
Egan, Martin J., Ph.D., B.Sc. (University of Exeter, United Kingdom), Assistant Professor, 2016.
Faske, Travis, Ph.D. (Texas A\&M University), M.S. (Oklahoma State University), B.S. (Tarleton State University), Associate Professor, 2015.
Goggin, Fiona, Ph.D. (University of California-Davis), B.S. (Cornell University), Professor, 2001, 2011.
Hopkins, John D., Ph.D. (University of Arkansas), M.S., B.S. (Clemson University), Associate Professor, 2001.
Joshi, Neelendra, Ph.D. (Pennsylvania State University), Assistant Professor, 2015.
Korth, Ken L., Ph.D. (North Carolina State University), B.S. (University of Nebraska), Professor, 1999, 2009.
Loftin, Kelly M., Ph.D. (New Mexico State University), M.S. (University of Arkansas), B.S. (Arkansas Tech), Associate Professor, 2002, 2010.
Lorenz, Gus M., Ph.D., B.S.A., M.S. (University of Arkansas),
Distinguished Professor, 1997, 2013.
McDermott, Emily, Ph.D. (University of California-Riverside), B.S. (The Ohio State University), Assistant Professor, 2020.
Rojas, Alejandro, Ph.D., M.S. (Michigan State University), M.S., B.S. (Los Andes University), Assistant Professor, 2018.
Rojas, Clemencia, Ph.D. (Cornell University), M.S. (Purdue University), B.S. (Universidad de Los Andes, Colombia), Assistant Professor, 2015.

Rupe, John C., Ph.D., M.S. (University of Kentucky), B.S. (Colorado State University), University Professor, 1984, 2019.
Spurlock, Terry, Ph.D. (University of Arkansas), Extension Associate Professor, 2015.
Steinkraus, Donald C., Ph.D. (Cornell University), M.S. (University of Connecticut), B.A. (Cornell University), Professor, 1989, 1999.
Studebaker, Glenn, Ph.D., M.S. (University of Arkansas), B.S. (Missouri Southern State University), Associate Professor, 1993.
Szalanski, Allen Lawrence, Ph.D. (University of Nebraska-Lincoln), M.S. (Kansas State University), B.S. (University of Manitoba), Professor, 2001, 2011.

Thrash, Ben, , Assistant Professor, 2018.
Tzanetakis, loannis E., Ph.D. (Oregon State University), M.S., B.S. (Agricultural University of Athens, Greece), Professor, 2008, 2016.
Wamishe, Yeshi Andenow, Ph.D. (University of Arkansas) M.S., B.S.
(Addis Ababa University, Ethiopia), Associate Professor, 2011, 2016.

## Entomology Courses

ENTO 1021L. Insects, Science and Society Lab. 1 Hour.
To educate students on the importance of insects in biology and science, human and animal medicine, ecosystems, agriculture, pollination, genetic research, the arts, and human culture and history. The lab will be a hands-on approach to reinforcing entomological concepts addressed in lecture. Corequisite: ENTO 1023. (Typically offered: Fall and Spring)

## ENTO 1023. Insects, Science and Society. 3 Hours.

To educate students on the importance of insects in biology and science, human and animal medicine, ecosystems, agriculture, pollination, genetic research, the arts, and human culture and history. Corequisite: ENTO 1021L. (Typically offered: Spring)

ENTO 3011L. Introduction to Insect Identification Lab. 1 Hour.
Introductory lab course on insect identification, collection, and curation techniques, primarily designed as an intensive add-on to ENTO 3013 for students wanting a more in-depth examination of insect diversity. Insect collection required. Course includes field trips. Students are encouraged to contact instructor before enrolling.
Pre- or Corequisite: ENTO 3013. (Typically offered: Fall)
This course is cross-listed with BIOL 3011L.

## ENTO 3013. Introduction to Entomology. 3 Hours.

Fundamentals of insect biology including structure and function, development, ecology, behavior, plant feeding and disease transmission. Lecture 3 hours/week. Students interested in a more intensive examination of insects, including collection, curation, and identification techniques, should sign up for the separate one credit lab ENTO 3011L. Students are strongly encouraged to take BIOL 1543 before registering for this course. (Typically offered: Fall)
This course is cross-listed with BIOL 3013.
ENTO 400V. Special Problems. 1-4 Hour.
Special problems. (Typically offered: Fall, Spring and Summer)

## ENTO 4013. Insect Behavior and Chemical Ecology. 3 Hours.

Basic concepts in insect senses and patterns of behavioral responses to various environmental stimuli. Previous knowledge of basic entomology is helpful, but not required. Lecture 2 hours, laboratory/discussion 2 hours per week. Corequisite: Lab component (Typically offered: Spring Even Years)
This course is cross-listed with BIOL 4013.
ENTO 4024. Insect Diversity and Taxonomy. 4 Hours.
Principles and practices of insect classification and identification with emphasis on adult insects. Corequisite: Lab component. Prerequisite: ENTO 3013. (Typically offered: Fall Even Years)
This course is cross-listed with BIOL 4024.

## ENTO 4043. Honey Bee Biology and Beekeeping. 3 Hours.

To acquaint the student with social insects in general and honey bees in particular, to promote an interest in beekeeping as a hobby, occupation, and/or science, to give the students the basic knowledge of how to keep honey bees, and to increase awareness of the contribution that pollinating insects make to agriculture, natural ecosystems, and human life. Lecture 3 hours, plus beekeeping field day. (Typically offered: Spring)

## ENTO 4053. Insect Ecology. 3 Hours.

To develop understanding of important ecological concepts through study of dynamic relationships among insects and their environment. To become familiar with the literature of insect ecology, and interpretation and critique of ecological research. Previous knowledge of basic entomology and/or ecology will be assumed. Corequisite: Lab component. (Typically offered: Fall Even Years)
This course is cross-listed with BIOL 4053.

## ENTO 410V. Special Topics. 1-3 Hour.

Topics not covered in other courses or a more intensive study of specific topics in entomology. (Typically offered: Irregular) May be repeated for degree credit.

ENTO 4123. Insect Pest Management. 3 Hours.
Study of principles and concept of insect pest management. Areas covered include survey of arthropod pests and damage, population dynamics, damage thresholds, physiological units, prediction models, surveillance, arthropod sampling, strategies and tactics utilized to maintain pest populations below economic injury levels. Prerequisite: ENTO 3013. (Typically offered: Spring Odd Years)

ENTO 4133. Advanced Applied Entomology. 3 Hours.
Biology and ecology of major arthropod pests as model applied management systems. Activities include independent study, literature review and group discussions. Knowledge of general entomology and pest management is required. Self-learning modules are available. Lecture 2 hours/week and direct self-study laboratory 2 hours/week. Corequisite: Lab component. Prerequisite: ENTO 3013. (Typically offered: Spring Even Years)

## Plant Pathology Courses

PLPA 3001L. Principles of Plant Pathology Laboratory. 1 Hour.
Lab course in examination of the causes and symptoms of plant disease and the genetics of plant disease. Physiology, and ecology of host-pathogen interactions. Spread of disease and principles of disease control. Pre- or Corequisite: PLPA 3003 or BIOL 3003. (Typically offered: Fall)
This course is cross-listed with BIOL 3001L.

## PLPA 3003. Principles of Plant Pathology. 3 Hours.

Examination of the causes and symptoms of plant disease and the genetics of plant disease. Physiology, and ecology of host-pathogen interactions. Spread of disease and principles of disease control. (Typically offered: Fall)
This course is cross-listed with BIOL 3003.
PLPA 400V. Research. 1-6 Hour.
Original investigations of assigned problems in plant pathology. Prerequisite: PLPA 3004. (Typically offered: Fall, Spring and Summer)

## PLPA 4123. Bacterial Lifestyles. 3 Hours.

The course will introduce students to bacteria as prokaryotic organisms, different from eukaryotes such as plants and animals. Model microbial systems will be studied in more detail to identify unique strategies that bacteria employ to thrive in their respective environment, whether they are causing diseases or establishing beneficial interactions with animal or plants or coexisting with other microorganisms in diverse ecological environments. The course will also cover special adaptations that bacteria have evolved to adapt to harsh environments and how these adaptations can be harnessed to control pollution. Prerequisite: (BIOL 2013 and BIOL 2011L) or BIOL 3123. (Typically offered: Spring Odd Years) This course is cross-listed with BIOL 4223.

## PLPA 4223. Plant Disease Control. 3 Hours.

Principles, methods and mechanics of plant disease control. Emphasis is given to the integration of control measures and epidemiology of plant diseases. Lecture 3
hours per week. Prerequisite: PLPA 3003. (Typically offered: Fall)
This course is cross-listed with BIOL 4133.

## PLPA 4333. Biotechnology in Agriculture. 3 Hours.

Discussion of the techniques, applications, and issues of biotechnology as it is being used in modern agriculture. Coverage includes the basics of molecular biology, production of transgenic plants and animals, and new applications in the agricultural, food, and medical marketplace. Lecture and discussion, 3 hours per week. (Typically offered: Fall)
This course is cross-listed with BIOL 4333.
PLPA 462V. Internship. 1-6 Hour.
Supervised practical work experience in pest management to develop and demonstrate professional competence. A maximum of 6 hours credit per semester or summer session is permitted. Faculty approval of projects proposal prior to enrollment, and written or oral reports are required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

## Food Science (FDSC)

Jeyam Subbiah<br>Department Head<br>N-201 Food Science Building<br>479-575-4605<br>jsubbiah@uark.edu<br>Renee Threlfall<br>Brewing Science Certificate of Proficiency Program Director<br>B-3 Food Science Building<br>479-575-4677<br>rthrelf@uark.edu

Department of Food Science Website (http://food-science.uark.edu/)
Brewing Science Certificate of Proficiency Website (https:// brewing.uark.edu/)

Food science is an interdisciplinary field involving microbiology, engineering, biochemistry, nutrition, and sensory science to better understand food processes and improve food products for the general public. As the stewards of the field, food scientists study the physical, microbial, and chemical makeup of food. They apply their findings to develop the safe, nutritious, and sustainable foods and innovative packaging that line supermarket shelves daily.

Food science prepares students for many interesting, rewarding and challenging professional career opportunities in industry, business, governmental and educational organizations associated with food and food-related products. Due to the diversity and abundance of opportunities available, students graduating with a B.S.A. in food science readily obtain employment in the food industry or continue studies for graduate school. Additionally, requirements for several pre-professional programs can be fulfilled while meeting requirements for the food science degree.

Students may choose one of three areas of concentration for their degree program: Food Science (FDSC), Food Technology (FDTN) or Food and Culinary Sciences (FDCU). The FDSC concentration at the University of Arkansas is one of only 43 programs in the United States and the only one in Arkansas that is approved by the Institute of Food Technologists. It provides students with a strong background in basic and applied sciences and food chemistry, microbiology, engineering and quality control.

The food we consume daily is the result of extensive food research, a systematic investigation into a variety of foods' properties and compositions. After the initial stages of research and development, food products are mass produced using the principles of food technology. The FDTN concentration provides students interested in food industry careers with a multidisciplinary education consisting of core food science requirements in combination with a minor chosen by the student to compliment the student's career goals.

Culinary sciences blend the artistic abilities of culinary arts with the scientific expertise of food science to shape the future of research and development in the food industry. The FDCU concentration provides students interested in product development careers with an interdisciplinary background in food science and culinary arts. This concentration is a partnership program with Northwest Arkansas Community College (NWACC). Students complete their culinary arts coursework at Brightwater: A Center for the Study of Food (an academic division of NWACC located in Bentonville, AR) and are eligible to receive a Certificate of Proficiency in Culinary Arts from NWACC with no
additional coursework. Culinary coursework will be transferred to the UA; it can be taken prior to admission to the UA or taken while in residence at the UA. Food and Culinary Sciences concentration will provide students with the course work necessary to be eligible to become a Certified Culinary Scientist through the Research Chef's Association.

Students in each concentration are required to complete a relevant internship. There are also ample opportunities for students to gain research and international experiences and to select a minor.

## Requirements for B.S.A. in Food Science with Food Science Concentration

## Major Requirements

State minimum core (p. 81) and discipline-specific general education requirements:
(Course work that meets state minimum core requirements is in bold.)
Communication (12 hours)
ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013)
ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023)
Select two courses from approved list of communication intensive courses
U.S. History and Government (3 hours) 3

Select 3 hours US History from University Core
Mathematics and Statistics (6 hours) 6

## Food Science B.S.A., Food Technology Concentration

## Nine-Semester Degree Program

Because the Food Technology Concentration requires an internship one summer, students cannot enroll in an Eight-Semester Program. See the Eight-Semester Degree Policy (p. 67) for requirements of the eightsemester programs. Students in the Food Technology Concentration must also complete a minor to provide multidisciplinary educational background
(minor must be declared with Bumpers College Dean's Office). Where not specified, select courses from the state minimum core (p. 81) list.

## Total Units in Sequence:

1 The Fine Arts Elective courses which satisfy General Education Outcome 3.1 include: ARCH 1003, ARHS 1003, COMM 1003, DANC 1003, LARC 1003, MLIT 1003, MLIT 1003H, MLIT 1013, MLIT 1013H, MLIT 1333, THTR 1003, THTR 1013, or THTR 1013H.
2 The Humanities Elective courses which satisfy General Education Outcomes 3.2 and 5.1 include: CLST 1003, CLST 1003H, CLST 1013, HUMN 1124H, PHIL 2003, PHIL 2003C, PHIL 2003H, PHIL 2103, or PHIL 2103C.
${ }^{3}$ One Social Science Elective should be selected from the following list of courses in order to satisfy General Education Outcomes 3.3 and 4.1:
ANTH 1023, COMM 1023, HDFS 1403, HDFS 2413, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2093,
HUMN 1114H, HUMN 2114H, INST 2013, INST 2813, INST 2813H, PLSC 2013, PLSC 2813, PLSC 2813H, RESM 2853, SOCI 2013, SOCI 2013H, or SOCI 2033.
4 The U.S. History or Government Elective courses which satisfy General Education Outcome 4.2 include: HIST 2003, HIST 2013, or PLSC 2003.
${ }^{5}$ Recommend ACOM 3143, ACOM 3143H, AGED 4003 or COMM 1313 to satisfy General Education Outcome 1.2. See academic adviser for complete list of Communication Intensive courses.
6 Students must complete 40 hours of upper division courses (3000-4000 level). It is recommended that students consult with the academic adviser when making course selections.

## Requirements for B.S.A. in Food Science with Food and Culinary Sciences Concentration <br> Major Requirements

test

## Minor in Food Science (FDSC-M)

The Food Science Minor consists of 18 semester hours to include:
The following courses are required for a minor in Food Science:

| FDSC 3103 | Principles of Food Processing | 3 |
| :--- | :--- | :--- |
| FDSC 4122 | Food Microbiology | 3 |
| \& FDSC 4121L | and Food Microbiology Lab |  |
| FDSC 4304 | Food Chemistry | 4 |

and a minimum of 8 hours selected from the following courses (at least 5 hours must be 3000-4000 level coursework):

| FDSC 1103 | Introduction to Food Science |
| :--- | :--- |
| FDSC 2401 | Uncorked: Vines to Wines |
| FDSC 2401 H | Honors Uncorked: Vines to Wines |
| FDSC 2603 | The Science of Cooking |
| FDSC 2701 | Food for Health |
| FDSC 3202 | Introduction to Food Law |
| FDSC 4113 | Food Analysis |
| \& FDSC 4111L and Food Analysis Lab |  |
| FDSC 4413 | Sensory Evaluation of Food |
| FDSC 4754 | Engineering Principles of Food Processing |
| NUTR 4213 | Advanced Nutrition I |

## Total Hours

18
A student planning to minor in food science must consult a Department of Food Science adviser.

## Requirements for Certificate of Proficiency in Brewing Science

This program is designed to provide students with a theoretical and practical introduction to brewing and fermentation. This certificate requires 15 credit hours of work, selected from the list below. Students must take two courses in brewing, one lecture and one lab, complete three credit hours of an internship, research, or special problems course, and then take two additional courses in FDSC, BIOL, CHEM, BENG, or CHEG. To broaden the student's exposure to the skills needed in brewing and fermentation, for currently enrolled undergraduate students, at least one of these additional courses must be in a different department from the department of the student's major, and that course must also be outside of those already required for the student's major(s). If the student already holds a degree, the course must be a new one outside of the previous degree program.

## Required courses

FDSC 2723 Introduction to Brewing Science 3
BIOL 2723L
Required internship, special problems, or honors research project
Internship
Students could participate in an approved three credit hour internship with a brewing industry partner. A three credit hour internship should involve approximately 120-130 hours of work with the partner. The internship need not be completed in a single semester, although that is acceptable. At the end of the final semester of the internship, students would have to present a written and oral report of the work performed and lessons learned.
Special problems or research hours

Students could complete three credit hours working on a practical research problem under the supervision of a faculty member in FDSC, BISC, CHEM, BENG, or CHEG. The topic of this work should be approved for relevance to the certificate before the work begins and reviewed if it changes substantially during the course of the work. Work that involves industry partners is particularly encouraged. At the end of the final semester of the work, students would have to present a written and oral report of the work performed and lessons learned. Credit hours and work done for an honors degree can satisfy this requirement, but if honors work is used, it must include at least one credit hour in three different semesters.

## Elective courses

BIOL 2013 General Microbiology (ACTS Equivalency = BIOL 2004 Lecture)
or BIOL 312:
BIOL 2533 Cell Biology
or BIOL 2323General Genetics
CHEM 2613 Organic Physiological Chemistry (ACTS Equivalency = CHEM 1224 Lecture)
or CHEM 36 Organic Chemistry II
FDSC 3103 Principles of Food Processing
FDSC 2603 The Science of Cooking
FDSC 2523 Sanitation and Safety in Food Processing Operations
FDSC 4122 Food Microbiology
CHEG 2133 Fluid Mechanics
CHEG 3144 Heat and Mass Transfer
BENG 3113 Measurement and Control for Biological Systems
BENG 3733 Transport Phenomena in Biological Systems
HIST 1213
Total Hours

## Faculty

Acuff, Jennifer C., Ph.D. (Virginia Tech), M.S. (Kansas State University), B.S. (Abilene Christian University), Assistant Professor, 2020.

Atungulu, Griffiths Odhiambo, Ph.D., M.S. (Iwate University, Japan),
B.S. (Jomo Kenyatta University of Agriculture and Technology, Kenya),

Associate Professor, 2013, 2019.
Baum, Jamie I., Ph.D., B.S. (University of Illinois-Urbana-Champaign), Associate Professor, 2011, 2018.
Crandall, Philip G., Ph.D., M.S. (Purdue University), B.S. (Kansas State University), Professor, 1989, 1997.
Gibson, Kristen Elizabeth, Ph.D. (Johns Hopkins University), B.S. (University of Central Florida), Associate Professor, 2012, 2017.
Hettiarachchy, Navam S., Ph.D. (University of Hull, England), M.S.
(Edinburgh University, Scotland), B.S. (University of Madras, India),
University Professor, 1992, 2006.
Howard, Luke R., Ph.D., M.S. (University of Arkansas), B.S. (Purdue University), Professor, 2002.
Lee, Sun-Ok, Ph.D., M.S. (lowa State University), M.S., B.S. (Dongduk
Women's University, South Korea), Associate Professor, 2008, 2016.
Morawicki, Ruben O., Ph.D. (Pennsylvania State University), M.Eng. (State University of New York-Buffalo), B.S. (Universidad Nacional de Misiones, Argentina), Associate Professor, 2006, 2016.
Seo, Han-Seok, Dr.rer.Medic. (Technische Universität Dresden,
Germany), Ph.D., M.Sc. (Seoul National University, South Korea), B.S.
(Korea University, Seoul, South Korea), Associate Professor, 2012, 2017.

Siebenmorgen, Terrence J., Ph.D. (University of Nebraska-Lincoln), M.S.Ag.E. (Purdue University), B.S.Ag.E. (University of Arkansas), Distinguished Professor, 1984, 2015.
Subbiah, Jeyamkondan, Ph.D. (Oklahoma State University), M.S. (University of Manitoba, Canada), B.E. (Tamil Nadu Agricultural University, India), Professor, 2019.
Ubeyitogullari, Ali, Ph.D. (University of Nebraska-Lincoln), M.S., B.S. (Middle East Technical University, Turkey), Assistant Professor, 2021.
Wang, Ya-Jane, Ph.D. (lowa State University), M.S. (University of Minnesota-Twin Cities), B.S. (National Taiwan University), Professor, 1999, 2009.

## Courses

FDSC 1011. Exploring Topics in Food Science. 1 Hour.
Introduces the depth and scope of Food Science as a profession. This course emphasizes the importance of science in processing and preservation of food and discusses current topics and issues. Practical information on food processing, composition, additives, labeling, environmental issues, regulations, safety, sensory analysis, and health benefits will be provided. Curriculum offerings in Food Science will be related to job responsibilities as a Food Scientist. Lecture/discussions, 2 hours per week for 8 weeks. (Typically offered: Fall)
FDSC 1103. Introduction to Food Science. 3 Hours.
This course is designed to provide students with a general application and understanding of current issues associated with food products and food ingredients. Discussions will focus on controversial subjects involving food products, food additives, food safety and preservation techniques based on scientific principles and popular belief. Lecture/discussions/demonstrations, 3 hours per week. (Typically offered: Spring)

## FDSC 2201. The Science of Chocolate. 1 Hour.

The objective of this course is to introduce you to the science and technology of chocolate production. You will learn the history, chemistry, and physics of chocolate. This course will provide you with an understanding of chocolate production steps, including cacao bean harvesting, fermentation, drying, roasting, grinding, and manufacturing, and how these unit operations affect chocolate texture and flavor. Special focus will be given to fat and sugar crystallization, sensory evaluation, and sustainability of chocolate production. (Typically offered: Spring)

FDSC 2201H. Honors The Science of Chocolate. 1 Hour.
The objective of this course is to introduce you to the science and technology of chocolate production. You will learn the history, chemistry, and physics of chocolate. This course will provide you with an understanding of chocolate production steps, including cacao bean harvesting, fermentation, drying, roasting, grinding, and manufacturing, and how these unit operations affect chocolate texture and flavor. Special focus will be given to fat and sugar crystallization, sensory evaluation, and sustainability of chocolate production. Prerequisite: Honors standing. (Typically offered: Spring)
This course is equivalent to FDSC 2201.
FDSC 2401. Uncorked: Vines to Wines. 1 Hour.
This introductory course is designed to provide students with an understanding of the basic concepts of growing grapes and winemaking, including history, grape growing, cultivars, chemistry, wine microorganisms, fermentation, winery operations, wine marketing, and the sensory and appreciation of wine. Coursework is expected to integrate lecture and guest presenters with supplement reading assignments. This course will not include wine tasting, therefore there are no age restrictions for enrollment. (Typically offered: Fall)

## FDSC 2401H. Honors Uncorked: Vines to Wines. 1 Hour.

This introductory course is designed to provide students with an understanding of the basic concepts of growing grapes and winemaking, including history, grape growing, cultivars, chemistry, wine microorganisms, fermentation, winery operations, wine marketing, and the sensory and appreciation of wine. Coursework is expected to integrate lecture and guest presenters with supplement reading assignments. This course will not include wine tasting, therefore there are no age restrictions for enrollment. Prerequisite: Honors standing. (Typically offered: Fall)
This course is equivalent to FDSC 2401.
FDSC 2523. Sanitation and Safety in Food Processing Operations. 3 Hours.
Topics covered will provide an understanding of the control of microbial, chemical, and physical food hazards as well as emerging food safety issues. Course will include a discussion of sanitation, cleaners and sanitizers, sanitary equipment and facility designs, and microbial growth and control in food processing operations. Lecture/discussion. (Typically offered: Spring)
FDSC 2603. The Science of Cooking. 3 Hours.
In recent years science has found its way into the kitchen and cooking into laboratories and food processing plants. This course is designed to integrate science and cooking to help students appreciate the chemical and physical properties of foods and understand how the processes used when handling, preparing, and storing foods affect these properties. (Typically offered: Fall)

## FDSC 2701. Food for Health. 1 Hour.

The course is designed for students interested in how foods affect one's health. This course provides students with a background of functional food that will enable them to understand, discuss, and evaluate functionality of food in relation to health. This class is designed to appeal to students studying food science, nutrition, biology, chemistry, nursing, and health and human performance. (Typically offered: Spring)

## FDSC 2723. Introduction to Brewing Science. 3 Hours.

An introduction to the biology and chemistry of fermentation, with an emphasis on beer brewing. Styles, flavors, and quality characteristics of beer will be discussed. The history, legal aspects, and economic impacts of homebrewing as well as craft and industrial brewing will be covered. Coursework is expected to integrate lectures and guest presenters with supplemental reading assignments. This course will not include beer tasting, therefore there are no age restrictions for enrollment.
Prerequisite: (CHEM 1123 or CHEM 1073) and (BIOL 1543 or BIOL 1584). (Typically offered: Spring)

## FDSC 3103. Principles of Food Processing. 3 Hours.

The course is designed as an overview of the unit; food processing operations common to all types of food processing plants. Examples will be drawn from international food processing operations processing fruits and vegetables, poultry and meats, and oil seeds and cereal grains. Emphasis on oral communication and critical thinking skills. Corequisite: Lab component. Prerequisite: CHEM 1123 and CHEM 1121L and (MATH 2043 or MATH 2554). (Typically offered: Fall)

## FDSC 3202. Introduction to Food Law. 2 Hours.

Discussion of government laws and regulations affecting the manufacture of food. Emphasis is on federal regulations relating to food safety, labeling, and the FDA. Discussion relates to practical use of food law. Lecture 2 hours per week. (Typically offered: Spring)

## FDSC 3202H. Honors Introduction to Food Law. 2 Hours.

Discussion of government laws and regulations affecting the manufacture of food.
Emphasis is on federal regulations relating to food safety, labeling, and the FDA.
Discussion relates to practical use of food law. Prerequisite: Honors standing. (Typically offered: Spring)
This course is equivalent to FDSC 3202.
FDSC 400V. Special Problems. 1-4 Hour.
Investigation of assigned problems in food science. Prerequisite: Junior standing.
(Typically offered: Fall, Spring and Summer)

## FDSC 4111L. Food Analysis Lab. 1 Hour.

Laboratory exercises providing students with experience of analytical techniques and instrumentation used in food analysis. Laboratory 3 hours per week. Corequisite:
FDSC 4113. Prerequisite: FDSC 4304 and CHEM 1123 and CHEM 1121L and CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L). (Typically offered: Spring)

## FDSC 4113. Food Analysis. 3 Hours.

Methods of analysis, instrumentation, and laboratory techniques for measuring the chemical composition of raw and value-added products. Lecture 3 hours.
Corequisite: FDSC 4111L. Prerequisite: FDSC 4304 and CHEM 1123 and
CHEM 1121L and CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L). (Typically offered: Spring)

FDSC 4121L. Food Microbiology Lab. 1 Hour.
A hands-on laboratory course designed to teach students microbiological techniques and certain enumeration and plating techniques of specific food spoilage and pathogenic bacteria. Prerequisite: BIOL 2013 and BIOL 2011L. Pre- or Corequisite: FDSC 4122. (Typically offered: Fall)
FDSC 4122. Food Microbiology. 2 Hours.
The study of food microbiology including classification/ taxonomy, contamination, preservation and spoilage of different kinds of foods, pathogenic microorganisms, food poisoning, sanitation, control and inspection and beneficial uses of microorganisms. Prerequisite: BIOL 2013 and BIOL 2011L or BIOL 2533. (Typically offered: Fall)
This course is cross-listed with BIOL 4122.

## FDSC 4304. Food Chemistry. 4 Hours.

Water, carbohydrates, lipids, proteins, vitamins, and minerals in foods; biochemical and functional properties, enzymes, food additives (emulsifiers, pigments, colors, flavors, preservatives, and sweeteners) and texture as related to properties in food systems and during processing. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CHEM 1123 and CHEM 1121L and CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L). (Typically offered: Fall)

## FDSC 431V. Internship in Food Science. 1-4 Hour.

The Food Science Internship is a supervised practical work experience with a food industry, research program or governmental agency to gain professional experience and insight into career opportunities. Prerequisite: Junior standing and consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

## FDSC 4413. Sensory Evaluation of Food. 3 Hours.

Principles and procedures for sensory evaluation of food. Appropriate uses of specific tests are discussed, along with physiological, psychological, and environmental factors affecting sensory verdicts. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: STAT 2303 or BUSI 1033 or STAT 2823 or PSYC 2013. (Typically offered: Fall)
FDSC 4513. Cereal Processing Technology. 3 Hours.
Fundamental concepts of heat and mass transport in grains; cereal/grain structure, property and composition; cereal/grain processing systems and technology; cereal/ grain co-product processing technology and value recovery; cereal/grain quality metrics, grading standards and food safety assurance. Prerequisite: FDSC 3103 or FDSC 4754 or with instructor permission. (Typically offered: Spring Odd Years)

## FDSC 4713. Product Innovation for the Food Scientist. 3 Hours.

This is a capstone course integrating knowledge developed in Food Science to the development of new food products. This course will take an integrated multidisciplinary approach to developing innovative food products and will provide learning experiences in new product development and Research \& Development. Topics include product formulation, ingredient interactions, sensory analysis, packaging, labeling, food safety and food law. Corequisite: Lab component. Preor Corequisite: FDSC 4113 and FDSC 4111L. Prerequisite: Senior standing, FDSC 4304, FDSC 3103, and FDSC 4413. (Typically offered: Spring)
FDSC 472V. Special Topics in Food Science. 1-4 Hour.
Discussion focused on selected topics of particular fields of raw product physiology, food processing, chemistry, physiology, microbiology, evaluation, sensory analysis, and preservation. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.
FDSC 4754. Engineering Principles of Food Processing. 4 Hours.
Basic mechanics of refrigeration, temperature controls, materials handling and mechanical problems as applied to foods and food processing. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: MATH 1213, MATH 2554, PHYS 2013, PHYS 2011L and FDSC 3103. (Typically offered: Spring)

## Horticulture (HORT)

Wayne A. Mackay<br>Head of the Department<br>316 Plant Sciences Building<br>479-575-2603<br>Department of Horticulture Website (http://hort.uark.edu/)

The Department of Horticulture offers a broad, science-based degree with comprehensive and technical training: Horticulture, Landscape and Turf Sciences (HLTS).

Horticulture, landscape, and turf management involves selection, production, management, marketing, use, and research of ornamental crops (shrubs, trees, flowers, and turf), edible crops (herbs, vegetables, and fruits) and turf grasses for the economic, nutritional, aesthetic and recreational well-being of society. The major provides education and training in basic and applied sciences, arts and humanities, communication, and business and economics to provide an understanding of the underlying principles in plant growth and development and use of new technologies, and the operation of a horticultural enterprise. In consultation with an academic adviser and mentor, students may individually focus their academic programs through required and elective courses to focus training in specialized areas such as production, greenhouse and floriculture sciences, turfgrass management, golf course management, nursery production and management, edible crop production, pest management, sales and support services, education and training, and horticultural consulting. An internship in the industry is required to gain practical, hands-on experience.

Job opportunities for horticulturists include horticulture crop production and management, horticulture merchandising and business, consulting, inspection, research, teaching, Extension, communications, allied industries serving horticultural producers, journalism, and developing private business. Students who specialize in landscape and aspects of ornamental horticulture will be prepared for careers in the landscape service industry, landscape nurseries, landscape design firms, private and public gardens, and public agencies such as parks and recreation. Job opportunities for students studying turfgrass management include golf course superintendent, sports field manager, turfgrass science companies, seed or sod production, commercial landscape turfgrass
management, research, sales, teaching, or private consulting. Advanced study may be required for some careers.

## Requirements for a Major in Horticulture, Landscape and Turf Sciences (HLTS)

The HLTS major will consist of 120 hours to include the following courses that meet the state minimum core (p. 81) and discipline specific general education (p. 72) requirements:
(Course work that meets state minimum core requirements is in bold.)

| Communication | s 6 |
| :---: | :---: |
| ENGL 1013 | $\begin{aligned} & \text { Composition I (ACTS Equivalency = ENGL } \\ & \text { 1013) } \end{aligned}$ |
| ENGL 1023 | $\begin{aligned} & \text { Composition II (ACTS Equivalency = ENGL } \\ & \text { 1023) } \end{aligned}$ |
| U.S. History and | Government 3 |
| HIST 2003 | History of the American People to 1877 (ACTS Equivalency = HIST 2113) |
| HIST 2013 | History of the American People, 1877 to Present (ACTS Equivalency = HIST 2123) |
| PLSC 2003 | American National Government (ACTS Equivalency = PLSC 2003) |
| Mathematics | 3-4 |
| MATH 1203 | College Algebra (ACTS Equivalency = MATH 1103) (or higher level math) |
| Physical and Bio | ological Sciences 12-16 |
| BIOL 1543 \& BIOL 1541L | Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture) <br> and Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab) |
| CHEM 2613 <br> \& CHEM 2611 | Organic Physiological Chemistry (ACTS <br> LEquivalency = CHEM 1224 Lecture) and Organic Physiological Chemistry Laboratory <br> (ACTS Equivalency = CHEM 1224 Lab) |
| Select from on | e Chemistry group: |
| CHEM 1073 <br> \& CHEM 1071 | Fundamentals of Chemistry (ACTS Equivalency L= CHEM 1214 Lecture) and Fundamentals of Chemistry Laboratory (ACTS Equivalency = CHEM 1214 Lab) |
| OR |  |
| CHEM 1103 <br> \& CHEM 1101 | University Chemistry I (ACTS Equivalency = LCHEM 1414 Lecture) and University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab) |
| AND |  |
| CHEM 1123 <br> \& CHEM 1121 | University Chemistry II (ACTS Equivalency = LCHEM 1424 Lecture) <br> and University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab) |
| Fine Arts and Hu | umanities (6 hours) 6-8 |
| Fine Arts Cor state minimu | Course (Select at least 3 hours from Fine Arts $m$ core) |
| Humanities C Humanities | ore Course (Select at least 3 hours from tate minimum core) |
| Social Sciences | 9 |

Select 9 hours from Social Science state minimum core including at least one of the following:
AGEC 1103 Principles of Agricultural Microeconomics
AGEC 2103 Principles of Agricultural Macroeconomics
ECON 2013 Principles of Macroeconomics (ACTS Equivalency = ECON 2103)
ECON 2023 Principles of Microeconomics (ACTS Equivalency = ECON 2203)
ECON 2143 Basic Economics: Theory and Practice
HLTS Core Requirements (30-31 hours)
UNIV 1001 University Perspectives 1
COMM $1313 \quad$ Public Speaking (ACTS Equivalency $=$ SPCH 3 1003)

Communication Intensive Elective (3 hours - see advisor for approved 3 list of courses)
CSES 2203
Soil Science
\& CSES 2201L and Soil Science Laboratory
HORT 2003 Principles of Horticulture (with lab component) 3
HORT 2101 Horticultural Career Development 1
HORT 4403 Plant Propagation (with lab component) 3
HORT 4413 Horticulture Physiology 3
HORT 462V Horticulture, Landscape, Turf Sciences Internship 1 Experience
HORT 472V Horticulture, Landscape, Turf Sciences Internship 2 Assessment
Select two of the following:
CSES 4143 Principles of Weed Control
ENTO 3013 Introduction to Entomology
PLPA 3003 Principles of Plant Pathology
\& PLPA 3001L and Principles of Plant Pathology Laboratory
Horticulture Electives
Select 18 hours from the following:
HORT 1303 Introduction to Floral Design
HORT 2303 Introduction to Turfgrass Management
HORT 3103 Woody Landscape Plants (with lab component)
HORT 3113 Herbaceous and Indoor Plant Materials (with lab component)
HORT 3123 International Horticulture
HORT 3303 Vegetable Crops
HORT 3403 Turfgrass Management (with lab component)
HORT 3503 Sustainable and Organic Horticulture
HORT 4033 Professional Landscape Installation and Construction
HORT 4043 Professional Landscape Management
HORT 4103 Fruit Production Science and Technology (with lab component)
HORT 4503 Sustainable Nursery Production
HORT 4603 Practical Landscape Planning
HORT 4703 Greenhouse Management and Controlled Environment Horticulture
HORT 4701L Greenhouse Management and Controlled Environment Horticulture Laboratory
HORT 4903 Golf and Sports Turf Management (with lab component)
HORT 400V Special Problems
HORT 401V $\quad$ Special Topics in Horticulture, Turf or Landscape
Discipline-Related Electives

Select at least 12 hours from the following:
ASTM 3102 Small Power Units/Turf Equipment \& ASTM 3101L and Small Power Units/Turf Equipment Laboratory
ASTM 3153 Surveying in Agriculture and Forestry
ASTM 4973 Irrigation (with lab component)
ANSC/POSC Principles of Genetics
3123
HORT 1103 Plants, People and You
HORT 400V Special Problems
HORT 401V Special Topics in Horticulture, Turf or Landscape
LARC 3914 Sustainable Design and Construction: Remediation and Plants on Structure
LARC 2113 Design Visualization, Inquiry and Communications
PHYS 1023 Physics and Human Affairs
\& PHYS 1021Land Physics and Human Affairs Laboratory (or higher level)
WCOB course electives (up to 9 hours)
or any AGEC, ASTM, BIOL, CHEM, CSES, ENSC, ENTO, FDSC, HORT, PLPA class not taken in any other elective group.

| General Electives | $12-21$ |
| :--- | ---: |
| Total Hours | 120 |

## Horticulture, Landscape and Turf Sciences

 B.S.A.
## Nine-Semester Degree Plan

Students wishing to follow the degree plan should see the Eight-Semester Degree Policy ( p .67 ) for university requirements of the program.

| First Year | Fall | Units <br> Spring |  |
| :--- | ---: | ---: | ---: |
| UNIV 1001 University Perspectives | 1 |  |  |

## Minor in Horticulture (HORT-M)

The Horticulture minor is only available to students outside the Horticulture, Landscape and Turfgrass Sciences (HLTS) major. The minor will consist of 18 hours to include:

| HORT 2003 | Principles of Horticulture | 3 |
| :--- | :--- | ---: |
| HORT 4403 | Plant Propagation | 3 |
| Select a minimum of 9 hours from the following: | $9-11$ |  |
| HORT 2303 | Introduction to Turfgrass Management |  |
| HORT 3303 | Vegetable Crops |  |

| HORT 400V | Special Problems |  |
| :--- | :--- | :--- |
| HORT 4103 | Fruit Production Science and Technology |  |
| HORT 4503 | Sustainable Nursery Production |  |

## Minor in Landscape Horticulture (LHRT-M)

The Landscape Horticulture minor is only available to students outside the Horticulture, Landscape and Turfgrass Sciences (HLTS) major. The minor will consist of 18 hours to include:

| HORT 2003 | Principles of Horticulture | 3 |
| :---: | :---: | :---: |
| HORT 4043 | Professional Landscape Management | 3 |
| Select 3 hours from the following: |  | 3 |
| HORT 4603 | Practical Landscape Planning |  |
| LARC Studio Course |  |  |
| Select one of the following: |  | 3 |
| HORT 3103 | Woody Landscape Plants |  |
| HORT 3113 | Herbaceous and Indoor Plant Materials |  |
| Select 6-8 hours from the following: |  | 6-8 |
| HORT 2303 | Introduction to Turfgrass Management |  |
| HORT 3103 | Woody Landscape Plants |  |
| HORT 3113 | Herbaceous and Indoor Plant Materials |  |
| HORT 3403 | Turfgrass Management |  |
| HORT 400V | Special Problems |  |
| HORT 4033 | Professional Landscape Installation and Construction |  |
| HORT 4403 | Plant Propagation |  |
| HORT 4503 | Sustainable Nursery Production |  |
| HORT 4703 <br> \& HORT 470 | Greenhouse Management and Controlled Environment Horticulture and Greenhouse Management and Controlled Environment Horticulture Laboratory |  |
| LARC 3734 | Sustainable Design and Construction: Material and Methods of Assembly |  |

## Total Hours

## Minor in Turf Management (TURF-M)

The Turf Management minor is only available to students outside the Horticulture, Landscape and Turfgrass Sciences (HLTS) major. The Turf Management minor is comprised of 18 to 20 hours to include the following:

| HORT 2303 | Introduction to Turfgrass Management | 3 |
| :--- | :--- | :--- |
| HORT 3403 | Turfgrass Management (with lab component) | 3 |
| Select one of the following: | 3 |  |

HORT 4903 Golf and Sports Turf Management (with lab component)
HORT 4913 (with lab component)
Select 3 hours from the following:

| ENTO 3013 | Introduction to Entomology (with lab component) |  |
| :--- | :--- | :--- |
| PLPA 3003 | Principles of Plant Pathology |  |
| \& PLPA 3001L | and Principles of Plant Pathology Laboratory | $6-8$ |
| Select two of the following: |  |  |
| ASTM 4973 | Irrigation |  |
| ASTM 3102 | Small Power Units/Turf Equipment |  |
| \& ASTM 3101L and Small Power Units/Turf Equipment Laboratory |  |  |
| CSES 2203 | Soil Science |  |
| \& CSES 2201L and Soil Science Laboratory |  |  |
| ENTO 3013 | Introduction to Entomology (with lab component) |  |
| PLPA 3003 | Principles of Plant Pathology |  |
| \& PLPA 3001L | and Principles of Plant Pathology Laboratory |  |
| HORT 4903 | Golf and Sports Turf Management (with lab <br> component) |  |
| HORT 4913 | (with lab component) |  |
| HORT 3103 | Woody Landscape Plants (with lab component) |  |
| HORT 4033 | Professional Landscape Installation and <br> Construction |  |

Total Hours
18-20

## Faculty

Bertucci, Matthew, Ph.D., M.S. (North Carolina State University), B.S. (Spring Hill College), Assistant Professor, 2020.
Cato, Aaron J., Ph.D. (University of Arkansas), M.S. (Kansas State
University), B.S. (Arkansas State University), Assistant Professor, 2019.
Clark, John R., Ph.D. (University of Arkansas), M.S., B.S. (Mississippi
State University), Distinguished Professor, 1983, 2016.
Dickson, Ryan W., Ph.D., B.S. (University of Florida), Assistant Professor, 2018.
Karcher, Douglas Edward, Ph.D., M.S. (Michigan State University), B.S. (The Ohio State University), Professor, 2000, 2016.
Mackay, Wayne A., Ph.D. (University of Maryland), M.S. (University of Delaware), B.S. (Virginia Polytechnic Institute and State University), Professor, 2014.
McDonald, Garry Vernon, Ph.D., M.S., B.S.A. (Texas A\&M University), Clinical Assistant Professor, 2016.
McKern, Jacquelyn A., Ph.D., M.S. (University of Arkansas), B.S. (Arkansas Technical University), Associate Professor, 2016.
McWhirt, Amanda L., Ph.D. (North Carolina State University), M.S. (Louisiana State University), B.S. (Tarleton State University), Assistant Professor, 2016.
Philyaw Perez, Amanda, Ph.D., M.P.H. (University of Arkansas for Medical Sciences), B.S. (University of Arkansas at Little Rock), Assistant Professor, 2020.
Richardson, Mike, Ph.D. (University of Georgia), M.S. (Louisiana State University), B.S. (Louisiana Tech University), Professor, 1998, 2007.
Rom, Curt R., Ph.D., M.S. (The Ohio State University), B.S. (University of Arkansas), University Professor, 1989, 2014.
Shi, Ainong, Ph.D. (North Carolina State University), M.S. (Graduate School of Chinese Academy of Agricultural Sciences), B.S. (Zhejiang University), Assistant Professor, 2013.
Worthington, Margaret L., Ph.D. (North Carolina State University), M.S. (University of California-Davis), B.S. (Duke University), Assistant Professor, 2016.

## Courses

HORT 1103. Plants, People and You. 3 Hours.
Plants, People and You is a course designed to introduce students to the world of horticulture, with an emphasis on how plants can be used for food, fun, health, economic value or environmental contribution. (Typically offered: Fall)

## HORT 1303. Introduction to Floral Design. 3 Hours.

Students in this introductory class in Floral Design will learn basic design elements such as line, form, mass, balance, texture and color as used in floral art. Students will gain an appreciation of the various types and species of flowers and foliage used in various floral arrangements such as bouquets and centerpieces. In addition, students will learn common post-harvest handling techniques of fresh cut floral plant material to prolong vase-life from the purchasing stage to the final design. Corequisite: Lab component. (Typically offered: Spring)

## HORT 2003. Principles of Horticulture. 3 Hours.

A course introducing students to the biological and technologies underlying the propagation, production, handling and use of horticultural crops, turf and landscape plants. Students will be introduced to the various disciplines and commodities of horticulture. The use of plants for the benefit of humankind because of their aesthetic and nutritional value will be explored. Previous instruction in Plant Science, Plant Biology, or general Botany is strongly encouraged. Corequisite: Lab component. (Typically offered: Spring)

## HORT 2101. Horticultural Career Development. 1 Hour.

A course which presents concepts necessary for developing a career and becoming a professional in horticulture industries or businesses. Concepts of goal setting, effective communication and interpersonal skills, behaviors and performance, portfolio and resume, development and job hunting skills will be presented. (Typically offered: Spring)

## HORT 2303. Introduction to Turfgrass Management. 3 Hours.

An introductory course in turfgrass management emphasizing turfgrass growth, adaptation, and management. Methods for establishment, fertilization, mowing, cultivation, irrigation, and pest management are presented, and their impact on culture of lawns, golf courses, athletic fields, and other managed turf areas discussed. (Typically offered: Fall)
HORT 3103. Woody Landscape Plants. 3 Hours.
Identification, climatic adaptation and landscape design values of woody ornamental trees, shrubs and vines. Lecture 2 hours per week. Corequisite: Lab component. (Typically offered: Fall)

## HORT 3113. Herbaceous and Indoor Plant Materials. 3 Hours.

Identification, culture, and use of annuals, perennials in landscapes and foliage plants in interiors. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Spring Odd Years)

## HORT 3123. International Horticulture. 3 Hours.

Considerable globalization of agriculture has occurred over the past several decades, especially in the area of horticultural crops. This course provides a base of knowledge of the international horticulture industry focusing on principles and practices of development and trade of horticultural crops. (Typically offered: Spring)

## HORT 3303. Vegetable Crops. 3 Hours.

General course in vegetable crops with attention to the principles underlying methods of production and handling related to yields and quality of the products. Lecture 2 hours, laboratory 2 hours per week. Prerequisite: HORT 2003 and CSES 2203. (Typically offered: Fall Odd Years)

## HORT 3403. Turfgrass Management. 3 Hours.

Cultural and management practices of commercial and residential lawns. Principles and practices of mowing, fertilizing, irrigating, and control of weed, disease, and insects. Identification of turfgrass; equipment selection. Corequisite: Lab component. Prerequisite: HORT 2303. (Typically offered: Spring Even Years)

## HORT 3503. Sustainable and Organic Horticulture. 3 Hours.

This course will provide a base of knowledge of the principles and practices of sustainable, organic, and alternative horticulture management systems. The class will review and evaluate topics including soil biological processes (compost, humus and fertility), pest management, alternative farming systems, and organic agriculture. After this foundation information is studied, the class will study applications of sustainable agriculture principles to production systems such as greenhouse vegetable production, ornamental production, fruit production, and landscape and turf management. (Typically offered: Fall Even Years)

## HORT 400V. Special Problems. 1-6 Hour.

Original investigations on assigned problems in horticulture. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

HORT 401V. Special Topics in Horticulture, Turf or Landscape. 1-6 Hour.
Topics related to horticulture, turfgrass or landscape science or management not covered in other courses or a more intensive study of a specific topic. (Typically offered: Irregular) May be repeated for degree credit.

## HORT 402V. Horticulture Judging and Competition Activity. 1-6 Hour.

Training for and participation on horticultural identification, judging and competitive teams. Prerequisite: HORT 2003. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HORT 4033. Professional Landscape Installation and Construction. 3 Hours. Principles and practices involved in landscape installation and construction. Topics covered include sequencing construction activities, protecting existing trees, landscape soils, selecting plants, planting and transplanting plant materials, wood construction, cement and masonry construction, and low-voltage lighting. Lecture 3 hours per week. Preparatory training in agribusiness or business is suggested. Prerequisite: HORT 2003. (Typically offered: Fall Even Years)

HORT 4043. Professional Landscape Management. 3 Hours.
Principles and practices of landscape management and maintenance. Topics include low maintenance and seasonal color design, pruning and hazard tree management, water and fertilizer management, pesticide use, and other maintenance activities. Basic elements of marketing, specifications and contracts, estimating, personnel management, and equipment selection and acquisition relevant for landscape services will be introduced. Preparatory training in agribusiness or business is suggested. Prerequisite: HORT 2003 and HORT 3103. (Typically offered: Fall Odd Years)

HORT 4103. Fruit Production Science and Technology. 3 Hours.
The management technologies and cultural practices of fruit crops including (but not limited to) blueberries, blackberries, raspberries, strawberries, grapes, peaches and apples will be presented. The underlying scientific principles of crop genetics, nutrition, and physiology will be presented as a basis for making management decisions in fruit crop productions. Corequisite: Lab component. Prerequisite: HORT 2003. (Typically offered: Spring Odd Years)

HORT 4153. Sustainable Techniques in Urban Horticulture. 3 Hours.
Sustainable Techniques in Urban Horticulture is a practicum based course where the student will learn basic techniques in sustainable production of horticultural crops in an urban or small-scale environment. Crops may include vegetables, cut flowers, or small fruits. This course is intended for students who do not have an agricultural production background or for those students wanting to learn more about the production of high-value horticultural crops under sustainable production systems. (Typically offered: Summer)

## HORT 4403. Plant Propagation. 3 Hours.

Principles of plant propagation using seeds, cuttings, grafting, budding, layering, and tissue culture. The physiological basis of propagation is described. Knowledge of plant growth and physiology is needed. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: HORT 2003. (Typically offered: Spring)

HORT 4403H. Honors Plant Propagation. 3 Hours.
Principles of plant propagation using seeds, cuttings, grafting, budding, layering, and tissue culture. The physiological basis of propagation is described. Knowledge of plant growth and physiology is needed. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: HORT 2003 and honors standing. (Typically offered: Spring)
This course is equivalent to HORT 4403.
HORT 4413. Horticulture Physiology. 3 Hours.
This course provides students with a background into the physiological processes of plants with an emphasis on horticultural crops and how the processes relate to horticultural crop production practices. Among the topics covered are photosynthesis, respiration, water relations and morphogenesis. Prerequisite: HORT 2003 and CHEM 1073. (Typically offered: Spring)

HORT 4503. Sustainable Nursery Production. 3 Hours.
This course addresses issues and practices involved in production of quality woody nursery crops (e.g. trees and shrubs produced in open filed and containerized systems). (Typically offered: Spring Even Years)

## HORT 4603. Practical Landscape Planning. 3 Hours.

Ornamental planting design and landscape planning concepts. Preparing planting plans, materials sheets, and cost estimates for residential properties. Prerequisite: HORT 3103. (Typically offered: Spring Even Years)

HORT 462V. Horticulture, Landscape, Turf Sciences Internship Experience. 1-6 Hour.

A supervised practical work experience in a horticulture, landscape design, or turf business or research program to gain professional competence and insight into employment opportunities. Prerequisite: COMM 1313 and HORT 2101. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

## HORT 4701L. Greenhouse Management and Controlled Environment

 Horticulture Laboratory. 1 Hour.Laboratory involving hands-on experiments designed to demonstrate principles discussed in the lecture section. Includes field trips. Corequisite: HORT 4703.
(Typically offered: Fall Odd Years)
HORT 4703. Greenhouse Management and Controlled Environment Horticulture. 3 Hours.
Operation and management of greenhouses and other controlled environments used in horticultural production. Emphasis on system design and construction, control of light intensity and photoperiod, heating and cooling systems, substrates, mineral nutrition, water quality and irrigation systems. Prerequisite: HORT 2003 and CHEM 1073. (Typically offered: Fall)

HORT 472V. Horticulture, Landscape, Turf Sciences Internship Assessment. 1-6 Hour.
The objective of the HORT 472V Internship Assessment is for the student to gain mastery in written and oral communication skills and critical thinking skills by reflection and analysis of ideas, artifacts, and events gained from a prior internship experience. The student is expected to master specific skills in the context, content development, syntax and mechanics and purpose of writing in a visual presentation relating to the internship experience. The student will also master skills in the organization, central message, language, and delivery of an oral presentation related to the internship experience. The student will master critical thinking skills through the explanation of issues, personal perspective, evidence presentation, and conclusions and outcomes related to the internship experience. Prerequisite: HORT 462V. (Typically offered: Fall, Spring and Summer)

HORT 4903. Golf and Sports Turf Management. 3 Hours.
Turf management techniques for golf courses, and athletic fields including species selection, root-zone construction and modification, fertilization, mowing, irrigation and pest control. Corequisite: Lab component. Prerequisite: CSES 2203 and CSES 2201L and (HORT 2303 or HORT 3403). (Typically offered: Fall Odd Years)

## Poultry Science (POSC)

David J. Caldwell
Director, Center of Excellence for Poultry Science
Head, Department of Poultry Science
0114 Poultry Science Center
479-575-4952
Department of Poultry Science Website (https://poultry-science.uark.edu/)
The Department of Poultry Science offers a major in poultry science leading to a Bachelor of Science in Agriculture. Students pursuing a major in Poultry Science would select one of two areas of concentration for their degree program: a Pre-Professional Science Concentration or a Poultry Science Industry Concentration. The department also offers coursework for a minor and a certificate of excellence program.

A major in poultry science is designed to provide the scientific and technical education to prepare students for positions of leadership and responsibility in the expanding fields of production, processing, marketing, and distribution of meat, eggs, and related poultry products. The curriculum also prepares students for career opportunities in specialized areas of nutrition, breeding, genetics, physiology, management, food science, immunology, and disease.

Elective hours allow students to select a minor and thus personalize their degree.

Elective hours can also be used to emphasize areas of business, production, processing or science. Pre-veterinary medicine, pre-medical, or pre-pharmacy requirements may be fulfilled while meeting degree requirements.

Curricula are designed to permit the student to obtain the necessary foundation to pursue graduate study for the master's and doctoral degrees. Advanced degrees are offered but not limited to the areas of nutrition, genetics, physiology, product technology, and poultry health.

## Minor in Poultry Science (POSC-M)

A student planning to minor in poultry science should declare the minor with their major dean's office and consult a departmental adviser to discuss requirements. The minor consists of 16 hours to include the following:

Core Requirements (10 hours)

| POSC 1003 | Introduction to Poultry Science | 3 |
| :--- | :--- | :--- |
| POSC 2343 | Poultry Production | 3 |
| Choose 4 hours from the following: | 4 |  |

POSC 3554 Avian Anatomy

| POSC 4314 | Egg and Meat Technology |  |
| :---: | :---: | :---: |
| Controlled POSC Electives (6 hours) |  | 6 |
| Choose a minimum of 6 hours from the following: |  |  |
| POSC 2353 | Poultry Breeder Management |  |
| POSC 3033 | Animal Physiology |  |
| POSC 3223 | Poultry Diseases |  |
| POSC 3554 | Avian Anatomy |  |
| POSC 3123 | Principles of Genetics |  |
| POSC 4314 | Egg and Meat Technology |  |
| POSC 4343 | Poultry Nutrition |  |
| POSC 3013 | Exotic Companion Birds |  |
| POSC 3513 | Current Approaches in Agricultural Laboratory Research |  |
| POSC 4213 | Integrated Poultry Management Systems |  |
| POSC 4233 | Value Added Muscle Foods |  |
| POSC 4923 | Brain and Behavior |  |
| POSC Electiv | (3 hours) |  |

Total Hours

## Requirements for Undergraduate Certificate of Excellence in Poultry

 ScienceStudents entering the Certificate of Excellence Program must 1) meet the admission requirements for the University of Arkansas and 2) have completed 90 hours of coursework with a 2.0 or higher from a regionally accredited institution of higher education.

Students who have completed a Bachelor of Science degree may also consider this program. Typical careers include production/processing/ allied positions in the poultry industry, graduate studies are also an option.

## Curriculum Outline:

| POSC 3033 | Animal Physiology | 3 |
| :---: | :--- | :---: |
| POSC 3223 | Poultry Diseases | 3 |
| POSC 3554 | Avian Anatomy | 4 |
| POSC 4213 | Integrated Poultry Management Systems | 3 |
| POSC 4314 | Egg and Meat Technology | 4 |
| POSC 4343 | Poultry Nutrition | 3 |
| POSC 4801 | Seminar: Research Topics | 1 |
| or POSC 4821 | Seminar: Problem Solving |  |
| POSC 4811 | Seminar: Professionalism | 1 |
| or POSC 4831 | Seminar: Processing Regulations | 3 |
| POSC 401V | Internship in Poultry Science | 3 |

## Faculty

Caldwell, David J., Ph.D., M.S., and B.S. (Texas A\&M University), Professor, 2019.
Clark, Fred D., Ph.D., D.V.M., M.S., B.S. (Texas A\&M University), Extension Professor, 1994, 2007.
Coon, Craig N., Ph.D., M.S., B.S. (Texas A\&M University), Professor, 1997.

Donoghue, Annie, Ph.D. (F. Edward Herbert School of Medicine), M.S. (Texas A\&M University), B.S. (San Diego State University), Research Professor, 2000.
Dridi, Sami, Ph.D., M.S. (National Polytechnic Institute of Lorraine, France), B.S. (Superior Institute of Mateur, Tunisia), Professor, 2013, 2018.

Erf, Gisela F., Ph.D. (Cornell University), M.S., B.S. (University of Guelph, Canada), Professor, Avian Immunology Professorship, 1994, 2004.

Hanning, Casey Owens, Ph.D., M.S., B.S. (Texas A\&M University), Professor, 2000, 2017.
Hargis, Billy M., Ph.D., D.V.M. (University of Minnesota-Twin Cities), M.S. (University of Georgia), B.S. (University of Minnesota), Distinguished Professor, Sustainable Poultry Health Chair, 2000, 2017.
Kidd, Michael T., Ph.D. (North Carolina State University), M.S., B.S.A. (University of Arkansas), Professor, 2010.
Kong, Byungwhi, Ph.D., M.S. (University of Minnesota-Twin Cities), B.S. (Korea University), Associate Professor, 2006, 2012.
Kuenzel, Wayne J., Ph.D. (University of Georgia), M.S., B.S. (Bucknell University), Professor, 2000.
Kwon, Young Min, Ph.D. (Texas A\&M University), M.S., B.S. (Seoul National University), Associate Professor, 2002, 2008.
Marcy, John A., Ph.D., M.S. (lowa State), B.S. (University of Tennessee), Extension Professor, 1993, 2006.
Orlowski, Sara K., Ph.D., M.S. (University of Arkansas), B.S. (Cornell University), Assistant Professor, 2019.
Rath, Narayan C., Ph.D., M.S. (University of Delhi-India), B.S. (Utkal University-India), Research Professor, 1992, 1998.
Rochell, Samuel J., Ph.D. (University of Illinois at Urbana-Campaign), M.S., B.S. (Auburn University), Assistant Professor, 2016.

Sun, Xiaolun, Ph.D., M.S. (Virginia Polytech Institute and State University), B.S. (Southern China Agricultural University), Assistant Professor, 2016.
Tellez-Isaias, Guillermo, Ph.D. (Texas A\&M University), Visiting Professor, 2002.
Wideman, Robert F., Ph.D. (University of Connecticut), B.A. (University of Delaware), Professor, 1993.

## Courses

POSC 1003. Introduction to Poultry Science. 3 Hours.
To introduce the student to the career opportunities in the poultry science industry. Students will be introduced to biological sciences associated with poultry. Corequisite: Lab component. (Typically offered: Fall)

POSC 1062. Sustainable Integrated Small Animal Farming. 2 Hours.
Practical information on small scale animal production, including practical strategies for farm planning, issues of economic and environmental sustainability, best management practices, biosecurity, disease prevention, and farm safety will be presented. (Typically offered: Spring)
This course is cross-listed with ANSC 1062.
POSC 2343. Poultry Production. 3 Hours.
To develop a basic foundation about the practices utilized to produce broilers and turkeys. Course will highlight hatchery function and management; embryo development and hatching; chick/poultry transportation, preparation and maintenance of facilities for rearing birds, bird environment, nutrition, and health. Also to be covered are the different roles associated with live production in an integrated company. Corequisite: Lab component. (Typically offered: Fall)

## POSC 2353. Poultry Breeder Management. 3 Hours.

Students will be introduced to the management practices used in production of young and adult chickens, turkeys, and other poultry with special emphasis on broiler, breeder, and market egg production. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. (Typically offered: Spring)

POSC 2411L. Domestic Animal Microbiology Laboratory. 1 Hour.
This course is designed for students working on their Poultry Science, Animal Science, and/or Food Science degrees. Students enrolled in this course will learn how to collect samples aseptically from live birds and meat samples, transport samples, and culture samples on a variety of different microbiological media. In addition, students will have the opportunity to visit one of the microbiology labs in the local poultry production facilities. Students will learn how to handle samples, stain bacterial cells, and identify unknown bacteria from field samples. A lab period will be assigned to teaching students on how to use bacteria in food production by teaching students how to prepare and sample yogurt. Corequisite: POSC 2413. (Typically offered: Fall)
This course is cross-listed with ANSC 2411L.

## POSC 2413. Domestic Animal Microbiology. 3 Hours.

Basic concepts of domestic animal and poultry microbiology including diversity, genetics, metabolism, growth, control of growth, pathogenesis, and immunology. Prerequisite: (BIOL 1543 and BIOL 1541L) and (CHEM 1073 or CHEM 1103 or CHEM 1123). Corequisite: POSC 2411L. (Typically offered: Fall)
This course is cross-listed with ANSC 2413.
POSC 3013. Exotic Companion Birds. 3 Hours.
Topics include basic care, health, breeding, bird evolution, anatomy, and nutritional management of commonly kept exotic companion birds, including parrots, cockatoos, macaws, finches, canaries, and pigeons. Discussion will include housing and care for individual pet birds and large scale breeding and production. Lecture/ discussion 3 hours per week. Prerequisite: BIOL 1543. (Typically offered: Fall Odd Years)

## POSC 3033. Animal Physiology. 3 Hours.

Fundamental aspects of central nervous, musculoskeletal, reproductive, digestive, immune, cardiovascular, respiratory and renal systems will be covered. The normal structure and function of these systems will be emphasized. Lecture 3 hours per week. Prerequisite: BIOL 1543 and (CHEM 1123 or CHEM 1073). (Typically offered: Spring)
This course is equivalent to ANSC 3033.

## POSC 3123. Principles of Genetics. 3 Hours.

Fundamentals of heredity, with special emphasis on the improvement of farm animals. Lecture 3 hours per week. Prerequisite: BIOL 1543 and MATH 1203 or higher. (Typically offered: Fall)
This course is cross-listed with ANSC 3123.

## POSC 3223. Poultry Diseases. 3 Hours.

Common diseases affecting poultry reared under commercial conditions will be covered including diagnosis, therapy and prevention. Immunity, sanitation practices, and chemoprophylaxis will also be covered. Lecture 3 hours per week with some demonstrations, slides and videotapes. Prerequisite: ((BIOL 2013 and BIOL 2011L) or (POSC 2413 and POSC 2411L)), and junior standing. (Typically offered: Spring)

POSC 3381. Poultry Judging and Selection. 1 Hour.
Practice in production judging and flock selection. Laboratory 3 hours per week. (Typically offered: Fall and Spring) May be repeated for up to 4 hours of degree credit.

POSC 3513. Current Approaches in Agricultural Laboratory Research. 3 Hours. A laboratory course to introduce students to current laboratory research techniques used in agricultural and life sciences. Hands-on laboratory exercises will emphasize current cellular and molecular research techniques, laboratory notebook keeping, data interpretation, and presentation of results. Prerequisite: BIOL 1543. (Typically offered: Spring Even Years)
This course is cross-listed with POSC 3513H, ANSC 3513H.

## POSC 3513H. Honors Current Approaches in Agricultural Laboratory

## Research. 3 Hours.

A laboratory course to introduce students to current laboratory research techniques used in agricultural and life sciences. Hands-on laboratory exercises will emphasize current cellular and molecular research techniques, laboratory notebook keeping, data interpretation, and presentation of results. Prerequisite: BIOL 1543. (Typically offered: Spring Even Years)
This course is cross-listed with ANSC 3513H.

## POSC 3554. Avian Anatomy. 4 Hours.

Detailed coverage of the external and internal anatomy of poultry, including formation and development of the egg and embryo. Lecture 3 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: BIOL 1543. (Typically offered: Fall)

## POSC 400V. Special Problems. 1-9 Hour.

Special problems in the poultry sciences for advanced students. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

## POSC 401V. Internship in Poultry Science. 1-6 Hour.

Supervised work experience with private or government organizations to introduce students to professional areas of work in poultry science. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 8 hours of degree credit.

## POSC 402V. Research Experience. 1-6 Hour.

An undergraduate research experience should familiarize students with the research process and expand their knowledge in areas of poultry science through scientific literature searches and hands-on experiential learning. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
POSC 4033. Statistical Process Control in the Food Industry. 3 Hours. Analysis of processing data related to compliance with regulatory limits, quality \& safety limits and internal \& external customer specifications. Emphasizes statistical process control chart development, including understanding data and chart selection, calculating statistical limits, and interpreting process performance. Prerequisite: Instructor consent. (Typically offered: Irregular)

POSC 410V. Special Topics in Poultry Science. 1-4 Hour.
Topics not covered in other courses or for a more intensive study of specific topics in poultry science. (Typically offered: Irregular) May be repeated for degree credit.

## POSC 4123. Legal Issues in Animal Agriculture. 3 Hours.

An issues-oriented course focusing on the legal issues involved in the production of poultry, swine and livestock. Emphasis will center on the laws, regulations and policy arguments involved in animal confinement, antibiotic use, humane slaughter and veterinary medicine, along with other related issues. The wide range of regulation from local to state to federal, depending on the issue will be studied and discussed. (Typically offered: Spring Odd Years)
This course is cross-listed with AGEC 4123, ANSC 4123.

POSC 4163. Companion Animal Nutrition. 3 Hours.
This course is designed to focus on the digestive anatomy, physiology, and nutrient metabolism of non-herbivorous companion animals, primarily dogs and cats. Topics discussed will also include an overview of the pet food industry, its regulations and commonly utilized ingredients. Students will gain a deeper understanding of nutrition as it relates to life stages and various disease states that can affect both dogs and cats. This course will require a Saturday trip to one or two off campus facilities. Prerequisite: ANSC 3143 or POSC 4343. (Typically offered: Spring) This course is cross-listed with ANSC 4163.

POSC 4213. Integrated Poultry Management Systems. 3 Hours.
Major managerial systems in the integrated commercial poultry industry.
Development of an understanding of the basic decision making processes of poultry companies and the factors influencing those decisions. Prerequisite: POSC 2353 and AGEC 1103 and AGEC 2303. (Typically offered: Spring)

POSC 4233. Value Added Muscle Foods. 3 Hours.
An intense study of muscle structure and how it relates to the development of further processed meat products. Muscle ultrastructure, protein functionality, product development, and quality analysis will be covered. In class hands on activities will also be included to allow students to obtain experience of producing processed meat products. Prerequisite: POSC 4314. (Typically offered: Spring Odd Years)
POSC 4314. Egg and Meat Technology. 4 Hours.
Study of the science and practice of processing poultry meat and egg products; examination of the physical, chemical, functional and microbiological characteristics of value added poultry products; factors affecting consumer acceptance and marketing of poultry products and the efficiency of production. Corequisite: Lab component. Prerequisite: (CHEM 1123 and CHEM 1121L) or (CHEM 1073 and CHEM 1071L) and BIOL 1543 and BIOL 1541L. (Typically offered: Fall)

POSC 4343. Poultry Nutrition. 3 Hours.
Principles of nutrition as applied to the formulation of practical chicken and turkey rations. Lecture 3 hours per week. Prerequisite: CHEM 2613 or CHEM 3603 and junior standing. (Typically offered: Spring)
POSC 4613. Muscle Growth and Development. 3 Hours.
This is an undergraduate level course offering detailed insights into skeletal muscle morphological, physiological, cellular, and molecular factors affecting muscle structure and function, with special emphasis on cellular and molecular regulation of muscle growth and development, such as myo-, fibro-, and adipo-genesis. And the relationship between the properties of skeletal muscle and meat quality. ANSC 3033 and(or) CHEM 3813 are recommended as a prerequisite(s). (Typically offered: Fall) This course is cross-listed with ANSC 4613.

POSC 4801. Seminar: Research Topics. 1 Hour.
Required by all poultry science majors. Prerequisite: Junior or Senior standing and COMM 1313. (Typically offered: Spring Odd Years)

POSC 4811. Seminar: Professionalism. 1 Hour.
Addressing issues associated with preparation for finding and retaining your first job in the poultry industry. Lecture 1 hour per week. Prerequisite: Junior or Senior standing. (Typically offered: Fall Odd Years)

POSC 4821. Seminar: Problem Solving. 1 Hour.
Real world problem solving of poultry production systems. Lecture 1 hour per week. Prerequisite: Junior/ senior standing. (Typically offered: Spring Even Years)

POSC 4831. Seminar: Processing Regulations. 1 Hour.
Processing plant procedures and regulations with an emphasis on problem solving. Lecture 1 hour per week. Prerequisite: Junior or senior standing. (Typically offered:
Fall Even Years)

## POSC 4923. Brain and Behavior. 3 Hours.

Covers cellular through neural systems, major brain functions and comparative neuroanatomy. Topics include ion channels, membrane and action potentials, synaptic integration, neurotransmitters, major brain regions of mammals and birds, sensory and autonomic nervous systems, neuroendocrine system, and control by the brain of critical functions and behavior. Lecture 3 hours per week. Prerequisite: (ANSC 3033 or POSC 3033) or PSYC 2003, or BIOL 2213, or BIOL 2443, or BIOL 2533. (Typically offered: Fall)
This course is cross-listed with ANSC 4923.

## School of Human Environmental Sciences (HESC)

Donna L. Graham<br>Director

118 Human Environmental Sciences Building
479-575-4305

## School of Human Environmental Sciences Website

The School of Human Environmental Sciences at the University of Arkansas prepares students for a wide variety of professional careers in education, industry, business, government, and community services. The school is concerned with improving the quality of life for individuals and families as they exist and function in society. Human environmental sciences draws knowledge from research, from the physical, biological, and social sciences, and from arts and humanities. It relates this knowledge to an understanding of individuals' and families' needs and goals for food, clothing, shelter, management of resources, and human development and relationships. The School of Human Environmental Sciences has made a substantial contribution to the development of individuals and families through undergraduate and graduate preparation of human environmental scientists and through research in human nutrition, foods, human development, family sciences, apparel and textiles.

## Majors

Six majors are offered in the School of Human Environmental Sciences:

- Apparel Merchandising and Product Development (p. 212)
- Birth through Kindergarten (p. 218)
- Food, Nutrition and Health (p. 221)
- Hospitality Management (p. 225)
- Human Development and Family Sciences (p. 227)
- Human Nutrition and Dietetics (p. 234)

## Minors

Five minors are offered in the School of Human Environmental Sciences:

- Child Services (p. 221)
- Event Management (p. 227)
- Hospitality Management (p. 227)
- Human Development and Family Sciences (p. 231)
- Human Nutrition (p. 236)

## Faculty

Apple, Laurie Marie McAlister, Ph.D. (Oklahoma State University), M.S., B.S. (University of Arkansas), Associate Professor, 2000, 2007.

Becnel, Jennifer N., Ph.D. (Arizona State University), M.A. (University of California-San Francisco). B.A. (San Diego State University), Assistant Professor, 2014.

Bowman, Jennifer, M.S., B.S. (University of Arkansas), Instructor, 2020.
Cho, Eunjoo, Ph.D. (lowa State University), M.S., B.S. (Hanyang
University, Seoul), Associate Professor, 2013, 2019.
Duncan, James M., Ph.D. (Florida State University), M.S. (University of Arkansas), Instructor, 2017.
Fillastre, Michelle D., PH.D., M.S. (Louisiana State University), Instructor, 2020.
Fuller, Serena M., Ph.D. (University of California, Davis), Associate Professor, 2014.
Garrison, Mary Elizabeth, Ph.D., M.S. (Iowa State University), B.S. (Benedictine College), Professor, 2014.
Harding, Lorna, M.S. (University of Alberta, Canada), B.A. (University of Western Ontario, Canada), Instructor, 2004.
Herold, Laura K., Ph.D., M.A. (University of Michigan), B.A. (Oberlin College), Teaching Assistant Professor, 2015.
Killian, Timothy Scott, Ph.D. (University of Missouri-Columbia), M.A. (Wheaton College), B.A. (Central Bible College), Associate Professor, 2001, 2007.
Ma, Weiyi, Ph.D, M.A. (University of Delaware), B.A. (China West Normal University), Assistant Professor, 2017.
McNally, Shelley Ann, Ph.D. (University of Toledo), M.S., B.S. (Ohio University), Professional Practice Assistant Professor, 2016.
Mosley, Jacquelyn Dee, Ph.D. (Texas Tech University), M.S. (Arizona State University), B.A. (University of Northern lowa), Professor, 2021, 2016.

Moxley, Shari Coleman, Ph.D. (University of North Carolina), Instructor, 2013.

O'Brien, Catherine, Ph.D. (University of Illinois, Chicago), M.P.H. (San Diego State University), M.A. (University of California, San Diego), B.S.Ed. (University of Wisconsin, Madison), Instructor, 2016.

Overby, Theresa, B.A. (University of Arkansas, Little Rock), Instructor, 2020.

Pendergraft, Sarah Ann, M.S. (University of Arkansas), B.S. (Texas Christian University), Instructor, 2020.
Post, Rana, M.B.A. (William Woods University), B.S. (University of Missouri, Columbia), Instructor, 2008.
Powell, Rob, M.S., B.S. (Louisiana State University), Instructor, 2020.
Robertson, Lona, Ed.D. (Indiana University, Bloomington), M.S., B.S. (Florida State University), Professor, 2006, 2011.
Siahmakoun, Lobat, M.S. (University of Arkansas), B.S. (Missouri Southern State University), Instructor, 2015.
Southward, Leigh, Ph.D., M.S., B.S. (University of Tennessee), B.S. (Mississippi University for Women), Associate Professor, 2008.
Stallings, Melinda, M.A. (University of Houston-Clear Lake), B.S. (Louisiana State University), Instructor, 2019.
Terrell, Amanda, Ph.D., M.S., B.S. (Oklahoma State University), Assistant Professor, 2017.
Timby, Donia, M.S., B.S. (University of Arkansas), Instructor, 2017.
Traywick, LaVona S., Ph.D. (University of Kentucky), M.A. (University of Arkansas-Little Rock), B.S. (University of Central Arkansas), Associate Professor, 2017.
Trudo, Sabrina P., Ph.D. (University of Washington), B.S. (Brigham Young University), Associate Professor, Twenty First Century Endowed Chair in Human Environmental Sciences, 2015.
Way, Kelly Ann, Ph.D., M.S., B.S. (Oklahoma State University), Associate Professor, 2006, 2012.

## Apparel Merchandising and Product Development Courses

## AMPD 1013. Introduction to Clothing Concepts. 3 Hours.

Origin of dress, the evolution of fashion as an economic power, the sociological and psychological aspects of clothing in various cultures, aesthetics of dress, selection and consumption of clothing. Lecture 3 hours per week. (Typically offered: Fall and Spring)
AMPD 1013H. Honors Introduction to Clothing Concepts. 3 Hours.
Origin of dress, the evolution of fashion as an economic power, the sociological and psychological aspects of clothing in various cultures, aesthetics of dress, selection and consumption of clothing. Lecture 3 hours per week. Prerequisite: Honors standing. (Typically offered: Fall and Spring)
This course is equivalent to AMPD 1013.
AMPD 1023. Introduction to Apparel Production. 3 Hours.
Course focuses on basic principles of apparel production and analysis of garment components of mass produced apparel. Students utilize computer generated designs in the production process. Laboratory 6 hours per week. Prerequisite: HESC or AMPD students only. (Typically offered: Fall and Spring)
AMPD 2013. Fashion, Buying and Promotion in a Global Market. 3 Hours. Fashion components, marketing theories and practices as they specifically relate to apparel, home goods, and other design driven products in the global market. Focus on principles and techniques on how fashion marketers develop and apply marketing strategies that meet consumer needs at a profit. International buying and promotional aspects of the apparel industry are emphasized. Lecture 3 hours per week. Prerequisite: AMPD major and AMPD 1013. (Typically offered: Fall and Spring)
AMPD 2013H. Honors Fashion, Buying and Promotion in a Global Market. 3 Hours.
Fashion components, marketing theories and practices as they specifically relate to apparel, home goods, and other design driven products in the global market. Focus on principles and techniques on how fashion marketers develop and apply marketing strategies that meet consumer needs at a profit. International buying and promotional aspects of the apparel industry are emphasized. Lecture 3 hours per week. Prerequisite: AMPD major, AMPD 1013 and honors standing. (Typically offered: Fall and Spring)
This course is equivalent to AMPD 2013.

## AMPD 2033. Computer Based Methods for Apparel. 3 Hours.

This course is designed to give students basic experience with CAD (computer aided design) apparel industry software in a computer laboratory environment. Prerequisite: AMPD majors only, AMPD 1013, AMPD 1023 and ASTM 2903 or ISYS 1123 or equivalent. (Typically offered: Fall and Spring)
AMPD 2053. Introduction to Textile Science. 3 Hours.
Textile fibers and fabrics, their structure, properties, manufacture, wearing qualities and methods of laundering, finishing, and dyeing. Artistic and economic selection of materials for clothing and household furnishings. Lecture 3 hours per week. Prerequisite: HESC, AMPD or FCSE students only. (Typically offered: Fall and Spring)

## AMPD 2063. Quality Assessment of Apparel. 3 Hours.

Study of apparel from the perspective of structure, aesthetics, cost and expected performance of the finished product. Lecture 2 hours per week, lab 2 hours per week. Prerequisite: AMPD 1023 and AMPD 2053. (Typically offered: Fall and Spring)

## AMPD 2073. Flat Pattern Drafting. 3 Hours.

A study of product development and production through flat pattern manipulation and the related vocabulary necessary to communicate professionally within the industry. Pre- or Corequisite: AMPD 2063. (Typically offered: Fall and Spring)

## AMPD 3033. Merchandising Math for the Apparel Industry. 3 Hours.

Exploration of activities associated with the procurement of fashion apparel. A fashion analysis is directed toward apparel demands and the creation of a fashion statement by the use of specific quantitative skills. Course follows fashion item from the designer to the store. Lecture 3 hours per week. Prerequisite: MATH 1203 or three credit hours of STAT and AMPD 2013. (Typically offered: Fall and Spring)

AMPD 3043. Fashion Brand Management. 3 Hours.
This course focuses on the fundamental elements of brand, the concept of brand equity, brand relationships with consumers, and the implications of technologies on the branding process in the fashion industry. The course topics include branding basics, the concept of brand equity, brand image, brand positioning, brand communications, the role of emotional and sensory experiences in fashion branding, luxury fashion brands, sustainable fashion branding management, and technology driven branding. Prerequisite: AMPD 2013. (Typically offered: Fall and Spring)

## AMPD 3053. Computer Aided Textile Design. 3 Hours.

This course is designed to give students advanced skills in textile design using industry based computer aided design (CAD) software. Prerequisite: AMPD 2033 and AMPD 2053 or instructor consent. (Typically offered: Fall and Spring)

## AMPD 3063. Digital Apparel Production. 3 Hours.

Use of industry specific computer aided software to perform pattern making, technical package, marketing, and other cross-functional team communication materials. Pre- or Corequisite: AMPD 2073, AMPD 2033, and AMPD 2063. (Typically offered: Fall and Spring)
AMPD 3071. Apparel Merchandising and Product Development Pre-Internship. 1 Hour.
A study of job descriptions, responsibilities at the management level, structural operations, work procedures, job performance evaluations, job application, the resume, and portfolio development in preparation for AMPD 4083, AMPD Internship. Lecture 1 hour per week. Prerequisite: AMPD majors only. (Typically offered: Spring)

## AMPD 3203. Fashion Styling - UARC. 3 Hours.

This course exposes students to the essential skills necessary for success in the field of fashion styling. Future stylists will learn the criteria to produce striking images for all visual media including entertainment, music, print and advertising. In addition, they will gain an understanding of the interdisciplinary collaborative nature within the creative process while working with directors, photographers and production crew. This course is only offered to AMPD students. This course will be offered by the University of Arkansas Rome Center, Italy. Prerequisite: AMPD majors only. (Typically offered: Fall)

## AMPD 3213. Trend Forecasting - UARC. 3 Hours.

Forecasting is one of the most rapidly growing research areas in fashion as well as in many other industry fields. Anticipating consumer demand is crucial and the ability to trend forecast is a skill required for product development. This course will enable students to develop trend forecasts by analyzing the global environment they live in using varied methodologies. The students will learn how to navigate between existing predictions and translate them for product development. This course is only offered to AMPD students. This course will be offered by the University of Arkansas Rome Center, Italy. Prerequisite: AMPD majors only. (Typically offered: Fall)

## AMPD 4011. History of Apparel Through Film to 1900. 1 Hour.

This course uses historic costume films to trace the evolution of clothing from ancient Egypt to the Twentieth Century. Emphasis is placed on societal aspects such as politics, religion, economy, technology, education, sports, class structure, and gender roles, and how they affect and change dress. Web-based course. (Typically offered: Fall and Spring)

AMPD 4023. Merchandising Application for the Apparel Industry. 3 Hours.
Application of merchandising theory, principles and practices in a capstone class. An in depth study of innovative apparel business concepts as applied to manufacturers and retailers of apparel including apparel classification, seasonal cycles, stock emphasis, assortment strategies, target customers, and apparel trends. Includes an overview of marketing communication including advertising, personal selling, and sales promotion. Prerequisite: AMPD 3033 and AMPD 3043 and completed 75 credit hours or instructor consent. (Typically offered: Fall and Spring)

AMPD 4053. Historic and Contemporary Apparel. 3 Hours.
This course traces the evolution of clothing from ancient times to the twentieth century with emphasis upon Western civilization and includes the study of contemporary fashion as a social force including the origin, scope, theory, and history of the fashion business, the materials of fashion, the fashion producers, auxiliary fashion enterprises, designers, fashion leaders, and leading market. Cultural and economic factors affecting dress, adornment and customs associated dress will be stressed. The Lecture 3 hours per week. Prerequisite: Completed 75 credit hours or instructor consent. (Typically offered: Fall and Spring)

## AMPD 4063. Advanced Apparel Production. 3 Hours.

An advanced study of product development incorporating technology used in the industry for a career in fashion merchandising and/or product development in a computer laboratory environment. Laboratory 6 hours per week. Prerequisite: AMPD 2063 and AMPD 2073. (Typically offered: Fall and Spring)

AMPD 4063H. Honors Advanced Apparel Production. 3 Hours.
An advanced study of product development incorporating technology used in the industry for a career in fashion merchandising and/or product development in a computer laboratory environment. Laboratory 6 hours per week. Prerequisite: AMPD 2033, AMPD 2063 and AMPD 2073 and honors candidacy. (Typically offered: Fall and Spring)
This course is equivalent to AMPD 4063.

## AMPD 4073. Fashion Show Theory and Production. 3 Hours.

A study of the fashion show including the history, purpose, future of, and elements necessary to produce a successful show. A study of fashion show production through experiential project-based learning and committee membership planning and implementing a fashion show. (Typically offered: Spring)
AMPD 4083. Apparel Merchandising and Product Development Internship. 3 Hours.
A practical experience in a retail store or in a work situation related to the apparel industry to gain insight into the field of apparel merchandising and operations. Prerequisite: Junior standing and 2.50 cum GPA and AMPD 2013, AMPD 2033, AMPD 2063, AMPD 2073, AMPD 3033, AMPD 3043, AMPD 3071, COMM 1313 and instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
AMPD 4093. Apparel Merchandise Planning and Inventory Control. 3 Hours. Describes today's challenges for both apparel manufacturers and retailers in meeting the consumer's demands for the right products at the right prices - and at the right times. Follows the evolution of the merchandising function with emphasis on production efficiency, highlighting the philosophies of industry executives and the effective integration of the merchandising, store design, marketing, the apparel supply chain and manufacturing functions along the way. Prerequisite: (ECON 2143 or (ECON 2013 and ECON 2023) or (AGEC 1103 and AGEC 2103)) and AMPD 3033 and senior standing or instructor consent. (Typically offered: Fall and Spring)

## AMPD 4103. Evolution of Fashion and Society Through Television Media. 3 Hours.

This course uses television programming from its early beginnings in the 1930s through to the twenty-first century to trace major events, societal changes, and the associated evolution of fashion. The course examines television both as an innovator and diffuser of fashion trends. (Typically offered: Fall and Spring)

AMPD 4111. History of Apparel Through Film from 1900 to Present. 1 Hour.
This course uses historic costume films to trace the evolution of clothing from 1900 to Present. Emphasis is placed on societal aspects such as politics, religion, economy, technology, education, sports, class structure, and gender roles, and how they affect and change dress. Web based course. (Typically offered: Fall and Spring)

## AMPD 4213. Fashion Illustration - UARC. 3 Hours.

The purpose of this course is to develop the fundamentals skills necessary in fashion illustration. Students will be highly encouraged to use various mediums, and also utilize these skills to develop a individual style of drawing for their own design collections. This course is only offered to AMPD students. This course will be offered by the University of Arkansas Rome Center, Italy - Course\# FASHDRW-317. Prerequisite: AMPD majors only. (Typically offered: Fall)
AMPD 4223. Design Concepts for Fashion Merchandising - UARC. 3 Hours. This course examines the elements of research and design in fashion design, fabrications and merchandising. The student develops creative skills as well as an awareness of the various roles played by workers in the fashion industry. This course is only offered to AMPD students. This course will be offered by the University of Arkansas Rome Center, Italy - Course \# FASHDES-316. Prerequisite: AMPD majors only. (Typically offered: Fall)

## AMPD 4233. Fashion Design - UARC. 3 Hours.

This course focuses on the key components of the fashion design process including research, trend forecasting, materials investigation and presentation of valuable, market-specific collections. Designers consider current market trends and design concepts as influences on merchandising. Extensive opportunities for the development and communication of a personal design vision in illustrated presentations helps students build portfolio-ready collections. Industry directed projects also provide opportunities to develop brand-conscious yet creative concepts and designs. CAD skills are utilized in a variety of presentational techniques. This course is only offered to AMPD students. This course will be offered by the University of Arkansas Rome Center, Italy - Course \# FASHDES-316. Prerequisite: AMPD majors only. (Typically offered: Fall)

## AMPD 4243. Pattern Development II - UARC. 3 Hours.

Students learn to drape basic bodice and skirt variations on standard industrial dress forms. Original garments are designed, draped and sewn. Accurate pattern-making, sewing and attention to design fundamentals are stressed throughout the course. This course is only offered to AMPD students. This course will be offered by the University of Arkansas Rome Center, Italy - Course\# FASD-311. Prerequisite: AMPD majors only. (Typically offered: Fall)

## AMPD 4901. AMPD International Pre-Study Tour. 1 Hour.

A study of specific regional and international fashion markets for apparel studies in preparation for AMPD 4912 AMPD International Study Tour. The course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets. AMPD 4901 is content specific to each AMPD 4912 international study tour and must be repeated for each study tour destination. A grade of "C" or better is required to participate in AMPD 4912. Prerequisite: 2.0 minimum GPA. AMPD majors with minimum 30 hours, or consent. (Typically offered: Spring and Summer) May be repeated for up to 4 hours of degree credit.

## AMPD 4901H. Honors AMPD International Pre-Study Tour. 1 Hour.

A study of specific regional and international fashion markets for apparel studies in preparation for AMPD 4912 AMPD Study Tour. The course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets. AMPD 4901 is content specific to each AMPD 4912 study tour and must be repeated for each study tour destination. A grade of "C" or better is required to participate in AMPD 4912. Prerequisite: 2.0 minimum GPA. AMPD majors with minimum 30 hours, or consent. (Typically offered: Spring and Summer) May be repeated for up to 4 hours of degree credit.
This course is equivalent to AMPD 4901.

AMPD 4912. AMPD International Study Tour. 2 Hours.
An on-site study of international fashion markets for apparel merchandising and product development. Course further examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets as outlined in AMPD 4901. Course includes study trip; length based upon destination. Additional fees required. Course offered each May Intersession. Prerequisite: AMPD 4901 (with a C or better), 2.0 min . GPA, AMPD major with min. 30 hours, and instructor consent. Corequisite: AMPD 4901 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min . GPA, AMPD major with min. 30 hours, and instructor consent. (Typically offered: Summer) May be repeated for up to 6 hours of degree credit.
AMPD 4912H. Honors AMPD International Study Tour. 2 Hours.
An on-site study of international fashion markets for apparel merchandising and product development. Course further examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets as outlined in AMPD 4901. Course includes study trip; length based upon destination. Additional fees required. Course offered each May Intersession. Prerequisite: AMPD 4901 (with a C or better), 2.0 min . GPA, AMPD major with min. 30 hours, and instructor consent. Corequisite: AMPD 4901 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min . GPA, AMPD major with min. 30 hours, and instructor consent. (Typically offered: Summer) May be repeated for up to 8 hours of degree credit.
This course is equivalent to AMPD 4912.

## AMPD 4921. AMPD New York City Pre-Study Tour. 1 Hour.

A pre-study of the New York fashion market for apparel students. Course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets. Course is a pre-requisite for AMPD 4952 a 6 day field study in New York City, NY, May Intercession. This course is only offered to AMPD majors. Prerequisite: 2.0 minimum GPA, and students must be a AMPD majors with a minimum of 30 hours, or consent. (Typically offered: Spring)

## AMPD 4921H. Honors AMPD New York City Pre-Study Tour. 1 Hour.

A pre-study of the New York fashion market for apparel students. Course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets. Course is a pre-requisite for AMPD 4952 a 6 day field study in New York City, NY, May Intercession. This course is only offered to AMPD majors. Prerequisite: 2.0 minimum GPA, students must be a AMPD majors with a minimum of 30 hours, and honors standing or consent. (Typically offered: Spring) This course is equivalent to AMPD 4921.

## AMPD 4931. AMPD Virtual Las Vegas Pre-Study Tour. 1 Hour.

Course examines the buying function of apparel by exploring facets of technology currently being used in the fashion industry. Students will be digitally exposed to assortment planning, budgeting, open-to-buy, and the visual merchandising aspects of apparel retailing. Aspects of the MAGIC trade show held in Las Vegas will be discussed and analyzed. MAGIC is the most comprehensive fashion trade show in the U.S. for apparel, accessories, footwear, and sourcing materials. This course is a pre-requisite for AMPD 4962. This course is only offered to AMPD majors. Prerequisite: Students must have a 2.0 minimum GPA and must be an AMPD major with a minimum 30 hours completed, or consent. (Typically offered: Spring)

## AMPD 4931H. Honors AMPD Virtual Las Vegas Pre-Study Tour. 1 Hour.

 Course examines the buying function of apparel by exploring facets of technology currently being used in the fashion industry. Students will be digitally exposed to assortment planning, budgeting, open-to-buy, and the visual merchandising aspects of apparel retailing. Aspects of the MAGIC trade show held in Las Vegas will be discussed and analyzed. MAGIC is the most comprehensive fashion trade show in the U.S. for apparel, accessories, footwear, and sourcing materials. This course is a pre-requisite for AMPD 4962. This course is only offered to AMPD majors. Prerequisite: Students must have a 2.0 minimum GPA, must be an AMPD major with a minimum 30 hours completed, and must have honors standing or consent. (Typically offered: Spring)This course is equivalent to AMPD 4931.

## AMPD 4941. AMPD Las Vegas Pre-Study Tour. 1 Hour.

A pre-study of the Las Vegas MAGIC trade show for apparel merchandising and product development. Course examines the design and production of a major trade show and the distribution of wholesale fashion goods to mass markets. Course is a pre-requisite for AMPD 4952 or AMPD 4952H a 6-day field study in Las Vegas, Nevada, August Intercession. This course is only offered to AMPD majors. Prerequisite: 2.0 minimum GPA, and students must be an AMPD major with a minimum of 30 hours, or consent. (Typically offered: Spring)
AMPD 4941H. Honors AMPD Las Vegas Pre-Study Tour. 1 Hour.
A pre-study of the Las Vegas MAGIC trade show for apparel merchandising and product development. Course examines the design and production of a major trade show and the distribution of wholesale fashion goods to mass markets. Course is a pre-requisite for AMPD 4952 or AMPD 4952H a 6-day field study in Las Vegas, Nevada, August Intercession. This course is only offered to AMPD majors. Prerequisite: 2.0 minimum GPA, students must be an AMPD major with a minimum of 30 hours, and have honors standing or consent. (Typically offered: Spring) This course is equivalent to AMPD 4941.

## AMPD 4952. AMPD New York City Study Tour. 2 Hours.

The course examines the application of business practices in the design, production, distribution and retailing of goods including sourcing, and manufacturing to mass markets. Students are expected to take an active role in the learning process for the duration of the study abroad experience, including critical thinking, problem identification and self-initiated inquiry. 2 credit hours Summer May Intersession enrollment includes study tour and related assignments to be completed on site. Corequisite: AMPD 4921 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 minimum GPA, AMPD major with minimum 30 hours, and instructor consent. Prerequisite: AMPD 4921 (with a C or better), 2.0 minimum GPA, AMPD major with minimum 30 hours, and instructor consent. (Typically offered: Spring)

## AMPD 4952H. Honors AMPD New York City Study Tour. 2 Hours.

The course examines the application of business practices in the design, production, distribution and retailing of goods including sourcing, and manufacturing to mass markets. Students are expected to take an active role in the learning process for the duration of the study abroad experience, including critical thinking, problem identification and self-initiated inquiry. 2 credit hours Summer May Intersession enrollment includes study tour and related assignments to be completed on site. Corequisite: AMPD 4921 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 minimum GPA, AMPD major with minimum 30 hours, honors standing and instructor consent. Prerequisite: AMPD 4921 (with a C or better), 2.0 minimum GPA, AMPD major with minimum 30 hours, honors standing and instructor consent. (Typically offered: Spring)
This course is equivalent to AMPD 4952.

## AMPD 4962. AMPD Virtual Las Vegas Study Tour. 2 Hours.

Course examines the buying function of apparel by exploring facets of technology currently being used in the fashion industry. Students will be digitally exposed to assortment planning, budgeting, open-to-buy, and the visual merchandising aspects of apparel retailing. Aspects of the MAGIC trade show held in Las Vegas will be discussed and analyzed. MAGIC is the most comprehensive fashion trade show in the U.S. for apparel, accessories, footwear, and sourcing materials. Corequisite: AMPD 4931 (with a C or better, if corequisite, must have $C$ or better at time of virtual tour), 2.0 minimum GPA, AMPD major with minimum 30 hours, and instructor consent. Prerequisite: AMPD 4931 (with a C or better), 2.0 minimum GPA, AMPD major with minimum 30 hours, and instructor consent. (Typically offered: Spring)

AMPD 4962H. Honors AMPD Virtual Las Vegas Study Tour. 2 Hours.
Course examines the buying function of apparel by exploring facets of technology currently being used in the fashion industry. Students will be digitally exposed to assortment planning, budgeting, open-to-buy, and the visual merchandising aspects of apparel retailing. Aspects of the MAGIC trade show held in Las Vegas will be discussed and analyzed. Prerequisite: AMPD 4931 (with a $C$ or better), 2.0 minimum GPA, AMPD major with minimum 30 hours, instructor consent and honors standing. (Typically offered: Spring)

## AMPD 4972. AMPD Las Vegas Study Tour. 2 Hours.

A 6 day field study of the Las Vegas MAGIC trade show for apparel studies. Course examines the design and production of a major trade show and the distribution of wholesale fashion goods from to mass markets. Course is a 6-day field study in Las Vegas, Nevada, August Intercession. Corequisite: AMPD 4941 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min . GPA, AMPD major with $\min .30$ hours, and instructor consent. Prerequisite: AMPD 4941 (with a C or better), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. (Typically offered: Spring)

## AMPD 4972H. Honors AMPD Las Vegas Study Tour. 2 Hours.

A 6 day field study of the Las Vegas MAGIC trade show for apparel studies. Course examines the design and production of a major trade show and the distribution of wholesale fashion goods from to mass markets. Course is a 6-day field study in Las Vegas, Nevada, August Intercession. Corequisite: AMPD 4941 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min . GPA, AMPD major with min. 30 hours, honors standing and instructor consent. Prerequisite: AMPD 4941 (with a C or better), 2.0 min . GPA, AMPD major with min. 30 hours, honors standing and instructor consent. (Typically offered: Spring)
This course is equivalent to AMPD 4972.

## Hospitality Courses

HOSP 1603. Introduction to Hospitality Management. 3 Hours.
Study of the hospitality industry from a global perspective. Emphasizes an introduction to the different sectors of the hospitality industry: food service, lodging, travel \& tourism, and marketing of the sectors. Exposes students to experienced practitioners who provide real life case studies and perspectives on management in the hospitality environment. Provides career development perspectives and instruction as well as management roles and techniques. (Typically offered: Fall and Spring)

## HOSP 2603. Purchasing and Cost Control. 3 Hours.

Food purchasing with emphasis on specifications. Relationship of food purchasing to available equipment. Receiving, storage, distribution, and inventory control. Meal quality control and costing. Food and nonfood materials, management of the purchasing process, and communication. Specification writing, menu analysis, and costing. Prerequisite: Must be a HESC, HNAD, FNAH, HOSP or IDST with EVMG track major or a EVMG-M student. (Typically offered: Fall and Spring)

## HOSP 2611. Foodservice Sanitation. 1 Hour.

Principles and theory of food safety and sanitation in the hospitality and foodservice industries, focused on prevention of food borne illnesses and ensuring public health and consumer safety. Prerequisite: HNAD, FNAH, or HOSP major, NUTR-M students or CATEBS-FCSE students. (Typically offered: Fall and Spring)

## HOSP 2633. Lodging Property Management. 3 Hours.

Examines the organization, duties and administration of the hotel. Includes: the rooms division, convention/meeting spaces, and general business operations. Preor Corequisite: HOSP 1603. (Typically offered: Fall and Spring)

## HOSP 2643. Intro to Casino Management. 3 Hours.

This course provides an overview of casino operations including the economics of the casino and its interface with hotels and other organizations and the practices and problems associated with the casino management such as staffing, security, controls, taxation and entertainment. Prerequisite: HOSP 1603 and (Hospitality Management Bachelor of Science (HOSPBS) or Hospitality Management Minor (HOSP-M) or Event Management Minor (EVMG-M) students). (Typically offered: Spring)

## HOSP 2653. Introduction to Hospitality Finance. 3 Hours.

Accounting principles, procedures and transactions used for the compilation of financial reports in hospitality industries. Prerequisite: HOSP 1603. (Typically offered: Fall and Spring)

## HOSP 3301. Hospitality Pre-Internship. 1 Hour.

A study of job descriptions, responsibilities at the management level, structural operations, work procedures, job performance evaluations, job application, the resume and portfolio development in preparation for HOSP 4693 Hospitality Management Internship. Prerequisite: HOSP 1603, HOSP majors only, and junior standing. (Typically offered: Fall and Spring)

## HOSP 3623. Introduction to Meetings and Events Management. 3 Hours.

Focuses on the planning and management of meetings and events in the hospitality industry. Includes developing event goals and objectives, site planning and management, event set up, risk management, food and beverage planning and management, budgeting, working with event services vendors, and marketing and promotion of events and meetings. Prerequisite: HOSP 1603, HOSP 2603, and (Hospitality majors (HOSPBS), Event Management Minor (EVMG-M) students or IDSTBA majors with EVMG track). (Typically offered: Fall)

HOSP 3653. Hospitality, Dietetic Management and Human Resources. 3 Hours. Function and methods of management as related to the hospitality, nutrition and dietetic industries. Topics include: recruitment, placement, talent management, training and development, and compensation. Prerequisite: HOSP 1603 or NUTR 1201, and junior standing. (Typically offered: Fall, Spring and Summer)

## HOSP 3673. Event Safety and Venue Management. 3 Hours.

This course will provide students with the information, skills, and tools necessary to help provide a safe environment, reduce liability, and guide individual and group behavior at events. Students will learn how to develop a risk management and safety plan for an event and/or venue, how to identify and plan to avoid potential problems, and how to implement safety and crowd management plans to ensure a safe event. The primary focus of the course will be on live event and venue safety planning. Prerequisite: HOSP 1603, HOSP 2603, HOSP 3623 and (Event Management Minor (EVMG-M) students or IDST major with EVMG track). (Typically offered: Spring)

## HOSP 3713. Beverage Management. 3 Hours.

This course introduces students to the concepts of the beverage industry with an emphasis on management. Standards of hospitality operation are explored as well as a brief overview of the products of the alcohol industry: wine, beer, and spirits. Also included is an overview of non-alcoholic products such as coffee, tea, water, and carbonated beverages. History, cultural relationships, production methods, service and sanitation, and concepts of sales are examined. Prerequisite: HOSP 1603, HOSP 2603, and students must be Hospitality (HOSP) majors; Student must be at least 21 years of age at start of term. (Typically offered: Fall)

HOSP 4602L. Culture and Cuisines of the World Practicum. 2 Hours. Development of service management skills for the hospitality industry through preparation and service of food, staffing, professionalism, recipe standardization, menu planning, cost control, sanitation, safety, and overall quality assurance. Instruction for planning food flow from receiving to service of meals, including choosing proper equipment for the flow plan and service items. Student must have a current Food Managers Certificate which is achieved upon successful completion of HOSP 2611. Laboratory 7 hrs per week. Pre- or Corequisite: HOSP 4603. Prerequisite: NUTR 1213, HOSP 2603, HOSP 2611, Junior standing, Hospitality Management Bachelor of Science in Human Environmental Science (HOSPBS) majors only, and instructor consent required. (Typically offered: Fall and Spring)

HOSP 4603. Culture and Cuisines of the World. 3 Hours.
Explores foods and food ways of various cultural/ethnic groups. Considers origin and migration of foods and customs throughout the world. Studies food's relationship to cultural groups, geographical location, social practices and economic wellbeing. Analyzes impact of multiple cultures on foods, food preparation, and food ways in the U.S. Students must have a current Food Managers Certification, which is achieved upon successful completion of HOSP 2611. Pre- or corequisite: HOSP 4602L. Prerequisite: HOSP 1603, HOSP 2603, HOSP 2611, junior standing, HOSP majors only and instructor consent required. (Typically offered: Fall and Spring)

## HOSP 4613. Festival Management and Analysis. 3 Hours.

This course provides students both knowledge and practical experiences of festival management and analysis. Lectures based on the selected textbook will systematically offer students the understanding of multiple aspects of a festival, such as alignment with the target attendees, connect to community and place, festival media platforms, and monitoring and evaluating festivals. Prerequisite: HOSP 1603, HOSP 2603, and HOSP 3623. (Typically offered: Fall)

## HOSP 4643. Special Events Management. 3 Hours.

Hands-on study of special events. Planning activities include conception, planning, implementation, execution of the hospitality program's annual fundraising event and evaluation. The interaction between staff, customers, guests, vendors, and others necessary to implement a successful special event. Topics including marketing, public relations and volunteer coordination are implemented. Additional focus on catering through, hotels, restaurants, and private companies. Prerequisite: HOSP 1603, HOSP 2603, HOSP 3623 and HOSP majors only. (Typically offered: Spring)

## HOSP 4653. Global Travel and Tourism Management. 3 Hours.

Course recounts the history of travel, explores the future, and discusses the components of tourism from a global perspective. An overview of tourism planning at the global level will be presented. A variety of planning theories, procedures and tourism guidelines to meet the diverse needs of travelers, destination communities, hospitality organizations, public, non-governmental organizations, and the private sector will be introduced in this class. Prerequisite: HOSP 1603, (HOSP 2633 or HOSP 2643), Junior Standing and (Hospitality Management Minor (HOSP-M) students or IDST major with HOSP track). (Typically offered: Spring)

HOSP 4663. Hospitality Management Capstone. 3 Hours.
Integration of previous classroom, laboratory, and practical experiences through development of a comprehensive project. Additional focus on application of critical thinking, demonstration of leadership principles, interaction with industry professionals and development of an awareness of societal and ethical issues and their application to the hospitality industries. Prerequisite: Senior standing. Pre- or corequisite: HOSP 4603, HOSP 4602L, and HOSP 3653. (Typically offered: Spring)

## HOSP 4673. Destination Marketing \& Operations. 3 Hours.

This course is designed to provide students with a basic understanding of the tasks and processes involved in running a successful destination management organization (DMO). The course places heavy emphasis on destination marketing. Prerequisite: HOSP 1603 and junior standing. (Typically offered: Fall)

## HOSP 4693. Hospitality Management Internship. 3 Hours.

Supervised experience in an instructor approved work/learning situation relating to the hospitality industry in multiple aspects of a hospitality organization. Emphasis on application of knowledge and skills to actual job roles and responsibilities related to a future career in the hospitality industry. Requires employment in a hospitality setting for a minimum of 250 clock hours that must be completed in the semester of enrollment. Prerequisite: HOSP 3301, HOSP 2611, HOSP 2633, HOSP 2653, HOSP 3623, HOSP 3653, Junior standing, restricted to HOSP students, 500 hours of documented work-related hospitality industry experience and instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

## Human Development and Family Sciences Courses

## HDFS 1403. Life Span Development. 3 Hours.

A broad overview of the physical, psychological, and social development of the individual from conception until death. Emphasis is on individual development in a family context. Lecture 3 hours per week. (Typically offered: Fall and Spring)

## HDFS 1403H. Honors Life Span Development. 3 Hours.

A broad overview of the physical, psychological, and social development of the individual from conception until death. Emphasis is on individual development in a family context. Lecture 3 hours per week. Prerequisite: Honors standing. (Typically offered: Fall and Spring)
This course is equivalent to HDFS 1403.
HDFS 1423. Observation and Foundations for Teaching Young Children. 3 Hours.
Designed to acquaint students with the historical importance of early childhood education, the recognized standards for practice, the variety of program models, and career opportunities available. Emphasis will be placed on theories, evidencebased practice, ethics, diversity, and professional preparation for this knowledgebased, skill-driven field. Students will also obtain knowledge of state and federal laws pertaining to the care and education of young children. (Typically offered: Fall)
HDFS 2401L. Infant and Toddler Development Laboratory. 1 Hour.
Introduction to infant and toddler development. Focus on observation and applied experience with children 0-3 documenting cognitive, emotional, language, physical, and social development, and demonstrating developmentally appropriate practice.
Corequisite: HDFS 2403. Prerequisite: HDFS majors or BRKD majors or HDFS minors or CATEBS-FCSE majors or instructor consent. (Typically offered: Fall and Spring)
HDFS 2403. Infant and Toddler Development. 3 Hours.
Infant and toddler development from conception through toddlerhood with emphasis on physical, emotional, social, language, and cognitive domains. Theoretical and research-based information will be applied to developmentally appropriate practice. Historical and future perspectives will be explored as will the expanding opportunities for professional work with infants and toddlers. Observations in care centers will be assigned. Corequisite: HDFS 2401L. Prerequisite: HDFS majors or BRKD majors or HDFS minors or CATEBS-FCSE majors or by instructor consent. (Typically offered: Fall and Spring)

## HDFS 2413. Family Relations. 3 Hours.

Courtship, marriage, and parenthood in the United States, with attention to cultural and psychological factors which affect relations among family members. Lecture 3 hours per week. (Typically offered: Fall and Spring)

## HDFS 2413H. Honors Family Relations. 3 Hours.

Courtship, marriage, and parenthood in the United States, with attention to cultural and psychological factors which affect relations among family members. Lecture 3 hours per week. Prerequisite: Honors standing. (Typically offered: Fall and Spring) This course is equivalent to HDFS 2413.

## HDFS 2433. Child Development. 3 Hours.

Theory, research, and application in physical, cognitive, social, and emotional development of the child, studied in the biocultural context. Begins with prenatal development and continues through adolescence, with special emphasis on early and middle childhood. (Typically offered: Fall and Spring)

HDFS 2433H. Honors Child Development. 3 Hours.
Theory, research, and application in physical, cognitive, social, and emotional development of the child, studied in the biocultural context. Begins with prenatal development and continues through adolescence, with special emphasis on early and middle childhood. Prerequisite: Honors standing. (Typically offered: Fall and Spring)
This course is equivalent to HDFS 2433.

## HDFS 2463. Introduction to Leadership and Administration in the Helping

 Professions. 3 Hours.The class is a basic introduction of leadership and emotional intelligence as it relates to becoming a successful administrator in the helping professions-based careers. Emphasis will be on administrators' roles as leaders in organizations. Topics include facilities, budget, staff development, and policy manuals. Prerequisite: Human Environmental Science (HESCBS) majors, Human Development \& Family Science (HDFSBS) majors, Birth through Kindergarten (BRKDBS) majors, Human Development \& Family Science (HDFS-M) minors, or departmental consent. (Typically offered: Fall)

## HDFS 2471L. Child Guidance Laboratory. 1 Hour.

Introduction to the guidance system. Focus on discipline techniques that are positive and age/stage appropriate for children ages 3-8. Corequisite: HDFS 2473. Prerequisite: HDFS 2433. (Typically offered: Fall and Spring)

HDFS 2473. Child Guidance. 3 Hours.
Introduction to the guidance system. Focus on discipline techniques that are positive and age/stage appropriate for children ages 3-8. Lecture 3 hours per week plus 1 hour demonstration. Corequisite: HDFS 2471L. Prerequisite: HDFS 2433. (Typically offered: Fall and Spring)

## HDFS 2483. Family Financial Management. 3 Hours.

Economic considerations of the family in a rapidly changing society. Family finance and consumer problems are emphasized. Prerequisite: HDFS 2413 or HDFS 2413H. (Typically offered: Fall and Spring)

## HDFS 2493. Introduction to Cultural Competence. 3 Hours.

Basic introduction to definitions of intercultural competence, diversity, cultural values and beliefs, attitudes and verbal and non-verbal behavior, are examined to identify basic differences among individuals from diverse cultural backgrounds and across populations. (Typically offered: Fall, Spring and Summer)
HDFS 2603. Rural Families and Communities. 3 Hours.
Meaning of sociology and sociological concepts with reference to rural society, families and communities; interdependence of rural and urban population in ecological areas; institutions; social change and adjustment. (Typically offered: Fall and Spring)

HDFS 2603H. Honors Rural Families and Communities. 3 Hours.
Meaning of sociology and sociological concepts with reference to rural society, families and communities; interdependence of rural and urban population in ecological areas; institutions; social change and adjustment. Prerequisite: Honors standing. (Typically offered: Spring)
This course is equivalent to HDFS 2603.

HDFS 3333. Language and Literacy Pedagogy for Birth through Kindergarten Educators. 3 Hours.
This course combines theory on emergent language and literacy development with research-based pedagogy for birth through kindergarten classrooms. Topics include: language and literacy development and exceptionalities, English Language Learners, environmental influences, best practice pedagogy, identifying language and literacy delays, and intervention strategies. This course includes a service learning component. Prerequisite: HDFS 2433, HDFS 2403 and HDFS 2401L. (Typically offered: Fall)

## HDFS 3423. Adolescent Development. 3 Hours.

Physiological and psychological development of the older child and youth, from pre-adolescence to adulthood. Theories of adolescent development. Cross-
cultural studies. Peer group influences. Some attention to pathological behaviors. Prerequisite: HDFS 1403 or PSYC 2003. (Typically offered: Fall and Spring)

## HDFS 3423H. Honors Adolescent Development. 3 Hours.

Physiological and psychological development of the older child and youth, from pre-adolescence to adulthood. Theories of adolescent development. Crosscultural studies. Peer group influences. Some attention to pathological behaviors. Prerequisite: HDFS 1403 or PSYC 2003 and honors standing. (Typically offered: Spring Odd Years)
This course is equivalent to HDFS 3423.
HDFS 3443. Families in Crisis. 3 Hours.
An interdisciplinary perspective on internal and external crises faced by contemporary families, including substance abuse, natural disasters and other crisis events. Students will explore the family processes during such experiences and develop strategies for stress management, coping, and recovery. Lecture 3 hours per week. Prerequisite: HDFS 2413 or HDFS 2413H. (Typically offered: Fall)
HDFS 3443H. Honors Families in Crisis. 3 Hours.
An interdisciplinary perspective on internal and external crises faced by contemporary families, including substance abuse, natural disasters and other crisis events. Students will explore the family processes during such experiences and develop strategies for stress management, coping, and recovery. Lecture 3 hours per week. Prerequisite: Honors standing and HDFS 2413 or HDFS 2413H. (Typically offered: Fall)
This course is equivalent to HDFS 3443.
HDFS 3453. Parenting and Family Dynamics. 3 Hours.
Focus is on influence of parenting and family dynamics on individual development, especially factors in family life which contribute to normal psychological development. Topics include family values, the psychology of sex and pregnancy, the transition to parenthood, childbearing techniques, family influences on cognitive and social development, and changes in family relationships during the life cycle. Prerequisite: (HDFS majors, HDFS minors, BRKD majors, CATEBS-FCSE majors, or IDST majors with HDFS track) and (HDFS 1403 or PSYC 2003). (Typically offered: Fall and Spring)

## HDFS 3463. The Hospitalized Child: Child Life Programming. 3 Hours.

Introduces child life programming in health care settings. Topics include: roles and expectations of a Child Life Specialist, importance of play, coping techniques, family advocacy, administration and professionalism. Lecture 3 hours per week.
Prerequisite: HDFS 2433 and (HDFS or BRKD majors, HDFS or CDSV minors, or IDST major with a CDSV or HDFS track). (Typically offered: Fall and Spring)

HDFS 3481. Pre-Internship in Human Development and Family Sciences. 1 Hour.
This course prepares students for their internship experience (HDFS 4483) in Human Development and Family Sciences. Topics covered include professional and ethical behavior when working with people, families and communities. The course will also cover professional and career development topics. By the end of the course, students are expected to have secured an internship position suitable for HDFS 4483. Students should enroll in this course no earlier than the semester before they anticipate enrolling in HDFS 4483. Prerequisite: Junior standing and HDFS majors only. (Typically offered: Fall and Spring)

HDFS 4212L. Math and Science for Young Children Lab. 2 Hours.
Students will plan curriculum for young children ages 0-5 in the areas of math and science. Emphasis will be placed on theories of learning, developmentally appropriate practice (DAP), professionalism, philosophy, and ethical conduct. Students will interact with young children and facilitate learning and assessment experiences in a program for young children. Corequisite: HDFS 4213. (Typically offered: Fall)

## HDFS 4213. Math and Science for Young Children. 3 Hours.

Students will plan curriculum for young children ages 0-5 in the areas of math and science. Emphasis will be placed on theories of learning, developmentally appropriate practice (DAP), professionalism, philosophy, and ethical conduct. Students will design lesson plans for young children and will learn about effective implementation of curriculum. Corequisite: HDFS 4212L. Prerequisite: HDFS 2473 and HDFS 2471L. (Typically offered: Fall)

## HDFS 4222L. Creative and Social Experiences for Young Children Lab. 2

 Hours.Students will plan curriculum for young children ages 0-5 in the areas of the arts and social emotional learning. Emphasis will be placed on theories of learning, developmentally appropriate practice (DAP), professionalism, philosophy, and ethical conduct. Students will interact with young children and facilitate learning and assessment experiences in a program for young children. Corequisite: HDFS 4223. Prerequisite: HDFS 2473 and HDFS 2471L. (Typically offered: Spring)
HDFS 4223. Creative and Social Experience for Young Children. 3 Hours. Students will plan curriculum for young children ages 0-5 in the areas of the arts and social emotional learning. Emphasis will be placed on theories of learning, developmentally appropriate practice (DAP), professionalism, philosophy, and ethical conduct. Students will design lesson plans for young children and will learn about effective implementation of curriculum. Corequisite: HDFS 4222L. Prerequisite: HDFS 2473 and HDFS 2471L. (Typically offered: Spring)
HDFS 4233. Developmental Assessment in Early Childhood. 3 Hours. Students will learn about developmentally appropriate observation, assessment, and documentation techniques and how to use these in high quality early childhood classrooms. Advantages and limitations of various assessment techniques, considerations used when interpreting findings, and the and making referrals will be discussed. Additional emphasis will be on anti-biased and culturally competent assessment, giving students methods to recognize and support learning and development in all young children. (Typically offered: Fall)

## HDFS 4313. Building Family and Community Relationships. 3 Hours.

This course will help students interested in early childhood to value the role parents play in schools and the role schools play in a community. Various models of parent involvement will be explored. Students will plan a school-community collaborative which values diverse cultures. Prerequisite: (HDFS 2413 or HDFS 2603) and (HDFS or BRKD majors, HDFS or CDSV minors, or IDST major with CDSV track or IDST major with HDFS track). (Typically offered: Spring)

HDFS 4332. Curriculum and Assessment: Birth to Three Years. 2 Hours.
The course will introduce students to curriculum planning and assessment in programs serving children from birth to three years of age. Emphasis will be on responsive relationships and curriculum focused on routines and activities. Corequisite: HDFS 4332L. Prerequisite: HDFS 2403 and HDFS 2401L. (Typically offered: Spring)

HDFS 4332L. Curriculum and Assessment: Birth to Three Years Laboratory. 2 Hours.
Laboratory. Corequisite: HDFS 4332. Prerequisite: HDFS 2403 and HDFS 2401L. (Typically offered: Spring)
HDFS 4342. Curriculum and Assessment: Three Years through Kindergarten. 2 Hours.
Students will plan curriculum and assessment for children three years of age through kindergarten. Emphasis will be on professionalism, philosophy and a code of ethics. Students will interact with young children and facilitate learning and assessment experiences in a program for young children. Corequisite: HDFS 4342L. Prerequisite: HDFS 2473 and HDFS 2471L. (Typically offered: Fall)
HDFS 4342L. Curriculum and Assessment: Three Years through Kindergarten. 2 Hours.
Laboratory. Corequisite: HDFS 4342. (Typically offered: Fall)
HDFS 4353. Play as Development in Childhood. 3 Hours.
This course will examine the contribution of play to cognitive, social, and emotional development of children. It will provide an overview of play theories and practices in indoor and outdoor settings, with an emphasis on nature-based learning and diversity and inclusion. Prerequisite: HDFS 2433, junior standing and HDFS, BRKD, or IDSTBA major or HDFS or CDSV minor. (Typically offered: Fall and Spring)

## HDFS 4363. Play as Development in Adulthood. 3 Hours.

This course will examine play as it pertains to development throughout life with a particular focus on adulthood. The modes of adult play will be examined, along with the benefits of play across adulthood. Emphasis will be on play, not as opposition to work, but as a part of a full life. Prerequisite: HDFS 1403. (Typically offered: Fall and Spring)

HDFS 4373. Internship: Infant, Toddler, and Preschool Programs. 3 Hours.
This course provides the student with interactive and observational experiences with young children in community-based early childhood programs. Some on-campus meetings will be required. Prerequisite: HDFS 4213, HDFS 4212L, HDFS 4223, and HDFS 4222L. (Typically offered: Spring)

## HDFS 4383. Internship: Kindergarten Programs. 3 Hours.

This course provides the student with interactive and observational experiences with young children in community-based kindergarten programs. Some on-campus meetings will be required. Prerequisite: HDFS 4213, HDFS 4212L, HDFS 4223, and HDFS 4222L. (Typically offered: Spring)
HDFS 4413. Infancy: Brain, Learning and Social Cognition. 3 Hours.
Investigation into how brain mechanisms interact with experience to provide the basis for learning and social cognition. Topics include face perception, motor cognition, imitation, joint attention and shared experience, empathy and altruism, theory of mind, social and moral cognition, language, memory, number, geometry and navigation, object representation, and executive function. Prerequisite: HDFS 2433 or PSYC 3093. (Typically offered: Spring)
HDFS 4413H. Honors Infancy: Brain, Learning and Social Cognition. 3 Hours. Investigation into how brain mechanisms interact with experience to provide the basis for learning and social cognition. Topics include face perception, motor cognition, imitation, joint attention and shared experience, empathy and altruism, theory of mind, social and moral cognition, language, memory, number, geometry and navigation, object representation, and executive function. Prerequisite: Honors standing and HDFS 2433 or PSYC 3093. (Typically offered: Spring) This course is equivalent to HDFS 4413.

## HDFS 4423. Adult Development. 3 Hours.

This course examines the social, psychological, and biological development that occurs throughout adulthood, with an emphasis on middle and later adulthood. Taking a life course perspective, this course particularly focuses on life course trajectories and variabilities across cultural contexts. Prerequisite: HDFS 1403 and Junior Standing. (Typically offered: Fall and Spring)

## HDFS 4443. Gerontology. 3 Hours.

Physiological and psychological development of the aging individual, extended family relations, service networks for the elderly, and retirement activities. Some attention to housing and care needs of persons in advanced years. Lecture 3 hours per week. Seminar. Prerequisite: HDFS 1403 (or HDFS 2413 or PSYC 2003 or SCWK 2133) and junior standing. (Typically offered: Spring)

## HDFS 4473. Multicultural Families. 3 Hours.

The course provides students with opportunities to gain awareness of their own cultures and families, reflect on families from a diverse array of cultures, and develop critical thinking skills needed to effectively engage with people and families from cultures different than their own. Prerequisite: HDFS 2493 and Junior or Senior Standing. (Typically offered: Fall)
HDFS 4483. Internship in Human Development and Family Studies. 3 Hours.
The internship experience provides practical experience for students in settings that are designed to serve the needs of individuals and/or families across the life span. Students must work a minimum of 150 hours in the setting. May be repeated for up to 6 hours of degree credit. Prerequisite: Grade of B or higher in HDFS 3481, junior standing, and instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

## HDFS 4493. Public Policy Advocacy for Children and Families. 3 Hours.

Public policy advocacy as related to children and family issues. Strategies for advocacy will be emphasized. Lecture three hours per week. Prerequisite: Junior standing and (HDFS majors or IDST majors with HDFS track). (Typically offered: Fall)
HDFS 4493H. Honors Public Policy Advocacy for Children and Families. 3 Hours.
Public policy advocacy as related to children and family issues. Strategies for advocacy will be emphasized. Lecture three hours per week. Prerequisite: Honors and Junior standing, and (HDFS major or IDST major with HDFS track). (Typically offered: Fall)
This course is equivalent to HDFS 4493.

## HDFS 4603. Environmental Sociology. 3 Hours.

The course provides a social perspective on environmental issues. It examines the linkage between society, ecological systems and the physical environment. It provides conceptual framework(s) for analyzing environmental issues, considers the role of humans in environmental issues, and enhances understanding the complexity of the relationship between societal organization and environmental change. (Typically offered: Irregular)
This course is cross-listed with SOCI 4603, SUST 4603.
HDFS 4763. Research in HDFS: Methodological Approaches. 3 Hours. This class introduces the methodology of HDFS and other social sciences in the social world. It covers research design, sampling, measurement, and other topics that underlie the social science conclusions presented to you in other classes. The class begins with an introduction to the goals of social science research, then focuses on the understanding of the 3 validities with which social scientists, and consumer of social science, must concern themselves: Internal, Measurement, and External. Each of these three validities is used as the focus of a course section. The class concludes with a fourth section that integrates these topics and other social science methods. It is recommended that HDFS students complete Rural Families and Communities (HDFS 2603) prior to enrolling in this course. Prerequisite: HDFS major and Junior Standing. (Typically offered: Fall)

## HDFS 4773. Research in HDFS: Statistical Approaches. 3 Hours.

This course is an introduction to analytical approaches to research in human development and family sciences and will examine the principles and practices underlying the development of knowledge in the field. Emphases in this course will be on conducting and evaluating data analyses relevant to human environmental sciences majors. Students will become critical consumers of data and develop basic skills to analyze and interpret their own data. Prerequisite: HDFS 4763, STAT 2303, and HDFS major. (Typically offered: Spring)

## Human Environmental Sciences Courses

HESC 255V. Special Topics. 1-6 Hour.
Topics not covered in other courses or a more intensive study of specific topics in the specializations of human environmental sciences. (Typically offered: Irregular) May be repeated for degree credit.

HESC 400V. Special Problems. 1-6 Hour.
Special problems. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

## HESC 455V. Special Topics. 1-6 Hour.

Topics not covered in other courses, a focused study of specific topics in the students' areas of concentration. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HESC 455VH. Honors Special Topics. 1-6 Hour.
Topics not covered in other courses, a focused study of specific topics in the students' areas of concentration. Prerequisite: Honors standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
This course is equivalent to HESC 455V.

## Nutrition Courses

NUTR 1201. Introduction to the Dietetic Profession. 1 Hour.
Introduction to profession of dietetics and nutrition including history, scope and future of professionals with emphasis on academic preparation, internships, acquisition of professional credentials, career laddering and career opportunities. Guest speakers will supplement lectures and assignments. Prerequisite: HNAD or FNAH majors only or by department consent. (Typically offered: Fall and Spring)

## NUTR 1213. Fundamentals of Nutrition. 3 Hours.

The functions of food, body processes, optimum diets in relation to health and physical fitness. (Typically offered: Fall and Spring)

## NUTR 1213H. Honors Fundamentals of Nutrition. 3 Hours.

The functions of food, body processes, optimum diets in relation to health and physical fitness. (Typically offered: Fall and Spring)
This course is equivalent to NUTR 1213.

## NUTR 2111L. Principles of Foods Laboratory. 1 Hour.

Laboratory exercises and practice applicable of Principles of Foods. Lab 3 hours.
Corequisite: NUTR 2113. (Typically offered: Fall and Spring)

## NUTR 2113. Principles of Foods. 3 Hours.

Physical and chemical characteristics of foods, organized by food science and nutrition, protein foods, phytochemicals, complex and refined carbohydrates, and fats. Emphasis on food preparation and storage methods and effect on foods. Investigation and practice of food preparation basics, cooking and baking techniques, knife skills, food safety, and sensory evaluation of food. Corequisite: NUTR 2111L. Prerequisite: NUTR 1213, a C or higher in HOSP 2611, (CHEM 1073, or CHEM 1103, or CHEM 1203), one of the following programs, minors or concentrations: (HNADBS, FNAHBS, HESCBS, NUTR-M, or CATEBS-FCSE) and students must also have a current ServSafe Manager's Certification. (Typically offered: Fall and Spring)

NUTR 2203. Sports Nutrition. 3 Hours.
The integration of concepts from nutrition and exercise physiology into an applied multidisciplinary study of how food, beverages and dietary supplements influence physical performance. Prerequisite: NUTR 1213. (Typically offered: Summer)

## NUTR 3101L. Culinary Nutrition Lab. 1 Hour.

Students will explore ways to apply evidence based nutrition research to culinary application. It addresses the fundamental culinary skills and knowledge required to prepare meals that impact the nutritional and sensory appeal of food. Corequisite: NUTR 3103. Prerequisite: NUTR 2113 and NUTR 2111L. (Typically offered: Fall)

NUTR 3101M. Honors Culinary Nutrition Lab. 1 Hour.
Students will explore ways to apply evidence based nutrition research to culinary application. It addresses the fundamental culinary skills and knowledge required to prepare meals that impact the nutritional and sensory appeal of food. Corequisite:
NUTR 3103H. Prerequisite: NUTR 2113, NUTR 2111L and honors standing. (Typically offered: Fall)
This course is equivalent to NUTR 3101L.

## NUTR 3103. Culinary Nutrition. 3 Hours.

This course is grounded in a food first approach to health and wellness with an emphasis on disease prevention. Students will study the physical and chemical characteristics of foods that increase nutritional value and will include exploration of the culinary nutrition modification process and application of these concepts to planning nutritionally balanced meals. Corequisite: NUTR 3101L. Prerequisite: NUTR 2113 and NUTR 2111L. (Typically offered: Fall)

## NUTR 3103H. Honors Culinary Nutrition. 3 Hours.

This course is grounded in a food first approach to health and wellness with an emphasis on disease prevention. Students will study the physical and chemical characteristics of foods that increase nutritional value and will include exploration of the culinary nutrition modification process and application of these concepts to planning nutritionally balanced meals. Corequisite: NUTR 3101M. Prerequisite: NUTR 2113, NUTR 2111L and honors standing. (Typically offered: Fall) This course is equivalent to NUTR 3103.

## NUTR 3203. Human Nutrition. 3 Hours.

Fundamental human nutrition; nutritive value of foods and general functions of nutrients based on concepts derived from inorganic and organic chemistry. Examples relating nutrition to disease used as illustrations to deepen understanding of normal nutrition. Lecture 3 hours per week. Corequisite: CHEM 2613 and CHEM 2611L or CHEM 3603 and CHEM 3601L. Prerequisite: NUTR 1213. (Typically offered: Fall)

## NUTR 3213. Nutrition Education and Counseling. 3 Hours.

Introduction to development of communication skills related to educational theory and techniques, development of educational materials, interpersonal communication skills, group dynamics, public speaking, and interviewing techniques. Includes discussion of counseling theory and methods, and how education and counseling are intertwined for nutrition professionals. Includes development of skills in nutrition counseling. Prerequisite: NUTR 1213, HNAD or FNAH majors only, and Junior or Senior standing. (Typically offered: Fall)

NUTR 3213H. Honors Nutrition Education and Counseling. 3 Hours.
Introduction to development of communication skills related to educational theory and techniques, development of educational materials, interpersonal communication skills, group dynamics, public speaking, and interviewing techniques. Includes discussion of counseling theory and methods, and how education and counseling are intertwined for nutrition professionals. Includes development of skills in nutrition counseling. Prerequisite: NUTR 1213, HNAD or FNAH majors only, Junior or Senior standing, and honors standing. (Typically offered: Fall)
This course is equivalent to NUTR 3213.

## NUTR 3303. Nutrition Assessment. 3 Hours

Principles of nutritional assessment and methodology including anthropometric, biochemical, clinical, and dietary evaluation. Emphasis placed on Nutrition Focused Physical Assessment, the interpretation of indices for all age groups in health and disease for both individuals and groups, and the application of nutrition assessment data in the nutrition care process. Prerequisite: NUTR 3203, junior standing and HNAD/FNAH majors only. (Typically offered: Spring)

## NUTR 3603. Quantity Foods. 3 Hours.

This course focuses on menu planning for a variety of food service organizations, with consideration of age, special needs, diet type, cultural and ethical parameters. Students will design flavorful and appealing menus that meet current nutrition recommendations, guidelines and budgetary constraints. They will learn recipe standardization, quantity production, and overall quality control. Prerequisite: NUTR 1213, HOSP 2603, junior standing and Human Nutrition and Dietetics Bachelor of Science (HNADBS) or Food, Nutrition and Health Bachelor of Science (FNAHBS) majors only. (Typically offered: Spring)

NUTR 4001. Nutrition Seminar. 1 Hour.
Presentation and discussion of selected nutrition topics of current interest. Prerequisite: Senior standing and HNAD or FNAH majors only. (Typically offered: Spring) May be repeated for up to 2 hours of degree credit.

NUTR 4103. Research Methods in Nutrition. 3 Hours.
This course will cover applications of experimental methods for investigations in nutrition research and cookery. Pre- or Corequisite: STAT 2303. Prerequisite: Major in either Human Nutrition and Dietetics (HNAD), or Food, Nutrition and Health (FNAH) and senior standing only. (Typically offered: Spring)

## NUTR 4213. Advanced Nutrition I. 3 Hours.

This course will cover nutritional, physiological, and biochemical aspects of carbohydrate, protein, and lipid metabolism in humans and their implications in health and disease. Prerequisite: CHEM 3813 and NUTR 3203. (Typically offered: Fall)

NUTR 4223. Life Cycle Nutrition. 3 Hours.
Study of normal nutrition emphasizing quantitative needs for nutrients as functions of biologic processes that vary during stages of the life cycle. Attention is given to preconception, pregnancy, childhood and older adults. Prerequisite: (HNAD majors and NUTR 3203) or (FNAH majors and junior standing). (Typically offered: Fall)

NUTR 4233. Advanced Nutrition II. 3 Hours.
This course will cover nutritional, physiological, and biochemical aspects of vitamins and minerals in humans, their functions and roles in metabolism, and their implications in health and disease. Prerequisite: NUTR 4213. (Typically offered: Spring)
NUTR 4243. Community Nutrition. 3 Hours.
Identifying, assessing, and developing solutions for nutritional problems encountered at the local, state, federal, and international levels. Lecture 3 hours per week. Prerequisite: NUTR 1213, junior standing, and Food, Nutrition and Health Bachelor of Science in Human Environmental Science (FNAHBS) or Human Nutrition and Dietetic Bachelor of Science in Human Environmental Science (HNADBS) majors or Nutrition minors only. (Typically offered: Spring)

## NUTR 4263. Medical Nutrition Therapy I. 3 Hours.

Principles of medical nutrition therapy with emphasis on the Nutrition Care Process, and the pathophysiology and current standards of practice for diseases and disorders. Pre- or corequisite: NUTR 3213 and NUTR 4213. Prerequisite:
BIOL 2213, BIOL 2211L, CHEM 3813 and NUTR 3303. (Typically offered: Fall)
NUTR 4273. Medical Nutrition Therapy II. 3 Hours.
Principles of medical nutrition therapy with emphasis on the Nutrition Care Process, and the pathophysiology and current standards of practice for diseases and disorders. Lecture 3 hours per week. Prerequisite: NUTR 4263. (Typically offered: Spring)

NUTR 4303. Cultural Perspectives on Foods. 3 Hours.
Cultural competence is growing in importance as our population becomes more culturally diverse. This course covers cuisine and culture of various regions for the purpose of promoting respect and understanding for cultural diversity. Students will learn the history of foods, ingredients, flavor profiles, religious based food practices, etiquette, and customs. Corequisite: Junior or senior standing, and (Human Nutrition and Dietetics majors (HNADBS) or Food, Nutrition and Health majors (FNAHBS) or Hospitality Management (HOSPBS) majors). (Typically offered: Fall)

## NUTR 4401L. Recipe Modification Lab. 1 Hour.

Students will use existing research to identify foods with preventative and functional properties and apply that information to develop recipes for improved nutritional quality and disease management. They will gather data to modify and refine the products and create an educational tool to promote their products. Corequisite: NUTR 4403. (Typically offered: Spring)
NUTR 4403. Recipe Modification. 3 Hours.
Students will use existing research to identify foods with preventative and functional properties and apply that information to develop recipes for improved nutritional quality and disease management. They will gather data to modify and refine the product and create an educational tool to promote their product. Corequisite: NUTR 4401L. Prerequisite: NUTR 2113 and NUTR 2111L. (Typically offered: Spring)

## Apparel Merchandising and Product Development (AMPD)

Donna L. Graham<br>Director<br>118 Home Economics Building<br>479-575-4305

The Apparel Merchandising and Product Development (AMPD) program opens the door to careers in the fashion industry. Buyer, product development specialist, fashion coordinator, sales consultant, visual display artist, and quality assurance technician are only a few of the possibilities. Classes in business, retailing, apparel production, science, social science, and the liberal arts give students a basic knowledge about the textile and apparel industries. By selecting from a variety of minors, students can tailor this program to meet their goals. Program strengths include guest speakers who provide insight into today's careers, tours of major fashion centers, and internships, which provide valuable career experience.

## Requirements for a Major in Apparel Merchandising and Product Development

State minimum core (p. 81) and discipline specific general education requirements:
(Course work that meets state minimum core requirements is in bold.)

## University Requirements <br> UNIV 1001 University Perspectives

Communication
ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013)

ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023)

COMM, ENGL, JOUR or World Language
COMM 1313 Public Speaking (ACTS Equivalency = SPCH 1003)

AMPD Requirements 52
AMPD 1013 Introduction to Clothing Concepts
AMPD 1023 Introduction to Apparel Production
AMPD 2013 Fashion, Buying and Promotion in a Global Market
AMPD 2033 Computer Based Methods for Apparel
AMPD 2053 Introduction to Textile Science
AMPD 2063 Quality Assessment of Apparel
AMPD 2073 Flat Pattern Drafting
AMPD 3033 Merchandising Math for the Apparel Industry
AMPD 3043 Fashion Brand Management
AMPD 3053 Computer Aided Textile Design
AMPD 3063 Digital Apparel Production
AMPD 3071 Apparel Merchandising and Product Development Pre-Internship
AMPD 4023 Merchandising Application for the Apparel Industry
AMPD 4053 Historic and Contemporary Apparel
AMPD 4063 Advanced Apparel Production
AMPD 4083 Apparel Merchandising and Product Development Internship
AMPD 4093 Apparel Merchandise Planning and Inventory Control

Select one pre-study and study tour from the following:
AMPD 4901 AMPD International Pre-Study Tour or AMPD 49:AMPD New York City Pre-Study Tour
or AMPD 49:AMPD Virtual Las Vegas Pre-Study Tour or AMPD 49،AMPD Las Vegas Pre-Study Tour AMPD 4912 AMPD International Study Tour or AMPD 4958MPD New York City Study Tour or AMPD 4968MPD Virtual Las Vegas Study Tour or AMPD 497*MMPD Las Vegas Study Tour

```
Computers
ASTM 2903 Agricultural and Human Environmental Sciences Applications of Microcomputers (or equivalent course)
or ISYS 112Business Application Knowledge - Computer Competency
ACOM 4243 Graphic Design in AFLS
General Electives \({ }^{2,3} 14\)
```

Suggested Electives:
AMPD 4011 History of Apparel Through Film to 1900
AMPD 4103 Evolution of Fashion and Society Through Television Media
AMPD 4111 History of Apparel Through Film from 1900 to Present

AMPD 4073 Fashion Show Theory and Production
MKTG 3433 Introduction to Marketing (Required for Business Minor - additional pre-requisite courses required)
Any 3000-4000 level MKTG (additional pre-requisites required)

## Total Hours

1 Students may substitute AGEC 1103 and AGEC 2103 or ECON 2013 and ECON 2023 for ECON 2143.
2 Elective hours will vary based on exemptions.
3 A minimum of 40 hours must be completed at the 3000-4000 level.

## Apparel Merchandise and Product Development B.S.H.E.S. <br> Nine-Semester Degree Program

Because the Apparel Merchandise and Product Development program requires a summer tour and an internship, it doesn't qualify for the EightSemester Degree Program. Go to the Eight-Semester Degree Policy (p. 67) for university requirements of the program. The program plan below, though, gives a path for completing required courses in a four-year period.

| First Year | Fall | Units <br> Spring |
| :--- | ---: | ---: |
| Summer |  |  |

| US History or Government State | 3 |  |

| 3.4) |  |  |
| General Electives |  |  |
| Year Total: |  |  |

## Total Units in Sequence:

${ }^{1}$ The Fine Arts Elective courses which satisfy General Education Outcome 3.1 include:

| WLLC 398V | Special Studies (must choose "To Rome with <br> Love" special topic for 3 hours) |
| :--- | :--- |
| ITAL 1003 | Elementary Italian I |
| ITAL 1013 | Elementary Italian II |
| MKTG 3433 | Introduction to Marketing |
| FINN 2043 | Principles of Finance |
| FINN 3003 | Personal Financial Management |
| BUSI 330V | Walton College Study Abroad (Must choose "The <br> Business of Art in Rome" special topic for 3 hours) |
| INST 2813 | Introduction to International Relations and Global <br> Studies |

## Total Hours

${ }^{1}$ Must be completed at UA-Fayetteville before study abroad at the Rome Center
${ }^{2}$ For students who have completed AMPD 2073 Flat Pattern Drafting or AMPD 3063 Digital Apparel Production or a UA Rome Center elective course.
${ }^{3}$ Course taken at the Rome Center
ARCH 1003, ARHS 1003, COMM 1003, DANC 1003, LARC 1003, MLIT 1003, MLIT 1013, MLIT 1003H, MLIT 1333, THTR 1003, THTR 1013 or THTR 1013H.
2 Or equivalent course for ISYS 1123.
${ }^{3}$ The Humanities Elective courses which satisfy General Education Outcome 3.2 include: AAST 2023, ANTH 1033, ARCH 1013, CLST 1003, CLST 1003H, CLST 1013, COMM 1233, DANC 1003, ENGL 1213, GNST 2003, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2003, HIST 2013, HUMN 1124H, HUMN 2213, LALS 2013, MRST 2013, MUSY 2003, MUSY 2003H, PHIL 2003, PHIL 2003C, PHIL 2003H, PHIL 2103, PHIL 2103C, PHIL 2303, THTR 1003, THTR 1013, THTR 1013H, WLIT 1113, WLIT 1123, or intermediate-level world language (usually 2003-level).
${ }^{4}$ See student degree audit for approved course list.
${ }^{5}$ See faculty/academic advisor for recommended AMPD-related electives.

## Minor in AMPD Global Experience

Apparel Merchandising and Product Development students will have the opportunity to broaden their international knowledge of the apparel industry by participating in a semester long study abroad program. This program will be offered in the fall semesters at the university's Rome Center in Rome, Italy. Apparel Merchandising and Product Development curriculum will provide an on-site study of apparel courses focusing on trend forecasting, styling, fashion illustration, fashion design and pattern development (draping) or elective. The 18-credit hour program will complete a minor in AMPD Global Experiences. Classes include:

COMM 2323 Interpersonal Communication ${ }^{1}$

## Rome Center Elective ${ }^{3}$

Recommend selecting 3 hours from the following list:

## Courses

## AMPD 1013. Introduction to Clothing Concepts. 3 Hours.

Origin of dress, the evolution of fashion as an economic power, the sociological and psychological aspects of clothing in various cultures, aesthetics of dress, selection and consumption of clothing. Lecture 3 hours per week. (Typically offered: Fall and Spring)

## AMPD 1013H. Honors Introduction to Clothing Concepts. 3 Hours.

Origin of dress, the evolution of fashion as an economic power, the sociological and psychological aspects of clothing in various cultures, aesthetics of dress, selection and consumption of clothing. Lecture 3 hours per week. Prerequisite: Honors standing. (Typically offered: Fall and Spring)
This course is equivalent to AMPD 1013.
AMPD 1023. Introduction to Apparel Production. 3 Hours.
Course focuses on basic principles of apparel production and analysis of garment components of mass produced apparel. Students utilize computer generated designs in the production process. Laboratory 6 hours per week. Prerequisite: HESC or AMPD students only. (Typically offered: Fall and Spring)

AMPD 2013. Fashion, Buying and Promotion in a Global Market. 3 Hours. Fashion components, marketing theories and practices as they specifically relate to apparel, home goods, and other design driven products in the global market. Focus on principles and techniques on how fashion marketers develop and apply marketing strategies that meet consumer needs at a profit. International buying and promotional aspects of the apparel industry are emphasized. Lecture 3 hours per week. Prerequisite: AMPD major and AMPD 1013. (Typically offered: Fall and Spring)

[^3]
## AMPD 2033. Computer Based Methods for Apparel. 3 Hours.

This course is designed to give students basic experience with CAD (computer aided design) apparel industry software in a computer laboratory environment. Prerequisite: AMPD majors only, AMPD 1013, AMPD 1023 and ASTM 2903 or ISYS 1123 or equivalent. (Typically offered: Fall and Spring)

## AMPD 2053. Introduction to Textile Science. 3 Hours.

Textile fibers and fabrics, their structure, properties, manufacture, wearing qualities and methods of laundering, finishing, and dyeing. Artistic and economic selection of materials for clothing and household furnishings. Lecture 3 hours per week. Prerequisite: HESC, AMPD or FCSE students only. (Typically offered: Fall and Spring)

## AMPD 2063. Quality Assessment of Apparel. 3 Hours.

Study of apparel from the perspective of structure, aesthetics, cost and expected performance of the finished product. Lecture 2 hours per week, lab 2 hours per week. Prerequisite: AMPD 1023 and AMPD 2053. (Typically offered: Fall and Spring)

## AMPD 2073. Flat Pattern Drafting. 3 Hours.

A study of product development and production through flat pattern manipulation and the related vocabulary necessary to communicate professionally within the industry. Pre- or Corequisite: AMPD 2063. (Typically offered: Fall and Spring)

## AMPD 3033. Merchandising Math for the Apparel Industry. 3 Hours.

Exploration of activities associated with the procurement of fashion apparel. A fashion analysis is directed toward apparel demands and the creation of a fashion statement by the use of specific quantitative skills. Course follows fashion item from the designer to the store. Lecture 3 hours per week. Prerequisite: MATH 1203 or three credit hours of STAT and AMPD 2013. (Typically offered: Fall and Spring)
AMPD 3043. Fashion Brand Management. 3 Hours.
This course focuses on the fundamental elements of brand, the concept of brand equity, brand relationships with consumers, and the implications of technologies on the branding process in the fashion industry. The course topics include branding basics, the concept of brand equity, brand image, brand positioning, brand communications, the role of emotional and sensory experiences in fashion branding, luxury fashion brands, sustainable fashion branding management, and technology driven branding. Prerequisite: AMPD 2013. (Typically offered: Fall and Spring)

## AMPD 3053. Computer Aided Textile Design. 3 Hours.

This course is designed to give students advanced skills in textile design using industry based computer aided design (CAD) software. Prerequisite: AMPD 2033 and AMPD 2053 or instructor consent. (Typically offered: Fall and Spring)

AMPD 3063. Digital Apparel Production. 3 Hours.
Use of industry specific computer aided software to perform pattern making, technical package, marketing, and other cross-functional team communication materials. Pre- or Corequisite: AMPD 2073, AMPD 2033, and AMPD 2063. (Typically offered: Fall and Spring)
AMPD 3071. Apparel Merchandising and Product Development Pre-Internship. 1 Hour.
A study of job descriptions, responsibilities at the management level, structural operations, work procedures, job performance evaluations, job application, the resume, and portfolio development in preparation for AMPD 4083, AMPD Internship. Lecture 1 hour per week. Prerequisite: AMPD majors only. (Typically offered: Spring)

## AMPD 3203. Fashion Styling - UARC. 3 Hours.

This course exposes students to the essential skills necessary for success in the field of fashion styling. Future stylists will learn the criteria to produce striking images for all visual media including entertainment, music, print and advertising. In addition, they will gain an understanding of the interdisciplinary collaborative nature within the creative process while working with directors, photographers and production crew. This course is only offered to AMPD students. This course will be offered by the University of Arkansas Rome Center, Italy. Prerequisite: AMPD majors only. (Typically offered: Fall)

AMPD 3213. Trend Forecasting - UARC. 3 Hours.
Forecasting is one of the most rapidly growing research areas in fashion as well as in many other industry fields. Anticipating consumer demand is crucial and the ability to trend forecast is a skill required for product development. This course will enable students to develop trend forecasts by analyzing the global environment they live in using varied methodologies. The students will learn how to navigate between existing predictions and translate them for product development. This course is only offered to AMPD students. This course will be offered by the University of Arkansas Rome Center, Italy. Prerequisite: AMPD majors only. (Typically offered: Fall)

## AMPD 4011. History of Apparel Through Film to 1900. 1 Hour.

This course uses historic costume films to trace the evolution of clothing from ancient Egypt to the Twentieth Century. Emphasis is placed on societal aspects such as politics, religion, economy, technology, education, sports, class structure, and gender roles, and how they affect and change dress. Web-based course. (Typically offered: Fall and Spring)
AMPD 4023. Merchandising Application for the Apparel Industry. 3 Hours.
Application of merchandising theory, principles and practices in a capstone class. An in depth study of innovative apparel business concepts as applied to manufacturers and retailers of apparel including apparel classification, seasonal cycles, stock emphasis, assortment strategies, target customers, and apparel trends. Includes an overview of marketing communication including advertising, personal selling, and sales promotion. Prerequisite: AMPD 3033 and AMPD 3043 and completed 75 credit hours or instructor consent. (Typically offered: Fall and Spring)
AMPD 4053. Historic and Contemporary Apparel. 3 Hours.
This course traces the evolution of clothing from ancient times to the twentieth century with emphasis upon Western civilization and includes the study of contemporary fashion as a social force including the origin, scope, theory, and history of the fashion business, the materials of fashion, the fashion producers, auxiliary fashion enterprises, designers, fashion leaders, and leading market. Cultural and economic factors affecting dress, adornment and customs associated dress will be stressed. The Lecture 3 hours per week. Prerequisite: Completed 75 credit hours or instructor consent. (Typically offered: Fall and Spring)
AMPD 4063. Advanced Apparel Production. 3 Hours.
An advanced study of product development incorporating technology used in the industry for a career in fashion merchandising and/or product development in a computer laboratory environment. Laboratory 6 hours per week. Prerequisite: AMPD 2063 and AMPD 2073. (Typically offered: Fall and Spring)
AMPD 4063H. Honors Advanced Apparel Production. 3 Hours.
An advanced study of product development incorporating technology used in the industry for a career in fashion merchandising and/or product development in a computer laboratory environment. Laboratory 6 hours per week. Prerequisite: AMPD 2033, AMPD 2063 and AMPD 2073 and honors candidacy. (Typically offered: Fall and Spring)
This course is equivalent to AMPD 4063.
AMPD 4073. Fashion Show Theory and Production. 3 Hours.
A study of the fashion show including the history, purpose, future of, and elements necessary to produce a successful show. A study of fashion show production through experiential project-based learning and committee membership planning and implementing a fashion show. (Typically offered: Spring)
AMPD 4083. Apparel Merchandising and Product Development Internship. 3 Hours.
A practical experience in a retail store or in a work situation related to the apparel industry to gain insight into the field of apparel merchandising and operations. Prerequisite: Junior standing and 2.50 cum GPA and AMPD 2013, AMPD 2033, AMPD 2063, AMPD 2073, AMPD 3033, AMPD 3043, AMPD 3071, COMM 1313 and instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

AMPD 4093. Apparel Merchandise Planning and Inventory Control. 3 Hours. Describes today's challenges for both apparel manufacturers and retailers in meeting the consumer's demands for the right products at the right prices - and at the right times. Follows the evolution of the merchandising function with emphasis on production efficiency, highlighting the philosophies of industry executives and the effective integration of the merchandising, store design, marketing, the apparel supply chain and manufacturing functions along the way. Prerequisite: (ECON 2143 or (ECON 2013 and ECON 2023) or (AGEC 1103 and AGEC 2103)) and AMPD 3033 and senior standing or instructor consent. (Typically offered: Fall and Spring)

AMPD 4103. Evolution of Fashion and Society Through Television Media. 3 Hours.
This course uses television programming from its early beginnings in the 1930s through to the twenty-first century to trace major events, societal changes, and the associated evolution of fashion. The course examines television both as an innovator and diffuser of fashion trends. (Typically offered: Fall and Spring)

AMPD 4111. History of Apparel Through Film from 1900 to Present. 1 Hour. This course uses historic costume films to trace the evolution of clothing from 1900 to Present. Emphasis is placed on societal aspects such as politics, religion, economy, technology, education, sports, class structure, and gender roles, and how they affect and change dress. Web based course. (Typically offered: Fall and Spring)

## AMPD 4213. Fashion Illustration - UARC. 3 Hours.

The purpose of this course is to develop the fundamentals skills necessary in fashion illustration. Students will be highly encouraged to use various mediums, and also utilize these skills to develop a individual style of drawing for their own design collections. This course is only offered to AMPD students. This course will be offered by the University of Arkansas Rome Center, Italy - Course\# FASHDRW-317. Prerequisite: AMPD majors only. (Typically offered: Fall)
AMPD 4223. Design Concepts for Fashion Merchandising - UARC. 3 Hours. This course examines the elements of research and design in fashion design, fabrications and merchandising. The student develops creative skills as well as an awareness of the various roles played by workers in the fashion industry. This course is only offered to AMPD students. This course will be offered by the University of Arkansas Rome Center, Italy - Course \# FASHDES-316. Prerequisite: AMPD majors only. (Typically offered: Fall)
AMPD 4233. Fashion Design - UARC. 3 Hours.
This course focuses on the key components of the fashion design process including research, trend forecasting, materials investigation and presentation of valuable, market-specific collections. Designers consider current market trends and design concepts as influences on merchandising. Extensive opportunities for the development and communication of a personal design vision in illustrated presentations helps students build portfolio-ready collections. Industry directed projects also provide opportunities to develop brand-conscious yet creative concepts and designs. CAD skills are utilized in a variety of presentational techniques. This course is only offered to AMPD students. This course will be offered by the University of Arkansas Rome Center, Italy - Course \# FASHDES-316. Prerequisite: AMPD majors only. (Typically offered: Fall)

## AMPD 4243. Pattern Development II - UARC. 3 Hours.

Students learn to drape basic bodice and skirt variations on standard industrial dress forms. Original garments are designed, draped and sewn. Accurate pattern-making, sewing and attention to design fundamentals are stressed throughout the course. This course is only offered to AMPD students. This course will be offered by the University of Arkansas Rome Center, Italy - Course\# FASD-311. Prerequisite: AMPD majors only. (Typically offered: Fall)

AMPD 4901. AMPD International Pre-Study Tour. 1 Hour.
A study of specific regional and international fashion markets for apparel studies in preparation for AMPD 4912 AMPD International Study Tour. The course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets. AMPD 4901 is content specific to each AMPD 4912 international study tour and must be repeated for each study tour destination. A grade of "C" or better is required to participate in AMPD 4912. Prerequisite: 2.0 minimum GPA. AMPD majors with minimum 30 hours, or consent. (Typically offered: Spring and Summer) May be repeated for up to 4 hours of degree credit.
AMPD 4901H. Honors AMPD International Pre-Study Tour. 1 Hour.
A study of specific regional and international fashion markets for apparel studies in preparation for AMPD 4912 AMPD Study Tour. The course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets. AMPD 4901 is content specific to each AMPD 4912 study tour and must be repeated for each study tour destination. A grade of " $C$ " or better is required to participate in AMPD 4912. Prerequisite: 2.0 minimum GPA. AMPD majors with minimum 30 hours, or consent. (Typically offered: Spring and Summer) May be repeated for up to 4 hours of degree credit.
This course is equivalent to AMPD 4901.

## AMPD 4912. AMPD International Study Tour. 2 Hours.

An on-site study of international fashion markets for apparel merchandising and product development. Course further examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets as outlined in AMPD 4901. Course includes study trip; length based upon destination. Additional fees required. Course offered each May Intersession. Prerequisite: AMPD 4901 (with a C or better), 2.0 min . GPA, AMPD major with min. 30 hours, and instructor consent. Corequisite: AMPD 4901 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min . GPA, AMPD major with min. 30 hours, and instructor consent. (Typically offered: Summer) May be repeated for up to 6 hours of degree credit.

## AMPD 4912H. Honors AMPD International Study Tour. 2 Hours.

An on-site study of international fashion markets for apparel merchandising and product development. Course further examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets as outlined in AMPD 4901. Course includes study trip; length based upon destination. Additional fees required. Course offered each May Intersession. Prerequisite: AMPD 4901 (with a C or better), 2.0 min . GPA, AMPD major with min. 30 hours, and instructor consent. Corequisite: AMPD 4901 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min . GPA, AMPD major with min. 30 hours, and instructor consent. (Typically offered: Summer) May be repeated for up to 8 hours of degree credit.
This course is equivalent to AMPD 4912.

## AMPD 4921. AMPD New York City Pre-Study Tour. 1 Hour.

A pre-study of the New York fashion market for apparel students. Course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets. Course is a pre-requisite for AMPD 4952 a 6 day field study in New York City, NY, May Intercession. This course is only offered to AMPD majors. Prerequisite: 2.0 minimum GPA, and students must be a AMPD majors with a minimum of 30 hours, or consent. (Typically offered: Spring)
AMPD 4921H. Honors AMPD New York City Pre-Study Tour. 1 Hour. A pre-study of the New York fashion market for apparel students. Course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets. Course is a pre-requisite for AMPD 4952 a 6 day field study in New York City, NY, May Intercession. This course is only offered to AMPD majors. Prerequisite: 2.0 minimum GPA, students must be a AMPD majors with a minimum of 30 hours, and honors standing or consent. (Typically offered: Spring) This course is equivalent to AMPD 4921.

## AMPD 4931. AMPD Virtual Las Vegas Pre-Study Tour. 1 Hour.

Course examines the buying function of apparel by exploring facets of technology currently being used in the fashion industry. Students will be digitally exposed to assortment planning, budgeting, open-to-buy, and the visual merchandising aspects of apparel retailing. Aspects of the MAGIC trade show held in Las Vegas will be discussed and analyzed. MAGIC is the most comprehensive fashion trade show in the U.S. for apparel, accessories, footwear, and sourcing materials. This course is a pre-requisite for AMPD 4962. This course is only offered to AMPD majors. Prerequisite: Students must have a 2.0 minimum GPA and must be an AMPD major with a minimum 30 hours completed, or consent. (Typically offered: Spring)

AMPD 4931H. Honors AMPD Virtual Las Vegas Pre-Study Tour. 1 Hour.
Course examines the buying function of apparel by exploring facets of technology currently being used in the fashion industry. Students will be digitally exposed to assortment planning, budgeting, open-to-buy, and the visual merchandising aspects of apparel retailing. Aspects of the MAGIC trade show held in Las Vegas will be discussed and analyzed. MAGIC is the most comprehensive fashion trade show in the U.S. for apparel, accessories, footwear, and sourcing materials. This course is a pre-requisite for AMPD 4962. This course is only offered to AMPD majors. Prerequisite: Students must have a 2.0 minimum GPA, must be an AMPD major with a minimum 30 hours completed, and must have honors standing or consent. (Typically offered: Spring)
This course is equivalent to AMPD 4931.
AMPD 4941. AMPD Las Vegas Pre-Study Tour. 1 Hour.
A pre-study of the Las Vegas MAGIC trade show for apparel merchandising and product development. Course examines the design and production of a major trade show and the distribution of wholesale fashion goods to mass markets. Course is a pre-requisite for AMPD 4952 or AMPD 4952H a 6-day field study in Las Vegas, Nevada, August Intercession. This course is only offered to AMPD majors. Prerequisite: 2.0 minimum GPA, and students must be an AMPD major with a minimum of 30 hours, or consent. (Typically offered: Spring)

## AMPD 4941H. Honors AMPD Las Vegas Pre-Study Tour. 1 Hour.

A pre-study of the Las Vegas MAGIC trade show for apparel merchandising and product development. Course examines the design and production of a major trade show and the distribution of wholesale fashion goods to mass markets. Course is a pre-requisite for AMPD 4952 or AMPD 4952H a 6-day field study in Las Vegas, Nevada, August Intercession. This course is only offered to AMPD majors. Prerequisite: 2.0 minimum GPA, students must be an AMPD major with a minimum of 30 hours, and have honors standing or consent. (Typically offered: Spring) This course is equivalent to AMPD 4941.

## AMPD 4952. AMPD New York City Study Tour. 2 Hours.

The course examines the application of business practices in the design, production, distribution and retailing of goods including sourcing, and manufacturing to mass markets. Students are expected to take an active role in the learning process for the duration of the study abroad experience, including critical thinking, problem identification and self-initiated inquiry. 2 credit hours Summer May Intersession enrollment includes study tour and related assignments to be completed on site. Corequisite: AMPD 4921 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 minimum GPA, AMPD major with minimum 30 hours, and instructor consent. Prerequisite: AMPD 4921 (with a C or better), 2.0 minimum GPA, AMPD major with minimum 30 hours, and instructor consent. (Typically offered: Spring)

AMPD 4952H. Honors AMPD New York City Study Tour. 2 Hours.
The course examines the application of business practices in the design, production, distribution and retailing of goods including sourcing, and manufacturing to mass markets. Students are expected to take an active role in the learning process for the duration of the study abroad experience, including critical thinking, problem identification and self-initiated inquiry. 2 credit hours Summer May Intersession enrollment includes study tour and related assignments to be completed on site. Corequisite: AMPD 4921 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 minimum GPA, AMPD major with minimum 30 hours, honors standing and instructor consent. Prerequisite: AMPD 4921 (with a C or better), 2.0 minimum GPA, AMPD major with minimum 30 hours, honors standing and instructor consent. (Typically offered: Spring)
This course is equivalent to AMPD 4952.

## AMPD 4962. AMPD Virtual Las Vegas Study Tour. 2 Hours.

Course examines the buying function of apparel by exploring facets of technology currently being used in the fashion industry. Students will be digitally exposed to assortment planning, budgeting, open-to-buy, and the visual merchandising aspects of apparel retailing. Aspects of the MAGIC trade show held in Las Vegas will be discussed and analyzed. MAGIC is the most comprehensive fashion trade show in the U.S. for apparel, accessories, footwear, and sourcing materials. Corequisite: AMPD 4931 (with a C or better, if corequisite, must have $C$ or better at time of virtual tour), 2.0 minimum GPA, AMPD major with minimum 30 hours, and instructor consent. Prerequisite: AMPD 4931 (with a C or better), 2.0 minimum GPA, AMPD major with minimum 30 hours, and instructor consent. (Typically offered: Spring)

## AMPD 4962H. Honors AMPD Virtual Las Vegas Study Tour. 2 Hours.

Course examines the buying function of apparel by exploring facets of technology currently being used in the fashion industry. Students will be digitally exposed to assortment planning, budgeting, open-to-buy, and the visual merchandising aspects of apparel retailing. Aspects of the MAGIC trade show held in Las Vegas will be discussed and analyzed. MAGIC is the most comprehensive fashion trade show in the U.S. for apparel, accessories, footwear, and sourcing materials.Corequisite: AMPD 4931 (with a C or better, if corequisite, must have C or better at time of virtual tour), 2.0 minimum GPA, AMPD major with minimum 30 hours, instructor consent and honors standing. Prerequisite: AMPD 4931 (with a C or better), 2.0 minimum GPA, AMPD major with minimum 30 hours, instructor consent and honors standing. (Typically offered: Spring)

## AMPD 4972. AMPD Las Vegas Study Tour. 2 Hours.

A 6 day field study of the Las Vegas MAGIC trade show for apparel studies. Course examines the design and production of a major trade show and the distribution of wholesale fashion goods from to mass markets. Course is a 6-day field study in Las Vegas, Nevada, August Intercession. Corequisite: AMPD 4941 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min . GPA, AMPD major with min. 30 hours, and instructor consent. Prerequisite: AMPD 4941 (with a C or better), 2.0 min . GPA, AMPD major with min. 30 hours, and instructor consent. (Typically offered: Spring)

## AMPD 4972H. Honors AMPD Las Vegas Study Tour. 2 Hours.

A 6 day field study of the Las Vegas MAGIC trade show for apparel studies. Course examines the design and production of a major trade show and the distribution of wholesale fashion goods from to mass markets. Course is a 6-day field study in Las Vegas, Nevada, August Intercession. Corequisite: AMPD 4941 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min . GPA, AMPD major with min. 30 hours, honors standing and instructor consent. Prerequisite: AMPD 4941 (with a C or better), 2.0 min . GPA, AMPD major with min. 30 hours, honors standing and instructor consent. (Typically offered: Spring)
This course is equivalent to AMPD 4972.

## Birth through Kindergarten (BRKD)

Donna L. Graham

Director
118 Home Economics Building
479-575-4305
Kelly Way
Assistant Director
16G Home Economics Building
479-575-4985
Laura Herold
Program Coordinator
16A Home Economics Building
479-575-5162
The major in Birth through Kindergarten prepares educators to teach infants, toddlers, preschoolers and kindergarteners including those children with disabilities. The program offers students a chance to work in settings that serve young children, including public schools, earlyintervention programs, child care and education centers, and residential placement centers. Successful completion of this degree, as specified in the requirements for a major in Birth through Kindergarten, leads to Arkansas' Integrated Birth through Kindergarten/Special Education teacher license.

Passing scores on the Praxis Core (Reading, Writing, and Math) or equivalent ACT, SAT or GRE scores are a requirement for formal admission into the Birth through Kindergarten major. Passing scores on the relevant Praxis Content exams (Interdisciplinary Early Childhood Education 5023, Education of Young Children 5024 and Principles of Learning and Teaching: Early Childhood 5621) are requirements for teacher licensure. Other specific application procedures and degree requirements are available from Birth through Kindergarten faculty advisers.

Program Description: The School of Human Environmental Sciences offers a major program in Food, Nutrition and Health leading to a B.S.H.E.S. degree. The school also offers a minor in Human Nutrition. Interest and aptitude for the biological and physical sciences as well as public health fields that support nutrition science are central to successfully completing the major program.

## Requirements for B.S.H.E.S. in Food, Nutrition and Health

State minimum core (p.81) and discipline specific general education (p. 72) requirements:
(Course work that meets state minimum core requirements is in bold.)

| University Requirements | 1 |  |
| :--- | :--- | :--- |
| UNIV 1001 | University Perspectives |  |
| Communications | 12 |  |
| ENGL 1013 | Composition I (ACTS Equivalency = ENGL 1013) <br> (unless exempt) |  |
| ENGL 1023 | Composition II (ACTS Equivalency = ENGL 1023) <br> (unless exempt) |  |
| COMM 1313 | Public Speaking (ACTS Equivalency = SPCH <br> 1003) |  |

Select one of the following:
ACOM 3143 Communicating Agriculture to the Public or ENGL 30ミTechnical and Professional Writing (ACTS Equivalency = ENGL 2023)
U.S. History and Government

Choose from U.S. History and Government Core Courses
Mathematics
MATH 1203 College Algebra (ACTS Equivalency = MATH 1103) (or higher level math)

STAT 2303 Principles of Statistics (ACTS Equivalency $=$ MATH 2103)

Sciences
CHEM 1073 Fundamentals of Chemistry (ACTS Equivalency \& CHEM 1071L= CHEM 1214 Lecture) and Fundamentals of Chemistry Laboratory (ACTS Equivalency = CHEM 1214 Lab)
AND 4 hours from University science core list
Or
CHEM 1103 University Chemistry I (ACTS Equivalency = \& CHEM 1101LCHEM 1414 Lecture)
\& CHEM 1123 and University Chemistry I Laboratory (ACTS
\& CHEM 1121LEquivalency = CHEM 1414 Lab) and University Chemistry II (ACTS Equivalency = CHEM 1424 Lecture) and University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab)
Fine Arts and Humanities
Choose from Fine Arts and Humanities Core Courses (Select 3 hours from each)
Social Sciences

| ENGL 3053 Technical and Professional Writing (ACTS Equivalency = ENGL 2023) or ACOM 3143 Communicating Agriculture to the Public |  | 3 |
| :---: | :---: | :---: |
| Electives |  | 9 |
| Year Total: | 16 | 15 |
| Third Year |  | Units |
|  | Fall | Spring |
| NUTR 3213 Nutrition Education and Counseling | 3 |  |
| NUTR 3103 Culinary Nutrition <br> \& NUTR 3101L Culinary Nutrition Lab | 4 |  |
| Social Science State Minimum Core Elective (Satisfies General Education Outcome 3.3) | 3 |  |

| NUTR 4001 Nutrition Seminar (Satisfies General Education Outcome 6.1) |  | 1 |
| NUTR 4103 Research Methods in Nutrition \& NUTR 4101L |  | 4 |
| Year Total: | 15 | 12 |

## Total Units in Sequence:

${ }^{1}$ The Fine Arts Elective courses which satisfy General Education Outcome 3.1 include: ARCH 1003, ARHS 1003, COMM 1003, DANC 1003, LARC 1003, MLIT 1003, MLIT 1003H, MLIT 1013, MLIT 1013H, MLIT 1333, THTR 1003, THTR 1013, or THTR 1013H.
2 The Humanities Elective courses which satisfy General Education Outcome 3.2 include: AAST 2023, ANTH 1033, ARCH 1013, CLST 1003, CLST 1003H, CLST 1013, COMM 1233, DANC 1003, ENGL 1213, GNST 2003, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2003, HIST 2013, HUMN 1124H, HUMN 2213, LALS 2013, MRST 2013, MUSY 2003, MUSY 2003H, PHIL 2003, PHIL 2003C, PHIL 2003H, PHIL 2103, PHIL 2103C, PHIL 2303, THTR 1003, THTR 1013, THTR 1013H, WLIT 1113, WLIT 1123, or intermediate-level world language (usually 2003-level).
${ }^{3}$ Students must complete 40 hours of upper division courses (3000-4000 level). It is recommended that students consult with their academic adviser when making course selections.

## Minor in Human Nutrition (NUTR-M)

Required Courses

| NUTR 1213 | Fundamentals of Nutrition |
| :--- | :--- |
| NUTR 3203 | Human Nutrition |
| NUTR 2113 | Principles of Foods |
| \& NUTR 2111L and Principles of Foods Laboratory |  |
| NUTR 4213 | Advanced Nutrition I |

| Select 6 hours from the following: | 6 |  |
| :--- | :--- | :--- |
| NUTR 2203 | Sports Nutrition |  |
| NUTR 4223 | Life Cycle Nutrition |  |
| NUTR 4243 | Community Nutrition |  |

Total Hours

## Courses

NUTR 1201. Introduction to the Dietetic Profession. 1 Hour.
Introduction to profession of dietetics and nutrition including history, scope and future of professionals with emphasis on academic preparation, internships, acquisition of professional credentials, career laddering and career opportunities. Guest speakers will supplement lectures and assignments. Prerequisite: HNAD or FNAH majors only or by department consent. (Typically offered: Fall and Spring)

NUTR 1213. Fundamentals of Nutrition. 3 Hours.
The functions of food, body processes, optimum diets in relation to health and physical fitness. (Typically offered: Fall and Spring)

NUTR 1213H. Honors Fundamentals of Nutrition. 3 Hours.
The functions of food, body processes, optimum diets in relation to health and physical fitness. (Typically offered: Fall and Spring) This course is equivalent to NUTR 1213.

NUTR 2111L. Principles of Foods Laboratory. 1 Hour.
Laboratory exercises and practice applicable of Principles of Foods. Lab 3 hours. Corequisite: NUTR 2113. (Typically offered: Fall and Spring)

## NUTR 2113. Principles of Foods. 3 Hours.

Physical and chemical characteristics of foods, organized by food science and nutrition, protein foods, phytochemicals, complex and refined carbohydrates, and fats. Emphasis on food preparation and storage methods and effect on foods. Investigation and practice of food preparation basics, cooking and baking techniques, knife skills, food safety, and sensory evaluation of food. Corequisite: NUTR 2111L. Prerequisite: NUTR 1213, a C or higher in HOSP 2611, (CHEM 1073, or CHEM 1103, or CHEM 1203), one of the following programs, minors or concentrations: (HNADBS, FNAHBS, HESCBS, NUTR-M, or CATEBS-FCSE) and students must also have a current ServSafe Manager's Certification. (Typically offered: Fall and Spring)

## NUTR 2203. Sports Nutrition. 3 Hours.

The integration of concepts from nutrition and exercise physiology into an applied multidisciplinary study of how food, beverages and dietary supplements influence physical performance. Prerequisite: NUTR 1213. (Typically offered: Summer)

NUTR 3101L. Culinary Nutrition Lab. 1 Hour.
Students will explore ways to apply evidence based nutrition research to culinary application. It addresses the fundamental culinary skills and knowledge required to prepare meals that impact the nutritional and sensory appeal of food. Corequisite: NUTR 3103. Prerequisite: NUTR 2113 and NUTR 2111L. (Typically offered: Fall)

## NUTR 3101M. Honors Culinary Nutrition Lab. 1 Hour.

Students will explore ways to apply evidence based nutrition research to culinary application. It addresses the fundamental culinary skills and knowledge required to prepare meals that impact the nutritional and sensory appeal of food. Corequisite: NUTR 3103H. Prerequisite: NUTR 2113, NUTR 2111L and honors standing. (Typically offered: Fall)
This course is equivalent to NUTR 3101L.

## NUTR 3103. Culinary Nutrition. 3 Hours.

This course is grounded in a food first approach to health and wellness with an emphasis on disease prevention. Students will study the physical and chemical characteristics of foods that increase nutritional value and will include exploration of the culinary nutrition modification process and application of these concepts to planning nutritionally balanced meals. Corequisite: NUTR 3101L. Prerequisite: NUTR 2113 and NUTR 2111L. (Typically offered: Fall)

## NUTR 3103H. Honors Culinary Nutrition. 3 Hours.

This course is grounded in a food first approach to health and wellness with an emphasis on disease prevention. Students will study the physical and chemical characteristics of foods that increase nutritional value and will include exploration of the culinary nutrition modification process and application of these concepts to planning nutritionally balanced meals. Corequisite: NUTR 3101M. Prerequisite: NUTR 2113, NUTR 2111L and honors standing. (Typically offered: Fall) This course is equivalent to NUTR 3103.

## NUTR 3203. Human Nutrition. 3 Hours.

Fundamental human nutrition; nutritive value of foods and general functions of nutrients based on concepts derived from inorganic and organic chemistry. Examples relating nutrition to disease used as illustrations to deepen understanding of normal nutrition. Lecture 3 hours per week. Corequisite: CHEM 2613 and CHEM 2611L or CHEM 3603 and CHEM 3601L. Prerequisite: NUTR 1213. (Typically offered: Fall)

## NUTR 3213. Nutrition Education and Counseling. 3 Hours.

Introduction to development of communication skills related to educational theory and techniques, development of educational materials, interpersonal communication skills, group dynamics, public speaking, and interviewing techniques. Includes discussion of counseling theory and methods, and how education and counseling are intertwined for nutrition professionals. Includes development of skills in nutrition counseling. Prerequisite: NUTR 1213, HNAD or FNAH majors only, and Junior or Senior standing. (Typically offered: Fall)

## NUTR 3213H. Honors Nutrition Education and Counseling. 3 Hours.

Introduction to development of communication skills related to educational theory and techniques, development of educational materials, interpersonal communication skills, group dynamics, public speaking, and interviewing techniques. Includes discussion of counseling theory and methods, and how education and counseling are intertwined for nutrition professionals. Includes development of skills in nutrition counseling. Prerequisite: NUTR 1213, HNAD or FNAH majors only, Junior or Senior standing, and honors standing. (Typically offered: Fall)
This course is equivalent to NUTR 3213.

## NUTR 3303. Nutrition Assessment. 3 Hours.

Principles of nutritional assessment and methodology including anthropometric, biochemical, clinical, and dietary evaluation. Emphasis placed on Nutrition Focused Physical Assessment, the interpretation of indices for all age groups in health and disease for both individuals and groups, and the application of nutrition assessment data in the nutrition care process. Prerequisite: NUTR 3203, junior standing and HNAD/FNAH majors only. (Typically offered: Spring)

NUTR 3603. Quantity Foods. 3 Hours.
This course focuses on menu planning for a variety of food service organizations, with consideration of age, special needs, diet type, cultural and ethical parameters. Students will design flavorful and appealing menus that meet current nutrition recommendations, guidelines and budgetary constraints. They will learn recipe standardization, quantity production, and overall quality control. Prerequisite: NUTR 1213, HOSP 2603, junior standing and Human Nutrition and Dietetics Bachelor of Science (HNADBS) or Food, Nutrition and Health Bachelor of Science (FNAHBS) majors only. (Typically offered: Spring)
NUTR 4001. Nutrition Seminar. 1 Hour.
Presentation and discussion of selected nutrition topics of current interest.
Prerequisite: Senior standing and HNAD or FNAH majors only. (Typically offered: Spring) May be repeated for up to 2 hours of degree credit.

## NUTR 4103. Research Methods in Nutrition. 3 Hours.

This course will cover applications of experimental methods for investigations in nutrition research and cookery. Pre- or Corequisite: STAT 2303. Prerequisite: Major in either Human Nutrition and Dietetics (HNAD), or Food, Nutrition and Health (FNAH) and senior standing only. (Typically offered: Spring)

## NUTR 4213. Advanced Nutrition I. 3 Hours.

This course will cover nutritional, physiological, and biochemical aspects of carbohydrate, protein, and lipid metabolism in humans and their implications in health and disease. Prerequisite: CHEM 3813 and NUTR 3203. (Typically offered: Fall)

## NUTR 4223. Life Cycle Nutrition. 3 Hours.

Study of normal nutrition emphasizing quantitative needs for nutrients as functions of biologic processes that vary during stages of the life cycle. Attention is given to preconception, pregnancy, childhood and older adults. Prerequisite: (HNAD majors and NUTR 3203) or (FNAH majors and junior standing). (Typically offered: Fall)

## NUTR 4233. Advanced Nutrition II. 3 Hours.

This course will cover nutritional, physiological, and biochemical aspects of vitamins and minerals in humans, their functions and roles in metabolism, and their implications in health and disease. Prerequisite: NUTR 4213. (Typically offered: Spring)

NUTR 4243. Community Nutrition. 3 Hours.
Identifying, assessing, and developing solutions for nutritional problems encountered at the local, state, federal, and international levels. Lecture 3 hours per week.
Prerequisite: NUTR 1213, junior standing, and Food, Nutrition and Health Bachelor of Science in Human Environmental Science (FNAHBS) or Human Nutrition and Dietetic Bachelor of Science in Human Environmental Science (HNADBS) majors or Nutrition minors only. (Typically offered: Spring)
NUTR 4263. Medical Nutrition Therapy I. 3 Hours.
Principles of medical nutrition therapy with emphasis on the Nutrition Care Process, and the pathophysiology and current standards of practice for diseases and disorders. Pre- or corequisite: NUTR 3213 and NUTR 4213. Prerequisite:
BIOL 2213, BIOL 2211L, CHEM 3813 and NUTR 3303. (Typically offered: Fall)
NUTR 4273. Medical Nutrition Therapy II. 3 Hours.
Principles of medical nutrition therapy with emphasis on the Nutrition Care Process, and the pathophysiology and current standards of practice for diseases and disorders. Lecture 3 hours per week. Prerequisite: NUTR 4263. (Typically offered: Spring)

## NUTR 4303. Cultural Perspectives on Foods. 3 Hours.

Cultural competence is growing in importance as our population becomes more culturally diverse. This course covers cuisine and culture of various regions for the purpose of promoting respect and understanding for cultural diversity. Students will learn the history of foods, ingredients, flavor profiles, religious based food practices, etiquette, and customs. Corequisite: Junior or senior standing, and (Human Nutrition and Dietetics majors (HNADBS) or Food, Nutrition and Health majors (FNAHBS) or Hospitality Management (HOSPBS) majors). (Typically offered: Fall)

NUTR 4401L. Recipe Modification Lab. 1 Hour.
Students will use existing research to identify foods with preventative and functional properties and apply that information to develop recipes for improved nutritional quality and disease management. They will gather data to modify and refine the products and create an educational tool to promote their products. Corequisite: NUTR 4403. (Typically offered: Spring)

## NUTR 4403. Recipe Modification. 3 Hours.

Students will use existing research to identify foods with preventative and functional properties and apply that information to develop recipes for improved nutritional quality and disease management. They will gather data to modify and refine the product and create an educational tool to promote their product. Corequisite: NUTR 4401L. Prerequisite: NUTR 2113 and NUTR 2111L. (Typically offered: Spring)

## Hospitality Management (HOSP)

Donna L. Graham
Director
118 Home Economics Building
479-575-4305
Kelly A. Way
Assistant Director
16G Home Economics Building
479-575-4985
Program Description: The School of Human Environmental Sciences offers a major in Hospitality Management, leading to a B.S.H.E.S. The program also offers two minors: Event Management and Hospitality Management.

## Requirements for B.S.H.E.S. in Hospitality Management

All Hospitality Management students must earn a grade of " C " or higher in all hospitality core required courses. State minimum core and discipline specific general education requirements:
(Course work that meets state minimum core (p. 81) requirements is in bold.)

| University Requirements |
| :--- |
| UNIV 1001 University Perspectives <br> Communications  |
| ENGL 1013 | | Composition I (ACTS Equivalency = ENGL |
| :--- |
| 1013) (unless exempt) |

U.S. History and Government

Choose from U.S. History and Government Core courses Mathematics and Computers

MATH 1203 College Algebra (ACTS Equivalency = MATH 1103)

MATH 2053 Finite Mathematics

## Sciences

Choose from state minimum core science courses
Fine Arts and Humanities

| Choose from Fine Arts, Humanities core courses -- Choose 3 hours from each |  |  |

| HOSP 3623 | Introduction to Meetings and Events Management |  |
| HOSP 3653 | Hospitality, Dietetic Management and Human Resources |  |
| HOSP 4643 | Special Events Management |  |
| HOSP 4653 | Global Travel and Tourism Management |  |
| HOSP 4663 | Hospitality Management Capstone |  |
| HOSP 4693 | Hospitality Management Internship ${ }^{1}$ |  |

Additional Requirements ..... 12
ASTM 2903 Agricultural and Human Environmental Sciences Applications of Microcomputers
or ISYS 112:Business Application Knowledge - Computer Competency
BLAW 2013 The Legal Environment of Business (ACTS Equivalency = BLAW 2003)
HDFS 2493 Introduction to Cultural Competence
HOSP 4673 Destination Marketing \& Operations

## Additional Professional and Business courses

12From the departmental codes ACCT, AGEC, ECON, FDSC, FINN, ISYS, MGMT, MKTG, SCMT, OMGT, WCOB and HOSP. Recommended that students take HOSP related courses: HOSP 3673 and HOSP 4613.
General Electives ${ }^{2}$ ..... 11
Total Hours ..... 120

1 Additional 3 hours credit may be earned if second experience is distinctly different from first internship.
2 Recommend world language 6 hours.

## Hospitality Management B.S.H.E.S., Eight-Semester Degree Program

Students wishing to follow the degree plan in Hospitality Management should go to the Eight-Semester Degree Policy (p. 67) for university requirements of the program.

2 The Humanities Elective courses which satisfy General Education Outcome 3.2 include: AAST 2023, ANTH 1033, ARCH 1013, CLST 1003, CLST 1003H, CLST 1013, COMM 1233, DANC 1003, ENGL 1213, GNST 2003, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2003, HIST 2013, HUMN 1124H, HUMN 2213, LALS 2013, MRST 2013, MUSY 2003, MUSY 2003H, PHIL 2003, PHIL 2003C, PHIL 2003H, PHIL 2103, PHIL 2103C, PHIL 2303, THTR 1003, THTR 1013, THTR 1013H, WLIT 1113, WLIT 1123, or Intermediate-level world language (usually 2003-level).
3 Students must complete 40 hours of upper division courses (3000-4000 level). It is recommended that students consult with their academic adviser when making course selections.

## Minor in Event Management

The Event Management minor provides students with expertise for careers in event planning and management. Curriculum covers skills and knowledge including negotiation, event planning, programming, promotion, budget and legal issues. This minor degree is open to all students at the University of Arkansas.

Requirements for a minor in Event Management: The Event Management minor requires 15 hours of coursework. To earn a minor in Event Management, a student must earn a "C" or better in the five courses required for the minor.

| HOSP 1603 | Introduction to Hospitality Management | 3 |
| :--- | :--- | ---: |
| HOSP 2603 | Purchasing and Cost Control | 3 |
| HOSP 3623 | Introduction to Meetings and Events Management | 3 |
| HOSP 3673 | Event Safety and Venue Management | 3 |
| HOSP 4613 | Festival Management and Analysis | 3 |
| Total Hours |  | $\mathbf{1 5}$ |

## Minor in Hospitality Management

This minor degree is designed to give students the expertise needed to pursue careers in the growing hospitality management industry. This minor degree is open to all students at the University of Arkansas.

Requirements for the minor in Hospitality Management: Students must complete 15 credit hours to earn this minor, including courses on tourism, finance, event management, and human resources. To earn a minor Hospitality Management, a student must earn a "C" or better in the five courses required for the minor.

| HOSP 1603 | Introduction to Hospitality Management | 3 |
| :--- | :--- | ---: |
| HOSP 2633 | Lodging Property Management | 3 |
| HOSP 3653 | Hospitality, Dietetic Management and Human <br>  <br>  <br> Resources | 3 |
| HOSP 4653 | Global Travel and Tourism Management | 3 |
| Total Hours 4673 | Destination Marketing \& Operations | 3 |

## Human Development and Family Sciences (HDFS)

Donna L. Graham<br>Director<br>118 Home Economics Building<br>479-575-4305

Kelly Way

Assistant Director
16G Home Economics Building
479-575-4985
Students majoring in human development and family sciences prepare for one of the fastest growing employment opportunities in the country. The human services area includes jobs that serve people from conception through the last stages of life. Students develop skills for working with individuals and families in governmental, private, and nonprofit organizations. In addition to the major in Human Development and Family Sciences, the program offers a major in Birth through Kindergarten (p. 218).

## Requirements for B.S.H.E.S. in Human Development and Family Life Sciences with Child Life Concentration Requirements for a Major in Human Development and Family Sciences (HDFS)

State minimum core and discipline specific general education requirements:
(Course work that meets state minimum core requirements is in bold.)

## University Requirements 1

UNIV 1001 University Perspectives

## Human Development and Family Sciences Courses

HDFS 1403. Life Span Development. 3 Hours.
A broad overview of the physical, psychological, and social development of the individual from conception until death. Emphasis is on individual development in a family context. Lecture 3 hours per week. (Typically offered: Fall and Spring)

## HDFS 1403H. Honors Life Span Development. 3 Hours.

A broad overview of the physical, psychological, and social development of the individual from conception until death. Emphasis is on individual development in a family context. Lecture 3 hours per week. Prerequisite: Honors standing. (Typically offered: Fall and Spring)
This course is equivalent to HDFS 1403.
HDFS 1423. Observation and Foundations for Teaching Young Children. 3 Hours.
Designed to acquaint students with the historical importance of early childhood education, the recognized standards for practice, the variety of program models, and career opportunities available. Emphasis will be placed on theories, evidencebased practice, ethics, diversity, and professional preparation for this knowledgebased, skill-driven field. Students will also obtain knowledge of state and federal laws pertaining to the care and education of young children. (Typically offered: Fall)

## HDFS 2401L. Infant and Toddler Development Laboratory. 1 Hour.

Introduction to infant and toddler development. Focus on observation and applied experience with children 0-3 documenting cognitive, emotional, language, physical, and social development, and demonstrating developmentally appropriate practice. Corequisite: HDFS 2403. Prerequisite: HDFS majors or BRKD majors or HDFS minors or CATEBS-FCSE majors or instructor consent. (Typically offered: Fall and Spring)

HDFS 2403. Infant and Toddler Development. 3 Hours.
Infant and toddler development from conception through toddlerhood with emphasis on physical, emotional, social, language, and cognitive domains. Theoretical and research-based information will be applied to developmentally appropriate practice. Historical and future perspectives will be explored as will the expanding opportunities for professional work with infants and toddlers. Observations in care centers will be assigned. Corequisite: HDFS 2401L. Prerequisite: HDFS majors or BRKD majors or HDFS minors or CATEBS-FCSE majors or by instructor consent. (Typically offered: Fall and Spring)

HDFS 2413. Family Relations. 3 Hours.
Courtship, marriage, and parenthood in the United States, with attention to cultural and psychological factors which affect relations among family members. Lecture 3 hours per week. (Typically offered: Fall and Spring)

## HDFS 2413H. Honors Family Relations. 3 Hours.

Courtship, marriage, and parenthood in the United States, with attention to cultural and psychological factors which affect relations among family members. Lecture 3 hours per week. Prerequisite: Honors standing. (Typically offered: Fall and Spring) This course is equivalent to HDFS 2413.

## HDFS 2433. Child Development. 3 Hours.

Theory, research, and application in physical, cognitive, social, and emotional development of the child, studied in the biocultural context. Begins with prenatal development and continues through adolescence, with special emphasis on early and middle childhood. (Typically offered: Fall and Spring)

## HDFS 2433H. Honors Child Development. 3 Hours.

Theory, research, and application in physical, cognitive, social, and emotional development of the child, studied in the biocultural context. Begins with prenatal development and continues through adolescence, with special emphasis on early and middle childhood. Prerequisite: Honors standing. (Typically offered: Fall and Spring)
This course is equivalent to HDFS 2433.
HDFS 2463. Introduction to Leadership and Administration in the Helping Professions. 3 Hours.
The class is a basic introduction of leadership and emotional intelligence as it relates to becoming a successful administrator in the helping professions-based careers. Emphasis will be on administrators' roles as leaders in organizations. Topics include facilities, budget, staff development, and policy manuals. Prerequisite: Human Environmental Science (HESCBS) majors, Human Development \& Family Science (HDFSBS) majors, Birth through Kindergarten (BRKDBS) majors, Human Development \& Family Science (HDFS-M) minors, or departmental consent. (Typically offered: Fall)

HDFS 2471L. Child Guidance Laboratory. 1 Hour.
Introduction to the guidance system. Focus on discipline techniques that are positive and age/stage appropriate for children ages 3-8. Corequisite: HDFS 2473. Prerequisite: HDFS 2433. (Typically offered: Fall and Spring)

## HDFS 2473. Child Guidance. 3 Hours.

Introduction to the guidance system. Focus on discipline techniques that are positive and age/stage appropriate for children ages 3-8. Lecture 3 hours per week plus 1 hour demonstration. Corequisite: HDFS 2471L. Prerequisite: HDFS 2433. (Typically offered: Fall and Spring)

HDFS 2483. Family Financial Management. 3 Hours.
Economic considerations of the family in a rapidly changing society. Family finance and consumer problems are emphasized. Prerequisite: HDFS 2413 or HDFS 2413H. (Typically offered: Fall and Spring)
HDFS 2493. Introduction to Cultural Competence. 3 Hours.
Basic introduction to definitions of intercultural competence, diversity, cultural values and beliefs, attitudes and verbal and non-verbal behavior, are examined to identify basic differences among individuals from diverse cultural backgrounds and across populations. (Typically offered: Fall, Spring and Summer)

## HDFS 2603. Rural Families and Communities. 3 Hours.

Meaning of sociology and sociological concepts with reference to rural society, families and communities; interdependence of rural and urban population in ecological areas; institutions; social change and adjustment. (Typically offered: Fall and Spring)

## HDFS 2603H. Honors Rural Families and Communities. 3 Hours.

Meaning of sociology and sociological concepts with reference to rural society, families and communities; interdependence of rural and urban population in ecological areas; institutions; social change and adjustment. Prerequisite: Honors standing. (Typically offered: Spring)
This course is equivalent to HDFS 2603.
HDFS 3333. Language and Literacy Pedagogy for Birth through Kindergarten Educators. 3 Hours.

This course combines theory on emergent language and literacy development with research-based pedagogy for birth through kindergarten classrooms. Topics include: language and literacy development and exceptionalities, English Language Learners, environmental influences, best practice pedagogy, identifying language and literacy delays, and intervention strategies. This course includes a service learning component. Prerequisite: HDFS 2433, HDFS 2403 and HDFS 2401L. (Typically offered: Fall)

HDFS 3423. Adolescent Development. 3 Hours.
Physiological and psychological development of the older child and youth, from pre-adolescence to adulthood. Theories of adolescent development. Cross cultural studies. Peer group influences. Some attention to pathological behaviors. Prerequisite: HDFS 1403 or PSYC 2003. (Typically offered: Fall and Spring)

## HDFS 3423H. Honors Adolescent Development. 3 Hours.

Physiological and psychological development of the older child and youth, from pre-adolescence to adulthood. Theories of adolescent development. Crosscultural studies. Peer group influences. Some attention to pathological behaviors. Prerequisite: HDFS 1403 or PSYC 2003 and honors standing. (Typically offered: Spring Odd Years)
This course is equivalent to HDFS 3423.

## HDFS 3443. Families in Crisis. 3 Hours.

An interdisciplinary perspective on internal and external crises faced by contemporary families, including substance abuse, natural disasters and other crisis events. Students will explore the family processes during such experiences and develop strategies for stress management, coping, and recovery. Lecture 3 hours per week. Prerequisite: HDFS 2413 or HDFS 2413H. (Typically offered: Fall)

## HDFS 3443H. Honors Families in Crisis. 3 Hours.

An interdisciplinary perspective on internal and external crises faced by contemporary families, including substance abuse, natural disasters and other crisis events. Students will explore the family processes during such experiences and develop strategies for stress management, coping, and recovery. Lecture 3 hours per week. Prerequisite: Honors standing and HDFS 2413 or HDFS 2413H. (Typically offered: Fall)
This course is equivalent to HDFS 3443.
HDFS 3453. Parenting and Family Dynamics. 3 Hours.
Focus is on influence of parenting and family dynamics on individual development, especially factors in family life which contribute to normal psychological development. Topics include family values, the psychology of sex and pregnancy, the transition to parenthood, childbearing techniques, family influences on cognitive and social development, and changes in family relationships during the life cycle. Prerequisite: (HDFS majors, HDFS minors, BRKD majors, CATEBS-FCSE majors, or IDST majors with HDFS track) and (HDFS 1403 or PSYC 2003). (Typically offered: Fall and Spring)

HDFS 3463. The Hospitalized Child: Child Life Programming. 3 Hours. Introduces child life programming in health care settings. Topics include: roles and expectations of a Child Life Specialist, importance of play, coping techniques, family advocacy, administration and professionalism. Lecture 3 hours per week. Prerequisite: HDFS 2433 and (HDFS or BRKD majors, HDFS or CDSV minors, or IDST major with a CDSV or HDFS track). (Typically offered: Fall and Spring)

HDFS 3481. Pre-Internship in Human Development and Family Sciences. 1 Hour.
This course prepares students for their internship experience (HDFS 4483) in Human Development and Family Sciences. Topics covered include professional and ethical behavior when working with people, families and communities. The course will also cover professional and career development topics. By the end of the course, students are expected to have secured an internship position suitable for HDFS 4483. Students should enroll in this course no earlier than the semester before they anticipate enrolling in HDFS 4483. Prerequisite: Junior standing and HDFS majors only. (Typically offered: Fall and Spring)

HDFS 4212L. Math and Science for Young Children Lab. 2 Hours.
Students will plan curriculum for young children ages 0-5 in the areas of math and science. Emphasis will be placed on theories of learning, developmentally appropriate practice (DAP), professionalism, philosophy, and ethical conduct. Students will interact with young children and facilitate learning and assessment experiences in a program for young children. Corequisite: HDFS 4213. (Typically offered: Fall)

## HDFS 4213. Math and Science for Young Children. 3 Hours.

Students will plan curriculum for young children ages 0-5 in the areas of math and science. Emphasis will be placed on theories of learning, developmentally appropriate practice (DAP), professionalism, philosophy, and ethical conduct. Students will design lesson plans for young children and will learn about effective implementation of curriculum. Corequisite: HDFS 4212L. Prerequisite: HDFS 2473 and HDFS 2471L. (Typically offered: Fall)

HDFS 4222L. Creative and Social Experiences for Young Children Lab. 2 Hours.
Students will plan curriculum for young children ages 0-5 in the areas of the arts and social emotional learning. Emphasis will be placed on theories of learning, developmentally appropriate practice (DAP), professionalism, philosophy, and ethical conduct. Students will interact with young children and facilitate learning and assessment experiences in a program for young children. Corequisite: HDFS 4223. Prerequisite: HDFS 2473 and HDFS 2471L. (Typically offered: Spring)

HDFS 4223. Creative and Social Experience for Young Children. 3 Hours. Students will plan curriculum for young children ages 0-5 in the areas of the arts and social emotional learning. Emphasis will be placed on theories of learning, developmentally appropriate practice (DAP), professionalism, philosophy, and ethical conduct. Students will design lesson plans for young children and will learn about effective implementation of curriculum. Corequisite: HDFS 4222L. Prerequisite: HDFS 2473 and HDFS 2471L. (Typically offered: Spring)

HDFS 4233. Developmental Assessment in Early Childhood. 3 Hours. Students will learn about developmentally appropriate observation, assessment, and documentation techniques and how to use these in high quality early childhood classrooms. Advantages and limitations of various assessment techniques, considerations used when interpreting findings, and the and making referrals will be discussed. Additional emphasis will be on anti-biased and culturally competent assessment, giving students methods to recognize and support learning and development in all young children. (Typically offered: Fall)

HDFS 4313. Building Family and Community Relationships. 3 Hours.
This course will help students interested in early childhood to value the role parents play in schools and the role schools play in a community. Various models of parent involvement will be explored. Students will plan a school-community collaborative which values diverse cultures. Prerequisite: (HDFS 2413 or HDFS 2603) and (HDFS or BRKD majors, HDFS or CDSV minors, or IDST major with CDSV track or IDST major with HDFS track). (Typically offered: Spring)
HDFS 4332. Curriculum and Assessment: Birth to Three Years. 2 Hours. The course will introduce students to curriculum planning and assessment in programs serving children from birth to three years of age. Emphasis will be on responsive relationships and curriculum focused on routines and activities. Corequisite: HDFS 4332L. Prerequisite: HDFS 2403 and HDFS 2401L. (Typically offered: Spring)

HDFS 4332L. Curriculum and Assessment: Birth to Three Years Laboratory. 2 Hours.
Laboratory. Corequisite: HDFS 4332. Prerequisite: HDFS 2403 and HDFS 2401L. (Typically offered: Spring)
HDFS 4342. Curriculum and Assessment: Three Years through Kindergarten. 2 Hours.
Students will plan curriculum and assessment for children three years of age through kindergarten. Emphasis will be on professionalism, philosophy and a code of ethics. Students will interact with young children and facilitate learning and assessment experiences in a program for young children. Corequisite: HDFS 4342L. Prerequisite: HDFS 2473 and HDFS 2471L. (Typically offered: Fall)
HDFS 4342L. Curriculum and Assessment: Three Years through Kindergarten. 2 Hours.
Laboratory. Corequisite: HDFS 4342. (Typically offered: Fall)
HDFS 4353. Play as Development in Childhood. 3 Hours.
This course will examine the contribution of play to cognitive, social, and emotional development of children. It will provide an overview of play theories and practices in indoor and outdoor settings, with an emphasis on nature-based learning and diversity and inclusion. Prerequisite: HDFS 2433, junior standing and HDFS, BRKD, or IDSTBA major or HDFS or CDSV minor. (Typically offered: Fall and Spring)

## HDFS 4363. Play as Development in Adulthood. 3 Hours.

This course will examine play as it pertains to development throughout life with a particular focus on adulthood. The modes of adult play will be examined, along with the benefits of play across adulthood. Emphasis will be on play, not as opposition to work, but as a part of a full life. Prerequisite: HDFS 1403. (Typically offered: Fall and Spring)

HDFS 4373. Internship: Infant, Toddler, and Preschool Programs. 3 Hours.
This course provides the student with interactive and observational experiences with young children in community-based early childhood programs. Some on-campus meetings will be required. Prerequisite: HDFS 4213, HDFS 4212L, HDFS 4223, and HDFS 4222L. (Typically offered: Spring)

## HDFS 4383. Internship: Kindergarten Programs. 3 Hours.

This course provides the student with interactive and observational experiences with young children in community-based kindergarten programs. Some on-campus meetings will be required. Prerequisite: HDFS 4213, HDFS 4212L, HDFS 4223, and HDFS 4222L. (Typically offered: Spring)
HDFS 4413. Infancy: Brain, Learning and Social Cognition. 3 Hours.
Investigation into how brain mechanisms interact with experience to provide the basis for learning and social cognition. Topics include face perception, motor cognition, imitation, joint attention and shared experience, empathy and altruism, theory of mind, social and moral cognition, language, memory, number, geometry and navigation, object representation, and executive function. Prerequisite: HDFS 2433 or PSYC 3093. (Typically offered: Spring)

HDFS 4413H. Honors Infancy: Brain, Learning and Social Cognition. 3 Hours. Investigation into how brain mechanisms interact with experience to provide the basis for learning and social cognition. Topics include face perception, motor cognition, imitation, joint attention and shared experience, empathy and altruism, theory of mind, social and moral cognition, language, memory, number, geometry and navigation, object representation, and executive function. Prerequisite: Honors standing and HDFS 2433 or PSYC 3093. (Typically offered: Spring) This course is equivalent to HDFS 4413.

## HDFS 4423. Adult Development. 3 Hours.

This course examines the social, psychological, and biological development that occurs throughout adulthood, with an emphasis on middle and later adulthood. Taking a life course perspective, this course particularly focuses on life course trajectories and variabilities across cultural contexts. Prerequisite: HDFS 1403 and Junior Standing. (Typically offered: Fall and Spring)

## HDFS 4443. Gerontology. 3 Hours.

Physiological and psychological development of the aging individual, extended family relations, service networks for the elderly, and retirement activities. Some attention to housing and care needs of persons in advanced years. Lecture 3 hours per week. Seminar. Prerequisite: HDFS 1403 (or HDFS 2413 or PSYC 2003 or SCWK 2133) and junior standing. (Typically offered: Spring)

## HDFS 4473. Multicultural Families. 3 Hours.

The course provides students with opportunities to gain awareness of their own cultures and families, reflect on families from a diverse array of cultures, and develop critical thinking skills needed to effectively engage with people and families from cultures different than their own. Prerequisite: HDFS 2493 and Junior or Senior Standing. (Typically offered: Fall)

HDFS 4483. Internship in Human Development and Family Studies. 3 Hours. The internship experience provides practical experience for students in settings that are designed to serve the needs of individuals and/or families across the life span. Students must work a minimum of 150 hours in the setting. May be repeated for up to 6 hours of degree credit. Prerequisite: Grade of B or higher in HDFS 3481, junior standing, and instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

HDFS 4493. Public Policy Advocacy for Children and Families. 3 Hours. Public policy advocacy as related to children and family issues. Strategies for advocacy will be emphasized. Lecture three hours per week. Prerequisite: Junior standing and (HDFS majors or IDST majors with HDFS track). (Typically offered: Fall)

## HDFS 4493H. Honors Public Policy Advocacy for Children and Families. 3

 Hours.Public policy advocacy as related to children and family issues. Strategies for advocacy will be emphasized. Lecture three hours per week. Prerequisite: Honors and Junior standing, and (HDFS major or IDST major with HDFS track). (Typically offered: Fall)
This course is equivalent to HDFS 4493.

## HDFS 4603. Environmental Sociology. 3 Hours.

The course provides a social perspective on environmental issues. It examines the linkage between society, ecological systems and the physical environment. It provides conceptual framework(s) for analyzing environmental issues, considers the role of humans in environmental issues, and enhances understanding the complexity of the relationship between societal organization and environmental change. (Typically offered: Irregular)
This course is cross-listed with SOCI 4603, SUST 4603.

## HDFS 4763. Research in HDFS: Methodological Approaches. 3 Hours.

This class introduces the methodology of HDFS and other social sciences in the social world. It covers research design, sampling, measurement, and other topics that underlie the social science conclusions presented to you in other classes.
The class begins with an introduction to the goals of social science research, then focuses on the understanding of the 3 validities with which social scientists, and consumer of social science, must concern themselves: Internal, Measurement, and External. Each of these three validities is used as the focus of a course section. The class concludes with a fourth section that integrates these topics and other social science methods. It is recommended that HDFS students complete Rural Families and Communities (HDFS 2603) prior to enrolling in this course. Prerequisite: HDFS major and Junior Standing. (Typically offered: Fall)

## HDFS 4773. Research in HDFS: Statistical Approaches. 3 Hours.

This course is an introduction to analytical approaches to research in human development and family sciences and will examine the principles and practices underlying the development of knowledge in the field. Emphases in this course will be on conducting and evaluating data analyses relevant to human environmental sciences majors. Students will become critical consumers of data and develop basic skills to analyze and interpret their own data. Prerequisite: HDFS 4763, STAT 2303, and HDFS major. (Typically offered: Spring)

## Human Environmental Sciences Courses

HESC 255V. Special Topics. 1-6 Hour.
Topics not covered in other courses or a more intensive study of specific topics in the specializations of human environmental sciences. (Typically offered: Irregular) May be repeated for degree credit.

HESC 400V. Special Problems. 1-6 Hour.
Special problems. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

HESC 455V. Special Topics. 1-6 Hour.
Topics not covered in other courses, a focused study of specific topics in the students' areas of concentration. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HESC 455VH. Honors Special Topics. 1-6 Hour.
Topics not covered in other courses, a focused study of specific topics in the students' areas of concentration. Prerequisite: Honors standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
This course is equivalent to HESC 455 V .

# Human Nutrition and Dietetics (HNAD) 

Donna L. Graham
Director
118 Home Economics Building
479-575-4305
Kelly A. Way
Assistant Director
16G Home Economics Building
479-575-4985
Program Description: Nutrition and Dietetics is for the student who intends to become a Registered Dietitian (RD), a credential that is required for one to counsel individuals related to any type of diet. Courses required are those necessary as prerequisites to application for a post-baccalaureate dietetic internship. Upon successful completion of the post-baccalaureate dietetic internship, the graduate is eligible to take the Registration Exam, the board examination for the RD credential. Graduates of this program who choose not to apply for a post-
baccalaureate dietetic internship are eligible upon completion of the Bachelor's degree to take the board examination to become a Dietetic Technician, Registered (DTR).

## Requirements for B.S.H.E.S. in Human Nutrition and Dietetics

State minimum core (p.81) and discipline specific general education (p. 72) requirements include the following. All students in Human Nutrition and Dietetics must earn a grade of " C " or higher in all NUTR and science required core courses
(Course work that meets state minimum core requirements is in bold.)

| University Requirements |  |
| :---: | :---: |
| UNIV 1001 | University Perspectives |
| Communications |  |
| ENGL 1013 | Composition I (ACTS Equivalency = ENGL 1013) (unless exempt) |
| ENGL 1023 | Composition II (ACTS Equivalency $=$ ENGL 1023) (unless exempt) |
| COMM 1313 | Public Speaking (ACTS Equivalency $=$ SPCH 1003) |

Select one of the following:
ENGL 3053 Technical and Professional Writing (ACTS Equivalency = ENGL 2023)
or ACOM 31 Communicating Agriculture to the Public
U.S. History and Government

Choose from U.S. History and Government Core Course
Mathematics
MATH 1203 College Algebra (ACTS Equivalency = MATH 1103) (or higher)

STAT 2303 Principles of Statistics (ACTS Equivalency $=$ MATH 2103)

| Sciences | 27-31 |
| :---: | :---: |
| BIOL 1543 <br> \& BIOL 1541L | Principles of Biology (ACTS Equivalency $=\mathrm{BIOL}$ 1014 Lecture) <br> and Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab) |
| Select 4-8 hours: |  |
| CHEM 1073 <br> \& CHEM 1071 | Fundamentals of Chemistry (ACTS Equivalency = LCHEM 1214 Lecture) <br> and Fundamentals of Chemistry Laboratory (ACTS Equivalency = CHEM 1214 Lab) |
| Or |  |
| CHEM 1103 <br> \& CHEM 1101L <br> \& CHEM 1123 <br> \& CHEM 1121L | University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture) <br> and University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab) <br> and University Chemistry II (ACTS Equivalency = CHEM 1424 Lecture) <br> and University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab) |

Take Additional Science Courses Below:
BIOL 2013 General Microbiology (ACTS Equivalency = BIOL
\& BIOL 2011L 2004 Lecture)
and General Microbiology Laboratory (ACTS
Equivalency = BIOL 2004 Lab)

| $\begin{aligned} & \text { BIOL } 2213 \\ & \text { \& BIOL } 2211 \mathrm{~L} \end{aligned}$ | Human Physiology (ACTS Equivalency $=$ BIOL 2414 Lecture) <br> and Human Physiology Laboratory (ACTS Equivalency = BIOL 2414 Lab) |

NUTR 2203 Sports Nutrition
NUTR 4223 Life Cycle Nutrition
NUTR 4243 Community Nutrition
Total Hours

## Courses

NUTR 1201. Introduction to the Dietetic Profession. 1 Hour.
Introduction to profession of dietetics and nutrition including history, scope and future of professionals with emphasis on academic preparation, internships, acquisition of professional credentials, career laddering and career opportunities. Guest speakers will supplement lectures and assignments. Prerequisite: HNAD or FNAH majors only or by department consent. (Typically offered: Fall and Spring)

NUTR 1213. Fundamentals of Nutrition. 3 Hours.
The functions of food, body processes, optimum diets in relation to health and physical fitness. (Typically offered: Fall and Spring)

NUTR 1213H. Honors Fundamentals of Nutrition. 3 Hours.
The functions of food, body processes, optimum diets in relation to health and physical fitness. (Typically offered: Fall and Spring)
This course is equivalent to NUTR 1213.
NUTR 2111L. Principles of Foods Laboratory. 1 Hour.
Laboratory exercises and practice applicable of Principles of Foods. Lab 3 hours.
Corequisite: NUTR 2113. (Typically offered: Fall and Spring)

## NUTR 2113. Principles of Foods. 3 Hours.

Physical and chemical characteristics of foods, organized by food science and nutrition, protein foods, phytochemicals, complex and refined carbohydrates, and fats. Emphasis on food preparation and storage methods and effect on foods. Investigation and practice of food preparation basics, cooking and baking techniques, knife skills, food safety, and sensory evaluation of food. Corequisite: NUTR 2111L. Prerequisite: NUTR 1213, a C or higher in HOSP 2611, (CHEM 1073, or CHEM 1103, or CHEM 1203), one of the following programs, minors or concentrations: (HNADBS, FNAHBS, HESCBS, NUTR-M, or CATEBS-FCSE) and students must also have a current ServSafe Manager's Certification. (Typically offered: Fall and Spring)

## NUTR 2203. Sports Nutrition. 3 Hours.

The integration of concepts from nutrition and exercise physiology into an applied multidisciplinary study of how food, beverages and dietary supplements influence physical performance. Prerequisite: NUTR 1213. (Typically offered: Summer)

## NUTR 3101L. Culinary Nutrition Lab. 1 Hour.

Students will explore ways to apply evidence based nutrition research to culinary application. It addresses the fundamental culinary skills and knowledge required to prepare meals that impact the nutritional and sensory appeal of food. Corequisite: NUTR 3103. Prerequisite: NUTR 2113 and NUTR 2111L. (Typically offered: Fall)

NUTR 3101M. Honors Culinary Nutrition Lab. 1 Hour.
Students will explore ways to apply evidence based nutrition research to culinary application. It addresses the fundamental culinary skills and knowledge required to prepare meals that impact the nutritional and sensory appeal of food. Corequisite: NUTR 3103H. Prerequisite: NUTR 2113, NUTR 2111L and honors standing. (Typically offered: Fall)
This course is equivalent to NUTR 3101L.

## NUTR 3103. Culinary Nutrition. 3 Hours.

This course is grounded in a food first approach to health and wellness with an emphasis on disease prevention. Students will study the physical and chemical characteristics of foods that increase nutritional value and will include exploration of the culinary nutrition modification process and application of these concepts to planning nutritionally balanced meals. Corequisite: NUTR 3101L. Prerequisite: NUTR 2113 and NUTR 2111L. (Typically offered: Fall)

## NUTR 3103H. Honors Culinary Nutrition. 3 Hours.

This course is grounded in a food first approach to health and wellness with an emphasis on disease prevention. Students will study the physical and chemical characteristics of foods that increase nutritional value and will include exploration of the culinary nutrition modification process and application of these concepts to planning nutritionally balanced meals. Corequisite: NUTR 3101M. Prerequisite: NUTR 2113, NUTR 2111L and honors standing. (Typically offered: Fall) This course is equivalent to NUTR 3103.

## NUTR 3203. Human Nutrition. 3 Hours.

Fundamental human nutrition; nutritive value of foods and general functions of nutrients based on concepts derived from inorganic and organic chemistry. Examples relating nutrition to disease used as illustrations to deepen understanding of normal nutrition. Lecture 3 hours per week. Corequisite: CHEM 2613 and CHEM 2611L or CHEM 3603 and CHEM 3601L. Prerequisite: NUTR 1213. (Typically offered: Fall)

## NUTR 3213. Nutrition Education and Counseling. 3 Hours.

Introduction to development of communication skills related to educational theory and techniques, development of educational materials, interpersonal communication skills, group dynamics, public speaking, and interviewing techniques. Includes discussion of counseling theory and methods, and how education and counseling are intertwined for nutrition professionals. Includes development of skills in nutrition counseling. Prerequisite: NUTR 1213, HNAD or FNAH majors only, and Junior or Senior standing. (Typically offered: Fall)

NUTR 3213H. Honors Nutrition Education and Counseling. 3 Hours.
Introduction to development of communication skills related to educational theory and techniques, development of educational materials, interpersonal communication skills, group dynamics, public speaking, and interviewing techniques. Includes discussion of counseling theory and methods, and how education and counseling are intertwined for nutrition professionals. Includes development of skills in nutrition counseling. Prerequisite: NUTR 1213, HNAD or FNAH majors only, Junior or Senior standing, and honors standing. (Typically offered: Fall)
This course is equivalent to NUTR 3213.
NUTR 3303. Nutrition Assessment. 3 Hours.
Principles of nutritional assessment and methodology including anthropometric, biochemical, clinical, and dietary evaluation. Emphasis placed on Nutrition Focused Physical Assessment, the interpretation of indices for all age groups in health and disease for both individuals and groups, and the application of nutrition assessment data in the nutrition care process. Prerequisite: NUTR 3203, junior standing and HNAD/FNAH majors only. (Typically offered: Spring)

NUTR 3603. Quantity Foods. 3 Hours.
This course focuses on menu planning for a variety of food service organizations, with consideration of age, special needs, diet type, cultural and ethical parameters. Students will design flavorful and appealing menus that meet current nutrition recommendations, guidelines and budgetary constraints. They will learn recipe standardization, quantity production, and overall quality control. Prerequisite: NUTR 1213, HOSP 2603, junior standing and Human Nutrition and Dietetics Bachelor of Science (HNADBS) or Food, Nutrition and Health Bachelor of Science (FNAHBS) majors only. (Typically offered: Spring)
NUTR 4001. Nutrition Seminar. 1 Hour.
Presentation and discussion of selected nutrition topics of current interest. Prerequisite: Senior standing and HNAD or FNAH majors only. (Typically offered: Spring) May be repeated for up to 2 hours of degree credit.

## NUTR 4103. Research Methods in Nutrition. 3 Hours.

This course will cover applications of experimental methods for investigations in nutrition research and cookery. Pre- or Corequisite: STAT 2303. Prerequisite: Major in either Human Nutrition and Dietetics (HNAD), or Food, Nutrition and Health (FNAH) and senior standing only. (Typically offered: Spring)

## NUTR 4213. Advanced Nutrition I. 3 Hours.

This course will cover nutritional, physiological, and biochemical aspects of carbohydrate, protein, and lipid metabolism in humans and their implications in health and disease. Prerequisite: CHEM 3813 and NUTR 3203. (Typically offered: Fall)

## NUTR 4223. Life Cycle Nutrition. 3 Hours.

Study of normal nutrition emphasizing quantitative needs for nutrients as functions of biologic processes that vary during stages of the life cycle. Attention is given to preconception, pregnancy, childhood and older adults. Prerequisite: (HNAD majors and NUTR 3203) or (FNAH majors and junior standing). (Typically offered: Fall)
NUTR 4233. Advanced Nutrition II. 3 Hours.
This course will cover nutritional, physiological, and biochemical aspects of vitamins and minerals in humans, their functions and roles in metabolism, and their implications in health and disease. Prerequisite: NUTR 4213. (Typically offered: Spring)

## NUTR 4243. Community Nutrition. 3 Hours.

Identifying, assessing, and developing solutions for nutritional problems encountered at the local, state, federal, and international levels. Lecture 3 hours per week. Prerequisite: NUTR 1213, junior standing, and Food, Nutrition and Health Bachelor of Science in Human Environmental Science (FNAHBS) or Human Nutrition and Dietetic Bachelor of Science in Human Environmental Science (HNADBS) majors or Nutrition minors only. (Typically offered: Spring)

## NUTR 4263. Medical Nutrition Therapy I. 3 Hours.

Principles of medical nutrition therapy with emphasis on the Nutrition Care Process, and the pathophysiology and current standards of practice for diseases and disorders. Pre- or corequisite: NUTR 3213 and NUTR 4213. Prerequisite:
BIOL 2213, BIOL 2211L, CHEM 3813 and NUTR 3303. (Typically offered: Fall)
NUTR 4273. Medical Nutrition Therapy II. 3 Hours.
Principles of medical nutrition therapy with emphasis on the Nutrition Care Process, and the pathophysiology and current standards of practice for diseases and disorders. Lecture 3 hours per week. Prerequisite: NUTR 4263. (Typically offered: Spring)

NUTR 4303. Cultural Perspectives on Foods. 3 Hours.
Cultural competence is growing in importance as our population becomes more culturally diverse. This course covers cuisine and culture of various regions for the purpose of promoting respect and understanding for cultural diversity. Students will learn the history of foods, ingredients, flavor profiles, religious based food practices, etiquette, and customs. Corequisite: Junior or senior standing, and (Human Nutrition and Dietetics majors (HNADBS) or Food, Nutrition and Health majors (FNAHBS) or Hospitality Management (HOSPBS) majors). (Typically offered: Fall)

## NUTR 4401L. Recipe Modification Lab. 1 Hour.

Students will use existing research to identify foods with preventative and functional properties and apply that information to develop recipes for improved nutritional quality and disease management. They will gather data to modify and refine the products and create an educational tool to promote their products. Corequisite: NUTR 4403. (Typically offered: Spring)

NUTR 4403. Recipe Modification. 3 Hours.
Students will use existing research to identify foods with preventative and functional properties and apply that information to develop recipes for improved nutritional quality and disease management. They will gather data to modify and refine the product and create an educational tool to promote their product. Corequisite: NUTR 4401L. Prerequisite: NUTR 2113 and NUTR 2111L. (Typically offered: Spring)

## Fay Jones School of Architecture and Design

## Mission and Objectives

The Fay Jones School of Architecture and Design, founded in 1946 by John G. Williams at the University of Arkansas, houses professional design programs of architecture, interior architecture and design and landscape architecture together with liberal studies programs. All combine studio design education with innovative teaching in history and theory; building and intelligent technologies and urban design and resiliency. A broad range of course offerings equips graduates with the knowledge and critical agility required to meet the challenges of designing for a changing world. Design instruction occurs in studio sequences that provide educational experiences appropriate for students who wish to pursue both traditional and non-traditional forms of professional practice. Fundamental principles and techniques design and design thinking are stressed and all curriculums empower students by developing skill, knowledge, and a deep sense of responsibility to their environment and to the cultures they will serve. The school's curriculum surveys issues and opportunities in built and natural settings, as well as addressing complex social, physical, and cultural and diverse relationships that constitute the human-made environment. In summary, the school prepares its students with critical frameworks for professional skills, and applied learning experiences that equip them to assume leadership roles in the profession and in their communities.

## Degrees Offered

The Fay Jones School of Architecture and Design offers three professionally accredited programs. The five-year Bachelor of Architecture (B.Arch.), the four-year Bachelor of Interior Architecture and Design (B.I.A.D.) and the nine-semester Bachelor of Landscape Architecture (B.L.A.).

The Bachelor of Science in Architectural Studies serve students who are interested in the design disciplines, but not professional practice. The four-year program is well suited for students who seek careers or graduate education in allied design disciplines.

## Minors

Students in architecture, interior architecture and design and landscape architecture may pursue academic minors in approved degree programs of other colleges on campus, providing they meet the specific requirements for that minor, as well as any of the school's minors in History of Architecture and Design, Planting Design, Design with Plants, Sustainable Landscape Design and Management, Planning, and Sustainability. An Interior Design minor is available only to students in the Fay Jones School of Architecture and Design.

## Accreditations

All three professional degree programs in the Fay Jones School are nationally accredited.

The architecture program was founded in 1946 and has been accredited by the National Architectural Accrediting Board (NAAB) since 1958. The landscape architecture program was established in 1975 and has been accredited by the Landscape Architecture Accreditation Board (LAAB) of the American Society of Landscape Architects (ASLA) since 1983. The Interior Architecture and Design program was established in 1974 and has been accredited by the Council for Interior Design Accreditation (CIDA) since 1993. The school holds memberships in the Association of Collegiate Schools of Architecture (ACSA) and the Council of Educators in Landscape Architecture (CELA) and the Interior Design Educators Council (IDEC), organizations that comprise North American schools of architecture, landscape architecture and interior design.

## Facilities and Resources

The three academic units of the Fay Jones School - architecture, interior architecture and design and landscape architecture - together with its administrative offices are located in Vol Walker Hall and its state of the art addition, the Steven L. Anderson Design Center. Harmoniously combining traditional and contemporary architecture, our award-winning facilities not only offer students in the Fay Jones School extraordinary opportunities for collaboration among its three design disciplines, but also model best practices for new and historic preservation construction, all adhering to high standards of sustainable design. At the same time, we value making connections with the entire state and our nation, pursuing learning experiences for our students that foster civic engagement and responsibility. So too, the school is aware of the increasing global nature of design practice and offers field trips, guest lectures, learning opportunities in applied design and research, and, especially, a variety of approved study abroad programs.

## Design Studio

The design studio sequence is the core of each discipline within the school. Studio projects are complemented by topical lectures that inform the design process. These learning experiences develop and nurture the
intellectual and creative skills of students and allow them to approach problem solving in a disciplined, logical, and analytical manner. The amount and complexity of material covered, the fast pace of assignments, and the presentation of work for critical discussion among faculty and other students combine to produce a challenging learning atmosphere.

## Library Resources

The collections in the Fine Arts Library include traditional print resources on the visual arts (painting, drawing, sculpture, ceramics, printmaking, and photography), architecture, and landscape architecture. Types of materials include books, exhibition catalogs, reference books, and periodicals. Electronic resources supporting the art (https://libraries.uark.edu/eresources/listing.asp? Category=Arts+and+Humanities\&Listing=Art), architecture (https:// libraries.uark.edu/eresources/listing.asp?Category=Arts+and +Humanities\&Listing=Architecture), landscape architecture (https:// libraries.uark.edu/eresources/listing.asp?Category=Arts+and +Humanities\&Listing=Landscape+Architecture), and interior design (https://libraries.uark.edu/eresources/listing.asp? Category=Arts+and+Humanities\&Listing=Interior+Design) programs include Art Full Text (https://libraries.uark.edu/eresources/ help.asp?TitleCode=ARTABS), Avery Index to Architectural Periodicals (https://libraries.uark.edu/eresources/help.asp? TitleCode=EbscoAvery), Bibliography of the History of Art (https:// libraries.uark.edu/eresources/helpweblinks.asp?LinkID=6065), and Oxford Art Online (https://libraries.uark.edu/eresources/help.asp? TitleCode=OxfordArt) among others. The Fine Arts Library also maintains course reserves for faculty wishing to place materials on reserve for their classes. Visual resources such as slides and other materials are available in the Art Department slide library. Archives and manuscripts related to art or architecture can be found in Special Collections (https:// libraries.uark.edu/specialcollections/) in Mullins Library. The Libraries participate in ARTstor (https://libraries.uark.edu/eresources/help.asp? TitleCode=ARTSTOR).

The C. Murray Smart Multimedia Center, located in Vol Walker Hall, contains a vast online digital image database relating to architecture, architectural history, interior design, landscape architecture and urban design.

## Digital Drawing and Fabrication Resources

Fabrication Laboratories Website (https://fayfabricationlabs.uark.edu)
Located in the lower levels of Vol Walker Hall and an annex location on Government Avenue in Fayetteville, the Fabrication Laboratories (http://fayfabricationlabs.uark.edu/) are an open environment for all students and faculty in the Fay Jones School of Architecture and Design. Material experimentation, prototyping and representing scale models are an essential part of the design culture at the Fay Jones School. The Fabrication Labs are flexible work spaces that support hands-on learning and research by offering a variety of equipment in four facilities: Wood Lab, 3D Print Lab, Laser and CNC Lab, and the Build Lab. The Fabrication Labs are under the direction of the Fay Jones School's Dean's Office and the Fabrication Laboratories manager.

## Garvan Woodland Gardens

Garvan Woodland Gardens Website (http://www.garvangardens.org/)
Located on Lake Hamilton in Hot Springs, Arkansas, Garvan Woodland Gardens is an integral unit of the school. The land and endowment were the result of a bequest to the department of landscape architecture
in 1985. This 210-acre woodland habitat features a variety of garden settings and unique architectural structures designed and developed by world-renowned specialists in botanical gardens, landscape architecture and architecture.

Garvan Woodland Gardens' mission is to preserve and enhance a unique part of the Ouachita environment; provide people with a place of learning, research, cultural enrichment, and serenity; develop and sustain gardens, landscapes, and structures of exceptional aesthetics, design, and construction; and partner with and serve communities of which the Gardens is a part.

An internship program offers opportunities for summer study and employments.

## University of Arkansas Community Design Center <br> Community Design Center Website (http://uacdc.uark.edu/)

Since 1995 the University of Arkansas Community Design Center (UACDC) has provided award-winning, innovative planning to communities and organizations throughout Arkansas. A nationally recognized leader in urban design, sustainable development, and education UACDC design solutions advance triple-bottom line thinking: simultaneously solving for economic, ecological, and social criteria. The center's work is multi-disciplinary as it addresses new challenges in affordable housing, context sensitive highway design, low impact development, transit-oriented development, big box urbanism, watershed urbanism, and agricultural urbanism. In the tradition of a teaching office, students collaborate with the center's professional design staff and allied consultants while authoring their own proposals. The goal is to prepare designers for leadership in "wicked problem solving" that leads to intelligent development of the built environment.

## Off-Campus Study Requirement

Each student in the professional program in architecture, landscape architecture and interior design is required to complete an approved offcampus study experience focusing upon complex urban relationships, and fostering cultural diversity. Approved programs in the Fay Jones School vary. They range from a semester in Rome to five- to ten-week programs in Europe or Latin America.

A special international programs fee supports the school's international programs. These fees are assessed to all students participating in the professional (five-year) degrees in architecture, landscape architecture and interior design designated in the "Fees and Cost Estimates" section of this catalog. The international program and any travel fees offsets the costs of maintaining off-campus programs that are not a part of the school's university-funded budget, as well as enhancing studentcentered activities. Students are assessed the international fee each semester up until the semester they study abroad. At that time, they will be assessed for any remaining semesters plus any additional program costs not covered by the international study fees. The fee is assessed for each study abroad program and is not regulated by the catalog year of the students' first enrollment in the Fay Jones School of Architecture and Design. All travel fees are non-refundable under any circumstances including withdrawal from the respective professional programs. For further information, see notes on related program fees under "Fees and Cost Estimates" for the university.

## School Academic Regulations

## Plus/Minus Grading System

The Fay Jones School of Architecture and Design utilizes a plus/minus grading system that assigns numerical values to 12 different grades. These values are used for architecture, interior design and landscape architecture courses when grade-point averages are calculated. The 12step grading system with assigned values is as follows:

| Grade | Value |
| :--- | :--- |
| A | 4.00 |
| A- | 3.67 |
| B+ | 3.33 |
| B | 3.00 |
| B- | 2.67 |

## School Scholarships

More than 100 awards and scholarships are available to students in the Fay Jones School of Architecture and Design. Most are awarded annually on the basis of recommendations made by the scholarship committee of the school.

## Student Organizations

## American Institute of Architecture Students

The American Institute of Architecture Students (AIAS) is a national organization whose purpose is "to organize architecture students and combine their efforts to advance the science and art of architecture, to promote excellence in architectural education, training and practice, and to foster an appreciation of architecture and related disciplines among all persons." All students in the school's architecture program are eligible for membership.

## American Society of Landscape Architects, Student Chapter

The purpose of the student chapter of the American Society of Landscape Architects is to bring together the landscape architecture students to combine their interests and efforts, to extend their knowledge of the profession of landscape architecture, and to help advance the profession while preparing for a professional career. All students in the school's landscape architecture program are eligible for membership.

## American Society of Interior Designers Student Chapter

The American Society of Interior Design Student Chapter (ASID) is dedicated to representing the entire profession and encouraging the highest possible standards for the practice of interior design. Their purpose is to encourage interaction with professionals in interior design and allied professions and to develop leadership qualities. All students in the school's interior design program are eligible for membership.

## National Organization of Minority Architects

The National Organization of Minority Architects (NOMA) mission is to champion diversity within the design professions by promoting the excellence, community engagement, and professional development of its members.

## Tau Sigma Delta Honor Society

The Alpha Eta Chapter of Tau Sigma Delta is the only national collegiate honor society recognized in the fields of architecture, landscape architecture, interior design and allied arts. All students in the school are eligible for membership.

Elections to membership are made by the existing membership, subject to approval by the faculty, from the top 20 percent of each class of fourthyear and fifth-year students maintaining a minimum 3.00 cumulative grade-point average. In addition, leadership, character, and promise of professional merit are considered in making selections.

## Sigma Lambda Alpha

Sigma Lambda Alpha, founded and chartered by the Council of Educators in Landscape Architecture (CELA), is an international honor society that encourages, recognizes and rewards academic excellence in preparation for the profession of landscape architecture. Any landscape architecture junior or senior with an average of 3.2 or higher is eligible for membership.

## Ownership of Work

All original work submitted for credit, including design studio projects, becomes the property of the Fay Jones School of Architecture and Design. Students are required to maintain portfolios documenting all academic and design studio work. Digital copies of all work completed in a studio must be submitted to the studio year coordinator in order to receive a grade for the studio.

## School Computer Policy

All students enrolled in the school are required to purchase, for their first year, a personal computer matching or exceeding specifications issued by school (https://fayjones.uark.edu/_resources/PDFs/ RecommendedLaptopSpecifications.pdf). The specifications are the same for all departments. All students will need their computers in the fall semester of the first year.

Recommendations for educationally priced computers are available on the UA Information Technology Services (https://its.uark.edu/software-equipment/tech-store/student-recommendations.php\#fay-jones-school-ofarchitecture).

A substantial amount of software may be required depending on specific course requirements, most of which is free for students to download at school's Technical Support page (http://fayjones.uark.edu/people/current-students/technical-support.php).

## School Admission Requirements

Each program within the Fay Jones School of Architecture and Design has its own requirements for admission to their general and professional programs. The page below provides admission requirements for:

- The Department of Architecture
- The Department Interior Architecture and Design
- The Department of Landscape Architecture

## Department of Architecture Admissions

The department of architecture maintains two distinct tracks of study for entering freshmen to accommodate all students interested in pursuing a degree in architecture. The two tracks of study are designed to foster learning and to build strong foundations for entering students with different skill levels and high school backgrounds. Students accepted to the University of Arkansas with the intention to participate in the B.Arch. or B.S. programs in the department of architecture will be classified as fall/ spring studio students or summer/summer studio students and assigned to either the fall/spring studio track or summer/summer studio track based upon department admissions policies described below.

## Fall/Spring Studio

Students must meet all of the following requirements:

- 25 ACT or better
- 3.5 GPA in high school
- College preparatory curriculum to include physics and an upper level math (Pre-Calculus or higher)

Space in the studio is limited to 120 students with priority given to first year students who are admitted to the University of Arkansas and indicate architecture or architectural studies as their intended degree program by Nov. 15.

Students are reviewed at the end of the fall semester and may continue in the program if they meet the following criteria:

- "C" or better in ARCH 1015, Architectural Design I
- "C" or better in PHYS 1044, Physics for Architects I or an approved equivalent
- " C " or better in ARCH 1212, Design Thinking I: Foundations in Technology
- Present a 2.0 GPA

Students who do not meet those criteria will receive a letter and be advised accordingly.

## Summer/Summer Studio

Summer studio students meet the University of Arkansas minimum requirements for admission but do not meet the above noted department criteria for the fall/spring studio. These students can enroll in ARCH 1015, Architectural Design I in the summer if they meet the following criteria:

- "C" or better in PHYS 1044, Physics for Architects I or an approved equivalent
- Present a 2.0 GPA

Students who do not meet these criteria will be delayed until they satisfy the admissions criteria for the Department of Architecture. Students will be
reviewed at the end of the first summer session and will not be allowed to continue in the program if they do not meet the following criteria:

```
- "C" or better in ARCH 1015, Architectural Design I
- "C" or better in ARCH 1212, Design Thinking I: Foundations in Technology
- Maintain a 2.0 GPA
```

## Architecture Department Transfer Students

Transfer students who are admitted to the Fay Jones School of Architecture start the design studio sequence in the summer and must meet the following requirements:

- Completion of an approved general physics course and an approved mathematics course.
- To enter Design I in the summer, students must successfully pass Physics for Architects I (or another approved upper level physics course) with a minimum of $C$ or better, complete an approved math course and present a 2.0 GPA overall.
- Students admitted to the university with a completed two-year associate of arts or associate of science degree from an Arkansas state-supported two-year or four-year college or university, as stated in ACT 182, will have general education (core) requirements waived. All students must complete any lower division discipline specific courses required for the major, as well as all courses required to comply with the conditions of accreditation.

Lack of knowledge or misinterpretation of policies and/or regulations on the part of individual students will not be considered a valid reason for failure to fulfill requirements.

Transferring from Accredited Schools of Architecture: Students transferring from an accredited professional program in architecture must have their architecture courses reviewed for acceptance and for determination of studio placement by submitting materials for review. Please contact the school's advising center for a specific list of required materials.

NOTE: All students must complete or receive transfer credit for either PHYS 1044 Physics for Architects I or PHYS 2013 and PHYS 2011L College Physics I, MATH 1213 Plane Trigonometry, MATH 2043 Survey of Calculus or MATH 2053 Finite Mathematics and all other first year university core curriculum courses prior to entry into ARCH 2016 Architectural Design III and its co-requisites in architectural structures and history.

Ultimate responsibility for completion of entrance requirements rests with each student. For questions concerning admissions, please contact the school's advising center for additional information.

## Admission to the Professional Program

The department of architecture offers students the opportunity to prepare for architectural practice or related endeavors. With this opportunity comes a responsibility for demonstrating a commitment to personal growth and success in the professional program.

Students are admitted to the first year of the architecture curriculum based on the above described by the university and the school. Every semester, students' grades in all architecture courses, especially the design studio, are evaluated to assess their progress and performance.

Upon completion of the third year of the five-year architecture curriculum, including completion of the 35 semester-credit hour university's state minimum (general education) core required, students will be evaluated for admission to the professional program. Admission to the Professional Degree Program in the Department of Architecture requires a minimum 2.00 grade-point average in the University Core and each of the sub-disciplines of Architecture: History/Theory, Technology and Design.

Students admitted to the professional program will continue in the established studio curriculum sequence and are to complete the final two years of design studio at the school. In addition to completing the design studio sequence, students are encouraged to take maximum advantage of the opportunities that professional and free electives provide for preprofessional development, cultivation of specialization in and related to the profession, and/or preparation for graduate education.

Interior Architecture and Design Program Admissions: Students are admitted to the first year of the interior architecture and design curriculum based on criteria established by the university and by the program. They are evaluated each semester by grades in lecture courses and by grades for performance and progress in the design studio sequence.

Admission to the Professional Program for Interior Architecture and Design

The interior architecture and design program offers prospective students the opportunity to prepare for professional practice or related endeavors. With this opportunity comes a responsibility for demonstrating a commitment to personal growth and success in the professional program.

At the completion of IARD 2804 Interior Design Studio III in the interior architecture and design curriculum, students will be evaluated for admission into the professional program on the basis of academic performance in the university core and the required interior architecture and design curriculum. Admission is based on available desks and requires a majority vote of a departmental admissions committee. Students admitted to the professional program will continue in the established studio curriculum sequence and are to complete the final five studios at the school. Students with less than a cumulative 2.5 GPA in IARD and ARCH courses will not be admitted to the professional program. Students who are not admitted are encouraged to consider alternative programs in the school and the university.

## Department of Landscape Architecture Admissions

All students (including freshmen, international, and transfer students) admitted to the University of Arkansas are eligible for participation in the landscape architecture program in the school. Space in the studio is limited with priority given to first year students who are admitted and indicate landscape architecture or landscape architectural studies on their admissions application by November 15th. Students who require developmental work because of low ACT or SAT scores or universityadministered math placement examinations or who require courses to remove deficiencies may not register for courses carrying LARC departmental designations. Upon completion of required developmental work and maintaining a grade-point average of 2.00 or more on at least 12 credit hours, students may enroll in landscape architecture (LARC) courses.

## Admission to the Professional Program in Landscape Architecture

The department of landscape architecture offers a professional education grounded in liberal arts studies, which prepares students for landscape architecture practice in the private, public, and not-for-profit sectors. Successful completion of the program requires commitment to personal growth and excellence.

Students are admitted to the first year of the landscape architecture program based upon the established criteria by the University of Arkansas. Academic and professional performance is evaluated by grades in the course work, design studios, and construction labs. After two years in the program, students submit a portfolio of work at the end of the spring semester for application to continue in the professional program. Applicants who have a grade-point average below a 2.5 will not be allowed to continue in the program. Contact the department head for specific portfolio submission requirements and schedule of deadlines. All candidates will be notified of their acceptance or rejection in writing, normally by the first of August.

Students will be evaluated on general academic performance and in the landscape architecture curriculum as well as professional conduct. All department faculty serve on the admissions committee. Any appeal to the committee's decision may be made by submitting a letter to the department head one week before the first week of the subsequent fall semester. The appeal will be presented to the entire faculty for consideration and will require the candidate to present their case in person.

Students who fail to gain admission to the Bachelor of Landscape Architecture degree program will be referred to the department head and the school's academic adviser for appeal procedures and alternative degree programs in the school and the university.

## Honors

## Fay Jones School of Architecture and Design Honors Program

The Honors Program of the Fay Jones School of Architecture and Design is proud to be one of the six individual honors programs partnered with the University of Arkansas Honors College. The Fay Jones School Honors Program is rooted in the best traditions of design education: responsibility and service to the societies and cultures to which we are inextricably connected, and the nurturing of the individual curiosity and capabilities of our students. Honors requirements are the same in all departments (Architecture, Interior Architecture and Design and Landscape Architecture) and can be found below.

The Fay Jones School of Architecture and Design Honors Program provides opportunities for students of superior academic and creative ability to enhance and enrich their professional and liberal education. Students in the Architecture Honors Program are eligible to graduate cum laude, magna cum laude, and summa cum laude. All other students who attain a cumulative GPA of 3.5 or higher will be eligible to graduate with distinction, a classification separate from the cum laude awards. The school's Honors Program requires 18 credits of honors coursework.

## Admission to the Fay Jones School Honors Program

The Honors College will automatically enroll freshmen who are accepted as honors students before summer orientation in the Fay Jones School Honors Program. At summer orientation, these honors students will fill out the Fay Jones School Honors Program enrollment form.

Freshmen who were not admitted by the Honors College before orientation but who come to orientation with the qualifying 28 composite ACT score and 3.75 high school GPA will also fill out the Fay Jones

School Honors Program Enrollment form at orientation. Students who do not present both 28 composite ACT and 3.75 high school GPA, but who subsequently earn and maintain a 3.5 GPA in their coursework at the $U$ of A, will be invited to enroll in the Fay Jones Honors Program as soon as they attain a 3.5 GPA, provided it is still possible for them to complete all of the Honors program requirements at the time of their enrollment.

Transfer students may be invited to join the Fay Jones School Honors Program if they maintain a cumulative GPA of 3.5 or higher in courses completed at the University of Arkansas.

Every semester, the school's advising center will apprise the Fay Jones School Honors Program Committee of students who have achieved this level of excellence and are eligible to join the Fay Jones School Honors Program. Invitations are extended to students by the end of the semester in which the candidacy is advanced.

## Confirmation of Intent to Complete the Fay Jones School Honors Program

At the end of the first semester of the third year, students will sign a form, confirming their intention to complete the remaining requirements for their honors degree. Students found not to have successfully completed the honors core course(s) needed to satisfy their Honors degree requirements (i.e., sufficient credits in University Core and/or Professional Core Honors courses) will be dismissed from the honors program at this time.

## Dismissal from the Fay Jones School Honors Program

The Fay Jones School Honors Program students who fail to maintain a 3.5 cumulative GPA, depending on their year level, will receive a onesemester probation period prior to dismissal from the program.

## Honors Independent Study Policy

Honors students may take as many regular or honors independent study credits as they deem desirable, but only one three-credit honors independent study course may be substituted for an Honors Professional Elective course. Furthermore, the substitution will be permitted only if all of the following conditions are satisfied:

- That the honors independent study course not be taken concurrently with capstone credit studio.
- That the honors independent study course not be taught by the student's capstone director.
- That honors independent study course be substituted for no more than three credits of a student's required professional electives credits.

It is recommended that students considering this option seek special advising from their faculty mentor. As it is helpful for students to know what is expected of them, the work of the honors independent study (research paper, models, prototypes, etc.) should be determined, and agreed upon, by the professor and student before the student registers for the credits. The school's advising center will register a student for an Honors Special Projects course only upon request of a syllabus or prospectus for the independent study from the student.

## Honors Capstone

All honors students will pursue a capstone project during the final year of their undergraduate program. Honors students will invest three credit hours in the development of a capstone project that will articulate research topics identified in the ARDS 3153H Honors Methods of Design Inquiry course taken spring semester in a students' third year. Guidelines
for topic selection and preparation of the honors capstone project are available from the Honors Committee.

All Fay Jones Honors students are held to the highest standard with regard to academic achievement and academic integrity. Students violating the Academic Integrity policy that receive a sanction of \# 1.0 at the University of Arkansas will be permanently removed from the Fay Jones Honors Program without the ability to reapply. The student may appeal the decision to the University's Academic Integrity Board; if the sanction is overturned and removed, the student will be reinstated into the Fay Jones Honors Program.

The honors capstone is a student-directed project supervised by a capstone director with expertise in the capstone topic. The capstone director, who must be a faculty member in the Fay Jones School, chairs a capstone committee to be comprised of two other members, typically, a departmental faculty member and a non-departmental faculty member who brings additional fields of knowledge to the project. In rare cases when the capstone director, in consultation with the School's Honors Committee and the student, determines that a non-departmental faculty member with expertise appropriate to the capstone in question cannot be identified on campus, an extra-disciplinary member from within the Fay Jones School (e.g., faculty in architectural history, technology, or other allied field) may fill the position of the non-departmental member. Any such exceptions to the standard membership of a capstone committee should be infrequent. The point of including non-departmental participation is to help ensure that a student's research is understandable and valid to an informed community outside of the disciplines of architecture, interior design or landscape architecture. Additional faculty, both departmental or non-departmental, as well as non-academic experts, may participate in any honors capstone as non-committee members, if the capstone director welcomes their involvement. Students will complete and present a written prospectus for the Honors Capstone no later than the Friday before summer break in their third year of study. The prospectus will be a product of the ARDS 3153H Honors Methods of Design Inquiry course. Students shall meet a schedule of interim requirements established by the capstone committee in consultation with the School's Honors Committee.

## Requirements for Fay Jones School of Architecture and Design Honors Program Scholars

Completion of 18 hours of honors designated courses, to include a minimum of:

| Honors elective (any Honors course at the university) 3 <br> Honors Professional Core (any Honors professional core in the Fay <br> Jones School) 3 <br> Honors Professional Electives or upper-level (3000+) university <br> honors courses 6 <br> ARDS 3153H Honors Methods of Design Inquiry <br> ARDS 5143H Honors Capstone |  |
| :--- | ---: |
| Total Hours | 3 |

## Architectural Studies (ARCH)

Department Office
115 Vol Walker Hall

## Bachelor of Science in Architectural Studies

The Bachelor of Science in Architectural Studies incorporates course work from the school with liberal studies for students with interests that fall outside the parameters of the accredited professional degree program. The architectural studies program provides opportunities for students who wish to prepare for graduate study in an accredited architecture program or in an allied discipline, such as architectural history, historic preservation, urban planning, or construction management, as well as serving students who seek opportunities in related fields that may not require the five-year accredited degree.

Architectural Studies degree candidates may pursue an academic minor. The minor must be in a field other than the major area, and students must notify the department of their intention to minor. An academic minor ordinarily consists of 15-18 hours.

Although foreign study is not required of candidates for the four-year degree, students in the architectural studies curriculum are encouraged to participate in the school's approved off-campus study programs.

To take maximum advantage of the opportunities the four-year degree offers for pre-professional development (cultivation of specialization in and related to the field, and/or preparation for graduate study) each candidate for the Architectural Studies degree will work with a faculty adviser to develop a program of study emphasizing a student's special interests.

## Requirements for a Bachelor of Science Degree in Architectural Studies:

1. Completion of the following 31 -hour architectural studies program: Architectural Design
ARCH 1015 Fundamental Design Skills 5

ARCH 1025 Fundamental Design Methodology 5
Architectural Technology
ARCH 1212 Design Thinking I: Foundations in Technology 2
ARCH 2132 Environmental Technology I 2
History and Theory of Architecture
ARCH $1013 \quad$ Diversity and Design
ARCH 1222 Design Thinking II: Foundations in History 2
ARCH 2233 History of Architecture I 3
ARCH 2243 History of Architecture II 3
ARCH 4433 History of Architecture III 3
ARCH 4523 Architectural Theory 3
(Students interested in Landscape Architecture may substitute LARC 3413 for ARCH 2233 or ARCH 2243.)

## Total Hours

31
2. Completion of the following 35 -hour state minimum core (p. 81): English Composition

| ENGL 1013 | Composition I (ACTS Equivalency $=$ ENGL <br> 1013) |
| :--- | :--- |
| ENGL 1023 | Composition II (ACTS Equivalency $=$ ENGL <br> $1023)$ |

American History or Government
Select one of the following:
3
HIST 2003 History of the American People to 1877 (ACTS Equivalency = HIST 2113)
$\left.\begin{array}{lll}\text { HIST } 2013 & \begin{array}{l}\text { History of the American People, 1877 to Present } \\ \text { (ACTS Equivalency = HIST 2123) }\end{array} \\ \text { PLSC } 2003 & \begin{array}{l}\text { American National Government (ACTS } \\ \text { Equivalency = PLSC 2003) }\end{array} \\ \text { Mathematics }\end{array} \quad \begin{array}{ll}\text { Select one of the following: }\end{array}\right]$

Total Hours
3. Completion of 45 hours of electives as follows:

Professional Concentration Electives
Concentration tracks can include: M.Arch. preparation; historic preservation; environmental technologies and sustainability; urban and regional planning; a recognized minor in an allied discipline; and other similar programs of study, subject to approval; including at least nine hours of upper-level courses in FJSOA.
Upper Division Electives outside of FJSOA
Interdisciplinary Core 9
Nine hours to include at least one course in IDES and one course in LARC

Total Hours
4. Free Electives 12
5. A minimum of 120 hours with a 2.00 cumulative grade-point average at this institution both in all work attempted and in course work completed in the Fay Jones School of Architecture.
6. Presentation of at least 40 semester hours in courses numbered 3000 or above or courses in the Fay Jones School of Architecture (or allied discipline) numbered 2000 with specific course prerequisites.
7. UNIV 1001 University Perspectives does not count toward degree credit.

## Architectural Studies B.S. Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 67) for university requirements of the program. During the first year, students who have been admitted to the fall-spring design studio and students who have been to the summersummer design studio follow different schedules, both of which are listed below, with the fall-spring studio first and then the summer-summer studio. The second, third and fourth years are identical for both scenarios.

## Fall-Spring Design Studio

HIST 2013 History of the American
People, 1877 to Present (ACTS
Equivalency = HIST 2123)
PLSC 2003 American National
Government (ACTS Equivalency = PLSC 2003)

PHYS 1044 Physics for Architects I
Fine Arts or Humanities Core

These students may continue into
ARCH 1015 Architectural Design I in the summer if they meet the following criteria: "C" or better in PHYS 1044 Physics for Architects I or an approved equivalent; Maintain a 2.0 GPA. Students who do not meet these criteria will be delayed until they satisfy the admissions criteria for the Department of Architecture. Students will be reviewed at the end of the first summer session and will not be allowed to continue in the program if they do not meet the following criteria: "C" or better in ARCH 1015 Architectural Design I; "C" or better in ARCH 1212 Design Thinking I: Foundations in Technology; Maintain a 2.0 GPA.
ENGL 1023 Composition II (ACTS
Equivalency = ENGL 1023)
Social Science Core
PHYS 1054 Physics for Architects II
(strongly recommended)
Fine Arts or Humanities Core
(whichever is still needed)
ARCH 1015 Fundamental Design Skills
ARCH 1212 Design Thinking I:

## Academic Policies

1. Any student receiving a grade of " $D(+/-)$ " in a pre-professional program studio course is subject to a comprehensive review of his/her
semester's work by the Design Review Committee. The committee can require the student to retake the studio, prior to advancing to the next studio in sequence, in order to demonstrate competence by achieving a grade of " $C$ " (2.00) or better. A student receiving an " $F$ " in any required design studio must repeat that studio before progressing.
2. Each student's progress through the Design Studio sequence is monitored and governed by the faculty and subject to a design review process.
3. Any student receiving an "l" in a design studio must complete all work necessary to receive a grade in that studio prior to the first day of the next studio in the student's prescribed sequence. Students carrying a grade of "l" will not be permitted to enroll in subsequent studios.
4. Prior to graduation, a student must present a 2.00 cumulative gradepoint average in all work at this institution.

## Faculty

Baker, Emily, M.Arch. (Cranbrook Academy of Art), B.Arch. (University of Arkansas), Assistant Professor, 2017.
Blackwell, Marlon, M. Arch. (Syracuse University), B.Arch. (Auburn University), Distinguished Professor, 1992, 2010.
Boelkins, Jonathan, M.Arch. (Washington University in St. Louis), B.Arch. (University of Arkansas), Instructor, 2017.

Colangelo, Jessica L., M.Arch. (Princeton University), B.Arch. (Rice University), Assistant Professor, 2018.
Del Gesso, Emilio, B.A. (University of Rome), Assistant Professor, 1997.
Elberfeld, Nathaniel, S.M.Arch.S. (Massachusetts Institute of
Technology), M.Arch. (Washington University in St. Louis), B.S. (William and Mary), Visiting Assistant Professor, 2021.
Fitzpatrick, Lynn, M.Arch. (Rice University), B.S. (Cornell University),
Teaching Associate Professor, 1999, 2023.
Folan, John, M.Arch (University of Pennsylvania), B.S.Arch (University of Illinois), Professor, 2019.
Goodstein-Murphree, Ethel S., Ph.D. (University of Michigan-Ann
Arbor), B.Arch., B.S. (City University of New York), Professor, 1992, 1998.
Herman, Greg, M.Arch. (Rice University), B.Arch. (University of Cincinnati), Associate Professor, 1991, 1998.
Holland, Brian, M.Arch.,(University of Pennsylvania), B.Arch., (California State Polytechnic University, Pomona), Assistant Professor, 2018.
Jacobus, Frank R., M.Arch. (University of Texas at Austin), Associate Professor, 2012, 2015.
Kennedy, David, M.Des. (Harvard University), B.Arch. (Carnegie Mellon University), Assistant Professor, 2021.
Kuhns, Alyssa, M.I.D. (Pratt Institute), B.Arch. (Carnegie Mellon University), Assistant Professor, 2021.
Luoni, Stephen D., M.Arch. (Yale University), B.S.Arch. (Ohio State University), Professor, 2003, 2006.
MacKeith, Peter, M.Arch. (Yale University), B.A. (University of Virginia), Professor, 2014.
Messadi, Tahar, Ed.D., M.Arch. (University of Michigan-Ann Arbor), B.Arch. (Universite de Constantine, Algeria), Associate Professor, 2003, 2009.

Rotolo, Chuck, M.Arch. (Washington University in St. Louis), B.Arch. (Louisiana State University), Assistant Professor, 2005.
Rudzinski, Russell D., M.A. (Washington University in St. Louis), B.Arch. (Syracuse University), Assistant Professor, 2000.
Sexton, Kim, Ph.D., M.A., M.Phil. (Yale University), B.A. (State University of New York at Binghampton), Associate Professor, 1999, 2005.
Shannon, Graham F., M.Arch. (Rice University), B.Arch., B.A. (University of Arkansas), Professor, 1979, 1990.
Terry, Laura, M.F.A. (Savannah State University), B.S. (Auburn
University), Associate Professor, 1998, 2007.

Turner, Alison, M.A. (Parsons School of Design), B.A. (Kentucky State University), Assistant Professor, 2008.
Veloso, Pedro, M.Sc. (University of Sao Paulo), B.Arch., B.U.D.
(University of Brasilia), Assistant Professor, 2021.

## Courses

ARCH 1003. Basic Course in the Arts: Architecture Lecture. 3 Hours.
A general introduction to architecture, exploring the designed environment, including cities and buildings and their histories, technologies and users, in a holistic manner. May not be presented towards satisfaction of major requirements in either the B.Arch or B.A. in architectural studies degrees. (Typically offered: Fall and Spring)

ARCH 1003H. Honors Basic Course in the Arts: Architecture Lecture. 3 Hours.
A general introduction to architecture, exploring the designed environment, including cities and buildings and their histories, technologies, and users, in a holistic manner. May not be presented towards satisfaction of major requirements in either the B.Arch or B.A. in architectural studies degrees. Prerequisite: Honors candidacy. (Typically offered: Fall)
This course is equivalent to ARCH 1003.
ARCH 1013. Diversity and Design. 3 Hours.
Explores the reciprocal relationship between diversity and design in America, investigating how race, gender, religion, ability, age, class, and location affect and are affected by the design of media, products, architecture, and cities/regions. Positive and negative effects of diversity and design are discussed. (Typically offered: Summer)

## ARCH 1015. Fundamental Design Skills. 5 Hours.

Fundamental design skills; development of visual and verbal communication skills including observation skills, design technologies, analysis and representation in both 2 -dimensions and 3 -dimensions through analog and digital tools; creative and critical thinking skills. (Typically offered: Fall and Spring)

## ARCH 1025. Fundamental Design Methodology. 5 Hours.

Fundamental design skills; use of precedents for understanding principles of design and natural and formal ordering systems; design development using both iterative and alternative methods of exploration in both 2-dimensions and 3-dimensions using analog and digital tools; continued development of visual and verbal communication skills. Prerequisite: ARCH 1015. (Typically offered: Spring and Summer)
ARCH 1212. Design Thinking I: Foundations in Technology. 2 Hours.
This course will raise pertinent questions about the role of architectural technology in design through studying the important theories about technology from Vitruvius to contemporary practice and understanding how they have been manifested in built form. (Typically offered: Fall and Summer)
ARCH 1222. Design Thinking II: Foundations in History. 2 Hours.
Explores the role of architectural history in design thinking, introducing divergent canons and traditions in a global context and emphasizing understanding of the relationships among buildings, spaces and places and the social, political and technological circumstances in which the work was theorized, produced, and lived. Prerequisite: ARCH 1212. (Typically offered: Spring and Summer)
ARCH 1600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)
ARCH 2016. Architectural Design III. 6 Hours.
Introduction of formal principles and strategies used in space making, focusing on the development of plans and sections. Precedents and the understanding of them through analysis and syntheses are used as a means of examining the past and the present while providing a framework from which personal design sensibilities can evolve. Corequisite: ARCH 2113 and ARCH 2132 and ARCH 2233. Prerequisite: ARCH 1025 and ARCH 1222. (Typically offered: Fall)

## ARCH 2026. Architectural Design IV. 6 Hours.

An elaboration of space-making, addressing three-dimensional aspects of formmaking, including the influence of structural systems, articulation of the vertical section, and exterior expression; the role of site as a generator of form; and the overarching importance of technics, including the materiality of space, structure, and light. Corequisite: ARCH 2123 and ARCH 2243. Prerequisite: ARCH 2016 and ARCH 2113 and ARCH 2132 and ARCH 2233. (Typically offered: Spring)
ARCH 2113. Architectural Structures I. 3 Hours.
Introduction to statics and strength of materials. Building loads are examined as to their effect on the elements of architectural projects. Simple post and beam structures are the focus of this course. Bending, axial, and shear stress are examined in beams and columns. Materials studied include wood, steel, and concrete. Corequisite: ARCH 2016 and ARCH 2132. Prerequisite: ARCH 1212. (Typically offered: Fall)
ARCH 2113H. Honors Architectural Structures I. 3 Hours.
Introduction to statics and strength of materials. Building loads are examined as to their effect on the elements of architectural projects. Simple post and beam structures are the focus of this course. Bending, axial, and shear stress are examined in beams and columns. Materials studied include wood, steel, and concrete. Corequisite: ARCH 2016 and ARCH 2132. Prerequisite: ARCH 1212. (Typically offered: Fall)
This course is equivalent to ARCH 2113.

## ARCH 2123. Architectural Structures II. 3 Hours.

Introduction to the basic theories of structures, structural behavior, and the design of simple structural systems capable of resisting gravity and lateral forces. Provides a basic understanding of structural behavior, organization of framing systems and location of lateral force resisting elements for building structures and other technical systems. Corequisite: ARCH 2026. Prerequisite: ARCH 2113 and ARCH 2132. (Typically offered: Spring)

## ARCH 2123H. Honors Architectural Structures II. 3 Hours.

Introduction to the basic theories of structures, structural behavior, and the design of simple structural systems capable of resisting gravity and lateral forces. Provides a basic understanding of structural behavior, organization of framing systems and location of lateral force resisting elements for building structures and other technical systems. Corequisite: ARCH 2026. Prerequisite: ARCH 2113, ARCH 2132 and honors candidacy. (Typically offered: Spring)
This course is equivalent to ARCH 2123.

## ARCH 2132. Environmental Technology I. 2 Hours.

Introduces theories and concepts of the building thermal, luminous and sonic environments with focus on solar geometry-shading, climate-thermal stresses, natural ventilation, daylight, sound isolation and noise control. The application of these systems to support the design of an environmentally responsive building and its enclosure is addressed. Corequisite: ARCH 2016 and ARCH 2113. Prerequisite: ARCH 1212. (Typically offered: Fall)

## ARCH 2132H. Honors Environmental Technology I. 2 Hours.

Introduces theories and concepts of the building thermal, luminous and sonic environments with focus on solar geometry-shading, climate-thermal stresses, natural ventilation, daylight, sound isolation and noise control. The application of these systems to support the design of an environmentally responsive building and its enclosure is addressed. Corequisite: ARCH 2016 and ARCH 2113. Prerequisite: ARCH 1212. (Typically offered: Fall)
This course is equivalent to ARCH 2132.
ARCH 2233. History of Architecture I. 3 Hours.
Critical study and analysis of world architecture from ancient times through the Middle Ages, comprising the ancient Americas, Asia, Mesopotamia, and Egypt; Classical, Byzantine, and Islamic architecture and vernacular design; and the early Christian, Romanesque, and Gothic periods. (Typically offered: Fall)

## ARCH 2233H. Honors History of Architecture I. 3 Hours.

Critical study and analysis of world architecture from ancient times through the Middle Ages, comprising the ancient Americas, Asia, Mesopotamia, and Egypt; Classical, Byzantine, and Islamic architecture and vernacular design; and the early Christian, Romanesque, and Gothic periods. Prerequisite: Honors candidacy. (Typically offered: Fall)
This course is equivalent to ARCH 2233.
ARCH 2243. History of Architecture II. 3 Hours.
Critical study and analysis of world architecture from the fifteenth to the midnineteenth centuries. Encompasses early modern Europe (Renaissance, Baroque, and Neoclassical) as well as two or more of the following: colonial New Spain, early modern Japan, and/or early modern Islamic empires in Africa, the Middle East, and Asia. Vernacular American building is surveyed as well as architecture in the nineteenth-century, including Beaux-Arts design and the introduction of industrial materials. Prerequisite for architecture majors only: ARCH 2233. (Typically offered: Spring)

## ARCH 2243H. Honors History of Architecture II. 3 Hours.

Critical study and analysis of world architecture from the fifteenth to the midnineteenth centuries. Encompasses early modern Europe (Renaissance, Baroque, and Neoclassical) as well as two or more of the following: colonial New Spain, early modern Japan, and/or early modern Islamic empires in Africa, the Middle East, and Asia. Vernacular American building is surveyed as well as architecture in the nineteenth-century, including Beaux-Arts design and the introduction of industrial materials. Prerequisite: Architecture majors only. Corequisite: ARCH 2233 and honors candidacy. (Typically offered: Spring)
This course is equivalent to ARCH 2243.

## ARCH 2600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)
ARCH 2993. Art and Culture in Italy. 3 Hours.
The evolution of culture and aesthetics and their immediate relationship with the creation of Italy's masterpieces in art and architecture. Includes site visits and lectures. Offered in the Rome study abroad semester. (Typically offered: Fall and Spring)

## ARCH 3016. Architectural Design V. 6 Hours.

Emphasis on issues of design process, exploration of internal and external determinants of form and the integration of appropriate technologies in design solutions. Corequisite: ARCH 4433. Prerequisite: ARCH 2026 and ARCH 2123 and ARCH 2243. (Typically offered: Fall)

## ARCH 3026. Architectural Design VI. 6 Hours.

Studio-based analysis and design of structural and enclosure systems for buildings with particular emphasis on systems interface and application within the context of design exercises. Investigations of the appropriate use of materials and assemblies for varied programmatic and environmental criteria. Twelve hours of studio each week. Corequisite: ARCH 4523. Prerequisite: ARCH 3016 and ARCH 3143. (Typically offered: Spring)

## ARCH 303V. Special Projects. 1-6 Hour.

Individual or group investigation in research, visual communication, history, or design concerning special interests of student or faculty. (Typically offered: Irregular) May be repeated for degree credit.

ARCH 303VH. Honors Special Projects. 1-6 Hour.
Individual or group investigation in research, visual communication, history, or design concerning special interests of student or faculty. Prerequisite: Honors candidacy. (Typically offered: Irregular) May be repeated for degree credit. This course is equivalent to ARCH 303 V .

## ARCH 3143. Building Materials and Assemblies. 3 Hours.

Introduction and comprehensive survey of primary building materials and methods of assembly: their history, properties, use and configuration - both traditional and contemporary, in the service of building construction; their impact on the form, expression and performance of building structures and envelopes. Prerequisite: ARCH 2132, ARCH 2113 and ARCH 2123. (Typically offered: Fall)

## ARCH 3253. Environmental Technology II. 3 Hours.

Covers theoretical foundations and applications of building environmental systems: HVAC with duct layout and controls, indoor air quality, electric lighting, power, acoustics, fire safety and egress, and water and waste. The important role of such systems in the design of buildings is examined through a series of small projects assignments. Prerequisite: ARCH 3016 and ARCH 3143. (Typically offered: Spring)

## ARCH 3600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

## ARCH 4016. Comprehensive Studio. 6 Hours.

Emphasis on issues of typology, context and technological suitability as sources of theoretical and developmental responses. Corequisite: ARCH 4152. Prerequisite: ARCH 3026. (Typically offered: Fall)

## ARCH 4023. Advanced Architectural Studies. 3 Hours.

Advanced seminars in subjects to special interest to students and faculty. (Typically offered: Fall and Spring) May be repeated for degree credit.

ARCH 4023H. Honors Advanced Architectural Studies. 3 Hours.
Advanced seminars in subjects to special interest to students and faculty.
Prerequisite: Honors candidacy. (Typically offered: Fall and Spring) May be repeated for degree credit.
This course is equivalent to ARCH 4023.
ARCH 4116. Architectural Design - Rome. 6 Hours.
Investigation of complex design problems in the context of the city of Rome, utilizing advanced issues in architectural design and planning. Prerequisite: ARCH 3026 or ARCH 4016. (Typically offered: Fall and Spring)

## ARCH 4126. Architectural Design Latin America. 6 Hours.

Introduces a complex social and physical urban condition through a process of formal analysis and design executed in a designated country augmented by an intense graphic investigation of urban form encountered through related field trips to the distinct cultural and geographic regions. Prerequisite: ARCH 3026 or ARCH 4016. (Typically offered: Summer)

## ARCH 4152. Building Systems Integration. 2 Hours.

Promotes the synthesis of building technologies, systems selection and integration in the resolution of a building design. Specifically, the student demonstrates knowledge in the ability to generate digital and analog graphic resolutions highlighting the design response of material, structural and environmental systems in a building. Corequisite: ARCH 4016. Prerequisite: ARCH 2113 and ARCH 2123 and ARCH 2132 and ARCH 3143 and ARCH 3253. (Typically offered: Fall and Spring)

## ARCH 4152H. Honors Building Systems Integration. 2 Hours.

Promotes the synthesis of building technologies, systems selection and integration in the resolution of a building design. Specifically, the student demonstrates knowledge in the ability to generate digital and analog graphic resolutions highlighting the design response of material, structural and environmental systems in a building. Corequisite: ARCH 4016. Prerequisite: ARCH 2113 and ARCH 2123 and ARCH 2132 and ARCH 3143 and ARCH 3253. (Typically offered: Fall and Spring) This course is equivalent to ARCH 4152.

## ARCH 4433. History of Architecture III. 3 Hours.

Critical study and analysis of the history and theories of modern architecture from the mid-nineteenth century to the present. Prerequisite: ARCH 2233 and ARCH 2243 or IARD 2883. (Typically offered: Fall)

ARCH 4433H. Honors History of Architecture III. 3 Hours.
Critical study and analysis of the history and theories of modern architecture from the mid-nineteenth century to the present. Prerequisite: ARCH 2233, ARCH 2243 and honors candidacy. (Typically offered: Fall)
This course is equivalent to ARCH 4433.
ARCH 4523. Architectural Theory. 3 Hours.
Introduction to the lexicon of architecture and the ideas and ideologies that provide the conceptual and critical infrastructure for the discipline. Reading and discussion of representative theory texts. Emphasis on twentieth century modernism and postmodernism, including contemporary speculations on possible and emerging forms of practice after theory. Prerequisite: ARCH 2233, ARCH 2243, and ARCH 4433. (Typically offered: Spring)
ARCH 4523H. Honors Architectural Theory. 3 Hours.
Introduction to architectural theories and their relationship to modern historiography. Case studies are employed for the critical evaluation of significant texts and the discernment of concepts embedded in textual structures. Reading theory through established historical categories establishes critical insight to the original deployment, negation and resurfacing of architectural theories. Prerequisite: ARCH 2233, ARCH 2243, and ARCH 4433. (Typically offered: Spring) This course is equivalent to ARCH 4523.

ARCH 4600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)
ARCH 4653. Architecture of the City. 3 Hours.
Analysis of Rome's urban form and historical and theoretical information in support of the students' experience. Includes site visits and lectures. Offered in the Rome study abroad semester. (Typically offered: Fall and Spring)
ARCH 4653H. Honors Architecture of the City. 3 Hours.
Analysis of Rome's urban form and historical and theoretical information in support of the students' experience. Includes site visits and lectures. Offered in the Rome study abroad semester. Prerequisite: Honors standing. (Typically offered: Fall and Spring)
This course is equivalent to ARCH 4653.

## ARCH 4673. Modern and Contemporary Rome. 3 Hours.

Explores different local conditions that determine main architectural changes that have taken place in Rome during the last century of its urban history. Important works, leading figures and major concepts in contemporary European architecture will be described to introduce examples of modern and contemporary architecture in Rome. (Typically offered: Fall and Spring)

## ARCH 4673H. Honors Modern and Contemporary Rome. 3 Hours.

Explores different local conditions that determine main architectural changes that have taken place in Rome during the last century of its urban history. Important works, leading figures and major concepts in contemporary European architecture will be described to introduce examples of modern and contemporary architecture in Rome. Prerequisite: Honors standing. (Typically offered: Fall and Spring)
This course is equivalent to ARCH 4673.
ARCH 4853. Renaissance and Baroque Architecture. 3 Hours.
Study of Renaissance and Baroque architecture in Europe and the New World from 1400 to 1700 . With reference to an array of texts, drawings, and the edifices themselves, this course charts the evolution of a commanding Western architectural tradition. Renaissance and Baroque -- with close attention to the social, humanistic, and religious contexts that produced it. Prerequisite: ARCH 4433. (Typically offered: Irregular)
This course is equivalent to ARHS 4753.

## ARCH 4863H. Honors St. Peter's and the Vatican. 3 Hours.

Examines art and architectural history of St. Peter's Basilica in Rome from antiquity to present. Emphasis on the Renaissance/Baroque church and its early Christian predecessor. Students consider the impact of devotional practices and papal politics on the church, the Vatican Palace, and its renown artworks including the Sistine ceiling. Prerequisite: ARCH 2233 or ARCH 2233H, and ARCH 2243 or ARCH 2243H and ARCH 4433 or ARCH 4433H. (Typically offered: Irregular)
This course is equivalent to ARHS 4733.
ARCH 4933. Introduction to Historic Preservation. 3 Hours.
Introduces theoretical, methodological and practical issues of architectural preservation in Europe and, more specifically, in Italy. Addresses history and theory of restoration, basic principles of architectural preservation and methodology in the study and praxis of preservation applied to architecture and the issues posed by the preservation of modern architecture. (Typically offered: Fall and Spring)

ARCH 5016. Option Studio I. 6 Hours.
Project development dependent upon the synthesis of knowledge and application of critical thinking addressing architectural issues at multiple scales. Prerequisite: ARCH 4016, or ARCH 4116, or ARCH 4126. (Typically offered: Fall) May be repeated for degree credit.

## ARCH 5026. Option Studio II. 6 Hours.

Project resolution including demonstrated skill in generating design ideas supported by clear understanding of issues resulting in comprehensive development and presentation of architectural issues at multiple scales. (Typically offered: Spring) May be repeated for degree credit.

## ARCH 5314. Architectural Professional Practice. 4 Hours

Study of role and responsibility of the architect, owner, and contractor relationships; professional ethics; organization of the architect's office; contracts and other documents; risk management strategies; and the preparation of the technical specifications and bidding documents of the Project Manual. Prerequisite: ARCH 4016 or ARCH 4116 or ARCH 4126. (Typically offered: Fall)

ARCH 5493. History of Urban Form. 3 Hours.
The study of pre-industrial urban and architectural design strategies in cities from the Classical through the Baroque eras and their rediscovery in the late 20th century, providing the student with a designer's understanding of a broad range of exemplary urban spaces and the buildings that shape them. Prerequisite: ARCH 2233 and ARCH 2243 and ARCH 4433. (Typically offered: Irregular)

ARCH 5493H. Honors History of Urban Form. 3 Hours.
The study of pre-industrial urban and architectural design strategies in cities from the Classical through the Baroque eras and their rediscovery in the late 20th century, providing the student with a designer's understanding of a broad range of exemplary urban spaces and the buildings that shape them. Prerequisite: ARCH 2233 and ARCH 2243 and ARCH 4433. (Typically offered: Irregular)
This course is equivalent to ARCH 5493.
ARCH 5953. Preservation Practice Field Trip. 3 Hours.
Intensive field study of a domestic or foreign site of significant or precedentsetting preservation activity, through a field trip and a course of pre-travel lectures. (Intersessions) Prerequisite: ARCH 4943 or instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

## Architecture (ARCH)

## Department Office

115 Vol Walker Hall

The Bachelor of Architecture prepares students for registration and licensure to practice architecture. Architects are licensed professionals trained in the art and science of the design and construction of buildings and structures that primarily provide shelter. Additionally, architects may be involved with designing the total built environment-from how a building integrates with its surrounding landscape to architectural or
construction details that involve the interior of the building to designing and creating furniture to be used in a specific space. An architect will create the overall aesthetic and look of buildings and structures, but the design of a building involves far more than its appearance. Buildings also must be functional, safe and economical and must suit the specific needs of the people who use them. Most importantly, they must be built with the public's health, safety and welfare in mind.

## Architecture - National Architectural Accrediting Board

In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with U.S. regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards. Doctor of Architecture and Master of Architecture degree programs may require a pre-professional undergraduate degree in architecture for admission. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

The University of Arkansas Fay Jones School of Architecture and Design's department of architecture offers the following NAAB-accredited degree program:

- B.Arch. (157 undergraduate credits)

The last accreditation visit for the B.Arch. programs was conducted in February 2014.

The National Architectural Accrediting Board (NAAB) only accredits professional programs offering the Bachelor of Architecture, which requires a minimum of five years of study, and the Master of Architecture degrees. These professional degrees are structured to educate those who aspire to registration and licensure to practice as architects. The curricular requirements for awarding these degrees must include three components - general studies, professional studies, and electives. Together these three components comprise a liberal education in architecture and ensure that graduates will be technically competent, critical thinkers who are capable of defining multiple career paths within a changing societal context.

No four-year degrees are accredited by NAAB, but the Bachelor of Science in Architectural Studies degree is excellent for those who want a foundation in the field of architecture as preparation for either continued education in a professional degree program or for employment in fields related to architecture.

## Bachelor of Architecture Degree

In addition to the State Minimum Core Requirements (https:// catalog.uark.edu/undergraduatecatalog/gened/stateminimum/), the following course requirements must be met.

Students must complete:
State Minimum Core Requirements including:

## Mathematics

Select one of the following:
MATH 1213 Plane Trigonometry (ACTS Equivalency = MATH 1203)

| MATH 2043 | $\begin{aligned} & \text { Survey of Calculus (ACTS Equivalency }=\text { MATH } \\ & \text { 2203) } \end{aligned}$ |  |
| :---: | :---: | :---: |
| MATH 2053 | Finite Mathematics |  |
| Laboratory Science (8 hours required) |  |  |
| Select four hours from the following: |  |  |
| PHYS 1044 | Physics for Architects I |  |
| PHYS 2013 \& PHYS 201 | ```College Physics I (ACTS Equivalency = PHYS 2014 Lecture) and College Physics I Laboratory (ACTS Equivalency = PHYS 2014 Lab)``` |  |
| Strongly recommend |  |  |
| Select four hours from the following: |  |  |
| PHYS 1054 | Physics for Architects II |  |
| PHYS 2033 <br> \& PHYS 203 | ```College Physics II (ACTS Equivalency = PHYS 2024 Lecture) and College Physics II Laboratory (ACTS Equivalency = PHYS 2024 Lab)``` |  |
| Architectural Design |  |  |
| Completion of the following 94 hour professional program: |  |  |
| ARCH 1015 | Fundamental Design Skills | 5 |
| ARCH 1025 | Fundamental Design Methodology | 5 |
| ARCH 2016 | Architectural Design III | 6 |
| ARCH 2026 | Architectural Design IV | 6 |
| ARCH 3016 | Architectural Design V | 6 |
| ARCH 3026 | Architectural Design VI | 6 |
| ARCH 4016 | Comprehensive Studio | 6 |
| ARCH 4116 | Architectural Design - Rome | 6 |
| ARCH 5016 | Option Studio I | 6 |
| ARCH 5026 | Option Studio II | 6 |
| Architectural Technology |  |  |
| ARCH 1212 | Design Thinking I: Foundations in Technology | 2 |
| ARCH 2113 | Architectural Structures I | 3 |
| ARCH 2123 | Architectural Structures II | 3 |
| ARCH 2132 | Environmental Technology I | 2 |
| ARCH 3143 | Building Materials and Assemblies | 3 |
| ARCH 3253 | Environmental Technology II | 3 |
| ARCH 4152 | Building Systems Integration | 2 |
| History and Theory of Architecture |  |  |
| ARCH 1222 | Design Thinking II: Foundations in History | 2 |
| ARCH 2233 | History of Architecture I | 3 |
| ARCH 2243 | History of Architecture II | 3 |
| ARCH 4433 | History of Architecture III | 3 |
| ARCH 4523 | Architectural Theory | 3 |

## Professional Practice

ARCH 5314 Architectural Professional Practice 4
Completion of 28 hours of electives, as follows:
Professional Electives
Chosen from upper-level courses (courses numbered 3000 or above) taught on the Fayetteville campus or approved study abroad programs in the Fay Jones School of Architecture and Design and allied disciplines.
Free Electives
Total Hours

1. A minimum of 157 hours with a 2.00 cumulative grade-point average at this institution both in all work attempted and in all professional course work attempted is required.
2. Participation for at least one semester in an approved international educational experience. (See Off-Campus Study Requirement (p. 238).)

NOTE: No more than three hours of physical education and/or R.O.T.C. may be counted toward a degree. Courses not acceptable toward degree credit include those of a remedial or orientation nature and whose content are considered to be measurably duplicated elsewhere in the curriculum.

By following the preceding curriculum, students will meet the state minimum core requirements. They must also meet all other university requirements for graduation. See the university Academic Regulations (p. 60).

Sample curriculum for the Bachelor of Architecture degree can be obtained from the school's advising center.

## Professional Licensure Degree Requirement

The National Architectural Accrediting Board (NAAB) only accredits professional programs offering the Bachelor of Architecture, which requires a minimum of five years of study, and the Master of Architecture degrees. These professional degrees are structured to educate those who aspire to registration and licensure to practice as architects. The curricular requirements for awarding these degrees must include three components - general studies, professional studies, and electives. Together these three components comprise a liberal education in architecture and ensure that graduates will be technically competent, critical thinkers who are capable of defining multiple career paths within a changing societal context.

While no four-year degrees are accredited by NAAB, the Bachelor of Science in Architectural Studies degree is excellent for those who want a foundation in the field of architecture as preparation for either continued education in a professional degree program or for employment in fields related to architecture.

## Architecture B.Arch. Ten-Semester Degree Program

The professional program for a Bachelor of Architecture Degree requires 10 semesters of coursework and is not eligible for the EightSemester Degree Completion Program. It also requires admission to the professional program after the third year of classes. However, the following 10 -semester sample plan shows how a first-year student could obtain a Bachelor of Architecture Degree in five years if the student is admitted to the Fall-Spring Architectural Design Studio and subsequently is admitted to the professional program. Students not accepted into the fall studio will begin ARCH 1015 in the first summer session (granted all fall requirements are met) followed by ARCH 1025 in the second summer session.

Students should be aware that PHYS 1044, PHYS 1054 (or an approved alternate laboratory science in the state minimum core) and one of the listed MATH courses must be completed before students can begin second-year courses in Architecture. Transfer students and students who change majors and seek exceptions to the sample curriculum will be reviewed on an individual basis.

Students in the professional program are required to participate in an approved study abroad experience. Students can chose from either a
fall or spring semester of 4th year in Rome, Italy or a summer program (summer prior to 4th or 5th year) in a designated Latin or Central American country. Students can elect to participate in both but only one program can serve as a substitution for one fourth-year studio semester. Should a student participate in both study aboard programs, the additional program would go to professional elective hours.

${ }^{1}$ Students are reviewed at the end of the fall semester and may continue the program if they meet the following criteria: " $C$ " or better
in ARCH 1015, Architectural Design I; "C" or better in PHYS 1044, Physics for Architects I or an approved equivalent; "C" or better in ARCH 1212, Design Thinking I: Foundations in Technology; Maintain a 2.0 GPA. Students who do not meet these criteria will receive a letter and be advised accordingly.
${ }^{2}$ All state minimum core courses must be completed by the end of the third year. Admission to ARCH 4016 is contingent upon admission to the professional program.
${ }^{3}$ Students have demonstrated successful completion of the learning indicators identified for learning outcome 2.1, by meeting the prerequisites for MATH 2053, MATH 1213, or MATH 2043.
4 The Social Sciences Elective courses which satisfy General Education Outcome 3.3 include: AGEC 1103, AGEC 2103, ANTH 1023, COMM 1023, ECON 2013, ECON 2023, ECON 2143, EDST 2003, HDFS 1403, HDFS 2413, HDFS 2603, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2003, HIST 2013, HIST 2093, HUMN 1114H, HUMN 2114H, INST 2813, INST 2813H, PLSC 2003, PLSC 2013, PLSC 2203, PLSC 2813, PLSC 2813H, PSYC 2003, RESM 2853, SOCI 2013, SOCI 2013H, or SOCI 2033.
5 The Fine Arts Elective courses which satisfy General Education Outcome 3.1 include: ARCH 1003, ARHS 1003, COMM 1003, DANC 1003, LARC 1003, MLIT 1003, MLIT 1003H, MLIT 1013, MLIT 1013H, MLIT 1333, THTR 1003, THTR 1013, or THTR 1013 H.
6
The Humanities Elective courses which satisfy General Education Outcome 3.2 include: AAST 2023, ANTH 1033, ARCH 1013, CLST 1003, CLST 1003H, CLST 1013, COMM 1233, DANC 1003, ENGL 1213, GNST 2003, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2003, HIST 2013, HUMN 1124H, HUMN 2213, LALS 2013, MRST 2013, MUSY 2003, MUSY 2003H, PHIL 2003, PHIL 2003C, PHIL 2003H, PHIL 2103, PHIL 2103C, PHIL 2303, THTR 1003, THTR 1013, THTR 1013H, WLIT 1113, WLIT 1123, or intermediate-level world language (usually 2003-level).
7 If the student participates in the Rome program in the spring semester, the course plan for fourth year is reversed. Students may also choose to participate in the 10 -week Latin American study abroad program in the summer before their 3rd or 4th year. If a student chooses to do both programs, only one studio will count towards the required studio sequence. The additional hours may count towards professional programs.

## Academic Policies

In addition to the requirements of the university, the following academic policies are applicable to all students in the Department of Architecture.

1. Any student receiving a grade of " $D(+/-)$ " in a pre-professional program studio course is subject to a comprehensive review of his/her semester's work by the Design Review Committee. The committee can require the student to retake the studio, prior to advancing to the next studio in sequence, in order to demonstrate competence by achieving a grade of " C " (2.00) or better. A student receiving an " F " in any required design studio must repeat that studio before progressing.
2. Each student's progress through the Design Studio sequence is monitored and governed by the faculty and subject to a design review process.
3. Admission to the Professional Degree Program in the Department of Architecture requires a minimum 2.00 grade-point average in the University Core and each of the sub-disciplines of Architectural History/ Theory, Technology, and Design.
4. Enrollment in any $4^{\text {th }}$ year design studio, including comprehensive design studio (ARCH 4016 ), the Rome Center Design Studio (ARCH 4116), and the Latin American summer studio (ARCH 4126) is contingent upon admission to the professional program in architecture as described above.
5. Successful completion of the upper level studios of the professional degree program (ARCH 4016, ARCH 4116, ARCH 4126, ARCH 5016, and ARCH 5026) requires demonstration of competence as evidenced by achieving a grade of " $C$ " (2.00) or better in those courses. Failure to achieve this minimum standard will require retaking the studio.
6. Any student receiving an "l" in a design studio must complete all work necessary to receive a grade in that studio prior to the first day of the next studio in the student's prescribed sequence. Students carrying a grade of "l" will not be permitted to enroll in subsequent studios.
7. Prior to graduation, a student must present a 2.00 cumulative gradepoint average in all work at this institution.

## Design Review (Grade Appeal) Procedure The Design Review Process

Design Review is a process initiated by a faculty member, the Department Head or a student in order that (1) a faculty member may review a student's design work within a studio course, or (2) a student may appeal grades and/or seek resolution of conflicts with studio faculty in which it is believed that questions of fairness and equity have been raised by the application of the published grading policy of the faculty member. Faculty reviews are predicated upon, but are not limited to, the review of student work that has received a "D" grade or lower.

The Department Head will appoint a Design Review (Appeals) Committee at the beginning of each academic year. The Committee shall be composed of three (3) members of the permanent faculty. Additional or alternate members of the Committee may be appointed at the discretion of the Department Head or the Associate Dean.

Grade appeals initiated by students will occur during the week prior to the start of classes in the subsequent semester. Grade appeals may be filed through petition to the Office of the Associate Dean as soon as the student receives his or her final grade, but no later than the first day of the subsequent semester, (Monday of the week prior to the start of classes). In instances when the appeal concerns a change of an incomplete grade, petition for review should be made as soon as possible after the award of the final grade, and the review will be scheduled at the discretion of the Associate Dean.

## Protocol for the Design Review (Appeal) Process

1. Students are encouraged to meet with the faculty member(s) who has awarded the contested grade prior to filing a grade appeal. The student may request that his/her faculty advisor, a member of the professional advising staff, or the Associate Dean facilitate this meeting.
2. When a Design Review (Appeal) has been scheduled, the student shall exhibit, at the place and time specified by the Associate Dean's office, ALL work assigned and attempted for the studio in the semester under review. Faculty are required to provide the Design Committee with the course syllabus, grading policy, semester assignments, mid-term course assessment, and a written evaluation (a one-page rationale) of the full semester's work at least 48 -hours in advance of the Design Review.
3. The Design Review (Appeal) will consist of separate and independent meetings of the Design Review (Appeal) Committee with the student and the faculty member(s). Following these meetings, the Committee will convene to evaluate the merits of the review (appeal). The Committee is expected to serve as both objective reviewers of the work and as advisers to the student.
4. The Design Review (Appeal) committee will keep minutes of its deliberations. All recommendations from the Committee shall have written explanations and/or justifications, which will be provided to the student, the faculty member, and the Associate Dean, and made part of the student's academic file. The Associate Dean will be responsible for communicating the results of a Review (Appeal) to the student.

## The outcome of the Design Review

1. A recommendation to the faculty member regarding the grade appeal of the student. Action upon that recommendation is undertaken solely at the discretion of the faculty member. No faculty member is compelled to change a grade in response to the recommendation of the Design Review Committee.
2. A requirement for the student to repeat the design studio course and any co-requisite.
3. A recommendation for enrollment in the subsequent studio course, while advising the student of the need to achieve and maintain a cumulative 2.00 (in the studio sequence) for admission to the professional program.
4. An academic advising plan to guide the student toward successful completion of his/her degree requirements or the pursuit of an alternate career path.

All efforts shall be made to achieve clarity and reconciliation, so that the student is able to move forward positively in his/her academic career.

## Requirements for a Minor in History of Architecture and Design

## Pre-requisites for the Minor in History of Architecture and Design (HARD-M):

For Fay Jones School students:

Requirements for the Minor in History of Architecture and Design:
History of Architecture and Design Core Courses ${ }^{1}$
Select three courses from the following:

| ARCH 2233 | History of Architecture I ${ }^{1}$ |
| :---: | :---: |
| ARCH 2243 | History of Architecture II ${ }^{1}$ |
| ARCH 4433 | History of Architecture III |
| ARCH 4523 | Architectural Theory |
| LARC 3413 | History of Landscape Architecture I |
| LARC 4413 | History of Landscape Architecture II |
| LARC 4033 | Landscape Architecture Theory |
| IARD 2883 | History of Interior Design |
| Advanced History of Architecture and Design Courses |  |
| Select 9 credit hours of 3000-plus level courses from the following: |  |
| ARCH 4553 | 2 |
| ARCH 4673 | Modern and Contemporary Rome ${ }^{2}$ |
| ARCH 4853 | Renaissance and Baroque Architecture |
| ARCH 4863 |  |
| ARCH 5493 | History of Urban Form |
| ARCH 4023 | Advanced Architectural Studies (variable topics in history of architecture) ${ }^{3}$ |
| LARC 402V | Special Studies (variable topics in the history of landscape architecture) ${ }^{3}$ |

## Total Hours

1 A Fay Jones School student can present only 9 hours of courses required for the major field of study for credit for the minor. 3000plus courses that are not required for the major can be presented for "advanced" credit in the minor.
2 Only 3 hours of credit earned in Study Abroad courses can be presented for credit toward the History of Architecture and Design minor.
3 A menu of variable topics courses that will qualify for credit toward the History of Architecture and Design Minor is published every semester.

## Faculty

Baker, Emily, M.Arch. (Cranbrook Academy of Art), B.Arch. (University of Arkansas), Assistant Professor, 2017.
Blackwell, Marlon, M.Arch. (Syracuse University), B.Arch. (Auburn University), Distinguished Professor, 1992, 2010.
Boelkins, Jonathan, M.Arch. (Washington University in St. Louis), B.Arch. (University of Arkansas), Instructor, 2017.

Colangelo, Jessica L., M.Arch. (Princeton University), B.Arch. (Rice University), Assistant Professor, 2018.
Del Gesso, Emilio, B.A. (University of Rome), Assistant Professor, 1997.
Elberfeld, Nathaniel, S.M.Arch.S. (Massachusetts Institute of
Technology), M.Arch. (Washington University in St. Louis), B.S. (William and Mary), Visiting Assistant Professor, 2021.
Fitzpatrick, Lynn, M.Arch. (Rice University), B.S. (Cornell University), Teaching Associate Professor, 1999, 2023.
Folan, John, M.Arch (University of Pennsylvania), B.S.Arch (University of Illinois), Professor, 2019.
Goodstein-Murphree, Ethel S., Ph.D. (University of Michigan-Ann Arbor), B.Arch., B.S. (City University of New York), Professor, 1992, 1998.
Herman, Greg, M.Arch. (Rice University), B.Arch. (University of Cincinnati), Associate Professor, 1991, 1998.
Holland, Brian, M.Arch.,(University of Pennsylvania), B.Arch., (California State Polytechnic University, Pomona), Assistant Professor, 2018.
Jacobus, Frank R., M.Arch. (University of Texas at Austin), Associate Professor, 2012, 2015.

Kennedy, David, M.Des. (Harvard University), B.Arch. (Carnegie Mellon University), Assistant Professor, 2021.
Kuhns, Alyssa, M.I.D. (Pratt Institute), B.Arch. (Carnegie Mellon University), Assistant Professor, 2021.
Luoni, Stephen D., M.Arch. (Yale University), B.S.Arch. (Ohio State University), Professor, 2003, 2006.
MacKeith, Peter, M.Arch. (Yale University), B.A. (University of Virginia), Professor, 2014.
Messadi, Tahar, Ed.D., M.Arch. (University of Michigan-Ann Arbor), B.Arch. (Universite de Constantine, Algeria), Associate Professor, 2003, 2009.

Rotolo, Chuck, M.Arch. (Washington University in St. Louis), B.Arch. (Louisiana State University), Assistant Professor, 2005.
Rudzinski, Russell D., M.A. (Washington University in St. Louis), B.Arch. (Syracuse University), Assistant Professor, 2000.
Sexton, Kim, Ph.D., M.A., M.Phil. (Yale University), B.A. (State University of New York at Binghampton), Associate Professor, 1999, 2005.
Shannon, Graham F., M.Arch. (Rice University), B.Arch., B.A. (University of Arkansas), Professor, 1979, 1990.
Terry, Laura, M.F.A. (Savannah State University), B.S. (Auburn University), Associate Professor, 1998, 2007.
Turner, Alison, M.A. (Parsons School of Design), B.A. (Kentucky State University), Assistant Professor, 2008.
Veloso, Pedro, M.Sc. (University of Sao Paulo), B.Arch., B.U.D. (University of Brasilia), Assistant Professor, 2021.

## Courses

ARCH 1003. Basic Course in the Arts: Architecture Lecture. 3 Hours.
A general introduction to architecture, exploring the designed environment, including cities and buildings and their histories, technologies and users, in a holistic manner. May not be presented towards satisfaction of major requirements in either the B.Arch or B.A. in architectural studies degrees. (Typically offered: Fall and Spring)

ARCH 1003H. Honors Basic Course in the Arts: Architecture Lecture. 3 Hours.
A general introduction to architecture, exploring the designed environment, including cities and buildings and their histories, technologies, and users, in a holistic manner. May not be presented towards satisfaction of major requirements in either the B.Arch or B.A. in architectural studies degrees. Prerequisite: Honors candidacy. (Typically offered: Fall)
This course is equivalent to ARCH 1003.
ARCH 1013. Diversity and Design. 3 Hours.
Explores the reciprocal relationship between diversity and design in America, investigating how race, gender, religion, ability, age, class, and location affect and are affected by the design of media, products, architecture, and cities/regions. Positive and negative effects of diversity and design are discussed. (Typically offered: Summer)

## ARCH 1015. Fundamental Design Skills. 5 Hours.

Fundamental design skills; development of visual and verbal communication skills including observation skills, design technologies, analysis and representation in both 2-dimensions and 3-dimensions through analog and digital tools; creative and critical thinking skills. (Typically offered: Fall and Spring)

## ARCH 1025. Fundamental Design Methodology. 5 Hours.

Fundamental design skills; use of precedents for understanding principles of design and natural and formal ordering systems; design development using both iterative and alternative methods of exploration in both 2-dimensions and 3-dimensions using analog and digital tools; continued development of visual and verbal communication skills. Prerequisite: ARCH 1015. (Typically offered: Spring and Summer)

ARCH 1212. Design Thinking I: Foundations in Technology. 2 Hours.
This course will raise pertinent questions about the role of architectural technology in design through studying the important theories about technology from Vitruvius to contemporary practice and understanding how they have been manifested in built form. (Typically offered: Fall and Summer)
ARCH 1222. Design Thinking II: Foundations in History. 2 Hours.
Explores the role of architectural history in design thinking, introducing divergent canons and traditions in a global context and emphasizing understanding of the relationships among buildings, spaces and places and the social, political and technological circumstances in which the work was theorized, produced, and lived. Prerequisite: ARCH 1212. (Typically offered: Spring and Summer)
ARCH 1600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

## ARCH 2016. Architectural Design III. 6 Hours.

Introduction of formal principles and strategies used in space making, focusing on the development of plans and sections. Precedents and the understanding of them through analysis and syntheses are used as a means of examining the past and the present while providing a framework from which personal design sensibilities can evolve. Corequisite: ARCH 2113 and ARCH 2132 and ARCH 2233. Prerequisite: ARCH 1025 and ARCH 1222. (Typically offered: Fall)

## ARCH 2026. Architectural Design IV. 6 Hours.

An elaboration of space-making, addressing three-dimensional aspects of formmaking, including the influence of structural systems, articulation of the vertical section, and exterior expression; the role of site as a generator of form; and the overarching importance of technics, including the materiality of space, structure, and light. Corequisite: ARCH 2123 and ARCH 2243. Prerequisite: ARCH 2016 and ARCH 2113 and ARCH 2132 and ARCH 2233. (Typically offered: Spring)

## ARCH 2113. Architectural Structures I. 3 Hours.

Introduction to statics and strength of materials. Building loads are examined as to their effect on the elements of architectural projects. Simple post and beam structures are the focus of this course. Bending, axial, and shear stress are examined in beams and columns. Materials studied include wood, steel, and concrete. Corequisite: ARCH 2016 and ARCH 2132. Prerequisite: ARCH 1212. (Typically offered: Fall)

## ARCH 2113H. Honors Architectural Structures I. 3 Hours.

Introduction to statics and strength of materials. Building loads are examined as to their effect on the elements of architectural projects. Simple post and beam structures are the focus of this course. Bending, axial, and shear stress are examined in beams and columns. Materials studied include wood, steel, and concrete. Corequisite: ARCH 2016 and ARCH 2132. Prerequisite: ARCH 1212. (Typically offered: Fall)
This course is equivalent to ARCH 2113.

## ARCH 2123. Architectural Structures II. 3 Hours.

Introduction to the basic theories of structures, structural behavior, and the design of simple structural systems capable of resisting gravity and lateral forces. Provides a basic understanding of structural behavior, organization of framing systems and location of lateral force resisting elements for building structures and other technical systems. Corequisite: ARCH 2026. Prerequisite: ARCH 2113 and ARCH 2132. (Typically offered: Spring)

## ARCH 2123H. Honors Architectural Structures II. 3 Hours.

Introduction to the basic theories of structures, structural behavior, and the design of simple structural systems capable of resisting gravity and lateral forces. Provides a basic understanding of structural behavior, organization of framing systems and location of lateral force resisting elements for building structures and other technical systems. Corequisite: ARCH 2026. Prerequisite: ARCH 2113, ARCH 2132 and honors candidacy. (Typically offered: Spring)
This course is equivalent to ARCH 2123.

## ARCH 2132. Environmental Technology I. 2 Hours.

Introduces theories and concepts of the building thermal, luminous and sonic environments with focus on solar geometry-shading, climate-thermal stresses, natural ventilation, daylight, sound isolation and noise control. The application of these systems to support the design of an environmentally responsive building and its enclosure is addressed. Corequisite: ARCH 2016 and ARCH 2113. Prerequisite: ARCH 1212. (Typically offered: Fall)

ARCH 2132H. Honors Environmental Technology I. 2 Hours.
Introduces theories and concepts of the building thermal, luminous and sonic environments with focus on solar geometry-shading, climate-thermal stresses, natural ventilation, daylight, sound isolation and noise control. The application of these systems to support the design of an environmentally responsive building and its enclosure is addressed. Corequisite: ARCH 2016 and ARCH 2113. Prerequisite: ARCH 1212. (Typically offered: Fall)
This course is equivalent to ARCH 2132.

## ARCH 2233. History of Architecture I. 3 Hours.

Critical study and analysis of world architecture from ancient times through the Middle Ages, comprising the ancient Americas, Asia, Mesopotamia, and Egypt; Classical, Byzantine, and Islamic architecture and vernacular design; and the early Christian, Romanesque, and Gothic periods. (Typically offered: Fall)

ARCH 2233H. Honors History of Architecture I. 3 Hours.
Critical study and analysis of world architecture from ancient times through the Middle Ages, comprising the ancient Americas, Asia, Mesopotamia, and Egypt; Classical, Byzantine, and Islamic architecture and vernacular design; and the early Christian, Romanesque, and Gothic periods. Prerequisite: Honors candidacy. (Typically offered: Fall)
This course is equivalent to ARCH 2233.
ARCH 2243. History of Architecture II. 3 Hours.
Critical study and analysis of world architecture from the fifteenth to the midnineteenth centuries. Encompasses early modern Europe (Renaissance, Baroque, and Neoclassical) as well as two or more of the following: colonial New Spain, early modern Japan, and/or early modern Islamic empires in Africa, the Middle East, and Asia. Vernacular American building is surveyed as well as architecture in the nineteenth-century, including Beaux-Arts design and the introduction of industrial materials. Prerequisite for architecture majors only: ARCH 2233. (Typically offered: Spring)

## ARCH 2243H. Honors History of Architecture II. 3 Hours.

Critical study and analysis of world architecture from the fifteenth to the midnineteenth centuries. Encompasses early modern Europe (Renaissance, Baroque, and Neoclassical) as well as two or more of the following: colonial New Spain, early modern Japan, and/or early modern Islamic empires in Africa, the Middle East, and Asia. Vernacular American building is surveyed as well as architecture in the nineteenth-century, including Beaux-Arts design and the introduction of industrial materials. Prerequisite: Architecture majors only. Corequisite: ARCH 2233 and honors candidacy. (Typically offered: Spring)
This course is equivalent to ARCH 2243.
ARCH 2600. Undergraduate Research Assistant. 0 Hours
Undergraduate research. (Typically offered: Fall, Spring and Summer)
ARCH 2993. Art and Culture in Italy. 3 Hours.
The evolution of culture and aesthetics and their immediate relationship with the creation of Italy's masterpieces in art and architecture. Includes site visits and lectures. Offered in the Rome study abroad semester. (Typically offered: Fall and Spring)

## ARCH 3016. Architectural Design V. 6 Hours.

Emphasis on issues of design process, exploration of internal and external determinants of form and the integration of appropriate technologies in design solutions. Corequisite: ARCH 4433. Prerequisite: ARCH 2026 and ARCH 2123 and ARCH 2243. (Typically offered: Fall)

## ARCH 3026. Architectural Design VI. 6 Hours.

Studio-based analysis and design of structural and enclosure systems for buildings with particular emphasis on systems interface and application within the context of design exercises. Investigations of the appropriate use of materials and assemblies for varied programmatic and environmental criteria. Twelve hours of studio each week. Corequisite: ARCH 4523. Prerequisite: ARCH 3016 and ARCH 3143. (Typically offered: Spring)

ARCH 303V. Special Projects. 1-6 Hour.
Individual or group investigation in research, visual communication, history, or design concerning special interests of student or faculty. (Typically offered: Irregular) May be repeated for degree credit

## ARCH 303VH. Honors Special Projects. 1-6 Hour

Individual or group investigation in research, visual communication, history, or design concerning special interests of student or faculty. Prerequisite: Honors candidacy. (Typically offered: Irregular) May be repeated for degree credit. This course is equivalent to ARCH 303V.

ARCH 3143. Building Materials and Assemblies. 3 Hours.
Introduction and comprehensive survey of primary building materials and methods of assembly: their history, properties, use and configuration - both traditional and contemporary, in the service of building construction; their impact on the form, expression and performance of building structures and envelopes. Prerequisite: ARCH 2132, ARCH 2113 and ARCH 2123. (Typically offered: Fall)

## ARCH 3253. Environmental Technology II. 3 Hours.

Covers theoretical foundations and applications of building environmental systems: HVAC with duct layout and controls, indoor air quality, electric lighting, power, acoustics, fire safety and egress, and water and waste. The important role of such systems in the design of buildings is examined through a series of small projects assignments. Prerequisite: ARCH 3016 and ARCH 3143. (Typically offered: Spring)

## ARCH 3600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

## ARCH 4016. Comprehensive Studio. 6 Hours.

Emphasis on issues of typology, context and technological suitability as sources of theoretical and developmental responses. Corequisite: ARCH 4152. Prerequisite: ARCH 3026. (Typically offered: Fall)

ARCH 4023. Advanced Architectural Studies. 3 Hours.
Advanced seminars in subjects to special interest to students and faculty. (Typically offered: Fall and Spring) May be repeated for degree credit.

ARCH 4023H. Honors Advanced Architectural Studies. 3 Hours.
Advanced seminars in subjects to special interest to students and faculty. Prerequisite: Honors candidacy. (Typically offered: Fall and Spring) May be repeated for degree credit.
This course is equivalent to ARCH 4023.

## ARCH 4116. Architectural Design - Rome. 6 Hours.

Investigation of complex design problems in the context of the city of Rome, utilizing advanced issues in architectural design and planning. Prerequisite: ARCH 3026 or ARCH 4016. (Typically offered: Fall and Spring)

ARCH 4126. Architectural Design Latin America. 6 Hours.
Introduces a complex social and physical urban condition through a process of formal analysis and design executed in a designated country augmented by an intense graphic investigation of urban form encountered through related field trips to the distinct cultural and geographic regions. Prerequisite: ARCH 3026 or ARCH 4016. (Typically offered: Summer)

## ARCH 4152. Building Systems Integration. 2 Hours.

Promotes the synthesis of building technologies, systems selection and integration in the resolution of a building design. Specifically, the student demonstrates knowledge in the ability to generate digital and analog graphic resolutions highlighting the design response of material, structural and environmental systems in a building. Corequisite: ARCH 4016. Prerequisite: ARCH 2113 and ARCH 2123 and ARCH 2132 and ARCH 3143 and ARCH 3253. (Typically offered: Fall and Spring)
ARCH 4152H. Honors Building Systems Integration. 2 Hours.
Promotes the synthesis of building technologies, systems selection and integration in the resolution of a building design. Specifically, the student demonstrates knowledge in the ability to generate digital and analog graphic resolutions highlighting the design response of material, structural and environmental systems in a building. Corequisite: ARCH 4016. Prerequisite: ARCH 2113 and ARCH 2123 and ARCH 2132 and ARCH 3143 and ARCH 3253. (Typically offered: Fall and Spring) This course is equivalent to ARCH 4152.
ARCH 4433. History of Architecture III. 3 Hours.
Critical study and analysis of the history and theories of modern architecture from the mid-nineteenth century to the present. Prerequisite: ARCH 2233 and ARCH 2243 or IARD 2883. (Typically offered: Fall)

## ARCH 4433H. Honors History of Architecture III. 3 Hours.

Critical study and analysis of the history and theories of modern architecture from the mid-nineteenth century to the present. Prerequisite: ARCH 2233, ARCH 2243 and honors candidacy. (Typically offered: Fall)
This course is equivalent to ARCH 4433.
ARCH 4523. Architectural Theory. 3 Hours.
Introduction to the lexicon of architecture and the ideas and ideologies that provide the conceptual and critical infrastructure for the discipline. Reading and discussion of representative theory texts. Emphasis on twentieth century modernism and postmodernism, including contemporary speculations on possible and emerging forms of practice after theory. Prerequisite: ARCH 2233, ARCH 2243, and ARCH 4433. (Typically offered: Spring)
ARCH 4523H. Honors Architectural Theory. 3 Hours.
Introduction to architectural theories and their relationship to modern historiography. Case studies are employed for the critical evaluation of significant texts and the discernment of concepts embedded in textual structures. Reading theory through established historical categories establishes critical insight to the original deployment, negation and resurfacing of architectural theories. Prerequisite: ARCH 2233, ARCH 2243, and ARCH 4433. (Typically offered: Spring) This course is equivalent to ARCH 4523.

ARCH 4600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

## ARCH 4653. Architecture of the City. 3 Hours.

Analysis of Rome's urban form and historical and theoretical information in support of the students' experience. Includes site visits and lectures. Offered in the Rome study abroad semester. (Typically offered: Fall and Spring)

ARCH 4653H. Honors Architecture of the City. 3 Hours.
Analysis of Rome's urban form and historical and theoretical information in support of the students' experience. Includes site visits and lectures. Offered in the Rome study abroad semester. Prerequisite: Honors standing. (Typically offered: Fall and Spring)
This course is equivalent to ARCH 4653.
ARCH 4673. Modern and Contemporary Rome. 3 Hours.
Explores different local conditions that determine main architectural changes that have taken place in Rome during the last century of its urban history. Important works, leading figures and major concepts in contemporary European architecture will be described to introduce examples of modern and contemporary architecture in Rome. (Typically offered: Fall and Spring)

ARCH 4673H. Honors Modern and Contemporary Rome. 3 Hours.
Explores different local conditions that determine main architectural changes that have taken place in Rome during the last century of its urban history. Important works, leading figures and major concepts in contemporary European architecture will be described to introduce examples of modern and contemporary architecture in Rome. Prerequisite: Honors standing. (Typically offered: Fall and Spring) This course is equivalent to ARCH 4673.
ARCH 4853. Renaissance and Baroque Architecture. 3 Hours.
Study of Renaissance and Baroque architecture in Europe and the New World from 1400 to 1700 . With reference to an array of texts, drawings, and the edifices themselves, this course charts the evolution of a commanding Western architectural tradition. Renaissance and Baroque -- with close attention to the social, humanistic, and religious contexts that produced it. Prerequisite: ARCH 4433. (Typically offered: Irregular)
This course is equivalent to ARHS 4753.
ARCH 4863H. Honors St. Peter's and the Vatican. 3 Hours.
Examines art and architectural history of St. Peter's Basilica in Rome from antiquity to present. Emphasis on the Renaissance/Baroque church and its early Christian predecessor. Students consider the impact of devotional practices and papal politics on the church, the Vatican Palace, and its renown artworks including the Sistine ceiling. Prerequisite: ARCH 2233 or ARCH 2233H, and ARCH 2243 or ARCH 2243H and ARCH 4433 or ARCH 4433H. (Typically offered: Irregular)
This course is equivalent to ARHS 4733.
ARCH 4933. Introduction to Historic Preservation. 3 Hours.
Introduces theoretical, methodological and practical issues of architectural preservation in Europe and, more specifically, in Italy. Addresses history and theory of restoration, basic principles of architectural preservation and methodology in the study and praxis of preservation applied to architecture and the issues posed by the preservation of modern architecture. (Typically offered: Fall and Spring)

## ARCH 5016. Option Studio I. 6 Hours.

Project development dependent upon the synthesis of knowledge and application of critical thinking addressing architectural issues at multiple scales. Prerequisite: ARCH 4016, or ARCH 4116, or ARCH 4126. (Typically offered: Fall) May be repeated for degree credit.

## ARCH 5026. Option Studio II. 6 Hours.

Project resolution including demonstrated skill in generating design ideas supported by clear understanding of issues resulting in comprehensive development and presentation of architectural issues at multiple scales. (Typically offered: Spring) May be repeated for degree credit.

## ARCH 5314. Architectural Professional Practice. 4 Hours.

Study of role and responsibility of the architect, owner, and contractor relationships; professional ethics; organization of the architect's office; contracts and other documents; risk management strategies; and the preparation of the technical specifications and bidding documents of the Project Manual. Prerequisite: ARCH 4016 or ARCH 4116 or ARCH 4126. (Typically offered: Fall)

## ARCH 5493. History of Urban Form. 3 Hours.

The study of pre-industrial urban and architectural design strategies in cities from the Classical through the Baroque eras and their rediscovery in the late 20th century, providing the student with a designer's understanding of a broad range of exemplary urban spaces and the buildings that shape them. Prerequisite: ARCH 2233 and ARCH 2243 and ARCH 4433. (Typically offered: Irregular)

## ARCH 5493H. Honors History of Urban Form. 3 Hours.

The study of pre-industrial urban and architectural design strategies in cities from the Classical through the Baroque eras and their rediscovery in the late 20th century, providing the student with a designer's understanding of a broad range of exemplary urban spaces and the buildings that shape them. Prerequisite: ARCH 2233 and ARCH 2243 and ARCH 4433. (Typically offered: Irregular)
This course is equivalent to ARCH 5493.

ARCH 5953. Preservation Practice Field Trip. 3 Hours.
Intensive field study of a domestic or foreign site of significant or precedentsetting preservation activity, through a field trip and a course of pre-travel lectures. (Intersessions) Prerequisite: ARCH 4943 or instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

## Interior Architecture and Design (IARD)

Carl Matthews, Department Head
Vol Walker Hall, room 111
479-575-7599
The Interior Architecture and Design faculty is composed of wellqualified educators and practitioners who foster an attitude of inquiry and learning based on their individual skills and interests. A professional advisory board supports the program and serves as external critics/ jurors. Intellectual development of students is stimulated and leadership qualities enhanced throughout the four-year curriculum. The Interior Design Organization (IDO) and American Society of Interior Designers Student Chapter (ASID) allow for interaction of students with professionals in interior design and allied professions. Both faculty and students participate in professional design association activities.

The studio sequence increases in complexity throughout the curriculum. The rigor of the program requires a significant commitment of time and energy. Students can expect to spend much time independent of studio classes to complete projects.

To promote a broader perspective of design, students are required to participate in a study abroad experience. In addition, both overnight and day field trips are required for studio courses.

## Council for Interior Design Accreditation

The Bachelor of Interior Architecture and Design (B.I.A.D.) degree is accredited by the Council for Interior Design Accreditation (CIDA). CIDA, an independent, nonprofit accrediting organization, is the sole agency authorized to accredit professional degree programs in interior design. To ensure conformance with educational standards, programs must seek reaccreditation every six years. The program is the oldest accredited interior architecture and design program in the state of Arkansas.

The University of Arkansas Fay Jones School of Architecture and Design's department of Interior Architecture and Design offers the following CIDA-accredited degree program:

- B.I.A.D. (120 undergraduate credits)

The last accreditation visit for the Interior Design program was conducted in March 2018; the next site visit is spring 2024.

## Requirements for B.I.A.D. in Interior Architecture and Design

Interior Architecture and Design Program Admissions: Students are admitted to the first year of the interior architecture and design curriculum based on criteria established by the university and by the program. They are evaluated each semester by grades in lecture courses and by grades for performance and progress in the design studio sequence.

Admission to the Professional Program for Interior Architecture and Design

The interior architecture and design program offers prospective students the opportunity to prepare for professional practice or related endeavors. With this opportunity comes a responsibility for demonstrating a commitment to personal growth and success in the professional program.

At the completion of IARD 2804 Interior Design Studio III in the interior architecture and design curriculum, students will be evaluated for admission into the professional program on the basis of academic performance in the university core and the required interior architecture and design curriculum. Admission is based on available desks and requires a majority vote of a departmental admissions committee. Students admitted to the professional program will continue in the established studio curriculum sequence and are to complete the final five studios at the school. Students with less than a cumulative 2.5 GPA in IARD and ARCH courses will not be admitted to the professional program. Students who are not admitted are encouraged to consider alternative programs in the school and the university.

## Requirements for Interior Architecture and Design

As part of the 35 -hour State Minimum Core, the department recommends the following:

## Social Sciences:

Select 3 hours from the following Economic courses:

| ECON 2013 | Principles of Macroeconomics (ACTS Equivalency <br> $=$ |
| :--- | :--- |
| ECON 2103) 2023 | Principles of Microeconomics (ACTS Equivalency |
|  | $=$ ECON 2203) |
| ECON 2143 | Basic Economics: Theory and Practice |

Select 6 hours from the following:

| ANTH 1023 | Introduction to Cultural Anthropology (ACTS Equivalency = ANTH 2013) |
| :---: | :---: |
| HDFS 1403 | Life Span Development |
| SOCI 2013 | General Sociology (ACTS Equivalency $=\mathrm{SOCI}$ 1013) |
| GEOS 1123 | Human Geography (ACTS Equivalency = GEOG 1113) |
| PSYC 2003 | General Psychology (ACTS Equivalency = PSYC 1103) |
| Professional Core Requirements (63 hours) |  |
| ARCH 1212 | Design Thinking I: Foundations in Technology |
| ARCH 1222 | Design Thinking II: Foundations in History |
| ARCH 4433 | History of Architecture III |
| IARD 1035 | Fundamental Design Skills |
| IARD 1045 | Fundamental Design Methodology |
| IARD 2723 | Digital Media in Design |
| IARD 2804 | Interior Design Studio III |
| IARD 2814 | Interior Design Studio IV |
| IARD 2823 | Interior Design Materials and Assemblies |
| IARD 2883 | History of Interior Design |
| IARD 3805 | Interior Design Studio V |
| IARD 3815 | Interior Design Studio VI |
| IARD 3833 | Building Systems for Interior Design |
| IARD 3843 | Lighting Systems |
| IARD 4805 | Interior Design Studio VII |
| IARD 4813 | Human Factors for Design |

## Academic Policies - Department of Interior Architecture and Design

The following academic policies, beyond the requirements of the university, are applicable to all students in the Interior Architecture and Design Program.

1. Successful completion of all IDES coursework requires demonstration of competence as evidenced by achieving a grade of " C " or better in those courses. Failure to achieve this minimum standard will require retaking the studio or lecture course.
2. Each student's progress through the design studio sequence is monitored and governed by the faculty and subject to a Design Review process.
3. Any student receiving an "l" in a design studio must complete all work necessary to receive a grade prior to the first day of the next studio in the student's prescribed sequence to be eligible to enroll in that studio.
4. Prior to graduation, a student must present a 2.00 cumulative grade point average at this institution in all work attempted including the university state minimum core, electives and in each interior architecture and design course.

## Design Review Procedure - Department of Interior Architecture and Design

Design Review is a process initiated by a faculty member, department head, or by a student. The committee composed of interior architecture and design faculty may review a student's design work within a studio course as well as other professional courses. The review process may be used by students to appeal grades and to seek resolution of conflicts with faculty when there are questions of fairness and equity in grading. Grade appeals initiated by students will occur during the week prior to the start of class in the subsequent semester. Petitions for this review must be made through the advising center prior to the scheduled meeting of the Design Review Committee. Grade appeals may be filed as soon as the student receives his or her final grade. In all cases, the student shall exhibit, at the place and time specified by the Design Review Committee, ALL work assigned and attempted for the course in the semester under review. Faculty are required to provide appropriate documentation including, but not limited to, the course syllabus, grading policy, and semester assignments. In the case of an appeal, the appeal will be presented to the entire Interior Architecture and Design faculty for consideration and may require the students to present their case in person.

The outcome of the Design Review process may include:

1. A recommendation to the faculty member regarding the grade appeal of the student.
2. A requirement for the student to repeat the design studio course or lecture course.
3. A recommendation for enrollment in the subsequent studio course, while advising the student of the need to achieve and maintain a cumulative 2.00 (in the studio sequence) to progress in the program.

Internship Requirement: In addition to the requirements listed in the nine-semester degree program, a supervised 200-hour internship experience is required for graduation. The one-credit hour summer internship generally occurs in the summer before the fourth year. Students have been placed in interior design firms, architectural offices, Main Street programs, governmental agencies, hospitality and casino design firms, and a wide range of other allied industries. Geographically, students have completed internships in Los Angeles, San Francisco, Seattle, New York, Las Vegas, Washington, D.C., Denver, Dallas, Chicago, Kansas City, and other major cities in the United States, as well as international locations such as London and Edinburgh.

## Interior Architecture and Design B.I.A.D. Nine-Semester Degree Plan

The Bachelor of Interior Architecture and Design can be completed in nine semesters that includes a summer internship. The one-credit hour summer internship occurs in the summer before fourth year. The study abroad requirement typically occurs in the summer before third year. Please see the Fay Jones School of Architecture Advising Center for specific core course requirements and elective options. Go to the state minimum core (p.81) and the general education (p.72) requirements for more details.

| First Year | Fall | Units <br> Spring |
| :--- | ---: | ---: | ---: |
| Summer |  |  |

| ENGL 1013 Composition I (ACTS | 3 |  |  |

## Faculty

Furlong, Kimberley J., M.Arch. (U. Texas at Austin), B.F.A. (Pratt Institute), Associate Professor, 2013, 2018.
Huh, Michelle Boyong, M.I.D. (University at Texas, Austin), B.Arch. (Korea University), Assistant Professor, 2022.
Lee, Jisun, Ph.D. (Yonsei University), M.S. (Yonsei University), B.S. (Yonsei University), Assistant Professor, 2020.
Matthews, Carl W., M.S. (Pratt Institute), Professor, 2012.
Miri, Marjan, M.I.D. (University of Texas, Austin), M.U.D. (Science \& Research University, Hamedan, Iran), Assistant Professor, 2021.
Park, Jinoh, Ph.D. (North Carolina State University), E.M.B.A. (Aalto University), M.B.A. (Seoul School of Integrated Sciences \& Technology), B.S. (Hanyang University), Assistant Professor, 2021.

Sharpless, Charles, M.Arch. (Harvard University), B.Arch. (Rice
University), Assistant Professor, 2020.
Tracy, Torrey, M.Arch., B.A. (University of Nevada, Las Vegas), Assistant Professor, 2019.
Tucci, Jake, M.S (University of North Carolina at Greensboro), B.S.
(North Carolina State University), Assistant Professor, 2019.
Webb, Jennifer D., Ph.D. (Oklahoma State University), M.S., B.S.
(University of Tennessee), Associate Professor, 1999, 2005.

## Courses

IARD 1035. Fundamental Design Skills. 5 Hours.
Fundamental design skills; development of visual and verbal communication skills including observation skills, design technologies, analysis and representation in both 2-dimensions and 3-dimensions through analog and digital tools; creative and critical thinking skills. (Typically offered: Fall and Summer)

IARD 1045. Fundamental Design Methodology. 5 Hours.
Fundamental design skills; use of precedents for understanding principles of design and natural and formal ordering systems; design development using both iterative and alternative methods of exploration in 2-dimensions and 3-dimensions using analog and digital tools; continued development of visual and verbal communication skills. Prerequisite: IARD 1035. (Typically offered: Spring and Summer)

IARD 2723. Digital Media in Design. 3 Hours.
Develops conceptual and practical knowledge of digital techniques on architectural and interior design production. The aim is to provide a foundation in digital modeling, drawings, renderings, and an introduction to digital fabrication. Prerequisite: Interior Design majors only. (Typically offered: Fall)

IARD 2804. Interior Design Studio III. 4 Hours.
An introduction to interior space articulation and the creation of small scale spaces. Components of various presentation methods and formats. Overnight travel requires additional fees. Prerequisite: IARD 1045. (Typically offered: Fall) May be repeated for degree credit.

IARD 2814. Interior Design Studio IV. 4 Hours.
Studio activities with emphasis on conceptualization, design theory and applications, ideation, programming and computer application. Overnight travel required.
Prerequisite: IARD 2804 and IARD 2723. (Typically offered: Spring) May be repeated for degree credit.

IARD 2823. Interior Design Materials and Assemblies. 3 Hours.
A study of materials, resources and assemblies used in interior spaces. (Typically offered: Fall)

IARD 2823H. Honors Interior Design Materials and Assemblies. 3 Hours.
A study of materials, resources and assemblies used in designing interior spaces. Prerequisite: Honors standing. (Typically offered: Fall)
This course is equivalent to IARD 2823.
IARD 2883. History of Interior Design. 3 Hours.
Study of historic interiors and furniture from antiquity through the present day. Identification of interior styles and furniture of these eras is emphasized. (Typically offered: Spring)

## IARD 2883H. Honors History of Interior Design. 3 Hours.

Study of historic interiors and furniture from antiquity through the present day. Identification of interior styles and furniture of these eras is emphasized. Prerequisite: Honors standing. (Typically offered: Spring)
This course is equivalent to IARD 2883.
IARD 3805. Interior Design Studio V. 5 Hours.
Emphasis on residential and/or commercial building systems. Continued development of presentation skills including hand and computer-based techniques. Prerequisite: IARD 2814. (Typically offered: Fall)
IARD 3815. Interior Design Studio VI. 5 Hours.
Advanced studio problems involving larger-scale interior spaces and contract documents for public use. Overnight field trip requires additional fees. Prerequisite: IARD 3805. (Typically offered: Spring)
IARD 3833. Building Systems for Interior Design. 3 Hours.
A survey course of building systems that addresses the design implications of heating/air conditioning/ventilation, plumbing, power, data/voice/and telecommunications, fire protection, security, and acoustical systems on building interiors. Performance characteristics and sustainable technologies will be addressed. Prerequisite: IARD 2814 and IARD 2823. (Typically offered: Fall)

IARD 3833H. Honors Building Systems for Interior Design. 3 Hours.
A survey course of building systems that addresses the design implications of heating/air conditioning/ventilation, plumbing, power, data/voice/and telecommunications, fire protection, security, and acoustical systems on building interiors. Performance characteristics and sustainable technologies will be addressed. Prerequisite: IARD 2814 and IARD 2823 and honors standing. (Typically offered: Fall)
This course is equivalent to IARD 3833.
IARD 3843. Lighting Systems. 3 Hours.
Exploration of interior design applications of lighting systems. (Typically offered: Spring)
IARD 3843H. Honors Lighting Systems. 3 Hours.
Exploration of interior design applications of lighting systems. Prerequisite: Honors standing. (Typically offered: Spring)
This course is equivalent to IARD 3843.
IARD 465V. Special Topics. 1-6 Hour.
A focused study of specialized topics in interior design. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

IARD 4805. Interior Design Studio VII. 5 Hours.
Comprehensive design studio synthesizing design skills, knowledge and critical thinking skills with emphasis on research, programming and process. Prerequisite: IARD 3815 and IARD 4823. (Typically offered: Fall) May be repeated for degree credit.
IARD 4813. Human Factors for Design. 3 Hours.
Emphasis is given to human behavior as applied to the design disciplines. Types of interior spaces, environmental effects on behavior, ergonomics, and design needs of special groups, and human factors programs are studied. Lecture 3 hours per week. Prerequisite: Completion of any two of the following: ANTH 1023, SOCI 2013, PSYC 2003, HDFS 1403 or GEOS 1123. (Typically offered: Spring)
IARD 4813H. Honors Human Factors for Design. 3 Hours.
Emphasis is given to human behavior as applied to interior design. Types of interior spaces, environmental effects on behavior, ergonomics, interior design needs of special groups, and human factors programs are studied. Lecture 3 hours per week. Prerequisite: Honors standing and completion of any two of the following: ANTH 1023, SOCI 2013, PSYC 2003, HDFS 1403 or GEOS 1123. (Typically offered: Fall)
This course is equivalent to IARD 4813.
IARD 4823. Professional Practice for Interior Design. 3 Hours.
General procedures for operating and maintaining an interior design business. Business documentation, communication, professional responsibilities and ethics. Corequisite: IARD 3805. (Typically offered: Fall)

IARD 4823H. Honors Professional Practice for Interior Design. 3 Hours. General procedures for operating and maintaining an interior design business. Business documentation, communication, professional responsibilities and ethics. Corequisite: IARD 3805 and honors standing. (Typically offered: Fall)
This course is equivalent to IARD 4823.

## IARD 4831. Internship for Interior Design. 1 Hour.

Supervised work experience and observation of operations/management procedures in approved design, government or service business. Prerequisite: IARD 3815. (Typically offered: Summer)

## IARD 4845. Interior Design Studio VIII. 5 Hours.

Comprehensive design studio synthesizing design skills, knowledge, and critical thinking skills developed in previous design studios, including ideation, programming, construction, and human factors. Prerequisite: IARD 4805. (Typically offered: Spring) May be repeated for degree credit.

## IARD 485V. Design Tours. 1-3 Hour.

Domestic and international study tours of a variety of design locations that contribute to the body of knowledge. Prerequisite: IARD 2814. (Typically offered: Irregular) May be repeated for degree credit.

## Landscape Architecture (LARC)

Ken McCown
Department Head
Vol Walker Hall
479-575-4907
Department of Landscape Architecture Website (http:// architecture.uark.edu/academics/landscape-architecture/)

The Department of Landscape Architecture offers two degrees, the Bachelor of Landscape Architecture described on this page and the Bachelor of Science in Landscape Architectural Studies (http://catalog.uark.edu/undergraduatecatalog/collegesandschools/ fayjonesschoolofarchitecture/landscapearchitecturalstudies/). The department also participates in the administration of the planning and planting design minors on campus. With sustainability administered through the Fay Jones School, these degrees and minors offer students a robust package to develop the tools and acumen necessary to have an impact on making sustainable and resilient places for people and the planet.

The Department of Landscape Architecture focuses on design and advocacy. The faculty in our department believe in the power of design and want to help our students and stakeholders become effective advocates to make positive and lasting change as collaborators and leaders.

The Bachelor of Landscape Architecture prepares students to practice landscape architecture as licensed professionals. Landscape Architecture is the sustainability profession, with practitioners providing meaningful solutions to such pressing topics as, climate change and resilience, clean water and air, health wellness and aging, and habitat and loss of it due to cataclysmic events such as wildfire.

The practice of landscape architecture ranges across the geographic spectrum from urban to suburban, rural and ecosystems. Landscape architects appropriately use systems thinking in the planning and design of systems, and design thinking at many scales, including of course to make spaces and places people inhabit outside. Planning and analysis projects for systems include habitat and conservation, watersheds, and infrastructure such as food and agriculture, energy, and transportation.
Design thinking enables landscape architects to create parks, plazas, greenways, community gardens, green alleyways, green roofs and walls, and innovative and natural stormwater treatment in urban sites and places.

Sustainable and resilient landscapes for residential areas are also a part of practice, ranging from high-density urban housing to rural landscapes. Cultural landscapes and historic, designed sites are also in the domain of landscape architectural practice. These represent an important body of work for practitioners. From the broad list above, opportunities are legion to use planning, design and design thinking to make better places for all.

The Bachelor of Science in Landscape Architectural Studies serves students who are interested in the design disciplines, but not professional practice. This four-year program suits students who seek careers in allied planning and design disciplines, including urban and regional planning, historic preservation, environmental law, and architectural history. This
degree is an excellent platform for students looking forward to graduate education in professions such as architecture, landscape architecture, geography, and urban and regional planning.

## Landscape Architecture - Landscape Architectural Accreditation Board

The Landscape Architecture Accreditation Board (LAAB) is the sole agency authorized to accredit U.S. professional degree programs in Landscape Architecture. LAAB recognizes the Bachelor of Landscape Architecture, Bachelor of Science in Landscape Architecture, and Masters of Landscape Architecture. It accredits each program every six years, evaluating degree of conformance with established education standards.

The University of Arkansas Fay Jones School of Architecture and Design's department of landscape architecture offers the following LAABaccredited degree program:

- B.L.A. (142 undergraduate credits)

The next accreditation visit for the B.L.A. program is academic year 2027-28.

## Bachelor of Landscape Architecture Degree

Requirements for completion of Bachelor of Landscape Architecture include the state minimum core (p. 81).

As part of the state minimum core, the department recommends the
following:

| Laboratory Science |  |  |
| :---: | :---: | :---: |
| Select two of the following natural sciences for a total of eight hours: |  |  |
| BIOL 1543 <br> \& BIOL 1541L | Principles of Biology (ACTS Equivalency $=\mathrm{BIOL}$ 1014 Lecture) <br> and Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab) |  |
| BIOL 1613 \& BIOL 1611L | ```Plant Biology (ACTS Equivalency = BIOL 1034 Lecture) and Plant Biology Laboratory (ACTS Equivalency = BIOL }1034\mathrm{ Lab)``` |  |
| GEOS 1113 <br> \& GEOS 1111L | ```Physical Geology (ACTS Equivalency = GEOL L1114 Lecture) and Physical Geology Laboratory (ACTS Equivalency = GEOL 1114 Lab)``` |  |
| UNIV 1001 | University Perspectives | 1 |
| Completion of the following Professional Core: |  |  |
| Design and Advocacy Components |  |  |
| LARC 1315 | Fundamental Design Skills | 5 |
| LARC 1325 | Fundamental Design Methodology | 5 |
| LARC 2335 | Landscape Architecture Design III: Engaging Site, Engaging Place | 5 |
| LARC 2351 | Advocacy and Theory Module: Engaging Site, Engaging Place | 1 |
| LARC 2345 | Landscape Architecture IV: Collaborating with Site | 5 |
| LARC 2361 | Advocacy and Theory Module: Collaborating with Site | 1 |
| LARC 3355 | Landscape Architecture Design V: International Urban Place | 5 |

| LARC 2371 | Advocacy and Theory Module: International Urban <br> Place | 1 |
| :--- | :--- | :--- |
| LARC 3365 | Landscape Architecture Design VI: Engaging <br> Communities; Understanding Culture | 5 |
| LARC 3381 | Advocacy and Theory Module: Engaging <br> Communities; Understanding Culture | 1 |
| LARC 3375 | Landscape Architecture Design VII: Collaborating <br> with Communities | 5 |
| LARC 3391 | Advocacy and Theory Module: Collaborating with <br> Communities | 1 |
| LARC 4385 | Landscape Architecture Design VIII: Capstone | 5 |
| LARC 4311 | Advocacy and Theory Module: Capstone | 1 |
| LARC 4395 | Landscape Architecture Design IX: Comprehensive | 5 |
| LARC 4321 | Advocacy and Theory Module: Comprehensive | 1 |
| Communications Components |  |  |

Honors students may also substitute up to 6 hours of the following:
LARC 303VH Honors Special Projects
Construction Components

| LARC 2714 | Ecological Design and Construction: Terrain | 4 |
| :--- | :--- | :--- |
| LARC 2914 | Sustainable Design and Construction: Plant <br> Communities | 4 |
| LARC 3724 | Ecological Design and Construction: Water and | 4 |
| LARC 3734 | Drainage |  |
| Sustainable Design and Construction: Material and | 4 |  |
| LARC 3914 | Methods of Assembly |  |
| Sustainable Design and Construction: Remediation <br> and Plants on Structure | 4 |  |

## History and Theory Components

LARC 3413 History of Landscape Architecture I 3

LARC 4033 Landscape Architecture Theory 3
LARC 4413 History of Landscape Architecture II 3
LARC 4123 Urban Form Studies 3
Practice Components
LARC 4811 Landscape Architecture Interns 1
LARC 5613 Landscape Architectural Professional Practice 3
Professional Electives 9
Students may select courses from the Departments of Landscape Architecture, Interior Design and Architecture as well as courses in history, geography, horticulture, art, sociology, environmental studies, and business. These courses can be thematically selected to emphasize urban studies, ecological planning, construction management, and land development.
Free Electives
Students are encouraged to take courses outside the Department to broaden their education.

Total Hours

1. Candidates seeking graduation shall achieve a minimum of 142 hours and a minimum of a " C -" in each course within the professional curriculum. The remaining balance of hours shall have a minimum of 2.00 cumulative grade point average. Students must maintain a minimum 2.0 cumulative grade-point average to continue in the studio sequence. Any student receiving a "D+/-" or below in the professional
core shall repeat the course. Any student with a second "D+/-" or below shall be considered for non-continuance in the program as determined by the department head and faculty. To continue in the professional program, the student must submit a portfolio after their second year for faculty review. Please see section "Admission to the Professional Program in Landscape Architecture."
2. Students in landscape architecture are required to complete the department's summer study abroad program, after their second year.

NOTE: No more than four hours of physical education and/or R.O.T.C. may be counted toward a degree. Courses not acceptable toward degree credit include those of a remedial or orientation nature and whose content are considered to be measurably duplicated elsewhere in the school's curriculum.

By following the preceding curriculum, students will meet the statemandated State Minimum Core requirements. They must also meet all other University Requirements (p. 86) for graduation. The department strongly recommends that transfer students present eight hours of laboratory science courses selected from botany, biology, geology, and physical science as part of the state minimum core.

Students admitted to the university with a completed two-year associate of arts or associate of science degree from an Arkansas state-supported two-year or four-year college or university will receive credit for general education (core) requirements in accordance with ACT 182. All students also must complete any lower division discipline specific courses required for the major as well as all courses required to comply with the conditions of accreditation.

## Grade Appeals - Department of Landscape Architecture

Students in the Department of Landscape Architecture may appeal grades in the design studios as well as other professional courses in which it is believed that there are questions of fairness or equity in the application of the published grading policy of the faculty member. Appeals must be made in writing to the department head one week before the first week of the subsequent semester. The appeal will be presented to the entire Landscape Architecture faculty for consideration and may require the students to present their case in person. Outcomes of grade appeals may result in one of the following:

1. A recommendation to the faculty member regarding the grade appeal of the student.
2. A requirement for the student to repeat the design studio course and any co-requisite.
3. A recommendation for enrollment in the subsequent studio course, while advising the student of the need to achieve and maintain a cumulative 2.00 (in the studio sequence) for admission to the professional program.

## Professional Licensure Degree Requirement

The School's Bachelor of Landscape Architecture program is accredited by LAAB, which requires that specific criteria be met in a professional program. This ten-semester professional program gives graduates the required accredited degree to qualify to take the licensing exam and prepares them for practice as a licensed professional.

All fifty states require licensure for landscape architects. The primary purpose of this licensure is to protect the health, safety, and welfare of the public. Most states require that candidates possess an accredited degree in landscape architecture and complete a period of professional
experience, working with a licensed landscape architect. The department curriculum requires a summer internship during the third year of the program as part of this developmental period. Once the requirements of an accredited degree and the necessary internship period are complete, candidates must pass a national, four-part exam, sometimes with additional sections unique to that state.

## Landscape Architecture B.L.A. Ten-Semester Degree Program

The professional program for a Bachelor of Landscape Architecture Degree must be completed in 10 semesters of coursework and is not eligible for the Eight-Semester Degree Completion Program. However, the following 10-semester sample plan shows how a first-year student could obtain a Bachelor of Landscape Architecture degree in five years if the student is admitted to the Landscape Architecture Design Studio and subsequently is admitted to the professional program.

| First Year | Units |  |  |
| :---: | :---: | :---: | :---: |
|  | Fall | Spring | Summer |
| LARC 1315 Fundamental Design Skills | 5 |  |  |
| Select one of the following (Satisfies | 4 |  |  |
| General Education Outcome 3.4): |  |  |  |
| BIOL 1613 Plant Biology (ACTS |  |  |  |
| Equivalency = BIOL 1034 Lecture) |  |  |  |
| \& BIOL 1611L Plant Biology |  |  |  |
| Laboratory (ACTS Equivalency = |  |  |  |
| BIOL 1543 Principles of Biology |  |  |  |
| Lecture) |  |  |  |
| \& BIOL 1541L Principles of Biology |  |  |  |
| Laboratory (ACTS Equivalency = |  |  |  |
| BIOL 1014 Lab) |  |  |  |
| MATH 1203 College Algebra (ACTS | 3 |  |  |
| Equivalency = MATH 1103) (Satisfies |  |  |  |
| General Education Outcome 2.1) |  |  |  |
| ENGL 1013 Composition I (ACTS | 3 |  |  |
| Equivalency = ENGL 1013) (Satisfies |  |  |  |
| General Education Outcome 1.1) |  |  |  |
| UNIV 1001 University Perspectives | 1 |  |  |
| LARC 1325 Fundamental Design |  | 5 |  |
| Methodology (Satisfies General |  |  |  |
| Education Outcome 1.2) |  |  |  |
| Satisfies General Education Outcome |  |  |  |
| 3.4: |  |  |  |
| GEOS 1113 Physical Geology (ACTS |  | 4 |  |
| Equivalency = GEOL 1114 Lecture) |  |  |  |
| \& GEOS 1111L Physical Geology |  |  |  |
| Laboratory (ACTS Equivalency $=$ GEOL |  |  |  |
| 1114 Lab) |  |  |  |
|  |  | 3 |  |
| Equivalency = SOCI 1013) (Satisfies |  |  |  |
| General Education Outcome 3.3) |  |  |  |
| ENGL 1023 Composition II (ACTS |  | 3 |  |
| Equivalency = ENGL 1023) (Satisfies |  |  |  |
| General Education Outcome 1.1) |  |  |  |
| Year Total: | 16 | 15 |  |

PHIL 2003C, PHIL 2003H, PHIL 2103, PHIL 2103C, PHIL 2303, THTR 1003, THTR 1013, THTR 1013H, WLIT 1113, WLIT 1123, or intermediate-level world language (usually 2003-level).
${ }^{3}$ The Fine Arts Elective courses which satisfy General Education Outcome 3.1 include: ARCH 1003, ARHS 1003, COMM 1003, DANC 1003, LARC 1003, MLIT 1003, MLIT 1003H, MLIT 1013, MLIT 1013H, MLIT 1333, THTR 1003, THTR 1013, or THTR 1013H.

## Minor in Design With Plants for Architecture Majors

The Department of Landscape Architecture offers and oversees a minor in Design With Plantss for students interested in significant world issues in landscape design, climate change, management, and sustainability. The Design with Plants Minor combines plant-centered coursework with several design-oriented courses within the Landscape Architecture Department. This minor is tailored for those students desiring a more indepth study of plants, plant communities, soils, aesthetic and architectural uses of plants, and design and deployment strategies related to them.

## What can I do with this minor?

Students pursuing this minor will be well-suited for engaging with landscape design professionals and other allied professionals pursuing productive, locally sensitive, sustainable, and resilient planting schemes.
Two courses provide students with core skills in designing with plants: 'Sustainable Design and Construction: Plant Communities' and 'Design Visualization, Inquiry and Communications.' Issues and topics addressed include:

## Foundation topics in plants and cultivation

- Concepts relating to plants, their associations, and communities, and how to utilize those concepts as design frameworks
- Fundamentals of soils, soil structure and composition, soil health and ecosystems, and strategies for their protection
- Studying productive plant communities (food crops) to understand them as a community and as a design opportunity
- Questions of sustainability regarding plants and planting
- Fundamental design methods and means of graphic representation to communicate ideas and proposals

## Required Courses

## Total Hours

## Requirements for Urban and Regional Planning Minor

A student who is interested in the Urban and Regional Planning minor should notify either the Departments of Landscape Architecture or Political Science and consult with their academic advisor. The minor consists of 18 hours of required and elective courses and subdivided into three tiers: core courses, tier-one electives and tier-two electives. The minor's required and elective courses include:

## Required Core Courses:

| PLSC 4103 | Introduction to Urban Planning | 3 |
| :--- | :--- | ---: |
| LARC 5493 | Environmental Land Use Planning | 3 |
| Tier-One Electives | $\mathbf{6 - 1 2}$ |  |
| Select 6-12 hours from the following: |  |  |
| LARC-approved design studio focused on planning (may only |  |  |
| count once) |  |  |
| LARC Advocacy Module focused on planning |  |  |
| ANTH 5113 | Anthropology of the City |  |
| PLSC 4173 | Community Development |  |
| PLSC 390V | Special Topics |  |
| HDFS 4603 | Environmental Sociology |  |
| GEOS 4073 | Urban Geography |  |
| PLSC 3253 | Urban Politics |  |
| LARC 4753 | Incremental Sprawl Repair |  |
| LARC 402V | Special Studies |  |
| SOCI 3153 | Urban Sociology |  |

Tier-Two Electives (up to six hours of electives may come from 0-6 the following options)

| LARC 4033 | Landscape Architecture Theory |
| :--- | :--- |
| GEOS 3043 | Sustaining Earth |
| GEOS 4393 | American Public Lands \& Policy |
| GEOS 4693 | Environmental Justice |
| LARC 5053 | Historic Landscape Preservation |
| ANTH 4443 | Cultural Resource Management I |
| ANTH 4603 |  |
| ENSC 3223 | Ecosystems Assessment |
| ENSC 3221L | Ecosystems Assessment Laboratory |
| ENSC 3933 | Environmental Ethics |
| ENSC 3413 | Principles of Environmental Economics |
| PLSC 4283 | Federalism and Intergovernmental Relations |
| ARCH 5493 | History of Urban Form |
| SCMT 3443 | DELIVER: Transportation and Distribution |

Total Hours

## Minor in Planting Design (for Horticulture majors)

17 Hours Total Required

## Required Courses

| LARC 2113 | Design Visualization, Inquiry and Communications | 3 |
| :--- | :--- | :--- |
| LARC 2714 | Ecological Design and Construction: Terrain | 4 |
| LARC 3914 | Sustainable Design and Construction: Remediation <br> and Plants on Structure | 4 |

| Electives |
| :--- |
| Select two of the following: |
| LARC 1003 |
| LARC 3123 |
|  |
| Basic Course in the Arts: The American Landscape |
| LARC 303V |
| Communications |

## Total Hours

Minor in Sustainable Landscape Design and Management
The Department of Landscape Architecture offers and oversees a minor in Sustainable Landscape Design and Management. The minor is available to any student pursuing a major within the Fay Jones School of Architecture and Design.

This minor in Sustainable Landscape Design and Management combines coursework in the foundations of sustainability, sustainable landscape practices, horticulture, landscape management, operations, and installation.

Responsible landscape professionals increasingly incorporate sustainability into their design, maintenance, and management philosophies. This minor will allow students to incorporate principles of sustainable landscape design and management into the built world, from large-scale landscapes to site-specific spaces. Sustainable landscape management ensures that the landscape needs of today are met without compromising those of future generations by giving equal attention to social, natural, built, and managed systems. Issues addressed include:

- Basic understanding of sustainability at the local to global scale.
- Sustainable landscape practices lessening maintenance time and costs.
- Ecological principles of site design and construction grading (ground plane manipulation).
- Proper plant selection with preference to native and/or organically grown plants that require minimal supplemental nutrients and water, attracting wildlife and pollinators, and are healthier for human use.
- Appropriate pruning to minimize waste, reduce costs and maximize the plant's benefits.
- Sustainable planting design and maintenance to maintain local character and identity.
- Sustainable landscape practices that help to maintain local jobs and businesses.
- Identifying locally sourced materials to minimize transportation costs and resource consumption.

## Required Courses

LARC 2714 Ecological Design and Construction: Terrain

## Choose 3 hours from:

HORT 2003 Principles of Horticulture
or HORT 3503ustainable and Organic Horticulture
or SUST 110Boundations of Sustainability
Choose 9-10 hours from the following:
LARC $2113 \quad$ Design Visualization, Inquiry and Communications
or LARC 3738 -10
Methods of Assembly
or HORT 310ßoody Landscape Plants
or HORT 3203
or HORT 3503ustainable and Organic Horticulture
or HORT 4033rofessional Landscape Installation and Construction
or SUST 110Boundations of Sustainability

A student must take a minimum of 6 hours in the 3000 and 4000 level courses to satisfy requirements for the minor.

## Total Hours

## Professional Licensure Degree Requirement

The School's Bachelor of Landscape Architecture program is accredited by LAAB, which requires that specific criteria be met in a professional program. This five-year professional program gives its graduates the required prerequisite degree to qualify to take the licensing exam and prepares them for practice.

All fifty states require licensure for landscape architects. The primary purpose of this licensure is to "protect the health, safety, and welfare of the public." Most states require that candidates possess an accredited degree in landscape architecture and complete a period of professional experience, working with a licensed landscape architect. Once these requirements are complete, candidates must pass a national, uniform exam, sometimes with additional sections unique to that state.

## Faculty

Biehle, Scott, M.L.A. (University of Texas at Austin), B.A. (St. Olaf College), Teaching Associate Professor, 2012, 2023.
Billig, Noah Scott, Ph.D. (Clemson University), M.Ur.P., M.L.A., B.A. (University of Minnesota), Associate Professor, 2011, 2018.
Coffman, James D., M.L.Arch. (Ball State University, Muncie, Indiana), B.S.B. (Indiana University-Bloomington), Assistant Professor, 2017.

Díaz Montemayor, Gabriel, M.L.A. (Auburn University), B.Arch.
(Universidad Autónoma de Chihuahua), Assistant Professor, 2019.
Erdman, Kimball Douglas, M.L.A. (University of Oregon), B.L.A. (Utah
State University), Professor, 2009, 2023.
McCown, Ken, M.Arch. (University of Illinois at Urbana Champaign), Professor, 2019.
Smith, Carl Alan, Ph.D., M.A. (University of Sheffield), B.Sc. (University of Lancaster), Associate Professor, 2008, 2013.

## Courses

LARC 1003. Basic Course in the Arts: The American Landscape. 3 Hours. Mankind's changing attitudes toward urban and rural outdoor spaces and their aesthetic and cultural values. The origins of the environmental/conservation movement and the development of an American land ethic. Appreciation of the relationship of the natural and historic landscape to the arts and the aesthetic importance of open space. (Typically offered: Fall and Spring)
LARC 1003H. Honors Basic Course in the Arts: The American Landscape. 3 Hours.
Mankind's changing attitudes toward urban and rural outdoor spaces and their aesthetic and cultural values. The origins of the environmental/conservation movement and the development of an American land ethic. Appreciation of the relationship of the natural and historic landscape to the arts and the aesthetic importance of open space. (Typically offered: Fall and Spring) This course is equivalent to LARC 1003.

## LARC 1315. Fundamental Design Skills. 5 Hours.

Fundamental design skills; development of visual and verbal communication skills including observation skills, design technologies, analysis and representation in both 2-dimensions and 3-dimensions through analog and digital tools; creative and critical thinking skills. (Typically offered: Fall and Summer)

## LARC 1325. Fundamental Design Methodology. 5 Hours.

Fundamental design skills; use of precedents for understanding principles of design and natural and formal ordering systems; design development using both iterative and alternative methods of exploration in 2-dimensions and 3-dimensions using analog and digital tools; continued development of visual and verbal communication skills. Prerequisite: LARC 1315. (Typically offered: Spring and Summer)

LARC 2113. Design Visualization, Inquiry and Communications. 3 Hours. Investigation and application of foundational, current and innovative techniques and technologies used in landscape architecture. Field work and other modes of inquiry and seeing are used to study sites. Processes and workflow are learned. Students learn inquiry through technologies, site context investigation, and how to communicate to stakeholders. (Typically offered: Fall)

LARC 2113H. Honors Design Visualization, Inquiry and Communications. 3 Hours.
Investigation and application of foundational, current and innovative techniques and technologies used in landscape architecture. Field work and other modes of inquiry and seeing are used to study sites. Processes and workflow are learned. Students learn inquiry through technologies, site context investigation, and how to communicate to stakeholders. Prerequisite: Honors standing. (Typically offered: Fall) This course is equivalent to LARC 2113.

LARC 2335. Landscape Architecture Design III: Engaging Site, Engaging Place. 5 Hours.
Fundamentals of site inventory, analysis, and assessment. Through measurement, observation, and documentation, students engage with the design of local and regional sites, synthesizing place- based inventorial understanding and experiential response. Students gain an appreciation for both quantifiable and qualitative measurement and observation as creative tools for design development. Corequisite: LARC 2351. Prerequisite: LARC 1325. (Typically offered: Fall)

## LARC 2345. Landscape Architecture IV: Collaborating with Site. 5 Hours.

Students consider an increased complexity of landscape issues and multi-purpose design strategies within a local or regional context, while simultaneously responding to external programmatic requirements. Instructor-guided design projects reinforce the value of site exploration and enumeration. The design process is enriched through programmatic and service requirements, stakeholder collaboration, and reflection on design implication. Corequisite: LARC 2351. Prerequisite: LARC 2335. (Typically offered: Spring)

LARC 2345H. Honors Landscape Architecture IV: Collaborating with Site. 5 Hours.
Students consider an increased complexity of landscape issues and multi-purpose design strategies within a local or regional context, while simultaneously responding to external programmatic requirements. Instructor-guided design projects reinforce the value of site exploration and enumeration. The design process is enriched through programmatic and service requirements, stakeholder collaboration, and reflection on design implication. Corequisite: LARC 2351. Prerequisite: LARC 2335 and Honors candidacy. (Typically offered: Spring)
This course is equivalent to LARC 2345.
LARC 2351. Advocacy and Theory Module: Engaging Site, Engaging Place. 1 Hour.
Students explore theories and history and their implementation to increase understanding of concurrent design studio topics. Students develop advocacy capacities through communication, collaboration and skills through workshops, readings, stakeholder engagement and discussions. Students form rationales for design and personal disposition, while gaining knowledge to advocate for the profession and discipline. Corequisite: LARC 2335. (Typically offered: Fall)

LARC 2361. Advocacy and Theory Module: Collaborating with Site. 1 Hour. Students explore theories and history and their implementation to increase understanding of concurrent design studio topics. Students develop advocacy capacities through communication, collaboration and skills through workshops, readings, stakeholder engagement and discussions. Students form rationales for design and personal disposition, while gaining knowledge to advocate for the profession and discipline. Corequisite: LARC 2345. (Typically offered: Spring)

LARC 2371. Advocacy and Theory Module: International Urban Place. 1 Hour. Students explore theories and history and their implementation to increase understanding of concurrent design studio topics. Students develop advocacy capacities through communication, collaboration and skills through workshops, readings, stakeholder engagement and discussions. Students form rationales for design and personal disposition, while gaining knowledge to advocate for the profession and discipline. Corequisite: LARC 3355. (Typically offered: Summer)
LARC 2714. Ecological Design and Construction: Terrain. 4 Hours. Introduces students to fundamental principles of reading and understanding geomorphology, site systems, and site design. Design tools include grading techniques, earthwork computations, and site-related documentation of natural and built structures. Site-related principles of sustainability are introduced as a framework for solving contemporary site issues. (Typically offered: Fall)

LARC 2714H. Honors Ecological Design and Construction: Terrain. 4 Hours. Introduces students to fundamental principles of reading and understanding geomorphology, site systems, and site design. Design tools include grading techniques, earthwork computations, and site-related documentation of natural and built structures. Site-related principles of sustainability are introduced as a framework for solving contemporary site issues. Prerequisite: Honors standing. (Typically offered: Fall)
This course is equivalent to LARC 2714.
LARC 2914. Sustainable Design and Construction: Plant Communities. 4 Hours.
Introduces plants as components of healthy ecosystems, to innovative and sustainable plants and planting strategies as design frameworks, and to planting as powerful design tool. Soils as building block of healthy designs, foundation identification of woody plants and plant taxonomy, and fundamental concepts of time--ephemerality, phenology, and phenomenology. (Typically offered: Spring)
LARC 303V. Special Projects. 1-6 Hour.
Design implementation, study, practicum, and preparation of working drawings. (Typically offered: Irregular) May be repeated for degree credit.
LARC 303VH. Honors Special Projects. 1-6 Hour.
Design implementation, study, practicum, and preparation of working drawings. Prerequisite: Honors candidacy. (Typically offered: Irregular) This course is equivalent to LARC 303V.

LARC 3123. Advanced Design Visualization, Inquiry and Communications. 3 Hours.
Students learn the applications of current communication techniques and technologies in landscape architecture to discover implications through inquiry. Field work and other modes of investigation and seeing are used around urbanization and large scale landscapes in design inquiry. Students learn how to communicate the implications of design to broad stakeholders. (Typically offered: Spring)

LARC 3123H. Honors Advanced Design Visualization, Inquiry and Communications. 3 Hours.
Students learn the applications of current communication techniques and technologies in landscape architecture to discover implications through inquiry. Field work and other modes of investigation and seeing are used around urbanization and large scale landscapes in design inquiry. Students learn how to communicate the implications of design to broad stakeholders. Prerequisite: Honors standing. (Typically offered: Spring)
This course is equivalent to LARC 3123.

LARC 3355. Landscape Architecture Design V: International Urban Place. 5 Hours.
Investigation of social behavior as applied to program and design that serves human needs. Projects reflect increased scope, scale, and resolution with a detailed design component. Studio and lecture. Corequisite: LARC 2371. Prerequisite: LARC 2345. (Typically offered: Summer)

LARC 3365. Landscape Architecture Design VI: Engaging Communities; Understanding Culture. 5 Hours.
Students engage in design projects working for and/or with a particular population, including forming partnerships with a variety of stakeholders. The studio emphasizes empathy and understanding of competing value systems. Students apply a new cultural understanding to design projects. Corequisite: LARC 3381. Prerequisite: LARC 3355. (Typically offered: Fall)

LARC 3375. Landscape Architecture Design VII: Collaborating with Communities. 5 Hours.
Investigation and application of an issues-based, service-learning, community design project, focusing on resiliency and forming partnerships with a variety of stakeholders. Students engage in design as a means for influencing and negotiating on behalf of a community partner. Corequisite: LARC 3391. (Typically offered: Spring)

LARC 3381. Advocacy and Theory Module: Engaging Communities; Understanding Culture. 1 Hour.
Students explore theories and history and their implementation to increase understanding of concurrent design studio topics. Students develop advocacy capacities through communication, collaboration and skills through workshops, readings, stakeholder engagement and discussions. Students form rationales for design and personal disposition, while gaining knowledge to advocate for the profession and discipline. Corequisite: LARC 3365. (Typically offered: Fall)

LARC 3391. Advocacy and Theory Module: Collaborating with Communities. 1 Hour.
Students explore theories and history and their implementation to increase understanding of concurrent design studio topics. Students develop advocacy capacities through communication, collaboration and skills through workshops, readings, stakeholder engagement and discussions. Students form rationales for design and personal disposition, while gaining knowledge to advocate for the profession and discipline. Corequisite: LARC 3375. (Typically offered: Spring)

## LARC 3413. History of Landscape Architecture I. 3 Hours.

Analysis of the interaction between landscapes and human cultural development as reflected in the meaning, organization, and impact of design and planning at garden and community scales from the Neolithic period through the eighteen century. (Typically offered: Fall)
LARC 3413H. Honors History of Landscape Architecture I. 3 Hours.
Analysis of the interaction between landscapes and human cultural development as reflected in the meaning, organization, and impact of design and planning at garden and community scales from the Neolithic period through the eighteenth century. Prerequisite: Honors candidacy. (Typically offered: Fall)
This course is equivalent to LARC 3413.

## LARC 3724. Ecological Design and Construction: Water and Drainage. 4

 Hours.Introduces water-related issues as encountered and addressed by landscape architects. Students will understand, apply, and design infrastructure such as retention/detention ponds, bioswales, and constructed wetlands. Technical documentation methods as a means of conveying design intent are included. Prerequisite: LARC 2714. (Typically offered: Fall)

LARC 3734. Sustainable Design and Construction: Material and Methods of Assembly. 4 Hours.
Introduces students to issues in material selection including properties, construction techniques, practical considerations in material use and subsequent implications and effects on the built environment. Material use and human experience are also explored. Technical documentation methods as a means of conveying design intent are included. Prerequisite: LARC 3724. (Typically offered: Spring)
LARC 3914. Sustainable Design and Construction: Remediation and Plants on Structure. 4 Hours.
Introduces particular strategies and techniques of plant use in the built environment. Potential topics include green infrastructure, site, soil, and water remediation techniques, and structural considerations of planting on structure. (Typically offered: Fall)

LARC 402V. Special Studies. 1-6 Hour.
Individual or group study and practicum involving landscape design, planning and management, history and environmental analysis. (Typically offered: Irregular) May be repeated for degree credit.
LARC 402VH. Honors Special Studies. 1-6 Hour.
Individual or group study and practicum involving landscape design, planning and management, history and environmental analysis. (Typically offered: Irregular) May be repeated for degree credit.
This course is equivalent to LARC 402V.

## LARC 4033. Landscape Architecture Theory. 3 Hours.

Examination of historic and current theories in landscape architecture and planning to develop critical judgement. Seminar format includes readings and case studies in issues such as social and environmental justice. Prerequisite: LARC 3413 and LARC 4413 or instructor consent. (Typically offered: Summer)

## LARC 4033H. Honors Landscape Architecture Theory. 3 Hours.

Examination of historic and current theories in landscape architecture and planning to develop critical judgement. Seminar format includes readings and case studies in issues such as social and environmental justice. Prerequisite: LARC 3413 and LARC 4413 or instructor consent. (Typically offered: Fall)
This course is equivalent to LARC 4033.
LARC 4123. Urban Form Studies. 3 Hours.
The examination of urban, village, and suburban form and its influencing forces. Includes study of cultural forces, technological developments, and physical shape, scale, and materials that define urban areas. Required field trip component of study abroad. Prerequisite: LARC 3413. (Typically offered: Summer)

LARC 4311. Advocacy and Theory Module: Capstone. 1 Hour.
Students explore theories and history and their implementation to increase understanding of concurrent design studio topics. Students develop advocacy capacities through communication, collaboration and skills through workshops, readings, stakeholder engagement and discussions. Students form rationales for design and personal disposition, while gaining knowledge to advocate for the profession and discipline. Corequisite: LARC 4385. (Typically offered: Fall)

LARC 4321. Advocacy and Theory Module: Comprehensive. 1 Hour.
Students explore theories and history and their implementation to increase understanding of concurrent design studio topics. Students develop advocacy capacities through communication, collaboration and skills through workshops, readings, stakeholder engagement and discussions. Students form rationales for design and personal disposition, while gaining knowledge to advocate for the profession and discipline. Corequisite: LARC 4395. (Typically offered: Spring)

LARC 4385. Landscape Architecture Design VIII: Capstone. 5 Hours.
Topic based, service learning studio that blends faculty research interests with student initiative and the potential for collaboration. This studio builds on the broad foundation of previous coursework while developing a design specialization through which students can advocate for both the profession and the communities they serve. Corequisite: LARC 4311. (Typically offered: Fall)

## LARC 4395. Landscape Architecture Design IX: Comprehensive. 5 Hours.

Summative studio that requires the student to demonstrate landscape architectural design competency through a multiscalar approach that utilizes various resolutions to address critical, multidimensional problems. Corequisite: LARC 4321. (Typically offered: Spring)

## LARC 4413. History of Landscape Architecture II. 3 Hours.

Critical study and analysis of landscape architecture from nineteenth century to the present, with an emphasis on the philosophies, design and planning theories, and social conditions that have influenced the form of gardens, parks, and cities. (Typically offered: Spring)

LARC 4413H. Honors History of Landscape Architecture II. 3 Hours.
Critical study and analysis of landscape architecture from nineteenth century to the present, with an emphasis on the philosophies, design and planning theories, and social conditions that have influenced the form of gardens, parks, and cities.
Prerequisite: Honors candidacy. (Typically offered: Spring)
This course is equivalent to LARC 4413.
LARC 4523H. Landscape Architecture Honors Thesis. 3 Hours.
Development and production of an honors thesis proposal and thesis. Required for all landscape architecture honors students. Prerequisite: Honors standing. (Typically offered: Irregular)

## LARC 4753. Incremental Sprawl Repair. 3 Hours.

Exploration of the causes, manifestation and results of suburban sprawl on the built environment. Design and planning strategies linked to landscape, urbanism, policy, transportation, resource-conservation, ecology, and social structures are proposed. Emphasis is placed on combining traditional and cutting edge methods for repairing sprawled cities and regions. Prerequisite: 4th or 5th year student or instructor approval. (Typically offered: Irregular)

## LARC 4753H. Honors Incremental Sprawl Repair. 3 Hours.

Exploration of the causes, manifestation and results of suburban sprawl on the built environment. Design and planning strategies linked to landscape, urbanism, policy, transportation, resource-conservation, ecology, and social structures are proposed. Emphasis is placed on combining traditional and cutting edge methods for repairing sprawled cities and regions. Prerequisite: 4th or 5th year student or instructor approval. (Typically offered: Irregular)
This course is equivalent to LARC 4753.
LARC 4811. Landscape Architecture Interns. 1 Hour.
Supervised work experience that may include a combination of design, planning, operations, and management procedures in approved design, design/build, government, or non-profit organization. Exposure to a wide range of job tasks and project types. Summative outcomes include a reflection essay and a portfolio of internship work. Prerequisite: LARC 3375 and LARC 3914. (Typically offered: Summer)

## LARC 4853. Latin American Landscapes. 3 Hours.

This course studies the shaping of urban Latin American Landscapes by investigating, problematizing, and analyzing their diverse social, cultural, economic, and environmental conditions as reflected in the built realm. The main scope of study is the conception, origins, meaning, function, and performance of public spaces and landscapes in the continent. (Typically offered: Spring)
This course is cross-listed with LALS 4853.

## LARC 5053. Historic Landscape Preservation. 3 Hours.

Survey of historic preservation as a profession and the emerging cultural landscape preservation movement. Introduction to preservation principles as described by the Secretary of the Interiors Standards and Guidelines. Analysis of case studies will reinforce basic philosophies and introduce preservation approaches. Prerequisite: LARC 3413 and LARC 4413. (Typically offered: Irregular)

LARC 5493. Environmental Land Use Planning. 3 Hours.
Investigation of the relationship between development, stewardship and land use on the city and regional scales. Natural resource systems, public policies, regional economics, and social contexts are investigated as informers of environmental planning and design decisions. Prerequisite: Junior standing or instructor approval. (Typically offered: Spring)

LARC 5493H. Honors Environmental Land Use Planning. 3 Hours.
Investigation of the relationship between development, stewardship and land use on the city and regional scales. Natural resource systems, public policies, regional economics, and social contexts are investigated as informers of environmental planning and design decisions. Prerequisite: Junior and honors standing, or instructor approval. (Typically offered: Spring)
This course is equivalent to LARC 5493.
LARC 5613. Landscape Architectural Professional Practice. 3 Hours.
Review of professional and disciplinary responsibilities and related aspects (including health, safety, and welfare issues) of private, public and non-profit landscape architectural practice. (Typically offered: Fall)
LARC 5613H. Honors Landscape Architectural Professional Practice. 3 Hours. Review of professional and disciplinary responsibilities and related aspects (including health, safety, and welfare issues) of private, public and non-profit landscape architectural practice. Prerequisite: Honors standing. (Typically offered: Fall)
This course is equivalent to LARC 5613.

## Urban and Regional Planning (PLAN)

Noah Billig

Director of Planning Minor
Department of Landscape Architecture
Fay Jones School of Architecture and Design
Vol Walker Hall, room 304
nsbillig@uark.edu
The Landscape Architecture and Political Science departments collaboratively offer an interdisciplinary minor in Urban and Regional Planning for students interested in critical and complex urban and sustainability issues. The minor incorporates discussion of policy, design, and advocacy as shapers of, among others, resilience and justice, infrastructure and mobility, or community engagement.

## Requirements for Urban and Regional Planning Minor

A student who is interested in the Urban and Regional Planning minor should notify either the Departments of Landscape Architecture or Political Science and consult with their academic advisor. The minor consists of 18 hours of required and elective courses and subdivided into three tiers: core courses, tier-one electives and tier-two electives. The minor's required and elective courses include:

## Required Core Courses:

| PLSC 4103 | Introduction to Urban Planning | 3 |
| :--- | :--- | :--- |
| LARC 5493 | Environmental Land Use Planning | 3 |

Tier-One Electives 6-12

Select 6-12 hours from the following:
LARC-approved design studio focused on planning (may only count once)
LARC Advocacy Module focused on planning
ANTH 5113 Anthropology of the City

| PLSC 4173 | Community Development |
| :--- | :--- |
| PLSC 390V | Special Topics |
| HDFS 4603 | Environmental Sociology |
| GEOS 4073 | Urban Geography |
| PLSC 3253 | Urban Politics |
| LARC 4753 | Incremental Sprawl Repair |
| LARC 402V | Special Studies |
| SOCI 3153 | Urban Sociology |

Tier-Two Electives (up to six hours of electives may come from 0-6 the following options)

| LARC 4033 | Landscape Architecture Theory |
| :--- | :--- |
| GEOS 3043 | Sustaining Earth |
| GEOS 4393 | American Public Lands \& Policy |
| GEOS 4693 | Environmental Justice |
| LARC 5053 | Historic Landscape Preservation |
| ANTH 4443 | Cultural Resource Management I |
| ANTH 4603 |  |
| ENSC 3223 | Ecosystems Assessment |
| ENSC 3221L | Ecosystems Assessment Laboratory |
| ENSC 3933 | Environmental Ethics |
| ENSC 3413 | Principles of Environmental Economics |
| PLSC 4283 | Federalism and Intergovernmental Relations |
| ARCH 5493 | History of Urban Form |
| SCMT 3443 | DELIVER: Transportation and Distribution |
|  | Management |

## Total Hours

## Sustainability (SUST)

Ken McCown
Coordinator of Academic Sustainability
Vol Walker Hall, suite 115
479-575-4907
Email: kennethm@uark.edu
Sustainability Program Website (https://sustainability.uark.edu/academics/ minor.php)

The program in sustainability offers an interdisciplinary minor in sustainability available to students from all majors at the university.

The minor is accessible to all undergraduate students, regardless of degree program. The purpose of the minor in Sustainability is to provide foundational knowledge and skills related to the emerging discipline of sustainability, organized around four thematic areas reflecting strength in scholarship of University of Arkansas academic colleges: Sustainability of Social Systems, Sustainability of Natural Systems, Sustainability of Built Systems, and Sustainability of Managed Systems. Students who complete the minor in Sustainability will be expected to:

- Articulate commonly accepted definitions of sustainability and discuss various nuances among those definitions;
- Have an understanding of the interdisciplinary nature of sustainability issues, particularly as they pertain to the thematic areas of knowledge addressed by the minor (sustainability of natural systems, sustainability of managed systems, sustainability of built systems, and sustainability of human social systems);
- Be conversant regarding acquisition and analysis of data pertinent to sustainability issues;
- Communicate orally and in writing organized thoughts defining sustainability issues;
- Identify appropriate potential strategies to address sustainability issues using data and provide results of rudimentary analyses of data using novel metrics or statistics;
- Make recommendations, based on data analysis and interpretation, to advance sustainability of individuals or institutions.

The program also offers a graduate certificate in sustainability (http:// catalog.uark.edu/graduatecatalog/programsofstudy/sustainabilitysust/) through the Graduate School.

## Required Courses for a Minor in Sustainability

Students must earn a grade of 'C' or better for all courses used to fulfill requirements of the minor in Sustainability.

SUST 1103 Foundations of Sustainability 3
SUST 2103 Applications of Sustainability 3
Elective courses with sustainability focus selected from a broad menu 9
of offerings in four thematic areas:
Sustainability of Social Systems
Sustainability of Natural Systems
Sustainability of Built Systems
Sustainability of Managed Systems
Elective courses are categorized as Tier 1 and Tier 2. Tier 1 courses are those with dominant sustainability content or fundamental principles related to understanding sustainability. Tier 1 courses must comprise at least 6 hours of the 9 elective hours. Tier 2 courses are those with subordinate sustainability content or associated principles related to understanding sustainability, but with content useful in preparing students with prerequisite knowledge for Tier 1 courses. Only 3 hours of Tier 2 courses will be accepted in fulfillment of the elective hours in the Minor in Sustainability.
Complete lists of Tier 1 and Tier 2 courses by thematic areas are presented below.

| SUST 4103 | Capstone Experience in Sustainability | 3 |
| :--- | :--- | ---: |
| Total Hours | 18 |  |

List of Available Elective Courses: Students choose 9 hours from menus provided on the Sustainability website (http:// sustainability.uark.edu/academics/minor/minor-courses.php); at least six hours must be chosen from Tier 1 courses (with prerequisites, if applicable).

## Capstone Experience

All students participating in the minor in Sustainability must complete a capstone experience focused on service learning, research learning, or internship in sustainability. Student engagement in community service, research, or relevant work on sustainability through a summer internship provides opportunities for students to apply sustainability theories and principles learned from prior coursework toward advancing sustainability across society.

Students may formally petition the University of Arkansas Sustainability Curriculum Steering Committee to substitute sustainability-oriented senior design projects, Honors College research projects, other service learning courses, or equivalent internship experiences for SUST 4103 to satisfy
the capstone element of minor in Sustainability. Details of the procedure to substitute alternative experiences for SUST 4103 can be found in the Foundations of Sustainability Program Handbook.

To qualify for SUST 4103 or other sustainability capstone experience, students must have successfully completed SUST 1103, SUST 2103, and 6 hours of elective course work toward the minor in Sustainability.

## Courses

SUST 1103. Foundations of Sustainability. 3 Hours.
Foundations of Sustainability is an interdisciplinary course to introduce concepts and theories of sustainability at global, regional, and local levels. Emphasis is on four thematic areas of sustainability; social, natural, built and managed systems. The aim is to increase environmental literacy for engagement of sustainability into students' own disciplines. (Typically offered: Spring)
SUST 1103H. Honors Foundations of Sustainability. 3 Hours.
Foundations of Sustainability is an interdisciplinary course to introduce concepts and theories of sustainability at global, regional, and local levels. Emphasis is on four thematic areas of sustainability; social, natural, built and managed systems. The aim is to increase environmental literacy for engagement of sustainability into students' own disciplines. Prerequisite: Honors standing. (Typically offered: Spring) This course is equivalent to SUST 1103.
SUST 2103. Applications of Sustainability. 3 Hours.
Applications of Sustainability is an interdisciplinary course introducing data gathering, data analysis or interpretation, and synthesis of data applied to problems in sustainability. Students engage in hands-on, inquiry-based investigation of sustainability issues across four thematic areas: social systems, natural systems, built systems (Architecture \& Engineering), and managed systems (Agriculture \& Business). Prerequisite: SUST 1103 or instructor consent. (Typically offered: Fall)
SUST 390V. Special Problems in Sustainability. 1-6 Hour.
Special Problems is intended to fulfill a need in the sustainability curriculum to offer one-time pilot course work in any semester prior to the formal curriculum approval process, offer seminars on unusual but timely topics in sustainability on a one-time basis, or independent study for students seeking additional expertise in sustainability research and scholarship. Prerequisite: SUST 1103 and SUST 2103 or instructor permission. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

SUST 4103. Capstone Experience in Sustainability. 3 Hours.
A capstone experience focused on service learning, research learning, or internship in sustainability. Student engagement in community service, research, or relevant work on sustainability through a summer internship or equivalent experience provides opportunities for students to apply sustainability theories and principles learned from prior course work toward advancing sustainability across society. Prerequisite: SUST 1103 and SUST 2103. (Typically offered: Spring)

## SUST 4603. Environmental Sociology. 3 Hours.

The course provides a social perspective on environmental issues. It examines the linkage between society, ecological systems and the physical environment. It provides conceptual framework(s) for analyzing environmental issues, considers the role of humans in environmental issues, and enhances understanding the complexity of the relationship between societal organization and environmental change. Prerequisite: Junior or senior standing. (Typically offered: Fall) This course is cross-listed with HDFS 4603, SOCI 4603.

SUST 4693. Environmental Justice. 3 Hours.
This course deals with the ethical, environmental, legal, economic, and social implications of society's treatment of the poor, the disenfranchised, and minorities who live in the less desirable, deteriorating neighborhoods, communities, and niches of our country. The class integrates science with philosophy, politics, economics, policy, and law, drawing on award-winning films, current news, and case studies. (Typically offered: Spring)
This course is equivalent to GEOS 4693.

## Fulbright College of Arts and Sciences

## Mission and Objectives

J. William Fulbright was a University of Arkansas student who graduated in 1925, was later a law professor and then became $U$ of $A$ president from 1939-41 - all prior to serving as a U.S. Senator for many years.

The university recognizes that J. William Fulbright's political legacy is controversial and complex. Along with signing the Southern Manifesto and opposing the landmark 1954 ruling of Brown v. Board of Education, Fulbright voted to filibuster the Civil Rights Act of 1964, and voted against the 1965 Voting Rights Act. These actions directly contradicted his efforts to advance cultural understanding, peace, and international exchange through education.
J. William Fulbright supported the creation of the United Nations and his efforts to increase mutual understanding between people and nations resulted in the creation of the Fulbright Program - the world's largest international educational exchange program with more than 370,000 alumni, and thousands of students and scholars from 160 countries participating annually. President Bill Clinton in 1993 honored him with the nation's highest civilian award, the Medal of Freedom.

Additionally, the Board of Trustees of the University of Arkansas on November 20, 1981, resolved...

> The College of Arts and Sciences at the University of Arkansas, Fayetteville, shall be named, henceforth, the J. WILLIAM FULBRIGHT COLLEGE OF ARTS AND SCIENCES. His name will imbue that college, and the University, with his reputation and image for a devoted interest in higher education and its accomplishments through its scholars as reflected in its students.

It's his work to enhance cultural understanding, peace, and international exchange through education that we honor, and his service to this institution as president. How we view past leaders is an important topic and many colleges and communities are grappling with what's right while working to understand the complete history of those involved and what we can learn from the process. There is no better place to have this discussion than on a college campus, where we value conversation, learning and debate.

Additionally, the college has adopted as its mission the following statement, learning from Fulbright's conflicting and complex legacy and vowing to do better:

The Fulbright College of Arts and Sciences enriches lives by promoting discovery, diversity, and inclusion, facilitating transformational experiences, and fostering peace through education.

## Facilities and Resources

## Academic Advising Services

The Fulbright College of Arts and Sciences provides an adviser for each student enrolled in the college. Advisers in the Fulbright College Advising Center will assist students in program planning and will help them to become aware of and familiar with the academic offerings of the university. Students should consult their advisers on a regular basis, not limited to registration matters but including all areas of their academic careers. Personnel in the Fulbright College Advising Center or the Dean's office will direct students to the appropriate advising office.

Students should discuss with their advisers opportunities for individual variations as well as regular course requirements. Programs and facilities of particular interest to individuals may include the Honors Program, programs for advanced placement and credit by examination, study abroad and the services of the University Career Development Center.

The Career Development Center administers and interprets tests that measure individual ability, interest, and achievement, and thus may aid also in counseling students about the field of study in which they are most likely to be effective and successful.

For questions regarding advising, contact the Fulbright College Advising Center at 575-3307 or visit online at http://fcac.uark.edu.

## Degrees Offered

The Fulbright College of Arts and Sciences offers four-year curricula leading to the degrees of Bachelor of Arts (B.A.), Bachelor of Science (B.S.), Bachelor of Fine Arts (B.F.A.), Bachelor of Music (B.M.), and Bachelor of Social Work (B.S.W.). Each candidate for the B.A. and B.S. degrees selects a major field for specialized study. In addition to usual departmental majors there are interdepartmental majors and special programs for students preparing for professional degrees in law, medicine, dentistry, and teaching.

## College Scholarships

Foremost among scholarships available in the Fulbright College of Arts and Sciences is the Sturgis Fellowship. This scholarship enables Fulbright College to offer outstanding graduates of secondary and preparatory schools undergraduate fellowships valued at \$50,000 for four collegiate years.

Students studying in the humanities or classics may qualify for the J . William and Elizabeth W. Fulbright Scholarship for study abroad. This award is for students who are at least juniors and is intended to support a year of study abroad.

The King Fahd Center for Middle East Studies offers two-year undergraduate scholarships for superior students interested in pursuing the study of the Middle East or Islam.

In addition, students may compete for a number of privately endowed scholarships, which are awarded on a competitive basis to those who qualify. Application for these general Fulbright College scholarships and awards is made through the Office of the Dean, 525 Old Main. Students may obtain more detailed information about the abovenamed scholarships and other Fulbright College scholarships at http:// fulbright.uark.edu/scholarships/index.php (http://fulbright.uark.edu/ scholarships/).

Other scholarships are available from the departments of Fulbright College. Information may be sought from the departmental chair of the student's major.

## Student Organizations

There are many general-interest societies and organizations to which students may belong, and nearly every department of the university maintains an honor society through which high scholarship is rewarded. Students in Fulbright College may aspire to membership in the following organizations:

- Alpha Chi Sigma (chemistry)
- Alpha Epsilon Delta (pre-medical, medical technology, pre-dental)
- Alpha Kappa Delta (sociology)
- Alpha Phi Sigma (criminal justice)
- Alpha Psi Omega (drama)
- American Association of Petroleum Geologists (geoscience)
- American Chemical Society (chemistry)
- American Society for Photogrammetry and Remote Sensing (geoscience)
- Delta Phi Alpha (German)
- Eta Sigma Phi (Greek and Latin)
- Gamma Theta Upsilon (geography)
- Kappa Kappa Psi (band)
- Kappa Tau Alpha (journalism)
- Lambda Alpha (anthropology)
- Lambda Pi Eta (communication)
- Lambda Tau (writers)
- Omicron Delta Epsilon (economics)
- Phi Alpha (social work)
- Phi Alpha Theta (history)
- Phi Beta Delta (international scholarship)
- Phi Beta Kappa (arts and sciences)
- Phi Kappa Phi
- Phi Mu Alpha (music, men)
- Pi Kappa Delta (forensics)
- Pi Mu Epsilon (mathematics)
- Pi Sigma Alpha (political science)
- Psi Chi (psychology)
- Sigma Alpha Iota (music, women)
- Sigma Delta Pi (Spanish)
- Sigma Gamma Epsilon (geology)
- Sigma Pi Sigma (physics)
- Tau Beta Sigma (band, women)

## College Academic Regulations

Courses of study in the Fulbright College of Arts and Sciences are designed to give students the comprehensive view of society that the modern world requires. Students who enroll in Fulbright College, or who elect some of its courses, have an opportunity to gain a broad cultural education, which is a part of intelligent living and, at the same time, to prepare for professions or to acquire technical training in the sciences. The college has two major teaching functions: to provide basic general education in the arts and sciences necessary to all persons for effective
participation in the complex world in which we live; and, second, to furnish the student an opportunity to specialize in the field of the student's choice.

To implement the first of these aims and to furnish a broad base for the accomplishment of the second, the faculty of Fulbright College has adopted the requirements listed below for each degree.

Specific course requirements may be fulfilled in one of four ways:

1. Establishing credit in approved courses:
a. By enrolling in and completing the required work in the course,
b. By examination (credit will be entered as CR on a student's record as explained in Advanced-Standing Programs (p. 64)),
c. By advanced achievement, i.e., by satisfactory completion of a more advanced course of a sequence. For example, students who earn a grade of " $C$ " or better in a third-semester foreign language course may be granted credit for the second semester course upon recommendation of the Department of World Languages, Literatures, and Cultures, and approval by the Dean of the college. (This does not apply to work taken as a self-paced online [correspondence] course or in transfer.)
2. Gaining exemption by examination. Announced exemption examinations are routinely offered in several courses. Students may consult any department or the dean's office concerning exemption examinations.
3. Advanced placement by examination. A student who is granted advanced placement may elect to substitute a more advanced course for the listed required course.
4. Transfer credit. Students presenting transfer credit in lieu of stated requirements may be asked to present official course descriptions, etc. Transfer work with grades of "D" or "F" will not be accepted.

## Degree Completion Program Policy

## Fulbright College of Arts and Sciences Graduation Requirements

In addition to the specific course requirements for the degree plan and major, be aware that there are general graduation requirements that every student in Fulbright College must complete.

1. Minimum Total Semester Hour Requirement
B.A., B.S. and B.S.W. Degrees: 120 hours
B.M.: 120 hours
B.F.A.: 120-123 hours
2. Residency Requirement
a. University Residency (Enrollment) Requirement

Students must earn a minimum of 30 semester hours at the University of Arkansas, Fayetteville campus - this includes UA faculty-led study abroad classes, online/on-campus classes, and Global Campus courses; and all other courses paid towards Fayetteville campus tuition and fees. These 30 semester hours are to be upper-division semester hours required for the completion of a degree program. Additional hours in residence can be required for completing a minor. Hours earned in another school or college at UA, Fayetteville, may be used to satisfy this requirement with approval of appropriate faculty curriculum committee.
b. College Residency Requirement and 24 Hour Rule

A student graduating from Fulbright College must have completed at least 30 hours of credit in courses offered by Fulbright College, at least 24 of which must be 3000 and 4000 level courses from departments in Fulbright College.
c. Major/Minor Residency Requirement (50 Percent Rule) A student graduating with a major or a minor from Fulbright College must have completed a minimum of 50 percent of degree credit work within the Fulbright College major or within the Fulbright College minor at the University of Arkansas through courses completed at the University of Arkansas, Fayetteville campus as defined in the University Residency Requirement. This percentage completion requirement may be higher for some majors and minors. Students should review individual departmental requirements to verify if a higher percentage is required by their specific major or minor department.
3. 40-Hour Rule

Students must present for degree credit at least 40 hours of work in courses numbered 3000 and above. Included in these 40 hours can be courses numbered 2000 if each has a specific course designated as a prerequisite. It is highly recommended that students complete all 40 hours in courses numbered 3000 and higher. These courses may be taken from other colleges or universities as long as the college residency requirement and the 24 -hour rule are satisfied.
4. Grade-Point Average

Students graduating from Fulbright College must have a minimum cumulative GPA of 2.00 .
5. Writing Requirement

Students graduating from Fulbright College must write a research/ analytical paper for at least one upper-division course in his or her major. Each department has determined its own procedures for certifying completion of this requirement. Questions should be referred to the departmental chairperson. A student may choose to write a senior thesis in a major area of study. The thesis may be accorded up to six hours of credit. Defense of the thesis before a committee is required. Satisfactory completion of an honors project or a senior thesis may be submitted to meet the college writing requirement.
6. Students must complete the stated requirements for a Fulbright College major in addition to all university requirements for graduation, including the University Core requirements.

Questions concerning fulfilling the requirements should be referred to the student's adviser or to the dean's office, which will maintain current lists of approved courses, experimental offerings approved to fulfill requirements for a specified period of time, examination schedules, and other options available to the student.

## Graduation with Distinction

Students who have not completed a Fulbright college or departmental honors degree program but have otherwise demonstrated academic excellence in baccalaureate degree programs in the Fulbright College of Arts and Sciences will be recognized at graduation by the designation of "with high distinction" or "with highest distinction." To earn this designation, students must meet the following criteria up through the term prior to their graduation term:

1. The student must have completed at least one-half of his or her degree work at the University of Arkansas.
2. For "with high distinction," the student must achieve a cumulative $U$ of A GPA of 3.8 to 3.899 .
3. For "with highest distinction," the student must achieve a cumulative $U$ of A GPA of 3.9 or higher.

The criteria may be evaluated and changed periodically by the Fulbright College of Arts and Sciences.

## Combined Academic and Medical, Dental, or Pharmacy Degree

Fulbright College offers a Bachelor of Science degree in medical science. A student may substitute the first year of regular medical, dental, or pharmacy work taken in any standard, approved medical, dental, or pharmacy school for 33 hours of the 120 hours required for the Bachelor of Science degree provided that the following requirements are met:

1. Completion of all university/state core requirements for a B.S. degree, as appropriate, prior to student's entrance in medical, dental, or pharmacy school.
2. Completion of at least 30 hours immediately prior to student's entrance in medical, dental, or pharmacy school in residence at the University of Arkansas to include 12 hours of upper division courses (3000 or above) taken in Fulbright College.

Students interested in this degree should consult with their adviser or with the Fulbright College dean's office early in their program. Formal application for the degree should be made to the Registrar.

This program is for highly qualified students with outstanding academic records who may be eligible for early admission to medical, dental, or pharmacy school programs. The year of a medical, dental, or pharmacy study substitutes for the major in the B.S. degree program.

## Graduate Studies

The Graduate School, in cooperation with the faculty of Fulbright College of Arts and Sciences, offers work leading to the graduate certificate or to the degrees of Master of Arts, Master of Science, Master of Music, Master of Fine Arts, Master of Public Administration, Master of Social Work, and Doctor of Philosophy.

Students interested in any of these advanced degrees should consult the Graduate School Catalog or the Dean of the Graduate School.

## Accreditations

The American Council on Education in Journalism and Mass Communications has accredited the Bachelor of Arts (B.A.) degree program in journalism. The Bachelor of Arts (B.A.), Bachelor of Music (B.M.), and Master of Music (M.M.) at the University of Arkansas are accredited by the National Association of Schools of Music. The Doctor of Philosophy (Ph.D.) degree program in clinical psychology is accredited by the American Psychological Association. The Bachelor of Social Work (B.S.W.) degree and the Master of Social Work (M.S.W.) degree are accredited by the Council on Social Work Education.

- Theatre (p. 581)

## Combined Majors

- Journalism/Political Science (http://catalog.uark.edu/ undergraduatecatalog/collegesandschools/ jwilliamfulbrightcollegeofartsandsciences/journalism-strategic-media/ \#combinationjournalismpoliticalsciencedegreetext)

## Second (or dependent) Majors

A second (or dependent) major is one that a student may pursue as a major if the student is already pursuing a first major that is authorized to be given independently.

- African and African American Studies (p. 288)
- Asian Studies (p. 329)
- Latin American and Latino Studies (p. 466)
- Middle East Studies (p. 483)

## Minors

Academic minors in approved degree programs are options available to students in the Fulbright College of Arts and Sciences. The minor must be in a field other than the major, and students must notify the department of their intention to minor. An academic minor ordinarily consists of 15-18 hours. Specific requirements for the minor are given in the section entitled Departments, Majors, and Minors. Minors may be chosen from the following fields:

- African and African American Studies (p. 290)
- Anthropology (p. 298)
- Arabic (p. 600)
- Art History (p. 319)
- Asian Studies (p. 329)
- Biology (p. 336)
- Business (p. 695)
- Chemistry (p. 351)
- Child Advocacy Studies Training (p. 571)
- Chinese (p. 601) (Business Orientation)
- Classical Studies (p. 356)
- Communication (p. 359)
- Criminal Justice (p. 366)
- East Asian History and Politics (p. 330)
- Economics (p. 403)
- English (p. 411)
- French (p. 600)
- French (p. 601) (Business Orientation)
- Gender Studies (p. 417)
- Geography (p. 420)
- Geology (p. 428)
- German (p. 600)
- Global Studies (p. 463)
- History (p. 447)
- Indigenous Studies (p. 455)
- Italian (p. 600)
- Japanese (p. 601) (Business Orientation)
- Jewish Studies (p. 465)
- Journalism and Strategic Media (http://catalog.uark.edu/ undergraduatecatalog/collegesandschools/ jwilliamfulbrightcollegeofartsandsciences/journalism-strategic-media/ \#minorinjournalismtext)
- Latin American and Latino Studies (p. 467)
- Legal Studies (p. 556)
- Mathematics (p. 476)
- Medical Humanities (p. 481)
- Medieval and Renaissance Studies (p. 482)
- Middle East Studies (p. 484)
- Music (p. 510)
- Philosophy (p. 527)
- Physics (p. 548)
- Political Science (p. 556)
- Psychology (p. 564)
- Religious Studies (p. 566)
- Rhetoric and Writing Studies (p. 567)
- Russian Studies (p. 600)
- Social Work (p. 572)
- Sociology (p. 576)
- Southern Studies (p. 579)
- Spanish (p. 601)
- Statistics (p. 476)
- Substance Abuse Disorders (p. 572)
- Theatre (p. 587)
- Urban and Regional Planning (p. 556)

Fulbright College also recognizes all official minors offered by sister colleges at the University of Arkansas. Students wishing to have such minors made a part of their transcript must notify the Fulbright College dean's office (MAIN 525) no later than when degree application is made.

## Other Programs <br> Undergraduate Preparation for Professional Programs

The Fulbright College of Arts and Sciences offers comprehensive support for students pursuing a wide array of professional and graduate programs. Because undergraduate preparation for these programs requires diligent planning, students should contact the Advising Center or appropriate faculty advisor as soon as possible. The Fulbright College Advising Center is in Old Main 518 and can be reached at 479-575-3307 or fcac@uark.edu. Supported programs include (but are not limited to) the following:

- Dentistry
- Law
- Medicine
- Optometry
- Pharmacy

Pre-Dental Program: All dental schools require a minimum of three years of college work, and most schools give preference to applicants who have completed a baccalaureate degree. The minimum requirements
for admission to most dental schools can be met at the University of Arkansas by completing the following courses:

| ENGL 1013 | Composition I (ACTS Equivalency = ENGL 1013) |
| :---: | :---: |
| ENGL 1023 | Composition II (ACTS Equivalency = ENGL 1023) |
| BIOL 1543 <br> \& BIOL 1541L | ```Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture) and Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab)``` |
| And at least 8 additional hours of biology (BIOL 1603/BIOL 1601L is recommended) |  |
| PHYS 2013 <br> \& PHYS 2011L | ```College Physics I (ACTS Equivalency = PHYS 2014 Lecture) and College Physics I Laboratory (ACTS Equivalency = PHYS 2014 Lab)``` |
| PHYS 2033 <br> \& PHYS 2031L | ```College Physics II (ACTS Equivalency = PHYS 2024 Lecture) and College Physics II Laboratory (ACTS Equivalency = PHYS 2024 Lab)``` |
| CHEM 1103 <br> \& CHEM 1101L | University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture) <br> and University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab) |
| CHEM 1123 <br> \& CHEM 1121L | University Chemistry II (ACTS Equivalency = CHEM 1424 Lecture) <br> and University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab) |
| CHEM 3603 <br> \& CHEM 3601L | Organic Chemistry I and Organic Chemistry I Laboratory |
| CHEM 3613 <br> \& CHEM 3611L | Organic Chemistry II and Organic Chemistry II Laboratory |
| CHEM 3813 | Elements of Biochemistry |

CLEP and AP credit is not accepted. Dental schools have a variety of additional course requirements and pre-dental students should check each school's website.

Mathematics is not a general requirement, but students are expected to have a background equivalent to college algebra and trigonometry.

Students who complete a minimum of 90 hours of work may qualify for the combined degree program provided that they complete the requirements for graduation in Fulbright College of Arts and Sciences.

All dental schools require the Dental Admissions Test. It is suggested that applicants take the DAT one year prior to the time they plan to enter dental school. A student planning a career in dentistry should contact Dr. J.C. Rose, Department of Anthropology, 479-575-2508.

Pre-Law Program: While there is no prescribed pre-law curriculum, Fulbright College offers a minor in legal studies administered through the department of political science. Students considering a career in law may consult the School of Law Catalog or the Fulbright College Advising Center for information concerning certain categories of courses that may be helpful to the study and practice of law. Students uncertain about a major degree program should contact the Fulbright College Advising Center.

A baccalaureate degree is required for admission to the University of Arkansas School of Law, except for those students in the Fulbright College of Arts and Sciences who are admitted to the special six-year program referred to in the paragraph immediately following. All applicants
for admission are required to take the Law School Admission Test. (See page 281.)

The University of Arkansas School of Law at Fayetteville and the Fulbright College of Arts and Sciences jointly administer a six-year program whereby highly qualified students may earn both the bachelor's degree and the Juris Doctor degree. Any student enrolled in the J. William Fulbright College of Arts and Sciences during a spring semester shall be permitted to matriculate in the School of Law in the following fall semester if the admission complies with Section 1 of Part A of the law school's admission policies and if the student meets the following conditions:

1. At least 30 consecutive hours of course work in Fulbright College,
2. At least 94 hours credited toward a bachelor's degree by Fulbright College,
3. Completion of Fulbright College's requirements for a major in connection with the bachelor's degree,
4. A cumulative grade-point average in all college or University course work of at least 3.50 , without grade renewal,
5. An LSAT score of at least 159.

A student may substitute law school course work for the remaining total hours required for the bachelor's degree from Fulbright College. Formal application for the degree should be made to the Registrar. Information about the program may be obtained in the dean's office or the Fulbright Advising Center.

Pre-Medical Program: Medical schools in general require a minimum of 90 semester hours of college credit exclusive of military science and physical education, and most recommend that the student complete a baccalaureate degree. All medical schools have specific course requirements, and the student should determine those requirements for the school or schools of his or her choice. The minimum requirements for many medical schools can be met by completion of the following courses:

ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013) 3
ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023) 3
BIOL $1543 \quad$ Principles of Biology (ACTS Equivalency $=$ BIOL 4
\& BIOL 1541L 1014 Lecture)
and Principles of Biology Laboratory (ACTS
Equivalency = BIOL 1014 Lab)
Plus one other course in biological sciences, or equivalent. UAMS 3-4 specifically requires:

| BIOL 2323 | General Genetics |  |
| :--- | :--- | ---: |
| CHEM 1103 | University Chemistry I (ACTS Equivalency = | 4 |
| \& CHEM 1101L | CHEM 1414 Lecture) <br> and University Chemistry I Laboratory (ACTS |  |
|  | Equivalency = CHEM 1414 Lab) | 4 |
| CHEM 1123 | University Chemistry II (ACTS Equivalency = | 4 |
| \& CHEM 1121L | CHEM 1424 Lecture) <br> and University Chemistry II Laboratory (ACTS |  |
|  | Equivalency = CHEM 1424 Lab) |  |$\quad 4$

| MATH 1203 \& MATH 1213 | ```College Algebra (ACTS Equivalency = MATH 1103) and Plane Trigonometry (ACTS Equivalency = MATH 1203)``` |
| :---: | :---: |
| or MATH 2554 | Calculus I (ACTS Equivalency = MATH 2405) |
| STAT 2823 or STAT 2303 | Biostatistics <br> Principles of Statistics (ACTS Equivalency $=$ MATH 2103) |
| PHYS 2013 <br> \& PHYS 2011L <br> \& PHYS 2033 <br> \& PHYS 2031L | ```College Physics I (ACTS Equivalency = PHYS 2014 Lecture) and College Physics I Laboratory (ACTS Equivalency = PHYS 2014 Lab) and College Physics II (ACTS Equivalency \(=\) PHYS 2024 Lecture) and College Physics II Laboratory (ACTS Equivalency = PHYS 2024 Lab)``` |
| or PHYS 2054 <br> \& PHYS 2074 | University Physics I (ACTS Equivalency = PHYS 2034) and University Physics II (ACTS Equivalency = PHYS 2044 Lecture) |
| 2 Social Sciences | referably: 6 |
| PSYC 2003 | $\begin{aligned} & \text { General Psychology (ACTS Equivalency = PSYC } \\ & \text { 1103) } \end{aligned}$ |
| SOCI 2013 | General Sociology (ACTS Equivalency $=$ SOCI 1013) |

Most medical schools will not accept CLEP credit, and in some cases, AP credit for the required courses above is not accepted.
Most medical schools will not accept on-line or web-based classes to fulfill requirements.
Additional courses are recommended. Special opportunities and experiences are available to pre-medical students through the Liebolt Premedical Program (http://premed.uark.edu (http://premed.uark.edu/)).

Pre-medical students are encouraged to complete the requirements for the B.A. or B.S. degree. As part of these requirements the student must choose a major, but the choice of a major has no direct bearing upon admission to medical school and should reflect the particular interests of the student. If a student is admitted to a medical school prior to completion of the baccalaureate degree requirements, he/she may wish to take advantage of the combined degree program in medical science. If that program is elected, the student should complete all of the basic University and college requirements for graduation during residence on the UA campus.

Most medical schools require the Medical College Admissions Test (MCAT), which is administered at several testing sites in Arkansas on specific dates from January to September each year. The MCAT normally should be taken in the spring preceding application to medical school. Admission to medical school is highly competitive, and a good grade-point average is demanded. A grade-point average of 3.30 is the minimum likely to receive favorable consideration. A grade of " $D$ " in any course required by the medical school is not considered satisfactory. Advising is available through Dr. Neil Allison, Department of Chemistry and Biochemistry, 479-575-5179, and Dr. Jeanne McLachlin, Department of Biological Sciences, 479-575-5348. Dr. Allison serves as chair of the University of Arkansas Pre-medical Advisory Committee. For information, visit the University of Arkansas pre-medical website at http:// premed.uark.edu.

Pre-Pharmacy Program: Entrance requirements for pharmacy schools vary; therefore, students should research the schools of their choice to
determine specific prerequisite course work. The University of Arkansas for Medical Sciences College of Pharmacy requires 69 hours of preprofessional courses to include: 4 hours of calculus, 9 hours of English/ Communication, 16 hours of chemistry, 12 hours of biology, 4 hours of physics, 3 hours of economics, 6 hours of critical thinking/problem solving, and 15 hours of humanities.

Students are advised to begin taking humanities electives during the second semester of their freshman year. Since pharmacy schools have many more applicants than they can accept, the student is urged to earn a grade point average much higher than the minimum of 2.00 .

Grades are a major consideration when admission committees evaluate a student's qualifications for acceptance. The University of Arkansas College of Pharmacy and other pharmacy schools also require applicants to take the Pharmacy College Admission Test (PCAT). This may be taken in November or February. The pre-pharmacy adviser for the University of Arkansas is Lorraine Brewer, Department of Chemistry and Biochemistry, 479-575-3103.

## Undergraduate Certificates <br> Professional Agility and Career Essentials Undergraduate Microcertificate

The goal of this microcredential is to assist students in making the connection between their collegiate major and/or minors and the General Education Learning Outcomes with several future professional career paths.

## Requirements for Professional Agility and Career Essentials Undergraduate Microcertificate

The PACE Undergraduate Microcertificate requires nine credit hours that may be used to fulfill the requirements for an undergraduate degree. The specific requirements are listed below. See an adviser for course selection.

ARSC 310V Fulbright College Elective Internship
Or an approved internship within any Fulbright College academic department
6-8 credit hours from the following:
ARSC 3013 Fulbright College Career Connections
ARSC 3203 Professional ePortfolio
Or other electives related to professional development, including an additional internship, to be approved by the director.
Total Hours

## The Fulbright College Honors Program

Lindsey S. Aloia
Director of Honors Program
525 Old Main
479-575-2509
Fulbright Honors Program Website (https://fulbright.uark.edu/honorsprogram/)

The Fulbright College Honors Program is designed for students who seek an intellectual environment that is engaging, challenging, and rewarding. The Fulbright College of Arts and Sciences provides students with a wholistic education in the arts, humanities, and sciences. Such an education is theoretically grounded, practically innovative, and enriched
by creative faculty. This is especially true for students with superior academic ability and creative talent.

The Fulbright College Honors Program consists of two options:

1. The College Honors Program
2. The Departmental Honors Program.

Students who complete either option are eligible to graduate cum laude, magna cum laude, or summa cum laude.

Admission to the University of Arkansas Honors College assures automatic admission into the Fulbright College Honors Program for incoming students. A student can apply for admission electronically through the Honors College website (https://honorscollege.uark.edu/ apply/). The admission criteria for the Fulbright College Honors Program are as follows:

## Entering Freshmen

Please visit the Honors College Section (https://catalog.uark.edu/ undergraduatecatalog/collegesandschools/honorscollege/) of the catalog

## Continuing and Transfer Students

- 3.5 cumulative grade point average
- An application from a student who is currently on probation in another University of Arkansas College Honors Program is evaluated at the conclusion of his/her/their probationary semester
- An application is not accepted from a student who is within three full semesters of his/her/their anticipated graduation date

## College Honors Program Requirements

The Fulbright College Honors Program requires students to meet all University of Arkansas, Fulbright College of Arts and Sciences, and Department degree requirements. In addition, a student must maintain a cumulative grade point average of 3.5 , complete 29-34 honors hours from specified areas of study, and defend an honors thesis.
B.A./B.S.W. College Honors Requirements $=32$ honors hours

- 8 hours of honors natural sciences or math
- 15 hours of honors social science, fine arts, or humanities
- 9 hours of honors colloquia
- Complete through 2013 of a world language (0-12 hours)
B.S. College Honors Requirements $=34$ honors hours
- 16 hours of honors natural sciences or math
- 9 hours of honors social sciences, fine arts, or humanities
- 9 hours of honors colloquia
- Complete through 2003 of a world language (0-9 hours)
B.F.A./B.M. College Honors Requirements $=29$ honors hours
- 8 hours of honors natural sciences or math
- 15 hours of honors social sciences, fine arts, or humanities
- 6 hours of honors colloquia
- Complete through 1013 of a world language (0-6 hours)

## Departmental Honors Program Requirements

The Fulbright College Honors Program requires students to meet all University of Arkansas, Fulbright College of Arts and Sciences, and Department degree requirements. In addition, a student must maintain a cumulative grade point average of 3.5 , complete 12-24 honors hours, and defend an honors thesis.

## The Fulbright College Honors Program Graduation Levels

The bachelor degrees summa cum laude (with highest honors), magna cum laude (with high honors), or cum laude (with honors) are conferred to students who successfully completed the requirements stated above. Both College Honors and Departmental Honors are eligible for the following designations.

## Summa Cum Laude

- 3.9 cumulative grade point average
- 24 honors hours
- Successful defense of an honors thesis

## Magna Cum Laude

- 3.7 cumulative grade point average
- 18 honors hours
- Successful defense of an honors thesis

Cum Laude

- 3.5 cumulative grade point average
- 12 honors hours
- Successful defense of an honors thesis
*Minimum required honors hours for each level must be completed at the University of Arkansas

## Grade Point Average Considerations

## First-Time Probation Students

Fulbright College Honors Program students must maintain a minimum 3.50 cumulative grade point average. Should a student's grade point average fall below 3.50, the student is placed on probation for the following semester. During this probationary period, the student retains the privilege of membership in the Honors College and the Fulbright College Honors Program. If at the end of the probationary semester, the student's cumulative grade point average is higher than 3.50, the student is removed from probation. If at the end of the probationary semester the student's cumulative grade point average remains below 3.50 , the student is removed from the Honors College and the Fulbright College Honors Program.

## Below 3.00 Cumulative GPA

If a Fulbright College Honors Program student's cumulative grade point average falls below 3.00 at any point, the student is immediately removed from the Honors College and the Fulbright College Honors Program.

## Fulbright Honors Academic Integrity Policy

All Fulbright College Honors students are held to the highest standards regarding academic achievement and academic integrity. Any student who violates the Academic Integrity Policy and receives a sanction of 1.0 or more at the University of Arkansas is permanently removed from the Fulbright College Honors Program. The student may petition for grade forgiveness to remove the sanction from their transcript.

If that is achieved, the student may apply for re-admission into the Fulbright College Honors Program. Any student suspended or expelled for dishonesty is permanently removed from the Honors College and the Fulbright College Honors Program and is denied the opportunity to reapply.

For more information about the Fulbright College Honors Program, visit the College's Honors Program website (https://fulbright.uark.edu/honorsprogram/).

# Advertising and Public Relations (ADPR) 

Larry Foley
Chair of the School
205 Kimpel Hall
479-575-3601
Jan LeBlanc Wicks
Vice Chair
Kimpel Hall 205
479-575-6304
Email: jwicks@uark.edu
School of Journalism and Strategic Media Website (https:// fulbright.uark.edu/departments/journalism/)

The B.A. in Advertising and Public Relations provides students with knowledge of the history, theory, practice, and ethics of the advertising, public relations and journalism fields, and educates students in advertising, public relations and journalistic skills. Advertising and public relations majors learn the theories and skills of how to create persuasive messages in mass, digital and social media, how to ensure those messages reach the right audience, and how to communicate persuasive messages in a socially responsible way.

## Requirements for B.A. in Advertising and Public Relations

Requirements for a Bachelor of Arts in Advertising/
Public Relations: The following credit hour requirements must be met (see Degree Completion Program Policy (http:// catalog.uark.edu/undergraduatecatalog/collegesandschools/ jwilliamfulbrightcollegeofartsandsciences/) for additional information. In addition, the Fulbright College Writing Requirement may be satisfied by successful completion of JOUR 4981 (https://catalog.uark.edu/search/? $\mathrm{P}=\mathrm{JOUR} \% 204981$ ) Journalism Writing Requirement with a grade of " C " or better.

State Minimum Core (p.81) requirements may vary by individual, based on placement and previous course credit earned. Once all core requirements are met, students may substitute with general electives in consultation with their academic adviser. Bolded courses from the course list below may be applied to portions of the State Minimum Core (p. 81) requirements.
State Minimum Core ..... 35
Select one of the following: ..... 3

| MATH 2043 | Survey of Calculus (ACTS Equivalency $=$ MATH <br> 2203) |
| :--- | :--- |
| MATH 2053 | Finite Mathematics |
| MATH 2183 | Mathematical Reasoning in a Quantitative <br> World |

| STAT 2303 | Principles of Statistics (ACTS Equivalency = MATH 2103) |  |
| :---: | :---: | :---: |
| or a higher level math. |  |  |
| World language up to the Intermediate I level (2000-level) |  | 9 |
| Select one of the following: |  | 3 |
| WLIT 1113 | World Literature: Beginnings to 1650 CE (ACTS Equivalency = ENGL 2113) |  |
| WLIT 1123 | World Literature: 1650CE to Present (ACTS Equivalency = ENGL 2123) |  |
| An advanced literature course |  |  |
| A language literature course |  |  |
| Select one of the following: |  | 3 |
| PHIL 2003 | Introduction to Philosophy (ACTS Equivalency = PHIL 1103) |  |
| PHIL 2103 | Introduction to Ethics (ACTS Equivalency = PHIL 1003) |  |
| Any philosophy (PHIL) course at the 3000-level or higher (recommended: PHIL 3103 Ethics and the Professions) |  |  |
| PLSC 2003 | American National Government (ACTS Equivalency = PLSC 2003) | 3 |
| A second PLSC course (the following are recommended options): |  | 3 |
| PLSC 2813 | Introduction to International Relations and Global Studies |  |
| PLSC 3233 | The American Congress |  |
| PLSC 4233 | The American Chief Executive |  |
| ECON 2143 | Basic Economics: Theory and Practice | 3 |
| COMM 1313 | Public Speaking (ACTS Equivalency = SPCH 1003) | 3 |
| Any HIST course 3000-level or higher |  | 3 |
| Cultural/Diversity Requirement |  | 3 |
| Choose a course in cultural/diversity studies from the following options: |  |  |
| ANTH 4533 | Middle East Cultures |  |
| COMM 4343 | Intercultural Communication |  |
| HIST 3233 | African American History to 1877 |  |
| HIST 3243 | African American History Since 1877 |  |
| HIST 3263 | History of the American Indian |  |
| JOUR 3263 | African Americans in Film |  |
| JOUR 4923 | History of the Black Press |  |
| SCWK 3193 | Human Diversity and Social Work |  |
| SOCI 3193 | Race, Class, Gender, and Sexuality |  |
| Other cultural/diversity courses as approved by the School of Journalism and Strategic Media. |  |  |
| Journalism and | Strategic Media Core | 16 |

All majors and minors must complete the Grammar, Spelling and Punctuation (GSP) requirement as a prerequisite or co-requisite to JOUR 1033 Media Writing by completing one of these two options: 1) Pass JOUR 1003 Journalistic Writing Skills with a grade of $C$ or better; or 2) Pass JOUR 1100 Grammar Spelling Punctuation Requirement with a Satisfactory (S) grade by scoring a $75 \%$ or better on the GSP test that is administered through the class. Once you officially declare a Journalism major or minor, you will obtain access to the GSP Blackboard course for Option 2. Students who do not complete both the GSP requirement and JOUR 1033 with a C or better cannot enroll in any courses for which JOUR 1033 is a prerequisite. The GSP test is only administered a certain number of times each semester. Students must request a GSP test time a minimum of two weeks before they plan to take the test. There is no guarantee that GSP testing slots will be open when desired, so students must schedule well in advance.
A minimum grade of " $C$ " is required in all journalism courses that serve as prerequisites for advanced journalism and advertising/ public relations courses. In certain courses a minimum grade of " $B$ " is required.

| JOUR 1023 | Media and Society |
| :--- | :--- |
| JOUR 1033 | Media Writing |
| JOUR 3633 | Media Law |
| JOUR 4333 | Ethics in Journalism |
| JOUR 4981 | Journalism Writing Requirement |

Journalism Digital Requirement: JOUR 2032/JOUR 2031L Broadcast News Reporting I and Lab, JOUR 2053 Multimedia Journalism, JOUR 2063 Media Graphics and Technology, or JOUR 405V Specialized Journalism Seminar with the subtopic "Videography/Editing" or "Digital Content Strategy."

## Advertising/Public Relations Courses

Students must have a cumulative GPA of 2.5 or higher to enroll in ADPR 3723 and ADPR 3743.
Students are required to earn a grade of " $B$ " or higher in both ADPR 3723 and ADPR 3743 and maintain a cumulative GPA of 2.5 or higher to qualify to take all other 3000 -level or higher Advertising/Public Relations courses. Students may retake
ADPR 3723 and ADPR 3743 only once to earn a grade of " $B$ " or higher.

| ADPR 3723 | Advertising Principles | 3 |
| :--- | :--- | :--- |
| ADPR 3743 | Public Relations Principles | 3 |
| ADPR 4143 | Public Relations Writing | 3 |
| ADPR 4423 | Creative Strategy and Execution | 3 |
| ADPR 4453 | Media Planning \& Strategy | 3 |
| or ADPR 4473 Account Planning |  |  |
| Six credit hours in JOUR or ADPR courses. It is recommended that <br> one course choice be an internship. | 6 |  |

MKTG 3433 Introduction to Marketing 3
MKTG 3553 Consumer Behavior 3
MKTG 3633 Marketing Research 3

Electives
Non-JOUR/ADPR General Electives 3

Total Hours
Writing Requirement: Successful completion of JOUR 4981 with a grade of "C" or better satisfies the Fulbright College Writing Requirement for journalism majors.

## Advertising/Public Relations B.A. Eight-Semester Plan

Students enrolling in the eight-semester degree plan should review the Eight-Semester Degree Completion Policy (p. 67).

State Minimum Core (p. 81) requirements may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute with general electives in consultation with their academic advisor.

Second Year
Students have the option of enrolling in ADPR
3723 and ADPR 3743 during the sophomore or
junior year. If enrolling during the sophomore
year, students must have a minimum of 30
credit hours completed, 2.5 cumulative GPA,
and must have completed JOUR 1033 with a C
or better. No in-progress credit hours accepted.
No exceptions will be made.

ADPR 3723 Advertising Principles (must earn a B or better) or if ECON 2013 or ECON 2023 was completed, then take the other ECON not completed in the sequence. If ECON 2143 was completed, then take a Social Sciences State Minimum Core course (Satisfies General Education Outcome 3.3). ${ }^{1}$

PHIL 2003 Introduction to Philosophy (ACTS
Equivalency = PHIL 1103)

Units
Fall Spring
Third Year
Units

Students have the option of enrolling in the
ADPR 4143, ADPR 4423, and (ADPR 4453 or
ADPR 4473) course sequence during the junior or senior year. If ADPR 3723 and ADPR 3743 are already completed with a grade of $B$ or
better, then choose one course from the ADPR courses below or complete another remaining degree requirement.
If enrolling during the junior year, students must have a minimum of 60 credit hours completed, 2.5 cumulative GPA, be an Advertising/Public Relations major, and must have completed ADPR 3723 and ADPR 3743, each with a grade of $B$ or better. No in-progress credit hours accepted. No exceptions will be made.
If not completed during sophomore year, then take:
ADPR 3723 Advertising Principles (must earn a $B$ or better)
If ADPR 3723 is already completed, then choose one ADPR course from below or complete another remaining degree requirement.

ADPR 4143 Public Relations Writing
or ADPR 4423 Creative Strategy and Execution
or ADPR 4453 Media Planning \& Strategy
or ADPR 4473 Account Planning
Students need only to complete either ADPR 4453 or ADPR 4473 towards the nine credit hours of the 4000-level ADPR course sequence--not both. If both are completed, then one will count as a JOUR/ADPR elective.

MKTG 3553 Consumer Behavior

JOUR 3633 Media Law
Cultural/diversity requirement or HIST elective 3000-level or higher
Any PLSC course (PLSC 2813 Introduction to

International Relations, PLSC 3233 The American
Congress, and PLSC 4233 The American Chief
Executive are recommended)

If not completed during sophomore year, then take:
ADPR 3743 Public Relations Principles (must earn a B or better)
If ADPR 3743 is already completed, then choose one ADPR course from below or complete another remaining degree requirement.

ADPR 4143 Public Relations Writing
or ADPR 4423 Creative Strategy and Execution
or ADPR 4453 Media Planning \& Strategy
or ADPR 4473 Account Planning
Students need only to complete either
ADPR 4453 or ADPR 4473 towards the nine credit hours of the 4000-level ADPR course sequence--not both. If both are completed, then one will count as a JOUR/ADPR elective.
Cultural/diversity requirement or HIST elective 3000-level or higher

If a HIST course was already completed that satisfies both requirements, then select nonJOUR/ADPR general electives.
MKTG 3633 Marketing Research
Any JOUR or ADPR course
Year Total:

Fourth Year
If not previously completed, and if available,
choose 1-2 courses from the following:
ADPR 4143 Public Relations Writing
or ADPR 4423 Creative Strategy and Exe
or ADPR 4453 Media Planning \& Strategy
or ADPR 4473 Account Planning
Students need only to complete either
ADPR 4453 or ADPR 4473 towards the ni
credit hours of the $4000-$ level ADPR cours
sequence--not both. If both are completed
one will count as a JOUR/ADPR elective.
JOUR 4333 Ethics in Journalism
Any JOUR or ADPR course
3
JOUR 4981 Journalism Writing Requirement
(Satisfies General Education Outcome 6.1) ${ }^{1}$
Fine Arts State Minimum Core (Satisfies General Education Outcome 3.1) ${ }^{1}$
Non-JOUR/ADPR General Electives
If not previously completed, then choose 1-3 courses from the following. If all nine hours in the sequence have been completed, then take nonJOUR/ADPR general electives.

ADPR 4143 Public Relations Writing or ADPR 4423 Creative Strategy and Execution
or ADPR 4453 Media Planning \& Strategy
or ADPR 4473 Account Planning
Students need only to complete either ADPR 4453 or ADPR 4473 towards the nine credit hours of the 4000-level ADPR course sequence--not both. If both are completed, then one will count as a JOUR/ADPR elective.
Social Sciences State Minimum Core (Satisfies General Education Outcome 3.3). If already satisfied, then take non-JOUR/ADPR general electives. ${ }^{1}$
Non-JOUR/ADPR General Electives

## Total Units in Sequence:

${ }^{1}$ Students must complete the State Minimum Core (https:// nam11.safelinks.protection.outlook.com/?url=http\%3A\%2F \%2Fcatalog.uark.edu\%2Fundergraduatecatalog\%2Fgened \%2Fstateminimum\%2F\&data=04\%7C01\%7Crcc003\%40uark.edu

These courses also fulfill many, if not all, of the General Education Requirements (https://nam11.safelinks.protection.outlook.com/?url=http \%3A\%2F\%2Fcatalog.uark.edu\%2Fundergraduatecatalog\%2Fgened \%2Fgeneraleducation\%2F\&data=04\%7C01\%7Crcc003\%40uark.edu \%7C92f936f375f845bf930708d8e3ec5fa1\%7C79c742c4e61c4fa5be89a3cb566a8 \%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQljoiV2luMzliLCJBTil6Ik1haWv \%7C1000\&sdata=r35av68n3oEQW9FsllqBgmbsTnUENpJF7EoP4AD4Bks \%3D\&reserved=0). Please visit these pages in the links provided and consult with your academic advisor when making course selections to fulfill these requirements.

## Requirements for a Minor in Journalism and Strategic Media

All majors and minors must complete the Grammar, Spelling and Punctuation (GSP) requirement as a prerequisite or co-requisite to JOUR 1033 Media Writing by completing one of these two options: 1) Pass JOUR 1003 Journalistic Writing Skills with a grade of C or better; or 2) Pass JOUR 1100 Grammar Spelling Punctuation Requirement with a Satisfactory (S) grade by scoring a $75 \%$ or better on the GSP test that is administered through the class. Once you officially declare a Journalism major or minor, you will obtain access to the GSP Blackboard course for Option 2. Students who do not complete both the GSP requirement and JOUR 1033 with a C or better cannot enroll in any courses for which JOUR 1033 is a prerequisite. The GSP test is only administered a certain number of times each semester. Students must request a GSP test time a minimum of two weeks before they plan to take the test. There is no guarantee that GSP testing slots will be open when desired, so students must schedule well in advance. JOUR 1003 cannot count as a major or minor elective within any Advertising/Public Relations or Journalism major or concentration, or Journalism and Strategic Media minor.

All students seeking a minor in Journalism and Strategic Media must take the following three courses:

| JOUR 1023 | Media and Society |
| :--- | :--- |
| JOUR 1033 | Media Writing |
| JOUR 2003 | Storytelling for Today's Media |

Select one of the following courses:

$$
\begin{array}{ll}
\text { JOUR } 3633 & \text { Media Law } \\
\text { JOUR } 4333 & \text { Ethics in Journalism }
\end{array}
$$

Select two of the following courses with at least one course numbered 6 3000-level or higher:

| JOUR 2053 | Multimedia Journalism |  |
| :--- | :--- | :--- |
| JOUR 2063 | Media Graphics and Technology |  |
| JOUR 3043 | Performer in Mass Media |  |
| ADPR 3553 | Advertising and Public Relations Strategies |  |
| ADPR 4483 | Multiculturalism in Advertising and Public Relations |  |
| Total Hours |  | $\mathbf{1 8}$ |

To display proficiency in grammar, spelling and punctuation, all students who major or minor in journalism must fulfill the School of Journalism and Strategic Media's GSP requirement. Students can meet the requirement in one of two ways: 1) pass the GSP exam with a score of at least $75 \%$; or 2) complete JOUR 1003 Journalistic Writing Skills with a grade of C or

## Requirements for Honors in Journalism and Strategic Media

The Journalism and Strategic Media Honors Program gives undergraduates a chance to pursue journalistic research in the context of other academic disciplines. Honors candidates carry out independent study and research under the guidance of the journalism faculty and participate in honors classes in journalism and at least one other discipline. Outstanding student achievement will be recognized by the award of distinction "Journalism Scholar Cum Laude" at graduation. Higher degree distinctions are recommended only in cases of exceptional achievement and are based on the candidate's total honors studies program. To be considered for such distinctions, students must earn a minimum cumulative 3.50 grade-point average in journalism.

Journalism School and College Honors students must complete a minimum of 13 hours in honors credits and a thesis. These requirements are specified as follows:

Journalism School and College Honors students must:

1. Enter the program no later than the first semester of their junior year, and register for JOUR 498VH Honors Journalism Writing Requirement beginning with the first semester of the junior year,
2. Take at least 1 credit of JOUR 498VH every fall and spring semester of the junior and senior year (and all students who do not complete and pass JOUR 498VH in any semester are automatically dismissed from the school's honors program),
3. Complete at least one journalism honors colloquium,
4. Complete the journalism honors core research course JOUR 4943H (offered every spring semester only),
5. Complete an approved honors colloquium in a second discipline,
6. Complete and orally defend an honors thesis based on honors courses of study, and
7. Earn an overall cumulative 3.50 grade-point average and a cumulative 3.50 grade-point average in journalism courses.

In addition, journalism majors pursuing college honors must also satisfy all requirements for the Fulbright College Honors Program and the Honors Core Curriculum for a Bachelor of Arts found elsewhere in this catalog.

More specific information on the requirements for honors in Journalism is available from the School of Journalism and Strategic Media Honors adviser.

Journalism (B.A.) Teacher Licensure Requirements: Students interested in obtaining teacher licensure may not obtain licensure in journalism alone. Licensure in another discipline must be obtained, and journalism may be added as an additional area of licensure. Please refer to the Secondary Education Requirements for Fulbright College Students (p. 276) or contact your departmental adviser or an adviser in the College of Education and Health Professions.

Schulte, Bret J., M.F.A. (George Mason University), B.A. (University of Nebraska-Lincoln), Professor, 2008, 2023.
Shelton, Gina, B.A. (Mississippi State University), Instructor, 2013.
Sosa, Ninette, M.A. (University of Arkansas), B.A. (San Diego State University), Instructor, 2021.
Starling-Ledbetter, Robyn M., M.A., B.A. (University of Arkansas), Instructor, 2007.
Tuychiev, Hayot A., M.A. (University of Arkansas), B.A. (Tashkent State University of Economics), Instructor, 2010.
Wicks, Jan L., Ph.D., M.A. (Michigan State University), B.A. (University of Southwestern Louisiana), Professor, 1994, 2006.

## Advertising/Public Relations Courses

## ADPR 3553. Advertising and Public Relations Strategies. 3 Hours.

Introduction to the research, strategies and tactics used in developing advertising and public relations campaigns. Provides an overview of planning, implementing, and evaluating research-based advertising and public relations campaigns. (Typically offered: Fall and Spring)

## ADPR 3723. Advertising Principles. 3 Hours.

Introductory course to the broad field of advertising. Includes a study of the role of advertising in modern society with emphasis being given to the extent and manner of use of advertising in mass media and digital media. Prerequisite: ((At least 30 credit hours completed; at least a 2.5 cumulative GPA; must be a Journalism major, Advertising and Public Relations major, Journalism minor, or obtain department consent; completion of JOUR 1033 with a grade of C or better; completion of JOUR 1003 with a grade of C or better or complete and pass the GSP (Grammar, Spelling and Punctuation) test in JOUR 1100 with a $75 \%$ or higher) or (At least 30 credit hours completed; at least a 2.5 cumulative GPA; must be a Journalism major, Advertising and Public Relations major, Journalism minor, or obtain department consent; must have completed at least 6 credit hours in JOUR courses, each with a grade of C or better.); No in-progress credit hours accepted. (Typically offered: Fall and Spring)

## ADPR 3743. Public Relations Principles. 3 Hours.

Study of theory, methods, and ethics of public relations in modern society, business, and communications. Influencing opinion through acceptable performance and 2way communication. Prerequisite: ((At least 30 credit hours completed; at least a 2.5 cumulative GPA; must be a Journalism major, Advertising and Public Relations major, Journalism minor, or obtain department consent; completion of JOUR 1033 with a grade of C or better; completion of JOUR 1003 with a grade of $C$ or better or complete and pass the GSP (Grammar, Spelling and Punctuation) test in JOUR 1100 with a $75 \%$ or higher) or (At least 30 credit hours completed; at least a 2.5 cumulative GPA; must be a Journalism major, Advertising and Public Relations major, Journalism minor, or obtain department consent; must have completed at least 6 credit hours in JOUR courses, each with a grade of $C$ or better.); No inprogress credit hours accepted. (Typically offered: Fall and Spring)

ADPR 4143. Public Relations Writing. 3 Hours.
Instructional and writing practice to develop the professional-level writing skills required of public relations practitioners. Emphasizes different approaches required for different audiences and media. Prerequisite: Minimum of 60 credit hours completed, 2.5 cumulative GPA, ADPR major, and completion of ADPR 3723 and ADPR 3743, each with a grade of B or better; no in-progress credit hours accepted. (Typically offered: Fall and Spring)

## ADPR 4423. Creative Strategy and Execution. 3 Hours.

The creation of advertising copy and layout for the mass media with emphasis on strategy, the written message, and the physical appearance for the advertisement. Includes laboratory component. Prerequisite: Minimum of 60 credit hours completed, 2.5 cumulative GPA, ADPR major, and completion of ADPR 3723 and ADPR 3743, each with a grade of $B$ or better; no in-progress credit hours accepted. (Typically offered: Fall and Spring)

## ADPR 4453. Media Planning \& Strategy. 3 Hours.

Includes the study of media characteristics, market research, media strategies, media analysis, media-market measurements and the development of media plans. Emphasis is placed on the analysis of major mass media and digital strategies, tactics, and planning. Prerequisite: Minimum of 60 credit hours completed, 2.5 cumulative GPA, ADPR major, and completion of ADPR 3723 and ADPR 3743, each with a grade of B or better; no in-progress credit hours accepted. (Typically offered: Fall and Spring)

## ADPR 4463. Campaigns. 3 Hours.

Applying advertising principles and techniques to preparation of a complete campaign; determining agency responsibilities, marketing objectives and research, media mix, and creative strategy. Emphasis also given to campaign presentation delivery, utilizing audio and visual techniques. Prerequisite: ADPR 3723 and ADPR 3743, each with a grade of B or better, ADPR major, and 2.5 overall GPA. (Typically offered: Fall and Spring)

ADPR 4473. Account Planning. 3 Hours.
An introduction to applied advertising research and account planning. Integrate consumers' perspectives into creative strategy to developing brand stories for clients. Write creative briefs, positioning statements and prepare copy-testing research instruments to evaluate messages. Utilize consumer research for creating messages for diverse cultures. Prerequisite: Minimum of 60 credit hours completed, 2.5 cumulative GPA, ADPR major, and completion of ADPR 3723 and ADPR 3743, each with a grade of $B$ or better; no in-progress credit hours accepted. (Typically offered: Fall and Spring)
This course is cross-listed with AAST 4473.
ADPR 4483. Multiculturalism in Advertising and Public Relations. 3 Hours.
Seminar course involving the critical examination of the major cultural, social, political, economic, ethical and persuasion theories and/or issues relevant to advertising and public relations. (Typically offered: Fall)

## Journalism Courses

JOUR 1003. Journalistic Writing Skills. 3 Hours.
Provides a functional approach to improving language and writing skills specific to journalistic writing. Covers introductory journalistic writing and correct grammar usage, the logic governing syntax and punctuation use, analysis of grammar and syntax, sentence structure, word selection to convey proper meaning, memory aids, and other language topics relevant to journalistic writing. Cannot count as a major or minor elective within any ADPR or Journalism major or concentration, or Journalism and Strategic Media minor. Prerequisite: Journalism major, Advertising and Public Relations major, Journalism minor, IDST major with JOUR track, or department consent. (Typically offered: Fall and Spring)

## JOUR 1023. Media and Society. 3 Hours.

A survey of mass media (newspaper, radio, TV, magazine, advertising, public relations, photography, etc.) which stresses their importance in today's society and introduces the student to the various areas in journalism. Recommended for students considering journalism as a major. Prerequisite: Journalism major, Advertising and Public Relations major, Journalism minor, IDST major with JOUR track, or department consent. (Typically offered: Fall and Spring)

## JOUR 1033. Media Writing. 3 Hours.

Introduces students to the skills of observation, critical thinking and concise writing required in all aspects of journalism and strategic media, as well as to the technology needed in upper-level courses. A prerequisite to JOUR 2003, JOUR 2013, JOUR 2031L, JOUR 2032, JOUR 2053, ADPR 3723 and ADPR 3743. Corequisite: Lab component. Pre- or Corequisite: JOUR 1003 or complete and pass the GSP (Grammar, Spelling and Punctuation) test in JOUR 1100 with a $75 \%$ or higher. Prerequisite: Journalism major, Advertising and Public Relations major, Journalism minor, IDST major with JOUR track, or department consent. (Typically offered: Fall, Spring and Summer)

## JOUR 1100. Grammar Spelling Punctuation Requirement. 0 Hours.

Students must complete the Grammar Spelling Punctuation (GSP) requirement as a prerequisite or corequisite to JOUR 1033 Media Writing. Students who do not take JOUR 1003 Journalistic Writing Skills to complete the GSP must take JOUR 1100, study for the GSP on their own and pass by earning a $75 \%$ or higher on the GSP test administered by the School of Journalism and Strategic Media. (Typically offered: Fall and Spring)

## JOUR 2003. Storytelling for Today's Media. 3 Hours.

Introduction to developing content strategies that tell accurate, concise stories across multiple media platforms. Emphasizes clear, effective storytelling in media content production for print, broadcast and digital platforms, including social media, podcasting, video, and short-feature writing. Integrates lessons on corporate social responsibility, personal branding and media entrepreneurship. Prerequisite: (Journalism major, Advertising and Public Relations major, Journalism minor, IDST major with JOUR track, or department consent) and JOUR 1033. (Typically offered: Fall and Spring)

## JOUR 2013. News Reporting I. 3 Hours.

Intensive training in the methods of gathering and writing news. Lecture 2 hours, laboratory 2 hours per week. Prerequisite: Must be a Journalism major, Advertising and Public Relations major, Journalism minor, or obtain department consent; JOUR 1023 and JOUR 1033, each with a grade of C or better, and either 1) JOUR 1003 with a grade of C or better or complete and pass the GSP (Grammar, Spelling and Punctuation) test in JOUR 1100 with a $75 \%$ or higher, or 2) at least 30 credit hours completed. (Typically offered: Fall and Spring)

## JOUR 2031L. Broadcast News Reporting I Laboratory. 1 Hour.

Provides experience in basic broadcast news reporting techniques. Laboratory 3 hours per week. Corequisite: JOUR 2032. Prerequisite: ((At least 30 credit hours completed; must be a Journalism major, Advertising and Public Relations major, Journalism minor, or obtain department consent; JOUR 1033 with a grade of $C$ or better; JOUR 1003 with a grade of $C$ or better or complete and pass the GSP (Grammar, Spelling and Punctuation) test in JOUR 1100 with a $75 \%$ or higher)) or (At least 30 credit hours completed; must be a Journalism major, Advertising and Public Relations major, Journalism minor, or obtain department consent; must have completed at least 6 credit hours in JOUR courses, each with a grade of $C$ or better.) (Typically offered: Fall and Spring)

## JOUR 2032. Broadcast News Reporting I. 2 Hours.

Intensive training in the methods of gathering and writing broadcast news. Lecture 2 hours per week. Corequisite: JOUR 2031L. Prerequisite: ((At least 30 credit hours completed; must be a Journalism major, Advertising and Public Relations major, Journalism minor, or obtain department consent; JOUR 1033 with a grade of $C$ or better; JOUR 1003 with a grade of $C$ or better or complete and pass the GSP (Grammar, Spelling and Punctuation) test in JOUR 1100 with a $75 \%$ or higher)) or (At least 30 credit hours completed; must be a Journalism major, Advertising and Public Relations major, Journalism minor, or obtain department consent; must have completed at least 6 credit hours in JOUR courses, each with a grade of $C$ or better.) (Typically offered: Fall and Spring)
JOUR 2053. Multimedia Journalism. 3 Hours.
Provides students with the skills of visual literacy, photo editing, audio processing, video editing and web publishing. Good writing will be emphasized. The course examines basic aesthetic principles in visual composition and techniques applicable to audio, video and web production. Prerequisite: Must be a Journalism major, Advertising and Public Relations major, Journalism minor, IDST major with JOUR track, or obtain department consent; JOUR 1023 and JOUR 1033, each with a grade of C or better, and either 1) JOUR 1003 with a grade of $C$ or better or complete and pass the GSP (Grammar, Spelling and Punctuation) test in JOUR 1100 with a $75 \%$ or higher, or 2) At least 30 credit hours completed. (Typically offered: Fall and Spring)

## JOUR 2063. Media Graphics and Technology. 3 Hours.

Introduction to computer skills required in journalism; focuses on training in the major creative software used for generating media graphics and visual communication. Emphasizes content creation and web publishing, including infographics and promotional materials. Prerequisite: Journalism major, Advertising and Public Relations major, Journalism minor, IDST major with JOUR track, or department consent. (Typically offered: Fall and Summer)
JOUR 2331L. Photojournalism I Laboratory. 1 Hour.
Photojournalism 1 Lab involves the transfer of images from a digital camera to a computer, and involves the use of image editing and enhancing software as well as layout and design software. Corequisite: JOUR 2332. (Typically offered: Fall)

## JOUR 2332. Photo Journalism I. 2 Hours.

Beginning course in the fundamentals of photography, including digital photography, composition, file transfer and management, image enhancement, and layout and design. Corequisite: JOUR 2331L. (Typically offered: Fall)

## JOUR 2453. Introduction to Sports Television Production I. 3 Hours.

Introduction to the specialized field of sports television production. Focuses on multicamera, single-camera and studio production. Studio lab and field work outside of regularly scheduled class time required. (Typically offered: Fall)

## JOUR 3013. Editing. 3 Hours.

Theories and practices in newspaper editing, copyreading, headline writing, page layout and the gathering and publication of written and pictorial information. Prerequisite: JOUR 1023 and JOUR 2013, each with a grade of C or better. (Typically offered: Fall and Spring)

## JOUR 3023. News Reporting II. 3 Hours.

Continuation of JOUR 2013. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: JOUR 2013 with a grade of C or better. (Typically offered: Fall and Spring)

## JOUR 3043. Performer in Mass Media. 3 Hours.

Introduction to performing in mass media on video, digital, and audio, while connecting effectively with audiences as journalists, spokespersons, experts, activists, or in other roles. Emphasizes principles and best practices related to performing on camera and microphone, voice and movement, researching and critiquing performances, and diversity and ethical performance. (Typically offered: Fall and Spring)

## JOUR 3071L. Broadcast News Reporting II Laboratory. 1 Hour.

Continuation of JOUR 2031L. Including advanced skills in broadcast news techniques. Corequisite: JOUR 3072. Prerequisite: JOUR 2032 and JOUR 2031L, each with a grade of $C$ or better. (Typically offered: Fall and Spring)

JOUR 3072. Broadcast News Reporting II. 2 Hours.
Continuation of JOUR 2032. Including advanced methods of gathering and writing broadcast news. Corequisite: JOUR 3071L. Prerequisite: JOUR 2032 and JOUR 2031L, each with a grade of C or better. (Typically offered: Fall and Spring)
JOUR 3123. Enterprise Journalism. 3 Hours.
Developing ideas and subjects for feature and human-interest articles for multiple platforms, with emphasis on the freelance trade. Instruction in idea generation, story pitches, interviewing methods, research, writing, revision, and narrative structure. Prerequisite: JOUR 2013 with a grade of $C$ or better. (Typically offered: Fall and Spring)

## JOUR 3163. Sports Journalism. 3 Hours.

Emphasis on techniques and principles of coverage of sports and sports-related subjects on and off the field, and on the relationship between sports and the mass media. (Typically offered: Fall)
JOUR 3263. African Americans in Film. 3 Hours.
A survey of the history of images of African Americans in film, especially as these images are examined in the context of stereotypical renditions and/or realistic representations of African American experiences. Issues of African American history, culture, and socio-political context will be addressed in the analyses of these films. Prerequisite: ENGL 1023 and junior or senior standing. (Typically offered: Irregular) This course is cross-listed with AAST 3263, ENGL 3263, COMM 3263.

## JOUR 3273. African Americans in Documentary Film. 3 Hours.

Exploration of the African-American image and experience in the context of time, historical record and varying production viewpoints from diverse documentarians. African-American history, culture and socio-political context are addressed in the analyses of these documentary films from the perspectives of mainstream media, independent filmmakers and minority documentarians. Prerequisite: Junior or senior standing. (Typically offered: Spring)
This course is cross-listed with AAST 3273, COMM 3273.

## JOUR 3633. Media Law. 3 Hours.

Constitutional guarantees, statutory laws and court cases applicable to mass communications. Prerequisite: Junior standing. (Typically offered: Fall and Spring)

## JOUR 3923H. Honors Colloquium. 3 Hours.

Covers a special topic or issue, offered as a part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in journalism). (Typically offered: Fall and Spring) May be repeated for degree credit.

## JOUR 401V. Advanced Journalistic Practices. 1-4 Hour.

Study of advanced journalistic practices and methods, individual or group projects. May only be taken once for degree credit. Prerequisite: Junior standing and 10 hours of journalism and a 2.5 cumulative grade average. (Typically offered: Fall and Spring)

## JOUR 402V. Internship in Journalism. 1-3 Hour.

Credit for practical experience gained through a journalistic internship. Report required on significant aspect of internship experience. Prerequisite: Journalism or Advertising and Public Relations major, and junior standing, and 10 hours JOUR/ ADPR courses, and 2.50 minimum cumulative grade point average. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

JOUR 4033. Advanced Radio News Reporting and Podcasting. 3 Hours.
Research, write and produce in-depth public radio style news stories and turn them into a three-episode podcast. Prerequisite: Instructor consent. (Typically offered:
Spring)

## JOUR 4043. Government and the Media. 3 Hours.

Focuses on the links between mass media and government and the increasingly significant role of media in politics and government. Examines the power, responsibility, and performance of the press and public officials/government agencies in their relationship with each other. Prerequisite: Junior standing (Typically offered: Fall)

## JOUR 405V. Specialized Journalism Seminar. 1-3 Hour.

Primary purpose of course is to enlarge the journalistic skills of students interested in advanced forms of mass communication. Students undertake projects related to particular aspects or problems of journalism. Content varies. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

## JOUR 4063. Computer-Assisted Publishing. 3 Hours.

In-depth, hands-on exploration of computer hardware and software in the design and production of media messages. Examination of developing media technologies and the computer's influence on design and conceptualization. (Typically offered: Irregular)

## JOUR 4073. Social Media and Journalism. 3 Hours.

Social Media and Journalism teaches conceptual knowledge and skills to develop news judgment and use changing technological tools to disseminate news quickly and to different audiences. The value of interacting with sources and the audience is stressed as are ethical, legal and accuracy issues. Prerequisite: JOUR 2013 or JOUR 2032 with a grade of C or better. (Typically offered: Fall)

JOUR 4083. Data Journalism. 3 Hours
An introduction to basic data reporting skills, including how to use data to guide and inform reporting as well as tell stories to better serve the public. Ethical issues and best practices in data reporting are also examined. Prerequisite: Any STAT course or instructor permission. (Typically offered: Fall)

JOUR 4093. Business Journalism. 3 Hours.
Examines how the U.S. economy works and how to find news in business, market and government data sources. Focuses on the role of corporations, financial markets, and regulators, and benefiting students interested in sports, entertainment, political and investigative journalism. (Typically offered: Spring)

JOUR 4313. Literature of Journalism. 3 Hours.
Surveys the works of book and magazine-length narrative non-fiction, from the mid-19th century to the present. (Typically offered: Fall)

JOUR 4333. Ethics in Journalism. 3 Hours.
Critical examination of specific ethical problems confronting professionals in all areas of mass communications. Reading and writing assignments are aimed at familiarizing students with the nature of the mass media and their social responsibilities. Prerequisite: Junior standing. (Typically offered: Fall and Spring)

JOUR 443V. Event Promotion and Execution. 1-3 Hour.
Practicum for students to plan, design, promote and execute several Journalism Days events, to include the Roy Reed Lecture, a scholarship reception, a job fair, Senior Salute and a fundraiser. Prerequisite: Junior standing. (Typically offered: Spring)

## JOUR 4503. Magazine Writing. 3 Hours.

Advanced long-form depth reporting and narrative writing augmented with multimedia, with an eye to generating the style of work found in such leading magazines as The New Yorker, the Atlantic, and Esquire. Advanced instruction in generating and pitching stories, reporting and writing for narrative, research. Stories are frequently published in nationally acclaimed student-magazine, Hill. Prerequisite: JOUR 2013 with a grade of C or better. (Typically offered: Spring)

JOUR 4863. Television News Reporting I. 3 Hours.
Continuation of JOUR 3072 and JOUR 3071L. Includes the specialized knowledge and skills needed in field reporting, anchoring, writing, and producing news for commercial television. Lab component arranged. Corequisite: Lab component. Prerequisite: JOUR 3072 and JOUR 3071L, each with a grade of C or better. (Typically offered: Fall and Spring)

JOUR 4873. Television News Reporting II. 3 Hours.
Continuation of JOUR 4863. Laboratory component arranged. Prerequisite:
JOUR 4863 with a grade of $C$ or better. (Typically offered: Fall and Spring)
JOUR 4883. Advanced Film \& Video Feature Production. 3 Hours.
Students research, write, direct, produce, shoot and edit non-fiction short feature films and videos for television, streaming and other presentations, including corporate and nonprofit use. Corequisite: Lab component. Prerequisite: JOUR 4863 with a grade of C or better, or instructor consent. (Typically offered: Irregular)

## JOUR 4893. Television News Producing. 3 Hours.

Intensive training in methods of producing a live television news broadcast, including news gathering, writing broadcast copy and production strategies. Lab 6 hours. Corequisite: Lab component. Prerequisite: JOUR 3072 and JOUR 3071L, each with a grade of C or better. (Typically offered: Fall and Spring)

JOUR 4903. Community Journalism. 3 Hours.
This three-hour course will blend student' reporting and editing skills with instruction on how regional newspapers select and present news to a local audience. This course will instruct students in deciding news stories for regional readers, how those stories can best be written and displayed. The semester goal is to publish a paper. Prerequisite: Junior standing. (Typically offered: Spring)

JOUR 4923. History of the Black Press. 3 Hours.
Covers the historic context of contributions and innovations to U.S. newspapers by African Americans. Also investigates the role of the black press from its beginnings in 1827 through the civil rights movement. Prerequisite: Junior standing. (Typically offered: Spring Even Years)
This course is cross-listed with AAST 4923.
JOUR 4943H. Honors Research Methods in Journalism. 3 Hours.
Emphasis on the major types of qualitative and quantitative research, electronic data base searching, and traditional library research. Prerequisite: Journalism or Advertising and Public Relations major and honors standing. (Typically offered: Spring)

JOUR 4981. Journalism Writing Requirement. 1 Hour.
Directed study in conceptualizing, researching, and writing a major paper to meet the college writing requirement. Students must make a C in order to satisfy the college writing requirement. Prerequisite: 90 hours. (Typically offered: Fall and Spring)

JOUR 498VH. Honors Journalism Writing Requirement. 1-6 Hour. Honors journalism writing requirement. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

This course is equivalent to JOUR 4981.

## African and African American Studies (AAST)

Caree Banton
Director
230 Memorial Hall

## 479-575-4086

African and African American Studies Website (https://fulbright.uark.edu/ area-studies/african-and-african-american-studies/)

The African and African American Studies program promotes an interdisciplinary approach to the study of the history, culture, and identity of Africans and African Americans. Students may pursue African and African American Studies as a second major alongside a primary major in Fulbright College. Students in any college may declare a minor. Advice on suitable primary majors to be taken with an African and African American Studies second major may be obtained from the program director of African and African American Studies.

## Requirements for a Dependent Major in African and African American Studies

A total of 21 credit hours in African and African American Studies courses in addition to the requirements of another major.

## Requirement 1

| AAST 1003 | Introduction to African and African American Studies | 3 |
| :---: | :---: | :---: |
| or AAST 2023 | The African American Experience |  |

## Total Hours

Interested students or those wanting further information should consult with the African and African American Studies Director for selection of appropriate classes and for information on other courses that can apply to the major and/or minor.

## Requirements for a Minor in African and African American Studies:

A total of 15 hours in African and African American Studies courses in addition to the requirements for the departmental major including the following:

| AAST 1003 | Introduction to African and African American <br> Studies | 3 |
| :--- | :--- | :--- |
| or AAST 2023 |  |  | | The African American Experience |
| :--- | :--- |

4153
The remaining nine hours shall be selected from the courses listed in Requirement 3 of the Requirements for a Second Major in African American Studies. A maximum of six of the nine hours may be submitted from courses taken in any one department.

## Total Hours

Interested students or those wanting further information should consult with the African and African American Studies Director for selection of appropriate classes and for information on other courses that can apply to the major and/or minor.

Requirements for Honors in African and African American Studies: The Honors Program in African and African American Studies gives junior and senior students of high ability the opportunity to enroll in enriched courses and conduct independent research culminating in an honors thesis. In addition to satisfying the general Fulbright College requirements for graduation and the basic eligibility requirements for honors as established by the Honors Council, candidates for honors in African and African American Studies must complete 12 hours of honors credit in partial satisfaction of requirements for the co-major. One to six of these may be thesis hours (AAST 399VH). The remaining six hours must be relevant honors colloquia or graduate courses (with permission) in one of the departments contributing to this interdisciplinary area of study. The 12 hours of honors credit will satisfy elective requirements in co-major requirement three above. The thesis committee shall include at least two faculty members affiliated with African and African American Studies. Successful completion of these requirements will be recognized
by the award of the distinction "African and African American Studies Scholar Cum Laude" at graduation. Higher degree distinctions are recommended only in exceptional cases and are based upon the whole of the candidate's program of honors studies.

## Faculty

Adams, Paul D., Ph.D. (Case Western Reserve University), B.S. (Louisiana State University), Professor, Department of Chemistry and Biochemistry, 2006, 2021.
Angton, Alexia, Ph.D., M.S., B.A. (lowa State University Ames), Assistant Professor, Department of Sociology and Criminology, 2022. Austin, Shawn, Ph.D., M.A. (University of New Mexico), B.A. (Brigham Young University-Idaho), Associate Professor, Department of History, 2015.

Bailey, Tameka A., Ph.D. (University of Arkansas), B.S. (University of Arkansas-Pine Bluff), Research Assistant Professor, Department of Biological Sciences, 2017.
Banton, Caree A., Ph.D. (Vanderbilt University), M.A. (University of Ghana), M.A. (University of New Orleans), B.A./B.P.A. (Grambling State University), Associate Professor, Department of History, 2013, 2019.
Baptist, Najja K., Ph.D. (Howard University), M.A. (Jackson State University), B.A. (North Carolina Central University), Assistant Professor, Department of Political Science, 2020.
Brown, Lucy M., Ph.D., M.A. (University of Texas, Austin), M.S. (Pratt Institute), Dip.G.A. (Edna Manley School for the Visual Arts, Jamaica), Teaching Assistant Professor, School of Journalism and Strategic Media, 2013.

Cleveland, Todd, Ph.D. (University of Minnesota), M.A., B.A. (University of New Hampshire), Professor, Department of History, 2015, 2021.
Corrigan, Lisa, Ph.D., M.A. (University of Maryland-College Park), B.A.
(University of Pittsburgh), Professor, Department of Communication, 2007, 2019.
D'Alisera, JoAnn, Ph.D., A.M. (University of Illinois-Urbana-Champaign), B.A. (State University of New York at New Paltz), Associate Professor, Department of Anthropology, 1999, 2005.
Davis, Geffrey, Ph.D., M.F.A., M.A. (Penn State University), B.A. (Oregon State University), Associate Professor, Department of English, 2014, 2019.

Ewelukwa, Uche U., S.J.D., LL.M. (Harvard University), LL.M. (University College, London), J.D. equivalent (University of Nigeria), Professor, School of Law, Arkansas Bar Foundation Professor of Law, 2001, 2010.
Fields, Lashawnda, Ph.D., M.S.W. (Washington University), Assistant Professor, School of Social Work, 2020.
Gigantino, Jim, Ph.D. (University of Georgia), B.A. (University of Richmond), Professor, Department of History, 2010, 2018.
Lorenzo, Violeta, Ph.D. (University of Toronto), M.A., B.A. (University of Florida), Associate Professor, Department of World Languages, Literatures and Cultures, 2014, 2020.
Marren, Susan M., Ph.D., M.A. (University of Michigan-Ann Arbor), B.A. (Cornell University), Associate Professor, Department of English, 1995, 2002.

Mensah, Angela, Ph.D. (Bowling Green State University), M.A. (Western Michigan University), B.A. (Ferris State University), Teaching Assistant Professor, Department of Communication, 2022.
Mosley, Jacquelyn Dee, Ph.D. (Texas Tech University), M.S. (Arizona State University), B.A. (University of Northern lowa), Professor, School of Human Environmental Sciences, 2021, 2016.

Murdock, Jeffrey A., Ph.D. (University of Memphis), M.M., B.M.
(University of Southern Mississippi), Assistant Professor, Department of Music, 2015.
Murphy-Erby, Yvette, Ph.D. (University of North Carolina at
Greensboro), M.S.W. (University of North Carolina, Chapel Hill), B.A.
(University of North Carolina, Charlotte), Professor, School of Social Work, 2004, 2013.
Pritchard, Eric, Ph.D., M.A., (University of Wisconsin-Madison), B.A.
(Lincoln University in Pennsylvania), Associate Professor, Department of English, 2021.
Robinson, Charles F., Ph.D. (University of Houston), M.A. (Rice University), B.A. (University of Houston), Professor, Department of History, 1999, 2011.
Starks, Trish, Ph.D., M.A. (The Ohio State University), B.A. (University of Missouri), Professor, Department of History, 2000, 2018.
Sytsma, Janine A., Ph.D. (University of Wisconsin-Madison), M.A. (University of Denver), B.A. (Arizona State University), Assistant Professor, School of Art, 2016.
Valandra, Ph.D., M.S.W. (University of Minnesota), M.B.A., B.S.
(University of Nebraska at Omaha), Associate Professor, School of Social Work, 2013, 2019.
Whayne, Jeannie, Ph.D., M.A., B.A. (University of California-San Diego), University Professor, Department of History, 1990, 2015.
White, Calvin, Ph.D. (University of Mississippi), M.A., B.A. (University
of Central Arkansas), Associate Professor, Department of History, 2007, 2013.

## Courses

AAST 1003. Introduction to African and African American Studies. 3 Hours. This course is an introduction to the interdisciplinary study of Africa and African Americans and their impact on the world order and society with an emphasis on that impact's manifestations in the United States of America. (Typically offered: Fall and Spring)
AAST 1233. History of Race and Medicine. 3 Hours.
Examines history of western biomedicine on the intersection of science, medicine, and race to trace origins of current racial disparities. Examples from the United States and other international developments. (Typically offered: Irregular)
This course is cross-listed with HIST 1233.

## AAST 2023. The African American Experience. 3 Hours.

Examines various facets of African American culture that collectively construct the African American experience including art, literature, drama, migration, film, and education. Covers issues facing African Americans through a cultural and sociopolitical context to understand and appreciate African American impacts on the United States. (Typically offered: Fall, Spring and Summer)

## AAST 2053. The Black Student-Athlete. 3 Hours.

Examines and deconstructs the experiences of Black student-athletes as they figure in University social, political, and economic life, as well as in popular culture and other aspects of our contemporary societies. Sources include poetry, music, websites, athletic manuals, contracts, as well as other media. (Typically offered: Fall, Spring and Summer)

## AAST 3023. African Americans in Sport. 3 Hours.

Historical, sociological, and political issues and debate surrounding African Americans in sport. Contemporary issues facing African American athletes and sports figures. (Typically offered: Fall, Spring and Summer)

AAST 3103. Diversity, Pedagogy, \& Visual Culture. 3 Hours.
Investigates various issues of diversity and equity in relation to art and education. It discusses the application of the theories of diversity and equity into teaching, community organizing, activism, and art practices. Prerequisite: ARED 3003. (Typically offered: Fall, Spring and Summer)
This course is cross-listed with ARED 3103.
AAST 3123. African American Students in Higher Education. 3 Hours. Examines the impact of college environments on African American students. Focuses on the following topics regarding African American students: retention, student demographics, student characteristics, current trends, issues and problems, student success, sub-populations, student values, and implications for higher education. (Typically offered: Irregular)

AAST 3133. History of Sports in Africa. 3 Hours.
This course considers the ways that Africans have strategically employed sports to confront and overcome both domestic and external challenges and how these approaches and the range of constituent strategies have changed over time. (Typically offered: Irregular)
This course is cross-listed with HIST 3133.

## AAST 3193. The Making of the Modern Caribbean. 3 Hours.

History of the Caribbean from pre-Columbian to present times focusing in particular on indigenous origins, colonialism, slavery, rebellion, independence, nationalism, and political integration in the making of the modern Caribbean region. (Typically offered: Fall)
This course is cross-listed with HIST 3193.
AAST 3233. African American History to 1877. 3 Hours.
History of the African American experience in North America emphasizing economic, social, and cultural perspectives. Topics include the African slave trade, the creation of race and racism, the institution of slavery, free community formation in North, and the impact of the Civil War and Reconstruction on African Americans. (Typically offered: Fall and Spring)
This course is cross-listed with HIST 3233.

## AAST 3243. African American History Since 1877. 3 Hours.

The course will study the major social, political, and economical issues relating to the African American experience beginning with the late post-Reconstruction period and will include all of the major personalities and influences in the Civil Rights Movement, from 1877 to the present. (Typically offered: Fall and Spring)
This course is cross-listed with HIST 3243.
AAST 3253. The History of Sub-Saharan Africa. 3 Hours.
Sub-Saharan African history from the 18th century to the present, with emphasis on the impact of the slave trade, colonization, Independence, and contemporary issues of the post-colonial period. Examination of the ways Africans experienced change in terms of culture, society, economics, gender, religion, politics, and labor. (Typically offered: Fall)
This course is cross-listed with HIST 3253.
AAST 3263. African Americans in Film. 3 Hours.
A survey of the history of images of African Americans in film, especially as these images are examined in the context of stereotypical renditions and/or realistic representations of African American experiences. Issues of African American history, culture, and socio-political context will be addressed in the analyses of these films. Prerequisite: ENGL 1023 and junior or senior standing. (Typically offered: Irregular) This course is cross-listed with ENGL 3263, JOUR 3263, COMM 3263.

AAST 3273. African Americans in Documentary Film. 3 Hours.
Exploration of the African-American image and experience in the context of time, historical record and varying production viewpoints from diverse documentarians. African-American history, culture and socio-political context are addressed in the analyses of these documentary films from the perspectives of mainstream media, independent filmmakers and minority documentarians. Prerequisite: Junior or senior standing. (Typically offered: Spring)
This course is cross-listed with JOUR 3273, COMM 3273.

## AAST 3293. Black Politics. 3 Hours.

This is a survey course designed to provide students with a comprehensive overview of Black political participation in the United States and throughout the diaspora. In addition to analyzing important events in Black politics in the U.S., the course also examines evolving patterns of diasporic political participation throughout the world. (Typically offered: Irregular)
This course is cross-listed with PLSC 3293.

## AAST 3353. Black Digital Storytelling. 3 Hours.

Provides basic knowledge of the range of capabilities of available audio and video design applications through the intersection of technology, story, and pedagogy, offering perspective, personalization, and insight. (Typically offered: Fall, Spring and Summer)

AAST 3393. Civil Rights Policy and Politics. 3 Hours.
This course will draw from linkages between the protest phase of the civil rights and American political institutions. The course explores the institutional impact of the civil rights movement on the presidency, congress, the courts, administrative regulatory agencies, and civil rights advisory organizations. (Typically offered: Spring) This course is cross-listed with PLSC 3393.

## AAST 3513. Black Indians in America. 3 Hours.

Examines the history of Black Indian slavery and Freedom in the Cherokee, Muscogee, Chickasaw, Choctaw, and Seminole Tribes. Explores the switch to chattel slavery following colonialization, the experiences of African people enslaved by the tribes and their descendants, ongoing present-day disputes over tribal citizenship, human rights, and the American Indian identity. (Typically offered: Fall and Summer Even Years)
AAST 3523. Black in the City. 3 Hours.
Covers the history of Black people's relationship with the urban landscape. Students will use a wide array of primary sources to explore the ways in which Americans not only perceived the city but also sought to understand, master, and reimagine it and the uneven social and economic development that emerged as a consequence. (Typically offered: Fall and Spring Odd Years)

## AAST 3673. Distant Relatives: The Global Black Diaspora. 3 Hours.

Examines the cultural, political, economic, and social experiences of different parts of the African diaspora in the Americas, with special attention to the Black Atlantic World, focusing on the making of the diaspora through slavery, the middle passage, and later coerced and voluntary migrations. (Typically offered: Spring and Summer Odd Years)
AAST 3853. Topics in African-American Literature and Culture. 3 Hours. The study of works of African-American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
This course is cross-listed with ENGL 3853.
AAST 3973. South Africa: The Long, Ongoing Walk to Freedom. 3 Hours. Examines the country's complex history and also the ways that this past is both remembered and memorialized. Closely examines the initial motivations for the colonization of South Africa, the experiences of Africans under colonial and, subsequently, apartheid rule and the ongoing legacies of these periods in contemporary South Africa. (Typically offered: Irregular)

AAST 3983. Black Movements and Messiahs. 3 Hours.
Focuses on black movements and leaders across global African history since the Age of Revolutions to the present including political, economic, social, cultural, religious and artistic movements throughout Africa and the diaspora. (Typically offered: Irregular)

AAST 399VH. Honors African \& African American Studies Thesis. 1-6 Hour. Independent thesis research and writing under the direction of an AAST faculty member. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
AAST 4003. African \& African American Studies Study Abroad. 3 Hours. Examination of selected topics in conjunction with student participation in the biannual African \& African American Studies Study Abroad program to Ghana. Topic variable, chosen by instructor. (Typically offered: Summer Even Years) May be repeated for up to 6 hours of degree credit.

## AAST 4003H. Honors African \& African American Studies Study Abroad. 3

 Hours.Examination of selected topics in conjunction with student participation in the biannual African \& African American Studies Study Abroad program to Ghana. Topic variable, chosen by instructor. (Typically offered: Summer Even Years) May be repeated for up to 6 hours of degree credit.

## AAST 4043. Black Italia. 3 Hours.

Explores the history, representation, and lived experiences, both prejudices and successes, of marginalized persons in Italy, particularly those of African heritage through an interdisciplinary lens. (Typically offered: Spring Odd Years)
This course is cross-listed with ITAL 4043.

## AAST 4053. Historic Black Northwest Arkansas. 3 Hours.

Explores the history of Black NWA from settlement to the twenty-first century by examining, recovering, and documenting the lives of the region's enslaved and free people of color. Additional exploration of the communities, institutions, social, businesses, and artistic movements that define the black experience in NWA. Corequisite: Lab component. (Typically offered: Irregular)
AAST 4103. Communicating Body Image. 3 Hours.
Examines hidden assumptions about body image as it relates to the intersections of race, class, gender, and other major identity markers. (Typically offered: Fall) This course is cross-listed with COMM 4103.

## AAST 4123. Africa and the Trans-Atlantic Slave Trade. 3 Hours.

Examines the trans-Atlantic slave trade with a primary focus on the role of Africa and Africans in creating the unique economy and culture of the trans-Atlantic world. (Typically offered: Irregular)
This course is cross-listed with HIST 4123.

## AAST 4153. Race and Society. 3 Hours.

Introduction to the sociological study of race and ethnicity within the United States, with emphasis on understanding how race and ethnicity operate within contemporary social institutions. Prerequisite: SOCI 2013 or AAST 1003 or AAST 2023. (Typically offered: Fall)
This course is cross-listed with SOCI 4153.
AAST 4163. African American Perspectives of Trauma, Loss, and Recovery. 3 Hours.
Explores dimensions of trauma, loss, and recovery within the lived experiences of African American individuals, families, and communities in the United States.
Prerequisite: Junior standing or instructor consent. (Typically offered: Fall)
This course is cross-listed with SCWK 4163.

AAST 4173. Social Work with African American Families. 3 Hours.
An overview of historical and contemporary issues of African American families using culturally competent and strengths based frameworks. Focuses on the Black family as a social institution. Covers current trends affecting Black families, historical influences, evaluation of social policies, and programs of today. Prerequisite: Junior standing or instructor consent. (Typically offered: Fall and Spring)
This course is cross-listed with SCWK 4173.
AAST 4183. Black Environmental Justice. 3 Hours.
Provides an overview of the foundations of environmental justice as it relates to African-American communities. Expands the definitions of the environment and deconstructs the connection between slavery, land loss, gentrification, and food deserts. Finally, the course explores federal policies that shapes built environments, and its influence on African-American culture. (Typically offered: Irregular)

## AAST 4263. Modern Africa. 3 Hours.

Examines the last half-century of Africa's history, focusing on the last few decades. Introduction of Africa's colonial past, revolutions and struggles for independence. Review of African development in the post-colonial and contemporary era, successes and failures of independent Africa, and the challenges the continent faces today. (Typically offered: Irregular)
This course is cross-listed with HIST 4263.
AAST 4323. Racial Identity, Politics, and Public Policy. 3 Hours.
Examines how race and perceived racial differences affect political discourse, mobilization, representation, and political outcomes. Prerequisite: PLSC 3293 or AAST 1003 or Junior standing. (Typically offered: Spring Even Years) This course is cross-listed with PLSC 4323.

AAST 4383. The American Civil Rights Movement. 3 Hours.
Introduction to the history and development of the civil rights movement in the United States. (Typically offered: Irregular)
This course is cross-listed with HIST 4383.

## AAST 4473. Account Planning. 3 Hours.

An introduction to applied advertising research and account planning. Integrate consumers' perspectives into creative strategy to developing brand stories for clients. Write creative briefs, positioning statements and prepare copy-testing research instruments to evaluate messages. Utilize consumer research for creating messages for diverse cultures. Corequisite: Lab component. Prerequisite: Minimum 90 hours completed, no in-progress hours or coursework accepted, 2.5 overall GPA, JOUR 1033 with a grade of C or better, and ADPR 3723 and ADPR 3743, with a grade of B or better. (Typically offered: Fall and Spring)
This course is cross-listed with ADPR 4473.
AAST 4523. Black Utopias/Dystopias. 3 Hours.
Explores how thinkers in the U.S., the Caribbean, and Africa, as well as movements such as fugitivity, colonization, and emigration to Haiti, Canada, Liberia, Ghana, Paris, and numerous other spaces, envisioned ideal forms of community that would shield them from the perils of white supremacy and racist oppression. (Typically offered: Fall Odd Years)

## AAST 4563. The Old South, 1607-1865. 3 Hours.

Survey of the political, social, and economic development of the antebellum South. (Typically offered: Irregular)
This course is cross-listed with HIST 4563.
AAST 4573. The New South, 1860 to the Present. 3 Hours.
Survey of the development of the Civil War and postwar South to the present. (Typically offered: Fall Even Years)
This course is cross-listed with HIST 4573.

## AAST 4583. Cultures of Africa. 3 Hours.

An exploration of the people and places of Africa from a variety of anthropological perspectives. Classic and contemporary works will be studied in order to underscore the unity and diversity of African cultures, as well as the importance African societies have played in helping us understand culture/society throughout the world. (Typically offered: Fall)
This course is cross-listed with ANTH 4583.
AAST 4623. African American Art History. 3 Hours.
Surveys African American art from the seventeenth century to the present. It begins with a discussion of the transatlantic slave trade and it examines art produced in what Pratt terms the "contact zones." It then follows developments in African American art from the Antebellum Period to the present. Prerequisite: ARHS 2923. (Typically offered: Fall)
This course is cross-listed with ARHS 4623.
AAST 4813. Africans and Slavery in Colonial Latin America. 3 Hours.
Explores the diverse experiences of slaves and free Blacks in colonial Spanish and Portuguese America from 1500 to around 1888, demonstrating that bondage and the practice of African slavery was a pillar of political authority in colonial Latin America. (Typically offered: Irregular)
This course is cross-listed with HIST 4813, LALS 4813.

## AAST 4823. Black Freedom in the Age of Emancipation. 3 Hours.

Comparative study of Atlantic World freedom movements from the perspective of the African Diaspora. Focuses on the histories, meanings, and legacies of the various types of black emancipation in the Atlantic World and the cultural technologies that enabled them. (Typically offered: Spring)
This course is cross-listed with HIST 4823.
AAST 4853. Studies in African American Literature and Culture. 3 Hours.
The study of works of African American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit. This course is cross-listed with ENGL 4853.

## AAST 4863. Gender, Race, and Power. 3 Hours.

Examines how communication shapes gender, race, sexuality, and power. Rather than focusing exclusively on interpersonal communication, this course looks at theories of power that shape institutional macro communication. (Typically offered: Fall Even Years)
This course is cross-listed with COMM 4363.

## AAST 489V. African \& African American Independent Study. 1-6 Hour.

An exploration of African \& African American Studies topics independently with a faculty member. Topic variable with permission of faculty member. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

## AAST 4923. History of the Black Press. 3 Hours.

Covers the historic context of contributions and innovations to U.S. newspapers by African Americans. Also investigates the role of the black press from its beginnings in 1827 through the civil rights movement. Prerequisite: Junior standing. (Typically offered: Spring Even Years)
This course is cross-listed with JOUR 4923.

## AAST 4933. African American Political Ideology. 3 Hours.

A survey course designed to identify and examine characteristics and functions of several variants of black political ideology/thought. (Typically offered: Fall Odd Years)
This course is cross-listed with PLSC 4933.
AAST 499V. African and African American Studies Seminar. 1-12 Hour. Explores the various aspects of the African \& African American experience as it relates to the development of relationships in American society and the world at large. Variable topic each semester. (Typically offered: Fall, Spring and Summer) May be repeated for up to 12 hours of degree credit.

## Anthropology (ANTH)

JoAnn D'Alisera
Acting Chair of the Department
330 Old Main
479-575-2508
anth@uark.edu
Department of Anthropology Website (http://fulbright.uark.edu/ departments/anthropology/)

Courses in anthropology provide an introduction to world peoples, their ways of living, and world views. Anthropology helps students to better understand human similarities and differences.

The Department of Anthropology offers both a Bachelor of Science and a Bachelor of Arts degree in anthropology.

The Bachelor of Science degree program is geared toward students with specializations in anthropological sciences. It is recommended for students planning to continue their education in basic or applied anthropological sciences in graduate or professional school. A B.S. degree in anthropology is also useful students planning to continue their education toward health or medical related careers.

The Bachelor of Arts degree program allows students to take additional coursework in any of four areas of focused study: archeology, biological anthropology, cartography/remote sensing/GIS, or cultural anthropology.

For the combined major in Anthropology and African and African American Studies, see the African and African American Studies (p. 288) listing.

For requirements for the M.A. and Ph.D. degrees in anthropology, see the Graduate School Catalog (http://catalog.uark.edu/graduatecatalog/ programsofstudy/anthropologyanth/).

## Requirements for a B.S. Degree with a Major in Anthropology

The department of anthropology offers the Bachelor of Science degree in anthropology. The Bachelor of Science degree program is geared toward students with focused studies in anthropological sciences. It is recommended for students planning to continue their education in basic or applied anthropological sciences in graduate or professional school. A B.S. degree in anthropology is also useful students planning to continue their education toward health or medical related careers.

Program Requirements: A minimum of 120 hours is required, including 35 hours of state minimum core (p. 81) and 57 hours specified as designated below.

Required Anthropology Core Courses:

| ANTH 1013 | Introduction to Biological Anthropology <br> \& ANTH 1011L <br> and Introduction to Biological Anthropology | 4 |
| :--- | :--- | ---: |
| Laboratory |  |  |$\quad$|  |  |
| :--- | ---: |
| ANTH 1023 | Introduction to Cultural Anthropology (ACTS <br> Equivalency = ANTH 2013) |
| ANTH 1033 | Introduction to Archaeology |
| ANTH 4013 | History of Anthropological Thought |

| Science | A minimum of 20 hours of electives from BIOL, <br> CHEM, GEOL, and/or PHYS | 20 |
| :--- | :--- | :--- |
| Mathematics |  | 6 |
| Minimum of 6 hours of math beyond College Algebra (MATH 1203) |  |  |
| selected from among the following courses: |  |  |$\quad 6$

Writing Requirement: The Fulbright College research/analytical paper requirement for anthropology majors is fulfilled by completing an intensive writing requirement ( 15 pages) with a grade of " B " or higher in a successfully completed 4000-level ANTH course and with instructor approval.

## Anthropology B.S. Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 67) in the Academic Regulations chapter for university requirements of the program. Core requirement
hours may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute a three-hour (or more) general elective in place of a core area.

STAT 2303 Principles of Statistics (ACTS
Equivalency = MATH 2103)

## Total Units in Sequence:

${ }^{1}$ The Humanities Elective courses which satisfy the General Education Outcome 3.2 include:
AAST 2023, ANTH 1033, ARCH 1013, CLST 1003, CLST 1003H, CLST 1013, COMM 1233, DANC 1003, ENGL 1213, GNST 2003, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2003 , HIST 2013, HUMN 1124H, HUMN 2213, LALS 2013, MRST 2013, MUSY 2003, MUSY 2003H,PHIL 2003, PHIL 2003C, PHIL 2003H, PHIL 2103, PHIL 2103C,PHIL 2303, THTR 1003, THTR 1013, THTR 1013H, WLIT 1113, WLIT 1123, or intermediate-level world language (usually 2003-level).
2 The Fine Art Elective courses which satisfy the General Education Outcome 3.1 include:

ARCH 1003, ARHS 1003, COMM 1003, DANC 1003, LARC 1003, MLIT 1003, MLIT 1003H, MLIT 1013, MLIT 1013H, MLIT 1333, THTR 1003, THTR 1013, or THTR 1013H.
${ }^{3}$ The Social Sciences Elective courses which satisfy the General Education Outcome 3.3 include:
AGEC 1103, AGEC 2103, ANTH 1023, COMM 1023, ECON 2013, ECON 2023, ECON 2143, EDST 2003, HDFS 1403, HDFS 2413,HDFS 2603, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2003, HIST 2013, HIST 2093, HUMN 1114H, HUMN 2114H, INST 2013, INST 2813, INST 2813H,PLSC 2003, PLSC 2013, PLSC 2203, PLSC 2813, PLSC 2813H, PSYC 2003, RESM 2853, SOCI 2013, SOCI 2013H, or SOCI 2033.
${ }^{4}$ Meets 40 -hour advanced credit hour requirement. See College Academic Regulations (p. 273).
${ }^{5}$ Meets 24 -hour rule ( 24 hours of 3000-4000 level courses in Fulbright College), in addition to meeting the 40 -hour rule. See College Academic Regulations (p. 273).

## Requirements for a Bachelor of Arts Degree with a Major in Anthropology

Required courses include 35 hours of state minimum core (p. 81) and a total of 120 hours including the following.

## 34 Semester Hours including:

| ANTH 1013 | Introduction to Biological Anthropology | 3 |
| :---: | :---: | :---: |
| ANTH 1011L | Introduction to Biological Anthropology Laboratory | 1 |
| ANTH 1023 | Introduction to Cultural Anthropology (ACTS Equivalency = ANTH 2013) | 3 |
| ANTH 1033 | Introduction to Archaeology | 3 |
| ANTH 4013 | History of Anthropological Thought | 3 |

These 34 hours must also include:

- One course in each ANTH subfield (Cultural, Archaeology, Biological) beyond the core ( 9 hours).
- 3 hours from each of two different geographical areas in ANTH for a total of 6 hours.
- 6 elective credit hours in anthropology. These may satisfied in concert with an optional focused study as described below.

## Focused Studies

## Focused Study in Archeology:

To complete the focused study, a student is required to fulfill the following course requirements:

## ANTH 3023 Approaches to Archeology

Two of the following method and theory courses or equivalent classes offered under ANTH 3903 and ANTH 4903, approved as having an archeological method and theory focus.

| ANTH 4093 | The Archeology of Death |
| :--- | :--- |
| ANTH 4353 | Laboratory Methods in Archeology |
| ANTH 4443 | Cultural Resource Management I |
| ANTH 4603 |  |
| ANTH 4633 |  |
| ANTH 4813 |  |
| Archeological Field Session |  |

ANTH 4256 Archeological Field Session

## Focused Study in Biological Anthropology:

To complete the focused study, a student is required to fulfill the following course requirements:

Four of the following courses in biological anthropology, including any 3000-4000 special topics or seminar courses offered that are deemed appropriate for training in any of the subdisciplines of biological anthropology (12-13 credits).

| ANTH 3423 | Human Osteology | 4 |
| :--- | :--- | :--- |
| \& ANTH 3421L | and Human Osteology Laboratory |  |
| ANTH 3433 | Human Evolution | 3 |
| ANTH 3533 | Medical Anthropology | 3 |
| ANTH 3923H | Honors Colloquium | 3 |
| ANTH 4523 | Dental Science | 3 |
| ANTH 4613 | Primate Adaptation and Evolution | 3 |

## Focused Study in Cartography/Remote Sensing/GIS:

This focused study gives students an opportunity to develop expertise in (1) cartography, map design and computer-assisted map production, (2) remote sensing and image interpretation, including photographic systems, sensor systems, and digital image processing, and (3) geographic information systems, including data sources, analytical techniques, and hardware/software systems.

To complete the focused study, a student is required to fulfill the following course requirements.

## Required Courses:

| GEOS 3023 | Introduction to Cartography | 3 |
| :--- | :--- | :--- |
| GEOS 3213 | Principles of Remote Sensing | 3 |
| ANTH 3543 | Geospatial Applications and Information Science | 3 |
| Elective Courses | Select three of the following: | 9 |
| GEOS 4523 | Cartographic Design and Production |  |
| ANTH 4553 | Introduction to Raster GIS |  |
| ANTH 4563 |  |  |
| STAT 3003 | Statistical Methods |  |
| CVEG 2053 | Surveying Systems (or other approved surveying <br> course) |  |

## Focused Study in Cultural Anthropology:

To complete the focused study, a student is required to fulfill the following course requirements:

Students must take a world language through the 2013 level
Two of the following method and theory courses or equivalent classes $\quad 6$ offered under ANTH 3903 and ANTH 4903 approved as having a cultural anthropology method and theory focus.

| ANTH 3123 | The Anthropology of Religion |
| :--- | :--- |
| ANTH 3533 | Medical Anthropology |
| ANTH 4143 | Ecological Anthropology |
| ANTH 4363 | Museums, Material Culture, and Popular <br> Imagination |

## ANTH 4813

Writing Requirement: The Fulbright College research/analytical paper requirement for anthropology majors is fulfilled by completing an
intensive writing requirement (15 pages) with a grade of "B" or higher in a successfully completed 4000-level ANTH course and with instructor approval.

## Anthropology B.A. <br> Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 67) in the Academic Regulations chapter for university requirements of the program. Core requirement hours may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute a three-hour (or more) general elective in place of a core area.

First Year $\quad$ Fall | Units |

Total Units in Sequence: 120
${ }^{1}$ The Humanities Elective courses which satisfy the General Education Outcome 3.2 include:
AAST 2023, ANTH 1033, ARCH 1013, CLST 1003, CLST 1003H, CLST 1013, COMM 1233, DANC 1003, ENGL 1213, GNST 2003, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2003, HIST 2013, HUMN 1124H, HUMN 2213, LALS 2013, MRST 2013, MUSY 2003, MUSY 2003H, PHIL 2003, PHIL 2003C, PHIL 2003H, PHIL 2103, PHIL 2103C PHIL 2303, THTR 1003, THTR 1013, THTR 1013H, WLIT 1113, WLIT 1123, or intermediate-level world language (usually 2003-level).
${ }^{2}$ The Fine Arts Elective courses which satisfy the General Education Outcome 3.1 include:
ARCH 1003, ARHS 1003, COMM 1003, DANC 1003, LARC 1003, MLIT 1003, MLIT 1003H, MLIT 1013, MLIT 1013H, MLIT 1333, THTR 1003, THTR 1013, or THTR 1013 H .

3 The Social Sciences Elective courses which satisfy the General Education Outcome 3.3 include:
AGEC 1103, AGEC 2103, ANTH 1023, COMM 1023, ECON 2013, ECON 2023, ECON 2143, EDST 2003, HDFS 1403, HDFS 2413, HDFS 2603, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2003, HIST 2013, HIST 2093, HUMN 1114H, HUMN 2114H, INST 2013, INST 2813, INST 2813H, PLSC 2003, PLSC 2013, PLSC 2203, PLSC 2813, PLSC 2813H, PSYC 2003, RESM 2853, SOCI 2013, SOCI 2013H, or SOCI 2033.
4 Meets 40-hour advanced credit hour requirement. See College Academic Regulations (p. 273).
5 Meets 24-hour rule (24 hours of 3000-4000 level courses in Fulbright College), in addition to meeting the 40-hour rule. See College Academic Regulations (p. 273).

## Minor in Anthropology

Requirements for a Minor in Anthropology: 15 hours including ANTH 1023. At least 9 hours must be in courses numbered 3000 or above. Students who minor in anthropology should consult with an anthropology adviser to select appropriate courses. A student must notify the department of his or her intent to minor.

Requirements for Departmental Honors in Anthropology: The Departmental Honors Program in Anthropology provides an opportunity for outstanding undergraduate majors to conduct independent research under the supervision of a faculty member. The research project culminates in an honors thesis, which is primary for the award "Anthropology Scholar Cum Laude."Higher degree distinctions are recommended only in truly exceptional cases and are based upon the candidate's entire program of honors studies.

Honors candidates must meet the college requirements for an honors degree. They must complete and defend an honors thesis and take 12 hours, which may include 6 hours of thesis, in Honors Studies. The candidate is expected to maintain a minimum 3.5 cumulative grade-point average in anthropology and other course work.

Please refer to the Secondary Education Requirements (http:// catalog.uark.edu/undergraduatecatalog/collegesandschools/ jwilliamfulbrightcollegeofartsandsciences/\#fieldsofstudytext) for Fulbright College Students.

Students wishing to pursue licensure through the UAteach undergraduate curriculum should consult with a UAteach adviser, uteach@uark.edu.

## Faculty

D'Alisera, JoAnn, Ph.D., A.M. (University of Illinois-Urbana-Champaign), B.A. (State University of New York at New Paltz), Associate Professor, 1999, 2005.
Delezene, Lucas, Ph.D., M.A. (Arizona State University), B.S. (Emory University), Associate Professor, 2011, 2020.
Erickson, Kirstin C., Ph.D., M.A. (University of Wisconsin-Madison), B.A. (St. Olaf College), Associate Professor, 2001, 2008.
Kowalski, Jessica Anne, Ph.D. (University of Alabama), Research Assistant Professor, 2019.
Koziol, Kathryn, Ph.D. (University of Arkansas), Teaching Associate Professor, 2019, 2022.
Paul, Kathleen, Ph.D., M.A. (Arizona State University), B.A. (New York University), Assistant Professor, 2019.
Plavcan, Joseph M., Ph.D., B.A. (Duke University), Professor, 2001, 2010.

Stoner, Wesley, Ph.D., M.A. (University of Kentucky), B.A. (Pennsylvania State University), Associate Professor, 2014, 2020.
Terhune, Claire E., Ph.D., M.A. (Arizona State University), B.A., B.S. (College of Charleston), Associate Professor, 2013, 2020.
Ungar, Peter S., Ph.D., M.A. (State University of New York at Stony Brook), B.A. (State University of New York, Binghampton), Distinguished Professor, 1995, 2009.
Villaseñor, Amelia, Ph.D. (George Washington University), B.A. (Arizona State University), Assistant Professor, 2019.
Vining, Benjamin R., Ph.D., M.A. (Boston University), B.A. Colgate
University, Associate Professor, 2016, 2022.

## Courses

ANTH 1011L. Introduction to Biological Anthropology Laboratory. 1 Hour. Laboratory exercises illustrating concepts of physical anthropology. Corequisite: ANTH 1013. (Typically offered: Fall)
ANTH 1011M. Honors Introduction to Biological Anthropology Laboratory. 1 Hour.
Laboratory exercises illustrating concepts of physical anthropology. Corequisite: ANTH 1013H and honors candidacy. (Typically offered: Fall)
This course is equivalent to ANTH 1011L.
ANTH 1013. Introduction to Biological Anthropology. 3 Hours.
An introduction to the field of biological anthropology using evolution and human variation as unifying concepts. Areas include human genetics, race, speciation, primate and human evolution, and human variation and adaptation. Corequisite: ANTH 1011L. (Typically offered: Spring and Summer)
ANTH 1013H. Honors Introduction to Biological Anthropology. 3 Hours.
An introduction to the field of biological anthropology using evolution and human variation as unifying concepts. Areas include human genetics, race, speciation, primate and human evolution, and human variation and adaptation. Corequisite: ANTH 1011M. (Typically offered: Fall and Spring)
This course is equivalent to ANTH 1013.
ANTH 1023. Introduction to Cultural Anthropology (ACTS Equivalency $=$ ANTH 2013). 3 Hours.

Introduction to the nature of culture and its influence on human behavior and personality: comparative study of custom, social organization, and processes of change and integration of culture. Corequisite: Drill component. (Typically offered: Fall, Spring and Summer)
ANTH 1023H. Honors Introduction to Cultural Anthropology. 3 Hours.
Introduction to the nature of culture and its influence on human behavior and personality; comparative study of custom, social organization, and processes of change and integration of culture. (Typically offered: Fall and Spring) This course is equivalent to ANTH 1023.

## ANTH 1033. Introduction to Archaeology. 3 Hours.

Archaeology studies the human past through contextual analysis of artifacts, archaeological sites, and landscapes. This course introduces archaeological methods and theories, significant discoveries and current debates in the discipline. Corequisite: Lab component. (Typically offered: Fall and Spring)

ANTH 2013. Introduction to Latin American Studies. 3 Hours.
This course provides an interdisciplinary introduction to Latin America. Drawing on Latin American literature, history, sociology, and political science, the course examines the broad forces that have shaped the region. (Typically offered: Irregular)

## ANTH 3003. World Prehistory. 3 Hours.

Survey of the prehistoric and early historic cultures of the Americas, Asia, and Africa. (Typically offered: Irregular)

ANTH 3013. Myths, Mysteries, and Manipulations of the Past. 3 Hours. Examines many archaeological fantasies, evaluates the evidence for and against such fringe theories, and confronts pseudoscience in everyday life. Dispels popular fantasies and "fake news" about the past. (Typically offered: Fall Odd Years)

## ANTH 3023. Approaches to Archeology. 3 Hours.

Study of the field of archeology including method, theory, analysis and interpretation with substantive worldwide examples. Prerequisite: ANTH 1033. (Typically offered: Spring)

ANTH 3043. Bones, Bodies, and Brains in Evolutionary Perspective. 3 Hours. This course will review the anatomy of the human body, comparing this anatomy with primates, mammals, and vertebrates, and it will consider how the major features of the human body emerged throughout evolution. (Typically offered: Irregular) This course is cross-listed with BIOL 3043.

## ANTH 3123. The Anthropology of Religion. 3 Hours.

An exploration of rituals, symbols, and rules that shape religious life. Religion is viewed broadly, considering activities that invoke powers beyond the reach of ordinary senses. Examining a variety of cultures, we explore what people say and do as they participate in activities such as magic, healing, pilgrimage, and contemporary religious movements. (Typically offered: Spring)
ANTH 3213. Indigenous Peoples of North America: Anthropological Perspectives. 3 Hours.
An exploration of indigenous societies and cultures of North America from an anthropological perspective. Using examples from diverse Native Nations from the time of European contact to the present, we will examine colonialism and resistance, indigenous cosmologies, memory culture and oral tradition, and the politics of representation. (Typically offered: Irregular)
ANTH 3263. Indians of Arkansas and the South. 3 Hours.
Study of the traditional lifeways and prehistoric backgrounds of Indians living in the Southern United States, including Arkansas. (Typically offered: Spring Odd Years)
ANTH 3323. Evolution of the Human Mating System. 3 Hours.
Examines basic principles governing the evolution of sexual behavior and anatomy in mammals, compares the features of human mating systems to those of primates, and explores models for the origin of fundamental features of the human social system. (Typically offered: Fall)

## ANTH 3421L. Human Osteology Laboratory. 1 Hour.

Laboratory exercises illustrating concepts of human osteology. Corequisite: ANTH 3423. (Typically offered: Spring)

ANTH 3423. Human Osteology. 3 Hours.
Study of the human skeleton, identification of bones, allometric growth, sexual dimorphism, osteological genetic inheritance and environmental stresses. Lectures and demonstration. Corequisite: ANTH 3421L. (Typically offered: Spring)
ANTH 3433. Human Evolution. 3 Hours.
A study of hominid evolution from origin to the present, including trends in comparative primate evolution and functional development of human form as a result of cultural and biological interaction. (Typically offered: Fall)

## ANTH 3473. North American Prehistory. 3 Hours.

Survey of the aboriginal prehistory of the North American Continent north of Mexico. (Typically offered: Irregular)

## ANTH 3533. Medical Anthropology. 3 Hours.

Survey of the interrelationship of human biology, culture and environment as reflected in disease experience from an evolutionary and cross cultural perspective. Special emphasis on stress. (Typically offered: Irregular)

ANTH 3543. Geospatial Applications and Information Science. 3 Hours. An introduction to the methods and theory underlying the full range of geographic information science and collateral areas - including GNSS, remote sensing, cadastral, spatial demographics and others. (Typically offered: Fall and Spring) This course is cross-listed with GEOS 3543.

ANTH 3553. Religion in Latin America. 3 Hours.
Examines contemporary implications of Latin America's unique religious heritage. An exploration of multiple Latin American religious traditions, with sustained focus on key theoretical concerns: conversion, vernacular vs. orthodox expressions, the blending of indigenous and European cosmologies, devotion and ritual, and the articulation of ethnic, gendered, and religious identities. (Typically offered: Irregular) This course is cross-listed with LALS 3553.

## ANTH 3563. Culture and Medicine. 3 Hours.

Study of health and medicine within cultural contexts, including attention to crosscultural healers and healing systems. Special emphasis on biomedicine as a cultural system. (Typically offered: Irregular)

## ANTH 3583. Body and Identity. 3 Hours.

This course explores personal, social and cultural constructions and performances of the body and identity, highlighting key intersections of embodiment including gender, race, sexuality and abilities. (Typically offered: Irregular)

ANTH 3593. Bioarchaeology: Bodies of the Past. 3 Hours.
Bioarchaeology is the study of human remains recovered from archaeological contexts. An overview of the field's history, ethical considerations, and relationship to the broader social sciences and STEM fields. Focuses on interpreting an individual's lived experience from their skeletal remains and mortuary context to reconstruct past phenomena. (Typically offered: Spring Odd Years)

## ANTH 3713. Extinction: Bad Genes or Bad Luck?. 3 Hours.

Explores mass extinctions through the history of life on Earth, with particular emphasis on the Quaternary (the last 2.6 million years) where hominins, particularly humans have played a dominant role in shaping the ecosystems we experience today. (Typically offered: Fall and Spring)
ANTH 3903. Topics in Anthropology. 3 Hours.
Covers a special topic or issue. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
ANTH 3923H. Honors Colloquium. 3 Hours.
Covers a special topic or issue, offered as part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in anthropology). (Typically offered: Irregular) May be repeated for degree credit.
ANTH 399VH. Honors Thesis. 1-6 Hour.
Honors thesis. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 12 hours of degree credit.
ANTH 4013. History of Anthropological Thought. 3 Hours.
Detailed consideration of anthropological theory through study of its historical development. The research paper fulfills the Fulbright College Writing Requirement for anthropology majors. Prerequisite: ANTH 1023. (Typically offered: Fall)

## ANTH 4043. Ancient Cities. 3 Hours.

Explores pre-modern cities from the earliest in the world to those on the brink of industrialization. Employs anthropological archaeology as its primary approach, but also draws upon formal/functional analysis of urban plans, historical documentation, urban planning and history, and semiotics to interpret the built-environment as a form of non-verbal communication. (Typically offered: Spring Even Years)

ANTH 4053. Anthropology of the City. 3 Hours.
Explores the implications of several pivotal urban and cultural trends and how representations of the city have informed dominant ideas about city space, function, and meaning. (Typically offered: Irregular)

## ANTH 4093. The Archeology of Death. 3 Hours.

Study of the analysis and interpretation of archeological mortuary remains and sites. Key archeological and anthropological sources that have influenced major theoretical developments are reviewed. (Typically offered: Irregular)

## ANTH 4143. Ecological Anthropology. 3 Hours.

Anthropological perspectives on the study of relationships among human populations and their ecosystems. (Typically offered: Irregular)

## ANTH 4256. Archeological Field Session. 6 Hours.

Practical field and laboratory experiences in archeological research. (Typically offered: Summer) May be repeated for up to 12 hours of degree credit.

ANTH 4263. Identity and Culture in the U.S.-Mexico Borderlands. 3 Hours. An exploration of the interplay between Latino/a, Mexican, Anglo, and Native American identities and cultures along the U.S.-Mexico border. Course examines identity formation, hybridity, social tension, marginalization, race and gender, from an anthropological perspective, paying special attention to the border as theoretical construct as well as material reality. (Typically offered: Irregular)
This course is cross-listed with LALS 4263.

## ANTH 4273. Photography for Fieldwork. 3 Hours.

This class explores the use of photographic images as both data and representational tools in anthropological research, emphasizing the ethical, theoretical, and methodological issues involved. (Typically offered: Irregular)

## ANTH 4283. Survey in Ethnographic Film. 3 Hours.

Survey of the development and evolution of ethnographic film, based on class screenings to build familiarity, vocabulary, and literacy with this branch of visual anthropology. (Typically offered: Irregular)

## ANTH 4353. Laboratory Methods in Archeology. 3 Hours.

Theory and practice of describing, analyzing, and reporting upon archeological materials. (Typically offered: Irregular)

ANTH 4363. Museums, Material Culture, and Popular Imagination. 3 Hours. Museums as ideological sites and thus as sites of potential contestation produce cultural and moral systems that legitimate existing social orders. This course will focus on strategies of representation and the continuous process of negotiating social and cultural hierarchies with and through objects that are displayed. (Typically offered: Fall)

## ANTH 4443. Cultural Resource Management I. 3 Hours.

Concentrated discussion of management problems relative to cultural resources, including review and interpretation of relevant federal legislation, research vs. planning needs, public involvement and sponsor planning, and assessment of resources relative to scientific needs. No field training involved; discussion will deal only with administrative, legal and scientific management problems. (Typically offered: Spring) May be repeated for degree credit.

## ANTH 448V. Individual Study of Anthropology. 1-6 Hour.

Reading course for advanced students with special interests in anthropology. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ANTH 4523. Dental Science. 3 Hours.
Introduction to the study of the human dentition including its anatomy, morphology, growth and development, and histology. (Typically offered: Fall)

ANTH 4533. Middle East Cultures. 3 Hours.
Study of the peoples and cultures of the Middle East; ecology, ethnicity, economics, social organizations, gender, politics, religion, and patterns of social change. (Typically offered: Spring) May be repeated for up to 9 hours of degree credit.

## ANTH 4553. Introduction to Raster GIS. 3 Hours.

Theory, data structures, algorithms, and techniques behind raster-based geographical information systems. Through laboratory exercises and lectures multidisciplinary applications are examined in database creation, remotely sensed data handling, elevation models, and resource models using boolean, map algebra, and other methods. (Typically offered: Fall)
This course is cross-listed with GEOS 4553.

## ANTH 4583. Cultures of Africa. 3 Hours.

An exploration of the people and places of Africa from a variety of anthropological perspectives. Classic and contemporary works will be studied in order to underscore the unity and diversity of African cultures, as well as the importance African societies have played in helping us understand culture/society throughout the world. (Typically offered: Fall)
This course is cross-listed with AAST 4583.
ANTH 4613. Primate Adaptation and Evolution. 3 Hours.
Introduction to the biology of the order of Primates. This course considers the comparative anatomy, behavioral ecology and paleontology of our nearest living relatives. Prerequisite: ANTH 1013 (or BIOL 1543 and BIOL 1541L). (Typically offered: Spring)
This course is cross-listed with BIOL 4613.

## ANTH 4703. Mammalian Evolution and Osteology. 3 Hours.

This course will focus on describing the evolutionary history of mammals, a group of vertebrates that include over 5,000 species in 29 orders, and will provide an overview of living species and their identifying features. Prerequisite: ANTH 1013 and ANTH 1011L or BIOL 1543 and BIOL 1541L or instructor consent. (Typically offered: Irregular)

## ANTH 4903. Seminar in Anthropology. 3 Hours.

Research, discussion, and projects focusing on a variety of topics. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

## ANTH 4913. Topics of the Middle East. 3 Hours.

Covers a special topic or issue. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

## Art (ARTS)

Marty Maxwell Lane
Director of the School of Art
Studio \& Design Center, 696 W. Praxis Lane
479-575-5202
School of Art Website (https://fulbright.uark.edu/departments/art/)
The School of Art offers two undergraduate programs leading to degrees:

- Bachelor of Arts
- Bachelor of Fine Arts

Separate requirements for each program and its concentrations are listed under the tabs. Requirements for honors are listed separately for the program. The School of Art also offers a minor in art history.

Under direction of accomplished faculty, the School of Art offers professional art degrees in many media areas, including art education, art history, ceramics, drawing, painting, photography, printmaking, sculpture, and visual design. Students enjoy a close proximity to the Crystal Bridges Museum of American Art, with which the School of Art has a strong relationship. The school also works closely with other local arts organizations and maintains an active presence in the communities of Northwest Arkansas. The school's Fine Arts Gallery (http://art.uark.edu/ fineartsgallery/) in the impressive Fine Arts Center designed by architect Edward Durell Stone, is currently being renovated and normally shows both student and professional works on a near-constant basis when open. The school's new Studio and Design Center and its Sculpture Studio are in the heart of the new Windgate Art and Design District at the southeast corner of Hill Avenue and Martin Luther King Boulevard. Both facilities include public galleries as well.

## Bachelor of Arts Degree

Transfer students should confer with the School of Art advisers prior to entrance for information concerning entrance requirements and transfer credits. Transfer credit will be allowed from other accredited and recognized art departments and schools if the credit earned is compatible with program and course requirements within the University of Arkansas School of Art and reflects a grade of "C" or higher. In addition, a student must spend a minimum of 2 semesters in residence. Credit for advanced studio classes in the school is contingent upon presentation of a portfolio of works created in a college-level class equivalent to the class the student is seeking credit for in the School of Art. Professors in the relevant studio area will evaluate portfolios and determine transfer credits.

## University and College Requirements for a Bachelor of Arts in

Art History: In addition to the Fulbright College of Arts and Sciences
Graduation Requirements (see under Degree Completion Program Policy) and the state minimum core (p. 81), the following course requirements must be met.

| State minimum core |  | 35 |
| :---: | :---: | :---: |
| Majors must complete the state minimum core course for Fine Arts from outside the School of Art. |  |  |
| World language | up to the Intermediate II level | 12 |
| Art History and Studio Art Courses |  |  |
| ARHS 2913 | Art History Survey I (ACTS Equivalency = ARTA 2003) | 3 |
| ARHS 2923 | Art History Survey II (ACTS Equivalency = ARTA 2103) | 3 |
| At least two courses selected from below (Group 1): |  | 6 |
| ARHS 4563 | Pre-Columbian Art |  |
| ARHS 4573 | Artists of New Spain |  |
| ARHS 4743 |  |  |
| ARHS 4753 | Renaissance and Baroque Architecture |  |
| ARHS 4833 | Ancient Art |  |
| ARHS 4843 | Medieval Art |  |
| ARHS 4853 | Italian Renaissance Art |  |
| ARHS 4863 | Northern Renaissance Art |  |
| ARHS 4873 | Baroque Art |  |
| ARHS 4983 | Special Topics in Art History |  |
| At least two courses selected from below (Group 2): |  | 6 |
| ARHS 4813 | The History of Photography |  |
| ARHS 4883 | 18th and 19th Century European Art |  |
| ARHS 4893 | 20th Century European Art |  |
| ARHS 4913 | American Art to 1860 |  |
| ARHS 4923 | American Art 1860-1960 |  |
| ARHS 4933 | Contemporary Art |  |
| ARHS 4993 | Special Topics in Modern Art |  |
| 6 credit hours in art history (ARHS) electives numbered 3000-level or higher. |  |  |
| 6 credit hours in seminar by completing ARHS 4973 (may be repeated for 6 credit hours) or both ARHS 4973 and ARHS 4763. One of these courses must be completed by the end of the junior year. |  |  |
| 6 credit hours in studio art (ARTS) electives |  | 6 |
| An additional 3 | edit hours in art history (ARHS) numbered 3000- | 3 |

An additional 3 credit hours in art history (ARHS) numbered 3000-

| 9 credit hours from outside the School of Art (as approved by an advisor) | 9 |
| :---: | :---: |
| Any UA offered credit hours 3000-level or higher | 6 |
| Any credit hours 3000-level or higher or any 2000-level credit hours which have a prerequisite | 10 |
| General Electives | 9 |
| Total Hours | 120 |

The Fulbright College Writing Requirement is satisfied by completing an art history (ARHS) course numbered 3000-level or higher with a grade of a 'C' or higher.

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 67) in the Academic Regulations chapter for university requirements of the program as well as Fulbright College requirements.

State minimum core (p.81) requirements may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute with general electives. Students should consult with their academic adviser.

| First Year |  | Units <br> Spring |
| :--- | ---: | ---: |
| ENGL 1013 Composition I (ACTS Equivalency | 3 |  |
| = ENGL 1013) (Satisfies General Education |  |  |

## Requirements for B.F.A. in Art Education with Concentration in Community Practice

## University and College Requirements for the Bachelor of Fine Arts in

 Art EducationIn addition to the state minimum core (p. 81) and the Fulbright College of Arts and Sciences Graduation Requirements (see under Degree Completion Program Policy), the following course requirements must be met.

```
State Minimum Core. Courses listed below are required for the major 35
and also count toward the state minimum core.
    PHIL 2003 Introduction to Philosophy (ACTS Equivalency =
        PHIL 1103)
    PSYC 2003 General Psychology (ACTS Equivalency = PSYC
        1103)
Art Education Core Requirements 39
    World language up to the Intermediate I level (2000-level)
    COMM 1313 Public Speaking (ACTS Equivalency = SPCH
        1003)
    PHIL 4403 Philosophy of Art
    ARTS 1919C Studio Foundation I
    ARTS 1929C Studio Foundation II
    ARED 1003 Introduction to Art Education
    ARED 3103 Diversity Theory & Pedagogy
    ARED 3003 Curriculum Design & Teaching Practices in Art
        Education
    ARED 4003 Community Art
A minimum of 12 credit hours in art history courses (ARHS) 12
    ARHS 2913 Art History Survey I (ACTS Equivalency = ARTA
        2003) }\mp@subsup{}{}{1
        ARHS 2923 Art History Survey II (ACTS Equivalency = ARTA
        2103) }\mp@subsup{}{}{1
        ARHS 4933 Contemporary Art
        Any ARHS course numbered 3000-level or higher
A minimum of 12 credit hours 3000-level or higher in a selected studio 12
art focus
A minimum of 12 credit hours 3000-level or higher in additional studio 12
art courses exclusive of the selected studio art focus
```

## Units

Spring

## Units

Spring

coursework requirements, an interview with Art Education faculty, and/or other specified recommendations by your program.

## Stage II: Internship

1. Complete the one-semester internship at one elementary and one secondary placement at approved locations.
2. Complete Praxis II requirements. See your adviser for details.

Students should always consult the Coordinator of Teacher Education for any licensure requirement changes. Students will not be licensed to teach in Arkansas until they have met all requirements for licensure as set forth by the Arkansas Department of Education.

Usually licensure in another state is facilitated by qualifying for a license in Arkansas. An application in another state must be made on the application form of that state, which can be obtained by request from the State Teacher Licensure office in the capital city. An official transcript should accompany the application. In many instances the applications are referred to the Coordinator of Teacher Education to verify program completion in teacher education.

## Course Requirements

In addition to the requirements listed above for the Bachelor of Arts in Art Education with a Concentration in K-12 Teaching, the following coursework is required for internship eligibility and degree completion.

| ARED 4953 | Special Topics in Art Education | 3 |
| :--- | :--- | ---: |
| CIED 3023 | Survey of Exceptionalities | 3 |
| or ARED 3013 | Inclusive Art Pedagogy |  |
| CIED 3033 | Classroom Learning Theory | 3 |
| During the final semester, students will complete the following: |  |  |
| ARED 4773 | Professional Development in Art Education | 3 |
| ARED 476V | Student Teaching in Art | $6-12$ |

The Fulbright College Writing Requirement is satisfied by completing an art history (ARHS) course numbered 3000-level or higher with a grade of a 'C' or higher.

## Art B.F.A. in Art Education with a Concentration in K-12 Teaching Eight-Semester Degree Program

Students enrolling in the eight-semester degree plan should review the Eight-Semester Degree Completion Policy (p. 67).

State minimum core requirements may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute with general electives in consultation with their academic advisor.

| First Year | Fall | Units <br> Spring |
| :--- | ---: | ---: |

2 Students completing the Bachelor of Fine Arts may substitute ARHS 2913 or ARHS 2923 to satisfy the content covered in the Fine Arts University/State Core Requirement.

## B.F.A. in Graphic Design

The Bachelor of Fine Arts degree in Graphic Design — often also referred to as visual design, visual communication design or visual communication - will prepare students to be proficient makers and thoughtful problem seekers and solvers in a four-year professional degree program. Students will work seamlessly across a range of media, working to identify appropriate solutions for audience and context. Students will be exposed to a rigorous curriculum covering research, theory, critical thinking, professional practices, conceptual idea-making, all while asking them to formally experiment and refine. The Graphic Design degree focuses on: typography, interactivity, branding and design research, each identified as strongly connected to the design industry, while incorporating the university research initiatives of the School of Art at the University of Arkansas.

## Requirements for Admission to the Bachelor of Fine Arts Degree in Graphic Design

For admission to the B.F.A. in Graphic Design, students must be a declared Art major in the School of Art and successfully complete the art foundation course sequence of ARTS 1919C Studio Foundation I and ARTS 1929C Studio Foundation II. Students must have a 3.0 cumulative GPA plus submit an application and portfolio for review.

## University and College Requirements for a Bachelor of Fine Arts in Graphic Design

In addition to the Fulbright College of Arts and Sciences Graduation Requirements (see under Degree Completion Program Policy), the following course requirements must be met.

State Minimum Core (The Humanities requirement is satisfied by
PHIL 2003 listed below. The Fine Arts requirement is satisfied by completing both ARHS 2913 and ARHS 2923 listed below.)

| PHIL 2003 | Introduction to Philosophy (ACTS Equivalency $=$ <br>  <br>  <br> PHIL 1103) | 3 |

Please visit these pages in the links provided and consult with your academic advisor when making course selections to fulfill these requirements.

## Bachelor of Arts Degree

Transfer students should confer with the departmental advisers prior to entrance for information concerning entrance requirements and transfer credits. Transfer credit will be allowed from other accredited and recognized art departments and schools if the credit earned is compatible with program and course requirements within the University of Arkansas School of Art and reflects a grade of " C " or higher. In addition, a student must spend a minimum of 2 semesters in residence. Credit for advanced studio classes in the school is contingent upon presentation of a portfolio of works created in a college-level class equivalent to the class the student is seeking credit for in the School of Art. Professors in the relevant studio area will evaluate portfolios and determine transfer credits.

## Requirements for a Major in Studio Art

In addition to the University Core requirements (http://catalog.uark.edu/ undergraduatecatalog/academicregulations/universitycore/) and the Fulbright College of Arts and Sciences Graduation Requirements (p. 273), the following course requirements must be met.

A minimum of 51 semester hours to include:

| ARTS 1919C | Studio Foundation I | 9 |
| :--- | :--- | :--- |
| ARTS 1929C | Studio Foundation II | 9 |
| 12 Hours of Art History to include: |  |  |
| ARHS 2913 | Art History Survey I (ACTS Equivalency = ARTA <br> 2003) | 3 |
| ARHS 2923 | Art History Survey II (ACTS Equivalency $=$ ARTA <br> 2103) | 3 |

AR
ARHS 4873 Baroque Art
ARHS 4983 Special Topics in Art History
Select one of the following: (Group 2) 3
ARHS 4763 Seminar in Critical Theory
ARHS 4813 The History of Photography

ARHS 4883 18th and 19th Century European Art
ARHS 4893 20th Century European Art
ARHS 4913 American Art to 1860
ARHS 4923 American Art 1860-1960
ARHS 4933 Contemporary Art
ARHS 4993 Special Topics in Modern Art
Students may take ARHS 4973 Seminar in Art History to fulfill their ARHS requirement, but designation as Group 1 or 2 will depend on the specific seminar taken.
In addition, students must complete a minimum of 21 hours of studio 21 art courses, with at least one course from each media category. Within these 21 hours, students must complete at least 6 hours of studio art courses at the 4000-level.

## Media Categories

-2D (drawing, printmaking, painting)
-3D (sculpture, ceramics)

- Digital/Lens (photography, graphic design (digital tools), time \& motion)

Studio Art majors must complete a basic fine arts course that satisfies the University Core requirement from outside the School of Art.

The Fulbright College Writing Requirement is satisfied by completing an art history (ARHS) course numbered 3000-level or higher with a grade of a ' C ' or higher.

## Studio Art B.A. <br> Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 67) for university requirements of the program. Core requirement hours may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute a three-hour (or more) general elective in place of a core area.

ARHS 4923 American Art 1860-1960 (ARHS 2923)
ARHS 4933 Contemporary Art ((ARHS 2923 and ARHS 4923))
ARHS 4993 Special Topics in Modern Art ((ARHS 2923))
Students may take ARHS 4973 Seminar in Art History to fulfill an ARHS requirement, but designation as Group 1 or 2 will depend on the topic of the specific seminar taken.

## Requirements for B.F.A. in Studio Art with Ceramics Concentration

Admission: Students who earn a grade point average of 3.0 or higher in art (after the completion of ARTS 1919C, ARTS 1929C and a three-credit hour introductory course in their desired concentration) and who have maintained an overall grade point average of 2.0 or higher are eligible to apply to the Studio Art B.F.A. degree program (STARBFA). In addition to meeting the required grade point average, all students must submit, as part of their application, a portfolio of current representative work for evaluation by the art faculty. Acceptance into the program is contingent upon favorable evaluation of the applicant's portfolio by the art faculty.

3 Transfer credit will be allowed from other accredited and recognized art departments and schools if the credit earned is compatible with program
and course requirements within the $U$ of $A$ School of Art and reflects a grade of " $C$ " or higher. The $U$ of $A$ School of Art will not accept more than 50 percent of the required B.F.A. degree credits from another institution, and it will require a portfolio review for acceptance of all studio art transfer courses above the foundations level.

Program Requirements: The Bachelor of Fine Arts degree will be awarded to students, who, upon the completion of the approved program, have maintained a 3.0 grade point average within the $U$ of A School of Art and a 2.0 grade point average overall. Students in the STARBFA program whose grade point average falls below 3.0 in $U$ of $A$ School of Art classes for two consecutive semesters will be dismissed from the program. While in the program, students are required to participate in a faculty-supervised critique once each semester. Finally, a senior exhibition is required prior to completing the program.

## University and College Requirements for a Bachelor of Fine Arts in Studio Art

In addition to the Fulbright College of Arts and Sciences Graduation Requirements (see under Degree Completion Program Policy), the following course requirements must be met. State minimum core requirements may vary by individual, based on placement and previous credit granted. Once all state minimum core requirements are met, students may substitute with general electives in consultation with their academic advisor.

| State Minimum Core |  | 35 |
| :---: | :---: | :---: |
| ARTS 1919C | Studio Foundation I | 9 |
| ARTS 1929C | Studio Foundation II | 9 |
| 15 credit hours in art history courses (ARHS) to include: |  | 15 |
| ARHS 2913 | Art History Survey I (ACTS Equivalency = ARTA 2003) ${ }^{1}$ |  |
| ARHS 2923 | Art History Survey II (ACTS Equivalency = ARTA 2103) ${ }^{1}$ |  |
| Nine credit hours in Art History electives (ARHS) numbered 3000level or higher. PHIL 4403 Philosophy of Art may also be used towards this requirement. |  |  |
| 27 credit hours in studio art electives (ARTS) numbered 3000-level or higher. At a minimum, students must divide the electives into the following: |  |  |
| At least six credit hours in Drawing and/or Painting courses (ARTS) |  |  |
| At least six credit hours in Photography and/or Printmaking courses (ARTS) |  |  |
| At least six credit hours in Ceramics and/or Sculpture courses (ARTS) |  |  |
| 21 credit hours towards a concentration in a single studio art media area (Ceramics, Drawing, Painting, Photography, Printmaking, or Sculpture) numbered 3000-level or higher, with six of these credit hours numbered 4000-level or higher. |  |  |
| ARTS 4993 | Studio Art BFA Capstone | 3 |
| General Electives |  |  |
| Total Hours |  | 120 |
| ${ }^{1}$ Completion of ARHS 2913 (http://catalog.uark.edu/search/?P=ARHS \%202913) and ARHS 2923 (http://catalog.uark.edu/search/?P=ARHS \%202923) satisfies the content covered in ARHS 1003 (http:// |  |  |

catalog.uark.edu/search/?P=ARHS\ 1003) for fulfillment of the Fine Arts State Minimum Core requirement.

Writing Requirement: School of Art majors will satisfy the Fulbright College Writing Requirement by earning a grade of " C " or higher on the final paper in an Art History (ARHS) course numbered 3000-level or higher or by successful completion of an honors thesis.

## Ceramics Concentration

21 credit hours in Ceramics courses (ARTS) numbered 3000-level or higher, with six of these credit hours numbered 4000-level or higher.

## Requirements for B.F.A. in Studio Art with Painting Concentration

Admission: Students who earn a grade point average of 3.0 or higher in art (after the completion of ARTS 1919C, ARTS 1929C and a three-credit hour introductory course in their desired concentration) and who have maintained an overall grade point average of 2.0 or higher are eligible to apply to the Studio Art B.F.A. degree program (STARBFA). In addition to meeting the required grade point average, all students must submit, as part of their application, a portfolio of current representative work for evaluation by the art faculty. Acceptance into the program is contingent upon favorable evaluation of the applicant's portfolio by the art faculty.

Transfer credit will be allowed from other accredited and recognized art departments and schools if the credit earned is compatible with program and course requirements within the $U$ of $A$ School of Art and reflects a grade of " $C$ " or higher. The $U$ of A School of Art will not accept more than 50 percent of the required B.F.A. degree credits from another institution, and it will require a portfolio review for acceptance of all studio art transfer courses above the foundations level.

Program Requirements: The Bachelor of Fine Arts degree will be awarded to students, who, upon the completion of the approved program, have maintained a 3.0 grade point average within the $U$ of $A$ School of Art and a 2.0 grade point average overall. Students in the STARBFA program whose grade point average falls below 3.0 in $U$ of A School of Art classes for two consecutive semesters will be dismissed from the program. While in the program, students are required to participate in a faculty-supervised critique once each semester. Finally, a senior exhibition is required prior to completing the program.

## University and College Requirements for a Bachelor of Fine Arts in Studio Art

In addition to the Fulbright College of Arts and Sciences Graduation Requirements (see under Degree Completion Program Policy), the following course requirements must be met. State minimum core requirements may vary by individual, based on placement and previous credit granted. Once all state minimum core requirements are met, students may substitute with general electives in consultation with their academic advisor.
State Minimum Core ..... 35
ARTS 1919C Studio Foundation I ..... 9
ARTS 1929C Studio Foundation II ..... 9
15 credit hours in art history courses (ARHS) to include: ..... 15
ARHS 2913 Art History Survey I (ACTS Equivalency = ARTA2003) ${ }^{1}$
ARHS 2923 Art History Survey II (ACTS Equivalency = ARTA 2103) ${ }^{1}$
Nine credit hours in Art History electives (ARHS) numbered 3000level or higher. PHIL 4403 Philosophy of Art may also be used towards this requirement.
27 credit hours in studio art electives (ARTS) numbered 3000-level
following:
At least six credit hours in Drawing and/or Painting courses (ARTS)
At least six credit hours in Photography and/or Printmaking courses (ARTS)
At least six credit hours in Ceramics and/or Sculpture courses (ARTS)
21 credit hours towards a concentration in a single studio art media area (Ceramics, Drawing, Painting, Photography, Printmaking, or Sculpture) numbered 3000 -level or higher, with six of these credit hours numbered 4000-level or higher.
ARTS 4993 Studio Art BFA Capstone 3
General Electives 1
Total Hours ..... 120
${ }^{1}$ Completion of ARHS 2913 (http://catalog.uark.edu/search/?P=ARHS \%202913) and ARHS 2923 (http://catalog.uark.edu/search/?P=ARHS \%202923) satisfies the content covered in ARHS 1003 (http:// catalog.uark.edu/search/?P=ARHS\ 1003) for fulfillment of the Fine Arts State Minimum Core requirement.
Writing Requirement: School of Art majors will satisfy the Fulbright College Writing Requirement by earning a grade of " C " or higher on the final paper in an Art History (ARHS) course numbered 3000-level or higher or by successful completion of an honors thesis.

| 15 credit hours in art history courses (ARHS) to include: |  |
| ARHS 2913 | Art History Survey I (ACTS Equivalency = ARTA 2003) ${ }^{1}$ |
| ARHS 2923 | Art History Survey II (ACTS Equivalency = ARTA 2103) ${ }^{1}$ |

Nine credit hours in Art History electives (ARHS) numbered 3000level or higher. PHIL 4403 Philosophy of Art may also be used towards this requirement.
27 credit hours in studio art electives (ARTS) numbered 3000-level or higher. At a minimum, students must divide the electives into the following:

At least six credit hours in Drawing and/or Painting courses (ARTS)
At least six credit hours in Photography and/or Printmaking courses (ARTS)
At least six credit hours in Ceramics and/or Sculpture courses (ARTS)
21 credit hours towards a concentration in a single studio art media area (Ceramics, Drawing, Painting, Photography, Printmaking, or Sculpture) numbered 3000-level or higher, with six of these credit hours numbered 4000-level or higher.
ARTS 4993 Studio Art BFA Capstone 3
General Electives 1
Total Hours 120
1 Completion of ARHS 2913 (http://catalog.uark.edu/search/?P=ARHS \%202913) and ARHS 2923 (http://catalog.uark.edu/search/?P=ARHS \%202923) satisfies the content covered in ARHS 1003 (http:// catalog.uark.edu/search/?P=ARHS\ 1003) for fulfillment of the Fine Arts State Minimum Core requirement.

Writing Requirement: School of Art majors will satisfy the Fulbright College Writing Requirement by earning a grade of " C " or higher on the final paper in an Art History (ARHS) course numbered 3000-level or higher or by successful completion of an honors thesis.

## Sculpture Concentration Requirements:

21 credit hours in Sculpture and Experimental Media courses (ARTS) numbered 3000-level or higher, with six of these credit hours numbered 4000-level or higher.

## Art B.F.A. with Sculpture and Experimental Media Concentration Eight-Semester Degree Program

## Faculty

Adams, Carris, M.F.A. (University of Chicago), B.F.A. (University of Texas at Austin), Visiting Professor, 2022.
Amirvaghefi, Maryamsadat, M.F.A. (University of Arkansas), B.F.A. (Sooreh Art University, Tehran), Instructor, 2017.
Andree, David, M.F.A. (State University of New York), B.F.A.
(Minneapolis College of Art and Design), Assistant Professor, 2015.
Andree, Kara M., M.F.A. (State University of New York at Buffalo), B.F.A. (Minneapolis College of Art and Design), Instructor, 2016.
Barnes, Ty, M.F.A. (University of Arkansas), B.F.A. (Mississippi State University), Instructor, 2022.
Benbrahim, Dina, M.F.A. (University of Florida), M.A. (Simon Fraser University), B.A. (Simon Fraser University), Endowed Assistant Professor, 2021.

Blakinger, John, Ph.D., M.A. (Stanford University), B.A. (Wesleyan University), Associate Professor, Endowed Chair in Art History, 2020.
Callander, Adrienne, M.F.A. (Rutgers University), B.A. (Reed College), Visiting Assistant Professor, 2017.
Callander, Neil, M.F.A. (Rutgers University), B.F.A. (Indiana University at Bloomington), Assistant Professor, 2017.
Camacho-Valencia, Paulina, Ph.D. (University of Illinois Urbana-
Champaign), M.A. (School of Art Institute of Chicago), Endowed Assistant Professor in Art History, 2022.
Cassiano Alverez, Renata, M.F.A. (University of MassachusettsDartmouth), Instructor, 2019.
Chioffi, David Charles, M.A. (Wesleyan University), B.F.A. (The
Rochester Institute of Technology), Professor, 2013, 2019.
Drolen, Rebecca, M.F.A., B.A. (Indiana University, Bloomington), Assistant Professor, 2015.
Edwards, Vincent A., M.F.A. (Herron School of Art and Design), B.F.A. (Indiana University), Instructor, 2016.
Efstathiou, Kes, M.F.A. (Rochester Institute of Technology), B.A.
(Montana State University), Visiting Assistant Professor, 2022.
Greenhill, Jennifer, Ph.D. (Yale University), M.A. (Williams College), B.A. (University of California, Los Angeles), Professor, Endowed Chair in Art History, 2020.
Hapgood, Thomas Layley, M.F.A., B.A. (University of Arizona), Associate Professor, 2005, 2012.
Hartenberger, Craig, M.F.A. (Kent State University), B.F.A. (Missouri State University), Instructor, 2022.
Hernandez, Gaby, M.F.A. (University of Florida), B.A. (Universidad de Costa Rica), Endowed Associate Professor of Graphic Design, 2021.
Hogan, Adam S., M.A, M.F.A (Washington University in St. Louis), Assistant Professor, 2014.
Hulen, Jeannie, M.F.A. (Louisiana State University), B.F.A. (Kansas City Art Institute), Professor, 2002, 2018.
Issa, Nadia, Ph.D. (Academy of Fine Arts in Warsaw), Teaching Assistant Professor, 2022.
Jacobs, Lynn Frances, Ph.D., M.A. (New York University), B.A.
(Princeton University), Distinguished Professor, 1989, 2016.
Joseph, Qwist, M.F.A. (University of Nebraska-Lincoln), Instructor, 2022.
King, Sam, M.F.A. (Indiana University at Bloomington), B.F.A. (University of Tulsa), Assistant Professor, 2011, 2016.
Lane, Marty Maxwell, M.G.D. (North Carolina State University), B.F.A. (University of Illinois at Chicago), Associate Professor, 2014, 2019.
LaPorte, Angela M., Ph.D. (Pennsylvania State University), M.A. (Arizona
State University), B.S. (La Roche College), Professor, 1998, 2016.
Lee, Oh Mee, M.A. (University of Oregon), Visiting Assistant Professor, 2019.

Levenson, Abra, Ph.D., M.A.(Princeton), B.A. (University of California, Berkeley), Assistant Professor, 2018.

Lopez, Linda Nguyen, M.F.A. (University of Colorado-Boulder), B.F.A. (California State University-Chico), Instructor, 2012.
McConnell, Mathew S., M.F.A. (University of Colorado-Boulder), B.F.A.
(Valdosta State University), Associate Professor, 2011, 2016.
McMahon, Bree, M.A., B.A. (North Carolina State University), Assistant Professor, 2018.
Mitchell, Marc E., M.F.A. (Boston University), Associate Professor, 2014, 2019.

Murff, Zora J., M.F.A. (University of Nebraska), Assistant Professor, 2018.

Place, Alison L., M.F.A (Miami University), Assistant Professor, 2017.
Posnak, Adam, M.F.A (Louisiana State University and A\&M College), Instructor, 2010.
Pulido Rull, Ana, Ph.D., M.A. (Harvard University), B.A. (National
Autonomous University of Mexico), Associate Professor, 2012, 2018.
Richards, Kat, M.F.A. (University of Arkansas), B.A. (University of Kansas), Visiting Assistant Professor, 2022.
Salas, Alexis, Ph.D. (University of Texas at Austin), Endowed Assistant Professor, 2022.
Schmitt, Jean, M.F.A. (Vermont College), B.F.A. (Alfred University), Assistant Professor, 2022.
Schulte, Christopher M., Ph.D. (Pennsylvania State University), Associate Professor, 2019.
Slone, Ryan B., B.F.A (University of Arkansas), Instructor, 2001.
Springer, Bethany Lynn, M.F.A. (University of Georgia), B.A. (Virginia
Polytechnic Institute and State University), Associate Professor, 2006, 2012.

Svendgard, Madison, M.F.A. (University of Arkansas), B.F.A. (University of Nebraska), Instructor, 2022.
Sytsma, Janine A., Ph.D. (University of Wisconsin-Madison), M.A. (University of Denver), B.A. (Arizona State University), Assistant Professor, 2016.
Thompson, Jody, M.F.A. (University of Arkansas, Fayetteville), B.A. (McNeese State University), Instructor, 2019.
Turner, Aaron, M.F.A (Rutgers State University), B.A (University of Memphis), Research Associate, 2016.
Wilson, Nichole, M.F.A. (Northwestern University), B.F.A. (Temple University), Assistant Professor, 2020.
Wilson-Parrish, Nichelle La Von, M.F.A. (University of North Texas), B.F.A. (University of Arkansas), M.A. (University of North Texas), Instructor, 2013.
Yoon-Ramirez, Injeong, Ph.D. (University of Arizona), Assistant Professor, Endowed Chair in Art Education, 2017.
Young, Chase, M.F.A. (University of Arkansas), B.F.A. (Arizona State University, Tempe), Instructor, 2022.
Young, Rana N., M.F.A. (University of Nebraska), Visiting Assistant Professor, 2019.

## Art Education Courses

ARED 1003. Introduction to Art Education. 3 Hours.
Covers foundational theories in art education, educational psychology, and philosophy. An 18 -hour early field experience includes observation and participation in art classes in public schools and community settings. (Typically offered: Fall and Spring)
ARED 3003. Curriculum Design \& Teaching Practices in Art Education. 3 Hours.
Covers contemporary art education theories and their implication to curriculum design. Students will discuss sociocultural learning theories in relation to the artmaking process. (Typically offered: Fall and Spring)

## ARED 3013. Inclusive Art Pedagogy. 3 Hours.

This course provides future art educators with the current issues and practices necessary for teaching disabled students in an inclusive art class through inverse inclusion (rotating roles as teacher, assistant, student, and observer). It will involve readings, observations, reflections, discussion, and extensive experience applying curriculum and contemporary pedagogy to inclusive art education practice in a community-based setting. (Typically offered: Irregular)

## ARED 3013H. Honors Inclusive Art Pedagogy. 3 Hours.

Provides future art educators with the current issues and practices necessary for teaching art to students with disabilities through inverse inclusion and rotating roles as teacher, assistant, student, and observer. Focuses on contemporary pedagogy to art classroom inclusion practice in a community-based setting with service learning. Prerequisite: Honors standing. (Typically offered: Irregular)
This course is equivalent to ARED 3013.
ARED 3103. Diversity Theory \& Pedagogy. 3 Hours.
Investigates various issues of diversity and equity in relation to art and education. It discusses the application of the theories of diversity and equity into teaching, community organizing, activism, and art practices. (Typically offered: Fall, Spring and Summer)
This course is cross-listed with AAST 3103.
ARED 4003. Community Art. 3 Hours.
Covers community-based art theories, classroom learning theories, and instructional strategies. It is also a teaching practicum course for community outreach; thus, students will design curriculum, implement lesson plans, and organize a final exhibition. Includes at least 24 hours of community teaching experience.
Prerequisite: ARED 3003. (Typically offered: Spring)

## ARED 4003H. Honors Community Art. 3 Hours.

Covers community-based art theories, classroom learning theories, and instructional strategies. It is also a teaching practicum course for community outreach; thus, students will design curriculum, implement lesson plans, and organize a final exhibition. Includes at least 24 hours of community teaching experience. Prerequisite: ARED 3003 and honors standing. (Typically offered: Spring) This course is equivalent to ARED 4003.

## ARED 4633. Individual Research in Art Education. 3 Hours.

Independent study in specific areas of art education. Prerequisite: 6 hours of art education. (Typically offered: Fall and Spring)

ARED 476V. Student Teaching in Art. 6-12 Hour.
A minimum of 6 weeks will be spent in an off-campus school. During this time the student teacher will have an opportunity under supervision to observe, to teach and participate in other activities involving the school and community. Successful completion of a criminal background check required before student can begin student teaching. Prerequisite: ARTBFA major. (Typically offered: Fall and Spring)

ARED 4773. Professional Development in Art Education. 3 Hours.
Students will reflect on their art education experiences and the roles of art educators in various educational settings. This capstone course prepares students for their professional careers in K-12 schools and community settings through journaling, discussions, and teaching portfolio review. (Typically offered: Fall and Spring)
ARED 486V. Internship in Art Education. 1-3 Hour.
Offers credit for practical experience gained through internships in community-based art education including museums and/or other organizations. A report is required from the intern and field supervisor on significant accomplishments and/or progress. Prerequisite: ARED 1003. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ARED 486VH. Honors Internship in Art Education. 1-3 Hour.
Offers credit for practical experience gained through internships in community-based art education including museums and/or other organizations. A report is required from the intern and field supervisor on significant accomplishments and/or progress. Prerequisite: ARED 1003 and honors standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
This course is equivalent to ARED 486 V .
ARED 490VH. Honors Thesis in Art Education. 1-6 Hour.
Special problems in Art Education. Prerequisite: Junior standing. (Typically offered: Fall and Spring) May be repeated for up to 12 hours of degree credit.

ARED 4953. Special Topics in Art Education. 3 Hours.
Art education topics not included in regularly offered courses. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

## ARED 4953H. Honors Special Topics in Art Education. 3 Hours.

Art education topics not included in regularly offered courses. Pre- or Corequisite: ARED 3613. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
This course is equivalent to ARED 4953.

## Art History Courses

ARHS 1003. Basic Course in the Arts: Art Lecture (ACTS Equivalency = ARTA 1003). 3 Hours.

A general introduction to the visual arts. Lectures on theory and criticism, demonstrations, films, and slides. Three hours a week plus attendance at specified programs and exhibits. May not be presented toward satisfaction of the B.A. fine arts requirement by art majors. (Typically offered: Fall, Spring and Summer)

ARHS 1003H. Honors Basic Course in the Arts: Art Lecture. 3 Hours.
A general introduction to the visual arts. Lectures on theory and criticism, demonstrations, films, slides. Three hours a week plus attendance at specified programs and exhibits. May not be presented toward satisfaction of the B.A. fine arts requirement by art majors. (Typically offered: Irregular)
This course is equivalent to ARHS 1003.
ARHS 2913. Art History Survey I (ACTS Equivalency = ARTA 2003). 3 Hours. Survey of art works from Stone Age through Medieval. Completion of ARHS 2913 and ARHS 2923 satisfies the content covered in ARHS 1003 for fulfillment of the fine arts university/state core. (Typically offered: Fall and Spring)

ARHS 2923. Art History Survey II (ACTS Equivalency = ARTA 2103). 3 Hours.
Survey of art works from Renaissance to the present. Completion of ARHS 2913 and ARHS 2923 satisfies the content covered in ARHS 1003 for fulfillment of the fine arts university/state core. (Typically offered: Fall and Spring)

## ARHS 3923H. Honors Colloquium. 3 Hours.

Covers a special topic or issue. Offered as a part of the honors program. Prerequisite: honors candidacy (not restricted to candidacy in art). (Typically offered: Irregular)

## ARHS 4013. Case Studies in Art History. 3 Hours.

Provides in-depth studies of selected artists, themes, or specific groups of art works. Only offered during intersession. Prerequisite: 6 hours of ARHS courses. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

## ARHS 4013H. Honors Case Studies in Art History. 3 Hours.

Provides in-depth studies of selected artists, themes, or specific groups of art works. Only offered during intersession. Prerequisite: 6 hours of ARHS courses and honors standing. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
This course is equivalent to ARHS 4013.

## ARHS 4413. Greek Art and Archaeology. 3 Hours.

Greek Art and Archaeology focuses on how visual and material culture shaped and were shaped by Greek society (religion, politics, military, economy, gender, etc.) from the Bronze Age through the Hellenistic period. Masterpieces of Greek art are analyzed alongside the material remains of everyday Greeks in civic and domestic spaces. Prerequisite: ARHS 2913. (Typically offered: Spring and Summer Odd Years)
This course is cross-listed with CLST 4413.

## ARHS 4413H. Honors Greek Art and Archaeology. 3 Hours.

Greek Art and Archaeology focuses on how visual and material culture shaped and were shaped by Greek society (religion, politics, military, economy, gender, etc.)
from the Bronze Age through the Hellenistic period. Masterpieces of Greek art are analyzed alongside the material remains of everyday Greeks in civic and domestic spaces. Prerequisite: ARHS 2913 and honors standing. (Typically offered: Spring and Summer Odd Years)
This course is cross-listed with CLST 4413, ARHS 4413.
ARHS 4423. Roman Art and Archaeology. 3 Hours.
Roman Art and Archaeology focuses on how visual and material culture shaped and were shaped by Roman society (religion, politics, economy, gender, ethnicity, etc.) from the Iron Age through the Late Antique period. We encounter famous masterpieces, but also the material remains of everyday Romans in civic and domestic spaces. Prerequisite: ARHS 2913. (Typically offered: Spring and Summer Even Years)
This course is cross-listed with CLST 4423.

## ARHS 4423H. Honors Roman Art and Archaeology. 3 Hours.

Roman Art and Archaeology focuses on how visual and material culture shaped and were shaped by Roman society (religion, politics, economy, gender, ethnicity, etc.) from the Iron Age through the Late Antique period. We encounter famous masterpieces, but also the material remains of everyday Romans in civic and domestic spaces. Prerequisite: ARHS 2913 and honors standing. (Typically offered: Spring and Summer Even Years)
This course is cross-listed with CLST 4423, ARHS 4423.
ARHS 451V. Internship in Art History. 1-3 Hour.
Credit for practical experience gained through an internship in art history. Report required from intern and field supervisor on significant accomplishments and/or progress. Prerequisite: 9 hours of ARHS courses. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

## ARHS 4563. Pre-Columbian Art. 3 Hours.

An introduction to pre-Columbian art from Mexico (3000 BC- 1521 AD) through a survey of works of art from different media: sculpture, architecture, and mural painting. Topics examined include: sacred images, political uses of sculpture, architecture and cosmogony, as well as the relationship between the material and content. (Typically offered: Irregular)

## ARHS 4563H. Honors Pre-Columbian Art. 3 Hours.

An introduction to pre-Columbian art from Mexico (3000 BC- 1521 AD) through a survey of works of art from different media: sculpture, architecture, and mural painting. Topics examined include: sacred images, political uses of sculpture, architecture and cosmogony, as well as the relationship between the material and content. (Typically offered: Irregular)
This course is equivalent to ARHS 4563.

## ARHS 4573. Artists of New Spain. 3 Hours.

An overview of colonial art in colonial New Spain. Focused on native agency, social function of art, and cross-cultural communication. Topics include indigenous materials and techniques, the use of images in legal contexts, and ritual liturgy. Some consideration will be given to artworks from the viceroyalty of Peru. (Typically offered: Irregular)

## ARHS 4573H. Honors Artists of New Spain. 3 Hours.

An overview of colonial art in colonial New Spain. Focused on native agency, social function of art, and cross-cultural communication. Topics include indigenous materials and techniques, the use of images in legal contexts, and ritual liturgy. Some consideration will be given to artworks from the viceroyalty of Peru. (Typically offered: Irregular)
This course is equivalent to ARHS 4573.

## ARHS 4613. African Art and Society. 3 Hours.

Situates the artistic production of modern Africa (1800-present) within a sociocultural framework, taking into consideration the role of the artist, the methods of production, the relationship between form and function, and the impact of geopolitical shifts (including intercontinental trade, colonialization, and globalization) on the artistic practice. Prerequisite: ARHS 2923. (Typically offered: Irregular)

## ARHS 4613H. Honors African Art and Society. 3 Hours.

Situates the artistic production of modern Africa (1800-present) within a sociocultural framework, taking into consideration the role of the artist, the methods of production, the relationship between form and function, and the impact of geopolitical shifts (including intercontinental trade, colonialization, and globalization) on the artistic practice. Prerequisite: ARHS 2923 and honors standing. (Typically offered: Irregular)
This course is equivalent to ARHS 4613.
ARHS 4623. African American Art History. 3 Hours.
Surveys African American art from the seventeenth century to the present. It begins with a discussion of the transatlantic slave trade and it examines art produced in what Pratt terms the "contact zones." It then follows developments in African American art from the Antebellum Period to the present. Prerequisite: ARHS 2923. (Typically offered: Irregular)
This course is cross-listed with AAST 4623.

## ARHS 4623H. Honors African American Art History. 3 Hours.

Surveys African American art from the seventeenth century to the present. It begins with a discussion of the transatlantic slave trade and it examines art produced in what Pratt terms the "contact zones." It then follows developments in African American art from the Antebellum Period to the present. Prerequisite: ARHS 2923 and honors standing. (Typically offered: Irregular)
This course is cross-listed with ARHS 4623, AAST 4623.

## ARHS 4633. Contemporary African Art. 3 Hours.

Serves as a forum for the study of contemporary African art. It situates African art from the 1980s to the present within a historic context, addressing the impact of geopolitical ruptures on artistic practices, and it examines how the work operates across different intellectual, political, and geographical spheres. Prerequisite: ARHS 2923. (Typically offered: Irregular)

## ARHS 4633H. Honors Contemporary African Art. 3 Hours.

Serves as a forum for the study of contemporary African art. It situates African art from the 1980s to the present within a historic context, addressing the impact of geopolitical ruptures on artistic practices, and it examines how the work operates across different intellectual, political, and geographical spheres. Prerequisite:
ARHS 2923 and honors standing. (Typically offered: Irregular)
This course is equivalent to ARHS 4633.

## ARHS 4733. Saint Peter's and the Vatican. 3 Hours.

Examines art and the architectural history of St. Peter's Basilica in Rome from antiquity to present. Emphasis on the Renaissance/Baroque church and its early Christian predecessor. Students consider the impact of devotional practices and papal politics on the church, the Vatican Palace, and its renown artworks including the Sistine ceiling. Prerequisite: ARHS 2913 and ARHS 2923. (Typically offered: Irregular)

## ARHS 4733H. Honors Saint Peter's and the Vatican. 3 Hours.

Examines art and the architectural history of St. Peter's Basilica in Rome from antiquity to present. Emphasis on the Renaissance/Baroque church and its early Christian predecessor. Students consider the impact of devotional practices and papal politics on the church, the Vatican Palace, and its renown artworks including the Sistine ceiling. Prerequisite: ARHS 2913 and ARHS 2923 and honors standing. (Typically offered: Irregular)
This course is equivalent to ARHS 4733.

## ARHS 4753. Renaissance and Baroque Architecture. 3 Hours.

Study of Renaissance and Baroque architecture in Europe and the New World from 1400 to 1700 . With reference to an array of texts, drawings, and edifices, this course charts the evolution of a commanding Western architectural tradition with close attention to social, humanistic, and religious contexts. Prerequisite: ARHS 2923 or ARCH 4433. (Typically offered: Irregular)
ARHS 4763. Seminar in Critical Theory. 3 Hours.
Study of critical theory as it relates to problems in modern and contemporary art. Prerequisite: Nine credit hours of ARHS coursework. (Typically offered: Spring)
ARHS 4763H. Honors Seminar in Critical Theory. 3 Hours.
Study of critical theory as it relates to problems in modern and contemporary art. Prerequisite: Nine credit hours of ARHS coursework. (Typically offered: Spring) This course is equivalent to ARHS 4763.

## ARHS 4773. History of New Media Art. 3 Hours.

Examines the history of "new media" art in relation to larger shifts in technology, philosophy and politics. Beginning in the 19th century, the course explores the development of photography, film, video, performance, sound and digital art through the 20th century. Culminates with an examination of contemporary practice. Prerequisite: ARHS 2923 and 3 hours of 3000 level and above art history coursework. (Typically offered: Irregular)

## ARHS 4773H. Honors History of New Media Art. 3 Hours.

Examines the history of "new media" art in relation to larger shifts in technology, philosophy and politics. Beginning in the 19th century, the course explores the development of photography, film, video, performance, sound and digital art through the 20th century. Culminates with an examination of contemporary practice. Prerequisite: ARHS 2923, honors standing and 3 hours of 3000 level and above art history coursework. (Typically offered: Irregular)
This course is equivalent to ARHS 4773.

## ARHS 4783. Special Topics in Contemporary Art. 3 Hours.

Examines specialized topics within the field of contemporary art, with special attention to cutting-edge issues confronting artists today. Prerequisite: ARHS 2923. (Typically offered: Irregular) May be repeated for degree credit.
ARHS 4783H. Honors Special Topics in Contemporary Art. 3 Hours.
Examines specialized topics within the field of contemporary art, with special attention to cutting-edge issues confronting artists today. Prerequisite: ARHS 2923 and honors standing. (Typically offered: Irregular) May be repeated for degree credit. This course is equivalent to ARHS 4783.

ARHS 4793. Making the Museum: History, Theory and Practice. 3 Hours. Presents a broad overview of the institutional history and the contemporary professional practice of the museum world. Features numerous visiting lectures from a working professionals from the local area and nationwide institutions. Prerequisite: Any 3 credit hour, 3000 level or higher art history course. (Typically offered: Irregular)
ARHS 4813. The History of Photography. 3 Hours.
Survey of photography from 1685 to present. (Typically offered: Irregular)

## ARHS 4823. History of Graphic Design. 3 Hours.

Survey of graphic design history from 1850 to the present. Prerequisite: ARHS 2923. (Typically offered: Spring)

ARHS 4823H. Honors History of Graphic Design. 3 Hours.
Survey of graphic design history from 1850 to the present. Prerequisite: Honors standing and ARHS 2923. (Typically offered: Spring)
This course is equivalent to ARHS 4823.
ARHS 4833. Ancient Art. 3 Hours.
Study of selections from the visual arts of Mesopotamia, Egypt, Greece, or Rome. Prerequisite: ARHS 2913. (Typically offered: Irregular)

## ARHS 4843. Medieval Art. 3 Hours.

Study of Early Christian, Byzantine, Early Medieval, Romanesque, and Gothic styles. Prerequisite: ARHS 2913. (Typically offered: Irregular)

ARHS 4843H. Honors Medieval Art. 3 Hours.
Study of Early Christian, Byzantine, Early Medieval, Romanesque, and Gothic styles. Prerequisite: ARHS 2913. (Typically offered: Irregular)
This course is equivalent to ARHS 4843.
ARHS 4853. Italian Renaissance Art. 3 Hours.
Study of Proto-Renaissance, Early, High Renaissance, and Mannerist styles in Italy. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4853H. Honors Italian Renaissance Art. 3 Hours.
Study of Proto-Renaissance, Early, High Renaissance, and Mannerist styles in Italy. Prerequisite: ARHS 2923. (Typically offered: Irregular)
This course is equivalent to ARHS 4853.
ARHS 4863. Northern Renaissance Art. 3 Hours.
Study of Late Gothic and Renaissance styles in the Netherlands, Germany, and France. Prerequisite: ARHS 2923. (Typically offered: Irregular)
ARHS 4863H. Honors Northern Renaissance Art. 3 Hours.
Study of Late Gothic and Renaissance styles in the Netherlands, Germany, and
France. Prerequisite: ARHS 2923. (Typically offered: Irregular)
This course is equivalent to ARHS 4863.
ARHS 4873. Baroque Art. 3 Hours.
Study of art styles of the 17th century, primarily in Italy, Spain, France, Flanders, and the Netherlands. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4873H. Honors Baroque Art. 3 Hours.
Study of art styles of the 17th century, primarily in Italy, Spain, France, Flanders, and the Netherlands. Prerequisite: ARHS 2923. (Typically offered: Irregular)
This course is equivalent to ARHS 4873.
ARHS 4883. 18th and 19th Century European Art. 3 Hours.
Study of eighteenth- and nineteenth-century art and architecture in Europe.
Prerequisite: ARHS 2923. (Typically offered: Irregular)
ARHS 4893. 20th Century European Art. 3 Hours.
Study of the major styles and movements of the century, including Cubism, Fauvism, German Expressionism, and Surrealism. Prerequisite: ARHS 2923. (Typically offered: Irregular)
ARHS 490VH. Honors Thesis in Art History. 1-6 Hour.
Special problems in art history. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 12 hours of degree credit.

## ARHS 4913. American Art to 1860. 3 Hours.

The visual arts in the United States from Colonial times through 1860. Prerequisite: ARHS 2923. (Typically offered: Irregular)
ARHS 4913H. Honors American Art to 1860. 3 Hours.
The visual arts in the United States from Colonial times through 1860. Prerequisite: ARHS 2923. (Typically offered: Irregular)
This course is equivalent to ARHS 4913.
ARHS 4923. American Art 1860-1960. 3 Hours.
The visual arts in the United States from the onset of the American Civil War through the Cold War Era. Prerequisite: ARHS 2923. (Typically offered: Irregular)

## ARHS 4923H. Honors American Art 1860-1960. 3 Hours.

The visual arts in the United States from the onset of the American Civil War through the Cold War Era. Prerequisite: ARHS 2923. (Typically offered: Irregular) This course is equivalent to ARHS 4923.

## ARHS 4933. Contemporary Art. 3 Hours.

Study of styles and major trends in the visual arts since 1960. Prerequisite: ARHS 2923. (Typically offered: Fall)

## ARHS 4933H. Honors Contemporary Art. 3 Hours.

Study of styles and major trends in the visual arts since 1960. Prerequisite:
ARHS 2923 and ARHS 4923. (Typically offered: Fall)
This course is equivalent to ARHS 4933.

## ARHS 4953. Art Museum Studies. 3 Hours.

A survey of the history and function of the art museum and an introduction to museum work. Investigation of collections and collections management, conservation, exhibitions, education and public programs, museum management, and contemporary issues which effect the museum profession. Prerequisite: ARHS 2913 and ARHS 2923, or graduate Art MFA standing. (Typically offered: Irregular)

ARHS 4963. Individual Research in Art History. 3 Hours.
Independent study in specific areas of art history and criticism. Prerequisite: 12 hours of Art History and permission of instructor. (Typically offered: Fall and Spring)

ARHS 4973. Seminar in Art History. 3 Hours.
Special studies of periods and styles of art. Prerequisite: 9 hours of Art History. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ARHS 4983. Special Topics in Art History. 3 Hours.
Subject matter not covered in regularly offered courses, and relating to the history of art before the eighteenth century. May be repeated for different topics. Prerequisite: ARHS 2913 or ARHS 2923. (Typically offered: Irregular) May be repeated for degree credit.

## ARHS 4983H. Honors Special Topics in Art History. 3 Hours.

Subject matter not covered in regularly offered courses, and relating to the history of art before the eighteenth century. May be repeated for different topics. Prerequisite: ARHS 2913 or ARHS 2923. (Typically offered: Irregular) May be repeated for degree credit.
This course is equivalent to ARHS 4983.

## ARHS 4993. Special Topics in Modern Art. 3 Hours.

Subject matter not covered in regularly offered courses, and relating to the history of art from the nineteenth century to the present. May be repeated for different topics. Prerequisite: ARHS 2923. (Typically offered: Irregular) May be repeated for degree credit.

## ARHS 4993H. Honors Special Topics in Modern Art. 3 Hours.

Subject matter not covered in regularly offered courses, and relating to the history of art from the nineteenth century to the present. May be repeated for different topics. Prerequisite: ARHS 2923 and honors standing. (Typically offered: Irregular) May be repeated for degree credit.
This course is equivalent to ARHS 4993.

## Art Courses

ARTS 1013. Drawing for Non-majors: Observation. 3 Hours.
Designed for non-studio majors, this course investigates the complexities of drawing from direct observation. Through demonstrations, guided working time, and critiques, students will refine their own ability to translate the observed world into 2-dimensional drawn forms. Knowledge of historical and contemporary artists will compliment studio production. (Typically offered: Summer)

ARTS 1023. Drawing for Non-majors: Experimental Methods. 3 Hours. Investigates drawing as a method for creative thinking and experimental imagemaking. Introduction to a wide range of materials and processes. Content includes visual design principles, creative ideation, and related artists who challenge the role of drawing. (Typically offered: Summer)

## ARTS 1313. Two-Dimensional Design. 3 Hours.

Studio problems in the use of line, shape, texture, value, and color and their relationships. (Typically offered: Fall and Spring)

## ARTS 1323. Three-Dimensional Design. 3 Hours.

Studio problems with the elements of three-dimensional design: structure, space, form, surface, and their relationship. (Typically offered: Fall and Spring)

## ARTS 1803. Photography for Non-Majors. 3 Hours.

Addresses photography's currency within visual culture by investigating its relationship to both society and art, considering its evolution as an art form. Using a variety of tools and techniques, projects will emphasize composition, digital manipulation, and the role of intention in creating art. (Typically offered: Fall and Spring)

## ARTS 1919C. Studio Foundation I. 9 Hours.

Intensive, studio-format coursework in a variety of two-dimensional, threedimensional, and time-based media provides an introduction to fundamentals of art and design with emphasis on components of the creative process; research and critical thinking; investigation of materials; and instruction in software and fabrication techniques. 9 credit hours. Corequisite: Drill component. (Typically offered: Fall and Spring)

## ARTS 1929C. Studio Foundation II. 9 Hours.

Continuation of Studio Foundation I. Intensive intermediate studio projects in a variety of two-dimensional, three-dimensional, and time-based mediums; instruction in software and fabrication techniques; and the introduction of professional practices, including the assemblage and maintenance of a foundational portfolio; required attendance at weekly seminar. Corequisite: Drill component. Prerequisite: ARTS 1919C (Typically offered: Fall and Spring)

ARTS 3003. Drawing I: Elements. 3 Hours.
This course explores the language of drawing and its creative application. Traditional materials and methods are complemented with implicit challenges to think expansively about drawing's potential. Investigations enable each individual to learn to see with acuity and develop fine motor skills to create meaningful and accomplished drawings in different forms. Prerequisite: ARTS 1919C and ARTS 1929C; or ARTS 1013 and instructor consent. (Typically offered: Fall and Spring)

ARTS 3013. Figure Drawing I. 3 Hours.
Investigation of the human form through drawing, with special emphasis on gestural modes of working. Careful analysis of human anatomy, including internal and externally visible structures, position and movement of joints, as well as anatomical proportions and their variations among different individuals. Prerequisite: ARTS 3003 or ARTS 3103. (Typically offered: Spring)

ARTS 3023. Drawing II: Invented Images. 3 Hours.
This course investigates drawing strategies for constructing images from the starting point of imagination and invention as a means to create a body of personalized work. Special emphasis is given to the process of generating and organizing images through a wide range of drawing media, collage, color, and digital tools. Prerequisite: ARTS 3003 or GDES 2313. (Typically offered: Spring)

## ARTS 3033. Drawing II: Perceptual Studio. 3 Hours.

This course investigates drawing strategies for generating images derived from direct perceptual experience in order to create a body of personalized work. Emphasis is placed on methods for translating perceptual experience into believable and complex drawn forms. Investigations explore on-site location drawing, selfdesigned studio environments, and the use of color. Prerequisite: ARTS 3003 or GDES 2313. (Typically offered: Fall)

## ARTS 3043. Illustration: Communicating With Drawing. 3 Hours.

How to create images that carry specific, unambiguous meanings - to speak with pictures. Projects will explore various modes of visual communication and relationships to texts, including narrative, editorial and sequential illustrations. Prerequisite: ARTS 3023 or ARTS 3033 or ARTS 3403 or GDES 2313 or instructor consent. (Typically offered: Irregular)

## ARTS 3053. Drawing in the Expanded Field. 3 Hours.

A philosophical examination of the discipline of drawing through experimental works. Initial projects will question the essential aspects of drawing-ness, pushing beyond the typical materials and processes to make drawings with unusual properties. In the second half of the course, students will take on a sustained individual exploration.
Prerequisite: ARTS 3023 or ARTS 3033 or ARTS 3503 or ARTS 3813 or ARTS 3203 or ARTS 3213 or instructor consent. (Typically offered: Irregular)

## ARTS 3103. Painting I. 3 Hours.

An introduction to oil painting, focusing on painting from direct observation. Topics to be covered include: materials, palette, understanding perceptual color and color theory, and development of the painting through use of layers, value, mark-making, composition, light, and space. Prerequisite: ARTS 3013 or (ARTS 1919C and ARTS 1929C). (Typically offered: Fall and Spring)

ARTS 3123. Painting: Water Media. 3 Hours.
Introduction to materials and techniques of watercolor and acrylic painting. Form, composition, and content to be studied through observation and imagination. Traditional techniques as well as experimentation and personal expression are to be explored. Prerequisite: ARTS 3103 or ARTS 3003. (Typically offered: Irregular)

## ARTS 3133. Figure Painting. 3 Hours.

Introduction to representational and interpretive figure painting and to contemporary issues in figurative painting. The model as well as other visual sources will be used as a basis for observation, interpretation and invention. Prerequisite: ARTS 3013, ARTS 3103. (Typically offered: Irregular)

## ARTS 3143. Painting \& Digital Tools. 3 Hours.

Introduces students to hybrid working methods, between analog painting and digital processes, to produce innovative personalized imagery. Digital tools such as image software, scanners, printers, plotters and laser cutters will extend the possibilities of painting through generating source material, creating cut forms, custom stencils, manipulating and reconfiguring imagery. Prerequisite: ARTS 3103. (Typically offered: Irregular)

## ARTS 3153. Painting Perception Into Abstraction. 3 Hours.

Investigation of the abstraction of visual phenomena. Various starting points and approaches will be studied. Emphasis on the analysis of form, the creation of pictorial structure, and the conceptual basis of perceptual abstraction. Prerequisite: ARTS 3103. (Typically offered: Irregular)

## ARTS 3163. Abstract Painting. 3 Hours.

An introduction to the material, formal, and conceptual aspects of abstract painting. Projects will explore a variety of starting points for the invention of form in painting. Examines the construction of meaning in modern and contemporary abstract painting through studio work, discussion, writing assignments and lectures. Prerequisite: ARTS 3103. (Typically offered: Irregular)
ARTS 3173. Contemporary Representational Painting. 3 Hours.
Contemporary approaches to the use of imagery in painting. Projects emphasize the systematic alteration of color, form and space through strategies of reduction, omission, distortion and compositing. Prerequisite: ARTS 3103. (Typically offered: Irregular)

## ARTS 3183. Landscape Painting. 3 Hours.

Exploration of perceptual and conceptual approaches to painting the landscape. Both traditional and experimental techniques of oil painting will be studied. Includes outdoor on-site painting. Prerequisite: ARTS 3103. (Typically offered: Irregular)

ARTS 3203. Fundamentals of Modeling, Mold Making \& Casting. 3 Hours.
An introduction to fundamental additive and subtractive sculpture techniques and methods of seeing and working that give expression to material form. Beginning techniques in modeling, carving, mold making, and basic casting are demonstrated. Lectures, readings, and critiques will develop student awareness of traditional building techniques which inform contemporary sculpture practices. Prerequisite: ARTS 1323; or ARTS 1919C and ARTS 1929C. (Typically offered: Spring and Summer)

## ARTS 3213. Construction Methods I. 3 Hours.

A focus on material sensitivity through thoughtful and skillful additive approaches. Woodworking and metalworking are introduced as methods to examine structural and spatial possibilities. Through examining and questioning the interplay of form, material, technique, and content, students will develop their knowledge of traditional fabrication processes, which inform contemporary sculpture. Prerequisite: ARTS 1323; or ARTS 1919C and ARTS 1929C. (Typically offered: Fall)

## ARTS 3223. Issues in Contemporary Sculpture. 3 Hours.

An experimental lab focused on critical issues in contemporary sculpture. Students will be challenged to dissect their process of making, to question the nature of sculpture and art-making in the 21st century, and the context in which art is created, shown, and distributed. Prerequisite: ARTS 1323 or (ARTS 1919C and ARTS 1929C). (Typically offered: Fall and Summer)
ARTS 3293. Seminar in Sculpture + Experimental Media. 3 Hours.
Introduction to techniques and theories that foster new experimental forms of artistic practice and to historical and contemporary interplay between methodologies including: object making and contextual design, material history and environmental sustainability, the moving image, sound, performance, mechatronics/electronics, interactivity, digital fabrication, social practice, speculative design, and interventions in public space. Prerequisite: ARTS 1919C and ARTS 1929C. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

## ARTS 3403. Printmaking: Introduction. 3 Hours.

Introduction to the technical, formal, conceptual, and historical aspects of printmaking through methods of relief, intaglio (etching), monoprint, serigraphic (screenprinting), and lithographic printing techniques. Prerequisite: ARTS 1919C and ARTS 1929C; or ARCH 1025; or LARC 1325; or IARD 1045. (Typically offered: Fall, Spring and Summer)

## ARTS 3423. Printmaking: The Collaborative Print. 3 Hours.

Collaborative exploration in the technical, formal, conceptual, and historical aspects of lithographic printmaking processes including wet and dry media on stone and plate, photo processes, and various inking methods. Prerequisite: ARTS 3403 or ARTS 3443; or ARCH 1025; or IARD 1045; or LARC 1325. (Typically offered: Spring)

## ARTS 3433. Printmaking: Painterly Prints. 3 Hours.

Exploration in the technical, formal, conceptual, and historical aspects of monoprint and relief printmaking through traditional and current methods of woodcut, linoleum, CNC routing, digital technologies, and other methods to create small editions and unique, singular works on paper. Prerequisite: ARTS 3403; or ARCH 1025; or IARD 1045; or LARC 1325. (Typically offered: Fall)

## ARTS 3443. Printmaking: Screenprinting. 3 Hours.

Introduction to serigraphic techniques, including cut stencils, photosensitive stencils, resist methods, additive and reductive printing, and other processes. Prerequisite: ARTS 1919C and ARTS 1929C; or ARTS 3403; or ARCH 1025; or IARD 1045; or LARC 1325. (Typically offered: Fall, Spring and Summer)

## ARTS 3463. Printmaking: Digital Inquiries. 3 Hours.

Exploration of the technical, formal, and conceptual aspects of both traditional printmaking techniques and contemporary digital media and their application to contemporary art and visual culture. Prerequisite: ARTS 3403 or ARTS 3443; or ARCH 1025; or LARC 1325; or IARD 1045. (Typically offered: Spring)

## ARTS 3473. Printmaking: Publishing Power. 3 Hours.

Exploration in the technical, formal, conceptual, and historical aspects of book arts and contemporary publishing practices through various book forms, book construction, binding, design, content, letterpress printing, risograph printing, and conceptual considerations. Prerequisite: ARTS 3403 or ARTS 3443; or ARCH 1025; or IARD 1045; or LARC 1325. (Typically offered: Fall)

## ARTS 3503. Ceramics: Handbuilding I. 3 Hours.

this introductory course investigates the techniques, materials, and themes common to hand-built ceramincs. Students will also be introduced to ceramic studio processes, including clay and glaze mixing, low temperature gas and electric firing, and studio safety procedures. Prerequisite: ARTS 1013 and ARTS 1323; or ARTS 1919C and ARTS 1929C. (Typically offered: Fall and Summer)

## ARTS 3523. Ceramics: Wheelthrowing I. 3 Hours.

This introductory course investigates the techniques, materials, and themes common in wheel-thrown ceramics. Students will also be introduced to ceramic studio processes, including clay and glaze mixing, high temperature gas and electric firing, and studio safety procedures. Prerequisite: ARTS 1013 and ARTS 1323; or ARTS 1919C and ARTS 1929C. (Typically offered: Spring and Summer)

## ARTS 3533. Ceramics: Wheelthrowing II. 3 Hours.

This concept-driven intermediate-level course focuses on expanding the students' skills and knowledge of wheel-thrown and hand-built forms. Additional emphasis will be placed on clay and glaze testing, and understanding the processes of firing in electric, gas, salt/soda, and wood-firing kilns. Prerequisite: ARTS 3523. (Typically offered: Irregular)

## ARTS 3543. Ceramics: Slip-Casting. 3 Hours.

This concept-driven intermediate-level course focuses on the techniques and approaches common to ceramic slip-casting. Plaster mold-making, model development and preparation, slip mixing, and slip-casting are emphasized. Students will utilize low and high temperature gas and electric firings. Prerequisite: ARTS 3503. (Typically offered: Spring)

## ARTS 3723. Experiments in Moving Image I. 3 Hours.

An introduction to experimental video art, providing a theoretical and practical foundation for creating video for installation, performance or screen, set within a context of historical and contemporary video art and experimental film. Students will complete assignments creating new, original moving image works. Prerequisite: ARTS 1919C and ARTS 1929C. (Typically offered: Fall and Spring)

## ARTS 3733. Experiments in Sound. 3 Hours.

An introduction to experimental sound art, providing a theoretical and practical foundation for creating sound for installation, performance or composition, set within a context of historical and contemporary sound art and electroacoustic composing. Students will complete assignments creating new, original sound works. Prerequisite: ARTS 1919C and ARTS 1929C. (Typically offered: Fall)

## ARTS 3803. Photo I: Darkroom. 3 Hours.

Photography I: Darkroom is an introduction to the basics of camera operation and exposure, analog black and white film and print processing, and photographic technique and theory. An emphasis on how to communicate through photographs is pursued in assignments, critiques, slide lectures, and demonstrations. Prerequisite: ARTS 1919C and ARTS 1929C. (Typically offered: Fall and Spring)

## ARTS 3813. Photo I: Digital. 3 Hours.

Photo I: Digital starts with and expands upon the basics of digital SLR photography, editing in Adobe Lightroom, basic digital file management, and printing. This includes an introduction to the applications of composition, light, and color in photography. The course also delves into image interpretation and photographic seeing. There will be emphasis placed on communicating ideas effectively through photography as well as the ability to speak about photography analytically, formally, and conceptually. Prerequisite: ARTS 1919C and ARTS 1929C. (Typically offered: Fall and Spring)

ARTS 3823. Alternative Photographic Methods. 3 Hours.
Alternative Photographic Methods focuses on the study and practice of alternative and historic photographic processes with a special interest in how materiality influences the content of a photograph. A heavy influence is placed on experimentation as the course explores the hybridization of analog chemical processes with digital technology and contemporary content. Prerequisite: ARTS 3803 and ARTS 3813. (Typically offered: Irregular)

## ARTS 3833. Documentary Photography. 3 Hours.

This course introduces students to a variety of methods used in the area of documentary photography in order to build the conceptual and technical skills necessary to create extended projects that focus on documenting and visually exploring subjects in an in-depth manner. Discussion of Photography's tricky relationship with objectivity is explored throughout the semester. Prerequisite: ARTS 3803 and ARTS 3813. (Typically offered: Irregular)

## ARTS 3843. Studio Light. 3 Hours.

Explores the technical, creative, and professional possibilities within making photographs using controlled light in both the studio setting and on location. Emphasizes how the studio setting has been used by photographers throughout history as well as its vital role in contemporary photography. Prerequisite: ARTS 3803 and ARTS 3813. (Typically offered: Irregular)

## ARTS 3853. The Photobook. 3 Hours.

This course is based on the both the historic and contemporary relevance of the photobook as an art object. Students will learn about all aspects of producing a photobook from generating content, designing a structure, case-binding methods, fine art inkjet printing, and book construction. Special attention will be paid to sequencing photographs to convey conceptual thought and critique of those ideas. Prerequisite: ARTS 3803 and ARTS 3813. (Typically offered: Irregular)

## ARTS 3903. Arts Entrepreneurship. 3 Hours.

Explores vehicles for socially conscious, arts-based, entrepreneurial action to gain an understanding of the innovative role that the creative process plays. With a bias toward action and collaboration, students will explore creative content, viability, and social, environmental, and cultural accountability. (Typically offered: Fall)

## ARTS 3913. Social Justice and the Arts. 3 Hours.

Takes a critical look at historic and contemporary models of collaborative and interdisciplinary practices in the visual arts. Examines art as a catalyst for community impact, develops strategies for addressing the needs and goals of a specific partner, and implements support for those strategies. Service learning course. (Typically offered: Spring)

## ARTS 4003. Drawing Projects. 3 Hours.

Individual studio projects in Drawing. Each student will propose a project to pursue over the course of the semester. Prerequisite: (ARTS 3023 and ARTS 3033) or ARTS 3043 or ARTS 3053 or Studio Art BFA concentration in drawing or by Instructor permission. (Typically offered: Spring) May be repeated for up to 9 hours of degree credit.

## ARTS 404V. Special Problems in Drawing. 1-6 Hour.

Individual projects in drawing arranged with the instructor. Prerequisite: ARTS 3003. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

## ARTS 4153. Topics in Advanced Painting. 3 Hours.

Topics in advanced and experimental painting. Prerequisite: 6 hours of painting. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

## ARTS 417V. Special Problems in Painting. 1-6 Hour.

Individual technique and subject matter projects to be arranged with the instructor. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

## ARTS 4183. Contemporary Issues in Painting. 3 Hours.

Examination of concepts and themes relevant to the contemporary practice of painting, accompanied by the production of an individually determined body of work. Emphasis on studio work supplemented by research, critique, reading and writing. Pre- or Corequisite: Three hours of painting from ARTS 3123, ARTS 3133, ARTS 3153, ARTS 3163, ARTS 3173, ARTS 3183, or ARTS 4153. Prerequisite: ARTS 3103. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

## ARTS 4193. Advanced Painting. 3 Hours.

Intensive course for those art majors concentrating in painting. Extended, individually determined projects will emphasize production of a well researched, conceptually grounded and cohesive body of work. Supplemented by reading, writing and discussion of contemporary issues in painting. Pre- or Corequisite: Three hours of painting from ARTS 3123, ARTS 3133, ARTS 3153, ARTS 3163, ARTS 3173, ARTS 3183, or ARTS 4153. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

## ARTS 4203. Modeling, Mold Making, \& Casting II. 3 Hours.

Merging historical methodology and advanced technology from lost-wax metal casting to digital fabrication, a continuation of additive and subtractive techniques in modeling, carving, moldmaking, and casting. Specific problems utilizing various media are preceded by readings, lectures, and demonstrations. Prerequisite: ARTS 3203. (Typically offered: Fall)

## ARTS 4213. Mixed Media \& Spatial Context. 3 Hours.

An exploration in assemblage, installation, environmental art, light, and kinetics as they apply to contemporary sculptural language. Specific problems utilizing various media are preceded by readings, lectures, and demonstrations. Prerequisite: One course from the following: ARTS 3203 or ARTS 3213 or ARTS 3223 or ARTS 3723 or ARTS 3733. (Typically offered: Fall and Spring)

## ARTS 4223. Advanced Sculpture + Experimental Media. 3 Hours.

A directed analysis of form and its relationship to content based on the development of work in students' medium of choice. Students will acquire the technical skills needed to meet personal vision through guidance of the instructor. Research evidenced in work, discussions, and critiques is emphasized. Prerequisite: Two of the following courses: ARTS 4203, ARTS 4213, ARTS 4243, ARTS 4743, ARTS 4753, or ARTS 4783. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

## ARTS 423V. Special Problems in Sculpture. 1-6 Hour.

Individual projects in sculpture with emphasis on materials exploration. Prerequisite: ARTS 4223. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

## ARTS 4243. Construction Methods II. 3 Hours.

A deeper investigation into construction techniques to further examine structural and spatial possibilities and question the relationship between traditional and contemporary sculptural materials. Through a more profound and critical analysis of form, material, process, content, and context, construction methodology will be established as a foundation for individual practice. Prerequisite: ARTS 3213. (Typically offered: Spring)

## ARTS 4413. Printmaking: Archives \& Counter-Archives. 3 Hours.

Advanced individual exploration of institutional and non-normative archives, theories, systems, and practices to create a research-informed body of work. Prerequisite: ARTS 3403 and ARTS 3443; plus one of the following: ARTS 3423 or ARTS 3433 or ARTS 3463 or ARTS 3473. (Typically offered: Fall)
ARTS 4423. Printmaking: The Expanded Field in the Expanding Field. 3 Hours. Advanced individual and collaborative exploration of artistic production through publication, events, and happenings. Prerequisite: ARTS 3403 and ARTS 3443; plus one of the following: ARTS 3423 or ARTS 3433 or ARTS 3463 or ARTS 3473 or ARTS 4413. (Typically offered: Spring)

ARTS 4453. Printmaking: Collaborative Publishing Workshop. 3 Hours.
Advanced exploration of the inner workings of the professional publishing workshop environment through the production of a fine art print edition designed in collaboration with a visiting artist. Prerequisite: ARTS 4483 or ARTS 4413 or ARTS 4423. (Typically offered: Fall and Spring)

## ARTS 4483. Printmaking: Advanced Studio. 3 Hours.

Continued advanced study in various printmaking media with emphasis on individual technical research, development of personal imagery, and refinement of skills. Prerequisite: ARTS 3403 and ARTS 3443; plus one of the following: ARTS 3423 or ARTS 3433 or ARTS 3463 or ARTS 3473. (Typically offered: Spring)
ARTS 449V. Special Problems in Prints. 1-6 Hour.
Advanced individual study of one or more printmaking processes with emphasis on individual technical research, development of personal imagery, and refinement of skills. Prerequisite: ARTS 3403. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

## ARTS 4503. Intermediate Ceramics. 3 Hours.

Focuses on discovering and developing a personal approach to the creation of ceramic objects. Students will explore and test clay bodies, surface treatments, and firing methods while simultaneously exploring ideas, formats, contexts, and interpretations to their work. Any or all ceramic processes may be used. Pre- or corequisite: ARTS 3503 or ARTS 3523 or ARTS 3543. (Typically offered: Fall)

## ARTS 4513. Technical Ceramics. 3 Hours.

Advanced study of ceramic materials and processes. Clay composition, clay body formulation and analysis, glaze composition and formulation, firing methods (low, mid, and high-temperature gas, electric and atmospheric firings), and kiln design will be covered in depth. Prerequisite: ARTS 4503. (Typically offered: Irregular)
ARTS 4573. Advanced Ceramics. 3 Hours.
This course focuses on the generation and development of ideas and objects to form a cohesive body of work. Students will lead their own explorations, technically and conceptually, while working toward a professional-level standard of output. Any or all ceramic processes may be used. Prerequisite: ARTS 3503 and ARTS 3523 and ARTS 3543 and ARTS 4503. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.
ARTS 458V. Special Problems in Ceramics. 1-3 Hour.
Individual projects in ceramic techniques. Prerequisite: ARTS 3503 or ARTS 3523. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

## ARTS 4743. Experiments in Moving Image II. 3 Hours.

Further exploration of experimental video art, pushing the theoretical and practical foundation students build in "Experiments in Moving Image I". Expands on creating video for installation, performance or screen, set within a context of historical and contemporary video art and experimental film. Prerequisite: ARTS 1919C, ARTS 1929C and ARTS 3723. (Typically offered: Fall and Spring)

## ARTS 4753. Sound and Space. 3 Hours.

Continued exploration of experimental sound art in order to build a deeper theoretical and practical understanding of creating sound for installation, performance, or composition within a context of historical and contemporary sound art and electroacoustic composing. Prerequisite: ARTS 3733. (Typically offered: Spring)

## ARTS 4783. Critical Issues in Experimental Media Art. 3 Hours.

This course serves as a special topics course for Experimental Media Art. Students will explore a variety of contemporary critical issues and methodologies, all while building a deeper theoretical and practical understanding of creating for the twentyfirst century. Prerequisite: (ARTS 1919C or ARTS 1929C) and (ARTS 3723 or ARTS 3733). (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ARTS 4823. Advanced Digital: The Constructed Image. 3 Hours.
Advanced Digital: The Constructed Image explores processes and concepts related to creating photographs that are staged, manipulated, or constructed in some manner both through digital processing and fabricating images for the camera. Emphasis will be placed on a questioning of photographic truth and how to communicate effectively through a series of photographs. Prerequisite: ARTS 3803 and ARTS 3813. (Typically offered: Irregular)

## ARTS 4833. Large Format Photography. 3 Hours.

Large Format Photography introduces students to the $4 \times 5$ view camera and the technical processes of larger film formats. Advanced darkroom work and digital process are combined to explore professional printmaking. Projects allow students to explore concepts in depth and relate the large format camera to contemporary photographic practice. Prerequisite: ARTS 3803 and ARTS 3813. (Typically offered: Irregular)
ARTS 484V. Special Problems in Photography. 1-6 Hour.
Individual instruction for advanced undergraduates and graduate students. Special projects in photography designated by students in collaboration with faculty. Prerequisite: ARTS 3803 and (ARTS 3813 or ARTS 4823 or ARTS 4833). (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

## ARTS 4893. Advanced Projects in Photography. 3 Hours.

Emphasizes diverse aspects of recognizing and fostering individualized creative processes, critical thinking, and problem-solving skills in order to create a sustainable and professional studio practice. Prerequisite: ARTS 3803 and ARTS 3813 and Junior or Senior level standing. (Typically offered: Fall and Spring) May be repeated for up to 9 hours of degree credit.
ARTS 490VH. Honors Thesis in Studio Art. 1-6 Hour.
Special problems in studio art. Prerequisite: Junior standing. (Typically offered: Fall and Spring) May be repeated for up to 12 hours of degree credit.

## ARTS 491V. Internships in Art. 1-6 Hour.

Credit for practical experience gained through internships in studio art, gallery practices and/or art education. Report required from intern and field supervisor on significant accomplishments and/or progress. Prerequisite: Junior standing and art major. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

## ARTS 4923. Professional Development. 3 Hours.

The creation and presentation of a portfolio of work in the student's area of concentration, accompanied by creation of relevant materials for successful professional practice. Art Education students may choose ARED 476V, Student Teaching, (12 credit hours) as a substitution. Prerequisite: Art majors only. Requires junior, senior or graduate standing. (Typically offered: Fall and Spring)
ARTS 493V. Fine Arts Gallery Internship. 1-3 Hour.
Study all aspects of operating the Fine Arts Gallery. Research and preparation for exhibitions, organize and install exhibits, care of art works, create and distribute publicity, arrange interviews with newspapers, and other media. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

## ARTS 495V. Special Topics. 1-6 Hour.

May be offered in a subject not specifically covered by the courses otherwise listed. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

## ARTS 4993. Studio Art BFA Capstone. 3 Hours.

A capstone experience for graduating BFA students across all Studio Art concentrations. Provides intensive mentorship and instruction to prepare students with acute visual literacy and relevant frameworks concerning career paths in contemporary art practice, curation, and education. Prerequisite: Studio Art BFA majors only and senior standing. (Typically offered: Spring)

## Arts and Sciences (ARSC)

Deborah Korth
Assistant Dean of Fulbright College

Old Main 526/CORD 338
479-575-7661
Students may enroll in college and off-campus programs (ARSC) under special circumstances and with the approval of the Assistant Dean of Fulbright College Student Success.

## Courses

ARSC 104V. Special Topics in Student Success. 1-3 Hour.
Empowers students to explore various ARSC topics and programs under the guidance of ARSC faculty and/or advisors to advance student success. (Typically offered: Fall and Spring) May be repeated for up to 3 hours of degree credit.

ARSC 1201. Introduction to Teaching STEM Subjects. 1 Hour. This course provides a preview of what it is like to teach STEM subjects. Engaging activities that model effective teaching practices, discussions of STEM education issues, and optional school observations will help STEM majors clarify interest in teaching as a career or as an additional skill as a STEM professional. (Typically offered: Fall and Spring)
ARSC 1212. Inquiry Approach to Teaching STEM Subjects. 2 Hours.
Along with learning classroom strategies for engaging students and organizing a lesson, student pairs plan and teach three inquiry-based lessons (choice of math, science, or computer science) in a local school classroom, assess student understanding, and reflect on feedback. For STEM majors exploring teaching as an additional career option. (Typically offered: Fall and Spring)
ARSC 1600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)
ARSC 2003. Second Year Experience. 3 Hours.
Explores the purpose of a college education, the university general education objectives, and the many dimensions of wellness for sophomores who are still discovering their place at the university. Prerequisite: Sophomore standing or instructor consent. (Typically offered: Fall and Spring)

ARSC 2201. College Perspectives for Transfer Students. 1 Hour.
Develops a sense of social belonging and wellness during the transition period by encouraging critical thinking and civil engagement for transfer students. Provides peer-to-peer support and instruction. (Typically offered: Fall and Spring)
ARSC 2600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)
ARSC 3013. Fulbright College Career Connections. 3 Hours.
This course teaches students how to capitalize on their strengths, skills, experience, professional connections, and academic discipline. Key components of this course are guest lectures from on-campus and off-campus professionals, interactive group activities to practice professional skills, and the creation of an online portfolio. Prerequisite: Sophomore standing. (Typically offered: Fall and Spring)
ARSC 310V. Fulbright College Elective Internship. 1-3 Hour.
Available to students completing an internship that aligns with their career goals and/or their area of study. Credit-only course that may be repeated for up to 6 hours of elective degree credit. Prerequisite: Instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
ARSC 3203. Professional ePortfolio. 3 Hours.
Serves as a forum for the development of a professional ePortfolio, showcasing academic and co-curricular accomplishments. Intended for students exploring multiple majors or career opportunities, but can benefit any student. (Typically offered: Fall and Spring)
ARSC 3600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)
ARSC 4600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

## Asian Studies (AIST)

Ka Zeng
Chair of Studies
428 Old Main
479-575-3356
Asian Studies Website (https://fulbright.uark.edu/area-studies/asianstudies/)

Students may pursue Asian studies as a second major alongside a primary major in Fulbright College. The program also offers a minor in Asian Studies.

The Asian Studies Program draws on the strength of faculty both in the Fulbright College of Arts and Sciences and in other colleges on campus to provide resources and training in Asian languages, cultures, history, politics and economics. The program strives to provide students with a well-rounded education essential for careers in which knowledge of Asia is vital, promote interdisciplinary research on the Pacific region, and serve as a source of knowledge and expertise for the community.

## Requirements for a Combined Major in Asian Studies

Language Competence: Students must complete CHIN 2013 (or equivalent) or JAPN 2013 (or equivalent). Subject to the approval of the Director of Studies, students with language competence in one language (Chinese or Japanese) may receive some elective credit for competence level courses in the other language. Proficiency in other Asian languages may also satisfy this requirement.

In addition to the above language requirement, students must complete 21 credit hours in Asia-related courses, subject to the following conditions:

Colloquium (3-6 hours): Students must complete at least three credit hours in the interdisciplinary colloquium, AIST 4003/AIST 4003H. The AIST Colloquium may be repeated, provided the topic is different.

Electives (15-18 hours): In addition to the above requirements and the requirements for the departmental major, students must complete $15-18$ credit hours of Asia-related courses (AIST-approved electives listed below) subject to the following conditions of distribution:

1. Students must complete 6 credit hours in history (HIST) courses.
2. Students must complete 6 credit hours in social science courses chosen from economics (ECON), political science (PLSC), or sociology (SOCI).
3. Courses must be selected from at least three different departments.
4. A maximum of 9 credit hours may be submitted from a single department.
5. In addition, the following may be applied toward the major:
a. Up to six credit hours in world language courses numbered at the 3000-level or higher (such as CHIN 3003, CHIN 3033, CHIN 3103, or JAPN 3033);
b. Up to 6 credit hours in an approved study-abroad program;
c. Up to 6 credit hours in CHIN 3983 or JAPN 3983 (Special Studies)
d. Other Asia-related courses with approval of the director of Asian Studies

## Approved AIST Electives

AIST 390V Special Topics in Asian Studies1-3

CHIN/AIST 3103 Chinese Culture through Film

| CHIN 4313/ | Culture and Society in China | 3 |
| :--- | :--- | :--- |
| AIST 4323 |  |  |
| ECON 3933 | The Japanese Economic System | 3 |
| ECON 4633 | International Trade | 3 |
| HIST 3523 | Modern China | 3 |
| HIST/AIST 3533 | World War II | 3 |
| HIST/AIST 3633 | Modern Japan | 3 |
| HIST/AIST 4403 | Islam in Asia | 3 |
| JAPN 3003H |  | 3 |
| JAPN 3013H |  | 3 |
| JAPN 4313 | Language and Society of Japan | 3 |
| MUSY 4113 |  | 3 |
| PLSC/AIST 3503 | Governments and Politics of East Asia | 3 |
| PLSC/AIST 4823 | Foreign Policy of East Asia | 3 |
| SOCI/AIST 3273 | Sociology of China |  |

## Requirements for a Minor in Asian Studies

Students may earn a minor in Asian Studies by taking courses in art, anthropology, economics, geography, history, languages, sociology, political science, and literature of Asia. Students must fulfill the language requirement described below and complete 15 hours in Asia-related courses in order to earn the minor.

Language Requirement: Students must complete CHIN 2013 (or equivalent) or JAPN 2013 (or equivalent). At the discretion of the chair of studies, proficiency in other Asian languages may also satisfy this requirement.

Beyond the language requirement, students must complete 15 credit hours of approved courses, including at least three hours in the Asian Studies Colloquium (AIST 4003). The following courses may be taken in fulfillment of the elective requirements:

## Approved AIST Electives

| AIST 390V | Special Topics in Asian Studies | $1-3$ |
| :--- | :--- | ---: |
| CHIN/AIST 3103 | Chinese Culture through Film | 3 |
| CHIN 4313/ | Culture and Society in China | 3 |
| AIST 4323 |  | 3 |
| ECON 3933 | The Japanese Economic System | 3 |
| ECON 4633 | International Trade | 3 |
| HIST 3523 | Modern China | 3 |
| HIST/AIST 3533 | World War II | 3 |
| HIST/AIST 3633 | Modern Japan | 3 |
| HIST/AIST 4403 | Islam in Asia | 3 |
| JAPN 4313 | Language and Society of Japan | 3 |
| MUSY 4113 |  | 3 |
| PLSC/AIST 3503 | Governments and Politics of East Asia | 3 |
| PLSC/AIST 4823 | Foreign Policy of East Asia | 3 |
| SOCI/AIST 3273 | Sociology of China |  |

Students may also apply three hours of credit in an approved studyabroad program in an Asian country and three hours of upper-level Chinese or Japanese toward the minor.

Other courses that include Asia-specific content may be taken for credit toward the secondary major or minor with the approval of the Chair of Asian Studies.

## Minor in East Asian History and Politics

The East Asian history and political science minor is designed to enhance students' understanding of the historical and political development of East Asia, in particular China and Japan. Students must complete 15 hours in courses related to East Asian history and political science in order to earn the minor. The interdisciplinary nature of this degree will allow students to use a variety of courses on East Asia to develop their own B.A. degree and thus prepare for a career related to the region.

## Students must complete 15 hours from the following:

| Required Courses (6 hours) |  |
| :---: | :---: |
| PLSC 3503 | Governments and Politics of East Asia |
| HIST 3523 | Modern China |
| Electives |  |
| Choose any three courses |  |
| AIST 4003 or AIST 40 | Asian Studies Colloquium :Honors Asian Studies Colloquium |
| CHIN 3103 | Chinese Culture through Film |
| CHIN 4313 | Culture and Society in China |
| HIST 4403 | Islam in Asia |
| Students can Japanese lan abroad progr | apply up to 3 hours of upper level Chinese or uage courses and 3 hours in an approved study $m$ toward the minor. |

## Total Hours

15

## Courses

AIST 3103. Chinese Culture through Film. 3 Hours.
Explores Chinese culture through the lens of Chinese films with an emphasis on contemporary communicative culture. Designed to give students analytical insights into Chinese culture, especially how its language, history, philosophy, society, education, customs, family values, and gender roles shape contemporary culture and people's communication. (Typically offered: Fall and Spring)
This course is cross-listed with CHIN 3103.

## AIST 3273. Sociology of China. 3 Hours.

This class offers a sociological account of China, including both its social ethos and the experience of Chinese Americans in the United States. (Typically offered: Fall) This course is cross-listed with SOCI 3273.

AIST 3503. Government and Politics of East Asia. 3 Hours.
Comparative analysis of structures, processes, and problems of the political systems of the Democratic Republic of Vietnam, Japan, and the Peoples Republic of China.
Prerequisite: PLSC 2013. (Typically offered: Fall and Spring)
This course is cross-listed with PLSC 3503.

## AIST 3533. World War II. 3 Hours.

This course explores broad themes such as imperialism, colonialism, nationalism, transnationalism, and racism by placing WWII in the context of the build-up of tensions between China, the Japanese Empire, and the United States starting in the nineteenth century. (Typically offered: Spring)
This course is cross-listed with HIST 3533.
AIST 3633. Modern Japan. 3 Hours.
This course exposes students to the rapid transformations in Japan from the midnineteenth century through to their rise into an important player in global politics. Students will be familiarized with the narrative history of the Japanese home islands as well as the place of Japan in the context of world events and global currents. (Typically offered: Fall)
This course is cross-listed with HIST 3633.

AIST 390V. Special Topics in Asian Studies. 1-3 Hour.
Special topics in Asian Studies. May be repeated for degree credit. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

## AIST 4003. Asian Studies Colloquium. 3 Hours.

An interdepartmental colloquium with an annual change of subject, required of students in the Asian studies program. Prerequisite: Sophomore standing. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

## AIST 4003H. Honors Asian Studies Colloquium. 3 Hours.

An interdepartmental colloquium with an annual change of subject, required of students in the Asian studies program. Prerequisite: Sophomore standing. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.
This course is equivalent to AIST 4003.
AIST 4323. Culture and Society in China. 3 Hours.
Examines contemporary Chinese society and culture through the lens of language and with an emphasis on globalization. (Typically offered: Fall and Spring) This course is cross-listed with CHIN 4313.

## AIST 4403. Islam in Asia. 3 Hours.

This course will introduce students to the history and varieties of Muslim life in East Asia and Southeast Asia during the past 1,200 years. Through a comparative historical approach, it will examine themes of gender, imperialism and nationalism, religious education, pilgrimage, Islamic modernism, and religious extremism. (Typically offered: Fall)
This course is cross-listed with HIST 4403.

## AIST 4823. Foreign Policy of East Asia. 3 Hours.

This course provides an introduction to China's foreign policy at the undergraduate level. Key topics covered include the historical, domestic, and international contexts of Chinese foreign policy, China's relations with key partner countries, security strategies, foreign economic relations, and evolving role in global governance. (Typically offered: Fall)
This course is cross-listed with PLSC 4823.

## Biological Sciences (BISC)

David S. McNabb
Department Chair
601 Science-Engineering Building
479-575-3787
Email: dmcnabb@uark.edu
Michelle Evans-White
Graduate Coordinator
623 Science-Engineering Building
479-575-4706
Email: mevanswh@uark.edu
Department of Biological Sciences Website (http://fulbright.uark.edu/ departments/biology/)

The Department of Biological Sciences offers a supportive training environment across the full spectrum of biology, bridging the disciplines of cell and molecular biology, physiology, development, genetics, molecular systematics, microbiology, neurobiology, ecology, and evolutionary biology. Through course selection both within and outside the department, our students are prepared to enter research and professional training programs (health, secondary education, law, etc.) or enter careers in government and a broad range of businesses that rely on a technologyliterate workforce with analytical and problem-solving skills.

For information on advanced degrees in biology, see the Graduate School Catalog (http://catalog.uark.edu/graduatecatalog/programsofstudy/ biologicalsciencesbisc/).

## University and College Requirements for a Bachelor of Science in Biology

In addition to the Fulbright College of Arts and Sciences graduation requirements (see under Degree Completion Program Policy), the following course requirements must be met.

State minimum core (p. 81) requirements may vary by individual, based on placement and previous course credit earned. Once all core requirements are met, students may substitute with general electives in consultation with their academic advisor.
State Minimum Core ..... 35
Mathematics ..... 4MATH 2554 Calculus I (ACTS Equivalency = MATH 2405)Statistics3-4
Choose one statistics (STAT) course from the following:

STAT 2303 Principles of Statistics (ACTS Equivalency = MATH 2103)

STAT 2823 Biostatistics
STAT 3003 Statistical Methods
\& STAT 3001L and Statistics Methods Laboratory
Chemistry
CHEM 1103 University Chemistry I (ACTS Equivalency = \& CHEM 1101LCHEM 1414 Lecture) and University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab)
CHEM 1123 University Chemistry II (ACTS Equivalency = \& CHEM 1121LCHEM 1424 Lecture) and University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab)
CHEM 3603 Organic Chemistry I
\& CHEM 3601Land Organic Chemistry I Laboratory
CHEM 3613 Organic Chemistry II
\& CHEM 3611Land Organic Chemistry II Laboratory
CHEM 3813 Elements of Biochemistry
Physics
8
Choose one two-semester sequence from the following:
PHYS 2013 College Physics I (ACTS Equivalency = PHYS \& PHYS 2011L 2014 Lecture)
and College Physics I Laboratory (ACTS Equivalency = PHYS 2014 Lab)
PHYS 2033 College Physics II (ACTS Equivalency = PHYS
\& PHYS 2031L 2024 Lecture)
and College Physics II Laboratory (ACTS Equivalency = PHYS 2024 Lab)
-or-
PHYS 2054 University Physics I (ACTS Equivalency = PHYS 2034)

PHYS 2074 University Physics II (ACTS Equivalency $=$ PHYS 2044 Lecture)

## Philosophy

PHIL 2103 Introduction to Ethics (ACTS Equivalency = PHIL 1003)

PHIL 2203 Logic (ACTS Equivalency $=$ PHIL 1003)
PHIL 3113 Environmental Ethics
PHIL 4213 Philosophy of Science

## Biology

BIOL 1584 Biology for Majors (ACTS Equivalency = BIOL 1014 Lecture) ${ }^{1}$
BIOL 2533 Cell Biology
BIOL 2323 General Genetics
BIOL 3023 Evolutionary Biology
BIOL 3863 General Ecology
and a minimum of one lab chosen from the following:
BIOL 2531L Cell Biology Laboratory
BIOL 2321L General Genetics Laboratory
BIOL 3861L General Ecology Laboratory
At least 23 credit hours in biology (BIOL) or biology-related electives, including:

1. At least 18 credit hours in biology (BIOL) courses numbered 3000 -level or higher, of which at least 12 credit hours must be numbered 4000-level or higher.
2. At least two lab courses numbered 2000 -level or higher. This includes Biology Core labs not previously completed. Courses whose course descriptions explicitly exlude them from counting toward this requirement may not be used. Lab courses may also include BIOL 480V Special Topics in Biological Sciences and BIOL 499V Research in Biology Sciences (and their honors equivalents).
3. No more than four credit hours numbered at the 1000-level are permitted. BIOL 1543/BIOL 1541L Principles of Biology/Principles of Biology Laboratory may not apply to this requirement.
4. A biology (BIOL) course that meets the Fulbright College Writing Requirement. This may be satisfied by a) Enrolling in BIOL 498V Senior Thesis; b) completing a term paper with a grade of a 'B' or higher in a biology (BIOL) course numbered 3000 -level or higher on a topic approved by the instructor; or c) Completing an honors thesis. Students may not use a paper written for another BIOL course for BIOL 498V Senior Thesis.
Note: Biology-related electives that are not taught by the Department of Biological Sciences must be approved by a departmental faculty member using the "Exception Request for Major or Minor Requirements" form.

| General Electives | 8 |
| :--- | ---: |
| Total Hours | 120 |

1 A student who, after completing BIOL 1543/BIOL 1541L Principles of Biology/Principles of Biology Laboratory with a grade of a ' B ' or better in both courses, wishes to substitute BIOL 1543/BIOL 1541L for the required BIOL 1584 Biology for Majors may petition the Department of Biological Sciences to do so. These petitions will be considered on a case by case basis.

Writing Requirement: The college writing requirement for majors in biology may be met by one of the following:

Choose one philosophy (PHIL) course from the following:

1. Completion of an honors thesis,
2. Completion of a senior thesis (BIOL 498V) supervised by a faculty member in biological sciences,
3. Completion of a required term paper with a grade of $B$ or above in a BIOL course numbered 3000 or above on a topic approved by the instructor, or
4. Completion of a paper, supervised by a Biological Sciences faculty member, in Special Topics (BIOL 480V)

Note A student exercising Option 3 or 4 may not use the paper written for that option for credit in BIOL 498V

## B.S. in Biology

## Eight-Semester Degree Plan

Students enrolling in the eight-semester degree plan should review the Eight-Semester Degree Completion Policy (p. 67).

State minimum core requirements may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute with general electives in consultation with their academic advisor.

| First Year |  |
| :---: | :---: |

Please visit these pages in the links provided and consult with your academic advisor when making course selections to fulfill these requirements.

## Requirements for a B.A. Degree with a Major in Biology:

A minimum of 120 hours is required, including:

1. BIOL 1584 Biology for Majors. Majors may substitute another 1000level BIOL course (BIOL 1603/BIOL 1601L Principles of Zoology or BIOL 1613/BIOL 1611L Plant Biology) for BIOL 1584; a maximum of four 1000-level credits may be applied toward the major. A student who, after completing BIOL 1543/BIOL 1541L Principles of Biology/ Lab with a grade of B or better in both courses, wishes to substitute BIOL 1543/BIOL 1541L Principles of Biology for BIOL 1584 may petition the Department of Biological Sciences to do so. These petitions will be considered on a case by case basis for approval.
2. An additional 26 hours of biological sciences, including:
a. Biology Core (13 hours):

BIOL 2533 Cell Biology 3
BIOL 2323 General Genetics 3
BIOL 3023 Evolutionary Biology 3
BIOL 3863 General Ecology 3
and a minimum of one hour of Core Laboratory selected from: 1
5. Students must complete a minimum of 20 credit hours at the 3000level or higher from requirements 2,3 , and 4 listed above or from a combination of requirements 2,3 , and 4 above and from additional 3000 -level or higher BIOL upper-level electives.

Writing Requirement: The college writing requirement for majors in biology may be met by one of the following:

1. Completion of an honors thesis,
2. Completion of a senior thesis (BIOL 498V) supervised by a faculty member in biological sciences,
3. Completion of a required term paper with a grade of $B$ or above in a BIOL course numbered 3000 or above on a topic approved by the instructor, or
4. Completion of a paper, supervised by a Biological Sciences faculty member, in Special Topics (BIOL 480V)

Note A student exercising Option 3 or 4 may not use the paper written for that option for credit in BIOL 498V

## Biology B.A. <br> Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 67) for university requirements of the program. Core requirement hours may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute a three-hour (or more) general elective in place of a core area.

| First Year | Units |  |
| :---: | :---: | :---: |
|  | Fall | Spring |
| ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013) (Satisfies General Education Outcome 1.1) | 3 |  |
| Select one of the following (Satisfies General Education Outcome 2.1): ${ }^{1}$ | 3-4 |  |
| MATH 1213 Plane Trigonometry (ACTS Equivalency = MATH 1203) |  |  |
| MATH 1284C Precalculus Mathematics (ACTS Equivalency = MATH 1305) |  |  |
| MATH 2554 Calculus I (ACTS Equivalency = MATH 2405) ${ }^{3}$ |  |  |
| BIOL 1584 Biology for Majors (ACTS Equivalency = BIOL 1014 Lecture) (Satisfies General Education Outcome 3.4) | 4 |  |
| Satisfies General Education Outcome 3.4: |  |  |
| CHEM 1103 University Chemistry I (ACTS <br> Equivalency = CHEM 1414 Lecture) <br> \& CHEM 1101L University Chemistry I Laboratory <br> (ACTS Equivalency = CHEM 1414 Lab) | 4 |  |
| General Elective | 0-1 |  |
| ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023) (Satisfies General Education Outcome 1.1) |  | 3 |
| MATH 2043 Survey of Calculus (ACTS Equivalency $=$ MATH 2203) ${ }^{3}$ or MATH 2554 Calculus I (ACTS Equivalency $=$ MATH 2405) |  | 3 |

CHEM 1123 University Chemistry II (ACTS
Equivalency = CHEM 1424 Lecture)
\& CHEM 1121L University Chemistry II Laboratory
(ACTS Equivalency = CHEM 1424 Lab)
Select one of the following (Satisfies General Education Outcome 4.2:

HIST 2003 History of the American People to
1877 (ACTS Equivalency $=$ HIST 2113)
HIST 2013 History of the American People, 1877 to Present (ACTS Equivalency $=$ HIST 2123)

PLSC 2003 American National Government (ACTS Equivalency = PLSC 2003)
Fine Arts State Minimum Core (Satisfies General
Education Outcome 3.1) ${ }^{2}$
Year Total: 15

| Second Year | Fall | Units <br> Spring |
| :--- | ---: | ---: |
| BIOL 2533 Cell Biology (BIOL 2531L optional) $)^{3}$ | 3 |  |
| Select from the following: | 4 |  |

CHEM 3603 Organic Chemistry I
\& CHEM 3601L Organic Chemistry I
Laboratory ${ }^{3,4}$
or
BIOL 2323 General Genetics
\& BIOL 2321L General Genetics Laboratory ${ }^{3}$
State Minimum Core Social Sciences (Satisfies
General Education Outcome 3.3) ${ }^{5}$
State Minimum Core Social Sciences (Satisfies
General Education Outcome 3.3)(as needed) or General Elective ${ }^{5}$
General Elective (Select a course that satisfies
General Education Outcome 4.1) ${ }^{6}$
Select one of the following:
BIOL 2323 General Genetics
\& BIOL 2321L General Genetics Laboratory ${ }^{3}$
Biology elective
BIOL 3023 Evolutionary Biology ${ }^{3,4}$
Select one of the following:
CHEM 3613 Organic Chemistry II
\& CHEM 3611L Organic Chemistry II
Laboratory ${ }^{3,4}$
CHEM 2613 Organic Physiological Chemistry
(ACTS Equivalency = CHEM 1224 Lecture)
\& CHEM 2611L Organic Physiological
Chemistry Laboratory (ACTS Equivalency = CHEM 1224 Lab) ${ }^{3}$
Select one of the following:

PHIL 2103 Introduction to Ethics (ACTS
Equivalency = PHIL 1003) (Satisfies General
Education Outcomes 3.2 and 5.1)
PHIL 2203 Logic (ACTS Equivalency $=$ PHIL
1003) ${ }^{3}$

PHIL 3113 Environmental Ethics ${ }^{3,4}$
PHIL 4213 Philosophy of Science ${ }^{3,4}$

${ }^{3}$ Meets 40 -hour advanced credit hour requirement. See College Academic Regulations (p. 273).
${ }^{4}$ Meets 24 -hour rule ( 24 hours of 3000-4000 level courses in Fulbright College), in addition to meeting the 40 -hour rule. See College Academic Regulations (p. 273).
${ }^{5}$ The Social Sciences Elective courses which satisfy General Education Outcome 3.3 include:
AGEC 1103, AGEC 2103, ANTH 1023, COMM 1023, ECON 2013, ECON 2023, ECON 2143, EDST 2003, HDFS 1403, HDFS 2413, HDFS 2603, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2003, HIST 2013, HIST 2093, HUMN 1114H, HUMN 2114H, INST 2813, INST 2813H, PLSC 2003, PLSC 2013, PLSC 2203, PLSC 2813, PLSC 2813H, PSYC 2003, RESM 2853, SOCI 2013, SOCI 2013H, or SOCI 2033
${ }^{6}$ Courses which satisfy the General Education Outcome 4.1 include: AGEC 2303, AMPD 1013, ANTH 1023, ANTH 1033, ANTH 4013, ARCH 1003, CATE 3103, CLST 1003, CLST 1003H, CLST 1013,COMM 1023, GEOS 2003, GEOS 2003H, GERM 2003, HDFS 1403, HDFS 2413, HDFS 2493, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2093, HORT 1103, HRWD 4133, HUMN 1114H, HUMN 1124H, HUMN 2114H, HUMN 2213, INST 2813, INST 2813H, LALS 2013, LARC 1003, MUSY 2003, MUSY 2003H, NURS 4023, PHIL 3113, PHIL 4093, PHIL 4113, PLSC 2013, PLSC 2813, PLSC 2813H, RESM 2853, SCWK 3193, SOCI 2013, SOCI 2013H, SOCI 2033, WLIT 1113, WLIT 1123, or intermediate-level world language (usually 2003-level).
7 The Humanities Elective courses which satisfy both General Education Outcomes 3.2 and 5.1 include:
CLST 1003, CLST 1003H, CLST 1013, HUMN 1124H, PHIL 2003, PHIL 2003C, PHIL 2003H, PHIL 2103, or PHIL 2103C.
${ }^{8}$ Courses which satisfy the General Education Outcome 1.2 include: ACOM 3143, ACOM 3143H, AGED 3133, AGED 4003, CATE 4013, CATE 406X, COMM 1313, ENGL 1033, ENGL 1033H, INST 3303, INST 3503, INST 3603, INST 4603, NURS 4092, NURS 4112, or NURS 4701.

## Requirements for a Minor in Biology:

Students must complete at least 19 credit hours of BIOL courses that include:

1. BIOL 1584 Biology for Majors (ACTS Equivalency = BIOL 1014 Lecture) or BIOL 1543 Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture)/BIOL 1541L Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab)
2. Three of the four biology core courses: BIOL 2533 Cell Biology, BIOL 2323 General Genetics, BIOL 3023 Evolutionary Biology, BIOL 3863 General Ecology.
3. Two additional BIOL courses, one of which must be a BIOL course numbered 3000 or above. This may include an additional BIOL core course.

Students must notify their academic dean's office of their intent to minor in biology.

Requirements for Departmental Honors in Biology: The biological sciences honors program is designed to provide students an opportunity to investigate questions in biology through an expanded reading program and research experience. Biological science majors may apply to enter the program between the second semester of the sophomore year and the end of the junior year. Application is made through both Honors Studies (MAIN 517) and the Department of Biological Sciences
(SCEN 601). Applicants must have a 3.5 grade-point average. Students should consult with their adviser to identify and contact a potential faculty research mentor. The student's research activities will then be directed by the departmental faculty member who agrees to sponsor the student.

Students may enroll for up to four hours of credit in BIOL 499VH during the junior year and up to eight hours of credit in BIOL 499VH during the senior year. A maximum of six of these credits may be applied toward a major. Participants must complete and defend an honors thesis and take 12 hours in Honors Studies, which may include six hours of thesis. The honors thesis is based on an original research project and presented orally before a committee composed of two faculty from the biological sciences, a person from outside the biological sciences, and a representative from the Honors Council. This committee makes a recommendation concerning the award of the honors distinction to the Honors Council. Students who successfully complete the departmental honors program usually graduate as "Departmental Scholar Cum Laude." Higher degree distinctions are recommended only in exceptional cases and are based upon the candidate's entire involvement in the honors program. Completion of an honors thesis fulfills the writing requirement in biological sciences, which precludes credit for BIOL 498V (Senior Thesis) for the same body of work.

## Biology/Life Science Teacher Licensure Requirements:

Students interested in pursuing a minor in STEM Education or Secondary Teacher Licensure in mathematics, biology, chemistry, physics, or computer science at the undergraduate level should consult with a STEM Education faculty adviser, teach@uark.edu. Another option to obtain secondary teacher licensure is to complete the one-year Master of Arts in Teaching (http://catalog.uark.edu/undergraduatecatalog/ collegesandschools/jwilliamfulbrightcollegeofartsandsciences/ mathematicalsciencesmasc/graduatecatalog/programsofstudy/ teachereducation/).

## Faculty

Alrubaye, Adnan A., Ph.D., M.Ed. (University of Arkansas), M.Sc. (University of Baghdad), Assistant Professor, 2016, 2021.
Alverson, Andrew James, Ph.D. (University of Texas at Austin), M.S. (lowa State University), B.S. (Grand Valley State University), Associate Professor, 2012, 2018.
Bailey, Tameka A., Ph.D. (University of Arkansas), B.S. (University of Arkansas-Pine Bluff), Research Assistant Professor, 2017.
Beaulieu, Jeremy M., Ph.D. (Yale University), M.S., B.S. (California Polytechnic State University), Associate Professor, 2016, 2021.
Beaupre, Steven J., Ph.D. (University of Pennsylvania), M.S., B.S. (University of Wisconsin), Professor, 1995, 2006.
Catanzaro, Donald G., Ph.D. (University of Arkansas), A.B. (University of California, Los Angeles), Research Assistant Professor, 2014.
Ceballos, Ruben M., Ph.D. (University of Montana), M.A. (University of Alabama-Birmingham), B.S.(University of Alabama-Huntsville), Assistant Professor, 2016.
DeGregorio, Brett A., Ph.D. (University of Illinois at Urbana-Champaign), M.S. (Purdue University), B.S. (University of Massachusetts at Amherst), Research Associate Professor, 2019.
Douglas, Marlis R., Ph.D., M.S., B.S. (University of Zurich), Professor, Bruker Life Sciences Chair, 2012.
Douglas, Michael Edward, Ph.D. (University of Georgia), M.S., B.S. (University of Louisville), Professor, 21st Century Chair in Global Change Biology, 2011.
Du, Yuchun, Ph.D. (Kagoshima University, Japan), B.S. (Shaanxi
University of Technology, China), Associate Professor, 2007, 2013.

DuRant, Sarah Elizabeth, Ph.D. (Virginia Polytechnic Institute and State University), B.S. (University of South Carolina), Associate Professor, 2017, 2021.
Durdik, Jeannine M., Ph.D. (Johns Hopkins University), B.S. (Purdue University), Professor, 1994, 2004.
Etges, William J., Ph.D. (University of Rochester), M.S. (University of Georgia), B.S. (North Carolina State University), Professor, 1987, 2004.
Evans, Timothy A., Ph.D. (Indiana University), B.S. (Slippery Rock University), Associate Professor, 2013, 2019.
Evans-White, Michelle Allayne, Ph.D. (University of Notre Dame), M.S., B.S. (Kansas State University), Professor, 2008, 2018.

Forbes, Kristian M., Ph.D. (University of Jyväskylä), M.P.H. (Latrobe University), B.Sc. (Latrobe University), Assistant Professor, 2018.
Henry, Ralph Leroy, Ph.D., M.S. (Kansas State University), B.S.E. (University of Kansas), Distinguished Professor, W.M. Keck Endowed Professorship, 1996, 2012.
Ivey, Mack, Ph.D., B.S. (University of Georgia), Associate Professor, 1992, 1998.
Iyer, Shilpa, Ph.D. (University of Georgia), M.Sc., B.Sc. (University of Pune, India), Assistant Professor, 2016.
Kral, Timothy Alan, Ph.D. (University of Florida), B.S. (John Carroll University), Professor, 1981, 2008.
Lehmann, Michael Herbert, Ph.D., Diploma in Biology (Philipps University of Marburg, Germany), Professor, 2002, 2018.
Lessner, Daniel J., Ph.D. (University of lowa), B.S. (University of Wisconsin-Stevens Point), Professor, 2008, 2020.
Lessner, Faith H., Ph.D. (University of lowa), B.S. (Cornell University), Teaching Assistant Professor, 2016, 2018.
Lewis, Jeffrey A., Ph.D. (University of Wisconsin-Madison), B.S. (University of California-Santa Barbara), Associate Professor, 2013, 2020. Lorince, Tammy, M.A., B.S. (University of Arkansas), Instructor, 2000. Magoulick, Daniel D., Ph.D. (University of Pittsburgh), M.S. (Eastern Michigan University), B.S. (Michigan State University), Research Professor, 2000, 2010.
McNabb, David S., Ph.D. (Louisiana State University Health Sciences Center), B.S. (University of Texas at Arlington), Associate Professor, 2000, 2006.
Mortensen, Jennifer, Ph.D. (Tufts University), M.S. (Villanova
University), Teaching Assistant Professor, 2019.
Naithani, Kusum, Ph.D. (University of Wyoming), M.Sc. (G.B. Pant University of Agriculture and Technology-India), B.Sc. (University of Lucknow-India), Associate Professor, 2014, 2021.
Nakanishi, Nagayasu, Ph.D. (University of California, Los Angeles), B.S. (University of California, San Diego), Assistant Professor, 2017.
Ortega, Jason, M.S. (University of Texas-Pan American), B.S. (Cornell University), Instructor, 2019.
Paré, Adam C., Ph.D. (University of California, San Diego), B.S. (Cornell University), Assistant Professor, 2019.
Pinto, Ines, Ph.D. (Louisiana State University Health Sciences Center), M.S., B.S. (University of Chile), Associate Professor, 2000, 2006.

Rhoads, Douglas Duane, Ph.D. (Kansas State University), M.A., B.A. (Wichita State University), University Professor, 1990, 2006.
Shadwick, John D.L., M.S. (University of Arkansas), B.S. (University of Central Arkansas), Instructor, 2011.
Siepielski, Adam M., Ph.D. (University of Wyoming-Laramie), M.S. (New Mexico State University), B.S. (Pennsylvania State University-University Park), Associate Professor, 2015, 2019.
Stephenson, Steven Lee, Ph.D., M.S. (Virginia Polytechnic Institute and State University), B.S. (Lynchburg College), Research Professor, 2003.
Tipsmark, Christian K., Ph.D., M.S. (University of Southern Denmark), Associate Professor, 2010, 2016.

Walker, James M., Ph.D. (University of Colorado-Boulder), M.S., B.S. (Louisiana Polytechnic Institute), Professor, 1965.
Walker, Kate Ireton, M.S. (University of Arkansas), B.S. (Kansas State University), Instructor, 2014.
Westerman, Erica L., Ph.D. (Yale University), M.Sc. (University of New Hampshire), B.S. (Yale University), Assistant Professor, 2016.
Willson, John David, Ph.D. (University of Georgia), B.S. (Davidson College), Associate Professor, 2012, 2018.
Zhuang, Xuan, Ph.D. (University of Illinois Urbana-Champaign), Assistant Professor, 2021.

## Courses

BIOL 1524. Biological Principles (ACTS Equivalency = BIOL 1004 Lecture). 4 Hours.
Integrated lecture and laboratory focusing on the overriding principles of Biology. Designed to convey biological reasoning to non-science majors. May not count as prerequisite for advanced courses in BIOL. Corequisite: Lab component. (Typically offered: Fall, Spring and Summer)
BIOL 1541L. Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab). 1 Hour.
Experimental and observational techniques used in biology with emphasis on the acquisition and interpretation of results that illustrate major biological principles.
Corequisite: BIOL 1543. (Typically offered: Fall, Spring and Summer)
BIOL 1541M. Honors Principles of Biology Laboratory. 1 Hour.
This course is designed for the well prepared student in the Honors program. It focuses on teaching students experimental and observational techniques used in the science of biology. It emphasizes the acquisition and interpretation of results that illustrate the major principles of biology. Corequisite: BIOL 1543H or BIOL 1543. (Typically offered: Fall and Spring)
This course is equivalent to BIOL 1541 L .
BIOL 1543. Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture). 3 Hours.
Principles that unify biology with emphasis on scientific study that demonstrates how all organisms are the product of evolution and are parts of interacting systems from the molecular to the ecosystem level. Corequisite: BIOL 1541L. (Typically offered: Fall, Spring and Summer)
BIOL 1584. Biology for Majors (ACTS Equivalency = BIOL 1014 Lecture). 4 Hours.
Integrated lecture and laboratory course designed to prepare Biology Majors to enter the rest of the Biology Core of Cell Biology, General Genetics, Evolutionary Biology, and General Ecology. Pre- or Corequisite: CHEM 1103 or CHEM 1203. (Typically offered: Fall and Spring)

BIOL 1601L. Principles of Zoology Laboratory (ACTS Equivalency = BIOL 1054 Lab). 1 Hour.
Laboratory exercises illustrating animal structure, physiology, genetics, and ecology. Corequisite: BIOL 1603. (Typically offered: Fall and Summer)
BIOL 1603. Principles of Zoology (ACTS Equivalency = BIOL 1054 Lecture). 3 Hours.
Introduction to zoological principles relating to cells, organ systems, development, genetics, ecology, and animal phyla. Corequisite: BIOL 1601L. Prerequisite:
BIOL 1584 or BIOL 1543 and BIOL 1541L. (Typically offered: Fall and Summer)
BIOL 1611L. Plant Biology Laboratory (ACTS Equivalency = BIOL 1034 Lab). 1 Hour.
Plant biology lab. Pre- or Corequisite: BIOL 1613. (Typically offered: Spring and Summer)

BIOL 1613. Plant Biology (ACTS Equivalency = BIOL 1034 Lecture). 3 Hours. Consideration of basic flowering plant structure, growth, development, physiology, genetics, ecology, and a brief survey of other plant groups. Lecture 3 hours per week. BIOL 1611 L is recommended as a corequisite and both are required for partial fulfillment of the Fulbright College natural sciences requirement. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L. (Typically offered: Spring and Summer)

BIOL 1693. Biology Bridges. 3 Hours.
Prepares students for advanced biology courses including genetics, cell biology, ecology, and evolutionary biology, among others. Synthesizes sub-disciplines within biology using the underlying concepts of evolutionary theory found in scientific literature. Prerequisite: BIOL 1543 or BIOL 1584. (Typically offered: Spring)

BIOL 2011L. General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab). 1 Hour.
Techniques for handling microorganisms. Does not count toward BS in Biology. Corequisite: BIOL 2013. (Typically offered: Fall, Spring and Summer)

BIOL 2011M. Honors General Microbiology Laboratory. 1 Hour.
Techniques for handling microorganisms. Does not count towards BS in Biology. Corequisite: BIOL 2013. (Typically offered: Fall, Spring and Summer)
This course is equivalent to BIOL 2011L
BIOL 2013. General Microbiology (ACTS Equivalency = BIOL 2004 Lecture). 3 Hours.
Basic concepts of microbiology including diversity, genetics, metabolism, growth, control of growth, pathogenesis, and immunology. Does not count towards BS in Biology. Corequisite: BIOL 2011L. Prerequisite: (BIOL 1543 and BIOL 1541L) or BIOL 1584)) and (CHEM 1073 and CHEM 1071L or CHEM 1103 or CHEM 1123 and CHEM 1121L or CHEM 1203 and CHEM 1201L). (Typically offered: Fall, Spring and Summer)

BIOL 2211L. Human Physiology Laboratory (ACTS Equivalency = BIOL 2414 Lab). 1 Hour.
Exercises include experiments on osmosis, reflexes, senses, muscle, cardiovascular system, ventilation, metabolism, renal function, etc. Data collection, analysis, and report writing. Does not satisfy the Fulbright College writing requirement. Does not count toward BS in Biology. Corequisite: BIOL 2213. (Typically offered: Fall and Spring)

BIOL 2213. Human Physiology (ACTS Equivalency = BIOL 2414 Lecture). 3 Hours.
Fundamental concepts of physiology with emphasis in the human. Does not count toward BS in Biology. Corequisite: BIOL 2211L. Prerequisite: (CHEM 1073 and CHEM 1071L) or (CHEM 1103) or (CHEM 1123 and CHEM 1121L) and MATH 1203. (Typically offered: Fall and Spring)

BIOL 2321L. General Genetics Laboratory. 1 Hour.
Analysis of genetic problems and experiments with emphasis on "hands-on" experience with a variety of organisms. May require time outside laboratory period. Laboratory 3 hours per week. Pre- or Corequisite: BIOL 2323. (Typically offered: Fall and Spring)

## BIOL 2323. General Genetics. 3 Hours.

Surveys of Mendelian, molecular, and population mechanisms of inheritance and gene expression in prokaryotes and eukaryotes. Lecture 3 hours per week. Prerequisite: (BIOL 1584 or BIOL 1543 and BIOL 1541L) and (CHEM 1103 or CHEM 1203) and (MATH 1203 or higher or STAT 2823 or STAT 2303 or equivalent). (Typically offered: Fall and Spring)

BIOL 2441L. Human Anatomy Laboratory (ACTS Equivalency = BIOL 2404 Lab). 1 Hour.

Laboratory 3 hours exercises in mammalian anatomy. Cannot be taken without prior credit in BIOL 2443 or concurrent enrollment in BIOL 2443. Does not count toward BS in Biology. Corequisite: BIOL 2443. (Typically offered: Fall, Spring and Summer)

BIOL 2443. Human Anatomy (ACTS Equivalency = BIOL 2404 Lecture). 3 Hours.
Description of human body as a series of organ systems and their interrelationships. Does not count towards BS in Biology. Corequisite: BIOL 2441L. Prerequisite: Four hours of biological sciences. (Typically offered: Fall, Spring and Summer)

BIOL 2531L. Cell Biology Laboratory. 1 Hour.
Introduction to methods and techniques used in Cell Biology research. Laboratory experiences to highlight topics covered in BIOL 2533. Pre- or Corequisite:
BIOL 2533. (Typically offered: Fall and Spring)
BIOL 2533. Cell Biology. 3 Hours.
Introduction to cell structure, cell processes, biological polymers, energetics, and diversity. An introduction to biochemistry and cell chemistry. Recommended:
(CHEM 1123 and CHEM 1121L) or (CHEM 1223 and CHEM 1221L) or equivalent. Prerequisite: BIOL 1584, or BIOL 1543 and BIOL 1541L. (Typically offered: Fall and Spring)

## BIOL 3001L. Principles of Plant Pathology Lab. 1 Hour.

Lab course in examination of the causes and symptoms of plant disease and the genetics of plant disease. Physiology, and ecology of host-pathogen interactions Spread of disease and principles of disease control. Pre- or Corequisite: PLPA 3003 or BIOL 3003. (Typically offered: Fall)
This course is cross-listed with PLPA 3001L
BIOL 3003. Principles of Plant Pathology. 3 Hours.
Examination of the causes and symptoms of plant disease and the genetics of plant disease. Physiology, and ecology of host-pathogen interactions. Spread of disease and principles of disease control. (Typically offered: Fall)
This course is cross-listed with PLPA 3003.
BIOL 3011L. Introduction to Insect Identification Lab. 1 Hour.
Introductory lab course on insect identification, collection, and curation techniques, primarily designed as an intensive add-on to BIOL 3013 for students wanting a more in-depth examination of insect diversity. Insect collection required. Course includes field trips. Students are encouraged to contact instructor before enrolling. Pre- or corequisite: BIOL 3013. (Typically offered: Fall)
This course is cross-listed with ENTO 3011L.
BIOL 3013. Introduction to Entomology. 3 Hours.
Fundamentals of insect biology including structure and function, development, ecology, behavior, plant feeding and disease transmission. Lecture 3 hours/week. Students interested in a more intensive examination of insects, including collection, curation, and identification techniques, should sign up for the separate one credit lab BIOL 3011L. Students are strongly encouraged to take BIOL 1543 before registering for this course. (Typically offered: Fall)
This course is cross-listed with ENTO 3013.

## BIOL 3023. Evolutionary Biology. 3 Hours.

An introduction to the mechanisms and patterns of evolutionary change. Seeks to develop logical, scientific skills and to apply them in understanding how life has changed during the history of the earth. Corequisite: Drill component. Prerequisite: (BIOL 1584 or BIOL 1543, BIOL 1541L) and BIOL 2323. (Typically offered: Fall and Spring)

BIOL 3043. Bones, Bodies, and Brains in Evolutionary Perspective. 3 Hours. Reviews the anatomy of the human body, comparing this anatomy with primates mammals, and vertebrates, and it will consider how the major features of the human body emerged throughout evolution. (Typically offered: Spring)
This course is cross-listed with ANTH 3043.
BIOL 3123H. Honors Prokaryote Biology. 3 Hours.
An in-depth coverage of prokaryote diversity, genetics, metabolism, growth, structures and functions. Prerequisite: BIOL 2533. (Typically offered: Spring)

BIOL 3273. Inquiry and Modeling in Science Education. 3 Hours.
Study of science practices with emphasis on modeling and inquiry for learning/ teaching. Includes practical, philosophical, cognitive, and disciplinary specific dimensions of doing science in academic and nonacademic settings. Includes planning and implementing multiple scientific inquiries, engaging in reflective practices, writing and presenting scientific information. Safety and ethical issues are included. Prerequisite: 8 hours of BIOL courses. Corequisite: Drill component. (Typically offered: Fall)
This course is cross-listed with PHYS 3273, CHEM 3273.

## BIOL 3404. Comparative Vertebrate Morphology. 4 Hours.

Anatomy of selected vertebrate animals with emphasis upon homologous structures in various animal groups. The recommended anatomy course for Biology BS majors. Lecture 2 or 3 hours, laboratory 4 or 6 hours per week. Corequisite: Lab component. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L. (Typically offered: Fall and Spring)

## BIOL 3861L. General Ecology Laboratory. 1 Hour.

General ecology lab. Pre- or Corequisite: BIOL 3863. (Typically offered: Fall)

## BIOL 3863. General Ecology. 3 Hours.

Ecological principles and concepts; environmental factors and interactions that determine distribution and abundance of organisms. Prerequisite: 7 hours of biological science. (Typically offered: Fall and Spring)

## BIOL 3923H. Honors Colloquium. 3 Hours.

Covers a special topic or issue, offered as part of the honors program. Prerequisite: honors candidacy (not restricted to candidacy in biological sciences). (Typically offered: Irregular) May be repeated for degree credit.

## BIOL 4003L. Laboratory in Prokaryote Biology. 3 Hours.

Laboratory techniques in prokaryote culture, identification, physiology, metabolism, and genetics. Laboratory 6 hours per week. Prerequisite: BIOL 3123. (Typically offered: Fall and Spring)
BIOL 4013. Insect Behavior and Chemical Ecology. 3 Hours.
Basic concepts in insect senses and patterns of behavioral responses to various environmental stimuli. Previous knowledge of basic entomology is helpful, but not required. Lecture 2 hours, laboratory/discussion 2 hours per week. Corequisite: Lab component. (Typically offered: Spring Even Years)
This course is cross-listed with ENTO 4013.
BIOL 4024. Insect Diversity and Taxonomy. 4 Hours.
Principles and practices of insect classification and identification with emphasis on adult insects. Corequisite: Lab component. Prerequisite: ENTO 3013. (Typically offered: Fall Even Years)
This course is cross-listed with ENTO 4024.

## BIOL 4043. Prokaryote Biology. 3 Hours.

An in-depth coverage of prokaryote diversity, genetics, metabolism, growth, structures and functions. Prerequisite: BIOL 2533. (Typically offered: Spring)

## BIOL 4053. Insect Ecology. 3 Hours.

To develop understanding of important ecological concepts through study of dynamic relationships among insects and their environment. To become familiar with the literature of insect ecology, and interpretation and critique of ecological research. Previous knowledge of basic entomology and/or ecology will be assumed. Corequisite: Lab component. (Typically offered: Fall Even Years) This course is cross-listed with ENTO 4053.

## BIOL 4104. Taxonomy of Flowering Plants. 4 Hours.

Identifying, naming, and classifying of wildflowers, weeds, trees, and other flowering plants. Emphasis is on the practical aspects of plant identification. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 1613 and BIOL 1611L and BIOL 2323 and BIOL 3023. (Typically offered: Spring)

BIOL 4114. Dendrology. 4 Hours.
Morphology, classification, geographic distribution, and ecology of woody plants. Lecture 3 hours, laboratory 3 hours per week, and fieldtrips. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Fall)

## BIOL 4122. Food Microbiology. 2 Hours.

The study of food microbiology including classification/taxonomy, contamination, preservation and spoilage of different kinds of foods, pathogenic microorganisms, food poisoning, sanitation, control and inspection and beneficial uses of microorganisms. Prerequisite: BIOL 2013 and BIOL 2011L or BIOL 2533. (Typically offered: Fall)
This course is cross-listed with FDSC 4122.

## BIOL 4133. Plant Disease Control. 3 Hours.

Principles, methods and mechanics of plant disease control. Emphasis is given to the integration of control measures and epidemiology of plant diseases. Lecture 3 hours per week. Prerequisite: PLPA 3003. (Typically offered: Fall)
This course is cross-listed with PLPA 4223.

## BIOL 4153. Biology of Global Change. 3 Hours.

Covers impact of global change on sustainability and adaptability of biological systems. Corequisite: BIOL 4252. Prerequisite: (BIOL 1543 and BIOL 1541L) or BIOL 1584. (Typically offered: Spring)

## BIOL 4163. Dynamic Models in Biology. 3 Hours.

Mathematical and computational techniques for developing, executing, and analyzing dynamic models arising in the biological sciences. Both discrete and continuous time models are studied. Applications include population dynamics, cellular dynamics, and the spread of infectious diseases. Prerequisite: MATH 2554. (Typically offered: Irregular)
This course is cross-listed with MATH 4163.

## BIOL 4174. Conservation Genetics. 4 Hours.

Covers concepts of biodiversity identification and illustrates how genetic data are generated and analyzed to conserve and restore biological diversity. Corequisite: Lab component and drill. Prerequisite: BIOL 3023, BIOL 3863 and STAT 2823 (or equivalent), and Junior standing. (Typically offered: Spring)
BIOL 4213. Biological Regulation and Subcellular Communication. 3 Hours. Combines lectures, review of primary literature, student presentations, and small group discussions to explore a diversity of topics related to mechanisms of biological regulation and subcellular communication. Prerequisite: BIOL 2323 and BIOL 2533. (Typically offered: Irregular)

## BIOL 4223. Bacterial Lifestyles. 3 Hours.

Introduces students to bacteria as prokaryotic organisms, different from eukaryotes such as plants and animals. Model microbial systems will be studied to identify unique strategies that bacteria employ to thrive in their respective environments or develop special adaptations to harsh environments. Prerequisite: BIOL 2013 and BIOL 2011L or BIOL 3123. (Typically offered: Spring Odd Years) This course is cross-listed with PLPA 4123.

## BIOL 4233. Genomics and Bioinformatics. 3 Hours.

Principles of molecular and computational analyses of genomes. Prerequisite: BIOL 2533 and BIOL 2323. (Typically offered: Spring)

## BIOL 4234. Comparative Physiology. 4 Hours.

Comparison of fundamental physiological mechanisms in various animal groups. Adaptations to environmental factors at both the organismal and cellular levels are emphasized. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 2533 and CHEM 3613 and (CHEM 3611L or CHEM 3612M). (Typically offered: Fall)
BIOL 4241L. Ichthyology Laboratory. 1 Hour.
Practical application of fish identification based on anatomy, fish sampling methods, and curation of fish specimen. Laboratory component of BIOL 4243. Corequisite: BIOL 4243. (Typically offered: Spring Odd Years)

## BIOL 4241M. Honors Ichthyology Laboratory. 1 Hour.

Practical application of fish identification based on anatomy, fish sampling methods, and curation of fish specimen. Laboratory component of BIOL 4243H. Prerequisite: Honors standing. Corequisite: BIOL 4243H. (Typically offered: Spring Odd Years) This course is equivalent to BIOL 4241L.

BIOL 4243. Ichthyology. 3 Hours.
Comprehensive overview of the diversity of fishes. Covers anatomy, physiology, evolution, taxonomy, ecology, behavior, zoogeography and conservation of marine and freshwater fishes. Lecture 3 hours per week. Prerequisite: Eight credits in Biology. Corequisite: BIOL 4241L. (Typically offered: Spring Odd Years)

## BIOL 4243H. Honors Ichthyology. 3 Hours.

Comprehensive overview of the diversity of fishes. Covers anatomy, physiology, evolution, taxonomy, ecology, behavior, zoogeography and conservation of marine and freshwater fishes. Lecture 3 hours per week. Prerequisite: Eight credits in Biology and honors standing. Corequisite: BIOL 4241L. (Typically offered: Spring Odd Years)
This course is equivalent to BIOL 4243.

## BIOL 4252. Biology of Global Change Seminar. 2 Hours.

Readings, essays, and group discussions that parallel the 27 lectures in BIOL 4153 and which dissect the resulting impacts of global change on sustainability and adaptability of biological systems. Corequisite: BIOL 4153. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L. (Typically offered: Spring)

## BIOL 4252H. Honors Biology of Global Change Seminar. 2 Hours.

Readings, essays, and group discussions that parallel the 27 lectures in BIOL 4153 and which dissect the resulting impacts of global change on sustainability and adaptability of biological systems. Corequisite: BIOL 4153. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L. (Typically offered: Spring)
This course is equivalent to BIOL 4252.

## BIOL 4263. Cell Physiology. 3 Hours.

In-depth molecular coverage of cellular processes involved in growth, metabolism, transport, excitation, signalling and motility, with emphasis on function and regulation in eukaryotes, primarily animals. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3813 and PHYS 2033. (Typically offered: Fall)

BIOL 4273. Endocrinology. 3 Hours.
In endocrinology we study hormonal integration of living processes as all levels from molecule to organism. We will work with the mechanisms of hormone action, the endocrine control axes and hormones physiological role. The course will include paper discussions and student presentations on topics of special interest. Prerequisite: BIOL 2533 or equivalent. (Typically offered: Spring)

BIOL 4313. Molecular Cell Biology. 3 Hours.
In-depth molecular coverage of transcription, cell cycle, translation, and protein processing in eukaryotes and prokaryotes. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3603 and CHEM 3601L and CHEM 3613 and CHEM 3611L. (Typically offered: Spring)

## BIOL 4313H. Honors Molecular Cell Biology. 3 Hours.

In-depth molecular coverage of transcription, cell cycle, translation, and protein processing in eukaryotes and prokaryotes. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3603 and CHEM 3601L and CHEM 3613 and CHEM 3611L. (Typically offered: Spring)
This course is equivalent to BIOL 4313.

## BIOL 4323. Comparative Neurobiology. 3 Hours.

Exploration of modern research approaches to understanding the development and function of animal nervous systems, with emphasis on molecular and cellular approaches in non-human animal models commonly used in biomedical research. Format combines lectures, group discussions, and student presentations using examples from the primary neurobiology literature. Prerequisite: BIOL 2323 and BIOL 2533 or equivalents. (Typically offered: Irregular)

BIOL 4333. Biotechnology in Agriculture. 3 Hours.
Discussion of the techniques, applications, and issues of biotechnology as it is being used in modern agriculture. Coverage includes the basics of molecular biology, production of transgenic plants and animals, and new applications in the agricultural, food, and medical marketplace. Lecture and discussion, 3 hours per week. (Typically offered: Fall)
This course is cross-listed with PLPA 4333.
BIOL 4353. Ecological Genetics/Genomics. 3 Hours.
Analysis of the genetics of natural and laboratory populations with emphasis on the ecological bases of evolutionary change. Prerequisite: BIOL 2323 and BIOL 2321L and MATH 2554 and STAT 2823 or equivalents. (Typically offered: Fall Odd Years)

## BIOL 4433. Principles of Evolution. 3 Hours.

Advanced survey of the mechanisms of evolutionary change with special emphasis on advances since the Modern Synthesis. Historical, theoretical, and population genetics approaches are discussed. Recommended BIOL 3023 and BIOL 2321L and BIOL 3861L. Prerequisite: BIOL 2323 and BIOL 3863. (Typically offered: Fall Even Years)

## BIOL 4463. Physiological Ecology. 3 Hours.

Interactions between environment, physiology, and properties of individuals and populations on both evolutionary and ecological scales. Prerequisite: BIOL 3863 and BIOL 4234 and its lab component. (Typically offered: Spring Odd Years)

BIOL 4511L. Population Ecology Laboratory. 1 Hour.
Population Ecology Lab. Pre- or Corequisite: BIOL 4513. (Typically offered: Fall Even Years)

## BIOL 4513. Population Ecology. 3 Hours.

Survey of theoretical and applied aspects of population processes stressing models of growth, interspecific interactions, and adaptation to physical and biotic environments. Prerequisite: BIOL 3863. (Typically offered: Fall Even Years)

BIOL 4523. Plant Ecology. 3 Hours.
To develop understanding of important ecological concepts through study of dynamics relationships among plants and their environment. To become familiar with the literature of plant ecology, and interpretation and critique of ecological research. Prerequisite: BIOL 3863. (Typically offered: Spring Even Years)

## BIOL 4543. Developmental Biology. 3 Hours.

An analysis of the principles and mechanisms of development emphasizing the embryonic and postembryonic development of animals. Prerequisite: BIOL 2533 and BIOL 2323. (Typically offered: Irregular)

BIOL 4554. Developmental Biology with Laboratory. 4 Hours.
An analysis of the concepts of mechanisms of development emphasizing the experimental approach. Lecture 3 hours, laboratory 3 hours per week. Students may not receive degree credit for both BIOL 4543 and BIOL 4554. Corequisite: Lab component. Prerequisite: BIOL 2533 and BIOL 2323 or graduate standing. (Typically offered: Fall)

## BIOL 4563. Cancer Biology. 3 Hours.

An introduction to the fundamentals of cancer biology. Prerequisite: BIOL 2533. (Typically offered: Fall)

BIOL 4573L. Introduction to Research in Animal Development and Evolution. 3 Hours.
Provides a hands-on introduction to investigation of problems in animal development and evolution. Emphasis on comparative molecular genetic approaches using nontraditional model organisms. Prerequisite: BIOL 2323. (Typically offered: Fall)

## BIOL 4583. Genetic Engineering. 3 Hours.

Provides an overview of current methods for altering gene expression, as well as ethical concerns arising from genetic engineering. Special emphasis is placed on practical considerations and techniques necessary for implementing genetic engineering strategies. Prerequisite: BIOL 2323 and BIOL 2533. (Typically offered: Fall)

BIOL 4613. Primate Adaptation and Evolution. 3 Hours.
Introduction to the biology of the order Primates. This course considers the comparative anatomy, behavioral ecology and paleontology of our nearest living relatives. Prerequisite: BIOL 3023 or ANTH 1013. (Typically offered: Spring) This course is cross-listed with ANTH 4613.

BIOL 4693. Forest Ecology. 3 Hours.
Introduction to the various biological, ecological and historical aspects of forest communities, with particular emphasis on the forests of the central and southeastern United States. Prerequisite: BIOL 3863. (Typically offered: Irregular)

BIOL 4703. Mechanisms of Pathogenesis. 3 Hours.
A survey of the events causing human disease at the molecular, cellular and genetic levels. Seeks to develop an appreciation that both the tricks pathogens use and the body's own defenses contribute to pathology. Prerequisite: BIOL 2533. (Typically offered: Fall)

## BIOL 4711L. Basic Immunology Laboratory. 1 Hour.

Basic immunology laboratory. Corequisite: BIOL 4713. (Typically offered: Spring)

## BIOL 4713. Basic Immunology. 3 Hours.

A general overview of immunity with emphasis on the underlying cellular, molecular, and genetic events, and discussions of more specialized issues in immunology, such as disease states involving the immune system, and other interesting problems in modern immunology. Lecture 2 hours, laboratory 4 hours per week. Prerequisite: BIOL 2323 and BIOL 2533. (Typically offered: Spring)

## BIOL 4713H. Honors Basic Immunology. 3 Hours.

A general overview of Immunity with emphasis on the underlying cellular, molecular, and genetic events, and discussions of more specialized issues in Immunology, such as disease states involving the Immune system, and other interesting problems in modern Immunology. Prerequisite: BIOL 2323 and BIOL 2533. (Typically offered: Spring)
This course is equivalent to BIOL 4713.
BIOL 4723L. Laboratory in Microbial Fermentation. 3 Hours.
An inquiry-based lab focusing on the microbiology of brewing. Introduces students to laboratory techniques used in molecular ecology, microbial physiology, genetics, and brewing. Laboratory 6 hours per week. Pre- or corequisite: FDSC 2723. Prerequisite: BIOL 2013 or BIOL 2323 or BIOL 2533. (Typically offered: Fall Even Years)

## BIOL 4734. Wildlife Management Techniques. 4 Hours.

To familiarize students with techniques used in the management of wildlife populations. Students will be exposed to field methods, approaches to data analysis, experimental design, and how to write a scientific paper. Management applications will be emphasized. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Irregular)

## BIOL 4744. Fish Biology. 4 Hours.

Morphology, classification, life history, population dynamics, and natural history of fishes and fish-like vertebrates. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: 12 hours of biological science. (Typically offered: Spring Odd Years)
BIOL 4763. Ornithology. 3 Hours.
Taxonomy, morphology, physiology, behavior, and ecology of birds. Lecture, laboratory, and field work. Corequisite: Lab component. Prerequisite: BIOL 3863 (Typically offered: Spring Even Years)

## BIOL 4774. Biometry. 4 Hours.

Students learn biological statistics and experimental design by actually designing experiments and analyzing data, as well as through lecture, discussion, reading, writing, and problem solving. Lecture 3 hours, laboratory 3 hours each week. Corequisite: Lab component. Prerequisite: (STAT 2823 or STAT 2303 or equivalent) and BIOL 3863. (Typically offered: Spring Even Years)

BIOL 4793. Introduction to Neurobiology. 3 Hours.
Exploration of the neurological underpinnings of perception, action, and experience including: how sense receptors convert information in the world into electricity, how information flows through the nervous systems, how neural wiring makes vision possible, how the nervous system changes with experience, and how the system develops. Prerequisite: BIOL 2533. (Typically offered: Spring)

BIOL 480V. Special Topics in Biological Sciences. 1-6 Hour.
Consideration of new areas of biological sciences not yet treated adequately in other courses. Prerequisite: 8 hours of biological sciences. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
BIOL 480VH. Honors Special Topics in Biological Sciences. 1-6 Hour.
Consideration of new areas of biological sciences not yet treated adequately in other courses. Prerequisite: 8 hours of biological sciences. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
This course is equivalent to BIOL 480 V .

## BIOL 4833. Animal Behavior. 3 Hours.

Organization, regulation, and phylogeny of animal behavior, emphasizing diversity across animal taxa. Lecture, laboratory, and field work. Corequisite: Lab component. (Typically offered: Spring)
BIOL 4844. Community and Ecosystem Ecology. 4 Hours.
Survey of theoretical and applied aspects of community processes stressing structure, tropic dynamics, community interactions, and major community types. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Fall Odd Years)

BIOL 4863. Analysis of Animal Populations. 3 Hours.
Basic principles of design and analysis for population studies of fish and wildlife species. Students will be instructed in the use of the latest software for estimating population parameters. Focus will be on both concepts and applications.
Management applications of estimated parameters will be emphasized. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Spring Even Years)
BIOL 4873. Microbial Molecular Genetics and Informatics. 3 Hours.
Fundamentals of microbial genomics and bioinformatics. Course covers microbial genetics, genetic structure, genome organization, proteome organization, approaches for the analysis of DNA, RNA, and proteins, cellular metabolic pathways, genetic regulation, small RNA molecules, functional genomics, metagenomics, and bioinformatics approaches for analysis of microbial genomes. Prerequisite: BIOL 2323 or BIOL 2533. (Typically offered: Fall)
BIOL 4883. Mammalian Evolution and Osteology. 3 Hours.
Focuses on describing the evolutionary history of mammals, a group of vertebrates that include over 5,000 species in 29 orders, and will provide an overview of living species and their identifying features. Prerequisite: ANTH 1013 and ANTH 1011L, or BIOL 1543 and BIOL 1541L, or instructor consent. (Typically offered: Fall Even Years)
This course is equivalent to ANTH 4703.
BIOL 496V. Culture and Environment: Field Studies. 1-6 Hour.
May be taken by students participating in overseas study programs or other domestic field study programs approved by the department. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
BIOL 496VH. Honors Culture and Environment: Field Studies. 1-6 Hour.
May be taken by students participating in overseas study programs or other domestic field study programs approved by the department. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
This course is equivalent to BIOL 496V.
BIOL 498V. Senior Thesis. 1-6 Hour.
Senior thesis. (Typically offered: Fall, Spring and Summer)

BIOL 499V. Research In Biological Sciences. 1-4 Hour.
Research. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 8 hours of degree credit.

BIOL 499VH. Honors Research in Biological Sciences. 1-4 Hour. Honors research. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 8 hours of degree credit. This course is equivalent to BIOL 499V.

## Chemistry and Biochemistry (CHBC)

Department of Chemistry and Biochemistry Website (http:// fulbright.uark.edu/departments/chemistry/)

The Department of Chemistry and Biochemistry offers two degree programs leading to either Bachelor of Science degree or a Bachelor of Arts degree.

The Bachelor of Science degree offers students one of three concentrations: a chemistry concentration, a biophysical concentration and a biochemistry concentration.

The Bachelor of Arts degree offers students the choice of two concentrations: a chemistry concentration and a biochemistry concentration.

Students with satisfactory performance on the chemistry proficiency exam and who completed CHEM 1123 on the Fayetteville campus with grade of "C" or better can request credit for CHEM 1103.

## Requirements for a B.S. degree with a Major in Chemistry

In addition to the University Core requirements and the Fulbright College of Arts and Sciences Graduation Requirements, the following course requirements must be met. Bolded courses from the list below may be applied to portions of the University Core requirements.

A Minimum of 40 Semester Hours in Chemistry including:
8 hours of one of the two following sequences:
CHEM 1203 Chemistry for Majors I
\& CHEM 1201Land Chemistry for Majors I Laboratory
CHEM 1223 Chemistry for Majors II
\& CHEM 1221Land Chemistry for Majors II Laboratory
or
CHEM 1103 University Chemistry I (ACTS Equivalency =
\& CHEM 1101LCHEM 1414 Lecture)
and University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab)

| CHEM 1123 <br> \& CHEM 1121 | University Chemistry II (ACTS Equivalency = LCHEM 1424 Lecture) <br> and University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab) |  |
| :---: | :---: | :---: |
| CHEM 2263 \& CHEM 2261L | Analytical Chemistry Lecture and Analytical Chemistry Laboratory | 4 |
| CHEM 3504 | Physical Chemistry I | 4 |
| CHEM 3512L | Physical Chemistry Laboratory | 2 |
| CHEM 3514 | Physical Chemistry II | 4 |
| CHEM 3703 <br> \& CHEM 3702L | Organic Chemistry I Lecture for Chemistry Majors and Organic Chemistry I Lab for Chemistry Majors | 5 |
| CHEM 3713 <br> \& CHEM 3712L | Organic Chemistry II Lecture for Chemistry Majors and Organic Chemistry II Lab for Chemistry Majors | 5 |
| CHEM 4123 | Advanced Inorganic Chemistry I | 3 |
| CHEM 4213 <br> \& CHEM 4211L | Instrumental Analysis and Instrumental Analysis Laboratory | 4 |
| CHEM 4723 | Experimental Methods in Organic Chemistry | 3 |
| And at least one | dditional Advanced Lecture course is required. | 3 |

A minimum of 18 hours of science outside of chemistry are required, including math through:

| MATH 2574 | Calculus III (ACTS Equivalency $=$ MATH 2603) <br> (Mathematics through MATH 2574) | 4 |
| :--- | :--- | :--- |
| and physics through: |  |  |

These mathematics and physics courses are prerequisites for some advanced courses and should be scheduled early in the student's program. Some work in the biological sciences is recommended.

This program meets the minimum requirements for certification by the American Chemical Society if CHEM 3813 (or CHEM 4813H/CHEM 4843H or CHEM 5813/) is included. Sample schedules may be obtained from the department of chemistry and biochemistry. Prospective students should consult a departmental adviser.

Writing Requirement: Chemistry majors will satisfy the Fulbright College writing requirement by satisfactory completion of the formal research/analytical reports required in Physical Chemistry Laboratory, CHEM 3451L or CHEM 3512L.

## Chemistry B.S. <br> Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 67) in the Academic Regulations chapter for university requirements of the program. Core requirement hours may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute a three-hour (or more) general elective in place of a core area. Students must complete at least 124 hours and this must be considered when scheduling upper-level hours in the senior year.

This program meets the minimum requirements for certification by the American Chemical Society if CHEM 3813 (or CHEM 4813H/CHEM 4843H or CHEM 5813/CHEM 5843) is included.

| First Year | Units |  |
| :---: | :---: | :---: |
|  | Fall | Spring |
| ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013) | 3 |  |
| MATH 2554 Calculus I (ACTS Equivalency = MATH 2405) ${ }^{1}$ | 4 |  |
| Select one of the following: | 4 |  |
| CHEM 1203 Chemistry for Majors I \& CHEM 1201L Chemistry for Majors I Laboratory |  |  |
| CHEM 1103 University Chemistry I (ACTS <br> Equivalency = CHEM 1414 Lecture) <br> \& CHEM 1101L University Chemistry I <br> Laboratory (ACTS Equivalency = CHEM 1414 <br> Lab) |  |  |
| University/State Core U.S. History requirement | 3 |  |
| General Elective | 3 |  |
| ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023) |  | 3 |
| MATH 2564 Calculus II (ACTS Equivalency $=$ MATH 2505) ${ }^{1}$ |  | 4 |
| Select one of the following: |  | 4 |
| CHEM 1223 Chemistry for Majors II \& CHEM 1221L Chemistry for Majors II Laboratory |  |  |
| CHEM 1123 University Chemistry II (ACTS <br> Equivalency = CHEM 1424 Lecture) <br> \& CHEM 1121L University Chemistry II <br> Laboratory (ACTS Equivalency = CHEM 1424 <br> Lab) |  |  |
| University/State Core Social Science requirement |  | 3 |
| Year Total: | 17 | 14 |
| Second Year |  | Units |
|  | Fall | Spring |
| MATH 2574 Calculus III (ACTS Equivalency = MATH 2603) ${ }^{1}$ | 4 |  |
| PHYS 2054 University Physics I (ACTS Equivalency = PHYS 2034) ${ }^{1}$ | 4 |  |
| CHEM 3703 Organic Chemistry I Lecture for Chemistry Majors \& CHEM 3702L Organic Chemistry I Lab for Chemistry Majors ${ }^{1,2}$ | 5 |  |
| University/State Core Fine Arts or Humanities requirement | 3 |  |
| PHYS 2074 University Physics II (ACTS <br> Equivalency = PHYS 2044 Lecture) ${ }^{1}$ |  | 4 |
| CHEM 3713 Organic Chemistry II Lecture for Chemistry Majors \& CHEM 3712L Organic Chemistry II Lab for Chemistry Majors ${ }^{1,2}$ |  | 5 |
| University/State Core Humanities or Fine Arts requirement (as needed) |  | 3 |
| University/State Core Social Science requirement |  | 3 |
| Year Total: | 16 | 15 |

| Third Year | Units |  |
| :---: | :---: | :---: |
|  | Fall | Spring |
| CHEM 3504 Physical Chemistry 1, ${ }^{1,2}$ | 4 |  |
| CHEM 2263 Analytical Chemistry Lecture \& CHEM 2261L Analytical Chemistry Laboratory ${ }^{1}$ | 4 |  |
| Select one of the following: | 3-4 |  |
| BIOL 1543 Principles of Biology (ACTS <br> Equivalency = BIOL 1014 Lecture) <br> \& BIOL 1541L Principles of Biology Laboratory $(\text { ACTS Equivalency }=\text { BIOL } 1014 \mathrm{Lab})^{1}$ <br> General Elective |  |  |
| University/State Core Social Science requirement | 3 |  |
| CHEM 3514 Physical Chemistry II \& CHEM 3512L Physical Chemistry Laboratory ${ }^{1,2}$ |  | 6 |
| Advanced Level Elective Course ${ }^{1}$ |  | 4 |
| Select one of the following: |  | 3-4 |
| BIOL 1543 Principles of Biology (ACTS <br> Equivalency = BIOL 1014 Lecture) <br> \& BIOL 1541L Principles of Biology Laboratory <br> (ACTS Equivalency = BIOL 1014 Lab) |  |  |
| General Elective |  |  |
| General Elective |  | 3 |
| Year Total: | 14 | 16 |
| Fourth Year |  | Units |
|  | Fall | Spring |
| CHEM 4123 Advanced Inorganic Chemistry I ${ }^{1,2}$ | 3 |  |
| CHEM 4723 Experimental Methods in Organic Chemistry ${ }^{1,2}$ | 3 |  |
| CHEM 3813 Elements of Biochemistry ${ }^{1,2}$ | 3 |  |
| CHEM Elective | 3 |  |
| General Elective | 3 |  |
| CHEM 4213 Instrumental Analysis |  | 4 |
| \& CHEM 4211L Instrumental Analysis Laboratory ${ }^{1,2}$ |  |  |
| CHEM 4853 Biochemical Techniques ${ }^{1,2}$ |  | 3 |
| General Electives (as needed to total 120) |  | 6 |
| Year Total: | 15 | 13 |

Total Units in Sequence:
${ }^{1}$ Meets 40 -hour advanced credit hour requirement. See College Academic Regulations on page 131 of this chapter
${ }^{2}$ Meets 24-hour rule (24 hours of 3000-4000 level courses in Fulbright College), in addition to meeting the 40-hour rule. See College Academic Regulations on page 131 of this chapter.

## Requirements for a B.S. degree with a Major in Chemistry, Biophysical Concentration

In addition to the University Core requirements and the Fulbright College of Arts and Sciences Graduation Requirements (see College Academic Regulations and Degree Completion Policy), the following course requirements must be met. Bolded courses from the list below may be applied to portions of the University Core requirements.

A Minimum of 43 Semester Hours in Chemistry including:
One of the following sequences:
\& CHEM 1201Land Chemistry for Majors I Laboratory
and
CHEM 1223 Chemistry for Majors II \& CHEM 1221Land Chemistry for Majors II Laboratory

CHEM 3514 Physical Chemistry II

BIOL 1543 Principles of Biology (ACTS Equivalency = \& BIOL 1541L BIOL 1014 Lecture)
and Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab)
BIOL 2533 Cell Biology
\& BIOL 2531L and Cell Biology Laboratory
And one additional lecture course numbered above 3000.
The mathematics and physics courses are prerequisites for some advanced courses and should be scheduled early in the student's program.

Total Hours

The mathematics and physics courses are prerequisites for some advanced courses and should be scheduled early in the student's program.

Writing Requirement: Chemistry majors will satisfy the Fulbright College writing requirement by satisfactory completion of the formal research/analytical reports required in Physical Chemistry Laboratory, CHEM 3451L or CHEM 3512L.

## Chemistry B.S. with Biophysical Option Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 67) in the Academic Regulations chapter for university requirements of the program. Core requirement hours may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute a three-hour (or more) general elective in place of a core area.

| First Year | Units <br> Spring |  |

## Requirements for a B.A. degree with a Major in Chemistry with Biochemistry Concentration

In addition to the University Core requirements and the Fulbright College of Arts and Sciences Graduation Requirements (see College Academic Regulations and Degree Completion Policy), the following course requirements must be met. Bolded courses from the list below may be applied to portions of the University Core requirements.

A minimum of 32 semester hours in chemistry including:
Select one of the following:
CHEM 1203 Chemistry for Majors I
\& CHEM 1201L and Chemistry for Majors I Laboratory
\& CHEM 1223 and Chemistry for Majors II
\& CHEM 1221Land Chemistry for Majors II Laboratory
CHEM 1103 University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture) (CHEM 1101L, CHEM 1123, CHEM 1121L)
CHEM 2263 Analytical Chemistry Lecture 4
\& CHEM 2261L and Analytical Chemistry Laboratory
Select one of the following:
CHEM 3453 Elements of Physical Chemistry
\& CHEM 3451L and Elements of Physical Chemistry Laboratory
CHEM 3504 Physical Chemistry I
\& CHEM 3514 and Physical Chemistry II
\& CHEM 3512Land Physical Chemistry Laboratory
Select one of the following: ..... 8
CHEM 3603 Organic Chemistry I
\& CHEM 3613 and Organic Chemistry II
CHEM 3703 Organic Chemistry I Lecture for Chemistry Majors
\& CHEM 3713 and Organic Chemistry II Lecture for Chemistry \& CHEM 3712LMajors and Organic Chemistry II Lab for Chemistry Majors

Select one of the following:
Or completion of a senior thesis based on independent research wherein at least 1 credit hour is earned in CHEM 400V (chemistry research) and/or CHEM 400VH (honors chemistry research) during each of 3 different semesters.
Select one of the following: ..... 6-7
CHEM 5813-5843 (same as CHEM 4813H-4843H)
CHEM 3813 Elements of Biochemistry
\& CHEM 4213 and Instrumental Analysis
\& CHEM 4211Land Instrumental Analysis Laboratory
CHEM 3813 Elements of Biochemistry
\& CHEM 4123 and Advanced Inorganic Chemistry I
CHEM 3813 Elements of Biochemistry
\& CHEM 4723 and Experimental Methods in Organic Chemistry
MATH $2554 \quad$ Calculus I (ACTS Equivalency = MATH 2405) ..... 4
or MATH 2043 Survey of Calculus (ACTS Equivalency = MATH2203)

Select one of the following:
PHYS 2013 College Physics I (ACTS Equivalency = PHYS
\& PHYS 2011L 2014 Lecture)
\& PHYS 2033 and College Physics I Laboratory (ACTS
\& PHYS 2031L Equivalency = PHYS 2014 Lab)
and College Physics II (ACTS Equivalency = PHYS 2024 Lecture) and College Physics II Laboratory (ACTS Equivalency = PHYS 2024 Lab)

## PHYS 2054 / PHYS 2074

Four courses from the Biological Sciences (at least 3 hours of which must be upper-level courses)
Completion of a World Language Course at the 2003 Intermediate I Level.

## Total Hours

The mathematics and physics courses are prerequisites for some advanced courses and should be scheduled early in the student's program.

Writing Requirement: Chemistry majors will satisfy the Fulbright College writing requirement by satisfactory completion of the formal research/analytical reports required in Physical Chemistry Laboratory, CHEM 3451L or CHEM 3512L.

## Chemistry B.A. with Biochemistry Option Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 67) in the Academic Regulations chapter for university requirements of the program. The following eight-
semester plan refers to additional B.A. Core requirement hours may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute a three-hour (or more) general elective in place of a core area.

University/State Core Fine Arts or Humanities 3 requirement
University/State Core Social Science requirement
CHEM 2263 Analytical Chemistry Lecture
\& CHEM 2261L Analytical Chemistry Laboratory ${ }^{1}$
Select one of the following:
PHYS 2074 University Physics II (ACTS
Equivalency = PHYS 2044 Lecture) ${ }^{1}$
PHYS 2033 College Physics II (ACTS
Equivalency = PHYS 2024 Lecture)
\& PHYS 2031L College Physics II Laboratory

$\begin{array}{lrr}\text { Third Year } & \begin{array}{r}\text { Units } \\ \text { Spring }\end{array} \\ \text { CHEM } 3703 \text { Organic Chemistry I Lecture for } & 5 & \end{array}$
Chemistry Majors
\& CHEM 3702L Organic Chemistry I Lab for

General Elective
Year Total:

| Fourth Year | FallUnits <br> Spring |  |
| :--- | ---: | ---: |
| CHEM 3813 Elty ${ }^{1,2}$ | 3 |  |

## Total Units in Sequence:

${ }^{1}$ Meets 40 -hour advanced credit hour requirement. See College Academic Regulations on page 131 of this chapter
${ }^{2}$ Meets 24-hour rule (24 hours of 3000-4000 level courses in Fulbright College), in addition to meeting the 40 -hour rule. See College Academic Regulations on page 131 of this chapter.
${ }^{3}$ Depending on placement; MATH 2043 Survey of Calculus is another option. Student may also choose to take MATH 1284C Precalculus in Fall Semester Year 1 and MATH 2554 Calculus in Spring Semester Year 1. Another option is to complete MATH 1203 in Fall Semester 1 and MATH 2043 Survey of Calculus in Spring Semester Year 1.

## Requirements for a Minor in Chemistry

| CHEM 2263 | Analytical Chemistry Lecture | 4 |
| :--- | :--- | ---: |
| \& CHEM 2261L | and Analytical Chemistry Laboratory |  |
| CHEM 3603 | Organic Chemistry I | 4 |
| \& CHEM 3601L | and Organic Chemistry I Laboratory |  |
| CHEM 3613 | Organic Chemistry II | 4 |
| \& CHEM 3611L | and Organic Chemistry II Laboratory |  |
| CHEM 3453 | Elements of Physical Chemistry | 3 |
| A course at the | 3000-4000 level. | 3 |

## Total Hours

A student must notify the department of his or her intent to minor.
Requirements for Departmental Honors in Chemistry: Students with good academic backgrounds and strong interests in research are encouraged to participate in the department of chemistry and biochemistry honors program. Entrance into the program is normally during the sophomore year or the first semester of the junior year, and a minimum cumulative GPA of 3.5 is required. Entrance is initiated by consulting the faculty academic adviser, who will help arrange conferences with potential faculty research project advisers. When there is agreement between the student and the adviser on a research project or area, an Honors Advisory Committee is set up to supervise the honors candidate's program. The heart of the program is the research project, but students are encouraged to broaden their experience beyond required courses within chemistry, the natural sciences, the social sciences, and the humanities. Participation in Honors Colloquia, honors sections of regular courses, and chemistry departmental and divisional seminars is especially recommended. All honors candidates enroll in the spring semester Honors Seminar (CHEM 4011H), and senior honors students must make at least one seminar presentation. All honors candidates will be required to complete and defend an honors thesis and take 12 hours (which may include 6 hours of thesis) in Honors Studies. The thesis is required in the spring semester of the senior year, followed by an oral presentation. On the basis of these written and oral reports and their evaluation of all aspects of the student's honor program, the candidate's Honors Advisory Committee will recommend whether or not the distinction "Chemistry or Biochemistry Scholar Cum Laude" should be awarded. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the whole of the candidate's program of honors studies.

## Chemistry Teacher Licensure Requirements:

Students interested in pursuing a minor in STEM Education or Secondary Teacher Licensure in mathematics, biology, chemistry, physics, or computer science at the undergraduate level should consult with a STEM Education faculty adviser, teach@uark.edu. Another option to
obtain secondary teacher licensure is to complete the one-year Master of Arts in Teaching (http://catalog.uark.edu/undergraduatecatalog/ collegesandschools/jwilliamfulbrightcollegeofartsandsciences/ mathematicalsciencesmasc/graduatecatalog/programsofstudy/ teachereducation/).

## Faculty

Adams, Paul D., Ph.D. (Case Western Reserve University), B.S. (Louisiana State University), Professor, 2006, 2021.
Allison, Neil T., Ph.D. (University of Florida), B.S. (Georgia College), Associate Professor, 1980.
Brewer, Lorraine C., M.S. (University of Wisconsin-Madison), Instructor, 1997.

Chen, Jingyi, Ph.D. (University of Washington), M.A. (State University College at Buffalo), B.S. (Zhongshan University), Professor, 2010, 2019.
Chevrier, Vincent Francois, Ph.D. (CEREGE, Aix-en-Provence, France),
M.E.S. (University Paris VII), B.S. (Academy of Versaille, France), Research Associate Professor, 2005.
Coridan, Robert, Ph.D., M.S. (University of Illinois-Urbana-Champaign), B.S. (The Ohio State University), Associate Professor, 2015, 2021.

Dong, Bin, Ph.D. (lowa State University), B.S. (Xiamen University), Assistant Professor, 2022.
Edwards, Martin, Ph.D., M.Sc., M.Math. (University of Warwick), Assistant Professor, 2020.
Edwards, Martin, Ph.D., M.Sc., M.Math. (University of Warwick), Assistant Professor, 2020.
Fan, Chenguang, Ph.D. (lowa State University), B.S. (Nanjing University), Assistant Professor, 2016.
Fritsch, Ingrid, Ph.D. (University of Illinois-Urbana-Champaign), B.S. (University of Utah), Professor, 1992, 2005.
He, Maggie, Ph.D. (ETH Zürich), M.S. (University of Pennsylvania), B.S. (City College of New York), Assistant Professor, 2019.
Hershberger, Margaret, Ph.D., M.S. (University of Chicago), B.S. (The Ohio State University), Instructor, 2015.
Heyes, Colin David, Ph.D. (Georgia Institute of Technology), B.S. (Loughborogh University), Professor, 2008, 2021.
Kilyanek, Stefan M., Ph.D., M.S. (University of Chicago), B.S. (Grand Valley State University), Associate Professor, 2014, 2019.
Kohanek, Julia, Ph.D. and M.S. (University of Illinois Urbana-
Champaign), B.S. (University of Michigan), Instructor, 2019, 2022.
Lay, Jackson, Ph.D. (University of Nebraska-Lincoln), Professor, 2002.
Margaret, Hershberger, Ph.D., M.S. (University of Chicago), B.S. (The Ohio State University), Instructor, 2015.
Mazzanti, Christopher L., Ph.D., M.S. (University of Arkansas), B.S. (University of Arkansas at Monticello), Instructor, 2012.
McIntosh, Matt, Ph.D. (Pennsylvania State University), B.A. (Virginia Tech), Professor, 1996, 2011.
Millett, Francis, Ph.D. (Columbia University), B.S. (University of Wisconsin), Distinguished Professor, 1972, 2003.
Moradi, Mahmoud, Ph.D. (North Carolina State University), M.S., B.S.
(Sharif University of Technology), Associate Professor, 2015, 2021.
Norman, Mya A., Ph.D. (University of Colorado-Boulder), M.S., B.S. (University of Arkansas), Instructor, 2006.
Sakon, Joshua, Ph.D. (University of Wisconsin-Madison), B.S. (Southern Oregon University), Professor, 1997, 2016.
Stenken, Julie A., Ph.D. (University of Kansas), B.S. (University of Akron), Professor, 21st Century Chair of Proteomics, 2007.
Stites, Wesley, Ph.D. (Massachusetts Institute of Technology), M.A., B.A. (Johns Hopkins University), Professor, 1991, 2008.
Striegler, Susanne, Ph.D., M.S., B.S. (Ulm University, Germany),
Professor, 2012, 2015.

Thallapuranam, Suresh, Ph.D. (Osmania University), Professor, 2003, 2015.

Tian, Ryan, Ph.D. (University of Connecticut), B.S. (Fudan University, Shanghai), Associate Professor, 2004, 2010.
Wang, Feng, Ph.D. (University of Pittsburgh), Ph.D. (Kutztown University of Pennsylvania), B.S. (Peking University), Associate Professor, Charles E. and Clydene Scharlau Endowed Professor, 2012.

Wilkins, Charles L., Ph.D. (University of Oregon), B.S. (Chapman College), Distinguished Professor, 1998.
Zheng, Nan, Ph.D. (University of Michigan-Ann Arbor), M.S. (University of Rochester), B.S. (University of Science and Technology of China), Professor, 2008, 2021.

## Courses

CHEM 1051L. Chemistry in the Modern World Laboratory (ACTS Equivalency = CHEM 1004 Lab). 1 Hour.
Basic laboratory exercises involving measurements of mass and volume, acids and bases, hardness of water, energy content in fuel, sugar content in drinks, and radioactivity. Meets 2 hours per week. Corequisite: CHEM 1053. (Typically offered: Fall and Spring)
CHEM 1053. Chemistry in the Modern World (ACTS Equivalency = CHEM 1004 Lecture). 3 Hours.
The impact of chemical developments upon contemporary society. Chemical problems of ecological, environmental, nutritional, economic, and sociological concern. Designed for non-science majors. Lecture 3 hours per week. Corequisite: CHEM 1051L. (Typically offered: Fall and Spring)

CHEM 1071L. Fundamentals of Chemistry Laboratory (ACTS Equivalency = CHEM 1214 Lab). 1 Hour.
Laboratory exercises in principles and practices of Fundamental Chemistry. Corequisite: CHEM 1073. (Typically offered: Fall)
CHEM 1073. Fundamentals of Chemistry (ACTS Equivalency = CHEM 1214 Lecture). 3 Hours.
One-semester introductory-level general chemistry course introducing select fundamental concepts and related problem-solving for atomic and molecular structures, nomenclature, dimensional analysis, chemical reactions, chemical bonding, intermolecular forces, states of matter, solutions, acid-base reactions, redox reactions, kinetics, thermochemistry, and chemical equilibrium. Corequisite: CHEM 1071L and related course component drill section for CHEM 1073. (Typically offered: Fall and Summer)
CHEM 1101L. University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab). 1 Hour.
Laboratory exercises involving density, types of chemical reactions separations and chromatography, solubility, waters of hydration, freezing point depression, gas laws, and data interpretation. Meets 3 hours per week for 1 hour credit. Pre- or Corequisite: CHEM 1103. (Typically offered: Fall, Spring and Summer)
CHEM 1103. University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture). 3 Hours.
An introductory course for science, engineering or agriculture majors. Atomic structure, electron configurations and periodic properties, nomenclature and bonding in compounds, Lewis structure and resonance forms, molecular geometries and polarity, stoichiometry, solution chemistry and aqueous reactions, thermochemistry, gas laws and kinetic molecular theory. Corequisite: Drill component. Prerequisite: MATH 1203 or higher, or AP Calculus AB 3C or higher, or AP Calculus BC 4C or higher, or MATH 1203 CLEP 54 or higher, or UA Math Placement 46 or higher, or ACT MATH 22 or higher, or new SAT MATH 540/old SAT MATH 540 or higher. (Typically offered: Fall, Spring and Summer)

CHEM 1121L. University Chemistry II Laboratory (ACTS Equivalency $=$ CHEM 1424 Lab). 1 Hour.
Quantitative laboratory with data interpretation and exercises covering the topics of stoichiometry, thermodynamics, kinetics, chemical equilibrium, pH , and descriptive inorganic chemistry. Laboratory 3 hours per week. Upon completion of CHEM 1121L on the UAF campus with a grade of " C " or better, credit for CHEM 1101L can be requested. Corequisite: CHEM 1123 and related course component drill section for CHEM 1123. (Typically offered: Fall, Spring and Summer)
CHEM 1121M. Honors University Chemistry II Laboratory. 1 Hour.
Qualitative and quantitative laboratory with data interpretation and exercises covering the topics of stoichiometry, thermodynamics, kinetics, chemical equilibrium, pH , and descriptive inorganic chemistry. Laboratory notebooks are required as part of every experiment. Designed for students in the honors programs. Laboratory 3 hours per week. Corequisite: CHEM 1123H and related course component drill for CHEM 1123H. (Typically offered: Fall and Spring)
This course is equivalent to CHEM 1121L.
CHEM 1123. University Chemistry II (ACTS Equivalency = CHEM 1424 Lecture). 3 Hours.
Introductory course for science, engineering or agriculture majors. Liquids, solids, intermolecular forces, phase diagrams, solution chemistry, solubility, colligative properties, chemical kinetics, chemical equilibria, acid-base equilibria, aqueous ionic equilibria, titrations, buffers, solubility equilibria, thermodynamics, electrochemistry, and nuclear chemistry. Lecture 3 hours per week. Corequisite: CHEM 1121L and related course component drill section for CHEM 1123. Prerequisite: CHEM 1103 (or CHEM 1203, or satisfactory performance on the chemistry proficiency exam) and MATH 1203 or higher, or AP Calculus AB 3C or higher, or AP Calculus BC 4C or higher, or MATH 1203 CLEP with a score of 54 or higher, or UA Math Placement 46 or higher, or ACT MATH 22 or higher, or new SAT MATH 540/old SAT Math 540 or higher. (Typically offered: Fall, Spring and Summer)
CHEM 1123H. Honors University Chemistry II. 3 Hours.
Presents the topics of periodicity, bonding, stoichiometry, thermodynamics, kinetics, and chemical equilibrium in detail. Lecture 3 hours per week. Students with satisfactory performance on the proficiency exam and who complete CHEM 1123H on the UAF campus with a grade of "C" or better can request credit for CHEM 1103. Pre- or Corequisite: MATH 1284C or higher. Corequisite: CHEM 1121M and related course component drill section for CHEM 1123H. Prerequisite: Honors candidacy and CHEM 1103 (or CHEM 1203, or satisfactory performance on the chemistry proficiency exam). (Typically offered: Fall, Spring and Summer)
This course is equivalent to CHEM 1123.
CHEM 1201L. Chemistry for Majors I Laboratory. 1 Hour.
Laboratory exercises involving density, types of chemical reactions separations and chromatography, solubility, waters of hydration, freezing point depression, gas laws, and data interpretation. Laboratory notebooks are required as part of every experiment.Laboratory 3 hours per week. Students may not receive credit for both CHEM 1201L and CHEM 1101L. Corequisite: CHEM 1203 and related course component drill for CHEM 1203. (Typically offered: Fall)

## CHEM 1203. Chemistry for Majors I. 3 Hours.

The first half of a two-semester course designed especially for students planning to major in chemistry or biochemistry. Students may not receive credit for both CHEM 1203 and CHEM 1103. Corequisite: CHEM 1201L and related course component drill section for CHEM 1203. Prerequisite: MATH 1203 or higher, or AP Calculus AB 3C or higher, or AP Calculus BC 4C or higher, or MATH 1203 CLEP with a score of 54 or higher, or UA Math Placement 46 or higher, or ACT MATH 22 or higher, or new SAT MATH 540/old SAT MATH 540 or higher. (Typically offered: Fall)

CHEM 1221L. Chemistry for Majors II Laboratory. 1 Hour.
Qualitative and quantitative laboratory with data interpretation and exercises covering the topics of stoichiometry, thermodynamics, kinetics, chemical equilibrium, pH , and descriptive inorganic chemistry. Laboratory notebooks are required as part of every experiment. Laboratory 3 hours per week. Students may not receive credit for both CHEM 1221L and CHEM 1121L. Corequisite: CHEM 1223 and related course component drill for CHEM 1223. (Typically offered: Spring)
This course is equivalent to CHEM 1121L.

## CHEM 1223. Chemistry for Majors II. 3 Hours.

The second half of a two-semester course designed specifically for students planning to major in chemistry or biochemistry. Students may not receive credit for both CHEM 1223 and CHEM 1123. Pre- or Corequisite: MATH 1284C or higher. Corequisite: CHEM 1221L and related course component drill section for CHEM 1223. Prerequisite: CHEM 1203 and CHEM 1201L (or CHEM 1103 and CHEM 1101L). (Typically offered: Spring)
This course is equivalent to CHEM 1123.

## CHEM 2261L. Analytical Chemistry Laboratory. 1 Hour.

Covers techniques of classical and instrumental methods of chemical separation and analysis. Laboratory 4 hours per week. Chemistry Majors/Minors must take analytical lecture and lab prior to any physical chemistry course. Chemistry Majors/Minors should take analytical lecture and lab together. Pre- or Corequisite: CHEM 2263. Prerequisite: (CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L) or (CHEM 1073 and CHEM 1071L) and MATH 1203 or higher, or AP Calculus AB 3C or higher, or AP Calculus BC 4C or higher, or CLEP College Algebra 54 or higher. (Typically offered: Fall and Spring)
CHEM 2263. Analytical Chemistry Lecture. 3 Hours.
Principles of chemical separations, analysis by classical and instrumental methods, and chemical equilibrium in physical and biological systems. Lecture 3 hours per week. Chemistry Majors/Minors must take analytical lecture and lab prior to any physical chemistry course. Chemistry Majors/Minors should take analytical lecture and lab together. Prerequisite: ((CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L) or (CHEM 1073 and CHEM 1071L)) and ((MATH 1203 or higher) or (AP Calculus AB 3C or higher) or (AP Calculus BC 4C or higher) or (MATH 1203 CLEP score of College Algebra 54 or higher) or (UA Math Placement 46 or higher) or (ACT MATH 22 or higher) or (old/ new SAT MATH of 540 or higher)). (Typically offered: Fall and Spring)
CHEM 2611L. Organic Physiological Chemistry Laboratory (ACTS Equivalency = CHEM 1224 Lab). 1 Hour.
A focus on properties of organic compounds as well as reactions of organic compounds with an emphasis on functional groups along with some classifications of certain types of compounds.Laboratory 3 hours per week. Corequisite: CHEM 2613 and related course component drill for CHEM 2613. (Typically offered: Fall, Spring and Summer)
CHEM 2613. Organic Physiological Chemistry (ACTS Equivalency = CHEM 1224 Lecture). 3 Hours.
One semester survey of organic chemistry necessary for understanding of biological systems, with some related physiological chemistry. Lecture 3 hours per week. Corequisite: CHEM 2611L and related course component drill section for CHEM 2613. Prerequisite: (CHEM 1073 and CHEM 1071L) or (CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L). (Typically offered: Fall, Spring and Summer)

## CHEM 3203. Forensic Chemistry. 3 Hours.

Survey of chemistry used in criminal investigations. Topics may include detection and identification of drugs, alcohol, toxins, explosives and gun powder residue. Chemical analysis of paint, ink, paper, soil, glass and fibers. Chemical detection of blood and fingerprints. Extraction of DNA from evidence, DNA fingerprinting. Prerequisite: CHEM 2613, or CHEM 3613 (recommended), or CHEM 3613H, or CHEM 3713. (Typically offered: Irregular)

CHEM 3273. Inquiry and Modeling in Science Education. 3 Hours.
Study of science practices with an emphasis on modeling and inquiry for learning/ teaching. Includes practical, philosophical, cognitive, and disciplinary specific dimensions of doing science in academic and nonacademic settings. Includes planning and implementing multiple scientific inquiries, engaging in reflective practices, writing and presenting scientific information. Safety issues are included. Corequisite: Drill component. Prerequisite: 8 hours of CHEM courses. (Typically offered: Spring)
This course is cross-listed with PHYS 3273, BIOL 3273.
CHEM 3451L. Elements of Physical Chemistry Laboratory. 1 Hour.
Experimental measurements of the physical properties, chemical systems, error analysis and report writing. Experiments cover topics in thermochemistry, heat capacity, chemical kinetics, spectroscopy, and phase/chemical equilibrium using a variety of physical chemistry techniques. Laboratory 3 hours per week. Corequisite: Chemistry majors and chemistry minors must enroll in CHEM 3453 concurrently. Prerequisite: CHEM 2261L and PHYS 2031L (or PHYS 2074). (Typically offered: Fall)

## CHEM 3453. Elements of Physical Chemistry. 3 Hours.

One semester accelerated course in physical chemistry primarily for students majoring/minoring in chemistry with biochemistry option, or pre-professional and agriculture students. Topics include thermodynamics, phase \& chemical equilibrium, chemical kinetics, quantum chemistry and spectroscopy. Presented at the same level as the 2-semester course with some recourse to calculus, although covering fewer topics in quantum chemistry. Lecture 3 hours per week. Students cannot earn credit for both CHEM 3453 and CHEM 3514. Corequisite: Chemistry majors and chemistry minors must enroll in CHEM 3451L concurrently. Prerequisite: CHEM 2263 and PHYS 2033 (or PHYS 2074), and MATH 2554 (or MATH 2043). (Typically offered: Fall)

## CHEM 3504. Physical Chemistry I. 4 Hours.

First semester of a 2-semester course in physical chemistry designed for chemistry majors and chemistry minors with topics covering wave-particle duality, quantum chemistry, atomic and molecular structure, bonding, spectroscopy and elementary statistical mechanics. Lecture and recitation 4 hours per week. Pre- or Corequisite: MATH 2564. Prerequisite: CHEM 2263 and PHYS 2074. (Typically offered: Fall)

## CHEM 3512L. Physical Chemistry Laboratory. 2 Hours.

Experimental studies of molecular structure, thermochemistry, and chemical kinetics, and the determination of other physicochemical properties of matter. Laboratory 8 hours per week. Students cannot earn credit for both CHEM 3451L and CHEM 3512L. Corequisite: Chemistry majors and chemistry minors must take CHEM 3514 concurrently. Prerequisite: CHEM 2261L and PHYS 2031L (or PHYS 2074). (Typically offered: Spring)
CHEM 3514. Physical Chemistry II. 4 Hours.
Second semester of a 2-semester course in physical chemistry aimed for B.S. chemistry majors/minors with topics covering the laws of thermodynamics, phase \& chemical equilibria; structure and properties of solutions, chemical potential, and chemical kinetics. Lecture and recitation 4 hours per week. Students cannot earn credit for both CHEM 3453 and CHEM 3514. Corequisite: Chemistry majors and chemistry minors must enroll in CHEM 3512L concurrently. Prerequisite: CHEM 3504. (Typically offered: Spring)

## CHEM 3601L. Organic Chemistry I Laboratory. 1 Hour.

Introduction to basic techniques for separation, purification, and identification of organic compounds. Laboratory exercises in organic chemistry. Meets 3 hours per week. Corequisite: CHEM 3603 and related course component drill for CHEM 3603. (Typically offered: Fall and Summer)

## CHEM 3602M. Honors Organic Chemistry I Laboratory. 2 Hours.

Introduction to basic techniques for separation, purification, and identification of organic compounds. Drill lecture-discussion (1hr/wk) and laboratory (4hr/wk). Writing component. Required drill. Corequisite: CHEM 3603H and related course component drill sections for CHEM 3603H and CHEM 3602M. Prerequisite: Honors candidacy. (Typically offered: Fall and Summer)
This course is equivalent to CHEM 3601L.

## CHEM 3603. Organic Chemistry I. 3 Hours.

Introduction to organic compounds including alkanes, haloalkanes, alkenes and alkynes; properties including basic stereochemistry and reactions including nucleophilic substitution, elimination, and electrophilic addition reactions. Lecture 3 hours per week. Corequisite: CHEM 3601L and related course component drill section for CHEM 3603. Prerequisite: (CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L). (Typically offered: Fall and Summer)

## CHEM 3603H. Honors Organic Chemistry I. 3 Hours.

In-depth introduction to organic compounds; properties and reactions. Including alkanes, haloalkanes, alkenes and alkynes; nucleophilic substitution, elimination, and electrophilic addition reactions. Lecture 3 hours per week. Corequisite: CHEM 3602M and related course component drill sections for CHEM 3603H and CHEM 3602M. Prerequisite: Honors candidacy and ((CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L)). (Typically offered: Fall and Summer)
This course is equivalent to CHEM 3603.
CHEM 3611L. Organic Chemistry II Laboratory. 1 Hour.
Continuation of CHEM 3601L and introduction to basic techniques of synthesis, isolation, and determination of structure and reactivity of organic compounds. Laboratory exercises in organic chemistry. Meets 3 hours per week. Corequisite: CHEM 3613 and related course component drill for CHEM 3613. Prerequisite: CHEM 3601L. (Typically offered: Spring and Summer)

## CHEM 3612M. Honors Organic Chemistry II Laboratory. 2 Hours.

Continuation of CHEM 3602M and introduction to basic techniques of synthesis, isolation, and determination of structure and reactivity of organic compounds. Drill lecture-discussion (1 hour/wk) and laboratory (4 hours/wk). Writing component. Drill required. Corequisite: CHEM 3613H and related course component drill sections for CHEM 3612M and CHEM 3613H. Prerequisite: Honors candidacy and CHEM 3602M. (Typically offered: Spring and Summer)
This course is equivalent to CHEM 3611L.
CHEM 3613. Organic Chemistry II. 3 Hours.
Basic chemistry of aromatic and carbonyl compounds: properties and reactions. Lecture 3 hours per week. Corequisite: CHEM 3611L and related course component drill section for CHEM 3613. Prerequisite: (CHEM 3603 and CHEM 3601L) or (CHEM 3603H and CHEM 3602M) or (CHEM 3703 and CHEM 3702L). (Typically offered: Spring and Summer)

## CHEM 3613H. Honors Organic Chemistry II. 3 Hours.

In-depth coverage of the basic chemistry of aromatic and carbonyl compounds; properties and reactions. Lecture 3 hours per week.Corequisite: CHEM 3612M and related course component drill sections for CHEM 3613H and CHEM 3612M. Prerequisite: Honors candidacy and CHEM 3603H and CHEM 3602M. (Typically offered: Spring and Summer)
This course is equivalent to CHEM 3613.

## CHEM 3702L. Organic Chemistry I Lab for Chemistry Majors. 2 Hours.

Introduction to basic techniques for separation, purification, and identification of organic compounds. Drill lecture-discussion ( $1 \mathrm{hr} / \mathrm{wk}$ ) and laboratory ( $4 \mathrm{hr} / \mathrm{wk}$ ). Writing component. Required drill. Corequisite: CHEM 3703 and related course component drill sections for CHEM 3703 and CHEM 3702L. Prerequisite: Chemistry major or minor. (Typically offered: Fall)

CHEM 3703. Organic Chemistry I Lecture for Chemistry Majors. 3 Hours. In-depth introduction to organic compounds including alkanes, haloalkanes, alkenes and alkynes; properties including basic stereochemistry and reactions including nucleophilic substitution, elimination, and electrophilic addition. Lecture 3 hours per week. Corequisite: CHEM 3702L and related course component drill sections for CHEM 3703 and CHEM 3702L. Prerequisite: Chemistry major or minor and (CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L). (Typically offered: Fall)
This course is equivalent to CHEM 3603.
CHEM 3712L. Organic Chemistry II Lab for Chemistry Majors. 2 Hours.
Continuation of CHEM 3702L and introduction to basic techniques of synthesis, isolation, and determination of structure and reactivity of organic compounds. Drill lecture-discussion (1 hour/wk) and laboratory (4 hours/wk). Writing component. Drill required. Corequisite: CHEM 3713 and related course component drill sections for CHEM 3713 and CHEM 3712L. Prerequisite: Chemistry major or minor and CHEM 3702L. (Typically offered: Spring)

CHEM 3713. Organic Chemistry II Lecture for Chemistry Majors. 3 Hours. Continuation of in-depth coverage of the basic chemistry of the compounds of carbon. Properties and reactions of aromatic and carbonyl functional groups. Lecture 3 hours per week. Corequisite: CHEM 3712L and related course component drill sections for CHEM 3713 and CHEM 3712L. Prerequisite: Chemistry major or minor and CHEM 3703 and CHEM 3702L. (Typically offered: Spring)
This course is equivalent to CHEM 3613.

## CHEM 3813. Elements of Biochemistry. 3 Hours.

One semester survey course of the fundamentals of biochemistry. Structures, properties, and reactions of major classes of biomolecules. Basics of enzyme catalysis. Overview of metabolism. Credit for both CHEM 3813 and CHEM 4813H may not be counted toward a chemistry degree. Lecture 3 hours per week. Prerequisite: (CHEM 3613 and CHEM 3611L) or (CHEM 3613H and CHEM 3612M) or (CHEM 3713 and CHEM 3712L) or (CHEM 2613 and CHEM 2611L). (Typically offered: Fall, Spring and Summer)

CHEM 3923H. Honors Colloquium. 3 Hours.
Covers a special topic or issue. Offered as a part of the honors program.
Prerequisite: Honors candidacy. (Typically offered: Fall, Spring and Summer)
CHEM 400V. Chemistry Research. 1-4 Hour.
Research problems. Students need to enroll in their supervising faculty mentor's section. CHBC students conducting research under a faculty mentor outside of CHBC must enroll in the CHBC chair's section. Additionally, honors students need the approval of the CHBC department honors advisor. Honors students must complete thesis in senior year. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CHEM 400VH. Honors Chemistry Research. 1-4 Hour.
Research problems. Students need to enroll in their supervising faculty mentor's section. CHBC students conducting research under a faculty mentor outside of CHBC must enroll in the CHBC chair's section. Additionally, honors students need the approval of the CHBC department honors advisor. Honors students must complete thesis in senior year. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
This course is equivalent to CHEM 400 V .

## CHEM 4011H. Honors Seminar. 1 Hour.

Research seminar for chemistry majors enrolled in the honors program. Enrollment is required the spring semester of the junior and senior years for honors students. Senior honors students must make one research presentation to graduate with honors. Prerequisite: Honors candidacy, chemistry major and junior or senior standing. (Typically offered: Spring) May be repeated for up to 2 hours of degree credit.

## CHEM 405V. Special Topics in Chemistry. 1-4 Hour.

Potential topics include: advanced spectroscopic methods, bioanalytical chemistry, bioinorganic chemistry, bioorganic chemistry, biophysical chemistry, chemical sensors, drug discovery and design, nanomaterials, pharmaceutical chemistry, process analytical chemistry, and protein folding and design. (Typically offered: Irregular)

CHEM 4123. Advanced Inorganic Chemistry I. 3 Hours.
Reactions and properties of inorganic compounds from the standpoint of electronic structure and the periodic table. Emphasis on recent developments. Prerequisite: CHEM 3453 or CHEM 3514. (Typically offered: Fall)
CHEM 4211L. Instrumental Analysis Laboratory. 1 Hour.
Provides laboratory experience in parallel with the lecture material in CHEM 4213. Laboratory 3 hours per week. Corequisite: CHEM 4213. (Typically offered: Fall and Spring)

## CHEM 4213. Instrumental Analysis. 3 Hours.

Provides students, especially those in the agricultural, biological, and physical sciences, with an understanding of modern instrumental techniques of analysis. Lecture 3 hours per week. Corequisite: CHEM 4211L. Prerequisite: (CHEM 2263 and CHEM 2261L) and ((CHEM 3613 and CHEM 3611L) or (CHEM 3613H and CHEM 3612M) or (CHEM 3713 and CHEM 3712L)). (Typically offered: Fall and Spring)

## CHEM 4283. Energy Conversion and Storage. 3 Hours.

Fundamental and applied concepts of energy storage and conversion, with sustainability implications. Chemical reactions (kinetics, thermodynamics, mass transfer), emphasizing oxidation-reduction, electrochemical, and interfacial processes, and impact on performance of fuel and biofuel cells, batteries, supercapacitors, and photochemical conversion. Prerequisite: CHEM 1123 and PHYS 2074. (Typically offered: Fall Even Years)

CHEM 4723. Experimental Methods in Organic Chemistry. 3 Hours. Introduction to the application of synthetic and spectroscopic methods in organic chemistry, including mass spectrometry, infrared spectroscopy, and nuclear magnetic resonance spectrometry. Other laboratory techniques applicable to chemical research will be included. Lecture 3 hours and laboratory 3 hours per week. Lecture only meets the first half of the term. Laboratory meets the entire term. Corequisite: Lab component. Prerequisite: CHEM 3613 and CHEM 3611L, (or CHEM 3613H or CHEM 3612M), (or CHEM 3713 and CHEM 3712L). (Typically offered: Fall)
CHEM 4813H. Honors Biochemistry I. 3 Hours.
The first of a two-course series covering biochemistry for undergraduate students in biology, agriculture, and chemistry. Topics covered include protein structure and function, enzyme kinetics, enzyme mechanisms, and nucleic acid and carbohydrate structures. Credit cannot be earned in both CHEM 3813 and CHEM 4813H. Additional honors-level work required in this section. Prerequisite: Honors candidacy and (CHEM 3613 and CHEM 3611L) or (CHEM 3613H and CHEM 3612M) or (CHEM 3713 and CHEM 3712L). (Typically offered: Fall)
CHEM 4843H. Honors Biochemistry II. 3 Hours.
A continuation of CHEM 4813 H covering topics including biological membranes and bioenergetics, photosynthesis, lipids and lipid metabolism, nucleic acid structure, structure and synthesis, and molecular biology. Credit cannot be earned in both CHEM 3813 and CHEM 4843H. Additional honors-level work required in this section. Prerequisite: Honors candidacy and CHEM 4813H. (Typically offered: Spring)
CHEM 4853. Biochemical Techniques. 3 Hours.
Techniques for handling, purifying and analyzing enzymes, structural proteins, and nucleic acids. Lecture 1 hour, laboratory 6 hours per week. Corequisite: Lab component. Pre or Corequisite: CHEM 3813 or CHEM 4843H. (Typically offered: Spring)

## Classical Studies (CLST)

Daniel B. Levine
Chair of Studies
502 Kimpel Hall
479-575-2951
The Classical Studies Program offers a major leading to a Bachelor of Arts degree. The program also offers a minor in classical studies.

Classical studies are the oldest discipline in the humanities and will teach you a lot about why our world is the way it is. Based on the Greek and Latin literature, the Classics remain essential to many fields in the liberal arts, including the study of ancient art, architecture, history, mythology, and philosophy. Based on Greek and Latin literature, the program draws faculty from five different departments. In addition to Greek and Latin, courses are offered on various aspects of classical civilization. Study abroad options in Greek and Italy are available.

## Requirements for B.A. in Classical Studies with Ancient Languages Concentration

The following credit hour requirements must be met (see Degree Completion Program Policy for additional information). In addition, the Fulbright College Writing Requirement is satisfied by successful completion of CLST 4003H.

State minimum core (p. 81) requirements may vary by individual, based on placement and previous course credit earned. Once all core requirements are met, students may substitute with general electives in consultation with their academic advisor.

State Minimum Core
Six credit hours in classical studies (CLST) courses numbered at the ..... 6
1000- or 2000-level
World language in Greek (GREK) or Latin (LATN) up to the ..... 9
Intermediate I level (2003-level)
CLST 4003H Honors Classical Studies Colloquium ..... 3
Concentration Requirements ..... 21
Any Fulbright College credit hours numbered 3000-level or higher ..... 3
Any UA-Fayetteville credit hours numbered at the 3000-level or higher 6
Any credit hours numbered at the 3000-level or higher, or any 2000-7
level credit hours that have a course prerequisite30
Total Hours ..... 120

## Requirements for Ancient Languages Concentration:

Nine credit hours in Greek (GREK) or Latin (LATN) world language courses numbered at the Intermediate II level (2013-level) or higher 12 credit hours numbered at the 3000-level or higher in Latin (LATN), 12 Greek (GREK), classical studies (CLST), or related courses from other areas. No more than six credit hours can be outside GREK/ LATN/CLST courses. ${ }^{1}$

## Total Hours

${ }^{1}$ Courses in other areas include: ARCH 2233, HIST 3003, HIST 3013, HIST 4003, HIST 4013, HIST 4023, HIST 4033, HIST 4043, HIST 4103, HIST 4113, and PHIL 4003.

## Requirements for B.A. in Classical Studies with Cultures, Reception and Digital Humanities Concentration

The following credit hour requirements must be met (see Degree Completion Program Policy for additional information). In addition, the Fulbright College Writing Requirement is satisfied by successful completion of CLST 4003H.

State minimum core (p. 81) requirements may vary by individual, based on placement and previous course credit earned. Once all core requirements are met, students may substitute with general electives in consultation with their academic advisor.

| State Minimum Core | 35 |
| :---: | :---: |
| Six credit hours in classical studies (CLST) courses numbered at the 1000- or 2000-level | 6 |
| World language in Greek (GREK) or Latin (LATN) up to the Intermediate I level (2003-level) | 9 |
| CLST 4003H Honors Classical Studies Colloquium | 3 |
| Concentration Requirements | 1 |
| Any Fulbright College credit hours numbered 3000-level or higher | 3 |
| Any UA-Fayetteville credit hours numbered at the 3000-level or higher | 6 |
| Any credit hours numbered at the 3000-level or higher, or any 2000level credit hours that have a course prerequisite | 7 |
| General Electives | 30 |
| Total Hours | 120 |
| Requirements for Cultures, Reception and Digital Humanities Concentration: |  |
| 21 credit hours in classical studies (CLST) courses or related courses in other areas. At least 18 credit hours must be numbered at the 3000 -level or higher. No more than six credit hours can be outside GREK/LATN/CLST courses. ${ }^{1}$ | 21 |

## Total Hours

${ }^{1}$ Courses in other areas include: ARCH 2233, HIST 3003, HIST 3013, HIST 4003, HIST 4013, HIST 4023, HIST 4033, HIST 4043, HIST 4103, HIST 4113, and PHIL 4003.

## Requirements for a Minor in Classical Studies:

Six credit hours in classical studies courses (CLST, GREK, or LATN) numbered at the 1000- or 2000-level.
12 credit hours numbered at the 3000 -level or higher in classical studies courses (CLST, GREK, or LATN) or related courses from other areas. No more than six credit hours can be outside CLST, GREK, or LATN courses. ${ }^{1}$

## Total Hours

${ }^{1}$ Courses in other areas include: HIST 3003, HIST 3013, HIST 4003, HIST 4013, HIST 4023, HIST 4033, HIST 4043, HIST 4103, HIST 4113, and PHIL 4003.

Requirements for Honors in Classical Studies: The Honors Program in Classical Studies gives students of high ability the opportunity to strengthen their study of classics by intensifying their experience with ancient languages and cultures.

In addition to the requirements for graduation with a major in classical studies and the general college requirements for a B.A. degree, honors candidates in classical studies must

1. Be accepted as honors candidates by the Classical Studies Committee,
2. Complete at least three semesters in a second classical language,
3. Enroll in at least two 1 -hour units of CLST 399VH and pursue independent-study topics under the guidance of classical studies faculty,
4. Enroll for two hours of CLST 399VH and write an honors thesis, and
5. Defend and discuss their entire honors program in an oral examination.

Successful completion of the requirements will be recognized by the award of the distinction "Classical Studies Scholar Cum Laude" at graduation. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the whole of the candidate's program of honors studies.

## Faculty

Coon, Lynda L., Ph.D., M.A. (University of Virginia), B.A. (James Madison University), Professor, Department of History, 1990, 2013. Fredrick, David Charles, Ph.D. (University of Southern California), M.A., B.A. (University of Kansas), Associate Professor, Department of World Languages, Literatures and Cultures, 1991, 1997.
Levine, Daniel, Ph.D. (University of Cincinnati), B.A. (University of Minnesota), University Professor, Department of World Languages, Literatures and Cultures, 1980, 2016.
Muntz, Charles E., Ph.D. (Duke University), B.A. (Swarthmore College), Associate Professor, Department of History, 2008, 2018.
Reeber, Joy Elisabeth, Ph.D., M.A. (University of Wisconsin-Madison), B.A. (University of North Carolina), Teaching Assistant Professor, Department of World Languages, Literatures and Cultures, 2012, 2022.
Vennarucci, Rhodora, Ph.D., M.A. (State University of New York at Buffalo), B.A. (University of Michigan), Assistant Professor, Department of World Languages, Literatures and Cultures, 2013, 2017.

## Courses

CLST 1003. Introduction to Classical Studies: Greece. 3 Hours.
An introduction to the world of Ancient Greece, from the Trojan War to Alexander the Great. Progresses chronologically, focusing on the literary, artistic, political, and philosophical ideas of the Greeks. Who were they and how are we like them? (Typically offered: Fall Odd Years)
CLST 1003H. Honors Introduction to Classical Studies: Greece. 3 Hours. Honors. Prerequisite: Honors candidacy. (Typically offered: Fall Odd Years) This course is equivalent to CLST 1003.

## CLST 1013. Introduction to Classical Studies: Rome. 3 Hours.

A multi-faceted introduction to Roman culture, focusing on the literature, philosophy, architecture, history, art and archeology. Source material to be read in English. Lectures liberally illustrated with slides. (Typically offered: Spring Even Years)

CLST 2013. Sport in Ancient Greece and Rome. 3 Hours.
Explores the meaning of ancient sport in its Greek and Roman contexts as well as the reception and transformation of these cultural meanings in sports today. Includes a look at sports outside Western traditions, focusing especially on indigenous forms of sport in the Americas. Prerequisite: ENGL 1023 or equivalent. (Typically offered: Fall)

## CLST 2323. Greek and Roman Mythology. 3 Hours.

A study of the stories, figures, and motifs in the mythology of Greece and Rome. Prerequisite: ENGL 1013 and ENGL 1023. (Typically offered: Irregular)

CLST 3003. Special Topics in Classical Studies. 3 Hours.
Close examination of subject matter not presented in regularly offered CLST courses. May be repeated for different topics. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

## CLST 3003H. Honors Special Topics in Classical Studies. 3 Hours.

Close examination of subject matter not presented in regularly offered CLST courses. May be repeated for different topics. Prerequisite: Honors standing. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit. This course is equivalent to CLST 3003.

CLST 3013. Sex(uality) \& Gender in Ancient Greece and Rome. 3 Hours. Introduces the constructions and representations of love, sex, gender, and sexuality in ancient Greece and Rome by looking at their poetry, prose, and material culture.
Explores the diversity of ancient thought on these issues and compares ideas of love and desire to contemporary cultural views. (Typically offered: Irregular)

CLST 3013H. Honors Sex(uality) \& Gender in Ancient Greece and Rome. 3 Hours.
Introduces the constructions and representations of love, sex, gender, and sexuality in ancient Greece and Rome by looking at their poetry, prose, and material culture. Explores the diversity of ancient thought on these issues and compares ideas of love and desire to contemporary cultural views. Prerequisite: Honors standing. (Typically offered: Irregular)
This course is equivalent to CLST 3013.

## CLST 3023. Ancient Greek and Roman Theatre. 3 Hours.

Explains what went on in performance spaces, how such performances reflected the ideas and social constructs of the times, and what such observations can teach us about human interactions, history, and attitudes. (Typically offered: Irregular)
CLST 3033. Non-Binary Rome. 3 Hours.
Suspends the assumption of a binary Rome and explores the consequences for how we interpret Roman lives, using a wide range of evidence and theory to pursue the possibility of a non-binary Rome. Prerequisite: ENGL 1013 and ENGL 1023, or equivalent. (Typically offered: Irregular)

## CLST 399VH. Honors Course Classical Studies. 1-6 Hour.

CLST honors thesis projects or CLST honors study abroad programs. Prerequisite: Junior standing. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

## CLST 4003H. Honors Classical Studies Colloquium. 3 Hours.

Covers a special topic or issue in classical studies. Appropriate for honors program students and students pursuing classical studies. May be repeated when the content is changed. Prerequisite: Junior standing. (Typically offered: Spring) May be repeated for up to 9 hours of degree credit.

## CLST 4413. Greek Art and Archaeology. 3 Hours.

Greek Art and Archaeology focuses on how visual and material culture shaped and were shaped by Greek society (religion, politics, military, economy, gender, etc.) from the Bronze Age through the Hellenistic period. Masterpieces of Greek art are analyzed alongside the material remains of everyday Greeks in civic and domestic spaces. (Typically offered: Spring; Summer Odd Years)
This course is cross-listed with ARHS 4413.

## CLST 4413H. Honors Greek Art and Archaeology. 3 Hours.

Greek Art and Archaeology focuses on how visual and material culture shaped and were shaped by Greek society (religion, politics, military, economy, gender, etc.) from the Bronze Age through the Hellenistic period. Masterpieces of Greek art are analyzed alongside the material remains of everyday Greeks in civic and domestic spaces. (Typically offered: Spring; Summer Odd Years)
This course is cross-listed with CLST 4413, ARHS 4413.

## CLST 4423. Roman Art and Archaeology. 3 Hours.

Roman Art and Archaeology focuses on how visual and material culture shaped and were shaped by Roman society (religion, politics, economy, gender, ethnicity, etc.) from the Iron Age through the Late Antique period. We encounter famous masterpieces, but also the material remains of everyday Romans in civic and domestic spaces. (Typically offered: Spring and Summer Even Years) This course is cross-listed with ARHS 4423.

## Communication (COMM)

Robert M. Brady

Chair of the Department
417 Kimpel Hall
479-575-3046
Communication Department Website (https://fulbright.uark.edu/ departments/communication/)

The Department of Communication offers a major leading to the Bachelor of Arts degree in communication as well as a minor in communication.

As a subject for academic study, communication bridges the humanities and the social sciences. It focuses on all forms and modes of communication and its consequences for individuals, groups, organizations, communities, and cultures. Our program of study applies communication theory and principles to a wide variety of settings, including interpersonal relationships, business and political systems, cultural interaction and communication technologies.

Communication students may concern themselves with the dynamics of persuasion, media technologies, gender roles, the family, organizational structures, cultural myths, and rhetoric. Because the program offers many diverse interests, there is a place for anyone with a genuine curiosity about human communication and its effect upon society.

The Department of Communication offers courses in five principal areas of study, though students can also choose to follow a broad range of courses across these areas:

- Film studies
- Interpersonal communication
- Mediated communication
- Organizations and communities
- Rhetoric and public communication

Communication majors from recent graduating classes now hold positions in government and public affairs, business, public relations, non-profit organizations, education, and media. Many others successfully pursue further education in graduate and professional schools.

Admission Requirements for a Major in Communication: For standing as a major, entering freshmen must have ACT composite scores of 20 or higher, and those transferring into the program after the first semester of college study must have a cumulative grade-point average of 2.00 or higher.

University and College Requirements for a Major in Communication: In addition to the university/state core requirements (http:// catalog.uark.edu/undergraduatecatalog/academicregulations/ universitycore/) and the Fulbright College of Arts and Sciences Graduation Requirements (see under College Academic Regulations and Degree Completion Policy (p. 273)), the following course requirements
must be met. Bolded courses from the list below may be applied to portions of the University/state minimum core requirements.
University/State Core Requirements
Select one of the following:

| MATH 2053 | Finite Mathematics |
| :--- | :--- |
| MATH 2183 | Mathematical Reasoning in a Quantitative World * |
| STAT 2303 | Principles of Statistics (ACTS Equivalency $=$ MATH <br>  | | 2103) |
| :--- |

Other 2000-level MATH courses can be accepted. (Check with your adviser for details.)
*These courses are highly recommended.
3-6 hours - Completion of a world language course at the 2003 Intermediate I level is preferred. (This is usually accomplished through completion of a sequence of two language courses: 1013 and 2003.) Alternatively, 6 hours of courses from a single culture or world region including African, Asian, European, Latin American and Latino, or Middle Eastern and Islamic may be used to fulfill this requirement. Courses must be approved by a departmental adviser.

## 36 hours - Communication courses:

*Two required courses (completed with a grade of C or higher)

| COMM 1313 | Public Speaking (ACTS Equivalency $=$ SPCH |
| :--- | :--- |
|  | 1003 ) |

COMM 2333 Introduction to Communication Research *
*At least two of the following introductory courses (completed with a 6 grade of C or higher):

| COMM 1003 Basic Course in the Arts: Film Lecture |  |  |
| :---: | :---: | :---: |
| COMM 2323 Interpersonal Communication |  |  |
| COMM 2343 Introduction to Small-Group Communication |  |  |
| COMM 2353 Argumentation and Advocacy |  |  |
| COMM 2813 Introduction to Mediated Communication |  |  |
| 3 hours of communication elective (numbered 2000 or higher) |  |  |
| 3000 or 4000-level COMM electives ${ }^{1,2}$ |  |  |
| 40 hours - Electives |  |  |
| Advanced Electives |  |  |
| General Electives |  | 21 |
| Total Hours |  | 12 |

Communication courses that may satisfy the college or University Core requirements will not count toward the communication electives. To graduate, students must have a cumulative grade-point average of 2.00 or above within the major.
${ }^{1}$ Meets 40-hour advanced credit hour requirement. See College Academic Requirements (http://catalog.uark.edu/undergraduatecatalog/ collegesandschools/jwilliamfulbrightcollegeofartsandsciences/).
2 Meets 24-hour rule ( 24 hours of 3000-4000 level courses in Fulbright College), in addition to meeting the 40 -hour rule. See College Academic Regulations (http://catalog.uark.edu/undergraduatecatalog/ collegesandschools/jwilliamfulbrightcollegeofartsandsciences/).

Writing Requirement: The college writing requirement may be satisfied by a research paper achieving a grade of " $C$ " or better submitted for an upper-division communication class and approved by the chair of the department.

## Communication B.A. Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 67) in the Academic Regulations chapter for university requirements of the program. Core requirement hours may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute a three-hour (or more) general elective in place of a core area.

| World language course 2003 (or world culture course) | 3 |  |
| :---: | :---: | :---: |
| COMM 2333 Introduction to Communication Research (Sp, Fa) or choose one COMM introductory course: COMM 2323, 2343, 2353, 2813 |  | 3 |
| COMM Elective (2000 or above) ${ }^{1}$ |  | 3 |
| Social Science university/state core requirement |  | 3 |
| Science university/state core lecture with corequisite lab requirement |  | 4 |
| General Elective |  | 3 |
| Year Total: | 16 | 16 |
| Third Year |  | Units |
|  | Fall | Spring |
| 3000 or 4000 -level COMM elective ${ }^{1,2}$ | 3 |  |
| 3000 or 4000 -level COMM elective ${ }^{1,2}$ | 3 |  |
| Advanced Level Elective ${ }^{1}$ | 3 |  |
| General Elective | 6 |  |
| 3000 or 4000 -level COMM elective ${ }^{1,2}$ |  | 3 |
| 3000 or 4000-level COMM elective ${ }^{1,2}$ |  | 3 |
| Advanced Level Elective ${ }^{1}$ |  | 3 |
| General Electives |  | 6 |
| Year Total: | 15 | 15 |
| Fourth Year |  | Units |
|  | Fall | Spring |
| 3000 or 4000 -level COMM elective ${ }^{1,2}$ | 3 |  |
| 3000 or 4000-level COMM elective ${ }^{1,2}$ | 3 |  |
| 3000 or 4000 -level elective ${ }^{1}$ | 3 |  |
| Advanced Level Elective ${ }^{1}$ | 3 |  |
| Advanced Level Elective (as needed) ${ }^{1}$ | 3 |  |
| 3000 or 4000-level COMM elective ${ }^{1,2}$ |  | 3 |
| 3000 or 4000-level COMM elective or General Elective ${ }^{1,2}$ |  | 3 |
| 3000 or 4000-level Fulbright College elective ${ }^{1,2}$ |  | 3 |
| Advanced Level Elective (as needed) or General Elective ${ }^{1}$ |  | 3 |
| General Elective |  | 1 |
| Year Total: | 15 | 13 |

## Total Units in Sequence:

1 Meets 40-hour advanced credit hour requirement. See College Academic Regulations (p. 273).
2 Meets 24-hour rule (24 hours of 3000-4000 level courses in Fulbright College), in addition to meeting the 40-hour rule. See College Academic Regulations (p. 273).

Requirements for a Minor in Communication: 21 hours including at least 12 hours must be numbered 3000 or above. A student should consult with an adviser in the department for appropriate courses.

Requirements for Honors in the Department of Communication: The Honors Program in communication gives an opportunity for a student
to achieve an additional level of intellectual growth and a satisfaction of accomplishment. A student engages in independent research and writing, under the supervision of a member of the communication faculty, and participates in special honors classes, seminars, and colloquia.

Faculty recognize outstanding achievement by a student by recommending that the bachelor's degree in communication be awarded with the distinction "Communication Scholar Cum Laude." Higher distinctions may be awarded to truly outstanding students based upon the whole of their academic program and quality of honors research.

To enter the Honors Program, a student must possess a 3.5 minimum grade-point average on all academic work and receive the recommendation of a faculty member in communication to the Honors Council of Fulbright College. A student may pursue an independent research program of a historical, critical, descriptive, or experimental nature, within any of the areas of rhetorical or communication theory, history of public address, interpersonal, small-group, or organizational communication, persuasion, argumentation, political communication, freedom of speech, communication education, or in any closely related areas of inquiry. A student interested in mass communications, broadcasting, or film may choose to pursue either a research project or a creative study. In addition to satisfying the general college and departmental requirements for a bachelor's degree, a student must satisfy departmental honors requirements, which include the following:

1. Become an honors candidate no later than the junior year of study. Students are encouraged to establish honors candidacy as early as possible.
2. Enroll in COMM 3991 H no later than the junior year of study.
3. Enroll in COMM 499VH a minimum of one hour of credit each semester after the completion of COMM 3991 H and until completion of the honors thesis,
4. Achieve a 3.5 minimum grade-point average in communication,
5. Complete 12 hours (which may include 6 hours of thesis) in Honors Studies, and
6. Write and successfully defend before a faculty examining committee a thesis based on the investigative or creative project undertaken in COMM 499VH.

For a full description of the Honors Program and its requirements, consult with the Undergraduate Director in the Department of Communication.

## Communication (B.A.) Drama/Speech Teacher Licensure

Requirements: Please refer to the Secondary Education Requirements
(p. 276) for Fulbright College Students in the "Other Programs" section of the page.

Brady, Robert M., Ph.D. (University of Michigan-Ann Arbor), M.A. (Western Kentucky University), B.S. (Murray State University), Associate Professor, 1979.
Branton, Scott, Ph.D. (University of Missouri), M.A. (Western Kentucky University), M.S.W., B.S.W. (Florida State University), Assistant Professor, 2023.

Butcher, Margaret, Ph.D. (University of Missouri), M.A., B.S. (Arkansas State University), Teaching Assistant Professor, 2016.
Catron-Ping, Peggy Lee, Ed.D. (University of Arkansas), M.T.S. (Phillips Theological Seminary), M.A. (Missouri State University), B.A. (Central Bible College), Instructor, 2004.
Corrigan, Lisa, Ph.D., M.A. (University of Maryland-College Park), B.A. (University of Pittsburgh), Professor, 2007, 2019.
Denison, Sarah, M.A. (University of Arkansas), B.S. (University of Texas at Tyler), Instructor, 2007.
Dionne, Terrell Jake, Ph.D. (University of Colorado), M.A. (Syracuse University), B.A. (University of North Texas), Assistant Professor, 2020.
Ekhalid, Amnee, Ph.D. (University of Missouri), M.S. (University of North Texas), B.A. (University of North Texas), Assistant Professor, 2023. Gliszinski, Ryan, M.A., B.A. (University of Arkansas), Instructor, 2018. Hatfield, Joe, Ph.D. (University of Colorado), M.A. (Syracuse University), B.A. University of North Texas), Assistant Professor, 2020.

Jennings, Freddie, Ph.D. (University of Missouri), M.A., B.A. University of Arkansas), Teaching Assistant Professor, 2018.
Jones, Ringo, M.F.A. (Miami University), B.A. (Northern Kentucky University), Assistant Professor, 2020.
Khan, Abraham, Ph.D. (University of Minnesota), M.A., B.A (Florida State University), Assistant Professor, 2022.
Knies, Cambry, M.A., B.A. (University of Arkansas), Instructor, 2020.
Lambert, Lauren, M.A., B.A. (Missouri State University), Instructor, 2020.
Leach, Rebecca, Ph.D. (Arizona State University), M.S. (Texas Christian University), B.A. (University of Montevallo), Assistant Professor, 2022. Lee, Joomi, Ph.D. (Michigan State University), M.A. (Indiana University), B.A. (The Catholic University of Korea), Assistant Professor, 2023.

Liles, Alex, M.A., B.A. (University of Arkansas), Instructor, 2014.
Mensah, Angela, Ph.D. (Bowling Green State University), M.A. (Western Michigan University), B.A. (Ferris State University), Teaching Assistant Professor, 2022.
Mobley, Veronica, M.A., B.A. (University of Arkansas), Instructor, 2021.
Morris, John, M.A. (University of Arkansas), B.A. (University of Central Arkansas), Instructor, 2021.
Neville-Shepard, Meredith D., Ph.D. (University of Kansas), M.A. (University of Kansas), B.A. (Furman University), Assistant Professor, 2016.

Neville-Shepard, Ryan M., Ph.D. (University of Kansas), M.A. (University of Kansas), B.A. (Bates College), Associate Professor, 2016.
Scheide, Frank Milo, Ph.D. (University of Wisconsin-Madison), M.A.
(New York University), B.S. (University of Wisconsin-River Falls), Professor, 1977, 2008.
Schulte, Stephanie Ricker, Ph.D., M.A. (George Washington University), B.A. (University of Arkansas), Professor, 2008.

Spialek, Matthew L., Ph.D. (University of Missouri), M.S., B.S. (Illinois State University), Associate Professor, 2016.
Suggs, Hannah Gant, M.A., B.A. (University of Arkansas), Instructor, 2018.

Walker, Kasey, Ph.D., M.A. (Purdue University), B.S. (Trinity University), Teaching Assistant Professor, 2006.
Warren, Ron, Ph.D. (Indiana University), M.A. (Colorado State University), B.A. (Michigan State University), Associate Professor, 1997, 2003.

Wicks, Robert Howard, Ph.D. (Michigan State University), M.A.
(University of Missouri-Columbia), B.A. (American University), Professor, 1994, 2006.

## Courses

COMM 1003. Basic Course in the Arts: Film Lecture. 3 Hours.
Introduction to film as entertainment and art. How to look at film through a study of composition, lighting, editing, sound and acting. Lectures and viewing time. (Typically offered: Fall, Spring and Summer)
COMM 1003H. Honors Basic Course in the Arts: Film Lecture. 3 Hours.
Introduction of film as entertainment and art. How to look at a film through a study of composition, lighting, editing, sound and acting. Lectures and viewing time.
Corequisite: Drill component. (Typically offered: Fall)
This course is equivalent to COMM 1003.
COMM 1023. Communication in a Diverse World. 3 Hours.
Introductory course that focuses on the skills and understandings associated with competent communication in a diverse society within interpersonal, group, organizational and intercultural communication contexts. (Typically offered: Fall and Spring)
COMM 1023H. Honors Communication in a Diverse World. 3 Hours.
Introductory course that focuses on the skills and understandings associated with competent communication in a diverse society within interpersonal, group, organizational and intercultural communication contexts. Prerequisite: Honors standing. (Typically offered: Fall)
This course is equivalent to COMM 1023.
COMM 1233. Media, Community and Citizenship. 3 Hours.
Examines theory and research on how messages are processed, meanings constructed, communities formed and maintained through interaction with the media. Focus is on critical citizenship and media literacy in the context of the cognitive, social, cultural, political, and economic consequences of increasingly networked media systems. (Typically offered: Fall and Spring)

COMM 1233H. Honors Media, Community and Citizenship. 3 Hours.
Examines theory and research on how messages are processed, meanings constructed, communities formed and maintained through interaction with the media. Focus is on critical citizenship and media literacy in the context of the cognitive, social, cultural, political, and economic consequences of increasingly networked media systems. Prerequisite: Honors standing. (Typically offered: Spring) This course is equivalent to COMM 1233.
COMM 1313. Public Speaking (ACTS Equivalency = SPCH 1003). 3 Hours.
Application of the communication techniques needed to organize and deliver oral messages in a public setting. Emphasis given to theory and practice of message strategies and preparation, audience analysis, presentational skills including multimedia support, speech criticism, and the listening process. (Typically offered: Fall, Spring and Summer)

## COMM 1313H. Honors Public Speaking. 3 Hours.

Application of the communication techniques needed to organize and deliver oral messages in a public setting. Emphasis given to theory and practice of message strategies and preparation, audience analysis, presentational skills including multimedia support, speech criticism, and the listening process. (Typically offered: Fall, Spring and Summer)
This course is equivalent to COMM 1313.

## COMM 2103. Interviewing. 3 Hours.

A study in the theory and practice of methods in selected interview settings, with an emphasis on interviewing through research, journalism, employment, and historical perspectives. (Typically offered: Fall)

COMM 2303. Advanced Public Speaking. 3 Hours.
Continuing study of the invention and adaptation or oral discourse to the needs of listeners. Consideration of the problems of communication in platform presentation. Prerequisite: COMM 1313. (Typically offered: Fall, Spring and Summer)

## COMM 2323. Interpersonal Communication. 3 Hours.

Personal and interpersonal factors affecting communication in everyday life. Emphasis upon ways in which interpersonal perception, physical environment, semantic choices, and nonverbal cues affect communication primarily in the context of work, family, and other personal experiences. (Typically offered: Fall, Spring and Summer)

COMM 2333. Introduction to Communication Research. 3 Hours.
Introduction to the basic assumptions underlying communication inquiry; resources for and methods of data collection in communication research; and techniques for organization, interpretation, reporting, and evaluation of communication research. (Typically offered: Fall and Spring)
COMM 2343. Introduction to Small-Group Communication. 3 Hours.
An introduction to procedures used in exchanging information, solving problems, determining policies, and resolving differences in committees and other small groups. Prerequisite: COMM 1313. (Typically offered: Fall, Spring and Summer)

## COMM 2353. Argumentation and Advocacy. 3 Hours.

An introduction to argumentation theory and practice, with concern for analyzing and producing logical, effective, and ethical public discourse. Examines contemporary models for analyzing argument, covers the common types of arguments and ways to evaluate their strengths and weaknesses, and introduces ways to test arguments for validity and fallacies. (Typically offered: Fall and Spring)
COMM 2613. Nonverbal Communication. 3 Hours.
Creates an understanding of the functions of nonverbal cues operating in human communication processes and develops familiarity with recent research in the field of nonverbal communication. (Typically offered: Irregular)

COMM 2813. Introduction to Mediated Communication. 3 Hours.
Introduction to media and media industries, particularly the social and cultural impact of their economic and regulatory structures. Emphasis on the historical development of media, business practices of media organizations, critical analysis of media messages, and cultural functions of the media. (Typically offered: Fall and Spring)
COMM 298V. Topics in Communication. 1-3 Hour.
Topics in communication not represented in other lower division courses.
Prerequisite: Completion of at least 3 hours of COMM coursework. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

## COMM 3153. Visual Communication. 3 Hours.

An examination of visual communication with emphasis on the understanding, manipulation, and effects of these messages on individuals and society. Explores visual messages in contexts such as film, television, advertising, social media, and the Internet by incorporating humanistic and social science theory and research. Prerequisite: COMM 2813. (Typically offered: Spring)
COMM 3173. Introduction to Linguistics. 3 Hours.
Introduction to language study with stress upon modern linguistic theory and analysis. Data drawn from various languages reveal linguistic universals as well as phonological, syntactic, and semantic systems of individual languages. Related topics: language history, dialectology, language and its relation to culture and society, and the history of linguistic scholarship. Prerequisite: Junior standing, COMM 1313 and COMM 2333. (Typically offered: Irregular)
This course is cross-listed with ENGL 3173, WLLC 3173.

## COMM 3253. The Latinx Image in Media. 3 Hours.

Exploration of the image and experience(s) of Latinx populations in the United States as represented in visual and print media, including film, television, news journalism, and art. Topics related to US Latinx history, culture, politics, and socioeconomics will be examined in the analyses of these mediated depictions. Prerequisite:
COMM 1003. (Typically offered: Irregular)
This course is equivalent to ENGL 3253.

COMM 3263. African Americans in Film. 3 Hours.
A survey of the history of images of African Americans in film, especially as these images are examined in the context of stereotypical renditions and/or realistic representations of African American experiences. Issues of African American history, culture, and socio-political context will be addressed in the analyses of these films. Prerequisite: COMM 1003. (Typically offered: Irregular)
This course is cross-listed with AAST 3263, ENGL 3263, JOUR 3263.
COMM 3273. African Americans in Documentary Film. 3 Hours.
Exploration of the African-American image and experience in the context of time, historical record and varying production viewpoints from diverse documentarians. African-American history, culture and socio-political context are addressed in the analyses of these documentary films from the perspectives of mainstream media, independent filmmakers and minority documentarians Prerequisite: Junior or senior standing. (Typically offered: Spring)
This course is cross-listed with JOUR 3273, AAST 3273.
COMM 3283. U.S. Latinos and Latinas through Film. 3 Hours.
This course will examine the portrayal of U.S. Latinos and Latinas in Hollywood films and how those images have changed over time. While coverage will extend to the early years of the twentieth century, the chosen films will place particular emphasis on the century's second half, from the Cold War to the modern day. (Typically offered: Spring)
This course is cross-listed with HIST 3283, LALS 3283.
COMM 3343. Contemporary Communication Theory. 3 Hours.
Study of the nature of the communication process as it is reflected in the individual, in interpersonal settings, in one-to-many situations, and in the mass media.
Prerequisite: COMM 2323. (Typically offered: Spring)
COMM 3373. Leadership Communication. 3 Hours.
An analysis of leadership as a discursive process, focusing on how leadership emerges and is enacted on a daily basis through communication-related behaviors. Prerequisite: COMM 2343 or permission of instructor. (Typically offered: Irregular)

## COMM 3383. Persuasion. 3 Hours.

Introduction to theories of persuasion with emphasis on application and effect. Prerequisite: COMM 1313 and COMM 2333, or instructor permission. (Typically offered: Fall, Spring and Summer)
COMM 3423. Science Fiction Film. 3 Hours.
This class concentrates on how science fiction in various communication media influences and is, in turn, influenced by broad features of cultural life. The class considers the impact of science fiction on science fact, the military, space travel, religion, race, gender, social class, education, politics, technology, and fashion styles. Prerequisite: COMM 1003. (Typically offered: Fall)

## COMM 3433. Family Communication. 3 Hours.

Study of the nature, functions, and management of communication patterns in the family. Focus is on understanding routine interpersonal interactions, conflict patterns, authority structures, and decision-making processes within the context of the contemporary family. Prerequisite: COMM 2323. (Typically offered: Fall)

COMM 3443. Introduction to Rhetorical Theory. 3 Hours.
Interpretive-critical study of rhetoric in public contexts. Prerequisite: COMM 1313 or COMM 2353. (Typically offered: Fall)

## COMM 3503. Popular Communication and Culture. 3 Hours.

This course is an introduction to basic theories and topics of Popular Communication and Culture studies. The course will emphasize understanding popular media communication forms. Prerequisite: COMM 2813. (Typically offered: Summer)

## COMM 3673. Mediated Communication. 3 Hours.

Focuses on media messages and their social/cultural effects. Includes a critical examination of media institutions and the ways they vie for audiences. Other topics include the ways people construct meaning from messages, media's influence on attitudes, media's role in cultural life, and audiences as critical consumers of media. Prerequisite: COMM 2813. (Typically offered: Fall)

## COMM 3703. Organizational Communication. 3 Hours.

An introduction to the theory, processes, and management of communication in organizations, with opportunities for simulated application. Prerequisite: COMM 2343. (Typically offered: Fall)

## COMM 3763. Health Communication. 3 Hours.

Examines communication within health care organizations and teams. Issues may include patient-provider communication, communication among health care professionals, negative consequences of poor communication in health care delivery, and the use of technology in health-related information dissemination and campaigns. Prerequisite: COMM 1313 and COMM 2333. (Typically offered: Fall)

COMM 3803. Survey of Social Media. 3 Hours.
Surveys research on social media, focusing on the potential cognitive, social, cultural, political, and/or economic consequences of social media and on strategies for engaging with and through social media to promote personal, social and civic goals. Pre- or Corequisite: COMM 2813. (Typically offered: Spring)

## COMM 3883. Rhetoric of Social Movements. 3 Hours.

Study of the functions of rhetoric as it appears in the context of social movements such as American independence, women's equality, civil rights, populism, and new conservatism. Prerequisite: COMM 1313 or COMM 2353. (Typically offered: Irregular)

## COMM 3923H. Honors Colloquium. 3 Hours.

Treats a special topic or issue, offered as part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in communication). (Typically offered: Irregular) May be repeated for degree credit.

## COMM 3933. Special Topics in Film Studies. 3 Hours.

Topics in film studies which are not usually presented in depth in regular courses. Prerequisite: COMM 1003. (Typically offered: Irregular) May be repeated for degree credit.

COMM 3943. Special Topics in Interpersonal Communication. 3 Hours.
Topics in interpersonal communication which are not usually presented in depth in regular courses. Prerequisite: COMM 2323. (Typically offered: Irregular) May be repeated for degree credit.
COMM 3953. Special Topics in Mediated Communication. 3 Hours.
Topics in mediated communication which are not usually presented in depth in regular courses. Prerequisite: COMM 2813. (Typically offered: Irregular) May be repeated for degree credit.

## COMM 3963. Special Topics in Organizational Communication. 3 Hours.

Topics in organizational communication which are not usually presented in depth in regular courses. Prerequisite: COMM 2343. (Typically offered: Irregular) May be repeated for degree credit.

COMM 3973. Special Topics in Rhetoric and Public Communication. 3 Hours.
Topics in rhetoric and public communication which are not usually presented in depth in regular courses. Prerequisite: COMM 2353. (Typically offered: Irregular) May be repeated for degree credit.
COMM 3983. Special Topics. 3 Hours.
Communication topics which are not usually presented in depth in regular courses. Prerequisite: COMM 1313 and COMM 2333. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
COMM 3983H. Honors Special Topics. 3 Hours.
Communication topics which are not usually presented in depth in regular courses. Prerequisite: COMM 1313, COMM 2333 and honors standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
This course is equivalent to COMM 3983.

COMM 3991H. Honors Course in Communication Research. 1 Hour.
The Honors Course in Communication is the student's first step toward developing an honors thesis project. The course is designed to facilitate the exploration of potential thesis topics, selection of a viable study for the thesis, and the conceptualization of that study. Prerequisite: Honors candidacy. (Typically offered: Fall and Spring)

## COMM 4103. Communicating Body Image. 3 Hours.

This course examines the hidden assumptions about body image as it relates to the intersections of race, class, gender, and other major identity markers. This course is designed a) to facilitate the acquisition of systematic knowledge by applying theories to critically analyze media images and messages, b) to stimulate student interest in feminist media studies as an academic discipline, and c) to promote body neutrality of self and diverse others in a media-saturated society. Prerequisite: COMM 2813.
(Typically offered: Fall)
This course is cross-listed with AAST 4103.
COMM 4113. Legal Communication. 3 Hours.
Examines communication processes in the legal environment and focuses on communication skills and behaviors among judges, attorneys, litigants, and jurors. Particular attention will be given to verbal strategies and nonverbal messages related to interviews, negotiation, mediation, and litigation and to the rhetorical functions of legal pleadings and judicial opinions. Prerequisite: COMM 1313 or COMM 2353. (Typically offered: Irregular)

## COMM 4143. American Film Survey. 3 Hours.

A survey of major American film genres, major directors and films that have influenced the development of motion pictures. Prerequisite: COMM 1003 or permission of instructor. (Typically offered: Fall)
This course is cross-listed with ENGL 4143.
COMM 4283. Communication in Contemporary Society. 3 Hours.
An examination of research and theory on the process and effects of communication in modern society. Prerequisite: COMM 1313 and COMM 2333 or permission of instructor. (Typically offered: Irregular)

## COMM 4323. Communication and Conflict. 3 Hours.

Study of the processes, effects, and managements of communicative conflict, including a consideration of conflict styles, power, goals, tactics, assessment, selfintervention and third-party intervention. Prerequisite: COMM 2323 or permission of instructor. (Typically offered: Fall)

## COMM 4333. Communication and Gender. 3 Hours.

Study of the nature, construction, functions, and effects of gender and genderrole stereotypes related to verbal and nonverbal communication, small-group and organizational interaction, and mass mediated images in contemporary culture. Prerequisite: COMM 2323 or permission of instructor. (Typically offered: Fall)
COMM 4343. Intercultural Communication. 3 Hours.
Study of intercultural communication skills, intercultural issues and their impact at home and abroad, and cross-cultural comparisons of communication phenomena from a variety of theoretical perspectives. Prerequisite: COMM 2323. (Typically offered: Spring)

COMM 4353. American Public Address. 3 Hours.
Historical and critical study of the leading American speakers, their speeches, the issues with which they were identified. Lectures, discussion, reports, and critical papers. Prerequisite: COMM 1313 or COMM 2353 or instructor permission. (Typically offered: Irregular)

## COMM 4363. Gender, Race and Power. 3 Hours.

Examines how communication shapes gender, race, sexuality, and power. Rather than focusing exclusively on interpersonal communication, this course looks at theories of power that shape institutional macro communication. Prerequisite: COMM 2353. (Typically offered: Irregular)
This course is cross-listed with AAST 4863.

## COMM 4373. Political Communication. 3 Hours.

Study of the nature and function of the communication process as it operates in the political environment. Prerequisite: COMM 1313 and COMM 2333. (Typically offered: Spring Even Years)
This course is cross-listed with PLSC 4373.
COMM 4383. Rhetoric of the Modern American Presidency. 3 Hours.
A study of the increasing reliance of contemporary presidents on public persuasion through rhetorical discourse. Prerequisite: COMM 1313 or COMM 2353. (Typically offered: Irregular)

COMM 4393. Freedom of Speech: Cases \& Issues. 3 Hours.
Study of philosophy, cases, and issues relevant to the first amendment right to the free expression, with focus on issues relevant to internal security, obscenity, pornography, slander, and the regulation of communication. Prerequisite:
COMM 1313 and COMM 2333. (Typically offered: Irregular)
COMM 4423. Disaster and Risk Communication. 3 Hours.
Examines the role of public communication efforts across all phases of a disaster with an emphasis on the use of risk communication theory to inform disaster preparedness campaign message design and response to media inquiries immediately following disasters. Prerequisite: COMM 2343 or instructor consent. (Typically offered: Fall and Spring)

## COMM 4433. Community Resilience. 3 Hours.

Explores communication systems, community relationships, and strategic communication processes that constitute community resilience. Introduces various methodological approaches to assessing community resilience in order to develop communication-based interventions that promote belonging, transformative potential, and social capital. Prerequisite: COMM 2343 or instructor permission. (Typically offered: Fall)

## COMM 4613. Rhetoric of American Women. 3 Hours.

Examines the social and cultural assumptions that have limited the role of women in public communication. Focus is on the rhetorical biographies of selected women and their arguments on important social and political issues. Prerequisite: COMM 1313 or COMM 2353. (Typically offered: Irregular)
COMM 4633. History and Development of International Film I. 3 Hours.
A critical survey of international film as a distinctive art form and as a medium of expression and communication with attention given to films and cinema from its origins to 1975. Prerequisite: COMM 1003. (Typically offered: Irregular)
COMM 4643. Environmental Communication. 3 Hours.
Explores how communication is used by individuals, corporations, and governments to shape public debates about environmental issues. Topics include rhetorical strategies, the publics' right to information and input, dispute resolution techniques, advocacy campaigns, and green marketing. Prerequisite: COMM 1313 and COMM 2333 or permission of instructor. (Typically offered: Spring)
COMM 4653. International Film II. 3 Hours.
A critical survey of international film as a distinctive art form as a medium of expression and communication with attention given to films and cinema from 1976 to the present. Prerequisite: COMM 1003. (Typically offered: Irregular)

## COMM 4683. Documentary Film. 3 Hours.

A study and analysis of the documentary film as a discrete film form and as an important contribution to the international cinematic scene. Prerequisite: Advanced standing. Prerequisite: COMM 1003. (Typically offered: Fall)

## COMM 4733. Reel Women. 3 Hours.

An examination of films made for, about, and/or by women with the aim of better understanding and centralizing issues pertinent to women's daily lives. Prerequisite: COMM 1003. (Typically offered: Fall)

COMM 4743. Representational Issues in Film. 3 Hours.
An examination of the varying ways that race and ethnicity, gender, sexual orientation, gender identity, class, (dis)ability, and age are represented in and by film - both historically and culturally. Prerequisite: COMM 1003. (Typically offered: Spring)

## COMM 4763. Health Communication Campaigns. 3 Hours.

Canvasses the theoretical frameworks used in the conceptualization of communication campaigns focused on health information dissemination and the purposes these campaigns serve. Students participate in a service learning project by defining campaign goals; identifying, segmenting, and assessing target audiences; and designing messages for multi-mediated health campaigns. (Typically offered: Spring Odd Years)
COMM 4773. Treatment of Native Americans in Film. 3 Hours.
This course compares the treatment of Native Americans in film with how representatives of this group identify themselves. Particular attention is paid to how motion pictures focusing on Native Americans produced by indigenous filmmakers compare to treatments of this people produced by Hollywood and others. Prerequisite: COMM 1003 or instructor consent. (Typically offered: Irregular)
COMM 4803. Seminar in Social Media. 3 Hours.
This class encourages in depth examination of contemporary theory and research on the potential effects of social media on cognitive, social, cultural, political, affective, and economic structures. Focus is on critical thinking and contextualization of social media. Pre- or Corequisite: COMM 2813. (Typically offered: Spring Even Years)

## COMM 4823. Children and Media. 3 Hours.

An in-depth examination of children's use of media and the effects of media content on child and adolescent development. Topics may include violence and sex in media, commercialism, and new media. Prerequisite: COMM 2813. (Typically offered: Spring Odd Years)

COMM 4843. Computer-Mediated Communication. 3 Hours.
Provides an in depth consideration of the nature of computer-mediated communication by examining its use and effects in interpersonal, work, educational, and societal contexts. Prerequisite: COMM 2813 or instructor permission. (Typically offered: Spring)
COMM 4863. Seminar in Media. 3 Hours.
Research/discussion of contemporary issues in media. Emphasis on the economic and social impact of advertising, news, censorship, programs directed toward children, portrayals of women and minorities, future trends in media technologies, and analysis of the changing media landscape. Prerequisite: COMM 2813 or instructor permission. (Typically offered: Spring)

COMM 4873. International Communication and Globalization. 3 Hours.
Examines aspects of international communication and the impact of globalization on the production, dissemination, and consumption of media technology and messages. Prerequisite: COMM 1313 and COMM 2333. (Typically offered: Irregular) This course is cross-listed with INST 4873.
COMM 4883. Television and American Culture. 3 Hours.
Historical and critical study of how television shapes American culture and is shaped by it. Attention will be given to the study of television history, programs and audiences; particularly how race and gender shape content and reception of programming. Prerequisite: COMM 2813. (Typically offered: Fall)
COMM 490V. Special Problems. 1-6 Hour.
Credit arranged. Prerequisite: COMM 2333 and at least 9 hours of COMM coursework. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.
COMM 4913. Internship in Communication. 3 Hours.
Internship in applied communication within public and private organizations. Prerequisite: COMM 1313 and COMM 2333. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

## COMM 499VH. Honors Thesis. 1-3 Hour.

Honors thesis under the direction of a faculty member in the Department of Communication. Pre- or Corequisite: COMM 3991H. Prerequisite: Honors standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

## Criminology (CRIM)

Shauna Morimoto
Department Chair
211 Old Main
479-575-3205
Department of Sociology and Criminology Website (https:// fulbright.uark.edu/departments/sociology/)

The Department of Sociology and Criminology offers a major leading to a Bachelor of Arts degree in criminology. The Criminology BA provides marketable skills and knowledge that relate to crime prevention, law enforcement, and the court system. The program in criminology is comprehensive, adding the skills in research, theory, and data analytics that prepare students beyond an understanding of criminal procedures or evidence. This major will educate students in the complexities of criminal behavior and familiarize them with the justice system processes and the causes, correlations and consequences of criminal behavior. The department offers robust undergraduate internship opportunities (https://fulbright.uark.edu/departments/sociology/internships/) that help criminology students develop a better understanding of a prospective career and determine whether their interests match a chosen career path, while simultaneously gaining experience with professionals in the field.

The department also offers a major in sociology (https://fulbright.uark.edu/ departments/sociology/), double major in criminology and sociology, a minor in sociology (https://fulbright.uark.edu/departments/sociology/ undergraduate-programs/minor-in-sociology.php) and a fully online minor in criminal justice (https://online.uark.edu/programs/minor-criminaljustice.php).

For requirements for an M.A. degree in sociology, with criminology concentration, see the Graduate School Catalog (http://catalog.uark.edu/ graduatecatalog/programsofstudy/sociologyandcriminologysoci/).

University and College Requirements for a Bachelor of Arts in Criminology: In addition to the Fulbright College of Arts and Sciences Graduation Requirements (see under Degree Completion Program Policy (http://catalog.uark.edu/undergraduatecatalog/collegesandschools/ jwilliamfulbrightcollegeofartsandsciences/)), the following course requirements must be met. Bolded courses from the course list below may be applied to portions of the state minimum core requirements (p. 81).
State Minimum Core 35

Select one of the following: 3-4

| MATH 2043 | Survey of Calculus (ACTS Equivalency = MATH <br> 2203) |
| :--- | :--- |
| MATH 2053 | Finite Mathematics |
| MATH 2183 | Mathematical Reasoning in a Quantitative <br> World |
| MATH 2554 | Calculus I (ACTS Equivalency = MATH 2405) |
| STAT 2303 | Principles of Statistics (ACTS Equivalency = <br> MATH 2103) |

World language up to the Elementary II level (1013) or higher

| CRIM 2003 | Introduction to Criminology and Criminal Justice (ACTS Equivalency = CRJU 1023) |  |
| :---: | :---: | :---: |
| SOCI 2013 | General Sociology (ACTS Equivalency = SOCI 1013) |  |
| CRIM 2043 | Sociology of Criminal Law |  |
| CRIM 3023 or SOCI 302 | Criminological Theory 2Triminological Theory |  |
| CRIM 3203 or SOCI 320 | Corrections and Social Control Corrections and Social Control |  |
| SOCI 3193 | Race, Class, Gender, and Sexuality |  |
| SOCI 3301L | Social Data and Analysis Laboratory |  |
| SOCI 3303 | Social Data and Analysis |  |
| SOCI 3313 | Social Research |  |
| 12 credit hours level or higher sociology (SOC | of criminology (CRIM) courses numbered 3000not taken above, six credit hours of which must be CI) or cross-listed with both CRIM/SOCI. |  |
| Any UA-Fayettev | ille credit hours numbered 3000-level or higher | 2 |
| Any credit hours n credit hours that | numbered 3000-level or higher or any 2000-level have a course prerequisite | 7 |
| General Electives |  | 30 |

Total Hours 120

For transfer students, a minimum of 18 hours of coursework in the major at the University of Arkansas is required.

Writing Requirement: To fulfill the Fulbright College writing requirement, each criminology major will submit, prior to graduation, a substantial research or analytical paper, with a grade of "A" or "B" from an upperdivision criminology course (3000-, 4000-, or 5000-level) to their departmental adviser. Satisfactory completion of an honors project or a senior thesis may fulfill this requirement.

## B.A. in Criminology Eight-Semester Degree Plan

In addition to the Fulbright College of Arts and Sciences Graduation Requirements (see under Degree Completion Program Policy), the following course requirements must be met.

State minimum core requirements may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute with general electives in consultation with their academic advisor.

| First Year | Units <br> Spring |
| :--- | ---: | ---: |
| ENGL 1013 Composition I (ACTS Equivalency <br> = ENGL 1013) (Satisfies General Education |  |
| Outcome 1.1) |  |
| Satisfies General Education Outcome 2.1: |  |
| MATH 1313 Quantitative Reasoning (ACTS |  |
| Equivalency = MATH 1113) <br> or MATH 1203 College Algebra (ACTS <br> Equivalency = MATH 1103) <br> or any MATH or STAT course numbered higher <br> than MATH 1203 | 3 |

SOCI 2013 General Sociology (ACTS Equivalency
$=$ SOCI 1013) (Satisfies General Education
Outcomes 3.3, 4.1, and 4.2) ${ }^{1}$
World language at the Elementary I (1003) level or higher
State Minimum Core-U.S. History or Government (Satisfies General Education Outcome 4.2) ${ }^{1}$
ENGL 1023 Composition II (ACTS Equivalency
= ENGL 1023) (Satisfies General Education
Outcome 1.1) ${ }^{1}$
Select one course from the following:
MATH 2043 Survey of Calculus (ACTS
Equivalency = MATH 2203)
MATH 2053 Finite Mathematics
MATH 2183 Mathematical Reasoning in a Quantitative World
MATH 2554 Calculus I (ACTS Equivalency = MATH 2405)
STAT 2303 Principles of Statistics (ACTS
Equivalency = MATH 2103)
World language at the Elementary II (1013) level or higher
State Minimum Core-Fine Arts (Satisfies General Education Outcome 3.1) ${ }^{1}$
General Elective
Year Total:

| Second Year | Fall |
| :--- | ---: |

CRIM 3203 Corrections and Social Control

1 Students must complete the State Minimum Core (https:// nam11.safelinks.protection.outlook.com/?url=http\%3A\%2F \%2Fcatalog.uark.edu\%2Fundergraduatecatalog\%2Fgened \%2Fstateminimum\%2F\&data=04\%7C01\%7Crcc003\%40uark.edu \%7C92f936f375f845bf930708d8e3ec5fa1\%7C79c742c4e61c4fa5be89a3cb566a8 \%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQljoiV2luMzliLCJBTil6Ik1haWv \%7C1000\&sdata=ZHBCul1Vytd
\%2FCnZSMgcmPS5ZljYEvtv2HPmN6hSxflk\%3D\&reserved=0) and the requirements of their major(s) as outlined in the Catalog of Studies. These courses also fulfill many, if not all, of the General Education Requirements (https://nam11.safelinks.protection.outlook.com/?url=http \%3A\%2F\%2Fcatalog.uark.edu\%2Fundergraduatecatalog\%2Fgened \%2Fgeneraleducation\%2F\&data=04\%7C01\%7Crcc003\%40uark.edu \%7C92f936f375f845bf930708d8e3ec5fa1\%7C79c742c4e61c4fa5be89a3cb566a8 \%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQljoiV2luMzliLCJBTil6Ik1haWv \%7C1000\&sdata=r35av68n3oEQW9FsllqBgmbsTnUENpJF7EoP4AD4Bks
$\% 3 D \& r e s e r v e d=0)$. Please visit these pages in the links provided and consult with your academic advisor when making course selections to fulfill these requirements.
${ }^{2}$ For additional details regarding the Fulbright College Writing Requirement, visit the department's webpage (https://fulbright.uark.edu/
departments/sociology/undergraduate-programs/ba-in-criminaljustice.php).

Requirements for a Minor in Criminal Justice: 18 semester hours in criminal justice and sociology to include CRIM 2003, CRIM 3023, SOCI 3313, and at least nine hours of 3000-level classes or above (no more than 3 hours may be SOCI ). A student must notify the department of her or his intent to minor.

Requirements for Departmental Honors in Criminology: The
Departmental Honors Program in Criminology is an upper-division course of study based on a topic in the area of criminology. To be eligible for criminology honors candidacy, students normally will have completed 28 semester hours and not more than 85 semester hours with a minimum cumulative grade-point average of 3.5 . They must take 12 hours (which may include 6 hours of thesis) in Honors Studies. The honors project may be an intensive study of a topic in criminology or an empirical research investigation. The candidate is expected to pass an oral examination given by an Honors Council Committee. Projects of extraordinarily high quality may be designated High Honors by the Committee. Successful completion of the requirements will be recognized by the award of the distinction Criminology Scholar cum laude at graduation. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the whole of the candidate's program of honors studies.

## Faculty

Adams, Douglas James, Ph.D., M.A. (University of Arizona), Associate Professor, 1995, 2002.
Allison, Kayla, Ph.D., (Indiana University-Bloomington), M.A. (University of Arkansas), B.A. (Indiana University-Bloomington), Assistant Professor, 2020.

Angton, Alexia, Ph.D., M.S., B.A. (lowa State University Ames), Assistant Professor, 2022.
Bustamante, Juan Jose, Ph.D. (Michigan State University), M.S., B.A. (University of Texas Pan American), Associate Professor, 2012, 2018.
Drawve, Grant R., Ph.D. (University of Arkansas at Little Rock), M.A., B.A. (Southern Illinois University), Associate Professor, 2016, 2021. Engen, Mindy Sue, Ph.D., M.A. (Pennsylvania State University), B.S. (Georgia State University), Professor, 2005, 2017.
Engen, Rodney L., Ph.D. (University of Washington), M.S., B.S. (University of Wisconsin-Milwaukee), Associate Professor, 2009.
Fitzpatrick, Kevin M., Ph.D. (State University of New York at Albany), M.A. (University of South Carolina at Columbia), B.A. (Susquehanna University), University Professor, Bernice Jones Chair in Community, 2005, 2014.
Gruenewald, Jeffrey A., Ph.D. (Michigan State University), Professor, 2019, 2022.
Harris, Casey Taggart, Ph.D., M.A. (Pennsylvania State University), B.S. (Texas A\&M University), Professor, 2011, 2023.
Holyfield, Lori C., Ph.D. (University of Georgia), M.A., B.S.E. (University of Arkansas), Professor, 1995, 2012.
Morimoto, Shauna, Ph.D., M.S. (University of Wisconsin-Madison), B.A. (University of Pittsburgh), Professor, 2008, 2023.
Niño, Michael D., Ph.D. (University of North Texas), M.A., B.S. (West Texas A\&M University), Assistant Professor, 2020.
Paez, Rocio Alejandra, Ph.D., M.A., B.A. (University of Arkansas at Little Rock), Teachinig Associate Professor, 2018, 2023.
Sabon, Lauren, Ph.D. (University of Tennessee-Knoxville), M.S/M.A. (Marshall University), B.S., B.A. (West Virginia University), Teaching Associate Professor, 2014, 2017.
Shields, Christopher A., Ph.D., J.D., M.A., B.A. (University of Arkansas), Teaching Associate Professor, 2003, 2017.

Thomas, Shaun A., Ph.D., M.A. (Louisiana State University), B.A. (University of Akron), Professor, 2015, 2023.
Worden, Steven K., Ph.D. (University of Texas at Austin), M.A., B.A. (Portland State University), Associate Professor, 1986.
Yang, Song, Ph.D., M.S. (University of Minnesota-Twin Cities), M.A. (Nankai University, China), B.A. (Branch College of Nankai, China), Professor, 2002, 2016.
Zajicek, Anna, Ph.D. (Virginia Polytechnic Institute and State University), M.S., B.S. (University of Silesia, Poland), Professor, 1994, 2006.

Zhang, Meredith, Ph.D., M.A. (The Ohio State University), B.A.
(Susquehanna University), Assistant Professor, 2022.

## Courses

CRIM 2003. Introduction to Criminology and Criminal Justice (ACTS Equivalency = CRJU 1023). 3 Hours.
Introduction to the field of criminology and the criminal justice system, including theories and patterns of criminal behavior, how criminal justice data are collected, social research methods, historical foundations of the field, institutions, and types of crimes and offenders. Provides a foundation for further criminological and theoretical studies. (Typically offered: Fall, Spring and Summer)
CRIM 2003H. Honors Introduction to Criminology and Criminal Justice. 3 Hours.
An introduction to the field history, development, and theoretical underpinnings of criminology and the criminal justice system, including theories aspects such as law enforcement, the courts, and patterns of criminal behavior, how criminal justice data are collected, social research methods, historical foundations of the field, institutions, and types of crimes and offenders. Provides a foundation for further criminological and theoretical studies. Prerequisite: Honors standing. (Typically offered: Fall, Spring and Summer)
This course is equivalent to CRIM 2003.

## CRIM 2043. Sociology of Criminal Law. 3 Hours.

Explores the history of criminal law in the United States, the construction of crime and punishment, and issues facing the contemporary legal system. (Typically offered: Fall and Spring)
CRIM 2513. Criminal Investigation. 3 Hours.
Survey of the theories, concepts, and legal conditions concerning the techniques used in the location, preservation and presentation of evidence. Prerequisite: CRIM 2003. (Typically offered: Fall and Spring)
CRIM 3011. Special Topics. 1 Hour.
Designed to develop the tools to write effectively in the social sciences, including skills related to organizing manuscripts, writing problem statements, identifying and synthesizing research, and revising and editing. Prerequisite: SOCI 2013 or CRIM 2003. (Typically offered: Fall and Spring) May be repeated for up to 3 hours of degree credit.
This course is cross-listed with SOCI 3011.
CRIM 3023. Criminological Theory. 3 Hours.
Advanced survey of theories of crime causation. Examines broad sociological paradigms, as well as both individual and aggregate-level explanations of crime causation. Applies criminological theories to contemporary issues associated with crime and criminal justice. Prerequisite: SOCI 2013. (Typically offered: Fall and Spring)
CRIM 3023H. Honors Criminological Theory. 3 Hours.
Advanced survey of theories of crime causation. Examines broad sociological paradigms, as well as both individual and aggregate-level explanations of crime causation. Applies criminological theories to contemporary issues associated with crime and criminal justice. Prerequisite: SOCI 2013 and junior standing. (Typically offered: Fall and Spring)
This course is equivalent to CRIM 3023.

## CRIM 3043. The Police and Society. 3 Hours.

Overview of origins, theories, development, practice, and current issues in policing in contemporary society. Prerequisite: CRIM 2003. (Typically offered: Fall and Spring)

CRIM 3053. Serial Crime. 3 Hours.
Historical development of criminal profiling in serial homicide, including sex crimes, stalking, and arson. Focuses on behavioral and criminological theory and a critical examination of different profiling methodologies. Prerequisite: SOCI 2013. (Typically offered: Irregular)
This course is cross-listed with SOCI 3053.
CRIM 3063. Victimology. 3 Hours.
Introduction to the scientific study of victimization. Examines conceptual boundaries of victimology research, covers theories, statistics and trends relevant to victimology, reviews the victim blaming and defending perspectives, explores practical applications of victimology, and the social, legal, and evaluates criminological issues that stem from concern over victims. Prerequisite: SOCI 2013. (Typically offered: Fall and Spring)
This course is cross-listed with SOCI 3063.
CRIM 3203. Corrections and Social Control. 3 Hours.
Overview of correctional systems and punishment. Focuses on theories of correctional philosophies, practices, and procedures, along with the historical development and modern practices of corrections, sentencing, facilities, and issues facing correctional populations. Examines principles and practices of treatment and rehabilitation. Prerequisite: CRIM 2003. (Typically offered: Fall and Spring) This course is cross-listed with SOCI 3203.

CRIM 3413. Special Topics. 3 Hours.
Designed to cover specialized topics not usually presented in regular courses.
Prerequisite: SOCI 2013. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

## CRIM 3413H. Honors Special Topics. 3 Hours.

Designed to cover specialized topics not usually presented in regular courses.
Prerequisite: Honors standing and SOCI 2013. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
This course is equivalent to CRIM 3413.

## CRIM 3443. Stratification and Crime. 3 Hours.

Examines how race, age, gender, social class, and geographic location impact criminal offending, victimization, and arrest. Subsequently, it explores how the criminal justice system stages of policing, sentencing, and incarceration further entrench or mitigate disparities across social strata group. Prerequisite: SOCI 2013. (Typically offered: Spring)

## CRIM 3453. Immigration and Crime. 3 Hours.

Provides a comprehensive foundation of the relationship between immigration, one of the most powerful forces that influences a nation's social fabric, and crime. Focuses not only on U.S. immigration but also crime in the global context. Prerequisite: SOCI 2013. (Typically offered: Fall)
This course is cross-listed with SOCI 3453.

## CRIM 3503. Criminal Procedures. 3 Hours.

Critical examination of how individual rights and police procedures are balanced with focus on arrests, use of force, identification, and search and seizure. Prerequisite: CRIM 2003. (Typically offered: Irregular)

CRIM 3513. Criminal Evidence. 3 Hours.
Examination of how evidence is collected, processed, and presented in court, with an emphasis on the competing interests of crime control and individual liberties.
Prerequisite: CRIM 2003. (Typically offered: Irregular)

## CRIM 3723. Deviant Behavior. 3 Hours.

Sociological overview of disconcerting conduct, its definition, theoretical understandings and research. Specific topics may include: interpersonal violence, self-destructive disorders, controversial lifestyles, substance abuse, as well as the relationship between inequality and disturbing acts. Prerequisite: SOCI 2013. (Typically offered: Irregular)
This course is cross-listed with SOCI 3723.

## CRIM 399VH. Honors Course. 1-6 Hour.

Undergraduate honors thesis hours designed to engage in advanced undergraduate research under the direction of a faculty advisor. Prerequisite: Honors standing. (Typically offered: Fall and Spring) May be repeated for up to 12 hours of degree credit.

CRIM 4003. Internship in Criminal Justice and Criminology. 3 Hours.
Supervised experience in municipal, county or state criminal justice agency, or any other agency which is approved by instructor. Prerequisite: CRIM 2003. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

## CRIM 4013. SPECIAL TOPICS. 3 Hours.

Offerings vary; check for particular course topics offered. Designed to cover specialized topics in greater depth than regular survey courses provide. Prerequisite: Junior standing. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

## CRIM 403V. Individual Study. 1-3 Hour.

In-depth individual or group study with a faculty member on advanced sociological readings and/or to participate in supervised research as an experience-based course. Faculty permission required in advance of enrollment. Prerequisite: Instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

## CRIM 4063. Organizations in Society. 3 Hours.

Review of literature on work and organizations, with focus on race, class, gender inequalities, and interactions between society and organizations; discussion of topics related to white collar crime and deviant behavior inside modern corporations. Prerequisite: SOCI 2013. (Typically offered: Spring)
This course is cross-listed with SOCI 4063.

## CRIM 4143. Juvenile Justice. 3 Hours.

Examination of juvenile justice system and juvenile crime, including historical development of the system and treatment of juvenile delinquents along with legal, correctional, and treatment processes and philosophies. Emphasis on current issues facing delinquents, the system, and delinquency prevention in addition to trends in juvenile crime. Prerequisite: CRIM 2003. (Typically offered: Fall and Spring) This course is cross-listed with SOCI 4143.

## CRIM 4223. Criminal Violence. 3 Hours.

Explores definitions, patterns, explanations, and potential interventions of aggression and criminal violence. Discusses the temporal, spatial, and demographic patterns of violence in the United States. Assesses various explanations of violence and considers possible interventions. Examines the literature on the structural- and individual-level correlates of violent criminal offending. Prerequisite: CRIM 2003 and junior standing. (Typically offered: Spring)

## CRIM 4233. Death Penalty. 3 Hours.

Examines problems and social issues related to the death penalty in the U.S., including the history of capital punishment, Supreme Court decisions, how various jurisdictions seek the death penalty, the comparative costs of incarceration and execution, miscarriages of justice, and how the criminal justice system responds to these issues. Prerequisite: CRIM 2003 or SOCI 2013. (Typically offered: Irregular) This course is cross-listed with SOCI 4233.

## CRIM 4303. Spatial Analyses for Social Data. 3 Hours.

Focuses on learning about spatial data and how to use spatial analyses to detect patterns and answer research questions related to crime occurrence. Emphasizes how results translate to practitioner efforts and policy. (Typically offered: Spring)

CRIM 4443. Terrorism and Homeland Security. 3 Hours.
Examines the evolution of modern terrorism and homeland security, focusing primarily on the dynamics of American terrorist movements (ideologies, motives, and tactics). Social, political, and criminal justice responses to terrorism are also considered. Prerequisite: Junior standing. (Typically offered: Spring)

Data scientists make sense of huge sets of data to help businesses, governments, nonprofits and other organizations make smarter decisions. The university's interdisciplinary Bachelor of Science in Data Science will prepare students for a successful career in data science with a strategic skill set, including the ability to:

- Use and apply state-of-the-art technologies for data representation, retrieval, manipulation, storage, governance, understanding, analysis, privacy, and security.
- Develop descriptive, predictive and prescriptive models to abstract complex systems and organizational problems, and to use computational methods to draw data-supported conclusions.
- Use foundational knowledge and apply critical thinking skills to identify and solve problems, make decisions, and visualize data, all with an awareness of societal and ethical impacts.
- Adapt analytics concepts to interpret and communicate findings and implications to senior decision-makers.
- Work effectively in an interdisciplinary team and transfer findings between knowledge domains and to others with no domain experience.
- Communicate using technical and non-technical language in writing and verbally.

Three colleges at the university - the College of Engineering, the Fulbright College of Arts and Sciences, and the Sam M. Walton College of Business - contribute expertise to the overall major while providing deeper insight into the concentrations they offer, including:

## - Accounting Analytics

- Bioinformatics
- Biomedical and Healthcare Informatics
- Business Data Analytics
- Computational Analytics
- Cybersecurity Analytics
- Data Science Statistics
- Geospatial Data Analytics
- Music Industry Data Analytics
- Operations Analytics
- Social Data Analytics
- Supply Chain Analytics

## Requirements for B.S. in Data Science with Accounting Analytics Concentration

Below are the general requirements for a Bachelor of Science degree with a major in Data Science, followed by specific requirements for the Accounting Analytics Concentration. Below those is a recommended eight-semester plan to achieve those requirements in a timely fashion.

## Requirements for B.S. in Data Science

Each student in Data Science is required to complete 120 hours of coursework including the state minimum core (p. 81). To be eligible for graduation, all students must complete at least 60 hours of Data Science (DTSC) Core required classes at the University of Arkansas. Each student in Data Science is also required to complete an additional 20-21 hours (depending on the student's chosen concentration) of required and elective concentration courses to meet the requirements for a concentration.

Additional opportunities are available to enhance the educational experience of students in these areas. Students should consult their academic adviser for recommendations.

1 Students have demonstrated successful completion of the learning
indicators identified for learning outcome 2.1, by meeting the
prerequisites for MATH 2554.
2 Students must complete the State Minimum Core requirements
(p. 81) as outlined in the Catalog of Studies. The courses that meet
the state minimum core also fulfill many of the university's General
Education requirements (p. 72), although there are additional
considerations to satisfy the general education learning outcomes.
Students are encouraged to consult with their academic adviser when
making course selections.
${ }^{3}$ Students are required to complete 40 hours of upper-division courses
(3000-4000 level). It is recommended that students consult with their
adviser when making course selections.
Data Science Statistics and Computational Analytics Concentration
students are advised to select STAT 3013/STAT 3003 to meet the
prerequisites required in the concentration.

## Requirements for B.S. in Data Science with Business Data Analytics Concentration

Below are the general requirements for a Bachelor of Science degree with a major in Data Science, followed by specific requirements for the Business Data Analytics Concentration. Below those is a recommended eight-semester plan to achieve those requirements in a timely fashion.

## Requirements for B.S. in Data Science

Each student in Data Science is required to complete 120 hours of coursework including the state minimum core (p. 81). To be eligible for graduation, all students must complete at least 60 hours of Data Science (DTSC) Core required classes at the University of Arkansas. Each student in Data Science is also required to complete an additional 20-21 hours (depending on the student's chosen concentration) of required and elective concentration courses to meet the requirements for a concentration.

Additional opportunities are available to enhance the educational experience of students in these areas. Students should consult their academic adviser for recommendations.

Total Units in Sequence:
${ }^{1}$ Students have demonstrated successful completion of the learning indicators identified for learning outcome 2.1, by meeting the prerequisites for MATH 2554.
${ }^{2}$ Students must complete the State Minimum Core requirements (p. 81) as outlined in the Catalog of Studies. The courses that meet the state minimum core also fulfill many of the university's General Education requirements (p.72), although there are additional considerations to satisfy the general education learning outcomes. Students are encouraged to consult with their academic adviser when making course selections.
${ }^{3}$ Students are required to complete 40 hours of upper-division courses (3000-4000 level). It is recommended that students consult with their adviser when making course selections.
${ }^{4}$ Data Science Statistics and Computational Analytics Concentration students are advised to select STAT 3013/STAT 3003 to meet the prerequisites required in the concentration.

## Requirements for B.S. in Data Science with Social Data Analytics Concentration

Below are the general requirements for a Bachelor of Science degree with a major in Data Science, followed by specific requirements for the Social Data Analytics Concentration. Below those is a recommended eight-semester plan to achieve those requirements in a timely fashion.

## Requirements for B.S. in Data Science

Each student in Data Science is required to complete 120 hours of coursework including the state minimum core (p. 81). To be eligible for graduation, all students must complete at least 60 hours of Data Science (DTSC) Core required classes at the University of Arkansas. 3 Each student in Data Science is also required to complete an additional 20-21 hours (depending on the student's chosen concentration) of required and elective concentration courses to meet the requirements for a concentration.

Additional opportunities are available to enhance the educational experience of students in these areas. Students should consult their academic adviser for recommendations.

## Faculty

Alverson, Andrew James, Ph.D. (University of Texas at Austin), M.S. (lowa State University), B.S. (Grand Valley State University), Associate Professor, Department of Biological Sciences, 2012, 2018.
Barrett, David A., Ph.D., M.A. (University of Arkansas), B.A. (Hendrix College), Instructor, Department of Philosophy, 2014.
Cothren, Jackson David, Ph.D., M.S. (The Ohio State University),
B.S. (United States Air Force Academy), Professor, Department of Geosciences, Leica Geosystems Chair in Geospatial Imaging, 2004, 2020.

Cronan, Timothy P., Ph.D. (Louisiana Tech University), M.S. (South Dakota State University), B.S. (University of Southwestern Louisiana), Professor, Department of Information Systems, M.D. Matthews Endowed Chair in Information Systems, 1979.
Cummings, Michael, Ph.D. (University of Minnesota), J.D. and M.P.A.
(Brigham Young University), B.S. (Utah Valley), Assistant Professor, Department of Strategic, Entrepreneurship and Venture Innovation, 2017.
Fugate, Brian, Ph.D., M.B.A., B.S. (University of Tennessee), Professor, J.B. Hunt Transport Department of Supply Chain Management, Oren Harris Chair in Transportation, 2015, 2018.
Gauch, John Michael, Ph.D. (University of North Carolina at Chapel Hill), M.Sc., B.Sc. (Queen's University, Canada), Professor, Department of Computer Science and Computer Engineering, 2008.
Gruenewald, Jeffrey A., Ph.D. (Michigan State University), Professor, Department of Sociology and Criminology, 2019, 2022.
Harris, Casey Taggart, Ph.D., M.A. (Pennsylvania State University), B.S. (Texas A\&M University), Professor, Department of Sociology and Criminology, 2011, 2023.
Keiffer, Elizabeth, Ph.D., M.A. (University of Arkansas), B.S. (East Central University), Teaching Assistant Professor, Department of Information Systems, 2016, 2019.
Nakarmi, Ukash, Ph.D. (University at Buffalo), M.S. (Oklahoma State 3 University), Assistant Professor, Department of Computer Science and Computer Engineering, 2020.
3 Pohl, Edward A., Ph.D., M.S.R.E. (University of Arizona), M.S.S.E. (Air Force Institute of Technology), M.S.E.M. (University of Dayton), B.S.E.E. (Boston University), Professor, Department of Industrial Engineering, Twenty-First Century Professorship in Engineering, 2004, 2013.
Rao, Raj R., Ph.D. (University of Georgia), M.S. (University of Texas), M.Sc., B.E. (Birla Institute of Technology and Sciences, India), Professor, Department of Biomedical Engineering, 2016.
Richardson, Vernon J., Ph.D. (University of Illinois-Urbana-Champaign), M.B.A., B.S. (Brigham Young University), Distinguished Professor, William Dillard Department of Accounting, G. William Glezen Jr. Endowed Chair in Accounting, 2005, 2016.
Ridge, Jason, Ph.D., M.A., B.A. (Oklahoma State University), Associate Professor, Department of Strategic, Entrepreneurship and Venture Innovation, 2015, 2017.

Robinson, Samantha, Ph.D., M.S., B.S. (University of Arkansas), Teaching Associate Professor, Department of Mathematical Sciences, Julia A. Hicks Chair, 2015, 2022.
Rosales, Claudia, Ph.D., M.S. (University of Cincinnati), B.S. (Universidad Rafael Landivar), Assistant Professor, J.B. Hunt Transport Department of Supply Chain Management, 2021.
Rossetti, Manuel D., Ph.D., P.E., M.S.I.E. (The Ohio State University), B.S.I.E. (University of Cincinnati), University Professor, Department of Industrial Engineering, 1999, 2022.
Schubert, Karl, Ph.D. (University of Arkansas), M.S.Ch.E. (University of Kentucky), B.S.Ch.E (University of Arkansas), Professor of Practice, Department of Industrial Engineering, 2016.
Sullivan, Kelly M., Ph.D. (University of Florida), M.S.I.E., B.S.I.E. (University of Arkansas), Associate Professor, Department of Industrial Engineering, 2012, 2019.
Wu, Xintao, Ph.D. (George Mason University), M.E. (Chinese Academy of Space Technology), B.S. (University of Science and Technology of China), Professor, Department of Computer Science and Computer Engineering, Charles D. Morgan/Acxiom Graduate Research Chair, 2014, 2019.

## Courses

DASC 1003. Introduction to Data Science. 3 Hours.
Introduction to Data Science is a course providing an overview of Data Science and preparation of Data Science First Year students for the Data Science program and for choosing one of the Data Science program concentrations. Corequisite: MATH 2554 or MATH 2554 C or MATH 2445. Prerequisite: Students must be a DTSCBS or DTSCFR major. (Typically offered: Fall)

DASC 1003H. Honors Introduction to Data Science. 3 Hours.
Introduction to Data Science is a course providing an overview of Data Science and preparation of Data Science First Year students for the Data Science program and for choosing one of the Data Science program concentrations. Corequisite: MATH 2554 or MATH 2554C or MATH 2445. Prerequisite: Students must have honors standing and be a DTSCBS or DTSCFR major. (Typically offered: Fall) This course is equivalent to DASC 1003.

DASC 1011. Success in Data Science Studies. 1 Hour.
This course provides preparation for Data Science First Year students for the Data Science program and for learning about University campus resources for students. This course is focused on students who are not MATH 2554 Calculus I or MATH 2445 Calculus I with Review ready. Prerequisite: Students must be a Data Science Major. (Typically offered: Fall)

## DASC 1104. Programming Languages for Data Science. 4 Hours.

Programming Languages for Data Science provides a semester-long introduction to basic concepts, tools, and languages for computer programming using Python and R, two powerful programming languages used by data scientists. This class will introduce students to computer programming and provide them with the basic skills and tools necessary to efficiently collect, process, analyze, and visualize datasets. Students will gain hands-on experience with de novo programming in $R$ and Python, finding and utilizing packages, and working in both interactive (Jupyter and RStudio) and non-interactive (Unix) environments. Corequisite: Lab component. Prerequisite: Students must be a DTSCBS or DTSCFR major. (Typically offered: Fall)

DASC 1204. Introduction to Object Oriented Programming for Data Science. 4 Hours.
Introduction to Object Oriented Programming for Data Science, introduces objectoriented programming in JAVA. It covers object-oriented programming elements and techniques in JAVA, such as primitive types and expressions, basic I/O, basic programming structures, abstract data type, object class and instance, Methods, Java File I/O, object inheritance, collections and composite objects, advanced input / output: streams and files, and exception handling. Students will gain hands-on programming experience using JAVA. Corequisite: Lab component. Prerequisite: DASC 1104 and must be a DTSCBS or DTSCFR major. (Typically offered: Spring)

DASC 1223. Role of Data Science in Today's World. 3 Hours.
Role of Data Science in Today's World is a survey course providing an overview of the Data Science Curriculum and an introduction to the essential elements of data science: data collection and management; summarizing and visualizing data; basic ideas of statistical inference; predictive analytics and machine learning. Students will continue their hands-on experience using the Python and R programming languages and Jupyter notebooks. Prerequisite: DASC 1003 and DASC 1104 and must be a DTSCBS or DTSCFR major. (Typically offered: Spring)
DASC 1223H. Honors Role of Data Science in Today's World. 3 Hours.
Role of Data Science in Today's World is a survey course providing an overview of the Data Science Curriculum and an introduction to the essential elements of data science: data collection and management; summarizing and visualizing data; basic ideas of statistical inference; predictive analytics and machine learning. Students will continue their hands-on experience using the Python and R programming languages and Jupyter notebooks. Prerequisite: DASC 1003, DASC 1104, honors standing and must be a DTSCBS or DTSCFR major. (Typically offered: Spring)
This course is equivalent to DASC 1223.
DASC 188V. Special Topics in Data Science. 1-6 Hour.
Special Topics in Data Science is a course for data science topics not covered in other courses. Corequisite: Lab component. Prerequisite: Students must be a DTSCBS or DTSCFR major and Instructor Permission Only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.
DASC 188VH. Honors Special Topics in Data Science. 1-6 Hour.
Special Topics in Data Science is a course for data science topics not covered in other courses. Corequisite: Lab component. Prerequisite: Students must be a DTSCBS or DTSCFR major, have honors standing and by instructor permission only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.
This course is equivalent to DASC 188 V .
DASC 2103. Data Structures \& Algorithms. 3 Hours.
Data Structures \& Algorithms focuses on fundamental data structures and associated algorithms for computing and data analytics. Topics include the study of data structures such as linked lists, stacks, queues, hash tables, trees, and graphs, recursion, their applications to algorithms such as searching, sorting, tree and graph traversals, divide-and-conquer, greedy algorithms, and dynamic programming, and the theory of NP-completeness. Students will gain hands-on experience using Python or Java. Prerequisite: DASC 1204 and must be a DTSCBS major. (Typically offered: Spring)

## DASC 2113. Principles and Techniques of Data Science. 3 Hours.

Principles and Techniques in Data Science is an intermediate semester-long data science course that follows an overview of data science in today's world. This class bridges between introduction to data science and upper division data science courses as well as methods courses in other concentrations. This class equips students with essential basic elements of data science, ranging from database systems, data acquisition, storage and query, data cleansing, data wrangling, basic data summarization and visualization, and data estimation and modeling. Students will gain hands-on experience using Python and various packages in Python. Corequisite: Lab component. Prerequisite: MATH 2564 and student must be a DTSCBS major. (Typically offered: Fall)

DASC 2133. Data Privacy \& Ethics. 3 Hours.
Data Privacy and Ethics (DASC 2133) explores the intersection of ethics and contemporary (big) data analytics. In particular, we will discuss how data analytics impacts ethical issues like privacy, autonomy, transparency, discrimination, data ownership, and justice, while also investigating its impact on the cohesiveness of society and democracy. Pre- or Corequisite: DASC 1001 and must be a DTSCBS or DTSCFR major. (Typically offered: Fall)
DASC 2203. Data Management and Data Base. 3 Hours.
Data Management and Data Base focuses on the investigation and application of data science database concepts including DBMS fundamentals, database technology and administration, data modeling, SQL, data warehousing, and current topics in modern database management. Prerequisite: MATH 2564, DASC 1204 and students must be a DTSCBS major. (Typically offered: Spring)

DASC 2213. Data Visualization and Communication. 3 Hours.
Data Visualization and Communication is a seminar providing an essential element of data science: the ability to effectively communicate data analytics findings using visual, written, and oral forms. Students will gain hands-on experience using data visualization software and preparing multiple formats of written reports (technical, social media, policy) that build a data literacy and communication toolkit for interdisciplinary work. In essence, this is a course emphasizing finding and telling stories from data, including the fundamental principles of data analysis and visual presentation conjoined with traditional written formats. Prerequisite: DASC 1104 and DASC 1222 and students must be a DTSCBS major. (Typically offered: Fall)

## DASC 2594. Multivariable Math for Data Scientists. 4 Hours.

Multivariable Mathematics for Data Scientists provides an in depth look at the multivariate calculus and linear algebra necessary for a successful understanding of modeling for data science. Students will gain an understanding of the mathematical and geometric concepts used in optimization and scientific computation using mathematical and computational techniques. At the end of the course, students will be equipped with the calculus and linear algebra skills and knowledge to be successful in courses in optimization and advanced data science methods. Corequisite: Lab component. Prerequisite: MATH 2564 and DASC 1104 and student must be a DTSCBS major. (Typically offered: Fall)
DASC 290V. Special Topics in Data Science. 1-6 Hour.
Special Topics in Data Science is a course for data science topics not covered in other courses. Prerequisite: Students must be a DTSCBS or DTSCFR major and Instructor Permission Only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

DASC 290VH. Honors Special Topics in Data Science. 1-6 Hour.
Special Topics in Data Science is a course for data science topics not covered in other courses. Prerequisite: Honors standing and students must be a DTSCBS or DTSCFR major and Instructor Permission Only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.
This course is equivalent to DASC 290 V .

## DASC 3103. Cloud Computing and Big Data. 3 Hours.

Cloud Computing and Big Data covers: introduction to distributed data computing and management, MapReduce, Hadoop, cloud computing, NoSQL and NewSQL systems, Big data analytics and scalable machine learning, real-time streaming data analysis. Students will gain hands-on experience using Amazon AWS, MongoDB,
Hive, and Spark. Prerequisite: DASC 2594 and DASC 2203 and student must be a DTSCBS major. (Typically offered: Fall)

## DASC 3103H. Honors Cloud Computing and Big Data. 3 Hours.

Cloud Computing and Big Data covers: introduction to distributed data computing and management, MapReduce, Hadoop, cloud computing, NoSQL and NewSQL systems, Big data analytics and scalable machine learning, real-time streaming data analysis. Students will gain hands-on experience using Amazon AWS, MongoDB, Hive, and Spark. Prerequisite: DASC 2594, DASC 2203, honors standing and student must be a DTSCBS major. (Typically offered: Fall)
This course is equivalent to DASC 3103.

DASC 3203. Optimization Methods in Data Science. 3 Hours.
Optimization Methods in Data Science is an advanced mathematical course providing the foundations and concepts of optimization that are essential elements of machine learning algorithms in data science, ranging from mathematical optimization to convex optimization to unconstrained and constrained optimization to nonlinear optimization to stochastic optimization. Students will gain hands-on experience using Python and various optimization packages in Python. Prerequisite: DASC 2113 and DASC 2594 and student must be a DTSCBS major. (Typically offered: Spring)

## DASC 3213. Statistical Learning. 3 Hours.

Statistical Learning is a course providing an in depth look at the theory and practice of applied linear modeling for data science: including model building, selection, regularization, classification and prediction. Students will gain hands-on experience using statistical software to learn from data using applied linear models. Prerequisite: DASC 1104 and ((MATH 3013 and STAT 3003) or (INEG 2314 and INEG 2323)) and student must be a DTSCBS major. (Typically offered: Spring)

## DASC 3223. Cyber Crime and Cyber Terrorism. 3 Hours.

Cyber Crime and Cyber Terrorism (CCCT) is an overview of the study of cybercrime and cyber terrorism for students of data science, criminology, and law discussing crimes committed via Internet, ranging from various white-collar financial crimes to the spread of viruses, malicious code, stalking, bullying, and web-based exploitation. Criminological, social-psychological explanations will be examined and the investigative and legal strategies employed to combat cyber-crime and cyber terrorism will be discussed. Prerequisite: DASC 2113 and must be a DTSCBS major. (Typically offered: Fall)

## DASC 390V. Special Topics in Data Science. 1-6 Hour.

Special Topics in Data Science is a course for data science topics not covered in other courses. Prerequisite: Student must be a DTSCBS or DTSCFR major and by Permission Only. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

## DASC 390VH. Honors Special Topics in Data Science. 1-6 Hour.

Special Topics in Data Science is a course for data science topics not covered in other courses. Prerequisite: Student must have honors standing, be a DTSCBS or DTSCFR major and by permission only. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
This course is equivalent to DASC 390V.
DASC 400VH. Honors Thesis in Data Science. 1-3 Hour.
Honors Thesis in Data Science (DASC 400VH) is a course to develop an Honors Thesis in Data Science. The Honors Thesis can be an independent thesis or can be related to the Data Science Practicum I and II Courses Project. Prerequisite: Student must be a DTSCBS major, have honors standing, and by Permission Only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

## DASC 4113. Machine Learning. 3 Hours.

Machine learning covers: logistic regression, ensemble methods, support vector machines, kernel methods, neural networks, Bayesian inference, reinforcement learning, learning theory, and their applications in text, image, and web data processing. Students will gain hands-on experience of developing machine learning algorithms using Python and scikit-learn. Prerequisite: DASC 2103 and DASC 3203 and student must be a DTSCBS major. (Typically offered: Fall)

## DASC 4113H. Honors Machine Learning. 3 Hours.

Machine learning covers: logistic regression, ensemble methods, support vector machines, kernel methods, neural networks, Bayesian inference, reinforcement learning, learning theory, and their applications in text, image, and web data processing. Students will gain hands-on experience of developing machine learning algorithms using Python and scikit-learn. Prerequisite: DASC 2103, DASC 3203, honors standing and student must be a DTSCBS major. (Typically offered: Fall) This course is equivalent to DASC 4113.

DASC 4123. Social Problems in Data Science and Analytics. 3 Hours.
This course explores the ways data analytics and data science are impacted by or intersect with issues of social justice, poverty and economic inequality, racial and ethnic relations, gender, crime, education, health and healthcare, and other contemporary social problems. Prerequisite: DASC 1222 and student must be a DTSCBS major. (Typically offered: Fall)

DASC 4533. Information Retrieval. 3 Hours.
Information Retrieval is a course providing expertise in processing unstructured data as a key component of data science. It covers text processing, file structures, ranking algorithms, query processing, and web search. Students will gain handson experience developing their own search engine from scratch, using Python, C, C++, or Java on a Linux server and making their search engine web accessible. Note: Prior user-level knowledge of Linux for file and directory management and remote login is required for this course. Corequisite: Lab component. Prerequisite: DASC 2103 and student must be a DTSCBS major. (Typically offered: Irregular)

## DASC 4892. Data Science Practicum I. 2 Hours.

Application of data science, analytics, business intelligence, data mining, machine learning, and data visualization to existing problems. Data Science techniques using current and relevant software and problem-solving methods are applied to current problems for presentation to management. This is the first semester of the required full-year multi-college interdisciplinary practicum using real-world data to solve realworld problems. Prerequisite: DASC 2113, DASC 2213, DASC 3203, ((STAT 3013 and STAT 3003) or (INEG 2314 and INEG 2323)), and student must be a DTSCBS major. Pre- or Corequisite: DASC 3213, DASC 4113, and DASC 4123. (Typically offered: Fall)
DASC 4892H. Honors Data Science Practicum I. 2 Hours.
Application of data science, analytics, business intelligence, data mining, machine learning, and data visualization to existing problems. Data Science techniques using current and relevant software and problem-solving methods are applied to current problems for presentation to management. This is the first semester of the required full-year multi-college interdisciplinary practicum using real-world data to solve realworld problems. Prerequisite: DASC 2113, DASC 2213, DASC 3203, ((STAT 3013 and STAT 3003) or (INEG 2314 and INEG 2323)), honors standing and the student must be a DTSCBS major. Pre- or Corequisite: DASC 3213, DASC 4113, and DASC 4123. (Typically offered: Fall)
This course is equivalent to DASC 4892.
DASC 490V. Special Topics in Data Science. 1-6 Hour.
Special Topics in Data Science is a course for data science topics not covered in other courses. Prerequisite: Students must be a DTSCBS major and Instructor Permission Only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

DASC 490VH. Honors Special Topics in Data Science. 1-6 Hour.
Special Topics in Data Science is a course for data science topics not covered in other courses. Prerequisite: Honors standing and students must be a DTSCBS major and Instructor Permission Only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.
This course is equivalent to DASC 490 V .

## DASC 4993. Data Science Practicum II. 3 Hours.

Application of data science, analytics, business intelligence, data mining, machine learning, and data visualization to existing problems. Data Science techniques using current and relevant software and problem-solving methods are applied to current problems for presentation to management. This is the second semester of the required full-year multi-college interdisciplinary practicum using real-world data to solve real-world problems. Corequisite: Lab component. Prerequisite: DASC 4892 with a grade of $C$ or better and student must be a DTSCBS major. (Typically offered: Spring)

DASC 4993H. Honors Data Science Practicum II. 3 Hours.
Application of data science, analytics, business intelligence, data mining, machine learning, and data visualization to existing problems. Data Science techniques using current and relevant software and problem-solving methods are applied to current problems for presentation to management. This is the second semester of the required full-year multi-college interdisciplinary practicum using real-world data to solve real-world problems. Corequisite: Lab component. Prerequisite: DASC 4892 with a grade of $C$ or better, and student must be a DTSCBS major, and have honors standing. (Typically offered: Spring)
This course is equivalent to DASC 4993.

## Earth Science (ERSC)

Jill A. Marshall

Program Director
116 Gearhart Hall
479-575-2420
Email: jillm@uark.edu
Earth Science Webpage (https://fulbright.uark.edu/departments/ geosciences/undergraduate/erscbs.php)

Fulbright College offers a major in earth science leading to the Bachelor of Science degree. Prospective secondary teachers may plan a program, in cooperation with the College of Education, which will satisfy the teacher licensure requirements. Students interested in environmental problems, teaching earth science in public schools, or wishing to pursue graduate work in either geography or geology will obtain much of the necessary foundation through this degree. Because the program outlined below lists only minimum science requirements, it is expected that most students will use some of their elective credit hours to strengthen their mathematics and science backgrounds in areas other than geography and geology. These areas of additional study will be determined through consultation between the student and the adviser.

## Requirements for the B.S. Degree with a Major in Earth

Science: In addition to the University Core (http://catalog.uark.edu/ undergraduatecatalog/academicregulations/universitycore/) requirements and the Fulbright College of Arts and Sciences Graduation Requirements (p. 273), the following course requirements must be met. Bolded courses from the list below may be applied to portions of the University/ state minimum core requirements.

## Basic Courses

Biology 8
Chemistry or Physics 8

GEOS 1113 Physical Geology (ACTS Equivalency = GEOL 4
\& GEOS 1111L 1114 Lecture)
and Physical Geology Laboratory (ACTS Equivalency = GEOL 1114 Lab)
GEOS 1133 Earth Science (ACTS Equivalency = GEOL 1124
\& GEOS 1131L Lecture)
and Earth Science Laboratory (ACTS Equivalency = GEOL 1124 Lab)
Select one of the following:
MATH 2043 Survey of Calculus (ACTS Equivalency = MATH 2203)

MATH 2053 Finite Mathematics
MATH 2183 Mathematical Reasoning in a Quantitative World
MATH 2554 Calculus I (ACTS Equivalency = MATH 2405)

Total Hours 65-66

1 World language courses taken are dependent on placement level in sequence.

Writing Requirement:The college writing requirement is to be met by completion of a term paper deemed satisfactory by the student's adviser and instructor of an upper-level geoscience course. The college writing requirement may also be met by the completion of an honors thesis.

## Earth Science B.S. <br> Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p.67) for university requirements of the program. Core requirement hours may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute a three-hour (or more) general elective in place of a core area.

| First Year |  |  |
| :---: | :---: | :---: |
|  | Fall | Spring |
| ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013) | 3 |  |
| Select one of the following: | 3-4 |  |
| MATH 1203 College Algebra (ACTS Equivalency $=$ MATH 1103) |  |  |
| MATH 2043 Survey of Calculus (ACTS Equivalency $=$ MATH 2203) ${ }^{1}$ |  |  |
| MATH 2053 Finite Mathematics ${ }^{1}$ |  |  |
| MATH 2183 Mathematical Reasoning in a Quantitative World ${ }^{1}$ |  |  |
| MATH 2554 Calculus I (ACTS Equivalency = MATH 2405) ${ }^{1}$ |  |  |
| GEOS 1113 Physical Geology (ACTS Equivalency <br> = GEOL 1114 Lecture) | 4 |  |
| \& GEOS 1111L Physical Geology Laboratory (ACTS Equivalency = GEOL 1114 Lab) |  |  |
| 1013 Elementary II World Language Course (or higher level) | 3 |  |

University/State Core US History requirement 3

ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023)
Select one of the following MATH if still needed, else General Elective:

MATH 2043 Survey of Calculus (ACTS
Equivalency $=$ MATH 2203) ${ }^{1}$
MATH 2053 Finite Mathematics ${ }^{1}$
MATH 2183 Mathematical Reasoning in a Quantitative World ${ }^{1}$
MATH 2554 Calculus I (ACTS Equivalency = MATH 2405) ${ }^{1}$
General Elective
GEOS 1133 Earth Science (ACTS Equivalency =
GEOL 1124 Lecture)
\& GEOS 1131L Earth Science Laboratory (ACTS
Equivalency $=$ GEOL 1124 Lab)
2003 Intermediate I World Language Course (or higher level)
University/State Core Fine Arts or Humanities
Course requirement
Year Total:

| Second Year | Fall | Units <br> Spring |
| :--- | ---: | ---: |
| GEOS 2313 Mineralogy | 3 |  |
| CHEM or PHYS Course (as needed) | 4 |  |
| University/State Core Humanities or Fine Arts <br> Course requirement (as needed) | 3 |  |
| University/State Core Social Science requirement <br> General Elective | 3 |  |
| ASTR 2003 Survey of the Universe (ACTS | 3 | 4 |
| Equivalency = PHSC 1204 Lecture) <br> \& ASTR 2001L Survey of the Universe Laboratory <br> (ACTS Equivalency = PHSC 1204 Lab) <br> GEOS 3413 Sedimentary Geology <br> CHEM or PHYS Course (as needed) <br> University/State Core Social Science requirement <br> Year Total: |  | 3 |
| Third Year | 16 | 4 |

$\begin{array}{ll}\text { GEOS } 3043 \text { Sustaining Earth } & 3 \\ \text { BIOL Course (as needed) } & 4\end{array}$
Advanced Level Elective ${ }^{1} 3$
GEOS 4033 Hydrogeology (Sp) 3
General Elective 1
Year Total: 16
BIOL Course (as needed) 4
GEOS 3023 Introduction to Cartography ${ }^{1,2} 3$
University/State Core Social Science requirement 3
Advanced Level Elective ${ }^{1}$
Advanced Level Elective ${ }^{1}$

Units

Units

| Fourth Year | Units |  |
| :---: | :---: | :---: |
|  | Fall | Spring |
| Select one of the following: <br> GEOS 4353 Meteorology (as needed) ${ }^{1,2}$ or Advanced Level Elective ${ }^{1}$ | 3 |  |
| Upper Level GEOS Course ${ }^{1,2}$ | 3 |  |
| 3000-plus Level Elective ${ }^{1}$ | 3 |  |
| General Electives | 6 |  |
| GEOS 4924 Earth System History (ACTS Equivalency = PHSC 1104) |  | 4 |
| Select one of the following GEOS 4363 Climatology or Advanced Level Elective ${ }^{1}$ |  | 3 |
| Upper Level GEOS Course ${ }^{1,2}$ |  | 3 |
| 3000-plus Level Elective ${ }^{1}$ |  | 3 |
| Year Total: | 15 | 13 |

## Total Units in Sequence:

${ }^{1}$ Meets 40 -hour advanced credit hour requirement. See College Academic Regulations (p. 273).
2 Meets 24-hour rule ( 24 hours of 3000-4000 level courses in Fulbright College), in addition to meeting the 40 -hour rule. See College Academic Regulations (p. 273).

## Teacher Licensure Requirements:

Students interested in pursuing a minor in STEM Education or Secondary Teacher Licensure in mathematics, biology, chemistry, physics, or computer science at the undergraduate level should consult with a STEM Education faculty adviser, teach@uark.edu. Another option to obtain secondary teacher licensure is to complete the one-year Master of Arts in Teaching (http://catalog.uark.edu/undergraduatecatalog/ collegesandschools/jwilliamfulbrightcollegeofartsandsciences/ mathematicalsciencesmasc/graduatecatalog/programsofstudy/ teachereducation/).

## Courses

GEOS 1111L. Physical Geology Laboratory (ACTS Equivalency = GEOL 1114 Lab). 1 Hour.
Laboratory exercises concerning the identification of rocks and minerals, use of aerial photographs and topographic maps, and several field trips. Pre- or Corequisite: GEOS 1113. (Typically offered: Fall, Spring and Summer)
GEOS 1111M. Honors Physical Geology Laboratory. 1 Hour.
Survey of geological processes and products and their relationships to landforms, natural resources, living environments, and human beings. Lecture 3 hours, laboratory 2 hours per week. Corequisite: GEOS 1113H. (Typically offered: Fall) This course is equivalent to GEOS 1111L.
GEOS 1113. Physical Geology (ACTS Equivalency = GEOL 1114 Lecture). 3 Hours.
Survey of geological processes and products, and their relationships to landforms, natural resources, living environments and human beings. Corequisite: GEOS 1111L. (Typically offered: Fall, Spring and Summer)

GEOS 1113H. Honors Physical Geology. 3 Hours.
Survey of geological processes and products and their relationships to landforms, natural resources, living environments, and human beings. Lecture 3 hours, laboratory 2 hours per week. Corequisite: GEOS 1111M. (Typically offered: Irregular)
This course is equivalent to GEOS 1113.
GEOS 1123. Human Geography (ACTS Equivalency = GEOG 1113). 3 Hours. Basic course in human geography stressing the interrelationships between the natural factors of the environment and man's activities, especially the role of geography in the understanding of social problems and economic and political activities. (Typically offered: Fall and Spring)

## GEOS 1123H. Honors Human Geography. 3 Hours.

Basic course in human geography stressing the interrelationships between the natural factors of the environment and man's activities, especially the role of geography in the understanding of social problems and economic and political activities. Prerequisite: Honors candidacy. (Typically offered: Fall and Spring) This course is equivalent to GEOS 1123.
GEOS 1131L. Earth Science Laboratory (ACTS Equivalency = GEOL 1124 Lab). 1 Hour.
Laboratory exercises concerning human interactions with the physical environment including the study of earthquakes, volcanoes, flooding, erosion, mass wasting, water supply and contamination, and waste disposal. (Typically offered: Fall and Spring)
GEOS 1133. Earth Science (ACTS Equivalency = GEOL 1124 Lecture). 3 Hours.
The application of earth science principles and knowledge of problems created by human occupancy and exploitation of the physical environment. (Typically offered: Fall and Spring)

## GEOS 1154. Introduction to Geology for Science Majors. 4 Hours.

Survey of geological processes and materials and their relationships to landforms, natural resources, environments, and human beings. Students will understand the principles of physical geology, Earth's internal structure, plate tectonics, and geologic time. Students may not receive degree credit for both GEOS 1113/GEOS 1111L and GEOS 1154. Corequisite: Lab component. Prerequisite: Freshman or sophomore standing, or by instructor consent. (Typically offered: Fall)
GEOS 2003. World Regional Geography (ACTS Equivalency = GEOG 2103). 3 Hours.
Survey of problems, development potential, and physical and human resources of the developing and developed world. (Typically offered: Fall and Spring)
GEOS 2003H. Honors World Regional Geography. 3 Hours.
Survey of problems, development potential, and physical and human resources of the developing and developed world. Prerequisite: Honors candidacy. (Typically offered: Fall and Spring)
This course is equivalent to GEOS 2003.

## GEOS 2313. Mineralogy. 3 Hours.

General principles of mineralogy, study and identification of common minerals, igneous \& metamorphic rocks using hand samples. Prerequisite: (GEOS 1113 or GEOS 1154) and CHEM 1103. Corequisite: Lab component. (Typically offered: Fall)

## GEOS 2813. Digital Earth. 3 Hours.

This course introduces the fundamental concepts and practical geospatial techniques of the digital earth initiative. Students will learn how digital geographical information is produced (also referred to as geospatial data) and utilized in a variety of economic, environmental, and scientific applications. The class will concentrate on how digital geospatial data are produced, integrated and applied in daily life and will review a variety of environmental and socioeconomic applications. (Typically offered: Fall)

## GEOS 2813H. Honors Digital Earth. 3 Hours.

This course introduces the fundamental concepts and practical geospatial techniques of the digital earth initiative. Students will learn how digital geographical information is produced (also referred to as geospatial data) and utilized in a variety of economic, environmental, and scientific applications. The class will concentrate on how digital geospatial data are produced, integrated and applied in daily life and will review a variety of environmental and socioeconomic applications. Prerequisite: Honors standing. (Typically offered: Fall)
This course is equivalent to GEOS 2813.

## GEOS 3013. Foundations of Geospatial Data Analysis. 3 Hours.

Basic mathematical tools applied in geospatial technology, including trigonometry in mapping, linear algebra in remote sensing, optimization in spatial decision support, and graph theory in routing. Course develops the framework for spatial data analysis and decision support. Students may receive credit for the course through testing. Prerequisite: GEOS 3543. (Typically offered: Fall and Spring)

GEOS 3023. Introduction to Cartography. 3 Hours.
Students learn basic principles of map design, cartographic theory and field surveying to produce a variety of computer-generated maps. An introductory course designed for students in a variety of different disciplines using AutoCad software and various new technologies. Field trips may be required. (Typically offered: Fall)

GEOS 3043. Sustaining Earth. 3 Hours.
Theory and growth of conservation and sustainability, the wise use of the major natural resources of the United States. This course meets the requirement in conservation and sustainability for teachers. Prerequisite: Junior standing. (Typically offered: Fall)

## GEOS 3043H. Honors Sustaining Earth. 3 Hours.

Theory and growth of conservation and the wise use of the major natural resources of the United States. This course meets the requirement in conservation for teachers. Prerequisite: Junior standing. (Typically offered: Fall)
This course is equivalent to GEOS 3043.
GEOS 3063. Geology of Arkansas. 3 Hours.
A survey of the distribution, genesis, and age of the rocks, fossils, structures, landforms and geological processes of Arkansas. Equivalent to two hours of lecture per week. Field trips required. Prerequisite: (GEOS 1113 or GEOS 1113H or GEOS 1154). (Typically offered: Spring)

GEOS 3103. Geospatial Technologies Computational Toolkit. 3 Hours. Basic computational tools and processes applied in geospatial software, related computer hardware components, systems and applications software, and spatial database fundamentals. Python, including SciPy and NumPy, geospatial implementations will be emphasized. No programming experience is required. Students may receive credit for the course through testing. Prerequisite: GEOS 3543. (Typically offered: Fall and Spring)

## GEOS 3213. Principles of Remote Sensing. 3 Hours.

Fundamental concepts of remote sensing of the environment. Optical, infrared, microwave, LIDAR, and in situ sensor systems are introduced. Remote sensing of vegetation, water, urban landscapes, soils, minerals, and geomorphology is discussed. The course includes laboratory exercises in GIS software and field spectroscopy. (Typically offered: Fall)

## GEOS 3333. Oceanography. 3 Hours.

The sea, its landforms; its winds and currents as related to the atmosphere, world climates, and world trade; its basin as avenues for continental drift; its waters as habitat for plant and animal life; its marine and submarine resources as presently and potentially useful to man. Offered as physical science. Prerequisite: Junior standing. (Typically offered: Fall)

GEOS 3413. Sedimentary Geology. 3 Hours.
An introductory study of sedimentary rocks from the standpoint of classification, field and laboratory description, genesis, and preservation. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: GEOS 2313. (Typically offered: Spring)

## GEOS 3514. Structural Geology. 4 Hours.

Survey of deformational features and their geological significance in the crust of the earth. Lecture 3 hours per week. Corequisite: Lab component. Prerequisite: GEOS 1113 or GEOS 1154. (Typically offered: Spring)
GEOS 3543. Geospatial Applications and Information Science. 3 Hours.
An introduction to the methods and theory underlying the full range of geographic information science and collateral areas - including GNSS, remote sensing, cadastral, spatial demographics and others. (Typically offered: Fall and Spring) This course is cross-listed with ANTH 3543.

## GEOS 3553. Spatial Analysis Using ArcGIS. 3 Hours.

Applications of analysis of spatial data using ArcGIS tools in map design, on-line mapping, creating geodatabases, accessing geospatial data, geo-processing, digitizing, geocoding, spatial analysis including basic spatial statistics, analysis of spatial distributions and patterning and 3D application using ArcGIS 3D Analyst. Prerequisite: GEOS 3543. (Typically offered: Fall and Spring)

## GEOS 3563. Geospatial Data Mining. 3 Hours.

Basic tools for analyzing, summarizing and visualizing geospatial data. Exploratory data and spatial data analysis, probability distributions and application, single and multivariate analysis and hypothesis testing, and spatial smoothing and interpolation. Emphasis will be on problem solving in geospatial settings using the R statistical language. Prerequisite: GEOS 3543 and (GEOS 3013 or MATH 2554 or MATH 2043 or DASC 2594) and (GEOS 3103 or DASC 1104 or DASC 2113). (Typically offered: Fall and Spring)

## GEOS 3593. Introduction to Geodatabases. 3 Hours.

Fundamental concepts and applications of geospatial databases. Schema development and spatial data models for geodata. Spatial and attribute query and optimization, properties and structures of relational and object-oriented geodatabases. Spatial extensions of SQL, spatial indexing, measurement, and geometry. Prerequisite: GEOS 3543 and (GEOS 3013 or MATH 2554 or MATH 2043 or DASC 2594) and (GEOS 3103 or DASC 1104 or DASC 2113). (Typically offered: Fall and Spring)

GEOS 360V. Undergraduate Special Problems. 1-6 Hour.
Library, laboratory, or field research in different phases of geology. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

## GEOS 3733. Geospatial Data Science in Public Health. 3 Hours.

Introduction to geospatial data science, including geographic information systems (GIS) and related technologies, with an emphasis on their practical applications in the fields of public health, global health, healthcare analytics, healthcare administration, and other health-related fields. (Typically offered: Fall)

## GEOS 3873. Geological Data Analysis. 3 Hours.

Quantitative methods and techniques for analysis and interpretation of geological data. Corequisite: Lab component. Pre- or corequisite: MATH 2564. (Typically offered: Spring)

GEOS 3901. Junior Honors Course. 1 Hour.
Special honors research in geology. One hour credit each semester. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer)
GEOS 3911. Junior Honors Course. 1 Hour.
Special honors research in geology. One hour credit each semester. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer)

## GEOS 399VH. Honors Course. 1-6 Hour.

Honors course. Prerequisite: Junior standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

## GEOS 4033. Hydrogeology. 3 Hours.

Occurrence, movement, and interaction of water with geologic and cultural features. Lecture 3 hours per week. Corequisite: Lab component. Prerequisite: MATH 2043 or MATH 2554, and GEOS 3514. (Typically offered: Spring)

## GEOS 4043. Geography of the Middle East. 3 Hours.

Physical and cultural landscapes, natural and cultural resources, art and architecture, land use, political history, OPEC, and current problems of North Africa and the Middle East region west of Afghanistan are discussed. Class participation, discussions, slides and films, and student presentations will round out the class. Prerequisite: Junior standing. (Typically offered: Fall)

## GEOS 4043H. Honors Geography of the Middle East. 3 Hours.

Physical and cultural landscapes, natural and cultural resources, art and architecture, land use, political history, OPEC, and current problems of North Africa and the Middle East region west of Afghanistan are discussed. Class participation, discussions, slides and films, and student presentations will round out the class.
Prerequisite: Junior standing. (Typically offered: Irregular)
This course is equivalent to GEOS 4043.

## GEOS 4053. Geomorphology. 3 Hours.

A quantitative, mechanistic overview of surface processes and landscape evolution. Lecture 2 hours, laboratory 3 hours per week. One to two field trips on weekends (2 day total) are required during the semester. Corequisite: Lab component. Prerequisite: GEOS 3873 or instructor consent. (Typically offered: Spring)

GEOS 4063. Principles of Geochemistry. 3 Hours.
Introduction to fundamental principles of geochemistry from historic development to modern concepts. Prerequisite: CHEM 1121L, CHEM 1123 and GEOS 2313. (Typically offered: Fall)

GEOS 4073. Urban Geography. 3 Hours.
Areal patterns of modern urban regions and the focus shaping these patterns. Emphasis is placed on American urban areas and their evolution and functional areas. Field work. Prerequisite: Junior standing. (Typically offered: Spring)

## GEOS 4083. Economic Geology. 3 Hours.

Introduction to mineral deposits used as economic resources. Covers basic geology and geochemistry of mineral deposit formations and the formation of major classes of deposits. Examines the relationship between the distribution of ores, oil, gas, coal, and Plate Tectonics. Explores environmental issues associated with the extraction of earth resources. Prerequisite: GEOS 2313. (Typically offered: Irregular)

## GEOS 4093. History and Philosophy of Geography. 3 Hours.

This course familiarizes students with the history of geography, the contributions of geographers to scientific thought and theory, and research techniques that are used in geography. Emphasis is given to the integration of statistical and spatial analysis, and their applications in field research. The course includes short fieldbased projects in and around Northwest Arkansas. (Typically offered: Spring Even Years)

## GEOS 410V. Special Problems in Geosciences. 1-6 Hour.

Designed to meet the needs of students who wish to study one particular geographic topic in some detail. Prerequisite: Junior standing. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

## GEOS 410VH. Honors Special Problems in Geosciences. 1-6 Hour.

Designed to meet the needs of students who wish to study one particular geographic topic in some detail. Prerequisite: Junior standing. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.
This course is equivalent to GEOS 410 V .

## GEOS 4113. Global Change. 3 Hours.

Examines central issues of global change including natural and human induced climate change, air pollution, deforestation, desertification, wetland loss urbanization, and the biodiversity crisis. The U.S. Global Change Research Program is also examined. (Typically offered: Spring)

GEOS 4113H. Honors Global Change. 3 Hours.
Examines central issues of global change including natural and human induced climate change, air pollution, deforestation, desertification, wetland loss urbanization, and the biodiversity crisis. The U.S. Global Change Research Program is also examined. Prerequisite: Honors candidacy. (Typically offered: Spring) This course is equivalent to GEOS 4113.

## GEOS 4153. Karst Hydrogeology. 3 Hours.

Assessment of ground water resources in carbonate rock terrains; relation of ground water and surface water hydrology to karst; quantification of extreme variability in karst environments; data collection rationale. Field trips required. Prerequisite: GEOS 4033. (Typically offered: Irregular)

GEOS 4223. Stratigraphy and Sedimentation. 3 Hours.
Introductory investigation of stratigraphic and sedimentologic factors important to the study of sedimentary rocks. Lecture 2 hours, laboratory 3 hours per week. A required weekend, two-day field trip will be conducted during the semester. Corequisite: Lab component. Prerequisite: GEOS 3413. (Typically offered: Fall)

## GEOS 4233. Geography of Religion \& Sacrality. 3 Hours.

Explores the spatial nature of the World's major faiths and religious institutions, focusing on the distribution and origins of these religions. Examines the religious beliefs, rituals, architecture, demographics, and art in different societies, cultures, and countries. Considers the tenets and practices of what is sacred and/or spiritual, held in common by a group or community. Prerequisite: Junior or senior standing. (Typically offered: Irregular)

## GEOS 4243. Political Geography. 3 Hours.

Contemporary world political problems in their geographic context. Development of the principles of political geography with emphasis upon the problems of Eastern Europe, Africa, and Southeast Asia. Prerequisite: Junior standing. (Typically offered: Fall Odd Years)

GEOS 4253. Petroleum Geology. 3 Hours.
Distribution and origin of petroleum. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: Geology major and senior standing. (Typically offered: Fall)

GEOS 4263. Geospatial Data Science - Sources and Characteristics. 3 Hours.
Covers the wide range of geospatial data sources and characteristics with emphasis on data science applications through hands-on experience recognizing the unique requirements of major sources. Techniques for the integration of disparate, heterogeneous data sets will be covered. Corequisite: GEOS 3563. Prerequisite: GEOS 3543. (Typically offered: Fall)

GEOS 430V. Internship in Physical Geography. 3-6 Hour.
Supervised experience in municipal, county, state or private natural resource management agency, or any other such organization approved by instructor. (Typically offered: Fall, Spring and Summer)

## GEOS 4333. Igneous and Metamorphic Petrology. 3 Hours.

Elementary to advanced study of the origin and evolution of igneous and metamorphic rocks in a variety of plate tectonics settings. Lecture 2 hours, Laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: GEOS 2313. (Typically offered: Spring)

GEOS 4353. Meteorology. 3 Hours.
Examination of the atmospheric processes that result in multifarious weather systems. Offered as physical science. Prerequisite: Junior standing. (Typically offered: Fall)

## GEOS 4363. Climatology. 3 Hours.

Fundamentals of topical climatology followed by a study of regional climatology. Offered as physical science. Prerequisite: GEOS 1133 or GEOS 4353. (Typically offered: Spring)

## GEOS 437V. Geology Field Trip. 1-2 Hour.

Camping field trip to areas of geologic interest, usually conducted during Spring Break. (Typically offered: Spring) May be repeated for up to 4 hours of degree credit.

GEOS 4383. Hazard \& Disaster Assessment, Mitigation, Risk \& Policy. 3 Hours. Comprehensive introduction to interdisciplinary approaches to natural and environmental hazards and risk. Hazards and disaster assessment, mitigation, and policy are the focus of the class. Prerequisite: Junior or senior standing. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

GEOS 4383H. Honors Hazard \& Disaster Assessment, Mitigation, Risk \& Policy. 3 Hours.
Comprehensive introduction to interdisciplinary approaches to natural and environmental hazards and risk. Hazards and disaster assessment, mitigation, and policy are the focus of the class. Prerequisite: Junior or senior standing. (Typically offered: Spring)
This course is equivalent to GEOS 4383.
GEOS 4393. American Public Lands \& Policy. 3 Hours.
The course examines the role of American federal public lands in 19th-21st century geography, history, policy, and art. It investigates the growth of conservation, preservation, and management movements in the US by looking at America's national parks, forests, dams, wildlife refuges, wilderness areas, managed and agricultural lands. Prerequisite: Junior or senior standing. (Typically offered: Irregular)

## GEOS 4393H. Honors American Public Lands \& Policy. 3 Hours.

The course examines the role of American federal public lands in 19th-21st century geography, history, policy, and art. It investigates the growth of conservation, preservation, and management movements in the US by looking at America's national parks, forests, dams, wildlife refuges, wilderness areas, managed and agricultural lands. Prerequisite: Honors standing and Junior or senior standing. (Typically offered: Irregular)
This course is equivalent to GEOS 4393.

## GEOS 4433. Geophysics. 3 Hours.

Derivation from physical principles, of the geophysical methods for mapping the Earth. Computational methods of converting gravity, magnetic, radiometric, electrical, and seismic data into geologic information. Lecture 3 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: MATH 2564 and PHYS 2033 and PHYS 2031L and GEOS 3514. (Typically offered: Irregular)

GEOS 4473. Applied Climatology. 3 Hours.
Applied climatology involves the use of climatic data to solve a variety of social, economic and environmental problems, such as for clients in agriculture, water and energy management. The basic purpose of applied climatology is to help society, at all scales and levels, to achieve a better adjustment to the climatic environment. (Typically offered: Fall)

GEOS 4493. Geography of Political Violence. 3 Hours.
This seminar focuses on the rise of civil conflict in the post-World War II world. We are particularly interested in understanding the institutional challenges facing countries that experience such conflict. The class will develop a contextuallyinformed understanding of the international system and how it is shaped by civil war. Prerequisite: Junior or senior standing. (Typically offered: Fall Even Years) This course is cross-listed with INST 4103 H .

## GEOS 4493H. Honors Geography of Political Violence. 3 Hours.

This seminar focuses on the rise of civil conflict in the post-World War II world. We are particularly interested in understanding the institutional challenges facing countries that experience such conflict. The class will develop a contextuallyinformed understanding of the international system and how it is shaped by civil war. Prerequisite: Junior or senior standing and honors standing. (Typically offered: Fall Even Years)
This course is cross-listed with GEOS 4493, INST 4103H.

## GEOS 4523. Cartographic Design and Production. 3 Hours.

This course addresses advanced cartographic concepts (i.e. visual hierarchy, aesthetics, image cognition) and production techniques as they relate to computerassisted mapping. Students produce a variety of maps using Adobe Illustrator (CS $4-6)$ software to build a map portfolio. Field trips may be required. Prerequisite: GEOS 3023. (Typically offered: Spring)

## GEOS 4533. Introduction to Petroleum Geophysics. 3 Hours.

Introduction to seismic wave propagation and petroleum seismology with particular emphasis on seismic events, elastic waves, and seismic survey design. Prerequisite: MATH 2564, (PHYS 2033 or PHYS 2074), and GEOS 3514 or instructor consent. (Typically offered: Fall)

## GEOS 4533H. Honors Introduction to Petroleum Geophysics. 3 Hours.

Introduction to seismic wave propagation and petroleum seismology with particular emphasis on seismic events, elastic waves, and seismic survey design. Prerequisite: MATH 2564, (PHYS 2033 or PHYS 2074), and GEOS 3514 or instructor consent. (Typically offered: Fall)
This course is equivalent to GEOS 4533.

## GEOS 4553. Introduction to Raster GIS. 3 Hours.

Theory, data structure, algorithms, and techniques behind raster-based geographical information systems. Through laboratory exercises and lectures multidisciplinary applications are examined in database creation, remotely sensed data handling, elevation models, and resource models using boolean, map algebra, and other methods. Prerequisite: GEOS 3543 or ANTH 3543. (Typically offered: Fall) This course is cross-listed with ANTH 4553.

## GEOS 4563. Geology of Our National Parks. 3 Hours.

This course examines the underlying geology responsible for selected parks, and explores the interplay of geology, biology, climate, topography, and humans to evaluate the value of the parks, and to anticipate the problems they will face in the near and long-term. Prerequisite: GEOS 1113. (Typically offered: Fall)

GEOS 4583. Enterprise and Multiuser GIS. 3 Hours.
GIS practice that's typical of collaborative team-based geospatial organizations. Solve real-world problems through end-to-end GIS design and implementation using ArcGIS Enterprise, extensive federal, state, and local repositories, and high quality software documentation. Includes relevant training in geospatial provenance and metadata, and in enterprise and multiuser GIS administration. (Typically offered: Spring)

GEOS 4593. Introduction to Global Positioning Systems and Global Navigation Satellite Systems. 3 Hours.
