The Program Coordinator, in consultation with the Teacher Education Professional Review Committee and the Dean's Office for Academic and Student Affairs in the College of Education and Health Professions, has the authority and responsibility to dismiss a student from the teacher education program for unethical or unprofessional behavior and/or not recommend the student for licensure.

More detailed guidelines about the policies, supports, and other requirements are provided in the program's handbook, as well as on the Office of Teacher Education website (https://teacher-education.uark.edu/ support/). Students who have been dismissed on the basis of unethical or unprofessional conduct may appeal the decision following the procedures outlined under the Student Grievances and Appeals section of the Undergraduate Catalog of Studies (http://catalog.uark.edu/ undergraduatecatalog/academicregulations/studentacademicappeals/).

## English Education B.A.T.

## Eight-Semester Plan

Because this program requires admission to progress, it does not qualify for the university's Eight-Semester Degree Program; however, students who qualify for admission to the program can finish a degree in four years by following the suggested order of classes below.

| First Year | Fall | Units <br> Spring |
| :--- | ---: | ---: |
| ENGL 1013 Composition I (ACTS Equivalency | 3 |  |
| = ENGL 1013) (Satisfies General Education |  |  |
| Outcome 1.1) | 3 |  |
| MATH 1203 College Algebra (ACTS Equivalency |  |  |
| $=$ MATH 1103) (or higher) (Satisfies General |  |  |
| Education Outcome 2.1) |  |  |

ENGL 1023 Composition II (ACTS Equivalency
= ENGL 1023) (Satisfies General Education
Outcome 1.1)
Science State Minimum Core with lab (Satisfies
General Education Outcome 3.4) ${ }^{1}$
COMM 1023 Communication in a Diverse World
(Satisfies General Education Outcomes 3.3 and
4.1)

ENGL 2063 Transatlantic Literature from 1640 to 1865
CIED 1003 Introduction to Technology in Education Year Total: 15
Second Year

ENGL 2023 Creative Writing I (ACTS Equivalency 3
= ENGL 2013) (Satisfies General Education
Outcome 3.1)
Social Sciences State Minimum Core (Satisfies 3
General Education Outcome 3.3) ${ }^{1}$
Elective
3
ENGL 2053 Transatlantic Literature from 3
Beginnings to 1640
CIED 2083 Innovation and Creativity in Daily 3
Practice
U.S. History or Government State Minimum Core 3
(Satisfies General Education Outcome 4.2)
Science State Minimum Core with lab (Satisfies 4
General Education Outcome 3.4) ${ }^{1}$
ENGL 2013 Essay Writing 3
ENGL 2073 Transatlantic Literature from 1865 to 3
1945
EDST 3223 American Educational History 3
Year Total: 15

Third Year $\quad$ Fall | Units |
| ---: |
| Spring |

ENGL 3603 Topics in Rhetoric and Composition

ENGL 2043 Rethinking Literature 3
SEED 4063 Disciplinary and Interdisciplinary 3
Literacies in Education (Satisfies General
Education Outcomes 1.2 and 5.1)
CIED 4403 Understanding Cultures in the
Classroom (Satisfies General Education Outcome
4.1)

ENGL Diversity Requirement ${ }^{2}$
SEED 3993 Critical Studies in Literature for 3
Adolescents
ENGL 4303 Introduction to Shakespeare
ENGL Diversity Requirement ${ }^{2}$

## Total Units in Sequence:

${ }^{1}$ Students must complete the State Minimum Core requirements (https://nam03.safelinks.protection.outlook.com/?url=https\%3A\%2F \%2Fnextcatalog.uark.edu\%2Fundergraduatecatalog\%2Fgened \%2Fstateminimum\%2F\&data=02\%7C01\%7Cagriffin\%40uark.edu \%7Ce4e632415f9b49eda9bf08d7f5c20b91\%7C79c742c4e61c4fa5be89a3 \%2F1XG8924jwOx8pTIw8IWNAGp0s\%3D\&reserved=0) as outlined in the Catalog of Studies. The courses that meet the state minimum core also fulfill many of the university's General Education requirements (https://nam03.safelinks.protection.outlook.com/?url=https\%3A\%2F \%2Fnextcatalog.uark.edu\%2Fundergraduatecatalog\%2Fgened \%2Fgeneraleducation\%2F\&data=02\%7C01\%7Cagriffin\%40uark.edu \%7Ce4e632415f9b49eda9bf08d7f5c20b91\%7C79c742c4e61c4fa5be89a3c \%2BDWRVEfAqIMsYNX4KXEgX2JdEJJY7Go\%3D\&reserved=0), although there are additional considerations to satisfy the general education learning outcomes. Students are encouraged to consult with their academic adviser when making course selections.
${ }^{2}$ ENGL Diversity Requirement: Choose from: ENGL 3853 / ENGL 4853 or ENGL 3553 / ENGL 4553 or ENGL 3543 / ENGL 4523 or ENGL 3583 / ENGL 4583 or ENGL 3593/ ENGL 4593.

## Courses

CIED 1003. Introduction to Technology in Education. 3 Hours.
A study of computer technology as it relates to teacher education. This course introduces students interested in teacher education to the knowledge and skills required to demonstrate their proficiency in technology and learning. (Typically offered: Fall, Spring and Summer)

CIED 1013. Introduction to Education. 3 Hours.
Integrates psychological, sociological, and philosophical foundations of education with concurrent involvement in field experiences. Encourages prospective teachers to become reflective practitioners by emphasizing organization of school systems, planning and implementation of effective classroom environments, development of teaching styles, and new directions in education. An 18-hour early field experience designed to give prospective teachers opportunities to observe and participate in a variety of school settings is incorporated in this introductory course to education. (Typically offered: Fall and Spring)

CIED 2083. Innovation and Creativity in Daily Practice. 3 Hours.
Arts integration course including the ideas, design, and implementation of practices in the classroom, board room, and professional field that enrich the experiences of all stakeholders while building right-brain thinking skills for the new millennium.
(Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

CIED 2943. Foundations of Language and Literacy. 3 Hours.
A foundational study of language and literacy with an emphasis on content knowledge for teachers that is essential to the components and principles of science-based literacy. Corequisite: CIED 3113. (Typically offered: Fall and Spring)

## CIED 3013. Development and Learning Theories in the K-6 Classroom. 3

Hours.
This course allows students to cultivate an understanding of how elementary students develop, process information, and learn; studies educational applications pertaining to theories of development, intelligence, and thinking dispositions. Students study various learning theories, their implications for instruction, and their role in the K-6 classroom. Field experience required. Prerequisite: PELED or CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

CIED 3013H. Honors Development and Learning Theories in the K-6 Classroom. 3 Hours.
This course allows students to cultivate an understanding of how elementary students develop, process information, and learn; studies educational applications pertaining to theories of development, intelligence, and thinking dispositions. Students study various learning theories, their implications for instruction, and their role in the K-6 classroom. Field experience required. Prerequisite: CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring)
This course is equivalent to CIED 3013.
CIED 3023. Survey of Exceptionalities. 3 Hours.
 definitions of exceptionalities, learning and behavior characteristics of individuals with exceptionalities and the legal basis for the education of persons with exceptionalities in both elementary and secondary schools. Prerequisite: CIED 1013, or MUED 2012, or AGED 1123, or PSYC 2003. (Typically offered: Fall, Spring and Summer)

A survey of the characteristics of students with exceptional needs. Reviews the definitions of exceptionalities, learning and behavior characteristics of individuals with exceptionalities and the legal basis for the education of persons with exceptionalities in both elementary and secondary schools. Prerequisite: Honors standing, CIED 1013, or MUED 2012, or AGED 1123, or PSYC 2003. (Typically offered: Fall, Spring and Summer)
This course is equivalent to CIED 3023.

## CIED 3033. Classroom Learning Theory. 3 Hours.

A survey of the major theories of learning with special emphasis on human learning and implications for education. Field experience required. Prerequisite: CIED 1013; or MUED 2012; or PHED 1003; or AGED 1123; or PSYC 2003. (Typically offered: Fall, Spring and Summer)

## CIED 3033H. Honors Classroom Learning Theory. 3 Hours.

A survey of the major theories of learning with special emphasis on human learning and implications for education. Field experience required. Prerequisite: Honors standing and (CIED 1013; or MUED 2012; or PHED 1003; or AGED 1123; or PSYC 2003). (Typically offered: Fall, Spring and Summer) This course is equivalent to CIED 3033.

## CIED 3053. The Emerging Adolescent. 3 Hours.

This course is a study of the developmental characteristics (social, emotional, physical, moral, and intellectual) of early adolescents (ages 10-15 years). The implications of these changes for motivation, instruction, learning, and classroom management in the classroom are emphasized. Course has field component. Prerequisite: CIED 1013. (Typically offered: Fall and Spring)

CIED 3103. Children and Adolescent Literature. 3 Hours.
A survey of children's literary works, authors, and illustrators with emphasis on elementary grade and adolescent literature. Prerequisite: CHEDBS or ELELBS or HDFSBS BRKD or HDFSBS CDEV or PSPED major. (Typically offered: Fall and Spring)

## CIED 3103H. Honors Children and Adolescent Literature. 3 Hours.

A survey of children's literary works, authors, and illustrators with emphasis on elementary grade and adolescent literature. Corequisite: CIED 3113. Prerequisite: CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring) This course is equivalent to CIED 3103.

CIED 3113. Emergent Literacy. 3 Hours.
An understanding of emergent literacy development through a study of sciencebased literacy pedagogy and practical field experiences. Field experience required. Corequisite: CIED 2943. Prerequisite: ENGL 1013, ENGL 1023, and CHEDBS or ELELBS or HDFSBS BRKD or HDFSBS CDEV or SPEDBS major. (Typically offered: Fall and Spring)

## CIED 3113H. Honors Emergent Literacy. 3 Hours.

This course focuses on theories of children's emerging literacy and on the continuing development of literacy abilities in pre-kindergarten and early elementary years.
Field experience required. Prerequisite: ENGL 1013, ENGL 1023, and CIED 3262, CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring) This course is equivalent to CIED 3113.

## CIED 3123. Mathematics Methods in the K-6 Classroom. 3 Hours.

An examination of the content of elementary mathematics courses. Special emphasis given to methods of teaching the content as well as enrichment materials. Field experience required. Prerequisite: MATH 1203, MATH 2213, MATH 2223, and (CHEDBS or ELELBS major). (Typically offered: Fall and Spring)

CIED 3133. Integrated Social Studies for the K-6 Classroom. 3 Hours.
Focuses on the methodology of facilitating elementary students' development in language arts and social studies. Integrates the curriculum and teaching strategies in language arts and social studies. Field experience required. Prerequisite: CHEDBS or ELELBS major, and PLSC 2003 and (HIST 2003 or HIST 2013), and (HIST 1113 or HIST 1123), and (GEOS 1123 or ANTH 1023), and (ECON 3053 or ECON 2143), and (ARHS 1003 or MLIT 1003). (Typically offered: Fall and Spring)

CIED 3453. Developmental Literacy. 3 Hours.
A deep and comprehensive application of the development of literacy skills from decoding to fluent, comprehending readers. Field experience required. Prerequisite: CIED 2943, CIED 3113, and admission into ELELBS or CHEDBS programs. (Typically offered: Fall and Spring)

## CIED 3453H. Honors Developmental Literacy. 3 Hours.

A deep and comprehensive application of the development of literacy skills from decoding to fluent, comprehending readers. Field experience required. Prerequisite: CIED 2943, CIED 3113, admission into ELELBS or CHEDBS programs, and honors standing. (Typically offered: Fall and Spring)
This course is equivalent to CIED 3453.
CIED 3901H. Honors Curriculum and Instruction Education Thesis Tutorial. 1 Hour.

Designed to provide the foundation for the Honors Thesis. Students and faculty tutors work "one-on-one" exploring a specific topic which has been agreed upon by the student and the professor. Prerequisite: Honors candidacy and CATEBS, CHEDBS, DREDBA, EDSTBS, EGEDBA, ELELBS, FREDBA, GREDBA, SNEDBA, SPEDBS, or SSEDBA majors. (Typically offered: Fall, Spring and Summer)

CIED 4003. Elementary Seminar. 3 Hours.
This course is designed to synthesize the foundational content presented in the Bachelor of Science in Education, Elementary Education program. It focuses on refinement of generalized knowledge to accommodate specialized content relevant to elementary students. Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall)

CIED 4013. Capstone Course for Foreign Language Licensure. 3 Hours.
This course is designed to identify and provide evidence of content language specific proficiencies in the four skills of reading, writing, listening, and speaking a foreign language. (Typically offered: Spring)

## CIED 4023. Teaching in Inclusive Secondary Settings. 3 Hours.

This course is designed to prepare pre-service teachers to teach in inclusive classroom settings at the secondary level. Course content will focus on the ways in which exceptionality, specifically focused on high-incidence disabilities and culture, specifically focused on English language learners mediate the learning experiences of secondary level students. (Typically offered: Summer)

CIED 4113. Integrated Communication Skills for the K-6 Classroom. 3 Hours. Focuses on the methodology of facilitating elementary students' literacy development. Emphasis is on the integration of the communication skills of reading, writing, speaking, and listening across the curriculum. Prerequisite: COMM 1313 or COMM 2323 and CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

CIED 4113H. Honors Integrated Communication Skills for the K-6 Classroom. 3 Hours.

Focuses on the methodology of facilitating elementary students? literacy development. Emphasis is on the integration of the communication skills of reading, writing, speaking, and listening across the curriculum. Prerequisite: COMM 1313 or COMM 2323 and CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring)
This course is equivalent to CIED 4113.

## CIED 4123. Literacy Assessment and Interventions in the Elementary

 Classroom. 3 Hours.An undergraduate course focusing on literacy assessment and intervention for prospective classroom teachers. Participants become familiar with assessment procedures and instruments for identifying student strengths and weaknesses in literacy, determining effective intervention strategies for literacy improvement, and principles of reporting assessment and intervention outcomes. Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall)

CIED 4131. Practicum for Secondary and Multilevel Tracks in Education. 1 Hour.
This practicum is a requirement for entry into the EDUC MA, Master of Arts in Teaching program. Students will be involved in documented experiences with children for a minimum of 60 hours in grades K-12. Students enrolled in the multilevel track will be placed in a combination of elementary, middle, and high school settings. Students enrolled in the secondary track will be placed in a combination of middle and high school settings. Prerequisite: Cleared background check. (Typically offered: Spring and Summer)

## CIED 4133. Measurement and Research in the K-6 Classroom. 3 Hours.

This course is designed to provide an introduction to educational assessment, research methods, and what research has to say about trends and topics in elementary education. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall)

CIED 4143. Curriculum Design and Applications of Instructional Practice. 3 Hours.
A course in the design and adaptation of curriculum for students in regular, elementary classrooms. Theoretical bases and curriculum models will be reviewed. Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Spring)

CIED 4153. Classroom Management in the Elementary Grades. 3 Hours.
This course focuses on a number of different management techniques for elementary classrooms that can be used in general education settings. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

## CIED 4163. Senior Project. 3 Hours.

This course is designed to provide students with the research skills necessary to complete their senior project. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Summer)

## CIED 4173. Student Teaching. 3 Hours.

Full-time student teaching in grades K-6 to be repeated both fall and spring semesters. Students will practice and master instructional strategies under the supervision of qualified mentor teachers and university faculty members.
Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

## CIED 4183. Instruction and Assessment of Writing. 3 Hours.

Develop knowledge, skills and dispositions about writing processes, genres, and pedagogy. Field experience required. Corequisite: CIED 3453. Prerequisite: CIED 2943, CIED 3113, and admission into CHEDBS or ELELBS programs. (Typically offered: Fall and Spring)

CIED 4183H. Honors Instruction and Assessment of Writing. 3 Hours.
Develop knowledge, skills and dispositions about writing processes, genres, and pedagogy. Field experience required. Prerequisite: CIED 2943, CIED 3113, CIED 3453, honors standing and admission into CHEDBS or ELELBS programs. (Typically offered: Fall and Spring)
This course is equivalent to CIED 4183.

## CIED 4285. Teaching Experience. 5 Hours.

The teaching experience is an essential component of the Bachelor of Arts in Teaching degree. The two semester experience allows Teacher Candidates (TC) to make further application of theoretical principles of teaching and learning. Teacher Candidates will be assigned placement in area schools for both fall and spring semesters. Teacher candidates are placed in K-12 or 7-12 levels depending on their content area for licensure. The fall semester consists of a field experience including observation, co-planning, and co-teaching. The spring semester consists of an immersion experience for teacher candidates to plan and teach independently. Prerequisite: Admission to one of the following: EGEDBA, SSEDBA, FREDBA, GREDBA, SNEDBA, or DREDBA. (Typically offered: Spring)

CIED 4363. Disciplinary Literacy in the K-6 Classroom. 3 Hours.
Focuses on the methodology of extending K-6 learners' basic literacy development, as a foundation for intermediate and disciplinary literacy. Emphasis is on the engagement of students in the distinct reading, writing, speaking, and listening requirements of different disciplines. Prerequisite: CIED 3113 and CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

## CIED 4403. Understanding Cultures in the Classroom. 3 Hours.

This course provides pre-and in-service teachers knowledge and skills necessary for educating ethnically and linguistically diverse classrooms. Students have the opportunity to understand positive relationships while removing stereotypes and prejudices. It addresses issues for social justice education through understanding ways that children learn and communicate in their homes and communities.
Students will examine how topics in multicultural education inform instructional goals, curriculum planning/implementation, and teaching practices across content areas in public K-12 classrooms. This course meets the AR teaching license ESL endorsement requirements for a culture course. Some sections of this course will contain a service learning component. (Typically offered: Fall)

## CIED 4413. Acquiring a Second Language. 3 Hours.

The course gives an introduction to the basics in research and learning theories involved in the acquisition of second languages and cultures, particularly of English. (Typically offered: Spring)

CIED 4423. Teaching English as a Second Language. 3 Hours.
This course is designed to provide teacher candidates with the basic knowledge and teaching skills necessary to address the linguistic needs of English language learners (ELLs) in regular classrooms. The students in this class will learn about and use multiple strategies for promoting ELLs' reading, writing, listening, and speaking skills. Emphasis will be placed especially on differentiating early reading instruction for ELLs. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Spring)

CIED 4433. The Moral Mind in Action. 3 Hours.
The Moral Mind in Action explores how people reason through moral dilemmas and prepares students to more effectively recognize and resolve moral problems. Best practices of teachers and administrators of K-16 character education programs are discussed. (Typically offered: Fall)

CIED 4443. Moral Courage. 3 Hours.
Moral Courage explores the factors that support translating moral thinking into moral action. This course draws from the field of positive psychology to guide students as they leverage existing strengths and develop new strategies for acting with moral courage in their personal and professional lives. Best practices of teachers and administrators of K-16 character education programs are discussed. (Typically offered: Spring)

## CIED 4463. Culture and Learning. 3 Hours.

Culture, its meanings, dimensions, and manifestations are explored in this course. How these cultural elements impact perceptions of students, classroom practices, and educational processes are explored in this course. A strength-based approach is employed to explore the issues associated with including all students within classrooms. (Typically offered: Fall, Spring and Summer)

## CIED 4483H. Honors Museum Matters: History, Practices, Culture and Controversy. 3 Hours.

Museums are respected institutions, but few visitors have likely thought about their history, purpose and role in society and culture. This class is an introduction to museology or the study of museums. Through field trips, guest lectures, discussions, and targeted readings we will explore issues such as collecting, exhibiting, controversies, architecture and the educational challenges found in the wide world of museums. Prerequisite: Honors standing. (Typically offered: Spring Odd Years)

CIED 4503H. Honors Charles Darwin and the Legacy of Evolution. 3 Hours.
This highly integrated honors class draws on various perspectives to examine the life of Charles Darwin and the legacy and impact of evolution. Topics and guest instructors change each semester, but the course will focus on evolution from the perspectives of biology, anthropology, the law, philosophy, history, culture and literature. Prerequisite: Honors standing. (Typically offered: Spring Even Years)

## CIED 4533. Reading Comprehension Through Children's and Adolescent

 Literature. 3 Hours.An examination of the major genres of children and adolescent literature to develop and extend K-6 students' skills in reading comprehension. Field experience required. Prerequisite: CIED 2943, CIED 3113, CIED 3453, and admission into CHEDBS or ELELBS programs. (Typically offered: Fall and Spring)

## CIED 4533H. Honors Reading Comprehension Through Children's and

 Adolescent Literature. 3 Hours.An examination of the major genres of children and adolescent literature to develop and extend K-6 students' skills in reading comprehension. Field experience required. Prerequisite: CIED 2943, CIED 3113, CIED 3453, admission into CHEDBS or ELELBS programs, and honors standing. (Typically offered: Fall and Spring) This course is equivalent to CIED 4533.

## CIED 4953. Assessment for English Learners. 3 Hours.

This course addresses how to design appropriate assessments for English Learners taking into account their English language proficiency level and how to utilize the results of these assessments appropriately. (Typically offered: Spring)

CIED 498VH. Curriculum and Instruction Honors Thesis/Project. 1-3 Hour.
Designed to provide facilitation of the Honors Thesis/Project. Students and faculty work "one-on-one" to complete the honors thesis/project. Prerequisite: Honors candidacy, CIED 3901 H , and CATEBS, CHEDBS, DREDBA, EDSTBS, EGEDBA, ELELBS, FREDBA, GREDBA, SNEDBA, SPEDBS, or SSEDBA major. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

CIED 499V. Special Topics in Curriculum and Instruction Education. 1-6 Hour. Discussion and advanced studies on selected topics in curriculum and instruction. Special focus on recent and emerging topics in education. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.
CIED 499VH. Honors Special Topics in Curriculum and Instruction Education. 1-3 Hour.
Discussion and advanced studies on selected topics in curriculum and instruction. Special focus on recent and emerging topics in education. (Typically offered: Fall, Spring and Summer)
This course is equivalent to CIED 499V.

## Exercise Science (EXSC)

The program in exercise science is designed to prepare candidates for a variety of career options, including teaching physical education, coaching, analyzing and prescribing fitness programs, athletic training, or preparation for professional programs in allied health.

Graduates of this program should be well prepared to enter graduate programs of study in such areas as exercise physiology, biomechanics, athletic training, sport management, medical school, physical therapy school, and other allied health professional schools.

## Requirements for B.S. in Exercise Science

## Requirements for the B.S. in Exercise Science

Students must have 40 hours of 3000/4000-level classes to graduate.

## State Minimum Core

MATH - A prerequisite course, MATH 1203, may be required.
MATH 1213 Plane Trigonometry (ACTS Equivalency = MATH 1203)
or MATH 12\&A@calculus Mathematics (ACTS Equivalency $=$ MATH 1305)
or MATH 2554alculus I (ACTS Equivalency = MATH 2405)
BIOL 1543 Principles of Biology (ACTS Equivalency $=$ BIOL
\& BIOL 1541L 1014 Lecture)
and Principles of Biology Laboratory (ACTS
Equivalency = BIOL 1014 Lab)
or BIOL 158،Biology for Majors (ACTS Equivalency = BIOL 1014 Lecture)
CHEM 1103 University Chemistry I (ACTS Equivalency =
\& CHEM 1101LCHEM 1414 Lecture) and University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab)
or CHEM 1203nemistry for Majors I
\& CHEM 120athd Chemistry for Majors I Laboratory
PSYC 2003 General Psychology (ACTS Equivalency = PSYC 1103)

Additional Required Sciences (20 hours)

| BIOL 2443 <br> \& BIOL 2441L | ```Human Anatomy (ACTS Equivalency = BIOL 2404 Lecture) and Human Anatomy Laboratory (ACTS Equivalency = BIOL 2404 Lab)``` | 4 |
| :---: | :---: | :---: |
| $\begin{aligned} & \text { BIOL } 2213 \\ & \text { \& BIOL 2211L } \end{aligned}$ | Human Physiology (ACTS Equivalency = BIOL 2414 Lecture) <br> and Human Physiology Laboratory (ACTS $\text { Equivalency = BIOL } 2414 \text { Lab) }$ | 4 |
| CHEM 1123 <br> \& CHEM 1121L <br> or CHEM 1223 <br> \& CHEM 1221L | University Chemistry II (ACTS Equivalency = CHEM 1424 Lecture) <br> and University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab) <br> Chemistry for Majors II and Chemistry for Majors II Laboratory | 4 |
| CHEM 2613 <br> \& CHEM 2611L <br> or CHEM 3603 <br> \& CHEM 3601L <br> or CHEM 3703 <br> \& CHEM 3702 | Organic Physiological Chemistry (ACTS Equivalency = CHEM 1224 Lecture) and Organic Physiological Chemistry Laboratory (ACTS Equivalency $=$ CHEM 1224 Lab) <br> Organic Chemistry I Land Organic Chemistry I Laboratory <br> Organic Chemistry I Lecture for Chemistry Majors and Organic Chemistry I Lab for Chemistry Majors | 4-5 |
| PHYS 2013 <br> \& PHYS 2011L | ```College Physics I (ACTS Equivalency = PHYS 2014 Lecture) and College Physics I Laboratory (ACTS Equivalency = PHYS 2014 Lab)``` | 4 |

Additional Non-EXSC Requirements (12 hours)
NUTR 1213 Fundamentals of Nutrition 3
COMM 1313 Public Speaking (ACTS Equivalency = SPCH 3 1003)

STAT $2303 \quad$ Principles of Statistics (ACTS Equivalency $=$ MATH 3 2103)
or PSYC 2013 Introduction to Statistics for Psychologists
or SOCI 3303 Social Data and Analysis
or STAT 2823 Biostatistics
PSYC 3023 Abnormal Psychology 3
Exercise Science Core Required ( 30 hours)
EXSC 2663 Terminology for the Health Professions ${ }^{1} 3$
EXSC 2733 Introduction to Exercise Science 3
EXSC 3153 Exercise Physiology 3
EXSC 3353 Mechanics of Human Movement 3
EXSC 3533 Laboratory Techniques 3
EXSC 4323 Exercise Prescription 3
EXSC 4783 Sport and Exercise Psychology 3
EXSC 4833 Exercise Applications for Special Populations 3
or EXSC 48331-Honors Exercise Applications for Special Populations
EXSC 4903 Internship in Exercise Science ${ }^{2}$
or EXSC 405V Independent Study
or EXSC 498VトExercise Science Honors Thesis/Project
EXSC Elective 3
Related Electives chosen from EXSC, PBHL, CHLP, SOCI, SPED, 15 FDSC, NUTR, CHEM, STAT, CDIS, BIOL, ANTH, HDFS, ANSC, CNED, PHED, PSYC, SCWK, HRWD, HESC, POSC, PHYS, RESM, MATH

| :--- | ---: |
| Total Hours | 120 |

${ }^{1}$ EXSC 2663 is cross-listed with PBHL 2663.
${ }^{2}$ EXSC 498VH option available only if completing Honors Program

## Exercise Science B.S. <br> Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan in Kinesiology should see the Eight-Semester Degree Policy (p. 67) for university requirements of the program. Students must have 40 hours of 3000/4000level classes to graduate. Find out more about the state minimum core (p. 81) requirements.

| First Year | Fall | Units <br> Spring |
| :--- | ---: | ---: |

Units

EXSC 3423. Principles and Theories of Strength and Conditioning. 3 Hours. This course will provide the practical skills necessary to design strength and conditioning programs. Special emphasis is placed on the ability to evaluate exercise movements, prescribe appropriate exercise programs, administer tests, and support program prescription with a sound knowledge of anatomical and physiological adaptation to exercise. The course will include laboratory experiences integrated with didactic learning. The laboratory experiences will in teach students various skills such as how to set up and run speed, agility, and quickness drills, how to select and administer the appropriate tests for athletic performance, and how to evaluate Olympic lifting technique. Everyone must participate in the labs as subjects. Come to lab prepared to exercise. When students are finished with this course, they will be well prepared to take the CSCS exam given by the National Strength and Conditioning Association. Corequisite: EXSC 3421L. Prerequisite: (BIOL 2443 and BIOL 2441L) and (BIOL 2213 and BIOL 2211L). (Typically offered: Spring)

## EXSC 3533. Laboratory Techniques. 3 Hours.

Practical experience in testing physical fitness in both the laboratory and nonlaboratory settings. Pre- or Corequisite: EXSC 3153. (Typically offered: Fall, Spring and Summer)

EXSC 3723H. Honors Research Methods in Exercise Science. 3 Hours. This course will provide an overview of research methods for experimental research designs in exercise science. The students will learn facets of research including: developing a research idea, getting funding for research, obtaining IRB/IACUC approval, data collection, data input, statistical analyses, and preparing manuscripts for publication. Designed for exercise science honors students in spring of their junior year or the summer prior to their senior year to prepare them for their honor's thesis. Prerequisite: Honors standing. (Typically offered: Spring)
This course is cross-listed with PBHL 3723H.
EXSC 3901H. Exercise Science Honors Thesis Tutorial. 1 Hour.
Designed to provide the foundation for the Honors Thesis/Project. Students and faculty tutors work "one-on-one" exploring a specific topic which has been agreed upon by the student and the professor. Prerequisite: Honors candidacy and EXSCBS major. (Typically offered: Fall, Spring and Summer)

EXSC 391V. Special Topics in EXSC. 1-3 Hour.
Designed to cover specialized topics not presented in exercise science coursework. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

## EXSC 4013. Clinical Exercise Physiology. 3 Hours.

The course is designed to build upon prior knowledge of Exercise Physiology and Exercise Testing. We will examine the physiological impacts of exercise and exercise training with specific emphasis on how they relate to clinical outcomes and clinical testing. At the end of the course students should have developed competencies congruent with the objectives of the American College of Sports Medicine's (ACSM) certification for Clinical Exercise Physiologist. Prerequisite: EXSC 3153 and EXSC 3533. (Typically offered: Fall)

EXSC 405V. Independent Study. 1-3 Hour.
Provides students an opportunity to pursue special study of research problems. (Typically offered: Fall, Spring and Summer) May be repeated for up to 12 hours of degree credit.

## EXSC 405VH. Honors Independent Study. 1-4 Hour.

Provides students an opportunity to pursue special study of research problems.
Prerequisite: Instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 4 hours of degree credit.
This course is equivalent to EXSC 405 V .
EXSC 4323. Exercise Prescription. 3 Hours.
This course is designed to provide knowledge and application of sound exercise prescription principles and design of exercise programs in cardiorespitory fitness, muscular fitness, body composition, flexibility, and balance. Pre- or corequisite: EXSC 3533. Prerequisite: EXSC 3153. (Typically offered: Fall and Spring)

## EXSC 4323H. Honors Exercise Prescription. 3 Hours.

This course is designed to provide knowledge and application of sound exercise prescription principles and design of exercise programs in cardiorespitory fitness, muscular fitness, body composition, flexibility, and balance. Pre- or corequisite: EXSC 3533. Prerequisite: EXSC 3153. (Typically offered: Fall and Spring) This course is equivalent to EXSC 4323.

## EXSC 4773. Performance and Drugs. 3 Hours.

The pharmacological and physiological effects of ergogenic aids upon the athlete and performance coupled with the ethical and moralistic viewpoints of drug taking. Practical laboratory experiences are provided with pertinent statistical surveys of athletes; their drug taking habits and relevant psychological impact on performance. Prerequisite: EXSC 3153. (Typically offered: Fall and Spring)

EXSC 4773H. Honors Performance and Drugs. 3 Hours.
The pharmacological and physiological effects of ergogenic aids upon the athlete and performance coupled with the ethical and moralistic viewpoints of drug taking. Practical laboratory experiences are provided with pertinent statistical surveys of athletes; their drug taking habits and relevant psychological impact on performance. Prerequisite: EXSC 3153 and honors standing. (Typically offered: Fall and Spring) This course is equivalent to EXSC 4773.

## EXSC 4783. Sport and Exercise Psychology. 3 Hours.

This course examines how individuals behave in physical activity, exercise, and sport settings. Psychological antecedents and consequences of primary and secondary involvement in exercise, sport, and related physical activities will be introduced. Prerequisite: PSYC 2003. (Typically offered: Fall and Summer)

## EXSC 4783H. Honors Sport and Exercise Psychology. 3 Hours.

This course examines how individuals behave in physical activity, exercise, and sport settings. Psychological antecedents and consequences of primary and secondary involvement in exercise, sport, and related physical activities will be introduced. Prerequisite: Honors standing and PSYC 2003. (Typically offered: Fall) This course is equivalent to EXSC 4783.

EXSC 4833. Exercise Applications for Special Populations. 3 Hours.
The study of the effects of exercise, exercise training, and other stressors in special groups. A detailed study of the biomechanical and physiological effects of exercise on the elderly, the diabetic, the post-coronary, and the individual with functional limitations. Prerequisite: EXSC 3353, EXSC 3153, EXSC 3533, and EXSC 4323. (Typically offered: Fall and Spring)

EXSC 4833H. Honors Exercise Applications for Special Populations. 3 Hours. The study of the effects of exercise, exercise training, and other stressors in special groups. A detailed study of the biomechanical and physiological effects of exercise on the elderly, the diabetic, the post-coronary, and the individual with functional limitations. Prerequisite: EXSC 3353, EXSC 3153, EXSC 3533, EXSC 4323 and honors standing. (Typically offered: Fall and Spring)
This course is equivalent to EXSC 4833.

## EXSC 4903. Internship in Exercise Science. 3 Hours.

Provides opportunities for students in Exercise Science to gain experience in clinics, hospitals, fitness centers, athletic training facilities or related settings. Preor Corequisite: EXSC 3533. Prerequisite: EXSC 3353 and EXSC 3153. (Typically offered: Fall, Spring and Summer)
EXSC 498VH. Exercise Science Honors Thesis/Project. 1-3 Hour.
Designed to provide facilitation of the Honors Thesis/Project. Students and faculty work "one-on-one" to complete the honors thesis/project. Prerequisite: Honors candidacy, EXSCBS, KINSBS, or PHEDBS major, and KINS 3901H or EXSC 3723H. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

## French Education (FRED)

Freddie Bowles
Program Coordinator

306 Peabody Hall
479-575-3035
Email: fbowles@uark.edu
Curriculum and Instruction Website (https://cied.uark.edu/)
The Department of Curriculum and Instruction offers a Bachelor of Arts in Teaching in French Education that leads to licensure for K-12 instruction. The program focuses on developing reflective practitioners based on the constructivist perspective that teachers are life-long learners, reflective practitioners themselves, and scholar researchers. The coursework is designed to develop these attributes so that students graduate as effective teachers with the knowledge, skills, and dispositions to engage students with meaningful and authentic instruction. The Bachelor of Arts in Teaching degree will also prepare students in the humanities with the pedagogical skills, the content knowledge, and the dispositions for teaching and learning in 21st century classrooms.

## B.A.T. in French Education

## Stage I: Pre-French Education (PFRED)

Complete all 46 hours of program pre-requisites for each content area (see below).

1. Obtain a GPA of 3.0 or better on UA coursework.
2. Complete all content and pedagogy courses with a "C" or better.
3. Complete a background check.

## Stage II: Admission to the B.A.T. Program

Admission to the Bachelor of Arts in Teaching program (B.A.T.) in the five content areas occurs the semester after the candidate has completed all pre-B.A.T. requirements including the first three courses in education CIED 1013, CIED 1003, and CIED 2083 - prior to a student entering the individual program of study the following fall term. The B.A.T. program is competitive, and meeting the minimum requirements does not guarantee admission to the program. Applications to the B.A.T. program must be submitted by deadlines stated on the Office of Teacher Education (https:// teacher-education.uark.edu/admissions/) website.

The application process includes:

1. Students must complete the application to teacher education (see the Teacher Education Application Fee (http://teachereducation.uark.edu/admissions/)) through the Teacher Education Office during the time period stated on the Office of Teacher Education website.. This includes completing and passing the criminal background check.*
2. Submission of B.A.T. application.
3. Submission of writing sample to content area faculty.
4. Submission of transcripts for all coursework.

* Another background check will be required prior to graduation in order to be eligible for licensure.

## Stage III: Requirements for Program Continuation and Internship

1. Maintain a cumulative GPA of 3.0 or better.
2. All professional education courses and content courses must have a grade 'C' or better (except SEED 3283 below). No teaching methods courses may be taken as self-paced (correspondence) courses.

## Stage IV: Requirements for Internship Semester (spring, senior year) and Program Completion

All students in the B.A.T. program must complete the following requirements prior to being admitted to the spring semester of their senior year.

1. Students must earn a "B" or better in the fall semester, senior year SEED 3283 practicum course.
2. Earn a cumulative GPA of 3.0 or better by the end of the fall semester, senior year. Students are not permitted to intern in the spring if the GPA requirement is not met.
3. Students must have taken the appropriate Praxis II-Content Knowledge exam to be admitted to the spring semester, senior year.
4. Candidate must complete a successful "internship admission interview" with B.A.T. faculty. Note these interviews are scheduled with all senior students during the fall semester.
5. Satisfactorily complete the internship/student teaching experience that has been approved by the Director of Field Placement.

All students seeking licensure in the state of Arkansas are subject to a criminal background check. Background checks can take up to six months to process; therefore, students are advised to complete and submit the forms to the proper authorities at least six months in advance of graduation (or six months prior to applying for a teaching license). Arkansas will not grant a teaching license to anyone who has been convicted of a felony.

## French Education Requirements

## Pre-French Education requirements

University Core (State Minimum Core)
Courses specifically required for FREDBA program
ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013)
ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023)
MATH 1203 College Algebra (ACTS Equivalency = MATH 1103) ( or higher)

COMM 1023 Communication in a Diverse World ${ }^{1}$
FREN 2013 Intermediate French II (ACTS Equivalency = FREN 2023)

Additional Pre-French Education requirements ${ }^{1} 9$
$\begin{array}{ll}\text { CIED 1013 } & \text { Introduction to Education } \\ \text { CIED 1003 } & \text { Introduction to Technology in Education } \\ \text { CIED 2083 } & \text { Innovation and Creativity in Daily Practice }\end{array}$
$\begin{array}{ll}\text { CIED } 2083 \text { Innovation and Creativity in Daily Practice } \\ \text { Education Requirements }{ }^{\mathbf{1}} & \mathbf{3 1}\end{array}$
EDST 3223 American Educational History
CIED 3033 Classroom Learning Theory
CIED 4023 Teaching in Inclusive Secondary Settings
or CIED 302:Survey of Exceptionalities
CIED 4285 Teaching Experience
CIED 4403 Understanding Cultures in the Classroom
SEED 3283 Teaching Experiences in Education
SEED 4022 Classroom Management Concepts
SEED 4063 Disciplinary and Interdisciplinary Literacies in Education
SEED 4443 Methods of Teaching Foreign Language K-12
SEED 4523 Instructional Practices in Teaching Foreign Language

| French Language Content ${ }^{1}$ | 33 |
| :--- | ---: |
| 9 hours 4000-level Literature requirement |  |
| 3 hours Linguistic elective (suggest WLLC 3173) |  |
| FREN 3003 | Advanced French |
| FREN 3103 | Cultural Readings |
| FREN 3113 | Introduction to Literature |
| FREN 4003 | French Grammar and Composition |
| FREN 4033 | French for Oral Proficiency |
| FREN 4113 | Special Themes in French |
| FREN 4213 | French Civilization |
| General Electives | $\mathbf{1 2}$ |
| Total Hours | $\mathbf{1 2 0}$ |

${ }^{1}$ Complete all content and pedagogy courses with a "C" or better, except SEED 3283, which requires a " B " or better.

## Dismissal based on Unethical or Unprofessional Behaviors from the B.A.T. program

The University of Arkansas' teacher preparation programs adhere to the Code of Ethics of the Education Profession as established by the National Education Association as described in NEA Code of Ethics (https://www.nea.org/resource-library/code-ethics-educators/), Arkansas Division of Elementary and Secondary Education Code of Ethics (https://dese.ade.arkansas.gov/Offices/educator-effectiveness/plsb-professional-ethicsdiscipline/code-of-ethics-for-arkansas-educators/), as well as discipline specific codes of ethics and standards found in program handbooks. Violation of these principles may result in probation, suspension, or dismissal of the internship as described:

1. Any incident of ethical misconduct or concern will be documented by the faculty member(s), discussed directly with the student and their mentor, and referred to the program's coordinator or supervising faculty. It may also be reported to the Teacher Candidate Professional Review Committee.
2. The Teacher Candidate Professional Review Committee evaluates the concerns and recommends a course of action, which may range from a zero score on the academic and/or internship work, a failing grade for the course, probation, up to dismissal from a teacher education program.
3. Any candidate may be suspended by a Teacher Education Program Coordinator for extreme, unforeseen circumstances such as endangerment of students or others, disruption of schools or classes, felonious behaviors, or ethical violations (i.e. Arkansas Code of Ethics, Code of Student Life). Such suspensions will be referred to the Teacher Candidate Professional Review Committee for review and may become permanent.

The Program Coordinator, in consultation with the Teacher Education Professional Review Committee and the Dean's Office for Academic and Student Affairs in the College of Education and Health Professions, has the authority and responsibility to dismiss a student from the teacher education program for unethical or unprofessional behavior and/or not recommend the student for licensure.

More detailed guidelines about the policies, supports, and other requirements are provided in the program's handbook, as well as on the Office of Teacher Education website (https://teachereducation.uark.edu/) or the Teacher Education Support page (https:// teacher-education.uark.edu/support/). Students who have been dismissed
on the basis of unethical or unprofessional conduct may appeal the decision following the procedures outlined under the Student Grievances and Appeals section of the Undergraduate Catalog of Studies (p. 87).

## French Education B.A.T. Eight-Semester Plan

Because this program requires admission to progress, it does not qualify for the university's Eight-Semester Degree Program; however, students who qualify for admission to the program can finish a degree in four years by following the suggested order of classes below.

| First Year | Units |  |
| :---: | :---: | :---: |
|  | Fall | Spring |
| ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013) (Satisfies General Education Outcome 1.1) | 3 |  |
| MATH 1203 College Algebra (ACTS Equivalency = MATH 1103) (or higher) (Satisfies General Education Outcome 2.1) | 3 |  |
| Social Sciences State Minimum Core (Satisfies General Education Outcome 3.3) ${ }^{1}$ | 3 |  |
| FREN 2013 Intermediate French II (ACTS Equivalency = FREN 2023) | 3 |  |
| CIED 1013 Introduction to Education | 3 |  |
| ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023) (Satisfies General Education Outcome 1.1) |  | 3 |
| Science State Minimum Core with lab (Satisfies General Education Outcome 3.4) ${ }^{1}$ |  | 4 |
| COMM 1023 Communication in a Diverse World (Satisfies General Education Outcome 3.3) |  | 3 |
| FREN 3003 Advanced French |  | 3 |
| CIED 1003 Introduction to Technology in Education |  | 3 |
| Year Total: | 15 | 16 |
| Second Year |  | Units |
|  | Fall | Spring |
| Fine Arts State Minimum Core (Satisfies General Education Outcome 3.1) ${ }^{1}$ | 3 |  |
| Social Sciences State Minimum Core (Satisfies General Education Outcome 3.3) ${ }^{1}$ | 3 |  |
| FREN 3113 Introduction to Literature | 3 |  |
| FREN 4113 Special Themes in French | 3 |  |
| Practice |  |  |
| U.S. History or Government State Minimum Core (Satisfies General Education Outcomes 3.2 and 4.2) ${ }^{1}$ |  | 3 |
| Science Core with lab (Satisfies General Education Outcome 3.4) ${ }^{1}$ |  | 4 |
| FREN 4003 French Grammar and Composition |  | 3 |
| FREN 3103 Cultural Readings |  | 3 |
| EDST 3223 American Educational History |  | 3 |
| Year Total: | 15 | 16 |

| Third Year |  | Units |
| :---: | :---: | :---: |
|  | Fall | Spring |
| 4000-level Literature course | 3 |  |
| FREN 4033 French for Oral Proficiency | 3 |  |
| SEED 4063 Disciplinary and Interdisciplinary Literacies in Education (Satisfies General Education Outcomes 1.2 and 5.1) | 3 |  |
| CIED 4403 Understanding Cultures in the Classroom (Satisfies General Education Outcome 4.1) | 3 |  |
| General Elective | 3 |  |
| 4000-level Literature course |  | 3 |
| FREN 4213 French Civilization |  | 3 |
| CIED 3033 Classroom Learning Theory |  | 3 |
| SEED 4022 Classroom Management Concepts |  | 2 |
| General Elective |  | 6 |
| Year Total: | 15 | 17 |
| Fourth Year |  | Units |
|  | Fall | Spring |
| 4000-level Literature course | 3 |  |
| Linguistic Elective (suggest WLLC 3173) | 3 |  |
| CIED 4023 Teaching in Inclusive Secondary Settings (or Elective) or CIED 3023 Survey of Exceptionalities | 3 |  |
| SEED 3283 Teaching Experiences in Education | 3 |  |
| SEED 4443 Methods of Teaching Foreign Language K-12 | 3 |  |
| CIED 4023 Teaching in Inclusive Secondary Settings (or Elective) or CIED 3023 Survey of Exceptionalities |  | 3 |
| SEED 4523 Instructional Practices in Teaching Foreign Language (Satisfies General Education Outcome 6.1) |  | 3 |
| CIED 4285 Teaching Experience |  | 5 |
| Year Total: | 15 | 11 |

## Total Units in Sequence:

${ }^{1}$ Students must complete the State Minimum Core requirements (p. 81) as outlined in the Catalog of Studies. The courses that meet the state minimum core also fulfill many of the university's General Education requirements (p. 72), although there are additional considerations to satisfy the general education learning outcomes. Students are encouraged to consult with their academic adviser when making course selections.

## Courses

CIED 1003. Introduction to Technology in Education. 3 Hours.
A study of computer technology as it relates to teacher education. This course introduces students interested in teacher education to the knowledge and skills required to demonstrate their proficiency in technology and learning. (Typically offered: Fall, Spring and Summer)

CIED 1013. Introduction to Education. 3 Hours.
Integrates psychological, sociological, and philosophical foundations of education with concurrent involvement in field experiences. Encourages prospective teachers to become reflective practitioners by emphasizing organization of school systems, planning and implementation of effective classroom environments, development of teaching styles, and new directions in education. An 18-hour early field experience designed to give prospective teachers opportunities to observe and participate in a variety of school settings is incorporated in this introductory course to education. (Typically offered: Fall and Spring)

CIED 2083. Innovation and Creativity in Daily Practice. 3 Hours.
Arts integration course including the ideas, design, and implementation of practices in the classroom, board room, and professional field that enrich the experiences of all stakeholders while building right-brain thinking skills for the new millennium. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

## CIED 2943. Foundations of Language and Literacy. 3 Hours.

A foundational study of language and literacy with an emphasis on content knowledge for teachers that is essential to the components and principles of science-based literacy. Corequisite: CIED 3113. (Typically offered: Fall and Spring)

CIED 3013. Development and Learning Theories in the K-6 Classroom. 3 Hours.
This course allows students to cultivate an understanding of how elementary students develop, process information, and learn; studies educational applications pertaining to theories of development, intelligence, and thinking dispositions. Students study various learning theories, their implications for instruction, and their role in the K-6 classroom. Field experience required. Prerequisite: PELED or CHEDBS or ELELBS major. (Typically offered: Fall and Spring)
CIED 3013H. Honors Development and Learning Theories in the K-6 Classroom. 3 Hours.
This course allows students to cultivate an understanding of how elementary students develop, process information, and learn; studies educational applications pertaining to theories of development, intelligence, and thinking dispositions. Students study various learning theories, their implications for instruction, and their role in the K-6 classroom. Field experience required. Prerequisite: CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring) This course is equivalent to CIED 3013.

## CIED 3023. Survey of Exceptionalities. 3 Hours.

A survey of the characteristics of students with exceptional needs. Reviews the definitions of exceptionalities, learning and behavior characteristics of individuals with exceptionalities and the legal basis for the education of persons with exceptionalities in both elementary and secondary schools. Prerequisite: CIED 1013, or MUED 2012, or AGED 1123, or PSYC 2003. (Typically offered: Fall, Spring and Summer)

## CIED 3023H. Honors Survey of Exceptionalities. 3 Hours.

A survey of the characteristics of students with exceptional needs. Reviews the definitions of exceptionalities, learning and behavior characteristics of individuals with exceptionalities and the legal basis for the education of persons with exceptionalities in both elementary and secondary schools. Prerequisite: Honors standing, CIED 1013, or MUED 2012, or AGED 1123, or PSYC 2003. (Typically offered: Fall, Spring and Summer)
This course is equivalent to CIED 3023.

## CIED 3033. Classroom Learning Theory. 3 Hours.

A survey of the major theories of learning with special emphasis on human learning and implications for education. Field experience required. Prerequisite: CIED 1013; or MUED 2012; or PHED 1003; or AGED 1123; or PSYC 2003. (Typically offered: Fall, Spring and Summer)

## CIED 3033H. Honors Classroom Learning Theory. 3 Hours.

A survey of the major theories of learning with special emphasis on human learning and implications for education. Field experience required. Prerequisite: Honors standing and (CIED 1013; or MUED 2012; or PHED 1003; or AGED 1123; or PSYC 2003). (Typically offered: Fall, Spring and Summer)
This course is equivalent to CIED 3033.
CIED 3053. The Emerging Adolescent. 3 Hours.
This course is a study of the developmental characteristics (social, emotional, physical, moral, and intellectual) of early adolescents (ages 10-15 years). The implications of these changes for motivation, instruction, learning, and classroom management in the classroom are emphasized. Course has field component. Prerequisite: CIED 1013. (Typically offered: Fall and Spring)

CIED 3103. Children and Adolescent Literature. 3 Hours.
A survey of children's literary works, authors, and illustrators with emphasis on elementary grade and adolescent literature. Prerequisite: CHEDBS or ELELBS or HDFSBS BRKD or HDFSBS CDEV or PSPED major. (Typically offered: Fall and Spring)

CIED 3103H. Honors Children and Adolescent Literature. 3 Hours.
A survey of children's literary works, authors, and illustrators with emphasis on elementary grade and adolescent literature. Corequisite: CIED 3113. Prerequisite: CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring) This course is equivalent to CIED 3103.

## CIED 3113. Emergent Literacy. 3 Hours.

An understanding of emergent literacy development through a study of sciencebased literacy pedagogy and practical field experiences. Field experience required. Corequisite: CIED 2943. Prerequisite: ENGL 1013, ENGL 1023, and CHEDBS or ELELBS or HDFSBS BRKD or HDFSBS CDEV or SPEDBS major. (Typically offered: Fall and Spring)

## CIED 3113H. Honors Emergent Literacy. 3 Hours.

This course focuses on theories of children's emerging literacy and on the continuing development of literacy abilities in pre-kindergarten and early elementary years. Field experience required. Prerequisite: ENGL 1013, ENGL 1023, and CIED 3262, CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring) This course is equivalent to CIED 3113.

## CIED 3123. Mathematics Methods in the K-6 Classroom. 3 Hours.

An examination of the content of elementary mathematics courses. Special emphasis given to methods of teaching the content as well as enrichment materials. Field experience required. Prerequisite: MATH 1203, MATH 2213, MATH 2223, and (CHEDBS or ELELBS major). (Typically offered: Fall and Spring)

CIED 3133. Integrated Social Studies for the K-6 Classroom. 3 Hours.
Focuses on the methodology of facilitating elementary students' development in language arts and social studies. Integrates the curriculum and teaching strategies in language arts and social studies. Field experience required. Prerequisite: CHEDBS or ELELBS major, and PLSC 2003 and (HIST 2003 or HIST 2013), and (HIST 1113 or HIST 1123), and (GEOS 1123 or ANTH 1023), and (ECON 3053 or ECON 2143), and (ARHS 1003 or MLIT 1003). (Typically offered: Fall and Spring)

## CIED 3453. Developmental Literacy. 3 Hours.

A deep and comprehensive application of the development of literacy skills from decoding to fluent, comprehending readers. Field experience required. Prerequisite: CIED 2943, CIED 3113, and admission into ELELBS or CHEDBS programs. (Typically offered: Fall and Spring)

## CIED 3453H. Honors Developmental Literacy. 3 Hours.

A deep and comprehensive application of the development of literacy skills from decoding to fluent, comprehending readers. Field experience required. Prerequisite: CIED 2943, CIED 3113, admission into ELELBS or CHEDBS programs, and honors standing. (Typically offered: Fall and Spring)
This course is equivalent to CIED 3453.

CIED 3901H. Honors Curriculum and Instruction Education Thesis Tutorial. 1 Hour.
Designed to provide the foundation for the Honors Thesis. Students and faculty tutors work "one-on-one" exploring a specific topic which has been agreed upon by the student and the professor. Prerequisite: Honors candidacy and CATEBS, CHEDBS, DREDBA, EDSTBS, EGEDBA, ELELBS, FREDBA, GREDBA, SNEDBA, SPEDBS, or SSEDBA majors. (Typically offered: Fall, Spring and Summer)

## CIED 4003. Elementary Seminar. 3 Hours.

This course is designed to synthesize the foundational content presented in the Bachelor of Science in Education, Elementary Education program. It focuses on refinement of generalized knowledge to accommodate specialized content relevant to elementary students. Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall)
CIED 4013. Capstone Course for Foreign Language Licensure. 3 Hours.
This course is designed to identify and provide evidence of content language specific proficiencies in the four skills of reading, writing, listening, and speaking a foreign language. (Typically offered: Spring)

## CIED 4023. Teaching in Inclusive Secondary Settings. 3 Hours.

This course is designed to prepare pre-service teachers to teach in inclusive classroom settings at the secondary level. Course content will focus on the ways in which exceptionality, specifically focused on high-incidence disabilities and culture, specifically focused on English language learners mediate the learning experiences of secondary level students. (Typically offered: Summer)
CIED 4113. Integrated Communication Skills for the K-6 Classroom. 3 Hours. Focuses on the methodology of facilitating elementary students' literacy development. Emphasis is on the integration of the communication skills of reading, writing, speaking, and listening across the curriculum. Prerequisite: COMM 1313 or COMM 2323 and CHEDBS or ELELBS major. (Typically offered: Fall and Spring)
CIED 4113H. Honors Integrated Communication Skills for the K-6 Classroom. 3 Hours.
Focuses on the methodology of facilitating elementary students? literacy development. Emphasis is on the integration of the communication skills of reading, writing, speaking, and listening across the curriculum. Prerequisite: COMM 1313 or COMM 2323 and CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring)
This course is equivalent to CIED 4113.
CIED 4123. Literacy Assessment and Interventions in the Elementary Classroom. 3 Hours.
An undergraduate course focusing on literacy assessment and intervention for prospective classroom teachers. Participants become familiar with assessment procedures and instruments for identifying student strengths and weaknesses in literacy, determining effective intervention strategies for literacy improvement, and principles of reporting assessment and intervention outcomes. Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall)
CIED 4131. Practicum for Secondary and Multilevel Tracks in Education. 1 Hour.
This practicum is a requirement for entry into the EDUC MA, Master of Arts in Teaching program. Students will be involved in documented experiences with children for a minimum of 60 hours in grades K-12. Students enrolled in the multilevel track will be placed in a combination of elementary, middle, and high school settings. Students enrolled in the secondary track will be placed in a combination of middle and high school settings. Prerequisite: Cleared background check. (Typically offered: Spring and Summer)

CIED 4133. Measurement and Research in the K-6 Classroom. 3 Hours.
This course is designed to provide an introduction to educational assessment, research methods, and what research has to say about trends and topics in elementary education. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall)

CIED 4143. Curriculum Design and Applications of Instructional Practice. 3 Hours.
A course in the design and adaptation of curriculum for students in regular, elementary classrooms. Theoretical bases and curriculum models will be reviewed. Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Spring)

CIED 4153. Classroom Management in the Elementary Grades. 3 Hours.
This course focuses on a number of different management techniques for elementary classrooms that can be used in general education settings. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall and Spring)
CIED 4163. Senior Project. 3 Hours.
This course is designed to provide students with the research skills necessary to complete their senior project. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Summer)

## CIED 4173. Student Teaching. 3 Hours.

Full-time student teaching in grades K-6 to be repeated both fall and spring semesters. Students will practice and master instructional strategies under the supervision of qualified mentor teachers and university faculty members. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

## CIED 4183. Instruction and Assessment of Writing. 3 Hours.

Develop knowledge, skills and dispositions about writing processes, genres, and pedagogy. Field experience required. Corequisite: CIED 3453. Prerequisite: CIED 2943, CIED 3113, and admission into CHEDBS or ELELBS programs. (Typically offered: Fall and Spring)

CIED 4183H. Honors Instruction and Assessment of Writing. 3 Hours.
Develop knowledge, skills and dispositions about writing processes, genres, and pedagogy. Field experience required. Prerequisite: CIED 2943, CIED 3113, CIED 3453, honors standing and admission into CHEDBS or ELELBS programs. (Typically offered: Fall and Spring)
This course is equivalent to CIED 4183.

## CIED 4285. Teaching Experience. 5 Hours.

The teaching experience is an essential component of the Bachelor of Arts in Teaching degree. The two semester experience allows Teacher Candidates (TC) to make further application of theoretical principles of teaching and learning. Teacher Candidates will be assigned placement in area schools for both fall and spring semesters. Teacher candidates are placed in K-12 or 7-12 levels depending on their content area for licensure. The fall semester consists of a field experience including observation, co-planning, and co-teaching. The spring semester consists of an immersion experience for teacher candidates to plan and teach independently. Prerequisite: Admission to one of the following: EGEDBA, SSEDBA, FREDBA, GREDBA, SNEDBA, or DREDBA. (Typically offered: Spring)

CIED 4363. Disciplinary Literacy in the K-6 Classroom. 3 Hours.
Focuses on the methodology of extending K-6 learners' basic literacy development, as a foundation for intermediate and disciplinary literacy. Emphasis is on the engagement of students in the distinct reading, writing, speaking, and listening requirements of different disciplines. Prerequisite: CIED 3113 and CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

## CIED 4403. Understanding Cultures in the Classroom. 3 Hours.

This course provides pre-and in-service teachers knowledge and skills necessary for educating ethnically and linguistically diverse classrooms. Students have the opportunity to understand positive relationships while removing stereotypes and prejudices. It addresses issues for social justice education through understanding ways that children learn and communicate in their homes and communities. Students will examine how topics in multicultural education inform instructional goals, curriculum planning/implementation, and teaching practices across content areas in public K-12 classrooms. This course meets the AR teaching license ESL endorsement requirements for a culture course. Some sections of this course will contain a service learning component. (Typically offered: Fall)

## CIED 4413. Acquiring a Second Language. 3 Hours.

The course gives an introduction to the basics in research and learning theories involved in the acquisition of second languages and cultures, particularly of English. (Typically offered: Spring)

## CIED 4423. Teaching English as a Second Language. 3 Hours.

This course is designed to provide teacher candidates with the basic knowledge and teaching skills necessary to address the linguistic needs of English language learners (ELLs) in regular classrooms. The students in this class will learn about and use multiple strategies for promoting ELLs' reading, writing, listening, and speaking skills. Emphasis will be placed especially on differentiating early reading instruction for ELLs. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Spring)

## CIED 4433. The Moral Mind in Action. 3 Hours.

The Moral Mind in Action explores how people reason through moral dilemmas and prepares students to more effectively recognize and resolve moral problems. Best practices of teachers and administrators of K-16 character education programs are discussed. (Typically offered: Fall)

## CIED 4443. Moral Courage. 3 Hours.

Moral Courage explores the factors that support translating moral thinking into moral action. This course draws from the field of positive psychology to guide students as they leverage existing strengths and develop new strategies for acting with moral courage in their personal and professional lives. Best practices of teachers and administrators of K-16 character education programs are discussed. (Typically offered: Spring)

## CIED 4463. Culture and Learning. 3 Hours.

Culture, its meanings, dimensions, and manifestations are explored in this course. How these cultural elements impact perceptions of students, classroom practices, and educational processes are explored in this course. A strength-based approach is employed to explore the issues associated with including all students within classrooms. (Typically offered: Fall, Spring and Summer)
CIED 4483H. Honors Museum Matters: History, Practices, Culture and Controversy. 3 Hours.
Museums are respected institutions, but few visitors have likely thought about their history, purpose and role in society and culture. This class is an introduction to museology or the study of museums. Through field trips, guest lectures, discussions, and targeted readings we will explore issues such as collecting, exhibiting, controversies, architecture and the educational challenges found in the wide world of museums. Prerequisite: Honors standing. (Typically offered: Spring Odd Years)
CIED 4503H. Honors Charles Darwin and the Legacy of Evolution. 3 Hours. This highly integrated honors class draws on various perspectives to examine the life of Charles Darwin and the legacy and impact of evolution. Topics and guest instructors change each semester, but the course will focus on evolution from the perspectives of biology, anthropology, the law, philosophy, history, culture and literature. Prerequisite: Honors standing. (Typically offered: Spring Even Years)

CIED 4533. Reading Comprehension Through Children's and Adolescent Literature. 3 Hours.
An examination of the major genres of children and adolescent literature to develop and extend K-6 students' skills in reading comprehension. Field experience required. Prerequisite: CIED 2943, CIED 3113, CIED 3453, and admission into CHEDBS or ELELBS programs. (Typically offered: Fall and Spring)

CIED 4533H. Honors Reading Comprehension Through Children's and Adolescent Literature. 3 Hours.
An examination of the major genres of children and adolescent literature to develop and extend K-6 students' skills in reading comprehension. Field experience required. Prerequisite: CIED 2943, CIED 3113, CIED 3453, admission into CHEDBS or ELELBS programs, and honors standing. (Typically offered: Fall and Spring) This course is equivalent to CIED 4533.

CIED 4953. Assessment for English Learners. 3 Hours.
This course addresses how to design appropriate assessments for English Learners taking into account their English language proficiency level and how to utilize the results of these assessments appropriately. (Typically offered: Spring)
CIED 498VH. Curriculum and Instruction Honors Thesis/Project. 1-3 Hour. Designed to provide facilitation of the Honors Thesis/Project. Students and faculty work "one-on-one" to complete the honors thesis/project. Prerequisite: Honors candidacy, CIED 3901 H , and CATEBS, CHEDBS, DREDBA, EDSTBS, EGEDBA, ELELBS, FREDBA, GREDBA, SNEDBA, SPEDBS, or SSEDBA major. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.
CIED 499V. Special Topics in Curriculum and Instruction Education. 1-6 Hour. Discussion and advanced studies on selected topics in curriculum and instruction. Special focus on recent and emerging topics in education. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

CIED 499VH. Honors Special Topics in Curriculum and Instruction Education. 1-3 Hour.
Discussion and advanced studies on selected topics in curriculum and instruction. Special focus on recent and emerging topics in education. (Typically offered: Fall, Spring and Summer)
This course is equivalent to CIED 499V.

## German Education (GRED)

Freddie Bowles
Program Coordinator
306 Peabody Hall
479-575-3035
Email: fbowles@uark.edu
Curriculum and Instruction Website (https://cied.uark.edu/)
The Department of Curriculum and Instruction offers a Bachelor of Arts in Teaching in German Education that leads to licensure for K-12 instruction. The program focuses on developing reflective practitioners based on the constructivist perspective that teachers are life-long learners, reflective practitioners themselves, and scholar researchers. The coursework is designed to develop these attributes so that students graduate as effective teachers with the knowledge, skills, and dispositions to engage students with meaningful and authentic instruction. The Bachelor of Arts in Teaching degree will also prepare students in the humanities with the pedagogical skills, the content knowledge, and the dispositions for teaching and learning in 21 st century classrooms.

## B.A.T. in German Education

Stage I: Pre-German Education (PGRED)

## Complete all 46 hours of program pre-requisites for each content area.

1. Obtain a GPA of 3.0 or better on UA coursework.
2. Complete all content and pedagogy courses with a grade of " C " or better.
3. Complete a background check.

## Stage II: Admission to the B.A.T. Program

Admission to the Bachelor of Arts in Teaching program (B.A.T.) occurs the semester after the candidate has completed all pre-B.A.T. requirements including the first three courses in education - CIED 1013, CIED 1003, and CIED 2083 - prior to a student entering the individual program of study the following fall term. The B.A.T. program is competitive, and meeting the minimum requirements does not guarantee admission to the program. Applications to the B.A.T. program must be submitted by deadlines stated on the Office of Teacher Education (https:// teacher-education.uark.edu/admissions/) website.

The application process includes:

1. Students must complete the application to teacher education (see the Teacher Education Application Fee (p.53)) through the Teacher Education Office during the time period stated on the Office of Teacher Education (https://teacher-education.uark.edu/ admissions/) website. This includes completing and passing the criminal background check.*
2. Submission of B.A.T. application.
3. Submission of writing sample to content area faculty.
4. Submission of transcripts for all coursework.

* Another background check will be required prior to graduation in order to be eligible for licensure.

## Stage III: Requirements for Program Continuation and Internship

1. Maintain a cumulative GPA of 3.0 or better.
2. All professional education courses and content courses must have a grade 'C' or better (except SEED 3283 below). No teaching methods courses may be taken as self-paced (correspondence) courses.

## Stage IV: Requirements for Internship Semester (spring, senior year) and Program Completion

All students in the B.A.T. program must complete the following requirements prior to being admitted to the spring semester of their senior year.

1. Students must earn a 'B' or better in the fall semester, senior year SEED 3283 practicum course.
2. Earn a cumulative GPA of 3.0 or better by the end of the fall semester, senior year. Students are not permitted to intern in the spring if the cGPA requirement is not met.
3. Students must have taken the appropriate Praxis II-Content Knowledge exam to be admitted to the spring semester, senior year.
4. Candidate must complete a successful "internship admission interview" with B.A.T. faculty. Note these interviews are scheduled with all senior students during the fall semester.
5. Satisfactorily complete the internship/student teaching experience that has been approved by the Director of Field Placement.

All students seeking licensure in the State of Arkansas are subject to a criminal background check. Background checks can take up to six months to process; therefore, students are advised to complete and submit the forms to the proper authorities at least six months in advance of graduation (or six months prior to applying for a teaching license). Arkansas will not grant a teaching license to anyone who has been convicted of a felony.

## German Education Requirements

## Pre-German Education requirements

University Core (State Minumum Core)
Courses specifically required for the German Education B.A.T. program

GERM 470V Special Topics (enrollment must be for 3 hours minimum)
3 hours Linguistic elective (WLLC 3173 suggested)
General Electives
Total Hours

## Dismissal based on Unethical or Unprofessional Behaviors from the B.A.T. program

The University of Arkansas' teacher preparation programs adhere to the Code of Ethics of the Education Profession as established by the National Education Association as described in NEA Code of Ethics (https://www.nea.org/resource-library/code-ethics-educators/), Arkansas Division of Elementary and Secondary Education Code of Ethics (https://dese.ade.arkansas.gov/Offices/educator-effectiveness/plsb-professional-ethicsdiscipline/code-of-ethics-for-arkansas-educators/), as well as discipline specific codes of ethics and standards found in program handbooks. Violation of these principles may result in probation, suspension, or dismissal of the internship as described:

1. Any incident of ethical misconduct or concern will be documented by the faculty member(s), discussed directly with the student and their mentor, and referred to the program's coordinator or supervising faculty. It may also be reported to the Teacher Candidate Professional Review Committee.
2. The Teacher Candidate Professional Review Committee evaluates the concerns and recommends a course of action, which may range from a zero score on the academic and/or internship work, a failing grade for the course, probation, up to dismissal from a teacher education program.
3. Any candidate may be suspended by a Teacher Education Program Coordinator for extreme, unforeseen circumstances such as endangerment of students or others, disruption of schools or classes, felonious behaviors, or ethical violations (i.e. Arkansas Code of Ethics, Code of Student Life). Such suspensions will be referred to the Teacher Candidate Professional Review Committee for review and may become permanent.

The Program Coordinator, in consultation with the Teacher Education Professional Review Committee and the Dean's Office for Academic and Student Affairs in the College of Education and Health Professions, has the authority and responsibility to dismiss a student from the teacher education program for unethical or unprofessional behavior and/or not recommend the student for licensure.

More detailed guidelines about the policies, supports, and other requirements are provided in the program's handbook, as well as on the Office of Teacher Education website (https://teachereducation.uark.edu/) or the Teacher Education Support page (https:// teacher-education.uark.edu/support/). Students who have been dismissed on the basis of unethical or unprofessional conduct may appeal the decision following the procedures outlined under the Student Grievances and Appeals section of the Undergraduate Catalog of Studies (p. 87).

## German Education B.A.T. Eight-Semester Plan

Because this program requires admission to progress, it does not qualify for the university's Eight-Semester Degree Program; however, students who qualify for admission to the program can finish a degree in four years by following the suggested order of classes below.

| First Year |  | Un |
| :---: | :---: | :---: |
|  | Fall | Spring |
| ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013) (Satisfies General Education Outcome 1.1) | 3 |  |
| MATH 1203 College Algebra (ACTS Equivalency = MATH 1103) (or higher) (Satisfies General Education Outcome 2.1) | 3 |  |
| Social Sciences State Minimum Core (Satisfies General Education Outcome 3.3) ${ }^{1}$ | 3 |  |
| GERM 2003 Intermediate German I (ACTS Equivalency = GERM 2013) (Satisfies General Education Outcome 4.1) | 3 |  |
| CIED 1013 Introduction to Education | 3 |  |
| ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023) (Satisfies General Education Outcome 1.1) |  | 3 |
| Science State Minimum Core with lab (Satisfies General Education Outcome 3.4) ${ }^{1}$ |  |  |
| COMM 1023 Communication in a Diverse World (Satisfies General Education Outcome 3.3) |  | 3 |
| GERM 2013 Intermediate German II (ACTS <br> Equivalency = GERM 2023) |  | 3 |
| CIED 1003 Introduction to Technology in Education |  | 3 |
| Year Total: | 15 | 6 |
| Second Year |  | Units |

Total Units in Sequence:
${ }^{1}$ Students must complete the State Minimum Core requirements (p. 81) as outlined in the Catalog of Studies. The courses that meet the state minimum core also fulfill many of the university's General Education requirements (p. 72), although there are additional considerations to satisfy the general education learning outcomes. Students are encouraged to consult with their academic adviser when making course selections.
${ }^{2}$ Only 6 hours GERM 470 V allowed for degree credit.

## Courses

CIED 1003. Introduction to Technology in Education. 3 Hours.
A study of computer technology as it relates to teacher education. This course introduces students interested in teacher education to the knowledge and skills required to demonstrate their proficiency in technology and learning. (Typically offered: Fall, Spring and Summer)

CIED 1013. Introduction to Education. 3 Hours.
Integrates psychological, sociological, and philosophical foundations of education with concurrent involvement in field experiences. Encourages prospective teachers to become reflective practitioners by emphasizing organization of school systems, planning and implementation of effective classroom environments, development of teaching styles, and new directions in education. An 18-hour early field experience designed to give prospective teachers opportunities to observe and participate in a variety of school settings is incorporated in this introductory course to education. (Typically offered: Fall and Spring)

## CIED 2083. Innovation and Creativity in Daily Practice. 3 Hours.

Arts integration course including the ideas, design, and implementation of practices in the classroom, board room, and professional field that enrich the experiences of all stakeholders while building right-brain thinking skills for the new millennium. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

## CIED 2943. Foundations of Language and Literacy. 3 Hours.

A foundational study of language and literacy with an emphasis on content knowledge for teachers that is essential to the components and principles of science-based literacy. Corequisite: CIED 3113. (Typically offered: Fall and Spring)
CIED 3013. Development and Learning Theories in the K-6 Classroom. 3 Hours.
This course allows students to cultivate an understanding of how elementary students develop, process information, and learn; studies educational applications pertaining to theories of development, intelligence, and thinking dispositions. Students study various learning theories, their implications for instruction, and their role in the K-6 classroom. Field experience required. Prerequisite: PELED or CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

CIED 3013H. Honors Development and Learning Theories in the K-6 Classroom. 3 Hours.
This course allows students to cultivate an understanding of how elementary students develop, process information, and learn; studies educational applications pertaining to theories of development, intelligence, and thinking dispositions. Students study various learning theories, their implications for instruction, and their role in the K-6 classroom. Field experience required. Prerequisite: CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring)
This course is equivalent to CIED 3013.

## CIED 3023. Survey of Exceptionalities. 3 Hours.

A survey of the characteristics of students with exceptional needs. Reviews the definitions of exceptionalities, learning and behavior characteristics of individuals with exceptionalities and the legal basis for the education of persons with exceptionalities in both elementary and secondary schools. Prerequisite: CIED 1013, or MUED 2012, or AGED 1123, or PSYC 2003. (Typically offered: Fall, Spring and Summer)

## CIED 3023H. Honors Survey of Exceptionalities. 3 Hours.

A survey of the characteristics of students with exceptional needs. Reviews the definitions of exceptionalities, learning and behavior characteristics of individuals with exceptionalities and the legal basis for the education of persons with exceptionalities in both elementary and secondary schools. Prerequisite: Honors standing, CIED 1013, or MUED 2012, or AGED 1123, or PSYC 2003. (Typically offered: Fall, Spring and Summer)
This course is equivalent to CIED 3023.

## CIED 3033. Classroom Learning Theory. 3 Hours.

A survey of the major theories of learning with special emphasis on human learning and implications for education. Field experience required. Prerequisite: CIED 1013; or MUED 2012; or PHED 1003; or AGED 1123; or PSYC 2003. (Typically offered: Fall, Spring and Summer)

CIED 3033H. Honors Classroom Learning Theory. 3 Hours.
A survey of the major theories of learning with special emphasis on human learning and implications for education. Field experience required. Prerequisite: Honors standing and (CIED 1013; or MUED 2012; or PHED 1003; or AGED 1123; or PSYC 2003). (Typically offered: Fall, Spring and Summer)
This course is equivalent to CIED 3033.

## CIED 3053. The Emerging Adolescent. 3 Hours.

This course is a study of the developmental characteristics (social, emotional, physical, moral, and intellectual) of early adolescents (ages 10-15 years). The implications of these changes for motivation, instruction, learning, and classroom management in the classroom are emphasized. Course has field component. Prerequisite: CIED 1013. (Typically offered: Fall and Spring)

CIED 3103. Children and Adolescent Literature. 3 Hours.
A survey of children's literary works, authors, and illustrators with emphasis on elementary grade and adolescent literature. Prerequisite: CHEDBS or ELELBS or HDFSBS BRKD or HDFSBS CDEV or PSPED major. (Typically offered: Fall and Spring)

## CIED 3103H. Honors Children and Adolescent Literature. 3 Hours.

A survey of children's literary works, authors, and illustrators with emphasis on elementary grade and adolescent literature. Corequisite: CIED 3113. Prerequisite: CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring) This course is equivalent to CIED 3103.

## CIED 3113. Emergent Literacy. 3 Hours.

An understanding of emergent literacy development through a study of sciencebased literacy pedagogy and practical field experiences. Field experience required. Corequisite: CIED 2943. Prerequisite: ENGL 1013, ENGL 1023, and CHEDBS or ELELBS or HDFSBS BRKD or HDFSBS CDEV or SPEDBS major. (Typically offered: Fall and Spring)

## CIED 3113H. Honors Emergent Literacy. 3 Hours.

This course focuses on theories of children's emerging literacy and on the continuing development of literacy abilities in pre-kindergarten and early elementary years.
Field experience required. Prerequisite: ENGL 1013, ENGL 1023, and CIED 3262, CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring) This course is equivalent to CIED 3113.

## CIED 3123. Mathematics Methods in the K-6 Classroom. 3 Hours.

An examination of the content of elementary mathematics courses. Special emphasis given to methods of teaching the content as well as enrichment materials. Field experience required. Prerequisite: MATH 1203, MATH 2213, MATH 2223, and (CHEDBS or ELELBS major). (Typically offered: Fall and Spring)

## CIED 3133. Integrated Social Studies for the K-6 Classroom. 3 Hours.

Focuses on the methodology of facilitating elementary students' development in language arts and social studies. Integrates the curriculum and teaching strategies in language arts and social studies. Field experience required. Prerequisite: CHEDBS or ELELBS major, and PLSC 2003 and (HIST 2003 or HIST 2013), and (HIST 1113 or HIST 1123), and (GEOS 1123 or ANTH 1023), and (ECON 3053 or ECON 2143), and (ARHS 1003 or MLIT 1003). (Typically offered: Fall and Spring)

## CIED 3453. Developmental Literacy. 3 Hours.

A deep and comprehensive application of the development of literacy skills from decoding to fluent, comprehending readers. Field experience required. Prerequisite: CIED 2943, CIED 3113, and admission into ELELBS or CHEDBS programs. (Typically offered: Fall and Spring)

## CIED 3453H. Honors Developmental Literacy. 3 Hours.

A deep and comprehensive application of the development of literacy skills from decoding to fluent, comprehending readers. Field experience required. Prerequisite: CIED 2943, CIED 3113, admission into ELELBS or CHEDBS programs, and honors standing. (Typically offered: Fall and Spring)
This course is equivalent to CIED 3453.

CIED 3901H. Honors Curriculum and Instruction Education Thesis Tutorial. 1 Hour.
Designed to provide the foundation for the Honors Thesis. Students and faculty tutors work "one-on-one" exploring a specific topic which has been agreed upon by the student and the professor. Prerequisite: Honors candidacy and CATEBS, CHEDBS, DREDBA, EDSTBS, EGEDBA, ELELBS, FREDBA, GREDBA, SNEDBA, SPEDBS, or SSEDBA majors. (Typically offered: Fall, Spring and Summer)

CIED 4003. Elementary Seminar. 3 Hours.
This course is designed to synthesize the foundational content presented in the Bachelor of Science in Education, Elementary Education program. It focuses on refinement of generalized knowledge to accommodate specialized content relevant to elementary students. Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall)

CIED 4013. Capstone Course for Foreign Language Licensure. 3 Hours.
This course is designed to identify and provide evidence of content language specific proficiencies in the four skills of reading, writing, listening, and speaking a foreign language. (Typically offered: Spring)
CIED 4023. Teaching in Inclusive Secondary Settings. 3 Hours.
This course is designed to prepare pre-service teachers to teach in inclusive classroom settings at the secondary level. Course content will focus on the ways in which exceptionality, specifically focused on high-incidence disabilities and culture, specifically focused on English language learners mediate the learning experiences of secondary level students. (Typically offered: Summer)

CIED 4113. Integrated Communication Skills for the K-6 Classroom. 3 Hours. Focuses on the methodology of facilitating elementary students' literacy development. Emphasis is on the integration of the communication skills of reading, writing, speaking, and listening across the curriculum. Prerequisite: COMM 1313 or COMM 2323 and CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

CIED 4113H. Honors Integrated Communication Skills for the K-6 Classroom. 3 Hours.
Focuses on the methodology of facilitating elementary students? literacy development. Emphasis is on the integration of the communication skills of reading, writing, speaking, and listening across the curriculum. Prerequisite: COMM 1313 or COMM 2323 and CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring)
This course is equivalent to CIED 4113.
CIED 4123. Literacy Assessment and Interventions in the Elementary Classroom. 3 Hours.
An undergraduate course focusing on literacy assessment and intervention for prospective classroom teachers. Participants become familiar with assessment procedures and instruments for identifying student strengths and weaknesses in literacy, determining effective intervention strategies for literacy improvement, and principles of reporting assessment and intervention outcomes. Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall)
CIED 4131. Practicum for Secondary and Multilevel Tracks in Education. 1 Hour.
This practicum is a requirement for entry into the EDUC MA, Master of Arts in Teaching program. Students will be involved in documented experiences with children for a minimum of 60 hours in grades K-12. Students enrolled in the multilevel track will be placed in a combination of elementary, middle, and high school settings. Students enrolled in the secondary track will be placed in a combination of middle and high school settings. Prerequisite: Cleared background check. (Typically offered: Spring and Summer)

## CIED 4133. Measurement and Research in the K-6 Classroom. 3 Hours.

This course is designed to provide an introduction to educational assessment, research methods, and what research has to say about trends and topics in elementary education. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall)

CIED 4143. Curriculum Design and Applications of Instructional Practice. 3 Hours.
A course in the design and adaptation of curriculum for students in regular, elementary classrooms. Theoretical bases and curriculum models will be reviewed. Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Spring)

CIED 4153. Classroom Management in the Elementary Grades. 3 Hours.
This course focuses on a number of different management techniques for elementary classrooms that can be used in general education settings. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall and Spring)
CIED 4163. Senior Project. 3 Hours.
This course is designed to provide students with the research skills necessary to complete their senior project. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Summer)

## CIED 4173. Student Teaching. 3 Hours.

Full-time student teaching in grades K-6 to be repeated both fall and spring semesters. Students will practice and master instructional strategies under the supervision of qualified mentor teachers and university faculty members. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

## CIED 4183. Instruction and Assessment of Writing. 3 Hours.

Develop knowledge, skills and dispositions about writing processes, genres, and pedagogy. Field experience required. Corequisite: CIED 3453. Prerequisite: CIED 2943, CIED 3113, and admission into CHEDBS or ELELBS programs. (Typically offered: Fall and Spring)
CIED 4183H. Honors Instruction and Assessment of Writing. 3 Hours.
Develop knowledge, skills and dispositions about writing processes, genres, and pedagogy. Field experience required. Prerequisite: CIED 2943, CIED 3113, CIED 3453, honors standing and admission into CHEDBS or ELELBS programs. (Typically offered: Fall and Spring)
This course is equivalent to CIED 4183.
CIED 4285. Teaching Experience. 5 Hours.
The teaching experience is an essential component of the Bachelor of Arts in Teaching degree. The two semester experience allows Teacher Candidates (TC) to make further application of theoretical principles of teaching and learning. Teacher Candidates will be assigned placement in area schools for both fall and spring semesters. Teacher candidates are placed in K-12 or 7-12 levels depending on their content area for licensure. The fall semester consists of a field experience including observation, co-planning, and co-teaching. The spring semester consists of an immersion experience for teacher candidates to plan and teach independently. Prerequisite: Admission to one of the following: EGEDBA, SSEDBA, FREDBA, GREDBA, SNEDBA, or DREDBA. (Typically offered: Spring)

CIED 4363. Disciplinary Literacy in the K-6 Classroom. 3 Hours.
Focuses on the methodology of extending K-6 learners' basic literacy development, as a foundation for intermediate and disciplinary literacy. Emphasis is on the engagement of students in the distinct reading, writing, speaking, and listening requirements of different disciplines. Prerequisite: CIED 3113 and CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

CIED 4403. Understanding Cultures in the Classroom. 3 Hours.
This course provides pre-and in-service teachers knowledge and skills necessary for educating ethnically and linguistically diverse classrooms. Students have the opportunity to understand positive relationships while removing stereotypes and prejudices. It addresses issues for social justice education through understanding ways that children learn and communicate in their homes and communities. Students will examine how topics in multicultural education inform instructional goals, curriculum planning/implementation, and teaching practices across content areas in public K-12 classrooms. This course meets the AR teaching license ESL endorsement requirements for a culture course. Some sections of this course will contain a service learning component. (Typically offered: Fall)

CIED 4413. Acquiring a Second Language. 3 Hours.
The course gives an introduction to the basics in research and learning theories involved in the acquisition of second languages and cultures, particularly of English. (Typically offered: Spring)
CIED 4423. Teaching English as a Second Language. 3 Hours.
This course is designed to provide teacher candidates with the basic knowledge and teaching skills necessary to address the linguistic needs of English language learners (ELLs) in regular classrooms. The students in this class will learn about and use multiple strategies for promoting ELLs' reading, writing, listening, and speaking skills. Emphasis will be placed especially on differentiating early reading instruction for ELLs. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Spring)

## CIED 4433. The Moral Mind in Action. 3 Hours.

The Moral Mind in Action explores how people reason through moral dilemmas and prepares students to more effectively recognize and resolve moral problems. Best practices of teachers and administrators of K-16 character education programs are discussed. (Typically offered: Fall)

CIED 4443. Moral Courage. 3 Hours.
Moral Courage explores the factors that support translating moral thinking into moral action. This course draws from the field of positive psychology to guide students as they leverage existing strengths and develop new strategies for acting with moral courage in their personal and professional lives. Best practices of teachers and administrators of K-16 character education programs are discussed. (Typically offered: Spring)

CIED 4463. Culture and Learning. 3 Hours.
Culture, its meanings, dimensions, and manifestations are explored in this course. How these cultural elements impact perceptions of students, classroom practices, and educational processes are explored in this course. A strength-based approach is employed to explore the issues associated with including all students within classrooms. (Typically offered: Fall, Spring and Summer)

CIED 4483H. Honors Museum Matters: History, Practices, Culture and Controversy. 3 Hours.
Museums are respected institutions, but few visitors have likely thought about their history, purpose and role in society and culture. This class is an introduction to museology or the study of museums. Through field trips, guest lectures, discussions, and targeted readings we will explore issues such as collecting, exhibiting, controversies, architecture and the educational challenges found in the wide world of museums. Prerequisite: Honors standing. (Typically offered: Spring Odd Years)

CIED 4503H. Honors Charles Darwin and the Legacy of Evolution. 3 Hours. This highly integrated honors class draws on various perspectives to examine the life of Charles Darwin and the legacy and impact of evolution. Topics and guest instructors change each semester, but the course will focus on evolution from the perspectives of biology, anthropology, the law, philosophy, history, culture and literature. Prerequisite: Honors standing. (Typically offered: Spring Even Years)

CIED 4533. Reading Comprehension Through Children's and Adolescent Literature. 3 Hours.
An examination of the major genres of children and adolescent literature to develop and extend K-6 students' skills in reading comprehension. Field experience required. Prerequisite: CIED 2943, CIED 3113, CIED 3453, and admission into CHEDBS or ELELBS programs. (Typically offered: Fall and Spring)

CIED 4533H. Honors Reading Comprehension Through Children's and Adolescent Literature. 3 Hours.
An examination of the major genres of children and adolescent literature to develop and extend K-6 students' skills in reading comprehension. Field experience required. Prerequisite: CIED 2943, CIED 3113, CIED 3453, admission into CHEDBS or ELELBS programs, and honors standing. (Typically offered: Fall and Spring) This course is equivalent to CIED 4533.

CIED 4953. Assessment for English Learners. 3 Hours.
This course addresses how to design appropriate assessments for English Learners taking into account their English language proficiency level and how to utilize the results of these assessments appropriately. (Typically offered: Spring)
CIED 498VH. Curriculum and Instruction Honors Thesis/Project. 1-3 Hour. Designed to provide facilitation of the Honors Thesis/Project. Students and faculty work "one-on-one" to complete the honors thesis/project. Prerequisite: Honors candidacy, CIED 3901 H , and CATEBS, CHEDBS, DREDBA, EDSTBS, EGEDBA, ELELBS, FREDBA, GREDBA, SNEDBA, SPEDBS, or SSEDBA major. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.
CIED 499V. Special Topics in Curriculum and Instruction Education. 1-6 Hour. Discussion and advanced studies on selected topics in curriculum and instruction. Special focus on recent and emerging topics in education. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

CIED 499VH. Honors Special Topics in Curriculum and Instruction Education. 1-3 Hour.
Discussion and advanced studies on selected topics in curriculum and instruction. Special focus on recent and emerging topics in education. (Typically offered: Fall, Spring and Summer)
This course is equivalent to CIED 499V.

## Health, Human Performance and Recreation (HHPR)

Michelle Gray<br>Interim Department Head<br>306 HPER Building<br>479-575-2857<br>rgray@uark.edu<br>Paul Calleja<br>Assistant Department Head and Graduate Coordinator<br>306C HPER Building<br>479-575-2854<br>pcallej@uark.edu<br>Health, Human Performance and Recreation website (http:// hhpr.uark.edu/)

The department offers programs leading to the B.S. degree with majors in exercise science (p. 777), public health (p. 795), or recreation and sport management (p. 799). and teaching K-12 physical education and health (p. 822).

The department also offers a minor in outdoor leadership (p. 803).

Buttram, Mance E., Ph.D., M.A. (Florida International University), M.A. (University of Arizona), Associate Professor, 2021.
Calleja, Paul C., Ph.D., M.S. (University of Arkansas), B.S. (San Jose
State University), Clinical Professor, 2003, 2018.
Davis, Robert, Ph.D., M.S., B.S. (University of Mississippi), Assistant Professor, 2018.
Dobbs, Page, Ph.D., M.S., B.S., (University of Arkansas), Assistant Professor, 2020.
Edmonston, Craig, M.S. (University of Kansas), B.S. (Kansas State University), Instructor, 2016.
Elbin, R. J., Ph.D. (Michigan State University), M.A., B.A. (University of New Orleans), Associate Professor, 2013, 2018.
Gallagher, Kaitlin, Ph.D., B.Sc. (University of Waterloo, Canada), Associate Professor, 2015.
Ganio, Matthew Stueck, Ph.D. (University of Connecticut), M.S., B.S. (University of Georgia), Professor, 2011, 2020.
Gray, Michelle, Ph.D. (University of Arkansas), M.S. (Ball State University), B.S. (University of Tennessee, Chattanooga), Associate Professor, 2010.
Greene, Nicholas P., Ph.D. (Texas A\&M University), M.S., B.S. (University of South Carolina), Professor, 2013, 2022.
Hamilton, Clayton, Ph.D., M.S. (University of Arkansas), B.S.B.A. (United States Sports Academy), Instructor, 2013.
Hammig, Bart, Ph.D. (University of Kansas), M.P.H. (University of Kansas Medical Center), B.S. (University of Kansas), Professor, 2008, 2018.

Henry, Leah Jean, Ph.D. (Texas Woman's University), M.A. (Michigan State University), B.S. (Texas A\&M University), Associate Professor, 2008, 2011.
Howie-Hickey, Erin, Ph.D. (University of South Carolina), B.S. (University of Maryland), Associate Professor, 2016, 2022.
Jones, Ches, Ph.D. (University of Alabama at Birmingham), B.S.E. (Pittsburg State University), Professor, 1994.
Kern, Jack C., Ph.D. (Texas Woman's University), M.Ed. (Texas State University-San Marcos), B.S. (University of Wisconsin-LaCrosse), Clinical Professor, 1996, 2013.
Langsner, Steve, Ph.D. (Indiana University at Bloomington), M.S. (University of Baltimore), B.S. (Springfield College), Associate Professor, 1989.

Lens, Joshua, J.D. (University of lowa), B.A. (University of Northern lowa), Assistant Professor, 2018.
Lirgg, Cathy D., Ph.D. (Michigan State University), M.S. (Indiana State University), B.A. (Muskingum College), Professor, 1991, 2018.
McDermott, Brendon P., Ph.D. (University of Connecticut), M.S. (Indiana University at Bloomington), B.S. (Northeastern University), Professor, 2012, 2023.
Moiseichik, Merry Lynn, J.D. (University of Arkansas), R.Ed. (Indiana University at Bloomington), M.S., B.S.E. (State University of New York at Cortland), Professor, 1989, 2007.
Murach, Kevin A., Ph.D. (Ball State), M.S. (James Madison University), B.S. (University of North Carolina), Assistant Professor, 2021.

Parke, Elizabeth A., Ph.D. (University of Hawaii), M.S. (University of Utah), B.A. (Hope College), Assistant Professor, 2021.
Rosa-Caldwell, Megan, Ph.D. (University of Arkansas), M.S. (University of Arkansas), B.S. (Baker University), Assistant Professor, 2023.
Russell, Alex, Ph.D. (Texas A \& M University), M.A. (University of Houston), B.S. (University of Houston), Assistant Professor, 2020.
Schmitt, Abigail, Ph.D. (University of Florida), M.S. (University of Northern Colorado), B.S. (University of North Carolina), Assistant Professor, 2020.

Schmitt, Craig, Ph.D. (University of Northern Colorado), M.B.A. (University of Central Florida), B.S. (University of Florida), Teaching Assistant Professor, 2020.
Smith-Nix, Angela, Ph.D. (University of Arkansas), M.Ed., B.S.E. (Arkansas State University), Teaching Professor, 1989.
Sullivan, Amanda Lynn, Ph.D., M.A.T., B.S.E. (University of Arkansas), Clinical Associate Professor, 2010, 2018.
Vela, Luzita I., Ph.D., (Pennsylvania State University), M.S. (Barry University), B.S. (Texas Woman's University), Teaching Professor, 2021. Washington, Tyrone A., Ph.D., B.S. (University of South Carolina at Columbia), Associate Professor, 2011, 2018.

## Human Resource Development (HRDE)

106 Graduate Education Building
hrwd@uark.edu
The undergraduate Human Resource Development program is specifically designed for adults who want to complete a bachelor's degree that opens doors to opportunity and personal growth. The Human Resource Development curriculum prepares individuals to apply integrated training, organizational development, and career planning and counseling skills to the design, management, and evaluation of programs to improve individual productivity, employability, job satisfaction, and organizational effectiveness. Undergraduates also obtain a solid academic base to pursue a graduate degree. This major does not lead to traditional licensure for teachers in Arkansas.

## Requirements for B.H.R.D. in Human Resource Development

All students start the program as pre-Human Resource Development majors. To be admitted into the Human Resource Development major, the students must meet the following criteria:

1. Have three or more years of full-time work experience or equivalent.
2. Complete all 35 hours of state core courses, including the PreHuman Resource Development program requirement:

Math course chosen from:
MATH 1313 Quantitative Reasoning (ACTS Equivalency = MATH 1113)
MATH 2053 Finite Mathematics
MATH 2183 Mathematical Reasoning in a Quantitative World
STAT 2303 Principles of Statistics (ACTS Equivalency $=$ MATH 2103)

Economics course or courses chosen from:
ECON 2143 Basic Economics: Theory and Practice
ECON 2013 Principles of Macroeconomics (ACTS Equivalency
\& ECON 2023 = ECON 2103)
and Principles of Microeconomics (ACTS
Equivalency = ECON 2203)
3. Have a 2.5 or higher GPA, or have a 2.5 or higher GPA on the Human Resource Development program's required courses after completing 12 hours of HRDE coursework.

## Human Resource Development Major

University Core Requirements
ECON $2143 \quad$ Basic Economics: Theory and Practice
or ECON 201Frinciples of Macroeconomics (ACTS Equivalency =
\& ECON 202ECON 2103)
and Principles of Microeconomics (ACTS Equivalency
= ECON 2203)
3 hours Pre-HRDE Math requirement chosen from:
MATH $2183 \quad$ Mathematical Reasoning in a Quantitative World
or MATH 2053nite Mathematics
or STAT 230ßrinciples of Statistics (ACTS Equivalency = MATH
2103 )
or MATH 1319uantitative Reasoning (ACTS Equivalency = MATH
1113)

Electives
Up to 19 credit hours of electives can include technical credit that can be obtained through experiential learning credits and/or faculty approved courses. See below for Elective Options.
Suggested HRDE electives:
HRDE 4113 The Generational Dynamics in the Workplace
HRDE 4323 Instructional Technology and Design

## HRDE Required Courses

| Career Development Pillar (15 hours) |  |  |
| :---: | :---: | :---: |
| HRDE 3113 | Foundations of Human Resource Development | 3 |
| HRDE 3123 | Career Development | 3 |
| HRDE 3133 | Writing for Human Resource and Workforce Development Professionals | 3 |
| HRDE 4123 | Strategic Human Resource Development | 3 |
| HRDE 4133 | International Human Resource Development and Cultural Differentiation | 3 |
| Organization Development Pillar (15 hours) |  |  |
| HRDE 3213 | Organization Development | 3 |
| HRDE 3223 | Managing Human Resource Development Programs | 3 |
| HRDE 4213 | Workplace Diversity and Human Resource Development | 3 |
| HRDE 4223 | Professional and Leadership Development | 3 |
| HRDE 4233 | HRD Legal and Ethical Issues | 3 |
| Training and Development Pillar (15 hours) |  |  |
| HRDE 3313 | Training and Development | 3 |
| HRDE 3323 | Designing and Developing Human Resource Development Programs | 3 |
| HRDE 3333 | Communication in Human Resource and Workforce Development | 3 |
| HRDE 4313 | Human Resource Development Program and Product Evaluation | 3 |
| HRDE 4333 | Human Resource Development Capstone | 3 |
| Total Hours |  | 20 |

## Options for Electives

1. Experiential Learning HRDE 450 V
a. Credits from HRDE faculty approved National Occupational Competency Testing Institute (NOCTI) assessments accepted and assessed by the HRWD faculty NOCTI coordinator.
b. American Council on Education (ACE) and Council on Adult and Experiential Learning (CAEL) credits as accepted by the University of Arkansas' undergraduate policy will also be
accepted by the undergraduate HRDE program for Experiential Learning HRDE 450V credits.
c. 3 credit hours will be awarded for recognition from the Association for Talent Development, (formerly the American Society for Training and Development), as a Certified Professional in Learning and Performance (CPLP).
d. Credits will be given for earning from Society for Human Resource Management (SHRM) Professional in Human Resources (PHR) and Senior Professional in Human Resources (SPHR) certification. 1 credit hour will be awarded for PHR certification. 3 credit hours for SPHR certification. If a student enters the undergraduate HRWD program with PHR certification and obtains SPHR certification while in the program, they will be given an additional 2 credit hours for a maximum of 3 credit hours.
e. A maximum of 3 credit hours of Continuing Education Unit (CEU) will be accepted. 15 hours of continuing education equals 1 CEU and equals 1 credit hour. Acceptable CEU's must be in training and development, career development, or organization development.
f. A maximum of 6 hours of ROTC credit will be granted for military service in accordance with the current University of Arkansas Policy.
2. Faculty Approved courses
a. Sanctioned by HRDE faculty.
b. Related to one of the HRDE areas, including psychology, organizational behavior, adult education, occupational counseling, skill testing and evaluation, program design and evaluation, consulting practice, organizational development, training, management, development, customer service, or total quality management.
c. Suggested HRDE electives: HRDE 4113 and HRDE 4323.

## Human Resource Development Semester Plan

The nature of the Human Resource Development major excludes it from ACT 1014 eight-semester degree-completion program requirements. The HRDE degree is a 120 hour degree in accordance with ACT 747.

Presented below is a typical plan for completing this degree in four semesters; individual student plans may vary significantly.

If fewer credits than needed are earned through technical credits, completing additional appropriate coursework will require heavier course loads and/or additional semesters to graduate. The 19 hours of technical requirements can be completed at any time during the four semester program. Students are not required to complete courses during the summer, but courses may be offered. Students may be able to finish the program sooner if they enroll in summer courses.

Earned prior to Fall Semester Year 1
State Minimum Core ${ }^{1}$
Must specifically include:
3-6 hours Pre-HRDE Economics Requirement chosen from:
ECON 2143 Basic Economics: Theory and Practice or ECON 201 Prrinciples of Macroeconomics (ACTS Equivalency = \& ECON 202BCON 2103)
and Principles of Microeconomics (ACTS Equivalency = ECON 2203)
3 hours Pre-HRDE Math Requirement chosen from:
MATH 2183 Mathematical Reasoning in a Quantitative World
or MATH 2053nite Mathematics
or STAT 230Brinciples of Statistics (ACTS Equivalency = MATH
2103)
or MATH 131@uantitative Reasoning (ACTS Equivalency = MATH
1113 )
Total Hours 3

| First Year | Units <br> Spring |  |
| :--- | ---: | ---: |
| HRDE 3113 Foundations of Human Resource | 3 |  |
| Development | 3 |  |
| HRDE 3123 Career Development | 3 |  |
| HRDE 3213 Organization Development | 3 | 3 |
| HRDE 3313 Training and Development |  | 3 |
| HRDE 3133 Writing for Human Resource and |  | 3 |

| HRDE 4313 Human Resource Development |  | 3 |
| Program and Product Evaluation |  |  |
| HRDE 4333 Human Resource Development |  | 3 |

Total Hours
Blisard, Paul, Ed.D. (University of Arkansas), M.C., B.S., B.S. (Southwest Missouri State University), Clinical Assistant Professor, 2014.
Charkasova, Aynur, Ph.D., M.S. (Southern Illinois University, Carbondale), B.A. (Azerbaijan University of Languages), Teaching Assistant Professor, 2021.
Christian, David, Ph.D., M.S. (University of North Texas), B.A. (University of Texas at Dallas), Associate Professor, 2015, 2021. Grover, Kenda Shea, Ed.D. (University of Arkansas), M.S., B.A. (Northeastern State University), Associate Professor, 2003, 2018.
Hevel, Michael Stephen, Ph.D. (University of lowa), M.A. (Bowling Green State University), B.A. (University of Kansas), Associate Professor, 2012, 2017.

Higgins, Kristin Kay, Ph.D., M.S. (University of Arkansas), B.A. (Vanderbilt University), Associate Professor, 2006, 2014.
Hughes, Claretha, Ph.D. (Virginia Polytechnic Institute and State University), M.S. (North Carolina State University), M.B.A. (University of Arkansas), B.A. (Clemson University), Professor, 2004, 2017.
Kacirek, Kit, Ed.D., M.Ed. (University of Arkansas), B.S. (University of Texas), Associate Professor, 1997, 2007.
Liang, Xinya, Ph.D. (Florida State University), B.S. (Zhejiang Gongshang University, China), Associate Professor, 2014, 2021.
Lo, Wen-Juo, Ph.D., M.A. (Arizona State University), B.S. (SooChow University), Associate Professor, 2008, 2014.
Lofton, Barbara A., Ed.D. (Grambling State University), M.A. (University of Iowa), B.S. (Jackson State University), Assistant Professor, 1996.
Lundeen, Lindsay, Ph.D. (University of Georgia), M.A. (Wake Forest University), B.S. (Kennesaw State University), Assistant Professor, 2023. Mamiseishvili, Ketevan, Ph.D., M.A. (University of Missouri-Columbia), B.A. (Akaki Tsereteli State University), Professor, 2008, 2017.

McCray, Suzanne, Ph.D. (University of Tennessee), M.A., B.A.
(University of Arkansas), Associate Professor, 2010.
Miller, Michael T., Ed.D. (University of Nebraska), M.S., B.A. (Southern Illinois University), Professor, 2003, 2005.
Murry, John, Ed.D., J.D., M.B.A., B.S.B.A., B.S. (University of Arkansas), Associate Professor, 1993, 1999.
Perryman, Kristi Leann, Ph.D. (University of Arkansas), M.S., B.S.
(Southwest Missouri State University), Associate Professor, 2014, 2022.
Popejoy, Erin O., Ph.D. (University of Texas-San Antonio), M.A. (Texas State University), B.A. (Case Western Reserve University), Assistant Professor, 2015.
Roessger, Kevin, Ph.D., M.S., B.A. (University of Wisconsin-Milwaukee), Associate Professor, 2016, 2019.
Samuels, Mandel G., M.B.A. (University of Arkansas), B.A. (Oklahoma State University), Clinical Assistant Professor, 2012, 2018.
Shelton, Leslie Jo, Ph.D. (Michigan State University), M.Ed., B.A. (Ohio University), Associate Professor, 2014, 2018.
Williams, Brent Thomas, Ph.D. (University of Illinois, UrbanaChampaign), M.S. (University of Texas Southwestern Medical School), B.A. (Austin College), Associate Professor, 2002, 2008.

Zhang, Jihong, Ph.D. (University of lowa), M.S. (University of Kansas), B.A. (Soochow University), Assistant Professor, 2023.

## Public Health (PBHL)

Public health is an exciting, diverse major that focuses on disease prevention and health promotion needs at the community level. Public health work is conducted by teams of clinicians, epidemiologists, behavioral scientists, environmental scientists, health education
specialists, health inspectors, statisticians, and health administrators. Students receiving a B.S. in Public Health will be trained for entrylevel public health positions found in government agencies, health corporations, and community non-profit organizations. Graduates are employed in a variety of settings, including: public health departments, non-governmental agencies, hospitals, health care management organizations, and health care accrediting agencies. The public health degree at the University of Arkansas is specifically focused on health promotion, health behavior and health education. In accordance, graduates are eligible for the Certified Health Education Specialist credential.

Public health is delivered in a variety of capacities to:

- Impact behavioral factors that are linked to chronic diseases, such heart disease, diabetes, and cancer.
- Promote behaviors that positively impact outcomes related to issues such as physical activity, nutrition, and sexual health.
- Prevent and control the spread of infectious diseases
- Improve access to health care
- Affect issues related to the health of the environment
- Prevent violent and unintentional injuries
- Participate in global health endeavors
- Prevent drug use and abuse
- Assure the safety of our food supply
- Manage the delivery of health services

## Requirements for B.S. in Public Health

An undergraduate major in public health leads to the Bachelor of Science degree. The minimum requirements for all students in the college are listed under general studies.

All students begin the program as pre-public health majors. To be admitted into the Public Health major, the student must meet the following criteria:

1. Complete the Pre-Public Health requirements
2. Have a 2.5 or higher University of Arkansas GPA ${ }^{1}$

## Pre-Public Health Requirements

| PSYC 2003 | General Psychology (ACTS Equivalency $=$ PSYC <br> 1103 ) | 3 |
| :--- | :--- | :--- |
| STAT 2303 | Principles of Statistics (ACTS Equivalency $=$ MATH <br> $2103)$ | 3 |

or ESRM 2403 Statistics in Nursing

| NUTR 1213 | Fundamentals of Nutrition | 3 |
| :--- | :--- | :--- |
| BIOL 2013 | General Microbiology (ACTS Equivalency = BIOL | 4 |
| \& BIOL 2011L | 2004 Lecture) <br> and General Microbiology Laboratory (ACTS |  |
|  | Equivalency = BIOL 2004 Lab) |  |
| ENGL 3053 | Technical and Professional Writing (ACTS <br> Equivalency = ENGL 2023) | 3 |

## Total Hours

${ }^{1}$ All students, including transfer students must complete at least 12 credit hours at the University of Arkansas with a minimum of 2.5 GPA.

Requirements for a Major in Public Health

| Pre-major (PBHL) | Requirements | 16 | ${ }^{3}$ Pre-major (PBHL) students are not allowed to enroll in these courses. |  |  |

\%2F1XG8924jwOx8pTIw8IWNAGp0s\%3D\&reserved=0) as outlined in the Catalog of Studies. The courses that meet the state minimum core also fulfill many of the university's General Education requirements (https://nam03.safelinks.protection.outlook.com/?url=https\%3A\%2F \%2Fnextcatalog.uark.edu\%2Fundergraduatecatalog\%2Fgened \%2Fgeneraleducation\%2F\&data=02\%7C01\%7Cagriffin\%40uark.edu \%7Ce4e632415f9b49eda9bf08d7f5c20b91\%7C79c742c4e61c4fa5be89a3cb566a \%2BDWRVEfAqIMsYNX4KXEgX2JdEJJY7Go\%3D\&reserved=0), although there are additional considerations to satisfy the general
education learning outcomes. Students are encouraged to consult with their academic adviser when making course selections.
2 Course requires $C$ or better for degree award.
3 If a student earns a "D", "F", or "W" in this course, the course must be repeated. The course must be passed on the second attempt (i.e., "A", "B", or "C"). If a student earns a "D", "F", or "W" in a second attempt, the student will be unable to obtain their degree in Public Health.

Buttram, Mance E., Ph.D., M.A. (Florida International University), M.A. (University of Arizona), Associate Professor, Department of Health, Human Performance and Recreation, 2021.
Davis, Robert, Ph.D., M.S., B.S. (University of Mississippi), Assistant

## Performance and Recreation, 1994.

Russell, Alex, Ph.D. (Texas A \& M University), M.A. (University of Houston), B.S. (University of Houston), Assistant Professor, Department of Health, Human Performance and Recreation, 2020.

## Courses

PBHL 1103. Personal Health and Safety. 3 Hours.
Health and safety problems with emphasis on the promotion of individual health and safety. (Typically offered: Fall and Spring)
PBHL 1203. Prevention of Drug Abuse. 3 Hours.
Provides an overview of drugs of use and abuse in society. Also assists the student
Professor, Department of Health, Human Performance and Recreation, 2018.

Dobbs, Page, Ph.D., M.S., B.S., (University of Arkansas), Assistant Professor, Department of Health, Human Performance and Recreation, 2020.

Hammig, Bart, Ph.D. (University of Kansas), M.P.H. (University of Kansas Medical Center), B.S. (University of Kansas), Professor, Department of Health, Human Performance and Recreation, 2008, 2018.
Henry, Leah Jean, Ph.D. (Texas Woman's University), M.A. (Michigan State University), B.S. (Texas A\&M University), Associate Professor, Department of Health, Human Performance and Recreation, 2008, 2011. Jones, Ches, Ph.D. (University of Alabama at Birmingham), B.S.E. (Pittsburg State University), Professor, Department of Health, Human

| Year Total: | 14 | 13 |

Total Units in Sequence: 120
${ }^{1}$ Students must complete the State Minimum Core requirements (https://nam03.safelinks.protection.outlook.com/?url=https\%3A\%2F \%2Fnextcatalog.uark.edu\%2Fundergraduatecatalog\%2Fgened \%2Fstateminimum\%2F\&data=02\%7C01\%7Cagriffin\%40uark.edu in evaluating drug abuse prevention approaches for public, private, or community
settings. (Typically offered: Fall and Spring)

PBHL 1303. Introduction to Human Sexuality. 3 Hours.
An examination of human sexuality with a critical analysis of male and female attitudes and values affecting self-understanding and gender identity. (Typically offered: Fall and Spring)

## PBHL 2101. Special Topics. 1 Hour.

Examination and application of health promotion concepts based on individualized health hazard appraisal. (Not to replace content courses leading to teacher certification in health education). (Typically offered: Fall and Spring) May be repeated for up to 5 hours of degree credit.

PBHL 2663. Terminology for the Health Professions. 3 Hours.
Emphasis is on word roots and combined forms of words describing various facets of health and disease. Descriptive definitions with application of practical significance included for the health professional. (Typically offered: Spring)
This course is cross-listed with EXSC 2663.
PBHL 3041. Undergraduate Pre-Internship. 1 Hour.
This course prepares students for their public health internship by providing professional development at the necessary steps for identifying and securing a Public Health Internship. (Typically offered: Fall and Spring)

PBHL 310V. Seminar in Public Health. 1-3 Hour.
Synthesis and critical analysis of current literature in the area of community health promotion. Prerequisite: PBHL majors only. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

PBHL 3202. Health Care and Public Health Policy. 2 Hours.
This course provides an introduction to health care services, inclusive of the characteristics and structure of the U.S. health care delivery system and comparison to other health systems. Aspects of public health policy, laws, ethics, and economics will be examined. Upon completion of the course, students are expected to demonstrate an understanding of the key elements of the health care industry as it pertains to medical care and public health, including an understanding of the roles of health care providers, public and private payers, the role of government, and challenges facing health care systems. Pre- or Corequisite: PBHL 1103 and PBHL 3443. Prerequisite: Public Health Bachelor of Science (PBHLBS) major required. (Typically offered: Fall and Spring)

PBHL 3202H. Honors Health Care and Public Health Policy. 2 Hours.
This course provides an introduction to health care services, inclusive of the characteristics and structure of the U.S. health care delivery system and comparison to other health systems. Aspects of public health policy, laws, ethics, and economics will be examined. Upon completion of the course, students are expected to demonstrate an understanding of the key elements of the health care industry as it pertains to medical care and public health, including an understanding of the roles of health care providers, public and private payers, the role of government, and challenges facing health care systems. Prerequisite: Public Health Bachelor of Science (PBHLBS) major and honors standing required. (Typically offered: Fall and Spring)
This course is equivalent to PBHL 3202.
PBHL 333V. Research in Public Health. 1-3 Hour.
This course is intended for undergraduate students who wish to gain research experience under the direction of a faculty mentor. Students will work independently and collaborate with faculty member(s) and fellow students to conduct research in a specified area of interest. The purpose of the course is for the student to develop knowledge in her/his own domain, strengthen her/his research skills, and work collaboratively on research projects. The directed research course places more emphasis on the students' role as a researcher in an academic setting. Prerequisite: Instructor consent. (Typically offered: Fall and Spring) May be repeated for up to 9 hours of degree credit.

## PBHL 333VH. Honors Research in Public Health. 1-3 Hour.

This course is intended for undergraduate students who wish to gain research experience under the direction of a faculty mentor. Students will work independently and collaborate with faculty member(s) and fellow students to conduct research in a specified area of interest. The purpose of the course is for the student to develop knowledge in her/his own domain, strengthen her/his research skills, and work collaboratively on research projects. The directed research course places more emphasis on the students' role as a researcher in an academic setting. Prerequisite: Instructor consent. (Typically offered: Fall and Spring) May be repeated for up to 9 hours of degree credit.
This course is equivalent to PBHL 333V.

## PBHL 3443. Introduction to Public Health. 3 Hours.

This course is intended for undergraduate students and will focus on the foundations of public health as a profession and its future outlook. Public health concepts and practice. Topics include philosophy, purpose, history, organization, functions, tools, activities and results at national, state, and community levels. (Typically offered: Fall and Spring)

## PBHL 3633. First Responder-First Aid. 3 Hours.

Prepares persons to administer cardiopulmonary resuscitation and emergency aid to victims of serious bleeding, poisoning, shock, fracture, and other forms of injury until emergency medical services personnel arrive at the scene. (Typically offered: Irregular)
PBHL 3643. Public Health Program Planning and Evaluation. 3 Hours.
Emphasis on community analysis; defining and verifying community health problems; establishing program goals; defining and assessing health behaviors; formulating educational goals, objectives, methods, and activities; promoting programs; and designing program evaluation. Prerequisite: Public Health Bachelor of Science (PBHLBS) major. (Typically offered: Spring)
PBHL 3643H. Honors Public Health Program Planning and Evaluation. 3 Hours. Emphasis on community analysis; defining and verifying community health problems; establishing program goals; defining and assessing health behaviors; formulating educational goals, objectives, methods, and activities; promoting programs; and designing program evaluation. Prerequisite: Public Health Bachelor of Science (PBHLBS) major and honors standing. (Typically offered: Fall and Spring) This course is equivalent to PBHL 3643.

## PBHL 3723H. Honors Research Methods in Public Health. 3 Hours.

This course will provide an overview of research methods for experimental research designs in public health. The students will learn facets of research including: developing a research idea, getting funding for research, obtaining IRB/IACUC approval, data collection, data input, statistical analyses, and preparing manuscripts for publication. Designed for public health honor students in spring of their junior year or the summer prior to their senior year to prepare them for their honor's thesis. Prerequisite: Honors Standing. (Typically offered: Spring)
This course is cross-listed with EXSC 3723 H .
PBHL 3901H. Honors Public Health Thesis Tutorial. 1 Hour.
Designed to provide the foundation for the Honors Thesis/Project. Students and faculty tutors work "one-on-one" exploring a specific topic which has been agreed upon by the student and the professor. Prerequisite: Honors candidacy and PBHLBS major. (Typically offered: Fall, Spring and Summer)

## PBHL 391V. Special Topics in PBHL. 1-3 Hour.

Designed to cover specialized topics not presented in public health coursework. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

PBHL 4043. Internship in Public Health. 3 Hours.
Designed to provide the student with an extended work experience in a selected community/public health program. The student works under college supervision with a professional in the health care delivery field. Pre- or Corequisite: PBHL 3643 and PBHL 4603. Prerequisite: Successful completion of PBHL 1103, Senior standing, and Public Health Bachelor of Science (PBHLBS) major required. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

PBHL 410V. Global Health: Issues, Concepts and Perspectives. 3-6 Hour. Emphasis placed on needs assessment, development, implementation, evaluation, and sustainability of public health initiatives designed to improve the health and well-being of community members at all levels of the health continuum; topics of focus will include determinants of health, mental health, environmental health, nutrition, maternal and child health, sexual health, injuries and chronic and infectious diseases. Prerequisite: Approval from Study Abroad to participate in the Community Development Service Learning Program. (Typically offered: Summer)

PBHL 410VH. Honors Global Health: Issues, Concepts and Perspectives. 3-6 Hour.
Emphasis placed on needs assessment, development, implementation, evaluation, and sustainability of public health initiatives designed to improve the health and well-being of community members at all levels of the health continuum; topics of focus will include determinants of health, mental health, environmental health, nutrition, maternal and child health, sexual health, injuries and chronic and infectious diseases. Prerequisite: Approval from Study Abroad to participate in the Community Development Service Learning Program. (Typically offered: Summer) This course is equivalent to PBHL 410V.

PBHL 4603. Health Behavior: Theories and Application. 3 Hours. Understanding the reasons for health behavior is vital for the health education professional. It is necessary to assist in the development of services and programs that are likely to move an individual from an unhealthy behavior to one that is more appropriate for a healthy lifestyle. This course surveys the major health behavior theories used in health education and applications of the theories will be used in the class. Prerequisite: PBHL 3443 and Public Health Bachelor of Science (PBHLBS) major required. (Typically offered: Fall and Spring)
PBHL 4603H. Honors Health Behavior: Theories and Application. 3 Hours. Understanding the reasons for health behavior is vital for the health education professional. It is necessary to assist in the development of services and programs that are likely to move an individual from an unhealthy behavior to one that is more appropriate for a healthy lifestyle. This course surveys the major health behavior theories used in health education and applications of the theories will be used in the class. Prerequisite: Must be a honors student, PBHL 3443 and Public Health Bachelor of Science (PBHLBS) major required. (Typically offered: Fall and Spring) This course is equivalent to PBHL 4603.

PBHL 4613. Principles of Epidemiology. 3 Hours.
Distribution and patterns of disease or physiological conditions within populations; an examination of the nature of epidemiological research. (Typically offered: Fall and Spring)
PBHL 4613H. Honors Principles of Epidemiology. 3 Hours.
Distribution and patterns of disease or physiological conditions within populations; an examination of the nature of epidemiological research. Prerequisite: Honors standing. (Typically offered: Fall and Spring)
This course is equivalent to PBHL 4613.
PBHL 4623. Human Diseases. 3 Hours.
An examination of the variety, behavior, distribution, and management of both infectious and noninfectious diseases in human populations. Prerequisite: BIOL 1603 (or BIOL 1543 and BIOL 1541L). (Typically offered: Irregular)

PBHL 4643. Multicultural Health. 3 Hours.
Through lecture, discussion, simulations, and case studies, students will develop an appreciation for the cultural traditions and practices of different groups. The importance and implications of these traditions on health outcomes and health status will be examined. Students will also develop skills of cultural competence that are essential for public health practitioners today. Prerequisite: Public Health Bachelor of Science (PBHLBS) major required. (Typically offered: Fall and Spring)

## PBHL 4643H. Honors Multicultural Health. 3 Hours.

Through lecture, discussion, simulations, and case studies, students will develop an appreciation for the cultural traditions and practices of different groups. The importance and implications of these traditions on health outcomes and health status will be examined. Students will also develop skills of cultural competence that are essential for public health practitioners today. Prerequisite: Public Health Bachelor of Science (PBHLBS) major and honors standing required. (Typically offered: Fall and Spring)
This course is equivalent to PBHL 4643.
PBHL 498VH. Honors Public Health Thesis/Project. 1-3 Hour.
Designed to provide facilitation of the Honors Thesis/Project. Students and faculty work "one-on-one" to complete the honors thesis/project. Prerequisite: Honors candidacy, PBHLBS major, and PBHL 3901H or PBHL 3723H. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

## Recreation and Sport Management (RESM)

The program in recreation and sport management is designed to prepare candidates for a variety of career opportunities in the field of recreation and sport management. Career opportunities may include park and recreation directors for a city, college and professional sports management, fitness center managers, state and national park managers, camp administrators, or work in YMCAs, Boys and Girls Clubs, or other youth-serving agencies. Graduates of this program should be well prepared to enter the recreation and sport workforce at an entry level position or pursue graduate studies in such areas as recreation management and sport management.

All students must complete the University Core requirements. In addition, all students must take the required general studies for the recreation and sport management core requirements listed. Recreation and sport management majors must obtain a ' C ' or better in all courses beginning with the alpha code RESM. To enroll in RESM 440V, students must have a 2.50 GPA or better in RESM core and professional elective courses, have senior standing and have completed RESM 3873 and two RESM 2011 practicums.

There are several experiential requirements within the recreation and sport management core. Students are required to do three practicum experiences (RESM 2011). Each experience totals 45 hours. A more intense experience of an internship (RESM 440V) requires a minimum of
400 hours or work full time for 12-15 weeks in an agency with a qualified park, recreation, or sport management professional.

An undergraduate major in Recreation and Sport Management leads to the Bachelor of Science degree. The minimum requirements for all students in the college are listed under general studies.

## Requirements for B.S. in Recreation and Sport Management with Recreation Administration Concentration

Curriculum for a Major in Recreation and Sport Management

Students must complete 40 hours of 3000/4000 level courses to complete degree.

State Minimum Core
Required state minimum core for major in Recreation and Sport Management:

PLSC 2003 American National Government (ACTS
Equivalency = PLSC 2003) ${ }^{2}$
PSYC 2003 General Psychology (ACTS Equivalency = PSYC 1103) ${ }^{2}$

SOCI 2013 General Sociology (ACTS Equivalency = SOCI 1013) ${ }^{2}$

ECON 2143 Basic Economics: Theory and Practice ${ }^{2}$ or ECON 20 Principles of Macroeconomics (ACTS Equivalency = \& ECON 20̌́ECON 2103)
and Principles of Microeconomics (ACTS Equivalency
= ECON 2203)
$\begin{array}{ll}\text { Recreation and Sport Management Major Requirements } \\ \text { COMM } 1313 & \text { Public Speaking (ACTS Equivalency }=\text { SPCH } \\ & \text { 1003) }\end{array}$
RESM 2011 Recreation and Sport Practicum (two enrollments of one hour each) ${ }^{1}$
RESM 3093 Diversity and Inclusion in Recreation and Sport Management ${ }^{1}$
RESM 2853 Leisure and Society ${ }^{1}$
RESM 3873 Law and Risk for Recreation and Sport Management ${ }^{1}$
RESM 3833 Program Planning in Recreation and Sport ${ }^{1}$
RESM 4013 Contemporary Issues in Leisure and Sport ${ }^{1}$
RESM 3083 Research in Recreation and Sport ${ }^{1}$
RESM 4411 Pre-Internship Preparation ${ }^{1}$
RESM 440V Internship (12 hours of RESM 440V required) ${ }^{1}$

## Recreation and Sports Administration Concentrations (See

## Minor in Outdoor Leadership

The Outdoor Leadership minor requires completion of 15 hours of study with at least 50 percent of the courses applied toward the minor taken in residence. Each student must have a 2.00 cumulative grade-point average in the courses offered to complete the minor.

Degree-seeking students who are not majoring in the Recreation and Sport Management Program but are working toward a minor should note the following:

1. Students who elect to obtain an Outdoor Leadership minor must provide written notice of their intent to the dean's office of the college in which they are receiving a degree. This notice and all requirements
for the Outdoor Leadership minor must be completed prior to the awarding of the student's undergraduate degree.
2. All equivalencies must be approved by the program faculty in recreation and sport management.

Program Curriculum:

| Required Core (11 hours) |  |  |
| :--- | :--- | ---: |
| RESM 1023 | Foundations of Outdoor Leadership | 3 |
| RESM 1032 | Outdoor Living Skills | 2 |
| RESM 3043 | Natural Resources and Outdoor Ethics | 3 |
| RESM 4023 | Applied Outdoor Adventure Leadership | 3 |
| Skill Based Courses (4 hours) |  |  |
| RESM 1051 | Rock Climbing I | 1 |
| RESM 1061 | Rock Climbing II | 1 |
| RESM 1071 | Introduction to Mountain Biking | 1 |
| RESM 1081 | Advanced Mountain Biking | 1 |
| Total Hours |  | 15 |

Edmonston, Craig, M.S. (University of Kansas), B.S. (Kansas State University), Instructor, Department of Health, Human Performance and Recreation, 2016.
Langsner, Steve, Ph.D. (Indiana University at Bloomington), M.S. (University of Baltimore), B.S. (Springfield College), Associate Professor, Department of Health, Human Performance and Recreation, 1989.
Lens, Joshua, J.D. (University of lowa), B.A. (University of Northern lowa), Assistant Professor, Department of Health, Human Performance and Recreation, 2018.
Moiseichik, Merry Lynn, J.D. (University of Arkansas), R.Ed. (Indiana University at Bloomington), M.S., B.S.E. (State University of New York at Cortland), Professor, Department of Health, Human Performance and Recreation, 1989, 2007.
Schmitt, Craig, Ph.D. (University of Northern Colorado), M.B.A. (University of Central Florida), B.S. (University of Florida), Teaching Assistant Professor, Department of Health, Human Performance and Recreation, 2020.

## Courses

RESM 1003. Professional Foundations of Recreation and Sport Management. 3 Hours.
An analysis of the historical and philosophical development of recreation, sport and leisure. Theories of play, recreation, sport and leisure are studied. Economic, political, technical, and social forces are examined as these influence recreation, sport, parks, and leisure services is examined in context with diverse service delivery systems. Prerequisite: RESM major or RESM minor or instructor consent. (Typically offered: Fall, Spring and Summer)

## RESM 1013. Sport Management Fundamentals. 3 Hours.

This course is designed to present an overview of the fundamentals of sport management in professional and intercollegiate sport, as well as issues facing sport organizations and how management techniques can be applied to solve sport business problems. A description of career opportunities in sport will be presented with special interest in helping the student design a course of study that best meets his/her goals. Prerequisite: RESMBS major or instructor consent. (Typically offered: Fall)

RESM 1023. Foundations of Outdoor Leadership. 3 Hours.
An introduction to the philosophy and history of outdoor recreation and an examination of the theories, principles, and practices of leading others outdoors. Focus is on an introduction to outdoor technical, power, and meta-skills needed to effectively lead adventure-based programs. Emphasis is placed on communication skills, group dynamics, flexible leadership styles, problem solving, basic facilitation techniques, professionalism, and decision-making. Field visits are required in this course. (Typically offered: Fall, Spring and Summer)
RESM 1032. Outdoor Living Skills. 2 Hours.
Classroom study leading to one overnight (weekend) trip to develop personal experience in outdoor recreational activities. Topics include low impact practices, meal planning, risk management, route and description plans, equipment selection, use, maintenance, clothing systems, shelters, weather, and more. An overnight outing is required in this course. (Typically offered: Fall and Spring)

RESM 1041. Social Issues in the Outdoor Industry. 1 Hour.
Every participant in outdoor sports - be it a recreational or a competitive environment - is affected by social issues. Building a nuanced and comprehensive understanding of these issues empowers future outdoor industry professionals to address the issues in holistic ways. This course will provide an overview of a variety of topics including but not limited to patriarchy, white supremacy, heteronormativity, fatphobia, Indigenous erasure, climate advocacy, physical and neuro disabilities, tokenism, and much more. We will also learn how to stop perpetuating the harmful cycles in the outdoor industry that many of these oppressive systems create. Prerequisite: Students must have instructor consent and/or be enrolled in the Outdoor Leadership minor (ODLR). (Typically offered: Irregular)

## RESM 1051. Rock Climbing I. 1 Hour.

This course will acquaint students with the principles and practices of indoor rock climbing, rock climbing equipment, climbing systems, physics of rock climbing, climbing movement, belaying, and different approaches to rock climbing. The course will enable students to increase muscular strength, endurance, and flexibility of the body through rock climbing as a fitness activity. This course will include the Professional Climbing Instructors Association Climb Site Belayer Certification. (Typically offered: Fall and Spring)

## RESM 1061. Rock Climbing II. 1 Hour.

Designed to acquaint students with intermediate to advanced climbing movement and techniques. Emphasis is placed on advanced understanding of climbing wall equipment, inspection, and maintenance, climbing instructional techniques, assisted braking belay devices, climbing rescue, supervision, and risk management. This course will include the Professional Climbing Instructors Association Climbing Wall Instructor Certification. (Typically offered: Fall and Spring)

## RESM 1071. Introduction to Mountain Biking. 1 Hour.

This course will deliver the basic skills and resources necessary for students to develop confidence in pursuing mountain biking. Topics will include technique and handling, basic maintenance, equipment, and resources for exploring the many mountain bike trails in Northwest Arkansas. Prerequisite: ODLR-M student or instructor consent. (Typically offered: Fall and Spring)

## RESM 1081. Advanced Mountain Biking. 1 Hour.

This course will deliver the intermediate to advanced skills and resources necessary for students to develop confidence in pursuing mountain biking. Topics will include progressive techniques and handling, advanced maintenance, and an exploration of a variety of trail types (e.g. XC, downhill, skills development, etc.) in Northwest Arkansas. Prerequisite: ODLR-M student or instructor consent. (Typically offered: Fall and Spring)

RESM 1091. Introduction to Bike Mechanics. 1 Hour.
This course will deliver basic skills and resources necessary for students to develop maintenance and repairs on bikes. Designed to progress through all the parts of the bike and conceptualize topics taught in class. Topics include drivetrain repair and maintenance, brake repair and maintenance, headset and hub adjustments, and flat tire repair. Prerequisite: Instructor consent and/or be enrolled in the Outdoor Leadership minor (ODLR). (Typically offered: Irregular)
RESM 1101. Wilderness First Aid. 1 Hour.
This course is the industry standard for wilderness medicine certifications for outdoor guides and leaders traveling for day trips or short adventures. Certification is dependent on testing and performance and participation in the course. Through this course, students will leader how to assess, treat, prioritize illnesses and injuries in remote settings. Active engagement is required as students will participate in skills labs and simulations. Students will receive certifications from Wilderness Medicine Training Center (WMTC) for a Wilderness First Aid, Wilderness CPR, and Epinephrine. Prerequisite: ODLR-M student or instructor consent. (Typically offered: Irregular)

RESM 1121. Soft Surface Trail Stewardship and Management. 1 Hour.
This course will deliver basic skills and resources necessary for students to learn trail design history, building techniques, maintenance, and sustainability. Topics include user access, tool usage, stonework, vegetative abatement, drainage and more. Prerequisite: ODLR-M student or instructor consent. (Typically offered: Fall)

## RESM 1131. Introduction to Bikepacking. 1 Hour.

This course is for students interested in an introduction to bikepacking, exploring the experiences available for both mountain bike and gravel/rural road touring with a focus on the Ozarks Mountains. The course is designed to (1) teach students the introductory skills needed to successfully plan a route for a multiday bikepacking trip while (2) developing the basic understanding of bikepacking through a selfsupported but instructor led two days, one night group bikepacking trip. Prerequisite: ODLR-M student or instructor consent. (Typically offered: Fall)

## RESM 2011. Recreation and Sport Practicum. 1 Hour.

Students are assigned to assist in leisure-oriented programs for exposure to organizational structure, services, and programming of cooperating recreational and sport agencies. Students may take 1-2 hours per semester; each credit hour is a 45-hour experience. Students must complete 2 different experiences before internship. Prerequisite: RESM 1003 or RESM 1013 with a grade of $C$ or better. (Typically offered: Fall, Spring and Summer) May be repeated for up to 2 hours of degree credit.

## RESM 2813. Recreation and Sport Leadership. 3 Hours.

Development of knowledge related to leadership theory, group dynamics, and face to face leadership techniques. Students gain an understanding of leadership theories as they are applied in a field setting. Pre- or Corequisite: COMM 1313. Prerequisite: RESM 1003 or RESM 1013 with a grade of C or better. (Typically offered: Fall and Spring)

## RESM 2853. Leisure and Society. 3 Hours.

This course is an examination of leisure and its effect on society. Course content includes identification and exploration of motivating factors related to various traditional and contemporary leisure expressions as it occurs across diverse populations. (Typically offered: Fall, Spring and Summer)

## RESM 2853H. Honors Leisure and Society. 3 Hours.

This course is an examination of leisure and its effect on society. Course content includes identification and exploration of motivating factors related to various traditional and contemporary leisure expressions as it occurs across diverse populations. (Typically offered: Fall and Spring)
This course is equivalent to RESM 2853.

## RESM 3023. Sport Management Fundamentals. 3 Hours.

This course is designed to present an overview of the fundamentals of sport management in professional and intercollegiate sport, as well as issues facing sport organizations and how management techniques can be applied to solve sport business problems. A description of career opportunities in sport will be presented with special interest in helping the student design a course of study that best meets his/her goals. Prerequisite: RESM 1003 with a grade of $C$ or better. (Typically offered: Fall)

## RESM 3043. Natural Resources and Outdoor Ethics. 3 Hours.

An examination of the use and management of natural resources for outdoor recreation with consideration of multiple use, environmental ethics, risk management, and other current topics. An overnight outing is required in this course. (Typically offered: Fall and Spring)

## RESM 3063. Commercial Recreation and Sport. 3 Hours.

Examination of the commercial recreation and sport industries. The operational requirement of a wide range of recreation businesses will be studied. Case study and field investigation methods will be emphasized. Prerequisite: RESM 1003 or RESM 1013 with a grade of C or better. (Typically offered: Fall and Spring)

## RESM 3073. Managing College Athletics. 3 Hours.

This course examines modern college athletics and the issues facing today's college athletics administrators. To appropriately do so, the course looks at the history of college athletics and accompanying issues. Further, the class will identify and discuss various constituencies of an athletics department as well as the various units within an athletics department. The class will examine the makeup of the NCAA and its operations as well as issues facing it. Prerequisite: RESM 1003 or RESM 1013 both with a C or better. (Typically offered: Fall)

## RESM 3083. Research in Recreation and Sport. 3 Hours.

An introduction to the applied methods and techniques of research and evaluation in recreation and sport services. General consideration given to research applications such as needs assessment, program evaluation, and marketing studies. Emphasis placed on the logic underlying the research process. Prerequisite: Junior standing and RESM 1003 or RESM 1013 both with a grade of C or better. (Typically offered: Fall and Spring)

## RESM 3083H. Honors Research in Recreation and Sport. 3 Hours.

An introduction to the applied methods and techniques of research and evaluation in recreation and sport services. General consideration given to research applications such as needs assessment, program evaluation, and marketing studies. Emphasis placed on the logic underlying the research process. Prerequisite: Honors candidacy and RESM 1003 or RESM 1013 both with a grade of C or better. (Typically offered: Fall and Spring)
This course is equivalent to RESM 3083.
RESM 3093. Diversity and Inclusion in Recreation and Sport Management. 3 Hours.
An introduction to the basic concepts of inclusive and special recreation and sport services integrated with knowledge and skill sets required to provide accessible recreation and leisure programming for people with disabilities. Prerequisite: RESM 1003 with a grade of C or better. (Typically offered: Spring)

## RESM 3833. Program Planning in Recreation and Sport. 3 Hours.

Development of the fundamentals of program planning using modern techniques of identifying and analyzing program activity areas and community needs. Includes program development and application with a variety of population groups and representative leisure service areas. Prerequisite: RESM 1003 or RESM 1013 with a grade of $C$ or better. (Typically offered: Spring)

## RESM 3843. Recreation and Sport Facilities. 3 Hours.

Planning concepts, design principles, and maintenance techniques are emphasized. Also, technical design concepts and firsthand experiences in maintenance of facilities are included. Prerequisite: RESM 1003 or RESM 1013 with a grade of C or better. (Typically offered: Spring)

RESM 3873. Law and Risk for Recreation and Sport Management. 3 Hours. In-depth look at risk management and related legal issues affecting recreation and sport administration. Pre- or Corequisite: RESM major or RESM minor or by instructor consent. Prerequisite: Junior standing, and RESM 1003 or RESM 1013 both with a grade of C or better. (Typically offered: Fall)

RESM 3883. Marketing and Promotion in Recreation and Sport Management. 3 Hours.
This course provides an overview of the principles and practices of promotions and marketing in the recreation and sport industry. Topics include sport marketing planning, market segmentation and identification of the target market, marketing mix, and sponsorship. Credits: three hours. Prerequisite: (RESM 1003 or RESM 1013 with a grade of C or better), and (ECON 2143 or (ECON 2013 and ECON 2023)). (Typically offered: Fall and Spring)

RESM 3901H. Honors Recreation and Sport Management Thesis Tutorial. 1 Hour.
Designed to provide the foundation for the Honors Thesis/Project. Students and faculty tutors work "one-on-one" exploring a specific topic which has been agreed upon by the student and the professor. Prerequisite: Honors candidacy, RESMBS major, and RESM 1003 with a grade of C or better. (Typically offered: Fall, Spring and Summer)

RESM 391V. Special Topics in RESM. 1-3 Hour.
Designed to cover specialized topics not presented in recreation and sport management coursework. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

RESM 4003. Management in Recreation and Sport. 3 Hours.
Management techniques for recreation and sport programs and facilities.
Prerequisite: RESM 1003 or RESM 1013 with a grade of $C$ or better. (Typically offered: Fall and Spring)

## RESM 4013. Contemporary Issues in Leisure and Sport. 3 Hours.

Discussion of selected topics and review of current literature in the recreation and sport field. Analysis of current trends and professional issues are emphasized. Certification at the instructor level or higher in at least 2 areas of expertise must be completed before a grade is assigned in this course. Prerequisite: Senior standing and RESM 1003 or RESM 1013 with a grade of C or better. (Typically offered: Fall and Spring)

## RESM 4023. Applied Outdoor Adventure Leadership. 3 Hours.

This course considers the values and scope of outdoor recreation programs, leadership and skill development with practical experience in a wilderness environment. The course will include a canoe trip through the wilderness, and skill training in such areas as orienteering and rock climbing; and leadership development in interpersonal and processing skills. (Typically offered: Summer)

RESM 405V. Independent Study in Recreation and Sport. 1-3 Hour.
Provides student an opportunity to pursue special study of research problems. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

## RESM 4253. Business of Sport. 3 Hours.

This course is designed as a "Study Tour" course. For the first part of the course, students will learn about the business of various sport organizations in different US locations. During the second part of the course, students will travel to the specific US location to connect with and learn from industry professionals and tour a variety of sport organizations and facilities. Course includes study trip; length based upon destination. Additional fees required. Course will be offered during the Intersession. Prerequisite: 2.0 minimum GPA, RESMBS majors with minimum of 60 hours completed, and instructor consent. (Typically offered: Fall, Spring and Summer)

RESM 4273. The Intramural Sports Program. 3 Hours.
Historical development, aim and objectives, organization, administration, units of competition, program of activities, schedule making, scoring plans, rules and regulations, awards, and special administrative problems. (Typically offered: Fall Odd Years)

## RESM 4283. History and Application of American Sport. 3 Hours.

This survey course will explore the historical development of sport in American culture and the processes of change in American culture and sport from the 15th century to the present. Students will learn how to apply historical concepts to current issues in recreation and sport management. (Typically offered: Irregular)

RESM 440V. Internship. 1-12 Hour.
This experiential based course requires 40 hours per week of work in an approved agency for a full semester. It is recommended that students register for the summer session after completion of their course work. Prerequisite: RESM 4411, RESM 3873 and two hours of RESM 2011 with grades of C or better. (Typically offered: Fall, Spring and Summer)

## RESM 4411. Pre-Internship Preparation. 1 Hour.

Enables student preparation for internship experiences and eventual employment. Course will assist students in preparation of resumes; provide opportunities for interview practice; the development of job search and application skills, as well as other requisites for entering the professional workforce. Prerequisite: RESM 1003 or RESM 1013, both with a grade of C or better. Pre- or Corequisite: RESM 3873. (Typically offered: Fall)

## RESM 480V. Workshop. 1-3 Hour.

Workshop. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

RESM 498VH. Honors Recreation and Sport Management Thesis/Project. 1-3 Hour.

Designed to provide facilitation of the Honors Thesis/Project. Students and faculty work "one-on-one: to complete the honors thesis/project. Prerequisite: Honors candidacy, RESMBS major, and RESM 3901H. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

## Social Studies Education (SSED)

Freddie Bowles
Program Coordinator
306 Peabody Hall
479-575-3035
Email: fbowles@uark.edu

## Curriculum and Instruction Website (https://cied.uark.edu/)

The Department of Curriculum and Instruction offers a Bachelor of Arts in Teaching in Social Studies Education that leads to licensure for 7-12 instruction. The program focuses on developing reflective practitioners based on the constructivist perspective that teachers are life-long learners, reflective practitioners themselves, and scholar researchers. The coursework is designed to develop these attributes so that students graduate as effective teachers with the knowledge, skills, and dispositions to engage students with meaningful and authentic instruction. The Bachelor of Arts in Teaching degree will also prepare students in the humanities with the pedagogical skills, the content knowledge, and the dispositions for teaching and learning in 21st century classrooms.

## B.A.T. in Social Studies Education <br> Stage I: Pre-Social Studies Education (PSSED)

Complete all 46 hours of program pre-requisites for each content area.

1. Obtain a GPA of 3.0 or better on UA coursework.
2. Complete all content and pedagogy courses with a grade of " C " or better.

## 3. Complete a background check.

## Stage II: Admission to the B.A.T. Program

Admission to the Bachelor of Arts in Teaching program (B.A.T.) occurs the semester after the candidate has completed all pre-B.A.T. requirements including the first three courses in education - CIED 1013, CIED 1003, and CIED 2083 - prior to a student's entering the individual programs of study the following fall term. The B.A.T. program is competitive, and meeting the minimum requirements does not guarantee admission to the program. Applications to the B.A.T. program must be submitted by deadlines statement on the Office of Teacher Education (https://teachereducation.uark.edu/admissions/) website.

The application process includes:

1. Students must complete the application to teacher education (see the Teacher Education Application Fee (p. 53)) through the Teacher Education Office during the time period stated on the Office of Teacher Education website. This includes completing and passing the criminal background check.*
2. Submission of B.A.T. application.
3. Submission of writing sample to content area faculty.
4. Submission of transcripts for all coursework.

* Another background check will be required prior to graduation in order to be eligible for licensure.

## Stage III: Requirements for Program Continuation and Internship

1. Maintain a cumulative GPA of 3.0 or better.
2. All professional education courses and content courses must have a grade 'C' or better (except SEED 3283 below). No teaching methods courses may be taken as self-paced (correspondence) courses.

## Stage IV: Requirements for Internship Semester (spring, senior year) and Program Completion

All students in the BAT program must complete the following requirements prior to being admitted to the spring semester of their senior year.

1. Students must earn a 'B' or better in the fall semester, senior year SEED 3283 practicum course.
2. Earn a cumulative GPA of 3.0 or better by the end of the fall semester, senior year. Students are not permitted to intern in the spring if the GPA requirement is not met.
3. Students must have taken the appropriate Praxis II-Content Knowledge exam to be admitted to the spring semester, senior year.
4. Candidate must complete a successful internship admission interview with B.A.T. faculty. Note these interviews are scheduled with all senior students during the fall semester.
5. Satisfactorily complete the internship/student teaching experience that has been approved by the Director of Field Placement.

All students seeking licensure in the State of Arkansas are subject to a criminal background check. Background checks can take up to six months to process; therefore, students are advised to complete and submit the forms to the proper authorities at least six months in advance of graduation (or six months prior to applying for a teaching license). Arkansas will not grant a teaching license to anyone who has been convicted of a felony.

## Social Studies Education Requirements

Pre-Social Studies Education requirements

| University Core (State Minimum Core) |  | 35 |
| :---: | :---: | :---: |
| Courses specifically required for the Social Studies Education B.A.T. program |  |  |
| ENGL 1013 | Composition I (ACTS Equivalency = ENGL 1013) |  |
| ENGL 1023 | Composition II (ACTS Equivalency = ENGL 1023) |  |
| MATH 1203 | College Algebra (ACTS Equivalency $=$ MATH 1103) (or higher) |  |
| HIST 2003 | History of the American People to 1877 (ACTS Equivalency = HIST 2113) |  |
| HIST 1113 | Institutions and Ideas of World Civilizations I (ACTS Equivalency = HIST 1113) |  |
| HIST 1123 | Institutions and Ideas of World Civilizations II (ACTS Equivalency = HIST 1123) |  |
| HIST 2013 | History of the American People, 1877 to Present (ACTS Equivalency = HIST 2123) |  |
| Additional Pre-Social Studies Education requirements ${ }^{1}$ |  | 9 |
| CIED 1013 | Introduction to Education |  |
| CIED 1003 | Introduction to Technology in Education |  |
| CIED 2083 | Innovation and Creativity in Daily Practice |  |
| Educational Requirements ${ }^{1}$ |  | 31 |
| EDST 3223 American Educational History or HIST 489'History Seminar |  |  |
| CIED 3033 | Classroom Learning Theory |  |
| CIED 4023 | Teaching in Inclusive Secondary Settings |  |
| SEED 4063 | Disciplinary and Interdisciplinary Literacies in Education |  |
| CIED 4285 | Teaching Experience |  |
| CIED 4403 | Understanding Cultures in the Classroom |  |
| SEED 3283 | Teaching Experiences in Education |  |
| SEED 4022 | Classroom Management Concepts |  |
| SEED 4103 | Methods of Teaching Secondary Social Studies I |  |
| SEED 4113 | Teaching History, Government and Economics |  |

Social Studies Content ${ }^{1}$
Social Science electives (6 hours of 3000 -level) ${ }^{2}$
Social Science electives ( 9 hours of 4000 -level) ${ }^{2}$
ECON 2143 Basic Economics: Theory and Practice
GEOS 1123 Human Geography (ACTS Equivalency = GEOG 1113)
or ANTH 10ء́Introduction to Cultural Anthropology (ACTS Equivalency $=$ ANTH 2013)
GEOS 2003 World Regional Geography (ACTS Equivalency = GEOG 2103)
HIST 4583 Arkansas in the Nation or HIST 338:Arkansas and the Southwest
PLSC 2003 American National Government (ACTS Equivalency = PLSC 2003)
SOCI 2013 General Sociology (ACTS Equivalency = SOCI 1013)

6 hours Social Studies Diversity core chosen from courses below:
HIST 3233 African American History to 1877
HIST 3243 African American History Since 1877
HIST 3093 Women in U.S. History

| HIST 3263 | History of the American Indian |
| :--- | :--- |
| HIST 3303 | U.S. Immigration History |
| HIST 3313 | Latinos and Latinas in the U.S. |
| PLSC 3263 | Latino Politics |
| PLSC 3293 | Black Politics |
| PLSC 4323 | Racial Identity, Politics, and Public Policy |
| PLSC 4333 | Southern Politics |
| PLSC 4593 | Islam and Politics |
| PLSC 3853 | American Foreign Policy |
| General Electives | $\mathbf{6}$ |
| Total Hours | $\mathbf{1 2 0}$ |

${ }^{1}$ All professional education courses and content courses must have a grade "C" or better, except SEED 3283, which must have a "B" or better.
${ }^{2}$ A minimum of 6 hours with international/non-U.S. focus must be taken among the combined 15 hours of 3000 - and 4000 -level Social Science electives.

## Dismissal based on Unethical or Unprofessional Behaviors from the B.A.T. program

The University of Arkansas' teacher preparation programs adhere to the Code of Ethics of the Education Profession as established by the National Education Association as described in NEA Code of Ethics (https://nam11.safelinks.protection.outlook.com/? url=http\%3A\%2F\%2Fwww.nea.org\%2Fhome \%2F30442.htm\&data=04\%7C01\%7Ckmamisei\%40uark.edu \%7Ca1b2cdf9639c4ba1b3ed08d897252433\%7C79c742c4e61c4fa5be89a3 \%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQljoiV2luMzliLCJBTil6Ik1 \%7C1000\&sdata=Rz4djbrQkGT\%2F6apKO7qqCfxSVIB \%2F1WVbxhHQ2C5AtBk\%3D\&reserved=0), Arkansas Division of Elementary and Secondary Education Code of Ethics (https://nam11.safelinks.protection.outlook.com/? url=http\%3A\%2F\%2Fdese.ade.arkansas.gov\%2Fdivisions \%2Feducator\%2520effectiveness\%2Fplsb-professional-ethics-discipline\%2Fcode-of-ethics-for-arkansaseducators\&data=04\%7C01\%7Ckmamisei\%40uark.edu
felonious behaviors, or ethical violations (i.e. Arkansas Code of Ethics, Code of Student Life). Such suspensions will be referred to the Teacher Candidate Professional Review Committee for review and may become permanent.

The Program Coordinator, in consultation with the Teacher Education Professional Review Committee and the Dean's Office for Academic and Student Affairs in the College of Education and Health Professions, has the authority and responsibility to dismiss a student from the teacher education program for unethical or unprofessional behavior and/or not recommend the student for licensure.

More detailed guidelines about the policies, supports, and other requirements are provided in the program's handbook, as well as on the Office of Teacher Education website (https:// teacher-education.uark.edu/) or the Teacher Education Support page (https://nam11.safelinks.protection.outlook.com/? url=https\%3A\%2F\%2Fteacher-education.uark.edu\%2Fsupport \%2Findex.php\&data=04\%7C01\%7Ckmamisei\%40uark.edu \%7Ca1b2cdf9639c4ba1b3ed08d897252433\%7C79c742c4e61c4fa5be89a3cb566a8 \%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQljoiV2luMzliLCJBTil6Ik1haWwil \%7C1000\&sdata=4bDHshKQWwWkHUpWokOosPmSDje1rOxumOETQaahHuA $\% 3 D \& r e s e r v e d=0$ ). Students who have been dismissed on the basis of unethical or unprofessional conduct may appeal the decision following the procedures outlined under the Student Grievances and Appeals section of the Undergraduate Catalog of Studies (http://catalog.uark.edu/ undergraduatecatalog/academicregulations/studentacademicappeals/).

## Social Studies Education B.A.T. Eight-Semester Plan

 1 解 who qualify for admission to the program can finish a degree in four years by following the suggested order of classes below.

| First Year | Fall | Units <br> Spring |
| :--- | ---: | ---: |
| ENGL 1013 Composition I (ACTS Equivalency | 3 |  |
| = ENGL 1013) (Satisfies General Education |  |  |
| Outcome 1.1) |  |  |

 \%7C1000\&sdata=IW
\%2FJFyUarqY5QAsdHdGE08O8yc32sq7svsTUJ78cV74\%3D\&reserved=0), as well as discipline specific codes of ethics and standards found in program handbooks. Violation of these principles may result in probation, suspension, or dismissal of the internship as described:

1. Any incident of ethical misconduct or concern will be documented by the faculty member(s), discussed directly with the student and their mentor, and referred to the program's coordinator or supervising faculty. It may also be reported to the Teacher Candidate Professional Review Committee.
2. The Teacher Candidate Professional Review Committee evaluates the concerns and recommends a course of action, which may range from a zero score on the academic and/or internship work, a failing grade for the course, probation, up to dismissal from a teacher education program.
3. Any candidate may be suspended by a Teacher Education Program Coordinator for extreme, unforeseen circumstances such as endangerment of students or others, disruption of schools or classes,

Education Outcome 2.1)
Humanities State Minimum Core (Satisfies General 3 Education Outcome 3.2) ${ }^{1}$
HIST 2003 History of the American People to 1877 (ACTS Equivalency $=$ HIST 2113) (Satisfies
General Education Outcome 3.2, 3.3, and 4.2)
CIED 1013 Introduction to Education
ENGL 1023 Composition II (ACTS Equivalency
= ENGL 1023) (Satisfies General Education Outcome 1.1)
Science State Minimum Core with lab (Satisfies
General Education Outcome 3.4) ${ }^{1}$

Total Units in Sequence: ..... 120
${ }^{1}$ Students must complete the State Minimum Core requirements (https://nam03.safelinks.protection.outlook.com/?url=https\%3A\%2F \%2Fnextcatalog.uark.edu\%2Fundergraduatecatalog\%2Fgened \%2Fstateminimum\%2F\&data=02\%7C01\%7Cagriffin\%40uark.edu \%7Ce4e632415f9b49eda9bf08d7f5c20b91\%7C79c742c4e61c4fa5be89a3cb566a \%2F1XG8924jwOx8pTlw8IWNAGp0s\%3D\&reserved=0) as outlined in the Catalog of Studies. The courses that meet the state minimum core also fulfill many of the university's General Education requirements (https://nam03.safelinks.protection.outlook.com/?url=https\%3A\%2F \%2Fnextcatalog.uark.edu\%2Fundergraduatecatalog\%2Fgened \%2Fgeneraleducation\%2F\&data=02\%7C01\%7Cagriffin\%40uark.edu \%7Ce4e632415f9b49eda9bf08d7f5c20b91\%7C79c742c4e61c4fa5be89a3cb566a \%2BDWRVEfAqIMsYNX4KXEgX2JdEJJY7Go\%3D\&reserved=0), although there are additional considerations to satisfy the general education learning outcomes. Students are encouraged to consult with their academic adviser when making course selections.
2 Chosen from Social Studies Diversity core program list.
${ }^{3}$ A minimum of 6 hours with international/non-U.S. focus must be taken among the combined 15 hours of 3000 - and 4000 -level Social Science electives.

## Courses

CIED 1003. Introduction to Technology in Education. 3 Hours.
A study of computer technology as it relates to teacher education. This course introduces students interested in teacher education to the knowledge and skills required to demonstrate their proficiency in technology and learning. (Typically offered: Fall, Spring and Summer)
CIED 1013. Introduction to Education. 3 Hours.
Integrates psychological, sociological, and philosophical foundations of education with concurrent involvement in field experiences. Encourages prospective teachers to become reflective practitioners by emphasizing organization of school systems, planning and implementation of effective classroom environments, development of teaching styles, and new directions in education. An 18-hour early field experience designed to give prospective teachers opportunities to observe and participate in a variety of school settings is incorporated in this introductory course to education. (Typically offered: Fall and Spring)

CIED 2083. Innovation and Creativity in Daily Practice. 3 Hours.
Arts integration course including the ideas, design, and implementation of practices in the classroom, board room, and professional field that enrich the experiences of all stakeholders while building right-brain thinking skills for the new millennium. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

CIED 2943. Foundations of Language and Literacy. 3 Hours.
A foundational study of language and literacy with an emphasis on content knowledge for teachers that is essential to the components and principles of science-based literacy. Corequisite: CIED 3113. (Typically offered: Fall and Spring)
CIED 3013. Development and Learning Theories in the K-6 Classroom. 3 Hours.
This course allows students to cultivate an understanding of how elementary students develop, process information, and learn; studies educational applications pertaining to theories of development, intelligence, and thinking dispositions. Students study various learning theories, their implications for instruction, and their role in the K-6 classroom. Field experience required. Prerequisite: PELED or CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

## CIED 3013H. Honors Development and Learning Theories in the K-6

 Classroom. 3 Hours.This course allows students to cultivate an understanding of how elementary students develop, process information, and learn; studies educational applications pertaining to theories of development, intelligence, and thinking dispositions.
Students study various learning theories, their implications for instruction, and their role in the K-6 classroom. Field experience required. Prerequisite: CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring)
This course is equivalent to CIED 3013.
CIED 3023. Survey of Exceptionalities. 3 Hours.
A survey of the characteristics of students with exceptional needs. Reviews the definitions of exceptionalities, learning and behavior characteristics of individuals with exceptionalities and the legal basis for the education of persons with exceptionalities in both elementary and secondary schools. Prerequisite: CIED 1013, or MUED 2012, or AGED 1123, or PSYC 2003. (Typically offered: Fall, Spring and Summer)

## CIED 3023H. Honors Survey of Exceptionalities. 3 Hours.

A survey of the characteristics of students with exceptional needs. Reviews the definitions of exceptionalities, learning and behavior characteristics of individuals with exceptionalities and the legal basis for the education of persons with exceptionalities in both elementary and secondary schools. Prerequisite: Honors standing, CIED 1013, or MUED 2012, or AGED 1123, or PSYC 2003. (Typically offered: Fall, Spring and Summer)
This course is equivalent to CIED 3023.

## CIED 3033. Classroom Learning Theory. 3 Hours.

A survey of the major theories of learning with special emphasis on human learning and implications for education. Field experience required. Prerequisite: CIED 1013; or MUED 2012; or PHED 1003; or AGED 1123; or PSYC 2003. (Typically offered: Fall, Spring and Summer)

## CIED 3033H. Honors Classroom Learning Theory. 3 Hours.

A survey of the major theories of learning with special emphasis on human learning and implications for education. Field experience required. Prerequisite: Honors standing and (CIED 1013; or MUED 2012; or PHED 1003; or AGED 1123; or PSYC 2003). (Typically offered: Fall, Spring and Summer)
This course is equivalent to CIED 3033.

## CIED 3053. The Emerging Adolescent. 3 Hours.

This course is a study of the developmental characteristics (social, emotional, physical, moral, and intellectual) of early adolescents (ages 10-15 years). The implications of these changes for motivation, instruction, learning, and classroom management in the classroom are emphasized. Course has field component. Prerequisite: CIED 1013. (Typically offered: Fall and Spring)

## CIED 3103. Children and Adolescent Literature. 3 Hours.

A survey of children's literary works, authors, and illustrators with emphasis on elementary grade and adolescent literature. Prerequisite: CHEDBS or ELELBS or HDFSBS BRKD or HDFSBS CDEV or PSPED major. (Typically offered: Fall and Spring)

## CIED 3103H. Honors Children and Adolescent Literature. 3 Hours.

A survey of children's literary works, authors, and illustrators with emphasis on elementary grade and adolescent literature. Corequisite: CIED 3113. Prerequisite: CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring) This course is equivalent to CIED 3103.

## CIED 3113. Emergent Literacy. 3 Hours.

An understanding of emergent literacy development through a study of sciencebased literacy pedagogy and practical field experiences. Field experience required. Corequisite: CIED 2943. Prerequisite: ENGL 1013, ENGL 1023, and CHEDBS or ELELBS or HDFSBS BRKD or HDFSBS CDEV or SPEDBS major. (Typically offered: Fall and Spring)

## CIED 3113H. Honors Emergent Literacy. 3 Hours.

This course focuses on theories of children's emerging literacy and on the continuing development of literacy abilities in pre-kindergarten and early elementary years. Field experience required. Prerequisite: ENGL 1013, ENGL 1023, and CIED 3262, CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring) This course is equivalent to CIED 3113.

## CIED 3123. Mathematics Methods in the K-6 Classroom. 3 Hours.

An examination of the content of elementary mathematics courses. Special emphasis given to methods of teaching the content as well as enrichment materials. Field experience required. Prerequisite: MATH 1203, MATH 2213, MATH 2223, and (CHEDBS or ELELBS major). (Typically offered: Fall and Spring)

## CIED 3133. Integrated Social Studies for the K-6 Classroom. 3 Hours.

Focuses on the methodology of facilitating elementary students' development in language arts and social studies. Integrates the curriculum and teaching strategies in language arts and social studies. Field experience required. Prerequisite: CHEDBS or ELELBS major, and PLSC 2003 and (HIST 2003 or HIST 2013), and (HIST 1113 or HIST 1123), and (GEOS 1123 or ANTH 1023), and (ECON 3053 or ECON 2143), and (ARHS 1003 or MLIT 1003). (Typically offered: Fall and Spring)

## CIED 3453. Developmental Literacy. 3 Hours.

A deep and comprehensive application of the development of literacy skills from decoding to fluent, comprehending readers. Field experience required. Prerequisite: CIED 2943, CIED 3113, and admission into ELELBS or CHEDBS programs. (Typically offered: Fall and Spring)

## CIED 3453H. Honors Developmental Literacy. 3 Hours.

A deep and comprehensive application of the development of literacy skills from decoding to fluent, comprehending readers. Field experience required. Prerequisite: CIED 2943, CIED 3113, admission into ELELBS or CHEDBS programs, and honors standing. (Typically offered: Fall and Spring)
This course is equivalent to CIED 3453.
CIED 3901H. Honors Curriculum and Instruction Education Thesis Tutorial. 1 Hour.
Designed to provide the foundation for the Honors Thesis. Students and faculty tutors work "one-on-one" exploring a specific topic which has been agreed upon by the student and the professor. Prerequisite: Honors candidacy and CATEBS, CHEDBS, DREDBA, EDSTBS, EGEDBA, ELELBS, FREDBA, GREDBA, SNEDBA, SPEDBS, or SSEDBA majors. (Typically offered: Fall, Spring and Summer)

## CIED 4003. Elementary Seminar. 3 Hours.

This course is designed to synthesize the foundational content presented in the Bachelor of Science in Education, Elementary Education program. It focuses on refinement of generalized knowledge to accommodate specialized content relevant to elementary students. Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall)

CIED 4013. Capstone Course for Foreign Language Licensure. 3 Hours.
This course is designed to identify and provide evidence of content language specific proficiencies in the four skills of reading, writing, listening, and speaking a foreign language. (Typically offered: Spring)
CIED 4023. Teaching in Inclusive Secondary Settings. 3 Hours.
This course is designed to prepare pre-service teachers to teach in inclusive classroom settings at the secondary level. Course content will focus on the ways in which exceptionality, specifically focused on high-incidence disabilities and culture, specifically focused on English language learners mediate the learning experiences of secondary level students. (Typically offered: Summer)

CIED 4113. Integrated Communication Skills for the K-6 Classroom. 3 Hours.
Focuses on the methodology of facilitating elementary students' literacy development. Emphasis is on the integration of the communication skills of reading, writing, speaking, and listening across the curriculum. Prerequisite: COMM 1313 or COMM 2323 and CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

CIED 4113H. Honors Integrated Communication Skills for the K-6 Classroom. 3 Hours.
Focuses on the methodology of facilitating elementary students? literacy development. Emphasis is on the integration of the communication skills of reading, writing, speaking, and listening across the curriculum. Prerequisite: COMM 1313 or COMM 2323 and CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring)
This course is equivalent to CIED 4113.
CIED 4123. Literacy Assessment and Interventions in the Elementary Classroom. 3 Hours.
An undergraduate course focusing on literacy assessment and intervention for prospective classroom teachers. Participants become familiar with assessment procedures and instruments for identifying student strengths and weaknesses in literacy, determining effective intervention strategies for literacy improvement, and principles of reporting assessment and intervention outcomes. Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall)

CIED 4131. Practicum for Secondary and Multilevel Tracks in Education. 1 Hour.
This practicum is a requirement for entry into the EDUC MA, Master of Arts in Teaching program. Students will be involved in documented experiences with children for a minimum of 60 hours in grades K-12. Students enrolled in the multilevel track will be placed in a combination of elementary, middle, and high school settings. Students enrolled in the secondary track will be placed in a combination of middle and high school settings. Prerequisite: Cleared background check. (Typically offered: Spring and Summer)

## CIED 4133. Measurement and Research in the K-6 Classroom. 3 Hours.

This course is designed to provide an introduction to educational assessment, research methods, and what research has to say about trends and topics in elementary education. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall)

CIED 4143. Curriculum Design and Applications of Instructional Practice. 3 Hours.
A course in the design and adaptation of curriculum for students in regular, elementary classrooms. Theoretical bases and curriculum models will be reviewed. Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Spring)

CIED 4153. Classroom Management in the Elementary Grades. 3 Hours.
This course focuses on a number of different management techniques for elementary classrooms that can be used in general education settings. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall and Spring)
CIED 4163. Senior Project. 3 Hours.
This course is designed to provide students with the research skills necessary to complete their senior project. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Summer)

## CIED 4173. Student Teaching. 3 Hours.

Full-time student teaching in grades K-6 to be repeated both fall and spring semesters. Students will practice and master instructional strategies under the supervision of qualified mentor teachers and university faculty members. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

## CIED 4183. Instruction and Assessment of Writing. 3 Hours.

Develop knowledge, skills and dispositions about writing processes, genres, and pedagogy. Field experience required. Corequisite: CIED 3453. Prerequisite: CIED 2943, CIED 3113, and admission into CHEDBS or ELELBS programs. (Typically offered: Fall and Spring)

CIED 4183H. Honors Instruction and Assessment of Writing. 3 Hours. Develop knowledge, skills and dispositions about writing processes, genres, and pedagogy. Field experience required. Prerequisite: CIED 2943, CIED 3113, CIED 3453, honors standing and admission into CHEDBS or ELELBS programs. (Typically offered: Fall and Spring)
This course is equivalent to CIED 4183.

## CIED 4285. Teaching Experience. 5 Hours.

The teaching experience is an essential component of the Bachelor of Arts in Teaching degree. The two semester experience allows Teacher Candidates (TC) to make further application of theoretical principles of teaching and learning. Teacher Candidates will be assigned placement in area schools for both fall and spring semesters. Teacher candidates are placed in K-12 or 7-12 levels depending on their content area for licensure. The fall semester consists of a field experience including observation, co-planning, and co-teaching. The spring semester consists of an immersion experience for teacher candidates to plan and teach independently. Prerequisite: Admission to one of the following: EGEDBA, SSEDBA, FREDBA, GREDBA, SNEDBA, or DREDBA. (Typically offered: Spring)

## CIED 4363. Disciplinary Literacy in the K-6 Classroom. 3 Hours.

Focuses on the methodology of extending K-6 learners' basic literacy development, as a foundation for intermediate and disciplinary literacy. Emphasis is on the engagement of students in the distinct reading, writing, speaking, and listening requirements of different disciplines. Prerequisite: CIED 3113 and CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

CIED 4403. Understanding Cultures in the Classroom. 3 Hours.
This course provides pre-and in-service teachers knowledge and skills necessary for educating ethnically and linguistically diverse classrooms. Students have the opportunity to understand positive relationships while removing stereotypes and prejudices. It addresses issues for social justice education through understanding ways that children learn and communicate in their homes and communities. Students will examine how topics in multicultural education inform instructional goals, curriculum planning/implementation, and teaching practices across content areas in public K-12 classrooms. This course meets the AR teaching license ESL endorsement requirements for a culture course. Some sections of this course will contain a service learning component. (Typically offered: Fall)

## CIED 4413. Acquiring a Second Language. 3 Hours.

The course gives an introduction to the basics in research and learning theories involved in the acquisition of second languages and cultures, particularly of English. (Typically offered: Spring)

CIED 4423. Teaching English as a Second Language. 3 Hours.
This course is designed to provide teacher candidates with the basic knowledge and teaching skills necessary to address the linguistic needs of English language learners (ELLs) in regular classrooms. The students in this class will learn about and use multiple strategies for promoting ELLs' reading, writing, listening, and speaking skills. Emphasis will be placed especially on differentiating early reading instruction for ELLs. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Spring)

## CIED 4433. The Moral Mind in Action. 3 Hours.

The Moral Mind in Action explores how people reason through moral dilemmas and prepares students to more effectively recognize and resolve moral problems. Best practices of teachers and administrators of K-16 character education programs are discussed. (Typically offered: Fall)

## CIED 4443. Moral Courage. 3 Hours.

Moral Courage explores the factors that support translating moral thinking into moral action. This course draws from the field of positive psychology to guide students as they leverage existing strengths and develop new strategies for acting with moral courage in their personal and professional lives. Best practices of teachers and administrators of K-16 character education programs are discussed. (Typically offered: Spring)

CIED 4463. Culture and Learning. 3 Hours.
Culture, its meanings, dimensions, and manifestations are explored in this course. How these cultural elements impact perceptions of students, classroom practices, and educational processes are explored in this course. A strength-based approach is employed to explore the issues associated with including all students within classrooms. (Typically offered: Fall, Spring and Summer)

CIED 4483H. Honors Museum Matters: History, Practices, Culture and Controversy. 3 Hours.
Museums are respected institutions, but few visitors have likely thought about their history, purpose and role in society and culture. This class is an introduction to museology or the study of museums. Through field trips, guest lectures, discussions, and targeted readings we will explore issues such as collecting, exhibiting, controversies, architecture and the educational challenges found in the wide world of museums. Prerequisite: Honors standing. (Typically offered: Spring Odd Years)

CIED 4503H. Honors Charles Darwin and the Legacy of Evolution. 3 Hours.
This highly integrated honors class draws on various perspectives to examine the life of Charles Darwin and the legacy and impact of evolution. Topics and guest instructors change each semester, but the course will focus on evolution from the perspectives of biology, anthropology, the law, philosophy, history, culture and literature. Prerequisite: Honors standing. (Typically offered: Spring Even Years)

CIED 4533. Reading Comprehension Through Children's and Adolescent

## Literature. 3 Hours.

An examination of the major genres of children and adolescent literature to develop and extend K-6 students' skills in reading comprehension. Field experience required. Prerequisite: CIED 2943, CIED 3113, CIED 3453, and admission into CHEDBS or ELELBS programs. (Typically offered: Fall and Spring)
CIED 4533H. Honors Reading Comprehension Through Children's and Adolescent Literature. 3 Hours.
An examination of the major genres of children and adolescent literature to develop and extend K-6 students' skills in reading comprehension. Field experience required. Prerequisite: CIED 2943, CIED 3113, CIED 3453, admission into CHEDBS or ELELBS programs, and honors standing. (Typically offered: Fall and Spring) This course is equivalent to CIED 4533.

CIED 4953. Assessment for English Learners. 3 Hours.
This course addresses how to design appropriate assessments for English Learners taking into account their English language proficiency level and how to utilize the results of these assessments appropriately. (Typically offered: Spring)

CIED 498VH. Curriculum and Instruction Honors Thesis/Project. 1-3 Hour. Designed to provide facilitation of the Honors Thesis/Project. Students and faculty work "one-on-one" to complete the honors thesis/project. Prerequisite: Honors candidacy, CIED 3901 H , and CATEBS, CHEDBS, DREDBA, EDSTBS, EGEDBA, ELELBS, FREDBA, GREDBA, SNEDBA, SPEDBS, or SSEDBA major. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

CIED 499V. Special Topics in Curriculum and Instruction Education. 1-6 Hour. Discussion and advanced studies on selected topics in curriculum and instruction. Special focus on recent and emerging topics in education. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.
CIED 499VH. Honors Special Topics in Curriculum and Instruction Education. 1-3 Hour.
Discussion and advanced studies on selected topics in curriculum and instruction. Special focus on recent and emerging topics in education. (Typically offered: Fall, Spring and Summer)
This course is equivalent to CIED 499V.

## Spanish Education (SNED)

Freddie Bowles
Program Coordinator
306 Peabody Hall
479-575-3035
Email: fbowles@uark.edu
Curriculum and Instruction Website (https://cied.uark.edu/)
The Department of Curriculum and Instruction offers a Bachelor of Arts in Teaching in Spanish Education that leads to licensure for K-12 instruction. The program focuses on developing reflective practitioners based on the constructivist perspective that teachers are life-long learners, reflective practitioners themselves, and scholar researchers. The coursework is designed to develop these attributes so that students graduate as effective teachers with the knowledge, skills, and dispositions to engage students with meaningful and authentic instruction. The Bachelor of Arts in Teaching degree will also prepare students in the humanities with the pedagogical skills, the content knowledge, and the dispositions for teaching and learning in 21st century classrooms.

## B.A.T. in Spanish Education Stage I: Pre-Spanish Education (PSNED)

## Complete all 46 hours of program pre-requisites for each content

 area.1. Obtain a GPA of 3.0 or better on UA coursework.
2. Complete all content and pedagogy courses with a grade of " C " or better.
3. Complete a background check.

## Stage II: Admission to the B.A.T. Program

Admission to the Bachelor of Arts in Teaching program (B.A.T.) occurs the semester after the candidate has completed all pre-B.A.T. requirements including the first three courses in education - CIED 1013, CIED 1003, and CIED 2083 - prior to a student entering the individual programs of study the following fall term. The B.A.T. program is competitive, and meeting the minimum requirements does not guarantee admission to the program. Applications to the B.A.T. program must be submitted by
deadlines stated on the Office of Teacher Education (https://teachereducation.uark.edu/admissions/) website.

The application process includes:

1. Students must complete the application to teacher education (see the Teacher Education Application Fee (p. 53)) through the Teacher Education Office during the time period stated on the Office of Teacher Education website. This includes completing and passing the criminal background check.*
2. Submission of B.A.T. application.
3. Submission of writing sample to content area faculty.
4. Submission of transcripts for all coursework.

* Another background check will be required prior to graduation in order to be eligible for licensure.

## Stage III: Requirements for Program Continuation and Internship

1. Maintain a cumulative GPA of 3.0 or better.
2. All professional education courses and content courses must have a grade 'C' or better ( except SEED 3283 below). No teaching methods courses may be taken as self-paced (correspondence) courses.

## Stage IV: Requirements for Internship Semester (spring, senior year) and Program Completion

All students in the B.A.T. program must complete the following requirements prior to being admitted to the spring semester of their senior year.

1. Students must earn a 'B' or better in the fall semester, senior year SEED 3283 practicum course.
2. Earn a cumulative GPA of 3.0 or better by the end of the fall semester, senior year. Students are not permitted to intern in the spring if the GPA requirement is not met.
3. Students must have taken the appropriate Praxis II-Content Knowledge exam to be admitted to the spring semester, senior year.
4. Candidate must complete a successful "internship admission interview" with B.A.T. faculty. Note these interviews are scheduled with all senior students during the fall semester.
5. Satisfactorily complete the internship/student teaching experience that has been approved by the Director of Field Placement.

All students seeking licensure in the State of Arkansas are subject to a criminal background check. Background checks can take up to six months to process; therefore, students are advised to complete and submit the forms to the proper authorities at least six months in advance of graduation (or six months prior to applying for a teaching license). Arkansas will not grant a teaching license to anyone who has been convicted of a felony.

## Spanish Education Requirements

## Pre-Spanish Education requirements

University Core (State Minumun Core)
Courses specifically required for the Spanish Education B.A.T. prograqm

| ENGL 1013 | Composition I (ACTS Equivalency = ENGL 1013) |

## Dismissal based on Unethical or Unprofessional Behaviors from the B.A.T. program

The University of Arkansas' teacher preparation programs adhere to the Code of Ethics of the Education Profession as established Code of Ethics (https://nam11.safelinks.protection.outlook.com/? url=http\%3A\%2F\%2Fwww.nea.org\%2Fhome
\%2F30442.htm\&data=04\%7C01\%7Ckmamisei\%40uark.edu ( \%7C1000\&sdata=Rz4djbrQkGT\%2F6apKO7qqCfxSVIB 5AtBk\%3D\&reserved=0), Arkansas Ethics (https://nam11.safelinks.protection.outlook.com/?
url=http\%3A\%2F\%2Fdese.ade.arkansas.gov\%2Fdivisions

| First Year | Units |  |
| :--- | ---: | ---: |
| ENGL 1013 Composition I (ACTS Equivalency | 3 |  |
| Spring |  |  |

1. Any incident of ethical misconduct or concern will be documented by the faculty member(s), discussed directly with the student and their mentor, and referred to the program's coordinator or supervising faculty. It may also be reported to the Teacher Candidate Professional Review Committee.
2. The Teacher Candidate Professional Review Committee evaluates the concerns and recommends a course of action, which may range from a zero score on the academic and/or internship work, a failing grade for the course, probation, up to dismissal from a teacher education program.
3. Any candidate may be suspended by a Teacher Education Program Coordinator for extreme, unforeseen circumstances such as endangerment of students or others, disruption of schools or classes, felonious behaviors, or ethical violations (i.e. Arkansas Code of Ethics, Code of Student Life). Such suspensions will be referred to the Teacher Candidate Professional Review Committee for review and may become permanent.

The Program Coordinator, in consultation with the Teacher Education Professional Review Committee and the Dean's Office for Academic and Student Affairs in the College of Education and Health Professions, has the authority and responsibility to dismiss a student from the teacher education program for unethical or unprofessional behavior and/or not recommend the student for licensure.

More detailed guidelines about the policies, supports, and other requirements are provided in the program's handbook, as well as on the Office of Teacher Education website (https:// teacher-education.uark.edu/) or the Teacher Education Support page (https://nam11.safelinks.protection.outlook.com/? url=https\%3A\%2F\%2Fteacher-education.uark.edu\%2Fsupport \%2Findex.php\&data=04\%7C01\%7Ckmamisei\%40uark.edu \%7Ca1b2cdf9639c4ba1b3ed08d897252433\%7C79c742c4e61c4fa5be89a3cb5.S. History or Government State Minimum Core \%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQljoiV2luMzliLCJBTil6lk1haWwiLCJXVCIGMnO\%3D $\% 7 C 1000$ \&sdata $=4$ bDHshKQWwWkHUpWokOosPmSDje1rOxumOETQaahH Science State Minimum Core with lab (Satisfies $\% 3 D \& r e s e r v e d=0$ ). Students who have been dismissed on the basis of unethical or unprofessional conduct may appeal the decision following the procedures outlined under the Student Grievances and Appeals section of the Undergraduate Catalog of Studies (http://catalog.uark.edu/ undergraduatecatalog/academicregulations/studentacademicappeals/).

## Spanish Education B.A.T. Eight-Semester Plan

Because this program requires admission to progress, it does not qualify for the university's Eight-Semester Degree Program; however, students who qualify for admission to the program can finish a degree in four years by following the suggested order of classes below.

General Education Outcome 3.4) ${ }^{1}$
SPAN 3033 Conversation and Composition (or 3
higher)
SPAN 3113 Introduction to Literature (or higher) 3
EDST 3223 American Educational History 3
Year Total: 15

| Third Year | Fall | Units <br> Spring |
| :--- | ---: | ---: |
| 4000-level SPAN elective | 3 |  |
| SPAN 4003 Advanced Grammar | 3 |  |

CIED 3033H. Honors Classroom Learning Theory. 3 Hours.
A survey of the major theories of learning with special emphasis on human learning and implications for education. Field experience required. Prerequisite: Honors standing and (CIED 1013; or MUED 2012; or PHED 1003; or AGED 1123; or PSYC 2003). (Typically offered: Fall, Spring and Summer)
This course is equivalent to CIED 3033.
CIED 3053. The Emerging Adolescent. 3 Hours.
This course is a study of the developmental characteristics (social, emotional, physical, moral, and intellectual) of early adolescents (ages 10-15 years). The implications of these changes for motivation, instruction, learning, and classroom management in the classroom are emphasized. Course has field component. Prerequisite: CIED 1013. (Typically offered: Fall and Spring)

CIED 3103. Children and Adolescent Literature. 3 Hours.
A survey of children's literary works, authors, and illustrators with emphasis on elementary grade and adolescent literature. Prerequisite: CHEDBS or ELELBS or HDFSBS BRKD or HDFSBS CDEV or PSPED major. (Typically offered: Fall and Spring)
CIED 3103H. Honors Children and Adolescent Literature. 3 Hours.
A survey of children's literary works, authors, and illustrators with emphasis on elementary grade and adolescent literature. Corequisite: CIED 3113. Prerequisite: CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring) This course is equivalent to CIED 3103.

## CIED 3113. Emergent Literacy. 3 Hours.

An understanding of emergent literacy development through a study of sciencebased literacy pedagogy and practical field experiences. Field experience required. Corequisite: CIED 2943. Prerequisite: ENGL 1013, ENGL 1023, and CHEDBS or ELELBS or HDFSBS BRKD or HDFSBS CDEV or SPEDBS major. (Typically offered: Fall and Spring)

## CIED 3113H. Honors Emergent Literacy. 3 Hours.

This course focuses on theories of children's emerging literacy and on the continuing development of literacy abilities in pre-kindergarten and early elementary years. Field experience required. Prerequisite: ENGL 1013, ENGL 1023, and CIED 3262, CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring) This course is equivalent to CIED 3113.

## CIED 3123. Mathematics Methods in the K-6 Classroom. 3 Hours.

An examination of the content of elementary mathematics courses. Special emphasis given to methods of teaching the content as well as enrichment materials. Field experience required. Prerequisite: MATH 1203, MATH 2213, MATH 2223, and (CHEDBS or ELELBS major). (Typically offered: Fall and Spring)

CIED 3133. Integrated Social Studies for the K-6 Classroom. 3 Hours.
Focuses on the methodology of facilitating elementary students' development in language arts and social studies. Integrates the curriculum and teaching strategies in language arts and social studies. Field experience required. Prerequisite: CHEDBS or ELELBS major, and PLSC 2003 and (HIST 2003 or HIST 2013), and (HIST 1113 or HIST 1123), and (GEOS 1123 or ANTH 1023), and (ECON 3053 or ECON 2143), and (ARHS 1003 or MLIT 1003). (Typically offered: Fall and Spring)

## CIED 3453. Developmental Literacy. 3 Hours.

A deep and comprehensive application of the development of literacy skills from decoding to fluent, comprehending readers. Field experience required. Prerequisite: CIED 2943, CIED 3113, and admission into ELELBS or CHEDBS programs. (Typically offered: Fall and Spring)

## CIED 3453H. Honors Developmental Literacy. 3 Hours.

A deep and comprehensive application of the development of literacy skills from decoding to fluent, comprehending readers. Field experience required. Prerequisite: CIED 2943, CIED 3113, admission into ELELBS or CHEDBS programs, and honors standing. (Typically offered: Fall and Spring)
This course is equivalent to CIED 3453.

CIED 3901H. Honors Curriculum and Instruction Education Thesis Tutorial. 1 Hour.
Designed to provide the foundation for the Honors Thesis. Students and faculty tutors work "one-on-one" exploring a specific topic which has been agreed upon by the student and the professor. Prerequisite: Honors candidacy and CATEBS, CHEDBS, DREDBA, EDSTBS, EGEDBA, ELELBS, FREDBA, GREDBA, SNEDBA, SPEDBS, or SSEDBA majors. (Typically offered: Fall, Spring and Summer)

## CIED 4003. Elementary Seminar. 3 Hours.

This course is designed to synthesize the foundational content presented in the Bachelor of Science in Education, Elementary Education program. It focuses on refinement of generalized knowledge to accommodate specialized content relevant to elementary students. Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall)
CIED 4013. Capstone Course for Foreign Language Licensure. 3 Hours.
This course is designed to identify and provide evidence of content language specific proficiencies in the four skills of reading, writing, listening, and speaking a foreign language. (Typically offered: Spring)

## CIED 4023. Teaching in Inclusive Secondary Settings. 3 Hours.

This course is designed to prepare pre-service teachers to teach in inclusive classroom settings at the secondary level. Course content will focus on the ways in which exceptionality, specifically focused on high-incidence disabilities and culture, specifically focused on English language learners mediate the learning experiences of secondary level students. (Typically offered: Summer)
CIED 4113. Integrated Communication Skills for the K-6 Classroom. 3 Hours. Focuses on the methodology of facilitating elementary students' literacy development. Emphasis is on the integration of the communication skills of reading, writing, speaking, and listening across the curriculum. Prerequisite: COMM 1313 or COMM 2323 and CHEDBS or ELELBS major. (Typically offered: Fall and Spring)
CIED 4113H. Honors Integrated Communication Skills for the K-6 Classroom. 3 Hours.
Focuses on the methodology of facilitating elementary students? literacy development. Emphasis is on the integration of the communication skills of reading, writing, speaking, and listening across the curriculum. Prerequisite: COMM 1313 or COMM 2323 and CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring)
This course is equivalent to CIED 4113.
CIED 4123. Literacy Assessment and Interventions in the Elementary Classroom. 3 Hours.
An undergraduate course focusing on literacy assessment and intervention for prospective classroom teachers. Participants become familiar with assessment procedures and instruments for identifying student strengths and weaknesses in literacy, determining effective intervention strategies for literacy improvement, and principles of reporting assessment and intervention outcomes. Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall)
CIED 4131. Practicum for Secondary and Multilevel Tracks in Education. 1 Hour.
This practicum is a requirement for entry into the EDUC MA, Master of Arts in Teaching program. Students will be involved in documented experiences with children for a minimum of 60 hours in grades K-12. Students enrolled in the multilevel track will be placed in a combination of elementary, middle, and high school settings. Students enrolled in the secondary track will be placed in a combination of middle and high school settings. Prerequisite: Cleared background check. (Typically offered: Spring and Summer)

CIED 4133. Measurement and Research in the K-6 Classroom. 3 Hours.
This course is designed to provide an introduction to educational assessment, research methods, and what research has to say about trends and topics in elementary education. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall)

CIED 4143. Curriculum Design and Applications of Instructional Practice. 3 Hours.
A course in the design and adaptation of curriculum for students in regular, elementary classrooms. Theoretical bases and curriculum models will be reviewed. Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Spring)

CIED 4153. Classroom Management in the Elementary Grades. 3 Hours.
This course focuses on a number of different management techniques for elementary classrooms that can be used in general education settings. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall and Spring)
CIED 4163. Senior Project. 3 Hours.
This course is designed to provide students with the research skills necessary to complete their senior project. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Summer)

## CIED 4173. Student Teaching. 3 Hours.

Full-time student teaching in grades K-6 to be repeated both fall and spring semesters. Students will practice and master instructional strategies under the supervision of qualified mentor teachers and university faculty members. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

## CIED 4183. Instruction and Assessment of Writing. 3 Hours.

Develop knowledge, skills and dispositions about writing processes, genres, and pedagogy. Field experience required. Corequisite: CIED 3453. Prerequisite: CIED 2943, CIED 3113, and admission into CHEDBS or ELELBS programs. (Typically offered: Fall and Spring)

CIED 4183H. Honors Instruction and Assessment of Writing. 3 Hours.
Develop knowledge, skills and dispositions about writing processes, genres, and pedagogy. Field experience required. Prerequisite: CIED 2943, CIED 3113, CIED 3453, honors standing and admission into CHEDBS or ELELBS programs. (Typically offered: Fall and Spring)
This course is equivalent to CIED 4183.

## CIED 4285. Teaching Experience. 5 Hours.

The teaching experience is an essential component of the Bachelor of Arts in Teaching degree. The two semester experience allows Teacher Candidates (TC) to make further application of theoretical principles of teaching and learning. Teacher Candidates will be assigned placement in area schools for both fall and spring semesters. Teacher candidates are placed in K-12 or 7-12 levels depending on their content area for licensure. The fall semester consists of a field experience including observation, co-planning, and co-teaching. The spring semester consists of an immersion experience for teacher candidates to plan and teach independently. Prerequisite: Admission to one of the following: EGEDBA, SSEDBA, FREDBA, GREDBA, SNEDBA, or DREDBA. (Typically offered: Spring)

CIED 4363. Disciplinary Literacy in the K-6 Classroom. 3 Hours.
Focuses on the methodology of extending K-6 learners' basic literacy development, as a foundation for intermediate and disciplinary literacy. Emphasis is on the engagement of students in the distinct reading, writing, speaking, and listening requirements of different disciplines. Prerequisite: CIED 3113 and CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

## CIED 4403. Understanding Cultures in the Classroom. 3 Hours.

This course provides pre-and in-service teachers knowledge and skills necessary for educating ethnically and linguistically diverse classrooms. Students have the opportunity to understand positive relationships while removing stereotypes and prejudices. It addresses issues for social justice education through understanding ways that children learn and communicate in their homes and communities. Students will examine how topics in multicultural education inform instructional goals, curriculum planning/implementation, and teaching practices across content areas in public K-12 classrooms. This course meets the AR teaching license ESL endorsement requirements for a culture course. Some sections of this course will contain a service learning component. (Typically offered: Fall)

## CIED 4413. Acquiring a Second Language. 3 Hours.

The course gives an introduction to the basics in research and learning theories involved in the acquisition of second languages and cultures, particularly of English. (Typically offered: Spring)

## CIED 4423. Teaching English as a Second Language. 3 Hours.

This course is designed to provide teacher candidates with the basic knowledge and teaching skills necessary to address the linguistic needs of English language learners (ELLs) in regular classrooms. The students in this class will learn about and use multiple strategies for promoting ELLs' reading, writing, listening, and speaking skills. Emphasis will be placed especially on differentiating early reading instruction for ELLs. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Spring)

## CIED 4433. The Moral Mind in Action. 3 Hours.

The Moral Mind in Action explores how people reason through moral dilemmas and prepares students to more effectively recognize and resolve moral problems. Best practices of teachers and administrators of K-16 character education programs are discussed. (Typically offered: Fall)

## CIED 4443. Moral Courage. 3 Hours.

Moral Courage explores the factors that support translating moral thinking into moral action. This course draws from the field of positive psychology to guide students as they leverage existing strengths and develop new strategies for acting with moral courage in their personal and professional lives. Best practices of teachers and administrators of K-16 character education programs are discussed. (Typically offered: Spring)

## CIED 4463. Culture and Learning. 3 Hours.

Culture, its meanings, dimensions, and manifestations are explored in this course. How these cultural elements impact perceptions of students, classroom practices, and educational processes are explored in this course. A strength-based approach is employed to explore the issues associated with including all students within classrooms. (Typically offered: Fall, Spring and Summer)
CIED 4483H. Honors Museum Matters: History, Practices, Culture and Controversy. 3 Hours.
Museums are respected institutions, but few visitors have likely thought about their history, purpose and role in society and culture. This class is an introduction to museology or the study of museums. Through field trips, guest lectures, discussions, and targeted readings we will explore issues such as collecting, exhibiting, controversies, architecture and the educational challenges found in the wide world of museums. Prerequisite: Honors standing. (Typically offered: Spring Odd Years)
CIED 4503H. Honors Charles Darwin and the Legacy of Evolution. 3 Hours. This highly integrated honors class draws on various perspectives to examine the life of Charles Darwin and the legacy and impact of evolution. Topics and guest instructors change each semester, but the course will focus on evolution from the perspectives of biology, anthropology, the law, philosophy, history, culture and literature. Prerequisite: Honors standing. (Typically offered: Spring Even Years)

CIED 4533. Reading Comprehension Through Children's and Adolescent Literature. 3 Hours.
An examination of the major genres of children and adolescent literature to develop and extend K-6 students' skills in reading comprehension. Field experience required. Prerequisite: CIED 2943, CIED 3113, CIED 3453, and admission into CHEDBS or ELELBS programs. (Typically offered: Fall and Spring)

CIED 4533H. Honors Reading Comprehension Through Children's and Adolescent Literature. 3 Hours.
An examination of the major genres of children and adolescent literature to develop and extend K-6 students' skills in reading comprehension. Field experience required. Prerequisite: CIED 2943, CIED 3113, CIED 3453, admission into CHEDBS or ELELBS programs, and honors standing. (Typically offered: Fall and Spring) This course is equivalent to CIED 4533.

CIED 4953. Assessment for English Learners. 3 Hours.
This course addresses how to design appropriate assessments for English Learners taking into account their English language proficiency level and how to utilize the results of these assessments appropriately. (Typically offered: Spring)
CIED 498VH. Curriculum and Instruction Honors Thesis/Project. 1-3 Hour. Designed to provide facilitation of the Honors Thesis/Project. Students and faculty work "one-on-one" to complete the honors thesis/project. Prerequisite: Honors candidacy, CIED 3901 H , and CATEBS, CHEDBS, DREDBA, EDSTBS, EGEDBA, ELELBS, FREDBA, GREDBA, SNEDBA, SPEDBS, or SSEDBA major. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.
CIED 499V. Special Topics in Curriculum and Instruction Education. 1-6 Hour. Discussion and advanced studies on selected topics in curriculum and instruction. Special focus on recent and emerging topics in education. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

CIED 499VH. Honors Special Topics in Curriculum and Instruction Education. 1-3 Hour.
Discussion and advanced studies on selected topics in curriculum and instruction. Special focus on recent and emerging topics in education. (Typically offered: Fall, Spring and Summer)
This course is equivalent to CIED 499V.

## Special Education (SPED)

Suzanne Kucharczyk
Program Coordinator
ARKA 303
479-575-6210
suzannek@uark.edu
The Department of Curriculum and Instruction offers programs that prepare candidates for initial teacher licensure in Special Education.
Graduates of the B.S.E. in Special Education will prepare students to teach special education to students with diverse disabilities from kindergarten to 12th grade.

Students wishing to pursue a major in Special Education declare the PreSpecial Education (PSPED) preparation emphasis until formal admission to the major is approved by program faculty.

## General Requirements

1. In addition to participating in interviews with faculty and providing a written statement, candidates applying to the program must meet one requirement in each of the following skill areas:
a. Writing: a) 3.0 average in ENGL 1013 and ENGL 1023 within last 7 years; b) passing ACT/SAT/Praxis Core score in Writing; or c) Accuplacer Next Generation score of 251.
b. Math: (a) Earned B or higher in College Algebra or equivalent course within last 7 years, (b) passing ACT/SAT/Praxis score in Math, or (c) Accuplacer Next Generation score of 251.
c. Reading: (a) 3.0 Cumulative GPA, (b) passing ACT/SAT/Praxis Core score in Reading, or Accuplacer Next Generation score of 251.
2. All CIED courses must have a grade of " C " or higher. All SPED courses must have a " B " or higher prior to the student teaching semesters. No teaching methods courses may be taken by as selfpaced (correspondence) courses.
3. Students are cleared for field experiences in their first year of the program by registering with the Office of Teacher Education (see the Teacher Education Application Fee (p. 53)). This includes a criminal record and child maltreatment background checks.

Continuation to senior year Teaching Internship block is based on cumulative GPA and grades described above and positive teacher disposition reviews by faculty.

Teacher License requirements include the following:

- Consistent display of professional teaching disposition qualities as reviewed by faculty and school partners
- Written support related to demonstrating special education practicebased competencies from participating school partners
- Students must have a cumulative GPA of 3.0 or higher
- Students must pass all Division of Elementary and Secondary Education required examinations

## Dismissal Based on Unethical or Unprofessional Behaviors from Special Education Programs

The University of Arkansas' teacher preparation programs adhere to the Code of Ethics of the Education Profession as established by the National Education Association as described in NEA
Code of Ethics (https://nam11.safelinks.protection.outlook.com/? url=http\%3A\%2F\%2Fwww.nea.org\%2Fhome \%2F30442.htm\&data=04\%7C01\%7Cjgbeasle\%40uark.edu
3. Any candidate may be suspended by a Teacher Education Program Coordinator for extreme, unforeseen circumstances such as endangerment of students or others, disruption of schools or classes, felonious behaviors, or ethical violations (i.e. Arkansas Code of Ethics, Code of Student Life). Such suspensions will be referred to the Teacher Candidate Professional Review Committee for review and may become permanent.

The Program Coordinator, in consultation with the Teacher Education Professional Review Committee and the Dean's Office for Academic and Student Affairs in the College of Education and Health Professions, has the authority and responsibility to dismiss a student from the teacher education program for unethical or unprofessional behavior and/or not recommend the student for licensure.

More detailed guidelines about the policies, supports, and other requirements are provided in the program's handbook, as well as on the Office of Teacher Education website (https://nam11.safelinks.protection.outlook.com/? url=https\%3A\%2F\%2Foccupationaltherapy.uark.edu \%2F\&data=04\%7C01\%7Cjgbeasle\%40uark.edu \%7C418b639d5fcc4412bdc308d87b720a68\%7C79c742c4e61c4fa5be89a3cb566a8 \%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQljoiV2luMzliLCJBTil6Ik1haWwiL

${ }^{1}$ Students must complete the State Minimum Core requirements (https://nam03.safelinks.protection.outlook.com/?url=https\%3A\%2F \%2Fnextcatalog.uark.edu\%2Fundergraduatecatalog\%2Fgened \%2Fstateminimum\%2F\&data=02\%7C01\%7Cagriffin\%40uark.edu \%7Ce4e632415f9b49eda9bf08d7f5c20b91\%7C79c742c4e61c4fa5be89a3cb566a \%2F1XG8924jwOx8pTIw8IWNAGp0s\%3D\&reserved=0) as outlined in the Catalog of Studies. The courses that meet the state minimum core also fulfill many of the university's General Education requirements (https://nam03.safelinks.protection.outlook.com/?url=https\%3A\%2F \%2Fnextcatalog.uark.edu\%2Fundergraduatecatalog\%2Fgened \%2Fgeneraleducation\%2F\&data=02\%7C01\%7Cagriffin\%40uark.edu \%7Ce4e632415f9b49eda9bf08d7f5c20b91\%7C79c742c4e61c4fa5be89a3cb566a \%2BDWRVEfAqIMsYNX4KXEgX2JdEJJY7Go\%3D\&reserved=0), although there are additional considerations to satisfy the general education learning outcomes. Students are encouraged to consult with their academic adviser when making course selections.

## Courses

SPED 3863. Applications of Behavior Change Procedures. 3 Hours.
Course content includes (a) information on behavior change procedures; (b) activities designed to acquire skill in developing and evaluating behavioral change programs; and (c) information and activities designed to acquire skills in providing and monitoring persons and systems providing support. Legal and ethical standards will be reviewed and applied to the course content. Prerequisite: SPED 3843. (Typically offered: Spring)

SPED 4173. Introduction to Dyslexia: Literacy Development and Structure of Language. 3 Hours.
This course focuses on the assessment of students with disabilities, literacy development, skills \& intervention. Students will utilize foundational concepts of oral and written language including the structure of language to assess student's difficulties and plan appropriate instruction. Techniques discussed include informal observation, miscue analysis, multisensory teaching, and portfolio assessment. Prerequisite: Admission into Special Education Bachelor of Science in Education (SPEDBS), Childhood Education Bachelor of Science in Education (CHEDBS), or departmental consent. (Typically offered: Spring)

SPED 4413. ABA and Classroom Management for Teachers. 3 Hours. Students in this course will develop an understanding of the basic principles of Applied Behavior Analysis (ABA) and learn how to implement these principles across a Positive Behavior Support Model. Intervention plans include development of individual supports, classroom management supports, and whole school behavior supports. Field experience required. Prerequisite: Admission into Special Education Bachelor of Science in Education (SPEDBS), Birth through Kindergarten Bachelor of Science in Human Environmental Science (BRKDBS), or departmental consent. (Typically offered: Spring)
SPED 4413H. Honors ABA and Classroom Management for Teachers. 3 Hours. Students in this course will develop an understanding of the basic principles of Applied Behavior Analysis (ABA) and learn how to implement these principles across a Positive Behavior Support Model. Intervention plans include development of individual supports, classroom management supports, and whole school behavior supports. Field experience required. Prerequisite: Honors standing. (Typically offered: Spring)
This course is equivalent to SPED 4413.
SPED 4423. Technology for the Inclusive Classroom. 3 Hours.
A study of the use of instructional and assistive/augmentative technology for students with learning differences and special learning needs. Prerequisite: Admission into Special Education Bachelor of Science in Education (SPEDBS) or departmental consent. (Typically offered: Fall)
SPED 4433. Curriculum Development and Instructional Planning. 3 Hours. Study of the research base for the design and adaptation of curriculum and instructional strategies for students with disabilities in general and special classrooms. Prerequisite: Admission into Special Education Bachelor of Science in Education (SPEDBS) or departmental consent. (Typically offered: Spring)

SPED 4443. Career Development and Transition Planning for Students with Disabilities. 3 Hours.
A study of career development theory and the research-based strategies for evaluating, planning, and implementing transition programs for students with disabilities. Prerequisite: Admission into Special Education Bachelor of Science Education (SPEDBS) or departmental consent. (Typically offered: Fall)
SPED 4453. Assessment of Students with Disabilities. 3 Hours.
A study of the methods and techniques of the assessment of children in all areas of exceptionality with emphasis on diagnosis, classification, and tracking progress. Field experience required. Prerequisite: Admission into Special Education Bachelor of Science in Education (SPEDBS) or departmental consent. (Typically offered: Fall)
SPED 4453H. Honors Assessment of Students with Disabilities. 3 Hours.
A study of the methods and techniques of the assessment of children in all areas of exceptionality with emphasis on diagnosis, classification, and tracking progress. Field experience required. (Typically offered: Fall)
This course is equivalent to SPED 4453.

SPED 4463. Teaching Students with Extensive Support Needs. 3 Hours. A study of methods and materials for teaching students (K-12) with extensive support needs, including those with intellectual disability, autism, other health impairments, and multiple disabilities. Prerequisite: Admission into Special Education Bachelor of Science in Education (SPEDBS), Birth through Kindergarten Bachelor of Science Human Environmental Sciences (BRKDBS), or departmental consent. (Typically offered: Spring)
SPED 4473. Teaching Students with Disabilities in Math and Science. 3 Hours. A study of content, methods, and materials for teaching mathematics and science to students with diverse learning needs and how to adapt curriculum to meet diverse needs. Field experience required. Prerequisite: Admission into Special Education Bachelor of Science in Education (SPEDBS) or departmental consent. (Typically offered: Spring)

SPED 4483. Teaching Literacy Skills to Students with Disabilities. 3 Hours. This course will offer a detailed study of how to systematically and explicitly teach essential reading skills to students with disabilities or those at-risk for learning difficulties. Field experience required. Prerequisite: Admission into Special Education Bachelor of Science in Education (SPEDBS), Childhood Education Bachelor of Science in Education (CHEDBS), or departmental consent. (Typically offered: Fall)
SPED 4493. Introduction to Students with High Incidence Disabilities. 3 Hours. The purpose of this course is to develop an understanding of high incidence disabilities, understand the unique characteristics as they apply to the context of the K-12 classroom, be able to design an appropriate classroom setting, and use evidence-based teaching practices for students with high incidence disabilities. Prerequisite: Admission into Special Education Bachelor of Science in Education (SPEDBS), Birth through Kindergarten Bachelor of Science Human Environmental Science (BRKDBS), or departmental consent. (Typically offered: Fall)
SPED 4538. Special Education Internship - Kindergarten through 6th Grade. 8 Hours.
Provides the opportunity to focus demonstrating and refining teaching skills through a teaching internship in special education grades K-6 grades while simultaneously developing a professional portfolio. Must be taken concurrently with SPED 4543. Corequisite: SPED 4543. (Typically offered: Fall)

SPED 4543. Special Education Seminar - Kindergarten through 6th Grade. 3 Hours.
Provides the opportunity to focus on issues encountered in the teaching internship in special education grades kindergarten through sixth grades while simultaneously developing a professional portfolio. Must be taken concurrently with SPED 4538. Corequisite: SPED 4538. (Typically offered: Fall)
SPED 4553. Special Education Research - Kindergarten through 6th Grade. 3 Hours.
Designing, conducting and applying research to improve classroom instruction in special education (K-6). (Typically offered: Fall)

SPED 4568. Special Education Teaching Internship - 7th through 12th Grade. 8 Hours.
Provides the opportunity to focus demonstrating and refining teaching skills through a teaching internship in special education grades 7-12 grades while simultaneously developing a professional portfolio. Must be taken concurrently with SPED 4573. Corequisite: SPED 4573. (Typically offered: Spring)
SPED 4573. Special Education Seminar - 7th through 12th Grade. 3 Hours. Provides the opportunity to focus on issues encountered in the teaching internship in special education grades seventh through twelfth grades while simultaneously developing a professional portfolio. Must be taken concurrently with SPED 4568. Corequisite: SPED 4568. (Typically offered: Spring)
SPED 4583. Special Education Research - 7th through 12th Grade. 3 Hours.
Designing, conducting and applying research to improve classroom instruction in special education (7-12). (Typically offered: Spring)

# STEM Education (STEM) 

Ed Bengtson
Department Head
216 Peabody Hall
479-575-4209
Email: egbengts@uark.edu
STEM Education Website (https://STEM.uark.edu/)
The Department of Curriculum and Education offers a minor in STEM Education and a Certificate of Proficiency in STEM Education, both of which are open to students majoring in the STEM fields - science, technology, engineering and mathematics - and who are interested in acquiring valuable communication skills in these complex subject areas, in developing a deeper understanding of how people learn science, mathematics, and computer science, and in applying research-based strategies to engage others in understanding these subjects.

The certificate and minor in STEM Education are also initial pathways into the undergraduate teacher licensure program that prepares secondary teachers in the following subjects: mathematics, biology, chemistry, physics, or computer science.

## Requirements for Minor in STEM Education

A minimum GPA of 3.0 required to earn the minor. Of the 15 credit hours, a minimum of 9 credit hours must be STEM, CIED, SEED, or CATE courses.

The 15 -credit-hour minor in STEM Education is not a teacher licensure program. However, these courses can be applied to the undergraduate teacher licensure program that prepares students for secondary licensure in the following subjects: Mathematics, Biology, Chemistry, Physics, or Computer Science. For questions about teacher licensure, please visit the Office of Teacher Education (https://teacher-education.uark.edu/). Students may also consider the one-year Master of Arts in Teaching program as a path to teacher licensure.

## Course Requirements

| STEM 2003 | The Art of STEM Communication | 3 |
| :---: | :---: | :---: |

| CATE 4073 | Introduction to Teaching Programming in the Secondary Schools |  |
| SEED 4003 | Teaching Secondary Science |  |
| STEM 4303 | Teaching Secondary Mathematics I |  |
| STEM 4313 | Teaching Secondary Mathematics II |  |

Total Hours
${ }^{1}$ Can be used only once for the minor.

## Certificate of Proficiency in STEM Education

The Certificate in STEM Education is for STEM majors interested in acquiring valuable communication skills in these complex subject areas, developing a deeper understanding of how people think about and learn these subjects, and applying research-based strategies to engage others in understanding these subjects.

The 9 credit hour Certificate in STEM Education is not a minor or teacher licensure program. However, these courses can be applied to the undergraduate Minor in STEM Education and also the teacher licensure program that prepares students for secondary licensure in the following subjects: mathematics, biology, chemistry, physics, or computer science. Contact a STEM Education faculty adviser at teach@uark.edu.

Total Hours

## Teaching K-12 Physical Education and Health (PHED)

The major leading to a B.S.E. in Teaching K-12 Physical Education and Health provides students wit the knowledge and skills to design quality physical education and health lessons and programs for K-12 school children. Graduates will learn to effectively work as a teacher or coach in the K-12 school environment and have the skills needed to establish a class environment that promotes learning and engage students.

The program leads to licensure in teaching of K-12 physical education and health.

## Requirements for B.S.E. in Teaching K-12 Physical Education and Health

Admission to the Teaching K-12 Physical Education and Health, which prepares a student to teach in the public schools, begins as a PreTeaching K-12 Physical Education and Health major. For admission to the major, the following is required:

1. Complete the Pre-Teaching K-12 Physical Education and Health requirements (see course list below).
2. Have a 2.5 or higher University of Arkansas GPA. ${ }^{1}$
3. Register with the Office of Teacher Education (see the Teacher Education Application Fee) in the fall of the sophomore year and complete an Arkansas State Police and Arkansas Child Maltreatment Registry background check. Students will be emailed a certification letter from the Office of Teacher Education once they have successfully completed these steps. The certification letter must be emailed by the student to the Teaching K-12 Physical Education and Health program coordinator to formally complete the admission process to the Teaching K-12 Physical Education and Health program.

## Pre-Teaching K-12 Physical Education and Health

| PHED 1003 or CIED 1013 | The Physical Education Profession: An Overview Introduction to Education | 3 |
| :---: | :---: | :---: |
| PHED 2023 or PHED 2373 | Sport Skills <br> Elementary Physical Education | 3 |
| PBHL 1103 | Personal Health and Safety | 3 |
| Total Hours |  | 9 |

1 All students, including transfer students must complete at least 12 credit hours at the University of Arkansas with a minimum of 2.5 GPA.

Deadlines to submit the information for the Teaching K-12 Physical Education and Health Program above are May 1 (typically spring sophomore year) for fall admission and Nov. 1 (typically fall junior year) for spring admission. Appeals must be made to the PHED Program Coordinator for admission after these deadlines.

- To enroll in PHED 3003 and PHED 3043, students are required to be admitted to the Teaching K-12 Physical Education and Health major.
- To enroll in PHED 4703, PHED 4743, and PHED 432V, students are required to have a cumulative grade point average of 2.7 or above and be admitted to the Teaching K-12 Physical Education and Health major.

To be eligible to enroll in the Senior Block Internship semester (PHED 4023, PHED 407V, PHED 4733), students are required to:

- Be admitted to the Teaching K-12 Physical Education and Health major.
- Have a cumulative grade point average of 2.7.
- Take the Praxis II exams required by the Arkansas Department of Education licensure area of K-12 Physical Education, Wellness and Leisure by December 1st.

In order to complete the Teaching K-12 Physical Education and Health major, students must complete all University and PHED program requirements for graduation.

Students interested in obtaining an endorsement in coaching should contact the Director of Teacher Licensure in the Office of Teacher Education. (https://teacher-education.uark.edu/licensure/)

\end{tabular}

General Electives 20-21
As needed for total hours based on waivers, exemptions and transfer inequalities
Total Hours
\({ }^{1}\) In addition to PSYC 2003 listed under State Minimum Core, students must also choose other courses to fulfill the State Minimum Core (p. 81).

2 Student must choose one course to take as part of the additional requirements and one course as part of the Pre-PHED.
\({ }^{3}\) Courses open to PHED majors only.

All students seeking licensure in the state of Arkansas are subject to a criminal background check. Forms for this procedure may be obtained at the office of the Teacher Certification Officer, at the State Department, or any police station, including the campus police. These background checks take up to six months to process; therefore, students are advised to complete and submit the forms to the proper authorities six months in advance of actually applying for a license. Arkansas will not certify anyone who has been convicted of a felony. Although not required for the Kinesiology concentration in Physical Education, Wellness and Leisure, students seeking coaching endorsement will need to take PHED 4001, take the appropriate standardized exams (ACT, SAT, GRE, or PRAXIS core) as designated by the Arkansas State Department of Education, and make a "C" or better in all courses required by the University of Arkansas for the Coaching Endorsement. Please see the College of Education and Health Professions PDF (http://coehp.uark.edu/CoachingALP.pdf) for these specific course numbers.

\section*{Student Dismissal Policy based on Unethical/Unprofessional Behavior}

The University of Arkansas' teacher preparation programs adhere to the Code of Ethics of the Education Profession as established by the National Education Association as described in NEA Code of Ethics, Arkansas Division of Elementary and Secondary Education Code of Ethics, as well as discipline specific codes of ethics and standards found in program handbooks. Violation of these principles may result in probation, suspension, or dismissal of the internship as described:
1. Any incident of ethical misconduct or concern will be documented by the faculty member(s), discussed directly with the student and their mentor, and referred to the program's coordinator or supervising faculty. It may also be reported to the Teacher Candidate Professional Review Committee.
2. The Teacher Candidate Professional Review Committee evaluates the concerns and recommends a course of action, which may range from a zero score on the academic and/or internship work, a failing grade for the course, probation, up to dismissal from a teacher education program.
3. Any candidate may be suspended by a Teacher Education Program Coordinator for extreme, unforeseen circumstances such as endangerment of students or others, disruption of schools or classes, felonious behaviors, or ethical violations (i.e., Arkansas Code of Ethics, Code of Student Life). Such suspensions will be referred to the Teacher Candidate Professional Review Committee for review and may become permanent.

The Program Coordinator, in consultation with the Teacher Education Professional Review Committee and the Dean's Office for Academic and Student Affairs in the College of Education and Health Professions, has the authority and responsibility to dismiss a student from the teacher education program for unethical or unprofessional behavior and/or not recommend the student for licensure. More detailed guidelines about the policies, supports, and other requirements are provided in the program's handbook, as well as on the Office of Teacher Education website or the Teacher Education Support page.

Students who have been dismissed on the basis of unethical or unprofessional conduct may appeal the decision following the procedures outlined under the Student Grievances and Appeals section of the Undergraduate Catalog of Studies (https://nam11.safelinks.protection.outlook.com/?url=http \%3A\%2F\%2Fcatalog.uark.edu\%2Fundergraduatecatalog \%2Facademicregulations\%2Fstudentacademicappeals \%2F\&data=04\%7C01\%7Cagriffin\%40uark.edu \%7C2ce8b829e8e040a2614108d8b32229d4\%7C79c742c4e61c4fa5be89a3c \%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQljoiV2luMzliLCJBTil6Ik1h \%7C1000\&sdata=HJfCw \%2BlavTFgx5n3xFWS0XdeBVvInxmiEAaQ1prgywk\%3D\&reserved=0).

\section*{Teaching K-12 Physical Education \& Health Eight-Semester Degree Program}

The teacher education program for Teaching K-12 Physical Education \& Health does not qualify for the eight semester degree plan due to the cumulative GPA requirements for progression. However, the following 8semester sample plan shows how a first-year student could select their courses to finish in four years.
\begin{tabular}{|c|c|c|}

\end{tabular}

\section*{Total Units in Sequence:}
\({ }^{1}\) Core areas must be completed as outlined in State Minimum Core (p. 81).

2 Students must complete the State Minimum Core requirements (https://nam03.safelinks.protection.outlook.com/?url=https\%3A\%2F \%2Fnextcatalog.uark.edu\%2Fundergraduatecatalog\%2Fgened \%2Fstateminimum\%2F\&data=02\%7C01\%7Cagriffin\%40uark.edu \%7Ce4e632415f9b49eda9bf08d7f5c20b91\%7C79c742c4e61c4fa5be89a3 \%2F1XG8924jwOx8pTIw8IWNAGp0s\%3D\&reserved=0) as outlined in the Catalog of Studies. The courses that meet the state minimum core also fulfill many of the university's General Education requirements (https://nam03.safelinks.protection.outlook.com/?url=https\%3A\%2F \%2Fnextcatalog.uark.edu\%2Fundergraduatecatalog\%2Fgened \%2Fgeneraleducation\%2F\&data=02\%7C01\%7Cagriffin\%40uark.edu \%7Ce4e632415f9b49eda9bf08d7f5c20b91\%7C79c742c4e61c4fa5be89a3c \%2BDWRVEfAqIMsYNX4KXEgX2JdEJJY7Go\%3D\&reserved=0), although there are additional considerations to satisfy the general education learning outcomes. Students are encouraged to consult with their academic adviser when making course selections.

\section*{Courses}

PHED 1003. The Physical Education Profession: An Overview. 3 Hours. An introduction to the teaching of physical education. (Typically offered: Fall and Spring) May be repeated for degree credit.

PHED 2023. Sport Skills. 3 Hours.
This course is designed to prepare the student to teach sport skills, primarily those taught in grades 5-8. (Typically offered: Fall)
PHED 2373. Elementary Physical Education. 3 Hours.
Program planning and techniques of teaching physical education activities to children; for early childhood, elementary and physical education teachers, supervisors, and principals. (Typically offered: Spring)

\section*{PHED 3003. Outdoor Education. 3 Hours.}

PHED 3043. Teaching Fitness. 3 Hours.
Instructional strategies for teaching public school students about fitness concepts. Prerequisite: Admission into PHED BSE program is required. (Typically offered: Spring)

\section*{PHED 3163. Applied Kinesiology. 3 Hours.}

Examination of the physiological responses and biomechanical principles of movement. The exploration includes the study of the maturation of the body's functional capacities as it relates to exercise and the fundamental principles of mechanical analysis of movement. (Typically offered: Fall)

PHED 3203. Principles and Problems of Coaching. 3 Hours.
A focus on the various aspects of coaching the athletes in contemporary society through an examination of research findings related to factors affecting performance. Attention to be given to principles, problems and understanding essential to the management of athletic contests. (Typically offered: Fall)

\section*{PHED 3223. Motor Development. 3 Hours.}

An overview of contemporary motor development and movement theory, developmental hierarchies, and physiological aspects of development throughout the lifespan. (Typically offered: Fall and Spring)
PHED 3413. Administration in Physical Education. 3 Hours.
An examination of the administrative duties of the physical education teacher. (Typically offered: Spring)

PHED 3573. The School Health Program. 3 Hours.
 well as the teacher's potential role in each. Prerequisite: PBHL 1103. (Typically offered: Fall)
PHED 3623. Sport Sociology. 3 Hours.
An investigation of the impact of physical education and sport on society. (Typically offered: Spring)

Provides fundamental concepts and skills essential to physical education
programming for students with disabilities. Deals with definitions, disabling conditions, developmental and remedial activities, games, and sports. Prerequisite: Junior standing. (Typically offered: Fall)
PHED 391V. Special Topics in PHED. 1-3 Hour.
Designed to cover specialized topics not presented in physical education coursework. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{PHED 3991H. Physical Education Honors Thesis Tutorial. 1 Hour.}

Designed to provide the foundation for the Honors Thesis/Project. Students and faculty tutors work "one-on-one" exploring a specific topic which has been agreed upon by the student and the professor. Prerequisite: Honors candidacy and PHEDBS major. (Typically offered: Fall, Spring and Summer)

\section*{PHED 4001. Coaching Practicum. 1 Hour.}

Designed for students who want to add the Coaching Endorsement to the state teaching license. Student serves as a coaching assistant with a local school, University or recreational sports team. Students who serves as a coaching assistant with a local school must successfully complete a criminal background check prior to beginning coaching practicum. Prerequisite: PHED 3203 and proof of current First Aid/CPR/AED certification submitted to instructor of record. (Typically offered: Fall and Spring)

\section*{PHED 4023. Class Management. 3 Hours.}

This course is designed to provide opportunities for the student to acquire an understanding that emphasizes class management; and includes professional ethics, and school policies related to students, faculty, and programs. Corequisite: PHED 407V and PHED 4733. Prerequisite: Admission into PHED BSE program, earn a cumulative grade point average of 2.7, and take the Praxis II exams required by the Arkansas Department of Education licensure area of K-12 Physical Education, Wellness and Leisure by December 1st. (Typically offered: Spring)

\section*{PHED 407V. Physical Education Teaching Internship. 1-9 Hour.}

This internship involves supervised teaching experience in a P-12 setting. Students will be placed under the guidance of a mentor teacher at specific school sites within NW Arkansas. Internship will be done at both the elementary and secondary levels. Successful completion of a criminal background check is required before beginning internship. Corequisite: PHED 4023 and PHED 4733. Prerequisite: Admission into PHED BSE program, earn a cumulative grade point average of 2.7, and take the Praxis II exams required by the Arkansas Department of Education licensure area of K-12 Physical Education, Wellness and Leisure by December 1st. (Typically offered: Spring)
PHED 432V. Teaching Practicum. 1-2 Hour.
K-12 Kinesiology majors serve as a teaching assistant with a local school physical education teacher. This course should be taken the semester before PHED 407V Internship. Prerequisite: Admission into PHED BSE program and a cumulative grade point average of 2.7 are required. (Typically offered: Fall)

PHED 4703. Assessment in Physical Education. 3 Hours.
An examination of the assessment duties required of a physical education teacher. The use of authentic assessment and various grading strategies will be investigated. Prerequisite: Admission into PHED BSE program and a cumulative grade point average of 2.7 are required. (Typically offered: Fall)

\section*{PHED 4733. Senior Seminar. 3 Hours.}

This capstone class will cover special topics for the Kinesiology P-12 students in preparation for entry into the profession. Resumes, cover letters, teaching philosophy, references, and interview preparation will be included. Students will also review contemporary issues relevant to the physical education teacher. Corequisite: PHED 4023. Prerequisite: Admission into PHED BSE program, earn a cumulative grade point average of 2.7, and take the Praxis II exams required by the Arkansas Department of Education licensure area of K-12 Physical Education, Wellness and Leisure by December 1st. (Typically offered: Spring)

PHED 4743. Secondary Physical Education. 3 Hours.
Strategies and curriculum for physical education, grades 7-12. Prerequisite:
Admission into PHED BSE program and a cumulative grade point average of 2.7 are required. (Typically offered: Fall)
PHED 480V. Workshop. 3-6 Hour.
Physical education workshop. Prerequisite: Instructor consent. (Typically offered: Summer)

\section*{College of Engineering Mission and Objectives}

Ever since people first began to use tools and manipulate their surroundings, engineering has been a vital aspect of human life, and these days, engineering is as important as it ever was. Society turns
to engineers to solve a range of social, economic and environmental problems, and an engineering degree can prepare students to work as managers and leaders, in the public or private spheres. Engineering education combines math and science with creativity, innovation and a passion to change the world.

The College of Engineering adds personal, social and economic value to the region, the state, the nation, and the world through engineering education and cutting-edge research in emerging technologies.

Recognizing that the University of Arkansas, Fayetteville, is a land-grant institution with consequent responsibilities in teaching, research, and service, and realizing that these are mutually dependent and necessary responsibilities, the College of Engineering adopts and seeks to fulfill the following statements of purpose.

Undergraduate Education - Offer a high-quality and fully accredited course of instruction involving classroom, laboratory, and extracurricular activities that will result in professionals qualified to begin careers in the field of engineering and prepared to assume responsible places of leadership in society.

Graduate Education and Research — Offer state-of-the-art coursework and research experiences that result in all graduates being capable of independent analysis and design, and all Ph.D. graduates capable of extending the state-of-the-art in their areas of expertise.

Continuing Education - Provide local, regional, national, and international seminars, symposia, short courses, and credit courses to engineers and others in the technical community to help them further their formal education and keep abreast of new developments in technology.

Technology Development and Job Creation - Assist actively and vigorously in the growth and development of the state of Arkansas and the nation by performing research and developing innovative new technology, by updating the existing technology within industrial circles, by providing educational support services, and by attracting and creating new industry.

The College of Engineering focuses on research, teaching and outreach in the following areas:
- Health care and healthcare systems
- Cyber and Homeland Security
- Big Data and Data Analytics
- Sustainability and the built environment
- Electric power systems and advanced power electronics
- Electronics manufacturing
- Environmental and ecosystems analysis
- Mixed signal electric systems
- Materials and manufacturing
- Nanotechnologies
- Transportation, logistics and infrastructure

More information about the College of Engineering can be found at the College of Engineering website (http://www.engr.uark.edu/).

\section*{College of Engineering Strategic Plan "Preparing You for Your Tomorrow"}

For more than 100 years, the College of Engineering has successfully fulfilled its primary mission: to provide an excellent engineering education to undergraduate and graduate students at the University of Arkansas.

The College of Engineering faculty, staff, alumni and students decided to accept the challenge to become one of the best. Specifically, the college's collective goal is:

To become and be recognized as one of the top tier graduate and undergraduate engineering programs in the U.S.

The College's strategic plan encompasses seven main goals. By successfully accomplishing these objectives, the College of Engineering will contribute to the University of Arkansas becoming a nationally competitive, student-centered research institution serving Arkansas and the world, effectively fulfilling its purpose.

\section*{Strategic Goals}
1. Provide a student-centered educational experience that attracts diverse, high-quality students, helps them to realize their potential, inspires them to pursue excellence at all degree levels and grooms them to become leaders in their profession.
2. Create a supportive research environment that enhances and recognizes scholarship while stimulating entrepreneurship and economic development within Arkansas, the nation and world.
3. Recruit, mentor and retain high-quality and diverse faculty members who value and promote world-class scholarship.
4. Attract, develop and retain well-qualified, diverse and skilled staff members who are equipped to support the growth and potential of the College of Engineering.
5. Implement service and outreach to enhance the impact of the College of Engineering both within and outside the university through service and outreach.
6. Become a catalyst for economic development to achieve the longterm economic goals of Arkansas through entrepreneurship, research and collaboration with industry and government.
7. Cultivate corporate and alumni relationships to improve educational opportunities and assist in providing a high quality educational infrastructure.

\section*{College Admission Requirements Undergraduate Students}

Freshmen admitted to the University of Arkansas, Fayetteville, are eligible to enroll in the College of Engineering. The freshman curriculum stresses a basic foundation in mathematics, physics, and chemistry, which will be required in later years. The sophomore, junior, and senior years are spent in a strong concentration on the student's chosen field, with emphasis on industrial applications of classroom and laboratory work. By the selection of electives, a student can concentrate in depth in a particular subject, have the flexibility to study several subjects, and minor in an area of interest. Provisions are made for electives in the humanities and social sciences as a means of providing a well-rounded education.

\section*{International Students}

Before being admitted all computer engineering applicants must submit a Test of Spoken English (TSE) score of at least 5.0, or a 7.0 on the spoken
section of the IELTS, and an ACT score of 25 (or SAT score of 1140(R)) or above, to be eligible for admission.

\section*{Transfer Students}

In addition to the university policies controlling the granting of credit for course work taken at other institutions, the College of Engineering specifies that advanced ( 3000 - and 4000-level at the University of Arkansas) engineering courses may not normally be transferred from institutions that do not have engineering programs accredited by the Engineering Accreditation Commission or the Computing Accreditation Commission of ABET.

\section*{Laptop Requirement}

The College of Engineering requires that entering first-year students have a laptop computer and strongly recommends that entering students obtain a computer that meets or exceeds the college's requirements.
The most up-to-date engineering specifications for laptops can be found on the Computer Recommendation page (https://its.uark.edu/ software-equipment/tech-store/student-recommendations.php\#college-of-engineering). The minimum requirements for the entering fall class are updated annually in the spring. The College of Engineering recommends that you wait until the summer to purchase a new computer to get the most up-to-date system.

An adjustment to your financial aid for the purchase of a computer may be available by completing a Budget Adjustment Form (https:// finaid.uark.edu/office_information/forms.php) through the University Financial Aid Office (https://finaid.uark.edu/financial_aid_information/).

\section*{College Scholarships}

The College of Engineering awards numerous scholarships, and most are based primarily on academic performance. However, scholarships may also be awarded on the basis of financial need and diversity. Scholarships are available from both the college and its individual departments. College scholarships are available to any engineering student, and departmental scholarships are meant for students enrolled in a particular discipline of engineering. College and departmental scholarships are not available for entering freshmen. Students must be admitted to the University of Arkansas and enrolled in the College of Engineering to qualify and receive either a college or departmental scholarship. The college has a one-step application process that allows a student to be considered for all collegelevel and departmental scholarships.

For more information concerning scholarship and diversity opportunities, contact the Engineering Student Affairs Office at 575-3051 or e-mail engrdean@uark.edu.

\section*{Facilities and Resources \\ Instructional, Computer, and Laboratory Facilities}

Undergraduate instruction in engineering takes place in Bell Engineering Center, John H. White Jr. Engineering Hall, J.B. Hunt Center for Academic Excellence, and the Mechanical Engineering building. These facilities contain state-of-the-art classrooms and instructional equipment. Undergraduate laboratories are located both on the main campus as well as at the Engineering Research Center. Laboratories offer students hands-on experience relating to the subject matter addressed in the classroom.

The College of Engineering utilizes a wide variety of computing equipment to assist in engineering education. Students have easy access to
computers through general computer laboratories or computer facilities located in specialized laboratories within the college. The computers are networked so that all the computing power of the university, including the mainframe computers, can be accessed from the PCs or workstations provided for engineering students. Owning a personal computer is not required; however, it is beneficial.

\section*{Laboratory Fee}

In order to maintain the college's state-of-the-art instructional and computer laboratories, each student enrolled in an engineering course is assessed a laboratory fee for that term. This fee is used only to purchase and maintain equipment and staff the engineering laboratories and classrooms to assist students.

\section*{Library}

The books and references used by engineering students and faculty are housed principally in the University of Arkansas Mullins Library. This collection is the most useful and comprehensive engineering library in the state. Many publications pertinent to the engineering profession are being added continuously. Mullins Library is the depository for water resources papers, geological survey materials, and NASA publications, as well as other governmental and industrial series.

\section*{Engineering Research Center}

The 178,000-square-foot Engineering Research Center is located approximately two miles south of the main campus. The center provides the facilities and support services for a wide variety of research activities. It houses the Engineering Experiment Station through which the research of individual departments in the college is administered. Centers and laboratories located at the Engineering Research Center include GENESIS, the High Density Electronics Center, the Center for Training Transportation Professionals, and the Chemical Hazards Research Center.

\section*{Distance Learning}

A Master of Science in Engineering (M.S.E.) degree is available for students who wish to take a broad range of engineering courses. See the Graduate School Catalog for details.

Professional development and continuing education credits can be earned through the College of Engineering's Center for Distance Learning. These courses provide ongoing training on technical and engineering topics for professional engineers, land surveyors, and others in the technical and engineering professions.

The Master of Science in Operations Management (M.S.O.M.) degree program at the University of Arkansas offers students the philosophy, concepts, and techniques needed to manage available resources to achieve maximum efficiency and effectiveness in meeting operational goals. It provides the tools needed for successful management in industrial and/or military settings. Geared toward the working student, classes meet in the evenings in five 8-week terms per year. The program is offered at military installations at Little Rock Air Force Base (Jacksonville, Ark.), Naval Support Activity Mid-South (Millington, Tenn.), Hurlburt Field, Fla., and at in-state sites at Fayetteville, Bentonville, Camden, and Blytheville. Students in remote locations may also earn the MSOM degree by taking video courses. This is a non-engineering degree that is open to students from all undergraduate backgrounds. See the Graduate School catalog for details.

\author{
Cooperative Education \\ GNEG 3801 Parallel Cooperative Education (1 Hour)
}

Part-time supervised experience in industry where students apply classroom skills to problems specific to their discipline in a professional workplace setting. Credit may not be applicable to all degree programs in engineering. Offered Fall, Spring, and Summer. Prerequisites: must have completed 30 hours towards engineering degree requirements; must have a minimum 2.50 cumulative GPA; must be working part-time (fewer than 25 hours) at co-op; transfer students (transferring 24 or more hours) must have completed 12 credit hours in the College of Engineering; U.S. citizens must be enrolled at least half-time ( 6 hours; spring and fall terms only); International F-1 visa students must have completed at least 30 weeks of study in the USA and must be enrolled full-time (12 hours; spring and fall terms only, per immigration regulations). These requirements are accurate for international students as of February 2021 and are subject to change based on immigration requirement changes within the law; for the most up-to-date requirements, please visit the Cooperative Education Overview page (https://engineering.uark.edu/career-services/students/ cooperative-education-overview.php).

\section*{GNEG 3811 Alternating Cooperative Education (1 Hour)}

Full-time supervised experience in industry where students apply classroom skills to problems specific to their discipline in a professional workplace setting. Application of credit to a degree program is at the discretion of the department owning the degree program. Offered Fall, Spring, and Summer. Prerequisites: must have completed 30 hours toward engineering degree requirements; must have a minimum of 2.50 cumulative GPA; must have at least 12 hours of required coursework in their major remaining upon return to campus; must be working full-time (40-plus hours); must not be enrolled in more than 3 credit hours; transfer students (transferring 24 or more hours) must have completed 12 credit hours in the College of Engineering; International F-1 visa must have completed at least 30 weeks of study in the USA and students may only enroll during summer per immigration and College of Engineering regulations. These requirements are accurate for international students as of February 2021 and are subject to change based on immigration requirement changes within the law; for the most up-to-date requirements, please visit Cooperative Education Overview page (https://engineering.uark.edu/career-services/students/cooperative-education-overview.php).

\section*{GNEG 5801 Parallel Cooperative Education (1 Hour)}

Part-time supervised experience in industry where students apply focused, discipline specific, classroom and research skills to problems directly related to their area of study in a professional workplace setting. A combination of GNEG 5801 or GNEG 5811 may be repeated for up to 3 hours of non-degree credit. Offered Fall, Spring, and Summer. Prerequisites: must have completed at least 6 hours of graduate level engineering courses meeting degree requirements at the University of Arkansas; must have a minimum of 3.0 cumulative GPA; must be working part-time (fewer than 25 hours) at co-op; must have approval of graduate committee chair prior to interviewing for co-op; must not hold a TA, GA, or RA position during the work experience; must have at least 3 required hours (Master's students) or 6 required hours (Ph.D. students) of course work remaining upon return to campus; U.S. Citizens must be enrolled at least half-time (5 hours, spring and fall terms only); International F-1 visa students must have completed 30 weeks of study in the USA and must be enrolled full-time ( 9 hours; spring and fall terms only, per immigration regulations); M.S.O.M. students must have completed OMGT 5003 Introduction to Operations Management (with a
grade of \(B\) or better) and one OMGT graduate elective directly applicable to the proposed internship experience. These requirements are accurate for international students as of February 2021 and are subject to change based on immigration requirement changes within the law; for the most up-to-date requirements, please visit Cooperative Education Overview page (https://engineering.uark.edu/career-services/students/cooperative-education-overview.php).

\section*{GNEG 5811 Alternating Cooperative Education (1 Hour)}

Full-time supervised experience in industry where students apply focused, discipline specific, classroom and research skills to problems directly related to their area of study in a professional workplace setting. A combination of GNEG 5801 or GNEG 5811 may be repeated for up to 3 hours of non-degree credit. Offered Fall, Spring, and Summer. Prerequisites: must have completed at least 6 hours of graduate level engineering courses meeting degree requirements at the University of Arkansas; must have a minimum 3.0 cumulative GPA; must be working full-time (40+ hours) at co-op; must have approval of graduate committee chair prior to interviewing for co-op; must not hold a TA, GA, or RA position during the work experience; must have at least 3 required hours (Master's students) or 6 required hours (Ph.D. students) of course work remaining upon return to campus; must not be enrolled in more than 3 credit hours; International F-1 visa students must have completed at least 30 weeks of study in the USA and may only enroll during summer per immigration and College of Engineering regulations; M.S.O.M. students must have completed OMGT 5003 Introduction to Operations Management (with a grade of B or better) and one OMGT graduate elective directly applicable to the proposed internship experience. These requirements are accurate for international students as of February 2021 and are subject to change based on immigration requirement changes within the law; for the most up-to-date requirements, please visit Cooperative Education Overview page (https://engineering.uark.edu/ career-services/students/cooperative-education-overview.php).

\section*{Student Organizations}

The following are honor societies, social organizations and professional societies to which engineering students at the University of Arkansas may aspire:
- Alpha Chi Sigma (a professional chemistry fraternity)
- Alpha Epsilon (Biological/Agricultural Engineering)
- Alpha Pi Mu (Industrial Engineering)
- Chi Epsilon (Civil Engineering)
- Eta Kappa Nu (Electrical Engineering)
- Omega Chi Epsilon (Chemical Engineering)
- Order of the Engineer (professional engineering society)
- Phi Eta Sigma (freshmen)
- Phi Kappa Phi (juniors and seniors)
- Phi Sigma Rho, (professional engineering sorority)
- Pi Mu Epsilon (Mathematics)
- Pi Tau Sigma (Mechanical Engineering)
- Tau Beta Pi (Engineering)
- Theta Tau, (A professional engineering fraternity, it maintains a chapter house on the campus and is active in university and college affairs.)

Several national engineering societies are listed below that maintain student branches in the College of Engineering, each under the auspices of a professor in a related department.
- American Chemical Society
- American Concrete Institute
- American Ecological Engineering Society
- American Indian Science and Engineering Society
- American Institute of Aeronautics and Astronautics
- American Institute of Chemical Engineers
- American Nuclear Society
- Amateur Radio Club of the University of Arkansas
- American Society of Agricultural and Biological Engineers
- American Society of Civil Engineers
- American Society of Heating, Refrigeration, and Air-Conditioning
- American Society of Mechanical Engineers
- Association for Computing Machinery
- Biomedical Engineering Society
- Engineers Without Borders
- Institute of Biological Engineering
- Institute of Electrical and Electronics Engineers
- Institute of Electrical and Electronics Engineers, Components, Packaging, and Manufacturing Technology Society
- Institute of Electrical and Electronics Engineers, Power Electronics Society
- Institute of Industrial Engineers
- Institute of Transportation Engineers
- International Microelectronics and Packaging Society
- Materials Research Society
- National Society of Professional Engineers
- National Society of Black Engineers
- Society of Automotive Engineers Assoc. for Computing Machinery
- Society of Hispanic Professional Engineers
- Society of Manufacturing Engineers
- Society of Women Engineers
- Transportation and Logistics Association

\section*{College Academic Regulations}

Students are expected to keep themselves informed concerning current regulations, policies, and program requirements in their fields of study and must meet all requirements of the degree programs in which they are enrolled. Courses that are modified or added to a curriculum and that are incorporated into the curriculum at a level beyond that at which a student is enrolled may become graduation requirements for that student. Courses that are incorporated into the curriculum at a level lower than the one at which the student is enrolled are not required for that student.

\section*{Eligibility}

Only students enrolled in the College of Engineering or enrolled in programs in which curricula require engineering courses will be allowed to take engineering courses. Exceptions to this requirement must be approved by the dean of engineering. This does not apply to graduate students.

\section*{Code of Ethics}

Students in the College of Engineering are obligated to comply with pertinent provisions of the Code of Ethics applicable to professional practice following graduation. The Code requires "honesty, impartiality, fairness, and equity," and "adherence to the highest principles of ethical conduct." Most particularly, it states that engineers shall:
1. Be objective and truthful in professional reports, statements, or testimony;
2. Not falsify or permit misrepresentation of their academic or professional qualifications;
3. Give credit for engineering work to those whom credit is due;
4. Not compete unfairly with other engineers by attempting to obtain employment or advancement by improper or questionable methods;
5. Avoid any act tending to promote their own interest at the expense of the dignity and integrity of the profession.

\section*{Degree Requirements}

The basic requirement for a Bachelor of Science degree in engineering is \(124-128\) semester hours of academic work, depending on the career field chosen. Students coming from high school with adequate preparation will be able to satisfy this requirement in eight semesters; however, some students require preparatory courses, and others choose to enroll in slightly lighter loads and graduate in nine or ten semesters. Students enrolled in ROTC require an additional 19 semester hours to meet all graduation requirements and graduate in ten semesters (five years).

Engineering is a rapidly changing profession, and the departmental curricula are updated continuously to keep pace with these changes. Students entering under this catalog will be required to comply with such curriculum changes to earn their degree. However, the total number of semester hours required for the degree may not be increased, and all work completed in accordance with this catalog prior to the curriculum change will be applied toward the student's degree requirements. Former students of the college must meet the curriculum requirements in effect at the time of their readmission.

\section*{Graduation Requirements}

In addition to university requirements for enrollment and graduation, the College of Engineering has these additional requirements. Individual departments may have additional requirements.
1. Grade-Point Average - A candidate for a degree from the College of Engineering must have earned a grade-point average of no less than 2.00 on all courses in the student's major area of study.
2. Courses That Do Not Count Toward a Degree - The following courses, which may be required, do not count toward degree credit for bachelor degrees in the College of Engineering: MATH 1203, MATH 1213, and MATH 1284C or their equivalents.
3. "D" Rule - No student will be allowed to graduate if the student has "D" grades in more than 8 hours presented to meet the requirements for a degree.
4. Transfer of Courses - Advanced (3000- and 4000-level at the University of Arkansas) engineering courses may not normally be transferred from institutions that do not have programs accredited by the Engineering Accreditation Commission.
5. Resident Requirements - A candidate must earn a minimum of 20 credit hours at the 3000 level and above in the College of Engineering from the University of Arkansas.
6. State Minimum Core - The University of Arkansas has adopted the state's minimum requirements of 35 semester-credit-hours of general education courses that are required of all baccalaureate degree candidates. This is in compliance with Arkansas Act 98 of 1989 and the subsequent action of the Arkansas State Board of Higher Education. Beginning in the fall semester of 1991, all state institutions of higher education in Arkansas have a 35 -hour minimum core requirement with specified hours in each of six academic areas. The university and the College of Engineering have identified those courses that meet the minimum requirement, and they are listed in the chart below.
\begin{tabular}{|c|c|c|}
\hline \multicolumn{3}{|l|}{Specific State Minimum Core Requirements for Engineering Students} \\
\hline \multicolumn{3}{|l|}{English} \\
\hline ENGL 1013 & Composition I (ACTS Equivalency = ENGL 1013) & 3 \\
\hline ENGL 1033 & Technical Composition II (ACTS Equivalency = ENGL 1023) & 3 \\
\hline \multicolumn{3}{|l|}{Mathematics} \\
\hline MATH 2554 & Calculus I (ACTS Equivalency = MATH 2405) & 4 \\
\hline \multicolumn{3}{|l|}{Science} \\
\hline PHYS 2054 & University Physics I (ACTS Equivalency \(=\) PHYS 2034) & 4 \\
\hline
\end{tabular}

Select one of the following:
PHYS 2074 University Physics II (ACTS Equivalency = PHYS 2044 Lecture)
CHEM 1123 University Chemistry II (ACTS Equivalency =
\& CHEM 1121LCHEM 1424 Lecture)
and University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab)
BIOL 1543 Principles of Biology (ACTS Equivalency \(=\) BIOL
\& BIOL 1541L 1014 Lecture)
and Principles of Biology Laboratory (ACTS Equivalency \(=\) BIOL 1014 Lab)

\section*{U.S. History or Government}

Select one of the following:
HIST 2003 History of the American People to 1877 (ACTS Equivalency = HIST 2113)
HIST 2013 History of the American People, 1877 to Present (ACTS Equivalency \(=\) HIST 2123)
PLSC 2003 American National Government (ACTS Equivalency = PLSC 2003)
Fine Arts, Humanities and Social Sciences
Fine Arts * 3
Humanities * 3
Social Sciences * 9

Total Hours
* Must be selected from the university-approved list of lower level Humanities, Fine Arts and Social Science courses found in the main State Minimum Core (http://catalog.uark.edu/undergraduatecatalog/ gened/stateminimum/) list.

\section*{Minors in Other Colleges and Schools}

Students in the College of Engineering may pursue an academic minor in other colleges. For example, a minor in business is popular among engineering students. For requirements regarding minors, check the
catalog listing for the department offering the minor. Students must notify the College of Engineering dean's office of their intent to pursue a minor.

\section*{Requirements to Graduate with Honors}

Students who have demonstrated exceptional academic performance in baccalaureate degree programs will be recognized at graduation by the honors designation of cum laude, magna cum laude, or summa cum laude. To earn this designation, the student must meet the following criteria:
1. Must have completed at least one-half of his or her degree work at the University of Arkansas;
2. Must have at least a 3.50 GPA on University of Arkansas course work, computed at graduation (students with grade-point averages lower than 3.50 do not receive honors designation at graduation);
3. Must successfully complete the Engineering Honors Program, which includes a minimum of 12 hours of honors courses (at least 6 of these hours in engineering), an undergraduate research experience and thesis, and any additional departmental requirements;
4. Research and thesis material shall be evaluated by each department;
5. For cum laude, the student must achieve a GPA of 3.50 or higher and have good or better performance on the undergraduate research and thesis;
6. For magna cum laude, the student must achieve a GPA of 3.75 or higher and have good or better performance on the undergraduate research and thesis;
7. For summa cum laude, the student must achieve a GPA of 3.90 or higher and have outstanding performance on the undergraduate research and thesis.

The criteria may be evaluated and changed periodically by the College of Engineering.

\section*{Requirements to Graduate with Distinction}

Students who have not completed the Engineering Honors Program but have demonstrated excellent academic performance in baccalaureate degree programs will be recognized at graduation by the designation of "with distinction," "with high distinction," or "with highest distinction." To earn these designations, the student must meet the following criteria on his or her University of Arkansas course work:
1. Must have completed at least one-half of his or her degree work at the University of Arkansas;
2. For "with distinction," the student must achieve a GPA of 3.60 or higher;
3. For "with high distinction," the student must achieve a GPA of 3.75 or higher;
4. For "with highest distinction," the student must achieve a GPA of 3.90 or higher.

The criteria may be evaluated and changed periodically by the College of Engineering.

\section*{Graduate Studies}

The College of Engineering, in cooperation with the UA Graduate School, offers programs leading to the following graduate degrees:
- Master of Science in Biological Engineering (M.S.B.E.)
- Master of Science in Biomedical Engineering (M.S.Bm.E.)
- Master of Science in Chemical Engineering (M.S.Ch.E.)
- Master of Science in Civil Engineering (M.S.C.E.)
- Master of Science in Computer Engineering (M.S.Cmp.E.)
- Master of Science in Computer Science (M.S.)
- Master of Science in Electrical Engineering (M.S.E.E.)
- Master of Science in Engineering (M.S.E.)
- Master of Science in Environmental Engineering (M.S.En.E.)
- Master of Science in Industrial Engineering (M.S.I.E.)
- Master of Science in Mechanical Engineering (M.S.M.E.)
- Master of Science in Operations Management (M.S.O.M.)
- Doctor of Philosophy in Computer Science (Ph.D.)
- Doctor of Philosophy in Engineering (Ph.D.)

In addition, the College of Engineering supports the following interdisciplinary graduate programs:
- Master of Science in Cellular and Molecular Biology (M.S.)
- Master of Science in Microelectronics-Photonics (M.S.)
- Master of Science in Space and Planetary Sciences (M.S.)
- Doctor of Philosophy in Cellular and Molecular Biology (Ph.D.)
- Doctor of Philosophy in Microelectronics-Photonics (Ph.D.)
- Doctor of Philosophy in Space and Planetary Sciences (Ph.D.)

Further information concerning these programs may be found in the Graduate School Catalog or in the office of the dean of the Graduate School.

\section*{Accreditations}

As the only comprehensive engineering program in Arkansas, the College of Engineering offers undergraduate, graduate, and doctoral degrees through eight academic departments.

The College of Engineering offers the following programs accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http:// www.abet.org).
- Bachelor of Science in Biological Engineering (B.S.B.E.)
- Bachelor of Science in Biomedical Engineering (B.S.Bm. E)
- Bachelor of Science in Chemical Engineering (B.S.Ch.E.)
- Bachelor of Science in Civil Engineering (B.S.C.E.)
- Bachelor of Science in Computer Engineering (B.S.Cmp.E.)
- Bachelor of Science in Electrical Engineering (B.S.E.E.)
- Bachelor of Science in Industrial Engineering (B.S.I.E.)
- Bachelor of Science in Mechanical Engineering (B.S.M.E.)

The College Engineering offers the following program accredited by the Computing Accreditation Commission of ABET, www.abet.org (http:// www.abet.org).
- Bachelor of Science in Computer Science (B.S.)

\section*{Degrees Offered}

The College of Engineering offers programs leading to the following eight undergraduate degrees:
- Bachelor of Science in Biological Engineering (p. 834) (B.S.B.E.)
- Bachelor of Science in Biomedical Engineering (p. 839) (B.S.Bm.E.)
- Bachelor of Science in Chemical Engineering (p. 881) (B.S.Ch.E.)
- Bachelor of Science in Civil Engineering (p. 844) (B.S.C.E.)
- Bachelor of Science in Computer Engineering (p. 849) (B.S.Cmp.E.)
- Bachelor of Science in Computer Science (p. 849) (B.S.)
- Bachelor of Arts in Computer Science (p. 849) (B.A.)
- Bachelor of Science in Data Science (p. 95) (B.S.) (interdisciplinary program)
- Bachelor of Science in Electrical Engineering (p. 860) (B.S.E.E.)
- Bachelor of Science in Industrial Engineering (p. 867) (B.S.I.E.)
- Bachelor of Science in Mechanical Engineering (p. 874) (B.S.M.E.)

\section*{Minors}
- Data Analytics (p. 860)
- Engineering Management (p. 870)

\section*{Other Programs \\ Off-Campus Programs}

The College of Engineering at the University of Arkansas (UofA) is offering the Bachelor of Science degrees in Electrical Engineering and Mechanical Engineering at the University of Arkansas at Fort Smith (UAFS). Upper-division courses are taught in person or through distancelearning technology by UAF faculty, and lower-division courses are taught by UAFS faculty. The degree is awarded by University of Arkansas (UofA), but all classes are offered at the UAFS campus.

\section*{Cooperative Education}

Kelsey Lavigne
Career Development Center, College of Engineering, Bell 3158
(479) 575-6201, Fax: (479) 575-7744, klavigne@uark.edu

Cooperative education (co-op) is an academic program that allows students to gain practical work experience prior to graduation. Over the years thousands of engineering students have participated in the coop program at the University of Arkansas, gaining experience related to their major locally, within the state, across the nation, and internationally. Students work either full- or part-time in paid, degree-related jobs, and the skills they acquire allow them to step into their first full-time positions
ready to contribute in ways that other students cannot. The material below will give more information about the co-op program.

\section*{Forms of Cooperative Education: Alternating and Parallel}

In an alternating plan, students alternate between semesters of oncampus study and semesters off-campus at their co-op work site. Students can take a maximum of 3 credit hours of course work during the off-campus co-op periods. In a parallel co-op, students work part-time for a local company (less than 25 hours each week) and attend school at least half-time ( 6 credit hours). In either plan the student is considered a full-time student.

By participating in Cooperative Education, students have the chance to:
- Gain hands-on experience in a real world setting
- Confirm the choice of their major
- Make valuable industry contacts
- Enhance their communication skills
- Make money while also taking classes
- Lay the foundations for a future full-time job

\section*{Requirements and Conditions}
- GNEG 3801 (undergraduate students working part-time):
- Must have completed 30 hours towards engineering degree.
- Must have a minimum of 2.25 cumulative GPA.
- Must be enrolled at least half-time and must be working part-time at co-op.
- GNEG 3811 (undergraduate students working full-time):
- Must have completed 30 hours toward engineering degree.
- Must have a minimum of a 2.25 cumulative GPA.
- Must be working full-time and must not be enrolled in more than 3 credit hours.
- Must have at least 12 hours of coursework in their major remaining upon return to campus.
- GNEG 5801 (graduate students working part-time):
- Completed at least 6 hours towards engineering degree.
- Have a minimum of a 3.0 cumulative GPA.
- Must be enrolled at least half-time and must be working part-time at co-op.
- Must have approval of their thesis/dissertation advisor prior to interviewing for co-op positions.
- GNEG 5811 (graduate students working full-time):
- Completed at least 6 hours towards engineering degree.
- Have a minimum of a 3.0 cumulative GPA.
- Must be working full-time and must not be enrolled in more than 3 credit hours.
- Must have at least 3 hours of non-thesis, -dissertation, or research hours remaining upon return to campus.
- Must have approval of their thesis/dissertation advisor prior to interviewing for co-op positions.
- Students who are TA's, GA's, or RA's in the term of their work experience are not eligible for this course.
- Transfer Students
- Must have completed one semester of full-time study in the College of Engineering.
- Must meet all other co-op requirements.

\section*{- F-1 Students}
- Must have completed nine months of study in the United States.
- Must meet all other co-op requirements.

Full-time co-op assignments consist of the following scenarios:
- One semester away from campus (Spring, Summer, or Fall).
- One summer and one semester away from campus (Spring \& Summer OR Summer \& Fall).
- Alternating Semesters between Spring, Summer, and Fall.

Students who are away from campus for 2 semesters in one year, are eligible for only one semester away the following year with no more than three co-op semesters in a 24-month period. (Exceptions to this must be approved in advance by their departmental co-op representative.) Students who are going to be away from campus for the Fall and Spring semester in the same academic must receive prior approval from their departmental co-op representative.

\section*{Study Abroad Programs}

The College of Engineering actively encourages engineering students to obtain an international experience while pursuing an engineering degree. Students have several opportunities to join engineering facultyled programs in India, Belize and Spain as well as opportunities within the Southeastern Conference Academic Consortium (SECAC). For more information on study abroad opportunities, contact the Assistant Dean for International Programs, 479-575-7236.

\section*{Dual-Degree Transfer Programs}

The College of Engineering recognizes that a graduate engineer, to be of full service to community, must be educated in the social sciences and humanities as well as in technical subjects. The practice of industry to elevate engineers to managerial and administrative positions elevates the desirability of a broad educational background. Likewise, most universities within Arkansas do not offer a degree in engineering. Accordingly, the College of Engineering of the University of Arkansas has entered into a cooperative program with several Arkansas "partner" universities to provide for dual-degree programs that lead to a Bachelor of Science degree from the partner university and an engineering degree from the University of Arkansas. Typically, a student spends two to three years at the partner university and then completes an engineering curriculum in two to three years at the University of Arkansas. The student is awarded the Bachelor of Art/Bachelor of Science degree by the partner university and the Bachelor of Science in an engineering discipline by the University of Arkansas. More information is available at www.engr.uark.edu/transfer (http://www.engr.uark.edu/transfer.php)

\section*{Honors Program}

The College of Engineering has established an honors program to challenge superior students with a more in-depth academic program and research experience and to provide a structure for working more closely with faculty members and other students in a team environment. An honors program is highly recommended for individuals planning academic or research related careers that require considerable critical and original independent thinking. Admission requirements for the college's Honors Program are as follows: entering freshmen must have at least a 3.5 high school GPA and at least a 28 composite score on the ACT or SAT equivalent; entering transfer students must have at least a 3.5 GPA on their transfer work. Students not initially qualifying for the Engineering Honors Program are eligible if they earn a 3.500 cumulative GPA at the University of Arkansas.

Students must formally apply for admission to the Honors Program by completing the online application. The application is available at Honors College website (https://honors-application.uark.edu/). Once accepted into the program, Honors students take a minimum of 12 hours of Honors courses (a minimum of 6 of these 12 hours must be in engineering), participate in undergraduate research and write an undergraduate thesis, and must fulfill any additional departmental requirements. To receive Latin honors distinction at graduation, a student must hold a cumulative GPA of 3.500 or better (for all course work, computed at graduation).

Deadlines related to the Honors Program are as follows:
1. A Honors Advising Form is to be completed prior to a student earning 100 semester hours.
2. Honors College Graduation Certification is to be completed prior to one week before the last day of classes of the student's last semester.

\section*{First-Year Requirements and Eight-Semester Plan}

All freshman enrolling in the College of Engineering may participate in an Eight-Semester Degree Completion Program (p. 67).

All students who want to pursue an engineering degree or a Bachelor of Science in Computer Science should follow the plan below for the first two semesters, at the end of which they may finish an eight-semester plan in Computer Science (p. 849) (B.S.) or choose from among any of the engineering fields: Biological Engineering (p. 834), Biomedical Engineering (p. 839), Chemical Engineering (p. 881), Civil Engineering (p. 844), Computer Engineering (p. 849), Electrical Engineering
(p. 860), Industrial Engineering (p. 867), or Mechanical Engineering (p. 874).
```

Specific State Minimum Core Requirements for Engineering Students
English (6 hours)
ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013) 3
ENGL 1033 Technical Composition II (ACTS Equivalency = 3 ENGL 1023)

```

Mathematics (4 hours)
MATH 2554 Calculus I (ACTS Equivalency = MATH 2405) 4
Science (8 hours)
Engineering students are required to take additional science courses with matching labs beyond the minimum 8 hours required by the state minimum core.
CHEM 1103 University Chemistry I (ACTS Equivalency \(=\quad 3\) CHEM 1414 Lecture)
PHYS \(2054 \quad\) University Physics I (ACTS Equivalency = PHYS 4 2034)
U.S. History or Government (6 houurs)

\section*{Biological and Agricultural Engineering (BAEG)}

\author{
Lalit Verma
}

Head of the Department
203 Engineering Hall
479-575-2351
Biological and Agricultural Engineering Website (https://bio-agengineering.uark.edu/)

Healthy Planet, Healthy People: this is the aspiration for the Biological Engineering program at the University of Arkansas. We improve people's lives today and help assure a prosperous world for tomorrow by designing sustainable water, food, and energy systems. Where challenges exist, we create solutions by optimizing the living systems of our world (the interactions of human, plant, animal, environment, food, and microbes) using the tools of engineering and biotechnology. Biological engineers contribute significantly to human health and prosperity by ensuring a safe and readily available water supply, a safe and nutritious food supply, and a healthy ecosystem upon which both water and food depend.

The faculty of the Biological Engineering program seeks to provide a challenging technical education in a safe, secure and inclusive learning environment that promotes a desire for service and prepares graduates to:
1. Successfully practice engineering involving the design and management of sustainable water, food, energy and related biological systems,
2. Make ethical, valuable and sustained contributions that benefit employers, communities, Arkansas and the world, and
3. Succeed in graduate education or continuing professional development, as needed for professional growth and licensure.

A Bachelor of Science degree in Biological Engineering is a job-ready degree with opportunities in a variety of industries, government agencies, and consulting firms. It is also excellent preparation for graduate studies (M.S. or Ph.D.) in engineering and related fields, as well as entry into other professional schools (e.g., medical, veterinary, dental, pharmacy, etc.).

The B.S. in Biological Engineering degree can lead immediately to careers in:
- Ecological engineering, such as water quality and watershed management, water resources and irrigation, low impact development in urban watersheds, stream and habitat restoration, and air quality remediation.
- Food and bio-product process engineering, such as food processing, forest products, biotechnology, biofuels, waste treatment and byproduct utilization.
- Sustainable resource engineering, such as sustainable agriculture to expand the food supply for a growing population; renewable and bio-energy development; life cycle analysis to assess, design and manage complex biological systems; efficient utilization of organic residues and by-products; conservation of Earth's finite resources.

Completion of degree requirements provides graduates with the following learning outcomes:
- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- An ability to communicate effectively with a range of audiences
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

\section*{Requirements for B.S. in Biological Engineering}

The undergraduate program in biological engineering, leading to a Bachelor of Science degree in Biological Engineering, is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (https:// www.abet.org/). The B.S. in Biological Engineering degree is conferred by the College of Engineering and is granted after the successful completion of 128 hours of approved course work.

Diverse applications of biological engineering can be pursued through elective coursework. Each student is required to complete 12 semester hours of biological/engineering/technical electives that are relevant to their career goals. At least 3 hours must be selected from a list of acceptable biological electives. At least 3 hours must be engineering courses within

BENG or other engineering programs. The remaining hours can be selected from engineering, math, biology, agriculture, sustainability, and other science/technical areas. A list of suggested electives is maintained by the department. Students may petition their adviser to seek approval of other electives that are not on this list. Courses must provide engineering or technical content that is value-added (i.e. not duplicating or remedial) and meets the career goals of the student. Students who choose electives meeting the Environmental Concentration requirements, can earn the concentration, see the 8-Semester Plan for the B.S. in Biological Engineering with an Environmental Concentration.

Students are required to complete 40 hours of upper division courses (3000-4000 level). It is recommended that students consult with their academic adviser when making course selections.

\section*{Biological Engineering B.S.B.E. EightSemester Degree Program}

The Bachelor of Science in Biological Engineering program is eligible for students who want to participate in an Eight Semester Degree Program. See the Eight-Semester Degree Policy (p. 67) for more details. The plan below lists a semester-by-semester sequence of courses to finish the degree in eight semesters. State minimum core courses for engineering are listed at the bottom of this page. Students may submit a maximum of four (4) hours of "D" in BENG Courses for their degree.

Some courses are not offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course pre-requisites.

\section*{Courses}

BENG 2632. Biological Engineering Design Studio. 2 Hours.
Application of the engineering design process to projects involving living systems. Projects are team-based open-ended design with hands-on construction and testing of design prototypes. Emphasis is placed on understanding, quantifying and controlling complex interacting living systems involving humans, animals, plants and microbes with the goal of creating economically and ecologically sustainable systems. 4 hours of design studio per week. Pre- or Corequisite: PHYS 2054 and BIOL 1543 and BIOL 1541L, and (GNEG 1111 or GNEG 1103). (Typically offered: Fall)

\section*{BENG 2643. Biological Engineering Methods I. 3 Hours.}

Introduction to software techniques for the graphical and geo-spatial representation of processes, structures, devices, landscapes and watersheds in biological engineering. Process layout and process flow diagrams. Two-dimensional and three-dimensional scale drawings and models. Elements of engineering drawings and plans. Mapping and introduction to geographic information systems. Surface topography, digital elevation modeling, spatial land use, soils and other GIS data sources. Stream networks, watershed delineation, grade planning and introductory runoff modeling. Introductory land surveying. Geo-referencing and integrating designed hydrologic structures with GIS-based site maps. Communicating complex designed systems. Two hours of lecture plus one 3-hour lab per week. Corequisite: Lab component. Prerequisite: PHYS 2054. (Typically offered: Spring)
BENG 3113. Measurement and Control for Biological Systems. 3 Hours.
Principles of sensors, instruments, measurements, controls, and data acquisition systems, with emphasis on applications for biological systems; including basic circuit analysis, sensor calibration and hardware selection. Basic process monitoring and control methods, including hardware and software. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: PHYS 2074. (Typically offered: Spring)

BENG 3113H. Honors Measurement and Control for Biological Systems. 3 Hours.
Principles of sensors, instruments, measurements, controls, and data acquisition systems, with emphasis on applications for biological systems; including basic circuit analysis, sensor calibration and hardware selection. Basic process monitoring and control methods, including hardware and software. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: PHYS 2074 and honors candidacy. (Typically offered: Spring)
This course is equivalent to BENG 3113.
BENG 3653. Global Bio-Energy Engineering. 3 Hours.
Global energy sources with a focus on renewable energy, solar and biomass derived fuels. Biomass energy production from crops and organic residues or waste products. Conversion of biomass to usable fuels. Utilization of renewable energy in society. Includes detailed systems analyses to examine inputs, efficiencies, usable outputs and by-products. Systems design to select and integrate components which meet client needs while maximizing sustainable global impacts. Three hours of lecture per week. Pre- or Corequisite: MEEG 2403 or CHEG 2313. (Typically offered: Fall)

\section*{BENG 3663. Biological Engineering Methods II. 3 Hours.}

Modeling biological processes to predict system behavior as part of the design process. Development and use of spreadsheets and script programming code to represent biological phenomena and processes. Introduction to experimental design as applied to biological processes, including data collection and analysis, and elementary statistics. Use of engineering economics to aid comparisons of alternatives. Analysis of engineering designs and management practices to best meet the needs of society and the client in areas of sustainable water, food and energy systems. Lecture 2 hours and lab 3 hours per week. Corequisite: Lab component. Prerequisite: PHYS 2054 and MATH 2564. (Typically offered: Fall)

BENG 3723. Unit Operations in Biological Engineering. 3 Hours.
Design of basic unit operations typical of biological engineering practice; unit operations include pump-pipe, fan-duct, moist air (psychrometric) processes (cool/ heater/humidifier/dryer), air mixing, aeration, and refrigeration; unit operations design will account for unique constraints imposed by biological systems. Lecture 2 hours and lab 3 hours per week. Corequisite: Lab component. Prerequisite: (MEEG 2403 or CHEG 2313) and (CVEG 3213 or CHEG 2133 or MEEG 3503). (Typically offered: Spring)
BENG 3733. Transport Phenomena in Biological Systems. 3 Hours.
Basic principles governing transport of energy and mass. Estimating transfer of energy (heat) through solid bodies and liquid/gas boundary layers through conduction, convection, and radiation. Modeling the rates at which biological reactions occur (kinetics). Estimating the transfer of diffusing mass (gas or liquid) through solid bodies and liquid/gas boundary layers, including processes such as drying and oxygen diffusion. Three hours lecture per week. Pre- or Corequisite: (CVEG 3213 or MEEG 3503 or CHEG 2133) and MATH 2584. Prerequisite: (MEEG 2403 or CHEG 2313). (Typically offered: Fall)

\section*{BENG 4123. Biosensors \& Bioinstrumentation. 3 Hours.}

Principles of biologically based sensing elements and interfacing techniques. Design and analysis methods of biosensing and transducing components in bioinstrumentation. Applications of biosensors and bioinstrumentation in bioprocessing, bioenvironmental, biomechanical and biomedical engineering. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 2013 or BIOL 2533 and BENG 3113. (Typically offered: Spring Odd Years)

BENG 450V. Special Problems. 1-4 Hour.
Selected problems in biological engineering are pursued in detail. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 4 hours of degree credit.

\section*{BENG 451VH. Honors Thesis. 1-6 Hour.}

Honors thesis. Prerequisite: Honors candidacy. (Typically offered: Fall, Spring and Summer)

BENG 452V. Special Topics in Biological Engineering. 1-6 Hour.
Special topics in biological engineering not covered in other courses. Prerequisite: Engineering student. (Typically offered: Irregular) May be repeated for up to 8 hours of degree credit.

\section*{BENG 4663. Sustainable Biosystems Designs. 3 Hours.}

Process and methodologies associated with measuring, assessing, and designing sustainable systems in water, energy and food. Quantitatively rigorous methodology for life cycle analysis (LCA) for inventory, assessment and impact analyses. Use of other systems analyses and process control theory to evaluate and design sustainable systems. Application of the methods to a project to gain experience in defining, quantifying and utilizing sustainable metrics. Three hours of lecture per week. Prerequisite: BENG 3653. (Typically offered: Spring)

BENG 4743. Food and Bio-Product Systems Engineering. 3 Hours.
Sustainable bio-product engineering through biosystem design, analysis, modeling, control, and optimization. Life cycle phases for bio-products (food, fiber, feed, and fuel). System analysis of inputs and outputs of energy, water and mass for the purpose of producing and processing biomass for human uses. Advanced bioprocess design topics to utilize enzymes, cells, tissues and organisms to create bio-products and methods for deactivating biological agents to preserve the quality and safety of food and other bio-products. Three hours lecture per week. Pre- or corequisite: BENG 3733. Prerequisite: BENG 3723. (Typically offered: Fall)

BENG 4812. Senior Biological Engineering Design I. 2 Hours.
Initiation of comprehensive two-semester team-design projects to design processes, devices and systems to meet needs of clients in sustainable water, food and energy. Practice in following the design process, including the definition of design objectives and constraints, establishing functions and performance criteria, generating alternatives and evaluating alternatives through analysis, modeling and prototype testing; exploring relevant design considerations including performance, efficiency, costs, environmental impacts, sustainability and stewardship, safety and ethics. Developing analytic capability; and practicing design optimization to find best alternative for the client. Lecture 1 hour, laboratory 3 hours per week. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Fall)
BENG 4823. Senior Biological Engineering Design II. 3 Hours.
Completion of comprehensive two-semester team-design projects to design processes, devices and systems to meet needs of clients in sustainable water, food and energy. Focus on building of prototypes or models, system optimization, evaluation and improvement. Final design details packaged to meet the needs of the client. Interaction with appropriate persons from other disciplines. Written and oral reporting. Communications with peers, supervisor, clients and the public. Lecture 1 hour per week, two 2-hour lab periods per week. Prerequisite: BENG 4812. Corequisite: Lab component. (Typically offered: Spring)

BENG 4831. Biological Engineering Professionalism. 1 Hour.
Preparation to be job-ready, employable and successful in transition to a professional career and further study in Biological Engineering. Introduction to job and graduate study searches. Professional and ethical responsibilities; professional registration. Conflict, change and project management. Effective communications and interactions with supervisors, peers, clients, and stakeholders. Two hour discussion section per week. Prerequisite: Senior standing. (Typically offered: Fall)

BENG 4933. Sustainable Watershed Engineering. 3 Hours.
Provides students with expertise in using advanced tools in watershed monitoring, assessment, and design. Builds on core competencies in hydrology and hydraulics to allow student to evaluate water used by sector in water management regions; evaluate and quantify water demands by sector with emphasis on irrigation; develop risk-based simulations of hydrologic processes, including precipitation, evapotransportation, infiltration, runoff, and stream flow; quantify and simulate constituent loading to watersheds using GIS-based models, and understand the applications of these methods in water resource management policy. Three hours lecture per week. Prerequisite: CVEG 3223. (Typically offered: Fall)

BENG 4963. Modeling Environmental Biophysics. 3 Hours.
Interactions between the biosphere and the atmosphere. Connecting the physical environment of solar energy, wind, soil, and hydrology to the biosphere through plant ecophysiology. Boundary layer meteorology, photosynthesis and boundary layer modeling strategies, and the soil-plant-atmosphere continuum. Instrumentation, measurement and modeling strategies for understanding leaf-, landscape- and regional behaviors; and, the transfer, kinetics, and balance of momentum, energy, water vapor, CO 2 , and other atmospheric trace gases between the landscape (vegetation and soil) and the atmosphere. Applications in sustainable agriculture, irrigation, land and water resources, and modeling plant water use and carbon uptake strategies. Three hours of lecture per week. Prerequisite: MATH 2564 and (BENG 4933 or CVEG 3223). (Typically offered: Spring Even Years)
BENG 4973. Practice in Water Quality Monitoring and Analysis. 3 Hours. Application of water quality principles to a real world problem. Team project experience developing quality assurance project plans, designing monitoring systems, selecting chemical analysis methods, estimating loads, performing trend analysis, basic model calibration and validation, and technical report writing and oral presentations. Working with various clientele to analyze water quality data in the context of evaluating real-world problems and issues. Technical course intended for students in engineering, environmental sciences, agriculture and biology. Three hours of lecture per week. Prerequisite: CVEG 3213 or instructor's consent to allow interdisciplinary student teams. (Typically offered: Spring Odd Years)

\section*{Biomedical Engineering (BMEG)}

Raj Rao
Department Head
120 John A. White Jr. Engineering Hall
479-575-8610

\section*{Biomedical Engineering Website (http://biomedical-engineering.uark.edu/)}

Biomedical engineering encompasses the creation, design, and operation, of processes / technology related to the broad field of human healthcare. The profession traditionally has focused on applications related to the development of instrumentation and diagnostic equipment, discovery of novel treatment options, production of new therapeutics, and the elucidation of underlying biophysical phenomena. Newer applications of bioengineering take advantage of the ever deepening understanding of human physiology and molecular genetics, as related to prevention, detection, and treatment of medical conditions. The program objectives of the Biomedical Engineering undergraduate program are to produce graduates who are capable of:
- Succeeding in practice at the interface between life science and engineering, in other professional activities, or in post-baccalaureate studies, and
- Utilizing their engineering education/experience in creating new knowledge or enabling technologies for improvement of human health and healthcare, and
- Conducting themselves with high standards of professional ethics and integrity, and
- Being aware of the limits of their knowledge and initiate self-directed learning to create future professional opportunities for themselves in biomedical engineering.

Completion of the degree requirements provides for the following educational outcomes and ability to:
- Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- Communicate effectively with a range of audiences
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusion
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

These educational outcomes are experienced within the context of biology and physiology appropriate to solving problems at the interface of engineering and biology.

\section*{Requirements for B.S. in Biomedical Engineering}

Technical Options in Biomedical Engineering
Each student in biomedical engineering is required to complete nine semester hours of biomedical engineering technical electives. Biomedical engineering technical elective courses must be selected from a facultyapproved list of courses found in the department's Undergraduate Advising Handbook, which is available on the department's website (http:// biomedical-engineering.uark.edu/). Elective courses are chosen with the aid of an academic adviser to better prepare for employment or further study in areas such as:
- Bioengineering
- Pharmaceutical manufacturing or pharmacology
- Biomedical device design
- Medicine
- Business
- Law

\section*{Technical Elective Course}

Each student in biomedical engineering is required to complete three semester hours of upper level science electives. Upper level (3000 and above) science electives will be chosen from courses in mathematics, engineering, and the sciences with the approval of their adviser. The department maintains a list of approved upper level science electives that may be found in the department's Undergraduate Advising Handbook, which is available on the department's website (http://biomedicalengineering.uark.edu/).

\section*{Biomedical Engineering B.S.Bm.E. Eight-Semester Degree Program}

The following section contains the list of courses required for the Bachelor of Science in Biomedical Engineering degree and a suggested sequence for students who enter the College through the Freshman Engineering Program. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites. Students wishing to follow the eightsemester degree plan should see the Eight-Semester Degree Policy
(p. 67) in the Academic Regulations chapter for university requirements of the program.

\section*{Honors Program Requirements}

Students enrolled in the Honors College who are to receive the Bachelor of Science in Biomedical Engineering must complete a minimum of 12 hours of honors credit. At least 6 hours must be completed within the Biomedical Engineering program including at least 3 hours resulting in an Honors Thesis. The BMEG honors courses are acceptable as engineering electives and in some cases may be substituted for required courses.
2 The Freshman Science Elective must be chosen from either CHEM 1123/CHEM 1121L or PHYS 2074.
3 The Sophomore Science Elective must be either PHYS 2074 or CHEM 1123/CHEM 1121L. (Whichever was not chosen as the Freshman Engineering Science Elective).
4 The Fine Arts Elective courses which satisfy General Education Outcome 3.1 include: ARCH 1003, ARHS 1003, COMM 1003, DANC 1003, LARC 1003, MLIT 1003, MLIT 1003H, MLIT 1013, MLIT 1013H, MLIT 1333, THTR 1003, THTR 1013, or THTR 1013H.
5 The Social Sciences Elective courses which satisfy General Education Outcomes 3.3 and 4.1 include: ANTH 1023, COMM 1023, HDFS 1403, HDFS 2413, HIST 1113, HIST 1123, HIST 2093, HUMN 1114H, HUMN 2114H, INST 2013, INST 2813, INST 2813H, PLSC 2013, PLSC 2813, PLSC 2813H, RESM 2853, SOCI 2013, SOCI 2013H, or SOCI 2033.
6 The Social Sciences Elective courses which satisfy General Education Outcome 3.3 include: AGEC 1103, AGEC 2103, ANTH 1023, COMM 1023, ECON 2013, ECON 2023, ECON 2143, EDST 2003, HDFS 1403, HDFS 2413, HDFS 2603, HIST 1113, HIST 1113H, HIST 1123,HIST 1123H, HIST 2003, HIST 2013, HIST 2093, HUMN 1114H, HUMN 2114H, INST 2813, INST 2813H, PLSC 2003, PLSC 2013, PLSC 2203, PLSC 2813, PLSC 2813H, PSYC 2003, RESM 2853, SOCI 2013, SOCI 2013H, or SOCI 2033. Note, courses cannot be counted twice in degree requirements.
7 The Humanities Elective courses which satisfy General Education Outcomes 3.2 and 5.1 include: CLST 1003, CLST 1003H, CLST 1013, HUMN 1124H, PHIL 2003, PHIL 2003C, PHIL 2003H, PHIL 2103, or PHIL 2103C.

\section*{Biomedical Engineering Technical Electives}

Abbas, James, Ph.D., M.S. (Case Western Reserve University), Sc.B. (Brown University), Professor, 2021.
Balachandran, Kartik, Ph.D., M.S. (Georgia Institute of Technology), B.S. (National University of Singapore), Associate Professor, 2012, 2018.

Elsaadany, Mostafa, Ph.D. (University of Toledo), Teaching Assistant Professor, 2019.
Harris, Leonard, Ph.D. (Cornell University), B.S. (University of Colorado, Boulder), Assistant Professor, 2020.
Jensen, Hanna Katariina, Ph.D. (University of Oulu, Finland), Research Assistant Professor, 2015.

Jensen, Morten O., Ph.D. (University of Aarhus, Denmark), M.Sc. (Georgia Institute of Technology), Associate Professor, 2014.
Muldoon, Timothy J., M.D. (Baylor College of Medicine), Ph.D. (Rice University), B.S. (Johns Hopkins University), Associate Professor, 2012, 2018.

Nelson, Christopher, Ph.D. (Vanderbilt University), Assistant Professor, 2019.

Puvanakrishnan, Priyaveena, Ph.D. (University of Texas at Austin), Instructor, 2015.
Qian, Xianghong, Ph.D., M.Phil. (George Washington University), B.S. (Nanjing University, P.R. China), Professor, 2011, 2016.
Quinn, Kyle P., Ph.D. (University of Pennsylvania), B.S. (University of Wisconsin), Assistant Professor, 2014.
Rajaram, Narasimhan, Ph.D. (University of Texas, Austin), B.E. (Anna University, India), Assistant Professor, 2014.
Rao, Raj R., Ph.D. (University of Georgia), M.S. (University of Texas), M.Sc., B.E. (Birla Institute of Technology and Sciences, India), Professor, 2016.

Samsonraj, Rebekah M., Ph.D. (Cornell University), B.S. (University of Colorado, Boulder), Assistant Professor, 2020.
Song, Young Hye, Ph.D. (Cornell University), Assistant Professor, 2019.
Wolchok, Jeffrey Collins, Ph.D. (University of Utah), M.S., B.S.
(University of California at Davis), Associate Professor, 2011, 2017.

\section*{Courses}

BMEG 2614. Introduction to Biomedical Engineering. 4 Hours.
An introductory course for undergraduate biomedical engineering students. It covers topics such as recombinant DNA technologies, cell and tissue engineering, stem cell and organ regeneration, the biomechanics, bioinstrumentation, engineering of immunity, and bio- and medical imaging, etc. The application of nano-biotechnology in developing clinical products such as tissue engineered products, drug delivery systems, etc. will be emphasized in the course. Prerequisite: (GNEG 1321H, or GNEG 1121, or GNEG 1103), and CHEM 1103, with a grade of \(C\) or better, MATH 2554 and PHYS 2054. (Typically offered: Fall and Summer)

\section*{BMEG 2813. Biomechanical Engineering. 3 Hours.}

This course introduces basic concepts and principles of biomechanics to biomedical and other engineering students. The course topics include mechanics and materials, viscoelastic properties, bone, cartilage, ligament, tendon, muscle, cardiovascular dynamics, clinical gait analysis, etc. After taking this course, students are expected to understand the application of engineering kinetics to describe motions of human body and mechanic properties of tissues. MATLAB will be used to write and solve biomechanical static and dynamic equations. Lecture 3 hours per week. Prerequisite: BMEG 2614, CHEM 1123, MATH 2564, and PHYS 2074. (Typically offered: Spring)

BMEG 2904. Biomedical Instrumentation. 4 Hours.
This course is designed for biomedical engineering undergraduate students to learn both theoretical and practical concepts of bioinstrumentation and their applications in modern life science and medicine. Analytical experiments will be practiced in the laboratory along with the lecture section. This course covers basic topics in circuits such as charge current, voltage, resistance, power energy, linear network analysis, inductors, capacitors, operational amplifier, time-varying signals, active analog filters, bioinstrumentation design etc. The application of these principles and theories in bioinstrumentation design and development is particularly emphasized in this course. The lab section requires team work, planning, and data sharing. Corequisite: Lab component. Prerequisite: BMEG 2614, MATH 2564 and PHYS 2074. (Typically offered: Spring)

BMEG 3124. Biomedical Signals and Systems. 4 Hours.
This course will introduce students to the basics of signals - continuous and digital signals, and signal processing tools, such as filters, Laplace and Fourier transforms. The 'systems' aspect of the course will focus on physiological systems and methods to model such systems. The course will also focus on the biomedical applications of these methods through lab components. Prerequisite: BMEG 2904. (Typically offered: Fall)

\section*{BMEG 3634. Biomaterials. 4 Hours.}

Introduction to the engineering properties of materials used in biomedical devices and applications. Topics include: atomic properties, structure-property-processing relationships, bulk engineering properties, surface and interfacial properties and applications of materials in biology and medicine. All topics will be reviewed in the context of specific biomedical devices and the engineering principles involved in their design. Corequisite: Lab component. Prerequisite: BMEG 2813, CHEM 1123, and BIOL 1543 and BIOL 1541L. (Typically offered: Fall)

\section*{BMEG 3653. Biomedical Modeling and Numerical Methods. 3 Hours.}

Application of mathematical techniques to physiological systems. The emphasis will be on cellular physiology and cardiovascular system. Cellular physiology topics include models of cellular metabolism, membrane dynamics, membrane potential, excitability, wave propagation and cellular function regulation. Cardiovascular system topics include models of blood cells, oxygen transport, cardiac output, cardiac regulation, and circulation. Pre- or Corequisite: MATH 2584. Prerequisite: BMEG 2614, and (MATH 2574 or MATH 3083). (Typically offered: Spring)
BMEG 3653H. Honors Biomedical Modeling and Numerical Methods. 3 Hours. Application of mathematical techniques to physiological systems. The emphasis will be on cellular physiology and cardiovascular system. Cellular physiology topics include models of cellular metabolism, membrane dynamics, membrane potential, excitability, wave propagation and cellular function regulation. Cardiovascular system topics include models of blood cells, oxygen transport, cardiac output, cardiac regulation, and circulation. Pre- or Corequisite: MATH 2584. Prerequisite: BMEG 2614, and (MATH 2574 or MATH 3083). (Typically offered: Spring) This course is equivalent to BMEG 3653.
BMEG 3801. Clinical Observations and Needs Finding. 1 Hour.
This course involves the introduction of clinical procedures and biomedical devices and technology to biomedical engineering students. Students will tour medical facilities, clinics and hospitals and will participate in medical seminars, workshops and medical rounds. The course prepares students to successfully select and complete a project in the senior capstone course. Prerequisite: The prerequisites for BMEG students are BMEG 2813 or BMEG 2904; prerequisites for DASC students: BMEG 2614 and DASC 2594. (Typically offered: Fall and Spring)

\section*{BMEG 3824. Biomolecular Engineering. 4 Hours.}

Biomolecular Engineering is to design and produce biomolecules, especially proteins, for uses ranging from pharmaceuticals, materials, sensors, transducers, to functional interfaces with conventional engineering materials. The course begins with an introduction to the tools and techniques of molecular biology that are used for protein engineering. Additional topics include recombinant DNA techniques, biochemical kinetics, cell growth reaction and kinetics, bioreactors, membrane processes, and bioproduct purification. There is an associated laboratory with exercises related to lecture topics. Corequisite: Lab component. Prerequisite: BMEG 3634, CHEM 1123, and BIOL 2533. (Typically offered: Spring)

\section*{BMEG 3824H. Honors Biomolecular Engineering. 4 Hours.}

Biomolecular Engineering is to design and produce biomolecules, especially proteins, for uses ranging from pharmaceuticals, materials, sensors, transducers, to functional interfaces with conventional engineering materials. The course begins with an introduction to the tools and techniques of molecular biology that are used for protein engineering. Additional topics include recombinant DNA techniques, biochemical kinetics, cell growth reaction and kinetics, bioreactors, membrane processes, and bioproduct purification. There is an associated laboratory with exercises related to lecture topics. Corequisite: Lab component. Prerequisite: BMEG 3634, CHEM 1123, and BIOL 2533. (Typically offered: Spring) This course is equivalent to BMEG 3824.

\section*{BMEG 3913. Biofluid Mechanics. 3 Hours.}

Introduction to fundamental concepts and applications of fluid dynamics from a biological and physiological perspective. Topics include physical properties of fluids, fluid statics, manometers, streamlines and the Bernoulli relation, velocity and acceleration fields, viscous flow and the Navier-Stokes equations, flows in pipes and over submerged surfaces, properties of blood and other physiological fluids, transport models in the lungs, lymph, blood, and artificial organs, and computational fluid dynamics (CFD) simulations. Prerequisite: MATH 2584, PHYS 2074, and BMEG 2614. (Typically offered: Fall)

\section*{BMEG 4213. Tissue Mechanics. 3 Hours.}

The purpose of this course is to introduce students to non-linear biomechanics of soft tissues such as skin, bladder, blood vessels, and the brain. Topics covered: Tissue mechanics: continuum biomechanics, tensor analysis, kinematics of continua, balance laws. Governing physics of mechanics as applied to soft tissues. Various constitutive relations will be discussed: linear elastic, hyperelastic, viscoelastic, poroelastic, and inelastic materials with internal variables. Cannot receive credit for both BMEG 4213 and BMEG 5213. Prerequisite: BMEG 2813, BMEG major and Senior standing. (Typically offered: Irregular)

BMEG 4243. Advanced Biomaterials and Biocompatibility. 3 Hours.
From Absorbable sutures to Zirconium alloy hip implants, biomaterials science influences nearly every aspect of medicine. This course focuses on the study of different classes of biomaterials and their interactions with human tissues. Topics include: biocompatibility; biofouling; hemocompatibility; wound healing response; foreign body response; design of orthopedic, dental and cardiovascular implants; opthalmological and dermatological materials; degradable polymers for drug delivery; nanobiomaterials; smart biomaterials and the regulation of devices and materials by the FDA. Pre- or Corequisite: BMEG 4623. Prerequisite: BMEG 3634. (Typically offered: Irregular)

BMEG 4253. Biologics: Next Generation Therapeutics and Their Purification. 3 Hours.
The course focuses on the production and purification of biologics including monoclonal antibodies, viral vectors, nucleic acids and other biotherapeutics. In particular, the course will focus on the fundamental thermodynamics principles as well as kinetic limitations involved in upstream harvesting and downstream purification. Applications of PCR, mass spectroscopy, electrophoresis, imaging and modeling tools during the production and purification of biologics will be discussed. (Typically offered: Irregular)

\section*{BMEG 4403. Biomedical Microscopy. 3 Hours.}

An advanced course covering light microscopy techniques, conjugate image planes, principles of contrast, fluorescence imaging, confocal and multi-photon microscopy, electron microscopy, atomic force microscopy, image reconstruction and digital image processing with supporting units in tissue culture and histology. Prerequisite: The prerequisites for BMEG students are BMEG 2904, PHYS 2074, BMEG major and Senior standing; prerequisites for DASC students: BMEG 2614, PHYS 2054 and DASC 2113. (Typically offered: Irregular)

\section*{BMEG 4413. Tissue Engineering. 3 Hours.}

This course introduces Tissue Engineering approaches at genetic and molecular, cellular, tissue, and organ levels. Topics include cell and tissue in vitro expansion, tissue organization, signaling molecules, stem cell and stem cell differentiation, organ regeneration, biomaterial and matrix for tissue engineering, bioreactor design for cell and tissue culture, dynamic and transportation in cell and tissue cultures, clinical implementation of tissue engineered products, and tissue-engineered devices. Prerequisite: BMEG 3824 and BIOL 2533. (Typically offered: Irregular)

\section*{BMEG 450VH. Honors Thesis. 1-4 Hour.}

Provides Biomedical Engineering students an opportunity to explore a topic in depth through an independent research or design project. Prerequisite: Honors standing. (Typically offered: Spring and Summer) May be repeated for degree credit.

\section*{BMEG 4513. Biomedical Optics and Imaging. 3 Hours.}

This course will provide students with a fundamental understanding of various biomedical imaging modalities. Topics will include: Basics of light-tissue interaction - absorption, fluorescence, elastic and inelastic scattering; Computational and analytical models of light propagation to quantify tissue optical properties; Optical imaging techniques spectroscopy, tomography, and laser speckle with potential clinical applications; and Clinical imaging modalities and recent advances Xray, Magnetic Resonance Imaging (MRI), Positron Emission Tomography (PET), Computed Tomography (CT), Ultrasound imaging, and Photoacoustic imaging. At the end of this course, students should have a good understanding of optical imaging, spectroscopy, and non-optical imaging modalities, specific anatomical sites that they are best suited for, and the trade-offs between imaging depth and resolution. Students may not receive credit for both BMEG 4513 and BMEG 5513. Prerequisite: The prerequisites for BMEG students are BMEG 2904 and senior standing; prerequisites for DASC students: BMEG 2614, PHYS 2054 and DASC 2113 and senior standing. (Typically offered: Irregular)

BMEG 4523. Biomedical Data and Image Analysis. 3 Hours.
This course focuses on an introduction to image processing and analysis for applications in biomedical research. After a review of basic MATLAB usage, students will learn fundamental tools for processing and analyzing data from a variety of subdisciplines within biomedical engineering. Topics include: filtering, thresholding, segmentation, morphological processing, and image registration. Through exercises involving 1D, 2D, and 3D data, students will develop problemsolving skills and a knowledge base in MATLAB required for customized quantitative data analysis. Students may not receive credit for both BMEG 4523 and BMEG 5523. Prerequisite: The prerequisites for BMEG students are BMEG 3124 and BMEG 3653; prerequisites for DASC students: BMEG 2614, PHYS 2054 and DASC 3203. (Typically offered: Irregular)

BMEG 4593. Biomedical Innovations for Global Impact. 3 Hours.
This course focuses on specific problems triggered or exacerbated by selected global health care challenges. Acknowledging the interdependence of our world, where the well-being of one individual is intrinsically connected to the well-being of the entire ecosystem, the course connects participating students with a global and local network of students, faculty, community partners, and mentors, and invite them to develop solutions to some of these health care challenges. Pre- or corequisite: Junior Level Standing. (Typically offered: Fall)
This course is cross-listed with SEVI 4333.
BMEG 460V. Individual Study. 1-6 Hour.
Individual study and research of a topic mutually agreeable to the student and faculty member. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

BMEG 460VH. Honors Individual Study. 1-6 Hour.
Individual study and research of a topic mutually agreeable to the student and faculty member. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
This course is equivalent to BMEG 460V.

\section*{BMEG 4623. Biomedical Transport Phenomena. 3 Hours.}

An introduction to the modeling of complex biological systems using principles of transport phenomena and biochemical kinetics. This course will cover molecular transport due to velocity, concentration and thermal gradients. Topics include the conservation relations; rheology of Newtonian and non-Newtonian physiological fluids; regulation of blood flow; steady and transient diffusion in reacting systems; dimensional analysis; transport processes in disease pathology. Prerequisite: BMEG 3653, CHEG 2133 or MEEG 3503, CHEG 2313 or MEEG 2403, and MATH 2584. (Typically offered: Fall)

\section*{BMEG 4623H. Honors Biomedical Transport Phenomena. 3 Hours.}

An introduction to the modeling of complex biological systems using principles of transport phenomena and biochemical kinetics. This course will cover molecular transport due to velocity, concentration and thermal gradients. Topics include the conservation relations; rheology of Newtonian and non-Newtonian physiological fluids; regulation of blood flow; steady and transient diffusion in reacting systems; dimensional analysis; transport processes in disease pathology. Prerequisite: BMEG 3653, CHEG 2133 or MEEG 3503, CHEG 2313 or MEEG 2403, and MATH 2584. (Typically offered: Fall)
This course is equivalent to BMEG 4623.
BMEG 470V. Special Topics in Biomedical Engineering. 1-4 Hour.
Consideration of current biomedical engineering topics not covered in other courses. Prerequisite: Senior standing. (Typically offered: Irregular) May be repeated for degree credit.

\section*{BMEG 4713. Cardiovascular Physiology and Devices. 3 Hours.}

Understanding etymology of disease while creating solutions and dedicated devices is the primary focus of biomedical engineering. This course describes an interdisciplinary approach of the clinical and engineering worlds to develop devices for treating cardiovascular disease. The first part of the course will be a thorough review of the relevant anatomic and physiological considerations important for developing devices. Understanding these considerations from an engineering perspective to inform device development will be the second part of the course. Students may not receive credit for both BMEG 4713 and BMEG 5713. Prerequisite: CHEG 2133 or MEEG 3503, and BIOL 2213. (Typically offered: Irregular)

\section*{BMEG 4813. Biomedical Engineering Design I. 3 Hours.}

This is part one of a two-semester course that introduces students to the basic concepts of design from a biomedical engineering perspective. Groups are organized into teams of 4-5 members. The students put together a development plan and complete an initial prototype. Students will design what is to be fabricated and tested as a medical device or software following design process and product design specification guidelines. Corequisite: Lab component. Pre- or Corequisite: BMEG 4623 and BMEG 2904. (Typically offered: Fall)

\section*{BMEG 4823. Biomedical Engineering Design II. 3 Hours.}

This is part two of a two-semester course that introduces students to the basic concepts of design from a biomedical engineering perspective. Groups are organized into teams of 4-5 members. The students put together a development plan and complete an initial prototype. Students will design what is to be fabricated and tested as a medical device or software following design process and product design specification guidelines. Corequisite: Lab component. Prerequisite: BMEG 4813. (Typically offered: Spring)

BMEG 4903. Entrepreneurial Bioengineering. 3 Hours.
The course introduces entrepreneurship, business model canvas, and lean startup principles to the students with a focus on medical device customer discovery and technology commercialization. Degree credit will not be awarded for both BMEG 4903 and BMEG 5903. Prerequisite: The prerequisite for BMEG students is BMEG 2904; prerequisites for DASC students: BMEG 2614 and DASC 2594. (Typically offered: Irregular)

\section*{BMEG 4973. Regenerative Medicine. 3 Hours.}

This is an advanced course focusing on tissue engineering and regenerative medicine. Topics include stem cell tissue engineering, cell signaling, transport and kinetics, biomaterials and scaffolds, surface interactions, viral and nonviral-based gene delivery, tissue engineered organs, organ transplantation, nanomedicine, cell replacement therapy, and organ regenerative therapy. Technologies used to grow clinical relevant cells and tissues in lab will also be discussed in this course. Pre- or Corequisite: Senior standing. (Typically offered: Irregular)
BMEG 4983. Genome Engineering and Synthetic Biology. 3 Hours. Genome Engineering and Synthetic Biology examines contemporary topics in genome engineering and synthetic biology and will be taught using a "journal club" style lecture format. This course covers a broad range of topics in synthetic biology and genome engineering using recently published literature and publicly available data and software and includes an ethics discussion at course end. Prerequisite: BMEG 3653 or DASC 3213. (Typically offered: Fall and Spring)

\section*{Civil Engineering (CVEG)}

Micah Hale
Head of the Department
4190 Bell Engineering Center
479-575-4954
Department of Civil Engineering Website (https://civilengineering.uark.edu/)

Civil engineering is the oldest of all engineering fields, yet it is as contemporary as the need to provide solutions to today's environmental, geotechnical, structural and transportation problems. The civil engineer plans, designs, builds, and operates projects for the advancement and well-being of society while coordinating and conserving human and natural resources. Civil engineering projects range from small to monumental and include public water systems, buildings, bridges, rail and highway networks, water and wastewater treatment plants, solid and hazardous waste disposal facilities, airports, and soil conservation and flood diversion controls.

The civil engineering profession offers a vast array of opportunities. Civil engineers may work in private employment or with public agencies. They may work indoors in activities such as planning and design, or outdoors in areas such as construction supervision. Employment is possible anywhere in the world.

The objective of the Civil Engineering undergraduate program is to produce graduates who are prepared to pursue:
- Careers in the broad field of civil engineering
- Licensure as a professional engineer
- Advanced education

To fulfill this objective, all students must take courses in geotechnical, environmental, transportation, and structural engineering. Courses are designed to present "real world" applications without sacrificing conceptual and theoretical basics. Students complete design problems in each of these areas; and, as part of the senior year, they participate in two major design projects.

Completion of degree requirements provides graduates with the following learning outcomes:
- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- An ability to communicate effectively with a range of audiences
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

\section*{Requirements for B.S. in Civil Engineering Elective Courses}

Students must select three 3-hour civil engineering elective courses in conference with their adviser. Normally, the civil engineering courses are selected from among the 4000-level elective CVEG courses. Exceptional students may be allowed to choose from the 5000 (graduate-level) course series.

Students must also choose one elective course in science, engineering, technology, or math (STEM) field.

Humanities and social science electives are selected from courses approved by the university which satisfy the University General Education Curriculum and the Arkansas State Minimum Core requirements.

Students are required to complete 40 hours of upper division courses (3000-4000 level). It is recommended that students consult with their adviser when making course selections.

\section*{Civil Engineering Design Electives}

Students must complete two of the following four CVEG design project electives: CVEG 4812 Environmental Design Project, CVEG 4822 Geotechnical Design Project, CVEG 4832 Structural Design Project, and CVEG 4842 Transportation Design Project. Each design project elective is associated with a specific design-oriented course. The associated course must be taken at the same time as the design project elective. The associated courses may be taken alone but the design electives cannot.

\section*{STEM Electives}

Students must also choose one elective course in science, engineering, technology, or math (STEM) from among the following:
\begin{tabular}{lll} 
CSCE 2004 & Programming Foundations I & 4 \\
ELEG 3903 & Electric Circuits and Machines & 3 \\
GNEG 3113 & Special Topics-Study Abroad & 3 \\
GNEG 3811 & Alternating Cooperative Education (must get 3 & 1 \\
MEEG 2013 & Deparate rotations) & 3 \\
MEEG 2403 & Thermodynamics & 3 \\
MEEG 2703 & Computer Methods in Mechanical Engineering & 3 \\
GEOS 3023 & Introduction to Cartography & 3
\end{tabular}
\begin{tabular}{lll} 
GEOS 3543 & Geospatial Applications and Information Science & 3 \\
GEOS 4533 & Introduction to Petroleum Geophysics & 3 \\
MATH 3083 & Linear Algebra & 3 \\
MATH 4363 & Numerical Analysis & 3 \\
Any 3000-level or above science, technology, engineering or math & 3
\end{tabular}
course. (It is recommended that students consult with their adviser when making this selection.)

\section*{Civil Engineering B.S.C.E. Eight-Semester Degree Program}

The Civil Engineering B.S.C.E. program is eligible for freshman students who want to participate in an Eight-Semester Degree Program. See the Eight-Semester Degree Policy (p. 67) for details of the program.

The following section contains the list of courses required for the Bachelor of Science in Civil Engineering degree and a suggested sequence. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites.

See the list of state minimum core (p. 81) courses available for engineering students.

General Education Outcomes 3.2 and 5.1) \({ }^{5}\)
Social Sciences Elective (select one course to
satisfy General Education Outcome 3.3) \({ }^{6}\)
CVEG 4513 Construction Management
Civil Engineering Design Elective (Satisfies
General Education Outcome 6.1)
CVEG 4243 Environmental Engineering Design Civil Engineering Electives \({ }^{4}\)

Social Sciences Elective (select one course to satisfy General Education Outcome 3.3) \({ }^{6}\) Year Total: 17 17

\section*{Total Units in Sequence:}
\({ }^{1}\) Students have demonstrated successful completion of the learning indicators identified for learning outcome 2.1, by meeting the prerequisites for MATH 2554.
2 The Fine Arts Elective courses which satisfy General Education Outcome 3.1 include: ARCH 1003, ARHS 1003, COMM 1003, DANC 1003, LARC 1003, MLIT 1003, MLIT 1003H, MLIT 1013, MLIT 1013H, MLIT 1333, THTR 1003, THTR 1013, or THTR 1013H.
\({ }^{3}\) The Social Sciences Elective courses which satisfy General Education Outcomes 3.3 and 4.1 include: ANTH 1023, COMM 1023, HDFS 1403, HDFS 2413, HIST 1113, HIST 1123, HIST 2093, HUMN 1114H, HUMN 2114H, INST 2013, INST 2813, INST 2813H, PLSC 2013, PLSC 2813, PLSC 2813H, RESM 2853, SOCI 2013, SOCI 2013H, or SOCI 2033.
\({ }^{4}\) See the elective list among the program requirements.
5 The Humanities Elective courses which satisfy General Education Outcomes 3.2 and 5.1 include: CLST 1003, CLST 1003H, CLST 1013, HUMN 1124H, PHIL 2003, PHIL 2003C, PHIL 2003H, PHIL 2103, or PHIL 2103C.
\({ }^{6}\) The Social Sciences Elective courses which satisfy General Education Outcome 3.3 include: AGEC 1103, AGEC 2103, ANTH 1023, COMM 1023, ECON 2013, ECON 2023, ECON 2143, EDST 2003, HDFS 1403, HDFS 2413, HDFS 2603, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2003, HIST 2013, HIST 2093, HUMN 1114H, HUMN 2114H, INST 2013, INST 2813, INST 2813H, PLSC 2003, PLSC 2013, PLSC 2203, PLSC 2813, PLSC 2813H, PSYC 2003, RESM 2853, SOCI 2013, SOCI 2013H, SOCI 2033. Note, courses cannot be counted twice in degree requirements.
\({ }^{7}\) Chose one from the list below:
PHYS 2074, GEOS 3514, BIOL 1543 and BIOL 1541L, BIOL 2013 and BIOL 2011L, or
CHEM 1123 and CHEM 1121L.

\section*{Honors Program Requirements}

Students enrolled in the Honors College who are to receive the Bachelor of Science in Civil Engineering must complete a minimum of 12 hours of honors credit. At least 6 hours must be completed within the Civil Engineering program including at least 3 hours resulting in an Honors Thesis. The CVEG honors courses are acceptable as engineering electives and in some cases may be substituted for required courses. The following Civil Engineering courses are offered for honors credit: CVEG 491VH Honors Studies in Geotechnical Engineering, CVEG 492VH , CVEG 493VH Honors Studies in Structural Engineering, CVEG 494VH Honors Studies in Transportation Engineering, and CVEG 4983H Honors Undergraduate Thesis.

\section*{Adjunct Faculty}

Circo, Carl J., J.D., B.A. (University of Nebraska), Professor, School of Law, 2003, 2010.

\section*{Courses}

CVEG 2002. Introduction to Civil Engineering Plans and CADD. 2 Hours.
Development and preparation of design and construction plans; plan terminology and features; introduction to computer-aided drafting and design (CADD) software. Corequisite: Drill component. Prerequisite: Civil Engineering major or departmental consent. (Typically offered: Fall, Spring and Summer)
CVEG 2013. Civil Engineering Mechanics I. 3 Hours.
CVEG 2013 provides the student with a foundation in the theory and principles of statics for use in subsequent civil engineering courses. The course applies mathematics and physics to solve practical problems of structural systems. Corequisite: MATH 2574. Prerequisite: MATH 2564 and PHYS 2054. (Typically offered: Fall and Spring)

\section*{CVEG 2023. Civil Engineering Mechanics II. 3 Hours.}

CVEG 2023 provides the student with a foundation in the theory and principles of mechanics of materials for use in subsequent civil engineering courses. This course applies mathematics and physics to solve problems in mechanics. Prerequisite: CVEG 2013 or MEEG 2003. (Typically offered: Fall and Spring)
CVEG 2051L. Surveying Systems Laboratory. 1 Hour.
Laboratory exercises demonstrating the principles and practices of surveying systems. Corequisite: CVEG 2053. (Typically offered: Fall)

\section*{CVEG 2053. Surveying Systems. 3 Hours.}

Coordinate geometry, measurements, and total integrated surveying systems; total stations, electronic data collection, and reduction; error analysis; applications to civil engineering and surveying practice. Corequisite: CVEG 2051L. Prerequisite: MATH 2554 or MATH 2445. (Typically offered: Fall)
CVEG 2113. Structural Materials. 3 Hours.
Production, properties, behavior, and structural applications of concrete, steel, timber, masonry, and plastic. Statistical analysis methods for quality control are also covered. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: MEEG 2003 or CVEG 2013. Pre- or Corequisite: MEEG 3013 or CVEG 2023. (Typically offered: Fall and Spring)

CVEG 2851. Engineering Professional Practice Issues. 1 Hour.
Study of various issues related to the professional practice of engineering including ethics, professionalism, professional licensure, project procurement, social and political issues, globalism, and other legal issues. (Typically offered: Fall and Spring)
CVEG 3131L. Soil Mechanics Laboratory. 1 Hour.
Index, strength, and consolidation properties of soils; test methods and specifications for soil sampling and testing. Corequisite: CVEG 3132. (Typically offered: Fall and Spring)
CVEG 3132. Soil Mechanics. 2 Hours.
Introduction to geotechnical engineering. Properties of soils related to foundations, retaining walls, earth structures, and highways. Lecture 2 hours, laboratory 3 hours per week. Corequisite: CVEG 3131L. Pre- or Corequisite: CVEG 3213 and MATH 2584. Prerequisite: (MEEG 3013 or CVEG 2023) and GEOS 1113 and CVEG 2002. (Typically offered: Fall and Spring)
CVEG 3213. Hydraulics. 3 Hours.
Study of incompressible fluids. Topics include fluid properties, fluid statics, continuity, energy and hydraulic gradients, fundamentals of flow in pipes and open channels, flow measurement devices, pump selection and analysis. Corequisite: Lab component. Prerequisite: CVEG 2013 or MEEG 2003. (Typically offered: Fall and Spring)

\section*{CVEG 3223. Hydrology. 3 Hours.}

Flood routing procedures in storage reservoirs and channels. Hydrologic planning including storage reservoir design, frequency duration analysis, and related techniques. Prerequisite: (CVEG 2053 or BENG 2643), (CVEG 3213 or MEEG 3503 or CHEG 2133). (Typically offered: Fall and Spring)

\section*{CVEG 3243. Environmental Engineering. 3 Hours.}

Introduction to theories and fundamentals of physical, chemical, and biological processes with emphasis on water supply and wastewater collection, transportation, and treatment. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: MATH 2584 and CHEM 1103. (Typically offered: Fall and Spring)
CVEG 3303. Structural Analysis. 3 Hours.
Truss analysis, influence lines for beams and frames, and effects of moving loads. Deformation of beams, frames, and trusses. Analysis of indeterminate structures by moment area, slope deflection, and moment distribution methods; approximate methods of analysis. Lecture 3 hours, drill 3 hours per week. Corequisite: Drill component. Prerequisite: MEEG 3013 or CVEG 2023. (Typically offered: Fall and Spring)

\section*{CVEG 3413. Transportation Systems Engineering. 3 Hours.}

Transportation Systems Engineering: Introduction to transportation systems engineering and planning. Includes the following topics: transportation governance, financing, and the effect on the environment; traffic flow theory; safety; traffic operations and control; capacity; and travel demand modeling. Prerequisite: CVEG 2053 and (INEG 2314 or INEG 3313). (Typically offered: Fall)

CVEG 4143. Foundation Engineering. 3 Hours.
Analysis and design of retaining walls, footings, sheet piles, and piles. Determination of foundation settlements in sand and clay. Prerequisite: CVEG 3132 and INEG 2413. (Typically offered: Fall and Spring)
CVEG 4203. Environmental Regulations and Permits. 3 Hours.
Topics include federal and state environmental regulations, the permitting process, permit requirements and related issues. Prerequisite: CVEG 3243 and senior standing. (Typically offered: Fall)

CVEG 4243. Environmental Engineering Design. 3 Hours.
Application of physical, biological, and chemical operations and processes to the design of water supply and wastewater treatment systems. Prerequisite: CVEG 3243 and INEG 2413. (Typically offered: Spring)
CVEG 4263. Air Pollution Control. 3 Hours.
Fundamentals of air pollution causes, effects, and measurements; as well as, control methods with application to current industrial problems. Prerequisite: CVEG 3213 or MEEG 3503. (Typically offered: Spring)
CVEG 4273. Open Channel Flow. 3 Hours.
Open Channel Flow includes advanced open channel hydraulics, flow measurement techniques, a hydrology review, culvert and storm drainage design, natural channel classification (fluvial geomorphology) and rehabilitation, computer methods and environmental issues. Prerequisite: CVEG 3213 and CVEG 3223. (Typically offered: Spring)

\section*{CVEG 4303. Reinforced Concrete Design I. 3 Hours.}

Design of reinforced concrete elements with emphasis on ultimate strength design supplemented by working stress design for deflection and crack analysis. Prerequisite: CVEG 2113 and CVEG 3303. (Typically offered: Fall and Spring)

\section*{CVEG 4313. Structural Steel Design I. 3 Hours.}

Design of structural steel elements by elastic design the Load and Resistance Factor Design method. Intensive treatment of tension members, beams, columns, and connections. Pre- or Corequisite: CVEG 2113. Prerequisite: CVEG 3303. (Typically offered: Fall and Spring)

CVEG 4323. Structural Loadings. 3 Hours.
Theoretical background to and practical code requirements for various structural loadings. These include dead loads, occupancy loads, roof loads and ponding, snow loads, granular loads, vehicular loads, wind loading, and seismic loads. Prerequisite: CVEG 3303, INEG 2413 and (CVEG 4303 or CVEG 4313). (Typically offered: Spring)

CVEG 4343. Reinforced Masonry Design. 3 Hours.
Properties of masonry materials and assemblages. Masonry workmanship and quality control. Design of reinforced masonry elements against gravity and lateral loads. Design of masonry connections and joints. Application to 1- and 2-story buildings. Prerequisite: CVEG 4303. (Typically offered: Irregular)

\section*{CVEG 4353. Timber Design. 3 Hours.}

Selection of timber beams, columns, and beam-columns. Physical properties of wood, analysis and design of timber connections. Truss design, glulam members, timber bridge design, treatment for decay, and fire protection. Pre- or Corequisite: CVEG 2113. Prerequisite: CVEG 3303. (Typically offered: Irregular)
CVEG 4413. Pavement Evaluation and Rehabilitation. 3 Hours.
Introduction of concepts and procedures for pavement condition surveys; evaluation by nondestructive and destructive testing; maintenance strategies; rehabilitation of pavement systems for highway and airfields; pavement management systems. Prerequisite: CVEG 4433. (Typically offered: Irregular)
CVEG 4423. Transportation Infrastructure. 3 Hours.
Transportation infrastructure includes discussion on the geometric design of roadways, roadway drainage, roadway materials, roadway structural design, and an economic analysis of roadways. This includes the design of horizontal and vertical alignment, cross section, intersections, pavement materials, and structural capacity. Prerequisite: CVEG 3413 and INEG 2413. (Typically offered: Fall and Spring)

\section*{CVEG 4433. Transportation Pavements and Materials. 3 Hours.}

Study of the engineering properties and behavior of materials commonly used in transportation facilities as they relate to the design and performance of flexible and rigid pavement systems. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CVEG 3132, CVEG 3413, and (INEG 2314 or INEG 3313). (Typically offered: Irregular)

\section*{CVEG 4513. Construction Management. 3 Hours.}

Introduction to methods and procedures for management of civil engineering construction projects including organization, plans and specs, cost estimating and bidding, project planning and finance, quality control/ assurance, construction safety, cost management, labor issues, change orders, and subcontractor issues. Prerequisite: Senior standing and Civil Engineering majors only. (Typically offered: Fall and Spring)

\section*{CVEG 4812. Environmental Design Project. 2 Hours.}

Comprehensive engineering design project primarily related to environmental issues. Corequisite: CVEG 4243. (Typically offered: Spring)

\section*{CVEG 4822. Geotechnical Design Project. 2 Hours.}

Comprehensive engineering design project primarily related to geotechnical issues. Corequisite: CVEG 4143. Prerequisite: CVEG 4303. (Typically offered: Fall)

\section*{CVEG 4832. Structural Design Project. 2 Hours.}

Comprehensive engineering design project primarily related to structural issues. Corequisite: CVEG 4323. Prerequisite: CVEG 4303 and CVEG 4313. (Typically offered: Spring)

CVEG 4842. Transportation Design Project. 2 Hours.
Comprehensive engineering design project primarily related to transportation issues. Corequisite: CVEG 4423. Prerequisite: CVEG 2002. (Typically offered: Fall)

\section*{CVEG 4863. Sustainability in Civil Engineering. 3 Hours.}

Qualify and quantify the economic, environmental, societal, and engineering drivers behind sustainability in Civil Engineering. Justification of the feasibility and benefits of sustainability in environmental, geotechnical, structural, and transportation engineering through verbal and written communications. Prerequisite: Senior standing. (Typically offered: Irregular)

CVEG 488V. Special Problems. 1-6 Hour.
Special problems. Prerequisite: Senior standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CVEG 4890. Fundamentals of Engineering Seminar. 0 Hours.
Preparation for students taking the Fundamentals of Engineering (FE) examination, administered by the National Council of Examiners for Engineering and Surveying (NCEES). Concept review and problem-solving drills for topics covered on the FE-Civil examination. Prerequisite: Civil Engineering major and senior standing. (Typically offered: Fall and Spring)

CVEG 491VH. Honors Studies in Geotechnical Engineering. 1-6 Hour.
The study of advanced topics in the geotechnical engineering field. May include participation in geotechnical engineering courses normally available only to graduate students. Prerequisite: CVEG 3132 with a grade of C or better. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
CVEG 493VH. Honors Studies in Structural Engineering. 1-6 Hour.
The study of advanced topics in the structural engineering field. May include participation in structural engineering courses normally available only to graduate students. Prerequisite: CVEG 3303 with a grade of C or better. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CVEG 494VH. Honors Studies in Transportation Engineering. 1-6 Hour.
The study of advanced topics in the transportation engineering field. May include participation in transportation engineering courses normally available only to graduate students. Prerequisite: CVEG 3413 with a grade of \(C\) or better. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
CVEG 4983H. Honors Undergraduate Thesis. 3 Hours.
Thesis research for civil engineering students enrolled in the honors college. Prerequisite: Honors College. (Typically offered: Irregular)

\section*{Computer Science and Computer Engineering (CSCE)}

\section*{Jia Di}

Head of the Department
504 J.B. Hunt Center for Academic Excellence
479-575-5728
Department of Computer Science and Computer Engineering Website (https://computer-science-and-computer-engineering.uark.edu/)

The faculty of the Computer Science and Computer Engineering Department is engaged in multidisciplinary academic research, course offerings, and student projects in areas such as: networking, data security, low power chip design, Web search, embedded systems, and graphics.

The educational objectives of the department are to produce graduates who are recruited in a competitive market and make valuable contributions to a wide variety of industries, particularly in computer and information technology; succeed in graduate or professional studies; pursue life-long learning and continued professional development; and undertake leadership roles in their profession, in their communities, and in the global society.

\section*{Accreditations}

The B.S. in Computer Engineering is accredited by the Engineering Accreditation Commission of ABET, www. abet.org (https:// www.abet.org/). The B.S. in Computer Science is accredited by the Computing Accreditation Commission of ABET, www.abet.org (https:// www.abet.org/).

\section*{Requirements for B.S. in Computer Engineering}

The computer engineering degree has required sequences of courses in both hardware and software aspects of computer applications and design. Since almost all of today's complex systems encompass hardware and software elements, computer engineering graduates must acquire the skills required to design, build, and test complex digital systems. At the advanced level, students are exposed to hands-on experience with openended problems with opportunities for research and design.

The Bachelor of Science in Computer Engineering program culminates in a capstone project completed in two consecutive semesters. In the first semester, students form teams and develop a project proposal. In the second semester, students develop, implement, and present the final project.

\section*{Computer Engineering B.S.Cmp.E. EightSemester Degree Program}

The following sections contain the list of courses required for the Bachelor of Science in Computer Engineering (B.S.Cmp.E.) with a suggested sequence below.

Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites. Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 67) in the Academic Regulations chapter for university requirements of the program.

\({ }^{1}\) Students have demonstrated successful completion of the learning indicators identified for learning outcome 2.1, by meeting the prerequisites for MATH 2554.
2 The Social Sciences Elective courses which satisfy General Education Outcomes 3.3 and 4.1 include: ANTH 1023, COMM 1023, HDFS 1403, HDFS 2413, HIST 1113, HIST 1113H, HIST 1123, HIST 2093, HUMN 1114H, HUMN 2114H, INST 2013, INST 2813, INST 2813H, PLSC 2013, PLSC 2813, PLSC 2813H, RESM 2853, SOCI 2013, SOCI 2013H, or SOCI 2033.
\({ }^{3}\) The Social Sciences Elective courses which satisfy General Education Outcome 3.3 include: AGEC 1103, AGEC 2103, ANTH 1023, COMM 1023, ECON 2013, ECON 2023, ECON 2143, EDST 2003, HDFS 1403, HDFS 2413, HDFS 2603, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2003, HIST 2013, HIST 2093, HUMN 1114H, HUMN 2114H, INST 2013, INST 2813, INST 2813H, PLSC 2003, PLSC 2013, PLSC 2203, PLSC 2813, PLSC 2813H, PSYC 2003, RESM 2853, SOCI 2013, SOCI 2013H, SOCI 2033. Note, courses cannot be counted twice in degree requirements.
\({ }^{4}\) Student may petition to take the two-course sequence, STAT 3013 and STAT 3113, instead of INEG 3313.
\({ }^{5}\) The Fine Arts Elective courses which satisfy General Education Outcome 3.1 include: ARCH 1003, ARHS 1003, COMM 1003, DANC 1003, LARC 1003, MLIT 1003, MLIT 1003H, MLIT 1013, MLIT 1013H, MLIT 1333, THTR 1003, THTR 1013, or THTR 1013H.

\section*{Program Educational Objectives}

For the B.S. degree program in computer engineering, the following set of program educational objectives describe what graduates are expected to attain within a few years after graduation.
Computer Engineering graduates will:
1. Be able to practice their profession in a competitive market. The competitive market includes being recruited by industrial firms, government agencies and graduate schools.
2. Make a significant contribution to society, including improving the standard of living particularly for the taxpayers of the state of Arkansas.
3. Understand the need for life-long learning and continued professional development for a successful and rewarding career.
4. Accept responsibility for leadership roles, in their profession, communities, and society.

\section*{Student Learning Outcomes}
- CE1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- CE2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- CE3. An ability to communicate effectively with a range of audiences.
- CE4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- CE5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- CE6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- CE7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

\section*{Requirements for B.S.Cmp.E. with Cybersecurity Concentration}

The computer engineering degree has required sequences of courses in both hardware and software aspects of computer applications and design. Since almost all of today's complex systems encompass hardware and software elements, computer engineering graduates must acquire the skills required to design, build, and test complex digital systems. At the advanced level, students are exposed to hands-on experience with openended problems with opportunities for research and design.

The Bachelor of Science in Computer Engineering program culminates in a capstone project completed in two consecutive semesters. In the first semester, students form teams and develop a project proposal. In the second semester, students develop, implement, and present the final project.

\section*{Additional Requirements for the Cybersecurity Concentration:}

The requirements for the Computer Engineering degree with Cybersecurity Concentration include completing the B.S. in Computer Engineering requirements and 9 semester credit hours in the area of cybersecurity. Courses satisfying the cybersecurity topics are listed below.

Choose three courses from the following list of CSCE Cybersecurity 9 Electives:
\begin{tabular}{ll} 
CSCE 4433 & Cryptography \\
CSCE 4753 & Computer Networks \\
CSCE 4783 & Cloud Computing and Security \\
CSCE 4853 & Information Security
\end{tabular}

\section*{Computer Engineering with Cybersecurity Concentration}

\section*{Eight-Semester Degree Program}

The following sections contain the list of courses required for the Bachelor of Science in Computer Engineering: Cybersecurity Concentration with a suggested sequence below.

Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites. Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 67) in the Academic Regulations chapter for university requirements of the program.

\({ }^{5}\) Student may petition to take the two-course sequence, STAT 3013 and STAT 3113, instead of INEG 3313.

\section*{Program Educational Objectives}

For the B.S. degree program in computer science, the following set of program educational objectives describe what graduates are expected to attain within a few years after graduation.

Computer Science graduates will:
1. Enhance Arkansas' and the nation's information technology industry.
2. Engage in advanced study of Computer Science and other fields, including engineering, law, medicine, and business.
3. Possess a sufficiently broad education to be inquisitive, well-informed reasoning members of their profession and society.
4. Understand human, social and ethical issues so that they will be good employees or employers, citizens and neighbors.

\section*{Student Learning Outcomes}
- CS1. An ability to analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- CS2. An ability to design, implement, and evaluate a computingbased solution to meet a given set of computing requirements in the context of the program's discipline.
- CS3. An ability to communicate effectively in a variety of professional contexts.
- CS4. An ability to recognize professional responsibilities and make informed judgements in computing practice based on legal and ethical principles.
- CS5. An ability to function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
- CS6. An ability to apply computer science theory and software development fundamentals to produce computing-based solutions.

\section*{Requirements for B.S.C.S. with Cybersecurity Concentration}

Computer science core courses include the fundamentals of programming concepts, operating systems, algorithms, formal languages, and database management systems.

The Bachelor of Science in Computer Science program culminates in a capstone project completed in two consecutive semesters. In the first semester, students form teams and develop a project proposal. In the second semester, students develop, implement, and present the final project.

\section*{Additional Requirements for the Cybersecurity Concentration:}

Requirements for the Computer Science major with Cybersecurity Concentration include completing the B.S. in Computer Science
requirements and 9 semester credit hours in the area of cybersecurity. Courses satisfying the cybersecurity topics are listed below.
\begin{tabular}{lll} 
Take the following CSCE Cybersecurity electives & \\
CSCE 4433 & Cryptography & 3 \\
CSCE 4783 & Cloud Computing and Security & 3 \\
CSCE 4853 & Information Security & 3 \\
\hline Total Hours & & 9
\end{tabular}

\section*{B.S. in Computer Science With Cybersecurity Concentration \\ Eight-Semester Degree Program}

The following sections contain the list of courses required for the Bachelor of Science in Computer Science: Cybersecurity Concentration (CSCEBSCYBR) degree with a suggested sequence below.

Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites. Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 67) in the Academic Regulations chapter for university requirements of the program.
\begin{tabular}{|c|c|c|}

Students must meet all requirements of their degree programs and are expected to keep informed concerning current regulations, policies, and program requirements in their fields of study. Changes made in the curriculum at a level beyond that at which a student is enrolled might become graduation requirements for that student. Changes made in the curriculum at a level lower than the one at which a student is enrolled are not required of that student. Students should consult their departmental adviser for additional information.

\section*{Computer Science B.A. Eight-Semester Degree Program}

The following sections contain the list of courses required for the Bachelor of Arts in Computer Science (B.A.) degrees with a suggested sequence below.

Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites. Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 67) in the Academic Regulations chapter for university requirements of the program.

Scholarship students may need to take General Elective hours in First Year, Fall and Spring Semesters, as well as the Third Year, Spring Semester for 15 semester hours.
\begin{tabular}{|c|c|c|}
\hline \multirow[t]{2}{*}{First Year} & \multicolumn{2}{|r|}{Units} \\

Total Units in Sequence:
\({ }^{1}\) Students have demonstrated successful completion of the learning indicators identified for learning outcome 2.1, by meeting the prerequisites for MATH 2554.
2 The Social Sciences Elective courses which satisfy General Education Outcomes 3.3 and 4.1 include: ANTH 1023, COMM 1023, HDFS 1403, HDFS 2413, HIST 1113, HIST 1123, HIST 2093, HUMN 1114H, HUMN 2114H, INST 2013, INST 2813, INST 2813H, PLSC 2013, PLSC 2813, PLSC 2813H, RESM 2853, SOCI 2013, SOCI 2013H, or SOCI 2033.
\({ }^{3}\) The Fine Arts Elective courses which satisfy General Education Outcome 3.1 include: ARCH 1003, ARHS 1003, COMM 1003, DANC 1003, LARC 1003, MLIT 1003, MLIT 1003H, MLIT 1013, MLIT 1013H, MLIT 1333, THTR 1003, THTR 1013, or THTR 1013H.
\({ }^{4}\) The Social Sciences Elective courses which satisfy General Education Outcome 3.3 include: AGEC 1103, AGEC 2103, ANTH 1023, COMM 1023, ECON 2013, ECON 2023, ECON 2143, EDST 2003,

HDFS 1403, HDFS 2413, HDFS 2603, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2003, HIST 2013, HIST 2093, HUMN 1114H, HUMN 2114H, INST 2013, INST 2813, INST 2813H, PLSC 2003, PLSC 2013, PLSC 2203, PLSC 2813, PLSC 2813H, PSYC 2003, RESM 2853, SOCI 2013, SOCI 2013H, SOCI 2033. Note, courses cannot be counted twice in degree requirements.
\({ }^{5}\) PHIL 3103 also meets Humanities Elective for State Minimum Core and Satisfies General Education Outcomes 3.2 and 5.1.

\section*{Requirements for a Minor in Computer Science:}
\begin{tabular}{ll}
\hline CSCE 2004 & Programming Foundations I \\
CSCE \(2014 \quad\) Programming Foundations II \\
CSCE \(3193 \quad\) Programming Paradigms \\
Three additional CSCE courses numbered above 2000. \\
\hline Total Hours \\
Requirements for Departmental Honors \\
in Computer Science and Computer \\
Engineering
\end{tabular}

The Honors Program in Computer Science and Computer Engineering is designed for the superior student and is intended to help the student develop a more comprehensive view of Computer Science and Computer Engineering. The program provides a vehicle for the recognition of achievements beyond the usual course of study. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the candidate's whole program of honors studies. A minimum of 12 hours of honors coursework is required.

The following requirements are necessary for graduation with honors in either the Computer Engineering or Computer Science Bachelor of Science program:
1. The candidate must satisfy the requirements set forth by the College of Engineering.
2. The student must obtain at least a 3.50 grade-point average in required Computer Engineering and/or Computer Science courses.
3. The student must complete 6 hours of Honors credit in the major, which includes 3 hours of Honors Thesis taken as successive semesters of CSCE 491 VH and 3 hours of CSCE coursework.

\section*{Faculty}

Andrews, David, Ph.D. (Syracuse University), M.S., B.S.E.E. (University of Missouri-Columbia), Professor, Thomas Mullins Chair of Computer Science and Computer Engineering, 2008.
Di, Jia, Ph.D. (University of Central Florida), M.S., B.S. (Tsinghua University), Professor, 21st Century Research Leadership Chair, 2004, 2014.

Gauch, John Michael, Ph.D. (University of North Carolina at Chapel Hill), M.Sc., B.Sc. (Queen's University, Canada), Professor, 2008.

Gauch, Susan E., Ph.D. (University of North Carolina at Chapel Hill), M.Sc., B.Sc. (Queen's University, Canada), Professor, 2007.

Huang, Miaoqing, Ph.D. (George Washington University), B.S. (Fudan University), Associate Professor, 2010, 2016.
Jin, Kevin, Ph.D., M.S., (University of Illinois at Urbana-Champaign), B.E. (Nanyang Technological University, Singapore), Associate Professor, , 2021.

Le, Thi Hoang Ngan, Ph.D. (Carnegie Mellon University), M.S., B.S. (University of Natural Sciences, Ho Chi Minh City, Vietnam), Assistant Professor, 2019.
Li, Qinghua, Ph.D. (Pennsylvania State University), M.S. (Tsinghua University), B.E. (Xi'an Jiaotong University), Associate Professor, 2013. Luu, Khoa, Ph.D. (Concordia University), Assistant Professor, 2018.
Nakarmi, Ukash, Ph.D. (University at Buffalo), M.S. (Oklahoma State University), Assistant Professor, 2020.
Nelson, Alexander H., Ph.D. (University of Maryland), M.S., B.S. (University of Arkansas), Associate Professor, 2017, 2023.
Pan, Yanjun, Ph.D., (University of Arizona), B.E. (Nanjing University of Aeronautics and Astronautics, China), Assistant Professor, 2022.
Panda, Brajendra Nath, Ph.D. (North Dakota St. University), M.S. (Utkal University, India), Professor, 2001, 2007.
Parkerson, Pat, Ph.D., B.S. (University of Arkansas), Associate Professor, 1990, 2005.
Patitz, Matthew J., Ph.D., M.S., B.S. (lowa State University), Associate Professor, 2012, 2018.
Peng, Yarui, Ph.D., M.S. (Georgia Institute of Technology), B.S. (Tsinghua University), Assistant Professor, 2017.
Streeter, Lora, Ph.D., M.S. (University of Arkansas, Fayetteville), Teaching Assistant Professor, 2019.
Thompson, Dale R., Ph.D. (North Carolina State University), M.S., B.S. (Mississippi State University), Professor, 2000, 2022.
Wu, Xintao, Ph.D. (George Mason University), M.E. (Chinese Academy of Space Technology), B.S. (University of Science and Technology of China), Professor, Charles D. Morgan/Acxiom Graduate Research Chair, 2014, 2019.
Zhang, Lu, Ph.D. (Nanyang Technological University, Singapore), Assistant Professor, 2018.

\section*{Courses}

CSCE 2004. Programming Foundations I. 4 Hours.
Introductory programming course for students majoring in computer science or computer engineering. Software development process: problem specification, program design, implementation, testing and documentation. Programming topics: data representation, conditional and iterative statements, functions, arrays, strings, file I/O and classes. Using C++ in a UNIX environment. Corequisite: Lab component. Prerequisite: MATH 2445 or MATH 2554 or MATH 2554 C with a grade of \(C\) or better, a College of Engineering (ENGR) student, a Computer Science Minor (CSCE-M), or a math major (MATHBS or MATHBA). (Typically offered: Fall and Spring)

\section*{CSCE 2014. Programming Foundations II. 4 Hours.}

This course continues developing problem solving techniques by focusing on fundamental data structures and associated algorithms. Topics include: abstract data types, introduction to object-oriented programming, linked lists, stacks, queues, hash tables, binary trees, graphs, recursion, and searching and sorting algorithms. Using C++ in a UNIX environment. Corequisite: Lab component. Prerequisite: CSCE 2004 with a grade of C or better. (Typically offered: Fall and Spring)
CSCE 2023. Introduction to Programming in Java. 3 Hours.
Introduction to programming in Java with emphasis on engineering applications. Programming techniques: data representation and expressions, conditional and iterative statements, arrays, lists, file I/O, methods. Object oriented programming: designing, implementing and using classes, collections and composite objects. Students will gain hands-on programming experience and exposure to classic engineering problem solving techniques. Prerequisite: MATH 2445 or MATH 2554 or MATH 2554C, each with a grade of \(C\) or higher. (Typically offered: Irregular)

\section*{CSCE 2114. Digital Design. 4 Hours.}

Introduction to the hardware aspects of digital computers, logic gates, flipflops, reduction, finite state machines, sequential logic design, digital systems, software design tools, hardware description language (VHDL), and implementation technologies. Corequisite: Lab component. Prerequisite: MATH 2554 or MATH 2554C with a grade of C or better. (Typically offered: Fall and Spring) This course is cross-listed with ELEG 2904.

\section*{CSCE 2214. Computer Organization. 4 Hours.}

Presents the relationship between computing hardware and software with a focus on the concepts for current computers. CPU design topics are covered including various techniques for microprocessor design and performance evaluation. Corequisite: Lab component. Prerequisite: CSCE 2114 with a grade of C or better. (Typically offered: Fall and Spring)

CSCE 3193. Programming Paradigms. 3 Hours.
Programming in different paradigms with emphasis on object oriented programming and network programming. Survey of programming languages, event driven programming, and concurrency. Prerequisite: CSCE 2014 with a grade of C or better. (Typically offered: Fall and Spring)

\section*{CSCE 3193H. Honors Programming Paradigms. 3 Hours.}

Programming in different paradigms with emphasis on object oriented programming and network programming. Survey of programming languages, event driven programming, and concurrency. Prerequisite: CSCE 2014 with a grade of C or better. (Typically offered: Fall)
This course is equivalent to CSCE 3193.
CSCE 3513. Software Engineering. 3 Hours.
A modern approach to the current techniques used in software design and development. This course emphasizes the use of modern software development tools, multi-module programming, and team design and engineering. Prerequisite: CSCE 3193 or CSCE 3193H or DASC 2103, each with a grade of C or better. (Typically offered: Fall and Spring)

CSCE 3613. Operating Systems. 3 Hours.
An introduction to operating systems including topics in system structures, process management, storage management, files, distributed systems, and case studies. Prerequisite: CSCE 2014 and CSCE 2214, each with a grade of \(C\) or better. (Typically offered: Fall and Spring)

\section*{CSCE 3613H. Honors Operating Systems. 3 Hours.}

An introduction to operating systems including topics in system structures, process management, storage management, files, distributed systems, and case studies. Prerequisite: CSCE 2014 and CSCE 2214, each with a grade of \(C\) or better. (Typically offered: Spring)
This course is equivalent to CSCE 3613.

\section*{CSCE 3953. System Synthesis and Modeling. 3 Hours.}

This course instructs the students in the use of modern synthesis and modeling languages and approaches for design automation. This course will teach students the use of HDLs and modeling languages for representing and implementing digital computer systems. Prerequisite: CSCE 2214 with a grade of \(C\) or better. (Typically offered: Fall)

\section*{CSCE 4013. Special Topics. 3 Hours.}

Consideration of computer science topics not covered in other courses. Prerequisite: CSCE 3193 or CSCE 3193H or DASC 2103, each with a grade of C or better. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

\section*{CSCE 4043. RFID Information Systems Security. 3 Hours.}

Radio frequency identification (RFID) information systems provide information to users about objects with RFID tags. They require the application of information systems security (INFOSEC) to protect the information from tampering, unauthorized information disclosure, and denial of service to authorized users. This course addresses security and privacy in an RFID system. Prerequisite: INEG 2314. (Typically offered: Irregular)

CSCE 4114. Embedded Systems. 4 Hours.
The architecture, software, and hardware of embedded systems. Involves a mixture of hardware and software for the control of a system (including electrical, electro-mechanical, and electro-chemical systems). They are found in a variety of products including cars, VCRs, HDTVs, cell phones, pacemakers, spacecraft, missile systems, and robots for factory automation. Corequisite: Lab component. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Fall)

CSCE 4123. Programming Challenges. 3 Hours.
This course studies the principle methods used in the solution of programming contest problems, e.g., data structures strings, sorting, machine arithmetic and algebra, combinatorics, number theory, backtracking, graph traversal, graph algorithms, dynamic programming, grids, and computational geometry. Prerequisite: CSCE 3193 or CSCE 3193H, each with a grade of C or better. (Typically offered: Irregular)

\section*{CSCE 4133. Algorithms. 3 Hours.}

Provides an introduction to formal techniques for analyzing the complexity of algorithms. The course surveys important classes of algorithms used in computer science and engineering. Prerequisite: (CSCE 3193 or CSCE 3193H or DASC 2103, each with a grade of C or better) and (MATH 2603 or MATH 2803). (Typically offered: Fall)

CSCE 4143. Data Mining. 3 Hours.
The course focuses on the principles, theory, design, and implementation of data mining algorithms for large-scale data. Topics include foundations of data mining; preprocessing; mining frequent patterns, associations and correlations; supervised learning including decision tree induction, naïve Bayesian classification, support vector machine, logistic regression, Bayesian network, and K-nearest neighbor learning; unsupervised learning including K-means clustering, hierarchical clustering, density-based clustering, and grid-based clustering; outlier analysis; graph mining; scalable and distributed data mining. Prerequisite: (CSCE 3193 or CSCE 3193H or DASC 2103) or (CSCE 2014 and INEG 2333 and INEG 2314) or (CSCE 2014 and STAT 3013 and STAT 3003)). (Typically offered: Fall)
This course is cross-listed with INEG 4143.
CSCE 4213. Computer Architecture. 3 Hours.
The architecture of modern scalar and parallel computing systems. Techniques for dynamic instruction scheduling, branch prediction, instruction level parallelism, shared and distributed memory multiprocessor systems, array processors, and memory hierarchies. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Spring)
This course is cross-listed with ELEG 4983.
CSCE 4233. Low Power Digital Systems. 3 Hours.
The reduction of power consumption is rapidly becoming one of the key issues in digital system design. Traditionally, digital system design has mainly focused on performance and area trade-offs. This course will provide a thorough introduction to digital design for lower consumption at the circuit, logic, and architectural level. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Irregular)

CSCE 4253. Concurrent Computing. 3 Hours.
Programming concurrent processes; computer interconnection network topologies; loosely coupled and tightly coupled paralleled computer architectures; designing algorithms for concurrency; distributed computer architectures. Prerequisite: CSCE 3193 or CSCE 3193H or DASC 2103, each with a grade of C or better. (Typically offered: Irregular)

\section*{CSCE 4263. Advanced Data Structures. 3 Hours.}

This course continues the study of data structures, algorithmic analysis for these data structures, and their efficient implementation to support standard library in programming languages. Topics include: AVL trees, Red-Black trees, Splay trees, Optimal Binary Search trees, 2-3 tree, 2-3-4 tree, B-trees, Segment trees, Leftist Heaps, Binomial Heaps, Fibonacci Heap, Disjoint Set, Hashing, and big integer with hundreds to thousands of digits. Prerequisite: CSCE 3193 or CSCE 3193H, each with a grade of C or better. (Typically offered: Irregular)

CSCE 4273. Big Data Analytics and Management. 3 Hours.
Introduction to tools and techniques for distributed data computing and management, big data analytics, scalable machine learning, and real-time streaming data analysis. Students cannot receive credit for both CSCE 4273 and CSCE 5273. Prerequisite: CSCE 3193 or CSCE 3193H or DASC 2103, each with a grade of C or better. (Typically offered: Irregular)

CSCE 4323. Formal Languages and Computability. 3 Hours.
Finite Automata and regular languages, regular expressions, context-free languages and pushdown automata, nondeterminism, grammars, and Turing machines. Church's thesis, halting problem, time complexity, space complexity and undecidability. Prerequisite: (CSCE 3193 or CSCE 3193H, each with a grade of C or better) and (MATH 2603 or MATH 2803). (Typically offered: Spring)

CSCE 4333. Introduction to Integrated Circuit Design. 3 Hours.
Design and layout of large scale digital integrated circuits using CMOS technology. Topics include MOS devices and basic circuits, integrated circuit layout and fabrication, dynamic logic, circuit design and layout strategies for large scale CMOS circuits. Students may not receive credit for both CSCE 4333 and CSCE 5223. Prerequisite: ELEG 3213 or ELEG 3933 and MATH 2584 (Typically offered: Fall)

\section*{CSCE 4353. CPLD/FPGA-Based System Design. 3 Hours.}

Field Programmable Logic devices (FPGAs/CPLDs) have become extremely popular as basic building blocks for digital systems. They offer a general architecture that users can customize by inducing permanent or reversible physical changes. This course will deal with the implementation of logic options using these devices.
Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Irregular) This course is cross-listed with ELEG 4963.

\section*{CSCE 4373. Electronic Design Automation. 3 Hours.}

This course studies physical design, analysis and optimization of VLSI circuits and systems with emphasis on computational realizations and optimization. We start with some related topics such as graph algorithms and discuss various well-known algorithms and methodologies in the design process of VLSI circuits, including design partitioning, logic synthesis, floorplanning, routing, static timing analysis and performance-driven layout. It requires a basic knowledge of digital circuit design, data structure, and object-oriented programming. Students cannot receive credit for both CSCE 4373 and CSCE 5373. Prerequisite: CSCE 3953 and CSCE 3193, each with a C or higher. (Typically offered: Irregular)
CSCE 4423. Computer Systems Modeling. 3 Hours.
Basic concepts of problem analysis, model design, and simulation experiments. A simulation will be introduced and used in this course. Prerequisite: CSCE 3193 or CSCE 3193H, each with a grade of C or better. (Typically offered: Irregular)

\section*{CSCE 4433. Cryptography. 3 Hours.}

This course provides a general introduction to modern cryptography. Topics include: stream ciphers, block ciphers, message authentication codes, public key encryption, key exchange, and signature schemes. Prerequisite: (CSCE 3193 or CSCE 3193H or DASC 2103, each with a grade of C or better) and (MATH 2603 or MATH 2803). (Typically offered: Irregular)
CSCE 4523. Database Management Systems. 3 Hours.
Introduction to database management systems, architecture, storage structures, indexing, relational data model, E-R diagrams, query languages, SQL, ODBC, transaction management, integrity, and security. Students may not receive credit for both CSCE 4523 and CSCE 5523. Prerequisite: CSCE 3193 or CSCE 3193H, each with a grade of \(C\) or better. (Typically offered: Spring)

\section*{CSCE 4543. Software Architecture. 3 Hours.}

A study of software architecture through the use of case studies drawn from real systems designed to solve real problems from technical as well as managerial perspectives. Techniques for designing, building, and evaluating software architectures. Prerequisite: CSCE 4133 and CSCE 3513. (Typically offered: Irregular)

\section*{CSCE 4553. Information Retrieval. 3 Hours.}

The objective of this course is to give students a hands-on introduction to information retrieval systems. Classical textual information retrieval systems are studied, including text preprocessing, file structures, term-weighting schemes, and web search engines. Students may not receive credit for both CSCE 4553 and CSCE 5533. Prerequisite: CSCE 3193 or CSCE 3193H, each with a grade of C or better. (Typically offered: Irregular)
CSCE 4561. Capstone I. 1 Hour.
CSCE students complete a comprehensive software capstone project during their final year of undergraduate studies. The project is done over 2 semesters in phases: concept, formal proposal, implementation, and presentation. The projects include and may require the integration of software and human factors and hardware elements and are developed to software engineering methodologies. Prerequisite: CSCE 3513 and (CSCE 3613 or CSCE 3613H) and completion of 96 credit hours. (Typically offered: Fall)

\section*{CSCE 4613. Artificial Intelligence. 3 Hours.}

Introduction to intelligent agents, Al languages, search, first order logic, knowledge representation, ontologies, problem solving, natural language processing, machine vision, machine learning, and robotics. Prerequisite: CSCE 3193 or CSCE 3193H or DASC 2103, each with a grade of C or better. (Typically offered: Irregular)

\section*{CSCE 4623. Mobile Programming. 3 Hours.}

An introduction to software development on mobile devices. The major topics covered in this course include underlying concepts and principles in mobile programming, as well as hands-on programming experience on mobile devices with an emphasis on smartphones. Prerequisite: CSCE 3193 or CSCE 3193H, each with a grade of \(C\) or better. (Typically offered: Irregular)

\section*{CSCE 4643. Graphics Processing Units Programming. 3 Hours.}

This course provides an introduction to massively parallel programming using Graphics Processing Units (GPUs). Topics include basic programming model, GPU thread hierarchy, GPU memory architecture, and performance optimization techniques and parallel patterns needed to develop real-life applications.
Prerequisite: CSCE 2014 with a grade of C or better. (Typically offered: Irregular)

\section*{CSCE 4753. Computer Networks. 3 Hours.}

This course is an introductory course on computer networks. Using the Internet as a vehicle, this course introduces underlying concepts and principles of modern computer networks, with emphasis on protocols, architectures, and implementation issues. Students cannot receive graduate credit for CSCE 4753. Prerequisite: CSCE 3193 or CSCE 3193H, each with a grade of C or better. (Typically offered: Irregular)

\section*{CSCE 4783. Cloud Computing and Security. 3 Hours.}

Cloud computing has entered the mainstream of information technology, providing highly elastic scalability in delivery of enterprise applications and services. In this course, we will focus on the architecture of today's cloud computing, the technologies used within them, application development using contemporary cloud computing tools, and the security risks and management in the cloud. Students cannot receive credit for both CSCE 4783 and CSCE 5783. Prerequisite: CSCE 3613 or CSCE 3613 H , each with a grade of C or better. (Typically offered: Irregular)

\section*{CSCE 4813. Computer Graphics. 3 Hours.}

Introduction to the theory and algorithms used in computer graphics systems and applications. Topics include: 2D and 3D geometric models (points, lines, polygons, surfaces), affine transformations (rotation, translation, scaling), viewpoint calculation (clipping, projection), lighting models (light-material interactions, illumination and shadow calculation). Students will implement their own graphics pipeline to demonstrate many of these techniques. Higher level computer graphics applications will be created using OpenGL. Prerequisite: CSCE 3193 or CSCE 3193H, each with a grade of \(C\) or better. (Typically offered: Irregular)

\section*{CSCE 4853. Information Security. 3 Hours.}

This course covers principles, mechanisms, and policies governing confidentiality, integrity, and availability of digital information. Topics to be covered include security concepts and mechanisms, security policies, multilevel security models, system vulnerability, threat and risk assessment, basic cryptography and its applications, intrusion detection systems. Prerequisite: CSCE 3193 or CSCE 3193H or DASC 2103, each with a grade of C or better. (Typically offered: Irregular)

CSCE 490V. Individual Study. 1-6 Hour.
Individual study directed by faculty in current research topics, state of the art, or advanced methodology in one of the major computer science or computer engineering areas. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{CSCE 4914. Advanced Digital Design. 4 Hours.}

To master advanced logic design concepts, including the design and testing of synchronous and asynchronous combinational and sequential circuits using state of the art CAD tools. Corequisite: Lab component. Prerequisite: CSCE 2114 or ELEG 2904. (Typically offered: Irregular)

CSCE 491VH. Honors Thesis. 1-3 Hour.
To provide honors students with experience in presenting their research accomplishments to their peers and faculty. Prerequisite: Honors standing. (Typically offered: Fall and Spring) May be repeated for up to 3 hours of degree credit.

CSCE 4963. Capstone II. 3 Hours.
CSCE students complete a comprehensive capstone project during their final year of undergraduate studies. The project is done over two consecutive semesters in phases: concepts, formal proposal, implementation, and presentation. The projects include and may require the integration of software, human factors, and hardware elements and are developed using software engineering methodologies. Prerequisite: CSCE 4561. (Typically offered: Spring)

\section*{Data Analytics (DATA)}

\section*{Minor in Data Analytics}

A minor in Data Analytics is offered through the Department of Industrial Engineering in the College of Engineering.

Requirements for the minor in Data Analytics: The minor requires completion of 15-18 credits of coursework, including:
\begin{tabular}{|c|c|c|}
\hline One course from \(A\) & Applied Statistics and Math Modeling group & 3-4 \\
\hline INEG 2314 & Statistics for Industrial Engineers I & \\
\hline INEG 2333 & Applied Probability and Statistics for Engineers II & \\
\hline INEG 3313 & Engineering Probability and Statistics & \\
\hline ELEG 3143 & Probability \& Stochastic Processes & \\
\hline STAT 2823 & Biostatistics & \\
\hline STAT 3013 & Introduction to Probability & \\
\hline Two courses from & Computing and Informatics group & 6-8 \\
\hline CSCE 2004 & Programming Foundations I & \\
\hline CSCE 2014 & Programming Foundations II & \\
\hline INEG 4683 & Decision Support in Industrial Engineering & \\
\hline INEG 3833 & Introduction to Database Concepts for Industrial Engineers & \\
\hline ISYS 2263 & Principles of Information Systems & \\
\hline STAT 3003 & Statistical Methods & \\
\hline STAT 3001L & Statistics Methods Laboratory & \\
\hline Two courses from & the Analytics group & 6 \\
\hline
\end{tabular}

CSCE 4143 Data Mining
or INEG 414Bata Mining
\begin{tabular}{ll} 
CSCE 4273 & Big Data Analytics and Management \\
\hline CSCE 4613 & Artificial Intelligence \\
ECON 4743 & Introduction to Econometrics \\
\hline ECON 4753 & Forecasting \\
INEG 4163 & \begin{tabular}{l} 
Introduction to Modern Statistical Techniques for \\
Industrial Applications
\end{tabular} \\
\hline ISYS 4193 & Business Analytics and Visualization \\
ISYS 4293 & Business Intelligence \\
\hline STAT 4333 & Analysis of Categorical Responses \\
\hline

\section*{Electrical Engineering and Computer Science (EECS)}

\section*{Jia Di}

Head of the Department
JBHT 504 J.B. Hunt Center for Academic Excellence
479-575-5728
Email: jdi@uark.edu

The newly merged Department of Electrical Engineering and Computer Science will offer the same degrees as the former Department of Electrical Engineering and the Department of Computer Science and Computer Engineering. Review any of their undergraduate programs at the following links:

\section*{Majors}
- Computer Engineering (p. 849) B.S.Cmp.E.
- Computer Engineering (p. 851) B.S.Cmp.E. with Cybersecurity Concentration
- Computer Science (p. 852) B.S.C.S.
- Computer Science (p. 854) B.S.C.S. with Cybersecurity Concentration
- Computer Science (p. 855) B.A.
- Electrical Engineering (p. 862) B.S.E.E.

\section*{Minors}
- Computer Science (p. 857)

\section*{Electrical Engineering (ELEG)}

Jia Di
Head of Department
3217 Bell Engineering Center
479-575-5728
Department of Electrical Engineering Website (http://electricalengineering.uark.edu/)

Electrical engineering is a professional engineering discipline that in its broader sense covers the study and application of electricity, electronics and electromagnetism. Electrical engineers are in charge of designing and utilizing electrical and electronic components, integrated circuits and computer chips, and electronic assemblies to benefit mankind. Fields of electrical engineering include analog and mixed-signal circuit design/test, biomedical, communications, computer hardware and digital circuit design, control systems, electronic packaging, embedded systems design, microwave and radar engineering, nanophotonics,
nanotechnology/microelectronics/optoelectronics, pattern recognition and artificial intelligence, power electronics, and renewable energy/power.

The electrical engineering graduate is at the forefront of technologies leading to accelerated use of electric power, applications of real time embedded control systems for smart highways, smart vehicles and smart gadgets, global communications, the dominating influence of the computer and electronics on modern society, the use of electronic equipment for medical diagnosis, the use of wireless chemical and biological nanosensors for hazard detection, the miniaturization of electronics, microwave and optical technology for national defense, and a host of other developments. Therefore, the use of electrical and electronic equipment has spread into such diverse areas as agricultural production, automotives, computer hardware and networks, health care, information technology, manufacturing, marketing, recreation, renewable energy resources, outer space and underwater exploration, transportation, and many others. As a result, electrical engineering is the largest of all scientific disciplines and assures a continuing demand for electrical engineering graduates throughout private industry and government.

\section*{Undergraduate Program}

The department also actively participates in the Honors Program to challenge superior students with a more in-depth academic program and research experience. The Honors program enables students to work more closely with faculty members and other students in a team environment. Please see the requirements given below.

In line with all the opportunities of our graduates, the Electrical Engineering Department has the mission and educational objectives to produce graduates who:
1. Are recruited in a competitive market and valued as reliable and competent employees by a wide variety of industries; in particular, electrical engineering industries,
2. Succeed in graduate studies such as engineering, science, law, medicine, business, and other professions, should they chose to pursue those studies.
3. Understand the need for life-long learning and continued professional development for a successful and rewarding career, and
4. Accept responsibility for leadership roles, in their profession, in their communities, and in the global society.

\section*{Accreditation}

The Electrical Engineering Department offers undergraduate, graduate, and doctoral degrees. The department has offered a Bachelor of Science degree in Electrical Engineering (B.S.E.E.) for over 100 years. The B.S.E.E. degree is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org). Completion of the degree requirements provides graduates with the following learning outcomes:
1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics,
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors,
3. an ability to communicate effectively with a range of audiences,
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgements, which must
consider the impact of engineering solutions in global, economic, environmental, and societal contexts,
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives,
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgement to draw conclusions,
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

\section*{Graduate Program in Electrical Engineering}

The graduate program offers a Master of Science degree in Electrical Engineering (on campus and online) and a Doctor of Philosophy degree in Engineering. The graduate program provides additional instruction and hands-on experience beyond the undergraduate level, and produces graduates who are prepared to promptly address critical issues and assume advanced positions in the profession, including management, design, teaching, research and development.

The research mission of the department is conducted mainly through the graduate program. Internal and external funded research projects serve to:
1. Discover new knowledge, address technical problems, and develop new electrical/electronic technologies;
2. Provide the tools and resources which keep the faculty at the cutting edge of electrical engineering;
3. Provide financial support for graduate students and gifted undergraduate students; and
4. Improve the quality of life for citizens of Arkansas and the world.

The graduate program supports the undergraduate program by giving top undergraduate students access to research laboratories with state-of-the-art equipment and software. Topics covered in graduate courses often migrate into senior undergraduate technical elective courses and eventually into required undergraduate courses.

\section*{Departmental Service Mission}

Faculty, administrators, and staff work to provide the education necessary to establish the best foundation for electrical engineering students at all degree levels, and prepare them to be competitive local and national leaders, skillful at undertaking the current and future challenges facing our world. Everyone is encouraged to provide services to both the community and the profession. Hence, they are active in local, state, national, and international professional and service organizations, as well as public and private schools involving grades K -12

\section*{Degree Program Changes}

A student must meet all requirements of the degree program and is expected to stay informed concerning current regulations, policies, and program requirements in a chosen field of study. Changes made in the electrical engineering curriculum at a level beyond that at which a student is enrolled may become graduation requirements for that student. Changes made in the curriculum at a level lower than the one at which a student is enrolled are not normally required for that student. Students should consult their adviser for additional information.

\section*{Potential Minors}

Although electrical engineering students can pursue any minor they desire, there are several minors that require a minimal number of
extra courses, such as Computer Science, Mathematics, Physics, etc. Students are advised to review the specific rules pertaining to the minor of interest in the section of the UA Catalog of Studies corresponding to the department granting that minor.

\section*{Undergraduate Program in Electrical Engineering}

The Electrical Engineering Department maintains the following student learning outcomes:
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics,
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental, and economic factors,
3. An ability to communicate effectively with a range of audiences,
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts,
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives,
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgement to draw conclusions,
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

For more information visit www.abet.org (http://www.abet.org/).
The electrical engineering curriculum is designed to provide students with knowledge of scientific principles and methods of engineering analysis to form a solid foundation for a career in design, research and development, manufacturing and processing, measurement and characterization, or management. Students progressively build their design experience throughout the curriculum and demonstrate this ability in the senior electrical engineering design laboratories. The curriculum also introduces students to subjects in the humanities, social sciences, and ethics so they may better understand the interaction of technology and society.

The electrical engineering curriculum is divided into three phases. The first year concentrates on the development of a sound understanding of basic sciences and mathematics. The second and third years further develop scientific principles and cover the basic core of electrical engineering. The fourth year is composed primarily of senior-level elective courses. At this time, the students, in consultation with their advisers, may choose classes related to one or more of the major areas of electrical engineering detailed (e.g., analog and mixed-signal circuit design/test, biomedical, communications, computer hardware and digital circuit design, control systems, electronic packaging, embedded systems design, microwave and radar engineering, nanophotonics, nanotechnology/microelectronics/optoelectronics, pattern recognition and artificial intelligence, power electronics, and renewable energy and power). This final year permits the student to tailor a program suited to her or his individual career objectives. The graduation requirement in electrical engineering is 125 semester hours as given below.

\section*{Recommended Technical Studies}

Students in electrical engineering are required to complete 21 semester hours of technical electives of which a minimum of 9 semester hours must be 4000 - or 5000 -level electrical engineering elective courses. A student may select the remaining 12 semester hours from 4000- or 5000-level electrical engineering elective courses or upper-division technical courses in mathematics, engineering, and the sciences with the approval of an adviser. One of these courses may be an approved Math/Science Elective and another may be an approved Engineering Science Elective. History and social science courses taught by Math and Science departments are not eligible for technical elective credit. Not more than 6 semester hours total of ELEG 488 V and ELEG 400 VH may be credited toward technical electives. Students who have taken full-time co-op experiences under GNEG 3811, and whose grades in these courses were A or B, may get credit for not more than three hours of non-ELEG technical electives if the work performed is of comparable quality to a technical elective; consult with the Department Co-op Coordinator. Descriptions of all electrical engineering courses are in the Course Descriptions chapter of this Catalog of Studies. The schedule of technical electives offered in a given semester is determined the previous semester since the selection depends on a number of varying factors such as student interest in a particular topic, the importance of a particular technology for the student's professional career, and teaching faculty availability.

\section*{Electrical Engineering B.S.E.E. EightSemester Degree Program}

The following section contains the list of courses required for the Bachelor of Science in Electrical Engineering and a suggested eight-semester sequence. See the Eight-Semester Degree Policy (p. 67) for more details. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites.

    MEEG 2013, MEEG 2303, MEEG 2403, CHEG 2313, or INEG 2413
    ELEG TECHNICAL ELECTIVES are defined as ELEG 4000 or ELEG
    5000 level courses. CSCE 4114, CSCE 4613, or CSCE 4233 are
    approved ELEG Technical Electives for students pursuing a dual
    ELEG/CSCE undergraduate degree. Not more than 6 hours may be
    ELEG 488 V or ELEG 400 VH courses.

7 The Social Sciences Elective courses which satisfy General Education Outcome 3.3 include: AGEC 1103, AGEC 2103, ANTH 1023,
COMM 1023, ECON 2013, ECON 2023, ECON 2143, EDST 2003, Outcome 3.3 include: AGEC 1103, AGEC 2103, ANTH 1023,
COMM 1023, ECON 2013, ECON 2023, ECON 2143, EDST 2003, HDFS 1403, HDFS 2413, HDFS 2603, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2003, HIST 2013, HIST 2093, HUMN 1114H, HUMN 2114H, INST 2013, INST 2813, INST 2813H, PLSC 2003, PLSC 2013, PLSC 2203, PLSC 2813, PLSC 2813H, PSYC 2003, RESM 2853, SOCI 2013, SOCI 2013H, SOCI 2033. Note, courses cannot be counted twice in degree requirements.
8 The Fine Arts Elective courses which satisfy General Education Outcome 3.1 include: ARCH 1003, ARHS 1003, COMM 1003, Outcome 3.1 include: ARCH 1003, ARHS 1003, COMM 1003,
DANC 1003, LARC 1003, MLIT 1003, MLIT 1003H, MLIT 1013, MLIT 1013H, MLIT 1333, THTR 1003, THTR 1013, or THTR 1013H.
9 MATH SCIENCE/TECHNICAL ELECTIVES: Any Engineering/ Science/Math Technical Elective, suggested classes
BIOL 1543/BIOL 1541L, CHEM 1123/CHEM 1121L, CHEM 3504, CHEM 3603, MATH 3083, MATH 4443, PHYS 3113, PHYS 3544, PHYS 3613, MEEG 2703 or STAT 3003.
10 TECHNICAL ELECTIVES are 3000 or above level courses in Math,
Engineering, or the sciences after the approval by ELEG advisor. CSCE 2014, Programming 2, CSCE 2214, Computer Organization, and SEVI 5213 Business Foundations for Entrepreneurs are allowable non-ELEG technical electives. Courses not eligible for technical elective credit include ELEG 3903, ELEG 3933 and any history courses in math and the sciences (e.g., MATH 3133).
Two Technical Elective \({ }^{10} \quad 6\)
Social Sciences Elective \({ }^{7}\) 3
Fine Arts Elective (Satisfies General Education 3
Outcome 3.1) \({ }^{8}\)
Year Total: 15 16

\section*{Total Units in Sequence:}

1 Students have demonstrated successful completion of the learning indicators identified for learning outcome 2.1, by meeting the prerequisites for MATH 2554.
2 CHEM 1123/CHEM 1121L or BIOL 1543/BIOL 1541L or BIOL 2213/BIOL 2211L, or PHYS 2094 or GEOS 1113/GEOS 1111L
3 The Humanities Elective courses that satisfy General Education Outcomes 3.2 and 5.1 include: CLST 1003, CLST 1003H, CLST 1013, HUMN 1124H, PHIL 2003, PHIL 2003C, PHIL 2003H, PHIL 2103, or PHIL 2103C.
4 The Social Sciences Elective courses that satisfy General Education Outcomes 3.3 and 4.1 include: ANTH 1023, COMM 1023, HDFS 1403, HDFS 2413, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2093, HUMN 1114H, HUMN 2114H, INST 2013, INST 2813, INST 2813H, PLSC 2013, PLSC 2813, PLSC 2813H, RESM 2853, SOCI 2013, SOCI 2013H, or SOCI 2033.

Math Technical Elective or one of these 2000 level courses: MEEG 2013, MEEG 2303, MEEG 2403, CHEG 2313, or INEG 2413 ELEG TECHNICAL ELECTIVES are defined as ELEG 4000 or ELEG 5000 level courses. CSCE 4114, CSCE 4613, or CSCE 4233 are approved ELEG Technical Electives for students pursuing a dual ELEG/CSCE undergraduate degree. Not more than 6 hours may be ELEG 488 V or ELEG 400VH courses.

Students should become very familiar with the Academic Regulations chapter for university requirements that apply to the electrical engineering program as well as the College of Engineering requirements (in particular
the "D rule" and the "Transfer of Credit" for courses taken at another institution). Students are required to complete 40 hours of upper division courses (3000-4000 level). It is recommended that students consult with their adviser when making course selections. In addition to these graduation requirements, candidates for an electrical engineering degree must have earned a grade-point average of no less than 2.00 on all ELEG courses.

\section*{Electrical Engineering Honors Program}

To graduate with Honors in electrical engineering, students must be a member of the Honors College, have a minimum cumulative GPA of 3.50, and complete a minimum of 12 hours of honors credit of which 6 hours must be Electrical Engineering Honors courses that include the following: ELEG 4063H Honors Electrical Engineering Design I, ELEG 4071H Honors Electrical Engineering Design II, and ELEG 400VH Honors Senior Thesis. Special problems credit hours (ELEG 488V) will not be counted in the requirement for graduation with Honors in Electrical Engineering.

\section*{Electrical Engineering Honors Courses:}

ELEG 3124H, ELEG 3143H, ELEG 3214H, ELEG 3224H, ELEG 3304H, ELEG 3704H, ELEG 3924H: Required ELEG junior courses with Honors section (all junior required courses include honors sections).

ELEG 4061H Honors Electrical Engineering Design I (Sp, Fa)
ELEG 4073H Honors Electrical Engineering Design II
ELEG 400VH Honors Senior Thesis (Sp, Su, Fa)
ELEG 4203H, ELEG 4233H, ELEG 4403H, ELEG 4503H, ELEG 4703H, ELEG 4783H, ELEG 4914H, ELEG 4963H: ELEG technical elective courses that have an Honors section
(Please check the offering of these Honors Sections for a particular semester).

ELEG 5000 or above: Any graduate level course.
Balda, Juan Carlos, Ph.D. (University of Natal), B.S. (Universidad Nacional del Sur), University Professor, 1989, 2013.
Chen, Zhong, Ph.D. (North Carolina State University), M.Eng. (National University of Singapore), B.S. (Zhejiang University), Assistant Professor, 2015.

Dix, Jeffrey, Ph.D., M.S., B.S.E.E., (University of Tennessee, Knoxville), Assistant Professor, 2018.
Du, Wei, Ph.D. (Institute of Semiconductors, Chinese Academy of
Science), B.S. (Peking University), Associate Professor, 2008, 2022.
El-Ghazaly, Samir M., Ph.D. (University of Texas at Austin), M.S., B.S. (Cairo University), Distinguished Professor, 2007.
El-Shenawee, Magda O., Ph.D. (University of Nebraska-Lincoln), M.S., B.S. (Assiut University, Egypt), Professor, 2001, 2010.

Farnell, Chris, Ph.D., M.S.E.E., B.S.E.E. (University of Arkansas), Research Assistant Professor, 2021.
Manasreh, Omar, Ph.D. (University of Arkansas), M.S. (University of Puerto Rico-Rio Piedras), B.S. (University of Jordan), Professor, 2003.
Mantooth, Alan, Ph.D. (Georgia Institute of Technology), M.S., B.S.
(University of Arkansas), Distinguished Professor, Twenty-First Century Chair in Mixed-Signal IC Design and CAD, 1998, 2011.
Martin, Terry W., Ph.D., M.S.E.E., B.S.E.E. (University of Arkansas), Professor, 1990, 2002.
McCann, Roy A., Ph.D. (University of Dayton), M.S.E.E., B.S.E.E. (University of Illinois), Professor, 2003, 2009.

Naseem, Hameed A., Ph.D., M.S. (Virginia Polytechnic State University), M.Sc. (Panjab University), University Professor, 1985.

Saunders, Robert F., M.S.E.E., M.S. (University of Arkansas), Instructor, 2012.

Song, Xiaoqing, Ph.D. (North Carolina State University), M.S., B.S.
(Beijing Institute of Technology), Assistant Professor, 2022.
Spiesshoefer, Silke, Ph.D., M.S.E.E., B.S.Ch.E. (University of Arkansas), Clinical Assistant Professor, 2014.
Ware, Morgan, Ph.D. (North Carolina State University), B.S. (Florida State University), Assistant Professor, 2005.
Wu, Jingxian, Ph.D. (University of Missouri-Columbia), M.S. (Tsinghua University), B.S. (Beijing University of Aeronautics and Astronautics), Associate Professor, 2008, 2013.
Yu, Fisher, Ph.D. (Arizona State University), M.S., B.S. (Peking
University), Associate Professor, 2008, 2014.
Zhao, Yue, Ph.D. (University of Nebraska-Lincoln), B.S. (Beijing
University), Assistant Professor, 2015.

\section*{Courses}

ELEG 2101L. Electric Circuits I Laboratory. 1 Hour.
Experimental investigation of the steady-state behavior of resistive circuits excited by DC sources and transient behavior of simple R, L, and C circuits. Topics include fundamental laws of circuit theory applied to resistive networks and time response functions of R-L and R-C circuits. Corequisite: ELEG 2103. (Typically offered: Fall and Summer)

\section*{ELEG 2103. Electric Circuits I. 3 Hours.}

Introduction to circuit variables, elements, and simple resistive circuits. Analysis techniques applied to resistive circuits. The concept of inductance, capacitance and mutual inductance. The natural and step responses of RL, RC, and RLC circuits. Corequisite: ELEG 2101L. Pre- or Corequisite: (MATH 2564 or MATH 2564C) and PHYS 2074. Prerequisite: PHYS 2054. (Typically offered: Fall and Summer)
ELEG 2111L. Electric Circuits II Laboratory. 1 Hour.
Experimental investigation of the steady-state behavior of circuits excited by sinusoidal sources. Topics include complex power, three-phase circuits, transformers, and resonance. Corequisite: ELEG 2113. (Typically offered: Spring and Summer)

\section*{ELEG 2113. Electric Circuits II. 3 Hours.}

Introduction to complex numbers. Sinusoidal steady-state analysis of electric circuits, active, reactive, apparent and complex power; balanced and unbalanced threephase circuits; mutual inductance; the use of the Laplace transform for electric circuit analysis and two-port networks. Corequisite: ELEG 2111L. Pre- or Corequisite: MATH 2584. Prerequisite: ELEG 2103, ELEG 2101L and PHYS 2074. (Typically offered: Spring and Summer)
ELEG 287V. Special Topics in Electrical Engineering. 1-4 Hour.
Consideration of current electrical engineering topics not covered in other courses. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.

\section*{ELEG 2904. Digital Design. 4 Hours.}

To introduce students to modern logic concepts, problem solving and design principles, and vocabulary and philosophy of the digital world. Corequisite: Lab component. Prerequisite: Engineering major. (Typically offered: Fall) This course is cross-listed with CSCE 2114.
ELEG 3124. System \& Signal Analysis. 4 Hours.
Definition and description of signals and systems; analog, digital, continuousand discrete-time and frequency analysis of systems, Z- and Fourier Transforms, sampling and signal reconstruction, filter design and engineering applications. Preor Corequisite: MATH 2584. Corequisite: Lab component. Prerequisite: ELEG 2103 or ELEG 3903 or BMEG 2904. (Typically offered: Fall)

ELEG 3124H. Honors System \& Signal Analysis. 4 Hours.
Definition and description of signals and systems; analog, digital, continuousand discrete-time and frequency analysis of systems, Z- and Fourier Transforms, sampling and signal reconstruction, filter design and engineering applications. Preor Corequisite: MATH 2584. Corequisite: Lab component. Prerequisite: ELEG 2103 or ELEG 3903 or BMEG 2904. (Typically offered: Fall)
This course is equivalent to ELEG 3124.
ELEG 3143. Probability \& Stochastic Processes. 3 Hours.
Review of system analysis, probability, random variables, stochastic processes, auto correlation, power spectral density, systems with random inputs in the time and frequency domain, and applications. Prerequisite: ELEG 3124. Pre- or Corequisite: MATH 2574. (Typically offered: Spring)

ELEG 3143H. Honors Probability \& Stochastic Processes. 3 Hours.
Review of system analysis, probability, random variables, stochastic processes, auto correlation, power spectral density, systems with random inputs in the time and frequency domain, and applications. Pre- or Corequisite: ELEG 3124. (Typically offered: Spring)
This course is equivalent to ELEG 3143.
ELEG 3211L. Electronics I Laboratory. 1 Hour.
Experimental investigation into electronic circuit analysis concepts. Topics include: diode behavior and applications, zener diode regulator design, bipolar junction transistor biasing, BJT common-emitter amplifier design, and operational amplifier fundamentals. Corequisite: ELEG 3213. (Typically offered: Fall and Spring)

ELEG 3211M. Honors Electronics I Laboratory. 1 Hour.
Experimental investigation into electronic circuit analysis concepts. Topics include: diode behavior and applications, zener diode regulator design, bipolar junction transistor biasing, BJT common-emitter amplifier design, and operational amplifier fundamentals. Corequisite: ELEG 3213H. Prerequisite: Honors standing. (Typically offered: Fall and Spring)
This course is equivalent to ELEG 3211L.

\section*{ELEG 3213. Electronics I. 3 Hours.}

Introduction to electronic systems and signal processing, operational amplifiers, diodes, non-linear circuit applications, MOSFETS, and BJTs. Course has a lab component. Pre- or Corequisite: MATH 2574 and ELEG 2113. Corequisite: ELEG 3211L. Prerequisite: MATH 2584. (Typically offered: Fall and Spring)

\section*{ELEG 3213H. Honors Electronics I. 3 Hours.}

Introduction to electronic systems and signal processing, operational amplifiers, diodes, non-linear circuit applications, MOSFETS, and BJTs. Pre- or Corequisite: MATH 2574 and ELEG 2113. Corequisite: ELEG 3211M. Prerequisite: Honors standing and PHYS 2074. (Typically offered: Fall and Spring)
This course is equivalent to ELEG 3213.
ELEG 3221L. Electronics II Laboratory. 1 Hour.
Selected experiments to illustrate and complement topics covered in companion course ELEG 3223 - Electronics II Laboratory. Corequisite: ELEG 3223. (Typically offered: Spring)

\section*{ELEG 3221M. Honors Electronics II Laboratory. 1 Hour.}

Selected experiments to illustrate and complement topics covered in companion course ELEG 3223 - Electronics II Laboratory. Corequisite: ELEG 3223H. Prerequisite: Honors standing. (Typically offered: Spring)
This course is equivalent to ELEG 3221L.
ELEG 3223. Electronics II. 3 Hours.
Differential pair amplifier, current mirrors, active loads, multistage amplifiers, amplifier frequency response, bode plots, Millers theorem, short circuit and open circuit time constant methods, feedback amplifiers, and stability of feedback amplifiers. Corequisite: ELEG 3221L. Prerequisite: ELEG 3213 and ELEG 2113. (Typically offered: Spring)

\section*{ELEG 3223H. Honors Electronics II. 3 Hours.}

Differential pair amplifier, current mirrors, active loads, multistage amplifiers, amplifier frequency response, bode plots, Millers theorem, short circuit and open circuit time constant methods, feedback amplifiers, and stability of feedback amplifiers. Corequisite: ELEG 3221M. Prerequisite: Honors standing, ELEG 3213 and MATH 2584. (Typically offered: Spring)
This course is equivalent to ELEG 3223.
ELEG 3304. Energy Systems. 4 Hours.
Steady state analysis of DC machines, transformers, induction machines and synchronous machines. Introduction to speed control of electric machines using power electronics. Corequisite: Lab component. Prerequisite: ELEG 2113. (Typically offered: Spring)

ELEG 3304H. Honors Energy Systems. 4 Hours.
Steady state analysis of DC machines, transformers, induction machines and synchronous machines. Introduction to speed control of electric machines using power electronics. Corequisite: Lab component. Prerequisite: ELEG 2113. (Typically offered: Spring)
This course is equivalent to ELEG 3304.

\section*{ELEG 3704. Applied Electromagnetics. 4 Hours.}

Analysis of transmission lines with sinusoidal and transient excitation. Development and use of the Smith Chart and methods of impedance matching. Vector analysis, static form of Maxwell's equations, electrostatics, and magnetostatics. Corequisite: Lab component. Pre- or Corequisite: PHYS 2074. Prerequisite: ELEG 2113 and MATH 2574. (Typically offered: Fall)

\section*{ELEG 3704H. Honors Applied Electromagnetics. 4 Hours.}

Analysis of transmission lines with sinusoidal and transient excitation. Development and use of the Smith Chart and methods of impedance matching. Vector analysis, static form of Maxwell's equations, electrostatics, and magnetostatics. Corequisite: Lab component. Pre- or Corequisite: PHYS 2074 and MATH 2574. Prerequisite: ELEG 2113. (Typically offered: Fall)
This course is equivalent to ELEG 3704.

\section*{ELEG 387V. Special Topics in Electrical Engineering. 1-4 Hour.}

Consideration of current electrical engineering topics not covered in other courses. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{ELEG 3903. Electric Circuits and Machines. 3 Hours.}

Basic electrical principles and circuits; Introduction to sinusoidal steady-state analysis of electric circuits, active, reactive, and complex power; balanced threephase circuits; Steady-state analysis of electric machines and transformers. Introduction to power electronics for machine speed control and alternative energy sources. For engineering students other than those in electrical engineering.
Prerequisite: MATH 2564 and PHYS 2074. (Typically offered: Fall and Spring)

\section*{ELEG 3924. Microprocessor Systems Design. 4 Hours.}

Introduction to 8-bit microprocessors and their application. Microprocessor architecture and assembly language; interface devices; system design using microprocessors. Corequisite: Lab component. Pre- or Corequisite: ELEG 2904. (Typically offered: Fall)

ELEG 3924H. Honors Microprocessor Systems Design. 4 Hours.
Introduction to 8-bit microprocessors and their application. Microprocessor architecture and assembly language; interface devices; system design using microprocessors. Corequisite: Lab component. Prerequisite: ELEG 2904. (Typically offered: Fall)
This course is equivalent to ELEG 3924.
ELEG 3933. Circuits \& Electronics. 3 Hours.
Basic principles of electric and electronic circuits and devices. For engineering students who are not pursuing a degree in electrical engineering. Prerequisite: MATH 2584 and PHYS 2074. (Typically offered: Spring)

ELEG 400VH. Honors Senior Thesis. 1-3 Hour.
Honors senior thesis. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer)

ELEG 4063. Electrical Engineering Design I. 3 Hours.
Capstone design and application in electrical engineering. Prerequisite: ELEG 3223 and ELEG 3924. (Typically offered: Fall and Spring)

\section*{ELEG 4063H. Honors Electrical Engineering Design I. 3 Hours.}

Design and application in electrical engineering. Prerequisite: ELEG 3223 and
ELEG 3924. (Typically offered: Fall and Spring)
This course is equivalent to ELEG 4063.
ELEG 4071. Electrical Engineering Design II. 1 Hour.
Design and application in electrical engineering. Prerequisite: ELEG 4063. (Typically offered: Fall and Spring)

ELEG 4071H. Honors Electrical Engineering Design II. 1 Hour.
Design and application in electrical engineering. Prerequisite: ELEG 4063. (Typically offered: Fall and Spring)
This course is equivalent to ELEG 4071.
ELEG 4203. Semiconductor Devices. 3 Hours.
Crystal properties and growth of semiconductors, energy bands and charge carriers in semiconductors, excess carriers in semiconductors, analysis and design of \(p /\) n junctions, analysis and design of bipolar junction transistors, and analysis and design of field-effect transistors. Students may not receive credit for both ELEG 4203 and ELEG 5203. Prerequisite: MATH 2584 and ELEG 3213, or graduate standing. (Typically offered: Irregular)

\section*{ELEG 4203H. Honors Semiconductor Devices. 3 Hours.}

Crystal properties and growth of semiconductors, energy bands and charge carriers in semiconductors, excess carriers in semiconductors, analysis and design of \(p /\) n junctions, analysis and design of bipolar junction transistors, and analysis and design of field-effect transistors. Students may not receive credit for both ELEG 4203 and ELEG 5203. Prerequisite: MATH 2584 and ELEG 3213, or graduate standing. (Typically offered: Irregular)
This course is equivalent to ELEG 4203.

\section*{ELEG 4233. Introduction to Integrated Circuit Design. 3 Hours.}

Design and layout of large scale digital integrated circuits using CMOS technology. Topics include MOS devices and basic circuits, integrated circuit layout and fabrication, dynamic logic, circuit design, and layout strategies for large scale CMOS circuits. Students may not receive credit for both ELEG 4233 and ELEG 5923. Prerequisite: ELEG 3213 or ELEG 3933 and ELEG 2904 or equivalent. (Typically offered: Fall)

\section*{ELEG 4243. Analog Integrated Circuits. 3 Hours.}

Theory and design techniques for linear and analog integrated circuits. Current mirrors, voltage to base emitter matching, active loads, compensation, level shifting, amplifier design techniques, circuit simulation using computer-assisted design programs. Prerequisite: ELEG 3223. (Typically offered: Irregular)

\section*{ELEG 4253L. Integrated Circuit Design Lab I. 3 Hours.}

This course will cover digital VLSI design and integrated circuit design tools. The course is structured with lectures. This course is offered to both senior undergraduate and graduate students. Students cannot get credit for both the undergraduate and graduate version of the course. Students cannot receive credit for both ELEG 4253L and ELEG 5253L. Prerequisite: ELEG 4233 or ELEG 5923. (Typically offered: Spring)

\section*{ELEG 4283. Mixed Signal Test Engineering I. 3 Hours.}

Overview of mixed signal testing, the test specification process, DC and parametric measurements, measurement accuracy, tester hardware, sampling theory, DSPbased testing, analog channel testing, digital channel testing. Prerequisite: Senior or graduate standing. (Typically offered: Irregular)

\section*{ELEG 4303. Introduction to Nanomaterials and Devices. 3 Hours.}

This course provides the students with an introduction to nanomaterials and devices. The students will be introduced to the quantization of energy levels in nanomaterials, growth of nanomaterials, electrical and optical properties, and devices based on these nanomaterials, such as tunneling resonant diodes, transistors, detector, and emitters. Graduate students will be given additional or different assignments. Graduate students will be expected to explore and demonstrate an understanding of the material with a greater level of depth and breadth than the undergraduates. Each group of students will have different expectations and grading systems. The instructor will prepare and distribute two distinct syllabi. Corequisite: ELEG 4203. Prerequisite: ELEG 3213 and PHYS 2074. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{ELEG 4403. Control Systems. 3 Hours.}

Mathematical modeling of dynamic systems, stability analysis, control system architectures and sensor technologies. Time-domain and frequency-domain design of feedback control systems: lead, lag, PID compensators. Special topics in microprocessor implementation. Students may not receive credit for both ELEG 4403 and ELEG 5403. Prerequisite: ELEG 3124. (Typically offered: Irregular)
ELEG 4403H. Honors Control Systems. 3 Hours.
Mathematical modeling of dynamic systems, stability analysis, control system architectures and sensor technologies. Time-domain and frequency-domain design of feedback control systems: lead, lag, PID compensators. Special topics in microprocessor implementation. Students may not receive credit for both ELEG 4403 and ELEG 5403. Prerequisite: ELEG 3124. (Typically offered: Irregular)
ELEG 4413. Advanced Control Systems. 3 Hours.
A second course in linear control systems. Emphasis on multiple-input and multipleoutput systems: State-space analysis, similarity transformations, eigenvalue and eigenvector decomposition, stability in the sense of Lyapunov, controllability and observability, pole placement, quadratic optimization. Students may not receive credit for both ELEG 4413 and ELEG 5413. Prerequisite: ELEG 4403 or equivalent course. (Typically offered: Irregular)

\section*{ELEG 4423. Optimal Control. 3 Hours.}

Introductory theory of optimizing dynamic systems: Formulation of performance objectives; calculus of variations; linear quadratic optimal control; discrete-time optimization; robustness and frequency domain techniques; reinforcement learning and optimal adaptive control. Prerequisite: ELEG 4403. (Typically offered: Irregular)

\section*{ELEG 4463L. Control Systems Laboratory. 3 Hours.}

Experimental study of various control systems and components. The use of programmable logic controllers in the measurement of systems parameters, ladderlogic applications, process-control applications, and electromechanical systems. Prerequisite: ELEG 3924 and ELEG 3124. (Typically offered: Irregular)
ELEG 4503. Design of Advanced Electric Power Distribution Systems. 3 Hours. Design considerations of electric power distribution systems, including distribution transformer usage, distribution system protection implementation, primary and secondary networks design, applications of advanced equipment based on power electronics, and use of capacitors and voltage regulation. Students may not receive credit for both ELEG 4503 and ELEG 5503. Prerequisite: ELEG 3304. (Typically offered: Irregular)

\section*{ELEG 4513. Power and Energy Systems Analysis. 3 Hours.}

Modeling and analysis of electric power systems: Energy sources and conversion; load flow analysis; reference frame transformations; symmetrical and unsymmetrical fault conditions; load forecasting and economic dispatch. Students may not receive credit for both ELEG 4513 and ELEG 5513. Prerequisite: ELEG 2113. (Typically offered: Irregular)

ELEG 4533. Power Electronics and Motor Drives. 3 Hours.
Characteristics of Insulated Gate Bipolar Transistors (IGBTs), Silicon Carbide ( SiC ) MOSFETs, Gallium Nitride (GaN) devices, Design of driver and snubber circuits for IGBTs and SiC MOSFETs, and an introduction to electric motor drives. Students may not receive credit for both ELEG 4533 and ELEG 5533. Prerequisite: ELEG 3304 and ELEG 3223. (Typically offered: Irregular)

ELEG 4543. Introduction to Power Electronics. 3 Hours.
Presents basics of emerging areas in power electronics and a broad range of topics such as power switching devices, electric power conversion techniques and analysis, as well as their applications. Students may not receive credit for both ELEG 5543 and ELEG 4543. Prerequisite: ELEG 2113 and ELEG 3213. (Typically offered: Irregular)

\section*{ELEG 4553. Switch Mode Power Conversion. 3 Hours.}

Basic switching converter topologies: buck, boost, buck-boost, Cuk, flyback, resonant; pulse-width modulation; integrated circuit controllers; switching converter design case studies; SPICE analyses of switching converters; state-space averaging and linearization; and switching converter transfer functions. Prerequisite: ELEG 3223 and ELEG 3124. (Typically offered: Irregular)
ELEG 4563. EMI in Power Electronics Converters: Generation, Propagation and Mitigation. 3 Hours.
Concepts of electro-magnetic-interference issues in power electronics converters. Basic concepts of EMI measurement, modeling and mitigation, with a focus on conducted EMI in power electronics converters. The course is structured with lectures and a lab session. Students can not receive credit for both ELEG 4563 and ELEG 5563. Prerequisite: ELEG 2103 or equivalent and MATH 2574. (Typically offered: Irregular)

\section*{ELEG 4583. Programming for Power Electronics: DSPs. 3 Hours.}

This course will focus on the development of both theoretical and practical skills needed to design and implement controls for power electronic systems using a Digital Signal Processors (DSPs). The course is structured with lectures and utilizes a project-based approach. Students cannot receive credit for both ELEG 5583 and ELEG 4583. Prerequisite: Senior standing, ELEG 2904, ELEG 3924, and CSCE 2004. (Typically offered: Spring)

\section*{ELEG 4593. Programming for Power Electronics: FPGA. 3 Hours.}

This course will focus on the development of both theoretical and practical skills needed to design and implement controls for power electronic system using Field Programmable Gate Arrays (FPGAs). The course is structured with lectures and utilizes a project-based approach. Students cannot receive credit for both ELEG 5593 and ELEG 4593. Prerequisite: Senior standing, ELEG 2904, ELEG 3924 and CSCE 2004. (Typically offered: Spring)

ELEG 4603. Deterministic Digital Signal Processing System Design. 3 Hours. Design of Digital Signal Processing systems with deterministic inputs. Sampling, quantisizing, oversampling, ADC trade-offs, distortion, equalizers, anti-aliasing, coherency, frequency domain design, audio and video compression. Prerequisite: ELEG 3124. (Typically offered: Irregular)

\section*{ELEG 4623. Communication Systems. 3 Hours.}

Various modulation systems used in communications. AM and FM fundamentals, pulse modulation, signal to noise ratio, threshold in FM, the phase locked loop, matched filter detection, probability of error in PSK, FKS, and DPSK. The effects of quantization and thermal noise in digital systems. Information theory and coding. Students may not receive credit for both ELEG 4623 and ELEG 5663. Pre- or Corequisite: ELEG 3143. (Typically offered: Irregular)

\section*{ELEG 4703. Introduction to RF and Microwave Design. 3 Hours.}

An introduction to microwave design principles. Transmission lines, passive devices, networks, impedance matching, filters, dividers, and hybrids will be discussed in detail. Active microwave devices will also be introduced. In addition, the applications of this technology as it relates to radar and communications systems will be reviewed. Prerequisite: ELEG 3704. (Typically offered: Irregular)

ELEG 4783. Introduction to Antennas. 3 Hours.
Basic antenna types: small dipoles, half wave dipoles, image theory, monopoles, small loop antennas. Antenna arrays: array factor, uniformly excited equally spaced arrays, pattern multiplication principles, nonuniformly excited arrays, phased arrays. Use of MATLAB programming and mathematical techniques for antenna analysis and design. Emphasis will be on using simulation to visualize variety of antenna radiation patterns. Corequisite: Drill component. Prerequisite: ELEG 3704. (Typically offered: Irregular)

\section*{ELEG 4783H. Honors Introduction to Antennas. 3 Hours.}

Basic antenna types: small dipoles, half wave dipoles, image theory, monopoles, small loop antennas. Antenna arrays: array factor, uniformly excited equally spaced arrays, pattern multiplication principles, nonuniformly excited arrays, phased arrays. Use of MATLAB programming and mathematical techniques for antenna analysis and design. Emphasis will be on using simulation to visualize variety of antenna radiation patterns. Corequisite: Drill component. Prerequisite: ELEG 3704. (Typically offered: Irregular)
This course is equivalent to ELEG 4783.
ELEG 487V. Special Topics in Electrical Engineering. 1-3 Hour.
Consideration of current electrical engineering topics not covered in other courses. Prerequisite: Senior standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
ELEG 488V. Special Problems. 1-3 Hour.
Individual study and research on a topic mutually agreeable to the student and a faculty member. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{ELEG 4963. CPLD/FPGA Based System Design. 3 Hours.}

Field Programmable logic devices (FPGAs/CPLDs) have become extremely popular as basic building blocks for digital systems. They offer a general architecture that users can customize by inducing permanent or reversible physical changes. This course will deal with the implementation of logic options using these devices.
Corequisite: Lab component. Prerequisite: ELEG 4914. (Typically offered: Irregular) This course is cross-listed with CSCE 4353.

\section*{ELEG 4983. Computer Architecture. 3 Hours.}

Design of a single board computer including basic computer organization, memory subsystem design, peripheral interfacing, DMA control, interrupt control, and bus organization. Prerequisite: ELEG 3924. (Typically offered: Irregular) This course is cross-listed with CSCE 4213.

\section*{Industrial Engineering (INEG)}

Chase E. Rainwater
Department Head
4207 Bell Engineering Center
479-575-6029
Email: ecer@uark.edu
Industrial Engineering Website (http://www.ineg.uark.edu/)
The mission of the industrial engineering department at the University of Arkansas is to be a nationally competitive, student-centered industrial engineering program serving Arkansas and the world through undergraduate and graduate studies and leading-edge research programs.

Industrial engineers are concerned with improving organized activity. The physical arrangement of people, equipment, and material significantly influences the effectiveness of any organization - whether the organization is industrial, governmental, or commercial.

Today's industrial engineers develop applications of new processing automation and control technology; install data processing systems,
performance measures and standards, job evaluation and wage and salary programs; research new products and product applications; devise ways to improve productivity through application of technology and human factors; select operating processes and methods to accomplish a given task using proper tools and equipment; design facilities, management systems, operations procedures, storage systems; improve allocation of resources, planning and control systems for distribution of goods and services, production, inventory, quality and plant maintenance; enhance plant environment and the quality of working life; evaluate reliability and quality performance; implement office systems, procedures, and policies; analyze complex business problems through operations research; conduct long-range organization studies, plant location surveys, system effectiveness studies; and study potential markets for goods and services, raw material sources, labor supply, energy resources, financing and taxes.

Industrial engineers integrate engineering skills with mathematics and computer science tools, providing systematic ways to maximize productivity and quality while minimizing time and cost.

Completion of the degree requirements provides graduates with the following learning outcomes:
- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- An ability to communicate effectively with a range of audiences
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

The goal of the Industrial Engineering Undergraduate Program at the University of Arkansas is to prepare men and women for professional careers and graduate studies in Industrial Engineering. We provide a foundation in mathematics, science, humanities and social sciences, engineering science, and engineering design to produce Industrial Engineers with the intellectual, technical, and professional competence to develop, implement, and manage industrial engineering solutions to complex problems in industry, government, and society.

The program's objectives have been developed to address the needs of the industrial engineering constituencies and to be consistent with and supportive of the department's mission and programmatic goals. The IE program educational objectives represent and describe the expected accomplishments of graduates resulting from participation within the program within the first few years after graduation. The program's objectives have been developed to address the needs of departmental
constituencies and to be consistent with and support the mission and programmatic goals.

Within 3-5 years of graduation, graduates of the \(U\) of \(A\) undergraduate program in industrial engineering will have:
1. Successfully applied core industrial engineering knowledge and skills for industrial or public sector organizations.
2. Successfully pursued advanced professional degrees, graduate studies in industrial engineering, professional training, or engineering certification.
3. Demonstrated professional and intellectual growth as managers and leaders in industrial engineering, society, and their communities.

\section*{Requirements for B.S. in Industrial Engineering}

The total graduation requirement in industrial engineering is 123 hours. For further information please visit the departmental website (http:// www.ineg.uark.edu/).

\section*{Technical Electives}

The purpose of technical electives is to provide students with the opportunity to expand their education along lines of particular interest to them. Each student is responsible for their technical elective program. Students may seek specific advice on technical elective selections from their advisor. Courses satisfying technical elective requirements cannot fulfill more than one B.S.I.E. requirement.

A minimum of 12 credit hours from the approved technical elective course list must be taken to satisfy technical elective requirements for the B.S.I.E. At least 6 of these 12 credit hours must be chosen from INEG and/or OPAN courses. No more than 3 of these credits may be based in individual/ independent study, no more than 4 of these credits may be based in honors thesis (honors thesis courses offered by our department include: INEG 400VH, INEG 3812H, and INEG 4812H), and no more than 3 of these credits may be based in cooperative education.

\section*{Approved Technical Elective Course List 1. Any BENG, BIOL, BMEG, CHEG, CHEM, CVEG, CSCE, ELEG, GNEG, INEG, MATH, MEEG, OPAN, and PHYS course that is at the 3000 -level or above is approved.}

Exceptions are:
- CVEG 4513 is not approved.
- GNEG 3801 is not approved.
- GNEG 3811 is approved only if the student has completed at least three semesters of GNEG 3811.
- INEG 3313 is not approved.
- MATH 3013 and MATH 3133 are not approved.
- PHYS 3603 is not approved.
2. Students may count one of MATH 2574 and MATH 2584 as a technical elective.
3. Courses at the 3000-level or above that are explicitly listed (not part of a blanket statement like "... 3000-to- 4000-level ...") in the Catalog of Studies under Minors for Non-Business Students (http://catalog.uark.edu/ undergraduatecatalog/collegesandschools/sammwaltoncollegeofbusiness/ minors/) are approved.

Exception:
- ISYS 3393 is not approved if the student is also seeking technical elective credit for INEG 4683.
4. Courses at the 3000-level or above that are explicitly listed on the Sustainability Minor Courses (https://sustainability.uark.edu/academics/ minor.php) website under Natural, Managed, or Built Systems are approved.
5. Courses at the 3000-level or above that are explicitly listed in the Catalog of Studies in the Analytics group for the Data Analytics Minor (http://catalog.uark.edu/undergraduatecatalog/collegesandschools/ collegeofengineering/dataanalytics/) are approved.
6. Additional approved courses are EXSC 3153, EXSC 3353, and HNRC 4013H.

\section*{Industrial Engineering B.S.I.E. Eight-Semester Degree Program}

The following section contains the list of courses required for the Bachelor of Science in Industrial Engineering degree and a suggested sequence. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites. Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 67) in the Academic Regulations chapter for university requirements of the program.

Students are required to complete 40 hours of upper division courses (3000-4000 level). It is recommended that students consult with their adviser when making course selections.

Sullivan, Kelly M., Ph.D. (University of Florida), M.S.I.E., B.S.I.E. (University of Arkansas), Associate Professor, 2012, 2019.
Vazquez, Alan, Ph.D. (University of Antwerp, Belgium), M.S. (Monterrey Institute of Technology, Mexico), B.S. (Autonomous University of Nuevo Leon, Mexico), Assistant Professor, 2022.
Zhang, Shengfan, Ph.D., M.I.E. (North Carolina State University), B.M. (Fudan University, Shanghai), Associate Professor, John L. Imhoff Chair in Industrial Engineering, 2011, 2020.

\section*{Courses}

INEG 2001. Industrial Engineering Seminar. 1 Hour.
Overview of the Department of Industrial Engineering: faculty and their backgrounds and interests, staff and the services they provide, facilities, curricular requirements, extracurricular opportunities, post-graduate opportunities. (Typically offered: Fall)

INEG 2103. Introduction to Industrial Engineering. 3 Hours.
Survey of industrial engineering problems. Application of key concepts from linear algebra and calculus in solving industrial engineering problems. Use of spreadsheets in solving industrial engineering problems. Visualization of common types of industrial engineering data. Exploration of the principles of effective teamwork and professionalism. Prerequisite: MATH 2445 or MATH 2514 or MATH 2554. (Typically offered: Fall and Spring)

INEG 2214. Computing Methods for Industrial Engineers I. 4 Hours. Introduction to programming and computing methods within the context of traditional industrial engineering problem solving. Students will be exposed to classic industrial engineering problem scenarios. Basic techniques within object-oriented programming, including designing classes, using objects, creating methods, looping and decision constructs, arrays, and file handling, will be used to facilitate solving these problems. Pre- or Corequisite: INEG 2103. (Typically offered: Fall and Spring)
INEG 2223. Computing Methods for Industrial Engineers II. 3 Hours.
A continuation of INEG 2214. Review of fundamental computing methods and exposure to advanced use of computing libraries. Developing and implementing algorithms using computing methods to solve illustrative and practical problems of interest to industrial engineers. Students will use existing computing libraries, data structures, and programming interfaces to implement software using problem-based learning. Prerequisite: INEG 2214. (Typically offered: Fall and Spring)
INEG 2314. Statistics for Industrial Engineers I. 4 Hours.
Applications to industrial engineering of descriptive statistics, single-population point and interval estimation, single-population hypothesis testing, two-population point and interval estimation, two-population hypothesis testing, goodness-of-fit testing, contingency table testing, linear regression, correlation, design of experiments, and analysis of variance. Introduction to statistical quality control. Use of modern statistical analysis software is emphasized. Prerequisite: INEG or DTSC students only. Pre- or corequisite: INEG 2103 or DASC 2594. (Typically offered: Fall and Spring)
INEG 2314H. Honors Statistics for Industrial Engineers I. 4 Hours.
Applications to industrial engineering of descriptive statistics, single-population point and interval estimation, single-population hypothesis testing, two-population point and interval estimation, two-population hypothesis testing, goodness-of-fit testing, contingency table testing, linear regression, correlation, design of experiments, and analysis of variance. Introduction to statistical quality control. Use of modern statistical analysis software is emphasized. Prerequisite: Honors standing, and INEG or DTSC students only. Pre- or corequisite: INEG 2103 or DASC 2594. (Typically offered: Fall and Spring)
This course is equivalent to INEG 2314.
INEG 2323. Probability and Stochastic Processes for Industrial Engineers. 3 Hours.
Development and analysis of industrial engineering applications of random experiments, random variables, renewal processes, Poisson processes, and Markov chains. Application areas include inventory, quality control, queueing, and reliability. Pre- or corequisite: INEG 2103 or DASC 2594. (Typically offered: Fall and Spring)
INEG 2333. Applied Probability and Statistics for Engineers II. 3 Hours.
Applications to engineering problems of two-population point and interval estimation, two-population hypothesis testing, linear regression, correlation, design of experiments, analysis of variance, and nonparametric statistics. Introduction to statistical quality control. Corequisite: Drill component. Prerequisite: INEG 2314. (Typically offered: Fall and Spring)

\section*{INEG 2413. Engineering Economic Analysis. 3 Hours.}

Economic aspects of engineering, including current economic problems and the treatment of estimates when evaluating alternative courses of action. Methods of selection and replacement of equipment and break-even points of operation; desirability of new processes or projects where asset life, rate of return on investment, and first, fixed, differential, marginal, and sunk costs must be considered. Corequisite: Drill component. Prerequisite: MATH 2445 or MATH 2514 or MATH 2554. (Typically offered: Fall and Spring)

\section*{INEG 2613. Introduction to Operations Research. 3 Hours.}

Introduction to modeling and analysis of deterministic operations design and planning problems using formal optimization algorithms and software. Identification and formulation of appropriate applications, linear programming, sensitivity, network flows/transportation/assignment problems, shortest paths, and integer linear programming. Prerequisite: INEG 2214 or DASC 1204. Pre- or corequisite: INEG 2103 or MATH 3083 or DASC 2594. (Typically offered: Fall and Spring)

INEG 3313. Engineering Probability and Statistics. 3 Hours.
Applications to engineering problems of data summary and presentation, random variables and probability distributions, point and interval estimation, hypothesis testing, linear regression, and design of experiments. Not for credit toward the Bachelor of Science in Industrial Engineering. Corequisite: Drill component. Prerequisite: MATH 2564. (Typically offered: Fall, Spring and Summer)

INEG 3333. Statistics for Industrial Engineers II. 3 Hours.
Introduction to model statistical learning, statistical learning beyond linear regression, data-driven anomaly detection and process monitoring, optimal sampling for data collection. Prerequisite: INEG 2223, INEG 2314 and INEG 2323. (Typically offered: Fall and Spring)

\section*{INEG 3443. Project Management. 3 Hours.}

Analysis of the strategic level of project management including planning, organizing, and staffing for successful project execution. Professional creativity, motivation, leadership, and ethics are also explored. At the tactical level, project selection, control, and systems management are analyzed. Systems development and decision support tools for project management are studied. (Typically offered: Fall and Spring)

\section*{INEG 3443H. Honors Project Management. 3 Hours.}

Analysis of the strategic level of project management including planning, organizing, and staffing for successful project execution. Professional creativity, motivation, leadership, and ethics are also explored. At the tactical level, project selection, control, and systems management are analyzed. Systems development and decision support tools for project management are studied. (Typically offered: Fall and Spring)
This course is equivalent to INEG 3443.

\section*{INEG 3513. Manufacturing Processes. 3 Hours.}

This course focuses on the manufacturing processes that impart geometry and properties to engineering materials including casting, metalworking, machining, joining, heat treatment, and polymer processes. Process selection and analysis, design-for-manufacturing principles, cost estimation, and selection of process parameters are covered. Lab component covers communication of manufacturing specifications via engineering drawings. Prerequisite: MEEG 2303. Corequisite: Lab component. (Typically offered: Spring)

INEG 3533. Transportation Logistics. 3 Hours.
This course introduces students to transportation and logistics systems, including the components of logistics system and their interactions. There is emphasis on quantitative models and techniques for the optimization and analysis of transportation and logistics systems. Topics covered include: an overview of logistics systems and modes of transportation; facility location analysis and network design; network flow and transportation modeling; and vehicle routing. Prerequisite: INEG 2613. Pre- or corequisite: INEG 2223. (Typically offered: Fall and Spring)

\section*{INEG 3543. Facility Logistics. 3 Hours.}

The design and analysis of efficient logistics systems at the facility level, with an emphasis on distribution facilities. Unit load, break bulk, crossdock and order fulfillment centers and their component systems and software. Automated and manual systems.Prerequisite: INEG 2413. Pre- or corequisite: INEG 2613. (Typically offered: Fall and Spring)

INEG 3553. Production Planning and Control. 3 Hours.
Strategy and competition, forecasting, aggregate planning, inventory control subject to known demand, inventory control subject to uncertain demand, supply chain management, push and pull production control systems, and operations scheduling. Prerequisite: INEG 2314 or STAT 3003. Pre- or corequisite: INEG 2613. (Typically offered: Fall and Spring)

INEG 3624. Simulation. 4 Hours.
The development and use of discrete-event simulation models for the analysis and design of systems found in manufacturing, distribution, and service contexts. Coverage includes conceptual modeling, model translation to computer form, statistical input models, random number generation and Monte Carlo methods, experimentation and statistical output analysis, and queuing analysis. Includes the use of modern computer simulation languages. Corequisite: Drill component. Prerequisite: (INEG 2223 or DASC 1204), INEG 2314 and INEG 2323. Pre- or Corequisite: INEG 2413. (Typically offered: Fall and Spring)

\section*{INEG 3624H. Honors Simulation. 4 Hours.}

The development and use of discrete-event simulation models for the analysis and design of systems found in manufacturing, distribution, and service contexts. Coverage includes conceptual modeling, model translation to computer form, statistical input models, random number generation and Monte Carlo methods, experimentation and statistical output analysis, and queuing analysis. Includes the use of modern computer simulation languages. Corequisite: Drill component. Prerequisite: (INEG 2223 or DASC 1204), INEG 2314, INEG 2323 and honors standing. Pre- or corequisite: INEG 2413. (Typically offered: Fall and Spring) This course is equivalent to INEG 3624.

\section*{INEG 3714. Work Methods and Ergonomics. 4 Hours.}

Ways of designing jobs, machines, operations and work environments so they are compatible with human capacities and limitations. Work methods topics include methods analysis, time studies, work sampling and learning curves. Cognitive and physical capabilities and limitations of humans are addressed through the study of human information processing, motor control theory, anthropometry, biomechanics, work physiology and manual material handling. Design of controls and displays, hand tools and workstations, along with work related musculoskeletal disorders. Laboratory required. Corequisite: Lab component. Prerequisite: INEG 2314. (Typically offered: Fall and Spring)

\section*{INEG 3833. Introduction to Database Concepts for Industrial Engineers. 3} Hours.
An introduction to the basic principles of database modeling and technologies for industrial engineers. Coverage includes analyzing user requirements, representing data using conceptual modeling techniques (e.g. UML, ERD), converting conceptual models to relational implementations via database design methodologies, extracting data via structured query language processing, and understanding the role of database technology in industrial engineering application areas, implementing database applications. Pre- or corequisite: INEG 2223. (Typically offered: Fall and Spring)

\section*{INEG 400VH. Honors Thesis. 1-3 Hour.}

For Honors College students majoring in Industrial Engineering only. Prerequisite: Honors college students only and instructor consent. (Typically offered: Fall, Spring and Summer)

INEG 410V. Special Topics in Industrial Engineering. 1-4 Hour.
Consideration of current industrial engineering topics not covered in other courses. Prerequisite: Senior standing. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.
INEG 410VH. Honors Special Topics in Industrial Engineering. 1-3 Hour.
Consideration of current industrial engineering topics not covered in other courses. Prerequisite: Senior standing. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.
This course is equivalent to INEG 410V.

INEG 411V. Individual Study in Industrial Engineering. 1-3 Hour.
Individual study and research on a topic mutually agreeable to the student and a faculty member. Prerequisite: Instructor consent. (Typically offered: Fall, Spring and Summer)
INEG 411VH. Honors Individual Study in Industrial Engineering. 1-3 Hour. Individual study and research on a topic mutually agreeable to the student and a faculty member. Prerequisite: Instructor consent and honors candidacy. (Typically offered: Fall, Spring and Summer)
This course is equivalent to INEG 411V.
INEG 4123. Global Engineering and Innovation. 3 Hours.
This course provides engineering students a global perspective for design and innovation. Students explore various design thinking tools and techniques. Students apply engineering design and innovation techniques to create solutions that meet specified markets with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental and economic factors. Students also have the opportunity to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which considers the impact of the engineering solution in the global, economic, environmental, and social contexts. Prerequisite: Senior standing or instructor consent. (Typically offered: Irregular)

\section*{INEG 4143. Data Mining. 3 Hours.}

The course focuses on the principles, theory, design, and implementation of data mining algorithms for large-scale data. Topics include foundations of data mining; preprocessing; mining frequent patterns, associations and correlations; supervised learning including decision tree induction, naïve Bayesian classification, support vector machine, logistic regression, Bayesian network, and K-nearest neighbor learning; unsupervised learning including K-means clustering, hierarchical clustering, density-based clustering, and grid-based clustering; outlier analysis; graph mining; scalable and distributed data mining. Prerequisite: (INEG 2333 and INEG 2223) or (CSCE 2014 and INEG 3313) or (INEG 2314 and INEG 2223) or INEG 3333. (Typically offered: Fall)

\section*{INEG 4163. Introduction to Modern Statistical Techniques for Industrial Applications. 3 Hours.}

This application-oriented course is driven by real problems arising from industry and focuses on problem solving using both modern and classic statistical methods. For both senior undergraduate and graduate students, the main goal of this course is to provide a comprehensive introduction to those most popular statistical learning methods and tools (such as R and Apache Spark) which are widely used in industry today. Prerequisite: INEG 2333 or INEG 2314 or INEG 3333. (Typically offered: Spring)

\section*{INEG 4253. Leadership Principles and Practices. 3 Hours.}

The course is designed to expose students to multiple approaches to leadership in a wide variety of settings. Leadership styles, the knowledge areas and competencies expected of today's leaders, the challenges leaders face, the historical and philosophical foundations of leadership, the relationships among leadership theory, leadership practice, and the moral-ethical aspects of leadership are among the topics covered in the course. A number of respected regional, national, and international leaders share "lessons learned" in their leadership journeys. Plus, a number of highly regarded leadership books and case studies on leadership are read and discussed. Students may not receive credit for INEG 4253 and INEG 5253/ OMGT 5253. Prerequisite: Senior standing. (Typically offered: Fall)

INEG 4253H. Honors Leadership Principles and Practices. 3 Hours.
The course is designed to expose students to multiple approaches to leadership in a wide variety of settings. Leadership styles, the knowledge areas and competencies expected of today's leaders, the challenges leaders face, the historical and philosophical foundations of leadership, the relationships among leadership theory, leadership practice, and the moral-ethical aspects of leadership are among the topics covered in the course. A number of respected regional, national, and international leaders share "lessons learned" in their leadership journeys. Plus, a number of highly regarded leadership books and case studies on leadership are read and discussed. Students may not receive credit for INEG 4253 and INEG 5253/ OMGT 5253. Prerequisite: Honors standing and instructor consent. (Typically offered: Fall)
This course is equivalent to INEG 4253.
INEG 4323. Quality Engineering and Management. 3 Hours.
Provides the student with complete coverage of the functional area of "Quality Assurance" ranging from the need for such a function, how it works, techniques utilized, and managerial approaches for insuring its effectiveness. Prerequisite: INEG 2333 or INEG 2314. (Typically offered: Irregular)
INEG 4423. Advanced Engineering Economy. 3 Hours.
Preparation of feasibility studies, including cost estimation, risk and uncertainty, sensitivity analysis and decision making. Effects of taxes, depreciation and financing costs on cash flows. Prerequisite: INEG 2314 and INEG 2413. (Typically offered: Irregular)

\section*{INEG 4423H. Honors Advanced Engineering Economy. 3 Hours.}

Preparation of feasibility studies, including cost estimation, risk and uncertainty, sensitivity analysis and decision making. Effects of taxes, depreciation and financing costs on cash flows. Prerequisite: INEG 2314 and INEG 2413. (Typically offered: Irregular)
This course is equivalent to INEG 4423.

\section*{INEG 4433. Systems Engineering and Management. 3 Hours.}

Overview of the fundamental concepts underlying the management of engineering. Reviews the engineering decision process within the life cycle. Examines implementation of basic management functions in technical organizations and development of strategy tools within a complex organization. Prerequisite: INEG 2413. (Typically offered: Fall)
INEG 4433H. Honors Systems Engineering and Management. 3 Hours. Overview of the fundamental concepts underlying the management of engineering. Reviews the engineering decision process within the life cycle. Examines implementation of basic management functions in technical organizations and development of strategy tools within a complex organization. Prerequisite: INEG 2413. (Typically offered: Fall) This course is equivalent to INEG 4433.

\section*{INEG 4453. Productivity Improvement. 3 Hours.}

Analysis of common productivity problems. Development of skills required to diagnose problems; measure productivity; develop improvement strategies; and provide for the implementation and maintenance of productivity measurement and improvement systems. Prerequisite: Senior standing. (Typically offered: Irregular)

INEG 4683. Decision Support in Industrial Engineering. 3 Hours.
Reinforcing important computer programming methods using industrial engineeringbased applications. Students will utilize Microsoft Excel and Visual Basic for Applications to develop custom solutions to challenging industrial engineering problems. Emphasis on computational proficiency and computing productivity in a spreadsheet-based setting. Prerequisite: INEG 2214 and INEG 2314. (Typically offered: Fall)

\section*{INEG 4913. Industrial Engineering Capstone Experience I. 3 Hours.}

First semester of a two-semester, team-based project in support of a real-world industry partner organization. Learn about the industry partner organization and the relevant segment of that organization. Assess and evaluate the operations and performance of the system that needs to be improved, or detail the need for and the requirements of a new system. Communicate findings using reports and presentations. Prerequisite: INEG 2001, INEG 2103, INEG 3333, INEG 3443, INEG 3543 and INEG 3624. Pre- or corequisite: INEG 3533, INEG 3553, INEG 3714, INEG 3833 and INEG 4433. (Typically offered: Fall)

INEG 4924. Industrial Engineering Capstone Experience II. 4 Hours.
Second semester of a two-semester, team-based project in support of a real-world industry partner organization. Develop and assess recommendations for improving system performance, or develop the detailed design of a new system. Evaluate the potential impact of the project. Develop deliverables for the industry partner organization. Communicate findings using reports and presentations. Students must have successfully completed INEG 4913 in the immediate prior semester. Corequisite: Lab component. Prerequisite: INEG 3533, INEG 3553, INEG 3714, INEG 3833, INEG 4433 and INEG 4913. (Typically offered: Spring)

Department of Mechanical Engineering Website (http://mechanicalengineering.uark.edu)

The mechanical engineering program is designed to offer a high-quality course of instruction involving classroom, laboratory, and extracurricular activities that results in graduates who are qualified and prepared to meet the demands of a professional career in the present and future work place and be able to assume a responsible place of leadership in a complex technological society.

The mission of the department is three-fold:
- Teaching - To provide a high-quality educational experience for undergraduate and graduate students that enables them to become leaders in their chosen professions.
- Research - To create, explore, and develop innovations in engineering and science through undergraduate and graduate research.
- Service - To provide beneficial service to the local, state, national, and international industries and communities via educational, technical, entrepreneurial, and professional activities.

The courses offered in mechanical engineering provide the student with a broad understanding of fundamental scientific principles that serve as a background for many fields of specialization. The undergraduate curriculum is designed to stress basic engineering principles and to assist in developing creative thinking. Emphasis is placed on the science and art of designing machines and systems, of converting energy into useful forms, and developing a basic understanding of engineering mechanics.

Completion of the degree requirements provides graduates with the following learning outcomes and ability to:
- Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics;
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors;
- Communicate effectively with a range of audiences;
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts;
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives;
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions; and Student Graduation; and,
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

The BSME Program Educational Objectives are to produce graduates who, within a few years of graduation, are expected to:
1. Contribute to the economic development of Arkansas and the world through the practice of Mechanical Engineering;
2. Meet or exceed the needs and expectations of mechanical engineering employers in industry, government, and private practice;
3. Engage in professional activities that promote the mechanical engineering profession and provide continuing self-development, and develop leadership potential;
4. Succeed in graduate study and research, if pursued; and
5. Become licensed professional engineers, if pursued.

\section*{Requirements for B.S. in Mechanical Engineering}

Requirements for the B.S.M.E.: The Bachelor of Science in Mechanical Engineering curriculum includes, in addition to the required 18 hours of history, government, fine arts/humanities/social science elective courses, a total of 12 hours of technical and science electives. A student must select all electives with the approval of his or her adviser. The fine arts/humanities/social science electives must be selected from the State Minimum Core (p. 81) in the Academic Regulations chapter for university requirements for the program. It is expected that technical and science electives will be chosen to provide a coherent program within one or more areas of specialization or options available to mechanical engineers. Traditional areas of specialization are available in mechanical systems, materials, and energy systems. Other areas include pre-medical, management, and aerospace.

The first-year curriculum is essentially the same as prescribed for all engineering freshmen. Students entering the mechanical engineering
program are required to take two, four hour laboratory based science electives. One of the four hour science electives must be PHYS 2074. The other four hour science elective must be chosen from one of the following:
\begin{tabular}{|c|c|c|}
\hline \begin{tabular}{l}
ASTR 2003 \\
\& ASTR 2001L
\end{tabular} & \begin{tabular}{l}

\end{tabular}

\section*{Fine Arts/Humanities/Social Science Electives}

Students must follow the University Core curriculum in selecting their history, government, fine arts, humanities, and social science electives. Each student in the College of Engineering is required to complete 18 semester hours in the humanities and social sciences.

The courses taken must include:
\begin{tabular}{|c|c|}
\hline HIST 2003 & History of the American People to 1877 (ACTS Equivalency = HIST 2113) \\
\hline or HIST 2013 & History of the American People, 1877 to Present (ACTS Equivalency = HIST 2123) \\
\hline or PLSC 2003 & American National Government (ACTS Equivalency = PLSC 2003) \\
\hline ECON 2143 & Basic Economics: Theory and Practice \\
\hline or ECON 2013 & Principles of Macroeconomics (ACTS Equivalency = ECON 2103) \\
\hline CLST 1003 & Introduction to Classical Studies: Greece \\
\hline \multicolumn{2}{|l|}{or CLST 1003HHonors Introduction to Classical Studies: Greece} \\
\hline or CLST 1013 & Introduction to Classical Studies: Rome \\
\hline or PHIL 2003 & \[
\begin{aligned}
& \text { Introduction to Philosophy (ACTS Equivalency = PHIL } \\
& \text { 1103) }
\end{aligned}
\] \\
\hline or PHIL 2103 & Introduction to Ethics (ACTS Equivalency \(=\) PHIL 1003) \\
\hline or PHIL 21036 & \[
\begin{aligned}
& \text { Introduction to Ethics (ACTS Equivalency = PHIL } \\
& \text { 1003) }
\end{aligned}
\] \\
\hline
\end{tabular}

The remaining three courses must be selected from an approved list. The humanities and social sciences chart from the State Minimum Core (p. 81) page should be used as a guide for selecting these courses.

\section*{Mechanical Engineering Concentration Electives}

The purpose of technical/science electives is to provide students with the opportunity to expand their education along lines of particular interest to them.

As part of the mechanical engineering curriculum, students are required to complete 12 hours of technical/science electives. These electives can be categorized into three groups: Mechanical Engineering Electives, Other Engineering Electives, and Science-Math Electives.
1. Mechanical Engineering Electives. All mechanical engineering courses at or above the 4000 level not already required in the BSME curriculum are acceptable. Special Project courses, MEEG 491V, are allowed as electives only after approval in advance by the department head.
2. Other Engineering Electives. The rules governing the selection of engineering electives are:
Engineering or Computer Science/Computer Engineering courses at or above the 3000 level not already required in the BSME curriculum are allowed as technical-science electives. Courses with content remedial to required courses are not allowed, and courses considered redundant to required courses are not allowed.
3. Science-Math Electives. The approved list of science and math courses accepted as technical-science electives is available HERE (https://mechanical-engineering.uark.edu/Academics/undergraduate-students/forms-and-resources/).

\section*{Mechanical Engineering B.S.M.E. Eight-Semester Degree Program}

The following section contains the list of courses required for the Bachelor of Science in Mechanical Engineering degree and a suggested sequence. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites. Students interested in obtaining a sequencing schedule of courses may contact the Mechanical Engineering office.

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 67) in the Academic Regulations chapter for university requirements of the program.

Either the science elective in the second semester of Year 1 or the science elective in the first semester of Year 2 must include PHYS 2074. Other science electives should be chosen from an approved list. See the mechanical engineering office.

\hline or PHIL 2103 & Introduction to Ethics (ACTS Equivalency = PHIL 1003) \\
\hline or PHIL 2103C & Introduction to Ethics (ACTS Equivalency \(=\) PHIL 1003) \\
\hline
\end{tabular}

The remaining three courses must be selected from an approved list. The humanities and social sciences chart from the State Minimum Core (p. 81) page should be used as a guide for selecting these courses.

\section*{Requirements for Aerospace Concentration: The Aerospace} Concentration in Mechanical Engineering provides students an opportunity to concentrate on engineering and scientific issues associated with aircraft, spacecraft, and space exploration. The Aerospace Concentration consists of the 112-credit hour Mechanical Engineering B.S. core and 12 hours of specified elective courses.

Choose at least two of the following courses:
MEEG 4503 Introduction to Flight
MEEG 4523 Astronautics
MEEG 4433 Aerospace Propulsion
MEEG 5503 Advanced Fluid Dynamics I
MEEG 5533 Fundamentals of Aerodynamics
Choose an additional 6 hours from any of the above courses not yet 6 taken or any following technical elective:

MEEG 4903H Honors Mechanical Engineering Research
MEEG 491V Special Topics in Mechanical Engineering
MEEG 492V Individual Study in Mechanical Engineering
MEEG 5473 Radiation Heat Transfer
ASTR 4033 Astrophysics I: Stars and Planetary Systems
ASTR 4043 Astrophysics II: Galaxies and the Large-Scale Universe
GEOS 3213 Principles of Remote Sensing
SPAC 5033 Astrophysics I: Stars and Planetary Systems

Zhou, Wenchao, Ph.D. (Georgia Institute of Technology), M.S.M.E. (Xi'an Jiaotong University, Xi'an, China), B.S.M.E. (Huazhong University of Science and Technology, Wuhan, China), Associate Professor, 2014, 2020.

Zou, Min, Ph.D., M.S.M.E. (Georgia Institute of Technology), M.S.A.E., B.S.A.E. (Northwestern Polytechnical University), Professor, Twenty-First Century Chair in Materials, Manufacturing and Integrated Systems, 2003, 2013.

\section*{Courses}

MEEG 2003. Statics. 3 Hours.
Equilibrium and resultants of force systems in a plane and in space; analysis of structures, friction, centroids, moments of inertia, and virtual work method. Methods of analysis are emphasized. Corequisite: Drill component. Pre- or Corequisite: MATH 2574 or MATH 2574C. Prerequisite: PHYS 2054. (Typically offered: Fall, Spring and Summer)

\section*{MEEG 2013. Dynamics. 3 Hours.}

Kinematics and kinetics of particle and of rigid bodies; work and energy; impulse and momentum, and special topics. Corequisite: Drill component. Prerequisite: MEEG 2003 and MATH 2574. (Typically offered: Fall, Spring and Summer)

MEEG 2101. Computer-aided Design. 1 Hour.
The concept and application of solid-modeling, based on SolidWorks ComputerAided Design (CAD) software suite, are introduced in this course. They include sketches, parts modeling, assembly of parts, and drawing documentation. Prerequisite: GNEG 1121 or GNEG 1121H or GNEG 1103. (Typically offered: Fall and Spring)

MEEG 2103. Introduction to Machine Analysis. 3 Hours.
Introduction to kinematics and kinetics of mechanisms, static and dynamic forces, gears and cam design and analysis. Recitation three hours per week and drill one hour per week. Corequisite: Drill component. Pre- or Corequisite: MEEG 2013.
Prerequisite: PHYS 2054 and MEEG 2101. (Typically offered: Spring and Summer)

\section*{MEEG 2303. Introduction to Materials. 3 Hours.}

A study of chemical, physical, and electrical properties of materials using fundamental atomistic approach. The materials of interest are: metals, polymers, ceramics, and composites. The interactive relationship between structure, properties, and processing of materials will be emphasized. For various engineering applications. Corequisite: Drill component. Prerequisite: MATH 2554, PHYS 2054 and CHEM 1103. (Typically offered: Fall and Spring)

\section*{MEEG 2403. Thermodynamics. 3 Hours.}

A study of the 1st and 2nd laws of thermodynamics. Availability of energy, properties of liquids, gases, and vapors; nonflow and flow processes. Recitation 3 hours, drill 2 hours per week. Corequisite: Drill component. Prerequisite: PHYS 2054 and MATH 2564. (Typically offered: Fall, Spring and Summer)
MEEG 2703. Computer Methods in Mechanical Engineering. 3 Hours. Use of computers and programming for solving engineering problems. Basic numerical methods including errors, equation solution, matrices, optimization, regression, integration, and differential equations. Corequisite: Drill component. Preor Corequisite: MATH 2584. (Typically offered: Spring and Summer)

\section*{MEEG 3013. Mechanics of Materials. 3 Hours.}

Stress and deformation of members in tension, compression, torsion, and bending, and the design of these members. Columns, statically indeterminate beams, and simple connections. Corequisite: Drill component. Prerequisite: MEEG 2003. (Typically offered: Fall, Spring and Summer)

\section*{MEEG 3013H. Honors Mechanics of Materials. 3 Hours.}

Stress and deformation of members in tension, compression, torsion, and bending, and the design of these members. Columns, statically indeterminate beams, and simple connections. Corequisite: Drill component. Prerequisite: MEEG 2003 and honors standing. (Typically offered: Fall, Spring and Summer)
This course is equivalent to MEEG 3013.
MEEG 3113. Fundamentals of Vibrations. 3 Hours.
Time and frequency domain mathematical techniques for linear system vibrations are reviewed. Undamped system and viscously damped systems are analyzed. Equations of motion of single and multiple degrees-of-freedom systems are studied. Vibration of multi-degree-of-freedom systems are analyzed using modal analysis and modal summation methods. Eigenvalue problems as related vibrations are studied. Corequisite: Drill component. Prerequisite: MEEG 2103, MATH 2584 or MATH 2584C, MEEG 2703, and MEEG 2013. (Typically offered: Fall and Spring)

\section*{MEEG 3202L. Mechanical Engineering Laboratory I. 2 Hours.}

Introduction to measurement, uncertainty, data acquisition, and instrumentation with an emphasis in materials and manufacturing. Corequisite: Drill component. Pre- or Corequisite: MEEG 3013 and ELEG 3903. Prerequisite: MEEG 2303 and PHYS 2074. (Typically offered: Fall and Spring)

\section*{MEEG 3212L. Mechanical Engineering Laboratory II. 2 Hours.}

Design and implementation of measurements, fabrication processes, data acquisition, and data analysis with emphasis in mechanical and fluid systems. Corequisite: Drill component. Prerequisite: MEEG 3202L, MEEG 3503 and MEEG 3113. (Typically offered: Fall and Spring)
MEEG 3223. Introduction to Mechatronics. 3 Hours.
This course is an introduction to design and control the mechatronic system, which requires integration of the mechanical and electrical knowledge within a unified framework. The topics covered in this course include basic electronics, diodes, transistors, power amplifiers, digital logic, operation amplifier, motor design, encoder, and programming in Arduino. Corequisite: Lab component. Prerequisite: MEEG 3202L. (Typically offered: Spring)

\section*{MEEG 3503. Mechanics of Fluids. 3 Hours.}

A study of fluids including fluid properties, pressure, and flow fields utilizing conservation of mass, energy, and momentum principles. Prerequisite: MEEG 2403 or CHEG 2313. Pre- or Corequisite: MATH 2584. (Typically offered: Fall and Summer)

\section*{MEEG 4003. Intermediate Dynamics. 3 Hours.}

Review of central-force motion of spacecraft, use of rotating reference frames, Coriolis acceleration. Kinematics of rigid bodies in 3-D space: velocities and accelerations in different moving reference frames, addition theorem of angular accelerations. Kinetics of rigid bodies in 3-D space: eigenvalues and eigenvectors of inertia matrices, momentum and kinetic energy of a rigid body in 3-D motion, Euler's equations of motion; precession, nutation, and spin of a gyroscope; forced steady precession, torque free steady precession, space cone, and body cone. Prerequisite: MEEG 2013. (Typically offered: Irregular)

MEEG 4023. Composite Materials: Analysis and Design. 3 Hours.
A study of fibrous composite materials with emphasis on mechanical behavior, synthesis, and application. Topics include macro- and micromechanical analysis lamina, lamina theory, failure analysis in design, and manufacturing techniques. Prerequisite: MEEG 3013. (Typically offered: Irregular)

\section*{MEEG 4103. Machine Element Design. 3 Hours.}

This course introduces the static failure theories and fatigue failure theories, and how each of the theories can be applied in practical engineering problems in supporting the selection and design of machine elements. This course also introduces key design concepts, design principles, design process, and design guidelines for four commonly-used machine elements: spring, gear, bearing and shaft. Pre- or Corequisite: MEEG 3113. Prerequisite: MEEG 3013. (Typically offered: Fall, Spring and Summer)

\section*{MEEG 4103H. Honors Machine Element Design. 3 Hours}

This course introduces the static failure theories and fatigue failure theories, and how each of the theories can be applied in practical engineering problems in supporting the selection and design of machine elements. This course also introduces key design concepts, design principles, design process, and design guidelines for four commonly-used machine elements: spring, gear, bearing and shaft. Advanced project required of honors students. Advanced project required. (Typically offered: Fall, Spring and Summer)
This course is equivalent to MEEG 4103.

\section*{MEEG 4123. Finite Element Methods I. 3 Hours.}

Introduction to the use of the finite element method in mechanical engineering analysis and design. Use of commercial software to solve thermal and mechanical problems. Pre- or Corequisite: MEEG 3013 and MEEG 4413. (Typically offered: Irregular)

MEEG 4132. Professional Engineering Practices. 2 Hours.
Design proposal preparation, design codes, professional ethics, engineering economics, and the role of the engineer in society. Pre- or Corequisite: MEEG 4103 or MEEG 4483. (Typically offered: Fall and Spring)

\section*{MEEG 4143. Design for Safety. 3 Hours.}

This course provides an overview of safety engineering and a framework from which the students can evaluate and develop mechanical and thermal systems from a safety perspective. Pre- or Corequisite: MEEG 4413. Prerequisite: MEEG 3013. (Typically offered: Irregular)

\section*{MEEG 4153. Fundamentals of Mechanical Design. 3 Hours.}

This class is designed to provide engineering students with a head start in industry as design engineers or working in an engineering related function. The course contents cover machine design and analysis experiences as related to working in industry and performing consulting work. Major topics include the design process, design procedures, fasteners, general design and numerous consulting experiences. A concept design exercise and two special design projects will be assigned to the students as homework. Prerequisite: MEEG 4103. (Typically offered: Fall)

MEEG 4173. Model-Based Systems Design and Analysis. 3 Hours.
This course provides students with an introduction into the two main approaches to understanding and designing complex engineered systems. First, the course covers the unique technical challenge of systems engineering and design of systems.
Second, the course covers concepts, methods and tools related to "model-based systems design." This covers formal modeling of the information content of complex systems. The third portion of the course will focus on modeling the complex behavior of the systems. This is often described as dynamical systems modeling. Students will utilize the methods and tools presented in class to model a complex engineered system of their choice (with instructor approval). The classes will alternate between presenting modeling methods to the students and students demonstrating their system to the class utilizing those methods. Students may not receive credit for both MEEG 4173 and MEEG 5173. Prerequisite: MEEG 4103 or Instructor consent. (Typically offered: Spring Even Years)

\section*{MEEG 4182. Creative Project Design I. 2 Hours.}

Students will select a capstone design project, and each student group will prepare a formal written proposal on their project for presentation to a panel of judges. This group project will be carried to completion in MEEG 4192. Corequisite: MEEG 4483. Prerequisite: MEEG 4103 and MEEG 3212L. (Typically offered: Fall and Spring)

\section*{MEEG 4192. Creative Project Design II. 2 Hours.}

Students choose their capstone project from a list of approved engineering problems. During the course of two semesters, students will learn and apply the design process along with project management skills to deliver the solution on time and on budget as a team. For the first semester (CP1) the team will focus on design of the best solution and development of a complete engineering package necessary to move forward. In the final semester (CP2) the team will implement and test the performance of their solution. Prerequisite: MEEG 4182. (Typically offered: Fall and Spring)

\section*{MEEG 4202L. Mechanical Engineering Laboratory III. 2 Hours.}

Application of measurement techniques to mechanical engineering problems which emphasize mechanical and thermal systems. Corequisite: Drill component. Pre- or corequisite: MEEG 4483. Prerequisite: MEEG 3212L and MEEG 4103. (Typically offered: Fall, Spring and Summer)

\section*{MEEG 4213. Control of Mechanical Systems. 3 Hours.}

Mathematical modeling for feedback control of dynamic mechanical systems with design techniques using LaPlace transforms, state variables, root locus, frequency analysis, and criteria for performance and stability. Prerequisite: MEEG 3113. (Typically offered: Irregular)

MEEG 4233. Microprocessors in Mechanical Engineering I: Electromechanical Systems. 3 Hours.
Microcomputer architectural, programming, and interfacing. Smart product design (microprocessor-based design). Control of DC and stepper motors and interfacing to sensors. Applications to robotics and real-time control. Mobile robot project. Digital and analog electronics are reviewed where required. Prerequisite: ELEG 3903. (Typically offered: Irregular)

\section*{MEEG 4253. Introduction to Robotics. 3 Hours.}

This course serves as an introduction to robotics. The course covers the historical development of robotics as a field, and as mechatronic systems, the importance of integrating sensors, actuators and end-effectors. Topics covered in this course will include but not limited to the following: mathematical modeling of robots, rigid motions and homogeneous transformation, forward/inverse kinematics, and velocity kinematics. Prerequisite: MEEG 2703, MEEG 3113 and instructor consent. (Typically offered: Fall)

\section*{MEEG 4303. Materials Laboratory. 3 Hours.}

A study of properties, uses, testing, and heat treatment of basic engineering materials and related analytical techniques. Corequisite: Lab component.
Prerequisite: MEEG 2303. (Typically offered: Irregular)

\section*{MEEG 4313. Introduction to Tribology. 3 Hours.}

A study of science and technology of interacting surfaces in relative motion. Topics include solid surface characterization, contact between solid surfaces, adhesion, friction, wear, lubrication, micro/nanotribology, friction and wear screening test methods, and tribological components and applications. Prerequisite: MEEG 3013 and MEEG 3503 or graduate standing. (Typically offered: Irregular)

MEEG 4333. Hybrid Electric Vehicles. 3 Hours.
This course is intended to provide an introduction to basics of hybrid and pure electrical vehicles (mainly passenger cars), covering history, architecture, constituents, working mechanisms, and key technologies. The course focuses on fundamental concepts of different hybrid electrical vehicles (HEVs) and their technical features and highlights the successes of the state-of-the-art pure electrical vehicles (EVs). In addition, this course will introduce various battery technologies used for electrical vehicles, covering traditional batteries, lithium-ion batteries, and batteries beyond lithium-ions. It is appropriate for engineering and natural science students interested in obtaining basic knowledge of hybrid and pure electrical vehicles to prepare for a career in developing alternate energy sources. Prerequisite: ELEG 3903 or BENG 3113, and senior standing. (Typically offered: Spring)

\section*{MEEG 4413. Heat Transfer. 3 Hours.}

Basic thermal energy transport processes; conduction, convection, and radiation; and the mathematical analysis of systems involving these processes in both steady and time-dependent cases. Prerequisite: MEEG 3503. (Typically offered: Spring and Summer)

\section*{MEEG 4423. Power Generation. 3 Hours.}

Study of design and operational aspects of steam, gas, and combined cycle power plants. Brief study of Nuclear and Alternative energy systems. Prerequisite: MEEG 3503. (Typically offered: Irregular)

MEEG 4433. Aerospace Propulsion. 3 Hours.
Principles, operation, and characteristics of gas turbine and rocket engines. Brief study of novel spacecraft propulsion systems. Prerequisite: MEEG 3503. (Typically offered: Irregular)

\section*{MEEG 4453. Industrial Waste and Energy Management. 3 Hours.}

Applications of thermodynamics, heat transfer, fluid mechanics, and electric machinery to the analysis of waste streams and energy consumption for industrial facilities. Current techniques and technologies for waste minimization and energy conservation including energy-consuming systems and processes, utility rate analysis, economic analysis and auditing are taught. Prerequisite: MEEG 4413. (Typically offered: Irregular)

\section*{MEEG 4473. Indoor Environmental Control. 3 Hours.}

Gives student a thorough understanding of the fundamental theory of air conditioning design for commercial buildings, including calculating heating and cooling loads along with the proper selection and sizing of air conditioning equipment. Prerequisite: MEEG 4413. (Typically offered: Irregular)

MEEG 4483. Thermal Systems Analysis and Design. 3 Hours.
Analysis design and optimization of thermal systems and components with examples from such areas as power generation, refrigeration, and propulsion, Availability loss characteristics of energy systems and availability conservation methods. Prerequisite: MEEG 4413. (Typically offered: Fall and Summer)
MEEG 4483H. Honors Thermal Systems Analysis and Design. 3 Hours.
Analysis design and optimization of thermal systems and components with examples from such areas as power generation, refrigeration, and propulsion. Availability loss characteristics of energy systems and availability conservation methods. Additional topics, with an additional design project and /or more rigorous approach to design projects for honors course. Advanced project required. Prerequisite: MEEG 4413
(Typically offered: Fall and Summer)
This course is equivalent to MEEG 4483.

MEEG 4503. Introduction to Flight. 3 Hours.
The course will provide understanding in basic aerodynamics, airfoil design and characteristics, and flight control surfaces. Prerequisite: MATH 2584, MEEG 3503. (Typically offered: Fall)

\section*{MEEG 4503H. Honors Introduction to Flight. 3 Hours.}

The course will provide understanding in basic aerodynamics, airfoil design and characteristics, and flight control surfaces. Prerequisite: MATH 2584 and MEEG 3503. (Typically offered: Fall)
This course is equivalent to MEEG 4503.
MEEG 4523. Astronautics. 3 Hours.
Study of spacecraft design and operations. Prerequisite: MEEG 2013 and MEEG 2403 or consent of instructor. (Typically offered: Irregular)

MEEG 4633. Additive Manufacturing. 3 Hours.
This course provides an overview of developing opportunities and critical challenges of additive manufacturing (AM, also known as 3-D printing). It covers existing and emerging additive manufacturing processes in the context of product design, materials selection and processing, and industrial and consumer applications. Students will learn to take advantage of the new capabilities of additive manufacturing technologies (e.g., design freedom) for existing and new applications and the implementation of their designs in a laboratory through project-based learning. Students may not receive credit for both MEEG 4633 and MEEG 5633. Prerequisite: MEEG 2101, MEEG 2303, MEEG 3013, and MEEG 3503 or instructor consent. (Typically offered: Spring)

\section*{MEEG 4703. Mathematical Methods in Engineering. 3 Hours.}

Determinants, matrices, inverse of a matrix, simultaneous equations, eigenvalues, eigenvectors, coordinate transformations for matrices, diagonalization, square roots of a matrix, cryptography, and method of least squares. Vector algebra and calculus, Green's theorem, Strokes' theorem, and Gauss' divergence theorem. Index notation, epsilon-delta identity, and Cartesian tensors. Curvilinear coordinates, base vectors, and covariant and contravariant tensors. Applications to mechanics. Prerequisite: MATH 2574. (Typically offered: Irregular)

\section*{MEEG 4903H. Honors Mechanical Engineering Research. 3 Hours.} Independent research for mechanical engineering honors students. Prerequisite: Honors standing and instructor consent. (Typically offered: Fall and Spring)
MEEG 491V. Special Topics in Mechanical Engineering. 1-6 Hour. Consideration of current mechanical engineering topics not covered in other courses. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{MEEG 492V. Individual Study in Mechanical Engineering. 1-3 Hour.}

Individual study and research on a topic of mutually agreeable interest to the student and a faculty member. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer)

MEEG 492VH. Honors Individual Study in Mechanical Engineering. 1-3 Hour. Individual study and research on a topic of mutually agreeable interest to the student and a faculty member. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer)
This course is equivalent to MEEG 492V.

\section*{Chemical Engineering (CHEG)}

Keisha B. Walters

Email: hlw@uark.edu
Ralph E. Martin Department of Chemical Engineering Website (https:// chemical-engineering.uark.edu/)

Chemical engineering deals with the creation, design, operation, and optimization of processes that derive practical benefits from chemical or physical changes principally involving chemical and biochemical reactions. The profession is quite broad and has traditionally provided the technology for: supplying energy and fuel; synthesizing materials such as plastics, chemicals, fertilizers, and pharmaceuticals; and managing environmental and safety concerns of physical and chemical processes. Some new applications of the principles of chemical engineering at nanoscales are being made in sustainable energy production and detection of gene mutations, protein configurations, and virus serotypes as well as thermal destruction of cancer cells.

Chemical engineers have a variety of traditional job opportunities in industries such as petroleum production and processing, chemical manufacturing, food processing, pharmaceutical production, and process equipment manufacturing. Job opportunities may involve research, development, design, manufacturing, sales, or teaching as professional activities. The chemical engineer can also move easily into environmental engineering, nuclear engineering, oceanography, biomedical engineering, pharmacology, law, medicine, or other multidisciplinary fields.

In chemical engineering, students obtain a broad foundation in chemistry, mathematics, physics, communication skills, economics, and the humanities. Courses in material and energy balances, thermodynamics, reaction kinetics, fluid mechanics, heat and mass transfer, process control, computer methods, safety, and design provide students with the background and learning skills required of the practicing chemical engineer. The curriculum includes elective courses that enable a student to prepare for immediate employment or further study at the graduate level or the professional level, such as for medical school. The chemical engineering program also serves as an excellent preparation for dental, pharmacy, or law school.

The educational objective of the undergraduate program in the Ralph E . Martin Department of Chemical Engineering is to prepare students for careers and professional accomplishment after graduating, including:
- Successfully practicing as an engineer or in another professional pursuit, including traditional or emerging fields of chemical engineering, to make a positive impact locally and globally.
- Actively involved in professional lifelong learning, both informal and formal, that deepens their knowledge and readiness to contribute to advancing science, technologies and solutions essential for the future, including successfully participating in a graduate or professional program.

The program prepares graduates to achieve these educational objectives through development of their skills as outlined in our educational outcomes and taught in our curriculum.

Completion of the degree requirements provides graduates with the following learning outcomes:
- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- An ability to apply the engineering design process to produce solutions that meet specified needs with consideration for public
health and safety, and for global, cultural, social, environmental, economic, and other factors as appropriate to the discipline
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- An ability to communicate effectively with a range or audiences
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- An ability to recognize the ongoing need to acquire new knowledge, to choose appropriate learning strategies, and to apply this knowledge
- An ability to function effectively as a member or leader of a team that establishes goals, plans tasks, meets deadlines, and creates a collaborative and inclusive environment

\section*{Requirements for B.S. in Chemical Engineering}

Each student in chemical engineering is required to complete 128 hours of coursework including the 35-hour University Core. To be eligible for graduation, all students must complete at least 30 hours of Chemical Engineering (CHEG) classes at the University of Arkansas, Fayetteville that are required for the degree. Each student in chemical engineering is also required to complete six semester hours of technical electives, three semester hours of Advanced Science electives, three semester hours of Chemical Engineering electives, and three semester hours of Advanced Science or Chemical Engineering electives. As discussed in the department's Undergraduate Advising Manual, students can select elective courses to better prepare for employment or further study in areas such as:
- Biotechnology
- Biomedical engineering
- Environmental engineering
- Food process engineering
- Materials engineering
- Microelectronics
- Nanotechnology
- Nuclear engineering
- Pre-medicine
- Simulation and optimization

Additional opportunities are available to enhance the educational experience of students in these areas. Students should consult their academic adviser for recommendations.

\section*{Chemical Engineering B.S.Ch.E. Eight-Semester Degree Program}

The following section contains the list of courses required for the Bachelor of Science in Chemical Engineering degree. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites. Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 67) in the Academic Regulations chapter for university requirements of the program. Entering freshmen will be required to participate in selected Freshman Engineering Student Services.

Chemical Engineering Elective
Year Total:
Total Units in Sequence:
14
Students have demonstrated successful completion of the learning
indicators identified for learning outcome 2.1, by meeting the
prerequisites for MATH 2554.
2 The Fine Arts Elective courses which satisfy General Education
Outcome 3.1 include: ARCH 1003, ARHS 1003, COMM 1003,
DANC 1003, LARC 1003, MLIT 1003, MLIT 1003H, MLIT 1013,
MLIT 1013H, MLIT 1333, THTR 1003, THTR 1013, or THTR 1013H.
The Social Sciences Elective courses which satisfy General
Education Outcomes 3.3 and 4.1 include: ANTH 1023, COMM 1023,
HDFS 1403, HDFS 2413, HIST 1113, HIST 1123, HIST 2093,
HUMN 1114H, HUMN 2114H, INST 2813, INST 2813H, PLSC 2013,
PLSC 2813, PLSC 2813H, RESM 2853, SOCI 2013, SOCI 2013H, or
SOCI 2033.
The Humanities Elective courses which satisfy General Education
Outcomes 3.2 and 5.1 include: CLST 1003, CLST 1003H, CLST 1013,
HUMN 1124H, PHIL 2003, PHIL 2003C, PHIL 2003H, PHIL 2103, or
PHIL 2103C.
The Social Sciences Elective courses which satisfy General Education
Outcome 3.3 include: AGEC 1103, AGEC 2103, ANTH 1023,
COMM 1023, ECON 2013, ECON 2023, ECON 2143, EDST 2003,
HDFS 1403, HDFS 2413, HDFS 2603, HIST 1113, HIST 1113H,
HIST 1123, HIST 1123H, HIST 2003, HIST 2013, HIST 2093,
HUMN 1114H, HUMN 2114H, INST 2813, INST 2813H, PLSC 2003,
PLSC 2013, PLSC 2203, PLSC 2813, PLSC 2813H, PSYC 2003,
RESM 2853, SOCI 2013, SOCI 2013H, SOCI 2033. Note, courses
cannot be counted twice in degree requirements.

\section*{Elective Options in Chemical Engineering}

Each student in chemical engineering is required to complete six semester hours of technical electives and nine semester hours of Advanced Science electives. At least three semester hours must be taken from the list of Science Electives.

\section*{Technical Electives}

In general, any upper level (3000-level or above) course in the sciences, math or engineering may serve as a technical elective, with prior approval by your academic adviser. BIOL 2013, BIOL 2213, BIOL 2323 and BIOL 2443 are 2000-level courses that can also serve as technical electives, and are also useful for students applying to medical school. INEG 2333, INEG 2413 and INEG 3513 are statistics-oriented classes, and may be used for technical elective credit. Upper-level courses in nontechnical areas such as business may also serve as technical electives with prior approval by your academic adviser. There is no specific list of approved technical electives.

\section*{Advanced Science and Chemical Engineering Electives}

A list of the approved Advanced Science or Chemical Engineering courses is shown below. Once again, each student in chemical engineering is required to complete nine semester hours of Advanced Science electives. At least three semester hours must be taken from the list of Science electives. Courses not on the list may satisfy the requirement with student appeal and approval by the Chemical Engineering faculty.
CHEM 3203 Forensic Chemistry 3CHEM 3453 Elements of Physical Chemistry 3CHEM 3504 Physical Chemistry I 4
CHEM 3514 Physical Chemistry II 4
CHEM 4123 Advanced Inorganic Chemistry I 3
CHEM 4211L Instrumental Analysis Laboratory 1
CHEM 4213 Instrumental Analysis 3
CHEM 4283 Energy Conversion and Storage 3
CHEM 4843H Honors Biochemistry II 3
CHEM 4853 Biochemical Techniques 3
CHEM 5283 Energy Conversion and Storage 3
FDSC 4304 Food Chemistry 4
PHYS 3113 Analytical Mechanics 3
PHYS 3453 Electromagnetic Theory I 3
PHYS 3463 Electromagnetic Theory II 3
PHYS 3544 Optics 4
PHYS 3603 Introduction to Modern Physics 3
PHYS 360VL Introduction to Modern Physics Laboratory 1-3
PHYS 3613 Modern Physics 3
PHYS 4073 Introduction to Quantum Mechanics 3
PHYS 4333 Thermal Physics 3
PHYS 4613 Introduction to Biophysics and Biophysical 3

\section*{Chemical Engineering Electives}
- Any graduate Chemical Engineering class (excluding seminar)-instructor permission is required
- Any senior level Chemical Engineering elective class excluding research, co-op/internship, special problem or ChE Car

Students are encouraged to select elective courses to better prepare for employment or further study in areas such as:
- Biotechnology
- Biomedical engineering
- Environmental engineering
- Food process engineering
- Materials engineering
- Microelectronics
- Nanotechnology
- Nuclear engineering
- Pre-medicine
- Simulation and optimization

Additional opportunities are available to enhance the educational experience of students in these areas. Students should consult their academic adviser for recommendations.

\section*{Honors Program Requirements}

Chemical engineering students enrolled in the Honors College are encouraged to complete the requirements to graduate with honors. In
addition to grade point requirements, Honors College students must complete a total of at least 12 hours of honors course credits including a minimum of 6 hours of honors course credits in chemical engineering. The student must also participate in a design or research project culminating in an Honors Thesis. Thesis credit in the department will be satisfied by Honors College students in one of the following ways:
- Completion of the American Institute of Chemical Engineers Design Competition Problem individually following contest rules as part of CHEG 4443 Design II;
- Completion of a design contest problem as part of a team, such as the WERC competition in CHEG 4443 Design II; or
- Completion of CHEG 488V Special Problems at the direction of a faculty mentor.

Regardless of the thesis project, an Honors Thesis and oral presentation will be prepared by the student and approved by the Department Honors Committee and the faculty mentor.

Ackerson, Michael D., Ph.D. (University of Arkansas), M.S., B.S. (University of Missouri-Rolla), Associate Professor, 1986, 1997.
Almodovar Montanez, Jorge L., Ph.D. (Colorado State University), Associate Professor, Ralph E. Martin Professorship in Chemical Engineering, 2018.
Beitle, Karen, M.S.(University of Arkansas), B.S. (University of Pittsburgh), Instructor, .
Beitle, Robert R., Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Pittsburgh), Professor, Jim L. Turpin Professorship in Chemical Engineering, 1993, 2006.

Clausen, Ed, Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Missouri-Rolla), University Professor, Charles W. Oxford Professorship in Chemical Engineering, 1981, 2018.
Hestekin, Christa, Ph.D. (Northwestern University), B.S.Ch.E. (University of Kentucky), Associate Professor, Ansel and Virginia Condray Endowed Professorship in Chemical Engineering, 2006, 2013.
Hestekin, Jamie A., Ph.D. (University of Kentucky), B.S.Ch.E. (University of Minnesota-Duluth), Professor, Maurice E. Barker Chair in Chemical Engineering, 2006, 2017.
Kim, Daesoo, Ph.D., M.S. (University of Arkansas), B.S. (Suncheon National University), Instructor, 2022.
Monroe, Jacob, Ph.D. (University of California, Santa Barbara), B.S. (University of Virginia), Assistant Professor, Ray C. Adam Endowed Chair in Chemical Engineering, .
Mourot, Michael, B.S. (University of Arkansas), Instructor, .
Nayani, Karthik, Ph.D. (Georgia Institute of Technology), B.S.Ch.E. (Indian Institute of Technology, Kanpur), Assistant Professor, 2020.
Richardson, Will, Ph.D. (Texas A\&M University), B.S. (University of Arkansas), Associate Professor, Bates Teaching Professorship in Chemical Engineering,
Spicer, Tom O., Ph.D., M.S., B.S. (University of Arkansas), Professor, Robert E. Babcock Sr. Professorship in Chemical Engineering, 1981, 1997.

Vega, Jose L., Ph.D. (University of Arkansas), M.S., Licenciatura (Universidad de Santiago de Compostela), Instructor, 2020.
Walker, Heather L., Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Arkansas), Teaching Assistant Professor, 2008, 2014.
Walters, Keisha, Ph.D., M.S., B.S. (Clemson University), Professor, Kevin W. and Marie L. Brown Department Head Chair in Chemical Engineering, Ralph E. Martin Leadership Chair in Chemical Engineering, 2021.

Wickramasinghe, Ranil, Ph.D. (University of Minnesota-Twin Cities), M.S., B.S. (University of Melbourne, Australia), Distinguished Professor, Ross E. Martin Chair in Emerging Technologies, 2011, 2021.

\section*{Courses}

CHEG 2113. Introduction to Chemical Engineering I. 3 Hours.
Introduction to the field of chemical engineering. Industries, careers, and the curriculum are discussed. Basic chemical engineering terms, concepts, and calculations are presented. Mass balance calculations are performed and the application of computers to chemical engineering problems is introduced. Pre- or Corequisite: CHEM 1123 or CHEM 1223. (Typically offered: Fall and Spring)

CHEG 2133. Fluid Mechanics. 3 Hours.
Analysis and design of fluids handling equipment and systems. Application of the principles of fluid statics, fluid dynamics, compressible flow, etc. Prerequisite: MATH 2584 or MATH 2584C. Pre- or Corequisite: MATH 2574 or MATH 2574C and (CHEG 2113 or BENG 2632 or BMEG 2614). (Typically offered: Fall, Spring and Summer)

\section*{CHEG 2133H. Honors Fluid Mechanics. 3 Hours.}

Analysis and design of fluids handling equipment and systems. Application of the principles of fluid statics, fluid dynamics, compressible flow, etc. Prerequisite: MATH 2584 or MATH 2584C. Pre- or Corequisite: MATH 2574 or MATH 2574C and (CHEG 2113 or BENG 2632 or BMEG 2614). (Typically offered: Fall, Spring and Summer)

This course is equivalent to CHEG 2133.
CHEG 2313. Thermodynamics of Single-Component Systems. 3 Hours. A detailed study of the thermodynamic "state principles," energy and entropy balances, and their application to the solution of problems involving singlecomponent physical systems and processes. Prerequisite: MATH 2584. Pre- or Corequisite: CHEG 2113 or BENG 2632 or BMEG 2614. (Typically offered: Fall, Spring and Summer)

CHEG 2313H. Honors Thermodynamics of Single-Component Systems. 3 Hours.

A detailed study of the thermodynamic "state principles," energy and entropy balances, and their application to the solution of problems involving singlecomponent physical systems and processes. Prerequisite: MATH 2584. Pre- or Corequisite: CHEG 2113 or BENG 2632 or BMEG 2614. (Typically offered: Fall, Spring and Summer)
This course is equivalent to CHEG 2313.

\section*{CHEG 3144. Heat and Mass Transfer. 4 Hours.}

Applications of the principles of conduction, convection and radiation to the analysis and design of chemical processing heat transfer equipment and systems. Fundamentals of chemical diffusional and convection processes. Pre- or Corequisite: CHEG 3323. Prerequisite: CHEG 2133 with a C or above, and MATH 2584. (Typically offered: Fall and Spring)

\section*{CHEG 3144H. Honors Heat and Mass Transfer. 4 Hours.}

Applications of the principles of conduction, convection and radiation to the analysis and design of chemical processing heat transfer equipment and systems. Fundamentals of chemical diffusional and convection processes. Pre- or Corequisite: CHEG 3323. Prerequisite: CHEG 2133 with a C or above, and MATH 2584.
(Typically offered: Fall and Spring)
This course is equivalent to CHEG 3144.

\section*{CHEG 3233L. Chemical Engineering Laboratory I. 3 Hours.}

Experimental measurements of various physical properties and comparison with published values and theoretical predictions. Experimental investigation of fluid flow and thermodynamics. Interpretation of results using graphical, numerical and statistical tools, and presentation of results in written technical reports and oral briefings. Identification and quantification of sources of experimental error. Identification of relevant experimental parameters to achieve an objective. Pre- or Corequisite: CHEG 3144. Corequisite: Drill component. Prerequisite: CHEG 2133 and CHEG 2313, both with a C or above. (Typically offered: Fall and Spring)

CHEG 3253. Chemical Engineering Computer Methods. 3 Hours.
Application of computer methods to chemical engineering problems including a review of structured programming principles. Corequisite: Drill component. Pre- or Corequisite: CHEG 3144 and CHEG 3323. Prerequisite: MATH 2584. (Typically offered: Fall and Spring)

CHEG 3323. Thermodynamics of Multi-Component Systems. 3 Hours.
The use of the state principle and energy and entropy balance developed in CHEG 2313 is extended to allow processes. Physical and chemical equilibrium processes are considered in detail. Prerequisite: CHEG 2313 with a C or above, and MATH 2574. (Typically offered: Fall and Spring)

CHEG 3323H. Honors Thermodynamics of Multi-Component Systems. 3 Hours. The use of the state principle and energy and entropy balance developed in CHEG 2313 is extended to allow processes. Physical and chemical equilibrium processes are considered in detail. Prerequisite: Honors standing, CHEG 2313 with a C or above, and MATH 2574. (Typically offered: Fall and Spring)
This course is equivalent to CHEG 3323.

\section*{CHEG 3333. Chemical Engineering Reactor Design. 3 Hours.}

Principles of kinetics of homogeneous and heterogeneous reactions, catalysis, and reactor design with applications, drawn from industrial processes. Pre- or Corequisite: CHEG 3253. Prerequisite: CHEG 3323, with a C or above. (Typically offered: Fall and Spring)

CHEG 3333H. Honors Chemical Engineering Reactor Design. 3 Hours.
Principles of kinetics of homogeneous and heterogeneous reactions, catalysis, and reactor design with applications, drawn from industrial processes. Pre- or
Corequisite: CHEG 3253. Prerequisite: Honors standing, and CHEG 3323 with a C or above. (Typically offered: Fall and Spring)
This course is equivalent to CHEG 3333.

\section*{CHEG 3713. Chemical Engineering Materials Technology. 3 Hours}

Selection of metals, polymers and ceramics for service in process conditions (including corrosion). In addition to static strains on materials, specialized materials such as semiconductors,, composites, and nano-materials are studied. The relationship between molecular structure and macroscopic properties is emphasized including processing and manufacture. Prerequisite: CHEG 3323 with a C or above, CHEM 3603, and PHYS 2054. (Typically offered: Spring)

CHEG 4163. Separation Processes. 3 Hours.
Applications of chemical engineering design to stagewise and continuous separations in systems approaching equilibrium. Prerequisite: CHEG 3144 with a C or above. (Typically offered: Fall and Spring)

CHEG 4163H. Honors Separation Processes. 3 Hours.
Applications of chemical engineering design to stagewise and continuous separations in systems approaching equilibrium. Prerequisite: Honors standing and CHEG 3144 with a C or above. (Typically offered: Fall and Spring)
This course is equivalent to CHEG 4163.

\section*{CHEG 4332L. Chemical Engineering Laboratory II. 2 Hours.}

Experimental investigations of mass transfer and kinetics/reactor design. Special attention to attaining a high order of accuracy and to presenting results in complete written reports, with emphasis on quality rather than quantity work performed.
Pre- or Corequisite: CHEG 3333 and CHEG 4163. Corequisite: Drill component. Prerequisite: CHEG 3233L with a C or above. (Typically offered: Fall and Spring)

CHEG 4413. Chemical Engineering Design I. 3 Hours.
Principles of cost estimation, profitability, economic analysis, and economic balances as practiced in the chemical process industries. Special emphasis on the solution of problems involving the combination of engineering principles and economics. Corequisite: Drill component. Pre- or Corequisite: CHEG 4163. Prerequisite: CHEG 3144 with a C or above, CHEG 3333 with a C or above, and (ECON 2013 or ECON 2143). (Typically offered: Fall and Spring)

CHEG 4413H. Honors Chemical Engineering Design I. 3 Hours.
Principles of cost estimation, profitability, economic analysis, and economic balances as practiced in the chemical process industries. Special emphasis on the solution of problems involving the combination of engineering principles and economics. Corequisite: Drill component. Pre- or Corequisite: CHEG 4163. Prerequisite: Honors standing, CHEG 3144 with a C or above, CHEG 3333 with a C or above, and (ECON 2013 or ECON 2143). (Typically offered: Fall and Spring) This course is equivalent to CHEG 4413.

\section*{CHEG 4423. Automatic Process Control. 3 Hours.}

Application of mathematical modeling methods to the description of transient phenomena of interest to process engineers. Modes of control and principles of feedback control are introduced with applications to process engineering problems. Pre- or Corequisite: CHEG 4163. Prerequisite: CHEG 3253 with a C or above. (Typically offered: Spring)

\section*{CHEG 4423H. Honors Automatic Process Control. 3 Hours.}

Application of mathematical modeling methods to the description of transient phenomena of interest to process engineers. Modes of control and principles of feedback control are introduced with applications to process engineering problems. Pre- or Corequisite: CHEG 4163. Prerequisite: Honors standing, and CHEG 3253 with a C or above. (Typically offered: Spring)
This course is equivalent to CHEG 4423.
CHEG 4443. Chemical Engineering Design II. 3 Hours.
Responsibility for decision making is placed on the students in the solution of a comprehensive, open ended problem based on an industrial process. Both formal oral and formal written presentation of results are required. Students are selected for participation in some sections of the course based on academic performance, honors standing and instructor recommendations. Corequisite: Drill component. Prerequisite: CHEG 4413 with a C or above. (Typically offered: Fall and Spring)

CHEG 4443H. Honors Chemical Engineering Design II. 3 Hours.
Responsibility for decision making is placed on the students in the solution of a comprehensive, open ended problem based on an industrial process. Both formal oral and formal written presentation of results are required. Students are selected for participation in some sections of the course based on academic performance, honors standing and instructor recommendations. Corequisite: Drill component. Prerequisite: CHEG 4413 with a C or above. (Typically offered: Fall and Spring) This course is equivalent to CHEG 4443.

\section*{CHEG 4813. Chemical Process Safety. 3 Hours.}

Application of chemical engineering principles to the study of safety, health, and loss prevention. Fires and explosions, hygiene, toxicology, hazard identification, and risk assessment in the chemical process industries. Corequisite: Drill component. Prerequisite: CHEG 3144 and CHEG 3323, both with a C or above. (Typically offered: Fall)

CHEG 4813H. Honors Chemical Process Safety. 3 Hours.
Application of chemical engineering principles to the study of safety, health, and loss prevention. Fires and explosions, hygiene, toxicology, hazard identification, and risk assessment in the chemical process industries. Corequisite: Drill component. Prerequisite: Honors standing, CHEG 3323 and CHEG 3144 both with a C or above. (Typically offered: Fall)
This course is equivalent to CHEG 4813.

\section*{CHEG 488V. Special Problems. 1-6 Hour.}

Special problems. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{Reserve Officers' Training Corps}

The Reserve Officers' Training Corps (ROTC) programs at the University of Arkansas provide physical and mental challenges that are not offered anywhere else on campus. The ROTC programs prepare young men and women for careers as professional military officers. In addition to academic studies, each service requires that all students attend a weekly leadership laboratory.

The freshman and sophomore courses are electives offered to male and female students who may earn four hours of academic credit in Aerospace Studies or up to six hours in Military Science. Absolutely no military obligation is incurred by non-scholarship students as a result of their enrollment in or completion of any or all of their freshman or sophomore ROTC courses.

\section*{Air Force ROTC}

Professor of Aerospace Studies
Lieutenant Colonel James W. Malloy III
319 Memorial Hall, 479-575-3651
Email: rotc030@uark.edu
Air Force ROTC Website (http://afrotc.uark.edu/)
The University of Arkansas hosts the award-winning Air Force ROTC Detachment 030, ThunderHawgs, part of a nationwide program that allows students to pursue commissions as officers in the United States Air Force while simultaneously attending college. Students can register through normal course registration processes.

Air Force ROTC consists of four years of Aerospace Studies classes:
\begin{tabular}{lll} 
AERO 1011 & \begin{tabular}{l} 
Heritage and Values of the United States Air Force
\end{tabular} & 1 \\
AERO 1021 & \begin{tabular}{l} 
Heritage and Values of the United States Air Force \\
II
\end{tabular} & 1 \\
AERO 2011 & Team and Leadership Fundamentals I & 1 \\
AERO 2021 & Team and Leadership Fundamentals II & 1 \\
AERO 3013 & Leading People and Effective Communication I & 3 \\
AERO 3023 & Leading People and Effective Communication II & 3 \\
AERO 4013 & \begin{tabular}{l} 
National Security Affairs and Preparation for Active \\
Duty I
\end{tabular} & 3 \\
AERO 4023 & \begin{tabular}{ll} 
National Security Affairs and Preparation for Active \\
& Duty II
\end{tabular} & 3
\end{tabular}

And a corresponding Leadership Laboratory for each year, at which students apply leadership skills, demonstrate command and effective communication, develop physical fitness, and practice military customs and courtesies.

College students enrolled in the Air Force ROTC program (known as "cadets") who successfully complete both Air Force ROTC training and college degree requirements will graduate and simultaneously commission as Second Lieutenants in the Active Duty Air Force.

Additional information about Air Force ROTC can be found on the web at www.afrotc.com (http://www.afrotc.com/).

\section*{Courses}

AERO 1011. Heritage and Values of the United States Air Force I. 1 Hour.
A survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force. Leadership LAB mandatory for cadets. Corequisite: Lab component. (Typically offered: Fall)
AERO 1021. Heritage and Values of the United States Air Force II. 1 Hour. A survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force. Leadership LAB mandatory for cadets. Corequisite: Lab component. (Typically offered: Spring)

AERO 2011. Team and Leadership Fundamentals I. 1 Hour.
This course focuses on laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The course will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate. Corequisite: Lab component. (Typically offered: Fall)
AERO 2021. Team and Leadership Fundamentals II. 1 Hour.
This course focuses on laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The course will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate. Prerequisite: AERO 2011. Corequisite: Lab component. (Typically offered: Spring)
AERO 3013. Leading People and Effective Communication I. 3 Hours. This course teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and communication. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors. Corequisite: Lab component. (Typically offered: Fall)
AERO 3023. Leading People and Effective Communication II. 3 Hours. This course teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and communication. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors. Corequisite: Lab component. (Typically offered: Spring)

AERO 4013. National Security Affairs and Preparation for Active Duty I. 3 Hours.
This course is designed for college seniors and gives them the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. The final semester provides information that will prepare the cadets for Active Duty. Corequisite: Lab component. (Typically offered: Fall)
AERO 4023. National Security Affairs and Preparation for Active Duty II. 3 Hours.
This course is designed for college seniors and gives them the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. The final semester provides information that will prepare the cadets for Active Duty. Corequisite: Lab component. (Typically offered: Spring)

Toll Free: 1-866-891-5538, Fax: 479-575-5855
Email: armyrotc@uark.edu
Army ROTC Website (http://armyrotc.uark.edu/)
Army ROTC teaches you how to lead. It is one of the best leadership courses in the country and you can make it a part of your academic curriculum here at the University of Arkansas. Army ROTC is an elective curriculum you take along with your required college courses that gives you the tools, training and experiences that will help you succeed in any competitive environment. Participation in the Army ROTC program while pursuing your academic degree offers you the opportunity to earn a commission as a second lieutenant and serve on active duty or in the National Guard or Army Reserve upon graduation.

The traditional four-year Army ROTC Program is divided into a two-year basic course (1000- and 2000-level Military Science classes) and a twoyear advanced course (3000- and 4000-level Military Science classes). Students may enroll in the basic course without incurring any military service obligation.

\section*{Basic Course Requirements}

The first two years of instruction introduce the student to fundamental military and leadership subjects. Students normally take the basic course sequence over four successive semesters, but the basic courses can be completed in as few as two semesters. Students should discuss available options with the Recruitment and Operations Officer before registering for courses if they have fewer than four semesters to complete the basic course.

The regular curriculum consists of a lecture and lab each semester. Freshmen are encouraged to take MILS 1001 Introduction to the Army in the fall and MILS 1011 Foundations of Agile and Adaptive Leadership in the spring. Both classes are 1 credit hour classes that have 1 hour of classroom instruction and 2 hours of lab per week. Sophomores are encouraged to take MILS 2002 Leadership and Decision Making in the fall and MILS 2012 Army Doctrine and Team Development in the spring. Both of the 2000-level classes are 2 credit hour classes that have 2 hours of classroom instruction and 3 hours of lab per week. Labs provide the opportunity for the practical application of leadership concepts and tactical military skills training such as map reading, land navigation, field training, and rifle/pistol marksmanship.

\section*{Advanced Course Requirements}

Students who have completed the basic course sequence or an equivalency (see Two-Year Program), have met all enrollment eligibility criteria continue into the advanced course. To enroll in the advanced course, students must meet eligibility and age requirements, be physically qualified, have two academic years to complete before graduation or reception of a graduate degree, have a minimum grade point average of 2.0, be accepted by the professor of military science, and be a U.S. citizen. This advanced course curriculum consists of the following courses that include corresponding leadership labs, physical fitness training sessions, and a four-week summer camp (Advanced Camp) at Fort Knox, Kentucky.

Course List
MILS 3004 Applied Leadership I 4
MILS 3014 Applied Leadership II 4
\begin{tabular}{lll} 
MILS 4004 & Advanced Leadership I & 4 \\
MILS 4014 & Advanced Leadership II & 4
\end{tabular}

During labs and physical training sessions students receive practical leadership opportunities to prepare them for summer camp and their future military careers. Students normally attend Advanced Camp in the summer between their junior and senior years. Students must complete all of the courses listed above and satisfactorily complete Advanced Camp to earn a commission.

Army ROTC students who receive an Army ROTC scholarship or enter the Army ROTC Advanced Course must agree to complete a period of service with the U.S. Army. You can serve full time in the Army for three years (four years for scholarship winners). Selected cadets may choose to serve part time in the U.S. Army Reserve or Army National Guard while pursuing a civilian career.

\section*{Two-Year Program}

Students who are veterans, members of the Army National Guard/ Army Reserve, or who have participated in the Junior Reserve Officers' Training Corps Program in high school may qualify for direct entry into the advanced course with the approval of the Professor of Military Science. Students who did not complete the ROTC basic course curriculum (see above) but have two years of academic study remaining may be eligible to attend Basic Camp to satisfy the basic course requirements. Basic Camp, held at Fort Knox, Kentucky, during the summer, introduces the student to the Army and covers the requirements for the basic course in 28 days. Students who believe they qualify for this program should consult with the Scholarship and Enrollment Officer for more information.

\section*{Scholarships}

Qualified students may compete for Army ROTC scholarships ranging from two to four years in duration. The Army provides scholarships for those who desire to serve on Active Duty, in the National Guard, or in the Army Reserve. Students must be enrolled and participating in Army ROTC to be eligible for scholarships. Scholarships are merit based and pay full tuition and fees (both in and out-of-state) or room and board (capped at \(\$ 5,000 /\) semester) but not both, \(\$ 600\) per semester for textbooks and laboratory expenses, and a tax fee subsistence stipend of \(\$ 300-\$ 500\) for each month of the regular school year depending on Military Science level. Interested students should consult with the Scholarship and Enrollment Officer for more detailed information concerning the scholarship eligibility requirements. For additional information about Army ROTC, students may contact Mr. Oscar Rayford in the Department of Military Science, 479-575-5853, olrayfor@uark.edu.

\section*{Courses}

\section*{MILS 1001. Introduction to the Army. 1 Hour.}

This course focuses on small group leadership and introducing the student to the Army as an organization. Students learn time management, drill and ceremony, military customs and courtesies, basic map reading, water safety and first aid. Introduction to the organization, values, ethics, personal development and the role of the Army. Classroom 1 hour per week. Lab 2 hours per week. Corequisite: Lab component. (Typically offered: Fall)

MILS 1011. Foundations of Agile and Adaptive Leadership. 1 Hour. Continuation of MILS 1001. Topics include the Army Profession and what it means to be a professional in the U.S. Army, the Army Leadership Requirements Model, intermediate map reading/orienteering, and basic field craft. Classroom 1 hour per week. Lab 2 hours per week. Corequisite: Lab component. (Typically offered: Spring)

MILS 1101. Basic Marksmanship. 1 Hour.
Introduction to safe use of a rifle and practical application of rifle marksmanship. Course includes weapons safety, mechanics, capabilities, and fundamentals of marksmanship. Includes visit to fire at a local indoor rifle range. Materials and equipment furnished by Department of Military Science. (Typically offered: Fall)

MILS 2002. Leadership and Decision Making. 2 Hours.
This course focuses on basic Army leadership doctrine and develops the student's skills by introducing them to small unit tactics. Students learn to apply critical thinking and problem solving by using Troop Leading Procedures (TLP). Additional topics include the value of diversity, understanding the officer`s role in leading change, management skills, and the fundamentals of the Army as a profession. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: MILS 1001 and MILS 1011 or departmental consent. (Typically offered: Fall)

MILS 2012. Army Doctrine and Team Development. 2 Hours.
Continuation of MILS 2002. Topics include Troop Leading Procedures (TLP), time management, military writing, and basic tactics. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: MILS 1001, MILS 1011, and MILS 2002 or departmental consent. (Typically offered: Spring)
MILS 2101. Advanced Rifle Marksmanship. 1 Hour.
Course to teach students the fundamentals of Advanced Rifle Marksmanship. Class is conducted once a week with topics including: Air rifle, small bore firing, advanced practical exercises of different shooting positions and marksmanship competition with other universities. Prerequisite: MILS 1101. (Typically offered: Spring)

\section*{MILS 3004. Applied Leadership I. 4 Hours.}

This course focuses on the development of managerial and leadership abilities and the practical application of these skills during 'hands-on' training. Students learn advanced infantry tactics and demonstrate their leadership potential using this medium. Students are required to lead in drill and ceremony, physical training, and tactical situations. This course prepares the student to excel at the ROTC Advanced Camp (normally attended during the summer between the junior and senior year). One 48 hour weekend field training exercise is required per semester. Lecture 2 hours, laboratory 3 hours, physical training 3 hours (conducted Tuesday - Thursday) per week. Corequisite: Lab component. Prerequisite: Departmental consent and (MILS 1001, MILS 1011, MILS 2002, and MILS 2012; or completion of Army ROTC Basic Camp; or completion of basic training with any component of the U.S. Armed Forces). (Typically offered: Fall)

\section*{MILS 3014. Applied Leadership II. 4 Hours.}

Continuation of MILS 3004. This course prepares the student to excel at the ROTC Advanced Camp (normally attended during the summer between the junior and senior year). Requirements include one 48 hour weekend field training exercise per semester. Lecture 2 hours, laboratory 3 hours, physical training 3 hours (conducted Tuesday - Thursday) per week. Corequisite: Lab component. Prerequisite: Departmental consent and MILS 1001, MILS 1011, MILS 2002, MILS 2012 and MILS 3004; or completion of Army ROTC Basic Camp; or completion of basic training with any component of the U.S. Armed Forces. (Typically offered: Spring)

\section*{MILS 4001. Advanced Military Issues. 1 Hour.}

Individual study for advanced undergraduates. Students will research, write a paper, and give an oral presentation of a current military issue. Prerequisite: PMS approval. (Typically offered: Fall and Spring)

MILS 4004. Advanced Leadership I. 4 Hours.
This course focuses on the study of various military organizations and their role in military operations. Discussion of command and staff management in military organizations, executive responsibility of Army commissioned officers, service customs, courtesies, and traditions. The senior year includes the study of personnel management, professional ethics, the military justice system, and the Army's training and maintenance management system. This course prepares students to assume responsibilities as a commissioned officer upon graduation. One 48 hour weekend field training exercise is required per semester. Lecture 2 hours, laboratory 3 hours, physical training 3 hours (conducted Tuesday - Thursday) per week. Corequisite: Lab component. Prerequisite: Departmental consent and MILS 3004 and MILS 3014. (Typically offered: Fall)

\section*{MILS 4011. Advanced Military Correspondence. 1 Hour.}

Practicum for advanced undergraduates. Students submit prepared military correspondence projects written in the military style using military forms and formats. Prerequisite: PMS approval. (Typically offered: Fall and Spring)

\section*{MILS 4014. Advanced Leadership II. 4 Hours.}

Continuation of MILS 4004. This course prepares students to assume responsibilities as a commissioned officer upon graduation. One 48 hour weekend field training exercise is required per semester. Lecture 2 hours, laboratory 3 hours, physical training 3 hours (conducted Tuesday - Thursday) per week. Corequisite: Lab component. Prerequisite: Departmental consent and MILS 3004, MILS 3014 and MILS 4004. (Typically offered: Spring)

\section*{The Service Learning Initiative}

The Service Learning Initiative is a joint initiative between the University of Arkansas Provost Office, the Honors College, and the Division of Student Affairs. Service learning builds critical thinking skills while engaging in academic courses that promote experiential, community-based activities. Formulized service learning courses must meet the committee-approved service learning definition and criteria, and be approved for designation by the Service Learning Committee.

\section*{Service Learning Definition}

Service learning is a credit-bearing, faculty-directed, teaching-learning experience that is course specific. Service Learning strengthens academic content knowledge and sense of civic responsibility. Students build critical thinking skills as they engage in experiential, community-based activities that are aligned with and integral to academic course work. At the same time, the community (real people in real situations) benefits from assistance that would otherwise not be available.

\section*{Courses Page}

Students can visit the Service Learning program course page (https:// servicelearning.uark.edu/courses/) to find courses that have been designated with service-learning components. Faculty can find criteria (http://servicelearning.uark.edu/) to develop courses that will be considered for designation as service learning courses.

\section*{Service Learning Steering Committee}
- Gabriel Diaz Montemayor, Fay Jones School of Architecture and Design
- Casey Kayser, Fulbright College of Arts and Sciences
- Lisa Bowers, College of Education and Health Professions
- Kevin Hall, College of Engineering
- Donia Timby, Dale Bumpers College of Agricultural, Food and Life Sciences
- Rogelio Garcia Contreras, Department of Marketing, Sam M. Walton College of Business
- Megan Hull, Graduate School and International Education/Office of Study Abroad
- Jen Edwards, Student Success at the CORD
- Chelsea Hodge, Honors College
- Amelia McGowan and Annie Smith, School of Law
- Claire Allison, Center for Community Engagement
- Richard Cassady, Teaching and Faculty Support Center

\section*{Undergraduate Faculty}

Faculty and instructional staff are listed in alphabetical order. The first date after the listing of each name indicates the year of first appointment at the University of Arkansas; the second date indicates the year of appointment to present faculty rank. Where they coincide, only one date is given.

\section*{A}

Abbas, James, Ph.D., M.S. (Case Western Reserve University), Sc.B. (Brown University), Professor, Department of Biomedical Engineering, 2021.

Abrahams, Daniel, Ph.D. (Oakland University), M.M. (University of Nebraska at Omaha), B.M.E. (Temple University), Associate Professor, Department of Music, 2016, 2022.
Ackerson, Michael D., Ph.D. (University of Arkansas), M.S., B.S. (University of Missouri-Rolla), Associate Professor, Ralph E. Martin Department of Chemical Engineering, 1986, 1997.
Acrey, Cash, Ph.D., M.B.A. (University of Arkansas), B.A. (University of Arkansas at Little Rock), Clinical Assistant Professor, Department of Finance, 2013.
Acuff, Jennifer C., Ph.D. (Virginia Tech), M.S. (Kansas State University), B.S. (Abilene Christian University), Assistant Professor, Department of Food Science, 2020.
Acurio, Danielle D., Ph.D. (Rocky Mountain University), B.S. (Louisiana State University), B.S. (Louisiana Tech University), Clinical Assistant Professor, Department of Communication Disorders and Occupational Therapy, 2023.
Adam, Thomas, Ph.D., M.A. (University of Leipzig), Professor, Department of Political Science, 2020, 2022.
Adams, Carris, M.F.A. (University of Chicago), B.F.A. (University of Texas at Austin), Visiting Professor, School of Art, 2022.
Adams, Douglas James, Ph.D., M.A. (University of Arizona), Associate Professor, Department of Sociology and Criminology, 1995, 2002.
Adams, Paul D., Ph.D. (Case Western Reserve University), B.S. (Louisiana State University), Professor, Department of Chemistry and Biochemistry, 2006, 2021.
Adler, Jacob, Ph.D., A.B. (Harvard University), Associate Professor, Department of Philosophy, 1984, 1991.

Ahrendsen, Bruce L., Ph.D., M.S. (North Carolina State University), B.S. (lowa State University), Professor, Department of Agricultural Economics and Agribusiness, 1990, 2007.
Airola, Denise T., Ph.D., M.S. (University of Arkansas), B.S. (University of New York), Assistant Professor, Department of Curriculum and Instruction, 2013.
Al Faouri, Radwan A., Ph.D. (University of Arkansas), Research Assistant Professor, Nanotechnology, 2015.
Alam, M. Sarwar, Ph.D. (University of Arkansas), M.S. (Pittsburg State University), M.S. (University of Chittagong, Bangladesh), B.A. (University of Chittagong), Instructor, Middle East Studies Program, 2010.
Allbright, Sara, M.S.W (University of Arkansas), B.S. (John Brown University), Lecturer, School of Social Work, 2018.
Allee, Kristian, Ph.D., M.B.A. (Indiana University), B.S. (Brigham Young University), Associate Professor, William Dillard Department of Accounting, Garrison/Wilson Chair in Accounting, 2016.
Allen, Amy L., M.L.I.S. (University of Alabama), B.A. (University of Arkansas), Assistant Librarian, University Libraries, 2008, 2010.
Allen, Jeremy L., D.M.A. (Cleveland Institute of Music), M.M. (University of Kentucky), B.S. (John Brown University), Instructor, Department of Music, 2018, 2021.
Allison, Kayla, Ph.D., (Indiana University-Bloomington), M.A. (University of Arkansas), B.A. (Indiana University-Bloomington), Assistant Professor, Department of Sociology and Criminology, 2020.
Allison, Neil T., Ph.D. (University of Florida), B.S. (Georgia College), Associate Professor, Department of Chemistry and Biochemistry, 1980.
Almahakeri, Mohamed, Ph.D., M.S.M.E. (Queen's University), Teaching Assistant Professor, Department of Mechanical Engineering, 2020.
Almenara, Erika, Ph.D. (University of Michigan), M.A. (University of Wisconsin-Milwaukee), B.A. ( Feminine University of the Sacred Heart), Associate Professor, Department of World Languages, Literatures and Cultures, 2015, 2022.
Almodovar Montanez, Jorge L., Ph.D. (Colorado State University), Associate Professor, Ralph E. Martin Department of Chemical Engineering, Ralph E. Martin Professorship in Chemical Engineering, 2018.

Aloia, Lindsey S., Ph.D. (Pennsylvania State University), M.A. (University of Delaware), B.A. (College of New Jersey), Associate Professor, Department of Communication, 2015.
Aloysius, John, Ph.D. (Temple University), B.S. (University of Colombo, Sri Lanka), Professor, J.B. Hunt Transport Department of Supply Chain Management, Oren Harris Chair in Logistics, 1995, 2017.
Alrubaye, Adnan A., Ph.D., M.Ed. (University of Arkansas), M.Sc. (University of Baghdad), Assistant Professor, Department of Poultry Science, Department of Biological Sciences, 2016, 2021.
Altom, Carol, M.B.A. (San Diego State University), B.S. (United States Naval Academy), Instructor, Operations Management Program, 2012. Alverson, Andrew James, Ph.D. (University of Texas at Austin), M.S. (lowa State University), B.S. (Grand Valley State University), Associate Professor, Department of Biological Sciences, 2012, 2018.
Alwood, Nancy D., Ph.D., M.S. (University of Arkansas), Instructor, Department of Psychological Science, 2012.
Aly, Mohamed H., Ph.D. (Texas A\&M), M.S., B.S. (Zagazig University), Associate Professor, Department of Geosciences, 2013, 2020.
Alzouwain, Hawraa, Ph.D., M.ED. (University of Arkansas), B.A. (Wasit University, Iraq), Instructor, Department of World Languages, Literatures and Cultures, 2021.
Amason, Trish, Ph.D. (Purdue University), M.A. (University of Kentucky), B.S.E. (University of Arkansas), Associate Professor, Department of Communication, 1994, 2000.
Amirvaghefi, Maryamsadat, M.F.A. (University of Arkansas), B.F.A.
(Sooreh Art University, Tehran), Instructor, School of Art, 2017.

Anand, Abhijith, Ph.D. (University of Waikato), M.I.S. (University of Wollongog), B.E. (K.S. Institute of Technology), Assistant Professor, Department of Information Systems, 2017.
Anderson, John D., Ph.D. (Oklahoma State University), M.S. (Arkansas State University), B.S. (College of the Ozarks), Professor, Department of Agricultural Economics and Agribusiness, 2020.
Anderson, Paula, M.S., B.S. (University of Arkansas), Instructor, Department of Geosciences, 2014.
Andree, David, M.F.A. (State University of New York), B.F.A.
(Minneapolis College of Art and Design), Assistant Professor, School of Art, 2015.
Andree, Kara M., M.F.A. (State University of New York at Buffalo), B.F.A. (Minneapolis College of Art and Design), Instructor, School of Art, 2016.
Andrews, David, Ph.D. (Syracuse University), M.S., B.S.E.E. (University of Missouri-Columbia), Professor, Department of Computer Science and Computer Engineering, Thomas Mullins Chair of Computer Science and Computer Engineering, 2008.
Andrus, Edward, Ph.D., M.A. (University of Arkansas), B.A. (University of Utah), Instructor, Department of History, 2021.
Angel, Christopher C., M.A. (University of Arkansas), B.A. (Arkansas
Tech University), Instructor, Middle East Studies Program, 2015.
Angton, Alexia, Ph.D., M.S., B.A. (lowa State University Ames),
Assistant Professor, Department of Sociology and Criminology, 2022.
Antov, Nikolay Atanasov, Ph.D. (University of Chicago), M.A. (Bilkent University, Turkey), B.A. (American University in Bulgaria), Associate Professor, Department of History, 2011, 2017.
Apple, Laurie Marie McAlister, Ph.D. (Oklahoma State University), M.S., B.S. (University of Arkansas), Associate Professor, School of Human Environmental Sciences, 2000, 2007.
Arellano, Betina, M.A. (University of Arkansas), B.A. (Universidad Nacional del Sur, Argentina), Instructor, Department of World Languages, Literatures and Cultures, 2016.
Arenberg, Nancy M., Ph.D. (University of Arizona), M.A. (University of Illinois, Champaign-Urbana), B.A. (Grinnell College), Associate Professor, Department of World Languages, Literatures and Cultures, 1996, 2002.
Armstrong, asher, D.M.A. (University of Toronto), Teaching Assistant Professor, Department of Music, 2020.
Arnold, Mark E., Ph.D., B.S. (Northern Illinois University), A.S. (Rock Valley College), Associate Professor, Department of Mathematical Sciences, 1993, 1999.
Atungulu, Griffiths Odhiambo, Ph.D., M.S. (Iwate University, Japan), B.S. (Jomo Kenyatta University of Agriculture and Technology, Kenya), Associate Professor, Department of Food Science, 2013, 2019.
Atwood, Casey, B.S.W. (University of Arkansas), Lecturer, School of Social Work, 2013.
Atwood, T. J., Ph.D. (University of Illinois), M.B.A. (University of Texas at Austin), B.S. (Western Kentucky University), Associate Professor, William Dillard Department of Accounting, 2014.
Austin, Shawn, Ph.D., M.A. (University of New Mexico), B.A. (Brigham Young University-Idaho), Associate Professor, Department of History, 2015.

Avalos, Lisa, Ph.D. (Northwestern University), J.D. (New York University), M.A., B.A. (Northwestern University), Associate Professor, School of Law, 2013.
Ayala, Jose Transito, M.A., B.A. (University of Arkansas), Lecturer, Department of Political Science, 2021.

Bacon, Robert Keith, Ph.D. (Purdue University), M.S., B.S.A., (University of Arkansas), Professor, Department of Crop, Soil and Environmental Sciences, 1984, 1993.

Bailey, Carlton, J.D. (University of Chicago), B.A. (Talladega College), Professor, School of Law, Robert A. Leflar Professor of Law, 1978, 2005. Bailey, Constance, Ph.D., M.A. (University of Missouri-Columbia), B.A. (Alcorn State University), Assistant Professor, Department of English, 2016.

Bailey, Tameka A., Ph.D. (University of Arkansas), B.S. (University of Arkansas-Pine Bluff), Research Assistant Professor, Department of Biological Sciences, 2017.
Baker, Emily, M.Arch. (Cranbrook Academy of Art), B.Arch. (University of Arkansas), Assistant Professor, Department of Architecture, 2017.
Balachandran, Kartik, Ph.D., M.S. (Georgia Institute of Technology), B.S. (National University of Singapore), Associate Professor, Department of Biomedical Engineering, 2012, 2018.
Balda, Juan Carlos, Ph.D. (University of Natal), B.S. (Universidad Nacional del Sur), University Professor, Department of Electrical Engineering, 1989, 2013.
Ballentine, Hope, D.N.P. (University of Arkansas), M.S.N. (Vanderbilt University), B.A. (Harding University), Teaching Assistant Professor, Eleanor Mann School of Nursing, 2014, 2018.
Banks, Jeff, M.S.O.M. (University of Arkansas), M.S. (Oklahoma State University), B.S. (University of Arkansas), Instructor, Operations Management Program, 2020.
Banton, Caree A., Ph.D. (Vanderbilt University), M.A. (University of Ghana), M.A. (University of New Orleans), B.A./B.P.A. (Grambling State University), Associate Professor, Department of History, 2013, 2019.
Baptist, Najja K., Ph.D. (Howard University), M.A. (Jackson State University), B.A. (North Carolina Central University), Assistant Professor, Department of Political Science, 2020.
Baranello, Micaela, Ph.D., M.A. (Princeton University), B.A. (Swarthmore College), Assistant Professor, Department of Music, 2017.
Barber, Thomas, Ph.D., M.S., B.S. (University of Arkansas), Professor, Department of Crop, Soil and Environmental Sciences, 2007, 2016.
Barkat, Sophia, Ph.D., M.A. (Northern Arizona University), B.A. (Mount Holyoke College), Visiting Assistant Professor, Department of Political Science, 2021.
Barnes, Ty, M.F.A. (University of Arkansas), B.F.A. (Mississippi State University), Instructor, School of Art, 2022.
Barnett, Tracey, PhD. (University of Texas at Arlington), M.S.W. (University of Alabama), Assistant Professor, School of Social Work, 2018.

Barraza-Lopez, Salvador, Ph.D. (University of Illinois-UrbanaChampaign), B.S. (Instituto Politecnico Nacional de Mexico), Associate Professor, Department of Physics, 2011, 2016.
Barrett, David A., Ph.D., M.A. (University of Arkansas), B.A. (Hendrix College), Instructor, Department of Philosophy, 2014.
Barry, Michelle, Ph.D., M.S.C.E., B.S.C.E. (Texas A\&M University), Associate Professor, Department of Civil Engineering, 2019.
Barta, Kathleen M., Ed.D. (University of Arkansas), M.S. (Boston College), B.S. (Marquette University), Associate Professor, Retired from NURS in 2016, 1984, 1998.
Barton, Ariel, Ph.D., M.S. (University of Chicago), B.S. (Harvey Mudd College), Associate Professor, Department of Mathematical Sciences, 2016, 2021.
Bateh, Justin, Ph.D. (University of Suderland-London), Instructor, Operations Management Program, 2020.
Bateman, Nick, Ph.D. (Mississippi State University), B.S. (University of Arkansas-Monticello), Assistant Professor, Department of Entomology and Plant Pathology, 2016.
Baum, Jamie I., Ph.D., B.S. (University of Illinois-Urbana-Champaign), Associate Professor, Department of Food Science, 2011, 2018.
Bavon, AI, Ph.D., M.S. (Florida State University), Professor, Clinton School of Public Service, 2008.

Bayram, A. Burcu, Ph.D. (Ohio State University), M.I.S. (North Carolina State University), B.A. (Middle East Technical University), Associate Professor, Department of Political Science, 2016, 2021.
Beam, Caroline, Ph.D., M.S. (University of California), B.S. (Princeton University), Teaching Assistant Professor, Operations Management Program, 2013.
Bean, Jeffrey, M.B.A. (University of Arkansas), B.A. (Rhodes College), Instructor, Operations Management Program, 2008.
Beard, Lonnie Ray, LL.M. (New York University), J.D. (University of Arkansas), B.A. (Arkansas State University), Professor, School of Law, 1983.

Beasley, Jennifer G., Ed.D. (University of Virginia), M.A. (Wichita State University), B.A. (Kansas State University), Clinical Associate Professor, Department of Curriculum and Instruction, 2009, 2018.
Beaulieu, Jeremy M., Ph.D. (Yale University), M.S., B.S. (California Polytechnic State University), Associate Professor, Department of Biological Sciences, 2016, 2021.
Beaupre, Steven J., Ph.D. (University of Pennsylvania), M.S., B.S. (University of Wisconsin), Professor, Department of Biological Sciences, 1995, 2006.
Bechtel, Don, B.A. (Lebanon Valley College), Instructor, J.B. Hunt Transport Department of Supply Chain Management, 2006.
Beck, Dennis E., Ph.D. (University of Florida), B.S. (Pennsylvania State University), Associate Professor, Department of Curriculum and Instruction, 2010, 2016.
Becknell, Natalie K., M.S.C.E., B.S.C.E. (University of Arkansas), Instructor, Department of Civil Engineering, 2012.
Becnel, Jennifer N., Ph.D. (Arizona State University), M.A. (University
of California-San Francisco). B.A. (San Diego State University), Assistant Professor, School of Human Environmental Sciences, 2014.
Becqué, Helen, (Hochschule München für Musik und Theater), Instructor, Department of Music, 2020.
Befus, Kevin, Ph.D. (University of Texas at Austin), M.S. (University of Colorado Boulder), B.S. (Wheaton College), Assistant Professor, Department of Geosciences, 2020.
Behrend, Douglas A., Ph.D. (University of Minnesota), B.A. (Kalamazoo College), Professor, Department of Psychological Science, 1989, 2009.
Beike, Denise R., Ph.D., B.A. (Indiana University), Professor, Department of Psychological Science, 1995, 2010.
Beitle, Karen, M.S.(University of Arkansas), B.S. (University of Pittsburgh), Instructor, Ralph E. Martin Department of Chemical Engineering, .
Beitle, Robert R., Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Pittsburgh), Professor, Ralph E. Martin Department of Chemical Engineering, Jim L. Turpin Professorship in Chemical Engineering, 1993, 2006.
Bell, Karmen V., M.Ed. (Indiana Wesleyan University), Clinical Instructor, Department of Curriculum and Instruction, 2015.
Bell, Steven M., Ph.D. (University of Kansas), M.A. (University of Kentucky), B.A. (University of Kansas), Associate Professor, Department of World Languages, Literatures and Cultures, 1992.
Bellaiche, Laurent, Ph.D., M.S., B.S. (University of Paris VI, France), Distinguished Professor, Department of Physics, 1999, 2016.
Benamara, Mourad, Ph.D., M.S. (University of Toulouse III, France), Assistant Professor, Nanotechnology, 2007.
Benbrahim, Dina, M.F.A. (University of Florida), M.A. (Simon Fraser University), B.A. (Simon Fraser University), Endowed Assistant Professor, School of Art, 2021.
Bengtson, Ed, Ph.D. (University of Georgia), Ed.S. (George Washington University), M.A. (California State University-Sacramento), B.S. (Pennsylvania State University), Associate Professor, Department of Curriculum and Instruction, 2010, 2016.

Bennett, Marion, Ph.D. (University of North Carolina at Chapel Hill), M.S.W. (University of Pennsylvania), B.S.W (Hampton University), Assistant Professor, School of Social Work, 2023.
Bentley, Christa, Ph.D., M.A. (University of North Carolina at Chapel Hill), B.A., (Texas Christian University), Assistant Professor, Department of Music, 2022.
Benton, Hilda Morayma, M.A. (University of Arkansas), B.A. (Chihuahua Institute of Technology), Instructor, Department of World Languages, Literatures and Cultures, 2009.
Bergdall, Joohn, Ph.D. (Brandeis University), B.S. (University of Minnesota), Assistant Professor, Department of Mathematical Sciences, 2022.

Bergman-Lanier, Leyah, Ph.D. (Claremont Graduate University), Instructor, English Language and Cultural Studies Program, 2014.
Berkovich, Nadja, Ph.D. (University of Illinois), M.A. (Boston College), B.A. (St. Petersburg Pedagogical Herzen University), Teaching Associate Professor, Department of World Languages, Literatures and Cultures, 2015, 2023.
Bernhardt-Barry, Michelle, Ph.D., M.S.C.E., B.S.C.E. (Texas A\&M University), Associate Professor, Department of Civil Engineering, 2013, 2019.

Bertucci, Matthew, Ph.D., M.S. (North Carolina State University), B.S. (Spring Hill College), Assistant Professor, Department of Horticulture, 2020.

Bhattacharya, Puja, Ph.D., M.A. (Ohio State University), M.S. (Indian Statistical Institute), B.S. (Presidency College), Assistant Professor, Department of Economics, 2019.
Bhave, Ashutosh, Ph.D., M.S. (University of Texas Dallas-Naveen Jindal School of Management), B.Eng. (University of Pune-India), Assistant Professor, Department of Marketing, 2022.
Biehle, Scott, M.L.A. (University of Texas at Austin), B.A. (St. Olaf College), Teaching Associate Professor, Department of Landscape Architecture, 2012, 2023.
Billig, Noah Scott, Ph.D. (Clemson University), M.Ur.P., M.L.A., B.A. (University of Minnesota), Associate Professor, Department of Landscape Architecture, 2011, 2018.
Blackwell, Marlon, M.Arch. (Syracuse University), B.Arch. (Auburn University), Distinguished Professor, Department of Architecture, 1992, 2010.

Blair, Alissa, Ph.D. (University of Wisconsin-Madison), M.E.D. (University of Notre Dame), B.A. (Saint Mary's College), Assistant Professor, Department of Curriculum and Instruction, 2020.
Blakinger, John, Ph.D., M.A. (Stanford University), B.A. (Wesleyan University), Associate Professor, School of Art, Endowed Chair in Art History, 2020.
Blisard, Paul, Ed.D. (University of Arkansas), M.C., B.S., B.S. (Southwest Missouri State University), Clinical Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2014. Bluhm, Burt H., Ph.D., M.S. (Purdue University), B.S. (University of Oklahoma), Associate Professor, Department of Entomology and Plant Pathology, 2008, 2014.
Blunschi, Jane, M.F.A. (University of Arkansas), B.A. (University of Louisiana at Lafayette), Instructor, Department of English, 2018.
Boelkins, Jonathan, M.Arch. (Washington University in St. Louis), B.Arch. (University of Arkansas), Instructor, Department of Architecture, 2017.

Booker, M. Keith, Ph.D. (University of Florida), M.S., M.A. (University of Tennessee), B.A. (Vanderbilt University), Professor, Department of English, 1990, 1997.
Boss, Steve K., Ph.D. (University of North Carolina at Chapel Hill), M.S. (Utah State University), B.S. (Bemidji State University), University Professor, Department of Geosciences, 1996, 2022.

Bostian-Neal, Elisabeth, M.S.W., B.S.W. (University of Arkansas), Lecturer, School of Social Work, 2020.
Bostick, David A., Ed.D. (Baker University), M.A. (Fort Hays State University), B.A. (University of Oklahoma), Teaching Associate Professor, School of Journalism and Strategic Media, 2019, 2023.
Bottje, Walter G., Ph.D. (University of Illinois-Urbana-Champaign), M.S. (Southern Illinois University), B.S. (Eastern Illinois University), Professor, Department of Poultry Science, 1985, 1993.
Bouchillon, Brandon C., Ph.D. (Texas Tech University), Associate Professor, School of Journalism and Strategic Media, 2019, 2023.
Bourland, Fred, Ph.D. (Texas A\&M University), M.S., B.S.A. (University of Arkansas), Professor, Department of Crop, Soil and Environmental Sciences, 1988.
Bowers, Andrew L., Ph.D. (University of Tennessee Health Science Center), M.A., B.A. (University of Tennessee), Associate Professor, Department of Communication Disorders and Occupational Therapy, 2012, 2019.
Bowers, Lisa Marie, Ph.D. (University of Tennessee Health Science Center), M.A., B.A. (Louisiana State University), Associate Professor, Department of Communication Disorders and Occupational Therapy, 2012, 2019.
Bowles, Freddie A., Ph.D., M.A. (University of Arkansas), B.A. (Arkansas State University), Associate Professor, Department of Curriculum and Instruction, 2004, 2013.
Bowling, Hilary, D.N.P. (University of Pittsburgh), M.S.N., B.S.N. (University of Arkansas), Clinical Assistant Professor, Eleanor Mann School of Nursing, 2014, 2022.
Bowman, Jennifer, M.S., B.S. (University of Arkansas), Instructor, School of Human Environmental Sciences, 2020.
Bowman, Margaret Warigia, Ph.D. (Harvard University), Professor, 2012.

Bradley, Amy, M.A.T. (John Brown University), M.A. (University of Arkansas), B.B.A. (Northeastern State University), Instructor, Department of Communication, 2020.
Bradley, Callie, D.N.P. (University of Utah), Visiting Clinical Assistant Professor, Eleanor Mann School of Nursing, 2020.
Bradshaw, Zachary, Ph.D. (University of Virginia), B.S. (Virginia Commonwealth University), Associate Professor, Department of Mathematical Sciences, 2017, 2022.
Brady, Kevin P., Ph.D. (University of Illinois-Champaign-Urbana), M.A. (Columbia University), B.A. (Binghamton University), Professor, Department of Curriculum and Instruction, 2014, 2020.
Brady, Laurie, M.A., B.A. (University of Arkansas), Instructor, Department of Communication, 1995.
Brady, Robert M., Ph.D. (University of Michigan-Ann Arbor), M.A.
(Western Kentucky University), B.S. (Murray State University), Associate Professor, Department of Communication, 1979.
Braham, Andrew F., Ph.D. (University of Illinois-Urbana-Champaign), M.S., B.S. (University of Wisconsin-Madison), Professor, Department of Civil Engineering, 2010, 2022.
Branton, Scott, Ph.D. (University of Missouri), M.A. (Western Kentucky University), M.S.W., B.S.W. (Florida State University), Assistant Professor, Department of Communication, 2023.
Bresnick, Terry A., M.S. (Stanford University), M.B.A. (George Mason University), B.S. (United States Military Academy), Instructor, Operations Management Program, 2014.
Brewer, Dennis W., Ph.D., M.A. (University of Wisconsin), B.A. (Sterling College), Professor, Department of Mathematical Sciences, 1975, 1990.
Brewer, Lorraine C., M.S. (University of Wisconsin-Madison), Instructor, Department of Chemistry and Biochemistry, 1997.

Bridges, Ana Julia, Ph.D. (University of Rhode Island), M.S. (Illinois State University), B.S. (University of Illinois-Urbana-Champaign), Professor, Department of Psychological Science, 2007, 2019.
Brill, Howard W., J.D. (University of Florida), LL.M. (University of Illinois at Chicago), B.A. (Duke University), University Professor, School of Law, Vincent Foster Professor of Legal Ethics and Professional Responsibility, 1975, 2005.
Bristow, Susan E., Ed.D., M.B.A., B.S.B.A. (University of Arkansas), Teaching Associate Professor, Department of Information Systems, 1997, 2020.

Brock, Geoffrey Arthur, Ph.D. (University of Pennsylvania), M.F.A. (University of Florida), M.A. (University of Pennsylvania), B.A. (Florida State University), Distinguished Professor, Department of English, 2005, 2020.

Brogi, Alessandro, Ph.D. (Ohio University), Ph.D. (University of Florence, Italy), M.A. (Ohio University), B.A. (University of Florence, Italy), Professor, Department of History, 2002, 2012.
Brown, Lucy M., Ph.D., M.A. (University of Texas, Austin), M.S. (Pratt Institute), Dip.G.A. (Edna Manley School for the Visual Arts, Jamaica), Teaching Assistant Professor, School of Journalism and Strategic Media, 2013.

Brown, Michael, M.S., B.S. (Northeastern State University), Instructor, School of Journalism and Strategic Media, 2018.
Brown, Mitchell J., Ph.D. (University of Southern Mississippi), M.A. (University of Dayton), B.A. (Lake Erie College), Instructor, Department of Psychological Science, 2022.
Brownback, Andrew P., Ph.D. (University of California, San Diego), B.A. (Kansas State University), Associate Professor, Department of Economics, 2015, 2021.
Bryan, Barry J., Ph.D. (Texas A\&M University), M.B.A., B.S.B.A. (University of Arkansas), Teaching Professor, William Dillard Department of Accounting, 2020.
Brye, Kristofor R., Ph.D., M.S. (University of Wisconsin-Madison), B.S. (University of Wisconsin-Stevens Point), University Professor, Department of Crop, Soil and Environmental Sciences, 2001, 2020.
Bryson, Sarah J., M.S.W. (Colorado State University), Lecturer, School of Social Work, 2014.
Buchanan, Greg, M.A. (University of Arkansas), Instructor, Department of World Languages, Literatures and Cultures, 2008.
Burgin, James, M.B.A. (Golden Gate University), B.S. (University of Arkansas), Instructor, Operations Management Program, 2012.
Burgin, Stephen, Ph.D., Ed.S., M.Ed., B.S. (University of Florida),
Associate Professor, Department of Curriculum and Instruction, 2014, 2020.

Burgos, Nilda Roma, Ph.D., M.S. (University of Arkansas), B.S. (Visayas State College of Agriculture-Philippines), Professor, Department of Crop, Soil and Environmental Sciences, 1998, 2010.
Burk, Robin K., Ph.D. (State University of New York at Albany), M.B.A. (University of North Carolina at Chapel Hill), B.A. (St. John's College), Instructor, Operations Management Program, 2019.
Burks, Lizette Anita, Ed.D. (University of Kansas), Instructor, Department of Curriculum and Instruction, 2019.
Burris, Sidney J., Ph.D., M.A. (University of Virginia), B.A. (Duke University), Professor, Department of English, 1986, 2002.
Burrow, Jason E., M.M. (Ohio University), B.M. (University of Arkansas), Associate Professor, Department of Theatre, 2015, 2021.
Burson, Claudia, , Lecturer, Department of Music, 1998, 2012.
Burton, Scot, Ph.D. (University of Houston), M.B.A., B.S.B.A. (University of Texas), Distinguished Professor, Department of Marketing, Tyson Chair in Food and Consumer Products Retailing, 1993, 2012.

Bustamante, Juan Jose, Ph.D. (Michigan State University), M.S., B.A. (University of Texas Pan American), Associate Professor, Department of Sociology and Criminology, 2012, 2018.
Butcher, Margaret, Ph.D. (University of Missouri), M.A., B.S. (Arkansas
State University), Teaching Assistant Professor, Department of Communication, 2016.
Butler, Martha R., Ph.D. (Texas Woman's University), M.N., B.S.N. (Wichita State University), Assistant Professor, Eleanor Mann School of Nursing, 2008, 2018.
Buttram, Mance E., Ph.D., M.A. (Florida International University), M.A. (University of Arizona), Associate Professor, Department of Health, Human Performance and Recreation, 2021.
Butts, Thomas R., Ph.D. (University of Nebraska-Lincoln), Assistant Professor, Department of Crop, Soil and Environmental Sciences, 2019.

\section*{C}

Calabretta-Sajder, Ryan C., Ph.D. (Middlebury College), M.A. (Indiana University-Bloomington), B.A. (Dominican University), Associate Professor, Department of World Languages, Literatures and Cultures, 2013, 2022.
Caldwell, David J., Ph.D., M.S., and B.S. (Texas A\&M University), Professor, Department of Poultry Science, 2019.
Caldwell, Stephen E., D.M.A. (Rutgers State University-New Brunswick), M.M. (Temple University), B.M.E. (University of Northern Colorado), Associate Professor, Department of Music, 2012, 2019.
Callander, Adrienne, M.F.A. (Rutgers University), B.A. (Reed College), Visiting Assistant Professor, School of Art, 2017.
Callander, Adrienne, M.F.A. (Rutgers University), P.Bacc. (Maryland Institute College of Art), B.A. (Reed College), Clinical Assistant Professor, Department of Strategic, Entrepreneurship and Venture Innovation, 2017.
Callander, Neil, M.F.A. (Rutgers University), B.F.A. (Indiana University at Bloomington), Assistant Professor, School of Art, 2017.
Calleja, Paul C., Ph.D., M.S. (University of Arkansas), B.S. (San Jose State University), Clinical Professor, Department of Health, Human Performance and Recreation, 2003, 2018.
Camacho-Valencia, Paulina, Ph.D. (University of IIlinois UrbanaChampaign), M.A. (School of Art Institute of Chicago), Endowed Assistant Professor in Art History, School of Art, 2022.
Campos, Alejandra, Ph.D. (University of Notre Dame), M.A., B.A. (University of Arkansas), Assistant Professor, Department of Political Science, 2023.
Candido, Joseph D., Ph.D. (Indiana University at Bloomington), M.A. (University of New Hampshire), B.A. (Colby College), Professor, Department of English, 1979, 1997.
Carlton, Dale, J.D. (University of Arkansas), B.A. (Ouachita Baptist University), Instructor, Department of Finance, 2022.
Carter, Vinson R., Ph.D., M.A.T., B.S. (University of Arkansas), Associate Professor, Department of Curriculum and Instruction, 2008, 2019.

Cartwright, Richard D., Ph.D. (University of California at Davis), M.S., B.S. (University of Arkansas), Extension Professor, Department of Entomology and Plant Pathology, 1993, 2005.
Casida, Jesse, Ph.D. (Seton Hall University), M.S.N. (Columbia University), B.S. (Bicol University, Phillipines), Professor, Eleanor Mann School of Nursing, George M. and Boyce W. Billingsley Endowed Chair in Nursing, 2022.
Cassady, Richard, Ph.D., M.S.I.S.E., B.S.I.S.E. (Virginia Polytechnic Institute and State University), University Professor, Department of Industrial Engineering, 2000, 2019.
Cassell, Cory A., Ph.D. (Texas A\&M University), M.S., B.S. (Trinity University), Professor, William Dillard Department of Accounting, Ralph McQueen Distinguished Chair in Accounting, 2009, 2020.

Cassiano Alverez, Renata, M.F.A. (University of MassachusettsDartmouth), Instructor, School of Art, 2019.
Castro Salas, Raquel, M.A. (University of Arkansas), B.A. (John Brown University), Teaching Assistant Professor, Department of World Languages, Literatures and Cultures, 2014, 2020.
Catanzaro, Donald G., Ph.D. (University of Arkansas), A.B. (University of California, Los Angeles), Research Assistant Professor, Department of Biological Sciences, 2014.
Cato, Aaron J., Ph.D. (University of Arkansas), M.S. (Kansas State University), B.S. (Arkansas State University), Assistant Professor, Department of Horticulture, 2019.
Catron-Ping, Peggy Lee, Ed.D. (University of Arkansas), M.T.S. (Phillips Theological Seminary), M.A. (Missouri State University), B.A. (Central Bible College), Instructor, Department of Communication, 2004.
Cavell, Timothy A., Ph.D. (Louisiana State University), M.S. (Texas A\&M University), B.A. (Louisiana State University), Professor, Department of Psychological Science, 2002.
Cavitt, Maurice, Ph.D. (University of Texas at Arlington), M.S. (University of Nebraska-Lincoln), B.S. (Prairie View A\&M University), Instructor, Operations Management Program, 2021.
Ceballos, Ruben M., Ph.D. (University of Montana), M.A. (University of Alabama-Birmingham), B.S.(University of Alabama-Huntsville), Assistant Professor, Department of Biological Sciences, 2016.
Celik, Bilal, Ph.D. (University of Tennessee), M.S. (University of Illinois), B.A. (Ege University), Teaching Assistant Professor, Department of Economics, 2023.
Chaffin, David J., Ph.D. (University of Tennessee), Assistant Professor, 2009.

Chakraborty, Avishek, Ph.D (Duke University), M.S., B.S. (Indian Statistical Institute), Associate Professor, Department of Mathematical Sciences, 2014, 2020.
Chapman, Kate M., Ph.D., M.S. (Penn State University), B.A. (New Florida College), Teaching Assistant Professor, Department of Psychological Science, 2016.
Charkasova, Aynur, Ph.D., M.S. (Southern Illinois University, Carbondale), B.A. (Azerbaijan University of Languages), Teaching Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2021.
Chen, Diana, Ph.D., M.S. (University of Arkansas), B.S. (Colorado State University), Lecturer, Department of Strategic, Entrepreneurship and Venture Innovation, 2020.
Chen, Jialie, Ph.D. (Cornell University), B.A. (Shanghai University of Finance and Economics), Assistant Professor, Department of Marketing, 2018.

Chen, Jingyi, Ph.D. (University of Washington), M.A. (State University College at Buffalo), B.S. (Zhongshan University), Professor, Department of Chemistry and Biochemistry, 2010, 2019.
Chen, Zhong, Ph.D. (North Carolina State University), M.Eng. (National University of Singapore), B.S. (Zhejiang University), Assistant Professor, Department of Electrical Engineering, 2015.
Cheng, Albert, Ph.D. (University of Arkansas), M.A. (Biola University), B.A. (University of California-Berkeley), Assistant Professor, Department of Education Reform, 2018.
Cheng, Linyin, Ph.D. (University of California, Irvine), M.S. (Clarkson University), B.S. (Sichuan University), Assistant Professor, Department of Geosciences, 2018.
Chevrier, Vincent Francois, Ph.D. (CEREGE, Aix-en-Provence, France), M.E.S. (University Paris VII), B.S. (Academy of Versaille, France), Research Associate Professor, Department of Chemistry and Biochemistry, 2005.

Chick, Cathy, M.L.S. (Louisiana State University at Shreveport), B.A. (Louisiana Tech University), Associate Librarian, University Libraries, 1983.

Chimka, Justin Robert, Ph.D., M.S.I.E., B.S.I.E. (University of Pittsburgh), Associate Professor, Department of Industrial Engineering, 2002, 2009.
Chioffi, David Charles, M.A. (Wesleyan University), B.F.A. (The
Rochester Institute of Technology), Professor, School of Art, 2013, 2019.
Cho, Eunjoo, Ph.D. (lowa State University), M.S., B.S. (Hanyang
University, Seoul), Associate Professor, School of Human Environmental Sciences, 2013, 2019.
Cholthitchanta, Nophachai, D.M.A. (University of Missouri-Kansas City), M.M. (University of Northern Colorado), B.M. (Chulalongkorn University, Thailand), Associate Professor, Department of Music, 2001, 2009.
Christian, David, Ph.D., M.S. (University of North Texas), B.A.
(University of Texas at Dallas), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2015, 2021.

Christiansen, Hope L., Ph.D. (University of Kansas), M.A., B.A. (Kansas State University), Associate Professor, Department of World Languages, Literatures and Cultures, 1990.
Christy, Kameri, Ph.D., M.S.W. (University of Kansas), B.A. (University of Missouri-Kansas City), Professor, School of Social Work, 2003, 2013.
Chung, Jee-Young, Ph.D. (University of Alabama), M.A. (University of Houston), B.S., B.A. (Seoul Women's University), Associate Professor, School of Journalism and Strategic Media, 2015, 2023.
Churchill, Hugh O.H., Ph.D., A.M. (Harvard University), B.A. (Oberlin College), B.M. (Oberlin Conservatory of Music), Associate Professor, Department of Physics, 2015, 2021.
Circo, Carl J., J.D., B.A. (University of Nebraska), Professor, School of Law, 2003, 2010.
Civelli, Andrea, Ph.D., M.A. (Princeton University), B.A. (Bocconi University, Milan), Associate Professor, Department of Economics, 2010, 2017.

Clare, Lauren N., M.M. (Oklahoma City University), Instructor, Department of Music, 2021.
Clark, Fred D., Ph.D., D.V.M., M.S., B.S. (Texas A\&M University), Extension Professor, Department of Poultry Science, 1994, 2007.
Clark, John R., Ph.D. (University of Arkansas), M.S., B.S. (Mississippi State University), Distinguished Professor, Department of Horticulture, 1983, 2016.
Clark, Suzanne G., J.D. (University of Arkansas), B.S. (University of Connecticut), Instructor, Department of Civil Engineering, 2023.
Clarke, Morgan, M.Acc., B.A., B.Acc. (University of Arkansas), Instructor, William Dillard Department of Accounting, 2021.
Clausen, Ed, Ph.D., M.S.Ch.E., B.S.Ch.E. (University of MissouriRolla), University Professor, Ralph E. Martin Department of Chemical Engineering, Charles W. Oxford Professorship in Chemical Engineering, 1981, 2018.
Clay, Matt, Ph.D., M.S. (University of Utah), B.S. (University of Oregon), Associate Professor, Department of Mathematical Sciences, 2012, 2015.
Cleveland, Todd, Ph.D. (University of Minnesota), M.A., B.A. (University of New Hampshire), Professor, Department of History, 2015, 2021.
Clingan, Shelley Diane, M.S.W. (University of Arkansas at Little Rock), Lecturer, School of Social Work, 2014.
Clowney, Nicole, J.D. (Yale University), M.A. (University of Kentucky),
B.A. (University of Chicago), Lecturer, Department of World Languages, Literatures and Cultures, 2014.
Clowney, Stephen, J.D. (Yale University), A.B. (Princeton University), Associate Professor, School of Law, 2014.

Cochran, Mark J., Ph.D., M.S. (Michigan State University), B.S.
(New Mexico State University), Professor, Department of Agricultural Economics and Agribusiness, 1982, 1991.
Cochran, Robert Brady, Ph.D. (University of Toronto), M.A., B.S. (Northwestern University), Professor, Department of English, 1976, 1987.
Coffey, Ken, Ph.D. (University of Missouri-Columbia), M.S. (University of Kentucky), B.S. (University of Tennessee), Professor, Department of Animal Science, 1996, 2003.
Coffman, James D., M.L.Arch. (Ball State University, Muncie, Indiana), B.S.B. (Indiana University-Bloomington), Assistant Professor, Department of Landscape Architecture, 2017.
Coffman, Rick, Ph.D. (University of Missouri-Columbia), M.S. (University of Texas at Austin), B.S. (University of Wyoming), Professor, Department of Civil Engineering, 2009, 2021.
Colangelo, Jessica L., M.Arch. (Princeton University), B.Arch. (Rice University), Assistant Professor, Department of Architecture, 2018.
Collet, Vicki S., Ph.D. (State University of New York at Buffalo), M.A. (University of Northern Colorado), B.A. (University of Utah), Professor, Department of Curriculum and Instruction, 2012, 2023.
Collett, Jesse, M.M. (University of Arkansas), Lecturer, Department of Music, 2021.
Collie, Sara J., M.S.W. (University of Arkansas at Little Rock), B.A. (University of Arkansas), Associate Professor, School of Social Work, 2011.

Collins, Kathleen, Ph.D., M.A., B.A. (University of California-Santa Barbara), Professor, Department of Curriculum and Instruction, 2002, 2012.

Comfort, Kathy, Ph.D. (University of Kansas), M.A., B.A. (Illinois State University), Professor, Department of World Languages, Literatures and Cultures, 2001, 2020.
Comsa, Maria, Ph.D. (Stanford University), M.A., B.A. (San José State University), B.A. (Université de Lyon 2 Lumière), Instructor, Department of World Languages, Literatures and Cultures, 2022.
Condray, Kathleen, Ph.D., M.A.. (University of Illinois-Urbana-
Champaign), B.A. (University of Arkansas), Associate Professor, Department of World Languages, Literatures and Cultures, 1999, 2008.
Conge, Patrick J., Ph.D. (University of Texas at Austin), M.A., B.S. (Arizona State University), Associate Professor, Department of Political Science, 1995, 2002.
Conley, Nathaniel, Ph.D. (University of Arkansas), M.A., B.A. (Arkansas State University), Instructor, Department of History, 2018.
Connors, Sean P., Ph.D. (The Ohio State University), M.S. (Elmira College), B.A. (SUNY Geneseo), Associate Professor, Department of Curriculum and Instruction, 2010, 2016.
Conway, Daniel, Ph.D., M.A. (Indiana University), B.A. (Augustana
College), Teaching Professor, Department of Information Systems, 2019.
Coon, Craig N., Ph.D., M.S., B.S. (Texas A\&M University), Professor, Department of Poultry Science, 1997.
Coon, Lynda L., Ph.D., M.A. (University of Virginia), B.A. (James Madison University), Professor, Department of History, 1990, 2013.
Coridan, Robert, Ph.D., M.S. (University of Illinois-Urbana-Champaign), B.S. (The Ohio State University), Associate Professor, Department of Chemistry and Biochemistry, 2015, 2021.
Correll, Jim, Ph.D., M.S. (University of California-Berkeley), B.S.
(Pennsylvania State University), Distinguished Professor, Department of Entomology and Plant Pathology, 1989, 2018.
Corrigan, Lisa, Ph.D., M.A. (University of Maryland-College Park), B.A. (University of Pittsburgh), Professor, Department of Communication, 2007, 2019.
Costello, Thomas A., Ph.D. (Louisiana State University), M.S.Ag.E., B.S.Ag.E. (University of Missouri-Columbia), Associate Professor, Department of Biological and Agricultural Engineering, 1986, 1992.

Costrell, Robert M., Ph.D. (Harvard University), B.A. (University of Michigan), Professor, Department of Education Reform, Endowed Chair in Education Accountability, 2006.
Cothren, Jackson David, Ph.D., M.S. (The Ohio State University), B.S. (United States Air Force Academy), Professor, Department of Geosciences, Leica Geosystems Chair in Geospatial Imaging, 2004, 2020.

Counce, Paul Allen, Ph.D. (University of Georgia), M.S. (Purdue
University), B.S. (University of Tennessee-Martin), Professor, Department of Crop, Soil and Environmental Sciences, 1983, 2003.
Covington, Matthew D., Ph.D. (University of California-Santa Cruz), B.A. (University of Arkansas), Associate Professor, Department of Geosciences, 2012, 2018.
Cox, Casandra Kay, M.S., B.S. (University of Arkansas), Instructor, Department of Agricultural Education, Communications and Technology, 2003.

Cox, Nicole R., M.B.A. (University of Arkansas), B.S. (College of the Ozarks), Instructor, Department of Marketing, 2003.
Crandall, Philip G., Ph.D., M.S. (Purdue University), B.S. (Kansas State University), Professor, Department of Food Science, 1989, 1997.
Crawford, Cory, J.D. (University of Arkansas), Lecturer, Department of Political Science, 2019.
Crawley, Michael, Ph.D. (University of Texas at Austin), M.B.A., B.S. (Indiana University), Teaching Assistant Professor, William Dillard Department of Accounting, 2016.
Crimmins, Thomas D., M.O.A.S. (Air Command and Staff College), Instructor, Operations Management Program, 2019.
Crisel, Brandon, M.S.I.E (University of Arkansas), M.S., B.S. (Arkansas State University), Instructor, 2022, Instructor, Department of Industrial Engineering, 2022.
Cronan, Timothy P., Ph.D. (Louisiana Tech University), M.S. (South Dakota State University), B.S. (University of Southwestern Louisiana), Professor, Department of Information Systems, M.D. Matthews Endowed Chair in Information Systems, 1979.
Culhane, Michelle, M.A. (New York University), B.S. (Louisiana State University), Instructor, Department of Theatre, 2018.
Cummings, Michael, Ph.D. (University of Minnesota), J.D. and M.P.A. (Brigham Young University), B.S. (Utah Valley), Assistant Professor, Department of Strategic, Entrepreneurship and Venture Innovation, 2017. Cummings, Shaughan, J.D., M.P.A., B.A. (Brigham Young University), Teaching Assistant Professor, Department of Strategic, Entrepreneurship and Venture Innovation, 2018.
Curry, Robert M., Ph.D. (Clemson University), M.S.I.S.E (University of Florida), B.S.I.E. (University of Arkansas), Assistant Professor, Department of Industrial Engineering, 2023.

Domínguez, Freddy C., Ph.D., M.A. (Princeton University), B.A. (Brown University), Assistant Professor, Department of History, 2014.
Donatelli, David, M.A. (Central Michigan University), B.A. (University of Pittsburgh), Instructor, Operations Management Program, 2014.
Dong, Bin, Ph.D. (lowa State University), B.S. (Xiamen University), Assistant Professor, Department of Chemistry and Biochemistry, 2022.
Donoghue, Annie, Ph.D. (F. Edward Herbert School of Medicine), M.S. (Texas A\&M University), B.S. (San Diego State University), Research Professor, Department of Poultry Science, 2000.
Donohue, Jenna L.A., Ph.D., M.A. (University of California, Los Angeles), M.Ed., B.S., B.A. (Notre Dame), Assistant Professor, Department of Philosophy, 2023.
Dopp, Alex R., Ph.D., M.A. (University of Missouri), B.A. (University of Michigan), Assistant Professor, Department of Psychological Science, 2016.

Dorjee, Thupten, Ph.D. (Foreign Institution), Instructor, Humanities Program, 2008.
Dorogan, Vitaliy, Ph.D. (University of Arkansas), Assistant Professor, Nanotechnology, 2011.
Doss, Will, Ph.D. (Texas Tech University), M.S., B.S., (Texas A\&M University), Assistant Professor, Department of Agricultural Education, Communications and Technology, 2022.
Doucet, Annie, Ph.D., M.A. (Tulane University), B.A. (Southeastern Louisiana University), Assistant Professor, Department of World Languages, Literatures and Cultures, 2020.
Douglas, Marlis R., Ph.D., M.S., B.S. (University of Zurich), Professor, Department of Biological Sciences, Bruker Life Sciences Chair, 2012.
Douglas, Michael Edward, Ph.D. (University of Georgia), M.S., B.S. (University of Louisville), Professor, Department of Biological Sciences, 21st Century Chair in Global Change Biology, 2011.

Dowdle, Andrew J., Ph.D. (Miami University), M.A. (University of lowa), B.A. (University of Tennessee), Professor, Department of Political Science, 2003, 2015.
Dowling, Ashley Patrick Gregg, Ph.D. (University of Michigan-Ann
Arbor), B.S. (University of Arizona), Professor, Department of Entomology and Plant Pathology, 2008, 2019.
Drawve, Grant R., Ph.D. (University of Arkansas at Little Rock), M.A., B.A. (Southern Illinois University), Associate Professor, Department of Sociology and Criminology, 2016, 2021.
Dridi, Sami, Ph.D., M.S. (National Polytechnic Institute of Lorraine, France), B.S. (Superior Institute of Mateur, Tunisia), Professor, Department of Poultry Science, 2013, 2018.
Driver, Nelson G., B.S. (University of Arkansas), Instructor, Department of Finance, 1997.
Drolen, Rebecca, M.F.A., B.A. (Indiana University, Bloomington), Assistant Professor, School of Art, 2015.
Du, Wei, Ph.D. (Institute of Semiconductors, Chinese Academy of Science), B.S. (Peking University), Associate Professor, Department of Electrical Engineering, 2008, 2022.
Du, Yuchun, Ph.D. (Kagoshima University, Japan), B.S. (Shaanxi University of Technology, China), Associate Professor, Department of Biological Sciences, 2007, 2013.
Dumond, Gregory, Ph.D. (University of Massachusetts), M.S. (Texas Tech University), B.S. (University of Texas El Paso), Associate Professor, Department of Geosciences, 2010, 2018.
Dunbar, Diana, M.S.N. (University of Central Arkansas), B.S.N. (University of Central Oklahoma), Clinical Instructor, Eleanor Mann School of Nursing, 2015, 2019.
Duncan, James M., Ph.D. (Florida State University), M.S. (University of Arkansas), Instructor, School of Human Environmental Sciences, 2017.
Durand-Morat, Alvaro, Ph.D., M.S. (University of Arkansas), B.S.E.
(National University of Entre Rios), Assistant Professor, Department of Agricultural Economics and Agribusiness, 2016.
DuRant, Sarah Elizabeth, Ph.D. (Virginia Polytechnic Institute and State University), B.S. (University of South Carolina), Associate Professor, Department of Biological Sciences, 2017, 2021.
Durdik, Jeannine M., Ph.D. (Johns Hopkins University), B.S. (Purdue University), Professor, Department of Biological Sciences, 1994, 2004. Díaz Montemayor, Gabriel, M.L.A. (Auburn University), B.Arch. (Universidad Autónoma de Chihuahua), Assistant Professor, Department of Landscape Architecture, 2019.

\section*{E}

Edmonston, Craig, M.S. (University of Kansas), B.S. (Kansas State University), Instructor, Department of Health, Human Performance and Recreation, 2016.
Edwards, Martin, Ph.D., M.Sc., M.Math. (University of Warwick), Assistant Professor, Department of Chemistry and Biochemistry, 2020.
Edwards, Martin, Ph.D., M.Sc., M.Math. (University of Warwick), Assistant Professor, Department of Chemistry and Biochemistry, 2020.
Edwards, Vincent A., M.F.A. (Herron School of Art and Design), B.F.A. (Indiana University), Instructor, School of Art, 2016.
Efstathiou, Kes, M.F.A. (Rochester Institute of Technology), B.A. (Montana State University), Visiting Assistant Professor, School of Art, 2022.

Egan, Martin J., Ph.D., B.Sc. (University of Exeter, United Kingdom), Assistant Professor, Department of Entomology and Plant Pathology, 2016.

Eidelman, Scott H., Ph.D. (University of Kansas), B.A. (University of Wisconsin-Madison), Associate Professor, Department of Psychological Science, 2008, 2013.

Ekhalid, Amnee, Ph.D. (University of Missouri), M.S. (University of North Texas), B.A. (University of North Texas), Assistant Professor, Department of Communication, 2023.
Eksioglu, Burak, Ph.D. (University of Florida), M.S.E.B.M. (University of Warwick), B.S.I.E. (Bogazici University), Professor, Department of Industrial Engineering, 2019.
Eksioglu, Sandra, Ph.D. (University of Florida), M.S.E.M.S.
(Mediterranean Agronomic Institute of Chania), B.S.B.A. (University of Tirana), Professor, Department of Industrial Engineering, Hefley Professor in Logistics and Entrepreneurship, 2019.
El-Ghazaly, Samir M., Ph.D. (University of Texas at Austin), M.S., B.S. (Cairo University), Distinguished Professor, Department of Electrical Engineering, 2007.
El-Shenawee, Magda O., Ph.D. (University of Nebraska-Lincoln), M.S., B.S. (Assiut University, Egypt), Professor, Department of Electrical Engineering, 2001, 2010.
Elberfeld, Nathaniel, S.M.Arch.S. (Massachusetts Institute of Technology), M.Arch. (Washington University in St. Louis), B.S. (William and Mary), Visiting Assistant Professor, Department of Architecture, 2021. Elbin, R. J., Ph.D. (Michigan State University), M.A., B.A. (University of New Orleans), Associate Professor, Department of Health, Human Performance and Recreation, 2013, 2018.
Elliot, Jonathan, M.S.W. (University of Texas at Austin), B.S.W. (University of Alabama), Lecturer, School of Social Work, 2019.
Ellstrand, Alan E., Ph.D. (Indiana University at Bloomington), M.B.A. (North Illinois University), B.S. (University of Illinois-Urbana), Professor, Department of Strategic, Entrepreneurship and Venture Innovation, 2000, 2002.

Elsaadany, Mostafa, Ph.D. (University of Toledo), Teaching Assistant Professor, Department of Biomedical Engineering, 2019.
Elsass, Angela Carlton, Ed.D., Ed.S. (University of Arkansas), M.Ed. (Harding University), B.S.E. (University of Central Arkansas), Clinical Associate Professor, Department of Curriculum and Instruction, 2010, 2016.

Embaye, Abel, Ph.D. (Georgia State University), M.A. (Tilburg University), B.A. (University of Asmara), Clinical Assistant Professor, Department of Economics, 2010.
Emory, DeAnna Jan, Ph.D. (University of Arkansas), M.S., B.S.N. (University of Oklahoma Health Sciences Center), Associate Professor, Eleanor Mann School of Nursing, 2012, 2018.
Endacott, Jason L., Ph.D., M.S. (University of Kansas), B.S. (Kansas State University), Associate Professor, Department of Curriculum and Instruction, 2011, 2016.
Engen, Mindy Sue, Ph.D., M.A. (Pennsylvania State University), B.S. (Georgia State University), Professor, Department of Sociology and Criminology, 2005, 2017.
Engen, Rodney L., Ph.D. (University of Washington), M.S., B.S.
(University of Wisconsin-Milwaukee), Associate Professor, Department of Sociology and Criminology, 2009.
English, John R., Ph.D. (Oklahoma State University) P.E., M.S.O.R., B.S.E.E. (University of Arkansas), Professor, Department of Industrial Engineering, 1991, 1998.
Erdman, Kimball Douglas, M.L.A. (University of Oregon), B.L.A. (Utah State University), Professor, Department of Landscape Architecture, 2009, 2023.
Erf, Gisela F., Ph.D. (Cornell University), M.S., B.S. (University of Guelph, Canada), Professor, Department of Poultry Science, Avian Immunology Professorship, 1994, 2004.
Erickson, Kirstin C., Ph.D., M.A. (University of Wisconsin-Madison),
B.A. (St. Olaf College), Associate Professor, Department of Anthropology, 2001, 2008.

Eskitch, Paolo, M.M. (Brooklyn College), Lecturer, Department of Music, 2012.

Espinoza, Leonel A., Ph.D., M.S. (University of Florida), B.S. (Iowa State University), Associate Professor, Department of Crop, Soil and Environmental Sciences, 2003, 2007.
Essary, Michael L., D.B.A. (Northcentral University), M.B.A. (Florida Institute of Technology), M.B.A. (University of South Carolina), B.S. (University of Tennessee), Instructor, Operations Management Program, 2019.

Estepp, Chris, Ph.D. (University of Florida), M.Ed., B.S. (Texas A\&M University), Associate Professor, Department of Agricultural Education, Communications and Technology, 2019.
Estes, Hanna, M.S., B.S. (University of Arkansas), Instructor, Department of Agricultural Education, Communications and Technology, 2014.
Estes, Stuart, M.S., B.S. (University of Arkansas), Instructor, Department of Agricultural Education, Communications and Technology, 2021.
Etges, William J., Ph.D. (University of Rochester), M.S. (University of Georgia), B.S. (North Carolina State University), Professor, Department of Biological Sciences, 1987, 2004.
Evans, Matthew James, Ph.D. (Northern Arizona University), M.A, B.A.
(University of Louisville), Lecturer, Department of Political Science, 2022.
Evans, Timothy A., Ph.D. (Indiana University), B.S. (Slippery Rock
University), Associate Professor, Department of Biological Sciences, 2013, 2019.
Evans-White, Michelle Allayne, Ph.D. (University of Notre Dame), M.S., B.S. (Kansas State University), Professor, Department of Biological Sciences, 2008, 2018.
Eveleth, William, M.B.A., B.B. (University of North Texas), Instructor, Operations Management Program, 2012.
Ewelukwa, Uche U., S.J.D., LL.M. (Harvard University), LL.M. (University College, London), J.D. equivalent (University of Nigeria), Professor, School of Law, Arkansas Bar Foundation Professor of Law, 2001, 2010. F
Fairey, Julian, Ph.D., M.S.C.E. (University of Texas at Austin), B.S.C.E. (University of Alberta, Canada), Associate Professor, Department of Civil Engineering, 2008, 2014.
Fan, Chenguang, Ph.D. (lowa State University), B.S. (Nanjing University), Assistant Professor, Department of Chemistry and Biochemistry, 2016.
Fang, Di, Ph.D., W.P. (Arizona State University), B.A. (Nankai University), Assistant Professor, Department of Agricultural Economics and Agribusiness, 2015.
Farmer, Amy Lynn, Ph.D., M.A. (Duke University), B.S. (Purdue University), University Professor, Department of Economics, Margaret Gerig and R.S. Martin Jr. Chair in Business, 1999, 2003.
Farnell, Chris, Ph.D., M.S.E.E., B.S.E.E. (University of Arkansas), Research Assistant Professor, Department of Electrical Engineering, 2021.

Faske, Travis, Ph.D. (Texas A\&M University), M.S. (Oklahoma State University), B.S. (Tarleton State University), Associate Professor, Department of Entomology and Plant Pathology, 2015.
Fatema, Jinat, M.S. (Sam Houston State University), B.S. (University of Dhaka), Instructor, Department of Mathematical Sciences, 2014.
Feldman, William A., Ph.D. (Queen's University), M.S. (Northwestern University), B.S. (Tufts University), Professor, Department of Mathematical Sciences, 1971.
Feldner, Matthew T., Ph.D. (University of Vermont), M.A. (West Virginia University), B.S. (University of Wisconsin-Stevens Point), Professor, Department of Psychological Science, 2005, 2015.

Feng, Song, Ph.D., M.S. (Chinese Academy of Sciences), B.S. (Yunnan University), Associate Professor, Department of Geosciences, 2013, 2018.

Ferguson, Alishia Juanelle, Ph.D., M.S., B.A. (University of Texas Arlington), Clinical Associate Professor, School of Social Work, 2008, 2022.

Fernandes, Katia de Avila, Ph.D. (Georgia Institute of Technology), M.S. (Instituto Nacional de Pesquisas Espaciais, Brazil), B.S. (Universidade Federal de Pelotas, Brazil), Assistant Professor, Department of Geosciences, 2019.
Fernstrom, Eric, Ph.D. (University of Arkansas), Teaching Assistant Professor, Department of Civil Engineering, 2014, 2021.
Ferrier, Gary D., Ph.D. (University of North Carolina-Chapel Hill), B.A. (University of Wisconsin-Madison), University Professor, Department of Economics, Lewis E. Epley Jr. Professorship in Economics, 1993, 2012. Fields, Lashawnda, Ph.D., M.S.W. (Washington University), Assistant Professor, School of Social Work, 2020.
Fillastre, Michelle D., PH.D., M.S. (Louisiana State University), Instructor, School of Human Environmental Sciences, 2020.
Fitzpatrick, Ellen Therese, Ph.D. (Michigan State University), Professor, Clinton School of Public Service, 2012.
Fitzpatrick, Kevin M., Ph.D. (State University of New York at Albany), M.A. (University of South Carolina at Columbia), B.A. (Susquehanna University), University Professor, Department of Sociology and Criminology, Bernice Jones Chair in Community, 2005, 2014.
Fitzpatrick, Lynn, M.Arch. (Rice University), B.S. (Cornell University), Teaching Associate Professor, Department of Architecture, 1999, 2023.
Flaccus, Janet A., LL.M. (University of Illinois-Urbana-Champaign), J.D., M.A. (University of California-Davis), Professor, School of Law, 1984.

Flynn, John, M.B.A., J.D. (Case Western Reserve University), B.S. (John Carroll University), Instructor, Operations Management Program, 2012.
Folan, John, M.Arch (University of Pennsylvania), B.S.Arch (University of Illinois), Professor, Department of Architecture, 2019.
Foley, Larry D., M.S. (University of Central Arkansas), B.A. (University of Arkansas), Professor, School of Journalism and Strategic Media, 1993, 2005.

Folse, Judith Anne Garretson, Ph.D. (University of Arkansas), M.B.A., B.B.A (Pittsburg State University), Professor, Department of Marketing, R.A. and Vivian Young Endowed Chair, 2022.

Forbes, Kristian M., Ph.D. (University of Jyväskylä), M.P.H. (Latrobe University), B.Sc. (Latrobe University), Assistant Professor, Department of Biological Sciences, 2018.
Forscher, Patrick, Ph.D. (University of Wisconsin), B.A. (Macalester College), Assistant Professor, Department of Psychological Science, 2017.

Foster, Sharon Elaine, Ph.D., LL.M. (University of Edinburgh, Scotland), J.D. (Loyola Marymount University), B.A. (University of California-Los Angeles), Associate Professor, School of Law, 2000, 2009.
Foster, William, LL.M. (New York University), J.D. (University of Arkansas), B.S. (University of Central Arkansas), Assistant Professor, School of Law, 2014.
Frank, Kate L., M.F.A. (University of Arkansas), B.F.A. (California State University-Los Angeles), Lecturer, Department of Theatre, 2006.
Franklin, Carly T.S., M.S.W. (University of Arkansas), Clinical Associate Professor, School of Social Work, 2014, 2021.
Franks, Lisa, D.N.P. (University of Missouri-Columbia), M.S.N., B.S.N. (University of Arkansas), Instructor, Eleanor Mann School of Nursing, 2014.

Frazier, Kimberly Frances, Ph.D. (University of South CarolinaColumbia), M.S., B.S.E. (University of Arkansas), Associate Professor, Department of Communication Disorders and Occupational Therapy, 2007, 2013.

Fredrick, David Charles, Ph.D. (University of Southern California), M.A., B.A. (University of Kansas), Associate Professor, Department of World Languages, Literatures and Cultures, 1991, 1997.
Freeman, Katherine, M.S.W. (University of Georgia), B.A. (University of Arkansas), Lecturer, School of Social Work, 2017.
Freeze, Ron, Ph.D. (Arizona State University), M.B.A. (University of Missouri-Kansas City), B.S. (General Motors Institute), Clinical Professor, Department of Information Systems, 2015, 2021.
Friscoe, Louis F., M.S., B.S. (Embry Riddle Aeronautical University), Instructor, Operations Management Program, 2014.
Fritsch, Ingrid, Ph.D. (University of Illinois-Urbana-Champaign), B.S. (University of Utah), Professor, Department of Chemistry and Biochemistry, 1992, 2005.
Fritz, Angela I., Ph.D. (Loyola University), M.A. (University of WisconsinMadison), B.A. (University of lowa), Associate Librarian, University Libraries, 2014.
Fu, Huaxiang, Ph.D., M.S. (Fudan University), B.S. (University of Science and Technology of China), Professor, Department of Physics, 2002, 2017. Fugate, Brian, Ph.D., M.B.A., B.S. (University of Tennessee), Professor, J.B. Hunt Transport Department of Supply Chain Management, Oren Harris Chair in Transportation, 2015, 2018.
Fukushima, Tatsuya, Ph.D., M.A. (Oklahoma State University), B.A. (Kanto Gakuin University, Japan), Associate Professor, Department of World Languages, Literatures and Cultures, 2000, 2007.
Fuller, Serena M., Ph.D. (University of California, Davis), Associate Professor, School of Human Environmental Sciences, 2014.
Funkhouser, Eric M., Ph.D. (Syracuse University), M.A., B.A. (University of Nebraska-Lincoln), Professor, Department of Philosophy, 2002, 2016.
Furlong, Kimberley J., M.Arch. (U. Texas at Austin), B.F.A. (Pratt Institute), Associate Professor, Department of Interior Architecture and Design, 2013, 2018.

Gosman, Alan R., Ph.D. (Harvard University), Associate Professor,
Department of Music, 2014.
Gosman, Sara, J.D., M.P.A. (Harvard University), A.B. (Princeton University), Assistant Professor, School of Law, 2014.
Gould, Kara, Ph.D. (University of Utah), M.A., B.A. (Wheaton College), Assistant Professor, School of Journalism and Strategic Media, 2016.
Graham, Donna Lucas, Ph.D. (University of Maryland-College Park), M.Ed., B.S. (University of Arkansas), University Professor, Department of Agricultural Education, Communications and Technology, 1985, 2017.
Grandy, Jake, Ph.D. (University of Southern California), M.A. (University of New Mexico), B.S. (University of British Columbia), Assistant Professor, Department of Strategic, Entrepreneurship and Venture Innovation, 2020.
Gray, Laura Virginia, M.F.A. (University of Arkansas), M.A. (University of Montevallo), B.A. (University of North Alabama), Instructor, Department of English, 2000, 2004.
Gray, Michelle, Ph.D. (University of Arkansas), M.S. (Ball State University), B.S. (University of Tennessee, Chattanooga), Associate Professor, Department of Health, Human Performance and Recreation, 2010.

Green-Turner, Amanda Lenora, D.M.A. (University of Michigan), Teaching Assistant Professor, Department of Music, 2021.
Greene, Aleza R.S., Ph.D., M.A. (Brandeis University), B.A. (Tufts University), Clinical Assistant Professor, Department of Curriculum and Instruction, 2006.
Greene, Jay Phillip, Ph.D., A.M. (Harvard University), B.A. (Tufts University), Distinguished Professor, Department of Education Reform, Endowed Chair in Education Reform, 2005, 2014.
Greene, Nicholas P., Ph.D. (Texas A\&M University), M.S., B.S. (University of South Carolina), Professor, Department of Health, Human Performance and Recreation, 2013, 2022.
Greenhill, Jennifer, Ph.D. (Yale University), M.A. (Williams College), B.A. (University of California, Los Angeles), Professor, School of Art, Endowed Chair in Art History, 2020.
Grover, Kenda Shea, Ed.D. (University of Arkansas), M.S., B.A.
(Northeastern State University), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2003, 2018.

Grover, Varun, Ph.D. (University of Pittsburg), M.B.A. (Southern Illinois University), B.S. (Indian Institute of Technology), Distinguished Professor,

Department of Information Systems, David D. Glass Chair in Information Systems, 2017.
Gruenewald, Jeffrey A., Ph.D. (Michigan State University), Professor, Department of Sociology and Criminology, 2019, 2022.
Gu, Jingping, Ph.D. (Texas A\&M University), M.A. (Peking University), B.A. (Renmin University of China, Bejiing), Associate Professor, Department of Economics, 2008, 2014.
Guo, Lei, Ph.D. (University of California, Berkeley), B.S. (Lanzhou University, China), Assistant Professor, Department of Civil Engineering, 2022.

Guo, Lei, Ph.D. (University of California, Berkeley), B.S. (Lanzhou University, China), Assistant Professor, Department of Civil Engineering, 2022.

H
Hackstadt, Angela, M.L.I.S. (University of Alabama), B.A. (University of Arkansas), Assistant Professor, University Libraries, .
Haggard, Brian Edward, Ph.D. (Oklahoma State University), M.S. (University of Arkansas), B.S. (Missouri University of Science and Technology), Professor, Department of Biological and Agricultural Engineering, 2006, 2011.
Haghighi, Mohammad, Ph.D. (Ohio University), Assistant Professor, Department of Communication Disorders and Occupational Therapy, 2019.

Hagstrom, Fran W., Ph.D. (Clark University), M.S. (University of Texas Health Science Center-Houston), M.A. (St. Louis University), B.A. (Southwest Baptist University), Associate Professor, Department of Communication Disorders and Occupational Therapy, 2002, 2008.
Halbert, Katey, D.M.A. (University of lowa), M.M. (Ohio State University), B.M. (Bowling Green State University), Visiting Assistant Professor, Department of Music, 2021.
Hale, Micah, Ph.D., M.S.C.E., B.S.C.E. (University of Oklahoma), Professor, Department of Civil Engineering, 21st Century Leadership Chair in Civil Engineering, 2002, 2013.
Hall, David, M.S.N., B.S.N. (University of Arkansas), Instructor, Eleanor Mann School of Nursing, 2020.
Hall, Kevin D., Ph.D. (University of Illinois-Urbana-Champaign), M.S.C.E., B.S.C.E. (University of Arkansas), University Professor, Department of Civil Engineering, 1993, 2020.
Hallett, LewEllyn, M.F.A. (Bowling Green State University), B.A. (University of New Mexico), Instructor, Department of English, 2013.
Ham, Garret Richard, M.Div. (Yale University, J.D. (University of Arkansas), B.A.C.S. (Ouachita Baptist University), Instructor, Operations Management Program, 2019.
Ham, Richard, Ed.D. (University of Arkansas at Little Rock), M.A.S.
(Embry-Riddle Aeronautical University), B.S. (Park University), Instructor, Operations Management Program, 2014.
Ham-Holm, Lindsay S., Ph.D., M.A., B.A. (University of NebraskaLincoln), Associate Professor, Department of Psychological Science, 2007, 2012.
Hamilton, Clayton, Ph.D., M.S. (University of Arkansas), B.S.B.A. (United States Sports Academy), Instructor, Department of Health, Human Performance and Recreation, 2013.
Hamilton, John H., M.S., B.S. (University of Arkansas), Instructor, Department of Mechanical Engineering, 2002.
Hammel, Alice, D.M.A. (Shenandoah University), M.M. (Florida State University), B.M. (Shenandoah University), Instructor, Department of Music, 2016.
Hammig, Bart, Ph.D. (University of Kansas), M.P.H. (University of Kansas Medical Center), B.S. (University of Kansas), Professor, Department of Health, Human Performance and Recreation, 2008, 2018.

Hammond, Kelly, Ph.D. (Georgetown University), M.A. (Simon Frazer University), B.A. (Bishop's University), Associate Professor, Department of History, 2015, 2020.
Hanning, Casey Owens, Ph.D., M.S., B.S. (Texas A\&M University), Professor, Department of Poultry Science, 2000, 2017.
Hapgood, Thomas Layley, M.F.A., B.A. (University of Arizona),
Associate Professor, School of Art, 2005, 2012.
Harding, Lorna, M.S. (University of Alberta, Canada), B.A. (University of Western Ontario, Canada), Instructor, School of Human Environmental Sciences, 2004.
Hardke, Jarrod T., Ph.D. (Louisiana State University), B.S.A. (University of Arkansas), Professor, Department of Crop, Soil and Environmental Sciences, 2013, 2020.
Hare, J. Laurence, Ph.D., M.A. (University of North Carolina at Chapel Hill), B.A. (University of Tennessee at Chattanooga), Associate Professor, Department of History, 2010, 2015.
Hargis, Billy M., Ph.D., D.V.M. (University of Minnesota-Twin Cities), M.S. (University of Georgia), B.S. (University of Minnesota), Distinguished Professor, Department of Poultry Science, Sustainable Poultry Health Chair, 2000, 2017.
Harmon, Kevin, Ph.D., M.B.A., M.S. (Texas Tech University), B.S.
(Truman State University), Assistant Professor, Department of Information Systems, 2022.
Harrington, Brett P., M.F.A. (University of Arkansas), B.A. (University of Houston-Clear Lake), Instructor, 2007.
Harrington, Phil, Ph.D., M.S. (University of Notre Dame), B.S. (Whitworth College), Professor, Department of Mathematical Sciences, 2009, 2019.
Harris, Casey Taggart, Ph.D., M.A. (Pennsylvania State University), B.S. (Texas A\&M University), Professor, Department of Sociology and Criminology, 2011, 2023.
Harris, Flint, Ed.D., M.Ed., B.S.E (University of Arkansas), Instructor, Department of Marketing, 2023.
Harris, Leonard, Ph.D. (Cornell University), B.S. (University of Colorado, Boulder), Assistant Professor, Department of Biomedical Engineering, 2020.

Harriss, Edmund O., Ph.D. (Imperial College, London), M.M. (University of Warwick), Assistant Professor, Department of Mathematical Sciences, 2010, 2022.
Hartenberger, Craig, M.F.A. (Kent State University), B.F.A. (Missouri State University), Instructor, School of Art, 2022.
Harter, William G., Ph.D. (University of California-Irvine), B.S. (Hiram College), Professor, Department of Physics, 1986.
Hatfield, Joe, Ph.D. (University of Colorado), M.A. (Syracuse University), B.A. University of North Texas), Assistant Professor, Department of Communication, 2020.
Haydar, Adnan Fuad, Ph.D. (University of California-San Diego), M.A., B.A. (American University of Beirut), Professor, Department of World Languages, Literatures and Cultures, 1993.
Haydar, Paula Marie, Ph.D., M.F.A. (University of Arkansas), M.Ed., B.S. (University of Massachusetts), Associate Professor, Department of World Languages, Literatures and Cultures, 2006, 2023.
Hayes, Thomas P., Ph.D. (University of North Texas), M.Acc. (University of Missouri), B.A. (Westminster College), Teaching Associate Professor, William Dillard Department of Accounting, 2019.
Hays, Phillip D., Ph.D., M.S. (Texas A\&M University), B.S. (University of Arkansas), Assistant Professor, Department of Geosciences, 2017.
He, Maggie, Ph.D. (ETH Zürich), M.S. (University of Pennsylvania), B.S. (City College of New York), Assistant Professor, Department of Chemistry and Biochemistry, 2019.
Henry, Christopher Garrett, Ph.D. (University of Nebraska-Lincoln), M.S., B.S. (Kansas State University), Associate Professor, Department of Biological and Agricultural Engineering, 2011, 2018.

Henry, Erin E., Ph.D. (University of Connecticut), M.S. (University of Memphis), B.Acc. (Mississippi State University), Associate Professor, William Dillard Department of Accounting, 2019, 2023.
Henry, Leah Jean, Ph.D. (Texas Woman's University), M.A. (Michigan State University), B.S. (Texas A\&M University), Associate Professor, Department of Health, Human Performance and Recreation, 2008, 2011. Henry, Ralph Leroy, Ph.D., M.S. (Kansas State University), B.S.E. (University of Kansas), Distinguished Professor, Department of Biological Sciences, W.M. Keck Endowed Professorship, 1996, 2012.
Herman, Greg, M.Arch. (Rice University), B.Arch. (University of Cincinnati), Associate Professor, Department of Architecture, 1991, 1998. Hermanson, Karl, M.F.A. (University of South Dakota), B.A. (Dana College), Instructor, Department of Theatre, 2018.
Hernandez, Gaby, M.F.A. (University of Florida), B.A. (Universidad de Costa Rica), Endowed Associate Professor of Graphic Design, 2022.
Hernandez, Gaby, M.F.A. (University of Florida), B.A. (Universidad de Costa Rica), Endowed Associate Professor of Graphic Design, School of Art, 2021.
Hernandez, Sarah, Ph.D., M.S. (University of California, Irvine), B.S. (University of Florida), Associate Professor, Department of Civil Engineering, Walter E. Hicks and Blossom Russel Hicks Professorship for Infrastructure Engineering, 2015, 2021.
Hernandez-Miranda, Michael, Ph.D., M.A. (Texas A\&M University), B.A. (University of Oriente), Instructor, Department of World Languages, Literatures and Cultures, 2015.
Herold, Laura K., Ph.D., M.A. (University of Michigan), B.A. (Oberlin College), Teaching Assistant Professor, School of Human Environmental Sciences, 2015.
Herold, Warren, Ph.D. (University of Michigan), Instructor, Department of Philosophy, 2014.
Hershberger, Margaret, Ph.D., M.S. (University of Chicago), B.S. (The Ohio State University), Instructor, Department of Chemistry and Biochemistry, 2015.
Hertzog, Jacob, Ph.D. (University of Arkansas), M.M. (Manhattan School of Music), B.M. (Berklee College of Music), Assistant Professor, Department of Music, 2022.
Herzberg, Amy, M.F.A. (California Institute of the Arts), B.A. (Arizona State University), Distinguished Professor, Department of Theatre, 1989, 2015.

Herzog, Jacob, M.M. (Manhattan School of Music), B.M. (Berklee College of Music), Instructor, Department of Music, 2016.
Hestekin, Christa, Ph.D. (Northwestern University), B.S.Ch.E. (University of Kentucky), Associate Professor, Ralph E. Martin Department of Chemical Engineering, Ansel and Virginia Condray Endowed Professorship in Chemical Engineering, 2006, 2013.
Hestekin, Jamie A., Ph.D. (University of Kentucky), B.S.Ch.E. (University of Minnesota-Duluth), Professor, Ralph E. Martin Department of Chemical Engineering, Maurice E. Barker Chair in Chemical Engineering, 2006, 2017.

Hettiarachchy, Navam S., Ph.D. (University of Hull, England), M.S. (Edinburgh University, Scotland), B.S. (University of Madras, India), University Professor, Department of Food Science, 1992, 2006.
Hevel, Michael Stephen, Ph.D. (University of lowa), M.A. (Bowling Green State University), B.A. (University of Kansas), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2012, 2017.
Heyes, Colin David, Ph.D. (Georgia Institute of Technology), B.S. (Loughborogh University), Professor, Department of Chemistry and Biochemistry, 2008, 2021.
Heymsfield, Ernie, Ph.D. (City University of New York), M.S.C.E. (Polytechnic University), Associate Professor, Department of Civil Engineering, 2001, 2007.

Hicks, Morgan, M.F.A. (University of Arkansas), M.A. (Missouri State University), B.F.A. (Arkansas State University), Teaching Assistant Professor, Department of Theatre, 2007.
Higgins, Kristin Kay, Ph.D., M.S. (University of Arkansas), B.A. (Vanderbilt University), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2006, 2014. Hill, Julie, Ph.D. (University of Arkansas), M.E (Colorado State University), B.S. (Brigham Young University), Assistant Professor, 2023. Hill, Kennedy, Ph.D., M.P.A., B.A. (University of Arkansas), Lecturer, Department of Political Science, 2022.
Hinrichsen, Lisa, Ph.D., M.A. (Boston University), B.A. (Wellesley College), Associate Professor, Department of English, 2008, 2015. Hodges, Amy M., B.A. (Louisiana Tech College Acadian Campus), Instructor, 2005.
Hodges, Beverly, M.Ed., B.S.B.A. (University of Arkansas), Instructor, 2004.

Hodges, Karen L., Ph.D. (University of Arkansas), Lecturer, Graduate School and International Education, 2019.
Hoehle, Hartmut, Ph.D., B.Com. (Victoria University of Wellington), Visiting Professor, Department of Information Systems, 2013, 2022.
Hofer, Christian, Ph.D. (University of Maryland University College), B.A. (European School of Business), Associate Professor, J.B. Hunt Transport Department of Supply Chain Management, 2007, 2012.
Hoffpauir, Susan Annette, Ph.D. (University of Michigan-Ann Arbor), Distinguished Professor, Clinton School of Public Service, 2011.
Hogan, Adam S., M.A, M.F.A (Washington University in St. Louis), Assistant Professor, School of Art, 2014.
Holland, Brian, M.Arch.,(University of Pennsylvania), B.Arch., (California State Polytechnic University, Pomona), Assistant Professor, Department of Architecture, 2018.
Holland, Edward C., Ph.D., M.A. (University of Colorado, Boulder), B.A. (Princeton University), Associate Professor, Department of Geosciences, 2016, 2022.
Holm, Jeremy, M.A., B.S. (University of Nebraska), Instructor, Department of Psychological Science, 2008.
Holyfield, Christine E., Ph.D. (Pennsylvania State University), M.A. (University of Kansas), B.S. (Central Michigan University), Associate Professor, Department of Communication Disorders and Occupational Therapy, 2017, 2022.
Holyfield, Lori C., Ph.D. (University of Georgia), M.A., B.S.E. (University of Arkansas), Professor, Department of Sociology and Criminology, 1995, 2012.

Hong, Ye "Abby", Ph.D. (University of Tennessee), M.S. (University of Illinois), B.S. (Nanjing University of Science and Technology), Teaching Assistant Professor, Department of Economics, 2022.
Hood, Shanda, Ph.D. M.S. (University of Arkansas), B.S. (University of Arkansas-Fort Smith), Teaching Assistant Professor, Department of Mathematical Sciences, 2013.
Hopkins, John D., Ph.D. (University of Arkansas), M.S., B.S. (Clemson University), Associate Professor, Department of Entomology and Plant Pathology, 2001.
Hossain, Md Amzad, Ph.D., M.A. (University of Virginia), B.S.S. (University of Dhaka), Assistant Professor, Department of Economics, 2022.

Houin, Cameron B., Ph.D. (University of Arkansas), Lecturer, Human Resource and Workforce Development Education Program, 2019.
Howard, John E., Ed.D. (John Hopkins University), M.A. (Bowie State University), Lecturer, Department of Curriculum and Instruction, 2020. Howard, Luke R., Ph.D., M.S. (University of Arkansas), B.S. (Purdue University), Professor, Department of Food Science, 2002.

Howie-Hickey, Erin, Ph.D. (University of South Carolina), B.S. (University of Maryland), Associate Professor, Department of Health, Human Performance and Recreation, 2016, 2022.
Hoyer, Jennifer M., Ph.D., M.A. (University of Minnesota-Twin Cities), B.A. (University of Tulsa), Associate Professor, Department of World Languages, Literatures and Cultures, 2007, 2013.
Hsu, Hung-Chia Scott, Ph.D. (University of North Carolina-Chapel Hill), M.A. (University of Southern California), B.A. (National Taiwan University), Associate Professor, Department of Finance, 2015, 2021.
Hu, Han, Ph.D. (Drexel University), Assistant Professor, Department of Mechanical Engineering, 2019, .
Hu, Jin, Ph.D. (Tulane University), B.S. (University of Science and Technology of China), Assistant Professor, Department of Physics, 2017.
Huang, Lifa, Ph.D., M.B.A. (University of Arkansas), M.S. (Southern Illinois University), Teaching Assistant Professor, Department of Finance, 2019.

Huang, Miaoqing, Ph.D. (George Washington University), B.S. (Fudan University), Associate Professor, Department of Computer Science and Computer Engineering, 2010, 2016.
Huang, Po-Hao Adam, Ph.D., M.S., B.S. (University of California-Los Angeles), Associate Professor, Department of Mechanical Engineering, 2006, 2012.
Huang, Quiqiong, Ph.D. (University of California-Davis), B.S. (Remin University of China), Professor, Department of Agricultural Economics and Agribusiness, 2013, 2018.
Huang, Xiao, Ph.D. (University of South Carolina), M.S. Georgia Institute of Technology (2016), B.S. (Wuhan University), Assistant Professor, Department of Geosciences, 2020.
Huang, Yan, Ph.D. (University of Wyoming), M.S. (Dankook University), B.S. (China Agricultural University), Assistant Professor, Department of Animal Science, 2015.
Huett, Briana Marie, Ph.D., M.S., M.P.A. (University of Arkansas), B.A. (Davidson College), Lecturer, Department of Political Science, 2021. Hughes, Claretha, Ph.D. (Virginia Polytechnic Institute and State University), M.S. (North Carolina State University), M.B.A. (University of Arkansas), B.A. (Clemson University), Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2004, 2017.

Huh, Michelle Boyong, M.I.D. (University at Texas, Austin), B.Arch. (Korea University), Assistant Professor, Department of Interior Architecture and Design, 2022.
Huitink, David, Ph.D., M.S.M.E., B.S.M.E. (Texas A\&M University), Associate Professor, Department of Mechanical Engineering, 2016, 2022. Hulen, Jeannie, M.F.A. (Louisiana State University), B.F.A. (Kansas City Art Institute), Professor, School of Art, 2002, 2018.
Hunt, Valerie H., Ph.D., J.D., B.A. (University of Arkansas), Associate Professor, Department of Political Science, 2005, 2014.
Hunter, Justin R., Ph.D. (University of Hawai'i at M\#noa), M.M., B.A. (University of Arkansas), Instructor, Department of Music, 2017.
Hunthrup, Mindy R., M.S., B.S.B.A. (Arkansas Tech University), Instructor, Operations Management Program, 2019.
Hurd, Debra, Ph.D., M.P.A., B.A. (University of Arkansas), Clinical Professor, School of Social Work, 1992, 2012.
Hurt, Bryan M., Ph.D. (University of Southern California), B.A. (Ohio State University), Assistant Professor, Department of English, 2019.
Hutchins, Rhett J., Ph.D. (University of Georgia), M.Ed., B.S. (Clemson University), Clinical Associate Professor, Department of Curriculum and Instruction, 2014, 2020.
Hutto, Gregory T., M.S. (Stanford University), B.S. (U.S. Naval Academy), Instructor, Operations Management Program, 2014.

Hux, Glenda, O.T.D. (Boston University), B.S. (University of Mississippi Medical Center), Assistant Professor, Department of Communication Disorders and Occupational Therapy, 2023.
Hyman, Jeremy S., C.Phil. (University of California, Los Angeles), M.A. (Princeton University), B.A. (University of Michigan), Instructor, Department of Philosophy, 2018.
I
Imbeau, Marcia B., Ph.D. (University of Connecticut), M.Ed. (University of Arkansas at Little Rock), B.A. (Hendrix College), Professor, Department of Curriculum and Instruction, 1991, 2013.
Irish, Shawn D., M.F.A. (University of Arkansas), B.A. (Missouri Southern State University), Associate Professor, Department of Theatre, 2013, 2020.

Issa, Nadia, Ph.D. (Academy of Fine Arts in Warsaw), Teaching Assistant Professor, School of Art, 2022.
Ivey, Mack, Ph.D., B.S. (University of Georgia), Associate Professor, Department of Biological Sciences, 1992, 1998.
Iyer, Shilpa, Ph.D. (University of Georgia), M.Sc., B.Sc. (University of Pune, India), Assistant Professor, Department of Biological Sciences, 2016.

J
Jacobs, Lynn Frances, Ph.D., M.A. (New York University), B.A. (Princeton University), Distinguished Professor, School of Art, 1989, 2016. Jacobus, Frank R., M.Arch. (University of Texas at Austin), Associate Professor, Department of Architecture, 2012, 2015.
Jaduh, Arva, Ph.D. (University of Southern California), M.Phil.
(Cambridge University), B.A. (University of California, Berkeley), Assistant Professor, Department of Economics, 2013.
Jandik, Dobrina, Ph.D. (University of Arkansas), M.Sc.Eng. (University of Chemical Technology), M.B.A. (University of Montana), Clinical Associate Professor, Department of Finance, 2017.
Jandik, Tomas, Ph.D. (University of Pittsburgh), M.S., B.S. (Czech Technical University), Professor, Department of Finance, Dillard Chair in Corporate Finance, 2000, 2016.
Jarnagin, Robyn, LL.M. (New York University), J.D., B.S. (University of Montana), Clinical Associate Professor, William Dillard Department of Accounting, 2016, 2020.
Jarrett, Anna Lee, Ph.D., M.S.N. (University of Missouri-Columbia), B.S.N. (Missouri Southern State College), Associate Professor, Eleanor Mann School of Nursing, 2012, 2018.
Javad, M., Ph.D. (University of Kansas), M.B.A. (University of Tehran, Iran), B.Sc. (Sharif University of Technology, Iran), Assistant Professor, Department of Marketing, 2022.
Jefferis, Neal, M.S.Ed. (Old Dominion University), B.E.S.(University of Missouri), Instructor, Operations Management Program, 2017.
Jennings, Freddie, Ph.D. (University of Missouri), M.A., B.A.
University of Arkansas), Teaching Assistant Professor, Department of Communication, 2018.
Jennings, John A., Ph.D. (University of Missouri), M.S. (University of Arkansas), B.S. (Southwest Missouri State University), Professor, Department of Animal Science, 1998.
Jensen, David C., Ph.D., M.S., B.S. (Oregon State University), Associate Professor, Department of Mechanical Engineering, 2012, 2018.
Jensen, Hanna Katariina, Ph.D. (University of Oulu, Finland), Research Assistant Professor, Department of Biomedical Engineering, 2015.
Jensen, Molly R., Ph.D., M.A. (University of Arkansas), B.S. (Southwest Missouri State University), Clinical Associate Professor, Department of Marketing, 2003.
Jensen, Morten O., Ph.D. (University of Aarhus, Denmark), M.Sc. (Georgia Institute of Technology), Associate Professor, Department of Biomedical Engineering, 2014.

Jensen, Sarah D., Ed.D. (University of Arkansas), M.B.A., B.A. (Webster University), Instructor, Department of Marketing, 2009.
Jensen, Thomas D., Ph.D., M.A., B.A. (University of Arkansas),
Professor, Department of Marketing, Wal-Mart Lecturer in Retailing, 1982, 2009.

Jensen, Toni, Ph.D. (Texas Tech University), M.A., B.A. (University of South Dakota), Associate Professor, Department of English, 2014, 2019. Jilka, Elizabeth C., M.F.A., B.A. (University of Arkansas), Instructor, Department of Theatre, 2017.
Jin, Kevin, Ph.D., M.S., (University of Illinois at Urbana-Champaign), B.E. (Nanyang Technological University, Singapore), Associate Professor, Department of Computer Science and Computer Engineering, , 2021.
Joffe Minor, Tacy Marie, Ph.D. (Northwestern University), M.A., B.S. (University of Arkansas), Teaching Assistant Professor, Department of Physics, 2011, 2018.
Johnson, Alex, M.S., B.A. (University of Arkansas), Lecturer, Department of Political Science, 2020.
Johnson, Donald M., Ph.D. (University of Missouri-Columbia), M.A., B.S. (Western Kentucky University), Professor, Department of Agricultural Education, Communications and Technology, 1993, 1999.
Johnson, Jon, Ph.D. (Indiana University at Bloomington), M.B.A., B.S. (University of Arkansas), Professor, Department of Strategic, Entrepreneurship and Venture Innovation, Walton College Professorship in Sustainability, 1996, 2007.
Johnson, Kelly Vowell, Ed.D. (University of Arkansas), M.N.Sc. (University of Arkansas for Medical Sciences) B.S.N. (Arkansas Tech University), Associate Professor, Eleanor Mann School of Nursing, 2013, 2021.

Johnson, Mark, Ph.D. (Michigan State University), M.S. (Purdue
University), B.S. (City University of New York, Brooklyn College), Professor, Department of Mathematical Sciences, 1995, 2015.
Johnson, Noah, B.A. (Fort Lewis College), Instructor, Department of Theatre, 2020.
Johnson, Normastel Mosby, M.L.S. (Simmons College), B.A. (Vanderbilt University), Associate Librarian, University Libraries, 1989.
Johnson-Carter, Charlene M., Ph.D. (Emory University), M.B.A. (Atlanta University), M.Ed., B.A. (University of Cincinnati), Associate Professor, Department of Curriculum and Instruction, 1992, 1998.
Jones, Chase, M.M., B.M. (University of Arkansas), Instructor, Department of Music, 2022.
Jones, Ches, Ph.D. (University of Alabama at Birmingham), B.S.E.
(Pittsburg State University), Professor, Department of Health, Human Performance and Recreation, 1994.
Jones, Clinton G., Ed.D. (Arkansas Tech University), Ed.S. (Harding University), Assistant Professor, Department of Curriculum and Instruction, 2019.
Jones, Garret, B.M. (University of Arkansas), Lecturer, Department of Music, 2022.
Jones, Linda Carol, Ph.D. (University of New Mexico), M.A. (University of Arkansas), M.A. (University of Arizona), B.A. (Northeast Louisiana University), Professor, Department of World Languages, Literatures and Cultures, 1988, 2022.
Jones, Phillip J., M.S. (University of Illinois-Urbana-Champaign), M.A. (University of California-Irvine), B.A. (University of California-Santa Barbara), Associate Librarian, University Libraries, 2003.
Jones, Phillip, M.B.A., B.S. (University of Arkansas), Instructor, Department of Civil Engineering, 2013, 2022.
Jones, Ringo, M.F.A. (Miami University), B.A. (Northern Kentucky University), Assistant Professor, Department of Communication, 2020. Joseph, Qwist, M.F.A. (University of Nebraska-Lincoln), Instructor, School of Art, 2022.

Joshi, Neelendra, Ph.D. (Pennsylvania State University), Assistant Professor, Department of Entomology and Plant Pathology, 2015. Judah, Matt, Ph.D., M.S. (Oklahoma State University), B.A. (Ozark Christian College), Assistant Professor, Department of Psychological Science, 2020.
Judges, Donald P., Ph.D. (University of Tulsa), J.D. (University of Maryland University College), B.A. (Johns Hopkins University), Professor, School of Law, E.J. Ball Professor of Law, 1989.
Juhl, Beth, M.L.S. (Columbia University), B.A. (University of Texas at Austin), Librarian, University Libraries, 1993, 1999.
Jung, Hyunseok, Ph.D. (Syracuse University), M.A. (Korea Development Institute), B.A. (Seoul National University), Assistant Professor, Department of Economics, 2018.

Kashiwagi, Tomoko, D.M.A. (University of Texas at Austin), M.M., B.M. (Indiana University), Associate Professor, Department of Music, 2012, 2022.

Kayser, Casey Lee, Ph.D. (Louisiana State University), M.A. (University of Missouri-Columbia), B.A. (Westminster College), Associate Professor, Department of English, 2012, 2022.
Keethler, Gregory A., M.S.O.R. (Air Force Institute of Technology), B.S. (University of Texas at El Paso), Instructor, Operations Management Program, 2019.
Kegley, Beth, Ph.D., M.S. (North Carolina State University), B.S. (Virginia Polytech Institute and State University), Professor, Department of Animal Science, 1996, 2007.
Keiffer, Elizabeth, Ph.D., M.A. (University of Arkansas), B.S. (East Central University), Teaching Assistant Professor, Department of Information Systems, 2016, 2019.
Kellams, Kyle, B.A. (University of Arkansas), Instructor, Campus Radio, 1989.

Kelley, Christopher Rowand, LL.M. (University of Arkansas), J.D.
(Howard University), B.A. (Louisiana State University at Shreveport), Associate Professor, School of Law, 1998, 2002.
Kelley, Jason, Ph.D., M.S. (Oklahoma State University), B.S. (Kansas State University), Professor, Department of Crop, Soil and Environmental Sciences, 2003, 2019.

Kemper, Nathan, Ph.D., M.S. (University of Arkansas), B.S. (Missouri State University), Clinical Professor, Department of Agricultural Economics and Agribusiness, 2014.
Kennedy, David, M.Des. (Harvard University), B.Arch. (Carnegie Mellon University), Assistant Professor, Department of Architecture, 2021.
Kennefick, Daniel John, Ph.D., M.A. (California Institute of Technology), B.S. (University College Cork, Ireland), Professor, Department of Physics, 2003, 2021.
Kennefick, Julia Dusk, Ph.D. (California Institute of Technology), B.S. (University of Arkansas), Associate Professor, Department of Physics, 2003, 2014.
Kent, John, Ph.D. (University of Tennessee), M.B.A. (University of Dallas), B.S. (Henderson State University), Clinical Associate Professor, J.B. Hunt Transport Department of Supply Chain Management, 2014, 2018.

Kent, Laura B., Ph.D. (University of Wisconsin-Madison), M.S. (Purdue University Calumet), B.S. (Purdue University), Associate Professor, Department of Curriculum and Instruction, 2006.
Kern, Jack C., Ph.D. (Texas Woman's University), M.Ed. (Texas State University-San Marcos), B.S. (University of Wisconsin-LaCrosse), Clinical Professor, Department of Health, Human Performance and Recreation, 1996, 2013.
Kerr, Brinck, Ph.D. (Texas A\&M University), B.A. (University of Texas at Austin), University Professor, Department of Political Science, 1994, 2021.

Khan, Abraham, Ph.D. (University of Minnesota), M.A., B.A (Florida State University), Assistant Professor, Department of Communication, 2022.
Kidd, Michael T., Ph.D. (North Carolina State University), M.S., B.S.A. (University of Arkansas), Professor, Department of Poultry Science, 2010. Killenbeck, Ann Mallatt, Ph.D. (University of Michigan-Ann Arbor), J.D. (University of Nebraska-Lincoln), Associate Professor, School of Law, 2003, 2010.
Killenbeck, Mark R., J.D., Ph.D. (University of Nebraska-Lincoln), B.A. (Boston College), Distinguished Professor, School of Law, Wylie H. Davis Professor of Law, 1988, 2003.
Killian, Timothy Scott, Ph.D. (University of Missouri-Columbia), M.A. (Wheaton College), B.A. (Central Bible College), Associate Professor, School of Human Environmental Sciences, 2001, 2007.
Kilmer, Michele, D.N.P. (University of Alabama), M.S.N (Texas Tech University), B.S.N. (Harding University), Assistant Professor, Eleanor Mann School of Nursing, 2017, 2018.
Kilyanek, Stefan M., Ph.D., M.S. (University of Chicago), B.S. (Grand Valley State University), Associate Professor, Department of Chemistry and Biochemistry, 2014, 2019.
Kim, Daesoo, Ph.D., M.S. (University of Arkansas), B.S. (Suncheon National University), Instructor, Ralph E. Martin Department of Chemical Engineering, 2022.
Kim, Hyun, Ph.D., D.M.A. (University of Colorado), M.M. (University of Cincinnati), M.M. (Sung-Shin Women's University), B.M. (Chung-Ang University), Visiting Assistant Professor, Department of Music, 2018. Kim, Jin-Woo, Ph.D. (Texas A\&M University), M.S. (University of Wisconsin-La Crosse), B.S. (University of lowa), Professor, Department of Biological and Agricultural Engineering, 2001, 2011.
Kim, Seokeun, Ph.D. (University of Georgia), M.P.A. (lowa State University), B.P.A. (University of Seoul), Visiting Assistant Professor, Department of Political Science, 2022.
King, Bonnie, M.A.T., B.S.E. (University of Arkansas), Clinical Instructor, Department of Curriculum and Instruction, 2015.
King, Leldon Dale, B.S. (University of Central Oklahoma), Instructor, 2010.

King, Michele S., M.L.S., B.F.A. (University of Oklahoma), Associate Librarian, University Libraries, 1987.

King, Sam, M.F.A. (Indiana University at Bloomington), B.F.A. (University of Tulsa), Assistant Professor, School of Art, 2011, 2016.
King, Tiffany, M.A. (University of Arkansas), B.J. (University of Missouri), Instructor, School of Journalism and Strategic Media, 2014.
Kippenbrock, Thomas A., Ed.D. (Indiana University at Bloomington), M.S. (Indiana University-Purdue University-Indianapolis), B.S.N. (Indiana State University), Professor, Eleanor Mann School of Nursing, 2003.
Kirkwood, Patricia Elaine, M.S. (University of Illinois-Urbana-
Champaign), B.S. (Pacific Lutheran University), Associate Librarian, University Libraries, 2004.
Kizsonas, Elizabeth, Ph.D. (University of Arkansas), Th.M., M.Div. (Trinity Evangelical Divinity School), B.A. (Rutgers University), Instructor, Department of History, 2020.
Knies, Cambry, M.A., B.A. (University of Arkansas), Instructor, Department of Communication, 2020.
Knighten, Chris, D.M.A., M.M. (University of Colorado), B.M. (Baylor University), Associate Professor, Department of Music, 2009.
Knighten, Janet Whitman, M.M., B.M. (East Carolina University), Assistant Professor, Department of Music, 2009.
Koh, Dongya, Ph.D. (Washington University-St. Louis), M.A. (Boston University), B.A. (Keio University), Assistant Professor, Department of Economics, 2014.
Kohanek, Julia, Ph.D. and M.S. (University of Illinois UrbanaChampaign), B.S. (University of Michigan), Instructor, Department of Chemistry and Biochemistry, 2019, 2022.
Kong, Byungwhi, Ph.D., M.S. (University of Minnesota-Twin Cities), B.S. (Korea University), Associate Professor, Department of Poultry Science, 2006, 2012.
Kopp, Steven W., Ph.D. (Michigan State University), M.B.A. (University of Southern Mississippi), B.S. (University of Missouri-Rolla), Associate Professor, Department of Marketing, 1992, 2000.
Korth, Deborah, Ed.D. (University of Arkansas), M.Ed. (North Carolina State University), B.S. (University of Nebraska-Lincoln), Teaching Professor, Fulbright College of Arts and Sciences, 2004, 2020.
Korth, Ken L., Ph.D. (North Carolina State University), B.S. (University of Nebraska), Professor, Department of Entomology and Plant Pathology, 1999, 2009.
Kovacs, Kent F., Ph.D. (University of California-Davis), B.A. (Vassar College), Associate Professor, Department of Agricultural Economics and Agribusiness, 2012, 2018.
Kowalski, Jessica Anne, Ph.D. (University of Alabama), Research Assistant Professor, Department of Anthropology, 2019.
Koziol, Kathryn, Ph.D. (University of Arkansas), Teaching Associate Professor, Department of Anthropology, 2019, 2022.
Kral, Timothy Alan, Ph.D. (University of Florida), B.S. (John Carroll University), Professor, Department of Biological Sciences, 1981, 2008.
Krupa, Trent, Ph.D. (University of Connecticut), M.B.A. (Bryant University), B.S.B.A., Assistant Professor, William Dillard Department of Accounting, 2022.
Kruse, Audrey, M.S. (Arkansas State University), B.S. (Brigham Young University), Instructor, Department of Mathematical Sciences, 2014.
Kucharczyk, Suzanne, Ed.D. (Columbia University Teacher's College), M.Ed., B.S. (University of Illinois-Urbana-Champaign), Associate Professor, Department of Curriculum and Instruction, 2014, 2020. Kuenzel, Wayne J., Ph.D. (University of Georgia), M.S., B.S. (Bucknell University), Professor, Department of Poultry Science, 2000.
Kuhns, Alyssa, M.I.D. (Pratt Institute), B.Arch. (Carnegie Mellon University), Assistant Professor, Department of Architecture, 2021.
Kulczak, Deborah E., M.L.S., B.A. (Kent State University), Librarian, University Libraries, 1988, 2013.

Kumar, Pradeep, Ph.D. (Boston University), M.Sc. (Indian Institute of Technology, Mumbai, India), Associate Professor, Department of Physics, 2013, 2019.
Kutz, Bryan Richard, M.S. (Western Kentucky University), B.S. (Oklahoma State University), A.S. (Northern Oklahoma College), Instructor, Department of Animal Science, 1997.
Kwon, Young Min, Ph.D. (Texas A\&M University), M.S., B.S. (Seoul National University), Associate Professor, Department of Poultry Science, 2002, 2008.

Lane, Valerie Jean, M.F.A. (Pennsylvania State University), B.F.A. (University of Memphis), Instructor, Department of Theatre, 2008. Langsner, Steve, Ph.D. (Indiana University at Bloomington), M.S. (University of Baltimore), B.S. (Springfield College), Associate Professor, Department of Health, Human Performance and Recreation, 1989.
LaPorte, Angela M., Ph.D. (Pennsylvania State University), M.A. (Arizona State University), B.S. (La Roche College), Professor, School of Art, 1998, 2016.

Lasater, Kara A., Ed.D. (University of Arkansas), Ed.S., M.S. (Pittsburg
State University), B.A. (Drury University), Associate Professor,
Department of Curriculum and Instruction, 2014, 2023.
Lau, Wing, Ph.D. University of Oregon), M.M. (Indiana University), Instructor, Department of Music, 2016.
Launder, John, M.A. (University of Missouri), B.A. (Westminster College), Instructor, Department of Management, 2011.
Lavery, Richard J., B.A. (University of South Florida), Assistant Professor, Air Force ROTC, Major, 2016.
Lawson, Connor, Ph.D., M.E. (North Carolina State University), B.A. (Macalester College), Assistant Professor, Department of Agricultural Economics and Agribusiness, 2022.
Lay, Jackson, Ph.D. (University of Nebraska-Lincoln), Professor, Department of Chemistry and Biochemistry, 2002.
Le, Thi Hoang Ngan, Ph.D. (Carnegie Mellon University), M.S., B.S. (University of Natural Sciences, Ho Chi Minh City, Vietnam), Assistant Professor, Department of Computer Science and Computer Engineering, 2019.

Leach, Rebecca, Ph.D. (Arizona State University), M.S. (Texas Christian University), B.A. (University of Montevallo), Assistant Professor, Department of Communication, 2022.

Leblanc, Michelle, M.A (New York University), B.S. (Louisiana State University), Instructor, Department of Theatre, 2018.
Lee, Jisun, Ph.D. (Yonsei University), M.S. (Yonsei University), B.S. (Yonsei University), Assistant Professor, Department of Interior Architecture and Design, 2020.
Lee, Joomi, Ph.D. (Michigan State University), M.A. (Indiana University), B.A. (The Catholic University of Korea), Assistant Professor, Department of Communication, 2023.
Lee, Jung Ae, Ph.D., M.S. (University of Georgia), M.A., B.A., (Ewha Womans University), Assistant Professor, Department of Crop, Soil and Environmental Sciences, 2016.
Lee, Oh Mee, M.A. (University of Oregon), Visiting Assistant Professor, School of Art, 2019.
Lee, Peggy B., Ed.D. (University of Arkansas), M.S. (University of Southern Mississippi), B.S.N. (Mississippi College), Teaching Associate Professor, Eleanor Mann School of Nursing, 2009, 2021.
Lee, Richard N., Ph.D. (Stanford University), B.A. (Luther College), Associate Professor, Department of Philosophy, 1982, 1988.
Lee, Seungtaek, Ph.D. (Arizona State University), M.S. (Chung-Ang University), Instructor, Department of Civil Engineering, 2021.
Lee, Sun-Ok, Ph.D., M.S. (lowa State University), M.S., B.S. (Dongduk Women's University, South Korea), Associate Professor, Department of Food Science, 2008, 2016.
Lee, Wayne Y., Ph.D. (University of California-Los Angeles), M.B.A. (Santa Clara University), B.S.M.E. (De La Salle College, Philippines), Professor, Department of Finance, Alice L. Walton Chair in Finance, Garrison Chair in Finance, 1998.
Lee, Yi-Jung, Ph.D. (University of Georgia), M.S. (National Taiwan Normal University), B.Ed. (National Taitung University), Assistant Professor, Department of Curriculum and Instruction, 2019.
Leeds, Stacy, LL.M. (University of Wisconsin-Madison), J.D. (University of Tulsa), M.B.A. (University of Tennessee), B.A. (Washington University in St. Louis), Professor, School of Law, 2011.
Leen-Feldner, Ellen Winifred, Ph.D. (University of Vermont), M.A.
(West Virginia University), B.A. (University of Notre Dame), Professor, Department of Psychological Science, 2005, 2017.
Leflar, Rob, M.P.H., J.D., A.B. (Harvard University), Professor, School of Law, 1982.
Leftwich, Matthew, Ph.D., M.S. and B.S. (University of Arkansas), M.B.A. (Webster University), Research Professor, Department of Physics, 2021.
Lehman, Kathleen A., M.L.I.S. (University of Wisconsin-Milwaukee),
M.A.T. (Webster University), B.A. (University of lowa), Assistant Librarian, University Libraries, 2010.
Lehmann, Michael Herbert, Ph.D., Diploma in Biology (Philipps
University of Marburg, Germany), Professor, Department of Biological Sciences, 2002, 2018.
Lehmer, Bret Darby, Ph.D. (Pennsylvania State University), B.S. (University of lowa), Associate Professor, Department of Physics, 2015, 2021.

Lennertz, Lora, M.I.S. (University of Arkansas), M.L.I.S., B.A. (University of Illinois-Urbana-Champaign), Librarian, University Libraries, 1991, 2011. Lens, Joshua, J.D. (University of lowa), B.A. (University of Northern Iowa), Assistant Professor, Department of Health, Human Performance and Recreation, 2018.
Leong, Josiah, Ph.D. (Stanford University), B.A. (University of California, Berkeley), Assistant Professor, Department of Psychological Science, 2020.

Lessner, Daniel J., Ph.D. (University of lowa), B.S. (University of Wisconsin-Stevens Point), Professor, Department of Biological Sciences, 2008, 2020.

Lessner, Faith H., Ph.D. (University of lowa), B.S. (Cornell University), Teaching Assistant Professor, Department of Biological Sciences, 2016, 2018.

Lester, Henry, Ph.D., M.S.(University of Alabama), M.S. (University of Arkansas), Instructor, Operations Management Program, 2020.
Levenson, Abra, Ph.D., M.A.(Princeton), B.A. (University of California, Berkeley), Assistant Professor, School of Art, 2018.
Levine, Daniel, Ph.D. (University of Cincinnati), B.A. (University of Minnesota), University Professor, Department of World Languages, Literatures and Cultures, 1980, 2016.
Levine, William H., Ph.D., M.S. (State University of New York at Binghamton), B.S. (DePaul University), Associate Professor, Department of Psychological Science, 2001, 2007.
Lewis, Jeffrey A., Ph.D. (University of Wisconsin-Madison), B.S. (University of California-Santa Barbara), Associate Professor, Department of Biological Sciences, 2013, 2020.
Leylek, Jim, Ph.D. (University of Illinois-Urbana-Champaign), M.S., B.S. (University of Illinois at Chicago), Professor, Department of Mechanical Engineering, 2011.
Li, Jiali, Ph.D., M.S. (The City College of the City University of New York), M.S. (University of Science and Technology of China), B.S. (Hei Long Jiang University), Professor, Department of Physics, 2002, 2016. Li, Qinghua, Ph.D. (Pennsylvania State University), M.S. (Tsinghua University), B.E. (Xi'an Jiaotong University), Associate Professor, Department of Computer Science and Computer Engineering, 2013.
Li, Xi, Ph.D. (Vanderbilt University), M.A. (Tulane University), B.S. (Hunan University), Associate Professor, Department of Finance, 2018.
Li, Xin "Sherry", Ph.D. (University of Michigan), M.A. (Syracuse University), M.A., B.A. (Renmin People's University of China), Professor, Department of Economics, 2018.
Li, Yanbin, Ph.D. (Pennsylvania State University), M.S. (University of Nebraska-Lincoln), B.S. (Shenyang Agricultural University), Distinguished Professor, Department of Biological and Agricultural Engineering, Tyson Endowed Chair in Biosensing Engineering, 1989, 2003.
Liang, Xinya, Ph.D. (Florida State University), B.S. (Zhejiang Gongshang University, China), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2014, 2021.
Liang, Yi, Ph.D. (University of Alberta, Canada), M.S., B.S. (China Agricultural University, Beijing, China), Associate Professor, Department of Biological and Agricultural Engineering, 2007, 2014.
Liao, Haitao, Ph.D., M.S., M.S.I.S.E. (Rutgers University), B.S.E.E.
(Beijing Institute of Technology), Professor, Department of Industrial Engineering, John and Mary Lib White Endowed Systems Integration Chair, 2015.
Liles, Alex, M.A., B.A. (University of Arkansas), Instructor, Department of Communication, 2014.
Liner, Christopher L., Ph.D. (Colorado School of Mines), M.S. (University of Tulsa), B.S. (University of Arkansas), Professor, Department of Geosciences, 2012.
Lirgg, Cathy D., Ph.D. (Michigan State University), M.S. (Indiana State University), B.A. (Muskingum College), Professor, Department of Health, Human Performance and Recreation, 1991, 2018.
Littlejohn, Brittni P., Ph.D. (Texas A\&M University), Assistant Professor, Department of Animal Science, 2019.
Littrell, Rita, Ph.D. (University of Kansas), Ed.S., M.Ed., B.S.E.
(University of Arkansas), Visiting Assistant Professor, Department of Economics, 1997.
Liu, Andrew Yizhou, Ph.D., M.A. (University of California, Santa
Barbara), B.A. (Nanjing University), Assistant Professor, Department of Economics, 2020.
Liu, Kuan, Ph.D. (Boston College, Rutgers University), M.S., B.S.
(Wuhan University), Assistant Professor, Department of Finance, 2020.

Liu, Pu, Ph.D., M.B.A. (Indiana University at Bloomington), B.S. (National Cheng Kung University), Professor, Department of Finance, Harold Dulan Chair in Capital Formation, Robert E. Kennedy Chair in Finance, 1984, 2009.

Liu, Yanran, Ph.D. (Georgia State University), M.M., B.Mgt. (China University of Geosciences), Visiting Assistant Professor, Department of Information Systems, 2021.
Livingston, Mark A., Ph.D. (University of Maryland), Instructor, Operations Management Program, 2017.
Lloyd, Larry, M.B.A., B.S.C.E. (University of Arkansas), Instructor, Department of Civil Engineering, 2020.
Lo, Wen-Juo, Ph.D., M.A. (Arizona State University), B.S. (SooChow University), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2008, 2014.
Loftin, Kelly M., Ph.D. (New Mexico State University), M.S. (University of Arkansas), B.S. (Arkansas Tech), Associate Professor, Department of Entomology and Plant Pathology, 2002, 2010.
Lofton, Annelle L., M.S.N. (University of Arkansas), B.S.N. (University of Arkansas), Clinical Instructor, Eleanor Mann School of Nursing, 2013.
Lofton, Barbara A., Ed.D. (Grambling State University), M.A. (University of lowa), B.S. (Jackson State University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 1996.
Long, Christiane, Ph.D. (Our Lady of the Lake University-San Antonio), M.S.W. (University of Arkansas at Little Rock), B.S. (University of Central Arkansas), Assistant Professor, School of Social Work, 2022.
Long, Mary Beth, Ph.D., M.A. (University of Massachusetts, Amherst), B.A. (Ouachita Baptist University), Assistant Professor, Department of English, 2014.
Looney, Charles R., Ph.D. (Louisiana State University), Professor, Department of Animal Science, 2019.
Looney, Nathan C., J.D. (University of Arkansas at Little Rock), M.P.S. (University of Arkansas Clinton School of Public Service), B.A. (University of Arkansas), Lecturer, Department of Political Science, 2012.
Looper, Michael L., Ph.D. (Oklahoma State University), M.S., B.S. (University of Arkansas), Professor, Department of Animal Science, 2011.
Lopez, Linda Nguyen, M.F.A. (University of Colorado-Boulder), B.F.A. (California State University-Chico), Instructor, School of Art, 2012.
Lopez, Trish A., M.A.T. (Arkansas Tech University), Research Associate, Department of Curriculum and Instruction, 2020.
Lorah, Elizabeth R., Ph.D., M.S.Ed., B.A. (Temple University), Associate Professor, Department of Curriculum and Instruction, 2013, 2018.
Lorenz, Gus M., Ph.D., B.S.A., M.S. (University of Arkansas), Distinguished Professor, Department of Entomology and Plant Pathology, 1997, 2013.
Lorenzo, Benjamin, D.M.A., M.M. (University of Texas), B.M. (Florida International University), Assistant Professor, Department of Music, 2015. Lorenzo, Violeta, Ph.D. (University of Toronto), M.A., B.A. (University of Florida), Associate Professor, Department of World Languages, Literatures and Cultures, 2014, 2020.
Lorince, Tammy, M.A., B.S. (University of Arkansas), Instructor, Department of Biological Sciences, 2000.
Lorne, Lorraine Kay, J.D. (University of Detroit Mercy), M.A. (University of Denver), B.A. (Alma College), Associate Librarian, University Libraries, 1992.

Lower, Otto, Ph.D. (Purdue University), M.S. (Michigan State and Louisiana State University), B.S. (Louisiana State University), Instructor, Operations Management Program, 2014.
Luecking, Daniel H., Ph.D., M.S., B.A. (University of Illinois-UrbanaChampaign), Professor, Department of Mathematical Sciences, 1981, 1990.

Lueke, Sarah B., Ph.D. (University of Akron), M.S. (Indiana UniversityPurdue University-Indianapolis), B.A. (University of Wisconsin-Madison), Teaching Assistant Professor, Department of Management, 2019. Lundeen, Lindsay, Ph.D. (University of Georgia), M.A. (Wake Forest University), B.S. (Kennesaw State University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2023.
Luoni, Stephen D., M.Arch. (Yale University), B.S.Arch. (Ohio State University), Professor, Department of Architecture, 2003, 2006. Luu, Khoa, Ph.D. (Concordia University), Assistant Professor, Department of Computer Science and Computer Engineering, 2018. Lynch, Andrew, Ph.D., M.A. (University of Missouri), B.S. (Southwest Baptist University), Assistant Professor, Department of Finance, 2020.

Manasreh, Omar, Ph.D. (University of Arkansas), M.S. (University of Puerto Rico-Rio Piedras), B.S. (University of Jordan), Professor, Department of Electrical Engineering, 2003.
Mantero, Paolo, Ph.D. (Purdue University), M.Sc., B.Sc. (University of Genova, Italy), Associate Professor, Department of Mathematical Sciences, 2015, 2021.
Mantooth, Alan, Ph.D. (Georgia Institute of Technology), M.S., B.S. (University of Arkansas), Distinguished Professor, Department of Electrical Engineering, Twenty-First Century Chair in Mixed-Signal IC Design and CAD, 1998, 2011.
Mao, Ruoyun, Ph.D. (Indiana University), B.A. (Sun Yat-sen University), Assistant Professor, Department of Economics, 2023.
Maranto, Robert Anthony, Ph.D. (University of Minnesota), B.S. (University of Maryland), Professor, Department of Education Reform, Endowed Chair in Leadership, 2008.
Marcy, John A., Ph.D., M.S. (lowa State), B.S. (University of Tennessee), Extension Professor, Department of Poultry Science, 1993, 2006.
Margaret, Hershberger, Ph.D., M.S. (University of Chicago), B.S. (The Ohio State University), Instructor, Department of Chemistry and Biochemistry, 2015.
Marren, Susan M., Ph.D., M.A. (University of Michigan-Ann Arbor), B.A. (Cornell University), Associate Professor, Department of English, 1995, 2002.

Marshall, Jill A., Ph.D. (University of Oregon), M.S. (San Francisco State University), B.S. (California State University, Hayward), Assistant Professor, Department of Geosciences, 2017.
Marshfield, Jonathan, LL.M. (New York University), J.D. (Rutgers University-Camden), B.A. (Cedarville University), Associate Professor, School of Law, 2013, 2016.
Martin, Terry W., Ph.D., M.S.E.E., B.S.E.E. (University of Arkansas), Professor, Department of Electrical Engineering, 1990, 2002.
Marzolf, Steven, M.F.A. (University of San Diego), B.A. (University of Wisconsin-Green Bay), Teaching Assistant Professor, Department of Theatre, 2015.
Mason, Richard Esten, Ph.D., B.A. (Texas A\&M University), Associate Professor, Department of Crop, Soil and Environmental Sciences, 2010, 2016.

Matlock, Marty D., Ph.D., M.S., B.S. (Oklahoma State University), Professor, Department of Biological and Agricultural Engineering, 2001, 2009.

Matthews, Carl W., M.S. (Pratt Institute), Professor, Department of Interior Architecture and Design, 2012.
Matthews, Mary Beth, J.D., B.S.E. (University of Arkansas), Professor, School of Law, Sidney Parker Davis Jr. Professor of Business and Commercial Law, 1981.
Maughan, Curtis, Ph.D. (Vanderbilt University), M.A. (California State University, Long Beach), Teaching Assistant Professor, 2022.
Mauromoustakos, Andy, Ph.D., M.S. (Oklahoma State University), B.S. (Oral Roberts University), Professor, Department of Crop, Soil and Environmental Sciences, 1989, 2002.
Maxwell, Angie, Ph.D., M.A. (University of Texas at Austin), B.A. (University of Arkansas), Professor, Department of Political Science, Diane D. Blair Professor of Southern Studies, 2008, 2022.
Maxwell, Charles, Ph.D. (University of Wisconsin-Madison), M.S., B.S. (University of Georgia), Professor, Department of Animal Science, 1996.

Mayes, Eric, Ph.D. (Howard University), Associate Professor, Department of Curriculum and Instruction, 2019.
Mazur, Yuriy, Ph.D. (Institute of General Physics, Moscow), M.S. (Moscow Institute of Physics and Engineering, Russia), Professor, Nanotechnology, 2001, 2011.
Mazzanti, Christopher L., Ph.D., M.S. (University of Arkansas), B.S. (University of Arkansas at Monticello), Instructor, Department of Chemistry and Biochemistry, 2012.
McBride, Wendy L., M.S. (Northern Illinois University), Instructor, English Language and Cultural Studies Program, 2015.
McCaffrey, Raymond, Ph.D. (University of Maryland), M.A. (University of Colorado), M.A. (Columbia University), B.A. (Fairfield University), Associate Professor, School of Journalism and Strategic Media, 2014, 2020.

McCann, Roy A., Ph.D. (University of Dayton), M.S.E.E., B.S.E.E. (University of Illinois), Professor, Department of Electrical Engineering, 2003, 2009.
McCargo, Renette, M.S.M.C. (Arkansas State University), M.B.A. (University of Phoenix), B.S. (Arkansas State University), Instructor, School of Journalism and Strategic Media, 2018.
McCartney, Nancy Glover, Ph.D., M.A., B.A. (University of WisconsinMadison), Assistant Curator, Assistant Professor, University Museum, 1974.

McComas, Kim Krusen, Ph.D. (University of Arkansas), M.A. (West Chester University of Pennsylvania), B.A. (University of Arizona), Teaching Associate Professor, Department of Curriculum and Instruction, 2012, 2020.
McComas, William, Ph.D. (University of lowa), M.S. (West Chester University of Pennsylvania), B.S. (Lock Haven University of Pennsylvania), Distinguished Professor, Department of Curriculum and Instruction, Parks Family Professor of Science Education, 2006, 2018.
McCombs, Davis, M.F.A. (University of Virginia), A.B. (Harvard), Professor, Department of English, 2002, 2018.
McConnell, Mathew S., M.F.A. (University of Colorado-Boulder), B.F.A. (Valdosta State University), Associate Professor, School of Art, 2011, 2016.

McCown, Ken, M.Arch. (University of Illinois at Urbana Champaign), Professor, Department of Landscape Architecture, 2019.
McCray, Suzanne, Ph.D. (University of Tennessee), M.A., B.A. (University of Arkansas), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2010.
McDermott, Brendon P., Ph.D. (University of Connecticut), M.S. (Indiana University at Bloomington), B.S. (Northeastern University), Professor, Department of Health, Human Performance and Recreation, 2012, 2023. McDermott, Emily, Ph.D. (University of California-Riverside), B.S. (The Ohio State University), Assistant Professor, Department of Entomology and Plant Pathology, 2020.
McDermott, Reba, Ph.D. (Oklahoma State University), M.B.A. (University of Texas- San Antonio), B.S.B.A (Virginia Commonwealth University, University of Arkansas), Executive-in-Residence Instructor, William Dillard Department of Accounting, 2021.
McDonald, Candice, D.B.A. (Walden University), M.A. (Malone University), B.A. (Malone College), Instructor, Operations Management Program, 2022.
McDonald, Garry Vernon, Ph.D., M.S., B.S.A. (Texas A\&M University), Clinical Assistant Professor, Department of Horticulture, 2016.
McGee, Joshua B., Ph.D., M.S., B.S. (University of Arkansas), Research Assistant Professor, Department of Education Reform, 2019.
McGee, Peter J., Ph.D. (Ohio State University), B.S. (Tulane University), Associate Professor, Department of Economics, 2014, 2018.
McGlynn, Moira, Ph.D., M.B.A. (Union College of Union University), Instructor, Operations Management Program, 2013.

McIntosh, Matt, Ph.D. (Pennsylvania State University), B.A. (Virginia Tech), Professor, Department of Chemistry and Biochemistry, 1996, 2011. McKee, Elizabeth Chadbourn, M.L.S. (University of Oklahoma), B.A. (University of Arkansas), Librarian, University Libraries, 1974.
McKenzie, Andrew Malcolm, Ph.D. (North Carolina State University), M.Sc. (Stirling University), B.Admin. (University of Dundee), Professor, Department of Agricultural Economics and Agribusiness, 1998, 2010.
McKenzie, Sarah C., Ph.D. (University of Arkansas), M.A. (Mills College), B.A. (Claremont McKenna College), Research Assistant Professor, Department of Education Reform, 2018.
McKern, Jacquelyn A., Ph.D., M.S. (University of Arkansas), B.S. (Arkansas Technical University), Associate Professor, Department of Horticulture, 2016.
McMahon, Bree, M.A., B.A. (North Carolina State University), Assistant Professor, School of Art, 2018.
McMullen, Amanda, Ph.D. (University of Miami), B.A. (Stetson University), Assistant Professor, Department of Philosophy, 2019.
McNabb, David S., Ph.D. (Louisiana State University Health Sciences Center), B.S. (University of Texas at Arlington), Associate Professor, Department of Biological Sciences, 2000, 2006.
McNally, Shelley Ann, Ph.D. (University of Toledo), M.S., B.S. (Ohio University), Professional Practice Assistant Professor, School of Human Environmental Sciences, 2016.
McNeal, Travis G., M.A. (University of Nevada), B.S. (Utah State University), Instructor, Operations Management Program, 2014. McVey, Thomas Matthew, M.S. (Penn State University), B.S. (University of Arkansas), Instructor, Department of Biological and Agricultural Engineering, 2022.
McWhirt, Amanda L., Ph.D. (North Carolina State University), M.S. (Louisiana State University), B.S. (Tarleton State University), Assistant Professor, Department of Horticulture, 2016.
Mears, Derrick, Ph.D. (University of Arkansas), M.S., B.S. (University of Central Missouri), Teaching Associate Professor, Department of Curriculum and Instruction, 2014.
Melton, Kerry D., Ph.D. (Oklahoma State University), M.S., B.S. (University of Arkansas), Instructor, Operations Management Program, 2013.

Meng, Xiangbo, Ph.D. (University of Western Ontario), M.S.E.E. (China University of Petroleum), B.S.C.E. (Northwestern University), Associate Professor, Department of Mechanical Engineering, 2016, 2022.
Mensah, Angela, Ph.D. (Bowling Green State University), M.A. (Western Michigan University), B.A. (Ferris State University), Teaching Assistant Professor, Department of Communication, 2022.
Mertens, Nathan, D.M.A., M.M. (University of Texas at Austin), B.M., B.A. (Hastings College), Teaching Assistant Professor, Department of Music, 2022.

Messadi, Tahar, Ed.D., M.Arch. (University of Michigan-Ann Arbor), B.Arch. (Universite de Constantine, Algeria), Associate Professor, Department of Architecture, 2003, 2009.
Michealson, Kirk, M.S. (Naval Postgraduate School), B.S. (United States Naval Academy), Instructor, Operations Management Program, 2014. Micheel, Tyler, M.F.A. (University of South Dakota), B.S. (Dakota State University), Instructor, Department of Theatre, 2016.
Mihalka, Matthew W., Ph.D. (University of Minnesota), M.A. (University of Minnesota-Duluth), M.A. (University of Minnesota-Twin Cities), Instructor, Department of Music, 2011.
Milburn, Ashlea R., Ph.D. (Georgia Institute of Technology), M.S.I.E. (Virginia Polytechnic Institute and State University), B.S.I.E. (University of Arkansas), Associate Professor, Department of Industrial Engineering, 2010, 2018.

Miles, Rebecca S., Ph.D. (Oklahoma Christian University), M.Ed. (Central State University), B.S. (Oklahoma Christian College), Clinical Assistant Professor, Department of Marketing, 2007, 2015.
Miller, Bettie Gale, M.S.N. (University of Phoenix), M.S., B.S.E., B.S.N. (University of Arkansas), Instructor, Eleanor Mann School of Nursing, 2003.

Miller, David M., Ph.D. (University of Georgia), M.S., B.S. (Purdue University), Professor, Department of Crop, Soil and Environmental Sciences, 1988, 2001.
Miller, Jefferson Davis, Ph.D., M.A. (Oklahoma State University), B.A. (Northeastern State University), Professor, Department of Agricultural Education, Communications and Technology, 2001, 2012.
Miller, Lance E., Ph.D. (University of Connecticut), M.S. (New Mexico State University), Associate Professor, Department of Mathematical Sciences, 2013, 2019.
Miller, Logan, Ph.D., M.S., B.A. (University of Arkansas), Teaching Assistant Professor, Department of Economics, 2023.
Miller, Michael T., Ed.D. (University of Nebraska), M.S., B.A. (Southern Illinois University), Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2003, 2005.
Millett, Francis, Ph.D. (Columbia University), B.S. (University of Wisconsin), Distinguished Professor, Department of Chemistry and Biochemistry, 1972, 2003.
Millett, Joseph D., M.F.A. (University of Southern California), B.A. (Union College), Teaching Assistant Professor, Department of Theatre, 2015.
Millett, Paul, Ph.D., M.S. (University of Arkansas), B.E. (Vanderbilt University), Associate Professor, Department of Mechanical Engineering, Twenty-First Century Professor, 2013, 2019.
Mills, Jonathan, Ph.D. (University of Arkansas), M.A., B.S. (University of Missouri-Columbia), Research Associate, Department of Education Reform, 2018.
Minar, Edward H., Ph.D., A.M., A.B. (Harvard University), Professor, Department of Philosophy, 1994, 2013.
Miri, Marjan, M.I.D. (University of Texas, Austin), M.U.D. (Science \& Research University, Hamedan, Iran), Assistant Professor, Department of Interior Architecture and Design, 2021.
Misenhelter, Dale D., Ph.D. (Florida State University), M.A. (University of Wyoming), B.M. (Florida State University), Professor, Department of Music, 2002, 2014.
Mitchell, James, Ph.D. (Kansas State University), M.S., B.S. (Oklahoma State University), Extension Assistant Professor, Department of Agricultural Economics and Agribusiness, 2020.
Mitchell, Joshua Lee, Ph.D. (Southern Illinois University), M.P.A., B.S. (Murray State University), Associate Professor, Department of Political Science, 2010, 2019.
Mitchell, Marc E., M.F.A. (Boston University), Associate Professor, School of Art, 2014, 2019.
Mitra, Suman, Ph.D. (University of California, Irvine), M.S., B.S. (Bangladesh University of Engineering and Technology), Assistant Professor, Department of Civil Engineering, 2019.
Miuri, Motoko, M.A. (Akita International University), Instructor, Department of World Languages, Literatures and Cultures, 2022.
Mixdorf, Cory, D.M.A., M.M. (Indiana University), B.A. (University of Northern lowa), Assistant Professor, Department of Music, 2013.
Mobley, Veronica, M.A., B.A. (University of Arkansas), Instructor, Department of Communication, 2021.
Moiseichik, Merry Lynn, J.D. (University of Arkansas), R.Ed. (Indiana University at Bloomington), M.S., B.S.E. (State University of New York at Cortland), Professor, Department of Health, Human Performance and Recreation, 1989, 2007.
Monroe, Jacob, Ph.D. (University of California, Santa Barbara), B.S. (University of Virginia), Assistant Professor, Ralph E. Martin Department
of Chemical Engineering, Ray C. Adam Endowed Chair in Chemical Engineering, .
Montejo Pizarro, Martha, Ph.D. (Texas A\&M University), B.A.
(Universidad de La Habana, Cuba), Instructor, Department of World Languages, Literatures and Cultures, 2015.
Montgomery, Mike, D.M.A. (University of Miami), M.M., B.M. (University of Southern Mississippi), Lecturer, Department of Music, 2017.
Montgomery, Scott, D.M.A. (University of Illinois), Lecturer, Department of Music, 2022.
Montgomery, Scott, D.M.A. (University of IIlinois), Lecturer, Department of Music, 2022.
Moore, Brian, M.S.W, B.S.W (University of Arkansas), Lecturer, School of Social Work, 2004.
Moores, John, M.A. (Ball State University), B.B.A. (Kent State
University), Instructor, Operations Management Program, 2001.
Moradi, Mahmoud, Ph.D. (North Carolina State University), M.S., B.S. (Sharif University of Technology), Associate Professor, Department of Chemistry and Biochemistry, 2015, 2021.
Morawicki, Ruben O., Ph.D. (Pennsylvania State University), M.Eng. (State University of New York-Buffalo), B.S. (Universidad Nacional de Misiones, Argentina), Associate Professor, Department of Food Science, 2006, 2016.
Morello, Valentina Angela, M.A. (Boston University), Instructor, Department of World Languages, Literatures and Cultures, 2022.
Morimoto, Shauna, Ph.D., M.S. (University of Wisconsin-Madison), B.A. (University of Pittsburgh), Professor, Department of Sociology and Criminology, 2008, 2023.
Morris, Adam, Ed.D. (University of Arkansas), M.S., B.S. (Friends University), B.S. (Newman University), Instructor, Operations Management Program, 2011.
Morris, Jack, M.S., M.B.A. (University of Arkansas), B.A. (University of Central Arkansas), Instructor, Operations Management Program, 2012.
Morris, John, M.A. (University of Arkansas), B.A. (University of Central Arkansas), Instructor, Department of Communication, 2021.
Morris, Noel, B.A. (Arkansas Tech University), Instructor, Department of Finance, 2007.
Morrow, Tommy K., Ph.D. (University of Texas at Austin), M.S. (North Carolina State University), B.S. (University of Arkansas), Instructor, Department of Civil Engineering, 2019.
Mortensen, Jennifer, Ph.D. (Tufts University), M.S. (Villanova
University), Teaching Assistant Professor, Department of Biological Sciences, 2019.
Mosley, Jacquelyn Dee, Ph.D. (Texas Tech University), M.S. (Arizona State University), B.A. (University of Northern lowa), Professor, School of Human Environmental Sciences, 2021, 2016.
Mounts, Denise Ann, Ed.D. (Saint Louis University), B.S.E. (Northwest Missouri State University), Clinical Associate Professor, Department of Curriculum and Instruction, 2005, 2016.
Mourot, Michael, B.S. (University of Arkansas), Instructor, Ralph E. Martin Department of Chemical Engineering, .
Moxley, Shari Coleman, Ph.D. (University of North Carolina), Instructor, School of Human Environmental Sciences, 2013.
Moyer, Rachael M., Ph.D., M.S., M.A. (University of Arkansas), B.A. (University of Missouri), Lecturer, Department of Political Science, 2020.
Mozaffari, Morteza, Ph.D. (University of Delaware), M.S., B.S. (University of Massachusetts), Assistant Professor, Department of Crop, Soil and Environmental Sciences, 2002.
Mozzoni, Leandro, Ph.D. (University of Arkansas), M.S. B.S. (Rosario National University), Associate Professor, Department of Crop, Soil and Environmental Sciences, 2017.

Mueller, Robert K., D.M.A. (University of Cincinnati), M.M. (Bowling Green State University), B.A. (Northern Michigan University), Professor, Department of Music, 1988, 2004.
Muir, Sherry, Ph.D. (Walden University), M.O.T. (Texas Women's University), Associate Professor, Department of Communication Disorders and Occupational Therapy, 2017.
Muldoon, Timothy J., M.D. (Baylor College of Medicine), Ph.D. (Rice University), B.S. (Johns Hopkins University), Associate Professor, Department of Biomedical Engineering, 2012, 2018.
Mullins, Jeff, Ph.D., M.A., B.S. (University of Arkansas), Assistant Professor, Department of Information Systems, 2006, 2018.
Muntz, Charles E., Ph.D. (Duke University), B.A. (Swarthmore College), Associate Professor, Department of History, 2008, 2018.
Murach, Kevin A., Ph.D. (Ball State), M.S. (James Madison University), B.S. (University of North Carolina), Assistant Professor, Department of Health, Human Performance and Recreation, 2021.
Murdock, Jeffrey A., Ph.D. (University of Memphis), M.M., B.M.
(University of Southern Mississippi), Assistant Professor, Department of Music, 2015.
Murff, Zora J., M.F.A. (University of Nebraska), Assistant Professor, School of Art, 2018.
Muriithi, Bernard, Ph.D. (Otto von Guericke University), M.A. (University of Southern California), M.A. (Kenyatta University), B.A. (Kenyatta University), Assistant Professor, Department of Communication Disorders and Occupational Therapy, 2023.
Muriithi, Jennifer, O.T.D. (University of Utah), M.S. (Grand Canyon University), M.A. (University of Southern California), B.A. (Baylor University), Clinical Assistant Professor, Department of Communication Disorders and Occupational Therapy, 2023.
Murphy, Cheryl Ann, Ed.D., M.A., B.A. (West Virginia University), Professor, Department of Curriculum and Instruction, 1996, 2017.
Murphy, Tiffany, J.D., B.A. (University of Michigan), Associate Professor, School of Law, 2014.
Murphy-Erby, Yvette, Ph.D. (University of North Carolina at Greensboro), M.S.W. (University of North Carolina, Chapel Hill), B.A. (University of North Carolina, Charlotte), Professor, School of Social Work, 2004, 2013.
Murray, Cameron, Ph.D. (University of Oklahoma), M.S.C.E, B.S.C.E. (University of Arkansas), Assistant Professor, Department of Civil Engineering, 2017.
Murray, Jeff B., Ph.D. (Virginia Polytechnic Institute and State University), M.A., B.A. (University of Northern Colorado), Professor, Department of Marketing, R.A. and Vivian Young Chair in Marketing, 1989, 2004.
Murray, Lori M., D.N.P. (University of Kansas Medical Center), M.S., B.S.N. (University of Oklahoma Health Sciences Center), Teaching Assistant Professor, Eleanor Mann School of Nursing, 2015, 2017.
Murry, John, Ed.D., J.D., M.B.A., B.S.B.A., B.S. (University of Arkansas), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 1993, 1999.

Osborne, Cara, M.S., Sc.D. (Harvard University), M.S.N. (Vanderbilt University), B.A. (Transylvania University), Assistant Professor of Practice, Department of Strategic, Entrepreneurship and Venture Innovation, 2020.
Otoshi, Elais, M.B.A. (Grand Canyon University), Professor, Army ROTC, 2020.

Overby, Theresa, B.A. (University of Arkansas, Little Rock), Instructor, School of Human Environmental Sciences, 2020.
Overstreet, Tyler, M.A. (University of Illinois), B.S. (Missouri Southern State University), Lecturer, Department of Political Science, 2022.
Owen, Donna S., M.S., B.S., B.A. (University of Arkansas), Clinical Instructor, Department of Curriculum and Instruction, 2005.

\section*{P}

Padgett, Joshua, Ph.D. (Baylor University), B.S. (Gardner-Webb University), Assistant Professor, Department of Mathematical Sciences, 2020.

Padilla, Yajaira, Ph.D. (University of California, San Diego), B.A. (University of California, Santa Cruz), Professor, Department of English, 2013, 2022.

Paez, Rocio Alejandra, Ph.D., M.A., B.A. (University of Arkansas at Little Rock), Teachinig Associate Professor, Department of Sociology and Criminology, 2018, 2023.
Page, Patricia, J.D. (University of Arkansas at Little Rock), M.S.W. (Florida State University), B.S.W. (University of Arkansas), Lecturer, School of Social Work, 2014.
Pan, Yanjun, Ph.D., (University of Arizona), B.E. (Nanjing University of Aeronautics and Astronautics, China), Assistant Professor, Department of Computer Science and Computer Engineering, 2022.
Panayotova, Miroslava Saifur, Ph.D. (University of Arizona), Instructor, Department of Music, 2014.
Panda, Brajendra Nath, Ph.D. (North Dakota St. University), M.S. (Utkal University, India), Professor, Department of Computer Science and Computer Engineering, 2001, 2007.
Paradise, Thomas R., Ph.D. (Arizona State University), M.Sc. (Georgia State University), F.G.A. (Goldsmith Hall Gem-A, London), G.G.
(Gemological Institute of America), B.S. (University of Nevada), University Professor, Department of Geosciences, 2000, 2016.
Park, Doyoung, Ph.D., M.A. (University of Colorado) B.S. (Sogang University, Seoul), Assistant Professor, Department of Economics, 2019. Park, Jinoh, Ph.D. (North Carolina State University), E.M.B.A. (Aalto University), M.B.A. (Seoul School of Integrated Sciences \& Technology), B.S. (Hanyang University), Assistant Professor, Department of Interior Architecture and Design, 2021.
Park, Joon, Ph.D. (University of Oregon), M.A., B.M. (Eastman School of Music), Assistant Professor, Department of Music, 2016.
Park, Moon-Sook, D.M.A. (University of Cincinnati), M.M. (Staatliche Hochschule fur Musik in Freiburg), B.M. (University of Seoul National), Associate Professor, Department of Music, 2012, 2017.
Parke, Elizabeth A., Ph.D. (University of Hawaii), M.S. (University of Utah), B.A. (Hope College), Assistant Professor, Department of Health, Human Performance and Recreation, 2021.
Parker, Betty, M.S.W., B.S.W. (University of Arkansas), Lecturer, School of Social Work, 2013, 2017.
Parker, Martha A., M.L.I.S. (University of North Carolina at Greensboro), B.A. (Queens University of Charlotte), A.A. (Central Piedmont Community College), Assistant Librarian, University Libraries, 2012.
Parker-Gibson, Necia T., M.L.I.S. (Louisiana State University), B.S.A. (University of Arkansas), Librarian, University Libraries, 1991, 2014.
Parkerson, Pat, Ph.D., B.S. (University of Arkansas), Associate
Professor, Department of Computer Science and Computer Engineering, 1990, 2005.
Parks, Nathan A., Ph.D., M.S. (Georgia Institute of Technology), B.A. (University of Virginia), Assistant Professor, Department of Psychological Science, 2012.
Parnell, Gregory S., Ph.D. (Stanford University), M.S. (University of Southern California), M.E.I.S.E. (University of Florida), B.S. (University of New York at Buffalo), Professor of Practice, Department of Industrial Engineering, 2013.
Parrilla Recuero, Antonio, Ph.D. (Indiana University), M.A. (University of Memphis), Instructor, Department of World Languages, Literatures and Cultures, 2020.
Parry, Janine A., Ph.D., M.A. (Washington State University), B.A.
(Western Washington University), University Professor, Department of Political Science, 1998, 2021.
Parsch, Janet H., M.P.A. (University of Arkansas), M.A., B.A. (University of Wisconsin-Madison), Librarian, University Libraries, 1983.
Paré, Adam C., Ph.D. (University of California, San Diego), B.S. (Cornell University), Assistant Professor, Department of Biological Sciences, 2019. Patitz, Matthew J., Ph.D., M.S., B.S. (Iowa State University), Associate Professor, Department of Computer Science and Computer Engineering, 2012, 2018.

Paul, Kathleen, Ph.D., M.A. (Arizona State University), B.A. (New York University), Assistant Professor, Department of Anthropology, 2019.
Paulus, David C., Ph.D. (Colorado State University), M.S.I.E., B.S.M.E. (University of Tennessee, Professor of Practice, Department of Industrial Engineering, 2023.
Payne, Whitney, M.S.W (University of Arkansas), B.S.W (University of Alaska-Anchorage), Clinical Assistant Professor, School of Social Work, 2013, 2014.
Pendergraft, Sarah Ann, M.S. (University of Arkansas), B.S. (Texas Christian University), Instructor, School of Human Environmental Sciences, 2020.
Peng, Yarui, Ph.D., M.S. (Georgia Institute of Technology), B.S. (Tsinghua University), Assistant Professor, Department of Computer Science and Computer Engineering, 2017.
Penner-Williams, Janet, Ed.D., M.Ed., B.S.E. (University of Houston), Associate Professor, Department of Curriculum and Instruction, 2005,

\section*{2016.}

Pereira, Andy, Ph.D. (Iowa State University), M.S. (Indian Agricultural Research Institute, India), B.Sc.Ag. (Govind Ballabh Pant University of Agriculture and Technology, India), Professor, Department of Crop, Soil and Environmental Sciences, Anheuser-Busch and Arkansas Wholesalers Professorship in Molecular Genetics, 2011.
Perkins, Asher, M.M. (University of Arkansas), Lecturer, Department of Music, 2020.
Perryman, Kristi Leann, Ph.D. (University of Arkansas), M.S., B.S.
(Southwest Missouri State University), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2014, 2022.

Peters, Gary F., Ph.D. (University of Oregon), M.S. (University of Missouri-Columbia), B.S. (Arkansas Tech University), Professor, William Dillard Department of Accounting, S. Robson Walton Chair in Accounting, 2003, 2012.
Peterson, David, Ph.D. (University of North Carolina), M.S. (Air
Force Institute of Technology), B.S. (Iowa State University), Instructor, Operations Management Program, 2018.
Peterson, Katelyn, M.S.N., B.S.N. (University of Arkansas), Instructor, Eleanor Mann School of Nursing, 2021.
Petrenko, Oleg, Ph.D. (Oklahoma State University), M.B.A., B.S.B.A. (University of Central Oklahoma), Assistant Professor, Department of Strategic, Entrepreneurship and Venture Innovation, 2020.
Petris, Giovanni, Ph.D., M.S. (Duke University), B.S. (Universita degli Studi di Milano, Italy), Professor, Department of Mathematical Sciences, 1999, 2015.
Petrone, Kim, J.D. (Northwestern University), B.A. (Southern Methodist University), Teaching Assistant Professor, William Dillard Department of Accounting, 2012, 2020.
Philipp, Dirk, Ph.D. (Texas Tech University), M.S., B.S. (University of Leizig, Germany), Associate Professor, Department of Animal Science, 2007, 2015.
Phillips, Jared, Ph.D., M.A., B.A. (University of Arkansas), Clinical Assistant Professor, International and Global Studies Program, 2017.
Philyaw Perez, Amanda, Ph.D., M.P.H. (University of Arkansas for Medical Sciences), B.S. (University of Arkansas at Little Rock), Assistant Professor, Department of Horticulture, 2020.
Pierce, Benjamin J., D.M.A., M.M. (University of Michigan-Ann Arbor), B.M. (Bowling Green State University), Professor, Department of Music, 2003, 2015.
Pierce, Lisa, M.S. (University of Georgia), B.S. (University of Tennessee), Instructor, Department of Information Systems, 2014.
Pierce, Michael C., Ph.D., M.A. (The Ohio State University), B.A. (Kenyon College), Associate Professor, Department of History, 2001, 2011.

Pijanowski, John C., Ph.D., M.S. (Cornell University), B.A. (Brown University), Professor, Department of Curriculum and Instruction, 2007, 2010.

Pinto, Ines, Ph.D. (Louisiana State University Health Sciences Center), M.S., B.S. (University of Chile), Associate Professor, Department of Biological Sciences, 2000, 2006.
Pittman, Harrison Mauzy, LL.M. (University of Arkansas), J.D., B.A. (University of Arkansas at Little Rock), Assistant Professor, 2001.
Place, Alison L., M.F.A (Miami University), Assistant Professor, School of Art, 2017.
Plassmeyer, Mark P., Ph.D. (University of Denver), M.S.W. (University of Pittsburg), B.A (Fort Lewis College), Assistant Professor, School of Social Work, 2019.
Plavcan, Joseph M., Ph.D., B.A. (Duke University), Professor, Department of Anthropology, 2001, 2010.
Plummer, Sean, Ph.D., M.S. (Texas A\&M University), B.S. (North Carolina State University), Assistant Professor, Department of Mathematical Sciences, 2022.
Pohl, Edward A., Ph.D., M.S.R.E. (University of Arizona), M.S.S.E. (Air Force Institute of Technology), M.S.E.M. (University of Dayton), B.S.E.E. (Boston University), Professor, Department of Industrial Engineering, Twenty-First Century Professorship in Engineering, 2004, 2013.
Pohl, Letitia, Ph.D. (University of Arkansas), M.S.S.E. (Air Force Institute of Technology), B.S.M.E. (Tulane University), Teaching Associate Professor, Department of Industrial Engineering, 2013, 2021.
Pohlman, Fred W., Ph.D. (Kansas State University), M.S. (University of Tennessee), B.S. (University of Missouri-Columbia), Professor, Department of Animal Science, 1997, 2009.
Pollock, Chad Aaron, M.A. (University of Missouri-Columbia), M.Div. (Baylor University), B.A. (Ouachita Baptist University), Assistant Librarian, University Libraries, 2011.
Poncet, Aurelie, Ph.D. (Auburn University), M.S. (Montpellier SupAgro,
France), M.S. Minor: (AgroTIC), B.S. (Montpellier SupAgro, France),
Assistant Professor, Department of Crop, Soil and Environmental Sciences, 2020.
Pope, Adam, Ph.D. (Purdue University), M.A. (University of Arkansas), B.A. (Freed-Hardeman University), Assistant Professor, Department of English, 2013.
Popejoy, Erin O., Ph.D. (University of Texas-San Antonio), M.A. (Texas State University), B.A. (Case Western Reserve University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2015.
Popp, Jennie Sheerin, Ph.D., M.S. (Colorado State University), B.S. (University of Scranton), Professor, Department of Agricultural Economics and Agribusiness, 1998, 2010.
Popp, Michael P., Ph.D. (Colorado State University), M.B.A. (University of Colorado-Boulder), B.Comm. (University of Manitoba), Professor, Department of Agricultural Economics and Agribusiness, 1998, 2006.
Porter, Errol, M.S.E.E., B.S.E.E. (University of Arkansas), Research Associate, 1997, 1999.
Posnak, Adam, M.F.A (Louisiana State University and A\&M College), Instructor, School of Art, 2010.
Post, Rana, M.B.A. (William Woods University), B.S. (University of Missouri, Columbia), Instructor, School of Human Environmental Sciences, 2008.
Potra, Adriana, Ph.D. (Florida International University), M.S., B.S. (University of Babes-Bolyai, Romania), Associate Professor, Department of Geosciences, 2012, 2019.
Powell, Jeremy G., Ph.D. (University of Arkansas), D.V.M. (Oklahoma State University), B.S. (University of Arkansas), Professor, Department of Animal Science, 2009, 2013.

Powell, Rob, M.S., B.S. (Louisiana State University), Instructor, School of Human Environmental Sciences, 2020.
Power, Daniel, B.S.M.E., (University of Arkansas), Instructor, Department of Civil Engineering, 2022.
Prinz, Gary S., Ph.D, M.S., B.S. (Brigham Young University), Associate Professor, Department of Civil Engineering, James T. Womble Professor of Computational Mechanics and Nanotechnology Modeling, 2014, 2019.
Pritchard, Eric, Ph.D., M.A., (University of Wisconsin-Madison), B.A.
(Lincoln University in Pennsylvania), Associate Professor, Department of English, 2021.
Prosandeev, Sergey, Ph.D., M.S. (Rostov State University), Research Professor, Department of Physics, 2005, 2016.
Pulido Rull, Ana, Ph.D., M.A. (Harvard University), B.A. (National Autonomous University of Mexico), Associate Professor, School of Art, 2012, 2018.
Pullen, Brian, M.A. (University of Arkansas), B.S. (Arkansas Tech University), Instructor, Department of Management, 2005.
Purcell, Larry C., Ph.D. (University of Florida), M.S., B.S. (University of Georgia), Distinguished Professor, Department of Crop, Soil and Environmental Sciences, Ben J. Altheimer Chair for Soybean Research, 1993, 2017.
Purdy, Ashley, Ph.D. (University of Pittsburgh), B.A. (State University of New York-Binghamton), Visiting Assistant Professor, Department of Philosophy, 2022.
Puvanakrishnan, Priyaveena, Ph.D. (University of Texas at Austin), Instructor, Department of Biomedical Engineering, 2015.
Pérez Arroyo, Elkin Javier, M.A. (University of Arkansas), B.A.
(Universidad de Córdoba, Montería, Colombia), Instructor, Department of World Languages, Literatures and Cultures, 2017.
Q
Qian, Xianghong, Ph.D., M.Phil. (George Washington University), B.S. (Nanjing University, P.R. China), Professor, Department of Biomedical Engineering, 2011, 2016.
Quetsch, Lauren, Ph.D., M.S. (West Virginia University), B.A.
(Georgetown University), Assistant Professor, Department of
Psychological Science, 2019.
Quinn, Elizabeth Hart, M.F.A. (Virginia Commonwealth University), B.A. (Sewanee University), Instructor, 2011.
Quinn, Kyle P., Ph.D. (University of Pennsylvania), B.S. (University of Wisconsin), Assistant Professor, Department of Biomedical Engineering, 2014.

Quinn, William A., Ph.D., M.A. (The Ohio State University), B.A. (Xavier University), Distinguished Professor, Department of English, 1979, 2018.
R
Radan, Nikola, M.M., B.M. (University of Belgrade), Lecturer, Department of Music, 2018.
Radan, Nikola, M.M., B.M. (University of Belgrade), Instructor, Department of Music, 2018.
Ragsdale, Chal, M.M. (East Carolina University), B.S. (Auburn
University), University Professor, Department of Music, 1975, 2013.
Rahman, Muhammad, Ph.D. (Indiana University), M.S., B.S. (University of Dhaka), Clinical Assistant Professor, Department of Economics, 2014. Raich, Andrew Seth, Ph.D., M.A. (University of Wisconsin-Madison), B.A. (Williams College), Professor, Department of Mathematical Sciences, 2008, 2018.
Raines, Anne, M.A., B.A. (University of Arkansas), Instructor, Department of English, 2019.
Rainey, Daniel V., Ph.D., M.S. (Purdue University), B.S.A. (University of Arkansas), Associate Professor, Department of Agricultural Economics and Agribusiness, 2000, 2006.

Rainey, Ronald L., Ph.D., M.S., B.S.A. (University of Arkansas), Professor, Department of Agricultural Economics and Agribusiness, 1993, 2012.

Rainwater, Candace Auburn, Ph.D. (University of Florida), Instructor, Engineering, 2012.
Rainwater, Chase E., Ph.D. (University of Florida), B.S.I.E. (University of Arkansas), Professor, Department of Industrial Engineering, Twenty-First Century Professorship in Engineering, 2009, 2021.
Rajaram, Narasimhan, Ph.D. (University of Texas, Austin), B.E. (Anna University, India), Assistant Professor, Department of Biomedical Engineering, 2014.
Raley, Sheida K., PH.D. (University of Kansas), M.Ed. (Vanderbilt University), B.S. (Boston University), Assistant Professor, Department of Curriculum and Instruction, 2023.
Ralston, Christine R., Ph.D. (Purdue University), M.Ed., B.S. (Indiana Wesleyan University), Clinical Associate Professor, Department of Curriculum and Instruction, 2015, 2020.
Rao, Raj R., Ph.D. (University of Georgia), M.S. (University of Texas), M.Sc., B.E. (Birla Institute of Technology and Sciences, India), Professor, Department of Biomedical Engineering, 2016.
Raoux, Katherine, Ph.D. (Brandeis University), B.A. (New College of Florida), Assistant Professor, Department of Mathematical Sciences, 2022.

Rapert, Molly, Ph.D. (University of Memphis), M.B.A., B.S.B.A.
(University of Arkansas), Associate Professor, Department of Marketing, 1991, 1998.
Rath, Narayan C., Ph.D., M.S. (University of Delhi-India), B.S. (Utkal University-India), Research Professor, Department of Poultry Science, 1992, 1998.
Rauth, Cynthia A., M.A. (University of Washington), Instructor, English Language and Cultural Studies Program, 2014.
Rawson, Caleb, Ph.D. (University of Colorado at Boulder), B.S. (Colorado Christian University), Assistant Professor, William Dillard Department of Accounting, 2018.
Raymundo, Fellipe, Ph.D. (University of Tennessee, University of Arkansas), M.A. (University of Arkansas), B.A. (lbmec), Assistant Professor, William Dillard Department of Accounting, 2020.
Reeber, Joy Elisabeth, Ph.D., M.A. (University of Wisconsin-Madison),
B.A. (University of North Carolina), Teaching Assistant Professor, Department of World Languages, Literatures and Cultures, 2012, 2022.
Reece, Bryan, Ph.D. (University of Toronto), M.St. (University of Oxford), M.A. (University of Oklahoma), B.A. (Oklahoma Baptist University), Assistant Professor, Department of Philosophy, 2020.
Reed, Chad, M.Acc. (University of Missouri-Columbia), Instructor, William Dillard Department of Accounting, 2022.
Reeves, Carol, Ph.D. (University of Georgia), M.A. (University of South Carolina), B.S. (Georgia Southern College), Professor, Department of Strategic, Entrepreneurship and Venture Innovation, Cecil and Gwendolyn Cupp Applied Professorship in Entrepreneurship, 1990, 2012.
Rennie, Craig, Ph.D. (University of Oregon), M.B.A. (Dalhousie University), B.A. (University of Toronto), Associate Professor, Department of Finance, Clete and Tammy Brewer Professorship in Business, 2001, 2007.

Renteria, Kimberly, J.D. (University of Arkansas at Little Rock), B.S. (Arkansas Tech University), Lecturer, Department of Political Science, 2023.

Restrepo, Luis Fernando, Ph.D., M.A. (University of Maryland-College Park), B.A. (Universidad Pontificia Bolivariana), University Professor, Department of World Languages, Literatures and Cultures, 1995, 2016. Rhoads, Douglas Duane, Ph.D. (Kansas State University), M.A., B.A. (Wichita State University), University Professor, Department of Biological Sciences, 1990, 2006.

Rice, Lanny, M.S. (University of Arkansas), Instructor, Department of Agricultural Education, Communications and Technology, 2012.
Richards, Kat, M.F.A. (University of Arkansas), B.A. (University of Kansas), Visiting Assistant Professor, School of Art, 2022.
Richardson, Mike, Ph.D. (University of Georgia), M.S. (Louisiana State University), B.S. (Louisiana Tech University), Professor, Department of Horticulture, 1998, 2007.
Richardson, Tracey, Ed.D. (Argosy University), M.S., B.A.Sc. (Troy University), Instructor, Operations Management Program, 2009.
Richardson, Vernon J., Ph.D. (University of Illinois-Urbana-Champaign), M.B.A., B.S. (Brigham Young University), Distinguished Professor, William Dillard Department of Accounting, G. William Glezen Jr. Endowed Chair in Accounting, 2005, 2016.
Richardson, Will, Ph.D. (Texas A\&M University), B.S. (University of Arkansas), Associate Professor, Ralph E. Martin Department of Chemical Engineering, Bates Teaching Professorship in Chemical Engineering, . Rickard, Brian, Ph.D., M.Ed., B.S. (University of Arkansas), Teaching Associate Professor, Department of Mathematical Sciences, 2015.
Ridge, Jason, Ph.D., M.A., B.A. (Oklahoma State University), Associate Professor, Department of Strategic, Entrepreneurship and Venture Innovation, 2015, 2017.
Rieck, Yo'av, Ph.D. (University of Texas at Austin), B.A. (Israel Institute of Technology), Professor, Department of Mathematical Sciences, 2000, 2010.

Rieske, David, M.S., B.S. (University of Arkansas), Instructor, Operations Management Program, 2007.
Riggs, Chloe B., M.P.A., B.A. (University of Arkansas), Lecturer, Department of Political Science, 2021.
Riha, Michael, M.F.A. (Indiana University at Bloomington), B.F.A. (University of Wisconsin, Stevens Point), Professor, Department of Theatre, 1992, 2008.
Riley, Nastassja, M.M. (Florida State University), Lecturer, Department of Music, 2014.
Riley, Timothy B., Ph.D., M.B.A., B.S.S. (University of Kentucky), Assistant Professor, Department of Finance, 2016.
Riva, Fernando, Ph.D. (Yale University), Visiting Assistant Professor, Department of World Languages, Literatures and Cultures, 2017.
Rivera, Daniel J., Ph.D. (New Mexico State University), M.S. (West Texas A\&M University), Associate Professor, Department of Animal Science, 2021.
Roberts, Monty, M.S., B.S. (University of Arkansas), Instructor, Department of Mechanical Engineering, 2011.
Roberts, Robin, Ph.D., M.A. (University of Pennsylvania), B.A. (Mount Holyoke College), Professor, Department of English, 2011.
Roberts, Trenton L., Ph.D. (University of Arkansas), M.S. (University of Arizona), B.S. (Oklahoma State University), Associate Professor, Department of Crop, Soil and Environmental Sciences, 2010, 2017.
Robertson, Lona, Ed.D. (Indiana University, Bloomington), M.S., B.S. (Florida State University), Professor, School of Human Environmental Sciences, 2006, 2011.
Robinson, Charles F., Ph.D. (University of Houston), M.A. (Rice University), B.A. (University of Houston), Professor, Department of History, 1999, 2011.
Robinson, Eddie, PhD. (Northcentral University), M.A.S. (Embry Riddle Aeronautical University), M.S. (University of Arkansas), B.S. (United States Air Force Academy), Instructor, Operations Management Program, 2007.

Robinson, Samantha, Ph.D., M.S., B.S. (University of Arkansas), Teaching Associate Professor, Department of Mathematical Sciences, Julia A. Hicks Chair, 2015, 2022.

Rochell, Samuel J., Ph.D. (University of Illinois at Urbana-Campaign), M.S., B.S. (Auburn University), Assistant Professor, Department of Poultry Science, 2016.
Rodriguez, Sarah, Ph.D., B.A. (University of Pennsylvania), Assistant Professor, Department of History, 2016.
Roe, Larry, Ph.D. (University of Florida), M.S., B.S.M.E. (University of Mississippi), Associate Professor, Department of Mechanical Engineering, 1994, 2000.
Roessger, Kevin, Ph.D., M.S., B.A. (University of Wisconsin-Milwaukee), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2016, 2019.
Rogers, Marilyn L., M.L.S. (Louisiana State University), B.A.
(Northwestern State University), Assistant Librarian, University Libraries, 1987.

Rojas, Alejandro, Ph.D., M.S. (Michigan State University), M.S., B.S. (Los Andes University), Assistant Professor, Department of Entomology and Plant Pathology, 2018.
Rojas, Clemencia, Ph.D. (Cornell University), M.S. (Purdue University), B.S. (Universidad de Los Andes, Colombia), Assistant Professor, Department of Entomology and Plant Pathology, 2015.
Rom, Curt R., Ph.D., M.S. (The Ohio State University), B.S. (University of Arkansas), University Professor, Department of Horticulture, 1989, 2014.
Rorie, Rick, Ph.D. (Louisiana State University), M.S., B.S. (University of Arkansas), Professor, Department of Animal Science, 1989, 2003.
Rosa, Ananda, M.S.W. (University of Arkansas at Little Rock), B.A. (University of Arkansas), Clinical Associate Professor, School of Social Work, 2010, 2022.
Rosa-Caldwell, Megan, Ph.D. (University of Arkansas), M.S. (University of Arkansas), B.S. (Baker University), Assistant Professor, Department of Health, Human Performance and Recreation, 2023.
Rosales, Claudia, Ph.D., M.S. (University of Cincinnati), B.S.
(Universidad Rafael Landivar), Assistant Professor, J.B. Hunt Transport Department of Supply Chain Management, 2021.
Rosales, Steven, Ph.D. (University of California-Irvine), B.A. (University of California-San Diego), Associate Professor, Department of History, 2013, 2018.
Rosen, Chris, Ph.D. (University of Akron), M.A. (Appalachian State University), B.A. (Washington and Lee University), Professor, Department of Management, 2006, 2015.
Rossetti, Manuel D., Ph.D., P.E., M.S.I.E. (The Ohio State University), B.S.I.E. (University of Cincinnati), University Professor, Department of Industrial Engineering, 1999, 2022.
Rossiter-Hofer, Adriana, Ph.D. (University of Maryland-College Park), M.S. (Federal University of Rio de Janeiro, Brazil), B.S. (Federal University of Pernambuco, Brazil), Associate Professor, J.B. Hunt Transport Department of Supply Chain Management, 2008, 2016. Rotolo, Chuck, M.Arch. (Washington University in St. Louis), B.Arch. (Louisiana State University), Assistant Professor, Department of Architecture, 2005.
Rowe, Stephen, Ph.D. (University of Illinois), M.S. (Loyola University Chicago), B.A. (Covenant College), Associate Professor, William Dillard Department of Accounting, 2016, 2020.
Roy, William, M.S. (University of Arkansas), B.S. (University of Memphis), Instructor, Operations Management Program, 2002.
Rucker, Kathryn Jill, Ph.D., M.B.A., B.S. (Oklahoma State University), Associate Professor, Department of Agricultural Education, Communications and Technology, 2013, 2018.
Rudzinski, Russell D., M.A. (Washington University in St. Louis), B.Arch. (Syracuse University), Assistant Professor, Department of Architecture, 2000.

Rulli, Richard J., D.M.A. (University of Wisconsin-Madison), M.M. (Ithaca College), B.M. (University of Northern Colorado), Associate Professor, Department of Music, 2003, 2009.
Rumley, Elizabeth R., LL.M. (University of Arkansas), J.D. (University of Toledo), B.A. (Michigan State University), Instructor, Department of Animal Science, 2012.
Rumley, Rusty W., J.D. (University of Oklahoma), Research Assistant Professor, Department of Agricultural Economics and Agribusiness, 2009.
Runkle, Benjamin R.K., Ph.D., M.S. (University of California-Berkeley),
B.S. (Princeton University), Assistant Professor, Department of Biological and Agricultural Engineering, 2014.
Runkles, Henry S., M.M. (University of Arkansas), Instructor, Department of Music, 2002.
Rupe, John C., Ph.D., M.S. (University of Kentucky), B.S. (Colorado State University), University Professor, Department of Entomology and Plant Pathology, 1984, 2019.
Russell, Alex, Ph.D. (Texas A \& M University), M.A. (University of Houston), B.S. (University of Houston), Assistant Professor, Department of Health, Human Performance and Recreation, 2020.
Russell, Mark, Ed.D. (Texas Tech University), M.S., B.S. (Colorado State University), Assistant Professor, Department of Animal Science, 2010. Ryan, Jeffrey J., Ph.D., M.A. (Rice University), B.A. (Colorado State University), Associate Professor, Department of Political Science, 1990, 1996.

Ryan, John, Ph.D. (University of York), M.Sc. (University of Warwick), B.A. (University of York, Britain), Distinguished Professor, Department of Mathematical Sciences, 1990, 2019.
Ryburn, Tori, M.S. (University of Arkansas), B.S. (University of ArkansasMonticello), Instructor, Department of Mathematical Sciences, 2013.

\section*{S}

Sabatini, Lindsey Rachel, D.N.P., M.S., B.S.N., B.S. (University of Arkansas), Instructor, Eleanor Mann School of Nursing, 2012.
Sabherwal, Rajiv, Ph.D. (University of Pittsburgh), P.G.D.M. (Indian Institute of Management), B.S.E.E. (Regional Engineering College, India), Distinguished Professor, Department of Information Systems, Edwin and Karlee Bradberry Chair, 2011, 2019.
Sabon, Lauren, Ph.D. (University of Tennessee-Knoxville), M.S/M.A. (Marshall University), B.S., B.A. (West Virginia University), Teaching Associate Professor, Department of Sociology and Criminology, 2014, 2017.

Sacharoff, Laurent A., J.D. (Columbia University), B.A. (Princeton University), Associate Professor, School of Law, 2010.
Saeidi, Shirin, Ph.D. (University of Cambridge, United Kingdom), M.A. (George Mason University), B.A. (University of Maryland-College Park), Assistant Professor, Department of Political Science, 2018.
Sakon, Joshua, Ph.D. (University of Wisconsin-Madison), B.S.
(Southern Oregon University), Professor, Department of Chemistry and Biochemistry, 1997, 2016.
Salamo, Gregory J., Ph.D. (City University of New York), M.S. (Indiana University-Purdue University-Indianapolis), B.S. (City University of New York, Brooklyn College), Distinguished Professor, Department of Physics, 1975, 2005.
Salas, Alexis, Ph.D. (University of Texas at Austin), Endowed Assistant Professor, School of Art, 2022.
Salisbury, Luti, M.Sc. (Loughborough University of Technology), B.Sc. (University of Guyana), Distinguished Professor, University Libraries, 1992, 2015.
Salonen, Rick, Ed.D., M.M. (University of Arkansas), B.M. (Central Michigan University), Instructor, Department of Music, 2008.

Salter, Kandy S.L., O.T.D. (University of Kansas), M.S. (University of Central Arkansas), Clinical Assistant Professor, Department of Communication Disorders and Occupational Therapy, 2018.
Samsonraj, Rebekah M., Ph.D. (Cornell University), B.S. (University of Colorado, Boulder), Assistant Professor, Department of Biomedical Engineering, 2020.
Samuels, Mandel G., M.B.A. (University of Arkansas), B.A. (Oklahoma State University), Clinical Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2012, 2018.

Sasidharan, Lekshmi, Ph.D. (Pennsylvania State University), M.S. (National Institute of Technology), B.S. (University of Kerala), Teaching Assistant Professor, Department of Civil Engineering, 2022.
Saunders, Robert F., M.S.E.E., M.S. (University of Arkansas), Instructor, Department of Electrical Engineering, 2012.
Savin, Mary Cathleen, Ph.D., M.S. (University of Rhode Island), B.S. (University of Notre Dame), Professor, Department of Crop, Soil and Environmental Sciences, 2002, 2011.
Scaif, Jacquelyn, M.E. (Harding University), B.A. (Arkansas State University), Instructor, Department of Curriculum and Instruction, 2023.
Schaffer, Meline M., Ph.D., M.S. (Clemson University), Teaching Assistant Professor, Department of Management, 2019.
Scheide, Frank Milo, Ph.D. (University of Wisconsin-Madison), M.A. (New York University), B.S. (University of Wisconsin-River Falls), Professor, Department of Communication, 1977, 2008.
Schluterman, Heath A., Ph.D., B.S. (University of Arkansas), Instructor, Engineering, 2009.
Schmitt, Abigail, Ph.D. (University of Florida), M.S. (University of Northern Colorado), B.S. (University of North Carolina), Assistant Professor, Department of Health, Human Performance and Recreation, 2020.

Schmitt, Craig, Ph.D. (University of Northern Colorado), M.B.A. (University of Central Florida), B.S. (University of Florida), Teaching Assistant Professor, Department of Health, Human Performance and Recreation, 2020.
Schmitt, Jean, M.F.A. (Vermont College), B.F.A. (Alfred University), Assistant Professor, School of Art, 2022.
Schneider, Susan, LL.M. (University of Arkansas), J.D. (University of Minnesota-Twin Cities), B.A. (College of Saint Catherine), Professor, School of Law, 1998, 2006.
Schott, Elizabeth W., Ph.D., M.S. (New Mexico State University), M.S.I.E. (Georgia Institute of Technology), Instructor, Operations Management Program, 2017.
Schreckhise, William D., Ph.D., M.A., B.A. (Washington State University), Professor, Department of Political Science, 1998, 2020.
Schroeder, Melinda, M.A. (University of Arkansas), B.S. (Northeastern State University), Instructor, Department of Mathematical Sciences, 2016.
Schubert, Karl, Ph.D. (University of Arkansas), M.S.Ch.E. (University of Kentucky), B.S.Ch.E (University of Arkansas), Professor of Practice, Department of Industrial Engineering, 2016.
Schulte, Bret J., M.F.A. (George Mason University), B.A. (University of Nebraska-Lincoln), Professor, School of Journalism and Strategic Media, 2008, 2023.
Schulte, Christopher M., Ph.D. (Pennsylvania State University), Associate Professor, School of Art, 2019.
Schulte, Stephanie Ricker, Ph.D., M.A. (George Washington University), B.A. (University of Arkansas), Professor, Department of Communication, 2008.

Scott, Adrienne R., M.S.W. (University of Texas, Arlington), B.A.
(University of Arkansas), Clinical Assistant Professor, School of Social
Work, 2014, 2022.

Scott, Allison L., D.N.P. (University of Missouri-Kansas City), M.S.N., B.S.N. (University of Arkansas for Medical Sciences), Associate Professor, Eleanor Mann School of Nursing, 2006, 2021.
Scott, Marc, Ph.D. (North Dakota State University), M.S., B.S. (South Carolina State University), Assistant Professor of Practice, J.B. Hunt Transport Department of Supply Chain Management, 2016.
Scott, Robert C., Ph.D. (Mississippi State University), M.S., B.S. (Oklahoma State University), Professor, Department of Crop, Soil and Environmental Sciences, 2002, 2008.
Scroggin, Sloan, M.S. (University of Arkansas), B.B.A. (University of Arkansas-Little Rock), Instructor, Department of Mathematical Sciences, 2013.

Sebold, Karen Denice, Ph.D., M.A. (University of Arkansas), B.S. (Campbell College), B.S. (Rogers State University), Assistant Professor, Department of Political Science, 2011, 2020.
Selvam, R. Panneer, Ph.D. (Texas Tech University), M.S.C.E. (South Dakota School of Mines and Technology), M.E., B.E. (University of Madras, India), University Professor, Department of Civil Engineering, 1986, 2010.
Senor, Thomas D., Ph.D., M.A. (University of Arizona), B.S. (University of Oregon), Professor, Department of Philosophy, 1989, 2012.
Seo, Han-Seok, Dr.rer.Medic. (Technische Universität Dresden, Germany), Ph.D., M.Sc. (Seoul National University, South Korea), B.S. (Korea University, Seoul, South Korea), Associate Professor, Department of Food Science, 2012, 2017.
Sexton, Kim, Ph.D., M.A., M.Phil. (Yale University), B.A. (State University of New York at Binghampton), Associate Professor, Department of Architecture, 1999, 2005.
Sha, Xueyan, Ph.D. (Louisiana State University), Professor, Department of Crop, Soil and Environmental Sciences, 2012.
Shadwick, John D.L., M.S. (University of Arkansas), B.S. (University of Central Arkansas), Instructor, Department of Biological Sciences, 2011.
Shaheen, lana, Ph.D., M.S. (University of South Florida), B.A. (National Research University Higher School of Economics, Moscow), Assistant Professor, J.B. Hunt Transport Department of Supply Chain Management, 2020.

Shakiba, Ehsan, Ph.D., M.S. (University of Arkansas), M.S., B.S. (Azad University, Iran), Assistant Professor, Department of Crop, Soil and Environmental Sciences, 2015.
Shallcross, Nicholas, Ph.D. (University of Arkansas), M.S. (Air Force Institute of Technology), B.S. (Virginia Military Institute), Instuctor, Operations Management Program, 2020.
Shannon, Graham F., M.Arch. (Rice University), B.Arch., B.A. (University of Arkansas), Professor, Department of Architecture, 1979, 1990.
Sharma, Ashish, Ph.D. (University of Georgia), M.Fin. (University of Glasgow), M.B.A., B.S.B.A (Indraprastha University), Assistant Professor, Department of Marketing, 2020.
Sharman, Glenn R., Ph.D. (Stanford University), B.S. (Wheaton College), Associate Professor, Department of Geosciences, 2017.
Sharpless, Charles, M.Arch. (Harvard University), B.Arch. (Rice
University), Assistant Professor, Department of Interior Architecture and Design, 2020.
Shaulis, Barry J., Ph.D., M.S., B.S. (University of Houston), B.B.A. (University of Georgia), Research Associate, Department of Geosciences, 2016.

Shaw, John B., Ph.D. (University of Texas at Austin), B.A. (Oberlin College), Associate Professor, Department of Geosciences, 2014, 2019.
Shelton, Gina, B.A. (Mississippi State University), Instructor, School of Journalism and Strategic Media, 2013.
Shelton, Leslie Jo, Ph.D. (Michigan State University), M.Ed., B.A. (Ohio University), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2014, 2018.

Shen, Haoming, Ph.D., M.S., M.S. (University of Michigan), Assistant Professor, 2023.
Shew, Aaron M., Ph.D., M.S., M.A. (University of Arkansas), B.S., B.A. (Middle Tennessee State University), Assistant Professor, Department of Agricultural Economics and Agribusiness, 2021.
Shew, Woodrow L., Ph.D. (University of Maryland-College Park), B.A. (College of Wooster), Associate Professor, Department of Physics, 2012, 2017.

Shi, Ainong, Ph.D. (North Carolina State University), M.S. (Graduate School of Chinese Academy of Agricultural Sciences), B.S. (Zhejiang University), Assistant Professor, Department of Horticulture, 2013.
Shields, Christopher A., Ph.D., J.D., M.A., B.A. (University of Arkansas), Teaching Associate Professor, Department of Sociology and Criminology, 2003, 2017.
Shields, Grant, Ph.D., M.A. (University of California, Davis), B.A.
(Simpson College), Assistant Professor, Department of Psychological Science, 2020.
Shields, Todd G., Ph.D., M.A. (University of Kentucky), B.A. (Miami University), Professor, Department of Political Science, 1994, 2005.
Shipman, Jonathan, Ph.D. (University of Tennessee), B.S. (University of Central Arkansas), Associate Professor, William Dillard Department of Accounting, 2015, 2019.
Shipp, Justin, M.I.S. (University of Arkansas), B.S. (John Brown University), Instructor, 2022.
Shobe, Marcia A., Ph.D. (University of Kansas), M.S.W. (University of Hawaii at Manoa), B.A. (State University of New York at Plattsburgh), Professor, School of Social Work, 2007, 2012.
Shook, Carole, M.S.B.A., B.S.B.A. (University of Arkansas), Teaching Associate Professor, Department of Information Systems, 1999, 2023.
Shou, Wan, Ph.D. (Missouri University of Science and Technology),
M.S.M.E. (University of Louisiana at Lafayette), B.E. (Tianjin Polytechnic University), Assistant Professor, Department of Mechanical Engineering, 2021.

Shreve, Marilou D., D.N.P., M.S.N. (University of Missouri-Kansas City), B.S.N. (University of Arkansas), Associate Professor, Eleanor Mann School of Nursing, 2013, 2021.
Siahmakoun, Lobat, M.S. (University of Arkansas), B.S. (Missouri Southern State University), Instructor, School of Human Environmental Sciences, 2015.
Siebenmorgen, Terrence J., Ph.D. (University of Nebraska-Lincoln), M.S.Ag.E. (Purdue University), B.S.Ag.E. (University of Arkansas), Distinguished Professor, Department of Food Science, 1984, 2015. Siebrits, Helene, M.F.A. (University of California, Los Angeles), B.A. (University of California, Los Angeles), Associate Professor, Department of Theatre, 2020.
Siepielski, Adam M., Ph.D. (University of Wyoming-Laramie), M.S. (New Mexico State University), B.S. (Pennsylvania State University-University Park), Associate Professor, Department of Biological Sciences, 2015, 2019.

Simon, Lauren, Ph.D., B.S.B.A., B.S. (University of Florida), Associate Professor, Department of Management, 2016, 2018.
Singer, Pecos, D.M.A. (University of Maryland), M.M. (San Francisco Conservatory), B.M. (University of Oregon), Instructor, Department of Music, .
Singh, Surendra P., Ph.D., M.A. (University of Rochester), M.Sc., B.Sc. (Banaras Hindu University, India), University Professor, Department of Physics, 1982, 2016.
Skinner, Stephen R., M.S., B.S. (University of Arkansas), Instructor, Department of Physics, 1998.
Slaton, Nathan A., Ph.D., M.S. (University of Arkansas), B.S. (Murray State University), Professor, Department of Crop, Soil and Environmental Sciences, 2001, 2009.

Sloan, Kathryn Ann, Ph.D., M.A., M.B.A. (University of Kansas), B.A. (Kansas State University), Professor, Department of History, 2004, 2016. Slone, Ryan B., B.F.A (University of Arkansas), Instructor, School of Art, 2001.

Smith, Annie B., LL.M. (George Washington University), J.D. (University of Wisconsin-Madison), Associate Professor, School of Law, 2012, 2016.
Smith, Benjamin C., M.F.A. (University of Pittsburgh), B.A. (University of Dallas), Assistant Professor, Department of Theatre, 2019.
Smith, Carl Alan, Ph.D., M.A. (University of Sheffield), B.Sc. (University of Lancaster), Associate Professor, Department of Landscape Architecture, 2008, 2013.
Smith, Christy L., Ed.D., Ed.S., M.S.E., B.S.E. (University of Arkansas), Clinical Assistant Professor, Department of Curriculum and Instruction, 2019.

Smith, Joshua Byron, Ph.D., M.A. (Northwestern University), B.A. (University of Illinois at Chicago), Associate Professor, Department of English, 2011, 2019.
Smith, Leah, Ph.D. (University of Tennessee), M.B.A. (Wake Forest University), B.A. (Indiana University), Assistant Professor, Department of Marketing, 2020.
Smith, Martin, B.S. (Oklahoma State University), Assistant Professor, Air Force ROTC, 1st Lieutenant, 2018.
Smith, Scott, M.S. (University of Arkansas), M.S. (Air Force Institute of Technology), B.S. (United States Air Force Academy), Instructor, Operations Management Program, 2006.
Smith-Nix, Angela, Ph.D. (University of Arkansas), M.Ed., B.S.E. (Arkansas State University), Teaching Professor, Department of Health, Human Performance and Recreation, 1989.
Snyder, Tamara D., M.S. (University of Arkansas), B.S. (University of California-Los Angeles), Teaching Assistant Professor, Department of Physics, 2004.
Soignet, Denise Breaux, Ph.D. (Florida State University), M.B.A., B.S. (Nicholls State University), Teaching Associate Professor, Department of Management, 2010.
Song, Geoboo, Ph.D. (University of Oklahoma), B.A. (Korea University), B.A. (Hanyang University), Associate Professor, Department of Political Science, 2012, 2019.
Song, Xiaoqing, Ph.D. (North Carolina State University), M.S., B.S. (Beijing Institute of Technology), Assistant Professor, Department of Electrical Engineering, 2022.
Song, Young Hye, Ph.D. (Cornell University), Assistant Professor, Department of Biomedical Engineering, 2019.
Sonn, Richard D., Ph.D., M.A. (University of California-Berkeley), B.A. (University of Michigan), Professor, Department of History, 1987, 2010.
Sosa, Ninette, M.A. (University of Arkansas), B.A. (San Diego State University), Instructor, School of Journalism and Strategic Media, 2021.
Southward, Leigh, Ph.D., M.S., B.S. (University of Tennessee), B.S.
(Mississippi University for Women), Associate Professor, School of Human Environmental Sciences, 2008.
Soysal, Gonca, Ph.D. (Northwestern University), M.S. (Northwestern University), M.E. (University of Florida), B.S. (Middle East Technical University), Assistant Professor, Department of Marketing, 2017.
Sparks, Leigh Pryor, Ph.D. (University of Arkansas), M.A., B.A. (Stanford University), Instructor, Department of English, 2009, 2019.
Spears, Kari R., M.S.W., B.A. (University of Arkansas), Instructor, School of Social Work, 2016.
Specking, Eric A., M.S.I.E., B.S. (University of Arkansas), Lecturer, Operations Management Program, 2014.
Speight, Dana Renee, Ph.D. (University of Arkansas), Assistant Professor, Department of Curriculum and Instruction, 2023.

Spialek, Matthew L., Ph.D. (University of Missouri), M.S., B.S. (Illinois State University), Associate Professor, Department of Communication, 2016.

Spicer, Tom O., Ph.D., M.S., B.S. (University of Arkansas), Professor, Ralph E. Martin Department of Chemical Engineering, Robert E. Babcock Sr. Professorship in Chemical Engineering, 1981, 1997.
Spiegel, Sarah E., M.S. (University of Illinois-Urbana-Champaign), B.A. (Bryn Mawr College), Assistant Librarian, University Libraries, 2007, 2009. Spiesshoefer, Silke, Ph.D., M.S.E.E., B.S.Ch.E. (University of Arkansas), Clinical Assistant Professor, Department of Electrical Engineering, 2014.
Sprandel, Heather, Ed.D., M.Ed. (University of Arkansas), B.A. (DePaul University), Instructor, Walton College of Business, 1999.
Sprandel, Heather, Ed.D., M.Ed. (University of Arkansas), B.A. (DePaul University), Instructor, Department of Management, 2019.
Springer, Bethany Lynn, M.F.A. (University of Georgia), B.A. (Virginia Polytechnic Institute and State University), Associate Professor, School of Art, 2006, 2012.
Spurlock, Terry, Ph.D. (University of Arkansas), Extension Associate Professor, Department of Entomology and Plant Pathology, 2015.
Srivastava, Vibha, Ph.D. (Jawaharlal Nehru University, New Delhi), M.S. (Govind Ballabh Pant University of Agriculture and Technology), B.S.
(D.E.I. University), Professor, Department of Crop, Soil and Environmental Sciences, 2001, 2012.
Stahle, David William, Ph.D. (Arizona State University), M.A. (University of Arkansas), B.A. (University of Arizona), Distinguished Professor, Department of Geosciences, 1982, 2005.
Stallings, Melinda, M.A. (University of Houston-Clear Lake), B.S. (Louisiana State University), Instructor, School of Human Environmental Sciences, 2019.
Standerfer, Christina Corrado, Ph.D. (University of Colorado-Boulder), M.A., B.A. (University of Arkansas at Little Rock), Professor, Clinton School of Public Service, 2007.
Stankus, Tony, M.L.S. (University of Rhode Island), B.A. (College of the Holy Cross), Distinguished Professor, University Libraries, 2007, 2014.
Stapp, Robert Bruce, Ph.D., M.S. (Oklahoma State University), B.S.B.A. (Oklahoma City University), Clinical Professor, Department of Economics, 1995, 2012.
Starks, Trish, Ph.D., M.A. (The Ohio State University), B.A. (University of Missouri), Professor, Department of History, 2000, 2018.
Starling-Ledbetter, Robyn M., M.A., B.A. (University of Arkansas), Instructor, School of Journalism and Strategic Media, 2007.
Stassen, Robert E., Ph.D., M.B.A. (University of Nebraska-Lincoln), B.S. (University of Minnesota), Associate Professor, Department of Marketing, 1989.

Stauss, Kim, Ph.D. (University of Utah), M.S.W. (California State University at Sacramento), B.S. (Stephen F. Austin State University), Associate Professor, School of Social Work, 2006, 2012.
Steelman, Zachary R., Ph.D., M.I.S. (University of Arkansas), B.B.A. (Northeastern State University), Associate Professor, Department of Information Systems, 2017, 2022.
Steinkraus, Donald C., Ph.D. (Cornell University), M.S. (University of Connecticut), B.A. (Cornell University), Professor, Department of Entomology and Plant Pathology, 1989, 1999.
Stenken, Julie A., Ph.D. (University of Kansas), B.S. (University of Akron), Professor, Department of Chemistry and Biochemistry, 21st Century Chair of Proteomics, 2007.
Stephens, Dorothy Anne, Ph.D. (University of California-Berkeley), M.A. (University of Illinois-Chicago), B.A. (Northwestern University), Professor, Department of English, 1992, 2008.
Stephens, Mary Paige, M.S.W., B.A. (University of Missouri-Columbia), Lecturer, School of Social Work, 2013.

Stephenson, Barbara C., M.S. (West Virginia University), Instructor, Department of Mathematical Sciences, 2004.
Stephenson, Steven Lee, Ph.D., M.S. (Virginia Polytechnic Institute and State University), B.S. (Lynchburg College), Research Professor, Department of Biological Sciences, 2003.
Sterling, Brett E., Ph.D., M.A. (Vanderbilt University), B.A. (University of Arkansas), Asociate Professor, Department of World Languages, Literatures and Cultures, 2013, 2022.
Stevens, Christopher W., Ph.D. (University of Maryland College Park), M.A. (City University of New York-The Graduate Center), B.A. (Humboldt State University), Instructor, Department of Philosophy, 2015.
Stewart, Patrick A., Ph.D., (Northern Illinois University), M.A., B.A. (University of Central Florida), Professor, Department of Political Science, 2008, 2021.
Stinson, Jonathan, D.M.A. (University of Cincinnati), Teaching Assistant Professor, Department of Music, 2020.
Stites, Wesley, Ph.D. (Massachusetts Institute of Technology), M.A., B.A. (Johns Hopkins University), Professor, Department of Chemistry and Biochemistry, 1991, 2008.
Stoner, Wesley, Ph.D., M.A. (University of Kentucky), B.A. (Pennsylvania State University), Associate Professor, Department of Anthropology, 2014, 2020.
Stoverink, Adam, Ph.D. (Texas A\&M University), M.B.A. (St. Louis University), B.S.B.A. (University of Missouri), Associate Professor, Department of Management, 2017, 2021.
Streeter, Lora, Ph.D., M.S. (University of Arkansas, Fayetteville), Teaching Assistant Professor, Department of Computer Science and Computer Engineering, 2019.
Striegler, Susanne, Ph.D., M.S., B.S. (Ulm University, Germany), Professor, Department of Chemistry and Biochemistry, 2012, 2015.
Studebaker, Glenn, Ph.D., M.S. (University of Arkansas), B.S. (Missouri Southern State University), Associate Professor, Department of Entomology and Plant Pathology, 1993.
Su, Danjie, Ph.D. (University of California, Los Angeles), M.A., B.A. (Sun Yatsen University, China), Associate Professor, Department of World Languages, Literatures and Cultures, 2017, 2023.
Suarez, Celina A., Ph.D. (University of Kansas), M.S. (Temple University), B.S. (Trinity University), Associate Professor, Department of Geosciences, 2012, 2018.
Subbiah, Jeyamkondan, Ph.D. (Oklahoma State University), M.S. (University of Manitoba, Canada), B.E. (Tamil Nadu Agricultural University, India), Professor, Department of Food Science, 2019.
Sude, Yujie, Ph.D., M.A. (University of Arkansas), M.Ed. (Beijing Normal University), LL.B. (Peking University), Clinical Assistant Professor, Department of Economics, 2018.
Suggs, Hannah Gant, M.A., B.A. (University of Arkansas), Instructor, Department of Communication, 2018.
Sullivan, Amanda Lynn, Ph.D., M.A.T., B.S.E. (University of Arkansas), Clinical Associate Professor, Department of Health, Human Performance and Recreation, 2010, 2018.
Sullivan, Kelly M., Ph.D. (University of Florida), M.S.I.E., B.S.I.E.
(University of Arkansas), Associate Professor, Department of Industrial Engineering, 2012, 2019.
Sullivan, W. Curt, M.A. (University of Arkansas), B.A. (Harding
University), Lecturer, Department of Political Science, 2015.
Summers, Jeffrey P., D.M.A. (University of Miami), Instructor, Department of Music, 2020.
Sun, Xiaolun, Ph.D., M.S. (Virginia Polytech Institute and State University), B.S. (Southern China Agricultural University), Assistant Professor, Department of Poultry Science, 2016.

Sutton, James M., M.S. (Southern Methodist University), B.S. (University of West Florida), B.M. (University of Southern Mississippi), Instructor, Operations Management Program, 2017.
Svendgard, Madison, M.F.A. (University of Arkansas), B.F.A. (University of Nebraska), Instructor, School of Art, 2022.
Swanson, Shawn, Ph.D. (University of Colorado Boulder), M.A. (University of Colorado Boulder, University of Wisconsin-Milwaukee), B.S. (University of Wisconsin-Madison), Teaching Assistant Professor, Department of Economics, 2021.
Sykes, Tracy Ann, Ph.D. (University of Arkansas), B.S. (University of Maryland-College Park), Associate Professor, Department of Information Systems, 2011, 2016.
Syler, Rhonda A., Ph.D. (Auburn University), M.B.A. (Columbus State University), M.S. (Kansas State University), B.S. (Middle Tennessee State University), Teaching Assistant Professor, Department of Information Systems, 2016.
Sytsma, Janine A., Ph.D. (University of Wisconsin-Madison), M.A. (University of Denver), B.A. (Arizona State University), Assistant Professor, School of Art, 2016.
Szakasits, Monika, J.D. (Baylor University), B.A. (Sam Houston State University), Associate Librarian, University Libraries, 2004.
Szalanski, Allen Lawrence, Ph.D. (University of Nebraska-Lincoln), M.S. (Kansas State University), B.S. (University of Manitoba), Professor, Department of Entomology and Plant Pathology, 2001, 2011.
Szwydky-Davis, Lissette López, Ph.D., M.A. (Penn State University), B.A. (University of Miami), Associate Professor, Department of English, 2013.

T
Tain Gutierrez, Laura, M.A. (Universidad Internacional de la Rioja), B.S. (Universidad de Sevilla), Instructor, Department of World Languages, Literatures and Cultures, 2020.
Talafuse, Thomas, Ph.D. (University of Arkansas), M.S. (Air Force Institute of Technology), B.S. (United States Air Force Academy), Instructor, Operations Management Program, 2018.
Tarvin, Tim, J.D. (University of Arkansas), B.A. (Hendrix College), Associate Professor, School of Law, 1993, 2011.
Tate, Rashone, M.S. (Army War College), M.S.O.M. (University of Arkansas), B.S. (Park University), Instructor, Operations Management Program, 2022.
Tayeh, Ralph, Ph.D., M.S. (University of Florida), B.S. (Lebanese American University, Byblos, Lebanon), Instructor, Department of Civil Engineering, 2021.
Tellez-Isaias, Guillermo, Ph.D. (Texas A\&M University), Visiting Professor, Department of Poultry Science, 2002.
Ten Haaf, Rachel E., Ph.D. (University of Michigan), M.A. (University of Illinois, Urbana-Champaign), Assistant Professor, Department of World Languages, Literatures and Cultures, 2016, 2017.
Terhune, Claire E., Ph.D., M.A. (Arizona State University), B.A., B.S. (College of Charleston), Associate Professor, Department of Anthropology, 2013, 2020.
Terrell, Amanda, Ph.D., M.S., B.S. (Oklahoma State University), Assistant Professor, School of Human Environmental Sciences, 2017.
Terrell, Katie, M.B.A. (University of Arkansas), B.A. (University of Central Arkansas), Instructor, William Dillard Department of Accounting, 2012.
Terry, Laura, M.F.A. (Savannah State University), B.S. (Auburn University), Associate Professor, Department of Architecture, 1998, 2007.
Tester, Colson, M.S., B.S. (University of Arkansas), Instructor,
Department of Agricultural Economics and Agribusiness, 2020.
Teuton, Sean Kicummah, Ph.D., M.A. (Cornell University), B.A. (University of Colorado-Boulder), Professor, Department of English, 2013, 2018.

Thallapuranam, Suresh, Ph.D. (Osmania University), Professor, Department of Chemistry and Biochemistry, 2003, 2015.
Theiss, Hank, Ph.D. (Purdue University), M.S. (Purdue University), B.S. (Virginia Tech), Research Associate Professor, Department of Geosciences, 2020.
Thibado, Paul M., Ph.D. (University of Pennsylvania), B.S. (San Diego State University), Professor, Department of Physics, 1996, 2005.
Thomas, JaLynn D., B.S. (Louisiana Tech College Ruston Campus), Instructor, William Dillard Department of Accounting, 2011.
Thomas, Johanna, Ph.D., M.S.W. (Louisiana State University), B.A. (University of Akron), Associate Professor, School of Social Work, 2015, 2022.

Thomas, Lauren, D.V.M. (Oklahoma State University), B.S. (University of Arkansas), Teaching Assistant Professor, Department of Animal Science, 2016.

Thomas, Rodney W., Ph.D., M.B.A. (University of Tennessee), B.S.B.A. (Greensboro College), Associate Professor, J.B. Hunt Transport Department of Supply Chain Management, 2017.
Thomas, Shaun A., Ph.D., M.A. (Louisiana State University), B.A.
(University of Akron), Professor, Department of Sociology and Criminology, 2015, 2023.
Thomas, Stephanie, M.S.W. (University of Maryland at Baltimore), B.S. (Old Dominion University), Lecturer, School of Social Work, 2017.
Thomas, Stephanie, Ph.D. (Georgia Southern University), M.B.A., B.A. (University of Tennessee), Associate Professor of Practice, J.B. Hunt Transport Department of Supply Chain Management, 2017, 2022.
Thompson, Dale R., Ph.D. (North Carolina State University), M.S., B.S. (Mississippi State University), Professor, Department of Computer Science and Computer Engineering, 2000, 2022.
Thompson, Gary A., Ph.D. (Purdue University), M.S. (University of Wisconsin), Professor, Department of Crop, Soil and Environmental Sciences, 2020.
Thompson, Graham W., M.S., (New Mexico State University), B.S. (University of Arkansas), Instructor, Department of Civil Engineering, 2021.

Thompson, Jody, M.F.A. (University of Arkansas, Fayetteville), B.A. (McNeese State University), Instructor, School of Art, 2019.
Thompson, Randy, J.D. (University of Illinois-Urbana-Champaign), M.L.S., B.A. (Indiana University), Associate Professor, School of Law, 2008.

Thompson, Rick, Ph.D., M.S., (Catholic University of America), M.B.A. (Cornell University), M.Arch. (New School of Architecture and Design), B.S. (Arizona State University), Instructor, Department of Civil Engineering, 2021.
Thomsen, Michael R., Ph.D. (University of Minnesota-Morris), M.S., B.S. (Utah State University), Professor, Department of Agricultural Economics and Agribusiness, 1998, 2015.
Thrash, Ben, , Assistant Professor, Department of Entomology and Plant Pathology, 2018.
Throop, Kathy, M.S.N. (Northeastern Oklahoma State University), B.S.N. (Baylor University), Instructor, Eleanor Mann School of Nursing, 2019.
Tian, Ryan, Ph.D. (University of Connecticut), B.S. (Fudan University, Shanghai), Associate Professor, Department of Chemistry and Biochemistry, 2004, 2010.
Timby, Donia, M.S., B.S. (University of Arkansas), Instructor, School of Human Environmental Sciences, 2017.
Tipsmark, Christian K., Ph.D., M.S. (University of Southern Denmark), Associate Professor, Department of Biological Sciences, 2010, 2016.
Tipton, John, Ph.D., M.S., B.S., (Colorado State University), Assistant Professor, Department of Mathematical Sciences, 2017.

Tjani, Maria, Ph.D. (Michigan State University), M.S. (Purdue University), B.S. (University of Ioannina, Greece), Professor, Department of Mathematical Sciences, 2003, 2020.
Torres, Maria, M.S.W., B.S.W. (University of Arkansas), Lecturer, School of Social Work, 2020.
Totten, Eric P., Ph.D. (University of Arkansas), M.A., B.A. (University of Central Florida), Instructor, Department of History, 2021.
Totten, Marie C., Ph.D. (University of Arkansas), M.A., B.A. (Arkansas Tech University), Instructor, Department of History, 2021.
Tracy, Torrey, M.Arch., B.A. (University of Nevada, Las Vegas), Assistant Professor, Department of Interior Architecture and Design, 2019.
Traywick, LaVona S., Ph.D. (University of Kentucky), M.A. (University of Arkansas-Little Rock), B.S. (University of Central Arkansas), Associate Professor, School of Human Environmental Sciences, 2017.
Trivitt, Julie R., Ph.D., M.A. (University of Arkansas), M.A. (Southwest Missouri State University), Clinical Associate Professor, 2012, 2017.
Troiano, Eric, D.M.A., M.M. (Michigan State University), B.M. (Ithaca College), Teaching Assistant Professor, Department of Music, 2016, 2021.

Troillett, Amanda, O.T.D. (Washington University St. Louis), B.A. (University of Cincinnati), Clinical Assistant Professor, Department of Communication Disorders and Occupational Therapy, 2021.
Trudo, Sabrina P., Ph.D. (University of Washington), B.S. (Brigham
Young University), Associate Professor, School of Human Environmental Sciences, Twenty First Century Endowed Chair in Human Environmental Sciences, 2015.
Tucci, Jake, M.S (University of North Carolina at Greensboro), B.S. (North Carolina State University), Assistant Professor, Department of Interior Architecture and Design, 2019.
Tucker, Mary Honore, J.D., B.C.L. (Louisiana State University), M.Ed. (University of Arkansas), B.S. (Tulane University), Lecturer, Department of Political Science, 2019.
Tullis, Jason A., Ph.D., M.S. (University of South Carolina), B.S.
(Brigham Young University), Professor, Department of Geosciences, 2004, 2018.
Tumlison, Creed, Ph.D., M.A. (University of Arkansas), B.S. (Arkansas State University), Visiting Assistant Professor, Department of Political Science, 2020.
Tung, Steve, Ph.D., M.S.M.E. (University of Houston), B.S.M.E. (National Taiwan University), Professor, Department of Mechanical Engineering, 2000, 2013.
Turner, Aaron, M.F.A (Rutgers State University), B.A (University of Memphis), Research Associate, School of Art, 2016.
Turner, Alison, M.A. (Parsons School of Design), B.A. (Kentucky State University), Assistant Professor, Department of Architecture, 2008.
Turner, Henry L., Ph.D., M.S. (University of Arkansas), B.S. (University of Oregon), Instructor, Department of Geosciences, 2008.
Turner, Ronna L., Ph.D. (University of Illinois-Urbana-Champaign), M.S.E. (Missouri State University), B.S.E. (Southwest Missouri State University), Professor, Department of Curriculum and Instruction, 1997, 2018.

Tuychiev, Hayot A., M.A. (University of Arkansas), B.A. (Tashkent State University of Economics), Instructor, School of Journalism and Strategic Media, 2010.
Tyler, Joel, M.B.A., B.A. (University of Arkansas), Instructor, J.B. Hunt Transport Department of Supply Chain Management, 2019.
Tyler, Susan, M.S.W., B.S.W (University of Arkansas), Clinical Assistant Professor, School of Social Work, 2018.
Tzanetakis, loannis E., Ph.D. (Oregon State University), M.S., B.S. (Agricultural University of Athens, Greece), Professor, Department of Entomology and Plant Pathology, 2008, 2016.

\section*{U}

Ubeyitogullari, Ali, Ph.D. (University of Nebraska-Lincoln), M.S., B.S. (Middle East Technical University, Turkey), Assistant Professor, Department of Food Science, 2021.
Ungar, Peter S., Ph.D., M.A. (State University of New York at Stony Brook), B.A. (State University of New York, Binghampton), Distinguished Professor, Department of Anthropology, 1995, 2009.
Uribe, Lia, D.M.A. (University of Kansas), M.M. (University of Arkansas), B.M. (Universidad Nacional de Colombia, Bogotá), Associate Professor, Department of Music, 2013, 2018.
V
Valandra, Ph.D., M.S.W. (University of Minnesota), M.B.A., B.S.
(University of Nebraska at Omaha), Associate Professor, School of Social Work, 2013, 2019.
Valencia, Fernando, M.M. (University of Arkansas), B.M. (Universidad Javeriana), Instructor, Department of Music, 2014.
Van Hoek, Remko, Ph.D. (University of Utrecht), M.B.A.(London School of Economics), B.S.B.A. (Vanderbilt University), Clinical Professor, J.B. Hunt Transport Department of Supply Chain Management, 2018.
Van Horn-Morris, Jeremy, Ph.D. (University of Texas at Austin), B.S. (University of Oregon), Associate Professor, Department of Mathematical Sciences, 2012, 2018.
VanDevender, Karl, Ph.D. (University of Arkansas), M.S., B.S. (Mississippi State University), Professor, Department of Biological and Agricultural Engineering, 1995, 2004.
Vansteenburg, Jessica, Ph.D. (University of Colorado), D.M.A. (University of Nebraska), M.M. (Ohio University), B.A. (Luther College), Visiting Instructor, Department of Music, 2022.
Vargas, Ivan, Ph.D. (University of Michigan), B.S. (Notre Dame University), Assistant Professor, Department of Psychological Science, 2019.

Vazquez, Alan, Ph.D. (University of Antwerp, Belgium), M.S. (Monterrey Institute of Technology, Mexico), B.S. (Autonomous University of Nuevo Leon, Mexico), Assistant Professor, Department of Industrial Engineering, 2022.

Vega, Jose L., Ph.D. (University of Arkansas), M.S., Licenciatura (Universidad de Santiago de Compostela), Instructor, Ralph E. Martin Department of Chemical Engineering, 2020.
Veilleux, Jennifer Celene, Ph.D., M.A. (University of Illinois at Chicago), B.A. (Macalaster College), Associate Professor, Department of Psychological Science, 2011, 2017.
Vela, Luzita I., Ph.D., (Pennsylvania State University), M.S. (Barry University), B.S. (Texas Woman's University), Teaching Professor, Department of Health, Human Performance and Recreation, 2021.
Velliquette, Anne M., Ph.D. (University of Arkansas), M.A.B., B.S. (Southwest Missouri State University), Clinical Assistant Professor, Department of Marketing, 2014.
Veloso, Pedro, M.Sc. (University of Sao Paulo), B.Arch., B.U.D.
(University of Brasilia), Assistant Professor, Department of Architecture, 2021.

Vennarucci, Rhodora, Ph.D., M.A. (State University of New York at Buffalo), B.A. (University of Michigan), Assistant Professor, Department of World Languages, Literatures and Cultures, 2013, 2017.
Vera, Eric, Ph.D (University of Texas at Austin), M.A. (University of Northern Colorado), B.F.A. (University of Texas at Austin), , Department of Theatre, Gordon Morgan Fellow, 2022.
Verma, Lalit R., Ph.D. (University of Nebraska-Lincoln), M.S. (University of Montana), B. Tech. (J.N. Agricultural University, Jabalpub, India), Professor, Department of Biological and Agricultural Engineering, 2000.

Vierck, Kelly, Ph.D. (Texas Tech University), M.S. (Kansas State University), B.S. (Oklahoma State University), Assistant Professor, Department of Animal Science, 2020.
Villalonga, Patrick, Ph.D., M.S., B.A. (Florida International University), Visiting Assistant Professor, Department of Political Science, 2022.
Villanova, Daniel, Ph.D. (Virginia Tech University), B.S.B.A.
(Appalachian State University), Assistant Professor, Department of Marketing, 2018.
Villaseñor, Amelia, Ph.D. (George Washington University), B.A. (Arizona State University), Assistant Professor, Department of Anthropology, 2019.
Vining, Benjamin R., Ph.D., M.A. (Boston University), B.A. Colgate University, Associate Professor, Department of Anthropology, 2016, 2022.
Viswanathan, Padma, M.F.A. (University of Arizona), M.A. (Johns Hopkins University), B.A. (University of Alberta), Professor, Department of English, 2010, 2022.
Vyas, Reeta, Ph.D. (State University of New York at Buffalo), M.S., B.S. (Banaras Hindu University), Professor, Department of Physics, 1984, 2002.

W
Wade, Les, Ph.D. (University of California-Santa Barbara), M.F.A. (University of Georgia), M.A. (Duke University), B.A. (Tulane University), Professor, Department of Theatre, 2011.
Wai, Jonathan, Ph.D., M.S. (Vanderbilt University), M.A. (Claremont Graduate University), B.A. (Claremont McKenna College), Assistant Professor, Department of Education Reform, Endowed Chair in Educational Policy, 2018.
Walch, John S., M.F.A. (University of Texas at Austin), B.A. (Colorado College), Associate Professor, Department of Theatre, 2016, 2022.
Walker, Heather L., Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Arkansas), Teaching Assistant Professor, Ralph E. Martin Department of Chemical Engineering, 2008, 2014.
Walker, James M., Ph.D. (University of Colorado-Boulder), M.S., B.S. (Louisiana Polytechnic Institute), Professor, Department of Biological Sciences, 1965.
Walker, Kasey, Ph.D., M.A. (Purdue University), B.S. (Trinity University), Teaching Assistant Professor, Department of Communication, 2006.
Walker, Kate Ireton, M.S. (University of Arkansas), B.S. (Kansas State University), Instructor, Department of Biological Sciences, 2014.
Waller, Matthew A., Ph.D., M.S. (Pennsylvania State University), B.S. (University of Missouri-Columbia), Professor, J.B. Hunt Transport Department of Supply Chain Management, Sam M. Walton Leadership Chair, 2002, 2007.
Walsh, Lora, Ph.D. (Northwestern University), M.Sc. (University of Edinburgh), B.A. (Pepperdine University), Assistant Professor, Department of English, 2014.
Walter, Keith D., Ph.D., M.S., B.S. (Clemson University), Professor, Department of Mechanical Engineering, Twenty-First Century Professorship, 2021.
Walters, D. Keith, Ph.D., M.S.M.E., B.S.M.E. (Clemson University), Professor, Department of Mechanical Engineering, 2021.
Walters, Keisha, Ph.D., M.S., B.S. (Clemson University), Professor, Ralph E. Martin Department of Chemical Engineering, Kevin W. and Marie L. Brown Department Head Chair in Chemical Engineering, Ralph E. Martin Leadership Chair in Chemical Engineering, 2021.
Wamishe, Yeshi Andenow, Ph.D. (University of Arkansas) M.S., B.S. (Addis Ababa University, Ethiopia), Associate Professor, Department of Entomology and Plant Pathology, 2011, 2016.
Wang, Dongyi, Ph.D. (University of Maryland), B.S. (Fundan University, Shanghai, China), Assistant Professor, Department of Biological and Agricultural Engineering, 2021.

Wang, Feng, Ph.D. (University of Pittsburgh), Ph.D. (Kutztown University of Pennsylvania), B.S. (Peking University), Associate Professor, Department of Chemistry and Biochemistry, Charles E. and Clydene Scharlau Endowed Professor, 2012.
Wang, Ya-Jane, Ph.D. (lowa State University), M.S. (University of Minnesota-Twin Cities), B.S. (National Taiwan University), Professor, Department of Food Science, 1999, 2009.
Wang, Yong, Ph.D., M.S. (University of California, Los Angeles), B.S. (University of Science and Technology of China), Assistant Professor, Department of Physics, 2016.
Wang, Yu, Ph.D. (Rutgers University, Boston College), M.S., B.S. (Wuhan University), Assistant Professor, Department of Finance, 2020.
Ward, Arley R., Ph.D. (University of Arkansas), M.A. (University of Tulsa), B.A. (University of North Carolina at Greensboro), Instructor, Department of History, 2021.
Ward, Barry M., Ph.D. (Rutgers State University-New Brunswick), M.Sc., B.A.Mod. (Trinity College, Dublin), Professor, Department of Philosophy, 2002, 2022.
Ward, Cortez, M.S. (Troy University), B.S. (University of Maryland), Instructor, Operations Management Program, 2006.
Ward, Heidi, Ph.D. (University of Oklahoma), D.V.M. (Oklahoma State University), B.S. (University of Oklahoma), Assistant Professor, Department of Animal Science, 2015.
Ward, Peggy, Ph.D. (University of Arkansas), M.S. (Texas A\&M University), B.S.Ed. (Southern Arkansas University), Clinical Assistant Professor, Department of Curriculum and Instruction, 2010, 2016.
Ward, Ryane, J.D. (University of Arkansas), B.A. (University of Kansas), Instructor, William Dillard Department of Accounting, 2022.
Wardlow, George W., Ph.D. (The Ohio State University), M.Ed., B.S. (University of Missouri-Columbia), Professor, Department of Agricultural Education, Communications and Technology, 1992, 1998.
Ware, Morgan, Ph.D. (North Carolina State University), B.S. (Florida State University), Assistant Professor, Department of Electrical Engineering, 2005.
Warn, Seth A., Ph.D. (University of Arkansas), B.S. (Columbia College), Research Assistant Professor, Department of Geosciences, 2019.
Warren, Ron, Ph.D. (Indiana University), M.A. (Colorado State
University), B.A. (Michigan State University), Associate Professor, Department of Communication, 1997, 2003.
Warren, W. Dale, M.M. (University of Kentucky), B.S. (Austin Peay State University), Professor, Department of Music, 1991.
Washington, Tyrone A., Ph.D., B.S. (University of South Carolina at Columbia), Associate Professor, Department of Health, Human Performance and Recreation, 2011, 2018.
Watanabe, Susumu, D.M.A. (University of Nebraska-Lincoln), M.F.A.
(City University of New York), B.M. (Berklee College of Music), Lecturer, Department of Music, 2021.
Watkins, Kenton Bradley, Ph.D. (Oklahoma State University), M.S., B.A. (University of Arkansas), Professor, Department of Agricultural Economics and Agribusiness, 2002, 2014.
Way, Kelly Ann, Ph.D., M.S., B.S. (Oklahoma State University), Associate Professor, School of Human Environmental Sciences, 2006, 2012.

Weatherby, Danielle, J.D. (University of Florida), B.A. (Franklin and Marshall College), Associate Professor, School of Law, 2013, 2016.
Webb, Jennifer D., Ph.D. (Oklahoma State University), M.S., B.S.
(University of Tennessee), Associate Professor, Department of Interior Architecture and Design, 1999, 2005.
Wejinya, Uchechukwu C., Ph.D., M.S., B.S. (Michigan State University), Associate Professor, Department of Mechanical Engineering, Twenty-First Century Professor, 2008, 2014.

Welcher, Richard, M.S.C.E., B.S.C.E. (University of Arkansas), Instructor, Department of Civil Engineering, 2011.
Wells, Michael, M.S. (Florida State University), B.S. (East Stroudsburg University), Instructor, Operations Management Program, 2011.
Weng, Qin, Ph.D. (University of Pittsburg), M.S. (Virginia Commonwealth University), B.A. (Beijing Foreign Studies University), Assistant Professor, Department of Information Systems, 2018.
Westerman, Erica L., Ph.D. (Yale University), M.Sc. (University of New Hampshire), B.S. (Yale University), Assistant Professor, Department of Biological Sciences, 2016.
Whayne, Jeannie, Ph.D., M.A., B.A. (University of California-San Diego), University Professor, Department of History, 1990, 2015.
White, Calvin, Ph.D. (University of Mississippi), M.A., B.A. (University of Central Arkansas), Associate Professor, Department of History, 2007, 2013.

White, Jessica, , Visiting Assistant Professor, Department of Economics, 2021.

Whitehead, Isabel M., M.S. (University of Arkansas), B.S. (Sul Ross
State University), Instructor, Department of Agricultural Education, Communications and Technology, 2018.
Whitmire, Daniel, Ph.D. (University of Texas), M.S. (University of Texas at El Paso), B.S. (Midwestern State University), Instructor, Department of Mathematical Sciences, 2013.
Wickramasinghe, Ranil, Ph.D. (University of Minnesota-Twin Cities), M.S., B.S. (University of Melbourne, Australia), Distinguished Professor, Ralph E. Martin Department of Chemical Engineering, Ross E. Martin Chair in Emerging Technologies, 2011, 2021.
Wicks, Jan L., Ph.D., M.A. (Michigan State University), B.A. (University of Southwestern Louisiana), Professor, School of Journalism and Strategic Media, 1994, 2006.
Wicks, Robert Howard, Ph.D. (Michigan State University), M.A. (University of Missouri-Columbia), B.A. (American University), Professor, Department of Communication, 1994, 2006.
Wideman, Robert F., Ph.D. (University of Connecticut), B.A. (University of Delaware), Professor, Department of Poultry Science, 1993.
Wiebe, Zac, Ph.D., M.Acc. (University of Kansas), B.S. (University of Saskatchewan), Assistant Professor, William Dillard Department of Accounting, 2018.
Wilke, Stephen, J.D., M.P.A. (University of Memphis), Instructor, Operations Management Program, 1996.
Wilkerson, Weston, M.F.A. (University of Tennessee), B.A. (Texas A\&M University), Associate Professor, Department of Theatre, 2014.
Wilkins, Charles L., Ph.D. (University of Oregon), B.S. (Chapman
College), Distinguished Professor, Department of Chemistry and Biochemistry, 1998.
Williams, Angela, Ed.D. (University of Arkansas), M.Ed. (University of Arkansas), B.A. (University of Arkansas), Teaching Assistant Professor, Fulbright College of Arts and Sciences, 2021.
Williams, Brent Thomas, Ph.D. (University of Illinois, Urbana-
Champaign), M.S. (University of Texas Southwestern Medical School), B.A. (Austin College), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2002, 2008.
Williams, Brent D., Ph.D., M.S. (University of Arkansas), B.A. (Lyon College), Associate Professor, J.B. Hunt Transport Department of Supply Chain Management, Garrison Chair in Supply Chain Management, 2011. Williams, Charlotte Lewellen, Ph.D., M.S. (University of Arkansas for Medical Sciences), B.S. (Howard University), Professor, Clinton School of Public Service, 2007.
Williams, Colleen C., J.D. (Washington University in St. Louis), B.A. (Western Washington University), Associate Librarian, University Libraries, 2006, 2009.

Williams, Darron, Ph.D. (Northcentral University), M.S., M.B.A., B.S. (University of Memphis), Instructor, Operations Management Program, 2015.

Williams, Donnie F., Ph.D. (Georgia Southern University), Clinical Associate Professor, J.B. Hunt Transport Department of Supply Chain Management, 2019.
Williams, Patrick George, Ph.D., M.A. (Columbia University), B.A. (University of Texas at Austin), Professor, Department of History, 1998, 2015.

Williams, Rodney D., Ph.D., M.S., B.S.C.E. (University of Arkansas), Instructor, Department of Civil Engineering, 1998.
Williams, Stacy Goad, Ph.D., M.S.C.E., B.S.C.E. (University of Arkansas), Associate Professor, Department of Civil Engineering, 1997. Willson, John David, Ph.D. (University of Georgia), B.S. (Davidson College), Associate Professor, Department of Biological Sciences, 2012, 2018.

Wilmot, Michael, Ph.D. (University of Minnesota), M.S., B.A. (University of Nebraska), Assistant Professor, Department of Management, 2020. Wilson, Nichole, M.F.A. (Northwestern University), B.F.A. (Temple University), Assistant Professor, School of Art, 2020.
Wilson-Parrish, Nichelle La Von, M.F.A. (University of North Texas), B.F.A. (University of Arkansas), M.A. (University of North Texas), Instructor, School of Art, 2013.
Wissehr, Cathy, Ed.D. (University of Missouri-Columbia), M.N.S.Ed., B.S. (Southeast Missouri State University), Clinical Associate Professor, Department of Curriculum and Instruction, 2009, 2016.
Woehr, Summer Dawn, M.A. (University of Arkansas), B.S. (Campbell University), Lecturer, Department of Political Science, 2020.
Wolchok, Jeffrey Collins, Ph.D. (University of Utah), M.S., B.S.
(University of California at Davis), Associate Professor, Department of Biomedical Engineering, 2011, 2017.
Wolf, Martha, M.S.I.E. (University of Arkansas), B.S. (University of Arkansas), Instructor, Operations Management Program, 2022.
Wolf, Patrick J., Ph.D., M.A. (Harvard University), B.A. (University of Saint Thomas), Distinguished Professor, Department of Education Reform, Endowed Chair in School Choice, 2006.
Wolfe, Marc E., M.S.A. (Central Michigan University), B.S. (Harding University), Professor, Air Force ROTC, Lieutenant Colonel, 2016.
Wood, Clinton M., Ph.D. (University of Texas at Austin), M.S.C.E., B.S.C.E. (University of Arkansas), Associate Professor, Department of Civil Engineering, 2013, 2019.
Wood, Lisa S., Ph.D., M.S., B.S. (University of Arkansas), Clinical Associate Professor, Department of Crop, Soil and Environmental Sciences, 2012, 2019.
Woodland, Janet C., Ph.D., M.A. (State University of New York at Stony Brook), B.A. (King's College), Teaching Assistant Professor, Department of Mathematical Sciences, 1993.
Woodruff, Emily, M.S.W., B.S. (University of Illinois at UrbanaChampaign), Clinical Assistant Professor, School of Social Work, 2022.
Woods, Jordan Blair, Ph.D., M.Phil (University of Cambridge), J.D.
(University of California, Los Angeles), Assistant Professor, School of Law, 2016.
Woods, Randall B., Ph.D., M.A., B.A. (University of Texas at Austin), Distinguished Professor, Department of History, John A. Cooper Sr. Distinguished Professor of Diplomacy, 1971, 1995.
Worden, Steven K., Ph.D. (University of Texas at Austin), M.A., B.A. (Portland State University), Associate Professor, Department of Sociology and Criminology, 1986.
Worrell, Dan, Ph.D., M.S., B.S. (Louisiana State University), Professor, Department of Strategic, Entrepreneurship and Venture Innovation, Corporate Responsibility Professorship in Management, 2005.

Worthington, Margaret L., Ph.D. (North Carolina State University), M.S. (University of California-Davis), B.S. (Duke University), Assistant Professor, Department of Horticulture, 2016.
Wright, Nia, M.B.A. (Tulane University), B.S. (University of Arkansas), Instructor, Operations Management Program, 2009.
Wu, Jingxian, Ph.D. (University of Missouri-Columbia), M.S. (Tsinghua University), B.S. (Beijing University of Aeronautics and Astronautics), Associate Professor, Department of Electrical Engineering, 2008, 2013. Wu, Xintao, Ph.D. (George Mason University), M.E. (Chinese Academy of Space Technology), B.S. (University of Science and Technology of China), Professor, Department of Computer Science and Computer Engineering, Charles D. Morgan/Acxiom Graduate Research Chair, 2014, 2019.

X
Xiao, Min, Ph.D. (University of Texas at Austin), B.S. (Nanjing University), Distinguished Professor, Department of Physics, 1990, 2004.
Xinya, Liang, Ph.D. (Florida State University), B.S. (Zhejiang Gongshang University, China), Assistant Professor, 2014.
Xu, Jenny, M.A. (University of Texas at Austin), Clinical Associate Professor, Department of World Languages, Literatures and Cultures, 1992, 2009.

Y
Yandell, Kay, Ph.D., M.A. (Cornell University), B.A. (University of Arkansas), Associate Professor, Department of English, 2013, 2018.
Yang, Li, M.A. (Brandeis University and Beijing Language and Culture University), B.A. (Beijing Language and Culture University), Instructor, Department of World Languages, Literatures and Cultures, 2014.
Yang, Song, Ph.D., M.S. (University of Minnesota-Twin Cities), M.A. (Nankai University, China), B.A. (Branch College of Nankai, China), Professor, Department of Sociology and Criminology, 2002, 2016.
Yazwinski, Tom, Ph.D. (North Carolina State University), M.S. (University of Maine), B.S. (University of Vermont), University Professor, Department of Animal Science, 1977, 2004.
Yeager, Timothy J., Ph.D., M.A. (Washington University in St. Louis), Professor, Department of Finance, Arkansas Bankers Association Chair in Banking, 2006, 2016.
Yoon-Ramirez, Injeong, Ph.D. (University of Arizona), Assistant
Professor, School of Art, Endowed Chair in Art Education, 2017.
Young, Amber, Ph.D. (University of Oklahoma), M.B.A. (Oklahoma Christian University), B.S.Ed. (University of Oklahoma), Associate Professor, Department of Information Systems, 2018, 2023.
Young, Chase, M.F.A. (University of Arkansas), B.F.A. (Arizona State University, Tempe), Instructor, School of Art, 2022.
Young, Elizabeth Lee, J.D. (George Washington University), B.A. (Hendrix College), Associate Professor, School of Law, 2008, 2011.
Young, Heather D., Ph.D. (University of Arkansas), M.S. (University of Tennessee), B.S. (Arkansas Tech University), Associate Professor, Department of Curriculum and Instruction, 2007, 2019.
Young, Rana N., M.F.A. (University of Nebraska), Visiting Assistant Professor, School of Art, 2019.
Young, Wes, M.P.A. (University of Arkansas), B.S. (University of Phoenix), A.S. (Ashworth University), Lecturer, Department of Political Science, 2022.
Youngblood, Joshua Cobbs, M.A. (Florida State University), B.A. (University of Louisiana at Monroe), Assistant Librarian, University Libraries, 2011.
Yu, Fisher, Ph.D. (Arizona State University), M.S., B.S. (Peking University), Associate Professor, Department of Electrical Engineering, 2008, 2014.

\section*{Z}

Zabelina, Darya, Ph.D. (Northwestern University), Assistant Professor, Department of Psychological Science, 2017.
Zajicek, Anna, Ph.D. (Virginia Polytechnic Institute and State University), M.S., B.S. (University of Silesia, Poland), Professor, Department of Sociology and Criminology, 1994, 2006.
Zamarro Rodriguez, Gema, Ph.D., M.S. (Centro de Estudios Monetarios y Financieros, Spain), B.A. (Universidad Carlos III de Madrid, Spain), Professor, Department of Education Reform, Endowed Chair in Teacher Quality, 2014, 2019.
Zamboanga, Byron L., Ph.D., M.A. (University of Nebraska), B.A. (University of California, Berkeley), Professor, Department of Psychological Science, 2020.
Zayas, Fernanda, M.S.N. (Lenoir-Rhyne University), Clinical Instructor, Eleanor Mann School of Nursing, 2018.
Zeng, Ka, Ph.D. (University of Virginia), M.A. (Virginia Polytech Institute and State University), B.A. (Foreign Affairs College, Beijing), Distinguished Professor, Department of Political Science, 2000, 2022. Zhang, Jihong, Ph.D. (University of lowa), M.S. (University of Kansas), B.A. (Soochow University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2023. Zhang, Lu, Ph.D. (Nanyang Technological University, Singapore), Assistant Professor, Department of Computer Science and Computer Engineering, 2018.
Zhang, Meredith, Ph.D., M.A. (The Ohio State University), B.A. (Susquehanna University), Assistant Professor, Department of Sociology and Criminology, 2022.
Zhang, Qingyang, Ph.D. (Northwestern University), M.S. (Loyola University-Chicago), B.S. (Beijing Normal University), Associate Professor, Department of Mathematical Sciences, 2015, 2021.
Zhang, Shengfan, Ph.D., M.I.E. (North Carolina State University), B.M. (Fudan University, Shanghai), Associate Professor, Department of Industrial Engineering, John L. Imhoff Chair in Industrial Engineering, 2011, 2020.
Zhang, Wen, Ph.D. (Purdue University), M.S. (University of Kansas), B.S. (Tongji University, China), Associate Professor, Department of Civil Engineering, 2011, 2018.
Zhang, Xinde, Ph.D. (University of North Carolina-Charlotte), M.S. (Youngstown State University), B.S. (Jilin University, China), Visiting Assistant Professor, Department of Finance, 2020.
Zhang, Ying, Ph.D. (University of Hong Kong), M.S. (Peking University), B.S. (Jilin University), Assistant Professor, Department of Management, 2021.

Zhao, Jiangchao, Ph.D. (University of Wisconsin-Madison), M.S., B.S. (China Agricultural University), Associate Professor, Department of Animal Science, 2015, 2019.
Zhao, Yue, Ph.D. (University of Nebraska-Lincoln), B.S. (Beijing University), Assistant Professor, Department of Electrical Engineering, 2015.

Zheng, Nan, Ph.D. (University of Michigan-Ann Arbor), M.S. (University of Rochester), B.S. (University of Science and Technology of China), Professor, Department of Chemistry and Biochemistry, 2008, 2021.
Zhou, Wenchao, Ph.D. (Georgia Institute of Technology), M.S.M.E. (Xi'an Jiaotong University, Xi'an, China), B.S.M.E. (Huazhong University of Science and Technology, Wuhan, China), Associate Professor, Department of Mechanical Engineering, 2014, 2020.
Zhu, Jun, Ph.D. (University of Illinois at Urbana-Champaign), M.S., B.S. (Zhejiang University, Hangzhou, China), Professor, Department of Biological and Agricultural Engineering, 2013.
Zhuang, Xuan, Ph.D. (University of Illinois Urbana-Champaign), Assistant Professor, Department of Biological Sciences, 2021.

Zies, Brenda June, Ph.D., M.A. (University of Arkansas), B.S. (East Texas State University), Teaching Assistant Professor, Department of Psychological Science, 2005.
Zollinger, Richard, M.B.A., B.S. (Brigham Young University), Instructor, Operations Management Program, 2016.
Zou, Min, Ph.D., M.S.M.E. (Georgia Institute of Technology), M.S.A.E., B.S.A.E. (Northwestern Polytechnical University), Professor, Department of Mechanical Engineering, Twenty-First Century Chair in Materials, Manufacturing and Integrated Systems, 2003, 2013.
Zou, Tim Jiping, Ph.D., M.S. (University of Illinois-Urbana-Champaign), B.A. (Shandong University), Librarian, University Libraries, 2004, 2010.

Zweig, Mark, M.B.A., B.S. (Southern Illinois University at Carbondale), Executive in Residence, Department of Strategic, Entrepreneurship and Venture Innovation, 2005.

\section*{Courses of Instruction}

Courses listed in this section describe all courses approved for offering by the University of Arkansas. The courses are listed alphabetically by subject with the subject code in parenthesis following. The word "course" refers to a unit of academic instruction, while the word "class" refers to a course that has been scheduled during a semester or summer session with a certain number of prescribed meetings each week. Many courses are offered as classes every semester while many others are offered less frequently. Successful completion of a class usually earns a specified number of semester hours of credit toward a degree.

To see a Schedule of Classes, which lists classes available in a specific semester, along with the instructor of record, time and place the class is being held, go to UAConnect (https://uaconnect.uark.edu/).

\section*{How to Read a Course Description}

Courses listed in this section describe all courses approved for offering by the University of Arkansas. The word "course" refers to a unit of academic instruction, while the word "class" refers to a course scheduled during a semester or summer session with a certain number of prescribed meetings each week. Successful completion of a class usually earns a specified number of semester hours of credit toward a degree.

The Schedule of Classes lists classes available in a specific semester, along with the instructor of record, time and place the class is being held.

\section*{Course Description Explanations}

A course listing comprises the following elements, in order:
Course Prefix: This alpha descriptor is the first identifying part of a course. This four-letter code represents the course prefix name. Usually the course prefix will be the same as the department offering the course, but occasionally the prefix is one of many different courses offered in a single department. For example, ARAB refers to Arabic courses, which are offered through the Department of World Languages, Literatures and Cultures; HIST refers to History courses.

Course Number: Each course is designated by a four-digit number. The first digit identifies the level of the course: 1, freshman level; 2 , sophomore level; 3 and 4, junior-senior level; 5, 6, and 7, graduate level. Any exceptions to this practice are stated in the course descriptions.

Students desiring admission to courses offered at levels beyond their standing should request the instructor's permission to enroll. (For definitions of academic level see Student Classification (p. 51).)

The second and third digits of the number identify the course within the department that offers it.

The fourth digit identifies the semester-hour value of the course. Credit for certain courses does not count toward some degrees.

Normally, courses meet once each week for 50 minutes for each hour of course credit. Laboratory, drill and other kinds of activity courses typically meet for two 50-minute periods per week for each hour of credit.

The letter ' \(V\) ' is used in place of the last digit for those courses in which credit is variable. The minimum and maximum credit hours possible are given in parentheses after the course title.

The letter ' \(X\) ' is used in place of the last digit for those courses in which fixed credit is ten or more hours.

The first three digits of the number are the same for corequisite courses (for example, a lecture and the corequisite lab or drill).

Course Suffix: A suffix to the course number further identifies the specific type of instruction:
- C - Drill or Lab Component
- L - Laboratory
- H - Honors Course
- M - Honors Laboratory

A course with no suffix is a typical lecture course (not an honors course).
Course Title: The title of the course is printed in bold letters.
Course Semester Offering: Course descriptions include a notation of the semester in which the course is typically offered. Consult the Schedule of Classes to verify that a course is being offered for a given term.

Course Description: A brief description of the course content and its major emphasis are stated. If the course is cross-listed (also offered under another subject) a statement to that effect will be included in the description. Likewise, if the course is equivalent to another course (such as an honors and non-honors offering) a statement to that effect will also be included. If the course is eligible to be repeated for degree credit more than once, a statement will appear to indicate the total hours or times a course may be repeated. If no repeat statement is listed, the course may be used for degree credit only once.

Requisites: Requisites are requirements that must be fulfilled either before a course may be taken or at the same time a course is taken. It is the student's responsibility to make sure the proper prerequisites have been completed before enrolling in any class. Prerequisites are courses or requirements that must be completed prior to enrolling in a certain course. Courses may have prerequisites from inside and outside the department. It is the student's responsibility to make sure he/she has completed the proper prerequisites before enrolling in any class. Courses listed as corequisite are to be taken in the same semester as the course desired.

A course listed as a pre- or corequisite to another course means that it must be taken during the same semester as that course, unless it has been completed in a previous term.

Students may not enroll in courses for which they do not have the necessary requisites. Students who are in doubt concerning their eligibility to enroll in specific courses should consult with their academic adviser.

Students may be dropped from courses for which they do not have the necessary requisites.

\section*{Accounting (ACCT)}

\section*{Courses}

\section*{ACCT 2013. Accounting Principles. 3 Hours.}

Introduction of accounting as an information system with emphasis on processing and presenting information in the form of financial statements for use in decision making. The course emphasizes business processes and double entry accounting. Prerequisite: (Non-business majors: (ISYS 1123 with a grade of \(C\) or better) or DASC 1003 or ASTM 2903) and MATH 2043 or higher with a grade of \(C\) or better), or (Business majors: (ISYS 1123 with a grade of C or better)), BUSI 1111 with a grade of C or better, and (MATH 2053 or MATH 2554 each with a grade of C or better)). (Typically offered: Fall, Spring and Summer)

\section*{ACCT 2013H. Honors Accounting Principles. 3 Hours.}

Introduction of accounting as an information system with emphasis on processing and presenting information in the form of financial statements for use in decision making. The course emphasizes business processes and double entry accounting. This course is equivalent to ACCT 2013. Prerequisite: (Non-business majors: Honors Standing, (ISYS 1123 with a grade of C or better)), and MATH 2043 or higher with a grade of C or better) or (Business majors: Honors standing, (ISYS 1123 with a grade of C or better)), BUSI 1111 with a grade of \(C\) or better, and (MATH 2053 or MATH 2554 with a grade of C or better)). (Typically offered: Spring) This course is equivalent to ACCT 2013.

\section*{ACCT 2023. Accounting Principles II. 3 Hours.}

In this course we study managerial accounting concepts and their use in business decisions. We will examine the development and analysis of cost information for management use in decision-making, income determination, and performance evaluation. Prerequisite: ACCT 2013 with a grade of \(C\) or better. (Typically offered: Fall, Spring and Summer)

\section*{ACCT 2023H. Honors Accounting Principles II. 3 Hours.}

In this course we study managerial accounting concepts and their use in business decisions. We will examine the development and analysis of cost information for management use in decision-making, income determination, and performance evaluation. Prerequisite: ACCT 2013 with a grade of \(C\) or better and honors standing. (Typically offered: Fall, Spring and Summer)
This course is equivalent to ACCT 2023.
ACCT 2403. Accounting Fundamentals for Planning and Control. 3 Hours. Use of accounting information for planning and control, including interpretation of financial statements and fundamentals of managerial accounting. Topics include financial statement structures and analysis, profitability and cash flow analysis, cost behaviors, production cost analysis, budgeting, standard costs and performance reporting, sources and uses of corporate capital, and other related topics. Walton College majors are not eligible to register for the course. No degree credit for Walton College majors. (Typically offered: Fall and Spring)

\section*{ACCT 310V. Accounting Internship. 1-3 Hour.}

This class is designed to give students an internship opportunity to combine their formal academic preparation with an exposure to the accounting profession.
Prerequisite: Department consent and ACCT 3723 with a grade of \(C\) or better.
(Typically offered: Spring) May be repeated for up to 3 hours of degree credit.

\section*{ACCT 310VH. Honors Accounting Internship. 1-3 Hour.}

This class is designed to give students an internship opportunity to combine their formal academic preparation with an exposure to the accounting profession. Prerequisite: Honors standing, Department consent and ACCT 3723 with a grade of C or better. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.
This course is equivalent to ACCT 310 V .
ACCT 3533. Accounting Technology. 3 Hours.
This course provides an overview of accounting information systems and illustrates the importance of technology to accountants. Students are exposed to a variety of information technologies including manual, file-oriented, and database systems. The relative advantages and disadvantages of each type of system are highlighted and discussed. Prerequisite: ACCT 2013 with a grade of B or better. (Typically offered: Fall and Spring)

\section*{ACCT 3543. Accounting Analytics. 3 Hours.}

This course provides students with an overview of the data analytics process in accounting: asking appropriate accounting questions, finding and mastering appropriate accounting data to address those questions, performing test analysis and communicating the results of the data through data visualizations. Extensive hands-on, experiential learning using short Excel and Tableau labs is a key part of the course. Basic knowledge of excel is recommended. Prerequisite: (Non-business majors: (ACCT 2013 with a grade of \(B\) or better) and (INEG 2314 or STAT 3013 with a grade of \(C\) or better)) or (Business majors: (ACCT 2013 with a grade of \(B\) or better) and (BUSI 1033 with a grade of C or better)). (Typically offered: Fall and Spring)

\section*{ACCT 3723. Intermediate Accounting I. 3 Hours.}

This course is designed to study the theoretical basis for financial accounting concepts and principles related to financial reporting. This course emphasizes researching technical accounting pronouncements for application to external financial reporting issues. Prerequisite: ACCT 2013 with a grade of B or better. (Typically offered: Fall and Spring)

\section*{ACCT 3753. Intermediate Accounting II. 3 Hours.}

This is the second financial accounting course designed to continue study of financial accounting concepts and principles. This course emphasizes research of technical accounting pronouncements for application to external financial reporting issues. Prerequisite: ACCT 3723 with a grade of \(C\) or better. (Typically offered: Fall and Spring)

\section*{ACCT 3843. Fundamentals of Taxation I. 3 Hours.}

Introduction to federal income taxation with a focus on individuals, including basic tax concepts, income tax principles applicable to individual taxpayers, primary tax law authorities, tax research techniques, and tax planning strategies. Prerequisite: ACCT 2013 with a grade of B or better. (Typically offered: Fall and Spring)

ACCT 4003H. Honors Accounting Colloquium. 3 Hours.
Explores events, concepts and/or new developments in the field of accounting. Prerequisite: Honors standing, Senior standing and ACCT 3723 with a grade of \(C\) or better. (Typically offered: Fall)

ACCT 410V. Special Topics in Accounting. 1-3 Hour.
Explore current events, concepts and new developments relevant to Accounting not available in other courses. Prerequisite: Department consent. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{ACCT 4123H. Professional Ethics and Corporate Governance. 3 Hours.}

An examination of various aspects of accounting and business ethics including ethical theories; ethical reasoning; ethical values - including integrity, objectivity, auditor independence, and other values relevant for accountants; and ethics codes. The course provides students with a framework of ethical reasoning, professional values and attitudes for exercising professional skepticism and other behavior that is in the best interest of the public and accounting profession. Aspects of corporate governance related to establishing an ethical corporate culture will also be addressed. Prerequisite: Senior standing, Honors standing, and ACCT 3723 with a grade of C or better. (Typically offered: Spring)

\section*{ACCT 4203. Fundamentals of Taxation II. 3 Hours.}

Study of federal income taxation with a focus on entities other than individuals (C corporations, S corporations, partnerships, estates, and trusts) as well as an introduction to federal transfer taxes, state and local taxes, and multinational tax issues, including applicable tax principles and continued development of tax research techniques, and tax planning strategies. Prerequisite: ACCT 3723 and ACCT 3843 each with a grade of \(C\) or better. (Typically offered: Fall and Spring)

\section*{ACCT 4673. Product, Project and Service Costing. 3 Hours.}

Cost systems with emphasis on information generation for cost management of products, projects and services. The course includes spreadsheet and other computer program analysis. Prerequisite: ACCT 2023 and ACCT 3723 each with grades of \(C\) or better. (Typically offered: Fall)

\section*{ACCT 4703. Governmental/Nonprofit Accounting. 3 Hours.}

Governmental and non-profit accounting, financial statement and internal controls compliance, and auditing for government and other non-profit organizations. Industry specific issues in accounting for health care organizations and colleges and universities; and federal governmental accounting. Prerequisite: ACCT 2013 and ACCT 2023 each with a grade of \(C\) or better. (Typically offered: Irregular)
ACCT 4963. Audit and Assurance Services. 3 Hours.
Professional standards and procedures as applied to external and internal assurance engagements. Including coverage of the economic role of assurance providers, engagement planning, risk assessment, evidence gathering, and reporting. Prerequisite: ACCT 3723 with a grade of C or better. (Typically offered: Fall and Spring)

ACCT 510V. Special Topics in Accounting. 1-3 Hour.
Explore current events, concepts and new developments relevant to Accounting not available in other courses. Graduate degree credit will not be given for both ACCT 410V and ACCT 510V. Prerequisite: ACCT 3723 with a grade of \(C\) or better. (Typically offered: Irregular) May be repeated for degree credit.

\section*{ACCT 5123. Corporate Governance and Professionalism. 3 Hours.}

Aspects of corporate governance related to establishing an ethical corporate culture are addressed. The course examines various aspects of accounting and business ethics including frameworks for ethical reasoning; professional values - including integrity, objectivity, accounting independence, and professional skepticism; and other core values relevant for accountants. Accounting professional ethics codes and rules are also addressed. Corporate governance structures are examined. Prerequisite: Graduate standing in the Masters of Accountancy or Professional Accounting program. (Typically offered: Irregular)

\section*{ACCT 5223. MBA Accounting Analysis. 3 Hours.}

Highlights the role played by accounting information in managing supply chains and retail operations. Provides tools for managing cost flows, including activity-based costing, retail accounting, and operational budgeting. Focuses on improving decision making processes, and linking the impact of retail/supply chain decisions to financial statements and shareholder value. (Typically offered: Fall and Spring)

ACCT 5263. Financial Statement Analysis for Executives. 3 Hours.
This course provides a framework for understanding the intersection between business strategy, accounting, economics, and finance. Using historical financial statements as the primary information input, you will employ tools that enable you to better understand the drivers of current performance and risk, forecast future performance, and construct a value estimate. These tools can be applied in a number of contexts including equity valuation, project selection, and managerial evaluation. Not eligible for MAcc program students. Prerequisite: MBA Director consent. (Typically offered: Summer)

\section*{ACCT 535V. Professional Accounting Internship. 1-3 Hour.}

This course allows a student to experience an internship within a business and benefit from the applied experience. The internship may be designed to offer a wide range of professional accounting experiences in Industry or Public Accounting. The internship must be supervised by a faculty member as well as a member of the firm. MACC Director approval required. Prerequisite: MAcc Director consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{ACCT 5413. Advanced Financial Accounting. 3 Hours.}

Integrated course which examines the financial reporting, tax, managerial, systems and auditing aspects of major corporate restructurings arising from events such as mergers, acquisitions, spinoffs, reorganizations and downsizing. Prerequisite: ACCT 3753 or equivalent with a grade of \(C\) or better or MAcc Director consent. (Typically offered: Spring)

\section*{ACCT 5433. Fraud Prevention and Detection. 3 Hours.}

An examination of various aspects of fraud prevention and detection, including the sociology of fraud, elements of fraud, types of fraud involving accounting information, costs of fraud, use of controls to prevent fraud, and methods of fraud detection. (Typically offered: Irregular)

\section*{ACCT 5443. Asset Management. 3 Hours.}

Managing assets to achieve corporate strategy. Included are issues such as strategy formulation, acquisition processes, internal controls, system requirements, accounting measurements, inventory models, re-engineering, capital budgeting, tax issues, and discussion of current business events that have ethical implications. (Typically offered: Irregular)

\section*{ACCT 5463. Financial Statement Analysis. 3 Hours.}

This course provides a framework for understanding the current economic position and future prospects of firms using corporate financial statements. Specifically, the student will study financial statements and their related footnotes in order to understand the drivers of current performance and risk, forecast future performance, and estimate the intrinsic value implied by those forecasts. These tools can be applied in a number of contexts including equity valuation, project selection, managerial evaluation, and corporate financial statement audits. Prerequisite: ACCT 3723 or equivalent with a grade of C or better. (Typically offered: Irregular)

\section*{ACCT 5483. Financial Accounting Research and Theory. 3 Hours.}

This course explores our contemporary understanding of financial reporting incentives and outcomes. The course draws upon existing research on the determinants and consequences of financial reporting and examines the roles of various constituents including investors, lenders, financial analysts, managers, regulators, and auditors within the financial reporting environment. Prerequisite: Graduate standing and MAcc Director consent. (Typically offered: Irregular)

\section*{ACCT 549V. Special Topics in Accounting. 1-3 Hour.}

Seminar in current topics not covered in other courses. Students may enroll in one or more units. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

ACCT 5523. Advanced Accounting Information Systems. 3 Hours.
This course describes accounting systems in technologically advanced environments. Controls and other technical design considerations are described for the input, processing, storage, and reporting of accounting information. Special topics, such as expert systems and artificial intelligence applications in financial accounting, auditing, and tax also receive considerable attention. Prerequisite: MAcc Director consent. (Typically offered: Irregular)
ACCT 5673. Product, Project and Service Costing. 3 Hours.
Cost systems with emphasis on information generation for cost management of products, projects and services. The course includes spreadsheet and other computer program analysis. Graduate degree credit will not be given for both ACCT 4673 and ACCT 5673. Prerequisite: ACCT 2023 and ACCT 3723 each with grades of \(C\) or better. (Typically offered: Fall)

\section*{ACCT 5703. Governmental/Nonprofit Accounting. 3 Hours.}

The course will critically examine current issues in governmental and non-profit accounting, financial statement compliance and control for governmental and nonprofit entities, and auditing for government and other non-profit organizations. Topics will include examination of state and local government accounting and reporting; sources and applications of taxes and program resources; not-for-profit organization accounting including taxation, regulatory, performance, and compliance issues; industry specific issues in accounting for health care organizations and colleges and universities; and federal governmental accounting. The course will also examine the application processes and compliance procedures for not-for-profit organizations and grants, and will provide a brief introduction to urban planning and economics. Prerequisite: MAcc Director consent. (Typically offered: Irregular)
ACCT 5853. State and Local Taxation. 3 Hours.
This course provides an overview of the basic principles of state and local taxation and the federal constitutional limits for state and local taxing authorities. Emphasis will be on the impact on individuals and multistate entities of income tax, sales tax, property taxes and hybrid tax systems. Prerequisite: ACCT 4203 or graduate standing. (Typically offered: Spring)

\section*{ACCT 5863. Taxation of Flow-Through Entities. 3 Hours.}

In-depth coverage of the federal tax treatment of pass-through entities and their owners, including Partnerships, LLCs, and S Corporations. Prerequisite: Graduate Standing and MACC Director Consent, including completion of ACCT 4203. (Typically offered: Spring)

\section*{ACCT 5873. Advanced Taxation. 3 Hours.}

In-depth coverage of the tax treatment of corporations including advanced tax issues. Introduction to tax research including the organization and authority of tax law; accessing and using the tax law; and, applying tax law to taxpayer scenarios. Prerequisite: ACCT 4203 or equivalent with a grade of \(C\) or better. (Typically offered: Fall)

\section*{ACCT 5883. Tax Planning. 3 Hours.}

In-depth coverage of the tax treatment of passthrough business entities including advanced tax issues. Overview of the income tax treatment of estates and trusts. Overview of the essentials of estate and gift taxation. Prerequisite: ACCT 3843 or equivalent with a grade of \(C\) or better. (Typically offered: Spring)

ACCT 5893. Multi-jurisdictional Tax Issues. 3 Hours.
This course provides an in-depth examination of multi-jurisdictional tax issues including U.S. federal income taxation of inbound and outbound transactions, state and local taxation, and multi-jurisdictional tax policy issues. Pre- or Corequisite: ACCT 5873. (Typically offered: Spring)

\section*{ACCT 5953. Auditing Standards. 3 Hours.}

Professional aspects of financial statement auditing and registered auditors. Including ethics and legal responsibilities; internal control testing; critical evaluation of evidence; application of sampling; and reporting problems. Prerequisite: ACCT 4963 or equivalent with a grade of \(C\) or better. (Typically offered: Fall)

ACCT 5963. Audit and Assurance Services. 3 Hours.
Professional standards and procedures as applied to external and internal assurance engagements. Including coverage of the economic role of assurance providers, engagement planning, risk assessment, evidence gathering, and reporting. Graduate degree credit will not be given for both ACCT 4963 and ACCT 5963. Prerequisite: ACCT 3723 with a grade of \(C\) or better. (Typically offered: Fall and Spring)

\section*{ACCT 6013. Graduate Colloquium. 3 Hours.}

Presentation and critique of research papers and proposals. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{ACCT 6033. Accounting Research Seminar I. 3 Hours.}

First course in the accounting research seminar sequence which explores and evaluates current accounting literature. Course content reflects recent developments in the literature and specific interests of participants. Examples of potential topics include research methods in accounting, managerial accounting and behavioral accounting. (Typically offered: Irregular)

\section*{ACCT 6133. Accounting Research Seminar II. 3 Hours.}

Second course in the accounting research seminar sequence which explores and evaluates current accounting literature. Course content reflects recent developments in the literature and specific interests of participants. Examples of potential topics include research methods in accounting, financial accounting, managerial accounting, behavioral accounting, tax, audit, international accounting, and education. Prerequisite: ACCT 6033. (Typically offered: Irregular)

\section*{ACCT 6233. Accounting Research Seminar III. 3 Hours.}

Third course in the accounting research seminar sequence which explores and evaluates current accounting literature. Course content reflects recent developments in the literature and specific interests of participants. Examples of potential topics include research methods in accounting, financial accounting, managerial accounting, behavioral accounting, tax, audit, international accounting, and education. Prerequisite: ACCT 6033. (Typically offered: Irregular)
ACCT 636V. Special Problems in Accounting. 1-6 Hour.
Special research project under supervision of a graduate faculty member. (Typically offered: Fall and Spring)
ACCT 6633. Accounting Research Seminar V. 3 Hours.
Fifth course in the accounting research seminar sequence which explores and evaluates current accounting literature. Course content reflects recent developments in the literature and specific interests of participants. Examples of potential topics include research methods in accounting, financial accounting, managerial accounting, behavioral accounting, tax, audit, international accounting, and education. Prerequisite: ACCT 6033. (Typically offered: Irregular)
ACCT 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral dissertation. Prerequisite: Candidacy. (Typically offered: Fall and Spring) May be repeated for degree credit.

\section*{Adult and Lifelong Learning (ADLL)}

\section*{Courses}

ADLL 5103. Diversity and Inclusion in Adult and Lifelong Learning. 3 Hours. Broadly explores how diverse populations and contexts influence the facilitation of adult learning. Focuses on the responsibilities of the practitioner to model and foster inclusive practices to enhance educational programs and initiatives across a variety of environments. (Typically offered: Summer)

\section*{ADLL 5113. Perspectives in Adult Education. 3 Hours.}

Historical overview of the evolving field of adult education and lifelong learning in responsibilities of adult education providers and reviews the expansion of adult and lifelong learning opportunities associated with societal and demographic shifts. (Typically offered: Fall and Spring)

\section*{ADLL 5123. Principles and Practices of Adult Learning. 3 Hours.}

Overview of the adult learner including characteristics, motivation for participating in learning, and strategies for developing educational programs for diverse adult populations. (Typically offered: Fall and Summer)

\section*{ADLL 5133. Curriculum Development in ABE and ASE. 3 Hours.}

Curriculum development in Adult Basic Education (ABE) and Adult Secondary Education (ASE) settings including the various educational functioning levels, measures to asses student levels, selection of teaching materials, and development of curriculum utilizing instructional standards for ABE and ASE programs. (Typically offered: Fall)

ADLL 5143. Instructional Strategies and Assessment in Adult Education. 3 Hours.
Selection and utilization of materials and instructional methods for use in adult learning settings. Evaluative strategies to develop or select appropriate tools and techniques predicated upon the needs and goals of adult learners. (Typically offered: Spring)
ADLL 5153. Organization and Administration of Adult and Lifelong Learning Programs. 3 Hours.
Legal, ethical, staffing, and financial considerations for the development and implementation of programs for adult and lifelong learners in various programs including literacy centers, GED centers, community education, lifelong/leisure learning, and postsecondary education. (Typically offered: Spring)

ADLL 5163. Managing Change in Adult and Lifelong Learning. 3 Hours. Strategies for planning, organizing, and facilitating change in programs that serve adult learners from diverse populations, across varied developmental stages and geographic locations. Discussion of social change that has impacted adult education and analysis of change models relevant to individuals, groups and organizations. (Typically offered: Fall and Summer)

\section*{ADLL 5173. Program Planning. 3 Hours.}

Program development process for adult and lifelong learners. Overview of assessment, developing program objectives, identifying resources, and designing program plans. (Typically offered: Summer)

ADLL 5183. Technology and Innovation in Adult Learning. 3 Hours. Techniques for designing, developing, implementing, and assessing technologymediated adult and lifelong learning programs. Discussion of issues relevant to the use of innovative strategies for delivering instruction via emerging technologies and their potential impact on content and learning outcomes. (Typically offered: Summer)

\section*{ADLL 5193. Seminar in Adult and Lifelong Learning. 3 Hours.}

Seminars focused on topics related to adult and lifelong learning. (Typically offered: Spring and Summer)

\section*{ADLL 5213. Adult and Lifelong Learning Internship. 3 Hours. \\ Internship in adult and lifelong learning settings. (Typically offered: Fall and Spring)}

ADLL 5223. Adult and Lifelong Learning Applied Project. 3 Hours.
Development and Implementation of a project focused on adult and lifelong learning. Consent of advisor/instructor required. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

ADLL 6113. Advanced Adult Learning Theory. 3 Hours.
Advanced study of theories and models of adult and lifelong learning with an emphasis on current trends, recent research, and issues affecting the field. Issues covered will include critical theory and advancements in neuroscience and cognition as they relate to adult learning and lifespan development. (Typically offered: Irregular)

ADLL 6123. Leadership and Ethics in Adult and Lifelong Learning. 3 Hours. This doctoral course focuses on leadership principles and ethical considerations that are critical to developing and sustaining adult education programs that benefit individuals, organizations, and communities. Course content will include case study analysis and lectures from scholar-practitioners from the field. (Typically offered: Irregular)

ADLL 6133. Analysis of International Adult and Lifelong Programs. 3 Hours. Survey of the historical and philosophical events which have shaped adult and lifelong learning worldwide. Discussion of issues affecting adult education and lifelong learning including globalization, educational access, and variance in national policies. (Typically offered: Irregular)

\section*{ADLL 6143. Instructional Adaptation and Innovation in Adult and Lifelong} Learning. 3 Hours.
An overview of teaching and learning methods, styles, and techniques which are applicable when facilitating adult learners across diverse settings. Content to include teaching and learning style assessment, accommodating learning styles, physical and learning disabilities, language differences and cultural norms. (Typically offered: Irregular)

\section*{ADLL 6153. Policy and Public Governance of Adult and Lifelong Learning} Programs. 3 Hours.
Policy analysis and public governance issues in adult and lifelong learning with emphasis on state and federal programs. Discussions of how to evaluate, design, and implement policy focused on promoting adult and lifelong learning activities in a myriad of organizations. Overview of trends and current issues related to policy and public governance of adult and lifelong learning. (Typically offered: Irregular)

\section*{ADLL 6173. Current Issues. 3 Hours.}

Exploration and discussion of current issues relative to adult education and lifelong learning. Focus on the review and application of current research as it relates to practice. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
ADLL 6183. Organization Development, Learning, and Change. 3 Hours. Using a system perspective, this course examines the theories and practices associated with organization development, learning and change to understand the dynamic nature of organizational life. This course examines the structural frame, the human resource frame, the political frame, and the symbolic frame that influences organizational behavior and learning. The course investigates strategies and best practices for managing and leveraging this dynamism to build organizational capacity and improve performance. (Typically offered: Fall and Spring)

\section*{ADLL 6213. Signature Pedagogy: Teaching and Learning in Community Colleges. 3 Hours.}

Using a learning-centered change model, this course examines how community colleges can shift from a traditional teaching-centered paradigm to one that is learning-centered. This course examines the context of the learning college, strategic planning for a learning-outcomes approach to governance, the role of student development and technology in the learning college, and implementing and assessing learning-centered strategies. (Typically offered: Irregular)

ADLL 6223. Workforce and Community Development. 3 Hours.
This course provides an overview of how community colleges influence workforce, economic, and community development through their education missions. The course will examine the community college's expanding role in economic and community development through workforce development programs. Emphasis will be placed on program structure, best practices in program development, and partnerships and collaboration with various stakeholders. (Typically offered: Irregular)

ADLL 6233. Survey and Significance of the American Community College. 3 Hours.
A comprehensive overview of the American community college, its history, its everevolving purpose and the challenges it faces. Course content will focus on the administrators and faculty who lead, the students they serve, and components such as developmental education, integrative education and transfer education. Discussion will include occupational and community education and issues related to accountability. Special attention will be paid to how this unique and complex institution remains relevant and significant to the community. (Typically offered: Irregular)

\section*{ADLL 6243. Current Trends in Community Colleges. 3 Hours.}

This course examines environmental factors that influence the organization and administration of community colleges. Trends related to funding, policy, staffing, and workforce development are examined and contextualized to the evolving community college mission. (Typically offered: Irregular)
ADLL 6253. Professional Development in Adult and Lifelong Learning. 3 Hours.
This course examines career planning and development, performance management, and professional development in various settings. The focus of the course will be on concepts associated with Human Resource Development (HRD) and developing employees within an organization, as well as leading adults in transition in the community and in educational settings through the process of making career decisions. (Typically offered: Irregular)

ADLL 6313. Independent Study. 3 Hours.
Independent study of topics in adult and lifelong learning. (Typically offered: Irregular)

ADLL 6403. Quantitative Reasoning I for Adult Educators. 3 Hours.
Introduction to quantitative reasoning for educators and researchers in adult education. Topics include applying the hypothetico-deductive research process, describing data using statistical terminology, building statistical models, presenting data meaningfully, and using SPSS to analyze data from practical research problems. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. (Typically offered: Fall and Spring)
ADLL 6413. Quantitative Reasoning II in Adult and Lifelong Learning. 3 Hours. Methodologies for designing descriptive, correlational, and experimental studies. Development of research questions, definition of variables, selection or development of instruments, data collection, analysis, interpretation and reporting of research results. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. Prerequisite: ADLL 6403 or ESRM 6403 or equivalent. (Typically offered: Fall)
ADLL 6423. Qualitative Reasoning in Adult and Lifelong Learning. 3 Hours. Methodologies for designing qualitative research studies in adult and lifelong learning settings. Selection of the appropriate qualitative tradition, selection of research subjects, development of data collection protocols, field work strategies, data analysis, data interpretation and presentation of data results. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. (Typically offered: Spring)

\section*{ADLL 6433. Program Evaluation. 3 Hours.}

Overview of evaluation strategies in adult and lifelong learning programs that include: development of evaluation questions, selection or development of instrumentation, data collection methods, data analysis, and reporting of evaluation results. Emphasis on practical and ethical issues associated with evaluation processes. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. (Typically offered: Spring)

ADLL 6443. Adult and Lifelong Learning Dissertation Seminar. 3 Hours. Development of dissertation proposal. Formation of research question, selection of methodologies, development of problem statement, research questions, and identification of research variables, constructs of phenomena. Identification of data collection and data analysis procedures. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. Prerequisite: ADLL 6403 or ESRM 6403 or ADLL 6413 or ADLL 6423 or ADLL 6433, or equivalent. (Typically offered: Spring)
ADLL 6463. Advanced Qualitative Reasoning in Adult and Lifelong Learning. 3 Hours.
This qualitative methods course provides students with advanced instruction in qualitative data collection, field observations, records research, data analysis, and data display. In addition to reviewing various research studies that demonstrate different qualitative research approaches, students will practice some of the activities associated with executing a qualitative research study. Prerequisite: ADLL 6423 or instructor consent. (Typically offered: Irregular)
ADLL 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{Advertising/Public Relations (ADPR)}

\section*{Courses}

ADPR 3553. Advertising and Public Relations Strategies. 3 Hours.
Introduction to the research, strategies and tactics used in developing advertising and public relations campaigns. Provides an overview of planning, implementing, and evaluating research-based advertising and public relations campaigns. (Typically offered: Fall and Spring)

\section*{ADPR 3723. Advertising Principles. 3 Hours.}

Introductory course to the broad field of advertising. Includes a study of the role of advertising in modern society with emphasis being given to the extent and manner of use of advertising in mass media and digital media. Prerequisite: ((At least 30 credit hours completed; at least a 2.5 cumulative GPA; must be a Journalism major, Advertising and Public Relations major, Journalism minor, or obtain department consent; completion of JOUR 1033 with a grade of \(C\) or better; completion of JOUR 1003 with a grade of C or better or complete and pass the GSP (Grammar, Spelling and Punctuation) test in JOUR 1100 with a \(75 \%\) or higher) or (At least 30 credit hours completed; at least a 2.5 cumulative GPA; must be a Journalism major, Advertising and Public Relations major, Journalism minor, or obtain department consent; must have completed at least 6 credit hours in JOUR courses, each with a grade of \(C\) or better.); No in-progress credit hours accepted. (Typically offered: Fall and Spring)

\section*{ADPR 3743. Public Relations Principles. 3 Hours.}

Study of theory, methods, and ethics of public relations in modern society, business, and communications. Influencing opinion through acceptable performance and 2way communication. Prerequisite: ((At least 30 credit hours completed; at least a 2.5 cumulative GPA; must be a Journalism major, Advertising and Public Relations major, Journalism minor, or obtain department consent; completion of JOUR 1033 with a grade of \(C\) or better; completion of JOUR 1003 with a grade of \(C\) or better or complete and pass the GSP (Grammar, Spelling and Punctuation) test in JOUR 1100 with a \(75 \%\) or higher) or (At least 30 credit hours completed; at least a 2.5 cumulative GPA; must be a Journalism major, Advertising and Public Relations major, Journalism minor, or obtain department consent; must have completed at least 6 credit hours in JOUR courses, each with a grade of \(C\) or better.); No inprogress credit hours accepted. (Typically offered: Fall and Spring)

\section*{ADPR 4143. Public Relations Writing. 3 Hours.}

Instructional and writing practice to develop the professional-level writing skills required of public relations practitioners. Emphasizes different approaches required for different audiences and media. Prerequisite: Minimum of 60 credit hours completed, 2.5 cumulative GPA, ADPR major, and completion of ADPR 3723 and ADPR 3743, each with a grade of B or better; no in-progress credit hours accepted. (Typically offered: Fall and Spring)

\section*{ADPR 4423. Creative Strategy and Execution. 3 Hours.}

The creation of advertising copy and layout for the mass media with emphasis on strategy, the written message, and the physical appearance for the advertisement. Includes laboratory component. Prerequisite: Minimum of 60 credit hours completed, 2.5 cumulative GPA, ADPR major, and completion of ADPR 3723 and ADPR 3743, each with a grade of B or better; no in-progress credit hours accepted. (Typically offered: Fall and Spring)

\section*{ADPR 4453. Media Planning \& Strategy. 3 Hours.}

Includes the study of media characteristics, market research, media strategies, media analysis, media-market measurements and the development of media plans. Emphasis is placed on the analysis of major mass media and digital strategies, tactics, and planning. Prerequisite: Minimum of 60 credit hours completed, 2.5 cumulative GPA, ADPR major, and completion of ADPR 3723 and ADPR 3743, each with a grade of \(B\) or better; no in-progress credit hours accepted. (Typically offered: Fall and Spring)

ADPR 4463. Campaigns. 3 Hours.
Applying advertising principles and techniques to preparation of a complete campaign; determining agency responsibilities, marketing objectives and research, media mix, and creative strategy. Emphasis also given to campaign presentation delivery, utilizing audio and visual techniques. Prerequisite: ADPR 3723 and ADPR 3743, each with a grade of B or better, ADPR major, and 2.5 overall GPA. (Typically offered: Fall and Spring)

ADPR 4473. Account Planning. 3 Hours.
An introduction to applied advertising research and account planning. Integrate consumers' perspectives into creative strategy to developing brand stories for clients. Write creative briefs, positioning statements and prepare copy-testing research instruments to evaluate messages. Utilize consumer research for creating messages for diverse cultures. Prerequisite: Minimum of 60 credit hours completed, 2.5 cumulative GPA, ADPR major, and completion of ADPR 3723 and ADPR 3743, each with a grade of B or better; no in-progress credit hours accepted. (Typically offered: Fall and Spring)
This course is cross-listed with AAST 4473.
ADPR 4483. Multiculturalism in Advertising and Public Relations. 3 Hours. Seminar course involving the critical examination of the major cultural, social, political, economic, ethical and persuasion theories and/or issues relevant to advertising and public relations. (Typically offered: Fall)

\section*{African and African American Studies (AAST)}

\section*{Courses}

AAST 1003. Introduction to African and African American Studies. 3 Hours. This course is an introduction to the interdisciplinary study of Africa and African Americans and their impact on the world order and society with an emphasis on that impact's manifestations in the United States of America. (Typically offered: Fall and Spring)

AAST 1233. History of Race and Medicine. 3 Hours.
Examines history of western biomedicine on the intersection of science, medicine, and race to trace origins of current racial disparities. Examples from the United States and other international developments. (Typically offered: Irregular)

This course is cross-listed with HIST 1233.
AAST 2023. The African American Experience. 3 Hours.
Examines various facets of African American culture that collectively construct the African American experience including art, literature, drama, migration, film, and education. Covers issues facing African Americans through a cultural and sociopolitical context to understand and appreciate African American impacts on the United States. (Typically offered: Fall, Spring and Summer)

\section*{AAST 2053. The Black Student-Athlete. 3 Hours.}

Examines and deconstructs the experiences of Black student-athletes as they figure in University social, political, and economic life, as well as in popular culture and other aspects of our contemporary societies. Sources include poetry, music, websites, athletic manuals, contracts, as well as other media. (Typically offered: Fall, Spring and Summer)

\section*{AAST 3023. African Americans in Sport. 3 Hours.}

Historical, sociological, and political issues and debate surrounding African Americans in sport. Contemporary issues facing African American athletes and sports figures. (Typically offered: Fall, Spring and Summer)

\section*{AAST 3103. Diversity, Pedagogy, \& Visual Culture. 3 Hours.} Investigates various issues of diversity and equity in relation to art and education. It discusses the application of the theories of diversity and equity into teaching, community organizing, activism, and art practices. Prerequisite: ARED 3003
(Typically offered: Fall, Spring and Summer)
This course is cross-listed with ARED 3103.
AAST 3123. African American Students in Higher Education. 3 Hours. Examines the impact of college environments on African American students. Focuses on the following topics regarding African American students: retention, student demographics, student characteristics, current trends, issues and problems, student success, sub-populations, student values, and implications for higher education. (Typically offered: Irregular)

AAST 3133. History of Sports in Africa. 3 Hours.
This course considers the ways that Africans have strategically employed sports to confront and overcome both domestic and external challenges and how these approaches and the range of constituent strategies have changed over time. (Typically offered: Irregular)
This course is cross-listed with HIST 3133.
AAST 3193. The Making of the Modern Caribbean. 3 Hours.
History of the Caribbean from pre-Columbian to present times focusing in particular on indigenous origins, colonialism, slavery, rebellion, independence, nationalism and political integration in the making of the modern Caribbean region. (Typically offered: Fall)
This course is cross-listed with HIST 3193.

AAST 3233. African American History to 1877. 3 Hours.
History of the African American experience in North America emphasizing economic, social, and cultural perspectives. Topics include the African slave trade, the creation of race and racism, the institution of slavery, free community formation in North, and the impact of the Civil War and Reconstruction on African Americans. (Typically offered: Fall and Spring)
This course is cross-listed with HIST 3233.
AAST 3243. African American History Since 1877. 3 Hours.
The course will study the major social, political, and economical issues relating to the African American experience beginning with the late post-Reconstruction period and will include all of the major personalities and influences in the Civil Rights Movement, from 1877 to the present. (Typically offered: Fall and Spring)
This course is cross-listed with HIST 3243.

\section*{AAST 3253. The History of Sub-Saharan Africa. 3 Hours.}

Sub-Saharan African history from the 18th century to the present, with emphasis on the impact of the slave trade, colonization, Independence, and contemporary issues of the post-colonial period. Examination of the ways Africans experienced change in terms of culture, society, economics, gender, religion, politics, and labor. (Typically offered: Fall)
This course is cross-listed with HIST 3253.
AAST 3263. African Americans in Film. 3 Hours.
A survey of the history of images of African Americans in film, especially as these images are examined in the context of stereotypical renditions and/or realistic representations of African American experiences. Issues of African American history, culture, and socio-political context will be addressed in the analyses of these films. Prerequisite: ENGL 1023 and junior or senior standing. (Typically offered: Irregular) This course is cross-listed with ENGL 3263, JOUR 3263, COMM 3263.

\section*{AAST 3273. African Americans in Documentary Film. 3 Hours.}

Exploration of the African-American image and experience in the context of time, historical record and varying production viewpoints from diverse documentarians. African-American history, culture and socio-political context are addressed in the analyses of these documentary films from the perspectives of mainstream media, independent filmmakers and minority documentarians. Prerequisite: Junior or senior standing. (Typically offered: Spring)
This course is cross-listed with JOUR 3273, COMM 3273.
AAST 3293. Black Politics. 3 Hours.
This is a survey course designed to provide students with a comprehensive overview of Black political participation in the United States and throughout the diaspora. In addition to analyzing important events in Black politics in the U.S., the course also examines evolving patterns of diasporic political participation throughout the world. (Typically offered: Irregular)
This course is cross-listed with PLSC 3293.

\section*{AAST 3353. Black Digital Storytelling. 3 Hours.}

Provides basic knowledge of the range of capabilities of available audio and video design applications through the intersection of technology, story, and pedagogy, offering perspective, personalization, and insight. (Typically offered: Fall, Spring and Summer)

\section*{AAST 3393. Civil Rights Policy and Politics. 3 Hours.}

This course will draw from linkages between the protest phase of the civil rights and American political institutions. The course explores the institutional impact of the civil rights movement on the presidency, congress, the courts, administrative regulatory agencies, and civil rights advisory organizations. (Typically offered: Spring) This course is cross-listed with PLSC 3393.

\section*{AAST 3513. Black Indians in America. 3 Hours.}

Examines the history of Black Indian slavery and Freedom in the Cherokee, Muscogee, Chickasaw, Choctaw, and Seminole Tribes. Explores the switch to chattel slavery following colonialization, the experiences of African people enslaved by the tribes and their descendants, ongoing present-day disputes over tribal citizenship, human rights, and the American Indian identity. (Typically offered: Fall and Summer Even Years)
AAST 3523. Black in the City. 3 Hours.
Covers the history of Black people's relationship with the urban landscape. Students will use a wide array of primary sources to explore the ways in which Americans not only perceived the city but also sought to understand, master, and reimagine it and the uneven social and economic development that emerged as a consequence. (Typically offered: Fall and Spring Odd Years)

\section*{AAST 3673. Distant Relatives: The Global Black Diaspora. 3 Hours.}

Examines the cultural, political, economic, and social experiences of different parts of the African diaspora in the Americas, with special attention to the Black Atlantic World, focusing on the making of the diaspora through slavery, the middle passage, and later coerced and voluntary migrations. (Typically offered: Spring and Summer Odd Years)

\section*{AAST 3853. Topics in African-American Literature and Culture. 3 Hours.}

The study of works of African-American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
This course is cross-listed with ENGL 3853.

\section*{AAST 3973. South Africa: The Long, Ongoing Walk to Freedom. 3 Hours.} Examines the country's complex history and also the ways that this past is both remembered and memorialized. Closely examines the initial motivations for the colonization of South Africa, the experiences of Africans under colonial and, subsequently, apartheid rule and the ongoing legacies of these periods in contemporary South Africa. (Typically offered: Irregular)

\section*{AAST 3983. Black Movements and Messiahs. 3 Hours.}

Focuses on black movements and leaders across global African history since the Age of Revolutions to the present including political, economic, social, cultural, religious and artistic movements throughout Africa and the diaspora. (Typically offered: Irregular)

AAST 399VH. Honors African \& African American Studies Thesis. 1-6 Hour. Independent thesis research and writing under the direction of an AAST faculty member. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
AAST 4003. African \& African American Studies Study Abroad. 3 Hours. Examination of selected topics in conjunction with student participation in the biannual African \& African American Studies Study Abroad program to Ghana. Topic variable, chosen by instructor. (Typically offered: Summer Even Years) May be repeated for up to 6 hours of degree credit.
AAST 4003H. Honors African \& African American Studies Study Abroad. 3
Hours.
Examination of selected topics in conjunction with student participation in the biannual African \& African American Studies Study Abroad program to Ghana. Topic variable, chosen by instructor. (Typically offered: Summer Even Years) May be repeated for up to 6 hours of degree credit.

\section*{AAST 4043. Black Italia. 3 Hours.}

Explores the history, representation, and lived experiences, both prejudices and successes, of marginalized persons in Italy, particularly those of African heritage through an interdisciplinary lens. (Typically offered: Spring Odd Years)
This course is cross-listed with ITAL 4043.

AAST 4053. Historic Black Northwest Arkansas. 3 Hours.
Explores the history of Black NWA from settlement to the twenty-first century by examining, recovering, and documenting the lives of the region's enslaved and free people of color. Additional exploration of the communities, institutions, social, businesses, and artistic movements that define the black experience in NWA. Corequisite: Lab component. (Typically offered: Irregular)

\section*{AAST 4103. Communicating Body Image. 3 Hours.}

Examines hidden assumptions about body image as it relates to the intersections of race, class, gender, and other major identity markers. (Typically offered: Fall) This course is cross-listed with COMM 4103.

AAST 4123. Africa and the Trans-Atlantic Slave Trade. 3 Hours.
Examines the trans-Atlantic slave trade with a primary focus on the role of Africa and Africans in creating the unique economy and culture of the trans-Atlantic world. (Typically offered: Irregular)
This course is cross-listed with HIST 4123.

\section*{AAST 4153. Race and Society. 3 Hours.}

Introduction to the sociological study of race and ethnicity within the United States, with emphasis on understanding how race and ethnicity operate within contemporary social institutions. Prerequisite: SOCI 2013 or AAST 1003 or AAST 2023. (Typically offered: Fall)
This course is cross-listed with SOCI 4153.
AAST 4163. African American Perspectives of Trauma, Loss, and Recovery. 3 Hours.
Explores dimensions of trauma, loss, and recovery within the lived experiences of African American individuals, families, and communities in the United States. Prerequisite: Junior standing or instructor consent. (Typically offered: Fall) This course is cross-listed with SCWK 4163.

AAST 4173. Social Work with African American Families. 3 Hours. An overview of historical and contemporary issues of African American families using culturally competent and strengths based frameworks. Focuses on the Black family as a social institution. Covers current trends affecting Black families, historical influences, evaluation of social policies, and programs of today. Prerequisite: Junior standing or instructor consent. (Typically offered: Fall and Spring) This course is cross-listed with SCWK 4173.

AAST 4183. Black Environmental Justice. 3 Hours.
Provides an overview of the foundations of environmental justice as it relates to African-American communities. Expands the definitions of the environment and deconstructs the connection between slavery, land loss, gentrification, and food deserts. Finally, the course explores federal policies that shapes built environments, and its influence on African-American culture. (Typically offered: Irregular)

\section*{AAST 4263. Modern Africa. 3 Hours.}

Examines the last half-century of Africa's history, focusing on the last few decades. Introduction of Africa's colonial past, revolutions and struggles for independence. Review of African development in the post-colonial and contemporary era, successes and failures of independent Africa, and the challenges the continent faces today. (Typically offered: Irregular)
This course is cross-listed with HIST 4263.
AAST 4323. Racial Identity, Politics, and Public Policy. 3 Hours.
Examines how race and perceived racial differences affect political discourse, mobilization, representation, and political outcomes. Prerequisite: PLSC 3293 or AAST 1003 or Junior standing. (Typically offered: Spring Even Years)
This course is cross-listed with PLSC 4323.

\section*{AAST 4383. The American Civil Rights Movement. 3 Hours.}

Introduction to the history and development of the civil rights movement in the United States. (Typically offered: Irregular)
This course is cross-listed with HIST 4383.

\section*{AAST 4473. Account Planning. 3 Hours.}

An introduction to applied advertising research and account planning. Integrate consumers' perspectives into creative strategy to developing brand stories for clients. Write creative briefs, positioning statements and prepare copy-testing research instruments to evaluate messages. Utilize consumer research for creating messages for diverse cultures. Corequisite: Lab component. Prerequisite: Minimum 90 hours completed, no in-progress hours or coursework accepted, 2.5 overall GPA, JOUR 1033 with a grade of C or better, and ADPR 3723 and ADPR 3743, with a grade of B or better. (Typically offered: Fall and Spring)
This course is cross-listed with ADPR 4473.

\section*{AAST 4523. Black Utopias/Dystopias. 3 Hours.}

Explores how thinkers in the U.S., the Caribbean, and Africa, as well as movements such as fugitivity, colonization, and emigration to Haiti, Canada, Liberia, Ghana, Paris, and numerous other spaces, envisioned ideal forms of community that would shield them from the perils of white supremacy and racist oppression. (Typically offered: Fall Odd Years)

AAST 4563. The Old South, 1607-1865. 3 Hours.
Survey of the political, social, and economic development of the antebellum South. (Typically offered: Irregular)
This course is cross-listed with HIST 4563.

\section*{AAST 4573. The New South, 1860 to the Present. 3 Hours.}

Survey of the development of the Civil War and postwar South to the present. (Typically offered: Fall Even Years)
This course is cross-listed with HIST 4573.

\section*{AAST 4583. Cultures of Africa. 3 Hours.}

An exploration of the people and places of Africa from a variety of anthropological perspectives. Classic and contemporary works will be studied in order to underscore the unity and diversity of African cultures, as well as the importance African societies have played in helping us understand culture/society throughout the world. (Typically offered: Fall)
This course is cross-listed with ANTH 4583.

\section*{AAST 4623. African American Art History. 3 Hours.}

Surveys African American art from the seventeenth century to the present. It begins with a discussion of the transatlantic slave trade and it examines art produced in what Pratt terms the "contact zones." It then follows developments in African American art from the Antebellum Period to the present. Prerequisite: ARHS 2923. (Typically offered: Fall)
This course is cross-listed with ARHS 4623.

\section*{AAST 4813. Africans and Slavery in Colonial Latin America. 3 Hours.}

Explores the diverse experiences of slaves and free Blacks in colonial Spanish and Portuguese America from 1500 to around 1888, demonstrating that bondage and the practice of African slavery was a pillar of political authority in colonial Latin America. (Typically offered: Irregular)
This course is cross-listed with HIST 4813, LALS 4813.
AAST 4823. Black Freedom in the Age of Emancipation. 3 Hours.
Comparative study of Atlantic World freedom movements from the perspective of the African Diaspora. Focuses on the histories, meanings, and legacies of the various types of black emancipation in the Atlantic World and the cultural technologies that enabled them. (Typically offered: Spring)
This course is cross-listed with HIST 4823.
AAST 4853. Studies in African American Literature and Culture. 3 Hours.
The study of works of African American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit. This course is cross-listed with ENGL 4853.

AAST 4863. Gender, Race, and Power. 3 Hours.
Examines how communication shapes gender, race, sexuality, and power. Rather than focusing exclusively on interpersonal communication, this course looks at theories of power that shape institutional macro communication. (Typically offered: Fall Even Years)
This course is cross-listed with COMM 4363.
AAST 489V. African \& African American Independent Study. 1-6 Hour. An exploration of African \& African American Studies topics independently with a faculty member. Topic variable with permission of faculty member. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
AAST 4923. History of the Black Press. 3 Hours.
Covers the historic context of contributions and innovations to U.S. newspapers by African Americans. Also investigates the role of the black press from its beginnings in 1827 through the civil rights movement. Prerequisite: Junior standing. (Typically offered: Spring Even Years)
This course is cross-listed with JOUR 4923.
AAST 4933. African American Political Ideology. 3 Hours.
A survey course designed to identify and examine characteristics and functions of several variants of black political ideology/thought. (Typically offered: Fall Odd Years)
This course is cross-listed with PLSC 4933.
AAST 499V. African and African American Studies Seminar. 1-12 Hour. Explores the various aspects of the African \& African American experience as it relates to the development of relationships in American society and the world at large. Variable topic each semester. (Typically offered: Fall, Spring and Summer) May be repeated for up to 12 hours of degree credit.
AAST 5003. Graduate Seminar in African \& African American Studies. 3 Hours. Introduction to graduate study of African \& African American Studies through an interdisciplinary examination of the history of the discipline, research methods employed, and its relationship to other disciplines. (Typically offered: Irregular)
AAST 5103. Graduate Readings in African \& African American Studies. 3 Hours.
An exploration of African \& African American Studies topics independently with a faculty member. Topic variable with permission of faculty member. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

AAST 5573. Black in the City. 3 Hours.
Covers the history of Black people's relationship with the urban landscape. Students will use a wide array of primary sources to explore the ways in which Americans not only perceived the city but also sought to understand, master, and reimagine it and the uneven social and economic development that emerged as a consequence. (Typically offered: Fall and Spring Odd Years)
AAST 5673. Distant Relatives: The Global Black Diaspora. 3 Hours.
Examines the cultural, political, economic, and social experiences of different parts of the African diaspora in the Americas, with special attention to the Black Atlantic World, focusing on the making of the diaspora through slavery, the middle passage, and later coerced and voluntary migrations. (Typically offered: Spring Odd Years; Summer)
AAST 5903. Special Topics in African \& African American Studies. 3 Hours.
Graduate level seminar with varied emphasis on topics relating to African \& African American studies. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

AAST 5913. Independent Study in African and African American Studies. 3 Hours.
Graduate level independent study course with varied emphasis on topics relating to African and African American studies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

AAST 6023. Destabilizing Queer Theory. 3 Hours.
Highlights constricted and racialized ways in which people generally visualize class, gender, race, and sexualities. Students will discuss the criticality of complex dynamics of visual politics in class, gender, race, and sexualities, and theoretical issues posed and negotiated by queer theory. (Typically offered: Irregular) This course is cross-listed with ARED 6023.

\section*{AAST 6963. Visualizing Critical Race Theory. 3 Hours.}

An examination of critical theoretical approaches to the concepts of race and racism. Students will examine the ways in which these constructs perform a critical function in the construction of race(s) and racism(s) and their relevance to visual culture. (Typically offered: Fall and Spring)
This course is cross-listed with PLSC 6963, ARED 6963.

\section*{Agricultural Communications (ACOM)}

\section*{Courses}

ACOM 2143. Introduction to Agricultural Communications and Leadership. 3 Hours.
A survey of agricultural communications and leadership theories and practices for students in the ACOM and AGLE concentrations and minors and anyone seeking a basic understanding of these disciplines. The course provides an overview of the history, philosophy, and theories of the disciplines and introduces students to career options, skills and practical competencies required of agricultural communicators and leaders. (Typically offered: Fall)
This course is cross-listed with AGLE 2143.
ACOM 3143. Communicating Agriculture to the Public. 3 Hours.
An overview of public communications theory and practices in the agricultural, food, and life sciences with a particular focus on technical writing, public relations and media relations writing, campaign planning, public speaking, and various mass media communication techniques, including print, broadcast, electronic, and social media. (Typically offered: Fall, Spring and Summer)
ACOM 3143H. Honors Communicating Agriculture to the Public. 3 Hours. An overview of public communications theory and practices in the agricultural, food, and life sciences with a particular focus on technical writing, public relations and media relations writing, campaign planning, public speaking, and various mass media communication techniques, including print, broadcast, electronic, and social media. Prerequisite: Honors standing. (Typically offered: Fall, Spring and Summer) This course is equivalent to ACOM 3143.

\section*{ACOM 3243. Ag Reporting and Feature Writing. 3 Hours.}

This course will provide students an exposure to writing, interviewing, and editing news on agricultural issues in agricultural industry publications. Students will gain practical experience with journalistic interviewing, news writing, feature writing, digital photography, and writing for broadcast on agricultural issues. This course is designed for students with at least six hours of upper division courses. Pre- or Corequisite: JOUR 1033 and lab component. (Typically offered: Fall Odd Years)
ACOM 3943. Professional Development in Agricultural Communications and Leadership. 3 Hours.
Overview of professional and technical skills needed to succeed in internships and jobs in the field of agricultural communications. (Typically offered: Fall Even Years) This course is cross-listed with AGLE 3943.
ACOM 400V. Special Problems in Agricultural Communications. 1-6 Hour. Individual study or research for advanced undergraduates in the field of agricultural communication. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
This course is cross-listed with AGED 400V, AGLE 400V.

\section*{ACOM 401V. Special Topics. 1-4 Hour.}

Studies of selected topics in agricultural communications not covered in other courses. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.

\section*{ACOM 4143. Electronic Communications in Agriculture. 3 Hours.}

An overview of communication technology in the agricultural, food and life sciences. (Typically offered: Spring Even Years)

\section*{ACOM 4243. Graphic Design in AFLS. 3 Hours.}

This course provides students with graphic design and software skills specific to industries in Agriculture, Food, and Life Sciences. Students will learn to use industry-standard software (InDesign, Photoshop, Illustrator, Microsoft Excel, etc.) to prepare text and graphics and package them for use in print production. Prerequisite: ASTM 2903 or ISYS 1123 or equivalent. (Typically offered: Fall, Spring and Summer)

\section*{ACOM 4343. Communication Campaigns in Agriculture. 3 Hours.}

Students will develop understanding of the principles, practices and applications of social marketing, integrated marketing communications, advertising and public relations as they pertain to developing communication campaign strategies for the agricultural industry. Students will develop a communication campaign for an agricultural company and/or entity focused on a specific product or service. Prerequisite: Junior standing or higher, ACOM 4243, ACOM 3243, ACOM 3143, and (ACOM 2143 or AGLE 2143), or instructor permission. (Typically offered: Spring Odd Years)

\section*{ACOM 4543. Ag Publications. 3 Hours.}

Students produce a magazine through classroom study mirroring a professional magazine staff and are provided an opportunity for their writing, advertisements, photographs and artwork to be published in the magazine. By using computer applications, students integrate various skills including writing, editing and layout in agricultural publications. Prerequisite: JOUR 1033. (Typically offered: Spring Even Years)

ACOM 4643. Agricultural Video Production. 3 Hours.
The goal of this course is for students to develop a practical understanding of video production with an emphasis on short-form videos commonly used in education and marketing in the agricultural, food and life sciences industry. The course content covers both theory and practical application and will include training with industrystandard video equipment and editing software. (Typically offered: Spring Even Years)

\section*{ACOM 475V. Internship in Ag Communications. 1-6 Hour.}

A supervised practical work experience in ag communications which is designed to give the student an insight into the role of ag communications employees and an opportunity to gain professional competence in this area. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
This course is cross-listed with AGLE 475V, ASTM 475V, EXED 475V.
ACOM 510V. Special Problems. 1-6 Hour.
Individual investigation of a special problem in agricultural communications which is not available through regular courses. These will be directed by a member of the graduate faculty. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{ACOM 5143. Electronic Communications in Agriculture. 3 Hours.}

An overview of communication technology in the agricultural, food and life sciences. Graduate degree credit will not be given for both ACOM 4143 and ACOM 5143. (Typically offered: Spring Even Years)

\section*{ACOM 520V. Special Topics. 1-4 Hour.}

Topics not covered in other courses or a more intensive study of specific topics in agricultural communications. (Typically offered: Irregular) May be repeated for degree credit.

\section*{ACOM 5243. Graphic Design in AFLS. 3 Hours.}

This course provides students with graphic design and software skills specific to industries in Agriculture, Food, and Life Sciences. Students will learn to use industry-standard software (InDesign, Photoshop, Illustrator, Microsoft Excel, etc.) to prepare text and graphics and package them for use in print production. Graduate degree credit will not be given for both ACOM 4243 and ACOM 5243. Prerequisite: ASTM 2903 or ISYS 1123 or equivalent. (Typically offered: Fall, Spring and Summer)

\section*{ACOM 5343. Communication Campaigns in Agriculture. 3 Hours.}

Students will develop understanding of the principles, practices and applications of social marketing, integrated marketing communications, advertising and public relations as they pertain to developing communication campaign strategies for the agricultural industry. Students will develop a communication campaign for an agricultural company and/or entity focused on a specific product or service. Graduate degree credit will not be given for both ACOM 4343 and ACOM 5343. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years)

\section*{ACOM 5543. Ag Publications. 3 Hours.}

Students produce a magazine through classroom study mirroring a professional magazine staff and are provided an opportunity for their writing, advertisements, photographs and artwork to be published in the magazine. By using computer applications, students integrate various skills including writing, editing and layout in agricultural publications. Graduate degree credit will not be given for both ACOM 4543 and ACOM 5543. (Typically offered: Spring Even Years)

\section*{ACOM 5643. Agricultural Video Production. 3 Hours.}

The goal of this course is for students to develop a practical understanding of video production with an emphasis on short-form videos commonly used in education and marketing in the agricultural, food and life sciences industry. The course content covers both theory and practical application and will include training with industrystandard video equipment and editing software. Prerequisite: Graduate standing. (Typically offered: Spring Even Years)

\section*{ACOM 575V. Internship in Agricultural Communications. 1-6 Hour.}

Scheduled practical field experiences under supervision of a professional practitioner. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{Agricultural Economics (AGEC) \\ Courses}

AGEC 1103. Principles of Agricultural Microeconomics. 3 Hours.
Introduction to agricultural economics, including a survey of the role and characteristics of agriculture businesses in our economic system. Basic economic concepts concerning price determination, profit maximization, and resource use are emphasized. The use of economic principles as applied to the production and marketing decisions made by managers of agricultural firms is demonstrated. Credit will be allowed for only one of AGEC 1103 or ECON 2023 or ECON 2023H. Pre- or Corequisite: MATH 1203. (Typically offered: Fall, Spring and Summer) This course is cross-listed with ECON 2023.

AGEC 1103H. Honors Principles of Agricultural Microeconomics. 3 Hours. Introduction to agricultural economics, including a survey of the role and characteristics of agriculture businesses in our economic system. Basic economic concepts concerning price determination, profit maximization, and resource use are emphasized. The use of economic principles as applied to the production and marketing decisions made by managers of agricultural firms is demonstrated. Credit will be allowed for only one of AGEC 1103 or ECON 2023 or ECON 2023H. Pre- or Corequisite: MATH 1203. (Typically offered: Fall and Spring)
This course is cross-listed with ECON 2023, AGEC 1103.

AGEC 2103. Principles of Agricultural Macroeconomics. 3 Hours.
Applications of economics principles to problems of agricultural production, distribution, and income; including a study of the interrelationship between agriculture and other segments of the economy; and the dynamic forces in the economy which affect agriculture. Credit will be allowed for only one of AGEC 2103 or AGEC 2103H or ECON 2013 or ECON 2013H. Pre- or Corequisite: MATH 1203. (Typically offered: Fall and Spring)
This course is cross-listed with ECON 2013.
AGEC 2103H. Honors Principles of Agricultural Macroeconomics. 3 Hours. Applications of economics principles to problems of agricultural production, distribution, and income; including a study of the interrelationship between agriculture and other segments of the economy; and the dynamic forces in the economy which affect agriculture. Credit will be allowed for only one of AGEC 2103 or AGEC 2103H or ECON 2013 or ECON 2013H. Pre- or Corequisite: MATH 1203. Prerequisite: Honors standing. (Typically offered: Fall and Spring)
This course is cross-listed with ECON 2013, AGEC 2103.
AGEC 2143. Agribusiness Financial Records. 3 Hours.
Principles of small agricultural business management accounting practices are taught to allow students to gain hands-on experience with financial record keeping for a business. Resulting financial statements are analyzed to determine opportunities for enhancing financial efficiency. Prerequisite: (ASTM 2903 or ISYS 1123) and (AGEC 1103 or ECON 2023 or ECON 2143). (Typically offered: Fall)

\section*{AGEC 2303. Introduction to Agribusiness. 3 Hours.}

Introduction to agribusiness issues as they relate to the food processing, wholesale and retail sectors of the agricultural industry. Coverage of methods and tools agribusiness managers use to evaluate business opportunities. Case studies serve to communicate concepts of product distribution, design, promotion and pricing in the development of a marketing plan. Prerequisite: AGEC 1103 or ECON 2023. (Typically offered: Fall, Spring and Summer)

\section*{AGEC 2403. Quantitative Tools for Agribusiness. 3 Hours.}

Introduction to quantitative methods used in agricultural economics and agribusiness with an emphasis on skills and techniques that will enhance the ability of students to perform in upper division coursework. Provides an overview of statistical and optimization methods used in research problems, economic theory, and applied decision making activities. Prerequisite: (AGEC 1103 or ECON 2023 or ECON 2143) and MATH 2043 (or higher MATH course from the University Core excluding MATH 2183). (Typically offered: Fall)

\section*{AGEC 3303. Food and Agricultural Marketing. 3 Hours.}

Surveys consumer trends in food markets and the marketing activities of the food and fiber system. Emphasizes marketing concepts for both commodities and differentiated food products. Topics include applied consumer and price theory; marketing management; structure and performance of the food system; and current agricultural marketing topics. Prerequisite: AGEC 1103 or ECON 2023 or ECON 2143. (Typically offered: Fall, Spring and Summer)

\section*{AGEC 3313. Agribusiness Sales. 3 Hours.}

Principles of professional sales and sales management techniques used in food and agricultural firms; develop a professional sales presentation; study current agribusiness industry professional sales persons and sales practices and techniques. Prerequisite: AGEC 1103 or AGEC 2103 or ECON 2013 or ECON 2023 or ECON 2143 or equivalent. (Typically offered: Spring)

\section*{AGEC 3373. Futures and Options Markets. 3 Hours.}

Theory and mechanics of commodity futures and options markets including trading, margin, fees, etc. Price relationships between cash, futures and options. Fundamental and technical price analysis. Price risk management strategies for producers and users of agricultural commodity marketing plan. Speculative and hedging simulation exercises. Prerequisite: AGEC 1103 or ECON 2023. (Typically offered: Fall)

AGEC 3403. Farm Business Management. 3 Hours.
Application of economic principles for the profitable organization and operation of the farm business. Focuses upon agricultural production management decision-making tools: budgeting techniques (enterprise, partial, cash flow), balance sheet, income statement, cash flow, investment analysis and risk management. Recommended: AGEC 1103 (or ECON 2023), AGEC 2143, and ASTM 2903. (Typically offered: Fall, Spring and Summer)
AGEC 3413. Principles of Environmental Economics. 3 Hours.
An introductory, issues-oriented course in the economics of the environment. The course will focus on what is involved in how society makes decisions about environmental quality. The environmental issues important to the State of Arkansas and the United States will be emphasized. Prerequisite: AGEC 1103 or ECON 2023. (Typically offered: Spring)
This course is cross-listed with ENSC 3413.
AGEC 3413H. Honors Principles of Environmental Economics. 3 Hours.
An introductory, issues-oriented course in the economics of the environment. The course will focus on what is involved in how society makes decisions about environmental quality. The environmental issues important to the State of Arkansas and the United States will be emphasized. Corequisite: Drill component. Prerequisite: AGEC 1103 or ECON 2023. (Typically offered: Spring) This course is cross-listed with AGEC 3413, ENSC 3413.

\section*{AGEC 3503. Agricultural Law I. 3 Hours.}

Examination of those areas of law especially applicable to agriculture. Fundamentals of contract law, torts law, and property law will accompany discussion of major areas of agricultural law; acquisition and disposal of farmland; farm tenancies; rights and limitations in the use and ownership of farmland; water law; environmental protection; protection of the productivity of agricultural land; and the law of sales and secured transactions in an agricultural context. (Typically offered: Fall)
AGEC 3523. Environmental and Natural Resources Law. 3 Hours.
Principles of environmental and natural resources law relevant to agriculture, food and the environmental sciences; legal principles relating to regulation of water, air, hazardous substances, land, wildlife, livestock, and water rights. Principles of civil and criminal liabilities and other developing legal and regulatory issues relating to agriculture and natural resources. (Typically offered: Spring Even Years)

\section*{AGEC 400V. Special Problems. 1-6 Hour.}

Special studies and readings conducted under the direct supervision of staff members to satisfy the requirements of individual students. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{AGEC 401V. Internship in Agribusiness. 1-6 Hour.}

A supervised practical work experience in an agribusiness firm or a governmental or industrial organization having direct impact on agriculture in order to gain professional competence and insight to employment opportunities. Prerequisite: junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 8 hours of degree credit.
AGEC 402V. Special Topics. 1-3 Hour.
Studies of selected topics in agricultural economics not available in other courses. (Typically offered: Irregular) May be repeated for degree credit.

\section*{AGEC 4041. Agribusiness Capstone. 1 Hour.}

The purpose of this course is to provide students with an opportunity to apply and integrate knowledge from previous coursework in general education and agribusiness. This course is designed for students to demonstrate mastery of a number of subjects within the agribusiness discipline. Students will provide evidence of integrated knowledge through a variety of means including oral presentations, creation of a 1250-word reflective essay, and applying problem solving and critical thinking skills. Prerequisite: Senior standing. (Typically offered: Fall and Spring)

\section*{AGEC 4113. Agricultural Prices and Forecasting. 3 Hours.}

Price theory and techniques for predicting price behavior of general economy and price behavior of individual agricultural products will be analyzed. Provides practice in the application of economics and statistics to agricultural price analysis.
Prerequisite: ((AGEC 1103 or ECON 2023) and (AGEC 2403 or STAT 2303 or BUSI 1033) and (MATH 2043 or higher, excluding MATH 2183)). (Typically offered: Spring)

\section*{AGEC 4123. Legal Issues in Animal Agriculture. 3 Hours.}

An issues-oriented course focusing on the legal issues involved in the production of poultry, swine and livestock. Emphasis will center on the laws, regulations and policy arguments involved in animal confinement, antibiotic use, humane slaughter and veterinary medicine, along with other related issues. The wide range of regulation from local to state to federal, depending on the issue will be studied and discussed. (Typically offered: Spring Odd Years)
This course is cross-listed with ANSC 4123, POSC 4123.

\section*{AGEC 4143. Agricultural Finance. 3 Hours.}

Methods and procedures whereby agricultural firms acquire and utilize funds required for their successful operation. Emphasis is placed upon role of finance and financial planning and consideration is given to an understanding of financial firms serving agriculture. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013) and (AGEC 2143 or ACCT 2013). (Typically offered: Fall)

AGEC 4163. Agricultural and Rural Development. 3 Hours.
Examination of agricultural and rural development issues in less developed countries. Alternative agricultural production systems are compared, development theories examined, and consideration given to the planning and implementation of development programs. Prerequisite: AGEC 1103 (or ECON 2023). (Typically offered: Fall)

AGEC 4163H. Honors Agricultural and Rural Development. 3 Hours.
Examination of agricultural and rural development issues in less developed countries. Alternative agricultural production systems are compared, development theories examined, and consideration given to the planning and implementation of development programs. Prerequisite: AGEC 1103 (or ECON 2023) and honors standing. (Typically offered: Fall)
This course is equivalent to AGEC 4163.
AGEC 4243. Agribusiness Strategy. 3 Hours.
Addresses problems of strategy formulation in agribusiness emphasizing current problems and cases in agriculture. Surveys modern and classic perspectives on strategy with applications to agribusiness. Examines the development of firm level strategies within the structure and competitive environment of agricultural firms and industries. Prerequisite: MATH 2043 and (AGEC 1103 or ECON 2023 or ECON 2143) and (AGEC 3403 or AGEC 2143 or ACCT 2013). (Typically offered: Spring)

\section*{AGEC 4303. Agribusiness Marketing Management. 3 Hours.}

Marketing concepts will be developed and applied to the global food and fiber system. The course will use both commodity and product marketing principles and economic theory to analyze varied marketing situations. Case studies will be used to demonstrate the role that demand analysis and consumer behavior play in market management. Prerequisite: AGEC 2303 and AGEC 3303. (Typically offered: Fall and Summer)

\section*{AGEC 4313. Agricultural Business Management. 3 Hours.}

The planning, organizing, leading and controlling functions of management as they relate to agricultural business firms. Marketing of value-added products, budgeting, organizational structure, cost control, financial statements, capital budgeting and employee supervision and motivation. Case studies are used to teach communication and decision-making skills. Senior standing recommended. Prerequisite: (AGEC 2143 or ACCT 2013) and AGEC 2303. (Typically offered: Fall)

AGEC 4323. AgriBusiness Entrepreneurship. 3 Hours.
Agribusiness entrepreneurship is the process of bringing food or rural-based products and services from conceptualization to market. The course presents the opportunities, problems and constraints facing individuals and firms operating in rural or isolated markets while emphasizing the steps in conceptualization, development, marketing, and delivery-selling of agribusiness rural products. Prerequisite:
AGEC 1103 or equivalent. (Typically offered: Spring)
AGEC 4373. Basis Trading: Applied Price Risk Management. 3 Hours.
This course provides students an opportunity to gain a detailed working knowledge of how basis trading concepts and practices are applied to agricultural markets and to develop a skill set that can be put immediately into practice in any basis trading operation. Prerequisite: AGEC 3373 or consent of instructor. (Typically offered: Spring and Summer)

AGEC 4383. Basis Trading: Case Study. 3 Hours.
This course provides an opportunity to apply principles learned in AGEC 4373 to grain merchandising using the case study approach. The course will involve in-class meetings supplemented with faculty-directed group-based learning experiences involving professional grain merchandisers. Group activities will follow the traditional case study method. Prerequisite: AGEC 4373. (Typically offered: Fall)

\section*{AGEC 4403. Advanced Farm Business Management. 3 Hours.}

Principles and procedures of decision making as applied to the allocation of resources in the farm business for profit maximization. Emphasis is placed on use of principles of economics and their application to the decision making process. Includes exercises on the application of principles to specific farm management problems. Senior standing recommended. Prerequisite: AGEC 3403 and (ASTM 2903 or equivalent) and (AGEC 2143 or ACCT 2013). (Typically offered: Fall)

AGEC 4403H. Honors Advanced Farm Business Management. 3 Hours.
Principles and procedures of decision making as applied to the allocation of resources in the farm business for profit maximization. Emphasis is placed on use of principles of economics and their application to the decision making process. Includes exercises on the application of principles to specific farm management problems. Senior standing recommended. Prerequisite: AGEC 3403, (ASTM 2903 or equivalent), (AGEC 2143 or ACCT 2013) and honors standing. (Typically offered: Fall)
This course is equivalent to AGEC 4403.

\section*{AGEC 4603. Food Economics and Health. 3 Hours.}

This course provides an advanced overview of selected topics in food economics, food and nutrition policy and the interface between nutrition programs and health policy. Students will develop an understanding of economic and policy concepts of food, nutrition, and health. The course emphasizes analytical tools that can be applied to study issues in food, nutrition, and health facing the US and world populations. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2403 or BUSI 1033 or STAT 2303 or MATH 2043 or MATH 3083 or MATH 3013). (Typically offered: Spring)

AGEC 4613. Political Economy of Agriculture and Food. 3 Hours.
Agricultural and food policies are studied from domestic and international perspectives. Laws, regulations, decisions and actions by governments and other institutions are examined in terms of rationale, content, and consequences. Economic and political frameworks are used to assess policies in terms competitive structure, operation, and performance of farming and food systems. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013) and (PSYC 2003 or SOCI 2013 or HDFS 2603). (Typically offered: Fall)
AGEC 4623. International Agricultural Trade and Commercial Policy. 3 Hours. Analysis of agricultural market competition and performance in a global economy. The impact of domestic and international agricultural policies on domestic and international markets and welfare. Economic principles applied to the interaction of economic events in the world food economy. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013). (Typically offered: Spring)

\section*{AGEC 500V. Special Problems. 1-3 Hour.}

Individual reading and investigation of a special problem in agricultural economics not available under regular courses, under the supervision of the graduate faculty. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

\section*{AGEC 5011. Seminar. 1 Hour.}

Presentation and discussion of graduate student research. Formal presentations are made by all graduate students. Consideration given to research design, procedures, and presentation of results. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

\section*{AGEC 502V. Special Topics. 1-3 Hour.}

Advanced studies of selected topics in agricultural economics not available in other courses. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

\section*{AGEC 503V. Internship in Agricultural Economics. 1-3 Hour.}

On-the-job application of skills developed in the M.S. program. (Typically offered: Fall, Spring and Summer)

\section*{AGEC 5043. Agricultural Finance. 3 Hours.}

Methods and procedures whereby agricultural firms acquire and utilize funds required for their successful operation. Emphasis is placed upon role of finance and financial planning and consideration is given to an understanding of financial firms serving agriculture. Graduate degree credit will not be given for both AGEC 4143 and AGEC 5043. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013) and (AGEC 2143 or ACCT 2013). (Typically offered: Fall)

\section*{AGEC 5053. Advanced Farm Business Management. 3 Hours.}

Principles and procedures of decision making as applied to the allocation of resources in the farm business for profit maximization. Emphasis is placed on use of principles of economics and their application to the decision making process. Includes exercises on the application of principles to specific farm management problems. Graduate degree credit will not be given for both AGEC 4403 and AGEC 5053. Prerequisite: AGEC 3403 and ASTM 2903 or equivalent. (Typically offered: Fall)

\section*{AGEC 5063. Agricultural and Rural Development. 3 Hours.}

Examination of agricultural and rural development issues in less developed countries. Alternative agricultural production systems are compared, development theories examined, and consideration given to the planning and implementation of development programs. Graduate degree credit will not be given for both AGEC 4163 and AGEC 5063. Prerequisite: AGEC 1103 (or ECON 2023). (Typically offered: Fall)

\section*{AGEC 5073. Basis Trading: Applied Price Risk Management. 3 Hours.}

This course provides students an opportunity to gain a detailed working knowledge of how basis trading concepts and practices are applied to agricultural markets and to develop a skill set that can be put immediately into practice in any basis trading operation. Graduate degree credit will not be given for both AGEC 4373 and AGEC 5073. Prerequisite: AGEC 3373 or consent of instructor. (Typically offered: Spring and Summer)

\section*{AGEC 5083. Basis Trading: Case Study. 3 Hours.}

This course provides an opportunity to apply principles learned in AGEC 4373 to grain merchandising using the case study approach. The course will involve in-class meetings supplemented with faculty-directed group-based learning experiences involving professional grain merchandisers. Group activities will follow the traditional case study method. Graduate degree credit will not be given for both AGEC 4383 and AGEC 5083. Prerequisite: AGEC 4373 or AGEC 5073 (formerly AGEC 4373). (Typically offered: Fall)

AGEC 5103. Agricultural Microeconomics. 3 Hours.
Masters-level training in agricultural microeconomic theory and its application to food, agriculture and the environment. The course covers behavior of firms, households and markets, in more depth and rigor than encountered in undergraduate courses. Theories are explained and then applied to relevant food, agricultural, environment and resource issues. (Typically offered: Fall)

AGEC 5113. Agricultural Prices and Forecasting. 3 Hours.
Price theory and techniques for predicting price behavior of general economy and price behavior of individual agricultural products will be analyzed. Provides practice in the application of economics and statistics to agricultural price analysis. Graduate degree credit will not be given for both AGEC 4113 and AGEC 5113. Prerequisite: Graduate Standing. (Typically offered: Spring)

\section*{AGEC 5123. AgriBusiness Entrepreneurship. 3 Hours.}

Agribusiness entrepreneurship is the process of bringing food or rural-based products and services from conceptualization to market. The course presents the opportunities, problems and constraints facing individuals and firms operating in rural or isolated markets while emphasizing the steps in conceptualization, development, marketing, and delivery-selling of agribusiness rural products. Graduate degree credit will not be given for both AGEC 4323 and AGEC 5123. Prerequisite: AGEC 1103 or equivalent. (Typically offered: Spring)

AGEC 5133. Agricultural and Environmental Resource Economics. 3 Hours. An economic approach to problems of evaluating private and social benefits and costs of altering the environment. Emphasis given to the interaction of individuals, institutions, and technology in problems of establishing and maintaining an acceptable level of environmental quality. Prerequisite: Minimum of 3 hours Agricultural Economics or Economics at 3000 level or higher or PhD standing. (Typically offered: Spring)

AGEC 5143. Financial Management in Agriculture. 3 Hours.
Covers advanced topics in agricultural finance. The general focus of the course is the financial management of non-corporate firms. Covers the basic tools of financial analysis including financial arithmetic, asset evaluation under risk, and financial analysis and planning using econometric models. Such topics covered include management of current assets, capital budgeting, capital structure, and institutions involved in agricultural finance. Prerequisite: Graduate standing. (Typically offered: Fall)

\section*{AGEC 5153. The Economics of Public Policy. 3 Hours.}

This class will examine the impact of public policy on agricultural and other business sectors as well as households and individuals, particular in rural areas. Emphasis will also be placed on analyzing the potential impact of future policy changes. The course will focus on the application of welfare criteria and economic analyses to the problems and policies affecting resource adjustments in agriculture and rural communities. Prerequisite: Graduate standing. (Typically offered: Spring)

\section*{AGEC 5203. Agribusiness Marketing Management. 3 Hours.}

Marketing concepts will be developed and applied to the global food and fiber system. The course will use both commodity and product marketing principles and economic theory to analyze varied marketing situations. Case studies will be used to demonstrate the role that demand analysis and consumer behavior play in market management. Graduate degree credit will not be given for both AGEC 4303 and AGEC 5203. Prerequisite: Graduate Standing. (Typically offered: Fall and Summer)

\section*{AGEC 5213. Agricultural Business Management. 3 Hours.}

The planning, organizing, leading and controlling functions of management as they relate to agricultural business firms. Marketing of value-added products, budgeting, organizational structure, cost control, financial statements, capital budgeting and employee supervision and motivation. Case studies are used to teach communication and decision-making skills. Graduate degree credit will not be given for both AGEC 4313 and AGEC 5213. Prerequisite: (AGEC 2143 or ACCT 2013) and AGEC 2303 or equivalent. (Typically offered: Fall)

AGEC 5223. International Agricultural Trade and Commercial Policy. 3 Hours. Analysis of agricultural market competition and performance in a global economy. The impact of domestic and international agricultural policies on domestic and international markets and welfare. Economic principles applied to the interaction of economic events in the world food economy. Graduate degree credit will not be given for both AGEC 4623 and AGEC 5223. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013). (Typically offered: Spring)
AGEC 5233. Political Economy of Agriculture and Food. 3 Hours.
Agricultural and food policies are studied from domestic and international perspectives. Laws, regulations, decisions and actions by governments and other institutions are examined in terms of rationale, content, and consequences. Economic and political frameworks are used to assess policies in terms competitive structure, operation, and performance of farming and food systems. Graduate degree credit will not be given for both AGEC 4613 and AGEC 5233. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013) and (PSYC 2003 or SOCI 2013 or HDFS 2603). (Typically offered: Fall)
AGEC 5303. Agricultural Marketing Theory. 3 Hours.
Survey of the structure of agricultural product and factor markets including a critique of theoretical analyses of industry structure, conduct and performance; and a review of market structure research in agricultural industries. Prerequisite: Graduate standing. (Typically offered: Fall)
AGEC 5403. Quantitative Methods for Agribusiness. 3 Hours.
Application of quantitative techniques used to support managerial decision-making and resource allocation in agricultural firms. Provides exposure to mathematical and statistical tools (regression analysis, mathematical programming, simulation) used in economic analysis in agriculture. Emphasis is placed on computer applications with conceptual linkage to economic theory. Prerequisite: Graduate standing. (Typically offered: Fall)

\section*{AGEC 5413. Agribusiness Strategy. 3 Hours.}

Addresses problems of strategy formulation in agribusiness emphasizing current problems and cases in agriculture. Surveys modern and classic perspectives on strategy with applications to agribusiness. Examines the development of firm level strategies within the structure and competitive environment of agricultural firms and industries. Prerequisite: Graduate standing. (Typically offered: Spring)
AGEC 5603. Food Economics and Health. 3 Hours.
This course provides an advanced overview of selected topics in food economics, food and nutrition policy and the interface between nutrition programs and health policy. Students will develop an understanding of economic and policy concepts of food, nutrition, and health. The course emphasizes analytical tools that can be applied to study issues in food, nutrition, and health facing the US and world populations. Prerequisite: Graduate standing. (Typically offered: Spring)

\section*{AGEC 5613. Econometrics. 3 Hours.}

Use of economic theory and statistical methods to estimate economic models. The single equation model is examined emphasizing multicollinearity, autocorrelation, heteroskedasticity, binary variables and distributed lags and model specification. Prerequisite: MATH 2043 and knowledge of matrix methods, (which may be acquired as a corequisite), and (AGEC 1103 or ECON 2023) and (AGEC 2403 or STAT 2303 or BUSI 1033). (Typically offered: Spring)
AGEC 5623. Quantitative Food and Agricultural Policy Analysis. 3 Hours. Introduction to applied analysis of domestic and international food and agricultural policies using quantitative tools. This course will provide hands-on experience with simulation modeling in microeconomics. An emphasis is placed on policy analysis through computer applications with theoretical underpinnings. Prerequisite: Graduate Standing. (Typically offered: Fall)

AGEC 5643. Agricultural Data Science. 3 Hours.
Agricultural and environmental data gathering, wrangling, analysis, and visualization with emphasis on applied programming, version control, and analytical skills. This course provides students foundational and applied skills in constructing diverse cross-sectional and panel data sets for econometric investigation. Students should expect to learn and demonstrate competency in programming for data gathering, wrangling, analysis, and visualization. The course will cover common data sources, descriptive analysis, and econometric techniques used in agricultural and production economics. Prerequisite: Graduate standing. (Typically offered: Spring)

\section*{AGEC 5713. Food Safety Law. 3 Hours.}

This course provides students with an introduction to food law and policy, history of food regulation, the organization of federal food law and regulatory agencies, government inspection and enforcement powers, food safety standards, food labeling, food advertising and product liability. Web-based course. (Typically offered: Irregular)
AGEC 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
AGEC 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{Agricultural Education (AGED) Courses}

AGED 1123. Foundations of Agricultural Education. 3 Hours.
A preparatory course evaluating the historical foundations of agricultural education with an introduction to the psychological, sociological and philosophical foundations of education. This course will encourage reflective practice through understanding of educational trends, classroom environment creation and utilization, and effective program planning. (Typically offered: Fall)
AGED 3111. Student Management. 1 Hour.
To guide students in the development of realistic, proactive classroom management strategies that establish a safe culture of student learning and academic success. Prerequisite: Instructor Consent. (Typically offered: Spring)

\section*{AGED 3133. Instructional and Presentation Strategies. 3 Hours.}

Methods and techniques in teaching agriculture at the secondary level. Lecture/ laboratory 4 hours per week. Corequisite: Lab component. (Typically offered: Spring)

\section*{AGED 3161L. Curriculum Development and Assessment Techniques in Career} and Technical Education Laboratory. 1 Hour.
To supply students with opportunities to apply skills in creating curricula, lesson plans, and assessment strategies for courses in career and technical education. Materials created as a result of this course will apply principles learned in AGED 3162, and will align with anticipated courses to be taught by the student during his/her teaching internship. Pre- or Corequisite: AGED 3162. (Typically offered: Fall)

AGED 3162. Curriculum Development and Assessment Techniques in AGED. 2 Hours.
To supply students with the necessary information and skills to select and apply appropriate teaching techniques, curricula, resources, and assessment strategies when designing a course in career and technical education. (Typically offered: Fall)

\section*{AGED 4003. Issues in Agriculture. 3 Hours.}

Lecture and discussion on local, regional, national and international issues related to agricultural policy, ethics, environment, society, and science. Designed for students with at least six hours of upper division agricultural science courses. Prerequisite:
Junior standing. (Typically offered: Fall)

\section*{AGED 400V. Special Problems in Agricultural and Extension Education. 1-6} Hour.
Individual study or research for advanced undergraduates in the field of agricultural and extension education. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
This course is cross-listed with AGLE 400V, ACOM 400V.

\section*{AGED 401V. Special Topics. 1-3 Hour.}

Studies of selected topics in agricultural or extension education not covered in other courses. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.
AGED 4113. Undergraduate Researchers Improving Student Experience. 3 Hours.
To engage students in the social sciences in action research that serves to solve a problem or answer a question within the student's academic field through scientific inquiry. All students will work with professionals, commonly outside of the university, within their discipline to conduct their action research in order to solve a problem experienced by that professional. Students may work in teams or individually to complete the overall purpose of the course. (Typically offered: Spring)

\section*{AGED 4213. Teachers as Professionals. 3 Hours.}

To expose students to the roles and responsibilities of professional teachers. Students will understand the characteristics common to professionals and apply these to the teaching setting. Real-world examples of "grey-area" situations will allow students to evaluate issues holistically and determine appropriate solutions following the ethical and professional guidelines of the teaching discipline. This course will also guide students in the development of realistic, proactive classroom management strategies that establish a safe culture of student learning and academic success, a major component of teacher professionalism. Additionally, students will prepare resumes and engage in mock interviews to enhance their professional dispositions as they consider employment opportunities. Prerequisite: Instructor consent. (Typically offered: Spring)

\section*{AGED 4233. Program Development. 3 Hours.}

Teachers of agricultural education need an understanding of the skills needed to successfully manage leadership and experiential learning components of the agricultural education model. This course is designed to teach principles and concepts of leadership, program organization, youth organization management, supervised agricultural experience, and advisory committees. This course is a portion of pre-professional studies required for certification in agricultural education. Prerequisite: AGED 3133 and instructor consent. (Typically offered: Spring)

\section*{AGED 4443. Principles of Technological Change. 3 Hours.}

This course introduces a structured approach for dealing with the organizational and human aspects of technology transition, including the key concepts of resistance and change management, organizational change, communications, and processes by which professional change agents influence the introduction, adoption, and diffusion of technological change. This course may be offered as a web-based course. Prerequisite: Junior standing. (Typically offered: Fall Odd Years)

\section*{AGED 475V. Internship in Agricultural Education. 1-6 Hour.}

Scheduled practical field experiences under the supervision of a professional practitioner in off-campus secondary school systems. Emphasis includes classroom preparation, teaching, and student evaluation. Successful completion of a criminal background check required before a student can begin internship. Prerequisite: Admission into Clinical Practice. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{AGED 4843L. Methods in Agricultural Laboratories. 3 Hours.}

Methods and management techniques in all types of agricultural laboratories that may be in a secondary agricultural science program. Emphasis on management of students and facilities, equipment, and materials. Laboratory 6 hours per week. (Typically offered: Spring)

AGED 5001. Seminar. 1 Hour.
Presentations and discussion of graduate student research as well as review of current literature and topics of current interest by students and faculty. All graduate students will make at least one formal presentation. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for up to 3 hours of degree credit.

AGED 5053. Philosophy of Agricultural and Extension Education. 3 Hours.
An examination and analysis of social and economic events leading to the establishment and maintenance of federal, state, county, and local agricultural education programs. Lecture 3 hours per week. Prerequisite: Graduate standing. (Typically offered: Spring)

\section*{AGED 510V. Special Problems. 1-6 Hour.}

Individual investigation of a special problem in agricultural education which is not available through regular courses. These will be directed by a member of the graduate faculty. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{AGED 5113. Undergraduate Researchers Improving Student Experiences. 3} Hours.
To engage students in the social sciences in action research that serves to solve a problem or answer a question within the student's academic field through scientific inquiry. All students will work with professionals, commonly outside of the university, within their discipline to conduct their action research in order to solve a problem experienced by that professional. Students may work in teams or individually to complete the overall purpose of the course. Prerequisite: AGED 5463 or HESC 5463 or other instructor approved Research Methods course. (Typically offered: Spring)
AGED 520V. Special Topics in Agricultural and Extension Education. 1-4 Hour. Topics not covered in other courses or a more intensive study of specific topics in agriculture education. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

\section*{AGED 5411. Thesis Proposal Development. 1 Hour.}

The purpose of this course is to assist graduate students in the preparation of their thesis or dissertation research proposal. Students will produce the first three chapters of their thesis by the end of the course. Prerequisite: AGED 5463 or HESC 5463. (Typically offered: Spring)

\section*{AGED 5421. Grant Writing. 1 Hour.}

This course provides students with the experience of navigating the research grant writing process, covering the process from idea conception through planning, proposing, receiving, executing grant-funded projects. Students will write an independent grant proposal as a major assignment in this course. Prerequisite: Graduate standing. (Typically offered: Fall)
AGED 5431. Technical Communication in the Social Sciences. 1 Hour. This course focuses on audience identification, writing, editing, formatting and production of social science-based materials for publication. Much of the course content is in the context of developing the findings, conclusions, and recommendations of the master's thesis or other research manuscript. Principles include communicating information relevant to human subject research in agriculture, natural resources, and life sciences to research peers. Course delivery is asynchronous. Prerequisite: Graduate standing. (Typically offered: Spring)

\section*{AGED 5443. Principles of Technological Change. 3 Hours.}

This course introduces a structured approach for dealing with the organizational and human aspects of technology transition, including the key concepts of resistance and change management, organizational change, communications, and processes by which professional change agents influence the introduction, adoption, and diffusion of technological change. This course may be offered as a web-based course. Graduate degree credit will not be given for both AGED 4443 and AGED 5443. (Typically offered: Fall Odd Years)

AGED 5463. Research Methodology in the Social Sciences. 3 Hours. Logical structure and the method of science. Basic elements of research design; observation, measurement, analytic method, interpretation, verification, presentation of results. Applications to research in economic or sociological problems of agriculture and human environmental sciences. Prerequisite: Graduate standing. (Typically offered: Fall)
This course is cross-listed with HESC 5463.
AGED 5473. Interpreting Social Data in Agriculture. 3 Hours.
The development of competencies in analyzing, interpreting and reporting the results of analyses of social science data in agriculturally related professions. Students will select appropriate analysis techniques and procedures for various problems, analyze data, and interpret and report the results of statistical analyses in narrative and tabular form. (Typically offered: Fall)

AGED 5493. Survey Design and Scale Development. 3 Hours.
This course is designed to provide the expertise required to design and conduct survey research. Students will understand the instruments (scales/questionnaire) used in data collection processes and acquire the statistical skills necessary to develop and test these survey instruments. This course uses both theory and practice. Hands-on training will be provided via SPSS package for data analyses, and Qualtrics will be used for web-based surveys. Prerequisite: 3 hours of graduate level statistics coursework and HESC 5463 or AGED 5463 or instructor consent. (Typically offered: Summer)
This course is cross-listed with HESC 5053.
AGED 575V. Internship in Agricultural Education. 1-6 Hour.
Scheduled practical field experiences under supervision of a professional practitioner in off-campus secondary school systems. Emphasis includes classroom preparation, teaching, and student evaluation. (Typically offered: Fall, Spring and Summer)

AGED 5993. Global Horticulture and Human Nutrition to Enhance Community Resilience and Food Security. 3 Hours.
This course covers three broad areas (Global Horticulture, Sustainable International Development, Human Health and Nutrition) and experts on three campuses created the instruction. The course is intended to be multi-disciplinary, and students should use their contextual knowledge to add to weekly discussions. Prerequisite: Graduate standing. (Typically offered: Spring)
This course is cross-listed with FDSC 5993, HORT 5993.
AGED 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{Agricultural Education, Communications and Technology (AECT)}

\section*{Courses}

AECT 610V. Special Problems. 1-6 Hour.
Individual investigation of a special problem in agricultural education which is not available through regular courses. These will be directed by a member of the graduate faculty. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

AECT 620V. Special Topics in Agricultural Education, Communications and Technology. 1-4 Hour.
Topics not covered in other courses or a more intensive study of specific topics in agriculture education. Prerequisite: Graduate standing. (Typically offered: Irregular)

\section*{AECT 6301. Doctoral Seminar. 1 Hour.}

The seminar provides doctoral students a critical review of current research in agricultural and extension education, communication, leadership, and technology, an opportunity for collaboration and mentorship with peers, faculty and visiting scholars, and professional development. The presentation of a doctoral research proposal and research findings is expected of all students. This course may be repeated for up to three hours of degree credit. Prerequisite: Admission in doctoral program. (Typically offered: Fall and Spring) May be repeated for up to 3 hours of degree credit.

\section*{AECT 6903. Emerging Scholarship in the Discipline. 3 Hours.}

This course surveys recent scholarship in the discipline of agricultural education, communications and technology, with a special focus on recent literature highlighting research, teaching, and service across the discourse communities of ag education, ag communications, ag systems technology management, and ag leadership. Prerequisite: Graduate standing. (Typically offered: Fall Odd Years)
AECT 700V. PhD Dissertation. 1-18 Hour.
PhD dissertation. Prerequisite: Graduate standing and approval of dissertation chair. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{Agricultural Leadership (AGLE) Courses}

AGLE 2143. Introduction to Agricultural Communications and Leadership. 3 Hours.
A survey of agricultural communications and leadership theories and practices for students in the ACOM and AGLE concentrations and minors and anyone seeking a basic understanding of these disciplines. The course provides an overview of the history, philosophy, and theories of the disciplines and introduces students to career options, skills and practical competencies required of agricultural communicators and leaders. (Typically offered: Fall)
This course is cross-listed with ACOM 2143.

\section*{AGLE 3153. Leadership Development in Agriculture. 3 Hours.}

Identification of styles and roles of leadership; development of leadership techniques and skills required in working with organizations; dynamics of group action; methods of resolving conflict; ethical considerations for leaders; and personal skills development. (Typically offered: Fall, Spring and Summer)

AGLE 3153H. Honors Leadership Development in Agriculture. 3 Hours. Identification of styles and roles of leadership; development of leadership techniques and skills required in working with organizations; dynamics of group action; methods of resolving conflict; ethical considerations for leaders; and personal skills development. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer)
This course is equivalent to AGLE 3153.
AGLE 3943. Professional Development in Agricultural Communications and Leadership. 3 Hours.
Overview of professional and technical skills needed to succeed in internships and jobs in the field of agricultural communications. (Typically offered: Fall Even Years) This course is cross-listed with ACOM 3943.

AGLE 400V. Special Problems in Agricultural Leadership. 1-6 Hour. Individual study or research for advanced undergraduates in the field of agricultural and extension education. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
This course is cross-listed with AGED 400V, ACOM 400V.
AGLE 401V. Special Topics. 1-4 Hour.
Studies of selected topics in agricultural or extension education not covered in other courses. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.

AGLE 4153. Survey of Leadership Theory in Agriculture. 3 Hours.
An interdisciplinary analysis of current issues in the practice of leadership in a contemporary and changing society, particularly as they affect agricultural organizations and issues. Discussions of leadership theory, roles of leaders, skills for effective leadership, diversity issues, and followership will challenge students to think critically about leadership, enhance personal leadership performance and potential, and prepare for or expand leadership roles, and to become innovative and productive in dealing with challenges facing agricultural organizations today. Prerequisite: AGLE 3153. (Typically offered: Fall)

\section*{AGLE 4163. Leadership Analysis Through Film. 3 Hours.}

Clemens (1999) stated, "Films are a catalyst." They make you laugh, cry, cheer, and think. Flaum (2002) stated leadership is best learned in the leadership moment. Moreover, the principles of Andragogy advocate adult learners best learning when there is a practical application of the learning subject. Therefore, this course builds upon the study of leadership theory by allowing students to analyze, reflect, synthesize, and apply leadership theories, models and concepts in the context of film. The course materials encourage students to reflect, synthesize, analyze, and apply the information learned from major leadership theories and apply them to various scenarios and situations demonstrated in selected films. Prerequisite: AGLE 3153 or AGLE 4153 or graduate standing or instructor consent. (Typically offered: Spring and Summer)

\section*{AGLE 475V. Internship in Ag Leadership. 1-6 Hour.}

A supervised practical work experience in Ag Leadership which is designed to give the student an insight into the role of ag leadership employees and an opportunity to gain professional competence in this area. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
This course is cross-listed with ACOM 475V, ASTM 475V, EXED 475V.
AGLE 5033. Developing Leadership in Agricultural Organizations. 3 Hours. Organizational concepts of leadership; administrative styles and structures; leadership for boards, committees, governmental bodies, and review of societal and political processes. Prerequisite: Graduate standing. (Typically offered: Fall)

\section*{AGLE 510V. Special Problems. 1-6 Hour.}

Individual investigation of a special problem in agricultural education which is not available through regular courses. These will be directed by a member of the graduate faculty. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{AGLE 5153. Survey of Leadership Theory in Agriculture. 3 Hours.}

An interdisciplinary analysis of current issues in the practice of leadership in a contemporary and changing society, particularly as they affect agricultural organizations and issues. Discussions of leadership theory, roles of leaders, skills for effective leadership, diversity issues, and followership will challenge students to think critically about leadership, enhance personal leadership performance and potential, and prepare for or expand leadership roles, and to become innovative and productive in dealing with challenges facing agricultural organizations today. Graduate degree credit will not be given for both AGLE 4153 and AGLE 5153. (Typically offered: Fall)

\section*{AGLE 5163. Leadership Analysis Through Film. 3 Hours.}

Films are a catalyst (Clemens, 1999). They make you laugh, cry, cheer, and think. Flaum (2002) stated leadership is best learned in the leadership moment. Moreover, the principles of Andragogy advocate adult learners best learning when there is a practical application of the learning subject. Therefore, this course builds upon the study of leadership theory by allowing students to analyze, reflect, synthesize, and apply leadership theories, models and concepts in the context of film. The course materials encourage students to reflect, synthesize, analyze, and apply the information learned from major leadership theories and apply them to various scenarios and situations demonstrated in selected films. (Typically offered: Spring and Summer)

AGLE 520V. Special Topics. 1-4 Hour.
Topics not covered in other courses or a more intensive study of specific topics in agricultural leadership. (Typically offered: Irregular) May be repeated for degree credit.

\section*{AGLE 575V. Internship in Agricultural Leadership. 1-6 Hour.}

Scheduled practical field experiences under supervision of a professional practitioner. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
This course is cross-listed with ACOM 575V, ASTM 575 V .

\section*{Agricultural Statistics (AGST) \\ Courses}

AGST 5014. Experimental Design. 4 Hours.
Types of experimental designs, their analysis and application to agricultural research. Lecture 3 hours and laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: AGST 5023 or STAT 5003. (Typically offered: Spring)
AGST 5023. Principles of Experimentation. 3 Hours.
Fundamental concepts of experimental and statistical methods as applied to agricultural research. Lecture 3 hours per week. (Typically offered: Fall, Spring and Summer)

\section*{AGST 5031. SAS Programming for Agricultural Sciences. 1 Hour.}

An introduction to the SAS programming language with an emphasis on the reading and restructuring of data files, and the displaying of data in tabular and graphic forms. The course is taught using a hands-on approach. (Typically offered: Fall and Spring)

AGST 504V. Special Topics. 1-4 Hour.
Topics not covered in other courses or a broader-based study of specific topics in statistics and related areas. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.
AGST 5713. Applied Regression Analysis for Agricultural Sciences. 3 Hours. Analysis of agricultural experiments which contain quantitative factors through regression procedures. Lecture 3 hours per week. Prerequisite: AGST 5023 or STAT 5003. (Typically offered: Fall)

\section*{Agricultural Systems Technology Management (ASTM) \\ Courses}

ASTM 1611L. Fundamentals of Agricultural Systems Technology Laboratory. 1 Hour.
Study of basic mathematical and physical science concepts important in the mechanization of agriculture. Laboratory required for agricultural education, communication and technology majors enrolled in ASTM 1613, optional for others enrolled in ASTM 1613. Corequisite: ASTM 1613. (Typically offered: Fall)
ASTM 1613. Fundamentals of Agricultural Systems Technology. 3 Hours. Introduction to basic physical concepts important in agricultural technical systems: applied mechanics, power and machinery management, structures and electrification, and soil and water conservation. Lecture 3 hours per week. (Typically offered: Fall)

\section*{ASTM 2123. Metals and Welding. 3 Hours.}

An introduction to agricultural mechanics shop work to include hot and cold metal work, arc welding, and gas welding and cutting. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. (Typically offered: Fall and Spring)

ASTM 2903. Agricultural and Human Environmental Sciences Applications of Microcomputers. 3 Hours.
Lecture and laboratory assignments covering the contemporary use of microcomputers in agricultural, food and life sciences. Emphasis placed on learning to use selected, appropriate Microsoft (Windows, Word, Excel, PowerPoint and Access), email/Internet, and collaboration software packages. (Typically offered: Fall, Spring and Summer)

ASTM 3101L. Small Power Units/Turf Equipment Laboratory. 1 Hour. Testing, evaluation, and maintenance of engines, hydrostatic power transmission systems, and equipment commonly used in the turf and landscaping industries. Corequisite: ASTM 3102. Prerequisite: MATH 1203 or higher. (Typically offered: Spring)

\section*{ASTM 3102. Small Power Units/Turf Equipment. 2 Hours.}

Principles of operation, adjustment, repair, maintenance, and trouble shooting of small air-cooled engines and power units, including various engine systems, service and maintenance of turf equipment and machinery. Lecture 2 hours per week. Corequisite: ASTM 3101L. Prerequisite: MATH 1203 or higher. (Typically offered: Spring)

\section*{ASTM 3153. Surveying in Agriculture and Forestry. 3 Hours.}

Techniques and procedures normally used in determining areas and characterizing the topography of agricultural and forest lands. Includes basic concepts of surveying; use and care of level, transit, distance measuring equipment; topographic mapping and public land surveys. (Typically offered: Fall)
ASTM 3173. Electricity in Agriculture. 3 Hours.
Principles of electricity; wiring of home, farmstead and other agricultural structures; selection of electric motors and their care and application in the broad field of agriculture; lighting and special uses of electricity such as heating and electrical controls. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Spring)

\section*{ASTM 400V. Special Problems. 1-6 Hour.}

Individual research or study in electrification, irrigation, farm power, machinery, or buildings. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
ASTM 402V. Special Topics in Agricultural Mechanization. 1-4 Hour. Topics not covered in other courses or a more intensive study of special topics in agricultural mechanization. (Typically offered: Irregular) May be repeated for degree credit.

\section*{ASTM 4203. Mechanized Systems Management. 3 Hours.}

Selection, sizing, and operating principles of agricultural machinery systems, including power sources. Cost analysis and computer techniques applied to planning and management of mechanized systems. Corequisite: Lab component. Prerequisite: MATH 1203 or higher. (Typically offered: Fall Even Years)
ASTM 475V. Internship in Ag Systems. 1-6 Hour.
A supervised practical work experience in Ag Systems Technology Management which is designed to give the student an insight into the role of ag systems employees and an opportunity to gain professional competence in this area. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
This course is cross-listed with ACOM 475V, AGLE 475V, EXED 475V.

\section*{ASTM 4973. Irrigation. 3 Hours.}

Methods of applying supplemental water to soils to supply moisture essential for plant growth, sources of water, measurement of irrigation water, pumps, conveyance structure, economics, and irrigation for special crops. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Spring)

ASTM 501V. Special Topics in Agricultural Mechanization. 1-4 Hour.
Topics not covered in other courses or a more intensive study of special topics in agricultural mechanization. Graduate degree credit will not be given for both ASTM 402V and ASTM 501V. (Typically offered: Irregular) May be repeated for degree credit.

\section*{ASTM 510V. Special Problems in Ag Systems Technology. 1-4 Hour.}

Individual investigation of a special problem in agricultural communications which is not available through regular courses. These will be directed by a member of the graduate faculty. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.
ASTM 5203. Mechanized Systems Management. 3 Hours.
Selection, sizing, and operating principles of agricultural machinery systems, including power sources. Cost analysis and computer techniques applied to planning and management of mechanized systems. Graduate degree credit will not be given for both ASTM 4203 and ASTM 5203. Corequisite: Lab component. Prerequisite: MATH 1203. (Typically offered: Fall Even Years)

ASTM 575V. Internship in Agricultural Systems. 1-6 Hour.
Scheduled practical field experiences under supervision of a professional practitioner. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
This course is cross-listed with ACOM 575V, AGLE 575V.

\section*{ASTM 5973. Irrigation. 3 Hours.}

Methods of applying supplemental water to soils to supply moisture essential for plant growth, sources of water, measurement of irrigation water, pumps, conveyance structure, economics, and irrigation for special crops. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both ASTM 4973 and ASTM 5973. Corequisite: Lab component. (Typically offered: Spring)

\section*{Agriculture, Food and Life Sciences (AFLS)}

\section*{Courses}

AFLS 1023H. Bumpers College Honors Program Perspectives. 3 Hours.
This course is intended to meet the requirements of UNIV 1001 and provide Bumpers College Honors students with an overview of the Honors Program as well as provide insight into research and creative project development and expectations. Pre- or Corequisite: Honors standing. (Typically offered: Fall)

\section*{AFLS 1600. Undergraduate Research Assistant. 0 Hours.}

Undergraduate research. (Typically offered: Fall, Spring and Summer)
AFLS 2600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)
AFLS 3413H. Honors Proposal Development and Research Methods. 3 Hours. This course will include creative process, ethics, proposal writing, literature review, qualitative and quantitative/experimental design, scientific theory and methods, data collection, and analysis. At the end if this course, students will have developed a proposal for their Honors thesis. The course also offers an opportunity for students to present their proposals orally as preparation for their proposal meeting. Prerequisite: Sophomore, junior or senior standing. (Typically offered: Fall and Spring)

AFLS 3600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

AFLS 3993. Professional Growth and Critical Career Skills. 3 Hours.
The MERIT Profile will be utilized to identify students behavioral and character profiles so they may "know themselves" based upon strengths and tendencies. Throughout the term, students will be engaged in topics to help them identify their core values and strengths and develop their weaknesses. Course topics will include; adjusting to mistakes, cast off the negatives, verifying your values, scheduling priorities, building character, framing decisions/choices, personal improvement plans, and more. Upon course completion students should be able to utilize personal leadership approaches, strategic thinking and behavior, critical thinking and problem identification techniques and verbal and written communication to effectively convey their suitability specific feasible careers. Prerequisite: Junior standing. (Typically offered: Fall)

\section*{AFLS 400VH. Honors Thesis. 1-6 Hour.}
(Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{AFLS 401V. Special Topics in AFLS. 1-6 Hour.}

Studies of selected topics not covered in other courses. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{AFLS 401VH. Honors Special Topics. 1-6 Hour.}

Studies of selected topics not covered in other courses. Must be in the Honors program to register for this course. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
This course is equivalent to AFLS 401V.
AFLS 403V. Special Problems. 1-6 Hour.
Individual study or research for advanced undergraduates. Corequisite: Instructor consent. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{AFLS 403VH. Honors Special Problems. 1-6 Hour.}

Individual study or research for advanced undergraduates. Corequisite: Instructor consent and honors standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
This course is equivalent to AFLS 403V.

\section*{AFLS 4600. Undergraduate Research Assistant. 0 Hours.}

Undergraduate research. (Typically offered: Fall, Spring and Summer)
AFLS 501V. Special Topics. 1-3 Hour.
Studies of selected topics not covered in other courses. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{Air Force ROTC (AERO)}

\section*{Courses}

AERO 1011. Heritage and Values of the United States Air Force I. 1 Hour. A survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force. Leadership LAB mandatory for cadets. Corequisite: Lab component. (Typically offered: Fall)

AERO 1021. Heritage and Values of the United States Air Force II. 1 Hour. A survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force. Leadership LAB mandatory for cadets. Corequisite: Lab component. (Typically offered: Spring)

\section*{AERO 2011. Team and Leadership Fundamentals I. 1 Hour.}

This course focuses on laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The course will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate. Corequisite: Lab component. (Typically offered: Fall)
AERO 2021. Team and Leadership Fundamentals II. 1 Hour.
This course focuses on laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The course will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate. Prerequisite: AERO 2011. Corequisite: Lab component. (Typically offered: Spring)
AERO 3013. Leading People and Effective Communication I. 3 Hours. This course teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and communication. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors. Corequisite: Lab component. (Typically offered: Fall)
AERO 3023. Leading People and Effective Communication II. 3 Hours. This course teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and communication. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors. Corequisite: Lab component. (Typically offered: Spring)
AERO 4013. National Security Affairs and Preparation for Active Duty I. 3 Hours.
This course is designed for college seniors and gives them the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. The final semester provides information that will prepare the cadets for Active Duty. Corequisite: Lab component. (Typically offered: Fall)

AERO 4023. National Security Affairs and Preparation for Active Duty II. 3 Hours.
This course is designed for college seniors and gives them the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. The final semester provides information that will prepare the cadets for Active Duty. Corequisite: Lab component. (Typically offered: Spring)

\section*{Animal Science (ANSC) Courses}

ANSC 1001L. Introductory to Animal Sciences Laboratory. 1 Hour. Study of facilities used in production, processing, and management in animal agriculture. Identification, selection evaluation and testing of livestock, meat, and milk. Laboratory 3 hours per week. (Typically offered: Fall and Spring)

ANSC 1033. Introductory Animal Sciences. 3 Hours.
Students will be introduced to biological sciences associated with modern systems of care and management of livestock. Foundation sciences include topics in genetics, nutrition, reproduction, and animal health. The importance of livestock, equine, and companion animals and their allied industries will also be discussed. (Typically offered: Fall and Spring)

\section*{ANSC 1033H. Honors Introductory Animal Sciences. 3 Hours.}

Students will be introduced to biological sciences associated with modern systems of care and management of livestock. Foundation sciences include topics in genetics, nutrition, reproduction, and animal health. The importance of livestock, equine, and companion animals and their allied industries will also be discussed. Prerequisite: Honors standing. (Typically offered: Fall and Spring)
This course is equivalent to ANSC 1033.
ANSC 1062. Sustainable Integrated Small Animal Farming. 2 Hours.
Practical information on small scale animal production, including practical strategies for farm planning, issues of economic and environmental sustainability, best management practices, biosecurity, disease prevention, and farm safety will be presented. (Typically offered: Spring)
This course is cross-listed with POSC 1062.
ANSC 1781. Career Preparation and Development. 1 Hour.
Course will cover concepts necessary for preparing for a career in the animal sciences and allied industries. Concepts of goal setting, effective written and verbal communications, interpersonal skills, professional behaviors, presentation skills, portfolio and resume development will be presented. (Typically offered: Fall)

ANSC 2003. Introduction to Equine Industry. 3 Hours.
Examination of careers and business opportunities in the equine industry. Students will gain the opportunity to identify high quality horses through evaluation of conformation and locomotion. Students will also gain skill at oral presentation and be knowledgeable of costs and responsibilities associated with horse ownership. (Typically offered: Spring)
ANSC 2111L. Introduction To Animal Evaluation and Handling Lab. 1 Hour. Laboratory component stressing fundamental concepts of animal structure, composition, and behavior, and animal handling as they relate to animal production, safety, well-being, and handler safety. One 3-hour lab weekly. Corequisite: ANSC 2113 (only for students majoring in Animal Science). Pre- or Corequisite: ANSC 1033. (Typically offered: Fall and Spring)
ANSC 2113. Introduction to Animal Evaluation and Handling. 3 Hours. Fundamental concepts of the interrelationship of animal growth, structure, function, and animal handling as they relate to animal production, safety, well-being, and handler safety. Corequisite: ANSC 2111L (only for students majoring in Animal Science). Pre- or Corequisite: ANSC 1033. (Typically offered: Fall and Spring)

ANSC 2252L. Introduction to Livestock and Meat Evaluation. 2 Hours.
Develop an understanding between live animal evaluation and carcass composition. Comparative judging including meat evaluation, classification and selection of beef cattle, sheep and swine. (Typically offered: Spring)

\section*{ANSC 2303L. Introduction to Horsemanship. 3 Hours.}

A study of modern horsemanship training techniques involving the psychology and ethology (reason for the behavior) of equine social behavior and how it pertains to learning patterns; application of fundamental behavioral concepts in training of horses, and modification of desirable and undesirable behavioral patterns.
Prerequisite: Instructor consent. (Typically offered: Fall and Spring)

\section*{ANSC 2333. Introduction to Animal Health. 3 Hours.}

This course will cover the fundamental principles of animal health and disease prevention. Course discussion will include sanitation, disinfection, immunization, nutrition, housing and husbandry, causes of diseases, parasitism, clinical signs of disease, prevention and treatment options for diseases. Prerequisite: BIOL 1543 and sophomore standing. (Typically offered: Fall)

ANSC 2411L. Domestic Animal Microbiology Laboratory. 1 Hour.
This course is designed for students working on their Poultry Science, Animal Science, and/or Food Science degrees. Students enrolled in this course will learn how to collect samples aseptically from live birds and meat samples, transport samples, and culture samples on a variety of different microbiological media. In addition, students will have the opportunity to visit one of the microbiology labs in the local poultry production facilities. Students will learn how to handle samples, stain bacterial cells, and identify unknown bacteria from field samples. A lab period will be assigned to teaching students on how to use bacteria in food production by teaching students how to prepare and sample yogurt. Corequisite: ANSC 2413. (Typically offered: Fall)
This course is cross-listed with POSC 2411L.
ANSC 2413. Domestic Animal Microbiology. 3 Hours.
Basic concepts of domestic animal and poultry microbiology including diversity, genetics, metabolism, growth, control of growth, pathogenesis, and immunology. Corequisite: ANSC 2411L. Prerequisite: (BIOL 1543 and BIOL 1541L) and (CHEM 1073 and ((CHEM 1071L or CHEM 1103) or (CHEM 1123 and CHEM 1121L)). (Typically offered: Fall)
This course is cross-listed with POSC 2413.

\section*{ANSC 3003. Applied Animal Parasitology. 3 Hours.}

The economically important parasites of domestic animals with emphasis on their host relationships and management considerations. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Fall Even Years)

\section*{ANSC 3013. Parasitisms of Domesticated Non-Herbivores. 3 Hours.}

Course will provide applied instruction and appreciation for the parasitisms of our domesticated swine, chickens, turkeys, dogs and cats. (Typically offered: Fall Odd Years)

ANSC 3033. Animal Physiology. 3 Hours.
Fundamental aspects of central nervous, musculoskeletal, reproductive, digestive, immune, cardiovascular, respiratory and renal systems will be covered. The normal structure and function of these systems will be emphasized. Lecture 3 hours per week. Prerequisite: BIOL 1543 and (CHEM 1123 or CHEM 1073). (Typically offered: Spring)

\section*{ANSC 3072. Equine Selection and Evaluation. 2 Hours.}

Students will learn criteria for evaluation and selection of breeding and show animals and will gain expertise in the evaluation of breed types and show ring characteristics. Includes field trips to various breed operations. Students in this class will be well prepared to participate in equine judging team activities. Prerequisite: Instructor consent. (Typically offered: Spring)

\section*{ANSC 3123. Principles of Genetics. 3 Hours.}

Fundamentals of heredity, with special emphasis on the improvement of farm animals. Lecture 3 hours per week. Prerequisite: BIOL 1543 and MATH 1203 or higher. (Typically offered: Fall)
This course is cross-listed with POSC 3123.
ANSC 3133. Animal Breeding and Genetics. 3 Hours.
Application of the principles of genetics to the breeding of farm animals. Lecture 3 hours per week. Corequisite: Drill component. Prerequisite: MATH 1203 or higher. (Typically offered: Spring)

\section*{ANSC 3141L. Animal Nutrition Laboratory. 1 Hour.}

Animal Nutrition Laboratory (FA) Practical and quantitative approach to animal nutrition; use of various methods of feedstuff evaluation including ration balancing for domestic animals. Laboratory 2 hours per week. Corequisite: ANSC 3143 for ANSC majors only. Prerequisite: MATH 1203. (Typically offered: Fall)

ANSC 3143. Principles of Animal Nutrition. 3 Hours.
Scientific approach to animal nutrition involving the mechanisms through which feed nutrients are utilized by farm animals. Lecture 3 hours per week. Corequisite: ANSC 3141L (only a corequisite for students majoring in Animal Science). Prerequisite: ANSC 1033. (Typically offered: Fall)

\section*{ANSC 3213. Behavior of Domestic Animals. 3 Hours.}

Behavior associated with domestication. Effects of selective breeding, physical and social environments, and developmental stage on social organization, aggressive behavior, sexual behavior, productivity, and training of domestic animals. (Typically offered: Fall)

\section*{ANSC 3282. Livestock Judging and Selection. 2 Hours.}

Comparative judging, including grading, classification, and selection of beef cattle, swine, sheep and horses. Oral and written discussion. Laboratory 6 hours per week. Prerequisite: ANSC 1033 or ANSC 2252L. (Typically offered: Fall)

ANSC 3291. Livestock Junior Judging Team Activity. 1 Hour.
Training for membership on judging teams, through participation. (Typically offered: Spring)

ANSC 3333. Diseases of Livestock. 3 Hours.
Introductory study of the diseases of farm animals with emphasis on fundamental principles of disease, body defense mechanisms, hygiene, and sanitation. Prerequisite: BIOL 1543 and ANSC 2333. (Typically offered: Spring)

ANSC 3433. Fundamentals of Reproductive Physiology. 3 Hours.
Principles of mammalian reproductive physiology with emphasis on farm animals. Lecture 3 hours per week. Pre- or Corequisite: ((CHEM 1073 and CHEM 1071L) or (CHEM 1123 and CHEM 1121L) or (CHEM 2613 and CHEM 2611L) or (CHEM 3603 and CHEM 3601L)) and junior standing. Prerequisite: BIOL 1543. (Typically offered: Fall)

ANSC 3491L. Artificial Insemination in Cattle. 1 Hour.
Experience with artificial insemination technique in cattle including estrus detection, semen storage and handling, insemination equipment maintenance and technique. Laboratory 4 hours per week. The course is offered the second 8 weeks of the spring semester. Pre- or Corequisite: ANSC 3433 or instructor consent. (Typically offered: Fall)

\section*{ANSC 3513H. Honors Current Approaches in Agricultural Laboratory Research. 3 Hours.}

A laboratory course to introduce students to current laboratory research techniques used in agricultural and life sciences. Hands-on laboratory exercises will emphasize current cellular and molecular research techniques, laboratory notebook keeping,
data interpretation, and presentation of results. Prerequisite: BIOL 1543 and honors standing. (Typically offered: Spring Even Years)
This course is cross-listed with POSC 3513 H .
ANSC 3613. Meat Science. 3 Hours.
The study of meat science and muscle biology. Topics will include animal/tissue growth and development and the relationship to meat quality. Meat processing, preservation, and meat safety concerns will also be considered. Lecture 3 hours per week. (Typically offered: Spring)

\section*{ANSC 3723. Horse and Livestock Merchandising. 3 Hours.}

Various types of merchandising programs for specific livestock enterprises will be presented. Students will evaluate the effectiveness of merchandising programs including how to organize, advertise, and manage a purebred auction sale of livestock. (Typically offered: Fall)
ANSC 3753. Equine Assisted Activities and Therapies. 3 Hours.
Animal Science 3753 introduces students to the field of equine assisted activities and therapies. A variety of approaches, therapeutic settings and client populations will be addressed with an emphasis on equine behavior. Students will gain experience in the practical application of an equine assisted therapy program. (Typically offered: Fall)

ANSC 3761L. Ranch Horse Riding. 1 Hour.
This course is designed for students to have the opportunity to practice and/or compete in ranch horse competition as well as experience horseback ranch work. The class will consist mostly of hands-on participation at the Whitaker Arena as well as various competition and ranch sites around the region and country. Students will learn the value of the horse in livestock production as well as the competition portion of the equine industry. The Ranch Horse Team is a flagship for the University of Arkansas, Bumper's College Department of Animal Science. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

\section*{ANSC 3773. Equine Behavior. 3 Hours.}

Students will be introduced to equine behavior and its application to equine management and training. Course will cover identifying behaviors, senses and memory of the horse, horse-human interaction, how horses learn, the application of classical conditioning and equine welfare. (Typically offered: Summer)
ANSC 400V. Special Problems. 1-6 Hour.
Special problems in the animal sciences for advanced undergraduate students. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{ANSC 401V. Internship in Animal Sciences. 1-6 Hour.}

Supervised work experience with private or government organizations Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{ANSC 4072. Advanced Equine Selection and Evaluation. 2 Hours.}

Advanced evaluation and selection of breeding and show animals, evaluation of breed types and show characteristics. Field trips to breeding operations. Competitive Judging team members come from this course and participation in competitive events will be required. Prior equine evaluation is not necessary, but instructor consent is required. Some Saturday activities. Prerequisite: ANSC 3072 or instructor consent. (Typically offered: Fall)

\section*{ANSC 410V. Special Topics in Animal Sciences. 1-4 Hour.}

Topics not covered in other courses or a more intensive study of specific topics in animal sciences. (Typically offered: Irregular) May be repeated for degree credit.

\section*{ANSC 410VH. Honors Special Topics in Animal Sciences. 1-4 Hour.}

Topics not covered in other courses or a more intensive study of specific topics in animal sciences. Prerequisite: Honors standing. (Typically offered: Irregular) May be repeated for degree credit.
This course is equivalent to ANSC 410 V .

\section*{ANSC 4123. Legal Issues in Animal Agriculture. 3 Hours.}

An issues-oriented course focusing on the legal issues involved in the production of poultry, swine and livestock. Emphasis will center on the laws, regulations and policy arguments involved in animal confinement, antibiotic use, humane slaughter and veterinary medicine, along with other related issues. The wide range of regulationfrom local to state to federal, depending on the issue- will be studied and discussed. (Typically offered: Spring Odd Years)
This course is cross-listed with AGEC 4123, POSC 4123.

\section*{ANSC 4142. Advanced Animal Handling Techniques. 2 Hours.}

This course is designed to familiarize students with handling techniques of a variety of animals, including cattle, sheep, horses, pigs, dogs, and others. Students will learn and practice handling, restraint, and common husbandry procedures with a variety of domestic species. The course will provide valuable preparation for careers in livestock management, vet medicine, animal-based research, and other fields in animal science. Prerequisite: Junior standing or consent. (Typically offered: Fall and Spring)

\section*{ANSC 4163. Companion Animal Nutrition. 3 Hours.}

This course is designed to focus on the digestive anatomy, physiology, and nutrient metabolism of non-herbivorous companion animals, primarily dogs and cats. Topics discussed will also include an overview of the pet food industry, its regulations and commonly utilized ingredients. Students will gain a deeper understanding of nutrition as it relates to life stages and various disease states that can affect both dogs and cats. This course will require a Saturday trip to one or two off campus facilities. Prerequisite: ANSC 3143 or POSC 4343. (Typically offered: Spring)
This course is cross-listed with POSC 4163.

\section*{ANSC 4173. Thoroughbred Horse Industry. 3 Hours.}

This course is designed to give you an overview of the Thoroughbred breed and industry. Students will gain an understanding of the Thoroughbred industry, it's history, and modern practices. Students will also gain an understanding of career potential in the Thoroughbred industry. Prerequisite: Instructor consent and Junior or Senior standing. (Typically offered: Spring Odd Years)

ANSC 4181. Kentucky Thoroughbred Tour. 1 Hour.
An overview of the Thoroughbred industry in central Kentucky through visiting major racetracks, world-class Thoroughbred breeding facilities, major equine veterinary practices, world class equine sales facilities, equine rehabilitation and retirement facilities, equine nutritional research facilities, and visit with horse trainers, veterinarians and farm managers. Successful completion of all course requirements and the tours will enable students to obtain 1 credit in animal science, network in the equine industry and critically assess potential careers. Prerequisite: Instructor consent. (Typically offered: Summer Odd Years)

ANSC 4252. Cow-Calf Management. 2 Hours.
Systems of cow-calf management including the practical application of the principles of breeding, feeding, and management to commercial and purebred beef cattle under Arkansas conditions. Prerequisite: Must be a student in the Bumpers College of Agricultural, Food and Life Sciences, ANSC 1033 and Junior standing or higher. (Typically offered: Fall)

\section*{ANSC 4262. Swine Production. 2 Hours.}

Methods in producing purebred and commercial swine with specific emphasis on the management programs needed for profitable pork production in Arkansas. Prerequisite: Must be a student in Bumpers College of Agricultural, Food and Life Sciences, ANSC 1033 and Junior standing or higher. (Typically offered: Fall Even Years)

\section*{ANSC 4272. Sheep Production. 2 Hours.}

Purebred and commercial sheep management emphasizing the programs of major importance in lamb and wool production in Arkansas. Prerequisite: Must be a student in Bumpers College of Agricultural, Food and Life Sciences, ANSC 1033 and Junior standing or higher. (Typically offered: Spring)

\section*{ANSC 4282. Horse Production. 2 Hours.}

Production, use and care of horses and ponies including breeding, feeding, handling, and management. Lecture 1 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: Junior standing or higher. (Typically offered: Spring)

\section*{ANSC 4291. Livestock Senior Judging Team Activity. 1 Hour.}

Training for membership on judging teams, through participation. (Typically offered: Fall)

\section*{ANSC 4303. Comparative Veterinary Anatomy. 3 Hours.}

Study of structures and principles of anatomy of major domestic species. The dog, horse, and cow will be used as models for anatomical structures and the application of anatomical knowledge in animal science; focus on veterinary applications. 3 hours of lecture each week. Spring semesters. Corequisite: Lab component. Prerequisite: ANSC 1033 or BIOL 1543, junior standing or instructor consent. (Typically offered: Fall and Spring)

\section*{ANSC 4452. Milk Production. 2 Hours.}

Principles of breeding, feeding, and management of dairy cattle will be studied. Prerequisite: Must be a student in the Bumpers College of Agricultural, Food and Life Sciences, ANSC 1033 and Junior standing or higher. (Typically offered: Fall Odd Years)

\section*{ANSC 4482. Companion Animal Management. 2 Hours.}

The study and application of principles of domestication, nutrition, reproduction, parasitology, diseases, behavior, and husbandry management to companion animals. Dogs, cats, and exotic animals will be the species of primary interest. Practical problems of care and management of these species will be solved.
Prerequisite: BIOL 1543 or equivalent or consent of instructor. (Typically offered: Spring)

\section*{ANSC 4553. Forage-Ruminant Relations. 3 Hours.}

Chemical, physical, and botanical characteristics of forage plants, the dynamics of grazing, intake, digestion, behavior, and nutrient cycling at the plant-animal interface. CSES 1203 recommended. Corequisite: Lab component. Prerequisite: ANSC 3143. (Typically offered: Fall Even Years)

\section*{ANSC 4613. Muscle Growth and Development. 3 Hours.}

This is an undergraduate level course offering detailed insights into skeletal muscle morphological, physiological, cellular, and molecular factors affecting muscle structure and function, with special emphasis on cellular and molecular regulation of muscle growth and development, such as myo-, fibro-, and adipo-genesis. And the relationship between the properties of skeletal muscle and meat quality. ANSC 3033 and(or) CHEM 3813 are recommended as a prerequisite(s). (Typically offered: Fall) This course is cross-listed with POSC 4613.

\section*{ANSC 4652. Stocker-Feedlot Cattle Management. 2 Hours.}

Production and management systems for stocker and feed-lot cattle including practical applications of forage systems, feeding, health management and economics of production of these livestock. Prerequisite: Must be a student in the Bumpers College of Agricultural, Food and Life Sciences, ANSC 1033 and Junior standing or higher. (Typically offered: Fall)

\section*{ANSC 4662. Comparative Studies in Panamanian and US Agricultural} Practices. 2 Hours.
An experiential-learning course with an embedded trip to Panama designed to give students an overview of the agricultural industry and the impact of Panamanian history, culture and geography on agriculture and how this contrasts with practices in the US. Students will participate in a study tour to Panama where they will engage in learning experiences that explore the agriculture, history, and culture of this country. They will have the opportunity to visit and learn from successful producers of livestock and agricultural staples as well as tour the Panama canal and learn about Panamanian culture and history. Prerequisite: Instructors consent and approval from Study Abroad office. (Typically offered: Spring)

\section*{ANSC 4923. Brain \& Behavior. 3 Hours.}

Covers cellular through neural systems, major brain functions and comparative neuroanatomy. Topics include ion channels, membrane and action potentials, synaptic integration, neurotransmitters, major brain regions of mammals and birds, sensory systems and the autonomic nervous systems, neuroendocrine system, and control by the brain of critical functions and behavior. Lecture 3 hours per week. Prerequisite: (ANSC 3033 or POSC 3033) or PSYC 2003 or BIOL 2213 or BIOL 2443 or BIOL 2533. (Typically offered: Fall)
This course is cross-listed with POSC 4923.

\section*{ANSC 4993. Animal Science Capstone. 3 Hours.}

The purpose of this course is to provide students with an opportunity to apply and integrate knowledge from previous coursework in general education and animal science. This course is a multiple experience/ exercise capstone course and is designed for students to demonstrate mastery of a particular subject within Animal Science. Students will provide evidence of integrated knowledge through a variety of means including oral presentations, creation of a 1250-word reflective essay, writing a research abstract and applying problem solving and critical thinking skills. Prerequisite: Senior standing. (Typically offered: Fall and Spring)

ANSC 500V. Special Problems. 1-6 Hour.
Work in special problems of animal industry. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{ANSC 5013. Domestic Animal Energetics. 3 Hours.}

Physical, physiological and biochemical aspects of energy metabolism of domestic animals and their applications to livestock production. Lecture 3 hours per week. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years)

\section*{ANSC 5023. Legal Issues in Animal Agriculture. 3 Hours.}

An issues-oriented course focusing on the legal issues involved in the production of poultry, swine and livestock. Emphasis will center on the laws, regulations and policy arguments involved in animal confinement, antibiotic use, humane slaughter and veterinary medicine, along with other related issues. The wide range of regulationfrom local to state to federal, depending on the issue- will be studied and discussed. Graduate degree credit will not be given for both ANSC 4123 and ANSC 5023. (Typically offered: Spring Odd Years)

\section*{ANSC 5052. Cow-Calf Management. 2 Hours.}

Systems of cow-calf management including the practical application of the principles of breeding, feeding, and management to commercial and purebred beef cattle under Arkansas conditions. Graduate degree credit will not be given for both ANSC 4252 and ANSC 5052. (Typically offered: Fall)

ANSC 510V. Special Topics in Animal Sciences. 1-4 Hour.
Topics not covered in other courses or a more intensive study of specific topics in animal sciences. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

ANSC 5123. Advanced Animal Genetics. 3 Hours.
Specialized study of animal genetics. Lecture 3 hours per week. Prerequisite: ANSC 3123. (Typically offered: Fall Even Years)
This course is cross-listed with POSC 5123.

\section*{ANSC 5143. Biochemical Nutrition. 3 Hours.}

Interrelationship of nutrition and physiological chemistry; structure and metabolism of physiological significant carbohydrates, lipids, and proteins; integration of metabolism with provision of tissue fuels; specie differences in regulatory control of tissue and whole body metabolism of nutrients. Prerequisite: CHEM 3813. (Typically offered: Fall Even Years)
This course is cross-listed with POSC 5143.

\section*{ANSC 5152. Protein and Amino Acid Nutrition. 2 Hours.}

Students will be introduced to the basic processes of protein digestion, amino acid absorption, transport, metabolism, and utilization along with how biochemical function of proteins and their dynamic state affect nutritional status for animals and man. Prerequisite: CHEM 3813. (Typically offered: Spring Even Years)
This course is cross-listed with POSC 5152.

ANSC 5163. Companion Animal Nutrition. 3 Hours.
This course is designed to focus on the digestive anatomy, physiology, and nutrient metabolism of non-herbivorous companion animals, primarily dogs and cats. Topics discussed will also include an overview of the pet food industry, its regulations and commonly utilized ingredients. Students will gain a deeper understanding of nutrition as it relates to life stages and various disease states that can affect both dogs and cats. This course will require a Saturday trip to one or two off campus facilities. Prerequisite: ANSC 3143 or POSC 4343. (Typically offered: Spring) This course is cross-listed with POSC 5163.

ANSC 5262. Swine Production. 2 Hours.
Methods in producing purebred and commercial swine with specific emphasis on the management programs needed for profitable pork production in Arkansas. Graduate degree credit will not be given for both ANSC 4262 and ANSC 5262. (Typically offered: Fall Even Years)

\section*{ANSC 5272. Sheep Production. 2 Hours.}

Purebred and commercial sheep management emphasizing the programs of major importance in lamb and wool production in Arkansas. Graduate degree credit will not be given for both ANSC 4272 and ANSC 5272. (Typically offered: Spring)

\section*{ANSC 5283. Horse Production. 3 Hours.}

Production, use and care of horses and ponies including breeding, feeding, handling, and management. Lecture 2 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both ANSC 4282 and ANSC 5283. Corequisite: Lab component. (Typically offered: Spring)
ANSC 5452. Milk Production. 2 Hours.
Principles of breeding, feeding, and management of dairy cattle will be studied. Graduate degree credit will not be given for both ANSC 4452 and ANSC 5452. (Typically offered: Fall Odd Years)

\section*{ANSC 5482. Companion Animal Management. 2 Hours.}

The study and application of principles of domestication, nutrition, reproduction, parasitology, diseases, behavior, and husbandry management to companion animals. Dogs, cats, and exotic animals will be the species of primary interest. Practical problems of care and management of these species will be solved. Graduate degree credit will not be given for both ANSC 4482 and ANSC 5482. Prerequisite: BIOL 1543 or equivalent or consent of instructor. (Typically offered: Spring)

\section*{ANSC 5553. Forage-Ruminant Relations. 3 Hours.}

Advanced chemical, physical, and botanical characteristics of forage plants, the dynamics of grazing, intake and digestion, and techniques of measuring forage utilization and systems analysis at the plant-animal interface. Lecture 3 hours per week. CSES 1203 recommended. Corequisite: Lab component. Prerequisite: ANSC 3143. (Typically offered: Fall Even Years)

\section*{ANSC 5613. Muscle Growth and Development. 3 Hours.}

This is a graduate level course offering detailed insights into skeletal muscle morphological, physiological, cellular and molecular factors affecting muscle structure and function, with special emphasis on cellular and molecular regulation of muscle growth and development, such as myo-, fibro-, and adipo-genesis. And the relationship between the properties of skeletal muscle and meat quality. Graduate students will focus on the scientific reading, problem solving, and generating research ideas. ANSC 3033, CHEM 3813 or ANSC 5143 or an equivalent course are recommended as a prerequisite. (Typically offered: Fall)
This course is cross-listed with POSC 5613.
ANSC 5652. Stocker-Feedlot Cattle Management. 2 Hours.
Production and management systems for stocker and feed-lot cattle including practical applications of forage systems, feeding, health management and economics of production of these livestock. Graduate degree credit will not be given for both ANSC 4652 and ANSC 5652. (Typically offered: Fall)

ANSC 5662. Comparative Studies in Panamanian and US Agricultural Practices. 2 Hours.
An experiential-learning course with an embedded trip to Panama designed to give students an overview of the agricultural industry and the impact of Panamanian history, culture and geography on agriculture and how this contrasts with practices in the US. Students will participate in a study tour to Panama where they will engage in learning experiences that explore the agriculture, history, and culture of this country. They will have the opportunity to visit and learn from successful producers of livestock and agricultural staples as well as tour the Panama canal and learn about Panamanian culture and history. Prerequisite: Instructor consent and approval from Study Abroad office. (Typically offered: Spring)

ANSC 5743L. Advanced Analytical Methods in Animal Sciences Laboratory. 3 Hours.
Introduction into theory and application of current advanced analytical techniques used in animal research. Two 3-hour laboratory periods per week. (Typically offered: Fall)
This course is cross-listed with POSC 5743L.
ANSC 5853. Advanced Meats Technology. 3 Hours.
An intensive study of processed meats, relating the science, technology, and quality of further processed meat and poultry products. Product development, sensory and chemical analysis, microbiology, nutritional aspects, and product labeling are covered. Prerequisite: POSC 4314 or ANSC 3613. (Typically offered: Spring Even Years)

\section*{ANSC 5901. Seminar. 1 Hour.}

Critical review of the current scientific literature pertaining to the field of animal science. Oral reports. Lecture 1 hour per week. Prerequisite: Senior standing. (Typically offered: Fall)

ANSC 5923. Brain \& Behavior. 3 Hours.
Covers cellular through neural systems, major brain functions and comparative neuroanatomy. Topics include ion channels, membrane and action potentials, synaptic integration, neurotransmitters, major brain regions of mammals and birds, sensory systems and the autonomic nervous systems, neuroendocrine system, and control by the brain of critical functions and behavior. Lecture 3 hours per week. Prerequisite: (ANSC 3033 or POSC 3033) or PSYC 2003 or BIOL 2213 or BIOL 2443 or BIOL 2533. (Typically offered: Fall)
This course is cross-listed with POSC 5923.
ANSC 5932. Cardiovascular Physiology of Domestic Animals. 2 Hours. Cardiovascular physiology, including mechanisms of heart function and excitation, and blood vessel mechanisms associated with the circulatory system in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: POSC 3033 or ANSC 3033. (Typically offered: Fall) This course is cross-listed with POSC 5932.

ANSC 5943. Endocrine Physiology of Domestic Animals. 3 Hours.
Endocrine physiology, including mechanisms of hormone secretion, function, and regulation. Mechanisms associated with the endocrine system will be discussed for domestic animals and poultry. Prerequisite: POSC 3033 or ANSC 3033. Pre- or Corequisite: CHEM 3813. (Typically offered: Spring Even Years)

ANSC 5952. Respiratory Physiology of Domestic Animals. 2 Hours.
Respiratory physiology, including mechanisms of lung function and gas exchange. Mechanisms associated with the interaction of the respiratory system with other bodily systems in domestic animals and poultry will be discussed. Lecture 3 hours; drill 1 hour per week for first 8 weeks of semester. Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: POSC 3033 or ANSC 3033. (Typically offered: Spring)
This course is cross-listed with POSC 5952.

ANSC 5962. Gastrointestinal/Digestive Physiology of Domestic Animals. 2 Hours.
Gastrointestinal and hepatic physiology, including mechanisms of digestion, absorption of nutrients with emphasis on cellular control mechanisms in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component.
Prerequisite: POSC 3033 or ANSC 3033. (Typically offered: Fall)
This course is cross-listed with POSC 5962.
ANSC 5972. Renal Physiology. 2 Hours.
Renal physiology, including mechanisms of renal clearance with emphasis on cellular control mechanisms in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: POSC 3033 or ANSC 3033. (Typically offered: Spring)
ANSC 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{ANSC 6143. Minerals in Animal Nutrition. 3 Hours.}

Mineral nutrients, their sources and functions, as related to nutrition of domestic animals. Lecture 3 hours per week. Prerequisite: ANSC 3143 or POSC 4343. (Typically offered: Fall; Spring Even Years)

\section*{ANSC 6243. Ruminant Nutrition. 3 Hours.}

Anatomy and physiology of the rumen. The nutrient requirements of microbial organisms and the relation of microbial digestion in the rumen to the nutrition of cattle, sheep and other ruminants. Lecture 3 hours per week. Prerequisite: Graduate standing. (Typically offered: Fall Odd Years)

\section*{ANSC 6343. Vitamin Nutrition and Metabolism. 3 Hours.}

The vitamins required for humans and domestic animals for a healthy life with emphasis on absorption, transport, metabolism, biopotency, mechanism of action, tissue retention and turnover. Prerequisite: CHEM 3813. (Typically offered: Fall Odd Years)
This course is cross-listed with FDSC 6343, POSC 6343.
ANSC 6833. Reproduction in Domestic Animals. 3 Hours.
Comprehensive review of current theory of reproductive function in domestic animals. Lecture 3 hours per week. Prerequisite: ANSC 3433. (Typically offered: Spring Even Years)
ANSC 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{Anthropology (ANTH)} Courses
ANTH 1011L. Introduction to Biological Anthropology Laboratory. 1 Hour. Laboratory exercises illustrating concepts of physical anthropology. Corequisite: ANTH 1013. (Typically offered: Fall)

ANTH 1011M. Honors Introduction to Biological Anthropology Laboratory. 1 Hour.
Laboratory exercises illustrating concepts of physical anthropology. Corequisite: ANTH 1013H and honors candidacy. (Typically offered: Fall)
This course is equivalent to ANTH 1011L.
ANTH 1013. Introduction to Biological Anthropology. 3 Hours.
An introduction to the field of biological anthropology using evolution and human variation as unifying concepts. Areas include human genetics, race, speciation, primate and human evolution, and human variation and adaptation. Corequisite: ANTH 1011L. (Typically offered: Spring and Summer)

ANTH 1013H. Honors Introduction to Biological Anthropology. 3 Hours.
An introduction to the field of biological anthropology using evolution and human variation as unifying concepts. Areas include human genetics, race, speciation, primate and human evolution, and human variation and adaptation. Corequisite: ANTH 1011M. (Typically offered: Fall and Spring)
This course is equivalent to ANTH 1013.
ANTH 1023. Introduction to Cultural Anthropology (ACTS Equivalency = ANTH 2013). 3 Hours.

Introduction to the nature of culture and its influence on human behavior and personality: comparative study of custom, social organization, and processes of change and integration of culture. Corequisite: Drill component. (Typically offered: Fall, Spring and Summer)

ANTH 1023H. Honors Introduction to Cultural Anthropology. 3 Hours.
Introduction to the nature of culture and its influence on human behavior and personality; comparative study of custom, social organization, and processes of change and integration of culture. (Typically offered: Fall and Spring)
This course is equivalent to ANTH 1023.
ANTH 1033. Introduction to Archaeology. 3 Hours.
Archaeology studies the human past through contextual analysis of artifacts, archaeological sites, and landscapes. This course introduces archaeological methods and theories, significant discoveries and current debates in the discipline. Corequisite: Lab component. (Typically offered: Fall and Spring)

\section*{ANTH 2013. Introduction to Latin American Studies. 3 Hours.}

This course provides an interdisciplinary introduction to Latin America. Drawing on Latin American literature, history, sociology, and political science, the course examines the broad forces that have shaped the region. (Typically offered: Irregular)
ANTH 3003. World Prehistory. 3 Hours.
Survey of the prehistoric and early historic cultures of the Americas, Asia, and Africa. (Typically offered: Irregular)
ANTH 3013. Myths, Mysteries, and Manipulations of the Past. 3 Hours. Examines many archaeological fantasies, evaluates the evidence for and against such fringe theories, and confronts pseudoscience in everyday life. Dispels popular fantasies and "fake news" about the past. (Typically offered: Fall Odd Years)

\section*{ANTH 3023. Approaches to Archeology. 3 Hours.}

Study of the field of archeology including method, theory, analysis and interpretation with substantive worldwide examples. Prerequisite: ANTH 1033. (Typically offered: Spring)

ANTH 3043. Bones, Bodies, and Brains in Evolutionary Perspective. 3 Hours.
This course will review the anatomy of the human body, comparing this anatomy with primates, mammals, and vertebrates, and it will consider how the major features of the human body emerged throughout evolution. (Typically offered: Irregular) This course is cross-listed with BIOL 3043.

\section*{ANTH 3123. The Anthropology of Religion. 3 Hours.}

An exploration of rituals, symbols, and rules that shape religious life. Religion is viewed broadly, considering activities that invoke powers beyond the reach of ordinary senses. Examining a variety of cultures, we explore what people say and do as they participate in activities such as magic, healing, pilgrimage, and contemporary religious movements. (Typically offered: Spring)
ANTH 3213. Indigenous Peoples of North America: Anthropological Perspectives. 3 Hours.
An exploration of indigenous societies and cultures of North America from an anthropological perspective. Using examples from diverse Native Nations from the time of European contact to the present, we will examine colonialism and resistance, indigenous cosmologies, memory culture and oral tradition, and the politics of representation. (Typically offered: Irregular)

ANTH 3263. Indians of Arkansas and the South. 3 Hours.
Study of the traditional lifeways and prehistoric backgrounds of Indians living in the Southern United States, including Arkansas. (Typically offered: Spring Odd Years)
ANTH 3323. Evolution of the Human Mating System. 3 Hours.
Examines basic principles governing the evolution of sexual behavior and anatomy in mammals, compares the features of human mating systems to those of primates, and explores models for the origin of fundamental features of the human social system. (Typically offered: Fall)

\section*{ANTH 3421L. Human Osteology Laboratory. 1 Hour.}

Laboratory exercises illustrating concepts of human osteology. Corequisite:
ANTH 3423. (Typically offered: Spring)
ANTH 3423. Human Osteology. 3 Hours.
Study of the human skeleton, identification of bones, allometric growth, sexual dimorphism, osteological genetic inheritance and environmental stresses. Lectures and demonstration. Corequisite: ANTH 3421L. (Typically offered: Spring)
ANTH 3433. Human Evolution. 3 Hours.
A study of hominid evolution from origin to the present, including trends in comparative primate evolution and functional development of human form as a result of cultural and biological interaction. (Typically offered: Fall)

\section*{ANTH 3473. North American Prehistory. 3 Hours.}

Survey of the aboriginal prehistory of the North American Continent north of Mexico. (Typically offered: Irregular)

\section*{ANTH 3533. Medical Anthropology. 3 Hours.}

Survey of the interrelationship of human biology, culture and environment as reflected in disease experience from an evolutionary and cross cultural perspective. Special emphasis on stress. (Typically offered: Irregular)

ANTH 3543. Geospatial Applications and Information Science. 3 Hours.
An introduction to the methods and theory underlying the full range of geographic information science and collateral areas - including GNSS, remote sensing, cadastral, spatial demographics and others. (Typically offered: Fall and Spring) This course is cross-listed with GEOS 3543.

\section*{ANTH 3553. Religion in Latin America. 3 Hours.}

Examines contemporary implications of Latin America's unique religious heritage. An exploration of multiple Latin American religious traditions, with sustained focus on key theoretical concerns: conversion, vernacular vs. orthodox expressions, the blending of indigenous and European cosmologies, devotion and ritual, and the articulation of ethnic, gendered, and religious identities. (Typically offered: Irregular) This course is cross-listed with LALS 3553.

\section*{ANTH 3563. Culture and Medicine. 3 Hours.}

Study of health and medicine within cultural contexts, including attention to crosscultural healers and healing systems. Special emphasis on biomedicine as a cultural system. (Typically offered: Irregular)

\section*{ANTH 3583. Body and Identity. 3 Hours.}

This course explores personal, social and cultural constructions and performances of the body and identity, highlighting key intersections of embodiment including gender, race, sexuality and abilities. (Typically offered: Irregular)
ANTH 3593. Bioarchaeology: Bodies of the Past. 3 Hours.
Bioarchaeology is the study of human remains recovered from archaeological contexts. An overview of the field's history, ethical considerations, and relationship to the broader social sciences and STEM fields. Focuses on interpreting an individual's lived experience from their skeletal remains and mortuary context to reconstruct past phenomena. (Typically offered: Spring Odd Years)

ANTH 3713. Extinction: Bad Genes or Bad Luck?. 3 Hours.
Explores mass extinctions through the history of life on Earth, with particular emphasis on the Quaternary (the last 2.6 million years) where hominins, particularly humans have played a dominant role in shaping the ecosystems we experience today. (Typically offered: Fall and Spring)

\section*{ANTH 3903. Topics in Anthropology. 3 Hours.}

Covers a special topic or issue. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

\section*{ANTH 3923H. Honors Colloquium. 3 Hours.}

Covers a special topic or issue, offered as part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in anthropology). (Typically offered: Irregular) May be repeated for degree credit.

ANTH 399VH. Honors Thesis. 1-6 Hour.
Honors thesis. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 12 hours of degree credit.

\section*{ANTH 4013. History of Anthropological Thought. 3 Hours.}

Detailed consideration of anthropological theory through study of its historical development. The research paper fulfills the Fulbright College Writing Requirement for anthropology majors. Prerequisite: ANTH 1023. (Typically offered: Fall)

ANTH 4043. Ancient Cities. 3 Hours.
Explores pre-modern cities from the earliest in the world to those on the brink of industrialization. Employs anthropological archaeology as its primary approach, but also draws upon formal/functional analysis of urban plans, historical documentation, urban planning and history, and semiotics to interpret the built-environment as a form of non-verbal communication. (Typically offered: Spring Even Years)

ANTH 4053. Anthropology of the City. 3 Hours.
Explores the implications of several pivotal urban and cultural trends and how representations of the city have informed dominant ideas about city space, function, and meaning. (Typically offered: Irregular)

ANTH 4093. The Archeology of Death. 3 Hours.
Study of the analysis and interpretation of archeological mortuary remains and sites. Key archeological and anthropological sources that have influenced major theoretical developments are reviewed. (Typically offered: Irregular)
ANTH 4143. Ecological Anthropology. 3 Hours.
Anthropological perspectives on the study of relationships among human populations and their ecosystems. (Typically offered: Irregular)
ANTH 4256. Archeological Field Session. 6 Hours.
Practical field and laboratory experiences in archeological research. (Typically offered: Summer) May be repeated for up to 12 hours of degree credit.

ANTH 4263. Identity and Culture in the U.S.-Mexico Borderlands. 3 Hours. An exploration of the interplay between Latino/a, Mexican, Anglo, and Native American identities and cultures along the U.S.-Mexico border. Course examines identity formation, hybridity, social tension, marginalization, race and gender, from an anthropological perspective, paying special attention to the border as theoretical construct as well as material reality. (Typically offered: Irregular) This course is cross-listed with LALS 4263.

ANTH 4273. Photography for Fieldwork. 3 Hours.
This class explores the use of photographic images as both data and representational tools in anthropological research, emphasizing the ethical, theoretical, and methodological issues involved. (Typically offered: Irregular)

\section*{ANTH 4283. Survey in Ethnographic Film. 3 Hours.}

Survey of the development and evolution of ethnographic film, based on class screenings to build familiarity, vocabulary, and literacy with this branch of visual anthropology. (Typically offered: Irregular)
ANTH 4353. Laboratory Methods in Archeology. 3 Hours.
Theory and practice of describing, analyzing, and reporting upon archeological materials. (Typically offered: Irregular)

ANTH 4363. Museums, Material Culture, and Popular Imagination. 3 Hours. Museums as ideological sites and thus as sites of potential contestation produce cultural and moral systems that legitimate existing social orders. This course will focus on strategies of representation and the continuous process of negotiating social and cultural hierarchies with and through objects that are displayed. (Typically offered: Fall)

\section*{ANTH 4443. Cultural Resource Management I. 3 Hours.}

Concentrated discussion of management problems relative to cultural resources, including review and interpretation of relevant federal legislation, research vs. planning needs, public involvement and sponsor planning, and assessment of resources relative to scientific needs. No field training involved; discussion will deal only with administrative, legal and scientific management problems. (Typically offered: Spring) May be repeated for degree credit.

ANTH 448V. Individual Study of Anthropology. 1-6 Hour.
Reading course for advanced students with special interests in anthropology. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{ANTH 4523. Dental Science. 3 Hours.}

Introduction to the study of the human dentition including its anatomy, morphology, growth and development, and histology. (Typically offered: Fall)

\section*{ANTH 4533. Middle East Cultures. 3 Hours.}

Study of the peoples and cultures of the Middle East; ecology, ethnicity, economics, social organizations, gender, politics, religion, and patterns of social change.
(Typically offered: Spring) May be repeated for up to 9 hours of degree credit.

\section*{ANTH 4553. Introduction to Raster GIS. 3 Hours.}

Theory, data structures, algorithms, and techniques behind raster-based geographical information systems. Through laboratory exercises and lectures multidisciplinary applications are examined in database creation, remotely sensed data handling, elevation models, and resource models using boolean, map algebra, and other methods. (Typically offered: Fall)
This course is cross-listed with GEOS 4553.
ANTH 4583. Cultures of Africa. 3 Hours.
An exploration of the people and places of Africa from a variety of anthropological perspectives. Classic and contemporary works will be studied in order to underscore the unity and diversity of African cultures, as well as the importance African societies have played in helping us understand culture/society throughout the world. (Typically offered: Fall)
This course is cross-listed with AAST 4583.
ANTH 4613. Primate Adaptation and Evolution. 3 Hours.
Introduction to the biology of the order of Primates. This course considers the comparative anatomy, behavioral ecology and paleontology of our nearest living relatives. Prerequisite: ANTH 1013 (or BIOL 1543 and BIOL 1541L). (Typically offered: Spring)
This course is cross-listed with BIOL 4613.

\section*{ANTH 4703. Mammalian Evolution and Osteology. 3 Hours.}

This course will focus on describing the evolutionary history of mammals, a group of vertebrates that include over 5,000 species in 29 orders, and will provide an overview of living species and their identifying features. Prerequisite: ANTH 1013 and ANTH 1011L or BIOL 1543 and BIOL 1541L or instructor consent. (Typically offered: Irregular)

\section*{ANTH 4903. Seminar in Anthropology. 3 Hours.}

Research, discussion, and projects focusing on a variety of topics. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

\section*{ANTH 4913. Topics of the Middle East. 3 Hours.}

Covers a special topic or issue. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{ANTH 500V. Advanced Problems in Anthropology. 1-18 Hour.}

Individual research at graduate level on clearly defined problems or problem areas. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

\section*{ANTH 5053. Quaternary Environments. 3 Hours.}

An interdisciplinary study of the Quaternary Period including dating methods, deposits, soils, climates, tectonics, and human adaptation. Lecture 2 hours, laboratory 2 hours per week. (Typically offered: Fall)
This course is cross-listed with ENDY 5053, GEOS 5053.
ANTH 5103. Applications of Cultural Method and Theory. 3 Hours.
Review of the nature and history of cultural anthropology; recent theories and practical implications and applications of various methods of acquiring, analyzing and interpreting cultural anthropological data. (Typically offered: Fall)

\section*{ANTH 5113. Anthropology of the City. 3 Hours.}

Examines cities as both products of culture, and sites where culture is made and received. Explores the implications of several pivotal urban and cultural trends and the way in which representations of the city have informed dominant ideas about city space, function, and feel. (Typically offered: Irregular)

\section*{ANTH 5143. Ecological Anthropology. 3 Hours.}

Anthropological perspectives on the study of relationships among human populations and their ecosystems. Graduate degree credit will not be given for both ANTH 4143 and ANTH 5143. (Typically offered: Irregular)

ANTH 5153. Topics in Anthropology. 3 Hours.
Graduate level seminar with varied emphasis on topics relating to cultural anthropology. (Typically offered: Irregular) May be repeated for degree credit.

ANTH 5203. Applications of Archeological Method and Theory. 3 Hours. Review of the nature and history of archeology; recent theories and practical implications and applications of various methods of acquiring, analyzing, and interpreting archeological data. (Typically offered: Fall)

\section*{ANTH 5256. Archeological Field Session. 6 Hours.}

Practical field and laboratory experiences in archeological research. Graduate degree credit will not be given for both ANTH 4256 and ANTH 5256. (Typically offered: Summer)

\section*{ANTH 5263. Indians of Arkansas and the South. 3 Hours.}

Study of the traditional lifeways and prehistoric backgrounds of Indians living in the southern United States, including Arkansas. (Typically offered: Spring Odd Years)

ANTH 5273. Photography for Fieldwork. 3 Hours.
This class explores the use of photographic images as both data and representational tools in anthropological research, emphasizing the ethical, theoretical, and methodological issues involved. Graduate degree credit will not be given for both ANTH 4273 and ANTH 5273. (Typically offered: Irregular)

\section*{ANTH 5283. Survey in Ethnographic Film. 3 Hours.}

Survey of the development and evolution of ethnographic film, based on class screenings to build familiarity, vocabulary, and literacy with this branch of visual anthropology. Graduate degree credit will not be given for both ANTH 4283 and ANTH 5283. (Typically offered: Irregular)

ANTH 5293. Identity and Culture in the U.S.-Mexico Borderlands. 3 Hours. An exploration of the interplay between Latino/a, Mexican, Anglo, and Native American identities and cultures along the U.S.-Mexico border. Course examines identity formation, hybridity, social tension, marginalization, race and gender, from an anthropological perspective, paying special attention to the border as theoretical construct as well as material reality. Graduate degree credit will not be given for both ANTH 4263 and ANTH 5293. (Typically offered: Irregular)

ANTH 5303. Applications of Method and Theory in Biological Anthropology. 3 Hours.
Review of the nature and history of biological anthropology; recent theories and the practical implications and applications of various methods of acquiring, analyzing, and interpreting data. (Typically offered: Irregular)

ANTH 5313. Laboratory Methods in Archeology. 3 Hours.
Theory and practice of describing, analyzing, and reporting upon archeological materials. Graduate degree credit will not be given for both ANTH 4353 and ANTH 5313. (Typically offered: Irregular)

ANTH 5363. Museums, Material Culture, and Popular Imagination. 3 Hours. Museums as ideological sites and thus as sites of potential contestation produce cultural and moral systems that legitimate existing social orders. This course will focus on strategies of representation and the continuous process of negotiating social and cultural hierarchies with and through objects that are displayed. Graduate degree credit will not be given for both ANTH 4363 and ANTH 5363. (Typically offered: Fall)

ANTH 5413. Bioarcheology Seminar. 3 Hours.
Intensive coverage of bioarcheological method and theory with the context of both academic and cultural resources management research. (Typically offered: Spring Odd Years)

\section*{ANTH 5443. Cultural Resource Management I. 3 Hours.}

Concentrated discussion of management problems relative to cultural resources, including review and interpretation of relevant federal legislation, research vs. planning needs, public involvement and sponsor planning, and assessment of resources relative to scientific needs. No field training involved; discussion will deal only with administrative, legal, and scientific management problems. (Typically offered: Irregular)

\section*{ANTH 548V. Individual Study of Anthropology. 1-6 Hour.}

Reading course for advanced students with special interests in anthropology. Graduate degree credit will not be given for both ANTH 448 V and ANTH 548V. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{ANTH 5523. Dental Science. 3 Hours.}

Introduction to the study of the human dentition including its anatomy, morphology, growth and development, and histology. Graduate degree credit will not be given for both ANTH 4523 and ANTH 5523. (Typically offered: Fall)

\section*{ANTH 5553. Introduction to Raster GIS. 3 Hours.}

Theory, data structures, algorithms, and techniques behind raster-based geographical information systems. Through laboratory exercises and lectures multidisciplinary applications are examined in database creation, remotely sensed data handling, elevation models, and resource models using boolean, map algebra, and other methods. Credit will not be given for both ANTH 4553 and ANTH 5553. (Typically offered: Fall)
This course is cross-listed with GEOS 5453.

\section*{ANTH 5623. Primate Adaptation and Evolution. 3 Hours.}

Introduction to the biology of the order of Primates. This course considers the comparative anatomy, behavioral ecology and paleontology of our nearest living relatives. Credit will not be given for both ANTH 4613 and ANTH 5623. (Typically offered: Spring)
This course is cross-listed with BIOL 5613.

\section*{ANTH 5703. Mammalian Evolution and Osteology. 3 Hours.}

This course will focus on describing the evolutionary history of mammals, a group of vertebrates that include over 5,000 species in 29 orders, and will provide an overview of living species and their identifying features. Credit will not be given for both ANTH 4703 and ANTH 5703. (Typically offered: Irregular)
This course is cross-listed with BIOL 5883.

ANTH 5813. Ethnographic Approaches to the Past. 3 Hours.
Review of the uses of ethnographic data in the reconstruction and interpretation of past cultures and cultural processes, with particular emphasis on the relationships between modern theories of culture and archeological interpretation. Credit will not be given for both ANTH 4813 and ANTH 5813. (Typically offered: Irregular)

\section*{ANTH 582V. Applied Visual Research. 1-6 Hour.}

This class provides hands-on skill and training conducting visually informed fieldwork designed to help represent unique cultural settings, experience, and heritage. Credit will not be given for both ANTH 482V and ANTH 582V. (Typically offered: Irregular)

\section*{ANTH 5903. Seminar in Anthropology. 3 Hours.}

Research, discussion, and projects focusing on a variety of topics. Credit will not be given for both ANTH 4903 and ANTH 5903. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

\section*{ANTH 5913. Topics of the Middle East. 3 Hours.}

Covers a special topic or issue. Credit will not be given for both ANTH 4913 and ANTH 5913. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{ANTH 600V. Master's Thesis. 1-6 Hour.}

Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{ANTH 6033. Society and Environment. 3 Hours.}

This course examines the complex interrelationships between human societies and the natural environment. Drawing on diverse and interdisciplinary perspectives in archaeology, ethnography, history, geography, and palaeo-environmental studies, readings and discussion will explore the co-production of social and environmental systems over time. (Typically offered: Spring) May be repeated for degree credit. This course is cross-listed with ENDY 6033.

ANTH 610V. Internship. 1-18 Hour.
Internship. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

ANTH 6813. Seminar: Cultural Anthropology. 3 Hours.
Variable topics in Anthropology will be explored in depth. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ANTH 6833. Seminar: Biological Anthropology. 3 Hours.
Various topics in Biological Anthropology will be explored in depth. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ANTH 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. (Typically offered: Fall and Spring) May be repeated for degree credit.

\section*{Apparel Merchandising and Product Development (AMPD)}

\section*{Courses}

\section*{AMPD 1013. Introduction to Clothing Concepts. 3 Hours.}

Origin of dress, the evolution of fashion as an economic power, the sociological and psychological aspects of clothing in various cultures, aesthetics of dress, selection and consumption of clothing. Lecture 3 hours per week. (Typically offered: Fall and Spring)

\section*{AMPD 1013H. Honors Introduction to Clothing Concepts. 3 Hours.}

Origin of dress, the evolution of fashion as an economic power, the sociological and psychological aspects of clothing in various cultures, aesthetics of dress, selection and consumption of clothing. Lecture 3 hours per week. Prerequisite: Honors standing. (Typically offered: Fall and Spring)
This course is equivalent to AMPD 1013.

AMPD 1023. Introduction to Apparel Production. 3 Hours.
Course focuses on basic principles of apparel production and analysis of garment components of mass produced apparel. Students utilize computer generated designs in the production process. Laboratory 6 hours per week. Prerequisite: HESC or AMPD students only. (Typically offered: Fall and Spring)

AMPD 2013. Fashion, Buying and Promotion in a Global Market. 3 Hours. Fashion components, marketing theories and practices as they specifically relate to apparel, home goods, and other design driven products in the global market. Focus on principles and techniques on how fashion marketers develop and apply marketing strategies that meet consumer needs at a profit. International buying and promotional aspects of the apparel industry are emphasized. Lecture 3 hours per week. Prerequisite: AMPD major and AMPD 1013. (Typically offered: Fall and Spring)

AMPD 2013H. Honors Fashion, Buying and Promotion in a Global Market. 3 Hours.
Fashion components, marketing theories and practices as they specifically relate to apparel, home goods, and other design driven products in the global market. Focus on principles and techniques on how fashion marketers develop and apply marketing strategies that meet consumer needs at a profit. International buying and promotional aspects of the apparel industry are emphasized. Lecture 3 hours per week. Prerequisite: AMPD major, AMPD 1013 and honors standing. (Typically offered: Fall and Spring)
This course is equivalent to AMPD 2013.
AMPD 2033. Computer Based Methods for Apparel. 3 Hours.
This course is designed to give students basic experience with CAD (computer aided design) apparel industry software in a computer laboratory environment. Prerequisite: AMPD majors only, AMPD 1013, AMPD 1023 and ASTM 2903 or ISYS 1123 or equivalent. (Typically offered: Fall and Spring)
AMPD 2053. Introduction to Textile Science. 3 Hours.
Textile fibers and fabrics, their structure, properties, manufacture, wearing qualities and methods of laundering, finishing, and dyeing. Artistic and economic selection of materials for clothing and household furnishings. Lecture 3 hours per week. Prerequisite: HESC, AMPD or FCSE students only. (Typically offered: Fall and Spring)
AMPD 2063. Quality Assessment of Apparel. 3 Hours.
Study of apparel from the perspective of structure, aesthetics, cost and expected performance of the finished product. Lecture 2 hours per week, lab 2 hours per week. Prerequisite: AMPD 1023 and AMPD 2053. (Typically offered: Fall and Spring)

\section*{AMPD 2073. Flat Pattern Drafting. 3 Hours.}

A study of product development and production through flat pattern manipulation and the related vocabulary necessary to communicate professionally within the industry. Pre- or Corequisite: AMPD 2063. (Typically offered: Fall and Spring)

AMPD 3033. Merchandising Math for the Apparel Industry. 3 Hours.
Exploration of activities associated with the procurement of fashion apparel. A fashion analysis is directed toward apparel demands and the creation of a fashion statement by the use of specific quantitative skills. Course follows fashion item from the designer to the store. Lecture 3 hours per week. Prerequisite: MATH 1203 or three credit hours of STAT and AMPD 2013. (Typically offered: Fall and Spring)

\section*{AMPD 3043. Fashion Brand Management. 3 Hours.}

This course focuses on the fundamental elements of brand, the concept of brand equity, brand relationships with consumers, and the implications of technologies on the branding process in the fashion industry. The course topics include branding basics, the concept of brand equity, brand image, brand positioning, brand communications, the role of emotional and sensory experiences in fashion branding, luxury fashion brands, sustainable fashion branding management, and technology driven branding. Prerequisite: AMPD 2013. (Typically offered: Fall and Spring)

\section*{AMPD 3053. Computer Aided Textile Design. 3 Hours.}

This course is designed to give students advanced skills in textile design using industry based computer aided design (CAD) software. Prerequisite: AMPD 2033 and AMPD 2053 or instructor consent. (Typically offered: Fall and Spring)

\section*{AMPD 3063. Digital Apparel Production. 3 Hours.}

Use of industry specific computer aided software to perform pattern making, technical package, marketing, and other cross-functional team communication materials. Pre- or Corequisite: AMPD 2073, AMPD 2033, and AMPD 2063. (Typically offered: Fall and Spring)
AMPD 3071. Apparel Merchandising and Product Development Pre-Internship. 1 Hour.
A study of job descriptions, responsibilities at the management level, structural operations, work procedures, job performance evaluations, job application, the resume, and portfolio development in preparation for AMPD 4083, AMPD Internship. Lecture 1 hour per week. Prerequisite: AMPD majors only. (Typically offered: Spring)

\section*{AMPD 3203. Fashion Styling - UARC. 3 Hours.}

This course exposes students to the essential skills necessary for success in the field of fashion styling. Future stylists will learn the criteria to produce striking images for all visual media including entertainment, music, print and advertising. In addition, they will gain an understanding of the interdisciplinary collaborative nature within the creative process while working with directors, photographers and production crew. This course is only offered to AMPD students. This course will be offered by the University of Arkansas Rome Center, Italy. Prerequisite: AMPD majors only. (Typically offered: Fall)

\section*{AMPD 3213. Trend Forecasting - UARC. 3 Hours.}

Forecasting is one of the most rapidly growing research areas in fashion as well as in many other industry fields. Anticipating consumer demand is crucial and the ability to trend forecast is a skill required for product development. This course will enable students to develop trend forecasts by analyzing the global environment they live in using varied methodologies. The students will learn how to navigate between existing predictions and translate them for product development. This course is only offered to AMPD students. This course will be offered by the University of Arkansas Rome Center, Italy. Prerequisite: AMPD majors only. (Typically offered: Fall)

\section*{AMPD 4011. History of Apparel Through Film to 1900. 1 Hour.}

This course uses historic costume films to trace the evolution of clothing from ancient Egypt to the Twentieth Century. Emphasis is placed on societal aspects such as politics, religion, economy, technology, education, sports, class structure, and gender roles, and how they affect and change dress. Web-based course. (Typically offered: Fall and Spring)
AMPD 4023. Merchandising Application for the Apparel Industry. 3 Hours. Application of merchandising theory, principles and practices in a capstone class. An in depth study of innovative apparel business concepts as applied to manufacturers and retailers of apparel including apparel classification, seasonal cycles, stock emphasis, assortment strategies, target customers, and apparel trends. Includes an overview of marketing communication including advertising, personal selling, and sales promotion. Prerequisite: AMPD 3033 and AMPD 3043 and completed 75 credit hours or instructor consent. (Typically offered: Fall and Spring)

\section*{AMPD 4053. Historic and Contemporary Apparel. 3 Hours.}

This course traces the evolution of clothing from ancient times to the twentieth century with emphasis upon Western civilization and includes the study of contemporary fashion as a social force including the origin, scope, theory, and history of the fashion business, the materials of fashion, the fashion producers, auxiliary fashion enterprises, designers, fashion leaders, and leading market. Cultural and economic factors affecting dress, adornment and customs associated dress will be stressed. The Lecture 3 hours per week. Prerequisite: Completed 75 credit hours or instructor consent. (Typically offered: Fall and Spring)

\section*{AMPD 4063. Advanced Apparel Production. 3 Hours.}

An advanced study of product development incorporating technology used in the industry for a career in fashion merchandising and/or product development in a computer laboratory environment. Laboratory 6 hours per week. Prerequisite: AMPD 2063 and AMPD 2073. (Typically offered: Fall and Spring)

AMPD 4063H. Honors Advanced Apparel Production. 3 Hours.
An advanced study of product development incorporating technology used in the industry for a career in fashion merchandising and/or product development in a computer laboratory environment. Laboratory 6 hours per week. Prerequisite: AMPD 2033, AMPD 2063 and AMPD 2073 and honors candidacy. (Typically offered: Fall and Spring)
This course is equivalent to AMPD 4063.
AMPD 4073. Fashion Show Theory and Production. 3 Hours.
A study of the fashion show including the history, purpose, future of, and elements necessary to produce a successful show. A study of fashion show production through experiential project-based learning and committee membership planning and implementing a fashion show. (Typically offered: Spring)
AMPD 4083. Apparel Merchandising and Product Development Internship. 3 Hours.
A practical experience in a retail store or in a work situation related to the apparel industry to gain insight into the field of apparel merchandising and operations. Prerequisite: Junior standing and 2.50 cum GPA and AMPD 2013, AMPD 2033, AMPD 2063, AMPD 2073, AMPD 3033, AMPD 3043, AMPD 3071, COMM 1313 and instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

AMPD 4093. Apparel Merchandise Planning and Inventory Control. 3 Hours. Describes today's challenges for both apparel manufacturers and retailers in meeting the consumer's demands for the right products at the right prices - and at the right times. Follows the evolution of the merchandising function with emphasis on production efficiency, highlighting the philosophies of industry executives and the effective integration of the merchandising, store design, marketing, the apparel supply chain and manufacturing functions along the way. Prerequisite: (ECON 2143 or (ECON 2013 and ECON 2023) or (AGEC 1103 and AGEC 2103)) and AMPD 3033 and senior standing or instructor consent. (Typically offered: Fall and Spring)

\section*{AMPD 4103. Evolution of Fashion and Society Through Television Media. 3} Hours.
This course uses television programming from its early beginnings in the 1930s through to the twenty-first century to trace major events, societal changes, and the associated evolution of fashion. The course examines television both as an innovator and diffuser of fashion trends. (Typically offered: Fall and Spring)
AMPD 4111. History of Apparel Through Film from 1900 to Present. 1 Hour. This course uses historic costume films to trace the evolution of clothing from 1900 to Present. Emphasis is placed on societal aspects such as politics, religion, economy, technology, education, sports, class structure, and gender roles, and how they affect and change dress. Web based course. (Typically offered: Fall and Spring)

\section*{AMPD 4213. Fashion Illustration - UARC. 3 Hours.}

The purpose of this course is to develop the fundamentals skills necessary in fashion illustration. Students will be highly encouraged to use various mediums, and also utilize these skills to develop a individual style of drawing for their own design collections. This course is only offered to AMPD students. This course will be offered by the University of Arkansas Rome Center, Italy - Course\# FASHDRW-317. Prerequisite: AMPD majors only. (Typically offered: Fall)

AMPD 4223. Design Concepts for Fashion Merchandising - UARC. 3 Hours. This course examines the elements of research and design in fashion design, fabrications and merchandising. The student develops creative skills as well as an awareness of the various roles played by workers in the fashion industry. This course is only offered to AMPD students. This course will be offered by the University of Arkansas Rome Center, Italy - Course \# FASHDES-316. Prerequisite: AMPD majors only. (Typically offered: Fall)
AMPD 4233. Fashion Design - UARC. 3 Hours.
This course focuses on the key components of the fashion design process including research, trend forecasting, materials investigation and presentation of valuable, market-specific collections. Designers consider current market trends and design concepts as influences on merchandising. Extensive opportunities for the development and communication of a personal design vision in illustrated presentations helps students build portfolio-ready collections. Industry directed projects also provide opportunities to develop brand-conscious yet creative concepts and designs. CAD skills are utilized in a variety of presentational techniques. This course is only offered to AMPD students. This course will be offered by the University of Arkansas Rome Center, Italy - Course \# FASHDES-316. Prerequisite: AMPD majors only. (Typically offered: Fall)

\section*{AMPD 4243. Pattern Development II - UARC. 3 Hours.}

Students learn to drape basic bodice and skirt variations on standard industrial dress forms. Original garments are designed, draped and sewn. Accurate pattern-making, sewing and attention to design fundamentals are stressed throughout the course. This course is only offered to AMPD students. This course will be offered by the University of Arkansas Rome Center, Italy - Course\# FASD-311. Prerequisite: AMPD majors only. (Typically offered: Fall)

\section*{AMPD 4901. AMPD International Pre-Study Tour. 1 Hour.}

A study of specific regional and international fashion markets for apparel studies in preparation for AMPD 4912 AMPD International Study Tour. The course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets. AMPD 4901 is content specific to each AMPD 4912 international study tour and must be repeated for each study tour destination. A grade of " \(C\) " or better is required to participate in AMPD 4912. Prerequisite: 2.0 minimum GPA. AMPD majors with minimum 30 hours, or consent. (Typically offered: Spring and Summer) May be repeated for up to 4 hours of degree credit.

\section*{AMPD 4901H. Honors AMPD International Pre-Study Tour. 1 Hour.}

A study of specific regional and international fashion markets for apparel studies in preparation for AMPD 4912 AMPD Study Tour. The course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets. AMPD 4901 is content specific to each AMPD 4912 study tour and must be repeated for each study tour destination. A grade of "C" or better is required to participate in AMPD 4912. Prerequisite: 2.0 minimum GPA. AMPD majors with minimum 30 hours, or consent. (Typically offered: Spring and Summer) May be repeated for up to 4 hours of degree credit.
This course is equivalent to AMPD 4901.

\section*{AMPD 4912. AMPD International Study Tour. 2 Hours.}

An on-site study of international fashion markets for apparel merchandising and product development. Course further examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets as outlined in AMPD 4901. Course includes study trip; length based upon destination. Additional fees required. Course offered each May Intersession. Prerequisite: AMPD 4901 (with a C or better), 2.0 min . GPA, AMPD major with min. 30 hours, and instructor consent. Corequisite: AMPD 4901 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min . GPA, AMPD major with min. 30 hours, and instructor consent. (Typically offered: Summer) May be repeated for up to 6 hours of degree credit.

AMPD 4912H. Honors AMPD International Study Tour. 2 Hours.
An on-site study of international fashion markets for apparel merchandising and product development. Course further examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets as outlined in AMPD 4901. Course includes study trip; length based upon destination. Additional fees required. Course offered each May Intersession. Prerequisite: AMPD 4901 (with a C or better), 2.0 min . GPA, AMPD major with min. 30 hours, and instructor consent. Corequisite: AMPD 4901 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min . GPA, AMPD major with min. 30 hours, and instructor consent. (Typically offered: Summer) May be repeated for up to 8 hours of degree credit.
This course is equivalent to AMPD 4912.

\section*{AMPD 4921. AMPD New York City Pre-Study Tour. 1 Hour.}

A pre-study of the New York fashion market for apparel students. Course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets. Course is a pre-requisite for AMPD 4952 a 6 day field study in New York City, NY, May Intercession. This course is only offered to AMPD majors. Prerequisite: 2.0 minimum GPA, and students must be a AMPD majors with a minimum of 30 hours, or consent. (Typically offered: Spring)

\section*{AMPD 4921H. Honors AMPD New York City Pre-Study Tour. 1 Hour.}

A pre-study of the New York fashion market for apparel students. Course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets. Course is a pre-requisite for AMPD 4952 a 6 day field study in New York City, NY, May Intercession. This course is only offered to AMPD majors. Prerequisite: 2.0 minimum GPA, students must be a AMPD majors with a minimum of 30 hours, and honors standing or consent. (Typically offered: Spring) This course is equivalent to AMPD 4921.

\section*{AMPD 4931. AMPD Virtual Las Vegas Pre-Study Tour. 1 Hour.}

Course examines the buying function of apparel by exploring facets of technology currently being used in the fashion industry. Students will be digitally exposed to assortment planning, budgeting, open-to-buy, and the visual merchandising aspects of apparel retailing. Aspects of the MAGIC trade show held in Las Vegas will be discussed and analyzed. MAGIC is the most comprehensive fashion trade show in the U.S. for apparel, accessories, footwear, and sourcing materials. This course is a pre-requisite for AMPD 4962. This course is only offered to AMPD majors. Prerequisite: Students must have a 2.0 minimum GPA and must be an AMPD major with a minimum 30 hours completed, or consent. (Typically offered: Spring)

\section*{AMPD 4931H. Honors AMPD Virtual Las Vegas Pre-Study Tour. 1 Hour.} Course examines the buying function of apparel by exploring facets of technology currently being used in the fashion industry. Students will be digitally exposed to assortment planning, budgeting, open-to-buy, and the visual merchandising aspects of apparel retailing. Aspects of the MAGIC trade show held in Las Vegas will be discussed and analyzed. MAGIC is the most comprehensive fashion trade show in the U.S. for apparel, accessories, footwear, and sourcing materials. This course is a pre-requisite for AMPD 4962. This course is only offered to AMPD majors. Prerequisite: Students must have a 2.0 minimum GPA, must be an AMPD major with a minimum 30 hours completed, and must have honors standing or consent. (Typically offered: Spring)
This course is equivalent to AMPD 4931.

\section*{AMPD 4941. AMPD Las Vegas Pre-Study Tour. 1 Hour.}

A pre-study of the Las Vegas MAGIC trade show for apparel merchandising and product development. Course examines the design and production of a major trade show and the distribution of wholesale fashion goods to mass markets. Course is a pre-requisite for AMPD 4952 or AMPD 4952H a 6-day field study in Las Vegas, Nevada, August Intercession. This course is only offered to AMPD majors. Prerequisite: 2.0 minimum GPA, and students must be an AMPD major with a minimum of 30 hours, or consent. (Typically offered: Spring)

\section*{AMPD 4941H. Honors AMPD Las Vegas Pre-Study Tour. 1 Hour.}

A pre-study of the Las Vegas MAGIC trade show for apparel merchandising and product development. Course examines the design and production of a major trade show and the distribution of wholesale fashion goods to mass markets. Course is a pre-requisite for AMPD 4952 or AMPD 4952H a 6-day field study in Las Vegas, Nevada, August Intercession. This course is only offered to AMPD majors.
Prerequisite: 2.0 minimum GPA, students must be an AMPD major with a minimum of 30 hours, and have honors standing or consent. (Typically offered: Spring) This course is equivalent to AMPD 4941.

\section*{AMPD 4952. AMPD New York City Study Tour. 2 Hours.}

The course examines the application of business practices in the design, production, distribution and retailing of goods including sourcing, and manufacturing to mass markets. Students are expected to take an active role in the learning process for the duration of the study abroad experience, including critical thinking, problem identification and self-initiated inquiry. 2 credit hours Summer May Intersession enrollment includes study tour and related assignments to be completed on site. Corequisite: AMPD 4921 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 minimum GPA, AMPD major with minimum 30 hours, and instructor consent. Prerequisite: AMPD 4921 (with a C or better), 2.0 minimum GPA, AMPD major with minimum 30 hours, and instructor consent. (Typically offered: Spring)

This course is equivalent to AMPD 4972.

\section*{AMPD 5003. Apparel Sourcing and Merchandising Systems in the Global Economy. 3 Hours.}

Evaluation of key issues facing textiles and apparel supply chain businesses in the global economy considering economic, political, and social perspectives and professional implications. Lecture 3 hours. (Typically offered: Fall Odd Years)

AMPD 5023. Social, Psychological and Cultural Aspects of Dress. 3 Hours. Integration of social, psychological and cultural theories as they apply to appearance and clothing behavior. Lecture 3 hours. (Typically offered: Spring Even Years)
AMPD 5033. Issues and Trends in Textile Studies. 3 Hours.
Studies of advances in textile science and recent developments in the textile industry. Lecture 3 hours. (Typically offered: Fall Even Years)

AMPD 5043. Theories and Practices in Apparel Merchandising. 3 Hours. Theoretical perspectives, concepts and current practices that influence apparel merchandising. Lecture 3 hours. (Typically offered: Spring Odd Years)

\section*{AMPD 5063. Advanced Apparel Production. 3 Hours.}

An advanced study of product development incorporating technology used in the industry for a career in fashion merchandising and/or product development in a computer laboratory environment. Laboratory 6 hours per week. Graduate degree credit will not be given for both AMPD 4063 and AMPD 5063. Prerequisite: AMPD 2033, AMPD 2063 and AMPD 2073. (Typically offered: Fall and Spring)

AMPD 5093. Apparel Merchandise Planning and Inventory Control. 3 Hours. Describes today's challenges for both apparel manufacturers and retailers in meeting the consumer's demands for the right products at the right prices - and at the right times. Follows the evolution of the merchandising function with emphasis on production efficiency, highlighting the philosophies of industry executives and the effective integration of the merchandising, store design, marketing, the apparel supply chain and manufacturing functions along the way. Graduate degree credit will not be given for both AMPD 4093 and AMPD 5093. Prerequisite: AMPD 3033. (Typically offered: Fall and Spring)
AMPD 5103. Evolution of Fashion and Society Through Television Media. 3 Hours.
This course uses television programming from its early beginnings in the 1930s through to the twenty-first century to trace major events, societal changes, and the associated evolution of fashion. The course examines television both as an innovator and diffuser of fashion trends. Graduate degree credit will not be given for both AMPD 4103 and AMPD 5103. (Typically offered: Fall and Spring)

\section*{AMPD 5223. Merchandising Application for the Apparel Industry. 3 Hours.}

Application of merchandising theory, principles and practices in a capstone class. An in depth study of innovative apparel business concepts as applied to manufacturers and retailers of apparel including apparel classification, seasonal cycles, stock emphasis, assortment strategies, target customers, and apparel trends. Includes an overview of marketing communication including advertising, personal selling, and sales promotion. Graduate degree credit will not be given for both AMPD 4023 and AMPD 5223. Prerequisite: AMPD 3033 and AMPD 3043. (Typically offered: Fall and Spring)

\section*{AMPD 5233L. Computer Aided Textile Design. 3 Hours.}

This course is designed to give students advanced skills in textile design using industry based computer aided design (CAD) software. Lab 4 hours per week. Prerequisite: AMPD 2033 and AMPD 2053. (Typically offered: Fall and Spring)

AMPD 5253. Historic and Contemporary Apparel. 3 Hours.
This course traces the evolution of clothing from ancient times to the twentieth century with emphasis upon Western civilization and includes the study of contemporary fashion as a social force including the origin, scope, theory, and history of the fashion business, the materials of fashion, the fashion producers, auxiliary fashion enterprises, designers, fashion leaders, and leading market. Cultural and economic factors affecting dress, adornment and customs associated dress will be stressed. The Lecture 3 hours per week. Graduate degree credit will not be given for both AMPD 4053 and AMPD 5253. (Typically offered: Fall and Spring)

\section*{AMPD 5901. AMPD Pre-Study Tour. 1 Hour.}

A study of specific regional and international fashion markets for apparel studies in preparation for AMPD 5912 AMPD Study Tour. The course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets. AMPD 5901 is content specific to each AMPD 5912 study tour and must be repeated for each study tour destination. A grade of " C " or better is required to participate in AMPD 5912. Graduate degree credit will not be given for both AMPD 4901 and AMPD 5901. Prerequisite: 2.0 minimum GPA. AMPD majors with minimum 30 hours, or consent. (Typically offered: Spring and Summer) May be repeated for up to 4 hours of degree credit.

\section*{AMPD 5912. AMPD Study Tour. 2 Hours.}

An on-site study of specific regional and international fashion markets for apparel merchandising and product development. Course further examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets as outlined in AMPD 4901. Course includes study trip; length based upon destination. Additional fees required. Course will also be offered each May and August Intersession. Prerequisite: AMPD 4901 (with a C or better), 2.0 min . GPA, AMPD major with min. 30 hours, and instructor consent. Corequisite: AMPD 4901 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min . GPA, AMPD major with min. 30 hours, and instructor consent. (Typically offered: Summer) May be repeated for up to 8 hours of degree credit.

\section*{Applied Music (Class) (MUAC)}

\section*{Courses}

MUAC 1121. English and Italian Diction for Singers. 1 Hour.
Training in proper pronunciation and inflections of English and Italian as applied to singers. Two meetings per week. (Typically offered: Fall)

\section*{MUAC 1141. German and French Diction for Singers. 1 Hour.}

Training in proper pronunciation and inflection of German and French as applied to singing. Two meetings per week. Prerequisite: MUAC 1121. (Typically offered: Spring)

MUAC 1161. Class Instruction in Piano for Non-Music Majors. 1 Hour.
Beginning instruction in piano. Does not fulfill the class piano requirement for music majors. (Typically offered: Fall, Spring and Summer)

MUAC 1221. Piano Class for Music Majors I. 1 Hour.
Training in functional piano skills for music majors. Two meetings per week. Prerequisite: Music major and MUTH 1003. (Typically offered: Spring)

MUAC 1231. Piano Class for Music Majors II. 1 Hour.
A continuation of MUAC 1221. Two meetings per week. Upon successful completion of MUAC 1231 with a grade of B or better, credit for MUAC 1221 will also be given. Prerequisite: MUAC 1221 and a music major pursuing a degree of Bachelor of Arts or Honors Bachelor of Arts or Bachelor of Music or Honors Bachelor of Music. (Typically offered: Fall)

MUAC 1321. Class Instruction in Guitar. 1 Hour.
Beginning class instruction in guitar. Students must provide their own instruments. (Typically offered: Fall and Spring)

MUAC 1381. Class Instruction in Voice. 1 Hour.
Fundamentals of vocalization and singing of English songs, including breathing, vowel clarity, and pronunciation of consonants. (Typically offered: Fall and Spring)

MUAC 2112. Music Technology. 2 Hours.
Introduces skills for transcribing music using music notation software and sound reinforcement systems. Covers MIDI sequencing and audio recording and editing software to produce accompaniment tracks and create compact discs of music and multimedia projects. Prerequisite: Music major pursuing a Bachelor of Music or Honors Bachelor of Music degree, and sophomore standing. (Typically offered: Fall, Spring and Summer)

\section*{MUAC 2221. Piano Class for Music Majors III. 1 Hour.}

A continuation of MUAC 1231. Two meetings per week. Upon successful completion of MUAC 2221 with a grade of B or better, credit for MUAC 1221 and MUAC 1231 will also be given. Prerequisite: MUAC 1231 and a music major pursuing a degree of Bachelor of Arts or Honors Bachelor of Arts or Bachelor of Music or Honors Bachelor of Music. (Typically offered: Spring)

MUAC 2231. Piano Class for Music Major IV. 1 Hour.
A continuation of MUAC 2221. Two meetings per week. Upon successful completion of MUAC 2231 with a grade of B or better, credit for MUAC 1221, MUAC 1231, and MUAC 2221 will also be given. Prerequisite: MUAC 2221 and a music major pursuing a degree of Bachelor of Arts or Honors Bachelor of Arts or Bachelor of Music or Honors Bachelor of Music. (Typically offered: Fall)

MUAC 2321. Guitar Class Intermediate. 1 Hour.
Continues the development of several skills on the guitar such as rhythm playing, chord formations, sheet music reading, and melody presentation. Includes significant solo and group playing experiences. Prerequisite: MUAC 1321 or Instructor Consent. (Typically offered: Fall and Spring)

\section*{MUAC 3401. Jazz Improvisation I. 1 Hour.}

This course is the first in a four-semester sequence on the study of jazz improvisation with a linguistic approach. The class will cover the vocabulary and grammar of jazz, as well as rhetoric, story-telling and emotional performance. Each week students will be expected to be proficient in technical drills, harmonic and rhythmic vocabulary, and repertoire related to the four fundamental forms encompassed by the course. Transcriptions and writing assignments will also be given, and students will work with the Contrast Method of Improvisational Concepts, self-listening and analysis, performing the topics in class, group performance, and artistic development. (Typically offered: Fall)

\section*{MUAC 3411. Jazz Improvisation II. 1 Hour.}

This course is the second in a four-semester sequence on the study of jazz improvisation with a linguistic approach. The class will cover the vocabulary and grammar of jazz, as well as rhetoric, story-telling and emotional performance. Each week students will be expected to be proficient in technical drills, harmonic and rhythmic vocabulary, and repertoire related to the four fundamental forms encompassed by the course. Transcriptions and writing assignments will also be given, and students will work with the Contrast Method of Improvisational Concepts, self-listening and analysis, performing the topics in class, group performance, and artistic development. Prerequisite: MUAC 3401. (Typically offered: Spring)

MUAC 4371. Teaching the High School Percussionist. 1 Hour.
A study of solo literature and small and large ensemble literature appropriate for the high school percussionist. Emphasis on advanced snare drum and marimba lit., timpani and the broad range of percussionist instruments. Includes study of high school band, orchestra and percussion ensemble scores. Prerequisite: MUED 1371. (Typically offered: Irregular)

\section*{MUAC 4401. Jazz Improvisation III. 1 Hour.}

This course is the third in a four-semester sequence on the study of jazz improvisation with a linguistic approach. The class will cover the vocabulary and grammar of jazz, as well as rhetoric, story-telling and emotional performance. Each week students will be expected to be proficient in technical drills, harmonic and rhythmic vocabulary, and repertoire related to the four fundamental forms encompassed by the course. Transcriptions and writing assignments will also be given, and students will work with the Contrast Method of Improvisational Concepts, self-listening and analysis, performing the topics in class, group performance, and artistic development. Prerequisite: MUAC 3411. (Typically offered: Fall)

\section*{MUAC 4411. Jazz Improvisation IV. 1 Hour.}

This course is the fourth in a four-semester sequence on the study of jazz improvisation with a linguistic approach. The class will cover the vocabulary and grammar of jazz, as well as rhetoric, story-telling and emotional performance. Each week students will be expected to be proficient in technical drills, harmonic and rhythmic vocabulary, and repertoire related to the four fundamental forms encompassed by the course. Transcriptions and writing assignments will also be given, and students will work with the Contrast Method of Improvisational Concepts, self-listening and analysis, performing the topics in class, group performance, and artistic development. Prerequisite: MUAC 4401. (Typically offered: Spring)

MUAC 4421. Advanced Studies in Improvisation. 1 Hour.
Extends the techniques built in the improvisation course sequence (MUAC 3401, MUAC 3411, MUAC 4401, MUAC 4411) with specialized topics in a variety of improvisatory traditions. Sections may include "Free Jazz", "Coltrane and Chromaticism" "Atonal Improvisation", "Baroque Improvisation" and "World Music Improvisation". Prerequisite: MUAC 4411 or instructor consent. (Typically offered: Irregular) May be repeated for up to 2 hours of degree credit.
MUAC 5371. Teaching the High School Percussionist. 1 Hour.
A study of solo literature and small and large ensemble literature appropriate for the high school percussionist. Emphasis on advanced snare drum and marimba lit., timpani and the broad range of percussionist instruments. Includes study of high school band, orchestra and percussion ensemble scores. Graduate degree credit will not be given for both MUAC 4371 and MUAC 5371. Prerequisite: MUED 1371. (Typically offered: Irregular)
MUAC 5421. Advanced Studies in Improvisation. 1 Hour.
Extends the techniques built in the improvisation course sequence (MUAC 3401, MUAC 3411, MUAC 4401, MUAC 4411) with specialized topics in a variety of improvisatory traditions. Sections may include "Free Jazz", "Coltrane and Chromaticism" "Atonal Improvisation", "Baroque Improvisation" and "World Music Improvisation". Prerequisite: Instructor consent. (Typically offered: Irregular) May be repeated for up to 2 hours of degree credit.

MUAC 5482. Innovators of Jazz Seminar. 2 Hours.
Explores major 20th century figures in jazz as they relate to Black Music genres and the music of major jazz figures from the perspective of performance, composition, improvisation, and historical/cultural analysis. Significant interaction with major jazz guest artists and pedagogical experiences via interaction with the undergraduate jazz studies program. (Typically offered: Fall, Spring and Summer)

MUAC 6121. Advanced IPA for Singers. 1 Hour.
Training in proper use of the International Phonetic Alphabet (IPA), as needed for application in the choral setting. Pronunciation and inflections of commonly used languages in choral music (English, Italian, German and French) will be explored. (Typically offered: Irregular)

\section*{Applied Music (Private Instruction) (MUAP) \\ Courses}

\section*{MUAP 100V. Applied Secondary-Level Voice/Instrument I. 1-2 Hour.} Private study of secondary voice/instrument. Prerequisite: Instructor consent. (Typically offered: Fall and Spring) May be repeated for up to 4 hours of degree credit.

\section*{MUAP 110V. Applied Major Voice/Instrument I. 1-4 Hour.}

Private study of the primary voice/instrument for music majors. Admission to MUAP 110V requires the successful completion of audition for the instructor. Prerequisite: Music major. (Typically offered: Fall and Spring) May be repeated for up to 8 hours of degree credit.

\section*{MUAP 130V. Applied Skills Voice/Instrument I. 1-4 Hour.}

Private study of the primary voice/instrument for music majors. Continued development of fundamental musical and technical skills introduced in MUAP 110V. Prerequisite: Music major; recommendation of instructor. (Typically offered: Fall and Spring) May be repeated for up to 8 hours of degree credit.

\section*{MUAP 200V. Applied Secondary-Level Voice/Instrument II. 1-2 Hour.}

Continued private study of secondary voice/instrument. Instructor permission required to enroll. Prerequisite: Two semesters of MUAP 100V and recommendation of the instructor. (Typically offered: Fall and Spring) May be repeated for up to 4 hours of degree credit.

\section*{MUAP 210V. Applied Major Voice/Instrument II. 1-4 Hour.}

Continued private study of the primary voice/instrument for music majors. Prerequisite: Two semesters of MUAP 110 V with grades of \(B\) or better or MUAP 130V with a grade of B or better. (Typically offered: Fall and Spring) May be repeated for up to 8 hours of degree credit.

\section*{MUAP 230V. Applied Skills Voice/Instrument II. 1-4 Hour.}

Private study of the primary voice/instrument for music majors. Continued development of fundamental musical and technical skills introduced in MUAP 210V. Prerequisite: Two semesters of MUAP 210V and recommendation of instructor. (Typically offered: Fall and Spring) May be repeated for up to 8 hours of degree credit.

MUAP 300V. Applied Secondary-Level Voice/Instrument III. 1-2 Hour. Advanced private study of secondary voice/instrument. Prerequisite: Two semesters of MUAP 200V and recommendation of the instructor. (Typically offered: Fall and Spring) May be repeated for up to 4 hours of degree credit.

MUAP 310V. Applied Major Voice/Instrument III. 1-4 Hour.
Continuation of MUAP 210V. Private study of the primary instrument/voice for music majors at the advanced level. Admission requires approval of the faculty committee of the area of study (voice, piano, woodwind, brass, percussion). Mastery of fundamental/technical skills sufficient to prepare for a recital must be observable by the committee. Prerequisite: Two semesters of MUAP 210V with grades of \(B\) or better or MUAP 230V with a grade of B or better. (Typically offered: Fall and Spring) May be repeated for up to 8 hours of degree credit.

\section*{MUAP 310VH. Honors Applied Major Voice/Instrument III. 1-4 Hour.}

Continuation of MUAP 210V. Private study of the primary voice/instrument for honors music majors at the advanced level. Admission requires approval of faculty committee of the area of study (voice, piano, woodwind, brass, percussion). Mastery of fundamental/technical skills sufficient to prepare for a recital must be observable by the committee. Prerequisite: Two semesters of MUAP 210 V with grades of \(B\) or better or MUAP 230V with a grade of B or better; honors standing. (Typically offered: Fall and Spring) May be repeated for up to 8 hours of degree credit.
This course is equivalent to MUAP 310 V .

\section*{MUAP 3201. Applied Recital I. 1 Hour.}

Preparation and performance of a public recital of a minimum of 25 minutes of music. (Typically offered: Fall and Spring) May be repeated for degree credit.

\section*{MUAP 3201H. Honors Applied Recital I. 1 Hour.}

Preparation and performance of a public recital of a minimum of 50 minutes of music. Corequisite: MUAP 310VH. (Typically offered: Fall and Spring) May be repeated for degree credit.
This course is equivalent to MUAP 3201.

\section*{MUAP 330V. Applied Skills Voice/Instrument III. 1-4 Hour.}

Private study of the primary voice/instrument for music majors at the advanced level. Continued development of musical and technical skills introduced in MUAP 310V. Prerequisite: Two semesters of MUAP 310V and recommendation of instructor. (Typically offered: Fall and Spring) May be repeated for up to 8 hours of degree credit.

MUAP 400V. Applied Secondary-Level Voice/Instrument IV. 1-2 Hour. Continued advanced private study of secondary voice/instrument. Instructor permission required to enroll. Prerequisite: Two semesters of MUAP 300V and recommendation of the instructor. (Typically offered: Fall and Spring) May be repeated for up to 4 hours of degree credit.

\section*{MUAP 410V. Applied Major Voice/Instrument IV. 1-4 Hour.}

Continuation of MUAP 310V. Private study of the primary voice/instrument for music majors at the advanced level. Prerequisite: Two semesters of MUAP 310V with recommendation of instructor. (Typically offered: Fall and Spring) May be repeated for up to 8 hours of degree credit.

MUAP 410VH. Honors Applied Major Voice/Instrument IV. 1-4 Hour.
Continuation of MUAP 310VH. Private study of the primary voice/instrument for honors music majors at the advanced level. Prerequisite: Two semesters of MUAP 310VH, recommendation of instructor and honors standing. (Typically offered: Fall and Spring) May be repeated for up to 8 hours of degree credit.
This course is equivalent to MUAP 410 V .
MUAP 415V. Applied Skills Voice/Instrument IV. 1-4 Hour.
Private study of the primary voice/instrument for music majors at the advanced level in preparation for recital. Continued development of musical and technical skills introduced in MUAP 410V. Prerequisite: Two semesters of MUAP 410V and recommendation of instructor. (Typically offered: Fall and Spring) May be repeated for up to 8 hours of degree credit.

\section*{MUAP 4201. Applied Recital II. 1 Hour.}

Preparation and performance of a public recital of a minimum of 50 minutes of music. Prerequisite: MUAP 3201. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUAP 4201H. Honors Applied Recital II. 1 Hour.
Preparation and performance of a public recital of a minimum of 50 minutes of music. Corequisite: MUAP 410VH. (Typically offered: Fall and Spring) May be repeated for degree credit.
This course is equivalent to MUAP 4201.

\section*{MUAP 4301. Composition Recital. 1 Hour.}

Preparation and performance of a public recital of a minimum of 50 minutes consisting of original musical compositions. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUAP 500V. Applied Voice/Instrument-Secondary Level. 1-2 Hour.
Private study at the graduate secondary level. (Typically offered: Fall and Spring) May be repeated for degree credit.
MUAP 510V. Applied Voice/Instrument. 1-5 Hour.
Private study at the graduate level. (Typically offered: Fall and Spring) May be repeated for degree credit.

\section*{MUAP 520V. Graduate Recital I. 1-2 Hour.}

Preparation and performance of a public recital of a minimum of 50 minutes of music. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{MUAP 521V. Graduate Recital II. 1-2 Hour.}

Preparation and performance of a public recital of a minimum of 50 minutes of music. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

MUAP 610V. Applied Voice/Instrument. 1-6 Hour.
Private study at the graduate level. (Typically offered: Fall and Spring) May be repeated for degree credit.

\section*{MUAP 6203. Graduate Recital I. 3 Hours.}

Public 50-minute lecture recital consisting of a musical performance and scholarly presentation in consultation with the candidate's doctoral advisor. (Typically offered: Irregular)

\section*{MUAP 6213. Graduate Recital II. 3 Hours.}

Preparation and performance of a public recital of a minimum of 50 minutes of music. (Typically offered: Irregular)
MUAP 6223. Community Project for DMA Candidates. 3 Hours.
Community outreach project related to the candidate's area of interest. (Typically offered: Irregular)

\section*{Arabic (ARAB)}

\section*{Courses}

ARAB 1003. Elementary Arabic I. 3 Hours.
Stresses correct pronunciation, aural comprehension, simple speaking ability. Basic grammar is taught inductively through oral and written skills. (Typically offered: Spring)

\section*{ARAB 1013. Elementary Arabic II. 3 Hours.}

Continues to stress correct pronunciation, aural comprehension, simple speaking ability. Continued presentation of grammar with special attention to basic morphology. Prerequisite: ARAB 1003 or equivalent. (Typically offered: Fall)

\section*{ARAB 1016. Immersive Arabic I. 6 Hours.}

Equivalent to ARAB 1003 and ARAB 1013. Stresses rapid learning through daily interaction and immersion in a fun and friendly atmosphere. Supportive pedagogical practice focuses on developing communicative proficiency. Fundamentals of grammar are taught inductively through engaging assignments and activities designed to incrementally develop oral and written skills. (Typically offered: Fall)

ARAB 110V. Special Topics in Arab Culture. 1-3 Hour.
Formulates an informed picture of the Arab World. Through exploration of various aspects of the region and interaction with Arabs in the community, students are introduced to the richness and diversity of Arab cultures. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
ARAB 2003. Intermediate Arabic I. 3 Hours.
Leads to greater oral comprehension and speaking ability and develops the more advanced reading and writing skills. Prerequisite: ARAB 1013 or ARAB 1016 or equivalent. (Typically offered: Spring)

\section*{ARAB 2013. Intermediate Arabic II. 3 Hours.}

Continued development of speaking, comprehension, reading, and writing. Emphasizes morphology and syntax. (Typically offered: Irregular)

\section*{ARAB 2016. Immersive Arabic II. 6 Hours.}

Continued emphasis on immersive learning through daily interaction. Leads to greater oral comprehension and speaking ability and develops the more advanced reading and writing skills. Emphasizes morphology and syntax. Focuses on expanding cultural awareness. Prerequisite: ARAB 1013 or ARAB 1016. (Typically offered: Spring)

\section*{ARAB 2016H. Honors Immersive Arabic II. 6 Hours.}

Continued emphasis on immersive learning through daily interaction. Leads to greater oral comprehension and speaking ability and develops the more advanced reading and writing skills. Emphasizes morphology and syntax. Focuses on expanding cultural awareness. Prerequisite: Honors standing and (ARAB 1013 or ARAB 1016). (Typically offered: Spring)
This course is equivalent to ARAB 2016.
ARAB 3016. Immersive Arabic III. 6 Hours.
Leads to greater facility in the spoken language and continues to develop reading and writing skills. Continued broadening of cultural awareness and emphasis on morphology and syntax. Prerequisite: ARAB 2016. (Typically offered: Fall)
ARAB 3016H. Honors Immersive Arabic III. 6 Hours.
Leads to greater facility in the spoken language and continues to develop reading and writing skills. Continued broadening of cultural awareness and emphasis on morphology and syntax. Prerequisite: Honors standing and (ARAB 2016 or ARAB 2016H). (Typically offered: Fall)
This course is equivalent to ARAB 3016.
ARAB 3033. Colloquial Arabic. 3 Hours.
Development of aural comprehension and speaking skills in one of the major Arabic dialects. Prerequisite: (ARAB 1003 and ARAB 1013) or ARAB 1016 or equivalent. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{ARAB 4016. Immersive Arabic IV. 6 Hours.}

Continued development of speaking, comprehension, reading, writing. Reading assignments introduce a variety of styles ranging from classical to modern in both prose and verse. Prerequisite: ARAB 3016. (Typically offered: Spring)

\section*{ARAB 4016H. Honors Immersive Arabic IV. 6 Hours.}

Continued development of speaking, comprehension, reading, writing. Reading assignments introduce a variety of styles ranging from classical to modern in both prose and verse. Prerequisite: Honors standing and (ARAB 3016 or ARAB 3016H). (Typically offered: Spring)
This course is equivalent to ARAB 4016.

\section*{ARAB 4023. Advanced Arabic I. 3 Hours.}

Development of advanced speaking and writing skills. Extensive reading and writing assignments and translating exercises from English into Arabic. Prerequisite: ARAB 4016. (Typically offered: Irregular)

\section*{ARAB 4033. Advanced Arabic II. 3 Hours.}

Continued advanced speaking, reading, and writing skills. Prerequisite: ARAB 4023. (Typically offered: Irregular)

\section*{ARAB 4053. Arabic Readings. 3 Hours.}

Develops skills in description, analysis, and argumentation within a workshop atmosphere. Readings are drawn from various styles of standard Arabic, ranging from newspapers to literary texts. The thematic focus of the course varies. Prerequisite: ARAB 4016 or equivalent. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{ARAB 4113. Modern Arabic Literature. 3 Hours.}

Selected readings from Arabic fiction and poetry from the 20th century to the present. Prerequisite: ARAB 4023 or equivalent. (Typically offered: Irregular)

\section*{ARAB 4213. Arab Culture and Civilization.. 3 Hours.}

Selected readings from Arab history, literature, the Islamic Tradition, and the Holy Qur'an. Prerequisite: ARAB 4016 or equivalent. (Typically offered: Irregular)

ARAB 470V. Special Topics. 1-6 Hour.
May be offered in a topic not specifically covered by courses otherwise listed. (Typically offered: Irregular) May be repeated for degree credit.
ARAB 570V. Special Topics. 1-6 Hour.
May be offered in a topic not specifically covered by courses otherwise listed. Graduate degree credit will not be given for both ARAB 470V and ARAB 570V. (Typically offered: Irregular) May be repeated for degree credit.

\section*{Architecture and Design (ARDS)}

\section*{Courses}

ARDS 3153. Methods of Design Inquiry. 3 Hours.
Investigation into practical, theoretical, and methodological strategies for embarking upon design inquiry and discourse. Practical issues of method are examined. A range of tools for interpreting architecture, landscape architecture and interior design are surveyed. Honors students will produce a prospectus for their Honors Capstone. Prerequisite: Fay Jones School students in third year or Honors candidacy. (Typically offered: Spring)

\section*{ARDS 3153H. Honors Methods of Design Inquiry. 3 Hours.}

Investigation into practical, theoretical, and methodological strategies for embarking upon design inquiry and discourse. Practical issues of method are examined. A range of tools for interpreting architecture, landscape architecture and interior design are surveyed. Honors students will produce a prospectus for their Honors Capstone. Prerequisite: Fay Jones School students in third year or Honors candidacy. (Typically offered: Spring)
This course is equivalent to ARDS 3153.

\section*{ARDS 5143H. Honors Capstone. 3 Hours.}

Development dependent upon the synthesis of knowledge and application of critical, reflective thinking addressing architectural, landscape architectural and/or interior design issues. A diversity of interests and modes or inquiry are encouraged. All capstones must include a written research on the topic of investigation. Prerequisite: ARDS 3153 and honors candidacy. (Typically offered: Fall and Spring)

\section*{ARDS 6023. Design Seminar. 3 Hours.}

Advanced seminars of special interest to students and faculty that are not covered in other courses. Prerequisite: Admission to the Master of Design Program (DSGNMDS). (Typically offered: Irregular) May be repeated for degree credit.

\section*{ARDS 6723. Methods of Design Inquiry. 3 Hours.}

Investigation into the practical, theoretical, and methodological strategies necessary for embarking upon inquiry and discourse for design-related problems. Pre- or Corequisite: Admission into the Master of Design program. (Typically offered: Fall)

ARDS 6803. Design Leadership. 3 Hours.
Explores leadership through conceptual and theoretical perspectives. Emphasis is on developing and managing effective design processes, methods, and organizations enabling innovative design practices. Students will explore contemporary issues and forces that affect the conditions of how design is embedded in thought leadership. Pre- or Corequisite: Admission into the Master of Design program. (Typically offered: Spring)

ARDS 6813. Cities and Public Good. 3 Hours.
Studies infrastructure as socio-technical systems and potential transitions to lowercarbon futures. Concepts governing Large Technical Systems such as obduracy, path-dependency, energy transitions, value capture, and public good are explored through analytic frameworks like Multi-level Perspectives (MLP) and Socio-technical Systems Theory (STS) in the context of incumbent technologies. Pre- or Corequisite: Admission into the Master of Design program. (Typically offered: Fall and Spring)

\section*{ARDS 6823. Vocabularies of Context Production. 3 Hours.}

Explores connectivity through spatial and organizational formats from urbanism to supply chains, ecosystems, resource sheds, infrastructure, neighborhoods, eco-districts, and other public spaces. In addition to the traditional categories of geometry, proportion, and fit used to define place, vocabularies of flow, timing, interactivity, phasing, modulation, distribution, and emergence will be examined. Preor Corequisite: Admission into the Master of Design program. (Typically offered: Fall and Spring)

ARDS 6833. Wood Theories, Tectonics and Environmental Response. 3 Hours. Investigate wood design through theoretical, technical and practical inquiry emphasizing tectonics responding to a range of material and environmental aspects. Focused study of wood's physical properties, functions, and behavior in manufactured and constructed assemblies. Current and future global issues, industry, economy, and the design of the constructed environment are explored. Prerequisite: Admission to the Master of Design Studies Degree. (Typically offered: Fall)

\section*{ARDS 6843. Advanced Wood Production Processes. 3 Hours.}

Examine performative wood design at the intersection of cutting edge of fabricationproduction technologies and the material assembly at multiple scales to expand the limits of current practice. Opportunities for wood design are re-examined in light of evolving digital technologies, practices and theories of making. Prerequisite: Admission to the Master of Design Studies Program. (Typically offered: Spring)

\section*{ARDS 6853. Health and Wellness in the Built Environment. 3 Hours.}

Advanced seminar examining the interactions of health and wellbeing in the built environment. Physiological and psychosocial wellness concepts are examined across multiple scales and settings. Prerequisite: Admission to the Master of Design Studies program or permission of instructor. (Typically offered: Fall)

ARDS 6906. Advanced Design Studio. 6 Hours.
A topical design studio investigating project development dependent upon the synthesis of knowledge and application of critical thinking to complex environmental design problems. The intimate relationship between architecture, place and culture is used to create connection and relevance in the built environment. Pre- or Corequisite: Admission into the Master of Design program. (Typically offered: Fall)

\section*{ARDS 6916. Advanced Design Studio II. 6 Hours.}

An advanced topical design studio utilizing methods from domains external to design disciplines. Project resolution requiring skill in generating design ideas developed through strategic planning and responding to sociopolitical, economic, and environmental drivers. Pre- or Corequisite: Admission into the Master of Design program. Prerequisite: Completion of ARDS 6906. (Typically offered: Spring)

\section*{ARDS 6926. Graduate Residency. 6 Hours.}

Experiential learning integrating knowledge and theory in professional environment. This guided experience will facilitate career development, professional relationships, and provide a critical opportunity to apply new skills and knowledge to real problems. Pre- or Corequisite: Admission into the Master of Design program. Prerequisite: Completion of ARDS 6906 and ARDS 6916. (Typically offered: Summer)

\section*{ARDS 693V. Extended Graduate Residency. 1-6 Hour}

Experiential learning integrating knowledge and theory in professional environment. This guided experience will facilitate career development, professional relationships, and provide a critical opportunity to apply new skills and knowledge to real problems. Pre- or Corequisite: Admission into the Master of Design Studies program. Prerequisite: Completion of ARDS 6906 and ARDS 6916. (Typically offered: Fall and Spring) May be repeated for degree credit.

\section*{Architecture (ARCH)}

\section*{Courses}

ARCH 1003. Basic Course in the Arts: Architecture Lecture. 3 Hours.
A general introduction to architecture, exploring the designed environment, including cities and buildings and their histories, technologies and users, in a holistic manner. May not be presented towards satisfaction of major requirements in either the B.Arch or B.A. in architectural studies degrees. (Typically offered: Fall and Spring)

ARCH 1003H. Honors Basic Course in the Arts: Architecture Lecture. 3 Hours. A general introduction to architecture, exploring the designed environment, including cities and buildings and their histories, technologies, and users, in a holistic manner. May not be presented towards satisfaction of major requirements in either the B.Arch or B.A. in architectural studies degrees. Prerequisite: Honors candidacy. (Typically offered: Fall)
This course is equivalent to ARCH 1003.
ARCH 1013. Diversity and Design. 3 Hours.
Explores the reciprocal relationship between diversity and design in America, investigating how race, gender, religion, ability, age, class, and location affect and are affected by the design of media, products, architecture, and cities/regions. Positive and negative effects of diversity and design are discussed. (Typically offered: Summer)

ARCH 1015. Fundamental Design Skills. 5 Hours.
Fundamental design skills; development of visual and verbal communication skills including observation skills, design technologies, analysis and representation in both 2-dimensions and 3-dimensions through analog and digital tools; creative and critical thinking skills. (Typically offered: Fall and Spring)

\section*{ARCH 1025. Fundamental Design Methodology. 5 Hours.}

Fundamental design skills; use of precedents for understanding principles of design and natural and formal ordering systems; design development using both iterative and alternative methods of exploration in both 2-dimensions and 3-dimensions using analog and digital tools; continued development of visual and verbal communication skills. Prerequisite: ARCH 1015. (Typically offered: Spring and Summer)

ARCH 1212. Design Thinking I: Foundations in Technology. 2 Hours.
This course will raise pertinent questions about the role of architectural technology in design through studying the important theories about technology from Vitruvius to contemporary practice and understanding how they have been manifested in built form. (Typically offered: Fall and Summer)

ARCH 1222. Design Thinking II: Foundations in History. 2 Hours.
Explores the role of architectural history in design thinking, introducing divergent canons and traditions in a global context and emphasizing understanding of the relationships among buildings, spaces and places and the social, political and technological circumstances in which the work was theorized, produced, and lived. Prerequisite: ARCH 1212. (Typically offered: Spring and Summer)

ARCH 1600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

\section*{ARCH 2016. Architectural Design III. 6 Hours}

Introduction of formal principles and strategies used in space making, focusing on the development of plans and sections. Precedents and the understanding of them through analysis and syntheses are used as a means of examining the past and the present while providing a framework from which personal design sensibilities can evolve. Corequisite: ARCH 2113 and ARCH 2132 and ARCH 2233. Prerequisite ARCH 1025 and ARCH 1222. (Typically offered: Fall)

\section*{ARCH 2026. Architectural Design IV. 6 Hours.}

An elaboration of space-making, addressing three-dimensional aspects of formmaking, including the influence of structural systems, articulation of the vertical section, and exterior expression; the role of site as a generator of form; and the overarching importance of technics, including the materiality of space, structure, and light. Corequisite: ARCH 2123 and ARCH 2243. Prerequisite: ARCH 2016 and ARCH 2113 and ARCH 2132 and ARCH 2233. (Typically offered: Spring)

ARCH 2113. Architectural Structures I. 3 Hours.
Introduction to statics and strength of materials. Building loads are examined as to their effect on the elements of architectural projects. Simple post and beam structures are the focus of this course. Bending, axial, and shear stress are examined in beams and columns. Materials studied include wood, steel, and concrete. Corequisite: ARCH 2016 and ARCH 2132. Prerequisite: ARCH 1212. (Typically offered: Fall)

\section*{ARCH 2113H. Honors Architectural Structures I. 3 Hours.}

Introduction to statics and strength of materials. Building loads are examined as to their effect on the elements of architectural projects. Simple post and beam structures are the focus of this course. Bending, axial, and shear stress are examined in beams and columns. Materials studied include wood, steel, and concrete. Corequisite: ARCH 2016 and ARCH 2132. Prerequisite: ARCH 1212. (Typically offered: Fall)
This course is equivalent to ARCH 2113.

\section*{ARCH 2123. Architectural Structures II. 3 Hours.}

Introduction to the basic theories of structures, structural behavior, and the design of simple structural systems capable of resisting gravity and lateral forces. Provides a basic understanding of structural behavior, organization of framing systems and location of lateral force resisting elements for building structures and other technical systems. Corequisite: ARCH 2026. Prerequisite: ARCH 2113 and ARCH 2132. (Typically offered: Spring)

\section*{ARCH 2123H. Honors Architectural Structures II. 3 Hours.}

Introduction to the basic theories of structures, structural behavior, and the design of simple structural systems capable of resisting gravity and lateral forces. Provides a basic understanding of structural behavior, organization of framing systems and location of lateral force resisting elements for building structures and other technical systems. Corequisite: ARCH 2026. Prerequisite: ARCH 2113, ARCH 2132 and honors candidacy. (Typically offered: Spring)
This course is equivalent to ARCH 2123.

\section*{ARCH 2132. Environmental Technology I. 2 Hours.}

Introduces theories and concepts of the building thermal, luminous and sonic environments with focus on solar geometry-shading, climate-thermal stresses, natural ventilation, daylight, sound isolation and noise control. The application of these systems to support the design of an environmentally responsive building and its enclosure is addressed. Corequisite: ARCH 2016 and ARCH 2113. Prerequisite: ARCH 1212. (Typically offered: Fall)

\section*{ARCH 2132H. Honors Environmental Technology I. 2 Hours.}

Introduces theories and concepts of the building thermal, luminous and sonic environments with focus on solar geometry-shading, climate-thermal stresses, natural ventilation, daylight, sound isolation and noise control. The application of these systems to support the design of an environmentally responsive building and its enclosure is addressed. Corequisite: ARCH 2016 and ARCH 2113. Prerequisite: ARCH 1212. (Typically offered: Fall)
This course is equivalent to ARCH 2132.
ARCH 2233. History of Architecture I. 3 Hours.
Critical study and analysis of world architecture from ancient times through the Middle Ages, comprising the ancient Americas, Asia, Mesopotamia, and Egypt; Classical, Byzantine, and Islamic architecture and vernacular design; and the early Christian, Romanesque, and Gothic periods. (Typically offered: Fall)

\section*{ARCH 2233H. Honors History of Architecture I. 3 Hours.}

Critical study and analysis of world architecture from ancient times through the Middle Ages, comprising the ancient Americas, Asia, Mesopotamia, and Egypt; Classical, Byzantine, and Islamic architecture and vernacular design; and the early Christian, Romanesque, and Gothic periods. Prerequisite: Honors candidacy. (Typically offered: Fall)
This course is equivalent to ARCH 2233.
ARCH 2243. History of Architecture II. 3 Hours.
Critical study and analysis of world architecture from the fifteenth to the midnineteenth centuries. Encompasses early modern Europe (Renaissance, Baroque, and Neoclassical) as well as two or more of the following: colonial New Spain, early modern Japan, and/or early modern Islamic empires in Africa, the Middle East, and Asia. Vernacular American building is surveyed as well as architecture in the nineteenth-century, including Beaux-Arts design and the introduction of industrial materials. Prerequisite for architecture majors only: ARCH 2233. (Typically offered: Spring)

\section*{ARCH 2243H. Honors History of Architecture II. 3 Hours.}

Critical study and analysis of world architecture from the fifteenth to the midnineteenth centuries. Encompasses early modern Europe (Renaissance, Baroque, and Neoclassical) as well as two or more of the following: colonial New Spain, early modern Japan, and/or early modern Islamic empires in Africa, the Middle East, and Asia. Vernacular American building is surveyed as well as architecture in the nineteenth-century, including Beaux-Arts design and the introduction of industrial materials. Prerequisite: Architecture majors only. Corequisite: ARCH 2233 and honors candidacy. (Typically offered: Spring)
This course is equivalent to ARCH 2243.

\section*{ARCH 2600. Undergraduate Research Assistant. 0 Hours.}

Undergraduate research. (Typically offered: Fall, Spring and Summer)
ARCH 2993. Art and Culture in Italy. 3 Hours.
The evolution of culture and aesthetics and their immediate relationship with the creation of Italy's masterpieces in art and architecture. Includes site visits and lectures. Offered in the Rome study abroad semester. (Typically offered: Fall and Spring)

\section*{ARCH 3016. Architectural Design V. 6 Hours.}

Emphasis on issues of design process, exploration of internal and external determinants of form and the integration of appropriate technologies in design solutions. Corequisite: ARCH 4433. Prerequisite: ARCH 2026 and ARCH 2123 and ARCH 2243. (Typically offered: Fall)

\section*{ARCH 3026. Architectural Design VI. 6 Hours.}

Studio-based analysis and design of structural and enclosure systems for buildings with particular emphasis on systems interface and application within the context of design exercises. Investigations of the appropriate use of materials and assemblies for varied programmatic and environmental criteria. Twelve hours of studio each week. Corequisite: ARCH 4523. Prerequisite: ARCH 3016 and ARCH 3143. (Typically offered: Spring)

\section*{ARCH 303V. Special Projects. 1-6 Hour.}

Individual or group investigation in research, visual communication, history, or design concerning special interests of student or faculty. (Typically offered: Irregular) May be repeated for degree credit.

ARCH 303VH. Honors Special Projects. 1-6 Hour.
Individual or group investigation in research, visual communication, history, or design concerning special interests of student or faculty. Prerequisite: Honors candidacy. (Typically offered: Irregular) May be repeated for degree credit. This course is equivalent to ARCH 303 V .

\section*{ARCH 3143. Building Materials and Assemblies. 3 Hours.}

Introduction and comprehensive survey of primary building materials and methods of assembly: their history, properties, use and configuration - both traditional and contemporary, in the service of building construction; their impact on the form, expression and performance of building structures and envelopes. Prerequisite: ARCH 2132, ARCH 2113 and ARCH 2123. (Typically offered: Fall)

\section*{ARCH 3253. Environmental Technology II. 3 Hours.}

Covers theoretical foundations and applications of building environmental systems: HVAC with duct layout and controls, indoor air quality, electric lighting, power, acoustics, fire safety and egress, and water and waste. The important role of such systems in the design of buildings is examined through a series of small projects assignments. Prerequisite: ARCH 3016 and ARCH 3143. (Typically offered: Spring)

\section*{ARCH 3600. Undergraduate Research Assistant. 0 Hours.}

Undergraduate research. (Typically offered: Fall, Spring and Summer)

\section*{ARCH 4016. Comprehensive Studio. 6 Hours.}

Emphasis on issues of typology, context and technological suitability as sources of theoretical and developmental responses. Corequisite: ARCH 4152. Prerequisite: ARCH 3026. (Typically offered: Fall)

ARCH 4023. Advanced Architectural Studies. 3 Hours.
Advanced seminars in subjects to special interest to students and faculty. (Typically offered: Fall and Spring) May be repeated for degree credit.

ARCH 4023H. Honors Advanced Architectural Studies. 3 Hours.
Advanced seminars in subjects to special interest to students and faculty.
Prerequisite: Honors candidacy. (Typically offered: Fall and Spring) May be repeated for degree credit.
This course is equivalent to ARCH 4023.
ARCH 4116. Architectural Design - Rome. 6 Hours.
Investigation of complex design problems in the context of the city of Rome, utilizing advanced issues in architectural design and planning. Prerequisite: ARCH 3026 or ARCH 4016. (Typically offered: Fall and Spring)

\section*{ARCH 4126. Architectural Design Latin America. 6 Hours.}

Introduces a complex social and physical urban condition through a process of formal analysis and design executed in a designated country augmented by an intense graphic investigation of urban form encountered through related field trips to the distinct cultural and geographic regions. Prerequisite: ARCH 3026 or ARCH 4016. (Typically offered: Summer)

\section*{ARCH 4152. Building Systems Integration. 2 Hours.}

Promotes the synthesis of building technologies, systems selection and integration in the resolution of a building design. Specifically, the student demonstrates knowledge in the ability to generate digital and analog graphic resolutions highlighting the design response of material, structural and environmental systems in a building. Corequisite: ARCH 4016. Prerequisite: ARCH 2113 and ARCH 2123 and ARCH 2132 and ARCH 3143 and ARCH 3253. (Typically offered: Fall and Spring)

\section*{ARCH 4152H. Honors Building Systems Integration. 2 Hours.}

Promotes the synthesis of building technologies, systems selection and integration in the resolution of a building design. Specifically, the student demonstrates knowledge in the ability to generate digital and analog graphic resolutions highlighting the design response of material, structural and environmental systems in a building. Corequisite: ARCH 4016. Prerequisite: ARCH 2113 and ARCH 2123 and ARCH 2132 and ARCH 3143 and ARCH 3253. (Typically offered: Fall and Spring) This course is equivalent to ARCH 4152.

\section*{ARCH 4433. History of Architecture III. 3 Hours.}

Critical study and analysis of the history and theories of modern architecture from the mid-nineteenth century to the present. Prerequisite: ARCH 2233 and ARCH 2243 or IARD 2883. (Typically offered: Fall)

ARCH 4433H. Honors History of Architecture III. 3 Hours.
Critical study and analysis of the history and theories of modern architecture from the mid-nineteenth century to the present. Prerequisite: ARCH 2233, ARCH 2243 and honors candidacy. (Typically offered: Fall)
This course is equivalent to ARCH 4433.
ARCH 4523. Architectural Theory. 3 Hours.
Introduction to the lexicon of architecture and the ideas and ideologies that provide the conceptual and critical infrastructure for the discipline. Reading and discussion of representative theory texts. Emphasis on twentieth century modernism and postmodernism, including contemporary speculations on possible and emerging forms of practice after theory. Prerequisite: ARCH 2233, ARCH 2243, and ARCH 4433. (Typically offered: Spring)

\section*{ARCH 4523H. Honors Architectural Theory. 3 Hours.}

Introduction to architectural theories and their relationship to modern historiography. Case studies are employed for the critical evaluation of significant texts and the discernment of concepts embedded in textual structures. Reading theory through established historical categories establishes critical insight to the original deployment, negation and resurfacing of architectural theories. Prerequisite:
ARCH 2233, ARCH 2243, and ARCH 4433. (Typically offered: Spring)
This course is equivalent to ARCH 4523.
ARCH 4600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)
ARCH 4653. Architecture of the City. 3 Hours.
Analysis of Rome's urban form and historical and theoretical information in support of the students' experience. Includes site visits and lectures. Offered in the Rome study abroad semester. (Typically offered: Fall and Spring)

\section*{ARCH 4653H. Honors Architecture of the City. 3 Hours.}

Analysis of Rome's urban form and historical and theoretical information in support of the students' experience. Includes site visits and lectures. Offered in the Rome study abroad semester. Prerequisite: Honors standing. (Typically offered: Fall and Spring)
This course is equivalent to ARCH 4653.

\section*{ARCH 4673. Modern and Contemporary Rome. 3 Hours.}

Explores different local conditions that determine main architectural changes that have taken place in Rome during the last century of its urban history. Important works, leading figures and major concepts in contemporary European architecture will be described to introduce examples of modern and contemporary architecture in Rome. (Typically offered: Fall and Spring)

\section*{ARCH 4673H. Honors Modern and Contemporary Rome. 3 Hours.}

Explores different local conditions that determine main architectural changes that have taken place in Rome during the last century of its urban history. Important works, leading figures and major concepts in contemporary European architecture will be described to introduce examples of modern and contemporary architecture in Rome. Prerequisite: Honors standing. (Typically offered: Fall and Spring)
This course is equivalent to ARCH 4673.
ARCH 4853. Renaissance and Baroque Architecture. 3 Hours.
Study of Renaissance and Baroque architecture in Europe and the New World from 1400 to 1700 . With reference to an array of texts, drawings, and the edifices themselves, this course charts the evolution of a commanding Western architectural tradition. Renaissance and Baroque -- with close attention to the social, humanistic, and religious contexts that produced it. Prerequisite: ARCH 4433. (Typically offered: Irregular)
This course is equivalent to ARHS 4753.

\section*{ARCH 4863H. Honors St. Peter's and the Vatican. 3 Hours.}

Examines art and architectural history of St. Peter's Basilica in Rome from antiquity to present. Emphasis on the Renaissance/Baroque church and its early Christian predecessor. Students consider the impact of devotional practices and papal politics on the church, the Vatican Palace, and its renown artworks including the Sistine ceiling. Prerequisite: ARCH 2233 or ARCH 2233H, and ARCH 2243 or ARCH 2243H and ARCH 4433 or ARCH 4433H. (Typically offered: Irregular)
This course is equivalent to ARHS 4733.
ARCH 4933. Introduction to Historic Preservation. 3 Hours.
Introduces theoretical, methodological and practical issues of architectural preservation in Europe and, more specifically, in Italy. Addresses history and theory of restoration, basic principles of architectural preservation and methodology in the study and praxis of preservation applied to architecture and the issues posed by the preservation of modern architecture. (Typically offered: Fall and Spring)

ARCH 5016. Option Studio I. 6 Hours.
Project development dependent upon the synthesis of knowledge and application of critical thinking addressing architectural issues at multiple scales. Prerequisite: ARCH 4016, or ARCH 4116, or ARCH 4126. (Typically offered: Fall) May be repeated for degree credit.

\section*{ARCH 5026. Option Studio II. 6 Hours.}

Project resolution including demonstrated skill in generating design ideas supported by clear understanding of issues resulting in comprehensive development and presentation of architectural issues at multiple scales. (Typically offered: Spring) May be repeated for degree credit.

\section*{ARCH 5314. Architectural Professional Practice. 4 Hours.}

Study of role and responsibility of the architect, owner, and contractor relationships; professional ethics; organization of the architect's office; contracts and other documents; risk management strategies; and the preparation of the technical specifications and bidding documents of the Project Manual. Prerequisite: ARCH 4016 or ARCH 4116 or ARCH 4126. (Typically offered: Fall)

\section*{ARCH 5493. History of Urban Form. 3 Hours.}

The study of pre-industrial urban and architectural design strategies in cities from the Classical through the Baroque eras and their rediscovery in the late 20th century, providing the student with a designer's understanding of a broad range of exemplary urban spaces and the buildings that shape them. Prerequisite: ARCH 2233 and ARCH 2243 and ARCH 4433. (Typically offered: Irregular)

\section*{ARCH 5493H. Honors History of Urban Form. 3 Hours.}

The study of pre-industrial urban and architectural design strategies in cities from the Classical through the Baroque eras and their rediscovery in the late 20th century, providing the student with a designer's understanding of a broad range of exemplary urban spaces and the buildings that shape them. Prerequisite: ARCH 2233 and ARCH 2243 and ARCH 4433. (Typically offered: Irregular)
This course is equivalent to ARCH 5493.

\section*{ARCH 5953. Preservation Practice Field Trip. 3 Hours.}

Intensive field study of a domestic or foreign site of significant or precedentsetting preservation activity, through a field trip and a course of pre-travel lectures. (Intersessions) Prerequisite: ARCH 4943 or instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{Army ROTC (MILS)}

\section*{Courses}

MILS 1001. Introduction to the Army. 1 Hour.
This course focuses on small group leadership and introducing the student to the Army as an organization. Students learn time management, drill and ceremony, military customs and courtesies, basic map reading, water safety and first aid. Introduction to the organization, values, ethics, personal development and the role of the Army. Classroom 1 hour per week. Lab 2 hours per week. Corequisite: Lab component. (Typically offered: Fall)

MILS 1011. Foundations of Agile and Adaptive Leadership. 1 Hour.
Continuation of MILS 1001. Topics include the Army Profession and what it means to be a professional in the U.S. Army, the Army Leadership Requirements Model, intermediate map reading/orienteering, and basic field craft. Classroom 1 hour per week. Lab 2 hours per week. Corequisite: Lab component. (Typically offered: Spring)
MILS 1101. Basic Marksmanship. 1 Hour.
Introduction to safe use of a rifle and practical application of rifle marksmanship. Course includes weapons safety, mechanics, capabilities, and fundamentals of marksmanship. Includes visit to fire at a local indoor rifle range. Materials and equipment furnished by Department of Military Science. (Typically offered: Fall)

\section*{MILS 2002. Leadership and Decision Making. 2 Hours.}

This course focuses on basic Army leadership doctrine and develops the student's skills by introducing them to small unit tactics. Students learn to apply critical thinking and problem solving by using Troop Leading Procedures (TLP). Additional topics include the value of diversity, understanding the officer`s role in leading change, management skills, and the fundamentals of the Army as a profession. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: MILS 1001 and MILS 1011 or departmental consent. (Typically offered: Fall)

\section*{MILS 2012. Army Doctrine and Team Development. 2 Hours.}

Continuation of MILS 2002. Topics include Troop Leading Procedures (TLP), time management, military writing, and basic tactics. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: MILS 1001, MILS 1011, and MILS 2002 or departmental consent. (Typically offered: Spring)

MILS 2101. Advanced Rifle Marksmanship. 1 Hour.
Course to teach students the fundamentals of Advanced Rifle Marksmanship. Class is conducted once a week with topics including: Air rifle, small bore firing, advanced practical exercises of different shooting positions and marksmanship competition with other universities. Prerequisite: MILS 1101. (Typically offered: Spring)

\section*{MILS 3004. Applied Leadership I. 4 Hours.}

This course focuses on the development of managerial and leadership abilities and the practical application of these skills during 'hands-on' training. Students learn advanced infantry tactics and demonstrate their leadership potential using this medium. Students are required to lead in drill and ceremony, physical training, and tactical situations. This course prepares the student to excel at the ROTC Advanced Camp (normally attended during the summer between the junior and senior year). One 48 hour weekend field training exercise is required per semester. Lecture 2 hours, laboratory 3 hours, physical training 3 hours (conducted Tuesday - Thursday) per week. Corequisite: Lab component. Prerequisite: Departmental consent and (MILS 1001, MILS 1011, MILS 2002, and MILS 2012; or completion of Army ROTC Basic Camp; or completion of basic training with any component of the U.S. Armed Forces). (Typically offered: Fall)

\section*{MILS 3014. Applied Leadership II. 4 Hours.}

Continuation of MILS 3004. This course prepares the student to excel at the ROTC Advanced Camp (normally attended during the summer between the junior and senior year). Requirements include one 48 hour weekend field training exercise per semester. Lecture 2 hours, laboratory 3 hours, physical training 3 hours (conducted Tuesday - Thursday) per week. Corequisite: Lab component. Prerequisite: Departmental consent and MILS 1001, MILS 1011, MILS 2002, MILS 2012 and MILS 3004; or completion of Army ROTC Basic Camp; or completion of basic training with any component of the U.S. Armed Forces. (Typically offered: Spring)

\section*{MILS 4001. Advanced Military Issues. 1 Hour.}

Individual study for advanced undergraduates. Students will research, write a paper, and give an oral presentation of a current military issue. Prerequisite: PMS approval. (Typically offered: Fall and Spring)

\section*{MILS 4004. Advanced Leadership I. 4 Hours.}

This course focuses on the study of various military organizations and their role in military operations. Discussion of command and staff management in military organizations, executive responsibility of Army commissioned officers, service customs, courtesies, and traditions. The senior year includes the study of personnel management, professional ethics, the military justice system, and the Army's training and maintenance management system. This course prepares students to assume responsibilities as a commissioned officer upon graduation. One 48 hour weekend field training exercise is required per semester. Lecture 2 hours, laboratory 3 hours, physical training 3 hours (conducted Tuesday - Thursday) per week. Corequisite: Lab component. Prerequisite: Departmental consent and MILS 3004 and MILS 3014. (Typically offered: Fall)

\section*{MILS 4011. Advanced Military Correspondence. 1 Hour.}

Practicum for advanced undergraduates. Students submit prepared military correspondence projects written in the military style using military forms and formats. Prerequisite: PMS approval. (Typically offered: Fall and Spring)

\section*{MILS 4014. Advanced Leadership II. 4 Hours.}

Continuation of MILS 4004. This course prepares students to assume responsibilities as a commissioned officer upon graduation. One 48 hour weekend field training exercise is required per semester. Lecture 2 hours, laboratory 3 hours, physical training 3 hours (conducted Tuesday - Thursday) per week. Corequisite: Lab component. Prerequisite: Departmental consent and MILS 3004, MILS 3014 and MILS 4004. (Typically offered: Spring)

\section*{MILS 5004. Applied Leadership I. 4 Hours.}

This course focuses on the development of managerial and leadership abilities and the practical application of these skills during 'hands-on' training. Students learn advanced infantry tactics and demonstrate their leadership potential using this medium. Students are required to lead in drill and ceremony, physical training, and tactical situations. This course prepares the student to excel at the ROTC Advanced Camp (normally attended during the summer between the junior and senior year). One 48 hour weekend field training exercise is required per semester. Lecture 2 hours, laboratory 3 hours, physical training 3 hours (conducted Tuesday Thursday) per week. Corequisite: Lab component. Prerequisite: Must be a graduate student, departmental consent, as well as MILS 1001, MILS 1011, MILS 2002 and MILS 2012; or completion of Army ROTC Basic Camp; or completion of Basic Training with any component of the U.S. Armed Forces. (Typically offered: Fall)
MILS 5014. Applied Military Leadership. 4 Hours.
Development of managerial and leadership abilities, maximizing performanceoriented 'hands-on' training. Students learn advanced infantry tactics and demonstrate their leadership potential using this medium. Students are required to lead in drill and ceremony, physical training, and tactical infantry situations. The training is intended to prepare the student for the ROTC Advanced Camp experienced normally in the summer prior to the 6000 level courses. Lecture 3 hours, laboratory 3 hours per week, plus 3 hours of physical training are conducted weekly. One weekend field training exercise is required per semester. Corequisite: Lab Component. Prerequisite: Departmental consent. (Typically offered: Spring)

\section*{MILS 6004. Advanced Leadership I Graduate. 4 Hours.}

This course focuses on the study of various military organizations and their role in military operations. Discussion of command and staff management in military organizations, executive responsibility of Army commissioned officers, service customs, courtesies, and traditions. This year includes the study of personnel management, professional ethics, the military justice system, and the Army's training and maintenance management system. This course prepares students to assume responsibilities as a commissioned officer upon graduation. One 48 hour weekend field training exercise is required per semester. Lecture 2 hours, laboratory 3 hours, physical training 3 hours (conducted Tuesday - Thursday) per week. Prerequisite: Graduate standing, departmental consent, and MILS 3004 and MILS 3014. Corequisite: Lab component. (Typically offered: Fall)

MILS 6014. Advanced Leadership II. 4 Hours.
Advanced Leadership II, focuses on your development as a leader and an Army officer. You will develop the knowledge, skills, and abilities to plan, resource, and assess training at the small unit level. You will also learn about Army programs that relate to counseling for subordinates, the evaluation of performance and career planning, values and ethics, and legal responsibilities. At the conclusion of this course, you will be familiar with how to plan, prepare, execute, and continuously assess the conduct of training at the company grade officer level. Corequisite: Lab Component. Prerequisite: Department Consent. (Typically offered: Spring)

\section*{Art (ARTS)}

\section*{Courses}

\section*{ARTS 1013. Drawing for Non-majors: Observation. 3 Hours.}

Designed for non-studio majors, this course investigates the complexities of drawing from direct observation. Through demonstrations, guided working time, and critiques, students will refine their own ability to translate the observed world into 2-dimensional drawn forms. Knowledge of historical and contemporary artists will compliment studio production. (Typically offered: Summer)
ARTS 1023. Drawing for Non-majors: Experimental Methods. 3 Hours. Investigates drawing as a method for creative thinking and experimental imagemaking. Introduction to a wide range of materials and processes. Content includes visual design principles, creative ideation, and related artists who challenge the role of drawing. (Typically offered: Summer)

\section*{ARTS 1313. Two-Dimensional Design. 3 Hours.}

Studio problems in the use of line, shape, texture, value, and color and their relationships. (Typically offered: Fall and Spring)

ARTS 1323. Three-Dimensional Design. 3 Hours.
Studio problems with the elements of three-dimensional design: structure, space, form, surface, and their relationship. (Typically offered: Fall and Spring)

\section*{ARTS 1803. Photography for Non-Majors. 3 Hours.}

Addresses photography's currency within visual culture by investigating its relationship to both society and art, considering its evolution as an art form. Using a variety of tools and techniques, projects will emphasize composition, digital manipulation, and the role of intention in creating art. (Typically offered: Fall and Spring)

\section*{ARTS 1919C. Studio Foundation I. 9 Hours.}

Intensive, studio-format coursework in a variety of two-dimensional, threedimensional, and time-based media provides an introduction to fundamentals of art and design with emphasis on components of the creative process; research and critical thinking; investigation of materials; and instruction in software and fabrication techniques. 9 credit hours. Corequisite: Drill component. (Typically offered: Fall and Spring)

\section*{ARTS 1929C. Studio Foundation II. 9 Hours.}

Continuation of Studio Foundation I. Intensive intermediate studio projects in a variety of two-dimensional, three-dimensional, and time-based mediums; instruction in software and fabrication techniques; and the introduction of professional practices, including the assemblage and maintenance of a foundational portfolio; required attendance at weekly seminar. Corequisite: Drill component. Prerequisite: ARTS 1919C (Typically offered: Fall and Spring)

ARTS 3003. Drawing I: Elements. 3 Hours.
This course explores the language of drawing and its creative application. Traditional materials and methods are complemented with implicit challenges to think expansively about drawing's potential. Investigations enable each individual to learn to see with acuity and develop fine motor skills to create meaningful and accomplished drawings in different forms. Prerequisite: ARTS 1919C and ARTS 1929C; or ARTS 1013 and instructor consent. (Typically offered: Fall and Spring)

\section*{ARTS 3013. Figure Drawing I. 3 Hours.}

Investigation of the human form through drawing, with special emphasis on gestural modes of working. Careful analysis of human anatomy, including internal and externally visible structures, position and movement of joints, as well as anatomical proportions and their variations among different individuals. Prerequisite: ARTS 3003 or ARTS 3103. (Typically offered: Spring)

\section*{ARTS 3023. Drawing II: Invented Images. 3 Hours.}

This course investigates drawing strategies for constructing images from the starting point of imagination and invention as a means to create a body of personalized work. Special emphasis is given to the process of generating and organizing images through a wide range of drawing media, collage, color, and digital tools. Prerequisite: ARTS 3003 or GDES 2313. (Typically offered: Spring)
ARTS 3033. Drawing II: Perceptual Studio. 3 Hours.
This course investigates drawing strategies for generating images derived from direct perceptual experience in order to create a body of personalized work. Emphasis is placed on methods for translating perceptual experience into believable and complex drawn forms. Investigations explore on-site location drawing, selfdesigned studio environments, and the use of color. Prerequisite: ARTS 3003 or GDES 2313. (Typically offered: Fall)

\section*{ARTS 3043. Illustration: Communicating With Drawing. 3 Hours.}

How to create images that carry specific, unambiguous meanings - to speak with pictures. Projects will explore various modes of visual communication and relationships to texts, including narrative, editorial and sequential illustrations. Prerequisite: ARTS 3023 or ARTS 3033 or ARTS 3403 or GDES 2313 or instructor consent. (Typically offered: Irregular)

\section*{ARTS 3053. Drawing in the Expanded Field. 3 Hours.}

A philosophical examination of the discipline of drawing through experimental works. Initial projects will question the essential aspects of drawing-ness, pushing beyond the typical materials and processes to make drawings with unusual properties. In the second half of the course, students will take on a sustained individual exploration.
Prerequisite: ARTS 3023 or ARTS 3033 or ARTS 3503 or ARTS 3813 or ARTS 3203 or ARTS 3213 or instructor consent. (Typically offered: Irregular)

\section*{ARTS 3103. Painting I. 3 Hours.}

An introduction to oil painting, focusing on painting from direct observation. Topics to be covered include: materials, palette, understanding perceptual color and color theory, and development of the painting through use of layers, value, mark-making, composition, light, and space. Prerequisite: ARTS 3013 or (ARTS 1919C and ARTS 1929C). (Typically offered: Fall and Spring)

\section*{ARTS 3123. Painting: Water Media. 3 Hours.}

Introduction to materials and techniques of watercolor and acrylic painting. Form, composition, and content to be studied through observation and imagination.
Traditional techniques as well as experimentation and personal expression are to be explored. Prerequisite: ARTS 3103 or ARTS 3003. (Typically offered: Irregular)

\section*{ARTS 3133. Figure Painting. 3 Hours.}

Introduction to representational and interpretive figure painting and to contemporary issues in figurative painting. The model as well as other visual sources will be used as a basis for observation, interpretation and invention. Prerequisite: ARTS 3013, ARTS 3103. (Typically offered: Irregular)
ARTS 3143. Painting \& Digital Tools. 3 Hours.
Introduces students to hybrid working methods, between analog painting and digital processes, to produce innovative personalized imagery. Digital tools such as image software, scanners, printers, plotters and laser cutters will extend the possibilities of painting through generating source material, creating cut forms, custom stencils, manipulating and reconfiguring imagery. Prerequisite: ARTS 3103. (Typically offered: Irregular)

ARTS 3153. Painting Perception Into Abstraction. 3 Hours.
Investigation of the abstraction of visual phenomena. Various starting points and approaches will be studied. Emphasis on the analysis of form, the creation of pictorial structure, and the conceptual basis of perceptual abstraction. Prerequisite: ARTS 3103. (Typically offered: Irregular)

\section*{ARTS 3163. Abstract Painting. 3 Hours.}

An introduction to the material, formal, and conceptual aspects of abstract painting. Projects will explore a variety of starting points for the invention of form in painting. Examines the construction of meaning in modern and contemporary abstract painting through studio work, discussion, writing assignments and lectures.
Prerequisite: ARTS 3103. (Typically offered: Irregular)

\section*{ARTS 3173. Contemporary Representational Painting. 3 Hours.}

Contemporary approaches to the use of imagery in painting. Projects emphasize the systematic alteration of color, form and space through strategies of reduction, omission, distortion and compositing. Prerequisite: ARTS 3103. (Typically offered: Irregular)

ARTS 3183. Landscape Painting. 3 Hours.
Exploration of perceptual and conceptual approaches to painting the landscape. Both traditional and experimental techniques of oil painting will be studied. Includes outdoor on-site painting. Prerequisite: ARTS 3103. (Typically offered: Irregular)

\section*{ARTS 3203. Fundamentals of Modeling, Mold Making \& Casting. 3 Hours.} An introduction to fundamental additive and subtractive sculpture techniques and methods of seeing and working that give expression to material form. Beginning techniques in modeling, carving, mold making, and basic casting are demonstrated. Lectures, readings, and critiques will develop student awareness of traditional building techniques which inform contemporary sculpture practices. Prerequisite: ARTS 1323; or ARTS 1919C and ARTS 1929C. (Typically offered: Spring and Summer)

\section*{ARTS 3213. Construction Methods I. 3 Hours.}

A focus on material sensitivity through thoughtful and skillful additive approaches. Woodworking and metalworking are introduced as methods to examine structural and spatial possibilities. Through examining and questioning the interplay of form, material, technique, and content, students will develop their knowledge of traditional fabrication processes, which inform contemporary sculpture. Prerequisite: ARTS 1323; or ARTS 1919C and ARTS 1929C. (Typically offered: Fall)

\section*{ARTS 3223. Issues in Contemporary Sculpture. 3 Hours.}

An experimental lab focused on critical issues in contemporary sculpture. Students will be challenged to dissect their process of making, to question the nature of sculpture and art-making in the 21st century, and the context in which art is created, shown, and distributed. Prerequisite: ARTS 1323 or (ARTS 1919C and ARTS 1929C). (Typically offered: Fall and Summer)

\section*{ARTS 3293. Seminar in Sculpture + Experimental Media. 3 Hours.}

Introduction to techniques and theories that foster new experimental forms of artistic practice and to historical and contemporary interplay between methodologies including: object making and contextual design, material history and environmental sustainability, the moving image, sound, performance, mechatronics/electronics, interactivity, digital fabrication, social practice, speculative design, and interventions in public space. Prerequisite: ARTS 1919C and ARTS 1929C. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

ARTS 3403. Printmaking: Introduction. 3 Hours.
Introduction to the technical, formal, conceptual, and historical aspects of printmaking through methods of relief, intaglio (etching), monoprint, serigraphic (screenprinting), and lithographic printing techniques. Prerequisite: ARTS 1919C and ARTS 1929C; or ARCH 1025; or LARC 1325; or IARD 1045. (Typically offered: Fall, Spring and Summer)

\section*{ARTS 3423. Printmaking: The Collaborative Print. 3 Hours.}

Collaborative exploration in the technical, formal, conceptual, and historical aspects of lithographic printmaking processes including wet and dry media on stone and plate, photo processes, and various inking methods. Prerequisite: ARTS 3403 or ARTS 3443; or ARCH 1025; or IARD 1045; or LARC 1325. (Typically offered: Spring)

\section*{ARTS 3433. Printmaking: Painterly Prints. 3 Hours.}

Exploration in the technical, formal, conceptual, and historical aspects of monoprint and relief printmaking through traditional and current methods of woodcut, linoleum, CNC routing, digital technologies, and other methods to create small editions and unique, singular works on paper. Prerequisite: ARTS 3403; or ARCH 1025; or IARD 1045; or LARC 1325. (Typically offered: Fall)

\section*{ARTS 3443. Printmaking: Screenprinting. 3 Hours.}

Introduction to serigraphic techniques, including cut stencils, photosensitive stencils, resist methods, additive and reductive printing, and other processes. Prerequisite: ARTS 1919C and ARTS 1929C; or ARTS 3403; or ARCH 1025; or IARD 1045; or LARC 1325. (Typically offered: Fall, Spring and Summer)

\section*{ARTS 3463. Printmaking: Digital Inquiries. 3 Hours.}

Exploration of the technical, formal, and conceptual aspects of both traditional printmaking techniques and contemporary digital media and their application to contemporary art and visual culture. Prerequisite: ARTS 3403 or ARTS 3443; or ARCH 1025; or LARC 1325; or IARD 1045. (Typically offered: Spring)

\section*{ARTS 3473. Printmaking: Publishing Power. 3 Hours}

Exploration in the technical, formal, conceptual, and historical aspects of book arts and contemporary publishing practices through various book forms, book construction, binding, design, content, letterpress printing, risograph printing, and conceptual considerations. Prerequisite: ARTS 3403 or ARTS 3443; or ARCH 1025; or IARD 1045; or LARC 1325. (Typically offered: Fall)

\section*{ARTS 3503. Ceramics: Handbuilding I. 3 Hours.}
this introductory course investigates the techniques, materials, and themes common to hand-built ceramincs. Students will also be introduced to ceramic studio processes, including clay and glaze mixing, low temperature gas and electric firing, and studio safety procedures. Prerequisite: ARTS 1013 and ARTS 1323; or ARTS 1919C and ARTS 1929C. (Typically offered: Fall and Summer)

\section*{ARTS 3523. Ceramics: Wheelthrowing I. 3 Hours.}

This introductory course investigates the techniques, materials, and themes common in wheel-thrown ceramics. Students will also be introduced to ceramic studio processes, including clay and glaze mixing, high temperature gas and electric firing, and studio safety procedures. Prerequisite: ARTS 1013 and ARTS 1323; or ARTS 1919C and ARTS 1929C. (Typically offered: Spring and Summer)

\section*{ARTS 3533. Ceramics: Wheelthrowing II. 3 Hours}

This concept-driven intermediate-level course focuses on expanding the students' skills and knowledge of wheel-thrown and hand-built forms. Additional emphasis will be placed on clay and glaze testing, and understanding the processes of firing in electric, gas, salt/soda, and wood-firing kilns. Prerequisite: ARTS 3523. (Typically offered: Irregular)

ARTS 3543. Ceramics: Slip-Casting. 3 Hours.
This concept-driven intermediate-level course focuses on the techniques and approaches common to ceramic slip-casting. Plaster mold-making, model development and preparation, slip mixing, and slip-casting are emphasized. Students will utilize low and high temperature gas and electric firings. Prerequisite: ARTS 3503. (Typically offered: Spring)

\section*{ARTS 3723. Experiments in Moving Image I. 3 Hours.}

An introduction to experimental video art, providing a theoretical and practical foundation for creating video for installation, performance or screen, set within a context of historical and contemporary video art and experimental film. Students will complete assignments creating new, original moving image works. Prerequisite: ARTS 1919C and ARTS 1929C. (Typically offered: Fall and Spring)

ARTS 3733. Experiments in Sound. 3 Hours.
An introduction to experimental sound art, providing a theoretical and practical foundation for creating sound for installation, performance or composition, set within a context of historical and contemporary sound art and electroacoustic composing. Students will complete assignments creating new, original sound works. Prerequisite: ARTS 1919C and ARTS 1929C. (Typically offered: Fall)

ARTS 3803. Photo I: Darkroom. 3 Hours.
Photography I: Darkroom is an introduction to the basics of camera operation and exposure, analog black and white film and print processing, and photographic technique and theory. An emphasis on how to communicate through photographs is pursued in assignments, critiques, slide lectures, and demonstrations. Prerequisite: ARTS 1919C and ARTS 1929C. (Typically offered: Fall and Spring)

\section*{ARTS 3813. Photo I: Digital. 3 Hours.}

Photo I: Digital starts with and expands upon the basics of digital SLR photography, editing in Adobe Lightroom, basic digital file management, and printing. This includes an introduction to the applications of composition, light, and color in photography. The course also delves into image interpretation and photographic seeing. There will be emphasis placed on communicating ideas effectively through photography as well as the ability to speak about photography analytically, formally, and conceptually. Prerequisite: ARTS 1919C and ARTS 1929C. (Typically offered: Fall and Spring)

ARTS 3823. Alternative Photographic Methods. 3 Hours.
Alternative Photographic Methods focuses on the study and practice of alternative and historic photographic processes with a special interest in how materiality influences the content of a photograph. A heavy influence is placed on experimentation as the course explores the hybridization of analog chemical processes with digital technology and contemporary content. Prerequisite: ARTS 3803 and ARTS 3813. (Typically offered: Irregular)

\section*{ARTS 3833. Documentary Photography. 3 Hours.}

This course introduces students to a variety of methods used in the area of documentary photography in order to build the conceptual and technical skills necessary to create extended projects that focus on documenting and visually exploring subjects in an in-depth manner. Discussion of Photography's tricky relationship with objectivity is explored throughout the semester. Prerequisite: ARTS 3803 and ARTS 3813. (Typically offered: Irregular)

\section*{ARTS 3843. Studio Light. 3 Hours.}

Explores the technical, creative, and professional possibilities within making photographs using controlled light in both the studio setting and on location. Emphasizes how the studio setting has been used by photographers throughout history as well as its vital role in contemporary photography. Prerequisite: ARTS 3803 and ARTS 3813. (Typically offered: Irregular)

\section*{ARTS 3853. The Photobook. 3 Hours.}

This course is based on the both the historic and contemporary relevance of the photobook as an art object. Students will learn about all aspects of producing a photobook from generating content, designing a structure, case-binding methods, fine art inkjet printing, and book construction. Special attention will be paid to sequencing photographs to convey conceptual thought and critique of those ideas. Prerequisite: ARTS 3803 and ARTS 3813. (Typically offered: Irregular)

\section*{ARTS 3903. Arts Entrepreneurship. 3 Hours.}

Explores vehicles for socially conscious, arts-based, entrepreneurial action to gain an understanding of the innovative role that the creative process plays. With a bias toward action and collaboration, students will explore creative content, viability, and social, environmental, and cultural accountability. (Typically offered: Fall)

\section*{ARTS 3913. Social Justice and the Arts. 3 Hours.}

Takes a critical look at historic and contemporary models of collaborative and interdisciplinary practices in the visual arts. Examines art as a catalyst for community impact, develops strategies for addressing the needs and goals of a specific partner, and implements support for those strategies. Service learning course. (Typically offered: Spring)

\section*{ARTS 4003. Drawing Projects. 3 Hours.}

Individual studio projects in Drawing. Each student will propose a project to pursue over the course of the semester. Prerequisite: (ARTS 3023 and ARTS 3033) or ARTS 3043 or ARTS 3053 or Studio Art BFA concentration in drawing or by Instructor permission. (Typically offered: Spring) May be repeated for up to 9 hours of degree credit.

\section*{ARTS 404V. Special Problems in Drawing. 1-6 Hour.}

Individual projects in drawing arranged with the instructor. Prerequisite: ARTS 3003. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{ARTS 4153. Topics in Advanced Painting. 3 Hours.}

Topics in advanced and experimental painting. Prerequisite: 6 hours of painting. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

\section*{ARTS 417V. Special Problems in Painting. 1-6 Hour.}

Individual technique and subject matter projects to be arranged with the instructor. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

\section*{ARTS 4183. Contemporary Issues in Painting. 3 Hours.}

Examination of concepts and themes relevant to the contemporary practice of painting, accompanied by the production of an individually determined body of work. Emphasis on studio work supplemented by research, critique, reading and writing. Pre- or Corequisite: Three hours of painting from ARTS 3123, ARTS 3133, ARTS 3153, ARTS 3163, ARTS 3173, ARTS 3183, or ARTS 4153. Prerequisite: ARTS 3103. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

\section*{ARTS 4193. Advanced Painting. 3 Hours.}

Intensive course for those art majors concentrating in painting. Extended, individually determined projects will emphasize production of a well researched, conceptually grounded and cohesive body of work. Supplemented by reading, writing and discussion of contemporary issues in painting. Pre- or Corequisite: Three hours of painting from ARTS 3123, ARTS 3133, ARTS 3153, ARTS 3163, ARTS 3173, ARTS 3183, or ARTS 4153. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.
ARTS 4203. Modeling, Mold Making, \& Casting II. 3 Hours.
Merging historical methodology and advanced technology from lost-wax metal casting to digital fabrication, a continuation of additive and subtractive techniques in modeling, carving, moldmaking, and casting. Specific problems utilizing various media are preceded by readings, lectures, and demonstrations. Prerequisite: ARTS 3203. (Typically offered: Fall)

\section*{ARTS 4213. Mixed Media \& Spatial Context. 3 Hours.}

An exploration in assemblage, installation, environmental art, light, and kinetics as they apply to contemporary sculptural language. Specific problems utilizing various media are preceded by readings, lectures, and demonstrations. Prerequisite: One course from the following: ARTS 3203 or ARTS 3213 or ARTS 3223 or ARTS 3723 or ARTS 3733. (Typically offered: Fall and Spring)

ARTS 4223. Advanced Sculpture + Experimental Media. 3 Hours.
A directed analysis of form and its relationship to content based on the development of work in students' medium of choice. Students will acquire the technical skills needed to meet personal vision through guidance of the instructor. Research evidenced in work, discussions, and critiques is emphasized. Prerequisite: Two of the following courses: ARTS 4203, ARTS 4213, ARTS 4243, ARTS 4743, ARTS 4753, or ARTS 4783. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

ARTS 423V. Special Problems in Sculpture. 1-6 Hour.
Individual projects in sculpture with emphasis on materials exploration. Prerequisite: ARTS 4223. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ARTS 4243. Construction Methods II. 3 Hours.
A deeper investigation into construction techniques to further examine structural and spatial possibilities and question the relationship between traditional and contemporary sculptural materials. Through a more profound and critical analysis of form, material, process, content, and context, construction methodology will be established as a foundation for individual practice. Prerequisite: ARTS 3213. (Typically offered: Spring)

\section*{ARTS 4413. Printmaking: Archives \& Counter-Archives. 3 Hours.}

Advanced individual exploration of institutional and non-normative archives, theories, systems, and practices to create a research-informed body of work. Prerequisite: ARTS 3403 and ARTS 3443; plus one of the following: ARTS 3423 or ARTS 3433 or ARTS 3463 or ARTS 3473. (Typically offered: Fall)

ARTS 4423. Printmaking: The Expanded Field in the Expanding Field. 3 Hours. Advanced individual and collaborative exploration of artistic production through publication, events, and happenings. Prerequisite: ARTS 3403 and ARTS 3443; plus one of the following: ARTS 3423 or ARTS 3433 or ARTS 3463 or ARTS 3473 or ARTS 4413. (Typically offered: Spring)

\section*{ARTS 4453. Printmaking: Collaborative Publishing Workshop. 3 Hours.}

Advanced exploration of the inner workings of the professional publishing workshop environment through the production of a fine art print edition designed in collaboration with a visiting artist. Prerequisite: ARTS 4483 or ARTS 4413 or ARTS 4423. (Typically offered: Fall and Spring)

\section*{ARTS 4483. Printmaking: Advanced Studio. 3 Hours.}

Continued advanced study in various printmaking media with emphasis on individual technical research, development of personal imagery, and refinement of skills. Prerequisite: ARTS 3403 and ARTS 3443; plus one of the following: ARTS 3423 or ARTS 3433 or ARTS 3463 or ARTS 3473. (Typically offered: Spring)

\section*{ARTS 449V. Special Problems in Prints. 1-6 Hour.}

Advanced individual study of one or more printmaking processes with emphasis on individual technical research, development of personal imagery, and refinement of skills. Prerequisite: ARTS 3403. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

\section*{ARTS 4503. Intermediate Ceramics. 3 Hours.}

Focuses on discovering and developing a personal approach to the creation of ceramic objects. Students will explore and test clay bodies, surface treatments, and firing methods while simultaneously exploring ideas, formats, contexts, and interpretations to their work. Any or all ceramic processes may be used. Pre- or corequisite: ARTS 3503 or ARTS 3523 or ARTS 3543. (Typically offered: Fall)

\section*{ARTS 4513. Technical Ceramics. 3 Hours.}

Advanced study of ceramic materials and processes. Clay composition, clay body formulation and analysis, glaze composition and formulation, firing methods (low, mid, and high-temperature gas, electric and atmospheric firings), and kiln design will be covered in depth. Prerequisite: ARTS 4503. (Typically offered: Irregular)
ARTS 4573. Advanced Ceramics. 3 Hours.
This course focuses on the generation and development of ideas and objects to form a cohesive body of work. Students will lead their own explorations, technically and conceptually, while working toward a professional-level standard of output. Any or all ceramic processes may be used. Prerequisite: ARTS 3503 and ARTS 3523 and ARTS 3543 and ARTS 4503. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

\section*{ARTS 458V. Special Problems in Ceramics. 1-3 Hour.}

Individual projects in ceramic techniques. Prerequisite: ARTS 3503 or ARTS 3523. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

\section*{ARTS 4743. Experiments in Moving Image II. 3 Hours.}

Further exploration of experimental video art, pushing the theoretical and practical foundation students build in "Experiments in Moving Image I". Expands on creating video for installation, performance or screen, set within a context of historical and contemporary video art and experimental film. Prerequisite: ARTS 1919C, ARTS 1929C and ARTS 3723. (Typically offered: Fall and Spring)

\section*{ARTS 4753. Sound and Space. 3 Hours.}

Continued exploration of experimental sound art in order to build a deeper theoretical and practical understanding of creating sound for installation, performance, or composition within a context of historical and contemporary sound art and electroacoustic composing. Prerequisite: ARTS 3733. (Typically offered: Spring)

\section*{ARTS 4783. Critical Issues in Experimental Media Art. 3 Hours.}

This course serves as a special topics course for Experimental Media Art. Students will explore a variety of contemporary critical issues and methodologies, all while building a deeper theoretical and practical understanding of creating for the twentyfirst century. Prerequisite: (ARTS 1919C or ARTS 1929C) and (ARTS 3723 or ARTS 3733). (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{ARTS 4823. Advanced Digital: The Constructed Image. 3 Hours.}

Advanced Digital: The Constructed Image explores processes and concepts related to creating photographs that are staged, manipulated, or constructed in some manner both through digital processing and fabricating images for the camera. Emphasis will be placed on a questioning of photographic truth and how to communicate effectively through a series of photographs. Prerequisite: ARTS 3803 and ARTS 3813. (Typically offered: Irregular)

\section*{ARTS 4833. Large Format Photography. 3 Hours.}

Large Format Photography introduces students to the \(4 \times 5\) view camera and the technical processes of larger film formats. Advanced darkroom work and digital process are combined to explore professional printmaking. Projects allow students to explore concepts in depth and relate the large format camera to contemporary photographic practice. Prerequisite: ARTS 3803 and ARTS 3813. (Typically offered: Irregular)

\section*{ARTS 484V. Special Problems in Photography. 1-6 Hour.}

Individual instruction for advanced undergraduates and graduate students. Special projects in photography designated by students in collaboration with faculty. Prerequisite: ARTS 3803 and (ARTS 3813 or ARTS 4823 or ARTS 4833). (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

\section*{ARTS 4893. Advanced Projects in Photography. 3 Hours.}

Emphasizes diverse aspects of recognizing and fostering individualized creative processes, critical thinking, and problem-solving skills in order to create a sustainable and professional studio practice. Prerequisite: ARTS 3803 and ARTS 3813 and Junior or Senior level standing. (Typically offered: Fall and Spring) May be repeated for up to 9 hours of degree credit.
ARTS 490VH. Honors Thesis in Studio Art. 1-6 Hour.
Special problems in studio art. Prerequisite: Junior standing. (Typically offered: Fall and Spring) May be repeated for up to 12 hours of degree credit.
ARTS 491V. Internships in Art. 1-6 Hour.
Credit for practical experience gained through internships in studio art, gallery practices and/or art education. Report required from intern and field supervisor on significant accomplishments and/or progress. Prerequisite: Junior standing and art major. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{ARTS 4923. Professional Development. 3 Hours.}

The creation and presentation of a portfolio of work in the student's area of concentration, accompanied by creation of relevant materials for successful professional practice. Art Education students may choose ARED 476V, Student Teaching, ( 12 credit hours) as a substitution. Prerequisite: Art majors only. Requires junior, senior or graduate standing. (Typically offered: Fall and Spring)

ARTS 493V. Fine Arts Gallery Internship. 1-3 Hour.
Study all aspects of operating the Fine Arts Gallery. Research and preparation for exhibitions, organize and install exhibits, care of art works, create and distribute publicity, arrange interviews with newspapers, and other media. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
ARTS 495V. Special Topics. 1-6 Hour.
May be offered in a subject not specifically covered by the courses otherwise listed. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{ARTS 4993. Studio Art BFA Capstone. 3 Hours.}

A capstone experience for graduating BFA students across all Studio Art concentrations. Provides intensive mentorship and instruction to prepare students with acute visual literacy and relevant frameworks concerning career paths in contemporary art practice, curation, and education. Prerequisite: Studio Art BFA majors only and senior standing. (Typically offered: Spring)

\section*{ARTS 5513. Technical Ceramics. 3 Hours.}

Advanced study of ceramic materials and processes. Clay composition, clay body formulation and analysis, glaze composition and formulation, firing methods (low, mid, and high-temperature gas, electric and atmospheric firings), and kiln design will be covered in depth. Graduate degree credit will not be given for both ARTS 4513 and ARTS 5513. Prerequisite: ARTS 4503. (Typically offered: Irregular)

\section*{ARTS 5723. Experiments in Moving Image I. 3 Hours.}

An introduction to experimental video art, providing a theoretical and practical foundation for creating video for installation, performance or screen, set within a context of historical and contemporary video art and experimental film. Students will complete assignments creating new, original moving image works. (Typically offered: Fall and Spring)

\section*{ARTS 5783. Critical Issues in Experimental Media Art. 3 Hours.}

Explores a variety of contemporary critical issues and methodologies in Experimental Media Art, while building a deeper theoretical and practical understanding of creating for the twenty-first century. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{ARTS 5813. Digital Photography. 3 Hours.}

Introduction to digital photography production, techniques and theory. Digital input from scanning (flatbed \& slide/negative), digital cameras, video and internet sources. Computer assisted manipulation of imagery for correction and abstraction. Output to a digital printing systems, analog systems (film recorder), servers and Internet. (Typically offered: Fall and Spring)

\section*{ARTS 5833. Advanced Black and White Photography. 3 Hours.}

Advanced black and white theory, practice and techniques including: Zone System, large format camera and studio lighting. Graduate degree credit will not be given for both ARTS 4833 and ARTS 5833. Prerequisite: ARTS 3803. (Typically offered: Irregular)

\section*{ARTS 584V. Special Problems in Photography. 1-6 Hour.}

Individual instruction for advanced undergraduates and graduate students. Special projects in photography designated by students in collaboration with faculty. Graduate degree credit will not be given for both ARTS 484 V and ARTS 584V. Prerequisite: ARTS 3803 and (ARTS 3813 or ARTS 4823 or ARTS 4833). (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.
ARTS 5883. Bookmaking. 3 Hours.
Introduction to the creation of unique, limited edition artist's bookworks -- with emphasis on technical knowledge and conceptual understanding of the book form as a means of artistic expression. (Typically offered: Irregular)

\section*{ARTS 5913. Graduate Seminar in Studio Art. 3 Hours.}

Special seminars at the graduate level in Studio Art. Subject matter changes depending on student interest and faculty expertise. Prerequisite: Admission to MFA program. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{ARTS 5923. MFA First Year Seminar. 3 Hours.}

Introduction to graduate level study in art, including pedagogy related to teaching art at the college level. Topics to be covered include: development of research interests, critical thinking within studio practice, situating work in the contemporary context, expectations at the graduate level, and an introduction to techniques and theories of studio art education. Prerequisite: Admission to MFA program. (Typically offered: Fall)

\section*{ARTS 5933. MFA Third Year Seminar. 3 Hours.}

Preparation for a professional art practice, including the examination of theoretical and practical aspects of career development for contemporary artists. Additional focus on research strategies, structure, and development of the MFA exhibition statement. Prerequisite: ARTS 5923. (Typically offered: Fall)

\section*{ARTS 596V. Fine Arts Gallery Internship. 1-3 Hour.}

Study all aspects of operating the Fine Arts Gallery. Research and preparation for exhibitions, organize and install exhibits, care of art works, create and distribute publicity, arrange interviews with newspapers, and other media. Graduate degree credit will not be given for both ARTS 493V and ARTS 596V. (Typically offered: Fall, Spring and Summer)

ARTS 601V. Master of Fine Arts Exhibition. 1-6 Hour.
Production and presentation of a one person exhibition of art work. The M.F.A. candidate will be responsible for making three acceptable slide sets of the exhibition and exhibition statements. Prerequisite: M.F.A. candidacy. (Typically offered: Fall, Spring and Summer)

\section*{ARTS 602V. Graduate Drawing. 1-6 Hour.}

Individual problems in drawing techniques. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for degree credit.

\section*{ARTS 6033. Graduate Drawing Studio. 3 Hours.}

Intensive studio practice in drawing combined with reading, writing, and discussion of relevant contemporary issues in the fields of painting and drawing. Includes regular critiques, both with the group and in individual consultations with the instructor. Prerequisite: Admission to MFA program in Studio Art. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.

ARTS 612V. Graduate Painting. 1-6 Hour.
Individual problems in painting techniques. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{ARTS 6133. Graduate Painting Studio. 3 Hours.}

Intensive studio practice in painting combined with reading, writing, and discussion of relevant contemporary issues in the fields of painting and drawing. Includes regular critiques, both with the group and in individual consultations with the instructor. Prerequisite: Admission to MFA program in Studio Art. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.

ARTS 622V. Graduate Sculpture. 1-6 Hour.
Individual problems in sculpture techniques. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for degree credit.
ARTS 6233. Graduate Sculpture + Experimental Media Studio. 3 Hours. Intensive studio practice in sculpture and experimental media combined with reading, writing, and discussion of relevant contemporary issues in the field of sculpture and new media. Includes regular critiques, both with the group and in individual consultations with the instructor. Prerequisite: Admission to MFA program in Studio Art. (Typically offered: Spring) May be repeated for up to 18 hours of degree credit.

ARTS 642V. Graduate Printmaking. 1-6 Hour.
Individual problems in printmaking techniques. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{ARTS 6433. Graduate Printmaking Studio. 3 Hours.}

Intensive studio practice in printmaking combined with reading, writing, and discussion of relevant contemporary issues in the fields of printmaking. Includes regular critiques, both with the group and in individual consultations with the instructor. Prerequisite: Admission to MFA program in Studio Art. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

ARTS 652V. Graduate Ceramics. 1-6 Hour.
Individual problems in ceramic techniques. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{ARTS 6533. Graduate Ceramics Studio. 3 Hours.}

Discussion of contemporary ceramics issues in tandem with the development of a cohesive body of work. Students lead their own explorations, technically and conceptually, while working toward a professional standard of output. Includes regular critiques, with the class and individually with the instructor. Any ceramic processes may be used. Prerequisite: MFA Studio Art Graduate Standing. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.
ARTS 682V. Graduate Photography. 1-6 Hour.
Individual problems in photography. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ARTS 6833. Graduate Photography Studio. 3 Hours.
Intensive studio practice with reading and discussion of contemporary issues in photography for MFA students. Prerequisite: Admission to MFA program in Art. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.

\section*{ARTS 695V. Special Topics. 1-6 Hour.}

Subject matter not covered in other courses. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

\section*{Art Education (ARED)}

\section*{Courses}

\section*{ARED 1003. Introduction to Art Education. 3 Hours.}

Covers foundational theories in art education, educational psychology, and philosophy. An 18-hour early field experience includes observation and participation in art classes in public schools and community settings. (Typically offered: Fall and Spring)
ARED 3003. Curriculum Design \& Teaching Practices in Art Education. 3 Hours.
Covers contemporary art education theories and their implication to curriculum design. Students will discuss sociocultural learning theories in relation to the artmaking process. (Typically offered: Fall and Spring)

\section*{ARED 3013. Inclusive Art Pedagogy. 3 Hours.}

This course provides future art educators with the current issues and practices necessary for teaching disabled students in an inclusive art class through inverse inclusion (rotating roles as teacher, assistant, student, and observer). It will involve readings, observations, reflections, discussion, and extensive experience applying curriculum and contemporary pedagogy to inclusive art education practice in a community-based setting. (Typically offered: Irregular)

\section*{ARED 3013H. Honors Inclusive Art Pedagogy. 3 Hours.}

Provides future art educators with the current issues and practices necessary for teaching art to students with disabilities through inverse inclusion and rotating roles as teacher, assistant, student, and observer. Focuses on contemporary pedagogy to art classroom inclusion practice in a community-based setting with service learning. Prerequisite: Honors standing. (Typically offered: Irregular)
This course is equivalent to ARED 3013.

ARED 3103. Diversity Theory \& Pedagogy. 3 Hours
Investigates various issues of diversity and equity in relation to art and education. It discusses the application of the theories of diversity and equity into teaching, community organizing, activism, and art practices. (Typically offered: Fall, Spring and Summer)
This course is cross-listed with AAST 3103.

\section*{ARED 4003. Community Art. 3 Hours.}

Covers community-based art theories, classroom learning theories, and instructional strategies. It is also a teaching practicum course for community outreach; thus, students will design curriculum, implement lesson plans, and organize a final exhibition. Includes at least 24 hours of community teaching experience. Prerequisite: ARED 3003. (Typically offered: Spring)

\section*{ARED 4003H. Honors Community Art. 3 Hours.}

Covers community-based art theories, classroom learning theories, and instructional strategies. It is also a teaching practicum course for community outreach; thus, students will design curriculum, implement lesson plans, and organize a final exhibition. Includes at least 24 hours of community teaching experience. Prerequisite: ARED 3003 and honors standing. (Typically offered: Spring) This course is equivalent to ARED 4003

\section*{ARED 4633. Individual Research in Art Education. 3 Hours.}

Independent study in specific areas of art education. Prerequisite: 6 hours of art education. (Typically offered: Fall and Spring)

\section*{ARED 476V. Student Teaching in Art. 6-12 Hour.}

A minimum of 6 weeks will be spent in an off-campus school. During this time the student teacher will have an opportunity under supervision to observe, to teach and participate in other activities involving the school and community. Successful completion of a criminal background check required before student can begin student teaching. Prerequisite: ARTBFA major. (Typically offered: Fall and Spring)

\section*{ARED 4773. Professional Development in Art Education. 3 Hours.}

Students will reflect on their art education experiences and the roles of art educators in various educational settings. This capstone course prepares students for their professional careers in K-12 schools and community settings through journaling, discussions, and teaching portfolio review. (Typically offered: Fall and Spring)

ARED 486V. Internship in Art Education. 1-3 Hour.
Offers credit for practical experience gained through internships in community-based art education including museums and/or other organizations. A report is required from the intern and field supervisor on significant accomplishments and/or progress. Prerequisite: ARED 1003. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit

ARED 486VH. Honors Internship in Art Education. 1-3 Hour.
Offers credit for practical experience gained through internships in community-based art education including museums and/or other organizations. A report is required from the intern and field supervisor on significant accomplishments and/or progress. Prerequisite: ARED 1003 and honors standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
This course is equivalent to ARED 486 V .
ARED 490VH. Honors Thesis in Art Education. 1-6 Hour.
Special problems in Art Education. Prerequisite: Junior standing. (Typically offered: Fall and Spring) May be repeated for up to 12 hours of degree credit.

ARED 4953. Special Topics in Art Education. 3 Hours.
Art education topics not included in regularly offered courses. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ARED 4953H. Honors Special Topics in Art Education. 3 Hours.
Art education topics not included in regularly offered courses. Pre- or Corequisite: ARED 3613. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

This course is equivalent to ARED 4953

ARED 5003. Introduction to Research Practices and Methodologies in Art Education. 3 Hours.
An overview of mixed research methodologies employed in the field of art education. Covers foundational knowledge and skills necessary for conducting research in education and related fields. (Typically offered: Spring)

ARED 5013. Diversity, Equity, and Inclusion in Art Education. 3 Hours.
Covers teaching strategies that deconstruct disabling, systemic, social constructions and explore how people are using comics, films, and other popular media to discuss/ expose issues of race, class, gender, sexuality, and gender identity, trauma, disease, and disability. (Typically offered: Spring)

\section*{ARED 5953. Special Topics in Art Education. 3 Hours.}

Art education topics not included in regularly offered courses. Graduate degree credit will not be given for both ARED 4953 and ARED 5953. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ARED 6003. Philosophical Foundations and Histories of Art Education. 3 Hours.

Examines classic theories in art education and their relevance to current developments in the field. Develop and conduct historical research projects, respond to writings on histories of art education, and explore how art education histories are represented. (Typically offered: Fall)

\section*{ARED 6013. Community-Based Art Education. 3 Hours.}

Provides an overview of current and historical art education programs in the community. Introduces foundational knowledge and skills necessary for funding support, development, and implementation. Focuses on intergenerational and collaborative cross-disciplinary programs, their significance, and implications. (Typically offered: Irregular)

\section*{ARED 6023. Destabilizing Queer Theory. 3 Hours.}

Highlights constricted and racialized ways in which people generally visualize class, gender, race, and sexualities. Students will discuss the criticality of complex dynamics of visual politics in class, gender, race, and sexualities, and theoretical issues posed and negotiated by queer theory. (Typically offered: Irregular) This course is cross-listed with AAST 6023.

ARED 6033. Transnational Feminist Perspectives in Art and Education. 3 Hours.
Explores transnational feminist frameworks aimed at investigation and women's activism. Focuses on how artists, educators, activists, and makers employ various artistic interventions to build transnational solidarities against global injustices. (Typically offered: Irregular)

\section*{ARED 6043. Art, Play, and Aesthetics in Childhood. 3 Hours}

Provides a comprehensive review of research and theory related to the study and practice of art, play and aesthetics in childhood, with specific attention given to contemporary research that extends, critiques, and exists alongside earlier understandings of how and why these practices matter to childhood. (Typically offered: Irregular)

\section*{ARED 6053. Disability Studies in Art Education. 3 Hours}

An overview of the current issues and practices related to disability studies and application in art education. Involves readings, observations, reflections, discussion, and extensive experience applying art curriculum and contemporary pedagogy to inclusive art education practice with disabled adults 18 years and older at a community-based setting. (Typically offered: Irregular)

ARED 6063. Curriculum and Pedagogical Theories in Art Education. 3 Hours. Examines, explores, and applies theory and research to curriculum and pedagogy. These curricular theories are situated both in general education and in art education in order to provide multiple frameworks for theorizing curricular change. (Typically offered: Fall)

\section*{ARED 6393. Independent Study - Art Education. 3 Hours.}

Independent study with varied emphasis on topics relating to Art Education and Visual Culture Studies. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

\section*{ARED 686V. Internship in Art Education. 3-6 Hour.}

Provides off-campus experiential learning opportunities that will allow students to apply theories into their professional practices. Course content is individualized with a student's internship advisor (an art education faculty member) and a field supervisor. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{ARED 695V. Special Topics in Art Education. 1-6 Hour.}

Subject matter not covered in regularly offered courses, and relating to art education. May be repeated for different topics. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

\section*{ARED 6963. Visualizing Critical Race Theory. 3 Hours.}

An examination of critical theoretical approaches to the concepts of race and racism. Students will examine the ways in which these constructs perform a critical function in the construction of race(s) and racism(s) and their relevance to visual culture. (Typically offered: Fall and Spring)
This course is cross-listed with PLSC 6963, AAST 6963.
ARED 698V. Master's Thesis in Art Education. 1-6 Hour.
Master's thesis in art education. Prerequisite: ARED 5003, ARED 5013, and ARED 6003. (Typically offered: Fall and Spring) May be repeated for up to 150 hours of degree credit.

\section*{Art History (ARHS)}

\section*{Courses}

ARHS 1003. Basic Course in the Arts: Art Lecture (ACTS Equivalency = ARTA 1003). 3 Hours.

A general introduction to the visual arts. Lectures on theory and criticism, demonstrations, films, and slides. Three hours a week plus attendance at specified programs and exhibits. May not be presented toward satisfaction of the B.A. fine arts requirement by art majors. (Typically offered: Fall, Spring and Summer)
ARHS 1003H. Honors Basic Course in the Arts: Art Lecture. 3 Hours.
A general introduction to the visual arts. Lectures on theory and criticism, demonstrations, films, slides. Three hours a week plus attendance at specified programs and exhibits. May not be presented toward satisfaction of the B.A. fine arts requirement by art majors. (Typically offered: Irregular)
This course is equivalent to ARHS 1003.
ARHS 2913. Art History Survey I (ACTS Equivalency = ARTA 2003). 3 Hours.
Survey of art works from Stone Age through Medieval. Completion of ARHS 2913 and ARHS 2923 satisfies the content covered in ARHS 1003 for fulfillment of the fine arts university/state core. (Typically offered: Fall and Spring)
ARHS 2923. Art History Survey II (ACTS Equivalency = ARTA 2103). 3 Hours. Survey of art works from Renaissance to the present. Completion of ARHS 2913 and ARHS 2923 satisfies the content covered in ARHS 1003 for fulfillment of the fine arts university/state core. (Typically offered: Fall and Spring)

\section*{ARHS 3923H. Honors Colloquium. 3 Hours.}

Covers a special topic or issue. Offered as a part of the honors program.
Prerequisite: honors candidacy (not restricted to candidacy in art). (Typically offered: Irregular)

\section*{ARHS 4013. Case Studies in Art History. 3 Hours.}

Provides in-depth studies of selected artists, themes, or specific groups of art works. Only offered during intersession. Prerequisite: 6 hours of ARHS courses. (Typically
offered: Irregular) May be repeated for up to 9 hours of degree credit.

ARHS 4013H. Honors Case Studies in Art History. 3 Hours.
Provides in-depth studies of selected artists, themes, or specific groups of art works. Only offered during intersession. Prerequisite: 6 hours of ARHS courses and honors standing. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
This course is equivalent to ARHS 4013.

\section*{ARHS 4413. Greek Art and Archaeology. 3 Hours.}

Greek Art and Archaeology focuses on how visual and material culture shaped and were shaped by Greek society (religion, politics, military, economy, gender, etc.) from the Bronze Age through the Hellenistic period. Masterpieces of Greek art are analyzed alongside the material remains of everyday Greeks in civic and domestic spaces. Prerequisite: ARHS 2913. (Typically offered: Spring and Summer Odd Years)
This course is cross-listed with CLST 4413.
ARHS 4413H. Honors Greek Art and Archaeology. 3 Hours.
Greek Art and Archaeology focuses on how visual and material culture shaped and were shaped by Greek society (religion, politics, military, economy, gender, etc.) from the Bronze Age through the Hellenistic period. Masterpieces of Greek art are analyzed alongside the material remains of everyday Greeks in civic and domestic spaces. Prerequisite: ARHS 2913 and honors standing. (Typically offered: Spring and Summer Odd Years)
This course is cross-listed with CLST 4413, ARHS 4413.

\section*{ARHS 4423. Roman Art and Archaeology. 3 Hours.}

Roman Art and Archaeology focuses on how visual and material culture shaped and were shaped by Roman society (religion, politics, economy, gender, ethnicity, etc.) from the Iron Age through the Late Antique period. We encounter famous masterpieces, but also the material remains of everyday Romans in civic and domestic spaces. Prerequisite: ARHS 2913. (Typically offered: Spring and Summer Even Years)
This course is cross-listed with CLST 4423.
ARHS 4423H. Honors Roman Art and Archaeology. 3 Hours.
Roman Art and Archaeology focuses on how visual and material culture shaped and were shaped by Roman society (religion, politics, economy, gender, ethnicity, etc.) from the Iron Age through the Late Antique period. We encounter famous masterpieces, but also the material remains of everyday Romans in civic and domestic spaces. Prerequisite: ARHS 2913 and honors standing. (Typically offered: Spring and Summer Even Years)
This course is cross-listed with CLST 4423, ARHS 4423.

\section*{ARHS 451V. Internship in Art History. 1-3 Hour.}

Credit for practical experience gained through an internship in art history. Report required from intern and field supervisor on significant accomplishments and/or progress. Prerequisite: 9 hours of ARHS courses. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{ARHS 4563. Pre-Columbian Art. 3 Hours.}

An introduction to pre-Columbian art from Mexico (3000 BC- 1521 AD) through a survey of works of art from different media: sculpture, architecture, and mural painting. Topics examined include: sacred images, political uses of sculpture, architecture and cosmogony, as well as the relationship between the material and content. (Typically offered: Irregular)

\section*{ARHS 4563H. Honors Pre-Columbian Art. 3 Hours.}

An introduction to pre-Columbian art from Mexico (3000 BC- 1521 AD) through a survey of works of art from different media: sculpture, architecture, and mural painting. Topics examined include: sacred images, political uses of sculpture, architecture and cosmogony, as well as the relationship between the material and content. (Typically offered: Irregular)
This course is equivalent to ARHS 4563.

\section*{ARHS 4573. Artists of New Spain. 3 Hours.}

An overview of colonial art in colonial New Spain. Focused on native agency, social function of art, and cross-cultural communication. Topics include indigenous materials and techniques, the use of images in legal contexts, and ritual liturgy. Some consideration will be given to artworks from the viceroyalty of Peru. (Typically offered: Irregular)

\section*{ARHS 4573H. Honors Artists of New Spain. 3 Hours.}

An overview of colonial art in colonial New Spain. Focused on native agency, social function of art, and cross-cultural communication. Topics include indigenous materials and techniques, the use of images in legal contexts, and ritual liturgy.
Some consideration will be given to artworks from the viceroyalty of Peru. (Typically offered: Irregular)
This course is equivalent to ARHS 4573.

\section*{ARHS 4613. African Art and Society. 3 Hours.}

Situates the artistic production of modern Africa (1800-present) within a sociocultural framework, taking into consideration the role of the artist, the methods of production, the relationship between form and function, and the impact of geopolitical shifts (including intercontinental trade, colonialization, and globalization) on the artistic practice. Prerequisite: ARHS 2923. (Typically offered: Irregular)

\section*{ARHS 4613H. Honors African Art and Society. 3 Hours.}

Situates the artistic production of modern Africa (1800-present) within a sociocultural framework, taking into consideration the role of the artist, the methods of production, the relationship between form and function, and the impact of geopolitical shifts (including intercontinental trade, colonialization, and globalization) on the artistic practice. Prerequisite: ARHS 2923 and honors standing. (Typically offered: Irregular)
This course is equivalent to ARHS 4613.

\section*{ARHS 4623. African American Art History. 3 Hours.}

Surveys African American art from the seventeenth century to the present. It begins with a discussion of the transatlantic slave trade and it examines art produced in what Pratt terms the "contact zones." It then follows developments in African American art from the Antebellum Period to the present. Prerequisite: ARHS 2923. (Typically offered: Irregular)
This course is cross-listed with AAST 4623.

\section*{ARHS 4623H. Honors African American Art History. 3 Hours.}

Surveys African American art from the seventeenth century to the present. It begins with a discussion of the transatlantic slave trade and it examines art produced in what Pratt terms the "contact zones." It then follows developments in African American art from the Antebellum Period to the present. Prerequisite: ARHS 2923 and honors standing. (Typically offered: Irregular)
This course is cross-listed with ARHS 4623, AAST 4623.

\section*{ARHS 4633. Contemporary African Art. 3 Hours.}

Serves as a forum for the study of contemporary African art. It situates African art from the 1980s to the present within a historic context, addressing the impact of geopolitical ruptures on artistic practices, and it examines how the work operates across different intellectual, political, and geographical spheres. Prerequisite: ARHS 2923. (Typically offered: Irregular)

\section*{ARHS 4633H. Honors Contemporary African Art. 3 Hours.}

Serves as a forum for the study of contemporary African art. It situates African art from the 1980s to the present within a historic context, addressing the impact of geopolitical ruptures on artistic practices, and it examines how the work operates across different intellectual, political, and geographical spheres. Prerequisite: ARHS 2923 and honors standing. (Typically offered: Irregular)
This course is equivalent to ARHS 4633.

ARHS 4733. Saint Peter's and the Vatican. 3 Hours.
Examines art and the architectural history of St. Peter's Basilica in Rome from antiquity to present. Emphasis on the Renaissance/Baroque church and its early Christian predecessor. Students consider the impact of devotional practices and papal politics on the church, the Vatican Palace, and its renown artworks including the Sistine ceiling. Prerequisite: ARHS 2913 and ARHS 2923. (Typically offered: Irregular)
ARHS 4733H. Honors Saint Peter's and the Vatican. 3 Hours.
Examines art and the architectural history of St. Peter's Basilica in Rome from antiquity to present. Emphasis on the Renaissance/Baroque church and its early Christian predecessor. Students consider the impact of devotional practices and papal politics on the church, the Vatican Palace, and its renown artworks including the Sistine ceiling. Prerequisite: ARHS 2913 and ARHS 2923 and honors standing. (Typically offered: Irregular)
This course is equivalent to ARHS 4733.

\section*{ARHS 4753. Renaissance and Baroque Architecture. 3 Hours.}

Study of Renaissance and Baroque architecture in Europe and the New World from 1400 to 1700 . With reference to an array of texts, drawings, and edifices, this course charts the evolution of a commanding Western architectural tradition with close attention to social, humanistic, and religious contexts. Prerequisite: ARHS 2923 or ARCH 4433. (Typically offered: Irregular)

\section*{ARHS 4763. Seminar in Critical Theory. 3 Hours.}

Study of critical theory as it relates to problems in modern and contemporary art. Prerequisite: Nine credit hours of ARHS coursework. (Typically offered: Spring)

\section*{ARHS 4763H. Honors Seminar in Critical Theory. 3 Hours.}

Study of critical theory as it relates to problems in modern and contemporary art. Prerequisite: Nine credit hours of ARHS coursework. (Typically offered: Spring) This course is equivalent to ARHS 4763.

\section*{ARHS 4773. History of New Media Art. 3 Hours.}

Examines the history of "new media" art in relation to larger shifts in technology, philosophy and politics. Beginning in the 19th century, the course explores the development of photography, film, video, performance, sound and digital art through the 20th century. Culminates with an examination of contemporary practice. Prerequisite: ARHS 2923 and 3 hours of 3000 level and above art history coursework. (Typically offered: Irregular)

\section*{ARHS 4773H. Honors History of New Media Art. 3 Hours.}

Examines the history of "new media" art in relation to larger shifts in technology, philosophy and politics. Beginning in the 19th century, the course explores the development of photography, film, video, performance, sound and digital art through the 20th century. Culminates with an examination of contemporary practice. Prerequisite: ARHS 2923, honors standing and 3 hours of 3000 level and above art history coursework. (Typically offered: Irregular)
This course is equivalent to ARHS 4773.

\section*{ARHS 4783. Special Topics in Contemporary Art. 3 Hours.}

Examines specialized topics within the field of contemporary art, with special attention to cutting-edge issues confronting artists today. Prerequisite: ARHS 2923. (Typically offered: Irregular) May be repeated for degree credit.
ARHS 4783H. Honors Special Topics in Contemporary Art. 3 Hours. Examines specialized topics within the field of contemporary art, with special attention to cutting-edge issues confronting artists today. Prerequisite: ARHS 2923 and honors standing. (Typically offered: Irregular) May be repeated for degree credit. This course is equivalent to ARHS 4783.

ARHS 4793. Making the Museum: History, Theory and Practice. 3 Hours. Presents a broad overview of the institutional history and the contemporary professional practice of the museum world. Features numerous visiting lectures from a working professionals from the local area and nationwide institutions. Prerequisite: Any 3 credit hour, 3000 level or higher art history course. (Typically offered: Irregular)

ARHS 4813. The History of Photography. 3 Hours.
Survey of photography from 1685 to present. (Typically offered: Irregular)
ARHS 4823. History of Graphic Design. 3 Hours.
Survey of graphic design history from 1850 to the present. Prerequisite: ARHS 2923. (Typically offered: Spring)

ARHS 4823H. Honors History of Graphic Design. 3 Hours.
Survey of graphic design history from 1850 to the present. Prerequisite: Honors standing and ARHS 2923. (Typically offered: Spring)
This course is equivalent to ARHS 4823.
ARHS 4833. Ancient Art. 3 Hours.
Study of selections from the visual arts of Mesopotamia, Egypt, Greece, or Rome. Prerequisite: ARHS 2913. (Typically offered: Irregular)

\section*{ARHS 4843. Medieval Art. 3 Hours.}

Study of Early Christian, Byzantine, Early Medieval, Romanesque, and Gothic styles. Prerequisite: ARHS 2913. (Typically offered: Irregular)

\section*{ARHS 4843H. Honors Medieval Art. 3 Hours.}

Study of Early Christian, Byzantine, Early Medieval, Romanesque, and Gothic styles. Prerequisite: ARHS 2913. (Typically offered: Irregular)
This course is equivalent to ARHS 4843.

\section*{ARHS 4853. Italian Renaissance Art. 3 Hours.}

Study of Proto-Renaissance, Early, High Renaissance, and Mannerist styles in Italy. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4853H. Honors Italian Renaissance Art. 3 Hours.
Study of Proto-Renaissance, Early, High Renaissance, and Mannerist styles in Italy. Prerequisite: ARHS 2923. (Typically offered: Irregular)
This course is equivalent to ARHS 4853.
ARHS 4863. Northern Renaissance Art. 3 Hours.
Study of Late Gothic and Renaissance styles in the Netherlands, Germany, and France. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4863H. Honors Northern Renaissance Art. 3 Hours.
Study of Late Gothic and Renaissance styles in the Netherlands, Germany, and
France. Prerequisite: ARHS 2923. (Typically offered: Irregular)
This course is equivalent to ARHS 4863.
ARHS 4873. Baroque Art. 3 Hours.
Study of art styles of the 17th century, primarily in Italy, Spain, France, Flanders, and the Netherlands. Prerequisite: ARHS 2923. (Typically offered: Irregular)
ARHS 4873H. Honors Baroque Art. 3 Hours.
Study of art styles of the 17th century, primarily in Italy, Spain, France, Flanders, and the Netherlands. Prerequisite: ARHS 2923. (Typically offered: Irregular)
This course is equivalent to ARHS 4873.
ARHS 4883. 18th and 19th Century European Art. 3 Hours.
Study of eighteenth- and nineteenth-century art and architecture in Europe.
Prerequisite: ARHS 2923. (Typically offered: Irregular)
ARHS 4893. 20th Century European Art. 3 Hours.
Study of the major styles and movements of the century, including Cubism, Fauvism, German Expressionism, and Surrealism. Prerequisite: ARHS 2923. (Typically offered: Irregular)

\section*{ARHS 490VH. Honors Thesis in Art History. 1-6 Hour.}

Special problems in art history. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 12 hours of degree credit.
ARHS 4913. American Art to 1860. 3 Hours.
The visual arts in the United States from Colonial times through 1860. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4913H. Honors American Art to 1860. 3 Hours.
The visual arts in the United States from Colonial times through 1860. Prerequisite:
ARHS 2923. (Typically offered: Irregular)
This course is equivalent to ARHS 4913.
ARHS 4923. American Art 1860-1960. 3 Hours.
The visual arts in the United States from the onset of the American Civil War through the Cold War Era. Prerequisite: ARHS 2923. (Typically offered: Irregular)

\section*{ARHS 4923H. Honors American Art 1860-1960. 3 Hours.}

The visual arts in the United States from the onset of the American Civil War through the Cold War Era. Prerequisite: ARHS 2923. (Typically offered: Irregular) This course is equivalent to ARHS 4923.

ARHS 4933. Contemporary Art. 3 Hours.
Study of styles and major trends in the visual arts since 1960. Prerequisite: ARHS 2923. (Typically offered: Fall)

ARHS 4933H. Honors Contemporary Art. 3 Hours.
Study of styles and major trends in the visual arts since 1960. Prerequisite: ARHS 2923 and ARHS 4923. (Typically offered: Fall)
This course is equivalent to ARHS 4933.
ARHS 4953. Art Museum Studies. 3 Hours.
A survey of the history and function of the art museum and an introduction to museum work. Investigation of collections and collections management, conservation, exhibitions, education and public programs, museum management, and contemporary issues which effect the museum profession. Prerequisite: ARHS 2913 and ARHS 2923, or graduate Art MFA standing. (Typically offered: Irregular)
ARHS 4963. Individual Research in Art History. 3 Hours.
Independent study in specific areas of art history and criticism. Prerequisite: 12 hours of Art History and permission of instructor. (Typically offered: Fall and Spring)

\section*{ARHS 4973. Seminar in Art History. 3 Hours.}

Special studies of periods and styles of art. Prerequisite: 9 hours of Art History. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{ARHS 4983. Special Topics in Art History. 3 Hours.}

Subject matter not covered in regularly offered courses, and relating to the history of art before the eighteenth century. May be repeated for different topics. Prerequisite: ARHS 2913 or ARHS 2923. (Typically offered: Irregular) May be repeated for degree credit.

ARHS 4983H. Honors Special Topics in Art History. 3 Hours.
Subject matter not covered in regularly offered courses, and relating to the history of art before the eighteenth century. May be repeated for different topics. Prerequisite:
ARHS 2913 or ARHS 2923. (Typically offered: Irregular) May be repeated for degree credit.
This course is equivalent to ARHS 4983.

\section*{ARHS 4993. Special Topics in Modern Art. 3 Hours.}

Subject matter not covered in regularly offered courses, and relating to the history of art from the nineteenth century to the present. May be repeated for different topics. Prerequisite: ARHS 2923. (Typically offered: Irregular) May be repeated for degree credit.

\section*{ARHS 4993H. Honors Special Topics in Modern Art. 3 Hours.}

Subject matter not covered in regularly offered courses, and relating to the history of art from the nineteenth century to the present. May be repeated for different topics. Prerequisite: ARHS 2923 and honors standing. (Typically offered: Irregular) May be repeated for degree credit.
This course is equivalent to ARHS 4993.

\section*{ARHS 5013. Case Studies in Art History. 3 Hours.}

This class provides in-depth studies of selected artists, themes, or specific groups of art works. This course is only offered during intersession. (Typically offered:
Irregular) May be repeated for up to 9 hours of degree credit.

\section*{ARHS 5563. Pre-Columbian Art. 3 Hours.}

An introduction to pre-Columbian art from Mexico ( 3000 BC- 1521 AD) through a survey of works of art from different media: sculpture, architecture, and mura painting. Topics examined include: sacred images, political uses of sculpture, architecture and cosmogony, as well as the relationship between the material and content. (Typically offered: Irregular)

ARHS 5573. Artists of New Spain. 3 Hours.
An overview of colonial art in colonial New Spain. Focused on native agency, social function of art, and cross-cultural communication. Topics include indigenous materials and techniques, the use of images in legal contexts, and ritual liturgy.
Some consideration will be given to artworks from the viceroyalty of Peru. (Typically offered: Irregular)

\section*{ARHS 5763. Seminar in Critical Theory. 3 Hours.}

Study of critical theory as it relates to problems in modern and contemporary art. Graduate degree credit will not be given for both ARHS 4763 and ARHS 5763. (Typically offered: Spring)

\section*{ARHS 5773. History of New Media Art. 3 Hours.}

Examines the history of "new media" art in relation to larger shifts in technology, philosophy and politics. Beginning in the 19th century, the course explores the development of photography, film, video, performance, sound and digital art through the 20th century. Culminates with an examination of contemporary practice. Graduate degree credit will not be given for both ARHS 4773 and ARHS 5773. (Typically offered: Irregular)

ARHS 5793. Making the Museum: History, Theory and Practice. 3 Hours. Presents a broad overview of the institutional history and the contemporary professional practice of the museum world. Features numerous visiting lectures from a working professionals from the local area and nationwide institutions. (Typically offered: Spring Even Years)

\section*{ARHS 5813. The History of Photography. 3 Hours.}

Survey of photography from 1685 to present. Graduate degree credit will not be given for both ARHS 4813 and ARHS 5813. (Typically offered: Irregular)

\section*{ARHS 5823. History of Graphic Design. 3 Hours.}

Survey of graphic design history from 1850 to the present. Graduate degree credit will not be given for both ARHS 4823 and ARHS 5823. Prerequisite: ARHS 2923. (Typically offered: Irregular)

\section*{ARHS 5833. Ancient Art. 3 Hours.}

Study of selections from the visual arts of Mesopotamia, Egypt, Greece, or Rome. Graduate degree credit will not be given for both ARHS 4833 and ARHS 5833. (Typically offered: Irregular)

\section*{ARHS 5843. Medieval Art. 3 Hours}

Study of Early Christian, Byzantine, Early Medieval, Romanesque, and Gothic styles. Graduate degree credit will not be given for both ARHS 4843 and ARHS 5843. (Typically offered: Irregular)

\section*{ARHS 5853. Italian Renaissance Art. 3 Hours.}

Study of Proto-Renaissance, Early, High Renaissance, and Mannerist styles in Italy. Graduate degree credit will not be given for both ARHS 4853 and ARHS 5853. (Typically offered: Irregular)

\section*{ARHS 5863. Northern Renaissance Art. 3 Hours.}

Study of Late Gothic and Renaissance styles in the Netherlands, Germany, and France. Graduate degree credit will not be given for both ARHS 4863 and ARHS 5863. (Typically offered: Irregular)

ARHS 5873. Baroque Art. 3 Hours.
Study of art styles of the 17th century, primarily in Italy, Spain, France, Flanders, and the Netherlands. Graduate degree credit will not be given for both ARHS 4873 and ARHS 5873. (Typically offered: Irregular)

ARHS 5883. 18th and 19th Century European Art. 3 Hours.
Study of eighteenth- and nineteenth-century art and architecture in Europe. Graduate degree credit will not be given for both ARHS 4883 and ARHS 5883. (Typically offered: Irregular)

\section*{ARHS 5893. 20th Century European Art. 3 Hours.}

Study of the major styles and movements of the century, including Cubism, Fauvism, German Expressionism, and Surrealism. Graduate degree credit will not be given for both ARHS 4893 and ARHS 5893. (Typically offered: Irregular)

ARHS 5913. American Art to 1860. 3 Hours.
The visual arts in the United States from Colonial times through 1860. Graduate degree credit will not be given for both ARHS 4913 and ARHS 5913. (Typically offered: Irregular)

ARHS 5923. American Art 1860-1960. 3 Hours.
The visual arts in the United States from the onset of the American Civil War through the Cold War Era. Graduate degree credit will not be given for both ARHS 4923 and ARHS 5923. (Typically offered: Irregular)

\section*{ARHS 5933. Contemporary Art. 3 Hours.}

Study of styles and major trends in the visual arts since 1960. Graduate degree credit will not be given for both ARHS 4933 and ARHS 5933. (Typically offered: Fall)

\section*{ARHS 5953. Art Museum Studies. 3 Hours.}

A survey of the history and function of the art museum and an introduction to museum work. Investigation of collections and collections management, conservation, exhibitions, education and public programs, museum management, and contemporary issues which effect the museum profession. Graduate degree credit will not be given for both ARHS 4953 and ARHS 5953. Prerequisite: ARHS 2913 and ARHS 2923, or graduate Art MFA standing. (Typically offered: Irregular)

\section*{ARHS 5973. Seminar in Art History. 3 Hours.}

Special studies of periods and styles of art. Graduate degree credit will not be given for both ARHS 4973 and ARHS 5973. Prerequisite: 9 hours of Art History. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ARHS 5983. Special Topics in Art History. 3 Hours.
Subject matter not covered in regularly offered courses, and relating to the history of art before the nineteenth century. May be repeated for different topics. Graduate degree credit will not be given for both ARHS 4983 and ARHS 5983. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{ARHS 5993. Special Topics in Modern Art. 3 Hours.}

Subject matter not covered in regularly offered courses, and relating to the history of art from the nineteenth century to the present. May be repeated for different topics. Graduate degree credit will not be given for both ARHS 4993 and ARHS 5993. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ARHS 6003. Art History's Histories: Critical Historiography and Methodology. 3 Hours.
Provides a theoretical, historiographic, and methodological foundation in art history. Exposes students to methods they can use throughout their degree work while providing them with the conceptual tools needed for meaningful engagement with the key debates animating the field. (Typically offered: Fall)

ARHS 6013. Immersive Travel. 3 Hours.
Involves hands-on research beyond the classroom. Includes site visits and access to collections, showcasing the multiplicity of perspectives one brings to cultural work. (Typically offered: Summer)

\section*{ARHS 6023. Graduate Art History Writing Workshop. 3 Hours.}

Prepares students to present their ideas in a range of formats and contexts for a variety of audiences. Guides students through the Qualifying Paper process. (Typically offered: Fall)

\section*{ARHS 6033. Art History Qualifying Paper. 3 Hours.}

Focused work on the art history Qualifying Paper, supervised by an art history faculty member/advisor. Preparation for art history symposium, the capstone event of the degree program. (Typically offered: Spring)

ARHS 6043. Art History Practicum. 3 Hours.
Internship at the Crystal Bridges Museum of American Art or another arts institution. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

ARHS 6103. Seminar in Spatial Practices in Mesoamerica and New Spain. 3 Hours.
Explores space as a category for historical analysis. Examines how different Mesoamerican cultures conceptualized space through the analysis of a wide variety of primary and secondary sources, such as archaeological sites, architecture, urbanism, maps, painted manuscripts, ceramics, and mural paintings. (Typically offered: Irregular)

\section*{ARHS 6203. Seminar in Art and Artifice of Americana. 3 Hours.}

Explores the aesthetic and social operations of Americana, loosely defined as things associated with the culture and history of the United States. Concepts to include imagined communities and usable pasts inform analysis of a wide range of material, from painting and sculpture to literature, magazine illustration, and interior design. (Typically offered: Irregular)
ARHS 6213. Seminar in Visual Legacies of the American West. 3 Hours. Explores the work of Euro-American painters who popularized visions of a mythic West and foregrounds the dramatically different stories told by Plains and Southwest artists. Indigenous methodologies and best practices with respect to community engagement are considered. (Typically offered: Irregular)

ARHS 6223. Seminar in Monuments and Public Space. 3 Hours.
Examines the relationship between ideology and space through the study of monuments, memorials, and public art. Explores the impacts monuments have on the built environment, the politics of iconoclasm, the meanings of memorialization, and interventions that reimagine, re-contextualize, and re-site existing monuments. (Typically offered: Irregular)

ARHS 6233. Seminar in Making and Unmaking the "Modern. 3 Hours. Investigates contested notions of the modern, modernism, and modernity in art historical discourse. Examines how modernism has been constructed by museum exhibitions and scholarship in specific historical and cultural contexts, and the power structures and investments that have shaped these narratives. (Typically offered: Irregular)

\section*{ARHS 6243. Seminar in Mining Museums. 3 Hours.}

Examines museums as complex sites of cultural production, with particular focus on contemporary debates. Students will be invited to reimagine the museum, testing their own approaches to collecting, curation, education, and public outreach by using the museum as a site for experimentation. (Typically offered: Irregular)

ARHS 6253. Seminar in Abstraction and Identity. 3 Hours.
Addresses how artists have used abstraction to make social arguments and how art institutions have framed the relationship between identity and abstraction with respect to their collections, by focusing on artworks in local collections. Brings together recent critical theory and the practical concerns of a public museum. (Typically offered: Irregular)
ARHS 6303. Seminar in Culture Wars: Politics, Protest, and Activism in the Arts. 3 Hours.
Explores the relationship between art and politics both historically and in the present. Examines art as activism and protest, considers theories of revolution, and discusses censorship and cultural appropriation, among other topics. (Typically offered: Irregular)

ARHS 6313. Seminar in Contemporary Native American Art. 3 Hours.
Explores the foundation and development of contemporary Native American art through a centering of Indigenous knowledge, world views, and voices from what is now known as Canada and the United States. Examines the scholarship, exhibitions, and art forms that have shaped the field historically through the present. (Typically offered: Irregular)

ARHS 6403. Seminar in Contemporary Latinx Art. 3 Hours.
Studies Latinx contemporary art, 1960 to the present, with an emphasis on the past 30 years. Addresses the political realities of migration, globalization, diaspora, crisis and violence, through theoretical frameworks including biopolitics, rasquachismo, relational aesthetics, and Majority World-ism. (Typically offered: Irregular)
ARHS 6413. Greek Art and Archaeology. 3 Hours.
Greek Art and Archaeology focuses on how visual and material culture shaped and were shaped by Greek society (religion, politics, military, economy, gender, etc.) from the Bronze Age through the Hellenistic period. Masterpieces of Greek art are analyzed alongside the material remains of everyday Greeks in civic and domestic spaces. (Typically offered: Spring Odd Years)
ARHS 6423. Roman Art and Archaeology. 3 Hours.
Roman Art and Archaeology focuses on how visual and material culture shaped and were shaped by Roman society (religion, politics, economy, gender, ethnicity, etc.) from the Iron Age through the Late Antique period. We encounter famous masterpieces, but also the material remains of everyday Romans in civic and domestic spaces. (Typically offered: Spring Even Years)

\section*{ARHS 6433. Seminar in Queer, Trans, and Feminist Art. 3 Hours.}

Examines Queer, Trans, and Feminist art practices of the Americas, which challenge heteronormative, cis, settler colonialist, Western, and patriarchal frameworks of bodies, histories, and ideas. Uses tools from queer theory, Latin American and Latinx studies, critical race studies, and women's, gender, and sexuality studies. (Typically offered: Irregular)

\section*{ARHS 6613. African Art and Society. 3 Hours.}

Situates the artistic production of modern Africa (1800-present) within a sociocultural framework, taking into consideration the role of the artist, the methods of production, the relationship between form and function, and the impact of geopolitical shifts (including intercontinental trade, colonialization, and globalization) on the artistic practice. (Typically offered: Irregular)
ARHS 6623. African American Art History. 3 Hours.
Surveys African American art from the seventeenth century to the present. It begins with a discussion of the transatlantic slave trade and it examines art produced in what Pratt terms the "contact zones". It then follows developments in African American art from the Antebellum Period to the present. (Typically offered: Irregular)
ARHS 6633. Contemporary African Art. 3 Hours.
Serves as a forum for the study of contemporary African art. It situates African art from the 1980s to the present within a historic context, addressing the impact of geopolitical ruptures on artistic practices, and it examines how the work operates across different intellectual, political, and geographical spheres. (Typically offered: Irregular)

\section*{ARHS 6643. Seminar in Imagining Africa. 3 Hours.}

Traces the history of Pan-Africanism and related aesthetic imaginaries of Africa over the twentieth century. (Typically offered: Irregular)
ARHS 6653. Seminar in Cross-cultural Artistic Production in the Atlantic World. 3 Hours.
Examines the interdependent art cultures of bordering countries in Africa, the Americas, the Caribbean, and Europe. Draws on postcolonial theory, migration studies, and critical race theory to look at modes of exchange around the Atlantic and conceptions of modernity. (Typically offered: Irregular)

ARHS 6823. Case Studies in Art History and Curatorial Practice. 3 Hours. Topics in art history and curatorial practice that focuses on specific exhibitions at Crystal Bridges Museum of American Art or other museums. Investigates theoretical as well as practical considerations of exhibiting specific content for public audiences. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{ARHS 6883. Special Topics in Art History. 3 Hours.}

Examines specialized topics in art history, with special attention to cutting-edge issues today. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ARHS 6933. Graduate Research In Art History. 3 Hours.
Independent study in specific areas of art history and criticism. (Typically offered: Irregular)

\section*{Arts and Sciences (ARSC) \\ Courses}

ARSC 104V. Special Topics in Student Success. 1-3 Hour.
Empowers students to explore various ARSC topics and programs under the guidance of ARSC faculty and/or advisors to advance student success. (Typically offered: Fall and Spring) May be repeated for up to 3 hours of degree credit.

ARSC 1201. Introduction to Teaching STEM Subjects. 1 Hour.
This course provides a preview of what it is like to teach STEM subjects. Engaging activities that model effective teaching practices, discussions of STEM education issues, and optional school observations will help STEM majors clarify interest in teaching as a career or as an additional skill as a STEM professional. (Typically offered: Fall and Spring)

ARSC 1212. Inquiry Approach to Teaching STEM Subjects. 2 Hours. Along with learning classroom strategies for engaging students and organizing a lesson, student pairs plan and teach three inquiry-based lessons (choice of math, science, or computer science) in a local school classroom, assess student understanding, and reflect on feedback. For STEM majors exploring teaching as an additional career option. (Typically offered: Fall and Spring)

ARSC 1600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

\section*{ARSC 2003. Second Year Experience. 3 Hours.}

Explores the purpose of a college education, the university general education objectives, and the many dimensions of wellness for sophomores who are still discovering their place at the university. Prerequisite: Sophomore standing or instructor consent. (Typically offered: Fall and Spring)

ARSC 2201. College Perspectives for Transfer Students. 1 Hour.
Develops a sense of social belonging and wellness during the transition period by encouraging critical thinking and civil engagement for transfer students. Provides peer-to-peer support and instruction. (Typically offered: Fall and Spring)

\section*{ARSC 2600. Undergraduate Research Assistant. 0 Hours}

Undergraduate research. (Typically offered: Fall, Spring and Summer)
ARSC 3013. Fulbright College Career Connections. 3 Hours.
This course teaches students how to capitalize on their strengths, skills, experience, professional connections, and academic discipline. Key components of this course are guest lectures from on-campus and off-campus professionals, interactive group activities to practice professional skills, and the creation of an online portfolio. Prerequisite: Sophomore standing. (Typically offered: Fall and Spring)

ARSC 310V. Fulbright College Elective Internship. 1-3 Hour.
Available to students completing an internship that aligns with their career goals and/or their area of study. Credit-only course that may be repeated for up to 6 hours of elective degree credit. Prerequisite: Instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ARSC 3203. Professional ePortfolio. 3 Hours
Serves as a forum for the development of a professional ePortfolio, showcasing academic and co-curricular accomplishments. Intended for students exploring multiple majors or career opportunities, but can benefit any student. (Typically offered: Fall and Spring)

ARSC 3600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)
ARSC 4600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

\section*{Asian Studies (AIST)}

\section*{Courses}

AIST 3103. Chinese Culture through Film. 3 Hours.
Explores Chinese culture through the lens of Chinese films with an emphasis on contemporary communicative culture. Designed to give students analytical insights into Chinese culture, especially how its language, history, philosophy, society, education, customs, family values, and gender roles shape contemporary culture and people's communication. (Typically offered: Fall and Spring)
This course is cross-listed with CHIN 3103.
AIST 3273. Sociology of China. 3 Hours.
This class offers a sociological account of China, including both its social ethos and the experience of Chinese Americans in the United States. (Typically offered: Fall) This course is cross-listed with SOCI 3273.

\section*{AIST 3503. Government and Politics of East Asia. 3 Hours.}

Comparative analysis of structures, processes, and problems of the political systems of the Democratic Republic of Vietnam, Japan, and the Peoples Republic of China.

Prerequisite: PLSC 2013. (Typically offered: Fall and Spring)
This course is cross-listed with PLSC 3503.

\section*{AIST 3533. World War II. 3 Hours}

This course explores broad themes such as imperialism, colonialism, nationalism, transnationalism, and racism by placing WWII in the context of the build-up of tensions between China, the Japanese Empire, and the United States starting in the nineteenth century. (Typically offered: Spring)

This course is cross-listed with HIST 3533.

\section*{AIST 3633. Modern Japan. 3 Hours.}

This course exposes students to the rapid transformations in Japan from the midnineteenth century through to their rise into an important player in global politics. Students will be familiarized with the narrative history of the Japanese home islands as well as the place of Japan in the context of world events and global currents. (Typically offered: Fall)
This course is cross-listed with HIST 3633.

\section*{AIST 390V. Special Topics in Asian Studies. 1-3 Hour.}

Special topics in Asian Studies. May be repeated for degree credit. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

AIST 4003. Asian Studies Colloquium. 3 Hours.
An interdepartmental colloquium with an annual change of subject, required of students in the Asian studies program. Prerequisite: Sophomore standing. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

\section*{AIST 4003H. Honors Asian Studies Colloquium. 3 Hours}

An interdepartmental colloquium with an annual change of subject, required of students in the Asian studies program. Prerequisite: Sophomore standing. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.
This course is equivalent to AIST 4003.

AIST 4323. Culture and Society in China. 3 Hours.
Examines contemporary Chinese society and culture through the lens of language and with an emphasis on globalization. (Typically offered: Fall and Spring) This course is cross-listed with CHIN 4313.

\section*{AIST 4403. Islam in Asia. 3 Hours.}

This course will introduce students to the history and varieties of Muslim life in East Asia and Southeast Asia during the past 1,200 years. Through a comparative historical approach, it will examine themes of gender, imperialism and nationalism, religious education, pilgrimage, Islamic modernism, and religious extremism. (Typically offered: Fall)
This course is cross-listed with HIST 4403.

\section*{AIST 4823. Foreign Policy of East Asia. 3 Hours.}

This course provides an introduction to China's foreign policy at the undergraduate level. Key topics covered include the historical, domestic, and international contexts of Chinese foreign policy, China's relations with key partner countries, security strategies, foreign economic relations, and evolving role in global governance. (Typically offered: Fall)
This course is cross-listed with PLSC 4823.

\section*{Astronomy (ASTR)}

\section*{Courses}

ASTR 2001L. Survey of the Universe Laboratory (ACTS Equivalency = PHSC 1204 Lab). 1 Hour.
Daytime and nighttime observing with telescopes and indoor exercises on selected
topics. Pre- or Corequisite: ASTR 2003. (Typically offered: Fall, Spring and Summer)

\section*{ASTR 2001M. Honors Survey of the Universe Laboratory. 1 Hour.}

An introduction to the content and fundamental properties of the cosmos. Topics include planets and other objects of the solar system, the sun, normal stars and interstellar medium, birth and death of stars, neutron stars, and black holes. Pre- or Corequisite: ASTR 2003 or ASTR 2003H. (Typically offered: Fall)
This course is equivalent to ASTR 2001L.
ASTR 2003. Survey of the Universe (ACTS Equivalency = PHSC 1204 Lecture). 3 Hours.
An introduction to the content and fundamental properties of the cosmos. Topics include planets and other objects of the solar system, the Sun, normal stars and interstellar medium, birth and death of stars, neutron stars, pulsars, black holes, the Galaxy, clusters of galaxies, and cosmology. Corequisite: ASTR 2001L or ASTR 2001M. (Typically offered: Fall, Spring and Summer)

\section*{ASTR 2003H. Honors Survey of the Universe. 3 Hours.}

An introduction to the content and fundamental properties of the cosmos. Topics include planets and other objects of the solar system, the Sun, normal stars and interstellar medium, birth and death of stars, neutron stars, pulsars, black holes, the Galaxy, clusters of galaxies, and cosmology. Corequisite: ASTR 2001M. (Typically offered: Fall)
This course is equivalent to ASTR 2003.
ASTR 4033. Astrophysics I: Stars and Planetary Systems. 3 Hours.
An introduction to astrophysics covering stellar structure and evolution, the properties of the solar system, and extrasolar planetary systems. Prerequisite: PHYS 3613 or CHEM 3504. (Typically offered: Fall Odd Years)

ASTR 4043. Astrophysics II: Galaxies and the Large-Scale Universe. 3 Hours. An introduction to astrophysics covering the interstellar medium, the Milky Way galaxy, extragalactic astronomy, and introduction to cosmology. Prerequisite: ASTR 4033. (Typically offered: Spring Even Years)

\section*{ASTR 4073. Cosmology. 3 Hours.}

An introduction to modern Big Bang cosmology. The course covers the origin, evolution, and structure of the Universe, based on the Theory of Relativity. Prerequisite: PHYS 3613 or CHEM 3504. (Typically offered: Spring Odd Years)

ASTR 4083. Data Analysis and Computing in Astronomy. 3 Hours.
Study of the statistical analysis of large data sets that are prevalent in the physical sciences with an emphasis on astronomical data and problems. Includes computational lab 1 hour per week. Corequisite: Lab component. Prerequisite: PHYS 3613. (Typically offered: Fall Even Years)

ASTR 5033. Astrophysics I: Stars and Planetary Systems. 3 Hours.
An introduction to astrophysics covering stellar structure and evolution, the properties of the solar system, and extrasolar planetary systems. (Typically offered: Fall Odd Years)
This course is cross-listed with SPAC 5033.
ASTR 5043. Astrophysics II: Galaxies and the Large-Scale Universe. 3 Hours. An introduction to astrophysics covering the interstellar medium, the Milky Way galaxy, extragalactic astronomy, and introduction to cosmology. Prerequisite: ASTR 5033 or SPAC 5033. (Typically offered: Spring Even Years)

\section*{ASTR 5073. Cosmology. 3 Hours.}

An introduction to modern physical cosmology covering the origin, evolution, and structure of the Universe, based on the Theory of Relativity. (Typically offered: Spring Odd Years)

ASTR 5083. Data Analysis and Computing in Astronomy. 3 Hours.
Study of the statistical analysis of large data sets that are prevalent in the physical sciences with an emphasis on astronomical data and problems. Includes computational lab 1 hour per week. Corequisite: Lab component. (Typically offered: Fall Even Years)

\section*{ASTR 5523. Theory of Relativity. 3 Hours.}

Conceptual and mathematical structure of the special and general theories of relativity with selected applications. Critical analysis of Newtonian mechanics; relativistic mechanics and electrodynamics; tensor analysis; continuous media; and gravitational theory. (Typically offered: Fall Even Years)

\section*{Athletic Training (ATTR)}

\section*{Courses}

ATTR 5111. Evidence Based Practice in Athletic Training I. 1 Hour.
This course is an introduction to evidence-informed practice principles for clinicianscholars including developing clinical questions, understanding the hierarchy of research, applying critical appraisal to evidence, describing quality improvement principles, and applying statistics principles when reading research literature. Prerequisite: Admission to the graduate program in athletic training. (Typically offered: Summer)

\section*{ATTR 5122. Intervention and Care Planning I. 2 Hours.}

This course will serve as foundational concepts and terminology for interventions and care planning in athletic training and will include content related to medical terminology, disablement framework, clinical reasoning habits, components of the history and physical examination, documentation, injury healing, \& tissue mechanics. Prerequisite: Admission to the graduate program in athletic training. (Typically offered: Summer)

\section*{ATTR 5133. Core Competencies and Clinical Care I. 3 Hours.}

This course will serve as an introduction to the athletic training program procedures, policies, and application of preventative and protective strategies in patient/client care. Prerequisite: Admission to the graduate program in athletic training. (Typically offered: Summer)

\section*{ATTR 5141. Professional Identity Formation. 1 Hour.}

This course will provide knowledge and skills related to professionalism and interprofessional education/practice. Concepts covered will include professional identity formation and professionalism, ethical considerations, professional longevity and interprofessional practice. Prerequisite: Admission to the graduate program in athletic training. (Typically offered: Summer)

\section*{ATTR 5151L. Intervention and Care Planning II Lab. 1 Hour.}

This course will cover skills related to interventions and care planning in athletic training and will include rehabilitation and modalities applications, care planning and interventions for impairments with a focus on lower extremity conditions.
Prerequisite: Admission to the graduate program in athletic training. (Typically offered: Fall)

\section*{ATTR 5153. Intervention and Care Planning II. 3 Hours.}

This course will present topics related to interventions and care planning in athletic training and will include rehabilitation \& modalities theory, care planning \& interventions for impairments with a focus on lower extremity conditions.
Prerequisite: Admission to the graduate program in athletic training. (Typically offered: Fall)
ATTR 5161. Evidence Based Practice in Athletic Training II. 1 Hour.
This course continues evidence-informed practice principles for clinician-scholars including evidence-based practice and statistics concepts for diagnostics \& interventions and quality improvement. Prerequisite: Admission to the graduate program in athletic training. (Typically offered: Fall)
ATTR 5172. Core Competencies and Clinical Care II. 2 Hours.
This course is designed to provide the student with clinical education experiences and applications of emergency care and critical incident management in patient/ client care and continued emphasis on prevention topics. Prerequisite: Admission to the graduate program in athletic training. (Typically offered: Fall)

ATTR 5181. Evidence Based Practice in Athletic Training III. 1 Hour.
This course completes evidence-informed practice principles for clinician-scholars including evidence-based practice and statistics concepts for prevention research and epidemiology. Prerequisite: Admitted to the graduate program in athletic training. (Typically offered: Spring)

\section*{ATTR 5213. Athletic Training Clinical I-Application of Injury Prevention Devices and Techniques. 3 Hours.}

This course will serve as an introduction to the athletic training program procedures, policies, and application of athletic preventive devices and how they support anatomical structures. Corequisite: ATTR 5223. Prerequisite: Admission to the graduate program in athletic training. (Typically offered: Summer)

\section*{ATTR 5223. Emergency Procedures. 3 Hours.}

This course will serve as a theory, laboratory and clinical experiences designed to provide students with formal instruction and skills development regarding curricular content related to emergency care of injuries/illnesses with a focus on team-based and inter-professional strategies for responding to emergencies. Corequisite: Lab component. Prerequisite: Admitted to the graduate program in athletic training. (Typically offered: Summer)
ATTR 5232. Athletic Training Clinical III - Lower Extremity Evaluation. 2 Hours. This course serves as a process to monitor student progression of athletic training competencies, acquire clinical hours under the direct supervision of a preceptor(s), and reinforce the evaluation skills of the lower extremity, lumbar and thoracic spine. Prerequisite: ATTR 5223. (Typically offered: Fall)

ATTR 5242. Athletic Training Clinical IV - Evaluation of Upper Extremity. 2 Hours.
This course serves as a process to monitor student's progression of athletic training competencies, acquire clinical hours under the direct supervision of a preceptor (s), and reinforce the evaluation skills of the gait, upper extremity, cervical abdominal/ thorax, head and face.Prerequisite: ATTR 5232. (Typically offered: Spring)

\section*{ATTR 5253. Professionalism in Athletic Training. 3 Hours.}

This course has dual purposes: to educate students on athletic training educational competencies related to professionalism and professional responsibility in the field of athletic training; and to provide an immersive clinical experience under the direct supervision of a preceptor as required by the accrediting body. Students will engage with information about professionalism in both the course material and the clinical experience. (Typically offered: Fall)

ATTR 5262. Athletic Training Clinical V - Rehabilitation Lab. 2 Hours.
This course will serve as a process for monitoring student's progression of athletic training competencies, acquire clinical hours under the direct supervision of a preceptor(s), practice clinical skills, and reinforce techniques and applications of therapeutic exercise and rehabilitation. (Typically offered: Fall)

\section*{ATTR 5272. Athletic Training Seminar. 2 Hours.}

This course will serve as a process for monitoring student's progression of athletic training competencies, acquire clinical hours under the direct supervision of a preceptor(s), practice clinical skills, and prepare students for the BOC-AT certification exam and future employment. Prerequisite: Admitted to the graduate program in athletic training. (Typically offered: Spring)

\section*{ATTR 5281L. Primary Care Lab. 1 Hour.}

This course will cover skills related to the examination and management of medical illnesses/conditions in physically active individuals across the lifespan. Prerequisite: Admitted to the graduate program in athletic training. (Typically offered: Spring)

\section*{ATTR 5283. Primary Care. 3 Hours.}

This course is a study of medical illnesses/conditions in physically active individuals across the lifespan with a focus on prevention, recognition, physical examination, management including medications, and referral of common conditions. Prerequisite: Admitted to the graduate program in athletic training. (Typically offered: Spring)

\section*{ATTR 5314. Clinical Anatomy for Athletic Trainers. 4 Hours.}

Instruction of human anatomy for the athletic training professional using lecture, diagrams, textbook readings, labs, and demonstrations. Focus will be placed on anatomy of structures related to athletic and orthopedic injuries. This course will prepare students in the evaluation, treatment, and rehabilitation of injuries in a variety of athletic training and clinical settings. Corequisite: Lab component. Prerequisite: Admitted to the graduate program in athletic training or instructor consent. (Typically offered: Summer)

\section*{ATTR 5332. Core Competencies and Clinical Care III. 2 Hours.}

This course is designed to provide the student with clinical education experiences and applications of musculoskeletal injury evaluation and care plans in complex patient cases and continued emphasis on professional development and clinician longevity. Prerequisite: Admitted to the graduate program in athletic training. (Typically offered: Spring)

\section*{ATTR 5341L. Intervention and Care Planning III Lab. 1 Hour.}

This course will cover skills related to interventions and care planning in athletic training and will include rehabilitation \& modalities applications, care planning \& interventions for activity limitations with a focus on upper extremity conditions and post-operative cases. Prerequisite: Admitted to the graduate program in athletic training. (Typically offered: Spring)

\section*{ATTR 5342. Intervention and Care Planning III. 2 Hours.}

This course will present topics related to interventions and care planning in athletic training and will include rehabilitation \& modalities applications, care planning \& interventions for activity limitations with a focus on upper extremity conditions, long-term post-operative cases, and complex cases. Prerequisite: Admitted to the graduate program in athletic training. (Typically offered: Spring)

ATTR 5361L. Upper Extremity Evaluation Lab. 1 Hour.
Athletic Training Students practice, apply and synthesize knowledge and skills from the injury prevention and upper extremity injury evaluation domains with a physically active population. This course provides the student with the formal instruction and evaluation of the psychomotor skills necessary for upper extremity assessment. Prerequisite: Admitted to the graduate program in athletic training. (Typically offered: Spring)

ATTR 5362. Evaluation Techniques of Athletic Injuries - Upper Extremity. 2 Hours.
Use of scientific assessment methods to recognize and evaluate the nature and severity of athletic injuries to the upper extremities, trunk, and head. Prerequisite: Admitted to the graduate program in athletic training. (Typically offered: Spring)

\section*{ATTR 5371L. Lower Extremity Evaluation Lab. 1 Hour.}

Athletic Training Students practice, apply and synthesize knowledge and skills from the injury prevention and lower extremity injury evaluation domains with a physically active population. This course provides the student with the formal instruction and evaluation of the psychomotor skills necessary for lower extremity assessment. Prerequisite: Admitted to the graduate program in athletic training. (Typically offered: Fall)

ATTR 5373. Evaluation Techniques of Athletic Injuries - Lower Extremity. 3 Hours.
Use of scientific assessment methods to recognize and evaluate the nature and severity of athletic injuries to the hip and lower extremities. Prerequisite: Admission to graduate athletic training program. (Typically offered: Fall)

\section*{ATTR 5403. Pathophysiology and Treatment I. 3 Hours.}

This course will provide knowledge, skills, and values that the entry-level athletic trainer must possess to prevent, recognize, treat, advise on medications for and, when appropriate, refer general medical conditions and disabilities of physically active individuals. Prerequisite: Admission to the athletic training program. (Typically offered: Spring)

\section*{ATTR 5413. Pathophysiology and Treatment II. 3 Hours.}

This course will provide knowledge, skills, and values that the entry-level athletic trainer must possess to prevent, recognize, treat, advise on medications for and, when appropriate, refer general medical conditions and disabilities of physically active individuals. Prerequisite: ATTR 5403. (Typically offered: Fall)

ATTR 5422. Sport and Nutrition. 2 Hours.
This course is designed to cover concepts and skills related to nutrition and hydration for healing, performance enhancement/recovery and weight gain/loss in patients/clients. Prerequisite: Admitted to the graduate program in athletic training. (Typically offered: Summer)

\section*{ATTR 5431. Sport-Related Concussion and Behavior. 1 Hour.}

The Sport-Related Concussion and Behavior course will immerse you in specific topics pertaining study to the study of human brain-behavior relationships. The course will focus on sports-related concussion in youth, collegiate, and professional athletes, with an emphasis on how athletes sustain concussions, how concussions are assessed, treated, and managed, and how return-to-play decisions are made. Prerequisite: Admitted to the graduate program in athletic training. (Typically offered: Summer)

\section*{ATTR 5442. Core Competencies and Clinical Care IV. 2 Hours.}

This course is designed to provide the student with clinical education experiences and applications of recognizing and managing emergent mental health concerns in patients/clients with continued emphasis on professional development and clinician longevity. Prerequisite: Admitted to the graduate program in athletic training. (Typically offered: Summer)

\section*{ATTR 5453. Therapeutic Modalities in Athletic Training. 3 Hours.}

Contemporary therapeutic modalities used in managing athletic injuries. Modalities covered are classified as thermal agents, electrical agents, or mechanical agents. Emphasis is placed on their physiological effects, therapeutic indications (and contraindications), and clinical application. Prerequisite: Admission to graduate athletic training program. (Typically offered: Fall)

ATTR 5463. Therapeutic Exercise and Rehabilitation of Athletic Injuries. 3 Hours.
A systematic approach to exercise program development, techniques, indications and contraindications of exercise, and progression as related to athletic injury, prevention, and return to play guidelines. Prerequisite: Admission to graduate athletic training program. (Typically offered: Fall)

ATTR 5473. Administration and Leadership in Athletic Training. 3 Hours. Administrative components of athletic training. Basic concepts of legal liability, leadership and management principles, financial management, day to day scheduling and supervision, maintenance, and general administration. Prerequisite: Admission to graduate athletic training program. (Typically offered: Fall)

ATTR 5493. Evidence-Based Practice in Athletic Training. 3 Hours.
In-depth analysis of current literature, research, case studies, and musculoskeletal evaluation and rehabilitation directed toward musculoskeletal injuries of the physically active. Prerequisite: Admission into the Athletic Training Education Program. (Typically offered: Summer)
ATTR 5501. Patient-Centered Care. 1 Hour.
This course will cover concepts related to patient advocacy, cultural competency, cultural humility, health literacy and social determinants of health in regard to patient/ client care. Prerequisite: Admitted to the graduate program in athletic training. (Typically offered: Summer)

\section*{ATTR 5532. Behavioral Health I. 2 Hours.}

This course provides the student with knowledge and skills related to behavioral health and patient-oriented aspects of clinical care. Topics include but are not limited to understanding mental health emergencies and critical incident plans, behavioral health screening, behavior change theory, and patient advocacy. Prerequisite: Admitted to the graduate program in athletic training. (Typically offered: Fall)

\section*{ATTR 5542. Behavioral Health II. 2 Hours.}

This course provides the student with knowledge and skills related to behavioral health and patient-oriented aspects of clinical care. Topics include but are not limited to concepts of mental health and rehabilitation due to forced inactivity, antecedents to injury, cognitive appraisal, and psychological skills applications. Prerequisite: Admitted to the graduate program in athletic training. (Typically offered: Fall)

\section*{ATTR 5611. Performance Enhancement. 1 Hour.}

This course is designed to provide an overview of performance enhancement principles in patients/clients who participate in sport and physical activity. Emphasis is placed on creating relationships with strength conditioning specialists in transitioning patients from care in the clinic to the field. Prerequisite: Admitted to the graduate program in athletic training or instructor consent. (Typically offered: Spring)

\section*{ATTR 5621. Sport Science. 1 Hour.}

This course is designed to provide an overview of sports science principles and applications in physical activity for risk mitigation, return to play and health outcomes. Prerequisite: Admitted to the graduate program in athletic training or instructor consent. (Typically offered: Spring)

\section*{ATTR 5631. Prevention and Wellness. 1 Hour.}

This course is designed to provide the student with content regarding risk mitigation strategies and prevention programming for physical activity; public health concepts related to care, and management strategies for long term conditions. Prerequisite: Admitted to the graduate program in athletic training. (Typically offered: Spring)

\section*{Biological Engineering (BENG) Courses}

BENG 2632. Biological Engineering Design Studio. 2 Hours.
Application of the engineering design process to projects involving living systems. Projects are team-based open-ended design with hands-on construction and testing of design prototypes. Emphasis is placed on understanding, quantifying and controlling complex interacting living systems involving humans, animals, plants and microbes with the goal of creating economically and ecologically sustainable systems. 4 hours of design studio per week. Pre- or Corequisite: PHYS 2054 and BIOL 1543 and BIOL 1541L, and (GNEG 1111 or GNEG 1103). (Typically offered: Fall)

\section*{BENG 2643. Biological Engineering Methods I. 3 Hours.}

Introduction to software techniques for the graphical and geo-spatial representation of processes, structures, devices, landscapes and watersheds in biological engineering. Process layout and process flow diagrams. Two-dimensional and three-dimensional scale drawings and models. Elements of engineering drawings and plans. Mapping and introduction to geographic information systems. Surface topography, digital elevation modeling, spatial land use, soils and other GIS data sources. Stream networks, watershed delineation, grade planning and introductory runoff modeling. Introductory land surveying. Geo-referencing and integrating designed hydrologic structures with GIS-based site maps. Communicating complex designed systems. Two hours of lecture plus one 3-hour lab per week. Corequisite: Lab component. Prerequisite: PHYS 2054. (Typically offered: Spring)
BENG 3113. Measurement and Control for Biological Systems. 3 Hours. Principles of sensors, instruments, measurements, controls, and data acquisition systems, with emphasis on applications for biological systems; including basic circuit analysis, sensor calibration and hardware selection. Basic process monitoring and control methods, including hardware and software. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: PHYS 2074. (Typically offered: Spring)
BENG 3113H. Honors Measurement and Control for Biological Systems. 3 Hours.
Principles of sensors, instruments, measurements, controls, and data acquisition systems, with emphasis on applications for biological systems; including basic circuit analysis, sensor calibration and hardware selection. Basic process monitoring and control methods, including hardware and software. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: PHYS 2074 and honors candidacy. (Typically offered: Spring)
This course is equivalent to BENG 3113.

\section*{BENG 3653. Global Bio-Energy Engineering. 3 Hours.}

Global energy sources with a focus on renewable energy, solar and biomass derived fuels. Biomass energy production from crops and organic residues or waste products. Conversion of biomass to usable fuels. Utilization of renewable energy in society. Includes detailed systems analyses to examine inputs, efficiencies, usable outputs and by-products. Systems design to select and integrate components which meet client needs while maximizing sustainable global impacts. Three hours of lecture per week. Pre- or Corequisite: MEEG 2403 or CHEG 2313. (Typically offered: Fall)

\section*{BENG 3663. Biological Engineering Methods II. 3 Hours.}

Modeling biological processes to predict system behavior as part of the design process. Development and use of spreadsheets and script programming code to represent biological phenomena and processes. Introduction to experimental design as applied to biological processes, including data collection and analysis, and elementary statistics. Use of engineering economics to aid comparisons of alternatives. Analysis of engineering designs and management practices to best meet the needs of society and the client in areas of sustainable water, food and energy systems. Lecture 2 hours and lab 3 hours per week. Corequisite: Lab component. Prerequisite: PHYS 2054 and MATH 2564. (Typically offered: Fall)

\section*{BENG 3723. Unit Operations in Biological Engineering. 3 Hours.}

Design of basic unit operations typical of biological engineering practice; unit operations include pump-pipe, fan-duct, moist air (psychrometric) processes (cool/ heater/humidifier/dryer), air mixing, aeration, and refrigeration; unit operations design will account for unique constraints imposed by biological systems. Lecture 2 hours and lab 3 hours per week. Corequisite: Lab component. Prerequisite: (MEEG 2403 or CHEG 2313) and (CVEG 3213 or CHEG 2133 or MEEG 3503). (Typically offered: Spring)

BENG 3733. Transport Phenomena in Biological Systems. 3 Hours.
Basic principles governing transport of energy and mass. Estimating transfer of energy (heat) through solid bodies and liquid/gas boundary layers through conduction, convection, and radiation. Modeling the rates at which biological reactions occur (kinetics). Estimating the transfer of diffusing mass (gas or liquid) through solid bodies and liquid/gas boundary layers, including processes such as drying and oxygen diffusion. Three hours lecture per week. Pre- or Corequisite: (CVEG 3213 or MEEG 3503 or CHEG 2133) and MATH 2584. Prerequisite: (MEEG 2403 or CHEG 2313). (Typically offered: Fall)

\section*{BENG 4123. Biosensors \& Bioinstrumentation. 3 Hours.}

Principles of biologically based sensing elements and interfacing techniques. Design and analysis methods of biosensing and transducing components in bioinstrumentation. Applications of biosensors and bioinstrumentation in bioprocessing, bioenvironmental, biomechanical and biomedical engineering. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 2013 or BIOL 2533 and BENG 3113. (Typically offered: Spring Odd Years)
BENG 450V. Special Problems. 1-4 Hour.
Selected problems in biological engineering are pursued in detail. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 4 hours of degree credit.
BENG 451VH. Honors Thesis. 1-6 Hour.
Honors thesis. Prerequisite: Honors candidacy. (Typically offered: Fall, Spring and Summer)

\section*{BENG 452V. Special Topics in Biological Engineering. 1-6 Hour.}

Special topics in biological engineering not covered in other courses. Prerequisite: Engineering student. (Typically offered: Irregular) May be repeated for up to 8 hours of degree credit.

\section*{BENG 4663. Sustainable Biosystems Designs. 3 Hours.}

Process and methodologies associated with measuring, assessing, and designing sustainable systems in water, energy and food. Quantitatively rigorous methodology for life cycle analysis (LCA) for inventory, assessment and impact analyses. Use of other systems analyses and process control theory to evaluate and design sustainable systems. Application of the methods to a project to gain experience in defining, quantifying and utilizing sustainable metrics. Three hours of lecture per week. Prerequisite: BENG 3653. (Typically offered: Spring)

BENG 4743. Food and Bio-Product Systems Engineering. 3 Hours.
Sustainable bio-product engineering through biosystem design, analysis, modeling, control, and optimization. Life cycle phases for bio-products (food, fiber, feed, and fuel). System analysis of inputs and outputs of energy, water and mass for the purpose of producing and processing biomass for human uses. Advanced bioprocess design topics to utilize enzymes, cells, tissues and organisms to create bio-products and methods for deactivating biological agents to preserve the quality and safety of food and other bio-products. Three hours lecture per week. Pre- or corequisite: BENG 3733. Prerequisite: BENG 3723. (Typically offered: Fall)

\section*{BENG 4812. Senior Biological Engineering Design I. 2 Hours.}

Initiation of comprehensive two-semester team-design projects to design processes, devices and systems to meet needs of clients in sustainable water, food and energy. Practice in following the design process, including the definition of design objectives and constraints, establishing functions and performance criteria, generating alternatives and evaluating alternatives through analysis, modeling and prototype testing; exploring relevant design considerations including performance, efficiency, costs, environmental impacts, sustainability and stewardship, safety and ethics. Developing analytic capability; and practicing design optimization to find best alternative for the client. Lecture 1 hour, laboratory 3 hours per week. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Fall)

\section*{BENG 4823. Senior Biological Engineering Design II. 3 Hours.}

Completion of comprehensive two-semester team-design projects to design processes, devices and systems to meet needs of clients in sustainable water, food and energy. Focus on building of prototypes or models, system optimization, evaluation and improvement. Final design details packaged to meet the needs of the client. Interaction with appropriate persons from other disciplines. Written and oral reporting. Communications with peers, supervisor, clients and the public. Lecture 1 hour per week, two 2-hour lab periods per week. Prerequisite: BENG 4812. Corequisite: Lab component. (Typically offered: Spring)

\section*{BENG 4831. Biological Engineering Professionalism. 1 Hour.}

Preparation to be job-ready, employable and successful in transition to a professional career and further study in Biological Engineering. Introduction to job and graduate study searches. Professional and ethical responsibilities; professional registration. Conflict, change and project management. Effective communications and interactions with supervisors, peers, clients, and stakeholders. Two hour discussion section per week. Prerequisite: Senior standing. (Typically offered: Fall)

BENG 4933. Sustainable Watershed Engineering. 3 Hours.
Provides students with expertise in using advanced tools in watershed monitoring, assessment, and design. Builds on core competencies in hydrology and hydraulics to allow student to evaluate water used by sector in water management regions; evaluate and quantify water demands by sector with emphasis on irrigation; develop risk-based simulations of hydrologic processes, including precipitation, evapotransportation, infiltration, runoff, and stream flow; quantify and simulate constituent loading to watersheds using GIS-based models, and understand the applications of these methods in water resource management policy. Three hours lecture per week. Prerequisite: CVEG 3223. (Typically offered: Fall)

\section*{BENG 4963. Modeling Environmental Biophysics. 3 Hours.}

Interactions between the biosphere and the atmosphere. Connecting the physical environment of solar energy, wind, soil, and hydrology to the biosphere through plant ecophysiology. Boundary layer meteorology, photosynthesis and boundary layer modeling strategies, and the soil-plant-atmosphere continuum. Instrumentation, measurement and modeling strategies for understanding leaf-, landscape- and regional behaviors; and, the transfer, kinetics, and balance of momentum, energy, water vapor, CO 2 , and other atmospheric trace gases between the landscape (vegetation and soil) and the atmosphere. Applications in sustainable agriculture, irrigation, land and water resources, and modeling plant water use and carbon uptake strategies. Three hours of lecture per week. Prerequisite: MATH 2564 and (BENG 4933 or CVEG 3223). (Typically offered: Spring Even Years)

BENG 4973. Practice in Water Quality Monitoring and Analysis. 3 Hours. Application of water quality principles to a real world problem. Team project experience developing quality assurance project plans, designing monitoring systems, selecting chemical analysis methods, estimating loads, performing trend analysis, basic model calibration and validation, and technical report writing and oral presentations. Working with various clientele to analyze water quality data in the context of evaluating real-world problems and issues. Technical course intended for students in engineering, environmental sciences, agriculture and biology. Three hours of lecture per week. Prerequisite: CVEG 3213 or instructor's consent to allow interdisciplinary student teams. (Typically offered: Spring Odd Years)
BENG 500V. Advanced Topics in Biological Engineering. 1-6 Hour.
Special problems in fundamental and applied research. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

BENG 5103. Advanced Instrumentation in Biological Engineering. 3 Hours.
Applications of advanced instrumentation in biological systems. Emphasis on updated sensing and transducing technologies, data acquisition and analytical instruments. Lecture 2 hours, lab 3 hours per week. Corequisite: Lab component. Prerequisite: BENG 3113. (Typically offered: Spring Even Years)

\section*{BENG 5253. Bio-Mems. 3 Hours.}

Topics include the fundamental principles of microfluidics, Navier-Stokes Equation, bio/abio interfacing technology, bio/abio hybrid integration of microfabrication technology, and various biomedical and biological problems that can be addressed with microfabrication technology and the engineering challenges associated with it. Lecture 3 hour per week. Prerequisite: MEEG 3503 or CVEG 3213 or CHEG 2133. (Typically offered: Irregular)
This course is cross-listed with MEEG 5253.

\section*{BENG 5613. Simulation Modeling of Biological Systems. 3 Hours.}

Application of computer modeling and simulation of discrete-event and continuoustime systems to solve biological and agricultural engineering problems. Philosophy and ethics of representing complex processes in simplified form. Deterministic and stochastic modeling of complex systems, algorithm development, application limits, and simulation interpretation. Emphasis on calibration, validation and testing of biological systems models for the purposes of system optimization, resource allocation, real-time control and/or conceptual understanding. Prerequisite: AGST 5023 or (STAT 3003 or STAT 5003) or INEG 2314. (Typically offered: Irregular)

\section*{BENG 5623. Life Cycle Assessment. 3 Hours.}

This course will examine the process and methodologies associated with life cycle analysis (LCA). The course will explore the quantitatively rigorous methodology for life cycle inventory (LCI), LCA and life cycle impact assessment (LCIA). This course is offered on-line. The principal instructor will be a UA faculty member. (Typically offered: Spring)
BENG 5633. Linkages Among Technology, Economics and Societal Values. 3 Hours.
Addresses how macro-level change is influenced by the linkages among technology, economics and societal values. Three major course initiatives: 1) Developing a conceptual model for understanding how macro-level change has occurred over history; 2) Examining recorded history in order to develop a contextual appreciation for Society's current situation; and 3) Using statistical data to identify six overriding world trends that are likely to greatly impact society's goal of achieving sustainable prosperity and well-being in the foreseeable future. Prerequisite: Graduate standing or instructor permission. (Typically offered: Fall and Spring)

BENG 5703. Design and Analysis of Experiments for Engineering Research. 3 Hours.
Principles of planning and design of experiments for engineering research.
Propagation of experimental error. Improving precision of experiments. Analysis of experimental data for optimal design and control of engineering systems using computer techniques. Students must have an introductory background in statistics. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. (Typically offered: Irregular)

\section*{BENG 5801. Graduate Seminar. 1 Hour.}

Reports presented by graduate students on topics dealing with current research in biological engineering. Prerequisite: Graduate standing. (Typically offered: Spring)

\section*{BENG 5923. Nonpoint Source Pollution Control and Modeling. 3 Hours.}

Control of hydrologic, meteorologic, and land use factors on nonpoint source (NPS) pollution in urban and agricultural watersheds. Discussion of water quality models to develop NPS pollution control plans and total maximum daily loads (TMDLs), with consideration of model calibration, validation, and uncertainty analysis. Prerequisite: CVEG 3223. (Typically offered: Irregular)

BENG 5933. Environmental and Ecological Risk Assessment. 3 Hours.
Process and methodologies associated with human-environmental and ecological risk assessments. Environmental risk assessments based on human receptors as endpoints, addressing predominantly abiotic processes. Ecological risk assessments based on non-human receptors as endpoints. Approach using hazard definition, effects assessment, risk estimation, and risk management. Application of methods to student projects to gain experience in defining and quantifying uncertainty associated with human perturbation, management and restoration of environmental and ecological processes. (Typically offered: Spring)

\section*{BENG 5963. Modeling Environmental Biophysics. 3 Hours.}

Interactions between the biosphere and the atmosphere. Connecting the physical environment of solar energy, wind, soil, and hydrology to the biosphere through plant ecophysiology. Boundary layer meteorology, photosynthesis and boundary layer modeling strategies, and the soil-plant-atmosphere continuum. Instrumentation, measurement and modeling strategies for understanding leaf-, landscape- and regional behaviors; and, the transfer, kinetics, and balance of momentum, energy, water vapor, CO 2 , and other atmospheric trace gases between the landscape (vegetation and soil) and the atmosphere. Applications in sustainable agriculture, irrigation, land and water resources, and modeling plant water use and carbon uptake strategies. A working knowledge of calculus and a discipline related to the course is expected. Three hours of lecture per week. Students may not earn degree credit for both BENG 4963 and BENG 5963. Prerequisite: Instructor consent. (Typically offered: Spring Even Years)

BENG 5973. Advanced Practice in Water Quality Monitoring and Analysis. 3 Hours.
Application of water quality principles to a real world problem. Team project experience leading and developing quality assurance project plans, designing monitoring systems, selecting chemical analysis methods, estimating loads, performing trend analysis, basic model calibration and validation, team management, and technical report writing and oral presentations. Working with various clientele to analyze water quality data in the context of evaluating realworld problems and issues. Three hours of lecture per week. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years)

BENG 600V. Master's Thesis. 1-6 Hour.
Graduate standing required for enrollment. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

BENG 700V. Doctoral Dissertation. 1-18 Hour.
Candidacy is required for enrollment. (Typically offered: Fall, Spring and
Summer) May be repeated for degree credit.

\section*{Biology (BIOL)}

\section*{Courses}

BIOL 1524. Biological Principles (ACTS Equivalency = BIOL 1004 Lecture). 4 Hours.
Integrated lecture and laboratory focusing on the overriding principles of Biology. Designed to convey biological reasoning to non-science majors. May not count as prerequisite for advanced courses in BIOL. Corequisite: Lab component. (Typically offered: Fall, Spring and Summer)

BIOL 1541L. Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab). 1 Hour.
Experimental and observational techniques used in biology with emphasis on the acquisition and interpretation of results that illustrate major biological principles.
Corequisite: BIOL 1543. (Typically offered: Fall, Spring and Summer)

BIOL 1541M. Honors Principles of Biology Laboratory. 1 Hour.
This course is designed for the well prepared student in the Honors program. It focuses on teaching students experimental and observational techniques used in the science of biology. It emphasizes the acquisition and interpretation of results that illustrate the major principles of biology. Corequisite: BIOL 1543H or BIOL 1543. (Typically offered: Fall and Spring)
This course is equivalent to BIOL 1541 L .
BIOL 1543. Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture). 3 Hours.
Principles that unify biology with emphasis on scientific study that demonstrates how all organisms are the product of evolution and are parts of interacting systems from the molecular to the ecosystem level. Corequisite: BIOL 1541L. (Typically offered: Fall, Spring and Summer)

BIOL 1584. Biology for Majors (ACTS Equivalency = BIOL 1014 Lecture). 4 Hours.
Integrated lecture and laboratory course designed to prepare Biology Majors to enter the rest of the Biology Core of Cell Biology, General Genetics, Evolutionary Biology, and General Ecology. Pre- or Corequisite: CHEM 1103 or CHEM 1203. (Typically offered: Fall and Spring)

BIOL 1601L. Principles of Zoology Laboratory (ACTS Equivalency = BIOL 1054 Lab). 1 Hour.
Laboratory exercises illustrating animal structure, physiology, genetics, and ecology. Corequisite: BIOL 1603. (Typically offered: Fall and Summer)

BIOL 1603. Principles of Zoology (ACTS Equivalency = BIOL 1054 Lecture). 3 Hours.
Introduction to zoological principles relating to cells, organ systems, development, genetics, ecology, and animal phyla. Corequisite: BIOL 1601L. Prerequisite:
BIOL 1584 or BIOL 1543 and BIOL 1541L. (Typically offered: Fall and Summer)
BIOL 1611L. Plant Biology Laboratory (ACTS Equivalency = BIOL 1034 Lab). 1 Hour.
Plant biology lab. Pre- or Corequisite: BIOL 1613. (Typically offered: Spring and Summer)

BIOL 1613. Plant Biology (ACTS Equivalency = BIOL 1034 Lecture). 3 Hours. Consideration of basic flowering plant structure, growth, development, physiology, genetics, ecology, and a brief survey of other plant groups. Lecture 3 hours per week. BIOL 1611L is recommended as a corequisite and both are required for partial fulfillment of the Fulbright College natural sciences requirement. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L. (Typically offered: Spring and Summer)

BIOL 1693. Biology Bridges. 3 Hours.
Prepares students for advanced biology courses including genetics, cell biology, ecology, and evolutionary biology, among others. Synthesizes sub-disciplines within biology using the underlying concepts of evolutionary theory found in scientific literature. Prerequisite: BIOL 1543 or BIOL 1584. (Typically offered: Spring)
BIOL 2011L. General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab). 1 Hour.
Techniques for handling microorganisms. Does not count toward BS in Biology. Corequisite: BIOL 2013. (Typically offered: Fall, Spring and Summer)

BIOL 2011M. Honors General Microbiology Laboratory. 1 Hour.
Techniques for handling microorganisms. Does not count towards BS in Biology. Corequisite: BIOL 2013. (Typically offered: Fall, Spring and Summer)
This course is equivalent to BIOL 2011 L .

BIOL 2013. General Microbiology (ACTS Equivalency = BIOL 2004 Lecture). 3 Hours.
Basic concepts of microbiology including diversity, genetics, metabolism, growth, control of growth, pathogenesis, and immunology. Does not count towards BS in Biology. Corequisite: BIOL 2011L. Prerequisite: (BIOL 1543 and BIOL 1541L) or BIOL 1584)) and (CHEM 1073 and CHEM 1071L or CHEM 1103 or CHEM 1123 and CHEM 1121L or CHEM 1203 and CHEM 1201L). (Typically offered: Fall, Spring and Summer)
BIOL 2211L. Human Physiology Laboratory (ACTS Equivalency = BIOL 2414 Lab). 1 Hour.
Exercises include experiments on osmosis, reflexes, senses, muscle, cardiovascular system, ventilation, metabolism, renal function, etc. Data collection, analysis, and report writing. Does not satisfy the Fulbright College writing requirement. Does not count toward BS in Biology. Corequisite: BIOL 2213. (Typically offered: Fall and Spring)

\section*{BIOL 2213. Human Physiology (ACTS Equivalency = BIOL 2414 Lecture). 3} Hours.
Fundamental concepts of physiology with emphasis in the human. Does not count toward BS in Biology. Corequisite: BIOL 2211L. Prerequisite: (CHEM 1073 and CHEM 1071L) or (CHEM 1103) or (CHEM 1123 and CHEM 1121L) and MATH 1203. (Typically offered: Fall and Spring)
BIOL 2321L. General Genetics Laboratory. 1 Hour.
Analysis of genetic problems and experiments with emphasis on "hands-on" experience with a variety of organisms. May require time outside laboratory period. Laboratory 3 hours per week. Pre- or Corequisite: BIOL 2323. (Typically offered: Fall and Spring)

\section*{BIOL 2323. General Genetics. 3 Hours.}

Surveys of Mendelian, molecular, and population mechanisms of inheritance and gene expression in prokaryotes and eukaryotes. Lecture 3 hours per week. Prerequisite: (BIOL 1584 or BIOL 1543 and BIOL 1541L) and (CHEM 1103 or CHEM 1203) and (MATH 1203 or higher or STAT 2823 or STAT 2303 or equivalent). (Typically offered: Fall and Spring)
BIOL 2441L. Human Anatomy Laboratory (ACTS Equivalency = BIOL 2404 Lab). 1 Hour.
Laboratory 3 hours exercises in mammalian anatomy. Cannot be taken without prior credit in BIOL 2443 or concurrent enrollment in BIOL 2443. Does not count toward BS in Biology. Corequisite: BIOL 2443. (Typically offered: Fall, Spring and Summer)
BIOL 2443. Human Anatomy (ACTS Equivalency = BIOL 2404 Lecture). 3 Hours.
Description of human body as a series of organ systems and their interrelationships. Does not count towards BS in Biology. Corequisite: BIOL 2441L. Prerequisite: Four hours of biological sciences. (Typically offered: Fall, Spring and Summer)
BIOL 2531L. Cell Biology Laboratory. 1 Hour.
Introduction to methods and techniques used in Cell Biology research. Laboratory experiences to highlight topics covered in BIOL 2533. Pre- or Corequisite:
BIOL 2533. (Typically offered: Fall and Spring)
BIOL 2533. Cell Biology. 3 Hours.
Introduction to cell structure, cell processes, biological polymers, energetics, and diversity. An introduction to biochemistry and cell chemistry. Recommended: (CHEM 1123 and CHEM 1121L) or (CHEM 1223 and CHEM 1221L) or equivalent. Prerequisite: BIOL 1584, or BIOL 1543 and BIOL 1541L. (Typically offered: Fall and Spring)

\section*{BIOL 3001L. Principles of Plant Pathology Lab. 1 Hour.}

Lab course in examination of the causes and symptoms of plant disease and the genetics of plant disease. Physiology, and ecology of host-pathogen interactions. Spread of disease and principles of disease control. Pre- or Corequisite: PLPA 3003 or BIOL 3003. (Typically offered: Fall)
This course is cross-listed with PLPA 3001L.

BIOL 3003. Principles of Plant Pathology. 3 Hours.
Examination of the causes and symptoms of plant disease and the genetics of plant disease. Physiology, and ecology of host-pathogen interactions. Spread of disease and principles of disease control. (Typically offered: Fall)
This course is cross-listed with PLPA 3003.
BIOL 3011L. Introduction to Insect Identification Lab. 1 Hour.
Introductory lab course on insect identification, collection, and curation techniques, primarily designed as an intensive add-on to BIOL 3013 for students wanting a more in-depth examination of insect diversity. Insect collection required. Course includes field trips. Students are encouraged to contact instructor before enrolling. Pre- or corequisite: BIOL 3013. (Typically offered: Fall)
This course is cross-listed with ENTO 3011L.
BIOL 3013. Introduction to Entomology. 3 Hours.
Fundamentals of insect biology including structure and function, development, ecology, behavior, plant feeding and disease transmission. Lecture 3 hours/week. Students interested in a more intensive examination of insects, including collection, curation, and identification techniques, should sign up for the separate one credit lab BIOL 3011L. Students are strongly encouraged to take BIOL 1543 before registering for this course. (Typically offered: Fall)
This course is cross-listed with ENTO 3013.
BIOL 3023. Evolutionary Biology. 3 Hours.
An introduction to the mechanisms and patterns of evolutionary change. Seeks to develop logical, scientific skills and to apply them in understanding how life has changed during the history of the earth. Corequisite: Drill component. Prerequisite: (BIOL 1584 or BIOL 1543, BIOL 1541L) and BIOL 2323. (Typically offered: Fall and Spring)
BIOL 3043. Bones, Bodies, and Brains in Evolutionary Perspective. 3 Hours.
Reviews the anatomy of the human body, comparing this anatomy with primates, mammals, and vertebrates, and it will consider how the major features of the human body emerged throughout evolution. (Typically offered: Spring)
This course is cross-listed with ANTH 3043.

\section*{BIOL 3123H. Honors Prokaryote Biology. 3 Hours.}

An in-depth coverage of prokaryote diversity, genetics, metabolism, growth, structures and functions. Prerequisite: BIOL 2533. (Typically offered: Spring)
BIOL 3273. Inquiry and Modeling in Science Education. 3 Hours.
Study of science practices with emphasis on modeling and inquiry for learning/ teaching. Includes practical, philosophical, cognitive, and disciplinary specific dimensions of doing science in academic and nonacademic settings. Includes planning and implementing multiple scientific inquiries, engaging in reflective practices, writing and presenting scientific information. Safety and ethical issues are included. Prerequisite: 8 hours of BIOL courses. Corequisite: Drill component. (Typically offered: Fall)
This course is cross-listed with PHYS 3273, CHEM 3273.

\section*{BIOL 3404. Comparative Vertebrate Morphology. 4 Hours.}

Anatomy of selected vertebrate animals with emphasis upon homologous structures in various animal groups. The recommended anatomy course for Biology BS majors. Lecture 2 or 3 hours, laboratory 4 or 6 hours per week. Corequisite: Lab component. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L. (Typically offered: Fall and Spring)
BIOL 3861L. General Ecology Laboratory. 1 Hour.
General ecology lab. Pre- or Corequisite: BIOL 3863. (Typically offered: Fall)
BIOL 3863. General Ecology. 3 Hours.
Ecological principles and concepts; environmental factors and interactions that determine distribution and abundance of organisms. Prerequisite: 7 hours of biological science. (Typically offered: Fall and Spring)

\section*{BIOL 3923H. Honors Colloquium. 3 Hours.}

Covers a special topic or issue, offered as part of the honors program. Prerequisite: honors candidacy (not restricted to candidacy in biological sciences). (Typically offered: Irregular) May be repeated for degree credit.

\section*{BIOL 4003L. Laboratory in Prokaryote Biology. 3 Hours.}

Laboratory techniques in prokaryote culture, identification, physiology, metabolism, and genetics. Laboratory 6 hours per week. Prerequisite: BIOL 3123. (Typically offered: Fall and Spring)

\section*{BIOL 4013. Insect Behavior and Chemical Ecology. 3 Hours.}

Basic concepts in insect senses and patterns of behavioral responses to various environmental stimuli. Previous knowledge of basic entomology is helpful, but not required. Lecture 2 hours, laboratory/discussion 2 hours per week. Corequisite: Lab component. (Typically offered: Spring Even Years)
This course is cross-listed with ENTO 4013.
BIOL 4024. Insect Diversity and Taxonomy. 4 Hours.
Principles and practices of insect classification and identification with emphasis on adult insects. Corequisite: Lab component. Prerequisite: ENTO 3013. (Typically offered: Fall Even Years)
This course is cross-listed with ENTO 4024.

\section*{BIOL 4043. Prokaryote Biology. 3 Hours.}

An in-depth coverage of prokaryote diversity, genetics, metabolism, growth, structures and functions. Prerequisite: BIOL 2533. (Typically offered: Spring)

\section*{BIOL 4053. Insect Ecology. 3 Hours.}

To develop understanding of important ecological concepts through study of dynamic relationships among insects and their environment. To become familiar with the literature of insect ecology, and interpretation and critique of ecological research. Previous knowledge of basic entomology and/or ecology will be assumed. Corequisite: Lab component. (Typically offered: Fall Even Years)
This course is cross-listed with ENTO 4053.
BIOL 4104. Taxonomy of Flowering Plants. 4 Hours.
Identifying, naming, and classifying of wildflowers, weeds, trees, and other flowering plants. Emphasis is on the practical aspects of plant identification. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 1613 and BIOL 1611L and BIOL 2323 and BIOL 3023. (Typically offered: Spring)

\section*{BIOL 4114. Dendrology. 4 Hours.}

Morphology, classification, geographic distribution, and ecology of woody plants. Lecture 3 hours, laboratory 3 hours per week, and fieldtrips. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Fall)

BIOL 4122. Food Microbiology. 2 Hours.
The study of food microbiology including classification/taxonomy, contamination, preservation and spoilage of different kinds of foods, pathogenic microorganisms, food poisoning, sanitation, control and inspection and beneficial uses of microorganisms. Prerequisite: BIOL 2013 and BIOL 2011L or BIOL 2533. (Typically offered: Fall)
This course is cross-listed with FDSC 4122.
BIOL 4133. Plant Disease Control. 3 Hours.
Principles, methods and mechanics of plant disease control. Emphasis is given to the integration of control measures and epidemiology of plant diseases. Lecture 3
hours per week. Prerequisite: PLPA 3003. (Typically offered: Fall)
This course is cross-listed with PLPA 4223.
BIOL 4153. Biology of Global Change. 3 Hours.
Covers impact of global change on sustainability and adaptability of biological systems. Corequisite: BIOL 4252. Prerequisite: (BIOL 1543 and BIOL 1541L) or BIOL 1584. (Typically offered: Spring)

BIOL 4163. Dynamic Models in Biology. 3 Hours.
Mathematical and computational techniques for developing, executing, and analyzing dynamic models arising in the biological sciences. Both discrete and continuous time models are studied. Applications include population dynamics, cellular dynamics, and the spread of infectious diseases. Prerequisite: MATH 2554. (Typically offered: Irregular)
This course is cross-listed with MATH 4163.
BIOL 4174. Conservation Genetics. 4 Hours.
Covers concepts of biodiversity identification and illustrates how genetic data are generated and analyzed to conserve and restore biological diversity. Corequisite: Lab component and drill. Prerequisite: BIOL 3023, BIOL 3863 and STAT 2823 (or equivalent), and Junior standing. (Typically offered: Spring)

BIOL 4213. Biological Regulation and Subcellular Communication. 3 Hours. Combines lectures, review of primary literature, student presentations, and small group discussions to explore a diversity of topics related to mechanisms of biological regulation and subcellular communication. Prerequisite: BIOL 2323 and BIOL 2533. (Typically offered: Irregular)

\section*{BIOL 4223. Bacterial Lifestyles. 3 Hours.}

Introduces students to bacteria as prokaryotic organisms, different from eukaryotes such as plants and animals. Model microbial systems will be studied to identify unique strategies that bacteria employ to thrive in their respective environments or develop special adaptations to harsh environments. Prerequisite: BIOL 2013 and BIOL 2011L or BIOL 3123. (Typically offered: Spring Odd Years) This course is cross-listed with PLPA 4123.

BIOL 4233. Genomics and Bioinformatics. 3 Hours.
Principles of molecular and computational analyses of genomes. Prerequisite: BIOL 2533 and BIOL 2323. (Typically offered: Spring)

\section*{BIOL 4234. Comparative Physiology. 4 Hours.}

Comparison of fundamental physiological mechanisms in various animal groups. Adaptations to environmental factors at both the organismal and cellular levels are emphasized. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 2533 and CHEM 3613 and (CHEM 3611L or CHEM 3612M). (Typically offered: Fall)

\section*{BIOL 4241L. Ichthyology Laboratory. 1 Hour.}

Practical application of fish identification based on anatomy, fish sampling methods, and curation of fish specimen. Laboratory component of BIOL 4243. Corequisite: BIOL 4243. (Typically offered: Spring Odd Years)

\section*{BIOL 4241M. Honors Ichthyology Laboratory. 1 Hour.}

Practical application of fish identification based on anatomy, fish sampling methods, and curation of fish specimen. Laboratory component of BIOL 4243H. Prerequisite: Honors standing. Corequisite: BIOL 4243H. (Typically offered: Spring Odd Years) This course is equivalent to BIOL 4241 L .

BIOL 4243. Ichthyology. 3 Hours.
Comprehensive overview of the diversity of fishes. Covers anatomy, physiology, evolution, taxonomy, ecology, behavior, zoogeography and conservation of marine and freshwater fishes. Lecture 3 hours per week. Prerequisite: Eight credits in Biology. Corequisite: BIOL 4241L. (Typically offered: Spring Odd Years)

\section*{BIOL 4243H. Honors Ichthyology. 3 Hours.}

Comprehensive overview of the diversity of fishes. Covers anatomy, physiology, evolution, taxonomy, ecology, behavior, zoogeography and conservation of marine and freshwater fishes. Lecture 3 hours per week. Prerequisite: Eight credits in Biology and honors standing. Corequisite: BIOL 4241L. (Typically offered: Spring Odd Years)
This course is equivalent to BIOL 4243.

BIOL 4252. Biology of Global Change Seminar. 2 Hours.
Readings, essays, and group discussions that parallel the 27 lectures in BIOL 4153 and which dissect the resulting impacts of global change on sustainability and adaptability of biological systems. Corequisite: BIOL 4153. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L. (Typically offered: Spring)

BIOL 4252H. Honors Biology of Global Change Seminar. 2 Hours.
Readings, essays, and group discussions that parallel the 27 lectures in BIOL 4153 and which dissect the resulting impacts of global change on sustainability and adaptability of biological systems. Corequisite: BIOL 4153. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L. (Typically offered: Spring)
This course is equivalent to BIOL 4252.

\section*{BIOL 4263. Cell Physiology. 3 Hours.}

In-depth molecular coverage of cellular processes involved in growth, metabolism, transport, excitation, signalling and motility, with emphasis on function and regulation in eukaryotes, primarily animals. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3813 and PHYS 2033. (Typically offered: Fall)

BIOL 4273. Endocrinology. 3 Hours.
In endocrinology we study hormonal integration of living processes as all levels from molecule to organism. We will work with the mechanisms of hormone action, the endocrine control axes and hormones physiological role. The course will include paper discussions and student presentations on topics of special interest. Prerequisite: BIOL 2533 or equivalent. (Typically offered: Spring)

BIOL 4313. Molecular Cell Biology. 3 Hours.
In-depth molecular coverage of transcription, cell cycle, translation, and protein processing in eukaryotes and prokaryotes. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3603 and CHEM 3601L and CHEM 3613 and CHEM 3611L. (Typically offered: Spring)

\section*{BIOL 4313H. Honors Molecular Cell Biology. 3 Hours.}

In-depth molecular coverage of transcription, cell cycle, translation, and protein processing in eukaryotes and prokaryotes. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3603 and CHEM 3601L and CHEM 3613 and CHEM 3611L. (Typically offered: Spring)
This course is equivalent to BIOL 4313.
BIOL 4323. Comparative Neurobiology. 3 Hours.
Exploration of modern research approaches to understanding the development and function of animal nervous systems, with emphasis on molecular and cellular approaches in non-human animal models commonly used in biomedical research. Format combines lectures, group discussions, and student presentations using examples from the primary neurobiology literature. Prerequisite: BIOL 2323 and BIOL 2533 or equivalents. (Typically offered: Irregular)
BIOL 4333. Biotechnology in Agriculture. 3 Hours.
Discussion of the techniques, applications, and issues of biotechnology as it is being used in modern agriculture. Coverage includes the basics of molecular biology, production of transgenic plants and animals, and new applications in the agricultural, food, and medical marketplace. Lecture and discussion, 3 hours per week. (Typically offered: Fall)
This course is cross-listed with PLPA 4333.
BIOL 4353. Ecological Genetics/Genomics. 3 Hours.
Analysis of the genetics of natural and laboratory populations with emphasis on the ecological bases of evolutionary change. Prerequisite: BIOL 2323 and BIOL 2321L and MATH 2554 and STAT 2823 or equivalents. (Typically offered: Fall Odd Years)

\section*{BIOL 4433. Principles of Evolution. 3 Hours.}

Advanced survey of the mechanisms of evolutionary change with special emphasis on advances since the Modern Synthesis. Historical, theoretical, and population genetics approaches are discussed. Recommended BIOL 3023 and BIOL 2321L and BIOL 3861L. Prerequisite: BIOL 2323 and BIOL 3863. (Typically offered: Fall Even Years)

BIOL 4463. Physiological Ecology. 3 Hours.
Interactions between environment, physiology, and properties of individuals and populations on both evolutionary and ecological scales. Prerequisite: BIOL 3863 and BIOL 4234 and its lab component. (Typically offered: Spring Odd Years)
BIOL 4511L. Population Ecology Laboratory. 1 Hour.
Population Ecology Lab. Pre- or Corequisite: BIOL 4513. (Typically offered: Fall Even Years)

\section*{BIOL 4513. Population Ecology. 3 Hours.}

Survey of theoretical and applied aspects of population processes stressing models of growth, interspecific interactions, and adaptation to physical and biotic environments. Prerequisite: BIOL 3863. (Typically offered: Fall Even Years)

\section*{BIOL 4523. Plant Ecology. 3 Hours.}

To develop understanding of important ecological concepts through study of dynamics relationships among plants and their environment. To become familiar with the literature of plant ecology, and interpretation and critique of ecological research. Prerequisite: BIOL 3863. (Typically offered: Spring Even Years)

\section*{BIOL 4543. Developmental Biology. 3 Hours.}

An analysis of the principles and mechanisms of development emphasizing the embryonic and postembryonic development of animals. Prerequisite: BIOL 2533 and BIOL 2323. (Typically offered: Irregular)

BIOL 4554. Developmental Biology with Laboratory. 4 Hours.
An analysis of the concepts of mechanisms of development emphasizing the experimental approach. Lecture 3 hours, laboratory 3 hours per week. Students may not receive degree credit for both BIOL 4543 and BIOL 4554. Corequisite: Lab component. Prerequisite: BIOL 2533 and BIOL 2323 or graduate standing. (Typically offered: Fall)

\section*{BIOL 4563. Cancer Biology. 3 Hours.}

An introduction to the fundamentals of cancer biology. Prerequisite: BIOL 2533. (Typically offered: Fall)

\section*{BIOL 4573L. Introduction to Research in Animal Development and Evolution. 3} Hours.
Provides a hands-on introduction to investigation of problems in animal development and evolution. Emphasis on comparative molecular genetic approaches using nontraditional model organisms. Prerequisite: BIOL 2323. (Typically offered: Fall)

\section*{BIOL 4583. Genetic Engineering. 3 Hours.}

Provides an overview of current methods for altering gene expression, as well as ethical concerns arising from genetic engineering. Special emphasis is placed on practical considerations and techniques necessary for implementing genetic engineering strategies. Prerequisite: BIOL 2323 and BIOL 2533. (Typically offered: Fall)

\section*{BIOL 4613. Primate Adaptation and Evolution. 3 Hours.}

Introduction to the biology of the order Primates. This course considers the comparative anatomy, behavioral ecology and paleontology of our nearest living relatives. Prerequisite: BIOL 3023 or ANTH 1013. (Typically offered: Spring) This course is cross-listed with ANTH 4613.

\section*{BIOL 4693. Forest Ecology. 3 Hours.}

Introduction to the various biological, ecological and historical aspects of forest communities, with particular emphasis on the forests of the central and southeastern United States. Prerequisite: BIOL 3863. (Typically offered: Irregular)

\section*{BIOL 4703. Mechanisms of Pathogenesis. 3 Hours.}

A survey of the events causing human disease at the molecular, cellular and genetic levels. Seeks to develop an appreciation that both the tricks pathogens use and the body's own defenses contribute to pathology. Prerequisite: BIOL 2533. (Typically offered: Fall)
BIOL 4711L. Basic Immunology Laboratory. 1 Hour.
Basic immunology laboratory. Corequisite: BIOL 4713. (Typically offered: Spring)

\section*{BIOL 4713. Basic Immunology. 3 Hours.}

A general overview of immunity with emphasis on the underlying cellular, molecular, and genetic events, and discussions of more specialized issues in immunology, such as disease states involving the immune system, and other interesting problems in modern immunology. Lecture 2 hours, laboratory 4 hours per week. Prerequisite: BIOL 2323 and BIOL 2533. (Typically offered: Spring)

\section*{BIOL 4713H. Honors Basic Immunology. 3 Hours.}

A general overview of Immunity with emphasis on the underlying cellular, molecular, and genetic events, and discussions of more specialized issues in Immunology, such as disease states involving the Immune system, and other interesting problems in modern Immunology. Prerequisite: BIOL 2323 and BIOL 2533. (Typically offered: Spring)
This course is equivalent to BIOL 4713.
BIOL 4723L. Laboratory in Microbial Fermentation. 3 Hours.
An inquiry-based lab focusing on the microbiology of brewing. Introduces students to laboratory techniques used in molecular ecology, microbial physiology, genetics, and brewing. Laboratory 6 hours per week. Pre- or corequisite: FDSC 2723. Prerequisite: BIOL 2013 or BIOL 2323 or BIOL 2533. (Typically offered: Fall Even Years)

\section*{BIOL 4734. Wildlife Management Techniques. 4 Hours.}

To familiarize students with techniques used in the management of wildlife populations. Students will be exposed to field methods, approaches to data analysis, experimental design, and how to write a scientific paper. Management applications will be emphasized. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Irregular)

\section*{BIOL 4744. Fish Biology. 4 Hours.}

Morphology, classification, life history, population dynamics, and natural history of fishes and fish-like vertebrates. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: 12 hours of biological science. (Typically offered: Spring Odd Years)

\section*{BIOL 4763. Ornithology. 3 Hours.}

Taxonomy, morphology, physiology, behavior, and ecology of birds. Lecture, laboratory, and field work. Corequisite: Lab component. Prerequisite: BIOL 3863 (Typically offered: Spring Even Years)

\section*{BIOL 4774. Biometry. 4 Hours.}

Students learn biological statistics and experimental design by actually designing experiments and analyzing data, as well as through lecture, discussion, reading, writing, and problem solving. Lecture 3 hours, laboratory 3 hours each week.
Corequisite: Lab component. Prerequisite: (STAT 2823 or STAT 2303 or equivalent) and BIOL 3863. (Typically offered: Spring Even Years)

BIOL 4793. Introduction to Neurobiology. 3 Hours.
Exploration of the neurological underpinnings of perception, action, and experience including: how sense receptors convert information in the world into electricity, how information flows through the nervous systems, how neural wiring makes vision possible, how the nervous system changes with experience, and how the system develops. Prerequisite: BIOL 2533. (Typically offered: Spring)

BIOL 480V. Special Topics in Biological Sciences. 1-6 Hour.
Consideration of new areas of biological sciences not yet treated adequately in other courses. Prerequisite: 8 hours of biological sciences. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

BIOL 480VH. Honors Special Topics in Biological Sciences. 1-6 Hour.
Consideration of new areas of biological sciences not yet treated adequately in other courses. Prerequisite: 8 hours of biological sciences. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
This course is equivalent to BIOL 480V.

\section*{BIOL 4833. Animal Behavior. 3 Hours.}

Organization, regulation, and phylogeny of animal behavior, emphasizing diversity across animal taxa. Lecture, laboratory, and field work. Corequisite: Lab component. (Typically offered: Spring)

BIOL 4844. Community and Ecosystem Ecology. 4 Hours.
Survey of theoretical and applied aspects of community processes stressing structure, tropic dynamics, community interactions, and major community types. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Fall Odd Years)

\section*{BIOL 4863. Analysis of Animal Populations. 3 Hours.}

Basic principles of design and analysis for population studies of fish and wildlife species. Students will be instructed in the use of the latest software for estimating population parameters. Focus will be on both concepts and applications.
Management applications of estimated parameters will be emphasized. Lecture
2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Spring Even Years)

BIOL 4873. Microbial Molecular Genetics and Informatics. 3 Hours.
Fundamentals of microbial genomics and bioinformatics. Course covers microbial genetics, genetic structure, genome organization, proteome organization, approaches for the analysis of DNA, RNA, and proteins, cellular metabolic pathways, genetic regulation, small RNA molecules, functional genomics, metagenomics, and bioinformatics approaches for analysis of microbial genomes. Prerequisite: BIOL 2323 or BIOL 2533. (Typically offered: Fall)

BIOL 4883. Mammalian Evolution and Osteology. 3 Hours.
Focuses on describing the evolutionary history of mammals, a group of vertebrates that include over 5,000 species in 29 orders, and will provide an overview of living species and their identifying features. Prerequisite: ANTH 1013 and ANTH 1011L, or BIOL 1543 and BIOL 1541L, or instructor consent. (Typically offered: Fall Even Years)
This course is equivalent to ANTH 4703.

\section*{BIOL 496V. Culture and Environment: Field Studies. 1-6 Hour.}

May be taken by students participating in overseas study programs or other domestic field study programs approved by the department. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
BIOL 496VH. Honors Culture and Environment: Field Studies. 1-6 Hour.
May be taken by students participating in overseas study programs or other domestic field study programs approved by the department. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
This course is equivalent to BIOL 496V.
BIOL 498V. Senior Thesis. 1-6 Hour.
Senior thesis. (Typically offered: Fall, Spring and Summer)
BIOL 499V. Research In Biological Sciences. 1-4 Hour.
Research. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 8 hours of degree credit.
BIOL 499VH. Honors Research in Biological Sciences. 1-4 Hour.
Honors research. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 8 hours of degree credit.
This course is equivalent to BIOL 499V.
BIOL 5001. Seminar in Biology. 1 Hour.
Discussion of selected topics and review of current literature in any area of the biological sciences. (Typically offered: Fall and Spring) May be repeated for up to 2 hours of degree credit.
BIOL 5003L. Laboratory in Prokaryote Biology. 3 Hours.
Laboratory techniques in prokaryote culture, identification, physiology, metabolism, and genetics. Laboratory 6 hours per week. Prerequisite: BIOL 3123. (Typically offered: Fall and Spring)

BIOL 5024. Insect Diversity and Taxonomy. 4 Hours.
Principles and practices of insect classification and identification with emphasis on adult insects. 2.5 hours lecture, 4 hours lab. Previous knowledge of basic entomology is necessary. Graduate degree credit will not be given for both
BIOL 4024 and BIOL 5024. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Fall)
This course is cross-listed with ENTO 5024.
BIOL 5034. Wildlife Management Techniques. 4 Hours.
To familiarize students with techniques used in the management of wildlife populations. Students will be exposed to field methods, approaches to data analysis, experimental design, and how to write a scientific paper. Management applications will be emphasized. Lecture 3 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both BIOL 4734 and BIOL 5034. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Irregular)

\section*{BIOL 5043. Prokaryote Biology. 3 Hours.}

An in-depth coverage of prokaryote diversity, genetics, metabolism, growth, structures and functions. (Typically offered: Spring)

\section*{BIOL 5053. Insect Ecology. 3 Hours.}

Teaches important ecological concepts through study of dynamic relationships among insects and their environment. Introduces literature of insect ecology, and interpretation and critique of ecological research. Previous knowledge of basic entomology and/or ecology will be assumed. 2 hours lecture/2 hours lab. Graduate degree credit will not be given for both BIOL 4053 and BIOL 5053. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Fall Even Years) This course is cross-listed with ENTO 5053.

\section*{BIOL 5104. Taxonomy of Flowering Plants. 4 Hours.}

Identifying, naming, and classifying of wildflowers, weeds, trees, and other flowering plants. Emphasis is on the practical aspects of plant identification. Lecture 3 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both BIOL 4104 and BIOL 5104. Corequisite: Lab component. Prerequisite: BIOL 1613 and BIOL 1611L and BIOL 2323 and BIOL 3023. (Typically offered: Spring)

\section*{BIOL 5113. Insect Behavior and Chemical Ecology. 3 Hours.}

Basic concepts in insect senses and patterns of behavioral responses to various environmental stimuli. Previous knowledge of basic entomology is helpful, but not required. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Spring Even Years)
This course is cross-listed with ENTO 5113.

\section*{BIOL 5122. Food Microbiology. 2 Hours.}

The study of food microbiology including classification/taxonomy, contamination, preservation and spoilage of different kinds of foods, pathogenic microorganisms, food poisoning, sanitation, control and inspection and beneficial uses of microorganisms. Graduate degree credit will not be given for both BIOL 4122 and BIOL 5122. Prerequisite: BIOL 2013 and BIOL 2011L or BIOL 2533. (Typically offered: Fall)
This course is cross-listed with FDSC 5122.

\section*{BIOL 5124. Dendrology. 4 Hours.}

Morphology, classification, geographic distribution, and ecology of woody plants. Lecture 3 hours, laboratory 3 hours per week, and fieldtrips. Graduate degree credit will not be given for both BIOL 4114 and BIOL 5124. Prerequisite: BIOL 3863. (Typically offered: Fall)

\section*{BIOL 5153. Practical Programming for Biologists. 3 Hours.}

Hands-on instruction in the fundamentals of biological computing. Students learn how to set up a Unix work station, work from the command line, install software, build databases, and program in Python, a popular scripting language for biological applications. Most examples focus on the analysis of genomic data. (Typically offered: Spring)

BIOL 5163. Dynamic Models in Biology. 3 Hours.
Mathematical and computational techniques for developing, executing, and analyzing dynamic models arising in the biological sciences. Both discrete and continuous time models are studied. Applications include population dynamics, cellular dynamics, and the spread of infectious diseases. Graduate degree credit will not be given for both BIOL 4163 and BIOL 5163. Prerequisite: MATH 2554. (Typically offered: Irregular)

\section*{BIOL 5174. Conservation Genetics. 4 Hours.}

Covers concepts of biodiversity identification and illustrates how genetic data are generated and analyzed to conserve and restore biological diversity. Corequisite: Lab component. Prerequisite: BIOL 3023, BIOL 3863 and STAT 2823 (or equivalent) and graduate standing. (Typically offered: Spring)

BIOL 5213. Biological Regulation and Subcellular Communication. 3 Hours. Combines lectures, review of primary literature, student presentations, and small group discussions to explore a diversity of topics related to mechanisms of biological regulation and subcellular communication. Prerequisite: Graduate standing. (Typically offered: Irregular)

\section*{BIOL 5223. Bacterial Lifestyles. 3 Hours.}

The course will introduce students to bacteria as prokaryotic organisms, different from eukaryotes such as plants and animals. Model microbial systems will be studied in more detail to identify unique strategies that bacteria employ to thrive in their respective environment, whether they are causing diseases or establishing beneficial interactions with animal or plants or coexisting with other microorganisms in diverse ecological environments. The course will also cover special adaptations that bacteria have evolved to adapt to harsh environments and how these adaptations can be harnessed to control pollution. Prerequisite: (BIOL 2013 and BIOL 2011L) or BIOL 3123. (Typically offered: Spring Odd Years) This course is cross-listed with PLPA 5123.

\section*{BIOL 5233. Genomics and Bioinformatics. 3 Hours.}

Principles of molecular and computational analyses of genomes. Prerequisite: BIOL 2533 or BIOL 2323. (Typically offered: Spring)

\section*{BIOL 5241L. Ichthyology Laboratory. 1 Hour.}

Practical application of fish identification based on anatomy, fish sampling methods, and curation of fish specimen. Laboratory component of BIOL 5243. Corequisite: BIOL 5243. (Typically offered: Spring Odd Years)

\section*{BIOL 5243. Ichthyology. 3 Hours.}

Comprehensive overview of the diversity of fishes. Covers anatomy, physiology, evolution, taxonomy, ecology, behavior, zoogeography and conservation of marine and freshwater fishes. Lecture 3 hours per week. Corequisite: BIOL 5241L. (Typically offered: Spring Odd Years)

\section*{BIOL 5254. Comparative Physiology. 4 Hours.}

Comparison of fundamental physiological mechanisms in various animal groups. Adaptations to environmental factors at both the organismal and cellular levels are emphasized. Lecture 3 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both BIOL 4234 and BIOL 5254. Prerequisite: BIOL 2533 and CHEM 3613 and (CHEM 3611L or CHEM 3612M). (Typically offered: Fall)

BIOL 5263. Cell Physiology. 3 Hours.
In-depth molecular coverage of cellular processes involved in growth, metabolism, transport, excitation, signaling and motility, with emphasis on function and regulation in eukaryotes, primarily animals. Prerequisite: BIOL 2323, BIOL 2533, BIOL 2531L, CHEM 3813, and PHYS 2033. (Typically offered: Fall)

\section*{BIOL 5273. Endocrinology. 3 Hours.}

In endocrinology we study hormonal integration of living processes at all levels from molecule to organism. We will work with the mechanisms of hormone action, the endocrine control axes and hormones physiological role. The course will include paper discussions and student presentations on topics of special interest. (Typically offered: Spring)

\section*{BIOL 5313. Molecular Cell Biology. 3 Hours.}

In-depth molecular coverage of transcription, cell cycle, translation, and protein processing in eukaryotes and prokaryotes. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3603 and CHEM 3601L and CHEM 3613 and CHEM 3611L. (Typically offered: Spring)

\section*{BIOL 5323. Comparative Neurobiology. 3 Hours.}

Exploration of modern research approaches to understanding the development and function of animal nervous systems, with emphasis on molecular and cellular approaches in non-human animal models commonly used in biomedical research. Format combines lectures, group discussions, and student presentations using examples from the primary neurobiology literature. Prerequisite: Graduate standing (Typically offered: Irregular)

\section*{BIOL 5343. Advanced Immunology. 3 Hours.}

Aspects of innate, cell-mediated, and humoral immunity in mammalian and avian species. Molecular mechanisms underlying the function of the immune system are emphasized. A course in Basic Immunology prior to enrollment in Advanced Immunology is recommended but not required. Lecture 3 hours per week. (Typically offered: Spring)
This course is cross-listed with POSC 5343.

\section*{BIOL 5352L. Immunology in the Laboratory. 2 Hours.}

Laboratory course on immune-diagnostic laboratory techniques and uses of antibodies as a research tool. Included are cell isolation and characterization procedures, immunochemistry, flow cytometry, ELISA and cell culture assay systems. Laboratory 6 hours per week. Prerequisite: POSC 5343 or BIOL 5343. (Typically offered: Spring)

This course is cross-listed with POSC 5352L.

\section*{BIOL 5353. Ecological Genetics/genomics. 3 Hours.}

Analysis of the genetics of natural and laboratory populations with emphasis on the ecological bases of evolutionary change. Prerequisite: BIOL 2323 and BIOL 2321L, BIOL 3023 and MATH 2554 and STAT 2823 or equivalents. (Typically offered: Fall Odd Years)

\section*{BIOL 5404. Comparative Botany. 4 Hours.}

A comparative approach to organisms classically considered to be plants with emphasis on morphology, life history, development, and phylogeny. Three hours lecture, 4 hours lab per week. Corequisite: Lab component. Prerequisite: Graduate standing. (Typically offered: Fall Odd Years)

BIOL 5433. Principles of Evolution. 3 Hours.
Advanced survey of the mechanisms of evolutionary change with special emphasis on advances since the Modern Synthesis. Historical, theoretical, and population genetics approaches are discussed. Recommended: BIOL 3023 and BIOL 2321L and BIOL 3861L. Prerequisite: BIOL 2323 and BIOL 3863. (Typically offered: Fall Even Years)

BIOL 5463. Physiological Ecology. 3 Hours.
Interactions between environment, physiology, and properties of individuals and populations on both evolutionary and ecological scales. Prerequisite: BIOL 3863 and BIOL 4234. (Typically offered: Spring Odd Years)

BIOL 5511L. Population Ecology Laboratory. 1 Hour.
Demonstration of the models and concepts from BIOL 5513. Pre- or Corequisite:
BIOL 5513. (Typically offered: Fall Even Years)
BIOL 5513. Population Ecology. 3 Hours.
Survey of theoretical and applied aspects of populations processes stressing models of growth, interspecific interactions, and adaptation to physical and biotic environments. Corequisite: BIOL 5511L. Prerequisite: BIOL 3863. (Typically offered: Fall Even Years)

BIOL 5523. Plant Ecology. 3 Hours.
To develop understanding of important ecological concepts through study of dynamics relationships among plants and their environment. To become familiar with the literature of plant ecology, and interpretation and critique of ecological research. Prerequisite: BIOL 3863. (Typically offered: Spring Even Years)

\section*{BIOL 5524. Developmental Biology with Laboratory. 4 Hours.}

An analysis of the concepts and mechanisms of development emphasizing the experimental approach. Students may not receive degree credit for both BIOL 5543 Developmental Biology and BIOL 5524 Developmental Biology with Laboratory. Corequisite: Lab component. (Typically offered: Fall)

BIOL 5543. Developmental Biology. 3 Hours.
An analysis of the principles and mechanisms of development emphasizing the embryonic and postembryonic development of animals. Degree credit will not be allowed for both BIOL 5543 and BIOL 5524. (Typically offered: Irregular)

\section*{BIOL 5553. Astrobiology. 3 Hours.}

Discusses the scientific basis for the possible existence of extraterrestrial life. Includes the origin and evolution of life on Earth, possibility of life elsewhere in the solar system (including Mars), and the possibility of life on planets around other stars. Prerequisite: Instructor consent. (Typically offered: Irregular) This course is cross-listed with SPAC 5553.

\section*{BIOL 5563. Cancer Biology. 3 Hours.}

An introduction to the fundamentals of cancer biology. Prerequisite: BIOL 2533. (Typically offered: Fall)

BIOL 5613. Primate Adaptation and Evolution. 3 Hours.
Introduction to the biology of the order Primates. This course considers the comparative anatomy, behavioral ecology and paleontology of our nearest living relatives. Graduate degree credit will not be given for both BIOL 4613 and BIOL 5613. Prerequisite: BIOL 3023 or ANTH 1013. (Typically offered: Spring) This course is cross-listed with ANTH 5623.

BIOL 5693. Forest Ecology. 3 Hours.
Introduction to the various biological, ecological and historical aspects of forest communities, with particular emphasis on the forests of the central and southeastern United States. Graduate degree credit will not be given for both BIOL 4693 and BIOL 5693. Prerequisite: BIOL 3863. (Typically offered: Irregular)

BIOL 5703. Mechanisms of Pathogenesis. 3 Hours.
A survey of events causing human disease at the molecular, cellular and genetic levels. Seeks to develop an appreciation that both the tricks pathogens use and the body's own defenses contribute to pathology. (Typically offered: Fall)

BIOL 5711L. Basic Immunology Laboratory. 1 Hour.
Basic immunology laboratory. Graduate degree credit will not be given for both BIOL 4711L and BIOL 5711L. Corequisite: BIOL 5713. (Typically offered: Spring)

BIOL 5713. Basic Immunology. 3 Hours.
A general overview of Immunity with emphasis on the underlying cellular, molecular and genetic events controlling immune reactions. Reading of the primary literature on disease states involving the immune system. (Typically offered: Spring)

\section*{BIOL 5723. Fish Biology. 3 Hours.}

Morphology, classification, life histories, population dynamics, and natural history of fishes and fish-like vertebrates. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: 12 hours of biological sciences. (Typically offered: Spring Odd Years)

BIOL 5743. Herpetology. 3 Hours.
Morphology, classification and ecology of amphibians and reptiles. Lecture 2 hours, laboratory 1 hour per week. Corequisite: Lab component. (Typically offered: Spring Even Years)

BIOL 5763. Ornithology. 3 Hours.
Taxonomy, morphology, physiology, behavior, and ecology of birds. Lecture, laboratory, and field work. Corequisite: Lab component. Prerequisite: 10 hours of biological sciences. (Typically offered: Spring Even Years)

\section*{BIOL 5774. Biometry. 4 Hours.}

Students learn biological statistics and experimental design by actually designing experiments and analyzing data, as well as through lecture, discussion, reading, writing, and problem solving. Lecture 3 hours, laboratory 3 hours each week. Graduate degree credit will not be given for both BIOL 4774 and BIOL 5774. Corequisite: Lab component. Prerequisite: STAT 2823 or equivalent, BIOL 3863. (Typically offered: Spring Even Years)

\section*{BIOL 5793. Introduction to Neurobiology. 3 Hours.}

Exploration of the neurological underpinnings of perception, action, and experience including: how sense receptors convert information in the world into electricity, how information flows through the nervous systems, how neural wiring makes vision possible, how the nervous system changes with experience, and how the system develops. Graduate degree credit will not be given for both BIOL 4793 and BIOL 5793. Prerequisite: BIOL 2533. (Typically offered: Spring)
BIOL 580V. Special Topics in Biological Sciences. 1-6 Hour.
Consideration of new areas of biological sciences not yet treated adequately in other courses. Prerequisite: 8 hours of biological sciences. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{BIOL 5823. Science Communication. 3 Hours.}

Covers the foundations of writing strategies, how to communicate with disciplinespecific versus broad audiences, elements of an effective presentation, and the manuscript and proposal review process. (Typically offered: Fall)
BIOL 5833. Animal Behavior. 3 Hours.
Organization, regulation, and phylogeny of animal behavior, emphasizing diversity across animal taxa. Lecture, laboratory, and field work. Corequisite: Lab component. (Typically offered: Spring)
BIOL 5843. Conservation Biology. 3 Hours.
The study of direct and indirect factors by which biodiversity is impacted by human activity. It is a synthetic field of study that incorporates principles of ecology, biogeography, population genetics, economics, sociology, anthropology, philosophy, geology, and geography. Prerequisite: BIOL 3863. (Typically offered: Irregular)

\section*{BIOL 5844. Community Ecology. 4 Hours.}

Survey of theoretical and applied aspects of community processes stressing structure, trophic dynamics, community interactions, and major community types. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Fall Odd Years)

\section*{BIOL 5863. Analysis of Animal Populations. 3 Hours.}

Basic principles of design and analysis for population studies of fish and wildlife species. Students will be instructed in the use of the latest software for estimating population parameters. Focus will be on both concepts and applications. Management applications of estimated parameters will be emphasized. Lecture 2 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both BIOL 4863 and BIOL 5863. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Spring Even Years)
BIOL 5873. Microbial Molecular Genetics and Informatics. 3 Hours.
Fundamentals of microbial genomics and bioinformatics. Course covers microbial genetics, genetic structure, genome organization, proteome organization, approaches for the analysis of DNA, RNA, and proteins, cellular metabolic pathways, genetic regulation, small RNA molecules, functional genomics, metagenomics, and bioinformatics approaches for analysis of microbial genomes. Prerequisite: Graduate status. (Typically offered: Fall)

BIOL 5883. Mammalian Evolution and Osteology. 3 Hours.
Focuses on describing the evolutionary history of mammals, a group of vertebrates that include over 5,000 species in 29 orders, and will provide an overview of living species and their identifying features. Credit will not be given for both ANTH 4703 and ANTH 5703. Prerequisite: Instructor consent. (Typically offered: Fall Even Years)
This course is cross-listed with ANTH 5703.

\section*{BIOL 5914. Stream Ecology. 4 Hours.}

Current concepts and research in lotic ecosystem dynamics. Lecture, laboratory, field work and individual research projects required. Corequisite: Lab component. Prerequisite: 3 hours of ecology-related coursework. (Typically offered: Fall Even Years)

BIOL 5933. Global Biogeochemistry: Elemental Cycles and Environmental Change. 3 Hours.
This course explores the chemical, biological, and geological processes occurring within ecosystems. An understanding of these processes is used to investigate how they form the global biogeochemical cycles that provide energy and nutrients necessary for life. Class discussions focus on global change and the effects of more recent anthropogenic influences. Prerequisite: 3 hours of chemistry or biochemistry and ecology. (Typically offered: Spring Odd Years)
BIOL 596V. Culture and Environment: Field Studies. 1-6 Hour.
May be taken by students participating in overseas study programs or other domestic field study programs approved by the department. Graduate degree credit will not be given for both BIOL 496V and BIOL 596V. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

\section*{BIOL 600V. Master's Thesis. 1-6 Hour.}

Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

BIOL 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{Biomedical Engineering (BMEG)}

\section*{Courses}

\section*{BMEG 2614. Introduction to Biomedical Engineering. 4 Hours.}

An introductory course for undergraduate biomedical engineering students. It covers topics such as recombinant DNA technologies, cell and tissue engineering, stem cell and organ regeneration, the biomechanics, bioinstrumentation, engineering of immunity, and bio- and medical imaging, etc. The application of nano-biotechnology in developing clinical products such as tissue engineered products, drug delivery systems, etc. will be emphasized in the course. Prerequisite: (GNEG 1321H, or GNEG 1121, or GNEG 1103), and CHEM 1103, with a grade of \(C\) or better, MATH 2554 and PHYS 2054. (Typically offered: Fall and Summer)

\section*{BMEG 2813. Biomechanical Engineering. 3 Hours.}

This course introduces basic concepts and principles of biomechanics to biomedical and other engineering students. The course topics include mechanics and materials, viscoelastic properties, bone, cartilage, ligament, tendon, muscle, cardiovascular dynamics, clinical gait analysis, etc. After taking this course, students are expected to understand the application of engineering kinetics to describe motions of human body and mechanic properties of tissues. MATLAB will be used to write and solve biomechanical static and dynamic equations. Lecture 3 hours per week. Prerequisite: BMEG 2614, CHEM 1123, MATH 2564, and PHYS 2074. (Typically offered: Spring)

\section*{BMEG 2904. Biomedical Instrumentation. 4 Hours.}

This course is designed for biomedical engineering undergraduate students to learn both theoretical and practical concepts of bioinstrumentation and their applications in modern life science and medicine. Analytical experiments will be practiced in the laboratory along with the lecture section. This course covers basic topics in circuits such as charge current, voltage, resistance, power energy, linear network analysis, inductors, capacitors, operational amplifier, time-varying signals, active analog filters, bioinstrumentation design etc. The application of these principles and theories in bioinstrumentation design and development is particularly emphasized in this course. The lab section requires team work, planning, and data sharing. Corequisite: Lab component. Prerequisite: BMEG 2614, MATH 2564 and PHYS 2074. (Typically offered: Spring)

\section*{BMEG 3124. Biomedical Signals and Systems. 4 Hours.}

This course will introduce students to the basics of signals - continuous and digital signals, and signal processing tools, such as filters, Laplace and Fourier transforms. The 'systems' aspect of the course will focus on physiological systems and methods to model such systems. The course will also focus on the biomedical applications of these methods through lab components. Prerequisite: BMEG 2904. (Typically offered: Fall)

\section*{BMEG 3634. Biomaterials. 4 Hours.}

Introduction to the engineering properties of materials used in biomedical devices and applications. Topics include: atomic properties, structure-property-processing relationships, bulk engineering properties, surface and interfacial properties and applications of materials in biology and medicine. All topics will be reviewed in the context of specific biomedical devices and the engineering principles involved in their design. Corequisite: Lab component. Prerequisite: BMEG 2813, CHEM 1123, and BIOL 1543 and BIOL 1541L. (Typically offered: Fall)

\section*{BMEG 3653. Biomedical Modeling and Numerical Methods. 3 Hours.} Application of mathematical techniques to physiological systems. The emphasis will be on cellular physiology and cardiovascular system. Cellular physiology topics include models of cellular metabolism, membrane dynamics, membrane potential, excitability, wave propagation and cellular function regulation. Cardiovascular system topics include models of blood cells, oxygen transport, cardiac output, cardiac regulation, and circulation. Pre- or Corequisite: MATH 2584. Prerequisite: BMEG 2614, and (MATH 2574 or MATH 3083). (Typically offered: Spring)

BMEG 3653H. Honors Biomedical Modeling and Numerical Methods. 3 Hours. Application of mathematical techniques to physiological systems. The emphasis will be on cellular physiology and cardiovascular system. Cellular physiology topics include models of cellular metabolism, membrane dynamics, membrane potential, excitability, wave propagation and cellular function regulation. Cardiovascular system topics include models of blood cells, oxygen transport, cardiac output, cardiac regulation, and circulation. Pre- or Corequisite: MATH 2584. Prerequisite: BMEG 2614, and (MATH 2574 or MATH 3083). (Typically offered: Spring) This course is equivalent to BMEG 3653.

\section*{BMEG 3801. Clinical Observations and Needs Finding. 1 Hour.}

This course involves the introduction of clinical procedures and biomedical devices and technology to biomedical engineering students. Students will tour medical facilities, clinics and hospitals and will participate in medical seminars, workshops and medical rounds. The course prepares students to successfully select and complete a project in the senior capstone course. Prerequisite: The prerequisites for BMEG students are BMEG 2813 or BMEG 2904; prerequisites for DASC students: BMEG 2614 and DASC 2594. (Typically offered: Fall and Spring)

\section*{BMEG 3824. Biomolecular Engineering. 4 Hours.}

Biomolecular Engineering is to design and produce biomolecules, especially proteins, for uses ranging from pharmaceuticals, materials, sensors, transducers, to functional interfaces with conventional engineering materials. The course begins with an introduction to the tools and techniques of molecular biology that are used for protein engineering. Additional topics include recombinant DNA techniques, biochemical kinetics, cell growth reaction and kinetics, bioreactors, membrane processes, and bioproduct purification. There is an associated laboratory with exercises related to lecture topics. Corequisite: Lab component. Prerequisite: BMEG 3634, CHEM 1123, and BIOL 2533. (Typically offered: Spring)

BMEG 3824H. Honors Biomolecular Engineering. 4 Hours.
Biomolecular Engineering is to design and produce biomolecules, especially proteins, for uses ranging from pharmaceuticals, materials, sensors, transducers, to functional interfaces with conventional engineering materials. The course begins with an introduction to the tools and techniques of molecular biology that are used for protein engineering. Additional topics include recombinant DNA techniques, biochemical kinetics, cell growth reaction and kinetics, bioreactors, membrane processes, and bioproduct purification. There is an associated laboratory with exercises related to lecture topics. Corequisite: Lab component. Prerequisite: BMEG 3634, CHEM 1123, and BIOL 2533. (Typically offered: Spring) This course is equivalent to BMEG 3824.

\section*{BMEG 3913. Biofluid Mechanics. 3 Hours.}

Introduction to fundamental concepts and applications of fluid dynamics from a biological and physiological perspective. Topics include physical properties of fluids, fluid statics, manometers, streamlines and the Bernoulli relation, velocity and acceleration fields, viscous flow and the Navier-Stokes equations, flows in pipes and over submerged surfaces, properties of blood and other physiological fluids, transport models in the lungs, lymph, blood, and artificial organs, and computational fluid dynamics (CFD) simulations. Prerequisite: MATH 2584, PHYS 2074, and BMEG 2614. (Typically offered: Fall)

\section*{BMEG 4213. Tissue Mechanics. 3 Hours.}

The purpose of this course is to introduce students to non-linear biomechanics of soft tissues such as skin, bladder, blood vessels, and the brain. Topics covered: Tissue mechanics: continuum biomechanics, tensor analysis, kinematics of continua, balance laws. Governing physics of mechanics as applied to soft tissues. Various constitutive relations will be discussed: linear elastic, hyperelastic, viscoelastic, poroelastic, and inelastic materials with internal variables. Cannot receive credit for both BMEG 4213 and BMEG 5213. Prerequisite: BMEG 2813, BMEG major and Senior standing. (Typically offered: Irregular)

\section*{BMEG 4243. Advanced Biomaterials and Biocompatibility. 3 Hours.}

From Absorbable sutures to Zirconium alloy hip implants, biomaterials science influences nearly every aspect of medicine. This course focuses on the study of different classes of biomaterials and their interactions with human tissues. Topics include: biocompatibility; biofouling; hemocompatibility; wound healing response; foreign body response; design of orthopedic, dental and cardiovascular implants; opthalmological and dermatological materials; degradable polymers for drug delivery; nanobiomaterials; smart biomaterials and the regulation of devices and materials by the FDA. Pre- or Corequisite: BMEG 4623. Prerequisite: BMEG 3634. (Typically offered: Irregular)

\section*{BMEG 4253. Biologics: Next Generation Therapeutics and Their Purification. 3} Hours.
The course focuses on the production and purification of biologics including monoclonal antibodies, viral vectors, nucleic acids and other biotherapeutics. In particular, the course will focus on the fundamental thermodynamics principles as well as kinetic limitations involved in upstream harvesting and downstream purification. Applications of PCR, mass spectroscopy, electrophoresis, imaging and modeling tools during the production and purification of biologics will be discussed. (Typically offered: Irregular)

\section*{BMEG 4403. Biomedical Microscopy. 3 Hours.}

An advanced course covering light microscopy techniques, conjugate image planes, principles of contrast, fluorescence imaging, confocal and multi-photon microscopy, electron microscopy, atomic force microscopy, image reconstruction and digital image processing with supporting units in tissue culture and histology. Prerequisite: The prerequisites for BMEG students are BMEG 2904, PHYS 2074, BMEG major and Senior standing; prerequisites for DASC students: BMEG 2614, PHYS 2054 and DASC 2113. (Typically offered: Irregular)

\section*{BMEG 4413. Tissue Engineering. 3 Hours.}

This course introduces Tissue Engineering approaches at genetic and molecular, cellular, tissue, and organ levels. Topics include cell and tissue in vitro expansion, tissue organization, signaling molecules, stem cell and stem cell differentiation, organ regeneration, biomaterial and matrix for tissue engineering, bioreactor design for cell and tissue culture, dynamic and transportation in cell and tissue cultures, clinical implementation of tissue engineered products, and tissue-engineered devices. Prerequisite: BMEG 3824 and BIOL 2533. (Typically offered: Irregular)

\section*{BMEG 450VH. Honors Thesis. 1-4 Hour.}

Provides Biomedical Engineering students an opportunity to explore a topic in depth through an independent research or design project. Prerequisite: Honors standing. (Typically offered: Spring and Summer) May be repeated for degree credit.

\section*{BMEG 4513. Biomedical Optics and Imaging. 3 Hours.}

This course will provide students with a fundamental understanding of various biomedical imaging modalities. Topics will include: Basics of light-tissue interaction - absorption, fluorescence, elastic and inelastic scattering; Computational and analytical models of light propagation to quantify tissue optical properties; Optical imaging techniques spectroscopy, tomography, and laser speckle with potential clinical applications; and Clinical imaging modalities and recent advances \(X\) ray, Magnetic Resonance Imaging (MRI), Positron Emission Tomography (PET), Computed Tomography (CT), Ultrasound imaging, and Photoacoustic imaging. At the end of this course, students should have a good understanding of optical imaging, spectroscopy, and non-optical imaging modalities, specific anatomical sites that they are best suited for, and the trade-offs between imaging depth and resolution. Students may not receive credit for both BMEG 4513 and BMEG 5513. Prerequisite: The prerequisites for BMEG students are BMEG 2904 and senior standing; prerequisites for DASC students: BMEG 2614, PHYS 2054 and DASC 2113 and senior standing. (Typically offered: Irregular)
BMEG 4523. Biomedical Data and Image Analysis. 3 Hours.
This course focuses on an introduction to image processing and analysis for applications in biomedical research. After a review of basic MATLAB usage, students will learn fundamental tools for processing and analyzing data from a variety of subdisciplines within biomedical engineering. Topics include: filtering, thresholding, segmentation, morphological processing, and image registration. Through exercises involving 1D, 2D, and 3D data, students will develop problemsolving skills and a knowledge base in MATLAB required for customized quantitative data analysis. Students may not receive credit for both BMEG 4523 and BMEG 5523. Prerequisite: The prerequisites for BMEG students are BMEG 3124 and BMEG 3653; prerequisites for DASC students: BMEG 2614, PHYS 2054 and DASC 3203. (Typically offered: Irregular)

\section*{BMEG 4593. Biomedical Innovations for Global Impact. 3 Hours.}

This course focuses on specific problems triggered or exacerbated by selected global health care challenges. Acknowledging the interdependence of our world, where the well-being of one individual is intrinsically connected to the well-being of the entire ecosystem, the course connects participating students with a global and local network of students, faculty, community partners, and mentors, and invite them to develop solutions to some of these health care challenges. Pre- or corequisite: Junior Level Standing. (Typically offered: Fall)
This course is cross-listed with SEVI 4333.

BMEG 460V. Individual Study. 1-6 Hour.
Individual study and research of a topic mutually agreeable to the student and faculty member. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{BMEG 460VH. Honors Individual Study. 1-6 Hour.}

Individual study and research of a topic mutually agreeable to the student and faculty member. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
This course is equivalent to BMEG 460 V .

\section*{BMEG 4623. Biomedical Transport Phenomena. 3 Hours.}

An introduction to the modeling of complex biological systems using principles of transport phenomena and biochemical kinetics. This course will cover molecular transport due to velocity, concentration and thermal gradients. Topics include the conservation relations; rheology of Newtonian and non-Newtonian physiological fluids; regulation of blood flow; steady and transient diffusion in reacting systems; dimensional analysis; transport processes in disease pathology. Prerequisite: BMEG 3653, CHEG 2133 or MEEG 3503, CHEG 2313 or MEEG 2403, and MATH 2584. (Typically offered: Fall)

\section*{BMEG 4623H. Honors Biomedical Transport Phenomena. 3 Hours.}

An introduction to the modeling of complex biological systems using principles of transport phenomena and biochemical kinetics. This course will cover molecular transport due to velocity, concentration and thermal gradients. Topics include the conservation relations; rheology of Newtonian and non-Newtonian physiological fluids; regulation of blood flow; steady and transient diffusion in reacting systems; dimensional analysis; transport processes in disease pathology. Prerequisite: BMEG 3653, CHEG 2133 or MEEG 3503, CHEG 2313 or MEEG 2403, and MATH 2584. (Typically offered: Fall)
This course is equivalent to BMEG 4623.
BMEG 470V. Special Topics in Biomedical Engineering. 1-4 Hour.
Consideration of current biomedical engineering topics not covered in other courses. Prerequisite: Senior standing. (Typically offered: Irregular) May be repeated for degree credit.

\section*{BMEG 4713. Cardiovascular Physiology and Devices. 3 Hours.}

Understanding etymology of disease while creating solutions and dedicated devices is the primary focus of biomedical engineering. This course describes an interdisciplinary approach of the clinical and engineering worlds to develop devices for treating cardiovascular disease. The first part of the course will be a thorough review of the relevant anatomic and physiological considerations important for developing devices. Understanding these considerations from an engineering perspective to inform device development will be the second part of the course. Students may not receive credit for both BMEG 4713 and BMEG 5713. Prerequisite: CHEG 2133 or MEEG 3503, and BIOL 2213. (Typically offered: Irregular)

\section*{BMEG 4813. Biomedical Engineering Design I. 3 Hours.}

This is part one of a two-semester course that introduces students to the basic concepts of design from a biomedical engineering perspective. Groups are organized into teams of 4-5 members. The students put together a development plan and complete an initial prototype. Students will design what is to be fabricated and tested as a medical device or software following design process and product design specification guidelines. Corequisite: Lab component. Pre- or Corequisite: BMEG 4623 and BMEG 2904. (Typically offered: Fall)

\section*{BMEG 4823. Biomedical Engineering Design II. 3 Hours.}

This is part two of a two-semester course that introduces students to the basic concepts of design from a biomedical engineering perspective. Groups are organized into teams of 4-5 members. The students put together a development plan and complete an initial prototype. Students will design what is to be fabricated and tested as a medical device or software following design process and product design specification guidelines. Corequisite: Lab component. Prerequisite: BMEG 4813. (Typically offered: Spring)

\section*{BMEG 4903. Entrepreneurial Bioengineering. 3 Hours.}

The course introduces entrepreneurship, business model canvas, and lean startup principles to the students with a focus on medical device customer discovery and technology commercialization. Degree credit will not be awarded for both BMEG 4903 and BMEG 5903. Prerequisite: The prerequisite for BMEG students is BMEG 2904; prerequisites for DASC students: BMEG 2614 and DASC 2594. (Typically offered: Irregular)

\section*{BMEG 4973. Regenerative Medicine. 3 Hours.}

This is an advanced course focusing on tissue engineering and regenerative medicine. Topics include stem cell tissue engineering, cell signaling, transport and kinetics, biomaterials and scaffolds, surface interactions, viral and nonviral-based gene delivery, tissue engineered organs, organ transplantation, nanomedicine, cell replacement therapy, and organ regenerative therapy. Technologies used to grow clinical relevant cells and tissues in lab will also be discussed in this course. Pre- or Corequisite: Senior standing. (Typically offered: Irregular)

\section*{BMEG 4983. Genome Engineering and Synthetic Biology. 3 Hours.}

Genome Engineering and Synthetic Biology examines contemporary topics in genome engineering and synthetic biology and will be taught using a "journal club" style lecture format. This course covers a broad range of topics in synthetic biology and genome engineering using recently published literature and publicly available data and software and includes an ethics discussion at course end. Prerequisite: BMEG 3653 or DASC 3213. (Typically offered: Fall and Spring)

BMEG 5103. Design and Analysis of Experiments in Biomedical Research. 3 Hours.

An advanced course covering sample size estimation with power calculations, protection of vertebrate animals and human subjects, factorial design, multivariate analysis of variance, parametric and non-parametrics data analysis, Kaplan-meier analysis, and post-test correction of multiple comparisons as related to biomedical data. Prerequisite: MATH 2584 and BMEG 3653 or equivalents. (Typically offered: Irregular)

\section*{BMEG 5213. Tissue Mechanics. 3 Hours.}

The purpose of this course is to introduce students to non-linear biomechanics of soft tissues such as skin, bladder, blood vessels, and the brain. Topics covered: Tissue mechanics: continuum biomechanics, tensor analysis, kinematics of continua, balance laws. Governing physics of mechanics as applied to soft tissues. Various constitutive relations will be discussed: linear elastic, hyperelastic, viscoelastic, poroelastic, and inelastic materials with internal variables. Cannot receive credit for both BMEG 4213 and BMEG 5213. Prerequisite: BMEG 2813 and BMEG 4623 or equivalents. (Typically offered: Irregular)

\section*{BMEG 5223. Genome Engineering and Synthetic Biology. 3 Hours.}

Genome Engineering and Synthetic Biology provides an overview of contemporary topics in genome engineering and synthetic biology. This course will introduce a range of topics in synthetic biology and genome engineering using recently published literature and publicly available data sets and software. In this rapidly evolving field, an ethics discussion will be held at the end of the course on potential topics including human embryo editing, genomic data privacy, patent claims, and GMOs. Students may not receive credit for both BMEG 4983 and BMEG 5223. Prerequisite: BMEG 3653 or DASC 3213. (Typically offered: Spring)

BMEG 5253. Biologics: Next Generation Therapeutics and Their Purification. 3 Hours.
The course focuses on the production and purification of biologics including monoclonal antibodies, viral vectors, nucleic acids and other biotherapeutics. In particular, the course will focus on the fundamental thermodynamics principles as well as kinetic limitations involved in upstream harvesting and downstream purification. Applications of PCR, mass spectroscopy, electrophoresis, imaging and modeling tools during the production and purification of biologics will be discussed. Students may not receive credit for both BMEG 4253 and BMEG 5253. (Typically offered: Irregular)

BMEG 5313. Advanced Biomaterials and Biocompatibility. 3 Hours.
From Absorbable sutures to Zirconium alloy hip implants, biomaterials science influences nearly every aspect of medicine. This course focuses on the study of different classes of biomaterials and their interactions with human tissues. Prerequisite: BMEG 3634 and BMEG 4623 or equivalents. (Typically offered: Irregular)

BMEG 5413. Tissue Engineering. 3 Hours.
This course introduces Tissue Engineering approaches at genetic and molecular, cellular, tissue, and organ levels. Topics include cell and tissue in-vitro expansion, tissue organization, signaling molecules, stem cell and stem cell differentiation, organ regeneration, biomaterial and matrix for tissue engineering, bioreactor design for cell and tissue culture, dynamic and transportation in cell and tissue cultures, clinical implementation of tissue engineered products, and tissue-engineered devices. Students may not earn credit for both BMEG 5413 and BMEG 4413. Prerequisite: BIOL 2533 and BMEG 3824. (Typically offered: Irregular)

\section*{BMEG 5423. Regenerative Medicine. 3 Hours.}

The course covers five broad areas: Biological and molecular basis for regenerative medicine, tissue development, regenerative medicine and innovative technologies, clinical applications of regenerative medicine, and regulation and ethics. Prerequisite: BIOL 2533 and BMEG 3824 or equivalents. (Typically offered: Irregular)

\section*{BMEG 5513. Biomedical Optics and Imaging. 3 Hours.}

This course will provide students with a fundamental understanding of various biomedical imaging modalities. Topics will include: Basics of light-tissue interaction - absorption, fluorescence, elastic and inelastic scattering; Computational and analytical models of light propagation to quantify tissue optical properties; Optical imaging techniques - spectroscopy, tomography, and laser speckle with potential clinical applications; and Clinical imaging modalities and recent advances - Xray, Magnetic Resonance Imaging (MRI), Positron Emission Tomography (PET), Computed Tomography (CT), Ultrasound imaging, and Photoacoustic imaging. At the end of this course, students should have a good understanding of optical imaging, spectroscopy, and non-optical imaging modalities, specific anatomical sites that they are best suited for, and the trade-offs between imaging depth and resolution. Students may not receive credit for both BMEG 4513 and BMEG 5513. (Typically offered: Irregular)

BMEG 5523. Biomedical Data and Image Analysis. 3 Hours.
This course focuses on an introduction to image processing and analysis for applications in biomedical research. After a review of basic MATLAB usage, students will learn fundamental tools for processing and analyzing data from a variety of subdisciplines within biomedical engineering. Topics include: filtering, thresholding, segmentation, morphological processing, and image registration. Through exercises involving 1D, 2D, and 3D data, students will develop problemsolving skills and a knowledge base in MATLAB required for customized quantitative data analysis. Students may not receive credit for both BMEG 4523 and BMEG 5523. Prerequisite: Graduate standing. (Typically offered: Irregular)

BMEG 560V. Advanced Individual Study. 1-6 Hour.
Individual study and research of a topic mutually agreeable to the student and faculty member. Prerequisite: Graduate standing. (Typically offered: Irregular)

BMEG 570V. Advanced Special Topics. 1-6 Hour.
Consideration of current biomedical engineering topics not covered in other courses. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 15 hours of degree credit

BMEG 5713. Cardiovascular Physiology and Devices. 3 Hours.
Understanding etymology of disease while creating solutions and dedicated devices is the primary focus of biomedical engineering. This course describes an interdisciplinary approach of the clinical and engineering worlds to develop devices for treating cardiovascular disease. The first part of the course will be a thorough review of the relevant anatomic and physiological considerations important for developing devices. Understanding these considerations from an engineering perspective to inform device development will be the second part of the course. Students may not receive credit for both BMEG 4713 and BMEG 5713. Prerequisite: Graduate standing. (Typically offered: Irregular)

BMEG 5800. Graduate Seminar I. 0 Hours.
A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including research ethics, authorship, biosafety and the use of animals in biomedical research.
Prerequisite: BMEG 5801. (Typically offered: Fall) May be repeated for up to 0 hours of degree credit.

BMEG 5801. Graduate Seminar I. 1 Hour.
A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including research ethics, authorship, biosafety and the use of animals in biomedical research. (Typically offered: Fall) May be repeated for up to 2 hours of degree credit.
BMEG 5810. Graduate Seminar II. 0 Hours.
A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including professional development, career options, effective communication, technology transfer, clinical translation and intellectual property. Prerequisite: BMEG 5811. (Typically offered: Spring) May be repeated for up to 0 hours of degree credit.

BMEG 5811. Graduate Seminar II. 1 Hour.
A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including professional development, career options, effective communication, technology transfer, clinical translation and intellectual property. (Typically offered: Spring) May be repeated for up to 2 hours of degree credit.

BMEG 5903. Entrepreneurial Bioengineering. 3 Hours.
The course introduces entrepreneurship, business model canvas, and lean startup principles to the students with a focus on medical device customer discovery and technology commercialization. Graduate degree credit will not be awarded for BMEG 4903. Degree credit will not be awarded for both BMEG 4903 and BMEG 5903. (Typically offered: Irregular)
BMEG 5953. Fundamentals of Fracture and Fatigue in Structures. 3 Hours. The course will cover the concepts of linear-elastic, elastic-plastic and timedependent Fracture Mechanics as applied to fracture in a variety of materials, structures, and operating conditions. The examples will include fracture in large components such as aircraft, bridges and pressure vessels and also in bones and in soft materials and human tissue. Prerequisite: Graduate standing in Civil, Mechanical or Biomedical Engineering or consent of the instructor. (Typically offered: Fall and Spring)
This course is cross-listed with MEEG 5953, CVEG 5953.
BMEG 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.
BMEG 700V. Doctoral Dissertation. 1-6 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered:
Irregular) May be repeated for degree credit.

\section*{Brewing Science (BREW)}

\section*{Courses}

\section*{BREW 4313. Internship in Brewing Science. 3 Hours.}

The Internship in Brewing Science is a supervised practical work experience with a brewing or brewing-related industry, program or governmental agency to gain professional experience and insight into career opportunities. Prerequisite: BREWCP students only. (Typically offered: Fall, Spring and Summer)

\section*{BREW 4573. Production Design and Analysis of Beer. 3 Hours.}

Production design, compositional analysis, and sensory evaluation of barley, malt, hops, water, yeast and beer. Corequisite: Lab component. Prerequisite: FDSC 2723, BIOL 2013, BIOL 2011L \& ((CHEM 2613 \& CHEM 2611L) or (CHEM 3603, CHEM 3601L, CHEM 3613, \& CHEM 3613L)). (Typically offered: Spring Odd Years)

BREW 5573. Production design and analysis of Beer. 3 Hours.
Production design, compositional analysis, and sensory evaluation of barley, malt, hops, water, yeast and beer. Corequisite: Lab component. Prerequisite: FDSC 2723, BIOL 2013, BIOL 2011L and ((CHEM 2613 \& CHEM 2611L) or (CHEM 3603, CHEM 3601L, CHEM 3613 \& CHEM 3613L)). (Typically offered: Spring Odd Years)

\section*{Business Administration (BADM)}

\section*{Courses}

BADM 5231. Intro to Global Business. 1 Hour.
Integrated overview of the global business environment and the organizational challenges of a multinational firm. To enhance understanding of the business and cultural environment of prominent emerging markets, the course includes a 2-3 week overseas immersion project to fulfill a predefined goal. Project is integrated with global content upon return. (Typically offered: Summer)

\section*{BADM 535V. MBA Internship. 1-3 Hour.}

This course allows a student to experience an internship within a business and benefit from the applied experience. The internship may be designed to offer a wide range of business experiences. The internship must be supervised by a faculty member as well as a member of the firm. MBA Director approval required. (Typically offered: Summer) May be repeated for up to 3 hours of degree credit.

\section*{BADM 537V. Special Topics. 1-3 Hour.}

This course provides students with a deep dive into a relevant and timely topic in business administration. The topic will change periodically to stay current with business trends. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
BADM 5511. Professional Development -- Special Topics In Business. 1 Hour. A concentrated emphasis on one business topic. Corequisite: MGMT 5613, ACCT 5263 and ECON 5253. (Typically offered: Fall and Spring) May be repeated for up to 5 hours of degree credit.

\section*{BADM 5533. Global Business. 3 Hours.}

Provides MBA students with the opportunity to explore a business problem in depth under the guidance of a graduate faculty member. (Typically offered: Summer)
BADM 5602. Introduction to Strategy. 2 Hours.
This course provides an introduction to business strategy, the driving force behind virtually all decisions of the firm. The goal of strategy is to make decisions that ensure the long-term survival and success of the firm. (Typically offered: Fall)

\section*{Business (BUSI)}

\section*{Courses}

BUSI 1011. Writing with Integrity for the Academic World. 1 Hour.
This course is designed to train students in responsible academic writing with a particular emphasis on academic honesty in the writing process. This course will emphasize the skills necessary to distinguish what ideas are your own, and which have been gleaned from another source. We will examine the ideological foundations of intellectual property, and the ethical implications of recognizing intellectual property as belonging to its creator or creators. (Typically offered: Fall and Spring)

\section*{BUSI 1033. Data Analysis and Interpretation. 3 Hours.}

This is an introductory level course covering topics involving estimation of population characteristics, research design and hypothesis testing, as well as measuring and predicting relationships. The course should enable the students to develop an understanding regarding the application and interpretation of basic data analysis techniques with an emphasis on statistical applications. Prerequisite: (MATH 2053 or MATH 2554, each with a grade of C or better) and ISYS 1123 with a grade of \(C\) or better. (Typically offered: Fall, Spring and Summer)

BUSI 1033H. Honors Data Analysis and Interpretation. 3 Hours.
This is an introductory level course covering topics involving estimation of population characteristics, research design and hypothesis testing, as well as measuring and predicting relationships. The course should enable the students to develop an understanding regarding the application and interpretation of basic data analysis techniques with an emphasis on statistical applications. Prerequisite: (MATH 2053 or MATH 2554, each with a grade of C or better) and ISYS 1123 with a grade of \(C\) or better. (Typically offered: Irregular)
This course is equivalent to BUSI 1033.

\section*{BUSI 1111. Freshman Business Connection. 1 Hour.}

Development of personal development skills, including time management; stress management and academic planning, necessary for success; introduction to business career options and opportunities. (Typically offered: Fall)

\section*{BUSI 1111H. Honors Freshman Business Connection. 1 Hour.}

Development of personal development skills, including time management; stress management and academic planning, necessary for success; introduction to business career options and opportunities. Prerequisite: Honors standing. (Typically offered: Irregular)
This course is equivalent to BUSI 1111.
BUSI 1600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

\section*{BUSI 2063. Workplace Competencies. 3 Hours.}

This online course identifies the skills necessary to be successful as a professional in the workforce. Employers expect new college graduates to possess certain competencies. This course identifies and creates opportunities for the development of the skills most often valued in the workplace, including working in a team structure; goal setting; decision making and problem solving; planning, organizing and prioritizing work; power, persuasion and oral communication; obtaining and processing relevant data; technical skills evaluation; written communications skills; workplace image and attitude; corporate values and workplace ethics; and influencing others at a new job. (Typically offered: Irregular)
BUSI 210V. Special Topics in Business. 1-6 Hour.
Special topics of an interdisciplinary nature. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

\section*{BUSI 210VH. Honors Special Topics in Business. 1-6 Hour.}

Special topics of an interdisciplinary nature. Prerequisite: Honors standing. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.
This course is equivalent to BUSI 210 V .

BUSI 230V. Walton College Study Abroad. 3-6 Hour.
Open to undergraduate students studying abroad in officially sanctioned programs in Walton College. Topics vary by location of study abroad opportunities. Prerequisite: Departmental consent. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

\section*{BUSI 230VH. Honors Walton College Study Abroad. 3-6 Hour.}

Open to undergraduate students studying abroad in officially sanctioned programs in Walton College. Topics vary by location of study abroad opportunities. Prerequisite: Honors standing and departmental consent. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
This course is equivalent to BUSI 230 V .

\section*{BUSI 2600. Undergraduate Research Assistant. 0 Hours.}

Undergraduate research. (Typically offered: Fall, Spring and Summer)

\section*{BUSI 3003H. Honors College Colloquium. 3 Hours.}

An inter-disciplinary course exploring events, concepts, and/or new developments in the field of business administration. Prerequisite: Junior or senior standing. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

\section*{BUSI 3023. Sustainability in Business. 3 Hours.}

The course focuses on theoretical and practical bases for pursuing sustainability in business and society. Students learn four definitions of sustainability, measured on four axes expressed by: 1987 UN Brundtland Report (intergenerational equity), Triple-play (people, planet, profits), resource sustainability, and economic justice (fair global system of rules, fairly enforced). Prerequisite: Junior standing. (Typically offered: Irregular)

BUSI 3033. The African American Experience in Business. 3 Hours.
This course is designed to provide the student with a comprehensive and critical analysis of the history of the African American experience as a member of the business sector of the United States economics. The course will review information that includes and demonstrates activities prior to slavery, during, and after slavery. (Typically offered: Irregular)

\section*{BUSI 3043. From Books to Boardrooms. 3 Hours.}

Examines career choices and skills necessary to be successful as a professional in the workforce. Self-assessment and career exploration strategies are examined using career development theories. Incorporates career path management principles to include exploring occupations, networking, enhancing business communications, job searching, workplace success skills, and college to work transition. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer)

\section*{BUSI 3053. Diversity in the Workforce. 3 Hours.}

This course is designed to engage students in discussions and to increase their awareness and knowledge about barriers and contributions of underrepresented groups. This course will cover race, class, gender, sexuality, ethnicity, nationality, and physical differences that impacts underrepresented groups and how this information can influence that work environment. The course involves weekly discussion, critical evaluation, and reflection of the subjects that are covered in the assignments. Prerequisite: Junior Standing. (Typically offered: Spring Odd Years)

\section*{BUSI 310V. Internship. 1-3 Hour.}

Internship allows students to earn one to three hours of academic credit per semester for work related to their major and/or minor. Accumulated credit may not exceed six hours. Eligibility requires: 1) junior standing in the college, 2) completion of the pre-business core and 3 ) the prescribed GPA. See catalog for details. Prerequisite: Junior standing and completion of pre-business core. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

BUSI 320V. International Internship. 1-3 Hour.
The International Internship allows students to work overseas with a pre-approved employer. Students must have a faculty supervisor who will work with their employer to monitor their work experience and progress. Students are responsible for finding a faculty supervisor, and the Global Engagement Office will work with both the student and faculty member to facilitate the employer relationship and expectations. Students will receive one to three hours of credit per semester based on hours worked and length of time abroad. Students may receive up to three hours of credit. Prerequisite: Junior Standing, 3.0 cumulative GPA, and Department Consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

\section*{BUSI 330V. Walton College Study Abroad. 3-6 Hour.}

Open to undergraduate students studying abroad in officially sanctioned programs in the Walton College. Topics vary by location of study abroad opportunities. To be eligible for credit, students must have junior standing and Walton College majors must have completed all pre-business requirements prior to studying abroad. Prerequisite: Departmental consent, completion of 30 hours, ENGL 1013, (MATH 2053 or MATH 2554), ECON 2013, ECON 2023, ISYS 1123, BUSI 1111 and ACCT 2013. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

BUSI 330VH. Honors Walton College Study Abroad. 3-6 Hour.
Open to undergraduate students studying abroad in officially sanctioned programs in the Walton College. Topics vary by location of study abroad opportunities. To be eligible for credit, students must have junior standing and Walton College majors must have completed all pre-business requirements prior to studying abroad. Prerequisite: Honors standing, departmental consent, completion of 30 hours, ENGL 1013, (MATH 2053 or MATH 2554), ECON 2013, ECON 2023, ISYS 1123, BUSI 1111 and ACCT 2013. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
This course is equivalent to BUSI 330 V .

\section*{BUSI 3600. Undergraduate Research Assistant. 0 Hours.}

Undergraduate research. (Typically offered: Fall, Spring and Summer)
BUSI 410V. Special Topics in Business. 1-6 Hour.
Special business topics of an interdisciplinary nature. Prerequisite: Junior standing. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.
BUSI 4600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)
BUSI 499VH. Honors Thesis. 1-3 Hour.
Provides Honors Students with an opportunity to explore a business topic in depth through an independent research project. Prerequisite: Good standing in the Walton College Honors Program. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

BUSI 510V. Special Topics in Business. 1-3 Hour.
Special business topics of an interdisciplinary nature. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

BUSI 6111. Seminar in Business Administration Teaching I. 1 Hour. This course in college level teaching is designed for graduate students and new college teachers with specific emphasis on the Business Administration learning and classroom management. The purpose of this course is to introduce graduate students to principles of teaching and learning and to prepare these future teachers to lifelong learners in the classroom as teachers. Prerequisite: Graduate standing. (Typically offered: Fall)

\section*{Business Law (BLAW) \\ \section*{Courses}}

BLAW 2013. The Legal Environment of Business (ACTS Equivalency = BLAW 2003). 3 Hours.

Introduction to the legal and ethical environment in which business operates. Topics covered in this survey course include: introduction to the legal system and the judicial resolution of disputes, constitutional law, administrative law, criminal law, torts, contracts, property law, advertising and marketing law, bankruptcy and credit transactions, business organizations, antitrust, employment law and ethics. (Typically offered: Fall, Spring and Summer)

\section*{BLAW 2013H. Honors The Legal Environment of Business. 3 Hours.}

Introduction to the legal and ethical environment in which business operates. Topics covered in this survey course include: introduction to the legal system and the judicial resolution of disputes, constitutional law, administrative law, criminal law, torts, contracts, property law, advertising and marketing law, bankruptcy and credit transactions, business organizations, antitrust, employment law and ethics. (Typically offered: Fall, Spring and Summer)
This course is equivalent to BLAW 2013.

\section*{BLAW 3033. Commercial Law. 3 Hours.}

A study of the laws applicable to commercial transactions. Topics covered include the common law of contracts, Articles Two (Sales) and Three (Commercial Paper) of the Uniform Commercial Code, secured transactions, suretyship, and bankruptcy. (Typically offered: Spring)

\section*{BLAW 5003. Commercial Transactions. 3 Hours.}

A study of laws applicable to business. Topics covered include the law of Contracts and UCC Sales, Payment Systems (checking accounts and E-payments), Bankruptcy, Intellectual Property, Principal-Agency Relationships, Business Entities, Data Security, Federal Securities Law, and Accountant's Legal Liability. Prerequisite: Graduate standing. (Typically offered: Irregular)

\section*{Career and Technical Education (CATE)}

\section*{Courses}

CATE 3003. Teaching Housing and Interior Design to Secondary Students. 3 Hours.
This course prepares students to teach housing and interior design concepts to students in secondary school settings. Topics to be covered include housing needs and decisions, architectural design and construction, furnishings, safety and security, and careers related to the housing industry. Problem-based and project-based learning will provide the foundation for content delivery in this course. (Typically offered: Spring)

\section*{CATE 3103. Introduction to Professionalism. 3 Hours.}

Studying and developing educational concepts in career and technical education with accepted principles of professionalism in secondary education settings.
Prerequisite: Career and Technical Education (CATE) students only. (Typically offered: Fall)
CATE 3103H. Honors Introduction to Professionalism. 3 Hours.
Studying and developing professional concepts in vocational education with accepted principles of professionalism applied to career and technical education settings. (Typically offered: Fall)
This course is equivalent to CATE 3103.
CATE 4013. Teaching Strategies. 3 Hours.
Methods and techniques in the preparation and delivery of teaching. Prerequisite:
CATE 3103 and admission to CATE-BS major. (Typically offered: Fall)

CATE 4023. Classroom Management. 3 Hours.
Theory and techniques in classroom management, including professional ethics and school policies related to students, faculty and programs. Prerequisite: CATE 3103 and admission to CATEBS major. (Typically offered: Fall)

CATE 4033. Assessment / Program Evaluation. 3 Hours.
An introduction to constructing, evaluating and interpreting tests; descriptive and inferential statistics; state competency testing; and guidelines for state program valuations. Prerequisite: CATE 3103 and admission to the CATEBS major. (Typically offered: Fall)

CATE 4052. Seminar Teaching Internship. 2 Hours.
Site-based field experiences are integrated with the course content to provide continuity between theory and practice. Classroom management, ethics and diversity are emphasized. Corequisite: CATE 406X. Prerequisite: Admission to CATEBS major. (Typically offered: Spring)

CATE 406X. Teaching Internship. 12 Hours.
A minimum of 15 weeks will be spent in an off-campus school, at which time the student will have an opportunity under supervision to observe, to teach and to participate in other activities involving the school and the community. Successful completion of a criminal background check required before student can begin internship. Prerequisite: Senior status, CATE 3103, CATE 4013, CATE 4023, CATE 4033, (CIED 3023 or CIED 4023), CIED 3033 and admission to CATEBS major. (Typically offered: Spring)

CATE 4073. Introduction to Teaching Programming in the Secondary Schools. 3 Hours.
This course provides an introduction to the foundations of teaching methods for computer programming in the secondary schools. Methods of computer programming instruction will include teaching strategies in coding, developing computational thinking, problem-solving skills, and applying key programming concepts. This is an introductory level course. No prerequisites are required. (Typically offered: Irregular)
CATE 4443. Teaching Career Development in Public Schools. 3 Hours. This course provides a study of curricula, methods, and techniques involved in teaching career development as related to the 16 occupational clusters. Successful completion of this course is required for licensed teachers to earn their 418 Career Development endorsement. (Typically offered: Summer)

\section*{CATE 4803. Word Processing and Multimedia. 3 Hours.}

This course is designed to provide an overview of computer technology for prospective teachers in career and technical education. The main emphasis will be placed on the hands-on learning of word processing and multimedia applications that are widely used in career and technical education programs and emerging trends and issues in computer technology. (Typically offered: Fall, Spring and Summer)

\section*{CATE 5003. Introduction to Professionalism. 3 Hours.}

This course examines the principles and concepts of professionalism in the teaching profession, with an emphasis on developing professional concepts in the profession. Added emphasis is on career and technical education organizations. Prerequisite: Admission to the CATE teacher education program. (Typically offered: Fall)

CATE 5013. Teaching Strategies. 3 Hours.
This course is designed to offer a variety of ideas and experiences concerning methods of teaching, planning and presenting instruction. (Typically offered: Fall)

CATE 5016. Cohort Teaching Internship. 6 Hours.
A minimum of 12 weeks will be spent in an off-campus school, at which time the intern will have an opportunity under supervision to observe, to teach, and to participate in other activities involving the school and the community. Prerequisite: Admission to the College of Education and Health Professions Teacher Education and CATE Master's program. (Typically offered: Spring)

CATE 5023. Classroom Management. 3 Hours.
Theory and techniques in classroom management, including professional ethics and school policies related to students, faculty and programs. Graduate degree credit will not be given for both CATE 4023 and CATE 5023. Prerequisite: CATE 3103. (Typically offered: Fall)

\section*{CATE 5033. Assessment/Program Evaluation. 3 Hours.}

An introduction to constructing, evaluating, and interpreting tests; descriptive and inferential statistics; state competency testing; and guidelines for state program evaluations. Prerequisite: Graduate standing. (Typically offered: Fall)
CATE 5073. Introduction to Teaching Programming in the Secondary Schools. 3 Hours.
This course provides an introduction to the foundations of teaching methods for computer programming in the secondary schools. Methods of computer programming instruction will include teaching strategies in coding, developing computational thinking, problem-solving skills, and applying key programming concepts. This is an introductory level course. No prerequisites are required. Graduate degree credit will not be given for both CATE 4073 and CATE 5073. Corequisite: Lab component. (Typically offered: Irregular)
CATE 5443. Teaching Career Development in Public Schools. 3 Hours. This course provides a study of curricula, methods, and techniques involved in teaching career development as related to the 16 occupational clusters. Successful completion of this course is required for licensed teachers to earn their 418 Career Development endorsement. (Typically offered: Summer)

\section*{CATE 5803. Teaching Apparel Production to Secondary Students. 3 Hours.}

This course prepares students to teach apparel production concepts to students in secondary school settings. Topics to be covered include clothing selection, textiles, clothing care and laundry, clothing construction, and careers and technology. Problem- and project-based learning will provide the foundation for content delivery in this course. The focus on this course is on preparing preservice teachers in secondary schools to teach apparel production utilizing a variety of teaching methods. Corequisite: Lab component. (Typically offered: Spring)

\section*{Cell and Molecular Biology (CEMB)}

\section*{Courses}

CEMB 590V. Special Topics in Cell and Molecular Biology. 1-6 Hour.
Consideration of new areas in Cell and Molecular Biology not yet treated adequately in textbooks or in other courses. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CEMB 5911. Seminar in Cell and Molecular Biology. 1 Hour.
Discussion of current topics in Cell and Molecular Biology. All graduate students in the Cell and Molecular Biology degree program must enroll every fall and spring semester in this course or an approved alternate seminar course. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for degree credit.

\section*{CEMB 600V. Master's Thesis. 1-6 Hour.}

Master's thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
CEMB 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{Chemical Engineering (CHEG)}

\section*{Courses}

CHEG 2113. Introduction to Chemical Engineering I. 3 Hours.
Introduction to the field of chemical engineering. Industries, careers, and the curriculum are discussed. Basic chemical engineering terms, concepts, and calculations are presented. Mass balance calculations are performed and the application of computers to chemical engineering problems is introduced. Pre- or Corequisite: CHEM 1123 or CHEM 1223. (Typically offered: Fall and Spring)

\section*{CHEG 2133. Fluid Mechanics. 3 Hours.}

Analysis and design of fluids handling equipment and systems. Application of the principles of fluid statics, fluid dynamics, compressible flow, etc. Prerequisite: MATH 2584 or MATH 2584C. Pre- or Corequisite: MATH 2574 or MATH 2574C and (CHEG 2113 or BENG 2632 or BMEG 2614). (Typically offered: Fall, Spring and Summer)

\section*{CHEG 2133H. Honors Fluid Mechanics. 3 Hours.}

Analysis and design of fluids handling equipment and systems. Application of the principles of fluid statics, fluid dynamics, compressible flow, etc. Prerequisite: MATH 2584 or MATH 2584C. Pre- or Corequisite: MATH 2574 or MATH 2574C and (CHEG 2113 or BENG 2632 or BMEG 2614). (Typically offered: Fall, Spring and Summer)
This course is equivalent to CHEG 2133.
CHEG 2313. Thermodynamics of Single-Component Systems. 3 Hours. A detailed study of the thermodynamic "state principles," energy and entropy balances, and their application to the solution of problems involving singlecomponent physical systems and processes. Prerequisite: MATH 2584. Pre- or Corequisite: CHEG 2113 or BENG 2632 or BMEG 2614. (Typically offered: Fall, Spring and Summer)

CHEG 2313H. Honors Thermodynamics of Single-Component Systems. 3 Hours.
A detailed study of the thermodynamic "state principles," energy and entropy balances, and their application to the solution of problems involving singlecomponent physical systems and processes. Prerequisite: MATH 2584. Pre- or Corequisite: CHEG 2113 or BENG 2632 or BMEG 2614. (Typically offered: Fall, Spring and Summer)
This course is equivalent to CHEG 2313.
CHEG 3144. Heat and Mass Transfer. 4 Hours.
Applications of the principles of conduction, convection and radiation to the analysis and design of chemical processing heat transfer equipment and systems.
Fundamentals of chemical diffusional and convection processes. Pre- or Corequisite: CHEG 3323. Prerequisite: CHEG 2133 with a C or above, and MATH 2584. (Typically offered: Fall and Spring)
CHEG 3144H. Honors Heat and Mass Transfer. 4 Hours.
Applications of the principles of conduction, convection and radiation to the analysis and design of chemical processing heat transfer equipment and systems. Fundamentals of chemical diffusional and convection processes. Pre- or Corequisite: CHEG 3323. Prerequisite: CHEG 2133 with a C or above, and MATH 2584. (Typically offered: Fall and Spring)
This course is equivalent to CHEG 3144.

\section*{CHEG 3233L. Chemical Engineering Laboratory I. 3 Hours.}

Experimental measurements of various physical properties and comparison with published values and theoretical predictions. Experimental investigation of fluid flow and thermodynamics. Interpretation of results using graphical, numerical and statistical tools, and presentation of results in written technical reports and oral briefings. Identification and quantification of sources of experimental error. Identification of relevant experimental parameters to achieve an objective. Pre- or Corequisite: CHEG 3144. Corequisite: Drill component. Prerequisite: CHEG 2133 and CHEG 2313, both with a C or above. (Typically offered: Fall and Spring)

CHEG 3253. Chemical Engineering Computer Methods. 3 Hours.
Application of computer methods to chemical engineering problems including a review of structured programming principles. Corequisite: Drill component. Pre- or Corequisite: CHEG 3144 and CHEG 3323. Prerequisite: MATH 2584. (Typically offered: Fall and Spring)

CHEG 3323. Thermodynamics of Multi-Component Systems. 3 Hours.
The use of the state principle and energy and entropy balance developed in CHEG 2313 is extended to allow processes. Physical and chemical equilibrium processes are considered in detail. Prerequisite: CHEG 2313 with a C or above, and MATH 2574. (Typically offered: Fall and Spring)
CHEG 3323H. Honors Thermodynamics of Multi-Component Systems. 3 Hours.
The use of the state principle and energy and entropy balance developed in CHEG 2313 is extended to allow processes. Physical and chemical equilibrium processes are considered in detail. Prerequisite: Honors standing, CHEG 2313 with a C or above, and MATH 2574. (Typically offered: Fall and Spring) This course is equivalent to CHEG 3323.
CHEG 3333. Chemical Engineering Reactor Design. 3 Hours.
Principles of kinetics of homogeneous and heterogeneous reactions, catalysis, and reactor design with applications, drawn from industrial processes. Pre- or Corequisite: CHEG 3253. Prerequisite: CHEG 3323, with a C or above. (Typically offered: Fall and Spring)

\section*{CHEG 3333H. Honors Chemical Engineering Reactor Design. 3 Hours.}

Principles of kinetics of homogeneous and heterogeneous reactions, catalysis, and reactor design with applications, drawn from industrial processes. Pre- or Corequisite: CHEG 3253. Prerequisite: Honors standing, and CHEG 3323 with a C or above. (Typically offered: Fall and Spring)
This course is equivalent to CHEG 3333.

\section*{CHEG 3713. Chemical Engineering Materials Technology. 3 Hours.}

Selection of metals, polymers and ceramics for service in process conditions (including corrosion). In addition to static strains on materials, specialized materials such as semiconductors,, composites, and nano-materials are studied. The relationship between molecular structure and macroscopic properties is emphasized including processing and manufacture. Prerequisite: CHEG 3323 with a C or above, CHEM 3603, and PHYS 2054. (Typically offered: Spring)

\section*{CHEG 4163. Separation Processes. 3 Hours.}

Applications of chemical engineering design to stagewise and continuous separations in systems approaching equilibrium. Prerequisite: CHEG 3144 with a C or above. (Typically offered: Fall and Spring)

\section*{CHEG 4163H. Honors Separation Processes. 3 Hours.}

Applications of chemical engineering design to stagewise and continuous separations in systems approaching equilibrium. Prerequisite: Honors standing and CHEG 3144 with a C or above. (Typically offered: Fall and Spring) This course is equivalent to CHEG 4163.

\section*{CHEG 4332L. Chemical Engineering Laboratory II. 2 Hours.}

Experimental investigations of mass transfer and kinetics/reactor design. Special attention to attaining a high order of accuracy and to presenting results in complete written reports, with emphasis on quality rather than quantity work performed. Pre- or Corequisite: CHEG 3333 and CHEG 4163. Corequisite: Drill component. Prerequisite: CHEG 3233L with a C or above. (Typically offered: Fall and Spring)

\section*{CHEG 4413. Chemical Engineering Design I. 3 Hours.}

Principles of cost estimation, profitability, economic analysis, and economic balances as practiced in the chemical process industries. Special emphasis on the solution of problems involving the combination of engineering principles and economics. Corequisite: Drill component. Pre- or Corequisite: CHEG 4163. Prerequisite: CHEG 3144 with a C or above, CHEG 3333 with a C or above, and (ECON 2013 or ECON 2143). (Typically offered: Fall and Spring)

\section*{CHEG 4413H. Honors Chemical Engineering Design I. 3 Hours.}

Principles of cost estimation, profitability, economic analysis, and economic balances as practiced in the chemical process industries. Special emphasis on the solution of problems involving the combination of engineering principles and economics. Corequisite: Drill component. Pre- or Corequisite: CHEG 4163. Prerequisite: Honors standing, CHEG 3144 with a C or above, CHEG 3333 with a C or above, and (ECON 2013 or ECON 2143). (Typically offered: Fall and Spring)
This course is equivalent to CHEG 4413.

\section*{CHEG 4423. Automatic Process Control. 3 Hours.}

Application of mathematical modeling methods to the description of transient phenomena of interest to process engineers. Modes of control and principles of feedback control are introduced with applications to process engineering problems. Pre- or Corequisite: CHEG 4163. Prerequisite: CHEG 3253 with a C or above. (Typically offered: Spring)

CHEG 4423H. Honors Automatic Process Control. 3 Hours.
Application of mathematical modeling methods to the description of transient phenomena of interest to process engineers. Modes of control and principles of feedback control are introduced with applications to process engineering problems. Pre- or Corequisite: CHEG 4163. Prerequisite: Honors standing, and CHEG 3253 with a C or above. (Typically offered: Spring)
This course is equivalent to CHEG 4423.
CHEG 4443. Chemical Engineering Design II. 3 Hours.
Responsibility for decision making is placed on the students in the solution of a comprehensive, open ended problem based on an industrial process. Both formal oral and formal written presentation of results are required. Students are selected for participation in some sections of the course based on academic performance, honors standing and instructor recommendations. Corequisite: Drill component. Prerequisite: CHEG 4413 with a C or above. (Typically offered: Fall and Spring)

\section*{CHEG 4443H. Honors Chemical Engineering Design II. 3 Hours.}

Responsibility for decision making is placed on the students in the solution of a comprehensive, open ended problem based on an industrial process. Both formal oral and formal written presentation of results are required. Students are selected for participation in some sections of the course based on academic performance, honors standing and instructor recommendations. Corequisite: Drill component. Prerequisite: CHEG 4413 with a C or above. (Typically offered: Fall and Spring) This course is equivalent to CHEG 4443.

\section*{CHEG 4813. Chemical Process Safety. 3 Hours.}

Application of chemical engineering principles to the study of safety, health, and loss prevention. Fires and explosions, hygiene, toxicology, hazard identification, and risk assessment in the chemical process industries. Corequisite: Drill component. Prerequisite: CHEG 3144 and CHEG 3323, both with a C or above. (Typically offered: Fall)

\section*{CHEG 4813H. Honors Chemical Process Safety. 3 Hours.}

Application of chemical engineering principles to the study of safety, health, and loss prevention. Fires and explosions, hygiene, toxicology, hazard identification, and risk assessment in the chemical process industries. Corequisite: Drill component.
Prerequisite: Honors standing, CHEG 3323 and CHEG 3144 both with a C or above. (Typically offered: Fall)
This course is equivalent to CHEG 4813.
CHEG 488V. Special Problems. 1-6 Hour.
Special problems. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{CHEG 5013. Membrane Separation and System Design. 3 Hours.}

Theory and system design of cross flow membrane process--reverse osmosis, nanofiltration, ultrafiltration, and microfiltration--and applications for pollution control, water treatment, food and pharmaceutical processing. (Typically offered: Irregular)

CHEG 5043. Colloid and Interface Science. 3 Hours.
This course aims to provide essential knowledge about surface, interface, and molecular self-organization. At the end of this course students should understand (i) basic concepts to describe phenomena at surfaces, (ii) molecular self-organization, and (iii) basic techniques for characterization of surfaces and interfaces. (Typically offered: Spring Odd Years)

CHEG 5113. Transport Processes I. 3 Hours.
Fundamental concepts and laws governing the transfer of momentum, mass, and heat. (Typically offered: Fall)

\section*{CHEG 5133. Advanced Reactor Design. 3 Hours.}

Applied reaction kinetics with emphasis on the design of heterogeneous reacting systems including solid surface catalysis, enzyme catalysis, and transport phenomena effects. Various types of industrial reactors, such as packed bed, fluidized beds, and other non-ideal flow systems are considered. (Typically offered: Spring)

\section*{CHEG 5273. Corrosion Control. 3 Hours.}

Qualitative and quantitative introduction to corrosion and its control. Application of the fundamentals of corrosion control in the process industries is emphasized. (Typically offered: Spring)

CHEG 5333. Advanced Thermodynamics. 3 Hours.
Methods of statistical thermodynamics, the correlation of classical and statistical thermodynamics, and the theory of thermodynamics of continuous systems (nonequilibrium thermodynamics). (Typically offered: Fall)

\section*{CHEG 5443. Chemical Engineering Design II. 3 Hours.}

A capstone design class designed for graduate students who do not have an engineering degree. Responsibility for decision making is placed on the students in the solution of a comprehensive, open ended problem based on an industrial process. Both formal oral and formal written presentation of results are required. Students may not receive credit for both CHEG 4443 and CHEG 5443. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

CHEG 5513. Biochemical Engineering Fundamentals. 3 Hours.
An introduction to bioprocessing with an emphasis on modern biochemical engineering techniques and biotechnology. Topics include: basic metabolism (procaryote and eucaryote), biochemical pathways, enzyme kinetics (including immobilized processes), separation processes (e.g. chromatography) and recombinant DNA methods. Material is covered within the context of mathematical descriptions (calculus, linear algebra) of biochemical phenomenon. (Typically offered: Spring Even Years)

\section*{CHEG 5733. Polymer Science and Engineering. 3 Hours.}

Synthesis, characterization, and application for polymers and multi-component polymer materials are presented. Topics include polymer science principles, commercial and research practices, processing, and recycling. (Typically offered: Irregular)

CHEG 5773. Medical Applications of Membranes Theory, Current Uses, and Development Areas. 3 Hours.
The course will cover most present-day medical products, treatments, and surgical equipment that rely on membrane transport and/or separation to function effectively. Membranes or membrane devices are used when certain human organs stop working or lose some degree of effectiveness. Those that will be covered in this course include the kidney, the pancreas, the lungs, the skin, and the eye. Localized, controlled-release of medications is also an area where membranes are used in medicine and this area will be described also. Along with dialysis, other external membrane treatment processes such as membrane plasmapheresis (a process whereby a membrane is used to separate blood cells from plasma and thereby opening the door for more effectively treating the cells or plasma separately outside of the body) will be discussed. (Typically offered: Irregular)

\section*{CHEG 5801. Graduate Seminar. 1 Hour.}

Students hear and present oral presentations on innovations in a variety of chemical engineering subjects with special emphasis on new developments. Prerequisite:
Graduate standing. (Typically offered: Fall and Spring) May be repeated for up to 12 hours of degree credit.

\section*{CHEG 588V. Special Problems. 1-6 Hour.}

Opportunity for individual study of an advanced chemical engineering problem not sufficiently comprehensive to be a thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CHEG 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CHEG 6123. Transport Processes II. 3 Hours.
Continuation of CHEG 5113. Prerequisite: CHEG 5113. (Typically offered: Spring)
CHEG 688V. Special Topics in Chemical Engineering. 1-3 Hour.
Advanced study of current Chemical Engineering topics not covered in other courses. Prerequisite: Doctoral students only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

CHEG 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{Chemistry and Biochemistry (CHEM)}

\section*{Courses}

CHEM 1051L. Chemistry in the Modern World Laboratory (ACTS Equivalency = CHEM 1004 Lab). 1 Hour.
Basic laboratory exercises involving measurements of mass and volume, acids and bases, hardness of water, energy content in fuel, sugar content in drinks, and radioactivity. Meets 2 hours per week. Corequisite: CHEM 1053. (Typically offered: Fall and Spring)

CHEM 1053. Chemistry in the Modern World (ACTS Equivalency = CHEM 1004 Lecture). 3 Hours.
The impact of chemical developments upon contemporary society. Chemical problems of ecological, environmental, nutritional, economic, and sociological concern. Designed for non-science majors. Lecture 3 hours per week. Corequisite: CHEM 1051L. (Typically offered: Fall and Spring)

CHEM 1071L. Fundamentals of Chemistry Laboratory (ACTS Equivalency = CHEM 1214 Lab). 1 Hour.
Laboratory exercises in principles and practices of Fundamental Chemistry Corequisite: CHEM 1073. (Typically offered: Fall)

CHEM 1073. Fundamentals of Chemistry (ACTS Equivalency = CHEM 1214 Lecture). 3 Hours.
One-semester introductory-level general chemistry course introducing select fundamental concepts and related problem-solving for atomic and molecular structures, nomenclature, dimensional analysis, chemical reactions, chemical bonding, intermolecular forces, states of matter, solutions, acid-base reactions, redox reactions, kinetics, thermochemistry, and chemical equilibrium. Corequisite: CHEM 1071L and related course component drill section for CHEM 1073. (Typically offered: Fall and Summer)

CHEM 1101L. University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab). 1 Hour.
Laboratory exercises involving density, types of chemical reactions separations and chromatography, solubility, waters of hydration, freezing point depression, gas laws, and data interpretation. Meets 3 hours per week for 1 hour credit. Pre- or Corequisite: CHEM 1103. (Typically offered: Fall, Spring and Summer)

CHEM 1103. University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture). 3 Hours.
An introductory course for science, engineering or agriculture majors. Atomic structure, electron configurations and periodic properties, nomenclature and bonding in compounds, Lewis structure and resonance forms, molecular geometries and polarity, stoichiometry, solution chemistry and aqueous reactions, thermochemistry, gas laws and kinetic molecular theory. Corequisite: Drill component. Prerequisite: MATH 1203 or higher, or AP Calculus AB 3C or higher, or AP Calculus BC 4C or higher, or MATH 1203 CLEP 54 or higher, or UA Math Placement 46 or higher, or ACT MATH 22 or higher, or new SAT MATH 540/old SAT MATH 540 or higher (Typically offered: Fall, Spring and Summer)

CHEM 1121L. University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab). 1 Hour.
Quantitative laboratory with data interpretation and exercises covering the topics of stoichiometry, thermodynamics, kinetics, chemical equilibrium, pH , and descriptive inorganic chemistry. Laboratory 3 hours per week. Upon completion of CHEM 1121L on the UAF campus with a grade of "C" or better, credit for CHEM 1101L can be requested. Corequisite: CHEM 1123 and related course component drill section for CHEM 1123. (Typically offered: Fall, Spring and Summer)

CHEM 1121M. Honors University Chemistry II Laboratory. 1 Hour.
Qualitative and quantitative laboratory with data interpretation and exercises covering the topics of stoichiometry, thermodynamics, kinetics, chemical equilibrium, pH , and descriptive inorganic chemistry. Laboratory notebooks are required as part of every experiment. Designed for students in the honors programs. Laboratory 3 hours per week. Corequisite: CHEM 1123H and related course component drill for CHEM 1123H. (Typically offered: Fall and Spring) This course is equivalent to CHEM 1121L

CHEM 1123. University Chemistry II (ACTS Equivalency = CHEM 1424 Lecture). 3 Hours.

Introductory course for science, engineering or agriculture majors. Liquids, solids, intermolecular forces, phase diagrams, solution chemistry, solubility, colligative properties, chemical kinetics, chemical equilibria, acid-base equilibria, aqueous ionic equilibria, titrations, buffers, solubility equilibria, thermodynamics, electrochemistry, and nuclear chemistry. Lecture 3 hours per week. Corequisite: CHEM 1121L and related course component drill section for CHEM 1123. Prerequisite: CHEM 1103 (or CHEM 1203, or satisfactory performance on the chemistry proficiency exam) and MATH 1203 or higher, or AP Calculus AB 3C or higher, or AP Calculus BC 4C or higher, or MATH 1203 CLEP with a score of 54 or higher, or UA Math Placement 46 or higher, or ACT MATH 22 or higher, or new SAT MATH 540/old SAT Math 540 or higher. (Typically offered: Fall, Spring and Summer)

CHEM 1123H. Honors University Chemistry II. 3 Hours.
Presents the topics of periodicity, bonding, stoichiometry, thermodynamics, kinetics, and chemical equilibrium in detail. Lecture 3 hours per week. Students with satisfactory performance on the proficiency exam and who complete CHEM 1123H on the UAF campus with a grade of "C" or better can request credit for CHEM 1103. Pre- or Corequisite: MATH 1284C or higher. Corequisite: CHEM 1121M and related course component drill section for CHEM 1123H. Prerequisite: Honors candidacy and CHEM 1103 (or CHEM 1203, or satisfactory performance on the chemistry proficiency exam). (Typically offered: Fall, Spring and Summer) This course is equivalent to CHEM 1123.

\section*{CHEM 1201L. Chemistry for Majors I Laboratory. 1 Hour.}

Laboratory exercises involving density, types of chemical reactions separations and chromatography, solubility, waters of hydration, freezing point depression, gas laws, and data interpretation. Laboratory notebooks are required as part of every experiment.Laboratory 3 hours per week. Students may not receive credit for both CHEM 1201L and CHEM 1101L. Corequisite: CHEM 1203 and related course component drill for CHEM 1203. (Typically offered: Fall)

CHEM 1203. Chemistry for Majors I. 3 Hours.
The first half of a two-semester course designed especially for students planning to major in chemistry or biochemistry. Students may not receive credit for both CHEM 1203 and CHEM 1103. Corequisite: CHEM 1201L and related course component drill section for CHEM 1203. Prerequisite: MATH 1203 or higher, or AP Calculus AB 3C or higher, or AP Calculus BC 4C or higher, or MATH 1203 CLEP with a score of 54 or higher, or UA Math Placement 46 or higher, or ACT MATH 22 or higher, or new SAT MATH 540/old SAT MATH 540 or higher. (Typically offered: Fall)

\section*{CHEM 1221L. Chemistry for Majors II Laboratory. 1 Hour.}

Qualitative and quantitative laboratory with data interpretation and exercises covering the topics of stoichiometry, thermodynamics, kinetics, chemical equilibrium, pH , and descriptive inorganic chemistry. Laboratory notebooks are required as part of every experiment. Laboratory 3 hours per week. Students may not receive credit for both CHEM 1221L and CHEM 1121L. Corequisite: CHEM 1223 and related course component drill for CHEM 1223. (Typically offered: Spring)
This course is equivalent to CHEM 1121L.
CHEM 1223. Chemistry for Majors II. 3 Hours.
The second half of a two-semester course designed specifically for students planning to major in chemistry or biochemistry. Students may not receive credit for both CHEM 1223 and CHEM 1123. Pre- or Corequisite: MATH 1284C or higher. Corequisite: CHEM 1221L and related course component drill section for CHEM 1223. Prerequisite: CHEM 1203 and CHEM 1201L (or CHEM 1103 and CHEM 1101L). (Typically offered: Spring)
This course is equivalent to CHEM 1123.
CHEM 2261L. Analytical Chemistry Laboratory. 1 Hour.
Covers techniques of classical and instrumental methods of chemical separation and analysis. Laboratory 4 hours per week. Chemistry Majors/Minors must take analytical lecture and lab prior to any physical chemistry course. Chemistry Majors/Minors should take analytical lecture and lab together. Pre- or Corequisite: CHEM 2263. Prerequisite: (CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L) or (CHEM 1073 and CHEM 1071L) and MATH 1203 or higher, or AP Calculus AB 3C or higher, or AP Calculus BC 4C or higher, or CLEP College Algebra 54 or higher. (Typically offered: Fall and Spring)

CHEM 2263. Analytical Chemistry Lecture. 3 Hours.
Principles of chemical separations, analysis by classical and instrumental methods, and chemical equilibrium in physical and biological systems. Lecture 3 hours per week. Chemistry Majors/Minors must take analytical lecture and lab prior to any physical chemistry course. Chemistry Majors/Minors should take analytical lecture and lab together. Prerequisite: ((CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L) or (CHEM 1073 and CHEM 1071L)) and ((MATH 1203 or higher) or (AP Calculus AB 3C or higher) or (AP Calculus BC 4C or higher) or (MATH 1203 CLEP score of College Algebra 54 or higher) or (UA Math Placement 46 or higher) or (ACT MATH 22 or higher) or (old/ new SAT MATH of 540 or higher)). (Typically offered: Fall and Spring)

\section*{CHEM 2611L. Organic Physiological Chemistry Laboratory (ACTS Equivalency = CHEM 1224 Lab). 1 Hour.}

A focus on properties of organic compounds as well as reactions of organic compounds with an emphasis on functional groups along with some classifications of certain types of compounds.Laboratory 3 hours per week. Corequisite: CHEM 2613 and related course component drill for CHEM 2613. (Typically offered: Fall, Spring and Summer)

\section*{CHEM 2613. Organic Physiological Chemistry (ACTS Equivalency = CHEM} 1224 Lecture). 3 Hours.
One semester survey of organic chemistry necessary for understanding of biological systems, with some related physiological chemistry. Lecture 3 hours per week. Corequisite: CHEM 2611L and related course component drill section for CHEM 2613. Prerequisite: (CHEM 1073 and CHEM 1071L) or (CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L). (Typically offered: Fall, Spring and Summer)

CHEM 3203. Forensic Chemistry. 3 Hours.
Survey of chemistry used in criminal investigations. Topics may include detection and identification of drugs, alcohol, toxins, explosives and gun powder residue. Chemical analysis of paint, ink, paper, soil, glass and fibers. Chemical detection of blood and fingerprints. Extraction of DNA from evidence, DNA fingerprinting. Prerequisite: CHEM 2613, or CHEM 3613 (recommended), or CHEM 3613H, or CHEM 3713. (Typically offered: Irregular)

CHEM 3273. Inquiry and Modeling in Science Education. 3 Hours.
Study of science practices with an emphasis on modeling and inquiry for learning/ teaching. Includes practical, philosophical, cognitive, and disciplinary specific dimensions of doing science in academic and nonacademic settings. Includes planning and implementing multiple scientific inquiries, engaging in reflective practices, writing and presenting scientific information. Safety issues are included. Corequisite: Drill component. Prerequisite: 8 hours of CHEM courses. (Typically offered: Spring)
This course is cross-listed with PHYS 3273, BIOL 3273.
CHEM 3451L. Elements of Physical Chemistry Laboratory. 1 Hour. Experimental measurements of the physical properties, chemical systems, error analysis and report writing. Experiments cover topics in thermochemistry, heat capacity, chemical kinetics, spectroscopy, and phase/chemical equilibrium using a variety of physical chemistry techniques. Laboratory 3 hours per week. Corequisite: Chemistry majors and chemistry minors must enroll in CHEM 3453 concurrently. Prerequisite: CHEM 2261L and PHYS 2031L (or PHYS 2074). (Typically offered: Fall)

\section*{CHEM 3453. Elements of Physical Chemistry. 3 Hours.}

One semester accelerated course in physical chemistry primarily for students majoring/minoring in chemistry with biochemistry option, or pre-professional and agriculture students. Topics include thermodynamics, phase \& chemical equilibrium, chemical kinetics, quantum chemistry and spectroscopy. Presented at the same level as the 2-semester course with some recourse to calculus, although covering fewer topics in quantum chemistry. Lecture 3 hours per week. Students cannot earn credit for both CHEM 3453 and CHEM 3514. Corequisite: Chemistry majors and chemistry minors must enroll in CHEM 3451L concurrently. Prerequisite: CHEM 2263 and PHYS 2033 (or PHYS 2074), and MATH 2554 (or MATH 2043). (Typically offered: Fall)

\section*{CHEM 3504. Physical Chemistry I. 4 Hours.}

First semester of a 2-semester course in physical chemistry designed for chemistry majors and chemistry minors with topics covering wave-particle duality, quantum chemistry, atomic and molecular structure, bonding, spectroscopy and elementary statistical mechanics. Lecture and recitation 4 hours per week. Pre- or Corequisite: MATH 2564. Prerequisite: CHEM 2263 and PHYS 2074. (Typically offered: Fall)

\section*{CHEM 3512L. Physical Chemistry Laboratory. 2 Hours.}

Experimental studies of molecular structure, thermochemistry, and chemical kinetics, and the determination of other physicochemical properties of matter. Laboratory 8 hours per week. Students cannot earn credit for both CHEM 3451L and CHEM 3512L. Corequisite: Chemistry majors and chemistry minors must take CHEM 3514 concurrently. Prerequisite: CHEM 2261L and PHYS 2031L (or PHYS 2074). (Typically offered: Spring)
CHEM 3514. Physical Chemistry II. 4 Hours.
Second semester of a 2-semester course in physical chemistry aimed for B.S. chemistry majors/minors with topics covering the laws of thermodynamics, phase \& chemical equilibria; structure and properties of solutions, chemical potential, and chemical kinetics. Lecture and recitation 4 hours per week. Students cannot earn credit for both CHEM 3453 and CHEM 3514. Corequisite: Chemistry majors and chemistry minors must enroll in CHEM 3512L concurrently. Prerequisite: CHEM 3504. (Typically offered: Spring)
CHEM 3601L. Organic Chemistry I Laboratory. 1 Hour.
Introduction to basic techniques for separation, purification, and identification of organic compounds. Laboratory exercises in organic chemistry. Meets 3 hours per week. Corequisite: CHEM 3603 and related course component drill for CHEM 3603. (Typically offered: Fall and Summer)

CHEM 3602M. Honors Organic Chemistry I Laboratory. 2 Hours.
Introduction to basic techniques for separation, purification, and identification of organic compounds. Drill lecture-discussion ( \(1 \mathrm{hr} / \mathrm{wk}\) ) and laboratory ( \(4 \mathrm{hr} / \mathrm{wk}\) ). Writing component. Required drill. Corequisite: CHEM 3603H and related course component drill sections for CHEM 3603H and CHEM 3602M. Prerequisite: Honors candidacy. (Typically offered: Fall and Summer)
This course is equivalent to CHEM 3601 L .
CHEM 3603. Organic Chemistry I. 3 Hours.
Introduction to organic compounds including alkanes, haloalkanes, alkenes and alkynes; properties including basic stereochemistry and reactions including nucleophilic substitution, elimination, and electrophilic addition reactions. Lecture 3 hours per week. Corequisite: CHEM 3601L and related course component drill section for CHEM 3603. Prerequisite: (CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L). (Typically offered: Fall and Summer)

\section*{CHEM 3603H. Honors Organic Chemistry I. 3 Hours.}

In-depth introduction to organic compounds; properties and reactions. Including alkanes, haloalkanes, alkenes and alkynes; nucleophilic substitution, elimination, and electrophilic addition reactions. Lecture 3 hours per week. Corequisite: CHEM 3602M and related course component drill sections for CHEM 3603H and CHEM 3602M. Prerequisite: Honors candidacy and ((CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L)). (Typically offered: Fall and Summer)
This course is equivalent to CHEM 3603.

\section*{CHEM 3611L. Organic Chemistry II Laboratory. 1 Hour.}

Continuation of CHEM 3601L and introduction to basic techniques of synthesis, isolation, and determination of structure and reactivity of organic compounds. Laboratory exercises in organic chemistry. Meets 3 hours per week. Corequisite: CHEM 3613 and related course component drill for CHEM 3613. Prerequisite: CHEM 3601L. (Typically offered: Spring and Summer)

\section*{CHEM 3612M. Honors Organic Chemistry II Laboratory. 2 Hours.}

Continuation of CHEM 3602M and introduction to basic techniques of synthesis, isolation, and determination of structure and reactivity of organic compounds. Drill lecture-discussion (1 hour/wk) and laboratory (4 hours/wk). Writing component. Drill required. Corequisite: CHEM 3613H and related course component drill sections for CHEM 3612M and CHEM 3613H. Prerequisite: Honors candidacy and CHEM 3602M. (Typically offered: Spring and Summer)
This course is equivalent to CHEM 3611 L .

CHEM 3613. Organic Chemistry II. 3 Hours.
Basic chemistry of aromatic and carbonyl compounds: properties and reactions. Lecture 3 hours per week. Corequisite: CHEM 3611L and related course component drill section for CHEM 3613. Prerequisite: (CHEM 3603 and CHEM 3601L) or (CHEM 3603H and CHEM 3602M) or (CHEM 3703 and CHEM 3702L). (Typically offered: Spring and Summer)

\section*{CHEM 3613H. Honors Organic Chemistry II. 3 Hours.}

In-depth coverage of the basic chemistry of aromatic and carbonyl compounds; properties and reactions. Lecture 3 hours per week.Corequisite: CHEM 3612M and related course component drill sections for CHEM 3613 H and CHEM 3612M. Prerequisite: Honors candidacy and CHEM 3603H and CHEM 3602M. (Typically offered: Spring and Summer)
This course is equivalent to CHEM 3613.
CHEM 3702L. Organic Chemistry I Lab for Chemistry Majors. 2 Hours.
Introduction to basic techniques for separation, purification, and identification of organic compounds. Drill lecture-discussion (1hr/wk) and laboratory (4hr/wk). Writing component. Required drill. Corequisite: CHEM 3703 and related course component drill sections for CHEM 3703 and CHEM 3702L. Prerequisite: Chemistry major or minor. (Typically offered: Fall)

CHEM 3703. Organic Chemistry I Lecture for Chemistry Majors. 3 Hours. In-depth introduction to organic compounds including alkanes, haloalkanes, alkenes and alkynes; properties including basic stereochemistry and reactions including nucleophilic substitution, elimination, and electrophilic addition. Lecture 3 hours per week. Corequisite: CHEM 3702L and related course component drill sections for CHEM 3703 and CHEM 3702L. Prerequisite: Chemistry major or minor and (CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L). (Typically offered: Fall) This course is equivalent to CHEM 3603.
CHEM 3712L. Organic Chemistry II Lab for Chemistry Majors. 2 Hours. Continuation of CHEM 3702L and introduction to basic techniques of synthesis, isolation, and determination of structure and reactivity of organic compounds. Drill lecture-discussion (1 hour/wk) and laboratory (4 hours/wk). Writing component. Drill required. Corequisite: CHEM 3713 and related course component drill sections for CHEM 3713 and CHEM 3712L. Prerequisite: Chemistry major or minor and CHEM 3702L. (Typically offered: Spring)
CHEM 3713. Organic Chemistry II Lecture for Chemistry Majors. 3 Hours. Continuation of in-depth coverage of the basic chemistry of the compounds of carbon. Properties and reactions of aromatic and carbonyl functional groups. Lecture 3 hours per week. Corequisite: CHEM 3712L and related course component drill sections for CHEM 3713 and CHEM 3712L. Prerequisite: Chemistry major or minor and CHEM 3703 and CHEM 3702L. (Typically offered: Spring) This course is equivalent to CHEM 3613.

\section*{CHEM 3813. Elements of Biochemistry. 3 Hours.}

One semester survey course of the fundamentals of biochemistry. Structures, properties, and reactions of major classes of biomolecules. Basics of enzyme catalysis. Overview of metabolism. Credit for both CHEM 3813 and CHEM 4813H may not be counted toward a chemistry degree. Lecture 3 hours per week. Prerequisite: (CHEM 3613 and CHEM 3611L) or (CHEM 3613H and CHEM 3612M) or (CHEM 3713 and CHEM 3712L) or (CHEM 2613 and CHEM 2611L). (Typically offered: Fall, Spring and Summer)
CHEM 3923H. Honors Colloquium. 3 Hours.
Covers a special topic or issue. Offered as a part of the honors program. Prerequisite: Honors candidacy. (Typically offered: Fall, Spring and Summer)

\section*{CHEM 400V. Chemistry Research. 1-4 Hour.}

Research problems. Students need to enroll in their supervising faculty mentor's section. CHBC students conducting research under a faculty mentor outside of CHBC must enroll in the CHBC chair's section. Additionally, honors students need the approval of the CHBC department honors advisor. Honors students must complete thesis in senior year. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{CHEM 400VH. Honors Chemistry Research. 1-4 Hour.}

Research problems. Students need to enroll in their supervising faculty mentor's section. CHBC students conducting research under a faculty mentor outside of CHBC must enroll in the CHBC chair's section. Additionally, honors students need the approval of the CHBC department honors advisor. Honors students must complete thesis in senior year. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
This course is equivalent to CHEM 400 V .
CHEM 4011H. Honors Seminar. 1 Hour.
Research seminar for chemistry majors enrolled in the honors program. Enrollment is required the spring semester of the junior and senior years for honors students. Senior honors students must make one research presentation to graduate with honors. Prerequisite: Honors candidacy, chemistry major and junior or senior standing. (Typically offered: Spring) May be repeated for up to 2 hours of degree credit.

\section*{CHEM 405V. Special Topics in Chemistry. 1-4 Hour.}

Potential topics include: advanced spectroscopic methods, bioanalytical chemistry, bioinorganic chemistry, bioorganic chemistry, biophysical chemistry, chemical sensors, drug discovery and design, nanomaterials, pharmaceutical chemistry, process analytical chemistry, and protein folding and design. (Typically offered: Irregular)
CHEM 4123. Advanced Inorganic Chemistry I. 3 Hours.
Reactions and properties of inorganic compounds from the standpoint of electronic structure and the periodic table. Emphasis on recent developments. Prerequisite: CHEM 3453 or CHEM 3514. (Typically offered: Fall)

CHEM 4211L. Instrumental Analysis Laboratory. 1 Hour.
Provides laboratory experience in parallel with the lecture material in CHEM 4213. Laboratory 3 hours per week. Corequisite: CHEM 4213. (Typically offered: Fall and Spring)

\section*{CHEM 4213. Instrumental Analysis. 3 Hours.}

Provides students, especially those in the agricultural, biological, and physical sciences, with an understanding of modern instrumental techniques of analysis. Lecture 3 hours per week. Corequisite: CHEM 4211L. Prerequisite: (CHEM 2263 and CHEM 2261L) and ((CHEM 3613 and CHEM 3611L) or (CHEM 3613H and CHEM 3612M) or (CHEM 3713 and CHEM 3712L)). (Typically offered: Fall and Spring)

CHEM 4283. Energy Conversion and Storage. 3 Hours.
Fundamental and applied concepts of energy storage and conversion, with sustainability implications. Chemical reactions (kinetics, thermodynamics, mass transfer), emphasizing oxidation-reduction, electrochemical, and interfacial processes, and impact on performance of fuel and biofuel cells, batteries, supercapacitors, and photochemical conversion. Prerequisite: CHEM 1123 and PHYS 2074. (Typically offered: Fall Even Years)

CHEM 4723. Experimental Methods in Organic Chemistry. 3 Hours.
Introduction to the application of synthetic and spectroscopic methods in organic chemistry, including mass spectrometry, infrared spectroscopy, and nuclear magnetic resonance spectrometry. Other laboratory techniques applicable to chemical research will be included. Lecture 3 hours and laboratory 3 hours per week. Lecture only meets the first half of the term. Laboratory meets the entire term. Corequisite: Lab component. Prerequisite: CHEM 3613 and CHEM 3611L, (or CHEM 3613H or CHEM 3612M), (or CHEM 3713 and CHEM 3712L). (Typically offered: Fall)

\section*{CHEM 4813H. Honors Biochemistry I. 3 Hours.}

The first of a two-course series covering biochemistry for undergraduate students in biology, agriculture, and chemistry. Topics covered include protein structure and function, enzyme kinetics, enzyme mechanisms, and nucleic acid and carbohydrate structures. Credit cannot be earned in both CHEM 3813 and CHEM 4813H.
Additional honors-level work required in this section. Prerequisite: Honors candidacy and (CHEM 3613 and CHEM 3611L) or (CHEM 3613H and CHEM 3612M) or (CHEM 3713 and CHEM 3712L). (Typically offered: Fall)

\section*{CHEM 4843H. Honors Biochemistry II. 3 Hours.}

A continuation of CHEM 4813H covering topics including biological membranes and bioenergetics, photosynthesis, lipids and lipid metabolism, nucleic acid structure, structure and synthesis, and molecular biology. Credit cannot be earned in both CHEM 3813 and CHEM 4843H. Additional honors-level work required in this section. Prerequisite: Honors candidacy and CHEM 4813H. (Typically offered: Spring)

CHEM 4853. Biochemical Techniques. 3 Hours.
Techniques for handling, purifying and analyzing enzymes, structural proteins, and nucleic acids. Lecture 1 hour, laboratory 6 hours per week. Corequisite: Lab component. Pre or Corequisite: CHEM 3813 or CHEM 4843H. (Typically offered: Spring)

\section*{CHEM 505V. Special Topics in Chemistry. 1-4 Hour.}

Potential topics include: advanced spectroscopic methods, bioanalytical chemistry, bioinorganic chemistry, bioorganic chemistry, biophysical chemistry, chemical sensors, drug discovery and design, nanomaterials, pharmaceutical chemistry, process analytical chemistry, and protein folding and design. Graduate degree credit will not be given for both CHEM 405V and CHEM 505V. Prerequisite: Instructor consent. (Typically offered: Irregular)
CHEM 5101. Introduction to Research. 1 Hour.
This eight week course introduces new graduate students to research opportunities and skills in chemistry and biochemistry. Meets 2 hours per week in the first half of the semester. Safety and ethics in research and scholarship are discussed. Students learn about research programs in the department to aid in choosing an advisor. (Typically offered: Fall)

\section*{CHEM 5123. Advanced Inorganic Chemistry. 3 Hours.}

Reactions and properties of inorganic compounds from the standpoint of electronic structure and the periodic table. Emphasis on recent developments. Knowledge comparable to material in CHEM 3453 is recommended. (Typically offered: Fall)
CHEM 5143. Advanced Inorganic Chemistry II. 3 Hours.
Chemistry of metallic and non-metallic elements emphasizing molecular structure, bonding and the classification of reactions. Knowledge of inorganic chemistry comparable to material in CHEM 4123 and CHEM 5123 is recommended. (Typically offered: Irregular)

\section*{CHEM 5153. Structural Chemistry. 3 Hours.}

Determination of molecular structure by diffraction, spectroscopic, and other techniques. Illustrative examples will be chosen from inorganic chemistry and biochemistry. (Typically offered: Irregular)

\section*{CHEM 5213. Instrumental Analysis. 3 Hours.}

Provides students, especially those in the physical, agricultural, and biological sciences, with an understanding of the theory and practice of modern instrumental techniques of analysis. Lecture 3 hours per week. Knowledge comparable to material in CHEM 2263 and CHEM 3603 is recommended. (Typically offered: Fall and Spring)

\section*{CHEM 5233. Chemical Separations. 3 Hours.}

Modern separation methods including liquid chromatography (adsorption, liquidliquid partition, ion exchange, exclusion) and gas chromatography. Theory and instrumentation is discussed with emphasis on practical aspects of separation science. (Typically offered: Fall Even Years)

CHEM 5243. Electrochemical Methods of Analysis. 3 Hours.
Topics will include diffusion, electron transfer kinetics, and reversible and irreversible electrode processes followed by a discussion of chronoamperometry, chronocoulometry, polarography, voltammetry, and chronopotentiometry. Knowledge of analytical chemistry comparable to material in CHEM 4213 is recommended. (Typically offered: Spring Even Years)

\section*{CHEM 5253. Spectrochemical Methods of Analysis. 3 Hours.}

Principles and methods of modern spectroscopic analysis. Optics and instrumentation necessary for spectroscopy is also discussed. Topics include atomic and molecular absorption and emission techniques in the ultraviolet, visible, and infrared spectral regions. Knowledge of analytical chemistry comparable to material in CHEM 4213 is recommended. (Typically offered: Fall Odd Years)

CHEM 5283. Energy Conversion and Storage. 3 Hours.
Fundamental and applied concepts of energy storage and conversion with sustainability implications. Chemical reactions (kinetics, thermodynamics, mass transfer), emphasizing oxidation-reduction, electrochemical, and interfacial processes, and impact on performance of fuel and biofuel cells, batteries, supercapacitors, and photochemical conversion. (Typically offered: Fall Even Years)

\section*{CHEM 5443. Physical Chemistry of Materials. 3 Hours.}

Physical and chemical characteristics of materials and discussion of the science behind materials engineering and performance. Topics include theory, principles of characterization methods, modeling, and applications in the context of materials. Knowledge comparable to material in CHEM 3514 and CHEM 3504 or CHEM 3453 or CHEG 3713 or MEEG 2403 is recommended. (Typically offered: Irregular)

\section*{CHEM 5453. Quantum Chemistry I. 3 Hours.}

Fundamental quantum theory: Hamiltonian formalism in classical mechanics, Schrodinger equation, operators, angular momentum, harmonic oscillator, barrier problems, rigid rotator, hydrogen atom, and interaction of matter with radiation. Knowledge of physical chemistry comparable to material in CHEM 3504 is recommended. (Typically offered: Spring Odd Years)

CHEM 5473. Chemical Kinetics. 3 Hours.
Theory and applications of the principles of kinetics to reactions between substances, both in the gaseous state and in solution. Knowledge of physical chemistry comparable to material in CHEM 3514 is recommended. (Typically offered: Spring)

CHEM 5573. Statistical Thermodynamics. 3 Hours.
Covers fundamentals in thermodynamics, molecular dynamics, Monte Carlo, phase transitions, behavior of gases and liquids and basic concepts in chemical kinetics and physical kinetics. Knowledge comparable to physical chemistry materials in CHEM 3514 is recommended. (Typically offered: Irregular)

CHEM 5603. Physical Organic Chemistry. 3 Hours.
Introduction to the theoretical interpretation of reactivity, reaction mechanisms, and molecular structure of organic compounds. Application of theories of electronic structure; emphasis on recent developments. Knowledge of material comparable to CHEM 3613, CHEM 3613H, CHEM 3713 and CHEM 3514 is recommended. (Typically offered: Fall)

\section*{CHEM 5633. Organic Reactions. 3 Hours.}

The more important types of organic reactions and their applications to various classes of compounds. Knowledge of organic chemistry comparable to material in CHEM 3603 is recommended. (Typically offered: Irregular)

CHEM 5643. Chemistry of Carbohydrates. 3 Hours.
Introduction to carbohydrate chemistry including structures of mono-, di- and oligosaccharides; properties including stereochemistry; characterization including spectroscopy, and molecular recognition; and real life examples including blood groups; current strategies, research groups and topics at the forefront in the field. (Typically offered: Spring Even Years)

\section*{CHEM 5723. Experimental Methods in Organic Chemistry. 3 Hours.}

Introduction to the application of synthetic and spectroscopic methods in organic chemistry, including mass spectrometry, infrared spectroscopy, and nuclear magnetic resonance spectrometry. Lecture 3 hours per week. Knowledge comparable to material in CHEM 3613 is recommended. (Typically offered: Fall)

\section*{CHEM 5753. Methods of Organic Analysis. 3 Hours.}

Interpretation of physical measurements of organic compounds in terms of molecular structure. Emphasis on spectroscopic methods (infrared, ultraviolet, magnet resonance, and mass spectra). Knowledge of organic chemistry comparable to material in CHEM 3603 is recommended. (Typically offered: Fall)

CHEM 5813. Biochemistry I. 3 Hours.
The first of a two-course series covering biochemistry for graduate students in biology, agriculture, and chemistry. Topics covered include protein structure and function, enzyme kinetics, enzyme mechanisms, and nucleic acid and carbohydrate structures. Knowledge of organic chemistry comparable to material in CHEM 3613 is recommended. (Typically offered: Fall)

CHEM 5843. Biochemistry II. 3 Hours.
A continuation of CHEM 5813 covering topics including biological membranes and bioenergetics, photosynthesis, lipids and lipid metabolism, nucleic acid and amino acid metabolism, and molecular biology. Knowledge of organic chemistry comparable to material in CHEM 3613 is recommended. Prerequisite: CHEM 5813. (Typically offered: Spring)

CHEM 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Chemistry graduate students enroll in this course as needed until all CUMES are passed and the student is officially a doctoral candidate. Prerequisite: Chemistry graduate student. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{CHEM 6011. Chemistry Seminar. 1 Hour.}

Weekly discussion of current chemical research. Departmental and divisional seminars in analytical chemistry, biochemistry, inorganic, organic, and physical chemistry are held weekly. Seminar credit does not count toward the minimum hourly requirements for any chemistry graduate degree. (Typically offered: Fall and Spring) May be repeated for degree credit.

\section*{CHEM 619V. Special Topics in Inorganic Chemistry. 1-3 Hour.}

Topics which have been covered in the past include: technique and theory of \(x\) ray diffraction, electronic structure of transition metal complexes, inorganic reaction mechanisms, and physical methods in inorganic chemistry. (Typically offered: Irregular) May be repeated for degree credit.

CHEM 6283. Mass Spectrometry. 3 Hours.
This course is devoted to the fundamental principles and applications of analytical mass spectrometry. Interactions of ions with magnetic and electric fields and the implications with respect to mass spectrometer design are considered, as are the various types of mass spectrometer sources. Representative applications of mass spectrometry in chemical analysis are also discussed. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years)

\section*{CHEM 629V. Special Topics in Analytical Chemistry. 1-3 Hour.}

Topics that have been presented in the past include: electroanalytical techniques, kinetics of crystal growth, studies of electrode processes, lasers in chemical analysis, nucleosynthesis and isotopic properties of meteorites, thermoluminescence of geological materials, early solar system chemistry and analytical cosmochemistry. (Typically offered: Irregular) May be repeated for degree credit.

CHEM 649V. Special Topics in Physical Chemistry. 1-3 Hour.
Topics which have been covered in the past include advanced kinetics, solution chemistry, molecular spectra, nuclear magnetic resonance spectroscopy, and methods of theoretical chemistry. (Typically offered: Irregular) May be repeated for degree credit.

\section*{CHEM 6633. Chemistry of Organic Natural Products. 3 Hours.}

Selected topics concerned with structure elucidation and synthesis of such compounds as alkaloids, antibiotics, bacterial metabolites, plant pigments, steroids, terpenoids, etc. Prerequisite: CHEM 5603 and CHEM 5633. (Typically offered: Irregular)

CHEM 6643. Organometallic Chemistry. 3 Hours.
Theories and principles of organometallic chemistry. Concepts include bonding, stereochemistry, structure and reactivity, stereochemical principles, conformational, steric and stereoelectronic effects. Transition metal catalysis of organic reactions will also be described. Knowledge of material comparable to CHEM 3713 and CHEM 3514 is recommended. (Typically offered: Irregular)

CHEM 669V. Special Topics in Organic Chemistry. 1-3 Hour.
Topics which have been presented in the past include heterogeneous catalysis, isotope effect studies of organic reaction mechanisms, organometallic chemistry, stereochemistry, photochemistry, and carbanion chemistry. (Typically offered: Irregular) May be repeated for degree credit.

CHEM 6823. Physical Biochemistry. 3 Hours.
Physical chemistry of proteins, nucleic acids, and biological membranes.
Ultracentrifugation, absorption and fluorescent spectrophotometry, nuclear magnetic resonance spectroscopy, x-ray diffraction, and other techniques. Prerequisite: CHEM 5813. (Typically offered: Fall Even Years)

CHEM 6863. Enzymes. 3 Hours.
Isolation, characterization, and general chemical and biochemical properties of enzymes. Kinetics, mechanisms, and control of enzyme reactions. Prerequisite: CHEM 5813 and CHEM 5843. (Typically offered: Fall Odd Years)
CHEM 6873. Molecular Biochemistry. 3 Hours.
Nucleic acid chemistry in vitro and in vivo, synthesis of DNA and RNA, genetic diseases, cancer biochemistry and genetic engineering. Prerequisite: CHEM 5813 and CHEM 5843. (Typically offered: Spring Odd Years)

CHEM 6883. Bioenergetics and Biomembranes. 3 Hours.
Cellular energy metabolism, photosynthesis, membrane transport, properties of membrane proteins, and the application of thermodynamics to biological systems. Prerequisite: CHEM 5813 and CHEM 5843. (Typically offered: Spring Even Years)

CHEM 700V. Doctoral Dissertation. 1-12 Hour.
Doctoral Dissertation. For chemistry graduate students who have passed all CUMES and have officially been admitted to doctoral candidacy. Prerequisite: Chemistry graduate student. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{Cherokee (CHRK)}

\section*{Courses}

CHRK 1003. Elementary Cherokee I. 3 Hours.
Introduction to the Cherokee language. Focuses on the sound and syllabary system of Cherokee, including grammar, vocabulary, culture, and heritage. (Typically
offered: Fall)

\section*{CHRK 1013. Elementary Cherokee II. 3 Hours.}

Focuses on the sound and syllabary system of Cherokee, including grammar, vocabulary, culture, and heritage. Includes in-depth activities and experiences with the Cherokee language. Prerequisite: CHRK 1003 or instructor's consent. (Typically offered: Spring)

\section*{Chinese (CHIN) Courses}

CHIN 1003. Elementary Chinese I. 3 Hours.
Elementary Chinese. (Typically offered: Fall)
CHIN 1013. Elementary Chinese II. 3 Hours.
Elementary courses stress correct pronunciation, Aural comprehension, and simple speaking ability, and lead to active mastery of basic grammar and limited reading ability. (Typically offered: Spring)

CHIN 2003. Intermediate Chinese I. 3 Hours.
Intermediate courses lead to greater facility in spoken language and to more advanced reading skills. (Typically offered: Fall)

CHIN 2013. Intermediate Chinese II. 3 Hours.
Continued development of basic speaking comprehension and writing skills and intensive development of reading skills. (Typically offered: Spring)

CHIN 3003. Advanced Chinese. 3 Hours.
Continues to develop speaking, listening, reading and writing skills and presents more complex forms and structures of the language as well as additional characters. Prerequisite: CHIN 2013 (Typically offered: Fall)

CHIN 3033. Conversation. 3 Hours.
Guided conversation practice for the post-intermediate student. Prerequisite: CHIN 2013 or equivalent. (Typically offered: Spring)

CHIN 3103. Chinese Culture through Film. 3 Hours.
This course explores Chinese culture through the lens of Chinese films. The course is designed to give students insights into Chinese culture by experiencing it through carefully selected Chinese films and thoughtful discussions. Through the film screenings, lectures, readings, discussions, and cultural reflections, students will learn about important dimensions of Chinese culture, especially regarding Chinese history, contemporary society, communication, education, romance, family, spiritual concepts, aesthetics, lifestyle, customs, and values. The course is taught in English; no knowledge of the Chinese language is required. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.
This course is cross-listed with AIST 3103.
CHIN 3983. Special Studies. 3 Hours.
May be offered in subject not specifically covered by courses otherwise listed. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
CHIN 4313. Culture and Society in China. 3 Hours.
Social, communicative, technological, and business contexts of contemporary Chinese culture and society, as well as implications for global citizens. Taught in English. No knowledge of the Chinese language required. (Typically offered: Spring) This course is cross-listed with AIST 4323.

CHIN 4333. Business Chinese Language in Speaking and Writing. 3 Hours. Introduction of Chinese vocabulary, formats, and expressions in business environments, such as company structures, management, banking and accounting, as well as how to read and write contracts, letters, and other business documents. Prerequisite: CHIN 3003 or equivalent Chinese proficiency. (Typically offered: Fall)

\section*{Civil Engineering (CVEG)}

\section*{Courses}

CVEG 2002. Introduction to Civil Engineering Plans and CADD. 2 Hours.
Development and preparation of design and construction plans; plan terminology and features; introduction to computer-aided drafting and design (CADD) software. Corequisite: Drill component. Prerequisite: Civil Engineering major or departmental consent. (Typically offered: Fall, Spring and Summer)

CVEG 2013. Civil Engineering Mechanics I. 3 Hours.
CVEG 2013 provides the student with a foundation in the theory and principles of statics for use in subsequent civil engineering courses. The course applies mathematics and physics to solve practical problems of structural systems.
Corequisite: MATH 2574. Prerequisite: MATH 2564 and PHYS 2054. (Typically offered: Fall and Spring)

CVEG 2023. Civil Engineering Mechanics II. 3 Hours.
CVEG 2023 provides the student with a foundation in the theory and principles of mechanics of materials for use in subsequent civil engineering courses. This course applies mathematics and physics to solve problems in mechanics. Prerequisite: CVEG 2013 or MEEG 2003. (Typically offered: Fall and Spring)
CVEG 2051L. Surveying Systems Laboratory. 1 Hour.
Laboratory exercises demonstrating the principles and practices of surveying systems. Corequisite: CVEG 2053. (Typically offered: Fall)

\section*{CVEG 2053. Surveying Systems. 3 Hours.}

Coordinate geometry, measurements, and total integrated surveying systems; total stations, electronic data collection, and reduction; error analysis; applications to civil engineering and surveying practice. Corequisite: CVEG 2051L. Prerequisite: MATH 2554 or MATH 2445. (Typically offered: Fall)

CVEG 2113. Structural Materials. 3 Hours.
Production, properties, behavior, and structural applications of concrete, steel, timber, masonry, and plastic. Statistical analysis methods for quality control are also covered. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: MEEG 2003 or CVEG 2013. Pre- or Corequisite: MEEG 3013 or CVEG 2023. (Typically offered: Fall and Spring)

\section*{CVEG 2851. Engineering Professional Practice Issues. 1 Hour.}

Study of various issues related to the professional practice of engineering including ethics, professionalism, professional licensure, project procurement, social and political issues, globalism, and other legal issues. (Typically offered: Fall and Spring)
CVEG 3131L. Soil Mechanics Laboratory. 1 Hour.
Index, strength, and consolidation properties of soils; test methods and specifications for soil sampling and testing. Corequisite: CVEG 3132. (Typically offered: Fall and Spring)

\section*{CVEG 3132. Soil Mechanics. 2 Hours.}

Introduction to geotechnical engineering. Properties of soils related to foundations, retaining walls, earth structures, and highways. Lecture 2 hours, laboratory 3 hours per week. Corequisite: CVEG 3131L. Pre- or Corequisite: CVEG 3213 and MATH 2584. Prerequisite: (MEEG 3013 or CVEG 2023) and GEOS 1113 and CVEG 2002. (Typically offered: Fall and Spring)
CVEG 3213. Hydraulics. 3 Hours.
Study of incompressible fluids. Topics include fluid properties, fluid statics, continuity, energy and hydraulic gradients, fundamentals of flow in pipes and open channels, flow measurement devices, pump selection and analysis. Corequisite: Lab component. Prerequisite: CVEG 2013 or MEEG 2003. (Typically offered: Fall and Spring)

CVEG 3223. Hydrology. 3 Hours.
Flood routing procedures in storage reservoirs and channels. Hydrologic planning including storage reservoir design, frequency duration analysis, and related techniques. Prerequisite: (CVEG 2053 or BENG 2643), (CVEG 3213 or MEEG 3503 or CHEG 2133). (Typically offered: Fall and Spring)

CVEG 3243. Environmental Engineering. 3 Hours.
Introduction to theories and fundamentals of physical, chemical, and biological processes with emphasis on water supply and wastewater collection, transportation, and treatment. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: MATH 2584 and CHEM 1103. (Typically offered: Fall and Spring)

\section*{CVEG 3303. Structural Analysis. 3 Hours.}

Truss analysis, influence lines for beams and frames, and effects of moving loads. Deformation of beams, frames, and trusses. Analysis of indeterminate structures by moment area, slope deflection, and moment distribution methods; approximate methods of analysis. Lecture 3 hours, drill 3 hours per week. Corequisite: Drill component. Prerequisite: MEEG 3013 or CVEG 2023. (Typically offered: Fall and Spring)

\section*{CVEG 3413. Transportation Systems Engineering. 3 Hours.}

Transportation Systems Engineering: Introduction to transportation systems engineering and planning. Includes the following topics: transportation governance, financing, and the effect on the environment; traffic flow theory; safety; traffic operations and control; capacity; and travel demand modeling. Prerequisite: CVEG 2053 and (INEG 2314 or INEG 3313). (Typically offered: Fall)

\section*{CVEG 4143. Foundation Engineering. 3 Hours.}

Analysis and design of retaining walls, footings, sheet piles, and piles. Determination of foundation settlements in sand and clay. Prerequisite: CVEG 3132 and INEG 2413. (Typically offered: Fall and Spring)

\section*{CVEG 4203. Environmental Regulations and Permits. 3 Hours.}

Topics include federal and state environmental regulations, the permitting process, permit requirements and related issues. Prerequisite: CVEG 3243 and senior standing. (Typically offered: Fall)

\section*{CVEG 4243. Environmental Engineering Design. 3 Hours.}

Application of physical, biological, and chemical operations and processes to the design of water supply and wastewater treatment systems. Prerequisite: CVEG 3243 and INEG 2413. (Typically offered: Spring)

\section*{CVEG 4263. Air Pollution Control. 3 Hours.}

Fundamentals of air pollution causes, effects, and measurements; as well as, control methods with application to current industrial problems. Prerequisite: CVEG 3213 or MEEG 3503. (Typically offered: Spring)

\section*{CVEG 4273. Open Channel Flow. 3 Hours.}

Open Channel Flow includes advanced open channel hydraulics, flow measurement techniques, a hydrology review, culvert and storm drainage design, natural channel classification (fluvial geomorphology) and rehabilitation, computer methods and environmental issues. Prerequisite: CVEG 3213 and CVEG 3223. (Typically offered: Spring)

\section*{CVEG 4303. Reinforced Concrete Design I. 3 Hours.}

Design of reinforced concrete elements with emphasis on ultimate strength design supplemented by working stress design for deflection and crack analysis. Prerequisite: CVEG 2113 and CVEG 3303. (Typically offered: Fall and Spring)

\section*{CVEG 4313. Structural Steel Design I. 3 Hours.}

Design of structural steel elements by elastic design the Load and Resistance Factor Design method. Intensive treatment of tension members, beams, columns, and connections. Pre- or Corequisite: CVEG 2113. Prerequisite: CVEG 3303. (Typically offered: Fall and Spring)

\section*{CVEG 4323. Structural Loadings. 3 Hours.}

Theoretical background to and practical code requirements for various structural loadings. These include dead loads, occupancy loads, roof loads and ponding, snow loads, granular loads, vehicular loads, wind loading, and seismic loads. Prerequisite: CVEG 3303, INEG 2413 and (CVEG 4303 or CVEG 4313). (Typically offered: Spring)

CVEG 4343. Reinforced Masonry Design. 3 Hours.
Properties of masonry materials and assemblages. Masonry workmanship and quality control. Design of reinforced masonry elements against gravity and lateral loads. Design of masonry connections and joints. Application to 1-and 2-story buildings. Prerequisite: CVEG 4303. (Typically offered: Irregular)

\section*{CVEG 4353. Timber Design. 3 Hours.}

Selection of timber beams, columns, and beam-columns. Physical properties of wood, analysis and design of timber connections. Truss design, glulam members, timber bridge design, treatment for decay, and fire protection. Pre- or Corequisite: CVEG 2113. Prerequisite: CVEG 3303. (Typically offered: Irregular)

CVEG 4413. Pavement Evaluation and Rehabilitation. 3 Hours.
Introduction of concepts and procedures for pavement condition surveys; evaluation by nondestructive and destructive testing; maintenance strategies; rehabilitation of pavement systems for highway and airfields; pavement management systems. Prerequisite: CVEG 4433. (Typically offered: Irregular)

\section*{CVEG 4423. Transportation Infrastructure. 3 Hours.}

Transportation infrastructure includes discussion on the geometric design of roadways, roadway drainage, roadway materials, roadway structural design, and an economic analysis of roadways. This includes the design of horizontal and vertical alignment, cross section, intersections, pavement materials, and structural capacity. Prerequisite: CVEG 3413 and INEG 2413. (Typically offered: Fall and Spring)

CVEG 4433. Transportation Pavements and Materials. 3 Hours.
Study of the engineering properties and behavior of materials commonly used in transportation facilities as they relate to the design and performance of flexible and rigid pavement systems. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CVEG 3132, CVEG 3413, and (INEG 2314 or INEG 3313). (Typically offered: Irregular)
CVEG 4513. Construction Management. 3 Hours.
Introduction to methods and procedures for management of civil engineering construction projects including organization, plans and specs, cost estimating and bidding, project planning and finance, quality control/ assurance, construction safety, cost management, labor issues, change orders, and subcontractor issues. Prerequisite: Senior standing and Civil Engineering majors only. (Typically offered: Fall and Spring)
CVEG 4812. Environmental Design Project. 2 Hours.
Comprehensive engineering design project primarily related to environmental issues. Corequisite: CVEG 4243. (Typically offered: Spring)
CVEG 4822. Geotechnical Design Project. 2 Hours.
Comprehensive engineering design project primarily related to geotechnical issues. Corequisite: CVEG 4143. Prerequisite: CVEG 4303. (Typically offered: Fall)
CVEG 4832. Structural Design Project. 2 Hours.
Comprehensive engineering design project primarily related to structural issues. Corequisite: CVEG 4323. Prerequisite: CVEG 4303 and CVEG 4313. (Typically offered: Spring)

CVEG 4842. Transportation Design Project. 2 Hours.
Comprehensive engineering design project primarily related to transportation issues. Corequisite: CVEG 4423. Prerequisite: CVEG 2002. (Typically offered: Fall)

CVEG 4863. Sustainability in Civil Engineering. 3 Hours.
Qualify and quantify the economic, environmental, societal, and engineering drivers behind sustainability in Civil Engineering. Justification of the feasibility and benefits of sustainability in environmental, geotechnical, structural, and transportation engineering through verbal and written communications. Prerequisite: Senior standing. (Typically offered: Irregular)

\section*{CVEG 488V. Special Problems. 1-6 Hour.}

Special problems. Prerequisite: Senior standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{CVEG 4890. Fundamentals of Engineering Seminar. 0 Hours.}

Preparation for students taking the Fundamentals of Engineering (FE) examination, administered by the National Council of Examiners for Engineering and Surveying (NCEES). Concept review and problem-solving drills for topics covered on the FE-Civil examination. Prerequisite: Civil Engineering major and senior standing. (Typically offered: Fall and Spring)

CVEG 491VH. Honors Studies in Geotechnical Engineering. 1-6 Hour.
The study of advanced topics in the geotechnical engineering field. May include participation in geotechnical engineering courses normally available only to graduate students. Prerequisite: CVEG 3132 with a grade of C or better. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
CVEG 493VH. Honors Studies in Structural Engineering. 1-6 Hour.
The study of advanced topics in the structural engineering field. May include participation in structural engineering courses normally available only to graduate students. Prerequisite: CVEG 3303 with a grade of C or better. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CVEG 494VH. Honors Studies in Transportation Engineering. 1-6 Hour. The study of advanced topics in the transportation engineering field. May include participation in transportation engineering courses normally available only to graduate students. Prerequisite: CVEG 3413 with a grade of \(C\) or better. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{CVEG 4983H. Honors Undergraduate Thesis. 3 Hours.}

Thesis research for civil engineering students enrolled in the honors college. Prerequisite: Honors College. (Typically offered: Irregular)

\section*{CVEG 5000. Graduate Seminar in Civil Engineering. 0 Hours.}

A weekly seminar devoted to civil engineering research topics. Appropriate grade to be "S". (Typically offered: Fall and Spring)

\section*{CVEG 5103. Geosynthetic Applications in Civil Engineering. 3 Hours.}

Geosynthetic Applications in Civil Engineering: The functional properties of various geosynthetic materials are defined as they relate to; reinforcement, separation, filtration, and drainage applications. Design procedures are developed for the use of geosynthetics in transportation, environmental and geotechnical applications. Prerequisite: CVEG 3132 and CVEG 3131L or equivalent. (Typically offered: Irregular)

\section*{CVEG 5113. Soil Dynamics. 3 Hours.}

This course covers propagation of stress waves in elastic and inelastic materials, dynamic loading of soils, and stiffness and damping properties of soils. Use of field and laboratory techniques to determine shear wave velocity of soils. Also includes applications of dynamic soil properties in site stiffness characterization, geotechnical earthquake engineering, evaluation of ground improvement, and design of machine foundations. Prerequisite: CVEG 4143 or graduate standing. (Typically offered: Irregular)

\section*{CVEG 5123. Measurement of Soil Properties. 3 Hours.}

Consideration of basic principles involved in measuring properties of soils. Detailed analysis of standard and specialized soil testing procedures and equipment. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CVEG 4143 or graduate standing. (Typically offered: Irregular)

\section*{CVEG 5133. Geotechnical Site Characterization. 3 Hours.}

One of primary tasks of geotechnical engineers is to perform in-situ site characterization for engineering design of foundations, retaining structures, roads, bridges and other infrastructure. This course will focus on in-situ investigations performed for the purpose of collecting detailed site characterization data for direct and/or indirect use in geotechnical design. Specifically, we will study various static (e.g., SPT, CPT, VST, DMT, PMT) and dynamic (e.g., CHT, DHT, SW, GPR) insitu tests used to obtain estimates of stratigraphy, density, strength, stress history, modulus, and permeability of geotechnical materials. We will predominantly focus on site characterization of soil sites, but will mention rock testing and design methods when appropriate. Prerequisite: CVEG 4143 or the equivalent. (Typically offered: Irregular)
CVEG 5143. Transportation Soils Engineering. 3 Hours.
Advanced study of the properties of surficial soils; soil classification systems; pedology; soil occurrence and variability; subgrade evaluation procedures; repeated load behavior of soils; soil compaction and field control; soil stabilization; soil trafficability and subgrade stability for transportation facilities. Prerequisite: CVEG 3132. (Typically offered: Irregular)
CVEG 5153. Earth Retaining Structures. 3 Hours.
This course will focus on the analysis and design of earth retaining structures. Specifically, we will discuss soil and rock property design parameter selection, lateral earth pressures for wall system design, and load and resistance factor design (LRFD) for retaining walls. Wall types discussed include gravity and semigravity walls, modular gravity walls, MSE walls, nongravity cantilever walls and anchored walls, and in-situ reinforced walls. Information on wall system feasibility and selection, construction materials and methods, cost information, and design and performance information will be discussed. Prerequisite: CVEG 4143 or equivalent. (Typically offered: Irregular)

\section*{CVEG 5163. Seepage and Consolidation. 3 Hours.}

Investigation of the flow of water through soils and the time rate of compression of soils. Characterization of the hydraulic conductivity of soils in the field, seepage through earth dams, excavation cut-off walls, and other seepage control systems. Analytical and experimental investigations of soil volume change under hydraulic and mechanical loading. Design of earth and rock dams, well pumping, and vertical and radial consolidation in embankments. Prerequisite: CVEG 4143 or graduate standing. (Typically offered: Irregular)

\section*{CVEG 5173. Advanced Foundations. 3 Hours.}

Study of soil-supported structures. Topics include drilled piers, slope stability, pile groups, negative skin friction, foundation design from the standard penetration test and Dutch cone, and other specialized foundation design topics. Prerequisite: CVEG 4143 or graduate standing. (Typically offered: Irregular)
CVEG 5183. Geo-Environmental Engineering. 3 Hours.
Study of the geotechnical aspects of waste containment systems and contaminant remediation applications. Analysis and measurement of flow of water and contaminants through saturated and unsaturated soils, clay mineralogy and soilchemical compatibility, and mechanical and hydraulic behavior of geomembranes, geotextiles, and geosynthetic clay liners. Design and construction aspects of compacted clay and composite landfill liners, drainage systems, and landfill covers. Prerequisite: CVEG 3132 or graduate standing. (Typically offered: Irregular)

CVEG 5193. Geotechnical Earthquake Engineering. 3 Hours.
This course covers stress wave propagation in soil and rock; influence of soil conditions on seismic ground motion characteristics; evaluation of site response using wave propagation techniques; liquefaction of soils; seismic response of earth structures and slopes. Prerequisite: CVEG 4143 or graduate standing. (Typically offered: Irregular)

\section*{CVEG 5203. Water Chemistry. 3 Hours.}

This course provides a basis for applying principles of physical chemistry to understanding the composition of natural waters and to the engineering of water and wastewater treatment processes. Topics covered include chemical equilibrium (algebraic, graphical, and computer-aided solution techniques); acid-base equilibria and buffering; oxidation and reduction reactions; and solid precipitation and dissolution. Prerequisite: Graduate standing or CVEG 3243 and instructor approval. (Typically offered: Spring)

\section*{CVEG 5213. Advanced Water Treatment Design. 3 Hours.}

Design of industrial and municipal water treatment plants. Discussion of raw and treated water requirements for several uses. Prerequisite: CVEG 3243. (Typically offered: Spring)

CVEG 5233. Microbiology for Environmental Engineers. 3 Hours.
Fundamental and applied aspects of microbiology and biochemistry relating to water quality control, wastewater treatment, and stream pollution. Prerequisite: CVEG 3243. (Typically offered: Irregular)

\section*{CVEG 5243. Groundwater Hydrology. 3 Hours.}

Detailed analysis of groundwater movement, well hydraulics, groundwater pollution and artificial recharge. Surface and subsurface investigations of groundwater and groundwater management, saline intrusion and groundwater modeling will be addressed. Prerequisite: CVEG 3223. (Typically offered: Irregular)

\section*{CVEG 5253. Physical-Chemical Processes for Water and Wastewater} Treatment. 3 Hours.
This course provides a fundamental understanding of physical and chemical processes used in the treatment of drinking water and wastewater. Principals of mass balance are applied to understand the impact of reactor hydraulics (ideal and non-ideal flow) and reaction kinetics on process performance and identify important process variables. Chemical processes covered include disinfection, gas transfer, adsorption, and ion exchange; physical processes covered include coagulation, flocculation, sedimentation, filtration, and membranes. Prerequisite: Graduate standing and instructor consent. (Typically offered: Fall Odd Years)

\section*{CVEG 5273. Open Channel Flow. 3 Hours.}

Open Channel Flow includes advanced open channel hydraulics, flow measurement techniques, a hydrology review, culvert and storm drainage facility design, natural channel classification (fluvial geomorphology) and rehabilitation, computer methods and environmental issues. Prerequisite: CVEG 3213 and CVEG 3223. (Typically offered: Irregular)
CVEG 5293. Water Reuse. 3 Hours.
CVEG 5293 is a graduate-level course that discusses topics related to water reclamation and reuse. Topics include past and current practices of water reuse, health and environmental issues related to water reuse, water technologies and systems for water reuse, and water reuse applications. Prerequisite: CVEG 3243 or equivalent course. (Typically offered: Spring Even Years)

\section*{CVEG 5303. Theory of Stability. 3 Hours.}

Study of structural members subjected to compression. Analysis of compression members considering support conditions and within frame configurations. Analysis of beams considering lateral torsional bucking. AISC Steel Manual strength equations related to columns and beams are derived and discussed. Prerequisite: Graduate standing. (Typically offered: Irregular)

\section*{CVEG 5313. Matrix Analysis of Structures. 3 Hours.}

Energy and digital computer techniques of structural analysis as applied to conventional forms, space trusses, and frames. Prerequisite: CVEG 3303 or graduate standing. (Typically offered: Irregular)
CVEG 5323. Structural Dynamics. 3 Hours.
Dynamics response of single and multidegree of freedom systems. Modal analysis. Response spectra. Computer programs for dynamic analysis. Design considerations for structures subjected to time-varying forces including earthquake, wind, and blast loads. Prerequisite: CVEG 3303. (Typically offered: Irregular)

\section*{CVEG 5333. Concrete Materials. 3 Hours.}

Topics include portland cement production, supplementary cementing materials, fresh and hardened concrete properties, mixture proportioning, chemical admixtures, curing, and specialty concretes. Corequisite: Lab component. Prerequisite:
CVEG 4303. (Typically offered: Irregular)

\section*{CVEG 5343. Highway Bridges. 3 Hours.}

Economics of spans, current design and construction specifications, comparative designs. Possible refinements in design techniques and improved utilization of materials. Prerequisite: CVEG 4313 and CVEG 4303. (Typically offered: Irregular)

CVEG 5353. Prestressed Concrete Design. 3 Hours.
Analysis and design of prestressed concrete beams. Topics include flexural analysis, prestress bond, draping and debonding, allowable stresses, shear analysis and design, camber prediction, and prestress losses. Prerequisite: CVEG 4303. (Typically offered: Irregular)

\section*{CVEG 5363. Advanced Topics in Reinforced Concrete. 3 Hours.}

Analysis and design of reinforced concrete members. Topics include slender columns, one-way and two-way slab design, strut and tie design, and torsion. Prerequisite: CVEG 4303 or graduate standing. (Typically offered: Irregular)

CVEG 5373. Advanced Structural Steel Design. 3 Hours.
Design of structural steel components using the Load and Resistance Factor Design method. Intensive treatment of simple and eccentric connections, composite construction, plate girders, and plastic analysis and design. Prerequisite: CVEG 4313 or graduate standing. (Typically offered: Irregular)
CVEG 5383. Finite Element Methods in Civil Engineering. 3 Hours.
An understanding of the fundamentals of the finite element method and its application to structural configurations too complicated to be analyzed without computer applications. Application to other areas of civil engineering analysis and design such as soil mechanics, foundations, fluid flow, and flow through porous media. Prerequisite: Graduate standing. (Typically offered: Irregular)

CVEG 5393. Advanced Strength of Materials. 3 Hours.
The course will continue from the basic material addressed in the undergraduate course and investigate in more detail stress analysis as it pertains to civil engineering type problems. Topics addressed in the course will include stress analysis (two-dimensional), constitutive relationships, solutions for two-dimensional problems, flexure, torsion, beams on elastic foundations, and energy methods. Prerequisite: CVEG 2023 or MEEG 3013. (Typically offered: Irregular)

CVEG 5413. Transportation and Land Development. 3 Hours.
Study of interaction between land development and the transportation network. Application of planning, design, and operational techniques to manage land development impacts upon the transportation system, and to integrate land layout with transportation network layout. Prerequisite: Graduate standing. (Typically offered: Irregular)

CVEG 5423. Structural Design of Pavement Systems. 3 Hours.
An introduction to the structural design of pavement systems including: survey of current design procedures; study of rigid pavement jointing and reinforcement practices; examination of the behavioral characteristics of pavement materials and of rigid and flexible pavement systems; introduction to structural analysis theories and to pavement management concepts. Prerequisite: CVEG 4433. (Typically offered: Irregular)

CVEG 5433. Traffic Engineering. 3 Hours.
A study of both the underlying theory and the use of traffic control devices (signs, traffic signals, pavement markings), and relationships to improved traffic flow and safety, driver and vehicle characteristics, geometric design, and societal concerns. Also includes methods to collect, analyze, and use traffic data. Prerequisite:
CVEG 3413 or graduate standing. (Typically offered: Irregular)

CVEG 5443. Data Analysis and Machine Learning. 3 Hours.
The purpose of this course is to provide students with a solid background in the application of common statistical/econometric analysis techniques and related statistical modeling. This course emphasizes the empirical application of statistical techniques, but underlying theories and their limitations will also be discussed and simple derivations will be performed in class. The class will focus on applications of modeling techniques through the use of technical computing software including Matlab and KNIME. Students from all areas of engineering and other broad disciplines are welcome. Prerequisite: Graduate Standing. (Typically offered: Spring)

\section*{CVEG 5453. Production and Construction of Pavement. 3 Hours.}

The life cycle of a pavement can be seen in five stages: 1) material selection, 2) structural design, 3) production and construction, 4) the life of the pavement, and 5) the end of the pavement's life. This course will focus on the production and construction of pavement, but will provide a brief overview of the first, second, fourth, and fifth stages as well. Three different types of pavements will be explored: 1) unbound granular material, 2) flexible pavement (asphalt concrete), and 3) rigid pavement (Portland cement concrete). Prerequisite: Graduate Standing. (Typically offered: Irregular)

\section*{CVEG 5463. Transportation Modeling. 3 Hours.}

The use of mathematical techniques and/or computer software to model significant transportation system attributes. May compare model results with actual measured traffic attributes, using existing data sources and/or collecting and analyzing field data. Pre- or Corequisite: Lab component. Prerequisite: Graduate standing. (Typically offered: Irregular)

CVEG 5473. Transportation System Characteristics. 3 Hours.
Introduction to the fundamentals of traffic engineering and transportation networks. In the first part, students will become familiar with traffic engineering studies, traffic flow theory, traffic control devices, traffic signals, capacity, and level of service analysis of freeways and urban streets. The second part of this course will introduce the basic concepts of transportation network analysis and explore some applications. Prerequisite: CVEG 3413 or graduate standing. (Typically offered: Irregular)

CVEG 5493. Pavement Maintenance and Rehabilitation. 3 Hours.
The life cycle of a pavement can be seen in five stages: 1) material selection, 2) structural design, 3) production and construction, 4) the life of the pavement, and 5) the end of the pavement's life. This course will focus on the life of roadway pavements and the end of the pavement's life, but will provide a brief overview of the first, second, and third stages as well. Three different types of pavements will be explored:1) unbound granular material, 2) flexible pavement (asphalt concrete), and 3 ) rigid pavement (Portland cement concrete). Prerequisite: Graduate Standing. (Typically offered: Irregular)

\section*{CVEG 5503. Construction Safety. 3 Hours.}

Construction industry safety management systems, practices, and research to prevent injuries on work sites. Roles, responsibilities, and interaction of construction industry participants in safety management. OSHA organization, regulation framework, and resources. Safety program procedures and practices associated with positive safety performance outcomes. Total cost of injuries to include personal, direct/indirect costs, and workers compensation insurance. Prerequisite: Graduate Standing. (Typically offered: Fall, Spring and Summer)

CVEG 5513. Construction Scheduling. 3 Hours.
Develop an understanding of modern scheduling techniques used for the management of construction projects. Learn the underlying logical principles calculation methods, and presentation formats for PDM, the most prevalent technique. Load schedules with resources and costs to enable leveling, smoothing, and earned value analysis. Learn to update schedules for actual progress, identify problems, and compress or crash activities. Prerequisite: Graduate Standing. (Typically offered: Fall, Spring and Summer)

\section*{CVEG 5523. Construction Productivity. 3 Hours.}

This course introduces the student to construction industry productivity measurement, management practices, planning processes, and work methods to improve labor productivity on project sites. Factors that influence labor productivity such as resource supply chain, rework, changes, craft labor motivation, and the workface environment are included. Roles, responsibilities, and interaction of construction industry participants in productivity management will be examined. Participants will learn construction productivity improvement program tools associated with improved productivity performance including work sampling and activity analysis. Prerequisite: Graduate Standing. (Typically offered: Fall, Spring and Summer)

CVEG 5533. Legal Aspects of Construction. 3 Hours.
Students will identify legal issues in the course of a construction project and learn to determine when and where they or their employers or clients need legal advice. The course covers the most common legal considerations and disputes that arise in the construction and design industries from the perspectives of different industry participants, and it explores the most important contractual terms commonly used in construction industry agreements. The individual lessons address basic aspects of the legal system, liability for negligence and professional malpractice, and a full range of legal risk allocation and risk management strategies, relating to: bidding and proposal practices; project delivery systems; contracting practices; insurance; surety bonds; pricing, scheduling, and payment disputes; contract administration; legal remedies; and alternative dispute resolution methods. Prerequisite: Graduate Standing. (Typically offered: Fall, Spring and Summer)

\section*{CVEG 5543. Sustainability in Construction Management. 3 Hours.}

Sustainability in Construction Management will explore traditional concepts of construction management through the lens of sustainability. Topics covered will include elements of sustainable design and construction, sustainable project requirements and management, choosing materials and production, sustainability design and construction economics, understanding specifications, community participation, waste management, regulatory agencies, and worker safety and roles. These topics will be viewed through the lens of the three pillars of sustainability: economics, environmental, and social. Prerequisite: Graduate Standing. (Typically offered: Fall, Spring and Summer)

CVEG 5553. Risk and Financial Management in Construction. 3 Hours.
This course prepares students to understand the differences between financial management in a construction company versus financial management in other industries. The course will also teach students how to account for a construction company's financial resources. The students will then learn how to quantitatively analyze financial decisions. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

\section*{CVEG 5563. Building Information Modeling (BIM) for Design and Construction.} 3 Hours.
This course provides students with a comprehensive overview of building information modeling (BIM) within the context of multiple project delivery methods and from the different perspectives of owners, architects/engineers and contractors/ subcontractors. The course includes "hands-on" experiences using BIM software (Autodesk Revit) and will provide students with a basic working knowledge of the software. The curriculum also covers a systems perspective of how BIM works in different contractual relationships and workflows. Finally, the course will provide students with an understanding of how to implement BIM for companies that have not already done so. The course culminates with a student-modeled project in BIM, in conjunction with a real-world example in how your company can implement BIM. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

\section*{CVEG 5573. Construction Project Management. 3 Hours.}

Construction project management introduces students to the full life cycle of construction projects from feasibility through completion and commissioning. Students are given an overview of the diverse construction industry, general project management concepts, and the specific application of those principles to complete construction projects. Standard construction industry processes and procedures such as cash flow and payment scheduling, change orders, project acceleration, coordination and communication, record keeping are depicted. Prerequisite: Graduate Standing. (Typically offered: Spring)

CVEG 5583. Heavy Construction Equipment Management. 3 Hours.
The course covers estimating equipment ownership, operating cost, and how to determine economic life and replacement policy as well as how to schedule a production-driven, equipment-intensive project that achieves target production rates and meets target equipment-related unit costs and profits. The course will cover material selection based on productivity and OSHA safety regulations. While this class is in the heavy civil track within the department, both horizontal and vertical construction equipment will be discussed. Prerequisite: Graduate Standing. (Typically offered: Summer)

\section*{CVEG 5593. Cost Management: Ownership. 3 Hours.}

Study of cost management procedures applicable to the building process from the conceptual phase through owner operations, including conceptual estimating, converting estimates to budgets, progress measurement, project cost analysis and control, value engineering, and life-cycle costing. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

CVEG 5603. Advanced Building Information Modeling (BIM) for Design and Construction. 3 Hours.
This course will cover the fundamental principles and practices of using building information models for model management, including quantification, scheduling, and coordination. The course will also present the use of advanced information systems in the construction context, such as parametric modeling, creating infrastructure models, and reality capture. The goal of this course is to develop the students' understanding of how cloud-connected tools, collaboration tools, and advanced construction technologies can transform and improve the construction management process to aid in project success. Prerequisite: Must be a student in the CSMG masters degree program. (Typically offered: Fall and Summer)

CVEG 562V. Independent Study. 1-6 Hour.
Fundamental and applied research. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

CVEG 563V. Special Problems. 1-6 Hour.
Special problems in CVEG. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CVEG 5703. Environmental Regulations and Permits. 3 Hours.
The purpose of this course is to introduce students to selected environmental regulations, Federal and State Agencies and to present an overview of the Permitting Process. The course primarily addresses NPDES wastewater and storm water rules and requirements but will also touch on Air Quality, Environmental Impact and impact statements as well as OSHA regulations. This course covers compliance and how you attain compliance. Prerequisite: Graduate standing and Department consent. (Typically offered: Fall and Spring)

CVEG 5713. Low Impact Development. 3 Hours.
To understand the purposes and aspects of low impact design and to apply LID principles to storm water management and site development. Prerequisite: Graduate Standing. (Typically offered: Fall, Spring and Summer)

CVEG 5863. Fundamentals of Sustainability in Civil Engineering. 3 Hours.
Qualify and quantify the economic, environmental, societal and engineering drivers behind sustainability in Civil Engineering. Justification of the feasibility and benefits of sustainability in environmental, geotechnical, structural and transportation through verbal and written communications. Students cannot receive credit for both CVEG 4863 and CVEG 5863. Prerequisite: Graduate standing or instructor consent. (Typically offered: Irregular)
CVEG 5903. Seismic Steel Building Design. 3 Hours.
The aim of this course is to give students the ability to analyze and design steel systems and components for extreme lateral loads induced by earthquakes. Focus will be placed on: basic theory of dynamic response and application of seismic design provisions; understanding of lateral load paths in structural steel systems; and the analysis and design of common steel seismic systems and components. Prerequisite: Graduate standing and Department consent. (Typically offered: Irregular)

\section*{CVEG 5913. CFD for Wind Engineering. 3 Hours.}

The goal of this course is to apply the Computational Fluid Dynamics (CFD) method to wind engineering problems. This is a unique class which needs an understanding of basic fluid mechanics, numerical techniques, wind engineering, turbulence, structural dynamics, fluid structure interaction (FSI) effect etc. Only an introduction to CFD is made using 1D, 2D and 3D problems. The course concludes with a brief discussion on advanced topics. Prerequisite: Graduate Standing. (Typically offered: Irregular)

CVEG 5953. Fundamentals of Fracture and Fatigue in Structures. 3 Hours.
The course will cover the concepts of linear-elastic, elastic-plastic and timedependent Fracture Mechanics as applied to fracture in a variety of materials, structures, and operating conditions. The examples will include fracture in large components such as aircraft, bridges and pressure vessels and also in bones and in soft materials and human tissue. Prerequisite: Graduate standing in Civil, Mechanical or Biomedical Engineering or consent of the instructor. (Typically offered: Fall)
This course is cross-listed with BMEG 5953, MEEG 5953.
CVEG 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CVEG 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{Classical Studies (CLST)}

\section*{Courses}

CLST 1003. Introduction to Classical Studies: Greece. 3 Hours.
An introduction to the world of Ancient Greece, from the Trojan War to Alexander the Great. Progresses chronologically, focusing on the literary, artistic, political, and philosophical ideas of the Greeks. Who were they and how are we like them? (Typically offered: Fall Odd Years)

CLST 1003H. Honors Introduction to Classical Studies: Greece. 3 Hours. Honors. Prerequisite: Honors candidacy. (Typically offered: Fall Odd Years) This course is equivalent to CLST 1003.

CLST 1013. Introduction to Classical Studies: Rome. 3 Hours.
A multi-faceted introduction to Roman culture, focusing on the literature, philosophy, architecture, history, art and archeology. Source material to be read in English. Lectures liberally illustrated with slides. (Typically offered: Spring Even Years)

\section*{CLST 2013. Sport in Ancient Greece and Rome. 3 Hours.}

Explores the meaning of ancient sport in its Greek and Roman contexts as well as the reception and transformation of these cultural meanings in sports today. Includes a look at sports outside Western traditions, focusing especially on indigenous forms of sport in the Americas. Prerequisite: ENGL 1023 or equivalent. (Typically offered: Fall)

\section*{CLST 2323. Greek and Roman Mythology. 3 Hours.}

A study of the stories, figures, and motifs in the mythology of Greece and Rome. Prerequisite: ENGL 1013 and ENGL 1023. (Typically offered: Irregular)

\section*{CLST 3003. Special Topics in Classical Studies. 3 Hours.}

Close examination of subject matter not presented in regularly offered CLST courses. May be repeated for different topics. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
CLST 3003H. Honors Special Topics in Classical Studies. 3 Hours.
Close examination of subject matter not presented in regularly offered CLST courses. May be repeated for different topics. Prerequisite: Honors standing. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit. This course is equivalent to CLST 3003.

CLST 3013. Sex(uality) \& Gender in Ancient Greece and Rome. 3 Hours. Introduces the constructions and representations of love, sex, gender, and sexuality in ancient Greece and Rome by looking at their poetry, prose, and material culture. Explores the diversity of ancient thought on these issues and compares ideas of love and desire to contemporary cultural views. (Typically offered: Irregular)

\section*{CLST 3013H. Honors Sex(uality) \& Gender in Ancient Greece and Rome. 3} Hours.
Introduces the constructions and representations of love, sex, gender, and sexuality in ancient Greece and Rome by looking at their poetry, prose, and material culture. Explores the diversity of ancient thought on these issues and compares ideas of love and desire to contemporary cultural views. Prerequisite: Honors standing. (Typically offered: Irregular)
This course is equivalent to CLST 3013.
CLST 3023. Ancient Greek and Roman Theatre. 3 Hours.
Explains what went on in performance spaces, how such performances reflected the ideas and social constructs of the times, and what such observations can teach us about human interactions, history, and attitudes. (Typically offered: Irregular)

\section*{CLST 3033. Non-Binary Rome. 3 Hours.}

Suspends the assumption of a binary Rome and explores the consequences for how we interpret Roman lives, using a wide range of evidence and theory to pursue the possibility of a non-binary Rome. Prerequisite: ENGL 1013 and ENGL 1023, or equivalent. (Typically offered: Irregular)

\section*{CLST 399VH. Honors Course Classical Studies. 1-6 Hour.}

CLST honors thesis projects or CLST honors study abroad programs. Prerequisite: Junior standing. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

\section*{CLST 4003H. Honors Classical Studies Colloquium. 3 Hours.}

Covers a special topic or issue in classical studies. Appropriate for honors program students and students pursuing classical studies. May be repeated when the content is changed. Prerequisite: Junior standing. (Typically offered: Spring) May be repeated for up to 9 hours of degree credit.

\section*{CLST 4413. Greek Art and Archaeology. 3 Hours.}

Greek Art and Archaeology focuses on how visual and material culture shaped and were shaped by Greek society (religion, politics, military, economy, gender, etc.) from the Bronze Age through the Hellenistic period. Masterpieces of Greek art are analyzed alongside the material remains of everyday Greeks in civic and domestic spaces. (Typically offered: Spring; Summer Odd Years)
This course is cross-listed with ARHS 4413.

\section*{CLST 4413H. Honors Greek Art and Archaeology. 3 Hours.}

Greek Art and Archaeology focuses on how visual and material culture shaped and were shaped by Greek society (religion, politics, military, economy, gender, etc.) from the Bronze Age through the Hellenistic period. Masterpieces of Greek art are analyzed alongside the material remains of everyday Greeks in civic and domestic spaces. (Typically offered: Spring; Summer Odd Years)
This course is cross-listed with CLST 4413, ARHS 4413.
CLST 4423. Roman Art and Archaeology. 3 Hours.
Roman Art and Archaeology focuses on how visual and material culture shaped and were shaped by Roman society (religion, politics, economy, gender, ethnicity, etc.) from the Iron Age through the Late Antique period. We encounter famous masterpieces, but also the material remains of everyday Romans in civic and domestic spaces. (Typically offered: Spring and Summer Even Years) This course is cross-listed with ARHS 4423.

\section*{Clinton School of Public Service (CSPS)}

\section*{Communication (COMM)}

\section*{Courses}

COMM 1003. Basic Course in the Arts: Film Lecture. 3 Hours.
Introduction to film as entertainment and art. How to look at film through a study of composition, lighting, editing, sound and acting. Lectures and viewing time. (Typically offered: Fall, Spring and Summer)

COMM 1003H. Honors Basic Course in the Arts: Film Lecture. 3 Hours. Introduction of film as entertainment and art. How to look at a film through a study of composition, lighting, editing, sound and acting. Lectures and viewing time. Corequisite: Drill component. (Typically offered: Fall) This course is equivalent to COMM 1003.

\section*{COMM 1023. Communication in a Diverse World. 3 Hours.}

Introductory course that focuses on the skills and understandings associated with competent communication in a diverse society within interpersonal, group, organizational and intercultural communication contexts. (Typically offered: Fall and Spring)

COMM 1023H. Honors Communication in a Diverse World. 3 Hours. Introductory course that focuses on the skills and understandings associated with competent communication in a diverse society within interpersonal, group, organizational and intercultural communication contexts. Prerequisite: Honors standing. (Typically offered: Fall)
This course is equivalent to COMM 1023.

\section*{COMM 1233. Media, Community and Citizenship. 3 Hours.}

Examines theory and research on how messages are processed, meanings constructed, communities formed and maintained through interaction with the media. Focus is on critical citizenship and media literacy in the context of the cognitive, social, cultural, political, and economic consequences of increasingly networked media systems. (Typically offered: Fall and Spring)

COMM 1233H. Honors Media, Community and Citizenship. 3 Hours.
Examines theory and research on how messages are processed, meanings constructed, communities formed and maintained through interaction with the media. Focus is on critical citizenship and media literacy in the context of the cognitive, social, cultural, political, and economic consequences of increasingly networked media systems. Prerequisite: Honors standing. (Typically offered: Spring) This course is equivalent to COMM 1233.

COMM 1313. Public Speaking (ACTS Equivalency \(=\) SPCH 1003). 3 Hours. Application of the communication techniques needed to organize and deliver oral messages in a public setting. Emphasis given to theory and practice of message strategies and preparation, audience analysis, presentational skills including multimedia support, speech criticism, and the listening process. (Typically offered: Fall, Spring and Summer)

COMM 1313H. Honors Public Speaking. 3 Hours.
Application of the communication techniques needed to organize and deliver oral messages in a public setting. Emphasis given to theory and practice of message strategies and preparation, audience analysis, presentational skills including multimedia support, speech criticism, and the listening process. (Typically offered: Fall, Spring and Summer)
This course is equivalent to COMM 1313.
COMM 2103. Interviewing. 3 Hours.
A study in the theory and practice of methods in selected interview settings, with an emphasis on interviewing through research, journalism, employment, and historical perspectives. (Typically offered: Fall)

\section*{COMM 2303. Advanced Public Speaking. 3 Hours.}

Continuing study of the invention and adaptation or oral discourse to the needs of listeners. Consideration of the problems of communication in platform presentation. Prerequisite: COMM 1313. (Typically offered: Fall, Spring and Summer)

\section*{COMM 2323. Interpersonal Communication. 3 Hours.}

Personal and interpersonal factors affecting communication in everyday life. Emphasis upon ways in which interpersonal perception, physical environment, semantic choices, and nonverbal cues affect communication primarily in the context of work, family, and other personal experiences. (Typically offered: Fall, Spring and Summer)

COMM 2333. Introduction to Communication Research. 3 Hours.
Introduction to the basic assumptions underlying communication inquiry; resources for and methods of data collection in communication research; and techniques for organization, interpretation, reporting, and evaluation of communication research. (Typically offered: Fall and Spring)

COMM 2343. Introduction to Small-Group Communication. 3 Hours.
An introduction to procedures used in exchanging information, solving problems, determining policies, and resolving differences in committees and other small groups. Prerequisite: COMM 1313. (Typically offered: Fall, Spring and Summer)

COMM 2353. Argumentation and Advocacy. 3 Hours.
An introduction to argumentation theory and practice, with concern for analyzing and producing logical, effective, and ethical public discourse. Examines contemporary models for analyzing argument, covers the common types of arguments and ways to evaluate their strengths and weaknesses, and introduces ways to test arguments for validity and fallacies. (Typically offered: Fall and Spring)

COMM 2613. Nonverbal Communication. 3 Hours.
Creates an understanding of the functions of nonverbal cues operating in human communication processes and develops familiarity with recent research in the field of nonverbal communication. (Typically offered: Irregular)

COMM 2813. Introduction to Mediated Communication. 3 Hours.
Introduction to media and media industries, particularly the social and cultural impact of their economic and regulatory structures. Emphasis on the historical development of media, business practices of media organizations, critical analysis of media messages, and cultural functions of the media. (Typically offered: Fall and Spring)

COMM 298V. Topics in Communication. 1-3 Hour.
Topics in communication not represented in other lower division courses. Prerequisite: Completion of at least 3 hours of COMM coursework. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{COMM 3153. Visual Communication. 3 Hours.}

An examination of visual communication with emphasis on the understanding, manipulation, and effects of these messages on individuals and society. Explores visual messages in contexts such as film, television, advertising, social media, and the Internet by incorporating humanistic and social science theory and research. Prerequisite: COMM 2813. (Typically offered: Spring)

COMM 3173. Introduction to Linguistics. 3 Hours.
Introduction to language study with stress upon modern linguistic theory and analysis. Data drawn from various languages reveal linguistic universals as well as phonological, syntactic, and semantic systems of individual languages. Related topics: language history, dialectology, language and its relation to culture and society, and the history of linguistic scholarship. Prerequisite: Junior standing, COMM 1313 and COMM 2333. (Typically offered: Irregular)
This course is cross-listed with ENGL 3173, WLLC 3173.

\section*{COMM 3253. The Latinx Image in Media. 3 Hours.}

Exploration of the image and experience(s) of Latinx populations in the United States as represented in visual and print media, including film, television, news journalism, and art. Topics related to US Latinx history, culture, politics, and socioeconomics will be examined in the analyses of these mediated depictions. Prerequisite: COMM 1003. (Typically offered: Irregular)
This course is equivalent to ENGL 3253.
COMM 3263. African Americans in Film. 3 Hours.
A survey of the history of images of African Americans in film, especially as these images are examined in the context of stereotypical renditions and/or realistic representations of African American experiences. Issues of African American history, culture, and socio-political context will be addressed in the analyses of these films. Prerequisite: COMM 1003. (Typically offered: Irregular)
This course is cross-listed with AAST 3263, ENGL 3263, JOUR 3263.
COMM 3273. African Americans in Documentary Film. 3 Hours.
Exploration of the African-American image and experience in the context of time, historical record and varying production viewpoints from diverse documentarians. African-American history, culture and socio-political context are addressed in the analyses of these documentary films from the perspectives of mainstream media, independent filmmakers and minority documentarians Prerequisite: Junior or senior standing. (Typically offered: Spring)
This course is cross-listed with JOUR 3273, AAST 3273.

\section*{COMM 3283. U.S. Latinos and Latinas through Film. 3 Hours.}

This course will examine the portrayal of U.S. Latinos and Latinas in Hollywood films and how those images have changed over time. While coverage will extend to the early years of the twentieth century, the chosen films will place particular emphasis on the century's second half, from the Cold War to the modern day. (Typically offered: Spring)
This course is cross-listed with HIST 3283, LALS 3283.
COMM 3343. Contemporary Communication Theory. 3 Hours.
Study of the nature of the communication process as it is reflected in the individual, in interpersonal settings, in one-to-many situations, and in the mass media. Prerequisite: COMM 2323. (Typically offered: Spring)

\section*{COMM 3373. Leadership Communication. 3 Hours.}

An analysis of leadership as a discursive process, focusing on how leadership emerges and is enacted on a daily basis through communication-related behaviors. Prerequisite: COMM 2343 or permission of instructor. (Typically offered: Irregular)

\section*{COMM 3383. Persuasion. 3 Hours.}

Introduction to theories of persuasion with emphasis on application and effect. Prerequisite: COMM 1313 and COMM 2333, or instructor permission. (Typically offered: Fall, Spring and Summer)

\section*{COMM 3423. Science Fiction Film. 3 Hours.}

This class concentrates on how science fiction in various communication media influences and is, in turn, influenced by broad features of cultural life. The class considers the impact of science fiction on science fact, the military, space travel, religion, race, gender, social class, education, politics, technology, and fashion styles. Prerequisite: COMM 1003. (Typically offered: Fall)

\section*{COMM 3433. Family Communication. 3 Hours.}

Study of the nature, functions, and management of communication patterns in the family. Focus is on understanding routine interpersonal interactions, conflict patterns, authority structures, and decision-making processes within the context of the contemporary family. Prerequisite: COMM 2323. (Typically offered: Fall)
COMM 3443. Introduction to Rhetorical Theory. 3 Hours.
Interpretive-critical study of rhetoric in public contexts. Prerequisite: COMM 1313 or COMM 2353. (Typically offered: Fall)

\section*{COMM 3503. Popular Communication and Culture. 3 Hours.}

This course is an introduction to basic theories and topics of Popular Communication and Culture studies. The course will emphasize understanding popular media communication forms. Prerequisite: COMM 2813. (Typically offered: Summer)

COMM 3673. Mediated Communication. 3 Hours.
Focuses on media messages and their social/cultural effects. Includes a critical examination of media institutions and the ways they vie for audiences. Other topics include the ways people construct meaning from messages, media's influence on attitudes, media's role in cultural life, and audiences as critical consumers of media. Prerequisite: COMM 2813. (Typically offered: Fall)

COMM 3703. Organizational Communication. 3 Hours.
An introduction to the theory, processes, and management of communication in organizations, with opportunities for simulated application. Prerequisite: COMM 2343. (Typically offered: Fall)

\section*{COMM 3763. Health Communication. 3 Hours.}

Examines communication within health care organizations and teams. Issues may include patient-provider communication, communication among health care professionals, negative consequences of poor communication in health care delivery, and the use of technology in health-related information dissemination and campaigns. Prerequisite: COMM 1313 and COMM 2333. (Typically offered: Fall)

\section*{COMM 3803. Survey of Social Media. 3 Hours.}

Surveys research on social media, focusing on the potential cognitive, social, cultural, political, and/or economic consequences of social media and on strategies for engaging with and through social media to promote personal, social and civic goals. Pre- or Corequisite: COMM 2813. (Typically offered: Spring)

\section*{COMM 3883. Rhetoric of Social Movements. 3 Hours.}

Study of the functions of rhetoric as it appears in the context of social movements such as American independence, women's equality, civil rights, populism, and new conservatism. Prerequisite: COMM 1313 or COMM 2353. (Typically offered: Irregular)

\section*{COMM 3923H. Honors Colloquium. 3 Hours.}

Treats a special topic or issue, offered as part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in communication). (Typically offered: Irregular) May be repeated for degree credit.
COMM 3933. Special Topics in Film Studies. 3 Hours.
Topics in film studies which are not usually presented in depth in regular courses. Prerequisite: COMM 1003. (Typically offered: Irregular) May be repeated for degree credit.

COMM 3943. Special Topics in Interpersonal Communication. 3 Hours.
Topics in interpersonal communication which are not usually presented in depth in regular courses. Prerequisite: COMM 2323. (Typically offered: Irregular) May be repeated for degree credit.

\section*{COMM 3953. Special Topics in Mediated Communication. 3 Hours.}

Topics in mediated communication which are not usually presented in depth in regular courses. Prerequisite: COMM 2813. (Typically offered: Irregular) May be repeated for degree credit.
COMM 3963. Special Topics in Organizational Communication. 3 Hours.
Topics in organizational communication which are not usually presented in depth in regular courses. Prerequisite: COMM 2343. (Typically offered: Irregular) May be repeated for degree credit.

COMM 3973. Special Topics in Rhetoric and Public Communication. 3 Hours. Topics in rhetoric and public communication which are not usually presented in depth in regular courses. Prerequisite: COMM 2353. (Typically offered: Irregular) May be repeated for degree credit.
COMM 3983. Special Topics. 3 Hours.
Communication topics which are not usually presented in depth in regular courses. Prerequisite: COMM 1313 and COMM 2333. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
COMM 3983H. Honors Special Topics. 3 Hours.
Communication topics which are not usually presented in depth in regular courses. Prerequisite: COMM 1313, COMM 2333 and honors standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
This course is equivalent to COMM 3983.
COMM 3991H. Honors Course in Communication Research. 1 Hour.
The Honors Course in Communication is the student's first step toward developing an honors thesis project. The course is designed to facilitate the exploration of potential thesis topics, selection of a viable study for the thesis, and the conceptualization of that study. Prerequisite: Honors candidacy. (Typically offered: Fall and Spring)

\section*{COMM 4103. Communicating Body Image. 3 Hours.}

This course examines the hidden assumptions about body image as it relates to the intersections of race, class, gender, and other major identity markers. This course is designed a) to facilitate the acquisition of systematic knowledge by applying theories to critically analyze media images and messages, b) to stimulate student interest in feminist media studies as an academic discipline, and c) to promote body neutrality of self and diverse others in a media-saturated society. Prerequisite: COMM 2813. (Typically offered: Fall)
This course is cross-listed with AAST 4103.

\section*{COMM 4113. Legal Communication. 3 Hours.}

Examines communication processes in the legal environment and focuses on communication skills and behaviors among judges, attorneys, litigants, and jurors. Particular attention will be given to verbal strategies and nonverbal messages related to interviews, negotiation, mediation, and litigation and to the rhetorical functions of legal pleadings and judicial opinions. Prerequisite: COMM 1313 or COMM 2353. (Typically offered: Irregular)

\section*{COMM 4143. American Film Survey. 3 Hours.}

A survey of major American film genres, major directors and films that have influenced the development of motion pictures. Prerequisite: COMM 1003 or permission of instructor. (Typically offered: Fall)
This course is cross-listed with ENGL 4143.

\section*{COMM 4283. Communication in Contemporary Society. 3 Hours.}

An examination of research and theory on the process and effects of communication in modern society. Prerequisite: COMM 1313 and COMM 2333 or permission of instructor. (Typically offered: Irregular)
COMM 4323. Communication and Conflict. 3 Hours.
Study of the processes, effects, and managements of communicative conflict, including a consideration of conflict styles, power, goals, tactics, assessment, selfintervention and third-party intervention. Prerequisite: COMM 2323 or permission of instructor. (Typically offered: Fall)

COMM 4333. Communication and Gender. 3 Hours.
Study of the nature, construction, functions, and effects of gender and genderrole stereotypes related to verbal and nonverbal communication, small-group and organizational interaction, and mass mediated images in contemporary culture. Prerequisite: COMM 2323 or permission of instructor. (Typically offered: Fall)

COMM 4343. Intercultural Communication. 3 Hours.
Study of intercultural communication skills, intercultural issues and their impact at home and abroad, and cross-cultural comparisons of communication phenomena from a variety of theoretical perspectives. Prerequisite: COMM 2323. (Typically offered: Spring)

\section*{COMM 4353. American Public Address. 3 Hours.}

Historical and critical study of the leading American speakers, their speeches, the issues with which they were identified. Lectures, discussion, reports, and critical papers. Prerequisite: COMM 1313 or COMM 2353 or instructor permission. (Typically offered: Irregular)

\section*{COMM 4363. Gender, Race and Power. 3 Hours.}

Examines how communication shapes gender, race, sexuality, and power. Rather than focusing exclusively on interpersonal communication, this course looks at theories of power that shape institutional macro communication. Prerequisite: COMM 2353. (Typically offered: Irregular)
This course is cross-listed with AAST 4863.
COMM 4373. Political Communication. 3 Hours.
Study of the nature and function of the communication process as it operates in the political environment. Prerequisite: COMM 1313 and COMM 2333. (Typically offered: Spring Even Years)
This course is cross-listed with PLSC 4373.
COMM 4383. Rhetoric of the Modern American Presidency. 3 Hours.
A study of the increasing reliance of contemporary presidents on public persuasion through rhetorical discourse. Prerequisite: COMM 1313 or COMM 2353. (Typically offered: Irregular)
COMM 4393. Freedom of Speech: Cases \& Issues. 3 Hours.
Study of philosophy, cases, and issues relevant to the first amendment right to the free expression, with focus on issues relevant to internal security, obscenity, pornography, slander, and the regulation of communication. Prerequisite: COMM 1313 and COMM 2333. (Typically offered: Irregular)
COMM 4423. Disaster and Risk Communication. 3 Hours.
Examines the role of public communication efforts across all phases of a disaster with an emphasis on the use of risk communication theory to inform disaster preparedness campaign message design and response to media inquiries immediately following disasters. Prerequisite: COMM 2343 or instructor consent. (Typically offered: Fall and Spring)

\section*{COMM 4433. Community Resilience. 3 Hours.}

Explores communication systems, community relationships, and strategic communication processes that constitute community resilience. Introduces various methodological approaches to assessing community resilience in order to develop communication-based interventions that promote belonging, transformative potential, and social capital. Prerequisite: COMM 2343 or instructor permission. (Typically offered: Fall)

\section*{COMM 4613. Rhetoric of American Women. 3 Hours.}

Examines the social and cultural assumptions that have limited the role of women in public communication. Focus is on the rhetorical biographies of selected women and their arguments on important social and political issues. Prerequisite: COMM 1313 or COMM 2353. (Typically offered: Irregular)

\section*{COMM 4633. History and Development of International Film I. 3 Hours.}

A critical survey of international film as a distinctive art form and as a medium of expression and communication with attention given to films and cinema from its origins to 1975. Prerequisite: COMM 1003. (Typically offered: Irregular)

\section*{COMM 4643. Environmental Communication. 3 Hours.}

Explores how communication is used by individuals, corporations, and governments to shape public debates about environmental issues. Topics include rhetorical strategies, the publics' right to information and input, dispute resolution techniques, advocacy campaigns, and green marketing. Prerequisite: COMM 1313 and COMM 2333 or permission of instructor. (Typically offered: Spring)

COMM 4653. International Film II. 3 Hours.
A critical survey of international film as a distinctive art form as a medium of expression and communication with attention given to films and cinema from 1976 to the present. Prerequisite: COMM 1003. (Typically offered: Irregular)

\section*{COMM 4683. Documentary Film. 3 Hours.}

A study and analysis of the documentary film as a discrete film form and as an important contribution to the international cinematic scene. Prerequisite: Advanced standing. Prerequisite: COMM 1003. (Typically offered: Fall)

\section*{COMM 4733. Reel Women. 3 Hours.}

An examination of films made for, about, and/or by women with the aim of better understanding and centralizing issues pertinent to women's daily lives. Prerequisite: COMM 1003. (Typically offered: Fall)

\section*{COMM 4743. Representational Issues in Film. 3 Hours.}

An examination of the varying ways that race and ethnicity, gender, sexual orientation, gender identity, class, (dis)ability, and age are represented in and by film - both historically and culturally. Prerequisite: COMM 1003. (Typically offered: Spring)

\section*{COMM 4763. Health Communication Campaigns. 3 Hours.}

Canvasses the theoretical frameworks used in the conceptualization of communication campaigns focused on health information dissemination and the purposes these campaigns serve. Students participate in a service learning project by defining campaign goals; identifying, segmenting, and assessing target audiences; and designing messages for multi-mediated health campaigns. (Typically offered: Spring Odd Years)

\section*{COMM 4773. Treatment of Native Americans in Film. 3 Hours.}

This course compares the treatment of Native Americans in film with how representatives of this group identify themselves. Particular attention is paid to how motion pictures focusing on Native Americans produced by indigenous filmmakers compare to treatments of this people produced by Hollywood and others. Prerequisite: COMM 1003 or instructor consent. (Typically offered: Irregular)

COMM 4803. Seminar in Social Media. 3 Hours.
This class encourages in depth examination of contemporary theory and research on the potential effects of social media on cognitive, social, cultural, political, affective, and economic structures. Focus is on critical thinking and contextualization of social media. Pre- or Corequisite: COMM 2813. (Typically offered: Spring Even Years)

COMM 4823. Children and Media. 3 Hours.
An in-depth examination of children's use of media and the effects of media content on child and adolescent development. Topics may include violence and sex in media, commercialism, and new media. Prerequisite: COMM 2813. (Typically offered: Spring Odd Years)

\section*{COMM 4843. Computer-Mediated Communication. 3 Hours.}

Provides an in depth consideration of the nature of computer-mediated communication by examining its use and effects in interpersonal, work, educational, and societal contexts. Prerequisite: COMM 2813 or instructor permission. (Typically offered: Spring)

COMM 4863. Seminar in Media. 3 Hours.
Research/discussion of contemporary issues in media. Emphasis on the economic and social impact of advertising, news, censorship, programs directed toward children, portrayals of women and minorities, future trends in media technologies, and analysis of the changing media landscape. Prerequisite: COMM 2813 or instructor permission. (Typically offered: Spring)

COMM 4873. International Communication and Globalization. 3 Hours.
Examines aspects of international communication and the impact of globalization on the production, dissemination, and consumption of media technology and messages. Prerequisite: COMM 1313 and COMM 2333. (Typically offered: Irregular) This course is cross-listed with INST 4873.

COMM 4883. Television and American Culture. 3 Hours.
Historical and critical study of how television shapes American culture and is shaped by it. Attention will be given to the study of television history, programs and audiences; particularly how race and gender shape content and reception of programming. Prerequisite: COMM 2813. (Typically offered: Fall)

COMM 490V. Special Problems. 1-6 Hour.
Credit arranged. Prerequisite: COMM 2333 and at least 9 hours of COMM coursework. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

\section*{COMM 4913. Internship in Communication. 3 Hours.}

Internship in applied communication within public and private organizations. Prerequisite: COMM 1313 and COMM 2333. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

COMM 499VH. Honors Thesis. 1-3 Hour.
Honors thesis under the direction of a faculty member in the Department of Communication. Pre- or Corequisite: COMM 3991H. Prerequisite: Honors standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{COMM 5111. Colloquium in Communication Research. 1 Hour}

Presentation, evaluation, and discussion of research proposals or on-going research projects. Graduate students are required to register for this course each semester of residence. (Typically offered: Fall and Spring) May be repeated for degree credit.

COMM 5123. Quantitative Research Methods in Communication. 3 Hours.
Emphasizes the assumptions and procedures of social scientific research methods in communication. (Typically offered: Fall)

COMM 5133. Media Processes \& Effects. 3 Hours.
Introduction to scholarly research and theory in media processes and effects. Particular attention will be devoted to the impact of media messages on individuals and societies. Emphasis will be placed on the construction and development of theory. (Typically offered: Fall)

COMM 5163. Introduction to Communication Paradigms. 3 Hours.
Introduces the variety of modes of inquiry used in communication. Reviews the field's history and boundaries. Explores contemporary communication research. (Typically offered: Fall)

\section*{COMM 5173. Qualitative Methods in Communication. 3 Hours.}

Emphasizes the assumptions and procedures of qualitative research methods in the examination of human communication behavior. (Typically offered: Spring)

COMM 5183. Interpretive Research Methods in Communication. 3 Hours.
Examines various perspectives used to analyze and critique various texts (e.g., media programming, speeches). (Typically offered: Spring)

COMM 5193. Seminar in Communication. 3 Hours.
Research, discussion, and papers focus on one of a variety of communication topics including symbolic processes in communication, philosophy of rhetoric, communication education, criticism of contemporary communication, interpersonal communication, organizational communication, and contemporary applications of rhetoric. Maximum credit is 9 semester hours. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

COMM 5323. Seminar in Persuasion. 3 Hours.
Focus is on comparing theoretical accounts of persuasion and research evidence concerning the effects of various factors on persuasion. (Typically offered: Fall)

\section*{COMM 5333. Interpersonal Communication Theory. 3 Hours.}

Survey of the theoretical orientations in interpersonal communication with primary focus on conceptual, philosophical and research issues. (Typically offered: Fall Even Years)

\section*{COMM 5343. Interpersonal Communication. 3 Hours.}

Theory and research concerning the exchange of information and the mutual influencing of behavior among people. Prerequisite: Graduate standing. (Typically offered: Fall)

\section*{COMM 5373. Content Analysis. 3 Hours}

Techniques for observing and analyzing the overt communication behavior of selected communicators. Prerequisite: Graduate standing. (Typically offered: Irregular)

COMM 5383. Seminar in Political Communication. 3 Hours.
Research seminar focusing on selected topics such as candidate imagery, diffusion of political information, or political symbolism. Prerequisite: Graduate standing. (Typically offered: Irregular)

\section*{COMM 5403. Organizational Communication Theory. 3 Hours.}

A seminar on the historical development of theory and research into communication processes occurring within an organizational setting. Lecture, discussion, oral and written reports. Prerequisite: Graduate standing. (Typically offered: Irregular)

COMM 5473. Treatment of Native Americans in Film. 3 Hours.
Compares the treatment of Native Americans in film with how representatives of this group identify themselves. Will also focus on motion pictures relating to Native Americans produced by indigenous filmmakers. (Typically offered: Irregular)

COMM 5503. Communication and Cultural Studies. 3 Hours.
Examinations of the role of communication in modern culture. Emphasis is upon the production and circulation of meanings with society, and special attention is given to the role of popular and mass media in this process. Prerequisite: Graduate standing. (Typically offered: Fall)

\section*{COMM 5653. Feminist Texts and Theories. 3 Hours.}

Explores concepts and ideologies that articulate and define principles of feminism. Attention given to critical and creative works that challenge the centrality of gender in feminist analyses through intersections of race, class, nationality, and sexuality. (Typically offered: Fall Odd Years)
This course is cross-listed with GNST 5653.
COMM 5763. Health Communication. 3 Hours.
Examines the difficulties of effective communication between health care providers and recipients including the following: issues of social support, conveying bad news, cultural issues, and identifying relevant communication skills associated with effective health care provision. Explores medical education models for training in effective patient-provider communication. (Typically offered: Irregular)

COMM 5823. Political Communication. 3 Hours.
Covers contemporary political communication theory and applies them to understand modern political campaigns. Topics covered include the rhetoric of politics, political advertising, the role of the media and public opinion, the impact of new technology, campaign speech genres, political debates, and the role of social identity in presidential campaigns. (Typically offered: Irregular)

COMM 5833. The Rhetoric of the Modern American Presidency. 3 Hours
Study contemporary presidents' reliance on public persuasion, especially in efforts to bypass Congress and accomplish complicated political goals. Explore the origins of the concept of the "rhetorical presidency," specifically how it developed and changed the nature of the executive branch of government. Examine major genres of modern presidential rhetoric illustrating that trend. (Typically offered: Irregular)

\section*{COMM 5843. Legal Communication. 3 Hours.}

Examines communication processes in the legal environment and focuses on communication skills and behaviors among judges, attorneys, litigants, and jurors. Particular attention will be given to verbal strategies and nonverbal messages related to interviews, negotiation, mediation, and litigation and to the rhetorical functions of legal pleadings and judicial opinions. (Typically offered: Irregular)

COMM 5853. American Film Survey. 3 Hours.
A survey of major American film genres, major directors and films that have influenced the development of motion pictures. (Typically offered: Fall and Summer)

COMM 5863. History and Development of International Film I. 3 Hours. A critical survey of international film as a distinctive art form and as a medium of expression and communication with attention given to films and cinema from its origins to 1975. (Typically offered: Irregular)

COMM 5873. History and Development of International Film II. 3 Hours. A critical survey of international film as a distinctive art form and as a medium of expression and communication with attention given to films and cinema from 1975 to the present. (Typically offered: Irregular)

COMM 590V. Special Problems. 1-6 Hour.
Credit by arrangement. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

COMM 5913. Internship in Communication. 3 Hours.
Internship in applied communication within public and private organizations. Prerequisite: 15 hours graduate level communication in residence. (Typically offered: Fall, Spring and Summer)

COMM 5923. Capstone Course in Communication. 3 Hours.
Students organize and synthesize knowledge developed throughout their graduate coursework into a tangible capstone product which becomes part of their professional portfolio. (Typically offered: Fall, Spring and Summer)

COMM 5993. Readings In Cultural Studies. 3 Hours.
Classic and current theoretical approaches to cultural studies. Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular)

COMM 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for degree credit.

\section*{Communication Sciences and Disorders (CDIS)}

\section*{Courses}

CDIS 2253. Introduction to Communicative Disorders. 3 Hours.
An introductory course which surveys the professional interests of speech-language pathology and audiology with specific attention to the general recognition and classification of disorders of speech, language, and hearing, and general trends in rehabilitation. Consideration given to the classroom teacher's involvement in communication disorders. (Typically offered: Fall and Spring)

CDIS 2903H. Honors Introduction to Research in Communication Sciences and Disorders. 3 Hours.
This course introduces students to the research process in the field of communication sciences and disorders. Prerequisite: Acceptance into the COEHP Honors Program and instructor consent. (Typically offered: Spring)

\section*{CDIS 3103. Introduction to Audiology. 3 Hours.}

Introduction to the basic concepts for administering and interpreting hearing tests including the anatomy and physiology of the auditory system, disorders of the ear, and techniques for administering and interpreting basic pure tone threshold tests. Corequisite: PHYS 1023 and PHYS 1021L, PHYS 2013 and PHYS 2011L or CHEM 1073 and CHEM 1071L. Pre- or Corequisite: CDIS 3213. Prerequisite: CDISBS major or departmental consent. (Typically offered: Fall and Spring)

CDIS 3103H. Honors Introduction to Audiology. 3 Hours.
Introduction to the basic concepts for administering and interpreting hearing tests, including the anatomy and physiology of the auditory system, disorders of the ear, and techniques for administering and interpreting basic pure tone threshold tests. Corequisite: PHYS 1023 and PHYS 1021L, PHYS 2013 and PHYS 2011L or CHEM 1073 and CHEM 1071L. Pre- or Corequisite: CDIS 3213. Prerequisite: CDISBS major and honors standing, or departmental consent. (Typically offered: Fall and Spring)

This course is equivalent to CDIS 3103.
CDIS 3123. Normal Phonology and Articulatory Process. 3 Hours.
Analysis of the English speech sounds as a basis for speech improvement; physiological positions and movements; acoustic qualities and transcription in the international phonetic alphabet. Prerequisite: CDISBS major or departmental consent. (Typically offered: Fall)

CDIS 3203. Articulation Disorders. 3 Hours.
A study of the definition, etiology, pathology, and treatment procedures of problems of articulation. Prerequisite: CDIS 3123, CDIS 3213 and CDISBS major or departmental consent. (Typically offered: Spring)

CDIS 3213. Anatomy and Physiology of the Speech Mechanism. 3 Hours. Structure and function of the organic mechanisms responsible for speech and language. Pre or Corequisite: BIOL 1543 and BIOL 1541L or higher. Prerequisite: CDISBS major or departmental consent. (Typically offered: Fall and Spring)

\section*{CDIS 3223. Language Development in Children. 3 Hours.}

Study of typical development of speech and language functions for communicative purposes in children from infancy to early school-age years, including the major components of language as well as the social, cognitive, biological and cultural factors related to language acquisition. Pre- or Corequisite: PSYC 2003.
Prerequisite: CDISBS major or departmental consent. (Typically offered: Fall)
CDIS 3223H. Honors Language Development in Children. 3 Hours.
Study of typical development of speech and language functions for communicative purposes in children from infancy to early school-age years, including the major components of language as well as the social, cognitive, biological, and cultural factors related to language acquisition. Pre- or Corequisite: PSYC 2003. Prerequisite: Honors candidacy and CDISBS major or departmental consent. (Typically offered: Fall)
This course is equivalent to CDIS 3223.
CDIS 3233. Introduction to Clinical Practice. 3 Hours.
An introduction to the various aspects of clinical operations including technical and interpersonal relationship skills necessary for case management and a survey of professional standards. Pre- or Corequisite: COMM 1313, CDIS 3223, and CDIS 3213. Prerequisite: CDISBS major or departmental consent. (Typically offered: Fall and Spring)

\section*{CDIS 3233H. Honors Introduction to Clinical Practice. 3 Hours.}

An introduction to the various aspects of clinical operations including technical and interpersonal relationship skills necessary for case management and a survey of professional standards. Pre- or Corequisite: COMM 1313, CDIS 3223, and CDIS 3213. Prerequisite: Honors standing and CDISBS major or departmental consent. (Typically offered: Fall and Spring)

This course is equivalent to CDIS 3233.

CDIS 3253. Cultural Diversity in Communication Disorders. 3 Hours.
An introduction to various cultures, customs, and professional standards in healthrelated fields that helps to develop intercultural communication skills necessary to manage the increasingly diverse caseloads of health-related professionals. Pre- or Corequisite: COMM 1313. Prerequisite: CDISBS major or departmental consent. (Typically offered: Spring)

CDIS 3901H. Honors Communication Disorders Thesis Tutorial. 1 Hour.
Designed to provide the foundation for the Honors Thesis/Project. Students and faculty tutors work "one-on-one" exploring a specific topic which has been agreed upon by the student and the professor. Prerequisite: Honors candidacy and CDISBS major. (Typically offered: Fall, Spring and Summer)

\section*{CDIS 3923H. Honors Colloquium. 3 Hours.}

Treats a special topic or issue, offered as part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in speech or dramatic art). (Typically offered: Irregular) May be repeated for degree credit.

\section*{CDIS 399VH. Honors Course. 1-6 Hour.}

Honors course. Prerequisite: Junior standing. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

CDIS 4003. Clinical Practicum Undergrad. 3 Hours.
Entry-level training in speech-language clinical practicum activities. This course is taken for satisfactory or unsatisfactory credit. Students are paired with a patient(s) at the UA Speech and Hearing Clinic to provide speech-language therapy while being supervised by a licensed and certified speech-language pathologist. The schedule for this course varies based on patient availability. Students are required to be on campus to provide clinical services (including session preparation) and to complete follow-up meetings with the instructor to discuss clinical practice and paperwork. Prerequisite: Admitted to the Communication Sciences and Disorders (CDISBS) major, CDIS 3213, CDIS 3223 and CDIS 3233, plus satisfactory completion of specific program requirements for admission to clinical practice. (Typically offered: Fall, Spring and Summer)

CDIS 4003H. Honors Clinical Practicum Undergrad. 3 Hours.
Entry-level training in speech-language clinical practicum activities. This course is taken for satisfactory or unsatisfactory credit. Prerequisite: Honors standing, admitted to the Communication Sciences and Disorders (CDISBS) major, CDIS 3213, CDIS 3223 and CDIS 3233, plus satisfactory completion of specific program requirements for admission to clinical practice. (Typically offered: Fall and Spring)
This course is equivalent to CDIS 4003.

\section*{CDIS 4133. Introduction to Aural Rehabilitation. 3 Hours.}

Study of the technique used in the rehabilitation of speech and language problems of the hearing impaired including the role of amplification, auditory training, and speech reading in rehabilitation. Prerequisite: CDIS 3103. (Typically offered: Spring)

CDIS 4183. Clinical Assessment of Speech and Language Disorders. 3 Hours. Study of the basic diagnostic procedures used in speech-language pathology. Emphasis is placed on the clinical processes of assessment, including criteria for test selection, techniques in test administration, and interpretation of test. Pre- or Corequisite: Prior coursework in CDIS and ANTH 1023. Prerequisite: CDISBS major or departmental consent. (Typically offered: Spring)

\section*{CDIS 4213. Introduction to Speech and Hearing Science. 3 Hours.}

Study of the acoustic structure of oral speech and the auditory skills underlying speech perception. Prerequisite: CDIS 3203, CDIS 3213, CDIS 3123 and its lab component and CDISBS major or departmental consent. Pre- or Corequisite: MATH 1203 or higher. (Typically offered: Fall and Spring)

CDIS 4223. Language Disorders in Children. 3 Hours.
Study of disorders of language acquisition and usage in children and adolescents, with emphasis upon the nature, assessment, and treatment of such disorders. Prerequisite: CDIS 3223 and CDISBS major or departmental consent. (Typically offered: Spring)

CDIS 4223H. Honors Language Disorders in Children. 3 Hours.
Study of disorders of language acquisition and usage in children and adolescents, with emphasis upon the nature, assessment, and treatment of such disorders.
Prerequisite: CDIS 3223 and CDISBS major and honors standing or departmental consent. (Typically offered: Spring)
This course is equivalent to CDIS 4223.
CDIS 4253. Neurological Bases of Communication. 3 Hours.
A study of the structures and functions of the central and peripheral nervous systems as they relate to human speech, language, and cognition. Prerequisite: CDIS 3213 and CDISBS major or departmental consent. (Typically offered: Fall)
CDIS 4253H. Honors Neurological Bases of Communication. 3 Hours.
A study of the structures and functions of the central and peripheral nervous systems as they relate to human speech, language, and cognition. Prerequisite: CDIS 3213, honors standing, and CDISBS major or departmental consent. (Typically offered: Fall)
This course is equivalent to CDIS 4253.
CDIS 4273. Communication Behavior and Aging. 3 Hours.
Study of the effects upon communication of normal aspects of the aging process, from early adulthood throughout the lifespan. Changes in speech, language, and hearing functioning are identified; common alterations in communicative disorders commonly associated with advanced age are discussed. Prerequisite: CDISBS major or departmental consent. (Typically offered: Fall)

CDIS 4273H. Honors Communication Behavior and Aging. 3 Hours.
Study of the effects upon communication of normal aspects of the aging process, from early adulthood throughout the lifespan. Changes in speech, language, and hearing functioning are identified; common alterations in communicative disorders commonly associated with advanced age are discussed. Prerequisite: CDISBS major and honors standing, or departmental consent. (Typically offered: Fall) This course is equivalent to CDIS 4273.

CDIS 490V. Special Problems. 1-3 Hour.
Special problems. Prerequisite: Advanced standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

CDIS 498VH. Honors Communication Disorders Thesis/Project. 1-3 Hour. Designed to provide facilitation of the Honors Thesis/Project. Students and faculty work "one-on-one" to complete the honors thesis/project. Prerequisite: Honors candidacy, CDISBS major, and CDIS 3901H. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.
CDIS 5103. Research Methodology in Communication Disorders. 3 Hours. An examination of methods of research in speech-language pathology and audiology and of the use of bibliographic tools. Focuses on purposes and problems of various forms of communication disorders research, procedures and instruments employed, and reporting of research. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5113. Seminar in Early Intervention. 3 Hours.
Study of a family-centered, transdisciplinary approach to early intervention with infants and toddlers at-risk for communication disorders. Topics include early communication development, service delivery in a family context, coordination with other disciplines, legislation mandating services, and providing services to children with multiple disabilities. Prerequisite: CDIS 3223 or equivalent, and graduate standing. (Typically offered: Irregular)

CDIS 5121L. Feeding and Swallowing Disorders Lab. 1 Hour.
Observation and interpretation of techniques used for assessment and remediation of feeding and swallowing disorders in children and adults. Prerequisite: Enrollment in CDISMS program or Instructor Consent. (Typically offered: Spring)
CDIS 5122. Feeding and Swallowing Disorders. 2 Hours.
Study of the etiology, assessment, and remediation of feeding and swallowing disorders in children and adults. Prerequisite: Enrollment in CDISMS program or Instructor Consent. (Typically offered: Spring)

CDIS 5143. Cognitive-Communication Development and Disorders. 3 Hours.
Study of normal cognitive development, the role of communication in this development, and shifts that may occur in conjunction with various speech, language and/or hearing disorders. Prerequisite: CDIS 3223. (Typically offered: Fall)

CDIS 5153. TBI and Right-Hemisphere Disorders. 3 Hours.
Study of the speech and language disorders commonly resulting from traumatic brain injury and right hemisphere disorders. Prerequisite: Enrollment in CDISMS program or instructor consent. (Typically offered: Spring)

CDIS 5163. Seminar in Language Topics. 3 Hours.
Study of selected topics in normal and disordered language acquisition and/ or language use. Implications of current research are reviewed and applied to evaluation and management of language impairment(s). Prerequisite: Graduate standing. (Typically offered: Irregular)

\section*{CDIS 5183. Advanced Clinical Practicum I. 3 Hours.}

Practicum activities in speech-language assessment and intervention. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5203. Introduction to Aural Rehabilitation. 3 Hours.
Study of the technique used in the rehabilitation of speech and language problems of the hearing impaired including the role of amplification, auditory training, and speech reading in rehabilitation. Graduate degree credit will not be given for both CDIS 4133 and CDIS 5203. Prerequisite: CDIS 3103. (Typically offered: Spring)

CDIS 5213. Voice and Resonance Disorders. 3 Hours.
Study of disorders of phonation and resonation, including etiologies, diagnosis, and intervention strategies. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5223. Fluency Disorders. 3 Hours.
An examination of fluency disorders including theory, etiological factors, and development. In addition, the course is designed to address assessment and management of fluency disorders consistent with evidence-based practice for prospective speech-language pathologists. Prerequisite: Graduate standing. (Typically offered: Fall)

\section*{CDIS 5233. Speech Sound Disorders. 3 Hours.}

Assessment and treatment of disorders in speech articulation. Prerequisite: Graduate standing. (Typically offered: Summer)

CDIS 5243. Language Disorders in Adults. 3 Hours.
This course will examine the diagnosis and treatment of language disorders in adults with focal and diffuse brain injuries. Prerequisite: Graduate standing. (Typically offered: Fall)

\section*{CDIS 5253. Motor Speech Disorders. 3 Hours.}

Study of motor speech production disorders related to damage to central or peripheral nervous system motor centers and pathways. Cerebral palsy, adult dysarthria, apraxia, and dysphagia are emphasized. Both theoretical and treatment considerations are addressed. Prerequisite: Enrollment in the Communication Sciences and Disorders Master of Science (CDISMS) program or instructor consent. (Typically offered: Spring)

\section*{CDIS 5273. Language, Learning and Literacy. 3 Hours.}

An examination of language-based literacy skills, including consideration of development, disorders, assessment and intervention. Prerequisite: Enrollment in CDISMS program or instructor consent. (Typically offered: Summer)

\section*{CDIS 5283. Advanced Clinical Practicum II. 3 Hours.}

Practicum activities in speech-language assessment and intervention. Prerequisite: Graduate standing and CDIS 5183. (Typically offered: Spring)

CDIS 5293. Augmentative and Alternative Communication. 3 Hours.
Approaches to communication management with the severely and profoundly handicapped child or adult, with primary emphasis on augmentative and alternative communication assessment and intervention. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5343. Cognitive Communication in Adults. 3 Hours.
Cognitive and communicative breakdown due to neurological trauma, including etiology, characteristics, assessment, and treatment for traumatic brain injury, right hemisphere injury, dementia, and other neurodegenerative communication disorders. Prerequisite: Graduate Standing. (Typically offered: Spring)

CDIS 5353. Neurological Bases of Communication. 3 Hours.
A study of the structures and functions of the central and peripheral nervous systems as they relate to human speech, language, and cognition. Graduate degree credit will not be given for both CDIS 4253 and CDIS 5353. Prerequisite: Enrollment in the Communication Sciences and Disorders Master of Science (CDISMS) program or Instructor Consent. (Typically offered: Fall)

CDIS 5383. Advanced Clinical Practicum III. 3 Hours.
Practicum activities in speech-language assessment and intervention. Prerequisite: Graduate standing and CDIS 5283. (Typically offered: Summer)

CDIS 5483. Advanced Clinical Practicum IV. 3 Hours.
Practicum activities in speech-language assessment and intervention. Prerequisite: Graduate standing and CDIS 5383. (Typically offered: Fall)

CDIS 5585. Advanced Clinical Practicum V. 5 Hours.
Practicum activities in speech-language assessment and intervention. Prerequisite: Graduate standing and CDIS 5483. (Typically offered: Spring)

CDIS 5813. Advanced Auditory (Re)Habilitation. 3 Hours.
This course provides students with an in-depth knowledge of hearing anatomy and physiology as well as current hearing and hearing assistive technologies. The development of auditory skills across the lifespan will be discussed as well as intervention techniques to facilitate auditory, speech, and spoken language skills across the lifespan. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5823. Language Learning with Multiple Disabilities. 3 Hours.
Approaches to services (assessment and intervention) for individuals who, as a result of multiple disabilities, are in the beginning stages of language development including the preintentional and presymbolic stages. Prerequisite: Graduate standing. (Typically offered: Irregular)

CDIS 5843. Communication and Swallowing in Dementia. 3 Hours.
This course provides an in-depth examination of the communication and feeding/ swallowing factors demonstrated by patients with dementia. Etiologies, symptoms, progression, evaluation, and appropriate interventions for of the most common forms of dementia are addressed. Prerequisite: Graduate standing. (Typically offered: Summer)

CDIS 5883. Policies \& Procedures in Educational Speech-Language Pathology. 3 Hours.
Educational Speech Pathology is designed to familiarize the student the factors related to functioning as an SLP in an educational setting, including state and federal regulations/standards, service delivery considerations, eligibility criteria, and documentation. Prerequisite: Graduate Standing. (Typically offered: Summer)

CDIS 590V. Special Problems. 1-6 Hour.
Special problems. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CDIS 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{CDIS 6103. Literacy for Learning in Educational Settings. 3 Hours.}

An examination of language-based literacy skills, including consideration of development, disorders, assessment, and intervention. Prerequisite: Graduate standing and admission to the ASLPMC program or with departmental consent. (Typically offered: Fall)

CDIS 6203. Advanced Assessment and Intervention for Fluency Disorders. 3 Hours.
An examination of fluency disorders including theory, etiological factors, and development. In addition, the course is designed to address assessment and management of fluency disorders consistent with evidence-based practice for prospective speech-language pathologists. Prerequisite: Graduate standing and admission to the ASLPMC program or with departmental consent. (Typically offered: Fall)

CDIS 6303. Effective Augmentative and Alternative Communication Services in Schools. 3 Hours.
This course will support current speech-language pathologists in becoming more effective speech-language pathologists as it relates to the provision of augmentative and alternative services in schools. Throughout this course, students will (a) identify a barrier they wish to address relevant to their current service provision or their current caseload, (b) discover strategies for addressing that barrier, and (c) develop a plan for improving their augmentative and alternative service provision through the implementation of those strategies in their own professional work. Prerequisite: Graduate standing and admission to the ASLPMC program or with departmental consent. (Typically offered: Spring)

CDIS 6403. Advanced Pediatric Feeding and Swallowing Assessment \& Intervention. 3 Hours.
Study of the etiology, assessment, and remediation of feeding and swallowing disorders in children. Prerequisite: Graduate standing and admission to the ASLPMC program or with departmental consent. (Typically offered: Irregular)

CDIS 6503. Behavioral Management in Educational Settings. 3 Hours.
The course provides an introduction to behavioral management across a variety of settings highlighting best practices from organizing time, materials, and room space. Strategies for managing individual and large group student behaviors, transitions, and other arrangements will be presented in addition to basic federal and state laws as they pertain to the legal procedures for all professionals, including educators of students with disabilities and students who use English as a Second Language (ESL). Prerequisite: Graduate standing and admission to the ASLPMC program or with departmental consent. (Typically offered: Spring)

CDIS 699V. Seminar in Communication Sciences and Disorders. 1-6 Hour. Discussion of pertinent topics and issues in the discipline of communication sciences and disorders. Prerequisite: Advanced graduate standing. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

\section*{Community College Leadership (CCLE) \\ Courses}

CCLE 5003. History of the Community College. 3 Hours.
The course examines the history and development of community colleges in the United States. Prerequisite: Admission into M.Ed. in Community College Leadership program or instructor consent. (Typically offered: Irregular)

CCLE 5013. Legal Issues in Community Colleges. 3 Hours.
The course examines the legal issues facing community colleges in the United States, including: the rights and responsibilities of educators and students, fair employment; due process; torts liability and contracts; and federal and state legislation. Prerequisite: Admission into the M.Ed. program in community college leadership or instructor consent. (Typically offered: Irregular)

CCLE 5023. Organization and Leadership in Community Colleges. 3 Hours. The course applies the scholarship of organizations and leadership to community colleges in the United States, covering issues related to governance and policymaking, management, problem-solving, and personnel. Prerequisite: Admission into M.Ed. in Community College Leadership or instructor consent. (Typically offered: Irregular)

CCLE 5033. Diversity and Inclusion in Community Colleges. 3 Hours.
The course focuses on the responsibilities of community college leaders to be multiculturally competent professionals who foster inclusive practices for diverse student populations. Prerequisite: Admission into M.Ed. in Community College Leadership or instructor consent. (Typically offered: Irregular)

CCLE 5043. Finance and Fiscal Management in Community Colleges. 3 Hours. The course provides an understanding of community college finance and budgeting practices. Prerequisite: Admission into M.Ed. in Community College Leadership program or instructor consent. (Typically offered: Irregular)

CCLE 5053. Students in Community Colleges. 3 Hours.
The course provides an understanding of student populations in community colleges. Prerequisite: Admission into M.Ed. in Community College Leadership or instructor consent. (Typically offered: Irregular)

CCLE 5063. Teaching and Learning in Community Colleges. 3 Hours.
The course examines instructional strategies and considers the diverse types of learning environments at community colleges. Prerequisite: Admission into M.Ed. in Community College Leadership or instructor consent. (Typically offered: Irregular)

CCLE 5073. Workforce and Economic Development in Community Colleges. 3 Hours.

The course provides an overview of the role community colleges play in workforce, economic, and community development, including community-based partnerships, best practices in program development, and collaboration with both for-profit and nonprofit organizations. Prerequisite: Admission into M.Ed. in Community College Leadership or instructor consent. (Typically offered: Irregular)

CCLE 5083. Research and Assessment of Community Colleges. 3 Hours. The course provides an overview of research and assessment applicable to community colleges to inform strategic planning and data-driven decision-making. Prerequisite: Admission into M.Ed. in Community College Leadership or instructor consent. (Typically offered: Irregular)

CCLE 5093. Program Planning in Community Colleges. 3 Hours.
The course introduces the process of program planning in community colleges, including various planning models used in academic settings and fundamental steps in the planning process. Prerequisite: Admission into M.Ed. in Community College Leadership or instructor consent. (Typically offered: Irregular)

CCLE 5103. Critical Issues in Community Colleges. 3 Hours.
The course considers the pressing problems facing community colleges and strategies to maximize the potential of these institutions. Prerequisite: Admission into M.Ed. in Community College Leadership or instructor consent. (Typically offered: Irregular)

CCLE 511V. Independent Study. 1-3 Hour.
Provides students with an opportunity to pursue special study in community college leadership. Prerequisite: Instructor permission. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{Community Health Promotion (CHLP)}

\section*{Courses}

CHLP 310V. Health Coaches I. 1-3 Hour.
This course, designed for students whose career goals are focused on community/ healthcare service, is a study of key issues concerning community health care, aimed at developing practical approaches to supporting patients. Students study the medical, social, cultural, and economic challenges as well as opportunities that exist within evolving health care systems, and consider how these forces, in addition to behavioral and psychological factors, affect health outcomes of individual patients. Obstacles to effective health care as well as strategies for enabling at-risk patients to play more active roles in promoting their health and well-being are key issues. This course provides students with the academic foundation for the field-based Health Coaches II and III. (Typically offered: Fall and Spring) May be repeated for up to 3 hours of degree credit.

CHLP 320V. Health Coaches II. 1-3 Hour.
Health Coaches II is the field-based second course in the three-course Health Coaches sequence. Health Coaches will become engaged in the processes of educating and motivating identified at risk patients to take an active and meaningful role in their health and well-being. Students are required to make scheduled visits to their assigned patients' homes, potentially attend doctor appointments with the patient, engage in phone interactions with patients and the healthcare team as needed, and meet face-to-face weekly with the care coordination healthcare team to discuss patient experiences and strategies for optimizing healthcare outcomes for individual patients. Prerequisite: CHLP 310V. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

CHLP 330V. Health Coaches III. 1-3 Hour.
Health Coaches III is the field-based third course in the three-course Health Coaches sequence. Health Coaches will to continue to be engaged in the processes of educating and motivating identified at risk patients to take an active and meaningful role in their health and well-being through scheduled visits to their assigned patients' homes or by phone, potentially attending doctor appointments with the patient, and participating in face-to-face weekly with the care coordination healthcare team to discuss patient experiences and strategies for optimizing healthcare outcomes for individual patients. In addition, students at this level will provide leadership within student care teams and provide community outreach under the direction of the professional healthcare team. Prerequisite: CHLP 310V and CHLP 320V. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

\section*{Computer Science and Computer Engineering (CSCE)}

\section*{Courses}

CSCE 2004. Programming Foundations I. 4 Hours.
Introductory programming course for students majoring in computer science or computer engineering. Software development process: problem specification, program design, implementation, testing and documentation. Programming topics: data representation, conditional and iterative statements, functions, arrays, strings, file I/O and classes. Using C++ in a UNIX environment. Corequisite: Lab component. Prerequisite: MATH 2445 or MATH 2554 or MATH 2554 C with a grade of \(C\) or better, a College of Engineering (ENGR) student, a Computer Science Minor (CSCE-M), or a math major (MATHBS or MATHBA). (Typically offered: Fall and Spring)

\section*{CSCE 2014. Programming Foundations II. 4 Hours.}

This course continues developing problem solving techniques by focusing on fundamental data structures and associated algorithms. Topics include: abstract data types, introduction to object-oriented programming, linked lists, stacks, queues, hash tables, binary trees, graphs, recursion, and searching and sorting algorithms. Using C++ in a UNIX environment. Corequisite: Lab component. Prerequisite: CSCE 2004 with a grade of C or better. (Typically offered: Fall and Spring)

CSCE 2023. Introduction to Programming in Java. 3 Hours.
Introduction to programming in Java with emphasis on engineering applications. Programming techniques: data representation and expressions, conditional and iterative statements, arrays, lists, file I/O, methods. Object oriented programming: designing, implementing and using classes, collections and composite objects. Students will gain hands-on programming experience and exposure to classic engineering problem solving techniques. Prerequisite: MATH 2445 or MATH 2554 or MATH 2554C, each with a grade of C or higher. (Typically offered: Irregular)

\section*{CSCE 2114. Digital Design. 4 Hours.}

Introduction to the hardware aspects of digital computers, logic gates, flipflops, reduction, finite state machines, sequential logic design, digital systems, software design tools, hardware description language (VHDL), and implementation technologies. Corequisite: Lab component. Prerequisite: MATH 2554 or MATH 2554C with a grade of C or better. (Typically offered: Fall and Spring) This course is cross-listed with ELEG 2904.

\section*{CSCE 2214. Computer Organization. 4 Hours.}

Presents the relationship between computing hardware and software with a focus on the concepts for current computers. CPU design topics are covered including various techniques for microprocessor design and performance evaluation. Corequisite: Lab component. Prerequisite: CSCE 2114 with a grade of \(C\) or better. (Typically offered: Fall and Spring)

\section*{CSCE 3193. Programming Paradigms. 3 Hours.}

Programming in different paradigms with emphasis on object oriented programming and network programming. Survey of programming languages, event driven programming, and concurrency. Prerequisite: CSCE 2014 with a grade of C or better. (Typically offered: Fall and Spring)

\section*{CSCE 3193H. Honors Programming Paradigms. 3 Hours.}

Programming in different paradigms with emphasis on object oriented programming and network programming. Survey of programming languages, event driven programming, and concurrency. Prerequisite: CSCE 2014 with a grade of C or better. (Typically offered: Fall)
This course is equivalent to CSCE 3193.

\section*{CSCE 3513. Software Engineering. 3 Hours.}

A modern approach to the current techniques used in software design and development. This course emphasizes the use of modern software development tools, multi-module programming, and team design and engineering. Prerequisite: CSCE 3193 or CSCE 3193H or DASC 2103, each with a grade of C or better. (Typically offered: Fall and Spring)

\section*{CSCE 3613. Operating Systems. 3 Hours.}

An introduction to operating systems including topics in system structures, process management, storage management, files, distributed systems, and case studies. Prerequisite: CSCE 2014 and CSCE 2214, each with a grade of C or better. (Typically offered: Fall and Spring)

CSCE 3613H. Honors Operating Systems. 3 Hours.
An introduction to operating systems including topics in system structures, process management, storage management, files, distributed systems, and case studies. Prerequisite: CSCE 2014 and CSCE 2214, each with a grade of \(C\) or better. (Typically offered: Spring)
This course is equivalent to CSCE 3613.

\section*{CSCE 3953. System Synthesis and Modeling. 3 Hours.}

This course instructs the students in the use of modern synthesis and modeling languages and approaches for design automation. This course will teach students the use of HDLs and modeling languages for representing and implementing digital computer systems. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Fall)

CSCE 4013. Special Topics. 3 Hours.
Consideration of computer science topics not covered in other courses. Prerequisite: CSCE 3193 or CSCE 3193H or DASC 2103, each with a grade of C or better. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

CSCE 4043. RFID Information Systems Security. 3 Hours.
Radio frequency identification (RFID) information systems provide information to users about objects with RFID tags. They require the application of information systems security (INFOSEC) to protect the information from tampering, unauthorized information disclosure, and denial of service to authorized users. This course addresses security and privacy in an RFID system. Prerequisite: INEG 2314. (Typically offered: Irregular)

\section*{CSCE 4114. Embedded Systems. 4 Hours.}

The architecture, software, and hardware of embedded systems. Involves a mixture of hardware and software for the control of a system (including electrical, electro-mechanical, and electro-chemical systems). They are found in a variety of products including cars, VCRs, HDTVs, cell phones, pacemakers, spacecraft, missile systems, and robots for factory automation. Corequisite: Lab component. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Fall)

CSCE 4123. Programming Challenges. 3 Hours.
This course studies the principle methods used in the solution of programming contest problems, e.g., data structures strings, sorting, machine arithmetic and algebra, combinatorics, number theory, backtracking, graph traversal, graph algorithms, dynamic programming, grids, and computational geometry. Prerequisite: CSCE 3193 or CSCE 3193H, each with a grade of C or better. (Typically offered: Irregular)

\section*{CSCE 4133. Algorithms. 3 Hours.}

Provides an introduction to formal techniques for analyzing the complexity of algorithms. The course surveys important classes of algorithms used in computer science and engineering. Prerequisite: (CSCE 3193 or CSCE 3193H or DASC 2103, each with a grade of C or better) and (MATH 2603 or MATH 2803). (Typically offered: Fall)

\section*{CSCE 4143. Data Mining. 3 Hours.}

The course focuses on the principles, theory, design, and implementation of data mining algorithms for large-scale data. Topics include foundations of data mining; preprocessing; mining frequent patterns, associations and correlations; supervised learning including decision tree induction, naïve Bayesian classification, support vector machine, logistic regression, Bayesian network, and K-nearest neighbor learning; unsupervised learning including K-means clustering, hierarchical clustering, density-based clustering, and grid-based clustering; outlier analysis; graph mining; scalable and distributed data mining. Prerequisite: (CSCE 3193 or CSCE 3193H or DASC 2103) or (CSCE 2014 and INEG 2333 and INEG 2314) or (CSCE 2014 and STAT 3013 and STAT 3003)). (Typically offered: Fall)
This course is cross-listed with INEG 4143.
CSCE 4213. Computer Architecture. 3 Hours.
The architecture of modern scalar and parallel computing systems. Techniques for dynamic instruction scheduling, branch prediction, instruction level parallelism, shared and distributed memory multiprocessor systems, array processors, and memory hierarchies. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Spring)
This course is cross-listed with ELEG 4983.

CSCE 4233. Low Power Digital Systems. 3 Hours.
The reduction of power consumption is rapidly becoming one of the key issues in digital system design. Traditionally, digital system design has mainly focused on performance and area trade-offs. This course will provide a thorough introduction to digital design for lower consumption at the circuit, logic, and architectural level. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Irregular)

CSCE 4253. Concurrent Computing. 3 Hours.
Programming concurrent processes; computer interconnection network topologies; loosely coupled and tightly coupled paralleled computer architectures; designing algorithms for concurrency; distributed computer architectures. Prerequisite: CSCE 3193 or CSCE 3193H or DASC 2103, each with a grade of C or better. (Typically offered: Irregular)

\section*{CSCE 4263. Advanced Data Structures. 3 Hours.}

This course continues the study of data structures, algorithmic analysis for these data structures, and their efficient implementation to support standard library in programming languages. Topics include: AVL trees, Red-Black trees, Splay trees, Optimal Binary Search trees, 2-3 tree, 2-3-4 tree, B-trees, Segment trees, Leftist Heaps, Binomial Heaps, Fibonacci Heap, Disjoint Set, Hashing, and big integer with hundreds to thousands of digits. Prerequisite: CSCE 3193 or CSCE 3193H, each with a grade of \(C\) or better. (Typically offered: Irregular)

CSCE 4273. Big Data Analytics and Management. 3 Hours.
Introduction to tools and techniques for distributed data computing and management, big data analytics, scalable machine learning, and real-time streaming data analysis. Students cannot receive credit for both CSCE 4273 and CSCE 5273. Prerequisite: CSCE 3193 or CSCE 3193H or DASC 2103, each with a grade of C or better. (Typically offered: Irregular)

\section*{CSCE 4323. Formal Languages and Computability. 3 Hours.}

Finite Automata and regular languages, regular expressions, context-free languages and pushdown automata, nondeterminism, grammars, and Turing machines. Church's thesis, halting problem, time complexity, space complexity and undecidability. Prerequisite: (CSCE 3193 or CSCE 3193H, each with a grade of C or better) and (MATH 2603 or MATH 2803). (Typically offered: Spring)
CSCE 4333. Introduction to Integrated Circuit Design. 3 Hours.
Design and layout of large scale digital integrated circuits using CMOS technology. Topics include MOS devices and basic circuits, integrated circuit layout and fabrication, dynamic logic, circuit design and layout strategies for large scale CMOS circuits. Students may not receive credit for both CSCE 4333 and CSCE 5223. Prerequisite: ELEG 3213 or ELEG 3933 and MATH 2584 (Typically offered: Fall)

\section*{CSCE 4353. CPLD/FPGA-Based System Design. 3 Hours.}

Field Programmable Logic devices (FPGAs/CPLDs) have become extremely popular as basic building blocks for digital systems. They offer a general architecture that users can customize by inducing permanent or reversible physical changes. This course will deal with the implementation of logic options using these devices. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Irregular) This course is cross-listed with ELEG 4963.

\section*{CSCE 4373. Electronic Design Automation. 3 Hours.}

This course studies physical design, analysis and optimization of VLSI circuits and systems with emphasis on computational realizations and optimization. We start with some related topics such as graph algorithms and discuss various well-known algorithms and methodologies in the design process of VLSI circuits, including design partitioning, logic synthesis, floorplanning, routing, static timing analysis and performance-driven layout. It requires a basic knowledge of digital circuit design, data structure, and object-oriented programming. Students cannot receive credit for both CSCE 4373 and CSCE 5373. Prerequisite: CSCE 3953 and CSCE 3193, each with a C or higher. (Typically offered: Irregular)

CSCE 4423. Computer Systems Modeling. 3 Hours.
Basic concepts of problem analysis, model design, and simulation experiments. A simulation will be introduced and used in this course. Prerequisite: CSCE 3193 or CSCE 3193H, each with a grade of C or better. (Typically offered: Irregular)

\section*{CSCE 4433. Cryptography. 3 Hours.}

This course provides a general introduction to modern cryptography. Topics include: stream ciphers, block ciphers, message authentication codes, public key encryption, key exchange, and signature schemes. Prerequisite: (CSCE 3193 or CSCE 3193H or DASC 2103, each with a grade of C or better) and (MATH 2603 or MATH 2803). (Typically offered: Irregular)

\section*{CSCE 4523. Database Management Systems. 3 Hours.}

Introduction to database management systems, architecture, storage structures, indexing, relational data model, E-R diagrams, query languages, SQL, ODBC, transaction management, integrity, and security. Students may not receive credit for both CSCE 4523 and CSCE 5523. Prerequisite: CSCE 3193 or CSCE 3193H, each with a grade of C or better. (Typically offered: Spring)

\section*{CSCE 4543. Software Architecture. 3 Hours.}

A study of software architecture through the use of case studies drawn from real systems designed to solve real problems from technical as well as managerial perspectives. Techniques for designing, building, and evaluating software architectures. Prerequisite: CSCE 4133 and CSCE 3513. (Typically offered: Irregular)

\section*{CSCE 4553. Information Retrieval. 3 Hours.}

The objective of this course is to give students a hands-on introduction to information retrieval systems. Classical textual information retrieval systems are studied, including text preprocessing, file structures, term-weighting schemes, and web search engines. Students may not receive credit for both CSCE 4553 and CSCE 5533. Prerequisite: CSCE 3193 or CSCE 3193H, each with a grade of C or better. (Typically offered: Irregular)

CSCE 4561. Capstone I. 1 Hour.
CSCE students complete a comprehensive software capstone project during their final year of undergraduate studies. The project is done over 2 semesters in phases: concept, formal proposal, implementation, and presentation. The projects include and may require the integration of software and human factors and hardware elements and are developed to software engineering methodologies. Prerequisite: CSCE 3513 and (CSCE 3613 or CSCE 3613H) and completion of 96 credit hours. (Typically offered: Fall)

\section*{CSCE 4613. Artificial Intelligence. 3 Hours.}

Introduction to intelligent agents, Al languages, search, first order logic, knowledge representation, ontologies, problem solving, natural language processing, machine vision, machine learning, and robotics. Prerequisite: CSCE 3193 or CSCE 3193H or DASC 2103, each with a grade of C or better. (Typically offered: Irregular)

\section*{CSCE 4623. Mobile Programming. 3 Hours.}

An introduction to software development on mobile devices. The major topics covered in this course include underlying concepts and principles in mobile programming, as well as hands-on programming experience on mobile devices with an emphasis on smartphones. Prerequisite: CSCE 3193 or CSCE 3193H, each with a grade of C or better. (Typically offered: Irregular)

\section*{CSCE 4643. Graphics Processing Units Programming. 3 Hours.}

This course provides an introduction to massively parallel programming using Graphics Processing Units (GPUs). Topics include basic programming model, GPU thread hierarchy, GPU memory architecture, and performance optimization techniques and parallel patterns needed to develop real-life applications. Prerequisite: CSCE 2014 with a grade of C or better. (Typically offered: Irregular)

\section*{CSCE 4753. Computer Networks. 3 Hours.}

This course is an introductory course on computer networks. Using the Internet as a vehicle, this course introduces underlying concepts and principles of modern computer networks, with emphasis on protocols, architectures, and implementation issues. Students cannot receive graduate credit for CSCE 4753. Prerequisite: CSCE 3193 or CSCE 3193H, each with a grade of C or better. (Typically offered: Irregular)

CSCE 4783. Cloud Computing and Security. 3 Hours.
Cloud computing has entered the mainstream of information technology, providing highly elastic scalability in delivery of enterprise applications and services. In this course, we will focus on the architecture of today's cloud computing, the technologies used within them, application development using contemporary cloud computing tools, and the security risks and management in the cloud. Students cannot receive credit for both CSCE 4783 and CSCE 5783. Prerequisite: CSCE 3613 or CSCE 3613 H , each with a grade of C or better. (Typically offered: Irregular)

\section*{CSCE 4813. Computer Graphics. 3 Hours.}

Introduction to the theory and algorithms used in computer graphics systems and applications. Topics include: 2D and 3D geometric models (points, lines, polygons, surfaces), affine transformations (rotation, translation, scaling), viewpoint calculation (clipping, projection), lighting models (light-material interactions, illumination and shadow calculation). Students will implement their own graphics pipeline to demonstrate many of these techniques. Higher level computer graphics applications will be created using OpenGL. Prerequisite: CSCE 3193 or CSCE 3193H, each with a grade of \(C\) or better. (Typically offered: Irregular)

\section*{CSCE 4853. Information Security. 3 Hours.}

This course covers principles, mechanisms, and policies governing confidentiality, integrity, and availability of digital information. Topics to be covered include security concepts and mechanisms, security policies, multilevel security models, system vulnerability, threat and risk assessment, basic cryptography and its applications, intrusion detection systems. Prerequisite: CSCE 3193 or CSCE 3193H or DASC 2103, each with a grade of C or better. (Typically offered: Irregular)

CSCE 490V. Individual Study. 1-6 Hour.
Individual study directed by faculty in current research topics, state of the art, or advanced methodology in one of the major computer science or computer engineering areas. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{CSCE 4914. Advanced Digital Design. 4 Hours.}

To master advanced logic design concepts, including the design and testing of synchronous and asynchronous combinational and sequential circuits using state of the art CAD tools. Corequisite: Lab component. Prerequisite: CSCE 2114 or ELEG 2904. (Typically offered: Irregular)

CSCE 491VH. Honors Thesis. 1-3 Hour.
To provide honors students with experience in presenting their research accomplishments to their peers and faculty. Prerequisite: Honors standing. (Typically offered: Fall and Spring) May be repeated for up to 3 hours of degree credit.

\section*{CSCE 4963. Capstone II. 3 Hours.}

CSCE students complete a comprehensive capstone project during their final year of undergraduate studies. The project is done over two consecutive semesters in phases: concepts, formal proposal, implementation, and presentation. The projects include and may require the integration of software, human factors, and hardware elements and are developed using software engineering methodologies. Prerequisite: CSCE 4561. (Typically offered: Spring)

CSCE 5013. Advanced Special Topics in Computer Science or Computer Engineering. 3 Hours.
Consideration of current computer engineering or computer science topics not covered in other courses. Prerequisite: Graduate standing in Computer Science Computer Engineering. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

\section*{CSCE 5033. Advanced Algorithms. 3 Hours.}

Design of computer algorithms, with primary emphasis on the development of efficient implementation. Prerequisite: Graduate standing in Computer Science Computer Engineering. (Typically offered: Irregular)

\section*{CSCE 5063. Machine Learning. 3 Hours.}

An introduction to machine learning, with particular emphasis on neural network techniques. This course presents the basic principles underlying algorithms that improve with experience, and covers using them effectively for modeling data and making predictions. Prerequisite: Computer Science Computer Engineering(CSCE) graduate standing. (Typically offered: Irregular)

CSCE 5073. Data Mining. 3 Hours.
This course surveys the most common methods used in data mining and machine learning. It involves several projects in which students will implement tools that are useful for mining knowledge from data and making predictions. The course will study both heuristic algorithms and statistical techniques. Prerequisite: CSCE 3193 and (INEG 2314 or STAT 3013) or Computer Science Computer Engineering (CSCE) graduate standing. (Typically offered: Irregular)

CSCE 5114. Embedded Systems. 4 Hours.
The architecture, software, and hardware of embedded systems. Involves a mixture of hardware and software for the control of a system (including electrical, electromechanical, and electro-chemical systems). They are found in a variety of products including cars, VCRs, HDTVs, cell phones, pacemakers, spacecraft, missile systems, and robots for factory automation. Graduate degree credit will not be given for both CSCE 4114 and CSCE 5114. Corequisite: Lab component. Prerequisite:
CSCE 2214 with a grade of C or better or Computer Science Computer Engineering (CSCE) graduate standing. (Typically offered: Fall)

\section*{CSCE 5133. Algorithms. 3 Hours.}

Provides an introduction to formal techniques for analyzing the complexity of algorithms. The course surveys important classes of algorithms used in computer science and engineering. Graduate degree credit will not be given for both CSCE 4133 and CSCE 5133. Prerequisite: ((CSCE 3193 and (MATH 2603 or MATH 2803)) or (MATH 4423) or (Computer Science/Computer Engineering(CS/CE) graduate standing). (Typically offered: Fall)

\section*{CSCE 5173. Formal Languages and Computability. 3 Hours.}

Finite Automata and regular languages, regular expressions, context-free languages and pushdown automata, nondeterminism, grammars, and Turing machines. Church's thesis, halting problem, and undecidability. Graduate degree credit will not be given for both CSCE 4323 and CSCE 5173. Prerequisite: CSCE 4133 or CSCE 5133 (formerly CSCE 4133). (Typically offered: Spring)

\section*{CSCE 5183. Advanced Data Structures. 3 Hours.}

This course continues the study of data structures, algorithmic analysis for these data structures, and their efficient implementation to support standard library in programming languages. Topics include: AVL trees, Red-Black trees, Splay trees, Optimal Binary Search trees, 2-3 tree, 2-3-4 tree, B-trees, Segment trees, Leftist Heaps, Binomial Heaps, Fibonacci Heap, Disjoint Set, Hashing, and big integer with hundreds to thousands of digits. Graduate degree credit will not be given for both CSCE 4263 and CSCE 5183. Prerequisite: CSCE 3193 or Computer Science Computer Engineering(CSCE) graduate standing. (Typically offered: Irregular)

\section*{CSCE 5193. Concurrent Computing. 3 Hours.}

Programming concurrent processes; computer interconnection network topologies; loosely coupled and tightly coupled paralleled computer architectures; designing algorithms for concurrency; distributed computer architectures. Graduate degree credit will not be given for both CSCE 4253 and CSCE 5193. Prerequisite: CSCE 3193 or Computer Science Computer Engineering (CSCE) graduate standing. (Typically offered: Irregular)

CSCE 5203. Advanced Database Systems. 3 Hours.
Topics include: object databases, distributed databases, XML query, data warehouses, network as database systems, peer-peer data sharing architectures, data grids, data mining, logic foundations, semantic databases, spatial and temporal databases, and knowledge bases. Prerequisite: CSCE 4523 or CSCE 5523. (Typically offered: Irregular)

CSCE 5223. Introduction to Integrated Circuit Design. 3 Hours.
Design and layout of large scale digital integrated circuits using CMOS technology. Topics include MOS devices and basic circuits, integrated circuit layout and fabrication, dynamic logic, circuit design, and layout strategies for large scale CMOS circuits. Students may not receive credit for both CSCE 4333 and CSCE 5223.
Prerequisite: (ELEG 3213 or ELEG 3933) and MATH 2584 or Computer Science Computer Engineering(CSCE) graduate standing. (Typically offered: Fall)

CSCE 5233. Low Power Digital Systems. 3 Hours.
The reduction of power consumption is rapidly becoming one of the key issues in digital system design. Traditionally, digital system design has mainly focused on performance and area trade-offs. This course will provide a thorough introduction to digital design for lower consumption at the circuit, logic, and architectural level. Graduate degree credit will not be given for both CSCE 4233 and CSCE 5233. Prerequisite: CSCE 2214 with a grade of \(C\) or better or graduate standing in Computer Science Computer Engineering (CSCE) or graduate standing in Electrical Engineering (ELEG). (Typically offered: Irregular)

\section*{CSCE 5253L. Integrated Circuit Design Laboratory I. 3 Hours.}

Design and layout of large scale digital integrated circuits. Students design, check and simulate digital integrated circuits which will be fabricated, and tested in I.C. Design Laboratory II. Topics include computer aided design, circuit timing, and wire delay. Prerequisite: CSCE 4333 or CSCE 5223 or ELEG 4233 or ELEG 5923. (Typically offered: Irregular)
This course is cross-listed with ELEG 5253L.

\section*{CSCE 5263. Computational Complexity. 3 Hours.}

Turing machines, recursion theory and computability, complexity measures, NP-completeness, analysis on NP-complete problems, pseudo-polynomial and approximation. Prerequisite: Computer Science Computer Engineering (CSCE) graduate standing. (Typically offered: Irregular)

CSCE 5273. Big Data Analytics and Management. 3 Hours.
Topics include principles of distributed data computing and management, design and implementation of non-relational data systems, crowd sourcing and human computation, big data analytics and scalable machine learning, real-time streaming data analysis, and social aware computing. Prerequisite: CSCE 3193 and INEG 2314 or Computer Science Computer Engineering (CSCE) graduate standing. (Typically offered: Irregular)
CSCE 5283. Graph and Combinatorial Algorithms. 3 Hours.
Advanced topics in graph and combinatorial optimization problems. Traditional approach section: P and NP problems, proof of NP-completeness, approximation algorithms for solving NP hard problems. Machine learning-based approach section: graph neural networks, deep reinforcement learning, state-of-the-art machine learning approaches for solving graph and combinatorial optimization problems. Prerequisite: Graduate standing in CSCE Department. (Typically offered: Irregular)

CSCE 5293. Computer Architecture. 3 Hours.
The architecture of modern scalar and parallel computing systems. Techniques for dynamic instruction scheduling, branch prediction, instruction level parallelism, shared and distributed memory multiprocessor systems, array processors, and memory hierarchies. Graduate degree credit will not be given for both CSCE 4213 and CSCE 5293. Prerequisite: CSCE 2214 with a grade of \(C\) or better or Computer Science Computer Engineering(CSCE) graduate standing. (Typically offered: Spring)

\section*{CSCE 5323. Computer Security. 3 Hours.}

This course covers a broad selection of contemporary issues in computer security. Topics include security concepts and mechanisms, access control, security policies, authentication methods, basic cryptography, secure system design, and information assurance. Prerequisite: Graduate standing in CSCE department. (Typically offered: Irregular)

\section*{CSCE 5333. Computer Forensics. 3 Hours.}

Various methods for identification, preservation, and extraction of electronic evidence at a computer crime scene. Specific topics include auditing and investigation of network and host intrusions, computer forensics tools, resources for system administrators and information security officers, legal issues related to computer and network forensics. Prerequisite: CSCE 5323. (Typically offered: Irregular)

\section*{CSCE 5343. Advanced Software Engineering. 3 Hours.}

This course is about software metrics and models. It will focus on quantitative methods and techniques for management of software projects, design of software systems, and improvement of software quality. The material covered will be metrics and models used in the software lifecycle, such as software requirements metrics, design metrics, implementation metrics, testing metrics, effort estimation model. Prerequisite: CSCE 3513 or Computer Science Computer Engineering (CSCE) graduate standing. (Typically offered: Irregular)
CSCE 5353. CPLD/FPGA-Based System Design. 3 Hours.
Field Programmable Logic devices (FPGAs/CPLDs) have become extremely popular as basic building blocks for digital systems. They offer a general architecture that users can customize by inducing permanent or reversible physical changes. This course will deal with the implementation of logic options using these devices. Graduate degree credit will not be given for both CSCE 4353 and CSCE 5353. Prerequisite: CSCE 2214 with a grade of C or better or Computer Science Computer Engineering (CSCE) graduate standing. (Typically offered: Irregular)

\section*{CSCE 5373. Electronic Design Automation. 3 Hours.}

This course studies physical design, analysis and optimization of VLSI circuits and systems with emphasis on computational realizations and optimization. We start with some related topics such as graph algorithms and discuss various well-known algorithms and methodologies in the design process of VLSI circuits, including design partitioning, logic synthesis, floorplanning, routing, static timing analysis and performance-driven layout. It requires a basic knowledge of digital circuit design, data structure, and object-oriented programming. Students cannot receive credit for both CSCE 4373 and CSCE 5373. Prerequisite: Graduate standing in Computer Engineering, Computer Science, or Electrical Engineering. (Typically offered: Irregular)

\section*{CSCE 5383. Malware Analysis. 3 Hours.}

This course discusses fundamental concepts on malicious software, otherwise known as malware, which play a major role in intrusion into computer systems. Various malware analysis tools and techniques are explored. A major focus of this course is providing hands-on laboratory activities, which include dissecting software binary and understanding how to detect and eliminate malicious codes. Prerequisite: Graduate standing in CSCE Department. (Typically offered: Irregular)

\section*{CSCE 5423. Cryptography. 3 Hours.}

This course provides an introduction to cryptography and its applications and practices. Topics covered include cryptography basics, symmetric key cryptography, public-key cryptography, cryptographic hash function, digital signature, message authentication, key management, password security, SSL/TLS, IPsec, cryptographyassisted anonymous communications, cryptocurrency, and privacy-aware computing. Graduate degree credit will not be given for both CSCE 4433 and CSCE 5423. Prerequisite: Graduate standing in CSCE Department. (Typically offered: Irregular)

\section*{CSCE 5523. Database Management Systems. 3 Hours.}

Introduction to database management systems, architecture, storage structures, indexing, relational data model, E-R diagrams, query languages, SQL, ODBC, transaction management, integrity, and security. Graduate degree credit will not be given for both CSCE 4523 and CSCE 5523. Prerequisite: Graduate standing in CSCE Department. (Typically offered: Spring)

\section*{CSCE 5533. Advanced Information Retrieval. 3 Hours.}

Study of the architecture, implementation, and evaluation of current information retrieval systems. Students will apply their knowledge of programming and data structures to implement a large system with an emphasis on efficiency and scalability. They will study current research in the field and implement individual or group projects on advanced topics. Prerequisite: Computer Science Computer Engineering (CSCE) graduate standing. (Typically offered: Irregular)

CSCE 5543. Statistical Natural Language Processing. 3 Hours.
Introduction to statistical natural language processing (NLP). Covers the theory and algorithms needed for building NLP tools, provides broad coverage of mathematical and linguistic foundations, and detailed discussion of statistical methods for text mining and information extraction. Current research and applications of statistical NLP will be discussed. Prerequisite: CSCE 2014 and (STAT 3013 or INEG 2314) or Computer Science Computer Engineering (CSCE) graduate standing. (Typically offered: Irregular)

\section*{CSCE 5553. Software Architecture. 3 Hours.}

A study of software architecture through the use of case studies drawn from real systems designed to solve real problems from technical as well as managerial perspectives. Techniques for designing, building, and evaluating software architectures. Graduate degree credit will not be given for both CSCE 4543 and CSCE 5553. Prerequisite: CSCE 4133 or CSCE 5133 and CSCE 3513. (Typically offered: Irregular)

\section*{CSCE 5563. Introduction to Deep Learning. 3 Hours.}

The course aims at understanding the fundamental of deep learning and its application in computer vision, natural language understanding and game theory. The course starts with basic multi layer perceptron and then moves towards other complicated models such as convolutional neural networks, recurrent neural networks, attention, and generative adversarial network models. The course will end with deep reinforcement learning. The course provides required steps for building deep learning models. Prerequisite: Computer Science Computer Engineering (CSCE) Graduate Standing. (Typically offered: Irregular)
CSCE 5613. Artificial Intelligence. 3 Hours.
Introduction to intelligent agents, Al languages, search, first order logic, knowledge representation, ontologies, problem solving, natural language processing, machine vision, machine learning, and robotics. Prerequisite: Graduate standing in CSCE Department. (Typically offered: Irregular)

\section*{CSCE 5623. Secure Digital System Design. 3 Hours.}

This course is to give graduate students an insight of contemporary security-related issues in modern digital systems. In addition to lectures, students will be practicing secure digital system design during a project. Prerequisite: Computer Science Computer Engineering (CSCE) graduate standing or Electrical Engineering (ELEG) graduate standing. (Typically offered: Irregular)

\section*{CSCE 5653. Network Security. 3 Hours.}

This course focuses on understanding and applying foundational principles in security to real computer networks. Students will study and implement several real attacks and take advantage of several recreated vulnerable systems in order to understand the modern landscape of network security. Students will also be looking at various case studies of attacks and defense strategies, including known exploit proofs-of-concept, published papers, and documents from security agencies and cyber-security research firms. Prerequisite: Graduate standing in CSCE department. (Typically offered: Irregular)

\section*{CSCE 5673. Mobile Programming. 3 Hours.}

An introduction to software development on mobile devices. The major topics covered in this course include underlying concepts and principles in mobile programming, as well as hands-on programming experience on mobile devices with an emphasis on smartphones. Graduate degree credit will not be given for both CSCE 4623 and CSCE 5673. Prerequisite: CSCE 3193 or Computer Science Computer Engineering (CSCE) graduate standing. (Typically offered: Irregular)

\section*{CSCE 5683. Image Processing. 3 Hours.}

The objective of this class is to give students a hands-on introduction to the fundamentals of image processing. A variety of image processing techniques and applications will be discussed including image enhancement, noise removal, spatial domain and frequency domain filtering, image restoration, color image processing, image compression, edge detection and image segmentation. Prerequisite: CSCE 3193 or Computer Science Computer Engineering (CSCE) graduate standing. (Typically offered: Irregular)

CSCE 5693. Graphics Processing Units Programming. 3 Hours.
This course provides an introduction to massively parallel programming using Graphics Processing Units (GPUs). Topics include basic programming model, GPU thread hierarchy, GPU memory architecture, and performance optimization techniques and parallel patterns needed to develop real-life applications. Graduate degree credit will not be given for both CSCE 4643 and CSCE 5693. Prerequisite: CSCE 2014 with a grade of C or better or Computer Science Computer Engineering (CSCE) graduate standing. (Typically offered: Irregular)

\section*{CSCE 5703. Computer Vision. 3 Hours.}

The objective of this course is to give students a hands-on introduction to the fundamentals of computer vision. Topics include image formation, object modeling, image processing, feature and edge detection, image segmentation, motion estimation, depth from stereo, shape description and object recognition. Prerequisite: CSCE 3193 and CSCE 4613 or Computer Science Computer Engineering (CSCE) graduate standing. (Typically offered: Irregular)

\section*{CSCE 5753. Wireless Systems Security. 3 Hours.}

Wireless systems such as wireless local area networks, cellular and mobile networks, and sensor networks are vulnerable to attacks. The goal of the class is for students to understand how to design secure wireless systems. Security topics include confidentiality, integrity, availability, privacy, and control of fraudulent usage of networks. Issues addressed include basic wireless theory, cryptography, threat modeling, risks, and mitigation techniques. Prerequisite: Graduate standing in Computer Science Computer Engineering(CSCE). (Typically offered: Irregular)

\section*{CSCE 5763. Privacy Enhancing Technologies. 3 Hours.}

This course introduces privacy enhancing technologies and hot privacy topics in modern computing systems. Students will be exposed to many interesting privacy problems, study privacy enhancing technologies, and apply their knowledge to explore an open research problem in a research-oriented project. After completing this course, students will gain broad knowledge of the state-of-the-art privacy enhancing technologies and open research problems. They will also develop skills and enhance potentials to do research on privacy and security. Prerequisite: Must be a graduate student in Computer Science Computer Engineering (CSCE). (Typically offered: Irregular)

\section*{CSCE 5773. Computer Networks. 3 Hours}

This course is an introductory course on computer networks. Using the Internet as a vehicle, this course introduces underlying concepts and principles of modern computer networks, with emphasis on protocols, architectures, and implementation issues. Graduate degree credit will not be given for both CSCE 4753 and CSCE 5773. Prerequisite: Computer Science Computer Engineering (CSCE) graduate standing. (Typically offered: Irregular)

\section*{CSCE 5783. Cloud Computing and Security. 3 Hours.}

Cloud computing has entered the mainstream of information technology, providing highly elastic scalability in delivery of enterprise applications and services. In this course, we will focus on the architecture of today's cloud computing, the technologies used within them, application development using contemporary cloud computing tools, and the security risks and management in the cloud. Graduate degree credit will not be given for both CSCE 4783 and CSCE 5783. Prerequisite: CSCE 3613 or graduate standing in Computer Science Computer Engineering(CSCE). (Typically offered: Irregular)

\section*{CSCE 5813. Computer Graphics. 3 Hours.}

Introduction to the theory and algorithms used in computer graphics systems and applications. Topics include: 2D and 3D geometric models (points, lines, polygons, surfaces), affine transformations (rotation, translation, scaling), viewpoint calculation (clipping, projection), lighting models (light-material interactions, illumination and shadow calculation). Students will implement their own graphics pipeline to demonstrate many of these techniques. Higher level computer graphics applications will be created using OpenGL. Graduate degree credit will not be given for both CSCE 4813 and CSCE 5813. Prerequisite: CSCE 2014 with a grade of C or better or Computer Science Computer Engineering (CSCE) graduate standing. (Typically offered: Irregular)

\section*{CSCE 5823. Multiprocessor Systems on Chip. 3 Hours.}

This course covers the latest trends in advanced computer architecture for multiprocessor systems on chip for embedded and real time systems. Topics covered include multicore architectures, modeling abstractions, run time systems, and MIMD/SIMD heterogeneous architectures, \(\mathrm{Hw} / \mathrm{Sw}\) co-design techniques. Prerequisite: CSCE 3613 and CSCE 4213. (Typically offered: Irregular)

CSCE 5833. Computer Architecture Security. 3 Hours.
This course will cover fundamental principles and emerging implementation strategies to reason about, design and construct architecture level security capabilities in the manycore era. Coverage includes formal security models, new and emerging considerations for heterogeneous multiprocessor system on chip architectures, hardware and software implementation methods, operating systems for run time security enforcement. Prerequisite: CSCE 4213 or graduate standing in Computer Science Computer Engineering (CSCE). (Typically offered: Irregular)

\section*{CSCE 5843. Reconfigurable Computing. 3 Hours.}

This course will cover emerging and proposed techniques and issues in Reconfigurable Computing. Topics will include FPGA technologies, CAD/CAE tools, \(\mathrm{Hw} / \mathrm{Sw}\) co-design, system level synthesis, programming models and abstractions
Prerequisite: Graduate standing in CSCE Department. (Typically offered: Irregular)
CSCE 5853. Information Security. 3 Hours.
This course covers principles, mechanisms, and policies governing confidentiality, integrity, and availability of digital information. Topics to be covered include security concepts and mechanisms, security policies, multilevel security models, system vulnerability, threat and risk assessment, basic cryptography and its applications, intrusion detection systems. Graduate degree credit will not be given for both CSCE 4853 and CSCE 5853. Prerequisite: CSCE 3193 or Computer Science Computer Engineering (CSCE) graduate standing. (Typically offered: Irregular)

\section*{CSCE 590V. Advanced Individual Study. 1-3 Hour.}

Advanced graduate level individual study directed by faculty in current research topics, state of the art, or advanced methodology in one of the major computer science or computer engineering areas. (Typically offered: Irregular)

\section*{CSCE 5914. Advanced Digital Design. 4 Hours.}

To master advanced logic design concepts, including the design and testing of synchronous and asynchronous combinational and sequential circuits using state of the art CAD tools. Graduate degree credit will not be given for both CSCE 5914 and CSCE 4914 or ELEG 4914 and ELEG 5914. Corequisite: Lab component. Prerequisite: Graduate students majoring in Computer Engineering, Computer Science, or Electrical Engineering. (Typically offered: Irregular)

CSCE 5943. Computer Arithmetic Circuits. 3 Hours.
Examination of fundamental principles of algorithms for performing arithmetic operations in computers. This course provides sufficient theoretical and practical information to prepare the digital design engineer with an awareness of basic techniques for the realization of arithmetic circuits. Prerequisite: Computer Science Computer Engineering (CSCE) graduate standing. (Typically offered: Irregular)

CSCE 610V. Master's Thesis. 1-6 Hour.
Master's thesis. (Typically offered: Fall and Spring) May be repeated for degree credit

CSCE 620V. Post-Master's Research. 1-18 Hour.
Post-master's research. (Typically offered: Fall and Spring)
CSCE 690V. Doctoral Individual Study. 1-3 Hour.
Advanced doctoral level individual study directed by faculty in current research topics, state of the art, or advanced methodology in one of the major computer science or computer engineering areas. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CSCE 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{Counselor Education (CNED)}

\section*{Courses}

\section*{CNED 3053. The Helping Relationship. 3 Hours.}

Development of an understanding of the helping relationship. Topics include establishing a working alliance, problem recognition and referral to appropriate resources. Prerequisite: PSYC 2003. (Typically offered: Fall and Spring)

\section*{CNED 4003. Classroom Human Relations Skills. 3 Hours.}

A study of interpersonal skills important to improving teacher-student relationships and achievement in classrooms. Human communication systems related to motivation, achievement, and educator-student relationships are studied. The attainment of effective human relations skills is emphasized. Prerequisite: Junior or Senior standing required. (Typically offered: Fall and Spring)

CNED 5003. Counseling and Human Development. 3 Hours.
This course is intended to give students a broad overview of human nature/behavior through knowledge of lifespan developmental theory, personality development, modern \& post-modern approaches to the study of human nature/behavior, and learning theory. Throughout the course, close attention will be given to human ecology or those social/historical/cultural/environmental forces furthering or impeding development. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

\section*{CNED 5193. Clinical Mental Health Counseling. 3 Hours.}

An introductory study of community counseling. The course content includes information concerning the educational, historical, philosophical, and psychological foundations of community counseling as well as specific traits and skills of professional community counselors. In addition, the course is designed to provide introductory level concepts and skills required for future certification and licensure as counseling professionals. Prerequisite: Graduate student status. (Typically offered: Spring)

\section*{CNED 5203. Foundations of the Counseling Profession. 3 Hours.}

A study of the counseling profession applicable to school, college and community agency settings. Introduction to the basic educational, historical, philosophical foundations of counseling as well as specific traits and skills of counselors. The course is also designed to provide beginning level concepts and skills required for certification and licensure. Prerequisite: Must be taken first year in program. (Typically offered: Fall and Summer)

\section*{CNED 5213. Lifestyle \& Career Development. 3 Hours.}

Theories of career development and counseling, including the use of occupational information sources and career assessment tools and techniques. Prerequisite:
CNED 5333. (Typically offered: Summer)

\section*{CNED 5223. Introduction to School Counseling. 3 Hours.}

Philosophy, organization, and practices of a counseling program in the elementary and secondary school. The school counselor's role as counselor, consultant, and coordinator, professional identity, and legal issues are included. Includes a significant focus on ethical standards and issues. (Typically offered: Fall Even Years)

CNED 5303. Individual Appraisal. 3 Hours.
Analysis of concepts, methods, and procedures utilized in individual appraisal. (Typically offered: Fall)

CNED 5313. Program Organization and Information Management. 3 Hours.
This course addresses needs and strategies for effective development and management of school counseling programs and guidance curriculum. Prerequisite: CNED 5223. (Typically offered: Spring Odd Years)

CNED 5323. Counseling Theory. 3 Hours.
Introductory survey and critical analysis of major alternative theoretical perspectives in counseling. (Typically offered: Fall and Summer)

CNED 5333. Basic Counseling Techniques. 3 Hours.
Introduction to basic counseling techniques and skills common to multiple theoretical perspectives. Prerequisite: Master's students in Counseling. (Typically offered: Fall and Spring)

\section*{CNED 5343. Counseling Practicum. 3 Hours.}

Supervised counseling practice. CNED faculty consent required. Pre- or Corequisite: CNED 5303, CNED 5403, CNED 5363 and CNED 5373. Prerequisite: CNED 5203, CNED 5323, CNED 5333, CNED 6133, and faculty consent required. (Typically offered: Fall and Spring)

\section*{CNED 5352. Psychopharmacology. 2 Hours.}

Study of theory, research, \& practice issues pertaining to psychopharmacology for non-medical practitioners. Prerequisite: CNED 5203, CNED 5323, and CNED 5333. (Typically offered: Spring and Summer)

\section*{CNED 5363. Dynamics of Group Counseling. 3 Hours.}

Therapeutic and other theoretical information is presented regarding group process and the counselor's role in that process. An experiential group experience is required. Prerequisite: CNED 5333 and CNED 5323. (Typically offered: Fall and Spring)
CNED 5373. Ethical and Legal Issues in Counseling. 3 Hours.
Review of ethical and legal standards governing professional counselor training, research, and counseling practice; including client rights; confidentiality; the client-counselor relationship; and counseling research, training, and supervision. Prerequisite: CNED 5003 and CNED 5203. (Typically offered: Fall)

\section*{CNED 5383. Crisis Intervention Counseling. 3 Hours.}

Analysis and application of short-term counseling intervention strategies in crisis situations, with special attention to incidents involving rape, physical, or emotional abuse, divorce, suicidal depression, grief, martial or family instability, and violent conflict. Prerequisite: CNED 5333. (Typically offered: Summer)

CNED 5403. Diagnosis and Treatment in Counseling. 3 Hours.
Procedures in case management utilizing both clinical and interview data in assisting children, adolescents, and adults in educational, vocational, personal, and social planning. Prerequisite: CNED 5303, CNED 5323 and CNED 5333. (Typically offered: Fall and Spring)

\section*{CNED 5443. Vocational Rehabilitation Foundations. 3 Hours.}

Survey of the philosophy of vocational rehabilitation, including history and legislation. (Typically offered: Fall Even Years)

\section*{CNED 5453. Medical Aspects of Disability. 3 Hours.}

Orientation to medical and medically related aspects of various disabling conditions with emphasis on the severely disabled. (Typically offered: Spring Even Years)

\section*{CNED 5463. Rehabilitation Case Management. 3 Hours.}

Counseling process in the rehabilitation setting. Focusing upon effective counseling strategies, representative cases, and effective case management methods.
(Typically offered: Spring Odd Years)
CNED 5473. Psychological Aspects of Disability. 3 Hours.
Intensive study of the psychological aspects of adjustment to atypical physique and prolonged handicapping condition. (Typically offered: Fall Odd Years)

\section*{CNED 5483. Counseling Research. 3 Hours.}

An in-depth examination of counseling research methodology and issues to prepare students to critically evaluate and use counseling research in their professional practice. (Typically offered: Fall, Spring and Summer)

CNED 5493. Principles and Practices of Psychiatric Rehabilitation. 3 Hours.
The course introduces students to the principles and practices of recovery-oriented, evidence-based psychiatric rehabilitation. Through lectures, guest presentations, films, discussions, and readings, students (a) explore the clinical, psychosocial, and vocational aspects of psychiatric disabilities and (b) examine psychiatric rehabilitation principles and practices to facilitate community integration and successful employment outcomes for individuals with psychiatric disabilities. (Typically offered: Fall)

\section*{CNED 5513. Counseling and Human Diversity. 3 Hours.}

Examination of human and cultural diversity, emphasizing issues of race, class, and socioeconomic status, and how they impact our clients as individuals and as family and society members. (Typically offered: Summer)

\section*{CNED 5533. Introduction to Adventure Therapy. 3 Hours.}

This course builds on the foundational understanding of group counseling theory and skills by introducing students to Adventure Therapy (AT), an activity-oriented form of group counseling. Students will integrate previous knowledge pertaining to group counseling with new AT concepts as well as review issues related to current research, best practices, and working with diverse populations. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
CNED 5541. Telemental Health Counseling. 1 Hour.
A study of the process, application, and implementation of technology-assisted counseling/therapy that meets state academic requirements for the distance delivery of clinical services. Emphasis will include integration of ethical and social responsibility, current standards of practice for distance delivery, and appropriateness of services with diverse individuals, relationships, and families. Prerequisite: CNED 5203, CNED 5323, and CNED 5333. (Typically offered: Spring and Summer)
CNED 5583. Placement of Persons with Disabilities. 3 Hours.
Focuses on placement theory and practice as they apply to persons who experience disabilities. Special attention is given to RehabMark approach. (Typically offered: Summer)

\section*{CNED 574V. Counseling Internship. 1-9 Hour.}

A 600-clock-hour field placement in an approved setting over a minimum of two continuous semesters. For students completing a counseling internship in a school setting, successful completion of a criminal background check is required before beginning internship. Pre- or Corequisite: CNED 5213. Prerequisite: CNED 5203, CNED 5303, CNED 5323, CNED 5333, CNED 5343, CNED 5363, CNED 5373, CNED 5403, CNED 5513. CNED faculty consent required. (Typically offered: Fall and Spring) May be repeated for up to 9 hours of degree credit.

\section*{CNED 6003. Theories and Foundations of Addictions. 3 Hours.}

A study of behavioral and substance addictions, including an overview of differential treatment. Prerequisite: CNED 5323 and CNED 5333, and admission to the CNED masters or doctoral program or departmental consent. (Typically offered: Spring and Summer)

CNED 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CNED 6013. Advanced Counseling Theory and Methods. 3 Hours.
Critical analysis of major theoretical perspectives in counseling, including both group and individual counseling strategies for dealing with affective, cognitive, and behavioral dysfunction. Prerequisite: CNED doctoral standing or permission. (Typically offered: Spring Even Years)

CNED 6023. Foundations of Marriage and Family Counseling Therapy. 3 Hours. Comprehensive exploration of the current theories/techniques of marriage, family and couples counseling. Prerequisite: CNED 5323 and CNED 5333 and CNED doctoral or masters standing or permission. (Typically offered: Summer)

CNED 6033. Advanced Group Theory and Methods. 3 Hours.
Comparative study of theories and processes of group counseling. Includes supervised experience in group facilitation with video recording and playback. Prerequisite: CNED 5363 or equivalent and CNED doctoral or masters standing or permission. (Typically offered: Spring Odd Years)
CNED 6043. Supervision of Counselors. 3 Hours.
Analysis, assessment, and practical application of counselor supervision techniques in treatment and training programs. Prerequisite: CNED doctoral standing and CNED faculty consent (Typically offered: Fall Even Years)

CNED 605V. Independent Study. 1-18 Hour.
Independent study. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

\section*{CNED 6073. Advanced Research in Counseling. 3 Hours.}

This course involves acquiring a knowledge and understanding of the use of research in counseling and the development of new research in the counseling profession that has heuristic value. Prerequisite: Graduate standing. (Typically offered: Spring)
CNED 6093. Counseling Children and Adolescents Through Play. 3 Hours. Introduction to counseling children and adolescents through play; including the process, theories, techniques, and materials applicable to children and adolescents in a pluralistic society. Prerequisite: CNED 5323, CNED 5333, CNED 6133, and CNED doctoral or masters standing or permission. (Typically offered: Spring)

CNED 6133. Introduction to Play Therapy. 3 Hours.
This course is an introduction to the basic concepts of child-centered play therapy (CCPT). Students will learn the conceptual framework of child-centered play therapy, as well as the attitudes and skills necessary to establish and maintain facilitative relationships with children that encourage their self-expression and facilitate change. Prerequisite: CNED 5323 and CNED 5333 and CNED doctoral or masters standing or consent. (Typically offered: Irregular)

CNED 6143. Teaching Counselor Education and Supervision. 3 Hours.
This course is designed to enhance the professional development and acculturation of doctoral students in order to facilitate their success as instructors of counselor education and supervision. Prerequisite: CNED doctoral status or permission from faculty. (Typically offered: Fall Odd Years)

CNED 6223. Foundations of Counselor Education and Supervision. 3 Hours. This course is designed to enhance the professional development and acculturation of doctoral students in order to facilitate their success in professional leadership roles of counselor education, supervision, counseling practice, and research competencies. Prerequisite: CNED Doctoral status or permission. (Typically offered: Spring Odd Years)

\section*{CNED 6243. Disability Policy in the U.S.. 3 Hours.}

An analysis of public policy approaches to disability in the U.S. Examines the political and philosophical origins of disability policy; reviews major disability legislation and its effects on policy stakeholders; describes recent initiatives; and analyzes evolution of disability policy within context of changing societal, economic, and political conditions. (Typically offered: Fall)

\section*{CNED 6343. Cultural Foundations and Counseling. 3 Hours.}

To gain learning experiences in pedagogy relevant to multicultural issues and competencies, including social change theory and advocacy action planning. To identify current multicultural issues as they relate to social change theories, ethical and legal considerations, disability, gender, sexuality, social justice, and advocacy models. Prerequisite: CNED or RHAB Doctoral Standing or Permission. (Typically offered: Fall Even Years)

\section*{CNED 6713. Advanced Counseling Practicum. 3 Hours.}

Supervised counseling practice. A 100-clock hour approved practical counseling experience. Prerequisite: CNED doctoral standing and permission of CNED faculty and Clinical Coordinator. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

\section*{CNED 674V. Internship. 1-18 Hour.}

Supervised field placement (Clinical/Instructorship/Supervision/Research).
Prerequisite: CNED doctoral standing, CNED faculty consent and CNED Clinical Coordinator consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

CNED 699V. Seminar. 1-18 Hour.
Seminar. Prerequisite: CNED Doctoral standing or permission. (Typically offered: Summer) May be repeated for up to 18 hours of degree credit.

CNED 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy and consent. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{Criminology (CRIM)}

\section*{Courses}

CRIM 2003. Introduction to Criminology and Criminal Justice (ACTS Equivalency = CRJU 1023). 3 Hours.
Introduction to the field of criminology and the criminal justice system, including theories and patterns of criminal behavior, how criminal justice data are collected, social research methods, historical foundations of the field, institutions, and types of crimes and offenders. Provides a foundation for further criminological and theoretical studies. (Typically offered: Fall, Spring and Summer)

\section*{CRIM 2003H. Honors Introduction to Criminology and Criminal Justice. 3}

\section*{Hours.}

An introduction to the field history, development, and theoretical underpinnings of criminology and the criminal justice system, including theories aspects such as law enforcement, the courts, and patterns of criminal behavior, how criminal justice data are collected, social research methods, historical foundations of the field, institutions, and types of crimes and offenders. Provides a foundation for further criminological and theoretical studies. Prerequisite: Honors standing. (Typically offered: Fall, Spring and Summer)
This course is equivalent to CRIM 2003.

\section*{CRIM 2043. Sociology of Criminal Law. 3 Hours.}

Explores the history of criminal law in the United States, the construction of crime and punishment, and issues facing the contemporary legal system. (Typically offered: Fall and Spring)

\section*{CRIM 2513. Criminal Investigation. 3 Hours.}

Survey of the theories, concepts, and legal conditions concerning the techniques used in the location, preservation and presentation of evidence. Prerequisite: CRIM 2003. (Typically offered: Fall and Spring)

\section*{CRIM 3011. Special Topics. 1 Hour.}

Designed to develop the tools to write effectively in the social sciences, including skills related to organizing manuscripts, writing problem statements, identifying and synthesizing research, and revising and editing. Prerequisite: SOCI 2013 or CRIM 2003. (Typically offered: Fall and Spring) May be repeated for up to 3 hours of degree credit.
This course is cross-listed with SOCI 3011.
CRIM 3023. Criminological Theory. 3 Hours.
Advanced survey of theories of crime causation. Examines broad sociological paradigms, as well as both individual and aggregate-level explanations of crime causation. Applies criminological theories to contemporary issues associated with crime and criminal justice. Prerequisite: SOCI 2013. (Typically offered: Fall and Spring)

\section*{CRIM 3023H. Honors Criminological Theory. 3 Hours.}

Advanced survey of theories of crime causation. Examines broad sociological paradigms, as well as both individual and aggregate-level explanations of crime causation. Applies criminological theories to contemporary issues associated with crime and criminal justice. Prerequisite: SOCI 2013 and junior standing. (Typically offered: Fall and Spring)
This course is equivalent to CRIM 3023.

\section*{CRIM 3043. The Police and Society. 3 Hours.}

Overview of origins, theories, development, practice, and current issues in policing in contemporary society. Prerequisite: CRIM 2003. (Typically offered: Fall and Spring)

\section*{CRIM 3053. Serial Crime. 3 Hours.}

Historical development of criminal profiling in serial homicide, including sex crimes, stalking, and arson. Focuses on behavioral and criminological theory and a critical examination of different profiling methodologies. Prerequisite: SOCI 2013. (Typically offered: Irregular)
This course is cross-listed with SOCI 3053.
CRIM 3063. Victimology. 3 Hours.
Introduction to the scientific study of victimization. Examines conceptual boundaries of victimology research, covers theories, statistics and trends relevant to victimology, reviews the victim blaming and defending perspectives, explores practical applications of victimology, and the social, legal, and evaluates criminological issues that stem from concern over victims. Prerequisite: SOCI 2013. (Typically offered: Fall and Spring)
This course is cross-listed with SOCI 3063.

\section*{CRIM 3203. Corrections and Social Control. 3 Hours.}

Overview of correctional systems and punishment. Focuses on theories of correctional philosophies, practices, and procedures, along with the historical development and modern practices of corrections, sentencing, facilities, and issues facing correctional populations. Examines principles and practices of treatment and rehabilitation. Prerequisite: CRIM 2003. (Typically offered: Fall and Spring) This course is cross-listed with SOCI 3203.

CRIM 3413. Special Topics. 3 Hours.
Designed to cover specialized topics not usually presented in regular courses. Prerequisite: SOCI 2013. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{CRIM 3413H. Honors Special Topics. 3 Hours.}

Designed to cover specialized topics not usually presented in regular courses. Prerequisite: Honors standing and SOCI 2013. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
This course is equivalent to CRIM 3413.
CRIM 3443. Stratification and Crime. 3 Hours.
Examines how race, age, gender, social class, and geographic location impact criminal offending, victimization, and arrest. Subsequently, it explores how the criminal justice system stages of policing, sentencing, and incarceration further entrench or mitigate disparities across social strata group. Prerequisite: SOCI 2013. (Typically offered: Spring)

\section*{CRIM 3453. Immigration and Crime. 3 Hours.}

Provides a comprehensive foundation of the relationship between immigration, one of the most powerful forces that influences a nation's social fabric, and crime. Focuses not only on U.S. immigration but also crime in the global context. Prerequisite: SOCI 2013. (Typically offered: Fall)
This course is cross-listed with SOCI 3453.
CRIM 3503. Criminal Procedures. 3 Hours.
Critical examination of how individual rights and police procedures are balanced with focus on arrests, use of force, identification, and search and seizure. Prerequisite: CRIM 2003. (Typically offered: Irregular)

CRIM 3513. Criminal Evidence. 3 Hours.
Examination of how evidence is collected, processed, and presented in court, with an emphasis on the competing interests of crime control and individual liberties. Prerequisite: CRIM 2003. (Typically offered: Irregular)

\section*{CRIM 3723. Deviant Behavior. 3 Hours.}

Sociological overview of disconcerting conduct, its definition, theoretical understandings and research. Specific topics may include: interpersonal violence, self-destructive disorders, controversial lifestyles, substance abuse, as well as the relationship between inequality and disturbing acts. Prerequisite: SOCI 2013. (Typically offered: Irregular)
This course is cross-listed with SOCI 3723.

\section*{CRIM 399VH. Honors Course. 1-6 Hour.}

Undergraduate honors thesis hours designed to engage in advanced undergraduate research under the direction of a faculty advisor. Prerequisite: Honors standing. (Typically offered: Fall and Spring) May be repeated for up to 12 hours of degree credit.

\section*{CRIM 4003. Internship in Criminal Justice and Criminology. 3 Hours.}

Supervised experience in municipal, county or state criminal justice agency, or any other agency which is approved by instructor. Prerequisite: CRIM 2003. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{CRIM 4013. SPECIAL TOPICS. 3 Hours.}

Offerings vary; check for particular course topics offered. Designed to cover specialized topics in greater depth than regular survey courses provide. Prerequisite: Junior standing. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{CRIM 403V. Individual Study. 1-3 Hour.}

In-depth individual or group study with a faculty member on advanced sociological readings and/or to participate in supervised research as an experience-based course. Faculty permission required in advance of enrollment. Prerequisite: Instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CRIM 4063. Organizations in Society. 3 Hours.
Review of literature on work and organizations, with focus on race, class, gender inequalities, and interactions between society and organizations; discussion of topics related to white collar crime and deviant behavior inside modern corporations. Prerequisite: SOCI 2013. (Typically offered: Spring)
This course is cross-listed with SOCI 4063.
CRIM 4143. Juvenile Justice. 3 Hours.
Examination of juvenile justice system and juvenile crime, including historical development of the system and treatment of juvenile delinquents along with legal, correctional, and treatment processes and philosophies. Emphasis on current issues facing delinquents, the system, and delinquency prevention in addition to trends in juvenile crime. Prerequisite: CRIM 2003. (Typically offered: Fall and Spring) This course is cross-listed with SOCI 4143.

\section*{CRIM 4223. Criminal Violence. 3 Hours.}

Explores definitions, patterns, explanations, and potential interventions of aggression and criminal violence. Discusses the temporal, spatial, and demographic patterns of violence in the United States. Assesses various explanations of violence and considers possible interventions. Examines the literature on the structural- and individual-level correlates of violent criminal offending. Prerequisite: CRIM 2003 and junior standing. (Typically offered: Spring)

\section*{CRIM 4233. Death Penalty. 3 Hours.}

Examines problems and social issues related to the death penalty in the U.S., including the history of capital punishment, Supreme Court decisions, how various jurisdictions seek the death penalty, the comparative costs of incarceration and execution, miscarriages of justice, and how the criminal justice system responds to these issues. Prerequisite: CRIM 2003 or SOCI 2013. (Typically offered: Irregular) This course is cross-listed with SOCI 4233.

\section*{CRIM 4303. Spatial Analyses for Social Data. 3 Hours.}

Focuses on learning about spatial data and how to use spatial analyses to detect patterns and answer research questions related to crime occurrence. Emphasizes how results translate to practitioner efforts and policy. (Typically offered: Spring)

\section*{CRIM 4443. Terrorism and Homeland Security. 3 Hours.}

Examines the evolution of modern terrorism and homeland security, focusing primarily on the dynamics of American terrorist movements (ideologies, motives, and tactics). Social, political, and criminal justice responses to terrorism are also considered. Prerequisite: Junior standing. (Typically offered: Spring)

\section*{Crop, Soil and Environmental Sciences (CSES)}

\section*{Courses}

CSES 1203. Introduction to Plant Sciences. 3 Hours.
An introduction to basics of agricultural crop plant structure, growth, and production. (Typically offered: Fall and Spring)

\section*{CSES 2013. Pest Management. 3 Hours.}

Introduction to basic principles of pest management as they relate to vertebrate animals, insects, plant disease and weeds. Selected pests are studied with emphasis on current management approaches and alternative pest control. (Typically offered: Spring)

\section*{CSES 2101L. Crop Science Laboratory. 1 Hour.}

A series of laboratory experiments designed to reinforce principles of plant growth and development, reproduction, classification, and the utilization of plant products. Emphasis is placed on major crop plant species. Experiments are conducted by individuals or by teams. Laboratory consists of a single, 2-hour period each week. Required for Crop Management majors. Corequisite: CSES 2103. (Typically offered: Spring)

\section*{CSES 2103. Crop Science. 3 Hours.}

Principles of crop growth, development, and utilization and how these principles relate to production. Emphasis on major agronomic crop species. Lecture 3 hours per week. (Typically offered: Spring)

\section*{CSES 2201L. Soil Science Laboratory. 1 Hour.}

Field and laboratory exercises related to the study of the physical, chemical, and biological properties of soils. Laboratory mandatory for all crop management and environmental, soil, and water science majors and optional for others. Laboratory 2 hours per week. Pre- or Corequisite: CSES 2203. (Typically offered: Fall and Spring)

CSES 2203. Soil Science. 3 Hours.
Origin, classification, and physical, chemical, and biological properties of soils. Lecture 3 hours, discussion 1 hour per week. Corequisite: Drill component. Prerequisite: MATH 1203 or higher (to include MATH 1213, MATH 1284C, MATH 1514, MATH 2213, MATH 2043, MATH 2053, MATH 2445, MATH 2514, MATH 2554, MATH 2564, or MATH 2574) and CHEM 1103 or CHEM 1073. (Typically offered: Fall and Spring)

\section*{CSES 3023. Crop, Soil, and Environmental Sciences Colloquium. 3 Hours.} A communication-intensive course covering topics in agronomy and environmental, soil, and water science with particular emphasis on spoken communication but also including written communication, group activities, professionalism, ethics, problem solving, and information retrieval. A student-oriented class with collaborative participation. Colloquium workshop: 3 hours per week. Prerequisite: COMM 1313 and Junior or Senior standing only. (Typically offered: Fall)

CSES 3214. Soil Resources and Nutrient Cycles. 4 Hours.
Integration of the fundamental concepts of the biological, chemical, and physical properties of soil systems and their roles in managing soil resources. Lecture 3 hours, laboratory 3 hours per week. Pre- or Corequisite: BIOL 2013 and BIOL 2011L. Corequisite: Lab component. Prerequisite: CSES 2203. (Typically offered: Spring Odd Years)

\section*{CSES 3312. Cotton Production. 2 Hours.}

Principles and techniques associated with production of cotton. Recitation 2 hours per week. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Fall Even Years)

\section*{CSES 3322. Soybean Production. 2 Hours.}

An overview of the history and utilization of soybean as well as the physiological and environmental basis for the development of economical soybean production practices. Recitation 2 hours per week. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Spring Odd Years)

\section*{CSES 3332. Rice Production. 2 Hours.}

A study of the principles and practices involved in rice culture worldwide with major emphasis on the United States. Recitation 2 hours per week. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Fall Odd Years)

\section*{CSES 3342. Cereal Grain Production. 2 Hours.}

An overview of the botany, production, cultural practices, soil \& climatic adaptation and utilization of the major cereal grain crops. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Spring Even Years)

CSES 355V. Soil Profile Description. 1-2 Hour.
Training for soil profile description writing and membership of judging teams. (Typically offered: Fall) May be repeated for up to 8 hours of degree credit.

\section*{CSES 3703. Precision Agriculture for Crops. 3 Hours.}

This course will provide students with a practical understanding of precision agriculture and crop/ecosystem monitoring with remote and proximal sensing technology. Prerequisite: MATH 1203 and CSES 1203. (Typically offered: Spring)

CSES 400V. Special Problems. 1-6 Hour
Work on special problems in crop, soil and environmental sciences or related field. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{CSES 4013. Advanced Crop Science. 3 Hours.}

Fundamental concepts of crop physiology, crop improvement, seed science, and crop production systems. Recitation 3 hours per week. Prerequisite: CSES 2103 and CSES 2203. (Typically offered: Spring)

CSES 402V. Special Topics. 1-3 Hour.
Studies of selected topics in crop, soil and environmental sciences not available in other courses. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

\section*{CSES 4103. Plant Breeding. 3 Hours.}

Basic principles involved in plant breeding programs to improve crop plants and seed programs. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: ANSC 3123 or BIOL 2323. (Typically offered: Fall Even Years)

CSES 4133. Ecology and Morphology of Weedy and Invasive Plants. 3 Hours.
Study of weeds as economic pests occurring in both agricultural and nonagricultural situations and including poisonous plants and other specific weed problems. Gross morphological plant family characteristics which aid identification, habitat of growth and distribution, ecology, competition, and allelopathy are discussed. Lecture 2 hours, laboratory 2 hours a week. Corequisite: Lab component. Prerequisite: CSES 2103 or HORT 2003. (Typically offered: Fall)

CSES 4143. Principles of Weed Control. 3 Hours.
Advanced concepts and technology used in modern weed control practices and study of the chemistry and specific activity of herbicides in current usage. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: CHEM 1073 and CHEM 1071L. (Typically offered: Spring)

\section*{CSES 4224. Soil Fertility. 4 Hours.}

Study of the soil's chemical, biological and physical properties, and human modification of these properties, as they influence the uptake and utilization of the essential nutrients by plants. Lecture 3 hours, laboratory 2 hours per week. Preor Corequisite: CHEM 1123 and CHEM 1121L or (CHEM 1073 and CHEM 1071L and CHEM 2613 and CHEM 2611L). Corequisite: Lab component. Prerequisite: CSES 2201L and CSES 2203. (Typically offered: Fall)

\section*{CSES 4253. Soil Classification and Genesis. 3 Hours.}

Lecture and field evaluation of soil properties and their relation to soil genesis and soil classification with emphasis on soils of Arkansas. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: CSES 2203 and CSES 2201L. (Typically offered: Fall Odd Years)

CSES 4553. Wetland Soils. 3 Hours.
This course explains the chemical, physical, and morphological characteristics of wetland soils and describes the techniques for identifying wetland soils using field indicatiors and monitoring equipment. This course also explains principles of wetland creation, restoration, and mitigation - all key components in assuring the sustainability of valuable wetland resources. Prerequisite: CSES 2203 and CSES 2201L or CSES 355V. (Typically offered: Spring Odd Years)

CSES 462V. Internship. 1-6 Hour.
Supervised practical work experience in agronomy and environmental science to develop and demonstrate professional competence. Faculty approval of project proposal prior to enrollment and written and oral reports after the project is complete are required. Prerequisite: Instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CSES 5001. Weed Science Practicum. 1 Hour.
Training for membership on weed team, through participation. Prerequisite: Graduate standing. (Typically offered: Summer)

\section*{CSES 5013. Crop Physiology. 3 Hours.}

Understanding and quantitative measurement of physiological processes, plant responses, and environmental parameters in relation to the production of crops. Prerequisite: BIOL 4303. (Typically offered: Spring Even Years)

\section*{CSES 5023. Physiology of Herbicide and Plant Interaction. 3 Hours.}

The reproduction, growth, and development of weeds and the ecological factors affecting these processes; development and mechanisms of herbicide resistance, flow of herbicide-resistance genes; and development of herbicide-resistant crops. Corequisite: Lab component. Prerequisite: CSES 4143 or CSES 5143 (formerly CSES 4143) and (BIOL 4303 or CHEM 5813). (Typically offered: Spring Odd Years)

CSES 502V. Special Problems Research. 1-6 Hour.
Original investigations on assigned problems in agronomy. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

\section*{CSES 5033. Advanced Soil Fertility and Plant Nutrition. 3 Hours}

Study of water uptake, ion absorption, translocation and metabolism in higher plants. Lecture 3 hours per week. Prerequisite: BIOL 4303 and CHEM 2613 and CHEM 2611L. (Typically offered: Spring Even Years)

CSES 504V. Special Topics. 1-4 Hour
Topics not covered in other courses or a more intensive study of specific topics in agronomy. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

CSES 5073. Advanced Crop Science. 3 Hours.
Fundamental concepts of crop physiology, crop improvement, seed science, and crop production systems. Recitation 3 hours per week. Graduate degree credit will not be given for both CSES 4013 and CSES 5073. (Typically offered: Fall)

\section*{CSES 5083. The Business of Plant Breeding. 3 Hours.}

Students will gain knowledge and develop skills in five areas central to successful execution of plant breeding in private and public environments: 1) breeding industry, 2) breeding goals, new product development and marketing, 3) breeding budgets and finance, 4) regulations of the breeding industry, and 5) leadership basics. (Typically offered: Fall Odd Years)

CSES 5093. Plant Breeding. 3 Hours.
Basic principles involved in plant breeding programs to improve crop plants and seed programs. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both CSES 4103 and CSES 5093. Corequisite: Lab component. Prerequisite: ANSC 3123 or BIOL 2323. (Typically offered: Fall Even Years)

CSES 5103. Scientific Presentations. 3 Hours.
Experience in procedures required for professional presentations of scientific papers, seminars, posters; and research findings at meetings in conferences, and with discussion groups. Instruction in organization of materials, visual aids, and good speaking habits. Lecture 3 hours per week. Prerequisite: Graduate standing. (Typically offered: Fall)

\section*{CSES 5114. Soil Fertility. 4 Hours}

Study of the soil's chemical, biological and physical properties, and human modification of these properties, as they influence the uptake and utilization of the essential nutrients by plants. Lecture 3 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both CSES 4224 and CSES 5114. Corequisite: Lab component. (Typically offered: Fall)

CSES 5133. Ecology and Morphology of Weedy and Invasive Plants. 3 Hours.
Study of weeds as economic pests occurring in both agricultural and nonagricultural situations and including poisonous plants and other specific weed problems. Gross morphological plant family characteristics which aid identification, habitat of growth and distribution, ecology, competition, and allelopathy are discussed. Lecture 2 hours, laboratory 2 hours a week. Graduate degree credit will not be given for both CSES 4133 and CSES 5133. Corequisite: Lab component. Prerequisite: CSES 2103 or HORT 2003. (Typically offered: Fall)
CSES 5143. Principles of Weed Control. 3 Hours.
Advanced concepts and technology used in modern weed control practices and study of the chemistry and specific activity of herbicides in current usage. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both CSES 4143 and CSES 5143. Corequisite: Lab component. Prerequisite: CHEM 1073 and CHEM 1071L. (Typically offered: Spring)
CSES 5214. Analytical Research Techniques in Agronomy. 4 Hours.
Preparation and analysis of plant and soil samples utilizing spectrophotometry, isotopes, and chromatographic separation methods. Additionally, measurements are made of photosyntheses, respiration, water relationships, light, and temperatures in whole plants. Lecture 2 hours, laboratory 4 hours per week. Corequisite: Lab component. Prerequisite: BIOL 4303 and CHEM 2613 and CHEM 2611L. (Typically offered: Fall Even Years)
CSES 5224. Soil Physics. 4 Hours.
Physical properties of soils and their relation to other soil properties, growth of plants and transport of water, oxygen, heat, and solutes such as pesticides and plant nutrients. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CSES 2203 and MATH 1203. (Typically offered: Spring)

\section*{CSES 5253. Soil Classification and Genesis. 3 Hours.}

Lecture and field evaluation of soil properties and their relation to soil genesis and soil classification with emphasis on soils of Arkansas. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both CSES 4253 and CSES 5253. Corequisite: Lab component. Prerequisite: CSES 2203 and CSES 2201L. (Typically offered: Fall Odd Years)

\section*{CSES 5264. Microbial Ecology. 4 Hours.}

A study of the microorganisms in soil and the biochemical processes for which they are responsible. Lecture 3 hours, laboratory 3 hours per week. Additional suggested prerequisites are BIOL 2013, CSES 2203, and ENSC 3003. Corequisite: Lab component. Prerequisite: BIOL 1543 and BIOL 3863 or ENSC 3223. (Typically offered: Fall Odd Years)

\section*{CSES 5453. Soil Chemistry. 3 Hours.}

Application of the principles of chemistry to processes of agronomic and environmental importance in soils. Soil clay mineralogy, soil solution thermodynamics, structure and reactivity of humus, surface complexation and ion exchange, electro-chemical phenomena, and colloidal stability. Prerequisite: CSES 2203 and CHEM 1123 and CHEM 1121L. (Typically offered: Fall Even Years)

\section*{CSES 5533. Wetland Soils. 3 Hours.}

This course explains the chemical, physical, and morphological characteristics of wetland soils and describes the techniques for identifying wetland soils using field indicatiors and monitoring equipment. This course also explains principles of wetland creation, restoration, and mitigation - all key components in assuring the sustainability of valuable wetland resources. Graduate degree credit will not be given for both CSES 4553 and CSES 5533. Prerequisite: CSES 2203 and CSES 2201L or CSES 355V. (Typically offered: Spring Odd Years)

\section*{CSES 5543. Plant Genomics. 3 Hours.}

Plant genetics based on the study of whole genome sequence, transcriptome and proteome. Provides an overview of the principles and techniques of experimental and in silico genomics. Covers all areas of genome research including structural, comparative and functional genomics as well as proteomics. Prerequisite:
CHEM 5843 or any graduate level genetics course. (Typically offered: Spring Even Years)
CSES 5653. Fate and Transport of Organic Contaminants. 3 Hours.
Fate and Transport of Organic Contaminants will present an overview of the transformation and transport processes that influence the environmental fate of organic contaminants, with an emphasis on agricultural pesticides. Biotic and abiotic factors influencing the movement and behavior of organic contaminants in soil and water will be covered extensively, with an emphasis on chemical mechanisms. Prerequisite: CHEM 1123 and CHEM 1121L and CSES 2203, or instructor consent. (Typically offered: Spring Odd Years)

\section*{CSES 5703. Precision Agriculture Data. 3 Hours.}

This course will provide students with a holistic understanding of precision agriculture and crop/ecosystem monitoring with remote and proximal sensing technology. The course will also provide students with practical experience working with spatial data using GIS software in the context of precision agriculture. (Typically offered: Spring)

\section*{CSES 600V. Master's Thesis. 1-6 Hour.}

Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
CSES 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{Curriculum and Instruction (CIED) \\ \section*{Courses}}

CIED 1003. Introduction to Technology in Education. 3 Hours.
A study of computer technology as it relates to teacher education. This course introduces students interested in teacher education to the knowledge and skills required to demonstrate their proficiency in technology and learning. (Typically offered: Fall, Spring and Summer)
CIED 1013. Introduction to Education. 3 Hours.
Integrates psychological, sociological, and philosophical foundations of education with concurrent involvement in field experiences. Encourages prospective teachers to become reflective practitioners by emphasizing organization of school systems, planning and implementation of effective classroom environments, development of teaching styles, and new directions in education. An 18-hour early field experience designed to give prospective teachers opportunities to observe and participate in a variety of school settings is incorporated in this introductory course to education. (Typically offered: Fall and Spring)
CIED 2083. Innovation and Creativity in Daily Practice. 3 Hours.
Arts integration course including the ideas, design, and implementation of practices in the classroom, board room, and professional field that enrich the experiences of all stakeholders while building right-brain thinking skills for the new millennium. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

CIED 2943. Foundations of Language and Literacy. 3 Hours.
A foundational study of language and literacy with an emphasis on content knowledge for teachers that is essential to the components and principles of science-based literacy. Corequisite: CIED 3113. (Typically offered: Fall and Spring)

\section*{CIED 3013. Development and Learning Theories in the K-6 Classroom. 3} Hours.
This course allows students to cultivate an understanding of how elementary students develop, process information, and learn; studies educational applications pertaining to theories of development, intelligence, and thinking dispositions. Students study various learning theories, their implications for instruction, and their role in the K-6 classroom. Field experience required. Prerequisite: PELED or CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

\section*{CIED 3013H. Honors Development and Learning Theories in the K-6} Classroom. 3 Hours.
This course allows students to cultivate an understanding of how elementary students develop, process information, and learn; studies educational applications pertaining to theories of development, intelligence, and thinking dispositions. Students study various learning theories, their implications for instruction, and their role in the K-6 classroom. Field experience required. Prerequisite: CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring)
This course is equivalent to CIED 3013.

\section*{CIED 3023. Survey of Exceptionalities. 3 Hours.}

A survey of the characteristics of students with exceptional needs. Reviews the definitions of exceptionalities, learning and behavior characteristics of individuals with exceptionalities and the legal basis for the education of persons with exceptionalities in both elementary and secondary schools. Prerequisite: CIED 1013, or MUED 2012, or AGED 1123, or PSYC 2003. (Typically offered: Fall, Spring and Summer)

\section*{CIED 3023H. Honors Survey of Exceptionalities. 3 Hours.}

A survey of the characteristics of students with exceptional needs. Reviews the definitions of exceptionalities, learning and behavior characteristics of individuals with exceptionalities and the legal basis for the education of persons with exceptionalities in both elementary and secondary schools. Prerequisite: Honors standing, CIED 1013, or MUED 2012, or AGED 1123, or PSYC 2003. (Typically offered: Fall, Spring and Summer)
This course is equivalent to CIED 3023.
CIED 3033. Classroom Learning Theory. 3 Hours.
A survey of the major theories of learning with special emphasis on human learning and implications for education. Field experience required. Prerequisite: CIED 1013; or MUED 2012; or PHED 1003; or AGED 1123; or PSYC 2003. (Typically offered: Fall, Spring and Summer)

\section*{CIED 3033H. Honors Classroom Learning Theory. 3 Hours.}

A survey of the major theories of learning with special emphasis on human learning and implications for education. Field experience required. Prerequisite: Honors standing and (CIED 1013; or MUED 2012; or PHED 1003; or AGED 1123; or PSYC 2003). (Typically offered: Fall, Spring and Summer)
This course is equivalent to CIED 3033.

\section*{CIED 3053. The Emerging Adolescent. 3 Hours.}

This course is a study of the developmental characteristics (social, emotional, physical, moral, and intellectual) of early adolescents (ages 10-15 years). The implications of these changes for motivation, instruction, learning, and classroom management in the classroom are emphasized. Course has field component. Prerequisite: CIED 1013. (Typically offered: Fall and Spring)
CIED 3103. Children and Adolescent Literature. 3 Hours.
A survey of children's literary works, authors, and illustrators with emphasis on elementary grade and adolescent literature. Prerequisite: CHEDBS or ELELBS or HDFSBS BRKD or HDFSBS CDEV or PSPED major. (Typically offered: Fall and Spring)

CIED 3103H. Honors Children and Adolescent Literature. 3 Hours.
A survey of children's literary works, authors, and illustrators with emphasis on elementary grade and adolescent literature. Corequisite: CIED 3113. Prerequisite: CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring) This course is equivalent to CIED 3103.

CIED 3113. Emergent Literacy. 3 Hours.
An understanding of emergent literacy development through a study of sciencebased literacy pedagogy and practical field experiences. Field experience required. Corequisite: CIED 2943. Prerequisite: ENGL 1013, ENGL 1023, and CHEDBS or ELELBS or HDFSBS BRKD or HDFSBS CDEV or SPEDBS major. (Typically offered: Fall and Spring)

\section*{CIED 3113H. Honors Emergent Literacy. 3 Hours.}

This course focuses on theories of children's emerging literacy and on the continuing development of literacy abilities in pre-kindergarten and early elementary years. Field experience required. Prerequisite: ENGL 1013, ENGL 1023, and CIED 3262, CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring) This course is equivalent to CIED 3113.

\section*{CIED 3123. Mathematics Methods in the K-6 Classroom. 3 Hours.}

An examination of the content of elementary mathematics courses. Special emphasis given to methods of teaching the content as well as enrichment materials. Field experience required. Prerequisite: MATH 1203, MATH 2213, MATH 2223, and (CHEDBS or ELELBS major). (Typically offered: Fall and Spring)

\section*{CIED 3133. Integrated Social Studies for the K-6 Classroom. 3 Hours.}

Focuses on the methodology of facilitating elementary students' development in language arts and social studies. Integrates the curriculum and teaching strategies in language arts and social studies. Field experience required. Prerequisite: CHEDBS or ELELBS major, and PLSC 2003 and (HIST 2003 or HIST 2013), and (HIST 1113 or HIST 1123), and (GEOS 1123 or ANTH 1023), and (ECON 3053 or ECON 2143), and (ARHS 1003 or MLIT 1003). (Typically offered: Fall and Spring)

\section*{CIED 3453. Developmental Literacy. 3 Hours.}

A deep and comprehensive application of the development of literacy skills from decoding to fluent, comprehending readers. Field experience required. Prerequisite: CIED 2943, CIED 3113, and admission into ELELBS or CHEDBS programs. (Typically offered: Fall and Spring)

\section*{CIED 3453H. Honors Developmental Literacy. 3 Hours.}

A deep and comprehensive application of the development of literacy skills from decoding to fluent, comprehending readers. Field experience required. Prerequisite: CIED 2943, CIED 3113, admission into ELELBS or CHEDBS programs, and honors standing. (Typically offered: Fall and Spring)
This course is equivalent to CIED 3453.
CIED 3901H. Honors Curriculum and Instruction Education Thesis Tutorial. 1 Hour.
Designed to provide the foundation for the Honors Thesis. Students and faculty tutors work "one-on-one" exploring a specific topic which has been agreed upon by the student and the professor. Prerequisite: Honors candidacy and CATEBS, CHEDBS, DREDBA, EDSTBS, EGEDBA, ELELBS, FREDBA, GREDBA, SNEDBA, SPEDBS, or SSEDBA majors. (Typically offered: Fall, Spring and Summer)

\section*{CIED 4003. Elementary Seminar. 3 Hours.}

This course is designed to synthesize the foundational content presented in the Bachelor of Science in Education, Elementary Education program. It focuses on refinement of generalized knowledge to accommodate specialized content relevant to elementary students. Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall)
CIED 4013. Capstone Course for Foreign Language Licensure. 3 Hours.
This course is designed to identify and provide evidence of content language specific proficiencies in the four skills of reading, writing, listening, and speaking a foreign language. (Typically offered: Spring)

CIED 4023. Teaching in Inclusive Secondary Settings. 3 Hours.
This course is designed to prepare pre-service teachers to teach in inclusive classroom settings at the secondary level. Course content will focus on the ways in which exceptionality, specifically focused on high-incidence disabilities and culture, specifically focused on English language learners mediate the learning experiences of secondary level students. (Typically offered: Summer)

CIED 4113. Integrated Communication Skills for the K-6 Classroom. 3 Hours.
Focuses on the methodology of facilitating elementary students' literacy development. Emphasis is on the integration of the communication skills of reading, writing, speaking, and listening across the curriculum. Prerequisite: COMM 1313 or COMM 2323 and CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

CIED 4113H. Honors Integrated Communication Skills for the K-6 Classroom. 3 Hours.

Focuses on the methodology of facilitating elementary students? literacy development. Emphasis is on the integration of the communication skills of reading, writing, speaking, and listening across the curriculum. Prerequisite: COMM 1313 or COMM 2323 and CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring)
This course is equivalent to CIED 4113.

\section*{CIED 4123. Literacy Assessment and Interventions in the Elementary} Classroom. 3 Hours.

An undergraduate course focusing on literacy assessment and intervention for prospective classroom teachers. Participants become familiar with assessment procedures and instruments for identifying student strengths and weaknesses in literacy, determining effective intervention strategies for literacy improvement, and principles of reporting assessment and intervention outcomes. Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall)

CIED 4131. Practicum for Secondary and Multilevel Tracks in Education. 1 Hour.
This practicum is a requirement for entry into the EDUC MA, Master of Arts in Teaching program. Students will be involved in documented experiences with children for a minimum of 60 hours in grades K-12. Students enrolled in the multilevel track will be placed in a combination of elementary, middle, and high school settings. Students enrolled in the secondary track will be placed in a combination of middle and high school settings. Prerequisite: Cleared background check. (Typically offered: Spring and Summer)

CIED 4133. Measurement and Research in the K-6 Classroom. 3 Hours. This course is designed to provide an introduction to educational assessment, research methods, and what research has to say about trends and topics in elementary education. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall)

CIED 4143. Curriculum Design and Applications of Instructional Practice. 3 Hours.
A course in the design and adaptation of curriculum for students in regular, elementary classrooms. Theoretical bases and curriculum models will be reviewed. Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Spring)

CIED 4153. Classroom Management in the Elementary Grades. 3 Hours.
This course focuses on a number of different management techniques for elementary classrooms that can be used in general education settings. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

CIED 4163. Senior Project. 3 Hours.
This course is designed to provide students with the research skills necessary to complete their senior project. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Summer)

CIED 4173. Student Teaching. 3 Hours.
Full-time student teaching in grades K-6 to be repeated both fall and spring semesters. Students will practice and master instructional strategies under the supervision of qualified mentor teachers and university faculty members Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

CIED 4183. Instruction and Assessment of Writing. 3 Hours.
Develop knowledge, skills and dispositions about writing processes, genres, and pedagogy. Field experience required. Corequisite: CIED 3453. Prerequisite: CIED 2943, CIED 3113, and admission into CHEDBS or ELELBS programs. (Typically offered: Fall and Spring)

CIED 4183H. Honors Instruction and Assessment of Writing. 3 Hours. Develop knowledge, skills and dispositions about writing processes, genres, and pedagogy. Field experience required. Prerequisite: CIED 2943, CIED 3113, CIED 3453, honors standing and admission into CHEDBS or ELELBS programs. (Typically offered: Fall and Spring)
This course is equivalent to CIED 4183.
CIED 4285. Teaching Experience. 5 Hours.
The teaching experience is an essential component of the Bachelor of Arts in Teaching degree. The two semester experience allows Teacher Candidates (TC) to make further application of theoretical principles of teaching and learning. Teacher Candidates will be assigned placement in area schools for both fall and spring semesters. Teacher candidates are placed in K-12 or 7-12 levels depending on their content area for licensure. The fall semester consists of a field experience including observation, co-planning, and co-teaching. The spring semester consists of an immersion experience for teacher candidates to plan and teach independently. Prerequisite: Admission to one of the following: EGEDBA, SSEDBA, FREDBA, GREDBA, SNEDBA, or DREDBA. (Typically offered: Spring)

CIED 4363. Disciplinary Literacy in the K-6 Classroom. 3 Hours.
Focuses on the methodology of extending K-6 learners' basic literacy development, as a foundation for intermediate and disciplinary literacy. Emphasis is on the engagement of students in the distinct reading, writing, speaking, and listening requirements of different disciplines. Prerequisite: CIED 3113 and CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

CIED 4403. Understanding Cultures in the Classroom. 3 Hours.
This course provides pre-and in-service teachers knowledge and skills necessary for educating ethnically and linguistically diverse classrooms. Students have the opportunity to understand positive relationships while removing stereotypes and prejudices. It addresses issues for social justice education through understanding ways that children learn and communicate in their homes and communities. Students will examine how topics in multicultural education inform instructional goals, curriculum planning/implementation, and teaching practices across content areas in public K-12 classrooms. This course meets the AR teaching license ESL endorsement requirements for a culture course. Some sections of this course will contain a service learning component. (Typically offered: Fall)

CIED 4413. Acquiring a Second Language. 3 Hours.
The course gives an introduction to the basics in research and learning theories involved in the acquisition of second languages and cultures, particularly of English. (Typically offered: Spring)

CIED 4423. Teaching English as a Second Language. 3 Hours.
This course is designed to provide teacher candidates with the basic knowledge and teaching skills necessary to address the linguistic needs of English language learners (ELLs) in regular classrooms. The students in this class will learn about and use multiple strategies for promoting ELLs' reading, writing, listening, and speaking skills. Emphasis will be placed especially on differentiating early reading instruction for ELLs. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Spring)

\section*{CIED 4433. The Moral Mind in Action. 3 Hours.}

The Moral Mind in Action explores how people reason through moral dilemmas and prepares students to more effectively recognize and resolve moral problems. Best practices of teachers and administrators of K-16 character education programs are discussed. (Typically offered: Fall)

\section*{CIED 4443. Moral Courage. 3 Hours.}

Moral Courage explores the factors that support translating moral thinking into moral action. This course draws from the field of positive psychology to guide students as they leverage existing strengths and develop new strategies for acting with moral courage in their personal and professional lives. Best practices of teachers and administrators of K-16 character education programs are discussed. (Typically offered: Spring)

\section*{CIED 4463. Culture and Learning. 3 Hours.}

Culture, its meanings, dimensions, and manifestations are explored in this course. How these cultural elements impact perceptions of students, classroom practices, and educational processes are explored in this course. A strength-based approach is employed to explore the issues associated with including all students within classrooms. (Typically offered: Fall, Spring and Summer)

CIED 4483H. Honors Museum Matters: History, Practices, Culture and Controversy. 3 Hours.
Museums are respected institutions, but few visitors have likely thought about their history, purpose and role in society and culture. This class is an introduction to museology or the study of museums. Through field trips, guest lectures, discussions, and targeted readings we will explore issues such as collecting, exhibiting, controversies, architecture and the educational challenges found in the wide world of museums. Prerequisite: Honors standing. (Typically offered: Spring Odd Years)

CIED 4503H. Honors Charles Darwin and the Legacy of Evolution. 3 Hours.
This highly integrated honors class draws on various perspectives to examine the life of Charles Darwin and the legacy and impact of evolution. Topics and guest instructors change each semester, but the course will focus on evolution from the perspectives of biology, anthropology, the law, philosophy, history, culture and literature. Prerequisite: Honors standing. (Typically offered: Spring Even Years)

CIED 4533. Reading Comprehension Through Children's and Adolescent Literature. 3 Hours.
An examination of the major genres of children and adolescent literature to develop and extend K-6 students' skills in reading comprehension. Field experience required. Prerequisite: CIED 2943, CIED 3113, CIED 3453, and admission into CHEDBS or ELELBS programs. (Typically offered: Fall and Spring)

\section*{CIED 4533H. Honors Reading Comprehension Through Children's and Adolescent Literature. 3 Hours.}

An examination of the major genres of children and adolescent literature to develop and extend K-6 students' skills in reading comprehension. Field experience required. Prerequisite: CIED 2943, CIED 3113, CIED 3453, admission into CHEDBS or ELELBS programs, and honors standing. (Typically offered: Fall and Spring) This course is equivalent to CIED 4533.

\section*{CIED 4953. Assessment for English Learners. 3 Hours.}

This course addresses how to design appropriate assessments for English Learners taking into account their English language proficiency level and how to utilize the results of these assessments appropriately. (Typically offered: Spring)

CIED 498VH. Curriculum and Instruction Honors Thesis/Project. 1-3 Hour. Designed to provide facilitation of the Honors Thesis/Project. Students and faculty work "one-on-one" to complete the honors thesis/project. Prerequisite: Honors candidacy, CIED 3901 H , and CATEBS, CHEDBS, DREDBA, EDSTBS, EGEDBA, ELELBS, FREDBA, GREDBA, SNEDBA, SPEDBS, or SSEDBA major. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

CIED 499V. Special Topics in Curriculum and Instruction Education. 1-6 Hour. Discussion and advanced studies on selected topics in curriculum and instruction. Special focus on recent and emerging topics in education. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

\section*{CIED 499VH. Honors Special Topics in Curriculum and Instruction Education.} 1-3 Hour.
Discussion and advanced studies on selected topics in curriculum and instruction. Special focus on recent and emerging topics in education. (Typically offered: Fall, Spring and Summer)
This course is equivalent to CIED 499V.
CIED 5003. Elementary Education Seminar. 3 Hours.
This course is designed to synthesize the foundational content presented in the Master of Arts in Teaching core courses. It focuses on refinement of the generalized knowledge to accommodate specialized content children. Professional attitudes, knowledge and skills relevant to elementary students. Professional attitudes, knowledge and skills applicable to today's elementary educator are addressed. Prerequisite: Admission to Elementary Education (ELEDMA) M.A.T. program. (Typically offered: Spring)

CIED 5013. Measurement, Research and Statistical Concepts in the Schools. 3 Hours.
An introduction to constructing, analyzing, and interpreting tests; types of research and the research process; qualitative and quantitative techniques for assessment; and descriptive and inferential statistics. Prerequisite: Admission to graduate school. (Typically offered: Summer)

\section*{CIED 5022. Classroom Management Concepts. 2 Hours.}

A number of different classroom management techniques are studied. It is assumed that a teacher must possess a wide range of knowledge and skills to be an effective classroom manager. Prerequisite: Admission to either Elementary Education (ELEDMA) or Teacher Education (EDUCMA) M.A.T. program. (Typically offered: Fall)

\section*{CIED 5032. Curriculum Design Concepts for Teachers. 2 Hours.}

The design and adaptation of curriculum for students in regular and special K-6 classrooms. Theoretical bases and curriculum models are reviewed. Concurrent clinical experiences in each area of emphasis are included. Prerequisite: Admission to Elementary Education (ELEDMA) M.A.T. program. (Typically offered: Spring)

CIED 5053. Multicultural Issues in Elementary Education. 3 Hours.
This course provides an introduction to the major concepts and issues related to multicultural education in elementary classrooms. The ways in which race, class, gender and exceptionality influence students' behavior are discussed. Prerequisite: Admission to graduate school. (Typically offered: Spring Odd Years; Summer)

\section*{CIED 5063. Disciplinary Literacies in Education. 3 Hours.}

This course teaches the integration of reading, writing, and new literacies within the discipline and across disciplines. Theory and strategy are presented as integrated strands of the language process as presented in the context of instructional principles and suggested teaching practices. A solid research base is emphasized while keeping the focus on practical application. Prerequisite: Admission to Teacher Education (EDUCMA) M.A.T. program. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

\section*{CIED 5073. Action Research in Elementary Education. 3 Hours.}

Provides the students with experience in conducting case studies and action research related to childhood education. In addition, students gain knowledge regarding practices used in ethnographic research. Prerequisite: Admission to Elementary Education (ELEDMA) M.A.T. program. (Typically offered: Spring)

CIED 508V. Elementary Education Cohort Teaching Internship. 1-6 Hour. Full-time student teaching in grades K-6 to be repeated both fall and spring semesters. Students will practice and master instructional strategies under the supervision of qualified mentor teachers and university faculty members. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

\section*{CIED 5153. Arts Integration in Practice. 3 Hours.}

Arts integration course including the ideas, design, and implementation of practices in the classroom, board room, and professional field that enrich the experiences of all stakeholders while building right-brain thinking skills for the new millennium. (Typically offered: Spring Even Years) May be repeated for up to 6 hours of degree credit.

\section*{CIED 5162. Applied Practicum. 2 Hours.}

Provides laboratory experiences for CIED 5173 (Literacy Assessment and Intervention). Prerequisite: Admission to Elementary Education (ELEDMA) M.A.T. program. (Typically offered: Fall)
CIED 5173. Literacy Assessment and Intervention. 3 Hours.
Focuses on assessment of young children's literacy skills. Techniques discussed include informal observation, miscue analysis, and portfolio assessment.
Prerequisite: Admission to graduate school. (Typically offered: Fall and Summer)
CIED 5203. English Language Arts/Speech \& Drama Methods of Instruction. 3 Hours.
This course provides an introduction to teaching English language arts (ELA) and speech/drama in the context of elementary, middle and high school settings. The topics, issues, methods, and materials encompassing philosophical, cognitive, and psychological dimensions of teaching the content area provide the major tenets of instruction. (Typically offered: Summer)

\section*{CIED 5213. Issues and Trends in Literacy. 3 Hours.}

This course provides an examination of practices to teaching literacy, broadly defined. The topics, issues, methods, and materials encompassing philosophical, cognitive, and psychological dimensions of teaching provide the major tenets of instruction. Prerequisite: Admission to Teacher Education (EDUCMA) M.A.T. program or instructor consent. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

\section*{CIED 5223. Learning Theory. 3 Hours.}

This course provides the student with information about foundational issues in education, including history and philosophy of American Education, psychological and social theories of education, characteristics of learners, and learning processes. Prerequisite: Admission to Teacher Education (EDUCMA) M.A.T. program. (Typically offered: Summer)
CIED 5243. The Moral Mind in Action. 3 Hours.
The Moral Mind in Action explores how people reason through moral dilemmas and prepares students to more effectively recognize and resolve moral problems. Best practices of teachers and administrators of K -16 character education programs are discussed. Graduate degree credit will not be given for both CIED 4433 and CIED 5243. (Typically offered: Fall)

CIED 5253. Moral Courage. 3 Hours.
Moral Courage explores the factors that support translating moral thinking into moral action. This course draws from the field of positive psychology to guide students as they leverage existing strengths and develop new strategies for acting with moral courage in their personal and professional lives. Best practices of teachers and administrators of K-16 character education programs are discussed. Graduate degree credit will not be given for both CIED 4443 and CIED 5253. (Typically offered: Spring)
CIED 5263. Assessment, Evaluation, and Practitioner Research. 3 Hours. A study of assessment, testing, and evaluative procedures in classrooms including types of tests, abuses of tests, test construction, scoring, analysis and interpretation, statistical methods, and alternative evaluation and assessment techniques. Classroom-based data collection and analysis. Prerequisite: Admission to Teacher Education (EDUCMA) M.A.T. program. (Typically offered: Fall)

\section*{CIED 5273. Research in Curriculum and Instruction. 3 Hours.}

An introduction to inquiry and research in curriculum and instruction. It examines the principles, strategies, and techniques of research, especially qualitative inquiry. Qualitative method in assessment and evaluation are considered. Practicum in educational research and evaluation is done as part of the class. (Typically offered: Fall)

CIED 528V. Teaching Experience. 1-6 Hour.
The teaching experience is an essential component of the Masters of Arts in Teaching degree. The two semester experience allows Teacher Candidates (TC) to make further application of theoretical principles of teaching and learning. Teacher Candidates will be assigned placement in area schools for both fall and spring semesters. The fall semester consists of a field experience including observation, co-planning, and co-teaching. The spring semester consists of an immersion experience for teacher candidates to plan and teach independently. Prerequisite: Admission to Teacher Education (EDUCMA) M.A.T. program. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

\section*{CIED 5313. Principles of Qualitative Research in Curriculum \& Instruction. 3} Hours.
Designed specifically for aspiring qualitative researchers who wish to conduct research in settings unique to curriculum and instruction. Methods of research design, data analysis, and writing for publication will be emphasized. Strongly recommended for graduate students who are considering a qualitative thesis or dissertation in curriculum and instruction. (Typically offered: Spring Odd Years)

CIED 5333. Curriculum Theory and Development for Educators. 3 Hours.
The design and adaptation of curriculum for students in regular and special K-12 classrooms. Theoretical bases and curriculum models are reviewed. Concurrent clinical experiences in each area of emphasis are included. Prerequisite: Admission to Teacher Education (SEEDMA or EDUCMA) M.A.T. program. (Typically offered: Summer) May be repeated for up to 6 hours of degree credit.

\section*{CIED 5363. K12 Virtual Teaching Methods. 3 Hours.}

A study of curriculum, instructional methods, measurement, and assessment techniques to faciliate student learning in K12 virtual and blended teaching environments. Prerequisite: Graduate standing. (Typically offered: Fall)

CIED 5383. Positive Classroom Structure \& Social-Emotional Well Being. 3 Hours.
Development of classroom environments conducive to learning for and socialemotional well being for all students. Emphasis placed on creation of positive classroom management structures, disciplinary interventions, and communication of expectations with students, families and school leaders. (Typically offered: Spring)

\section*{CIED 5393. Introduction to Linguistics. 3 Hours.}

This course is an introduction to human language. The goal is to understand what it means to speak a language, including an introduction to phonetics and phonology (specifically the sound system of American English), morphology (the rules of English at the word level), syntax (rules that govern sentence level language), semantics (meanings of words) and sociolinguistics (or the study of language use in its social context). (Typically offered: Fall)

\section*{CIED 5423. Curriculum Design. 3 Hours.}

A study of models of curriculum design and instructional practice in a variety of educational settings. (Typically offered: Spring)

CIED 5443. Methods of Teaching Foreign Language K-12. 3 Hours.
Study of the methods and materials in the teaching of foreign language in K-12 settings as well as the theories of second language acquisition. Includes philosophical, cognitive, and psychological dimensions of teaching foreign languages. The planning of instruction, microteaching, and the development of instructional materials are included. Prerequisite: Admission to Teacher Education (EDUCMA) M.A.T. program. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

CIED 5461. Capstone Research Seminar. 1 Hour.
This course provides students with basic knowledge and practical skills in understanding, utilizing and implementing a research design project with a focus in the discipline of curriculum and instruction with particular emphasis of some aspect of teaching and/or learning. As a part of this course students will design, conduct and report the results of an action research study undertaken in the teaching internship. Prerequisite: Admission to Teacher Education (EDUCMA) M.A.T. program. (Typically offered: Spring) May be repeated for up to 2 hours of degree credit.

CIED 5523. Instructional Practices in Teaching Foreign Language. 3 Hours.
A pedagogical studies course based on the theoretical and practical aspects of methods, techniques, and materials for effective teaching of foreign languages in K-12 schools. Prerequisite: Admission to Teacher Education (EDUCMA) M.A.T. program. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

\section*{CIED 5533. Teaching Language Arts. 3 Hours.}

This course emphasizes the place of the language arts in the elementary curriculum. Exploration of materials, content, practices, and methods used in reading, speaking, listening, and writing experiences is the basis for instruction. (Typically offered: Spring)

CIED 5543. Structures of American English. 3 Hours.
This course provides an introduction to the grammars of English, including (but not restricted to traditional, structural, and transformational-generative (universal grammar). It includes approaches to the teaching of all types of grammars. (Typically offered: Spring and Summer)

CIED 5553. Social Justice and Multicultural Issues in Education. 3 Hours.
This seminar provides an introduction to the major concepts and issues related to multicultural education and social justice in education and the ways in which race, ethnicity, class, gender, and exceptionality influence students' behavior. The course also examines the intersection of teacher and student perceptions of identity, schooling, and learning and the effects on educational systems. Prerequisite: Admission to Teacher Education (EDUCMA) M.A.T. program (Typically offered: Summer) May be repeated for up to 6 hours of degree credit.

\section*{CIED 5573. Foundations of Literacy. 3 Hours.}

A foundational graduate course in teaching literacy processes and strategies to children from the emergent to the developmental stages. Topics explored include major theoretical and conceptual, historical, and evidence-based components of reading, writing, and language techniques as well as the role of the reading/literacy specialist to enhance literacy learning. (Typically offered: Fall, Spring and Summer)

\section*{CIED 5683. Adolescent Literature. 3 Hours.}

Content course in adolescent literature including selection, reading, evaluation, and psychological basis of classic and contemporary works. (Typically offered: Fall, Spring and Summer)

\section*{CIED 5733. Educator as Researcher. 3 Hours.}

Survey of methods for practitioner research in education with emphasis on analyzing educational research, creating valid and reliable educational assessments, utilizing research strategies for classroom data collection, interpreting data to analyze the impact of educational interventions, and disseminating findings for collaboration with other educators. (Typically offered: Summer)

\section*{CIED 5753. Empirically Informed Instructional Development. 3 Hours.}

Integration and application of evidence from educational literature and data from appropriate educational assessments to the process of instructional design and development. Emphasis placed on the critical evaluation of instructional changes and their impact on student learning and development. (Typically offered: Spring)

\section*{CIED 5793. Practicum in Literacy. 3 Hours.}

Clinical experience in which candidates assess reading difficulties and practice remedial measures under the direct supervision of the instructor. Emphasis is given to continuous assessment and to the use of commercially produced materials and trade books for intervention. Prerequisite: CIED 5573. (Typically offered: Fall, Spring and Summer)

CIED 5803. Nature and Needs of the Gifted and Talented. 3 Hours.
Educational, psychological, and social characteristics of gifted and talented children. Prerequisite: Graduate standing. (Typically offered: Fall)

CIED 5813. Curriculum Development in Gifted and Talented. 3 Hours.
Examines the various models for developing curriculum and providing services for students identified for gifted programs. Prerequisite: CIED 5803. (Typically offered: Spring)

CIED 5823. Gifted and Talented (Structured) Practicum. 3 Hours.
Supervised field experience in gifted education programs, schools, institutions, and other facilities for gifted/talented children. Prerequisite: CIED 5813. (Typically offered: Summer)

\section*{CIED 5843. Representations of American Education in Film. 3 Hours.}

This course provides an examination of students, teachers, administrators, schools, and schooling as they exist on the silver screen. Of particular interest is how film representations and misrepresentations potentially affect public perceptions of education. This course draws on educational theory and the field of cultural studies. (Typically offered: Irregular)

\section*{CIED 5883. Survey Research Methodology in Education. 3 Hours.}

Students will learn the important characteristics of a well designed survey and then apply these characteristics by analyzing and evaluating surveys used by others and then by creating and administering a survey of their own. Students will also analyze the results of the survey to determine if the survey provided the data they intended to gather. (Typically offered: Fall)

CIED 5913. Parent/Family Engagement for Culturally \& Linguistically Diverse Students. 3 Hours.
Students will investigate characteristics of family-community engagement systems and models serving culturally and linguistically diverse (CLD) students and families. Identify qualities of a welcoming, accepting environment for CLD families and implement some of these characteristics in their classroom and schools. Support communication and facilitate contributions by CLD families to the school and community including leadership roles. Demonstrate knowledge, skills, best practices and resources to enhance CLD family-community engagement by developing and implementing a service-learning project in their school or community. Prerequisite: Graduate standing. (Typically offered: Summer)

CIED 5923. Second Language Acquisition. 3 Hours.
This is one of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course gives an introduction to the basics in research and learning theories involved in the acquisition of second languages and cultures, particularly ESL. (Typically offered: Fall)

CIED 5933. Second Language Methodologies. 3 Hours.
This is one of a series of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course introduces the basics in approaches, methodologies, techniques, and strategies for teaching second languages, especially ESL. (Typically offered: Fall)

\section*{CIED 5943. Teaching People of Other Cultures. 3 Hours.}

This is one in a series of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course focuses on cultural awareness, understanding cultural differences, and instruction methods for integrating second cultures, especially the culture of the United States, into the curriculum. (Typically offered: Spring)

\section*{CIED 5953. Second Language Assessment. 3 Hours.}

This is one in a series of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course introduces basic methods for testing, assessing and evaluating second language, especially ESL, learners for placement purposes and academic performance. (Typically offered: Spring)

CIED 5983. Practicum in Curriculum \& Instruction. 3 Hours.
This course will provide degree candidates with advance knowledge of teaching in the elementary or secondary schools. This will be accomplished through a semesterlong practicum during which an action research project will be designed, enacted, and reported. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{CIED 599V. Special Topics. 1-18 Hour}

Special topics. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

\section*{CIED 600V. Master's Thesis. 1-6 Hour.}

This course is designed for students completing a thesis at the master's level in curriculum and instruction and related programs. It may be taken multiple times for 1-6 credits but no more than 6 credits will be counted toward the degree. Prerequisite: Graduate Standing (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{CIED 6013. Curriculum Theory, Development, and Evaluation. 3 Hours.}

Principles and concepts of curriculum and development, with an analysis of the factors basic to planning, the aims of the educational program, the organization of the curriculum, curriculum models, and elements desirable in the curriculum of schools including evaluation. (Typically offered: Fall Odd Years)

CIED 6023. Instructional Theory. 3 Hours.
Study of psychological, anthropological, sociological, and educational theories of instruction and learning. Emphasis is placed on synthesizing a broad range of existing and emerging perspectives in understanding individual, interactional and contextual phenomena of instruction and learning. (Typically offered: Spring Even Years)

CIED 6043. Analysis of Teacher Education. 3 Hours.
This course examines issues, problems, trends, and research associated with teacher education programs in early childhood, elementary, special education, and secondary education. (Typically offered: Summer Even Years)

CIED 6053. Assessment and Evaluation. 3 Hours.
A study of models for assessing and evaluating student learning with a focus upon design and implementation. (Typically offered: Spring)

\section*{CIED 6073. Seminar in Developing Creativity. 3 Hours.}

A study of the facets of creativity, how they can be applied to be used in one's everyday life, how they can be applied in all classrooms, and how to encourage the development of these in students. (Typically offered: Irregular)

\section*{CIED 6093. Vygotsky in the Classroom. 3 Hours.}

This course introduces the cultural-historical theory of L. Vygotsky and considers its complexity. The comprehensive nature of Vygotsky's heritage and the importance of the sociocultural context for understanding his work is emphasized, as well as the implications of his theories for contemporary educational settings. (Typically offered: Spring Odd Years)

\section*{CIED 6123. New Literacy Studies. 3 Hours.}

In the past decade scholars have expressed an interest in the diverse literacy practices in which adolescents engage outside of school. In using new media, adolescents interweave multiple sign system, including word and image, to construct a narrative or communicate information. How do readers interpret these texts? What conventions do authors manipulate to influence the meanings they construct? This course aims to answer these and other questions. (Typically offered: Fall Odd Years) May be repeated for up to 12 hours of degree credit

CIED 6133. Trends and Issues in Curriculum and Instruction. 3 Hours
Analysis of trends and issues in curriculum and instruction with emphasis on political/social contexts and prevailing philosophies/theories/practices across disciplines. Prerequisite: Admittance in Ed.D, Ed.S. or Ph.D. program. (Typically offered: Fall Even Years)

CIED 6143. Differentiated Instruction for Academically Diverse Learners. 3 Hours.

Major focus of this course will be the examination of differentiated instruction, a teaching philosophy appropriate for a wide range of learners. (Typically offered: Summer)

CIED 6153. Theories of Literacy and Language Learning.. 3 Hours.
In this seminar, students consider theories of literacy and language learning and their implications for practice and research. Theories are viewed as historically and socially situated, and students reflect on how their own work might be situated within these theories. The ways in which theories support research methodology are also explored. (Typically offered: Fall Even Years)

CIED 6163. Social and Emotional Components of Gifted and Talented Students. 3 Hours.

Purpose of this course is to study the theoretical and practical aspects of those affective issues, behaviors, and experiences often associated with gifted and talented students. (Typically offered: Summer Even Years)

CIED 6173. Reviews of Research in Reading Comprehension. 3 Hours. In this online course, students will learn types of reviews of research, including qualitative systematic reviews and meta-analyses, and will conduct a review of research on a topic related to reading comprehension. Students will consider implicit and explicit definitions of comprehension and the influence various definitions have on assessment, instruction, policy and research and will examine comprehension in different contexts, disciplines, genres, and platforms. The course is a CIED Area of Study or Cognate Course (not part of the Inquiry Core). (Typically offered: Summer Even Years)

CIED 6183. Theory and Research in Arts Integration. 3 Hours.
Content course in arts integration including the pedagogy, design, and implementation of lesson plans which simultaneously address core curriculum learning targets and teach skills through the visual and performing arts in order to address the needs of the learners of the new millennium. Prerequisite: Instructor consent. (Typically offered: Spring and Summer)

CIED 6193. Teaching English Language Learners in the Content Areas. 3 Hours.

This course prepares teachers to teach English language learners in math, science, and social studies. These subject areas each have their own vocabulary that must be mastered by English language learners. The course focuses on teachers of both children and adults. (Typically offered: Spring)

CIED 6243. Bakhtin in Language, Literacy, and Research. 3 Hours.
This seminar course explores a growing body of theory, research, and applications inspired by the ideas of Russian scholar Mikhail M. Bakhtin, who provides a unique perspective on language, literacy, and culture. Bakhtin's focus on the process of meaning-making through dialogic interaction is relevant for educators in all academic areas. Bakhtin's ideas provide a powerful humanistic alternative to prevailing formalistic tendencies in studying language, culture, and education. Many modern orientations, such as discourse analysis and dialogic pedagogy, can be traced to Bakhtinian concepts. In addition to exploring Bakhtinian concepts in language and literacy, this course applies a Bakhtinian framework for research. (Typically offered: Fall Odd Years)

CIED 6313. Issues, History, and Rationale of Science Education. 3 Hours.
This course is the foundation experience for those interested in the discipline of science education. It provides an overview of the fundamental issues in and vocabulary of science education. The course includes the research basis for science teaching, the literature of science education, and the issues and controversies surrounding the teaching of science. (Typically offered: Irregular)

CIED 6343. Advanced Science Teaching Methods. 3 Hours.
This course is designed for those educators who have had some previous instruction in science teaching methods and/or had some prior science teaching experience. Students will gain new or renewed perspectives with respect to their personal teaching ability while engaging in discussions and activities designed to assist others in professional grow in science instruction. Prerequisite: Admission to graduate school. (Typically offered: Irregular)

CIED 6353. Foundations and Issues in Bilingual and ESL Education. 3 Hours. This course introduces the conceptual, linguistic, sociological, historical, and political foundations of bilingualism and bilingual education. Policy issues and the legislative foundations of bilingual education will also be addressed. This course will enhance students' understanding of different types of bilingual and ESL programs, their underlying principles, and issues related to program implementation. (Typically offered: Fall)

CIED 6443. Mixed Methods Research. 3 Hours.
This course will provide opportunities for students to acquire the skills, knowledge, and strategies necessary to design and implement a mixed methods research study. Emphasis is upon developing research questions, developing a research design, selecting a sample, and utilizing appropriate techniques for analyzing data. (Typically offered: Fall)

\section*{CIED 6533. Problem-Based Learning and Teaching. 3 Hours.}

A course in the design, development, and delivery of the problem-based learning (PBL) model. Theoretical cases and curriculum models will be centered on issues and models related to PBL. (Typically offered: Irregular)

CIED 6603. Research in Multicultural and Justice-Oriented Education. 3 Hours. This course examines issues related to the implementation of and research on multicultural and social justice education. The meanings, dimensions, influences, manifestations, and status of varied cultures within schools (kindergarten to twelfth grades) and society are emphasized. The implications of these varied dimensions of culture on educational processes, and research including design, implementation and interpretation, are studied. (Typically offered: Spring)

CIED 6623. Research Methods and Scholarship in Curriculum and Instruction. 3 Hours.
In this course students will look at methods and practices in writing a successful dissertation proposal. Emphasis will be placed on research studies, collection of reliable and valid data, and analysis of data. Throughout the course, topics will focus on what scholarship looks like in curriculum and instruction. Prerequisite: Advanced standing in the doctoral program. (Typically offered: Fall)

CIED 6653. Advanced Methods of Qualitative Research in Curriculum \& Instruction. 3 Hours.
Designed specifically emerging researchers who seek to advance their knowledge, skills, and aptitudes for engaging in qualitative research in curriculum and instruction. Advanced modes of data collection, analysis and organization of findings will be emphasized with specific attention given to alignment with theoretical frameworks. Strongly recommended for graduate students who are considering a qualitative thesis or dissertation in curriculum and instruction. (Typically offered: Summer)

\section*{CIED 674V. PhD Research Internship. 1-6 Hour.}

This research internship is for doctoral level students in curriculum and instruction.
The goal is provide research experience within the doctoral course of study. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

CIED 680V. Ed.S. Project. 1-6 Hour.
Instructor permission required to register. Prerequisite: Instructor permission. (Typically offered: Fall, Spring and Summer)

CIED 684V. PhD Teaching Internship. 1-6 Hour.
This teaching internship is for doctoral level students in curriculum and instruction.
The goal is to provide teaching experience within the doctoral course of study.
(Typically offered: Fall, Spring and Summer)
CIED 694V. Special Topics. 1-6 Hour.
Discussion and advanced studies on selected topics in curriculum and instruction. Specific focus on recent developments. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CIED 695V. Independent Study. 1-6 Hour.
Independent study. (Typically offered: Fall, Spring and Summer)
CIED 699V. Doctoral Seminar. 1-3 Hour
Doctoral seminar. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

CIED 700V. Dissertation. 1-18 Hour.
Dissertation. Prerequisite: Candidacy (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{Dance (DANC)}

\section*{Courses}

DANC 1003. Dance Appreciation. 3 Hours.
Introduction to the nature and scope of ballet, modern dance, and ethnic-ritual-world dance forms, their potential for contributing towards multicultural literacy, and to the shaping of an American audience. Comprised of lectures, videos, and movement experiences in the form of Studio Labs. (Typically offered: Fall, Spring and Summer)

DANC 1912. Beginning Modern Dance. 2 Hours.
Introduction to basic techniques with an emphasis on acquiring flexibility, strength, and coordination. (Typically offered: Fall and Spring)

DANC 1932. Beginning Ballet. 2 Hours.
Introduction to the basic techniques of ballet in the recognized classic form including barre exercises, port de bras, and center practice. (Typically offered: Fall and Spring)

\section*{DANC 1942. Beginning Ballet II. 2 Hours.}

A continuation of the basic techniques of classical ballet from DANC 1932. This course is not recommended for those students who have extensive training, but the student must be versed in the basic fundamentals of ballet. (Typically offered: Spring)

DANC 1952. Tap Dance. 2 Hours.
Basic technical training in the tap dance idiom through technique, improvisation, and composition. Overview of tap dance history and the cultural influences on the art form. First steps in developing skill, clarity and motivational intent as well as strength. No previous tap experience necessary. (Typically offered: Fall and Spring)

DANC 1962. Broadway Jazz Dance I. 2 Hours.
Basic technical and artistic training in the jazz dance idiom through technique, improvisation and composition. First steps in developing skill, clarity and motivational intent as well as strength and flexibility. (Typically offered: Irregular)

DANC 199V. Special Topics in Dance. 1-3 Hour.
Classes not listed in the regular curriculum, offered on demand on the basis of student needs and changes within the profession. (Typically offered: Irregular)

\section*{Data Science (DASC)}

\section*{Courses}

DASC 1003. Introduction to Data Science. 3 Hours.
Introduction to Data Science is a course providing an overview of Data Science and preparation of Data Science First Year students for the Data Science program and for choosing one of the Data Science program concentrations. Corequisite: MATH 2554 or MATH 2554C or MATH 2445. Prerequisite: Students must be a DTSCBS or DTSCFR major. (Typically offered: Fall)

\section*{DASC 1003H. Honors Introduction to Data Science. 3 Hours.}

Introduction to Data Science is a course providing an overview of Data Science and preparation of Data Science First Year students for the Data Science program and for choosing one of the Data Science program concentrations. Corequisite: MATH 2554 or MATH 2554C or MATH 2445. Prerequisite: Students must have honors standing and be a DTSCBS or DTSCFR major. (Typically offered: Fall) This course is equivalent to DASC 1003.

DASC 1011. Success in Data Science Studies. 1 Hour.
This course provides preparation for Data Science First Year students for the Data Science program and for learning about University campus resources for students. This course is focused on students who are not MATH 2554 Calculus I or MATH 2445 Calculus I with Review ready. Prerequisite: Students must be a Data Science Major. (Typically offered: Fall)

DASC 1104. Programming Languages for Data Science. 4 Hours.
Programming Languages for Data Science provides a semester-long introduction to basic concepts, tools, and languages for computer programming using Python and R , two powerful programming languages used by data scientists. This class will introduce students to computer programming and provide them with the basic skills and tools necessary to efficiently collect, process, analyze, and visualize datasets. Students will gain hands-on experience with de novo programming in R and Python, finding and utilizing packages, and working in both interactive (Jupyter and RStudio) and non-interactive (Unix) environments. Corequisite: Lab component. Prerequisite: Students must be a DTSCBS or DTSCFR major. (Typically offered: Fall)

\section*{DASC 1204. Introduction to Object Oriented Programming for Data Science. 4} Hours.
Introduction to Object Oriented Programming for Data Science, introduces objectoriented programming in JAVA. It covers object-oriented programming elements and techniques in JAVA, such as primitive types and expressions, basic I/O, basic programming structures, abstract data type, object class and instance, Methods, Java File I/O, object inheritance, collections and composite objects, advanced input / output: streams and files, and exception handling. Students will gain hands-on programming experience using JAVA. Corequisite: Lab component. Prerequisite: DASC 1104 and must be a DTSCBS or DTSCFR major. (Typically offered: Spring)

\section*{DASC 1223. Role of Data Science in Today's World. 3 Hours.}

Role of Data Science in Today's World is a survey course providing an overview of the Data Science Curriculum and an introduction to the essential elements of data science: data collection and management; summarizing and visualizing data; basic ideas of statistical inference; predictive analytics and machine learning. Students will continue their hands-on experience using the Python and R programming languages and Jupyter notebooks.Prerequisite: DASC 1003 and DASC 1104 and must be a DTSCBS or DTSCFR major. (Typically offered: Spring)

\section*{DASC 1223H. Honors Role of Data Science in Today's World. 3 Hours.}

Role of Data Science in Today's World is a survey course providing an overview of the Data Science Curriculum and an introduction to the essential elements of data science: data collection and management; summarizing and visualizing data; basic ideas of statistical inference; predictive analytics and machine learning. Students will continue their hands-on experience using the Python and R programming languages and Jupyter notebooks. Prerequisite: DASC 1003, DASC 1104, honors standing and must be a DTSCBS or DTSCFR major. (Typically offered: Spring)
This course is equivalent to DASC 1223.

DASC 188V. Special Topics in Data Science. 1-6 Hour.
Special Topics in Data Science is a course for data science topics not covered in other courses. Corequisite: Lab component. Prerequisite: Students must be a DTSCBS or DTSCFR major and Instructor Permission Only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

DASC 188VH. Honors Special Topics in Data Science. 1-6 Hour.
Special Topics in Data Science is a course for data science topics not covered in other courses. Corequisite: Lab component. Prerequisite: Students must be a DTSCBS or DTSCFR major, have honors standing and by instructor permission only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.
This course is equivalent to DASC 188 V .

\section*{DASC 2103. Data Structures \& Algorithms. 3 Hours.}

Data Structures \& Algorithms focuses on fundamental data structures and associated algorithms for computing and data analytics. Topics include the study of data structures such as linked lists, stacks, queues, hash tables, trees, and graphs, recursion, their applications to algorithms such as searching, sorting, tree and graph traversals, divide-and-conquer, greedy algorithms, and dynamic programming, and the theory of NP-completeness. Students will gain hands-on experience using Python or Java. Prerequisite: DASC 1204 and must be a DTSCBS major. (Typically offered: Spring)

\section*{DASC 2113. Principles and Techniques of Data Science. 3 Hours.}

Principles and Techniques in Data Science is an intermediate semester-long data science course that follows an overview of data science in today's world. This class bridges between introduction to data science and upper division data science courses as well as methods courses in other concentrations. This class equips students with essential basic elements of data science, ranging from database systems, data acquisition, storage and query, data cleansing, data wrangling, basic data summarization and visualization, and data estimation and modeling. Students will gain hands-on experience using Python and various packages in Python. Corequisite: Lab component. Prerequisite: MATH 2564 and student must be a DTSCBS major. (Typically offered: Fall)

\section*{DASC 2133. Data Privacy \& Ethics. 3 Hours.}

Data Privacy and Ethics (DASC 2133) explores the intersection of ethics and contemporary (big) data analytics. In particular, we will discuss how data analytics impacts ethical issues like privacy, autonomy, transparency, discrimination, data ownership, and justice, while also investigating its impact on the cohesiveness of society and democracy. Pre- or Corequisite: DASC 1001 and must be a DTSCBS or DTSCFR major. (Typically offered: Fall)
DASC 2203. Data Management and Data Base. 3 Hours.
Data Management and Data Base focuses on the investigation and application of data science database concepts including DBMS fundamentals, database technology and administration, data modeling, SQL, data warehousing, and current topics in modern database management. Prerequisite: MATH 2564, DASC 1204 and students must be a DTSCBS major. (Typically offered: Spring)

\section*{DASC 2213. Data Visualization and Communication. 3 Hours.}

Data Visualization and Communication is a seminar providing an essential element of data science: the ability to effectively communicate data analytics findings using visual, written, and oral forms. Students will gain hands-on experience using data visualization software and preparing multiple formats of written reports (technical, social media, policy) that build a data literacy and communication toolkit for interdisciplinary work. In essence, this is a course emphasizing finding and telling stories from data, including the fundamental principles of data analysis and visual presentation conjoined with traditional written formats. Prerequisite: DASC 1104 and DASC 1222 and students must be a DTSCBS major. (Typically offered: Fall)

DASC 2594. Multivariable Math for Data Scientists. 4 Hours.
Multivariable Mathematics for Data Scientists provides an in depth look at the multivariate calculus and linear algebra necessary for a successful understanding of modeling for data science. Students will gain an understanding of the mathematical and geometric concepts used in optimization and scientific computation using mathematical and computational techniques. At the end of the course, students will be equipped with the calculus and linear algebra skills and knowledge to be successful in courses in optimization and advanced data science methods. Corequisite: Lab component. Prerequisite: MATH 2564 and DASC 1104 and student must be a DTSCBS major. (Typically offered: Fall)

DASC 290V. Special Topics in Data Science. 1-6 Hour.
Special Topics in Data Science is a course for data science topics not covered in other courses. Prerequisite: Students must be a DTSCBS or DTSCFR major and Instructor Permission Only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

DASC 290VH. Honors Special Topics in Data Science. 1-6 Hour.
Special Topics in Data Science is a course for data science topics not covered in other courses. Prerequisite: Honors standing and students must be a DTSCBS or DTSCFR major and Instructor Permission Only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.
This course is equivalent to DASC 290V.
DASC 3103. Cloud Computing and Big Data. 3 Hours.
Cloud Computing and Big Data covers: introduction to distributed data computing and management, MapReduce, Hadoop, cloud computing, NoSQL and NewSQL systems, Big data analytics and scalable machine learning, real-time streaming data analysis. Students will gain hands-on experience using Amazon AWS, MongoDB, Hive, and Spark. Prerequisite: DASC 2594 and DASC 2203 and student must be a DTSCBS major. (Typically offered: Fall)
DASC 3103H. Honors Cloud Computing and Big Data. 3 Hours.
Cloud Computing and Big Data covers: introduction to distributed data computing and management, MapReduce, Hadoop, cloud computing, NoSQL and NewSQL systems, Big data analytics and scalable machine learning, real-time streaming data analysis. Students will gain hands-on experience using Amazon AWS, MongoDB, Hive, and Spark. Prerequisite: DASC 2594, DASC 2203, honors standing and student must be a DTSCBS major. (Typically offered: Fall)
This course is equivalent to DASC 3103.

\section*{DASC 3203. Optimization Methods in Data Science. 3 Hours.}

Optimization Methods in Data Science is an advanced mathematical course providing the foundations and concepts of optimization that are essential elements of machine learning algorithms in data science, ranging from mathematical optimization to convex optimization to unconstrained and constrained optimization to nonlinear optimization to stochastic optimization. Students will gain hands-on experience using Python and various optimization packages in Python. Prerequisite: DASC 2113 and DASC 2594 and student must be a DTSCBS major. (Typically offered: Spring)

\section*{DASC 3213. Statistical Learning. 3 Hours.}

Statistical Learning is a course providing an in depth look at the theory and practice of applied linear modeling for data science: including model building, selection, regularization, classification and prediction. Students will gain hands-on experience using statistical software to learn from data using applied linear models. Prerequisite: DASC 1104 and ((MATH 3013 and STAT 3003) or (INEG 2314 and INEG 2323)) and student must be a DTSCBS major. (Typically offered: Spring)

DASC 3223. Cyber Crime and Cyber Terrorism. 3 Hours.
Cyber Crime and Cyber Terrorism (CCCT) is an overview of the study of cybercrime and cyber terrorism for students of data science, criminology, and law discussing crimes committed via Internet, ranging from various white-collar financial crimes to the spread of viruses, malicious code, stalking, bullying, and web-based exploitation. Criminological, social-psychological explanations will be examined and the investigative and legal strategies employed to combat cyber-crime and cyber terrorism will be discussed. Prerequisite: DASC 2113 and must be a DTSCBS major. (Typically offered: Fall)

\section*{DASC 390V. Special Topics in Data Science. 1-6 Hour.}

Special Topics in Data Science is a course for data science topics not covered in other courses. Prerequisite: Student must be a DTSCBS or DTSCFR major and by Permission Only. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{DASC 390VH. Honors Special Topics in Data Science. 1-6 Hour.}

Special Topics in Data Science is a course for data science topics not covered in other courses. Prerequisite: Student must have honors standing, be a DTSCBS or DTSCFR major and by permission only. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
This course is equivalent to DASC 390 V .
DASC 400VH. Honors Thesis in Data Science. 1-3 Hour.
Honors Thesis in Data Science (DASC 400VH) is a course to develop an Honors Thesis in Data Science. The Honors Thesis can be an independent thesis or can be related to the Data Science Practicum I and II Courses Project. Prerequisite: Student must be a DTSCBS major, have honors standing, and by Permission Only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

\section*{DASC 4113. Machine Learning. 3 Hours.}

Machine learning covers: logistic regression, ensemble methods, support vector machines, kernel methods, neural networks, Bayesian inference, reinforcement learning, learning theory, and their applications in text, image, and web data processing. Students will gain hands-on experience of developing machine learning algorithms using Python and scikit-learn. Prerequisite: DASC 2103 and DASC 3203 and student must be a DTSCBS major. (Typically offered: Fall)

\section*{DASC 4113H. Honors Machine Learning. 3 Hours.}

Machine learning covers: logistic regression, ensemble methods, support vector machines, kernel methods, neural networks, Bayesian inference, reinforcement learning, learning theory, and their applications in text, image, and web data processing. Students will gain hands-on experience of developing machine learning algorithms using Python and scikit-learn. Prerequisite: DASC 2103, DASC 3203, honors standing and student must be a DTSCBS major. (Typically offered: Fall) This course is equivalent to DASC 4113.

\section*{DASC 4123. Social Problems in Data Science and Analytics. 3 Hours.}

This course explores the ways data analytics and data science are impacted by or intersect with issues of social justice, poverty and economic inequality, racial and ethnic relations, gender, crime, education, health and healthcare, and other contemporary social problems. Prerequisite: DASC 1222 and student must be a DTSCBS major. (Typically offered: Fall)

DASC 4533. Information Retrieval. 3 Hours.
Information Retrieval is a course providing expertise in processing unstructured data as a key component of data science. It covers text processing, file structures, ranking algorithms, query processing, and web search. Students will gain handson experience developing their own search engine from scratch, using Python, C, C++, or Java on a Linux server and making their search engine web accessible. Note: Prior user-level knowledge of Linux for file and directory management and remote login is required for this course. Corequisite: Lab component. Prerequisite: DASC 2103 and student must be a DTSCBS major. (Typically offered: Irregular)

DASC 4892. Data Science Practicum I. 2 Hours.
Application of data science, analytics, business intelligence, data mining, machine learning, and data visualization to existing problems. Data Science techniques using current and relevant software and problem-solving methods are applied to current problems for presentation to management. This is the first semester of the required full-year multi-college interdisciplinary practicum using real-world data to solve realworld problems. Prerequisite: DASC 2113, DASC 2213, DASC 3203, ((STAT 3013 and STAT 3003) or (INEG 2314 and INEG 2323)), and student must be a DTSCBS major. Pre- or Corequisite: DASC 3213, DASC 4113, and DASC 4123. (Typically offered: Fall)

\section*{DASC 4892H. Honors Data Science Practicum I. 2 Hours.}

Application of data science, analytics, business intelligence, data mining, machine learning, and data visualization to existing problems. Data Science techniques using current and relevant software and problem-solving methods are applied to current problems for presentation to management. This is the first semester of the required full-year multi-college interdisciplinary practicum using real-world data to solve realworld problems. Prerequisite: DASC 2113, DASC 2213, DASC 3203, ((STAT 3013 and STAT 3003) or (INEG 2314 and INEG 2323)), honors standing and the student must be a DTSCBS major. Pre- or Corequisite: DASC 3213, DASC 4113, and DASC 4123. (Typically offered: Fall)
This course is equivalent to DASC 4892.
DASC 490V. Special Topics in Data Science. 1-6 Hour.
Special Topics in Data Science is a course for data science topics not covered in other courses. Prerequisite: Students must be a DTSCBS major and Instructor Permission Only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

DASC 490VH. Honors Special Topics in Data Science. 1-6 Hour.
Special Topics in Data Science is a course for data science topics not covered in other courses. Prerequisite: Honors standing and students must be a DTSCBS major and Instructor Permission Only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.
This course is equivalent to DASC 490 V .
DASC 4993. Data Science Practicum II. 3 Hours
Application of data science, analytics, business intelligence, data mining, machine learning, and data visualization to existing problems. Data Science techniques using current and relevant software and problem-solving methods are applied to current problems for presentation to management. This is the second semester of the required full-year multi-college interdisciplinary practicum using real-world data to solve real-world problems. Corequisite: Lab component. Prerequisite: DASC 4892 with a grade of C or better and student must be a DTSCBS major. (Typically offered: Spring)

\section*{DASC 4993H. Honors Data Science Practicum II. 3 Hours.}

Application of data science, analytics, business intelligence, data mining, machine learning, and data visualization to existing problems. Data Science techniques using current and relevant software and problem-solving methods are applied to current problems for presentation to management. This is the second semester of the required full-year multi-college interdisciplinary practicum using real-world data to solve real-world problems. Corequisite: Lab component. Prerequisite: DASC 4892 with a grade of \(C\) or better, and student must be a DTSCBS major, and have honors standing. (Typically offered: Spring)
This course is equivalent to DASC 4993.

\section*{Economics (ECON)}

\section*{Courses}

ECON 2013. Principles of Macroeconomics (ACTS Equivalency = ECON 2103). 3 Hours.

Macroeconomic analysis, including aggregate employment, income, fiscal and monetary policy, growth and business cycles. Credit will be allowed for only one of ECON 2013 and AGEC 2103. Prerequisite: MATH 1203 or higher, or a score of 26 on the math component of the ACT exam, or 600 on the math component of the old SAT or 620 on the math component of the new SAT. (Typically offered: Fall, Spring and Summer)
This course is cross-listed with AGEC 2103.
ECON 2013H. Honors Principles of Macroeconomics. 3 Hours.
Macroeconomic analysis, including aggregate employment, income, fiscal and monetary policy, growth and business cycles. Credit will be allowed for only one of ECON 2013H and AGEC 2103. Prerequisite: MATH 1203 or higher or a score of 26 on the math component of the ACT exam, or 600 on the math component of the old SAT or 620 on the math component of the new SAT, and honors standing. (Typically offered: Fall)
This course is cross-listed with ECON 2013, AGEC 2103.
ECON 2023. Principles of Microeconomics (ACTS Equivalency = ECON 2203).
3 Hours.
Microeconomic analysis, including market structures, supply and demand, production costs, price and output, and international economics. Credit will be allowed for only one of ECON 2023 and AGEC 1103. Prerequisite: MATH 1203 or higher, or a score of at least 26 on the math component of the ACT exam, or a score of at least 600 on the math component of the old SAT or 620 on the math component of the new SAT. (Typically offered: Fall, Spring and Summer) This course is cross-listed with AGEC 1103.

\section*{ECON 2023H. Honors Principles of Microeconomics. 3 Hours.}

Microeconomic analysis, including market structures, supply and demand, production costs, price and output, and international economics. Credit will be allowed for only one of ECON 2023H and AGEC 1103. Prerequisite: MATH 1203 or higher, or a score of 26 on the math component of the ACT exam, or 600 on the math component of the old SAT or 620 on the math component of the new SAT, and honors standing. (Typically offered: Spring)
This course is cross-listed with ECON 2023, AGEC 1103.
ECON 2143. Basic Economics: Theory and Practice. 3 Hours.
Surveys basic micro, macro principles and analytical tools needed to study contemporary economic problems such as inflation, unemployment, poverty, and pollution. Walton College majors are not eligible to register for the course. No degree credit for Walton College majors. (Typically offered: Fall, Spring and Summer)

ECON 2143H. Honors Basic Economics: Theory and Practice. 3 Hours. Surveys basic micro, macro principles and analytical tools needed to study contemporary economic problems such as inflation, unemployment, poverty, and pollution. Not open to students majoring in Economics or Business Administration. (Typically offered: Fall, Spring and Summer) This course is equivalent to ECON 2143.

\section*{ECON 3033. Microeconomic Theory. 3 Hours.}

Nature, scope, and purpose of economic analysis; theories of demand, production, cost, firm behavior, allocation of resources, etc., in a market-oriented system. Prerequisite: (ECON 2013 and ECON 2023) or (ECON 2143) and (MATH 2043 or MATH 2554). (Typically offered: Fall, Spring and Summer)

ECON 3053. Economics for Elementary Teachers. 3 Hours.
For students who plan to become teachers in elementary schools. Acquaints students with basic concepts and functioning of the American economic system. Walton College majors are not eligible to register for the course. No degree credit for Walton College majors. Recommended to be completed in the fall semester of junior year. Prerequisite: 40 hours of completed course work. (Typically offered: Fall)

\section*{ECON 3063. Economics for Secondary Educators. 3 Hours.}

Economics for Secondary Educators teaches basic economics understandings equipping students to make sound economics decisions as consumers, investors, voters and savers. Lessons and activities appropriate for secondary classes will be demonstrated. The course will survey materials available for government, economics, world and U.S. history, environmental science, language arts, business education, personal finance and entrepreneurship classes. Walton College majors are not eligible to register for the course. No degree credit for Walton College majors. Recommended to be completed in the fall semester of junior year. Prerequisite: 40 hours of completed course work. (Typically offered: Irregular)

\section*{ECON 3133. Macroeconomic Theory. 3 Hours.}

Theoretical determinations of national aggregate employment, income, consumption, investment, price level, etc. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143) and ((MATH 2043 or MATH 2554)). (Typically offered: Fall and Spring)

\section*{ECON 3143. Economics of Poverty and Inequality. 3 Hours}

This course provides the study of how labor markets work and how economic institutions and policy affect labor market outcomes. Topics include changes to the modern economy including forces like globalization and technical advances and how such forces have altered incomes, wealth and social mobility. The course will provide a clearer understanding of the trends, the reasoning behind the trends, and the impact of social policy on the welfare of the American worker. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. (Typically offered: Fall)

\section*{ECON 330V. Economics Study Abroad. 3-6 Hour.}

Open to undergraduate students studying abroad in officially sanctioned programs in Economics in the Walton College. Topics vary by location of study abroad opportunities. To be eligible for credit, students must have junior standing and Walton College majors must have completed all pre-business requirements prior to studying abroad. Prerequisite: Departmental consent, Junior standing and completion of pre-business course requirements, each with a grade of \(C\) or better, a pre-business cumulative GPA of 2.5 or better and an overall GPA of 2.5 or better. (Typically offered: Irregular)

\section*{ECON 3333. Public Economics. 3 Hours.}

Governmental functions, revenues; tax shifting, incidence; public expenditures, their effects; and fiscal policy. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. (Typically offered: Irregular)

ECON 3433. Money and Banking. 3 Hours.
Financial history; theory and practice of financial institutions; monetary policy in theory and practice. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. (Typically offered: Irregular)

\section*{ECON 3533. Labor Economics. 3 Hours.}

Economic analysis of labor markets. Topics include analysis of labor demand and supply; human capital investment; wage differentials; discrimination; economic effects of labor unions and collective bargaining; public sector labor markets; unemployment; and labor market effects on inflation. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. (Typically offered: Irregular)

\section*{ECON 3633. Economics of Advertising. 3 Hours.}

An examination of how economists define and categorize types of products and advertising campaigns. Alternative views of advertising -- persuasive vs. informative -- are discussed. Models of the relationship between advertising and sales, profits, market structure, product quality, and price are examined. Prerequisite: ECON 2023 or ECON 2143. (Typically offered: Irregular)

ECON 3843. Economics of the Developing World. 3 Hours.
Examine theories and patterns of economic development in emerging economies. The role of the World Bank and IMF as multilateral lenders and examination of their success and failures in fostering development. Measures of poverty and inequality and their implications for economic development. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. (Typically offered: Fall and Spring)

ECON 3853. Emerging Markets. 3 Hours.
An analysis of the business and economic environment in emerging countries; focusing in Latin America, South East Asia and Transition Economies. The topics and issues covered include market structure and market failures, financial and legal background, current institutions and political economy issues, and current business opportunities. Prerequisite: ECON 2143; or ECON 2013 and ECON 2023. (Typically offered: Fall)

ECON 3933. The Japanese Economic System. 3 Hours.
This class presents essential facts about the Japanese economy and then subjects them to modern economic analyses. Japanese institutions and policies are contrasted with their American counterparts, and these economies are compared in terms of performance. Current issues including contemporary economic conditions and US - Japanese trade relations are also examined. Pre- or Corequisite:
ECON 2023. Prerequisite: ECON 2013 or ECON 2143. (Typically offered: Spring)
ECON 399VH. Honors Course. 1-3 Hour.
Honors thesis research and writing under the direction of a faculty member in the department. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{ECON 4003H. Honors Economics Colloquium. 3 Hours.}

Explores events, concepts and/or new developments in the field of Economics. Prerequisite: Senior standing. (Typically offered: Fall)

ECON 410V. Special Topics in Economics. 1-6 Hour.
Covers special topics in economics not available in other courses. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ECON 410VH. Honors Special Topics in Economics. 1-6 Hour.
Covers special topics in economics not available in other courses. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
This course is equivalent to ECON 410V.

\section*{ECON 4173. Nation Model United Nations. 3 Hours}

This class is designed to prepare students for their participation in a Nation Model United Nations (NMUN) Conference. The NMUN Conference is sponsored by The National Collegiate Conference Association (NCCA), which is the largest collegelevel Model United Nations conference. This course is designed to advance the research skills of the students by requiring extensive background position papers covering various economic and social issues of their assigned committee and ultimately preparing resolution documents they develop during the conference. They will present their positions via speeches and in caucus settings. This course will broaden the students' international perspective while they gain a thorough understanding of the primary activities of the United Nations. Prerequisite: Junior standing and departmental consent. (Typically offered: Fall)

\section*{ECON 4333. Economics of Organizations. 3 Hours.}

An economic perspective on the design of organizations. Applies developments in game theory and contract theory to analyze the role of information and incentives within and between firms. Covers the boundaries of firms, integration and outsourcing, authority and incentives, and alternative organizational structures in an evolving business environment. Prerequisite: ECON 3033. (Typically offered: Fall)

\section*{ECON 4423. Behavioral Economics. 3 Hours.}

Both economics and psychology systematically study human judgment, behavior, and well-being. This course surveys attempts to incorporate psychology into economics to better understand how people make decisions in economic situations. The course will cover models of choice under uncertainty, choice over time, as well as procedural theories of decision making. Prerequisite: ECON 3033. (Typically offered: Fall)

\section*{ECON 4433. Experimental Economics. 3 Hours.}

The course offers an introduction to the field of experimental economics. Included are the methodological issues associated with developing, conducting, and analyzing controlled laboratory experiments. Standard behavioral results are examined and the implications of such behavior for business and economic theory are explored. Prerequisite: ECON 2023 or ECON 2143. (Typically offered: Spring)

ECON 450V. Independent Study. 1-6 Hour.
Permits students on individual basis to explore selected topics in economics. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ECON 4633. International Trade. 3 Hours.
Problems of the international economy from a microeconomic perspective. Topics include analysis of the pattern and content of trade; trade in factors of production; and the applications of trade theory to the study of trade barriers such as tariffs and quotas. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. (Typically offered: Fall and Spring)

\section*{ECON 4643. International Macroeconomics and Finance. 3 Hours.}

Problems of the international economy from a macroeconomic perspective. Topics include national income accounting and the balance of payments; exchange rates and the foreign exchange markets; exchange rate policy; macroeconomic policy coordination; developing countries and the problem of 3rd world debt; and the global capital market. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. (Typically offered: Fall and Spring)

\section*{ECON 4743. Introduction to Econometrics. 3 Hours.}

Introduction to the application of statistical methods to problems in economics. Prerequisite: ((ECON 2013 and ECON 2023) or ECON 2143) and ((MATH 2043 or MATH 2554 or higher)) and (BUSI 1033 or STAT 2303). (Typically offered: Spring)

\section*{ECON 4753. Forecasting. 3 Hours.}

The application of forecasting methods to economics, management, engineering, and other natural and social sciences. The student will learn how to recognize important features of time series and will be able to estimate and evaluate econometric models that fit the data reasonably well and allow the construction of forecasts. Prerequisite: (ECON 2013 and ECON 2023) or (ECON 2143) and (MATH 2043 or MATH 2554) and (BUSI 1033 or STAT 2303). (Typically offered: Fall)

\section*{ECON 4763. Economic Analytics. 3 Hours.}

This course provides an overview of modern statistical learning methods, including Machine Learning, for senior economics or business majors, along with handson experience of in-depth analytics projects using real data. Students will use the most advanced Machine Learning libraries available in Python, \(R\) and MATLAB to gather and organize data as well as to train, validate and test their empirical models. Knowledge of statistical software is recommended. Pre- or Corequisite: ECON 4743 or ISYS 4193. (Typically offered: Fall)

\section*{ECON 5243. Managerial Economics. 3 Hours.}

This course will provide students with a strong foundation in core economics principles, with emphasis on industrial organization issues and applications geared toward the supply-chain and retail focus of the redesigned MBA program. (Typically offered: Fall and Spring)

ECON 5253. Economics of Management and Strategy. 3 Hours.
Information economics and applied game theory. (Typically offered: Irregular)
ECON 5263. Applied Microeconomics. 3 Hours.
The framework for this course is the economic way of thinking. Both the theory and application of important economics questions are presented, showing students the applicability of various economic methodologies in a number of different contexts. To gain competence in the applied side of economic analysis, students will use MS Excel or other software to apply class concepts to solve concrete problems. Prerequisite: ECON 5243 and (ECON 5743 or AGEC 5613). (Typically offered: Spring)

\section*{ECON 5423. Behavioral Economics. 3 Hours.}

Both economics and psychology systematically study human judgment, behavior, and well-being. This course surveys attempts to incorporate psychology into economics to better understand how people make decisions in economic situations. The course will cover models of choice under uncertainty, choice over time, as well as procedural theories of decision making. Graduate degree credit will not be given for both ECON 4423 and ECON 5423. Prerequisite: ECON 2023 or ECON 2143. (Typically offered: Spring)

\section*{ECON 5433. Experimental Economics. 3 Hours.}

The course offers an introduction to the field of experimental economics. Included are the methodological issues associated with developing, conducting, and analyzing controlled laboratory experiments. Standard behavioral results are examined and the implications of such behavior for business and economic theory are explored. Graduate degree credit will not be given for both ECON 4433 and ECON 5433. Prerequisite: ECON 2023 or ECON 2143. (Typically offered: Fall)

\section*{ECON 5743. Introduction to Econometrics. 3 Hours.}

Introduction to the application of statistical methods to problems in economics. Graduate degree credit will not be given for both ECON 4743 and ECON 5743. Prerequisite: ((ECON 2013 and ECON 2023) or ECON 2143) and ((MATH 2043 or MATH 2554 or higher)) and (BUSI 1033 or STAT 2303). (Typically offered: Spring)

ECON 5753. Forecasting. 3 Hours.
The application of forecasting methods to economics, management, engineering, and other natural and social sciences. The student will learn how to recognize important features of time series and will be able to estimate and evaluate econometric models that fit the data reasonably well and allow the construction of forecasts. Graduate degree credit will not be given for both ECON 4753 and ECON 5753. Prerequisite: (ECON 2013 and ECON 2023) or (ECON 2143) and (MATH 2043 or MATH 2554) and (BUSI 1033 or STAT 2303). (Typically offered: Fall)

\section*{ECON 5763. Economic Analytics. 3 Hours.}

This course provides students with a good overview of modern big data methods, including Machine Learning, along with hands-on experience of in-depth analytics projects using real data. After 3 weeks of introductory lectures on the big data methods by the instructor, students will form groups and propose research projects they will develop over the semester. Knowledge of some statistical software is recommended, including Python, R and MATLAB. Prerequisite: (ECON 5743 or AGEC 5613) and ECON 5783. (Typically offered: Spring)

\section*{ECON 5783. Applied Microeconometrics. 3 Hours.}

This course covers the principles of causal inference. Methods include panel data models, instrumental variables, regression discontinuity designs, difference-indifferences, and matching. Emphasis on developing a solid understanding of the underlying econometric principles of the methods taught as well as on their empirical application. Prerequisite: ECON 5743 or AGEC 5613. (Typically offered: Fall)

\section*{ECON 5813. Economic Analytics I. 3 Hours.}

Part one of the capstone in the Masters in Economic Analytics. The course provides an overview of modern statistical learning methods, including Machine Learning, along with hands-on experience of in-depth analytics exercises using real data. Students will be given a set of datasets early in the semester and will use them for in-class exercises, assignments, and a class project. Students will make use of the most advanced learning libraries available in Python to gather and organize data as well as to train, validate, and test their empirical models. Prerequisite: ECON 4743 or ECON 5743 or ISYS 4193. (Typically offered: Fall)

\section*{ECON 5823. Economic Analytics II. 3 Hours.}

Part two of the capstone in the Masters in Economic Analytics. The MS in Economic Analytics is a professional degree primarily designed to lay a strong foundation for a career in economic analytics. The career preparation culminates with a capstone project. In this course, students work in small teams to (i) develop capstone topics, (ii) formulate hypotheses related to their projects, (iii) find appropriate datasets, and (iv) analyze their datasets to test hypotheses using the econometric models/ techniques that they have learned over the course of the program. Prerequisite: ECON 5813. (Typically offered: Spring)

ECON 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{ECON 6133. Mathematics for Economic Analysis. 3 Hours.}

This course will develop mathematical and statistical skills for learning economics and related fields. Topics include calculus, static optimization, real analysis, linear algebra, convex analysis, and dynamic optimization. Prerequisite: Graduate standing and MATH 2554 or equivalent. (Typically offered: Summer)
ECON 6213. Microeconomic Theory I. 3 Hours.
Introductory microeconomic theory at the graduate level. Mathematical formulation of the consumer choice, producer behavior, and market equilibrium problems at the level of introductory calculus. Discussion of monopoly, oligopoly, public goods, and externalities. (Typically offered: Fall)

\section*{ECON 6223. Microeconomic Theory II. 3 Hours.}

Advanced treatment of the central microeconomic issues using basic real analysis. Formal discussion of duality, general equilibrium, welfare economics, choice under uncertainty, and game theory. (Typically offered: Spring)
ECON 6313. Macroeconomic Theory I. 3 Hours.
Theoretical development of macroeconomic models that include and explain the natural rate of unemployment hypothesis and rational expectations, consumer behavior, demand for money, market clearing models, investment, and fiscal policy. (Typically offered: Fall)

\section*{ECON 6323. Macroeconomic Theory II. 3 Hours.}

Further development of macroeconomic models to include uncertainty and asset pricing theory. Application of macroeconomic models to explain real world situations. (Typically offered: Spring)

\section*{ECON 636V. Special Problems in Economics. 1-6 Hour.}

Independent reading and investigation in economics. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.
ECON 643V. Seminar in Economic Theory and Research I. 1-3 Hour.
Seminar. (Typically offered: Fall) May be repeated for up to 7 hours of degree credit.

\section*{ECON 644V. Seminar in Economic Theory and Research II. 1-3 Hour.}

Independent research and group discussion. (Typically offered: Spring) May be repeated for up to 4 hours of degree credit.

\section*{ECON 6613. Econometrics I. 3 Hours.}

Use of economic theory and statistical methods to estimate economic models. The single equation model is examined emphasizing multicollinearity, autocorrelation, heteroskedasticity, binary variables and distributed lags. Prerequisite: MATH 2043 and knowledge of matrix methods, which may be acquired as a corequisite, and ECON 2023, and an introductory statistics course or equivalent. (Typically offered: Fall)

ECON 6623. Econometrics II. 3 Hours.
Use of economic theory and statistical methods to estimate economic models. The treatment of measurement error and limited dependent variables and the estimation of multiple equation models and basic panel data models will be covered. Additional frontier techniques may be introduced. Prerequisite: ECON 6613. (Typically offered: Spring)

\section*{ECON 6633. Econometrics III. 3 Hours.}

Use of economic theory and statistical methods to estimate economic models. Nonlinear and semiparametric/nonparametric methods, dynamic panel data methods, and time series analysis (both stationary and nonstationary processes) will be covered. Additional frontier techniques may be covered. Prerequisite: ECON 6613. (Typically offered: Spring)

\section*{ECON 6713. Industrial Organization I. 3 Hours.}

This course will develop the theory of modern industrial organization. The latest advances in microeconomic theory, including game theory, information economics and auction theory will be applied to understand the behavior and organization of firms and industries. Theory will be combined with empirical evidence on firms, industries and markets. Prerequisite: ECON 6213 and ECON 6223. (Typically offered: Fall)

\section*{ECON 6723. Industrial Organization II. 3 Hours.}

This course surveys firm decisions, including setting prices, choosing product lines and product quality, employing price discrimination, and taking advantage of market structure. It will also cover behavioral IO, which reconsiders the assumption that firms and consumers are perfectly rational and examines the role of regulation. Prerequisite: ECON 6133. (Typically offered: Spring)

\section*{ECON 6833. International Trade and Development I. 3 Hours.}

A first graduate level course in development economics with a focus on foundational theoretical issues. We explore the causation, implications, and remedies for pervasive and persistent poverty in low-income countries. Emphasis will be primarily on microeconomics topics. May be taken either as a precursor to International Development Economics II or stand-alone. Prerequisite: ECON 6213, (ECON 6613 or AGEC 5613) or by instructor's permission. (Typically offered: Fall)

ECON 6843. International Trade and Development II. 3 Hours.
A second graduate level course in development economics that focuses on the empirical aspect of development in low-income countries. The course explores various microeconomics topics related to poverty, human capital accumulation, and their interactions with role of public policy. Prerequisite: ECON 6213, (ECON 6613 or AGEC 5613) or instructor consent. (Typically offered: Spring)

\section*{ECON 6913. Experimental Economics. 3 Hours.}

The course develops advanced concepts in the use of controlled experiments to test economic theory and explore behavioral regularities relating to economics. The class focuses on the methodology of experimental economics while reviewing a variety of established results. Prerequisite: ECON 6213. (Typically offered: Fall)

\section*{ECON 6923. Experimetrics. 3 Hours.}

This course covers econometric techniques commonly used in experimental economics but infrequently covered in standard econometrics classes, e.g., power tests, non-parametric tests of means, simulated data, dealing with discrete and ordinal data, finite mixture models, structural estimation. This is an applied course and instruction will lean heavily on examples. Prerequisite: ECON 6213 and ECON 6223. (Typically offered: Fall)

\section*{ECON 6933. Behavioral Economics. 3 Hours.}

This course surveys the frontier of behavioral economics, both theoretical and applied. Standard economic theory serves as a base for economics analysis, but when deviations from standard predictions are regularly and systematically observed, models have to modified to account better predict human behavior. Insights from psychology, biology, and neuroscience are incorporated economic models of both individual and strategic behavior. Prerequisite: ECON 6213 and ECON 6223. (Typically offered: Spring)
ECON 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{Education (EDHP)}

\section*{Courses}

EDHP 1600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)
EDHP 2600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)
EDHP 3600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)
EDHP 3923. Education Seminar. 3 Hours.
Special topics or issues in education. (Typically offered: Irregular) May be repeated for degree credit.

\section*{EDHP 3923H. Honors Education Seminar. 3 Hours.}

Special topics or issues in education for the Honors student. Prerequisite: Honors candidacy. (Typically offered: Irregular) May be repeated for degree credit.
EDHP 4001. Dean's Seminar. 1 Hour.
The Dean's Seminar is a seminar course that leverages the expertise of our faculty to provide students from multiple disciplines an opportunity to study topics at the intersection of education and health. Each offering will focus on a different complex societal challenge and help students develop high-leverage interventions to address the issue through the lens of education and health. Topics vary by semester. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

\section*{EDHP 4001H. Honors Dean's Seminar. 1 Hour.}

The Dean's Seminar is a seminar course that leverages the expertise of our faculty to provide students from multiple disciplines an opportunity to study topics at the intersection of education and health. Each offering will focus on a different complex societal challenge and help students develop high-leverage interventions to address the issue through the lens of education and health. Topics vary by semester.
Prerequisite: Honors Standing. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.
This course is equivalent to EDHP 4001.

\section*{EDHP 4600. Undergraduate Research Assistant. 0 Hours.}

Undergraduate research. (Typically offered: Fall, Spring and Summer)

\section*{EDHP 5001. DEAN'S SEMINAR. 1 Hour.}

The Dean's Seminar is a seminar course that leverages the expertise of our faculty to provide students from multiple disciplines an opportunity to study topics at the intersection of education and health. Each offering will focus on a different complex societal challenge and help students develop high-leverage interventions to address the issue through the lens of education and health. Topics vary by semester.
(Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

\section*{Education Reform (EDRE)}

\section*{Courses}

EDRE 5053. Philosophy and History of Education and Education Reform. 3 Hours.
This course traces the historical development of the philosophical debates concerning education and its role in society as well as how those ideas and consequent demands for reform affected the educational system and its structures. (Typically offered: Spring Even Years)
EDRE 5113. Education Policy in Israel. 3 Hours.
This course, which is built around a study abroad component in Israel, examines education policy in Israel. It will compare US and Israeli perspectives and ideas on education reform and education innovation in diverse societies. (Typically offered: Summer Even Years)

\section*{EDRE 6023. Economics of Education. 3 Hours.}

This course applies the principles of economic analysis to education and education reform. Topics include: Human capital and signaling theories; education labor markets; educational production functions; public policy and market forces. The course also features empirical evidence evaluating economic theories of education. (Typically offered: Spring Odd Years)

\section*{EDRE 6033. Politics of Education. 3 Hours.}

This course explores historical and institutional forces that help shape education policymaking. Particular attention will be paid to the experience of past education reform movements as well as the influence of interest groups, federalism,
bureaucracy, governance structures, public opinion, and judicial review on education policy. (Typically offered: Fall)

\section*{EDRE 6043. Finance and Education Policy. 3 Hours.}

This course examines K-12 education finance from the standpoint of education reform policy. The tools of analysis include economics, public finance, law and political science. Topics include: revenue sources and fiscal federalism, standardsbased reform and school finance, school funding formulas, adequacy lawsuits, the politics of school funding, school funding and markets. The course also features empirical evidence on the educational impact of education finance. (Typically offered: Spring Even Years)

\section*{EDRE 6053. Measurement of Educational Outcomes. 3 Hours.}

This course will train students to consider the various types of outcome and assessment measures used for education at the K-12 level throughout the United States; further, the students will engage in analyses of research that relies on these various outcome measures. (Typically offered: Fall Odd Years)

EDRE 6103. Quantitative Analytical Techniques for Education Policy. 3 Hours. This course introduces students to the quantitative techniques required for the evaluation of education policies and interventions. The class will focus on the identification and estimation of causal effects, necessary assumptions, and how to deal with the failure of these assumptions. Major topics covered include randomized experiments, the ordinary least squares regression method, matching estimators, instrumental variable methods, regression discontinuity, difference in difference methods, and introduction to estimation strategies with panel data models. (Typically offered: Fall)

EDRE 6123. Intermediate Quantitative Analytical Techniques for Education Policy. 3 Hours.
This course builds on the content presented in EDRE 6103 by delving more deeply into benefits and limitations of the Ordinary Least Squares (OLS) estimator while also introducing the student to new estimation techniques. Students will be introduced to panel data estimation techniques, methods for robust inferences, and use of the Maximum Likelihood estimator for estimating binary and multinomial choice models. Students will also expand on their knowledge of how to implement STATA in practical research settings. Prerequisite: EDRE 6103. (Typically offered: Spring)

\section*{EDRE 6143. Advanced Quantitative Analytical Techniques for Education} Policy. 3 Hours.
This course introduces students to advanced estimation methods and empirical models often used in education policy empirical research, such as Maximum Likelihood to estimate discrete choice models, censored models and selection models, duration models, Generalized Method of Moments to estimate dynamic panel data models, and bootstrapping of standard errors and simulation-based inference. Prerequisite: EDRE 6103. (Typically offered: Irregular)

EDRE 6213. Program Evaluation and Research Design. 3 Hours.
This course provides students with training in the methods used to generate evidence-based answers to questions regarding the efficacy and impacts of education programs. The central questions that motivate most educational program evaluations are: (1) What is the problem? (2) What policies or programs are in place to address the problem? (3) What is their effect? (4) What works better? (5) What are the relative benefits and costs of alternatives? (Typically offered: Fall) This course is cross-listed with ESRM 6613.

EDRE 6223. Research Seminar in Education Policy. 3 Hours.
This course provides students with the opportunity to learn about education policy research by interacting directly with the leading scholars and practitioners in the field. Students will also gain a foundation in the field of education policy research by reading and discussing some of the founding works of the field. (Typically offered: Spring)
EDRE 636V. Special Problems. 1-6 Hour.
Independent reading and investigation in education policy under faculty supervision. Prerequisite: Approval of EDRE Graduate Director. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{EDRE 6413. Issues in Education Policy. 3 Hours.}

This course examines how K-12 education policy is designed and implemented in the United States. Students will develop a working knowledge of policymaking frameworks to examine major education policies of current interest and debate key policy issues that arise at each level of government. In great measure, the goals of the course will be accomplished through the consideration of opposing stances on key educational policy debates and issues that are of current import. (Typically offered: Fall)
This course is cross-listed with EDFD 5683.
EDRE 6423. Seminar in School Choice Policy. 3 Hours.
This course examines parental school choice - perhaps the most controversial education reform of our age. Students will be introduced to the full set of school choice policies, including charter schools and vouchers, and evaluate their benefits and drawbacks as educational interventions. (Typically offered: Fall Even Years)

EDRE 6433. Seminar in Education Accountability Policy. 3 Hours.
This course examines K-12 school and district accountability under state and Federal law (e.g. NCLB), as well as teacher and student accountability (e.g. exit exams). Topics include the theory of incentives and politics of tradeoffs, measurement issues of policy implementation, and statistical evidence on policy effects on performance. (Typically offered: Irregular)

\section*{EDRE 6443. Seminar in Education Leadership Policy. 3 Hours.}

This course will examine the individual and systemic prerequisites of effective leadership of schools and school systems, and effective leadership techniques. It will consider the differences between public and private sector leadership. It will also explore ways to identify effective and ineffective leaders, and design and evaluate systems to recruit and train the former and reassign the latter. (Typically offered: Fall Odd Years)

\section*{EDRE 6453. Seminar in Teacher Quality and Public Policy. 3 Hours.}

Examines how our public system of education shapes the preparation and continued professional development of K-12 teachers, and how that system has been influenced by standards-based education reform as well as efforts to enhance the quality of teaching and learning in public schools. Uses education reform legislation in several states as case studies to illustrate the successes and pitfalls of attempts to reform teacher education and licensure through public policy. (Typically offered: Spring Even Years)

\section*{EDRE 6463. Psychology of Education. 3 Hours.}

This course explores psychological science findings that pertain to education research and policy with a focus on empirical evidence. Particular emphasis will be on studying individual differences in the context of education. Historical, methodological, and measurement perspectives will be introduced and psychological constructs studied and applied in educational contexts will be examined. (Typically offered: Spring Odd Years)

EDRE 674V. Internship in Education Policy. 1-6 Hour.
Internship at a public or private entity involved in the making or implementation of education policy. Paper required on a significant aspect of the internship experience. Prerequisite: Approval of EDRE Graduate Director. (Typically offered: Irregular)
EDRE 699V. Special Topics. 1-3 Hour.
Topics vary depending on instructor. Prerequisite: Approval of EDRE Graduate Director. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

EDRE 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Irregular) May be repeated for degree credit.

\section*{Educational Foundations (EDFD)}

\section*{Courses}

EDFD 5373. Psychological Foundations of Teaching and Learning. 3 Hours.
Psychological principles and research applied to classroom learning and instruction. Social, emotional, and intellectual factors relevant to topics such as readiness, motivation, discipline, and evaluation in the classroom. (Typically offered: Irregular)

EDFD 5683. Issues in Educational Policy. 3 Hours.
This course examines how K-12 education policy is designed and implemented in the United States. Students will develop a working knowledge of policymaking frameworks to examine major education policies of current interest and debate key policy issues that arise at each level of government. (Typically offered: Fall, Spring and Summer)
This course is cross-listed with EDRE 6413.

\section*{Educational Leadership (EDLE) Courses}

\section*{EDLE 5003. Schools and Society. 3 Hours.}

Schools and Society is an introduction to the social, structural, political and historical forces that have created the American school system. (Typically offered: Summer Even Years)

\section*{EDLE 5013. School Organization and Administration. 3 Hours.}

Analysis of structure and organization of American public education; fundamental principles of school management and administration. (Typically offered: Fall; Summer Odd Years)

\section*{EDLE 5023. The School Principalship. 3 Hours.}

Duties and responsibilities of the public school building administrator; examination and analysis of problems, issues, and current trends in the theory and practice of the principalship. (Typically offered: Spring and Summer)

\section*{EDLE 5033. Psychology of Learning. 3 Hours.}

This course prepares educational leaders to create and sustain a learning centered environment in school settings. Students will study learning theory across the lifespan and apply it to the practice of instructional leadership, curriculum design, and staff development. (Typically offered: Spring; Summer Odd Years)
EDLE 5043. Leadership Ethics. 3 Hours.
Leadership Ethics is an experiential based course grounded in ethical decision making theory that uses case study and practice to study school based ethical dilemmas. (Typically offered: Fall; Summer Odd Years)

\section*{EDLE 5053. School Law. 3 Hours.}

Legal aspects of public and private schooling: federal and state legislative statues and judicial decisions, with emphasis upon Arkansas public education. (Typically offered: Fall; Summer Odd Years)

EDLE 5063. Instructional Leadership, Planning, and Supervision. 3 Hours. Instructional Leadership, Planning, and Supervision is designed to prepare practitioners to seize the role of educational leader at the school site level through the development of a vision that will be used to drive a data driven instructional school plan. (Typically offered: Fall; Summer Odd Years)

EDLE 5073. Research for Leaders. 3 Hours.
This course introduces research methodology that will support school leaders as consumers of educational research and supervisors of action research within their schools. Practical application of research for school leaders is emphasized. (Typically offered: Spring; Summer Odd Years)

\section*{EDLE 5083. Analytical Decision-Making. 3 Hours.}

Analytical Decision Making is a performance based examination of the principles and practices related to the building administrator's role in the development, administration, and evaluation of curricular programs in public schools. This includes creating a school culture, fostering communication, aligning curriculum with state mandated standards, and staff development. (Typically offered: Spring Even years; Summer)

\section*{EDLE 5093. Effective Leadership for School Improvement. 3 Hours.}

A performance based examination of strategic planning, group facilitation and decision-making, organizational behavior and development, professional ethics and standards, student services administration, and principles of effective leadership. (Typically offered: Spring and Summer)
EDLE 5103. School Building-Level Finance. 3 Hours.
The course will provide an introduction to the leading theories and practices associated with budgeting and finance at the school-building level. Additionally, the course will concentrate on issues relating to resource allocation at the K-12 level, including an examination of political frameworks and policy issues common to public schools, concepts central to K-12 finance and budgeting, purposes, designs, and uses of school budgets, procedures for generating, analyzing, and interpreting issues related to finance and budgeting specifically at the schoolbuilding level. Prerequisite: Admission to M.Ed. in Educational Leadership (EDLE), or Ed.S. in Educational Leadership (EDLE), or graduate certificate in Building-Level Administration (PSBLMC), or graduate certificate in District-Level Administration (PSDLMC). (Typically offered: Summer)

\section*{EDLE 574V. Internship. 1-6 Hour.}

Supervised in-school/district experiences individually designed to afford opportunities to apply previously-acquired knowledge and skills in administrative workplace settings. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

EDLE 599V. Seminar. 1-6 Hour.
Important foundational topics in educational leadership that are current and critical will be taught in this Master's-level seminar. Topics range from the psychology of learning and leading to how schools and society interact in the 21st century. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{EDLE 600V. Master's Thesis. 1-6 Hour.}

Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{EDLE 6013. Problems of Practice for Educational Leaders. 3 Hours.}

Problems of Practice is designed to extend and refine students' thinking, experience, and knowledge about the Education Doctorate (EdD), as well as selecting a Problem of Practice that can contribute to the following program goals: advanced analytical reasoning skills; positive impact on professional practice; and the refinement of the scholar-practitioner. (Typically offered: Summer)

EDLE 6023. School Facilities Planning and Management. 3 Hours.
School facilities planning, management, cost analysis, operations, and maintenance of the school plant. (Typically offered: Fall Odd Years)
EDLE 6053. School-Community Relations. 3 Hours.
Community analysis, politics and education; power groups and influences; school issues and public responses; local policy development and implementation; effective communication and public relations strategies. (Typically offered: Spring Even Years)

\section*{EDLE 605V. Independent Study. 1-6 Hour.}

Independent study. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{EDLE 6093. School District Governance: The Superintendency. 3 Hours.}

Analysis of the organizational and governance structures of American public education at national, state, and local levels. (Typically offered: Fall Even Years)

\section*{EDLE 6103. School Finance. 3 Hours.}

Principles, issues and problems of school funding formulae and fiscal allocations to school districts. (Typically offered: Spring Odd Years)

\section*{EDLE 6123. Advanced Fiscal Issues. 3 Hours.}

This course is an advanced course at the graduate level in the Graduate Educational Leadership Program. The Scholar Practitioner model at this level will pursue an in-depth study of knowledge, skills, and dispositions needed for the successful undertaking of analyzing budgeting and finance issues arising at the school and district-level. Prerequisite: Graduate standing and acceptance into EDLEES program. (Typically offered: Irregular)

\section*{EDLE 6173. School Business Management. 3 Hours.}

Fiscal and resource management in public schools: budgeting, insurance, purchasing, and accounting. (Typically offered: Summer Odd Years)

\section*{EDLE 6333. Advanced Legal Issues in Education. 3 Hours.}

The examination and discussion of advanced legal issues affecting public school education. Prerequisite: Advanced graduate standing. (Typically offered: Fall Even Years)

\section*{EDLE 6433. Legal Aspects of Special Education. 3 Hours.}

A study of litigation and legislation in special education, federal and state laws and court cases, and due process hearings. (Typically offered: Irregular)
This course is cross-listed with SPED 6433.
EDLE 6503. Topics in Educational Research for School Administration. 3 Hours.
Application of educational research in the school setting by educational administrators. Emphasis placed on the use of state and local school or district data, data analysis, interpretation and reporting, hands-on experience with SPSS, and the formal process of writing a research report. Prerequisite: Advanced graduate standing. (Typically offered: Fall Odd Years)

\section*{EDLE 6513. Program Evaluation in Education. 3 Hours.}

Program Evaluation in Education is designed to introduce students to concepts and methods of policy and program evaluation. Emphasis will be placed on preparing educational leadership students to conduct a program evaluation specialist project of dissertation. (Typically offered: Summer)

\section*{EDLE 6533. Educational Policy. 3 Hours.}

Examination of the research and theory related to the evolution of local, state, and federal governance and educational policy. Emphasis given to the consideration of procedures involving policy formulation, implementation, and analysis. (Typically offered: Spring Odd Years)

\section*{EDLE 6543. Introduction to Qualitative Research. 3 Hours.}

This course offers an introduction to the qualitative approach to research in the Social Sciences. In particular, this course focuses on initial qualitative research designs that support planning, problem solving, and evaluation for educational leaders. Developing a conceptual framework, gaining an initial understanding of the methods of data collection and analysis, and establishing credibility in qualitative research are discussed. This course will be taught online using Blackboard and will require synchronous online class meetings that will require a webcam and microphone. Prerequisite: Admission into EDD in Educational Leadership program or instructor consent. (Typically offered: Fall)

EDLE 6553. Advanced Qualitative Methods in Educational Research. 3 Hours. This course has been designed to provide graduate students with a more indepth understanding of qualitative research methods. Emphasis will be placed on preparing educational leadership students to design a qualitative or mixed-method dissertation study. Prerequisite: Admission into EDD in Educational Leadership program or instructor consent. (Typically offered: Spring)

EDLE 6583. Statistical Literacy for Educational Leaders. 3 Hours.
Statistical Literacy for Leaders is designed to extend and refine students' thinking, experiences, and knowledge about planning and executing research in an educational setting. Students will develop a greater understanding of how statistics are used to drive decision-making in educational settings and become more critical consumers of educational research. Prerequisite: Admission into the Ed.D. in Educational Leadership. (Typically offered: Spring)

EDLE 674V. Internship. 1-6 Hour.
Internship. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{EDLE 680V. Educational Specialist Project. 1-6 Hour.}

An original project, research project, or report required of all Ed.S. Degree candidates. Prerequisite: Admission to the Ed.S. program. (Typically offered: Fall, Spring and Summer)

\section*{EDLE 699V. Advanced Seminar. 1-6 Hour.}

Seminar. Prerequisite: Advanced graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

EDLE 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
EDLE 7413. Problem of Practice Dissertation Methods and Implementation. 3 Hours.
This course guides students through all phases of the capstone experience in educational leadership from program design to completion and dissemination of the final product to scholarly and practitioner audiences. Prerequisite: Admission to the EDLE Ed.D. program. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

\section*{Educational Statistics and Research Methods (ESRM)}

\section*{Courses}

\section*{ESRM 2403. Statistics in Nursing. 3 Hours.}

Introduction to descriptive and inferential statistics used in nursing research. (Typically offered: Fall, Spring and Summer)
ESRM 5013. Research Methods in Education. 3 Hours.
General orientation course which considers the nature of research problems in education and the techniques used by investigators in solving those problems. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

ESRM 5303. Healthcare Analytics Fundamentals. 3 Hours.
The Healthcare Analytics Fundamentals course provides fundamental knowledge and skills in several major areas of healthcare and business data analytics in a modular format. Several modules that emphasize healthcare analytics as well as data fundamentals, concepts, and problems are used and include - Healthcare Analytics Concepts, Problems, and Management; Intermediate \& Advanced Spreadsheet Topics; Relational Databases \& SOL; and Introductory Programming with Python. Prerequisite: Program Director permission. (Typically offered: Irregular)

ESRM 5393. Statistics in Education and Health Professions. 3 Hours.
Applied statistics course for Master's degree candidates. Includes concepts and operations for frequency distributions, graphing techniques, measures of central tendency and variation, sampling, hypothesis testing, and interpretation of statistical results. (Typically offered: Fall, Spring and Summer)

\section*{ESRM 5823. Healthcare Business Analytics I. 3 Hours.}

Fundamentals of healthcare analytics to include data patterns, forecasting techniques, and linear prediction models, including theoretical and mathematical study of assumptions in model building. Prerequisite: ESRM 5303, ISYS 5503, ISYS 5833, and ISYS 5843, or permission of the instructor. (Typically offered: Irregular)

ESRM 5853. Healthcare Business Analytics II. 3 Hours.
Intermediate healthcare analytics to include categorical analyses and logistic regression for binary and polytomous models applied to healthcare. Prerequisite: ESRM 5823 or instructor permission. (Typically offered: Irregular)

\section*{ESRM 600V. Master's Thesis. 1-6 Hour.}

Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
ESRM 605V. Independent Study. 1-6 Hour.
Independent study. (Typically offered: Fall, Spring and Summer)
ESRM 6403. Educational Statistics and Data Processing. 3 Hours.
Theory and application of frequency distributions, graphical methods, central tendency, variability, simple regression and correlation indexes, chi-square, sampling, and parameter estimation, and hypothesis testing. Use of the computer for the organization, reduction, and analysis of data (required of doctoral candidates). Prerequisite: ESRM 5013 or ESRM 5393 or an equivalent course, each with a grade of \(C\) or better. (Typically offered: Fall, Spring and Summer)

\section*{ESRM 6413. Experimental Design in Education. 3 Hours.}

Principles of experimental design as applied to educational situations. Special emphasis on analysis of variance techniques used in educational research. Prerequisite: ESRM 6403 with a grade of \(C\) or better or an equivalent course with a grade of \(C\) or better. (Typically offered: Spring)

\section*{ESRM 6423. Multiple Regression Techniques for Education. 3 Hours.}

Introduction to multiple regression procedures for analyzing data as applied in educational settings, including multicollearity, dummy variables, analysis of covariance, curvi-linear regression, and path analysis. Prerequisite: ESRM 6403 with a grade of \(C\) or better or an equivalent course with a grade of \(C\) or better. (Typically offered: Fall)

\section*{ESRM 6453. Applied Multivariate Statistics. 3 Hours.}

Multivariate statistical procedures as applied to educational research settings including discriminant analysis, principal components analysis, factor analysis, canonical correlation, and cluster analysis. Emphasis on use of existing computer statistical packages. Prerequisite: ESRM 6413 and ESRM 6423, both with a grade of C or better. (Typically offered: Spring)

\section*{ESRM 6513. Hierarchical Linear Modeling. 3 Hours.}

This course covers the theory and applications of hierarchical linear modeling (HLM) also known as multilevel modeling. Both the conceptual and methodological issues for analyses of nested (clustered) data in using HLM will be reviewed, including linear models, non-linear models, growth models, and some alternative designs. Prerequisite: ESRM 6413 and ESRM 6423, both with a grade of \(C\) or better. (Typically offered: Fall Even Years)

\section*{ESRM 6523. Structural Equation Modeling. 3 Hours.}

This course provides a detailed introduction to structural equation modeling (SEM) based on students' previous knowledge of multiple linear regression. Topics include path analysis, confirmatory factor analysis, full latent variable models, estimation techniques, data-model fit analysis, model comparison, and other topics, potentially equivalent models, specification searches, latent mean models, parameter invariance, multi-group models, and models of discrete data. Prerequisite: ESRM 6423 with a grade of C or better. (Typically offered: Spring)

\section*{ESRM 6533. Qualitative Research. 3 Hours.}

Introduction of non-quantitative methods, including data collection through interviews, field observation, records research, internal and external validity problems in qualitative research. Prerequisite: ESRM 6403 with a grade of \(C\) or better. (Typically offered: Fall and Spring)

ESRM 6543. Advanced Qualitative Research. 3 Hours.
Preparation for the conduct of qualitative research, structuring, literature reviews, data collection and analysis, and reporting results. Prerequisite: ESRM 6533 with a grade of \(C\) or better. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

\section*{ESRM 6553. Advanced Multivariate Statistics. 3 Hours.}

Builds on the foundation provided in Multivariate and introduces techniques that extend methodological elements of canonical, discriminant, factor analytic, and longitudinal analyses, providing the mathematical and theoretical foundations necessary for these designs. Prerequisite: ESRM 6453 with a grade of \(C\) or better. (Typically offered: Spring Even Years)
ESRM 6613. Evaluation of Policies, Programs, and Projects. 3 Hours. Introduction to evaluation in social science research, including why and how evaluations of programs, projects, and policies are conducted; includes analysis of actual evaluations in a variety of disciplines. Prerequisite: ESRM 6403 with a grade of \(C\) or better. (Typically offered: Fall)
This course is cross-listed with EDRE 6213.

\section*{ESRM 6653. Measurement and Evaluation. 3 Hours.}

Fundamentals of measurement: scales, scores, norms, reliability, validity. Test and scale construction and item analysis. Standardized measures and program evaluation models in decision making. Prerequisite: ESRM 6403 with a grade of C or better. (Typically offered: Fall)

\section*{ESRM 668V. Practicum in Research. 1-6 Hour.}

Practical experience in educational research on campus, in school systems, or in other agencies in educational program development. (Typically offered: Irregular)

\section*{ESRM 6753. Item Response Theory. 3 Hours.}

Topics of measurement in the psychometric field focusing on item response theory; item level and test level analyses including differential item functioning, test dimensionality, computer adaptive testing, equating, and general evaluation and usage of measurement instruments. Prerequisite: ESRM 6653 with a grade of \(C\) or better. (Typically offered: Spring Odd Years)
ESRM 699V. Seminar. 1-6 Hour.
Seminar. Prerequisite: Advanced graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ESRM 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{Educational Studies (EDST) \\ Courses}

\section*{EDST 2003. Introduction to Educational Studies. 3 Hours.}

The course explores the field of education through the lens of educational studies, a unique interdisciplinary association of looking at education as a function of society, psychology, politics, religion, and economic interests. This course introduces non-education field students to the difference between the various fields of study within education, including, but not limited to: instruction, curriculum, comparative education, multicultural education, informal education, content education, pedagogy, education policy, support services, and community education. No field observation hours are required for this course. (Typically offered: Fall and Summer)

EDST 3003. Formative Readings for Cultural Education. 3 Hours.
This course examines some of the historically important readings stemming from identification of the America Reads project produced by the Library of Congress (2014-2016). Special attention will be devoted to the understanding of the relevance of these historical documents and texts to the American identity. The course will focus on the role education plays in the creation of the current society through cultural transmission. The role of education through public schooling in the formations of citizens has been historically documented and deemed necessary under American political thought. This course is constructed to establish linkages of educational trends in the promotion of literacy and the popularization of popular cultural literature of the 18th, 19th, and 20th century that has shaped the social, economic, environmental, and political landscape that a citizen may navigate over their lifetime. (Typically offered: Spring)

EDST 3003H. Honors Formative Readings for Cultural Education. 3 Hours. This course examines some of the historically important readings stemming from identification of the America Reads project produced by the Library of Congress (2014-2016). Special attention will be devoted to the understanding of the relevance of these historical documents and texts to the American identity. The course will focus on the role education plays in the creation of the current society through cultural transmission. The role of education through public schooling in the formations of citizens has been historically documented and deemed necessary under American political thought. This course is constructed to establish linkages of educational trends in the promotion of literacy and the popularization of popular cultural literature of the 18th, 19th, and 20th century that has shaped the social, economic, environmental, and political landscape that a citizen may navigate over their lifetime. Prerequisite: Honors standing. (Typically offered: Spring) This course is equivalent to EDST 3003.

\section*{EDST 3113. Legal Developments in Education. 3 Hours.}

This lecture provides an overview of issues in the field of education coming out of legal developments in the United States over the last two centuries involving the legal basis for public schooling, Constitutional issues in public schools, and contract law governing private schooling. Special interest is paid to education legislation and case law on educational issues. (Typically offered: Fall)

\section*{EDST 3203. Multicultural Education Issues. 3 Hours.}

The purpose of this course is to give pre-service educators an opportunity to explore various facets of multiculturalism and their implications for future practice. We will examine the impact of race, class, gender, sexual orientation, religion, and other aspects of social group identities on teaching and learning as they relate to contexts in multiple learning environments. While this course is broad in scope, the primary aim is to assist future educators in exploring what it means to be an educator in a society that is multicultural, within a vast educational system (public and private) which is stratified according to multiple factors. Students should not be in enrolled in EDST 3203 \& CIED 4403 during the same semester. (Typically offered: Fall)

\section*{EDST 3223. American Educational History. 3 Hours.}

This course is designed to offer a comprehensive study of the history of the American education system. Students completing this course will be able to document the diverse and often competing influences into what has become the public school structure, as well as, the second system of American schools, parochial schools, arising out of the schooling conflict of the 1880's. Starting with the development of literacy skills and the formation of township or colony schools, the linage of schooling will be investigated from the late 1600's to the present time. (Typically offered: Fall, Spring and Summer)

\section*{EDST 3223H. Honors American Educational History. 3 Hours.}

This course is designed to offer a comprehensive study of the history of the American education system. Students completing this course will be able to document the diverse and often competing influences into what has become the public school structure, as well as, the second system of American schools, parochial schools, arising out of the schooling conflict of the 1880's. Starting with the development of literacy skills and the formation of township or colony schools, the linage of schooling will be investigated from the late 1600's to the present time. Prerequisite: Honors standing. (Typically offered: Fall, Spring and Summer) This course is equivalent to EDST 3223.

\section*{EDST 3313. Trauma Based Educational Practices. 3 Hours.}

Socio-emotional learning and trauma-based classroom instruction are needed pre-professional knowledge bases for classroom teachers that shape classroom management practices and student-engagement relationships. This course focuses on identifying and understanding daily classroom interactions with students having previously experienced out-of-school trauma that manifests itself in classroom environment. This course is intended for teacher-educators to modify student relationship engagement and not intended for diagnosis or clinical practices. Prerequisite: EDSTBS-PARA major. (Typically offered: Fall)

EDST 3333. Children's \& Young Adult Literature in Educational Settings. 3 Hours.
This course provides a comprehensive overview of children's, adolescent, and young adult literature across educational settings, both formal and informal. Picture books, novels, informational texts, and the novelization of movies and vice versa for children and adolescent audiences will be explored. (Typically offered: Fall)

EDST 3913. Formal Classroom Internship in Education. 3 Hours.
The internship is a prearranged onsite work experience serving in an educationally related field. The formal classroom internship is taken after the completion of CIED 1013 and either along with or after the completion of CIED 3033. Locations have been selected by the EDST program and Office of Teacher Education. Internships my be served at a variety of public or private based educational services or agencies. The internship experience must include a minimum number of practical work hours (120), reflective journaling, mid-semester evaluation, and final report. All arrangements for internships are coordinated through the COEHP Office of Field Placement by the Director of Field Placement. State of Arkansas background checks may be required for individuals completing internships at locations serving populations of minors. Prerequisite: CIED 1013. Pre- or Corequisite: CIED 3033. (Typically offered: Fall and Spring)

EDST 3923. Informal Based or Outdoor Internship in Education. 3 Hours.
The internship is a prearranged onsite work experience serving in an educationally related field. The informal/outdoor internship is taken during or after taking EDST 4113. Locations have been selected by the EDST program and Office of Teacher Education; during the summer, students may petition for a camp based informal experience that is outside of the typical semester offering. Internships my be served at a variety of public or private based educational services or agencies. The internship experience must include a minimum number of practical work hours (120), reflective journaling, mid-semester evaluation, and final report. All arrangements for internships are coordinated through the COEHP Office of Field Placement by the Director of Field Placement. State of Arkansas background checks may be required for individuals completing internships at locations serving populations of minors. Prerequisite: EDST 4113. Pre- or Corequisite: CIED 3033. (Typically offered: Spring and Summer)

\section*{EDST 399V. Special Topics in Educational Studies. 1-3 Hour.}

Discussion and advanced studies on selected topics in educational studies. Special focus on recent and emerging topics in education. Junior (3000) level course offerings. Course may be repeated only for unique topic enrollments. (Typically offered: Irregular) May be repeated for up to 15 hours of degree credit.

EDST 399VH. Honors Special Topics in Educational Studies. 1-3 Hour. Discussion and advanced studies on selected topics in educational studies. Special focus on recent and emerging topics in education. Junior (3000) level course offerings. Each offering of EDST 399VH must be unique. Student may not repeat the same topic for degree credit multiple times. (Typically offered: Irregular) May be repeated for up to 15 hours of degree credit.
This course is equivalent to EDST 399V.

\section*{EDST 4003. Philosophy of Education. 3 Hours.}

This course provides a review of philosophical ideas in education and an introduction to research, methodologies, foundation theories in education. Students explore historical ideas in philosophy pertaining to education and how those ideas contribute to current educational practices. Students in the course learn about the nature of research, both theoretical and applied, and the process of developing future research based agendas. Prerequisite: Junior or senior standing. (Typically offered: Spring)

\section*{EDST 4003H. Honors Philosophy of Education. 3 Hours.}

This course provides a review of philosophical ideas in education and an introduction to research, methodologies, foundation theories in education. Students explore historical ideas in philosophy pertaining to education and how those ideas contribute to current educational practices. Students in the course learn about the nature of research, both theoretical and applied, and the process of developing future research based agendas. Prerequisite: Honors standing and (junior or senior standing). (Typically offered: Spring)
This course is equivalent to EDST 4003.
EDST 4033. Understanding Professional Teaching Standards I. 3 Hours. This course provides preparation and review for the required initial post-graduation licensure testing requirements mandated by the State of Arkansas. Currently these testing requirements are Pearson Education's Foundation of Reading, Educational Testing Services' Praxis Series Assessments: Core Academic Skills for Educators, Principles of Learning \& Teaching, and Specific Licensure Area Content Assessments. Prerequisite: EDSTBS-PARA major. (Typically offered: Fall)

EDST 4043. Understanding Professional Teaching Standards II. 3 Hours.
This is the second course in the professional test preparation series. This course provides preparation and review for the required initial post-graduation licensure testing requirements mandated by the State of Arkansas. Currently these testing requirements are Pearson Education's Foundation of Reading, Educational Testing Services' Praxis Series Assessments: Core Academic Skills for Educators, Principles of Learning \& Teaching, and Specific Licensure Area Content Assessments. Prerequisite: EDSTBS-PARA major and EDST 4033. (Typically offered: Spring)

EDST 4113. Teaching and Funding Outdoor \& Informal Education. 3 Hours. In-depth exploration of natural/outdoors education and informal education and grant writing for education will be covered. Methods and techniques in the preparation and delivery of teaching in nontraditional instructional settings (informal education) will be developed. Course participants will be required to teach an outdoor and/or informal education class and participate in a collaborative grant application process. (Typically offered: Spring)
EDST 4213. Religion, Education, \& Religious Education. 3 Hours.
This course provides a comprehensive introduction on the influences of religion in education, particularly in relation to the dynamic of religion in public education in the United States. Students in the course learn about the nature of the study of religion, religious studies, and religious education, as well as the teaching of religion. Prerequisite: Junior or senior level standing. (Typically offered: Fall)

EDST 4933. Capstone Seminar and Final Internship in Education. 3 Hours. The capstone course provides students with a culminating experience for Educational Studies. The course provides an opportunity for students to develop a portfolio of their learning and to evaluate their overall program performance in preparation for completion of their degrees. This course contains 100 hours of internship experience and will serve as the final internship experience for EDSTBS majors. This course includes 20 hours of coursework along with the required internship experience. This course should only be enrolled in after the completion of EDST 3913 and EDST 3923 and during the students final year of coursework. All internship placements are arranged by the Office of Field Placement and the Director of Field Placement. Prerequisite: EDST 3913, EDST 3923, and senior standing. (Typically offered: Fall and Spring)
EDST 4993. Para-Professional Internship. 3 Hours.
120-hour field/formal classroom-based experience including lesson planning, classroom activity, classroom management, and reflective experience integration. Prerequisite: Admission into the EDSTBS-PARA major. (Typically offered: Fall and Spring) May be repeated for up to 9 hours of degree credit.

\section*{Educational Technology (ETEC)}

\section*{Courses}

ETEC 5203. Technology Foundations. 3 Hours.
A comprehensive survey of individuals, processes, and products that have affected the evolution of the field of educational technology. (Typically offered: Summer)

\section*{ETEC 5213. Media and Web Design. 3 Hours.}

A study of coding, platforms for media development, and web design with a focus on developing educational products. Prerequisite: Graduate standing. (Typically offered: Fall)

\section*{ETEC 5243. Instructional Design. 3 Hours.}

A comprehensive study of the models used to systematically design web-based instruction. Prerequisite: Graduate standing. (Typically offered: Fall)

ETEC 5253. Leadership and Innovation. 3 Hours.
A study of leadership roles, responsibilities, concepts, and strategies for building educational technology infrastructure in a variety of contexts. (Typically offered:
Spring)
ETEC 5263. Grant Writing. 3 Hours.
A study of issues and topics related to research and grant writing with a focus upon proposal development and submission for consideration. (Typically offered: Summer)

\section*{ETEC 5303. Technology Integration in K12. 3 Hours.}

A study of learning theories and technologies that can be utilized to support and to enhance instruction in multiple subject areas in the K-12 classroom. Prerequisite: Graduate standing. (Typically offered: Spring)

ETEC 5313. Visual Literacy. 3 Hours.
A study of visual literacy research and tools used to create visuals that help enhance content delivery to learners. (Typically offered: Summer)
ETEC 5373. Designing Websites. 3 Hours.
Students design websites for content delivery with a focus upon multiple platforms, effective design principles, accessibility, and copyright compliance. Prerequisite:
Must be an Educational Technology Master of Education (ETECME) major.
(Typically offered: Spring) May be repeated for up to 3 hours of degree credit.
ETEC 5743. Internship. 3 Hours.
A supervised field placement in educational technology that provides experience consistent with the student's professional goals and training emphasis. Internship experiences are planning and directed under the guidance of a faculty member.
On-campus and on-site supervision is required. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{ETEC 5981. Eportfolio Production. 1 Hour.}

This is a capstone course that is typically taken in the last semester of coursework and designed to: 1) review key constructs presented within the Educational Technology curriculum; 2) provide ETEC students the opportunity for reflection relative to his/her learning of the key concepts; and 3) utilize technology to assemble student-created artifacts that demonstrate mastery of the key concepts. (Typically offered: Fall and Spring)

ETEC 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{ETEC 6223. Research and Strategic Planning. 3 Hours.}

A study of quantitative, qualitative and mixed methods with a focus upon the strategic planning process and the development of skills necessary to implement effective educational technoogy and instructional design programs. (Typically offered: Fall)

\section*{ETEC 6253. Distance Learning. 3 Hours.}

A study of aspects of module design to facilitate learning in online and blended environments. (Typically offered: Spring)

\section*{ETEC 6393. Issues and Trends. 3 Hours.}

A study of challenges related to the infusion of technology into school and training environments with a focus on policies, trends, and issues in the field. (Typically offered: Fall)

\section*{Electrical Engineering (ELEG)}

\section*{Courses}

\section*{ELEG 2101L. Electric Circuits I Laboratory. 1 Hour.}

Experimental investigation of the steady-state behavior of resistive circuits excited by DC sources and transient behavior of simple R, L, and C circuits. Topics include fundamental laws of circuit theory applied to resistive networks and time response functions of R-L and R-C circuits. Corequisite: ELEG 2103. (Typically offered: Fall and Summer)

\section*{ELEG 2103. Electric Circuits I. 3 Hours.}

Introduction to circuit variables, elements, and simple resistive circuits. Analysis techniques applied to resistive circuits. The concept of inductance, capacitance and mutual inductance. The natural and step responses of RL, RC, and RLC circuits. Corequisite: ELEG 2101L. Pre- or Corequisite: (MATH 2564 or MATH 2564C) and PHYS 2074. Prerequisite: PHYS 2054. (Typically offered: Fall and Summer)
ELEG 2111L. Electric Circuits II Laboratory. 1 Hour.
Experimental investigation of the steady-state behavior of circuits excited by sinusoidal sources. Topics include complex power, three-phase circuits, transformers, and resonance. Corequisite: ELEG 2113. (Typically offered: Spring and Summer)

ELEG 2113. Electric Circuits II. 3 Hours.
Introduction to complex numbers. Sinusoidal steady-state analysis of electric circuits, active, reactive, apparent and complex power; balanced and unbalanced threephase circuits; mutual inductance; the use of the Laplace transform for electric circuit analysis and two-port networks. Corequisite: ELEG 2111L. Pre- or Corequisite: MATH 2584. Prerequisite: ELEG 2103, ELEG 2101L and PHYS 2074. (Typically offered: Spring and Summer)

ELEG 287V. Special Topics in Electrical Engineering. 1-4 Hour.
Consideration of current electrical engineering topics not covered in other courses. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.

\section*{ELEG 2904. Digital Design. 4 Hours.}

To introduce students to modern logic concepts, problem solving and design principles, and vocabulary and philosophy of the digital world. Corequisite: Lab component. Prerequisite: Engineering major. (Typically offered: Fall)
This course is cross-listed with CSCE 2114.

\section*{ELEG 3124. System \& Signal Analysis. 4 Hours.}

Definition and description of signals and systems; analog, digital, continuousand discrete-time and frequency analysis of systems, Z- and Fourier Transforms, sampling and signal reconstruction, filter design and engineering applications. Preor Corequisite: MATH 2584. Corequisite: Lab component. Prerequisite: ELEG 2103 or ELEG 3903 or BMEG 2904. (Typically offered: Fall)

\section*{ELEG 3124H. Honors System \& Signal Analysis. 4 Hours.}

Definition and description of signals and systems; analog, digital, continuousand discrete-time and frequency analysis of systems, Z- and Fourier Transforms, sampling and signal reconstruction, filter design and engineering applications. Preor Corequisite: MATH 2584. Corequisite: Lab component. Prerequisite: ELEG 2103 or ELEG 3903 or BMEG 2904. (Typically offered: Fall)
This course is equivalent to ELEG 3124.
ELEG 3143. Probability \& Stochastic Processes. 3 Hours.
Review of system analysis, probability, random variables, stochastic processes, auto correlation, power spectral density, systems with random inputs in the time and frequency domain, and applications. Prerequisite: ELEG 3124. Pre- or Corequisite: MATH 2574. (Typically offered: Spring)

ELEG 3143H. Honors Probability \& Stochastic Processes. 3 Hours.
Review of system analysis, probability, random variables, stochastic processes, auto correlation, power spectral density, systems with random inputs in the time and frequency domain, and applications. Pre- or Corequisite: ELEG 3124. (Typically offered: Spring)
This course is equivalent to ELEG 3143.

\section*{ELEG 3211L. Electronics I Laboratory. 1 Hour.}

Experimental investigation into electronic circuit analysis concepts. Topics include: diode behavior and applications, zener diode regulator design, bipolar junction transistor biasing, BJT common-emitter amplifier design, and operational amplifier fundamentals. Corequisite: ELEG 3213. (Typically offered: Fall and Spring)

\section*{ELEG 3211M. Honors Electronics I Laboratory. 1 Hour.}

Experimental investigation into electronic circuit analysis concepts. Topics include: diode behavior and applications, zener diode regulator design, bipolar junction transistor biasing, BJT common-emitter amplifier design, and operational amplifier fundamentals. Corequisite: ELEG 3213H. Prerequisite: Honors standing. (Typically offered: Fall and Spring)
This course is equivalent to ELEG 3211L.

\section*{ELEG 3213. Electronics I. 3 Hours.}

Introduction to electronic systems and signal processing, operational amplifiers, diodes, non-linear circuit applications, MOSFETS, and BJTs. Course has a lab component. Pre- or Corequisite: MATH 2574 and ELEG 2113. Corequisite:
ELEG 3211L. Prerequisite: MATH 2584. (Typically offered: Fall and Spring)

ELEG 3213H. Honors Electronics I. 3 Hours.
Introduction to electronic systems and signal processing, operational amplifiers, diodes, non-linear circuit applications, MOSFETS, and BJTs. Pre- or Corequisite: MATH 2574 and ELEG 2113. Corequisite: ELEG 3211M. Prerequisite: Honors standing and PHYS 2074. (Typically offered: Fall and Spring)
This course is equivalent to ELEG 3213.
ELEG 3221L. Electronics II Laboratory. 1 Hour.
Selected experiments to illustrate and complement topics covered in companion course ELEG 3223 - Electronics II Laboratory. Corequisite: ELEG 3223. (Typically offered: Spring)

\section*{ELEG 3221M. Honors Electronics II Laboratory. 1 Hour.}

Selected experiments to illustrate and complement topics covered in companion course ELEG 3223 - Electronics II Laboratory. Corequisite: ELEG 3223H. Prerequisite: Honors standing. (Typically offered: Spring)
This course is equivalent to ELEG 3221L.

\section*{ELEG 3223. Electronics II. 3 Hours.}

Differential pair amplifier, current mirrors, active loads, multistage amplifiers, amplifier frequency response, bode plots, Millers theorem, short circuit and open circuit time constant methods, feedback amplifiers, and stability of feedback amplifiers. Corequisite: ELEG 3221L. Prerequisite: ELEG 3213 and ELEG 2113. (Typically offered: Spring)

\section*{ELEG 3223H. Honors Electronics II. 3 Hours.}

Differential pair amplifier, current mirrors, active loads, multistage amplifiers, amplifier frequency response, bode plots, Millers theorem, short circuit and open circuit time constant methods, feedback amplifiers, and stability of feedback amplifiers. Corequisite: ELEG 3221M. Prerequisite: Honors standing, ELEG 3213 and MATH 2584. (Typically offered: Spring)

This course is equivalent to ELEG 3223.
ELEG 3304. Energy Systems. 4 Hours.
Steady state analysis of DC machines, transformers, induction machines and synchronous machines. Introduction to speed control of electric machines using power electronics. Corequisite: Lab component. Prerequisite: ELEG 2113. (Typically offered: Spring)

ELEG 3304H. Honors Energy Systems. 4 Hours.
Steady state analysis of DC machines, transformers, induction machines and synchronous machines. Introduction to speed control of electric machines using power electronics. Corequisite: Lab component. Prerequisite: ELEG 2113. (Typically offered: Spring)
This course is equivalent to ELEG 3304
ELEG 3704. Applied Electromagnetics. 4 Hours.
Analysis of transmission lines with sinusoidal and transient excitation. Development and use of the Smith Chart and methods of impedance matching. Vector analysis, static form of Maxwell's equations, electrostatics, and magnetostatics. Corequisite: Lab component. Pre- or Corequisite: PHYS 2074. Prerequisite: ELEG 2113 and MATH 2574. (Typically offered: Fall)

\section*{ELEG 3704H. Honors Applied Electromagnetics. 4 Hours.}

Analysis of transmission lines with sinusoidal and transient excitation. Development and use of the Smith Chart and methods of impedance matching. Vector analysis, static form of Maxwell's equations, electrostatics, and magnetostatics. Corequisite: Lab component. Pre- or Corequisite: PHYS 2074 and MATH 2574. Prerequisite:
ELEG 2113. (Typically offered: Fall)
This course is equivalent to ELEG 3704
ELEG 387V. Special Topics in Electrical Engineering. 1-4 Hour.
Consideration of current electrical engineering topics not covered in other courses. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ELEG 3903. Electric Circuits and Machines. 3 Hours.
Basic electrical principles and circuits; Introduction to sinusoidal steady-state analysis of electric circuits, active, reactive, and complex power; balanced threephase circuits; Steady-state analysis of electric machines and transformers Introduction to power electronics for machine speed control and alternative energy sources. For engineering students other than those in electrical engineering. Prerequisite: MATH 2564 and PHYS 2074. (Typically offered: Fall and Spring)

ELEG 3924. Microprocessor Systems Design. 4 Hours.
Introduction to 8-bit microprocessors and their application. Microprocessor architecture and assembly language; interface devices; system design using microprocessors. Corequisite: Lab component. Pre- or Corequisite: ELEG 2904. (Typically offered: Fall)

\section*{ELEG 3924H. Honors Microprocessor Systems Design. 4 Hours.}

Introduction to 8-bit microprocessors and their application. Microprocessor architecture and assembly language; interface devices; system design using microprocessors. Corequisite: Lab component. Prerequisite: ELEG 2904. (Typically offered: Fall)
This course is equivalent to ELEG 3924.

\section*{ELEG 3933. Circuits \& Electronics. 3 Hours.}

Basic principles of electric and electronic circuits and devices. For engineering students who are not pursuing a degree in electrical engineering. Prerequisite: MATH 2584 and PHYS 2074. (Typically offered: Spring)

ELEG 400VH. Honors Senior Thesis. 1-3 Hour.
Honors senior thesis. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer)

\section*{ELEG 4063. Electrical Engineering Design I. 3 Hours.}

Capstone design and application in electrical engineering. Prerequisite: ELEG 3223 and ELEG 3924. (Typically offered: Fall and Spring)

ELEG 4063H. Honors Electrical Engineering Design I. 3 Hours.
Design and application in electrical engineering. Prerequisite: ELEG 3223 and
ELEG 3924. (Typically offered: Fall and Spring)
This course is equivalent to ELEG 4063.
ELEG 4071. Electrical Engineering Design II. 1 Hour.
Design and application in electrical engineering. Prerequisite: ELEG 4063. (Typically offered: Fall and Spring)

\section*{ELEG 4071H. Honors Electrical Engineering Design II. 1 Hour.}

Design and application in electrical engineering. Prerequisite: ELEG 4063. (Typically offered: Fall and Spring)
This course is equivalent to ELEG 4071.
ELEG 4203. Semiconductor Devices. 3 Hours.
Crystal properties and growth of semiconductors, energy bands and charge carriers in semiconductors, excess carriers in semiconductors, analysis and design of p/ n junctions, analysis and design of bipolar junction transistors, and analysis and design of field-effect transistors. Students may not receive credit for both ELEG 4203 and ELEG 5203. Prerequisite: MATH 2584 and ELEG 3213, or graduate standing. (Typically offered: Irregular)

ELEG 4203H. Honors Semiconductor Devices. 3 Hours.
Crystal properties and growth of semiconductors, energy bands and charge carriers in semiconductors, excess carriers in semiconductors, analysis and design of p/ n junctions, analysis and design of bipolar junction transistors, and analysis and design of field-effect transistors. Students may not receive credit for both ELEG 4203 and ELEG 5203. Prerequisite: MATH 2584 and ELEG 3213, or graduate standing. (Typically offered: Irregular)
This course is equivalent to ELEG 4203.

ELEG 4233. Introduction to Integrated Circuit Design. 3 Hours.
Design and layout of large scale digital integrated circuits using CMOS technology. Topics include MOS devices and basic circuits, integrated circuit layout and fabrication, dynamic logic, circuit design, and layout strategies for large scale CMOS circuits. Students may not receive credit for both ELEG 4233 and ELEG 5923. Prerequisite: ELEG 3213 or ELEG 3933 and ELEG 2904 or equivalent. (Typically offered: Fall)

\section*{ELEG 4243. Analog Integrated Circuits. 3 Hours.}

Theory and design techniques for linear and analog integrated circuits. Current mirrors, voltage to base emitter matching, active loads, compensation, level shifting, amplifier design techniques, circuit simulation using computer-assisted design programs. Prerequisite: ELEG 3223. (Typically offered: Irregular)

ELEG 4253L. Integrated Circuit Design Lab I. 3 Hours.
This course will cover digital VLSI design and integrated circuit design tools. The course is structured with lectures. This course is offered to both senior undergraduate and graduate students. Students cannot get credit for both the undergraduate and graduate version of the course. Students cannot receive credit for both ELEG 4253L and ELEG 5253L. Prerequisite: ELEG 4233 or ELEG 5923. (Typically offered: Spring)

\section*{ELEG 4283. Mixed Signal Test Engineering I. 3 Hours.}

Overview of mixed signal testing, the test specification process, DC and parametric measurements, measurement accuracy, tester hardware, sampling theory, DSPbased testing, analog channel testing, digital channel testing. Prerequisite: Senior or graduate standing. (Typically offered: Irregular)

\section*{ELEG 4303. Introduction to Nanomaterials and Devices. 3 Hours.}

This course provides the students with an introduction to nanomaterials and devices. The students will be introduced to the quantization of energy levels in nanomaterials, growth of nanomaterials, electrical and optical properties, and devices based on these nanomaterials, such as tunneling resonant diodes, transistors, detector, and emitters. Graduate students will be given additional or different assignments. Graduate students will be expected to explore and demonstrate an understanding of the material with a greater level of depth and breadth than the undergraduates. Each group of students will have different expectations and grading systems. The instructor will prepare and distribute two distinct syllabi. Corequisite: ELEG 4203. Prerequisite: ELEG 3213 and PHYS 2074. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{ELEG 4403. Control Systems. 3 Hours.}

Mathematical modeling of dynamic systems, stability analysis, control system architectures and sensor technologies. Time-domain and frequency-domain design of feedback control systems: lead, lag, PID compensators. Special topics in microprocessor implementation. Students may not receive credit for both ELEG 4403 and ELEG 5403. Prerequisite: ELEG 3124. (Typically offered: Irregular)

\section*{ELEG 4403H. Honors Control Systems. 3 Hours.}

Mathematical modeling of dynamic systems, stability analysis, control system architectures and sensor technologies. Time-domain and frequency-domain design of feedback control systems: lead, lag, PID compensators. Special topics in microprocessor implementation. Students may not receive credit for both ELEG 4403 and ELEG 5403. Prerequisite: ELEG 3124. (Typically offered: Irregular)

ELEG 4413. Advanced Control Systems. 3 Hours.
A second course in linear control systems. Emphasis on multiple-input and multipleoutput systems: State-space analysis, similarity transformations, eigenvalue and eigenvector decomposition, stability in the sense of Lyapunov, controllability and observability, pole placement, quadratic optimization. Students may not receive credit for both ELEG 4413 and ELEG 5413. Prerequisite: ELEG 4403 or equivalent course. (Typically offered: Irregular)

ELEG 4423. Optimal Control. 3 Hours.
Introductory theory of optimizing dynamic systems: Formulation of performance objectives; calculus of variations; linear quadratic optimal control; discrete-time optimization; robustness and frequency domain techniques; reinforcement learning and optimal adaptive control. Prerequisite: ELEG 4403. (Typically offered: Irregular)

ELEG 4463L. Control Systems Laboratory. 3 Hours.
Experimental study of various control systems and components. The use of programmable logic controllers in the measurement of systems parameters, ladderlogic applications, process-control applications, and electromechanical systems. Prerequisite: ELEG 3924 and ELEG 3124. (Typically offered: Irregular)

ELEG 4503. Design of Advanced Electric Power Distribution Systems. 3 Hours. Design considerations of electric power distribution systems, including distribution transformer usage, distribution system protection implementation, primary and secondary networks design, applications of advanced equipment based on power electronics, and use of capacitors and voltage regulation. Students may not receive credit for both ELEG 4503 and ELEG 5503. Prerequisite: ELEG 3304. (Typically offered: Irregular)

\section*{ELEG 4513. Power and Energy Systems Analysis. 3 Hours.}

Modeling and analysis of electric power systems: Energy sources and conversion; load flow analysis; reference frame transformations; symmetrical and unsymmetrical fault conditions; load forecasting and economic dispatch. Students may not receive credit for both ELEG 4513 and ELEG 5513. Prerequisite: ELEG 2113. (Typically offered: Irregular)

ELEG 4533. Power Electronics and Motor Drives. 3 Hours.
Characteristics of Insulated Gate Bipolar Transistors (IGBTs), Silicon Carbide ( SiC ) MOSFETs, Gallium Nitride ( GaN ) devices, Design of driver and snubber circuits for IGBTs and SiC MOSFETs, and an introduction to electric motor drives. Students may not receive credit for both ELEG 4533 and ELEG 5533. Prerequisite: ELEG 3304 and ELEG 3223. (Typically offered: Irregular)

\section*{ELEG 4543. Introduction to Power Electronics. 3 Hours.}

Presents basics of emerging areas in power electronics and a broad range of topics such as power switching devices, electric power conversion techniques and analysis, as well as their applications. Students may not receive credit for both ELEG 5543 and ELEG 4543. Prerequisite: ELEG 2113 and ELEG 3213. (Typically offered: Irregular)

\section*{ELEG 4553. Switch Mode Power Conversion. 3 Hours.}

Basic switching converter topologies: buck, boost, buck-boost, Cuk, flyback, resonant; pulse-width modulation; integrated circuit controllers; switching converter design case studies; SPICE analyses of switching converters; state-space averaging and linearization; and switching converter transfer functions. Prerequisite: ELEG 3223 and ELEG 3124. (Typically offered: Irregular)

ELEG 4563. EMI in Power Electronics Converters: Generation, Propagation and Mitigation. 3 Hours.
Concepts of electro-magnetic-interference issues in power electronics converters. Basic concepts of EMI measurement, modeling and mitigation, with a focus on conducted EMI in power electronics converters. The course is structured with lectures and a lab session. Students can not receive credit for both ELEG 4563 and ELEG 5563. Prerequisite: ELEG 2103 or equivalent and MATH 2574. (Typically offered: Irregular)

\section*{ELEG 4583. Programming for Power Electronics: DSPs. 3 Hours.}

This course will focus on the development of both theoretical and practical skills needed to design and implement controls for power electronic systems using a Digital Signal Processors (DSPs). The course is structured with lectures and utilizes a project-based approach. Students cannot receive credit for both ELEG 5583 and ELEG 4583. Prerequisite: Senior standing, ELEG 2904, ELEG 3924, and CSCE 2004. (Typically offered: Spring)

ELEG 4593. Programming for Power Electronics: FPGA. 3 Hours.
This course will focus on the development of both theoretical and practical skills needed to design and implement controls for power electronic system using Field Programmable Gate Arrays (FPGAs). The course is structured with lectures and utilizes a project-based approach. Students cannot receive credit for both ELEG 5593 and ELEG 4593. Prerequisite: Senior standing, ELEG 2904, ELEG 3924 and CSCE 2004. (Typically offered: Spring)

ELEG 4603. Deterministic Digital Signal Processing System Design. 3 Hours. Design of Digital Signal Processing systems with deterministic inputs. Sampling, quantisizing, oversampling, ADC trade-offs, distortion, equalizers, anti-aliasing, coherency, frequency domain design, audio and video compression. Prerequisite: ELEG 3124. (Typically offered: Irregular)

\section*{ELEG 4623. Communication Systems. 3 Hours.}

Various modulation systems used in communications. AM and FM fundamentals, pulse modulation, signal to noise ratio, threshold in FM, the phase locked loop, matched filter detection, probability of error in PSK, FKS, and DPSK. The effects of quantization and thermal noise in digital systems. Information theory and coding. Students may not receive credit for both ELEG 4623 and ELEG 5663. Pre- or Corequisite: ELEG 3143. (Typically offered: Irregular)

ELEG 4703. Introduction to RF and Microwave Design. 3 Hours.
An introduction to microwave design principles. Transmission lines, passive devices, networks, impedance matching, filters, dividers, and hybrids will be discussed in detail. Active microwave devices will also be introduced. In addition, the applications of this technology as it relates to radar and communications systems will be reviewed. Prerequisite: ELEG 3704. (Typically offered: Irregular)

\section*{ELEG 4783. Introduction to Antennas. 3 Hours.}

Basic antenna types: small dipoles, half wave dipoles, image theory, monopoles, small loop antennas. Antenna arrays: array factor, uniformly excited equally spaced arrays, pattern multiplication principles, nonuniformly excited arrays, phased arrays. Use of MATLAB programming and mathematical techniques for antenna analysis and design. Emphasis will be on using simulation to visualize variety of antenna radiation patterns. Corequisite: Drill component. Prerequisite: ELEG 3704. (Typically offered: Irregular)

\section*{ELEG 4783H. Honors Introduction to Antennas. 3 Hours.}

Basic antenna types: small dipoles, half wave dipoles, image theory, monopoles, small loop antennas. Antenna arrays: array factor, uniformly excited equally spaced arrays, pattern multiplication principles, nonuniformly excited arrays, phased arrays. Use of MATLAB programming and mathematical techniques for antenna analysis and design. Emphasis will be on using simulation to visualize variety of antenna radiation patterns. Corequisite: Drill component. Prerequisite: ELEG 3704. (Typically offered: Irregular)
This course is equivalent to ELEG 4783.

\section*{ELEG 487V. Special Topics in Electrical Engineering. 1-3 Hour.}

Consideration of current electrical engineering topics not covered in other courses. Prerequisite: Senior standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ELEG 488V. Special Problems. 1-3 Hour.
Individual study and research on a topic mutually agreeable to the student and a faculty member. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ELEG 4963. CPLD/FPGA Based System Design. 3 Hours.
Field Programmable logic devices (FPGAs/CPLDs) have become extremely popular as basic building blocks for digital systems. They offer a general architecture that users can customize by inducing permanent or reversible physical changes. This course will deal with the implementation of logic options using these devices

Corequisite: Lab component. Prerequisite: ELEG 4914. (Typically offered: Irregular) This course is cross-listed with CSCE 4353.

ELEG 4983. Computer Architecture. 3 Hours.
Design of a single board computer including basic computer organization, memory subsystem design, peripheral interfacing, DMA control, interrupt control, and bus organization. Prerequisite: ELEG 3924. (Typically offered: Irregular)
This course is cross-listed with CSCE 4213.
ELEG 5173L. Digital Signal Processing Laboratory. 3 Hours.
Use of DSP integrated circuits. Lectures, demonstrations, and projects. DSP IC architectures and instruction sets. Assembly language programming. Development tools. Implementation of elementary DSP operations, difference equations, transforms and filters. Prerequisite: ELEG 3124. (Typically offered: Irregular)

\section*{ELEG 5203. Semiconductor Devices. 3 Hours.}

Crystal properties and growth of semiconductors, energy bands and charge carriers in semiconductors, excess carriers in semiconductors, analysis and design of p/ n junctions, analysis and design of bipolar junction transistors, and analysis and design of field-effect transistors. Students may not receive credit for both ELEG 4203 and ELEG 5203. Prerequisite: Graduate standing. (Typically offered: Irregular)

ELEG 5213. Integrated Circuit Fabrication Technology. 3 Hours.
Theory and techniques of integrated circuit fabrication technology; crystal growth, chemical vapor deposition, impurity diffusion, oxidation, ion implantation, photolithography and medullization. Design and analysis of device fabrication using SUPREM and SEDAN. In-process analysis techniques. Student review papers and presentations on state of the art fabrication and device technology. Prerequisite: ELEG 4203 or ELEG 5203. (Typically offered: Irregular)

ELEG 5223. Design and Fabrication of Solar Cells. 3 Hours.
Solar insolation and its spectral distribution/ p-n junction solar cells in dark and under illumination; solar cell parameters efficiency limits and losses; standard cell technology; energy accounting; design of silicon solar cells using simulation; fabrication of designed devices in the lab and their measurements. Prerequisite: ELEG 4203 or ELEG 5203. (Typically offered: Irregular)

\section*{ELEG 5253L. Integrated Circuit Design Laboratory I. 3 Hours.}

Design and layout of large scale digital integrated circuits. Students design, check, and simulate digital integrated circuits which will be fabricated and tested in I.C. Design Laboratory II. Topics include computer-aided design, more in-depth coverage of topics from ELEG 4233, and design of very large scale chips. Prerequisite: ELEG 4233 or ELEG 5923. (Typically offered: Irregular)
This course is cross-listed with CSCE 5253L.

\section*{ELEG 5273. Electronic Packaging. 3 Hours.}

An introductory treatment of electronic packaging, from single chip to multichip, including materials, substrates, electrical design, thermal design, mechanical design, package modeling and simulation, and processing considerations. Prerequisite: Graduate standing. (Typically offered: Irregular)
ELEG 5293L. Integrated Circuits Fabrication Laboratory. 3 Hours.
Experimental studies of silicon oxidation, solid-state diffusion, photolithographical materials and techniques, bonding and encapsulation. Fabrication and testing of PN diodes, NPN transistors and MOS transistors. Prerequisite: ELEG 5213. (Typically offered: Irregular)

ELEG 5303. Introduction to Nanomaterials and Devices. 3 Hours.
This course provides the students with an introduction to nanomaterials and devices. The students will be introduced to the quantization of energy levels in nanomaterials, growth of nanomaterials, electrical and optical properties, and devices based on these nanomaterials, such as tunneling resonant diodes, transistors, detector, and emitters. Graduate students will be given additional or different assignments. Graduate students will be expected to explore and demonstrate an understanding of the material with a greater level of depth and breadth than the undergraduates. Each group of students will have different expectations and grading systems. The instructor will prepare and distribute two distinct syllabi. Corequisite: ELEG 4203. Prerequisite: ELEG 3213 and PHYS 2074. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{ELEG 5313. Power Semiconductor Devices. 3 Hours.}

Carrier transport physics; breakdown phenomenon in semiconductor devices; power bipolar transistors, thyristors, power junction field-effect transistors, power field-controlled diodes, power metal-oxide-semiconductor field-effect transistors, and power MOS-bipolar devices. Prerequisite: ELEG 4203 or graduate standing. (Typically offered: Irregular)

\section*{ELEG 5323. Semiconductor Nanostructures I. 3 Hours.}

This course is focused on the basic theoretical and experimental analyses of low dimensional systems encountered in semiconductor heterojunctions and nanostructures with the emphasis on device applications and innovations.
Prerequisite: ELEG 4203 or instructor permission. (Typically offered: Irregular)

\section*{ELEG 5353. Semiconductor Optoelectronic Devices. 3 Hours.}

This course will provide graduate students a detailed background in semiconductor optoelectronic devices such as light emitting diodes and lasers, photodetectors, solar cells, modulators. The applications of these devices will also be discussed. Prerequisite: ELEG 4203 or ELEG 5203. (Typically offered: Spring Odd Years)
ELEG 5363. Semiconductor Material and Device Characterization. 3 Hours. This course provides an overview of semiconductor characterization techniques in industry: Electrical measurements, Optical measurements, Electron and ion beam measurements, X-ray and probe measurements. Prerequisite: ELEG 4203 or ELEG 5203 and instructor consent. (Typically offered: Irregular)

\section*{ELEG 5383. Introduction of Integrated Photonics. 3 Hours.}

This course is designed to provide junior and senior graduate students detailed knowledge of integrated photonics by using silicon photonics as an example. The course covers a cycle of design, fabrication, and testing of photonic devices by using analytic and numerical methods. The course will focus on designing an interferometer, which is widely used in communication and sensing applications. Students will be exposed to use the state-of-art design simulation tool, Lumerical, to design the photonic circuits and to evaluate the performances. In the course project, students will extend the design rules to design a set of components to be used for integrated microwave photonics based on Ge on \(\mathrm{Si}, \mathrm{SiGeSn}\), or Si 3 N 4 on sapphire platform. Prerequisite: ELEG 4203 and ELEG 5353. (Typically offered: Irregular)

\section*{ELEG 5393. Electronic Materials. 3 Hours.}

This is a lecture course designed to provide a fundamental introduction to materials science. Upon this fundamental basis, we will survey many of the properties and materials relevant to modern electronics. This course will cover semiconductors, but only briefly. The focus will be on properties and materials not generally well covered in other electrical engineering courses from a materials perspective. This will include, but not be limited to metals, dielectrics, and magnetic and optical materials. Prerequisite: Graduate standing; A knowledge of quantum mechanics is helpful but not required. (Typically offered: Spring)

\section*{ELEG 5403. Control Systems. 3 Hours.}

Mathematical modeling of dynamic systems, stability analysis, control systems architectures and sensor technologies. Time-domain and frequency-domain design of feedback control systems: lead, lag, PID compensators. Special topics on microprocessor implementation. Credit not given for both ELEG 4403 and ELEG 5403. Prerequisite: Graduate standing or ELEG 3124. (Typically offered: Irregular)

\section*{ELEG 5413. Modern Control Systems. 3 Hours.}

A second course in linear control systems. Emphasis on multiple-input and multipleoutput systems: State-space analysis, similarity transformations, eigenvalue and eigenvector decomposition, stability in the sense of Lyapunov, controllability and observability, pole placement, quadratic optimization. Credit not given for both ELEG 4413 and ELEG 5413. Prerequisite: ELEG 5403 or equivalent. (Typically offered: Irregular)

\section*{ELEG 5423. Optimal Control Systems. 3 Hours.}

Conditions for optimality; calculus of variations; linear quadratic regulators; Kalman filter theory; H-infinity design. Prerequisite: ELEG 5413 or graduate standing. (Typically offered: Irregular)

\section*{ELEG 5443. Nonlinear Systems Analysis and Control. 3 Hours.}

Second-order nonlinear systems analysis; Describing function analysis; Lyapunov stability; Feedback linearization; Backstepping control; Sliding mode control; Model reference adaptive control. Prerequisite: ELEG 5413. (Typically offered: Irregular)

\section*{ELEG 5473. Power System Operation and Control. 3 Hours.}

Study of the control and operation of electric power systems: Modeling, dynamics, and stability of three-phase power systems. Design and implementation of control systems related to generation and transmission. Overview of the related industry and government regulations for power system protection and reliability. Prerequisite: ELEG 4403 or graduate standing. (Typically offered: Irregular)

ELEG 5503. Design of Advanced Power Distribution Systems. 3 Hours. Design considerations of electric power distribution systems, including distribution transformer usage, distribution system protection implementation, primary and secondary networks design, applications of advanced equipment based on power electronics, and use of capacitors and voltage regulation. Students may not receive credit for both ELEG 4503 and ELEG 5503. Prerequisite: ELEG 3304 or graduate standing. (Typically offered: Irregular)

\section*{ELEG 5513. Power Systems Analysis. 3 Hours.}

Modeling and analysis of electric power systems: Energy sources and conversion; load flow analysis; reference frame transformations; symmetrical and unsymmetrical fault conditions; load forecasting and economic dispatch. Credit not given for both ELEG 4513 and ELEG 5513. Prerequisite: Graduate standing. (Typically offered: Irregular)

\section*{ELEG 5523. Electric Power Quality. 3 Hours.}

The theory and analysis of electric power quality for commercial, industrial and residential power systems. Specific topics include harmonics, voltage sags, wiring and grounding, instrumentation, distributed generation and power electronic systems, and site surveys. Case studies complement the theoretical concepts. Prerequisite: ELEG 3304 or graduate standing. (Typically offered: Irregular)

ELEG 5533. Power Electronics and Motor Drives. 3 Hours.
Fundamentals of power electronics, diode bridge rectifiers, inverters, general concepts on motor drives, induction motor drives, synchronous motor drives, and dc motor drives. Students may not receive credit for both ELEG 4533 and ELEG 5533. Prerequisite: Graduate standing or ELEG 3223 and ELEG 3304. (Typically offered: Irregular)

ELEG 5543. Introduction to Power Electronics. 3 Hours.
Presents basics of emerging areas in power electronics and a broad range of topics such as power switching devices, electric power conversion techniques and analysis, as well as their applications. Students may not receive credit for both ELEG 5543 and ELEG 4543. Prerequisite: ELEG 2113 and ELEG 3213, or graduate standing. (Typically offered: Irregular)

\section*{ELEG 5553. Switch Mode Power Conversion. 3 Hours.}

Basic switching converter topologies, control scheme of switching converters, simulation of switching converters, resonant converters, isolated converters, dynamic analysis of switching converters. Students will not receive graduate credit for both ELEG 4553 and ELEG 5553. Prerequisite: Graduate standing. (Typically offered: Irregular)

\section*{ELEG 5563. EMI in Power Electronics Converters: Generation, Propagation and Mitigation. 3 Hours.}

Concepts of electro-magnetic-interference issues in power electronics converters. Basic concepts of EMI measurement, modeling and mitigation, with a focus on conducted EMI in power electronics converters. The course is structured with lectures and a lab session. Students can not receive credit for both ELEG 4563 and ELEG 5563. Prerequisite: Graduate standing. (Typically offered: Irregular)

ELEG 5583. Programming for Power Electronics: DSPs. 3 Hours.
This course will focus on the development of both theoretical and practical skills needed to design and implement controls for power electronic systems using a Digital Signal Processors (DSPs).The course is structured with lectures and utilizes a project-based approach. Students cannot receive credit for both the undergraduate (ELEG 4583) and graduate version (ELEG 5583) of the course. Prerequisite: Graduate Standing. (Typically offered: Spring)

ELEG 5593. Programming for Power Electronics: FPGA. 3 Hours.
This course will focus on the development of both theoretical and practical skills needed to design and implement controls for power electronic systems using a Field Programmable Gate Arrays (FPGAs) to implement these control algorithms. The course is structured with lectures and utilizes a project-based approach. Students cannot receive credit for both the undergraduate (ELEG 4593) and graduate (ELEG 5593) version of the course. Prerequisite: Graduate Standing. (Typically offered: Spring)

\section*{ELEG 5663. Communication Theory. 3 Hours.}

Principles of communications. Channels and digital modulation. Optimum receivers and algorithms in the AWGN and fading channels. Coherent, non-coherent detectors and matched filters. Bounds on the performance of communications, and comparison of communications systems. Background in stochastic processes and probabilities, communication systems is desirable. Students may not receive credit for both ELEG 4623 and ELEG 5663. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

\section*{ELEG 5693. Wireless Communications. 3 Hours.}

Comprehensive course in fast developing field of wireless mobile/cellular personal telecommunications. Topics include cellular system structures, mobile radio propagation channels, etc. Prerequisite: Graduate standing. (Typically offered: Irregular)

\section*{ELEG 5703. RF \& Microwave Design. 3 Hours.}

An introduction to microwave design principles. Transmission lines, passive devices, networks, impedance matching, filters, dividers, and hybrids will be discussed in detail. Active microwave devices will also be introduced. In addition, the applications of this technology as it relates to radar and communications systems will be reviewed. Selected topics for device fabrication and measurements will be covered. Cannot get credit if student has taken ELEG 4703. Prerequisite: ELEG 3704. (Typically offered: Irregular)

\section*{ELEG 5723. Advanced Microwave Design. 3 Hours.}

This course is an advanced course in microwave design building on the introduction to microwave design course. A detailed discussion of active devices, biasing networks, mixers, detectors, Microwave Monolithic Integrated Circuits (MMIC), and wideband matching networks will be provided. In addition, a number of advanced circuits will be analyzed. Prerequisite: ELEG 3704 and ELEG 4703 or ELEG 5703. (Typically offered: Irregular)

ELEG 5763. Advanced Electromagnetic Scattering \& Transmission. 3 Hours. Reflection and transmission of electromagnetic waves from a flat interface, the Poynting theorem, the complex and average power, the rectangular wave guides, TE and TM modes, radiation from antennas in free space and introduction to computational electromagnetics. Prerequisite: ELEG 3704. (Typically offered: Irregular)

\section*{ELEG 5783. Introduction to Antennas. 3 Hours.}

Basic antenna types: small dipoles, half wave dipoles, image theory, monopoles, small loop antennas. Antenna arrays: array factor, uniformly excited equally spaced arrays, pattern multiplication principles, nonuniformly excited arrays, phased arrays. Use of MATLAB programming and mathematical techniques for antenna analysis and design. Emphasis will be on using simulation to visualize variety of antenna radiation patterns. Students cannot get credit for ELEG 5783 if they have taken ELEG 4783. Prerequisite: ELEG 3704. (Typically offered: Irregular)

ELEG 587V. Special Topics in Electrical Engineering. 1-3 Hour.
Consideration of current electrical engineering topics not covered in other courses. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

ELEG 588V. Special Problems. 1-6 Hour.
Opportunity for individual study of advanced subjects related to a graduate electrical engineering program to suit individual requirements. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit

\section*{ELEG 5903. Engineering Technical Writing. 3 Hours.}

In this course, advanced graduate students (PhD candidates and selected MS students) will be trained in rephrasing and preparing technical papers, including scientific reports. Illustrations step by step will be explained. Each student is required to prepare technical papers based on their own research results and will be guided from selecting a title to a finished product. The emphasis will be placed on the structures of the articles including figures and table preparation, abstract writing, citations and references, and acknowledgments. The students will also be trained to prepare letters to the journals' editors and how to respond to reviewers' comments. Prerequisite: Graduate standing. (Typically offered: Fall)

\section*{ELEG 5923. Introduction to Integrated Circuit Design. 3 Hours.}

Design and layout of large scale digital integrated circuits using CMOS technology. Topics include MOS devices and basic circuits, integrated circuit layout and fabrication, dynamic logic, circuit design, and layout strategies for large scale CMOS circuits. Students may not receive credit for both ELEG 4233 and ELEG 5923. Prerequisite: ELEG 3213 or ELEG 3933 and MATH 2584. (Typically offered: Fall)

ELEG 5953. Semiconductor Device and IC ESD Reliability. 3 Hours.
This course will cover semiconductor device and IC ESD design. The course is structured with lecture sessions and is offered to graduate students. The objective of this course is for students to understand semiconductor device and IC ESD design. Students will be able to demonstrate understanding of the basic concepts of ESD on-chip and off-chip protection for ICs and the future trends in ESD protections for advanced and emerging ICs. Prerequisite: ELEG 5923. (Typically offered: Irregular)

\section*{ELEG 5983. Computer Architecture. 3 Hours.}

Design of a single board computer including basic computer organization, memory subsystem design, peripheral interfacing, DMA control, interrupt control, and bus organization. Prerequisite: ELEG 3924. (Typically offered: Irregular)

\section*{ELEG 600V. Master's Thesis. 1-6 Hour.}

Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ELEG 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{Engineering (ENGR)}

\section*{English (ENGL)}

\section*{Courses}

ENGL 0001. Writing Lab. 1 Hour.
Required corequisite course with ENGL 1013 for students with scores below 19 in ACT English or below 470 in SAT Verbal. Writing labs, practice in study skills and time management, and mentorship from instructor. Credit not applied to hours required for degree. Corequisite: ENGL 1013. (Typically offered: Fall and Spring)

ENGL 1013. Composition I (ACTS Equivalency = ENGL 1013). 3 Hours. Teaches writing strategies for varied contexts, methods of research and integrating sources, and processes for drafting and revision. Pre- or Corequisite: ENGL 0001 or 19 or above on ACT English; or 490 or above on SAT Evidence-Based Reading and Writing; or 80 or above on Compass Writing Skills; or 83 or above on Accuplacer Sentence Skills; or above 255 on Accuplacer Next Generation Writing; or High School GPA of 3.2 or above. (Typically offered: Fall, Spring and Summer)

ENGL 1013H. Honors Composition I. 3 Hours.
Composition I offered at an Honors level, with the same textbooks and major assignments. Prerequisite: ACT English scores of 28 or above or SAT EvidenceBased Reading and Writing scores of 630 or above and honors student. (Typically offered: Fall)
This course is equivalent to ENGL 1013
ENGL 1023. Composition II (ACTS Equivalency = ENGL 1023). 3 Hours.
Builds on the skills, tools, and concepts presented in ENGL 1013 Composition I. Students will gain a rhetorical understanding of writing and composing genres in order to respond to different audience needs, contexts, and purposes. Prerequisite: ENGL 1013 or the equivalent. (Typically offered: Fall, Spring and Summer) This course is cross-listed with ENGL 1023H, ENGL 1033.

ENGL 1023H. Honors Composition II. 3 Hours.
Composition II offered at an Honors level, with the same textbooks and major assignments. Prerequisite: ENGL 1013 or the equivalent, ACT English scores of 28 or above or SAT Evidence-Based Reading and Writing scores of 630 or above and honors student. (Typically offered: Fall and Spring)
This course is cross-listed with ENGL 1023, ENGL 1033.
ENGL 1033. Technical Composition II (ACTS Equivalency = ENGL 1023). 3 Hours.

Composition II for Engineering and Business students, or any other students who are interested. Focuses on learning technical writing conventions and genres, such as definitions, instructions, correspondence, and proposals. Fulfills Core Curriculum requirement for ENGL 1023 Composition II. Prerequisite: ENGL 1013 or the equivalent. (Typically offered: Fall and Spring)

This course is cross-listed with ENGL 1023, ENGL 1023H.
ENGL 1033H. Honors Technical Composition II. 3 Hours.
Technical Composition II offered to Engineering and Business students, or any other students who are interested, at an Honors level, with the same textbooks and major assignments. Prerequisite: ENGL 1013 or the equivalent, ACT English scores of 28 or above or SAT Evidence-Based Reading and Writing scores of 630 or above and honors student. (Typically offered: Irregular)
This course is cross-listed with ENGL 1023, ENGL 1023H, ENGL 1033.
ENGL 1103. Reading Literature. 3 Hours.
Introduces students to close-reading strategies for analyzing texts with scholarly care and attention. Readings will vary based on instructor expertise and interest. (Typically offered: Fall and Spring)

ENGL 1213. Introduction to Literature. 3 Hours.
Approaches to reading and writing about fiction, drama, and poetry at the college level. (Typically offered: Fall and Spring)

ENGL 1213H. Honors Introduction to Literature. 3 Hours.
Approaches to reading and writing about fiction, drama, and poetry at the college level. Prerequisite: Honors standing. (Typically offered: Fall and Spring) This course is equivalent to ENGL 1213

\section*{ENGL 2003. Advanced Composition. 3 Hours.}

Review course in English composition. Exemption for this course may be granted for certain majors that require it by a grade of at least a "B" in ENGL 1013 and ENGL 1023 (or equivalent courses from an accredited institution), by achieving a score of 4 or 5 on the AP Language and Composition Examination and the AP Literature and Composition Examination, or by achieving a 6 HL or 7 HL on the IB Examination in English. Cannot be counted toward a major in English. Prerequisite: ENGL 1013 and ENGL 1023. (Typically offered: Fall, Spring and Summer)

\section*{ENGL 2013. Essay Writing. 3 Hours.}

Through assignments in Creative Nonfiction, from memoir to personal journalism, students will learn how form affects content, and develop their personal voice and their ability to use rhetorical techniques and strategies in all forms of writing. Prerequisite: ENGL 1013 and (ENGL 1023 or ENGL 1033 or equivalent). (Typically offered: Fall and Spring)

ENGL 2023. Creative Writing I (ACTS Equivalency = ENGL 2013). 3 Hours. Beginning level workshop course in which students write original poems and stories. Reading and detailed discussion of poems and stories in anthologies is required. Designed to teach the student the fundamental techniques of fiction and poetry. Prerequisite: ENGL 1013 and ENGL 1023. (Typically offered: Fall and Spring)

\section*{ENGL 2043. Rethinking Literature. 3 Hours.}

Introduces students to groupings of texts that are not usually discussed in traditional English classes, asking why some texts are considered Literature while others are not. Readings will vary based on instructor expertise and interest. Prerequisite: ENGL 1023. (Typically offered: Fall and Spring)

ENGL 2053. Transatlantic Literature from Beginnings to 1640. 3 Hours. A critical and historical survey of transatlantic literature from its beginnings to 1640, with attention to identifying cultural and/or historical trends of the period. Readings will vary based on instructor expertise and interest. Prerequisite: ENGL 1023. (Typically offered: Fall and Spring)

ENGL 2063. Transatlantic Literature from 1640 to 1865. 3 Hours.
A critical and historical survey of the development of transatlantic literature from 1640 to 1865 , with attention to identifying cultural and/or historical trends of the period. Readings will vary based on instructor expertise and interest. Prerequisite: ENGL 1023. (Typically offered: Fall and Spring)

ENGL 2073. Transatlantic Literature from 1865 to 1945. 3 Hours.
A critical and historical survey of the development of transatlantic literature from 1865 to 1945, with attention to identifying cultural and/or historical trends of the period. Readings will vary based on instructor expertise and interest. Prerequisite: ENGL 1023. (Typically offered: Fall and Spring)

ENGL 2083. Transatlantic Literature from 1945 to Present. 3 Hours. A critical and historical survey of the development of transatlantic literature from 1945 to the present, with attention to identifying cultural and/or historical trends of the period. Readings will vary based on instructor expertise and interest. Prerequisite: ENGL 1023. (Typically offered: Fall and Spring)

\section*{ENGL 2173. Literacy in America. 3 Hours.}

A course that examines the myriad definitions of literacy (and illiteracy) and their connections to issues of social class, occupational status, economic and political structures, educational institutions, cultural organizations, and the media. (Typically offered: Spring)

ENGL 2303. English Literature from the Beginning through the 17th Century (ACTS = ENGL 2673). 3 Hours.
A critical and historical survey of the development of literature in the British Isles from its beginnings to the end of the seventeenth century. Prerequisite: ENGL 1013 and ENGL 1023. (Typically offered: Fall and Spring)

ENGL 2303C. English Literature from the Beginning through the 17th Century (ACTS = ENGL 2673). 3 Hours.
A critical and historical survey of the development of literature in the British Isles from its beginnings to the end of the seventeenth century. Lecture and drill.
Prerequisite: ENGL 1013 and ENGL 1023. (Typically offered: Fall)
This course is equivalent to ENGL 2303.
ENGL 2313. Survey of English Literature from 1700 to 1900 (ACTS Equivalency = ENGL 2683). 3 Hours.
A critical and historical survey of the development of literature in the British Isles from 1700 to 1900. Prerequisite: ENGL 1013 and ENGL 1023. (Typically offered: Fall and Spring)

ENGL 2323. Survey of Modern and Contemporary British, Irish, and Postcolonial Literature. 3 Hours.
A survey of modern and contemporary literature in English written in Great Britain, Ireland, Africa, Asia, and the Caribbean. Prerequisite: ENGL 1013 and ENGL 1023. (Typically offered: Fall and Spring)

ENGL 2343. Survey of American Lit from the Colonial Period through Naturalism (ACTS Equiv=ENGL 2653). 3 Hours.
A survey of major American writers from the colonial period to 1900. Prerequisite: ENGL 1013 and ENGL 1023. (Typically offered: Fall and Spring)

ENGL 2353. Survey of Modern and Contemporary American Literature (ACTS Equivalency = ENGL 2663). 3 Hours.
A survey of American writers after 1900. Prerequisite: ENGL 1013 and ENGL 1023. (Typically offered: Fall and Spring)

\section*{ENGL 2413. Introductory Topics in English. 3 Hours.}

Students will understand concepts and issues of theme, form, and motif in literary works about the designated topic. Students will improve in their abilities to read literary works carefully and critically and to write about literature correctly and cogently. Topics and content will vary from semester to semester. (Typically offered: Irregular)

\section*{ENGL 3013. Creative Writing II. 3 Hours.}

Laboratory course for students who wish to attempt original work in the various literary forms. Prerequisite: ENGL 2023 or equivalent. (Typically offered: Fall and Spring)

ENGL 3053. Technical and Professional Writing (ACTS Equivalency = ENGL 2023). 3 Hours.

Intensive practice in such types of writing as processes, descriptions of mechanism, abstracts, and laboratory and research reports. The criteria for effective written exposition in the scientific areas, including agriculture and engineering. Prerequisite: ENGL 1013 and ENGL 1023 or equivalent. (Typically offered: Fall and Spring)

ENGL 3083. Professional Topics. 3 Hours.
Specialized topics related to professional issues in the humanities, e.g. academic and alternative-academic job searches, publication workshops, public humanities, and/or teaching of humanities disciplines at various levels. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
This course is cross-listed with HUMN 3083.
ENGL 3103. Approaches to Critical Thinking About Literature and Culture. 3 Hours.
Introduces students to a selection of critical methods for studying literature and culture, emphasizing careful reflection on methodological choices. Readings will vary based on instructor expertise and interest. (Typically offered: Fall and Spring)

ENGL 3113. Folklore. 3 Hours.
Popular literature (ballads, folktales, etc.). Prerequisite: Junior standing. (Typically offered: Irregular)

ENGL 3123. Folk and Popular Music Traditions. 3 Hours.
Introduction to folk and popular music studies. Emphasis on American traditions. (Typically offered: Irregular)

ENGL 3173. Introduction to Linguistics. 3 Hours.
Introduction to language study with stress upon modern linguistic theory and analysis. Data drawn from various languages reveal linguistic universals as well as phonological, syntactic, and semantic systems of individual languages. Related topics: language history, dialectology, language and its relation to culture and society, the history of linguistic scholarship. Prerequisite: Junior standing. (Typically offered: Irregular)
This course is cross-listed with COMM 3173, WLLC 3173.
ENGL 3203. Poetry. 3 Hours.
A critical introduction to the genre. (Typically offered: Fall and Spring)
ENGL 3213. Fiction. 3 Hours.
A critical introduction to the genre. (Typically offered: Fall and Spring)
ENGL 3223. Drama. 3 Hours.
The companion course of Theatre in London Study Abroad which immerses scholars in the world of theatre and culture in Britain. Students spend four weeks in London with excursions to Stratford-upon-Avon, Oxford and Bath. Literature, performance, design and history are all explored through lectures, field trips and writing prompts. (Typically offered: Summer)

ENGL 3253. The Latinx Image in Media. 3 Hours.
Exploration of the image and experience of Latinx populations as represented in visual and print media, including film, television, news journalism, and art. Topics related to U.S. Latinx history, culture, politics, and socioeconomics will be examined in the analyses of these mediated depictions. (Typically offered: Irregular)
ENGL 3263. African Americans in Film. 3 Hours.
A survey of the history of images of African Americans in film, especially as these images are examined in the context of stereotypical renditions and/or realistic representations of African American experiences. Issues of African American history, culture, and socio-political context will be addressed in the analyses of these films. Prerequisite: ENGL 1023 and advanced standing. (Typically offered: Irregular) This course is cross-listed with AAST 3263, JOUR 3263, COMM 3263.
ENGL 3283. Topics in Popular Culture and Popular Genres. 3 Hours. Survey of a broad topical area in popular culture and popular genres, such as science fiction or detective fiction. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{ENGL 3433. Introduction to Chaucer. 3 Hours.}

Course designed primarily for undergraduates. Extensive reading in Chaucer's major works. (Typically offered: Irregular)

ENGL 3443. Topics in Literature, Medicine, and Science. 3 Hours.
Examines the intersections between medical and scientific topics and literature, with attention to specific theories, themes, genres, authors, historical moments, literary movements, or other organizing principles. Prerequisite: ENGL 1013 and ENGL 1023, or equivalent in both. (Typically offered: Spring Odd Years) May be repeated for up to 9 hours of degree credit.

ENGL 3543. Topics in U.S. Latino/Latina Literature and Culture. 3 Hours. The study of works of U.S. Latino/Latina literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3553. Topics in Native American Literature and Culture. 3 Hours.
The study of works of Native American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3573. Special Topics in Diversity. 3 Hours.
The study of literature and culture with specific focus on issues of diversity, inclusion, and equality. Courses may be organized around specific theories, themes, genres, authors, historical moments, artistic movements, comparative and intersectional approaches, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3583. Topics in Arab American Literature and Culture. 3 Hours.
The study of works of Arab American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. No knowledge of Arabic necessary. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3593. Topics in Gender, Sexuality, and Literature. 3 Hours.
The study of gender or sexuality and literature, with attention to specific theories, themes, genres, authors, historical moments, literary movements, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{ENGL 3603. Topics in Rhetoric and Composition. 3 Hours.}

The study of special topics in the field of Rhetoric and Composition. Content will vary. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{ENGL 3623. The Bible as Literature. 3 Hours.}

The several translations of the Bible; its qualities as great literature; its influence upon literature in English; types of literary forms. (Typically offered: Irregular) This course is cross-listed with WLIT 3623.

ENGL 3633. Writing on Social Issues. 3 Hours.
The study and application of writing on a range of social issues. Content will vary. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3713. Topics in Medieval Literature and Culture. 3 Hours.
Study of the languages, literature, and civilization of the British Isles from approximately 500 to 1500 CE (including Old English, Middle English, Latin, Celtic, Anglo-Norman, and Scandinavian). Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3713H. Honors Topics in Medieval Literature and Culture. 3 Hours. Study of the languages, literature, and civilization of the British Isles from approximately 500 to 1500 CE (including Old English, Middle English, Latin, Celtic, Anglo-Norman, and Scandinavian). Content varies. Prerequisite: Honors standing. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit. This course is equivalent to ENGL 3713.

\section*{ENGL 3723. Topics in Renaissance Literature and Culture. 3 Hours.}

The study of literary works of the English Renaissance, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Course content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3723H. Honors Topics in Renaissance Literature and Culture. 3 Hours. The study of literary works of the English Renaissance, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Course content varies. Prerequisite: Honors standing. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit. This course is equivalent to ENGL 3723.
ENGL 3733. Topics in Restoration and Eighteenth-Century Literature and Culture. 3 Hours.
The study of Restoration and eighteenth-century literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3743. Topics in Nineteenth-Century British Literature and Culture. 3 Hours.
The study of literature of the 19th century, with attention to particular themes, genres, authors, literary movements, historical movements, or other organizing principles. Course content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3753. Topics in Modern and Contemporary British Literature and Culture. 3 Hours.
The study of a special topic in the field of modern and contemporary British literature and culture. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
ENGL 3833. Topics in American Literature and Culture to 1900. 3 Hours. The study of American literature and culture to 1900, with attention to particular themes, genres, authors, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3843. Topics in Modern and Contemporary American Literature and Culture. 3 Hours.
The study of a special topic in the field of modern and contemporary American literature and culture. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
ENGL 3853. Topics in African-American Literature and Culture. 3 Hours. The study of works of African American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
This course is cross-listed with AAST 3853.
ENGL 3863. Topics in Literature and Culture of the American South. 3 Hours.
The study of works of literature of the American South, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3873. Seminar in Medical Humanities. 3 Hours.
Combines literary and critical texts that lead students to consider the ways in which literature and the humanities enrich and inform medical education and practice. Students will practice critical analysis and reflection to instill in them a commitment to compassionate, community responsive, and culturally competent medical care. (Typically offered: Spring)
ENGL 3873H. Honors Seminar in Medical Humanities. 3 Hours.
Combines literary and critical texts that lead students to consider the ways in which literature and the humanities enrich and inform medical education and practice.
Students will practice critical analysis and reflection to instill in them a commitment to compassionate, community responsive, and culturally competent medical care. (Typically offered: Spring)
This course is equivalent to ENGL 3873.
ENGL 3903. Special Topics. 3 Hours.
Survey of a broad topical area related to literature and culture but not otherwise encompassed by the curriculum. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3923H. Honors Colloquium. 3 Hours.
Covers a special topic or issue. Offered as part of the honors program. Prerequisite: honor candidacy (not restricted to candidacy in English). (Typically offered: Irregular) May be repeated for degree credit.
ENGL 4003. Style and Grammar for Professional Writers. 3 Hours.
Study of English style and grammar at an advanced level for students who plan to teach writing or practice as professional or technical writers. (Typically offered: Fall Odd Years)

ENGL 4013. Undergraduate Poetry Workshop. 3 Hours.
Gives close attention to individual manuscripts in a workshop environment. Prerequisite: ENGL 3013 or equivalent. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
ENGL 4023. Undergraduate Fiction Workshop. 3 Hours.
Gives close attention to individual manuscripts in a workshop environment. Prerequisite: ENGL 3013 or equivalent. (Typically offered: Irregular)
ENGL 4113. Undergraduate Independent Study. 3 Hours.
Undergraduate original research and writing. Prerequisite: 'B' average and twothirds (21 hours) of regular requirements for English major completed. Departmental approval and instructor approval required. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.
ENGL 4133. Writing Nature. 3 Hours.
Study of writings about nature, both scientific and literary. Examination of the basis of each author's relationship with (and definition of) the natural world while examining the literary/aesthetic aspects of that experience. Prerequisite: ENGL 1023. (Typically offered: Spring) May be repeated for up to 9 hours of degree credit.

\section*{ENGL 4133H. Honors Writing Nature. 3 Hours.}

Study of writings about nature, both scientific and literary. Examination of the basis of each author's relationship with (and definition of) the natural world while examining the literary/aesthetic aspects of that experience. Prerequisite: ENGL 1023. (Typically offered: Spring) May be repeated for up to 9 hours of degree credit.
This course is equivalent to ENGL 4133.
ENGL 4143. American Film Survey. 3 Hours.
A survey of major American genres, major directors, and films that have influenced the development of motion pictures. (Typically offered: Irregular)
This course is cross-listed with COMM 4143.
ENGL 4193. Undergraduate Internship in English. 3 Hours.
Internship changes depending on availability and student interest. Prerequisite: Junior standing and department consent. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{ENGL 4303. Introduction to Shakespeare. 3 Hours.}

Extensive reading in Shakespeare's comedies, histories, tragedies, and nondramatic poetry. (Typically offered: Fall)

\section*{ENGL 4503. Introduction to Literary Theory. 3 Hours.}

A historical survey of literary theory from Plato onwards. (Typically offered: Irregular)
ENGL 4513. Studies in Literary Criticism and Theory. 3 Hours.
A survey of contemporary trends in literary criticism. Emphasis will be placed on engaging the practices of a particular theory. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4523. Studies in U.S. Latino/Latina Literature and Culture. 3 Hours.
The study of works of U.S. Latino/a literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
ENGL 4553. Studies in Native American Literature and Culture. 3 Hours.
The study of works of Native American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{ENGL 4563. Studies in Major Authors. 3 Hours.}

The concentrated study of works by one or more major authors. At least one major paper will be required. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4573. Studies in Major Literary Movements. 3 Hours.
This course focuses on the literature either of a major literary movement such as Romanticism or Modernism or of a more specific topic such as Utopianism in twentieth-century writing. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4583. Studies in Arab American Literature and Culture. 3 Hours.
The study of works of Arab American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. Research paper required. No knowledge of Arabic necessary. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4593. Studies in Gender, Sexuality, and Literature. 3 Hours.
The study of gender or sexuality and literature, with attention to specific theories, themes, genres, authors, historical moments, literary movements, or other organizing principles. Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{ENGL 4603. Special Studies. 3 Hours.}

Concentrated study of a specific topical area related to literature and culture but not otherwise encompassed by the curriculum. Content varies. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

\section*{ENGL 4603H. Honors Special Studies. 3 Hours.}

Concentrated study of a specific topical area related to literature and culture but not otherwise encompassed by the curriculum. Content varies. (Typically offered: Irregular) May be repeated for degree credit.
This course is equivalent to ENGL 4603.
ENGL 4673. Special Studies in Diversity. 3 Hours.
The study of literature and culture with specific focus on issues of diversity and inclusion. May be organized around specific theories, themes, genres, authors, or other organizing principles. At least one major research paper will be required. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{ENGL 4713. Studies in Medieval Literature and Culture. 3 Hours.}

Study of the languages, literature, and civilization of the British Isles from approximately 500 to 1500 CE (including Old English, Middle English, Celtic, AngloNorman, and Scandinavian). Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4723. Studies in Renaissance Literature and Culture. 3 Hours.
The study of literary works of the English Renaissance, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Course content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
ENGL 4733. Studies in Restoration and Eighteenth-Century Literature. 3 Hours. The study of Restoration and eighteenth-century literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
ENGL 4743. Studies in Nineteenth-Century British Literature and Culture. 3 Hours.
The study of literature of the nineteenth century, with attention to particular themes, genres, authors, literary movements, historical movements, or other organizing principles. Course content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4753. Studies in Modern and Contemporary British Literature and Culture. 3 Hours.
The study of modern and contemporary British literature and culture. Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4833. Studies in American Literature and Culture to 1900. 3 Hours.
The study of American literature and culture to 1900, with attention to particular themes, genres, authors, or other organizing principles. Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
ENGL 4843. Studies in Modern and Contemporary American Literature and Culture. 3 Hours.
The study of modern and contemporary American literature and culture, with attention to particular themes, genres, authors, or other organizing principles. Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{ENGL 4853. Studies in African American Literature and Culture. 3 Hours.}

The study of works of African American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
This course is cross-listed with AAST 4853.
ENGL 4863. Studies in Literature and Culture of the American South. 3 Hours. The study of works of literature of the American South, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least on major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{ENGL 4903. Studies in Rhetoric and Composition. 3 Hours.}

Concentrated study of a specific topical area related to Rhetoric and Composition. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{ENGL 4933. Studies in Popular Culture and Popular Genres. 3 Hours.}

The study of a focused topical area in popular culture and popular genres, such as science fiction or detective fiction. Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

\section*{ENGL 498V. Senior Thesis. 1-6 Hour.}

Honors thesis under the direction of a faculty member in the Department of English. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{ENGL 5003. Composition Pedagogy. 3 Hours.}

Introduction to teaching college composition. Designed for graduate assistants at the University of Arkansas. (Typically offered: Fall)

ENGL 5023. Writing Workshop: Fiction. 3 Hours.
Fiction writing workshop. Prerequisite: Creative Writing MFA students only.
(Typically offered: Irregular) May be repeated for up to 24 hours of degree credit.
ENGL 5033. Writing Workshop: Poetry. 3 Hours.
Poetry writing workshop. Prerequisite: Creative Writing MFA students only. (Typically offered: Irregular) May be repeated for up to 24 hours of degree credit.

\section*{ENGL 5043. Translation Workshop. 3 Hours.}

Problems of translation and the role of the translator as both scholar and creative writer; involves primarily the discussion in workshop of the translations of poetry, drama, and fiction done by the students, some emphasis upon comparative studies of existing translations of well-known works. Primary material will vary. Prerequisite: Reading knowledge of a foreign language and Creative Writing MFA students only. (Typically offered: Irregular) May be repeated for up to 24 hours of degree credit.

ENGL 5083. Professional Topics. 3 Hours
Specialized topics related to professional issues in the humanities, e.g. academic and alternative-academic job searches, publication workshops, public humanities, and/or teaching of humanities disciplines at various levels. (Typically offered: Irregular)
This course is cross-listed with HUMN 5083.
ENGL 510V. Readings in English and American Literature. 1-6 Hour.
Open to Honors candidates and graduate students. Prerequisite: Departmental approval and instructor approval required. (Typically offered: Irregular) May be repeated for degree credit.

ENGL 5173. Advanced Studies in Medieval Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5193. Graduate Internship in English. 3 Hours.
Internship changes depending on availability and student interest. Departmental consent required. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ENGL 5203. Introduction to Graduate Studies. 3 Hours.
Develop knowledge and strategies for successfully negotiating graduate work and the profession. Topics covered include, but are not limited to, scholarly habits and practices, writing and publishing skills, scholarly associations, journals, conferences, university structures, and career paths. Emphasis on the development of individual academic and professional goals. (Typically offered: Irregular)

ENGL 5213. Portfolio Workshop. 3 Hours.
Workshop designed for students in the M.A. Program in English or Comparative Literature and Cultural Studies who are using the Portfolio Option to complete the program. Instructor consent required. (Typically offered: Spring)

ENGL 5223. Advanced Studies in Renaissance Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
ENGL 5233. Craft of Translation: I. 3 Hours.
An examination of the principal challenges that confront translators of literature, including the recreation of style, dialect, ambiguities, and formal poetry; vertical translation; translation where multiple manuscripts exist; and the question of how literal a translation should be. (Typically offered: Irregular)

ENGL 5243. Special Topics. 3 Hours.
Designed to cover subject matter not offered in other courses. (Typically offered: Irregular) May be repeated for degree credit.

\section*{ENGL 5263. Craft of Fiction: I. 3 Hours.}

Such aspects of the genre as scene, transition, character, and conflict. Discussion is limited to the novel. (Typically offered: Irregular)

ENGL 5273. Craft of Poetry: I. 3 Hours.
An examination of perception, diction, form, irony, resolution, and the critical theories of the major writers on poetry, such as Dryden, Coleridge, and Arnold. (Typically offered: Irregular)

\section*{ENGL 5283. Craft of Fiction: II. 3 Hours.}

Second part of the study of the techniques of fiction. Discussion is limited to the short story. (Typically offered: Irregular) May be repeated for degree credit.

ENGL 5293. Craft of Poetry: II. 3 Hours.
Second part of the study of the techniques of poetry; independent study of a poet or a problem in writing or criticism of poetry. (Typically offered: Irregular) May be repeated for up to 15 hours of degree credit.

ENGL 5383. Histories of Rhetoric and Composition. 3 Hours.
Surveys contextualized histories of the field of Rhetoric and Composition. Focus and readings will vary depending on instructor interest. (Typically offered: Spring Even Years)

ENGL 5403. Advanced Studies in Nineteenth-Century British Literature and Culture. 3 Hours
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5413. Advanced Studies in Modern and Contemporary British Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5453. Technical Writing in Healthcare Settings. 3 Hours
Focuses on the work of technical writing across a variety of healthcare settings. Prepares healthcare professionals and healthcare-adjacent professionals to use technical writing theory and skills in their workplace. (Typically offered: Summer)

ENGL 5503. Style and Context for Tech Writers. 3 Hours
Addresses project management frameworks and their impact on technical writing, creation of design and deliverables for team meetings, and the role of writing in user experience work. (Typically offered: Summer)

ENGL 5513. Design, Editing, and Publication for Technical Writers. 3 Hours. Focuses on the document creation workflow of technical writers, starting with document design, moving into editing, and finally layout for publication. (Typically offered: Fall Odd Years)

ENGL 5523. Technical Writing and UX for Online Audiences. 3 Hours.
Investigates the challenges of creating documents that must exist concurrently in online, face-to-face, and mixed modalities, with a focus on online writing. Covers user-centered theory, strategies, and skills for online writing, HTML, CSS, and web standards. Specific focus on creating organizational websites with editorial workflows geared towards technical writers. (Typically offered: Fall)

\section*{ENGL 5533. Technical Writing Praxis. 3 Hours.}

Focuses on the process of applying theory to situated practice in technical writing. The course is offered in two sessions of the summer. The first session focuses on style in technical writing. The second session focuses on applied practice, with students choosing between academic writing, professional writing, or grant and proposal writing. (Typically offered: Summer) May be repeated for up to 6 hours of degree credit.

ENGL 5543. Advanced Studies in U.S. Latino/Latina Literature and Culture. 3 Hours.

The study of works of U.S. Latino/a literature and literary criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5563. Advanced Studies in Native American Literature and Culture. 3 Hours.

The study of works of Native American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5583. Advanced Studies in Arab American Literature and Culture. 3 Hours.
The study of works of Arab American literature and criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. Research paper required. No knowledge of Arabic necessary. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5593. Advanced Studies in Gender, Sexuality, and Literature. 3 Hours. The study of gender or sexuality and literature, with attention to specific theories, themes, genres, authors, historical moments, literary movements, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5623. The Bible as Literature. 3 Hours.
The several translations of the Bible; its qualities as great literature; its influence upon literature in English; types of literary forms. (Typically offered: Irregular) This course is cross-listed with WLIT 5623.

ENGL 5653. Shakespeare: Plays and Poems. 3 Hours.
An introduction to a broad selection of Shakespeare's work. (Typically offered: Irregular)

ENGL 5703. Advanced Studies in American Literature and Culture Before 1900.

\section*{3 Hours.}

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5723. Advanced Studies in Literature and Culture of the American South. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
ENGL 5763. Advanced Studies in Postcolonial Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
ENGL 5803. Advanced Studies in Modern and Contemporary American Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5863. Advanced Studies in African American Literature and Culture. 3 Hours.
The study of works of African American literature and literary criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
ENGL 5923. Advanced Studies in Film and Media. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
ENGL 5933. Advanced Studies in Popular Culture and Popular Genres. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5943. Advanced Studies in Criticism and Literary Theory. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5963. Advanced Studies in Technical Writing and Public Rhetorics. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. Course will cover various topics relevant to students working in Technical Writing and Public Rhetorics. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ENGL 5973. Advanced Studies in Rhetoric and Composition. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
ENGL 6113. Seminar in Medieval Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
ENGL 6203. Seminar in Renaissance Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
ENGL 6243. Seminar in Special Topics. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6443. Seminar in Nineteenth-Century British Literature and Culture. 3
Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
ENGL 6513. Seminar in Modern and Contemporary British Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6543. Seminar in U.S. Latino/Latina Literature and Culture. 3 Hours.
The study of works of U.S. Latino/a literature and literary criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper, suitable for presentation or publication, will be required. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6553. Seminar in Native American Literature and Culture. 3 Hours. The study of works of Native American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper, suitable for presentation or publication, will be required. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6593. Seminar in Gender, Sexuality, and Literature. 3 Hours. The study of gender or sexuality and literature, with attention to specific theories, themes, genres, authors, historical moments, literary movements, or other organizing principles. Content varies. At least one major research paper, suitable for presentation or publication, will be required. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
ENGL 6733. Seminar in Literature and Culture of the American South. 3 Hours. Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
ENGL 6763. Seminar in Postcolonial Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. At least one major research paper, suitable for presentation or publication, will be required.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
ENGL 6803. Seminar in Modern and Contemporary American Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6853. Seminar in African American Literature and Culture. 3 Hours. The study of works of African American literature and literary criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper, suitable for presentation or publication, will be required. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6933. Seminar in Popular Culture and Popular Genres. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
ENGL 6943. Seminar in Criticism and Literary Theory. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
ENGL 6973. Seminar in Rhetoric and Composition. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
ENGL 698V. Master's Thesis. 1-6 Hour.
Master's thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{ENGL 699V. Master of Fine Arts Thesis. 1-6 Hour.}

Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ENGL 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{English Language and Cultural Studies (ELAC)}

\section*{Courses}

\section*{ELAC 000V. University Connections Intensive English. 1-9 Hour}

This class is part of the Intensive English Program designed for students who are in their first semester of the University Connections three-semester program. Not for degree credit. Prerequisite: Language assessment required. (Typically offered: Irregular)

\section*{ELAC 0011. Writing Workshop: Grammar through Editing. 1 Hour.}

This class is designed to assist upper-intermediate to advanced non-native speakers of English improve their academic writing at the sentence level. Students' writing is analyzed for grammatical accuracy; students develop strategies for editing their writing more independently and learn to produce clearer, more grammatically correct writing. Not for degree credit. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / UofA ELPT (writing) / TOEFL Alternative. (Typically offered: Fall and Spring)

ELAC 0103. University Connections Intensive English Level I. 3 Hours.
Students new to English will be introduced to the letters and sounds of the alphabet, fundamental grammar structures for conversation and writing, and essentia vocabulary on themes (relevant to community, individual and academic entities), and cultural distinctions in the American university system. Applied language instruction and assignments will be supplemented by and supported with practical training in educational technology and investigation through special topics. (Typically offered: Fall, Spring and Summer)

ELAC 0203. University Connections Intensive English Level II. 3 Hours. Based on placement or successful completion of Level I (ELAC 0103) coursework, emerging learners continue to develop reading-for-learning and writing-forcommunication strategies; extend vocabulary on themes relating to community, individual and academic development, and cultural distinctions of the United States; and focus on advancing grammar structures for conversation and writing. Applied language instruction and assignments will be supplemented by and supported with practical training in educational technology and investigation through special topics. (Typically offered: Fall, Spring and Summer)

ELAC 0303. University Connections Intensive English Level III. 3 Hours. Based on placement or successful completion of Level II (ELAC 0203) coursework, intermediate learners extend reading-for-learning and writing-for-communication strategies to more academic contexts; extend vocabulary and word form knowledge (on themes relating to community, individual and academic development, and cultural distinctions of the United States); and focus on applying advanced grammar structures to conversation and writing. Applied language instruction and assignments will be supplemented by and supported with practical training in educational technology and investigation through special topics. (Typically offered: Fall, Spring and Summer)

ELAC 0403. University Connections Intensive English Level IV. 3 Hours. Based on placement or successful completion of Level III (ELAC 0303) coursework, intermediate learners continue to develop strategies for comprehension and communication in all language skills; to extend vocabulary to concepts related to social, environmental and global themes in academics; and to explore the cultural distinctions of the United States. Advancing grammar structures for conversation and writing extend to sophisticated forms of support and persuasion. Applied language instruction and assignments will be supplemented by and supported with practical training in educational technology and investigation through special topics. (Typically offered: Fall, Spring and Summer)

ELAC 0503. University Connections Intensive English Level V. 3 Hours.
Based on placement or successful completion of Level IV (ELAC 0403) coursework, this course incorporates critical thinking and processing skills for improved reading and listening comprehension, and accuracy and efficacy in writing and speaking. Vocabulary development advances with social, environmental and global themes. Applied language instruction and assignments will be supplemented by and supported with practical training in educational technology and investigation through special topics. (Typically offered: Fall, Spring and Summer)

ELAC 0603. University Connections Intensive English Level VI. 3 Hours. Following placement or successful completion of Level V (ELAC 0503) coursework, highly effective writing skills and reading comprehension are solidified and integrated intensely at this advanced level. Through extended reading, writing and presentation assignments, students improve their ability to recognize and deliver main ideas, distinguish and produce persuasive support, and respond to content in a range of contexts. Applied language instruction and assignments will be supplemented by and supported with practical training in educational technology and investigation through special topics. (Typically offered: Fall, Spring and Summer)

ELAC 1023. Academic Writing Across Disciplines. 3 Hours.
The class is designed to improve the academic writing and critical thinking skills for non-native speakers of English in all fields. Through focused instruction and extensive practice, students will improve their academic lexicon, grammatical accuracy, discourse organization and fluency in formal academic writing. Not for degree credit in the Fulbright College of Arts and Sciences. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / UofA ELPT (writing) / TOEFL Alternative. (Typically offered: Fall and Spring)

ELAC 1033. English Language through Mass Media. 3 Hours.
Students expand their communicative language skills through the study of news and media. By analyzing the messages and methods used in a variety of sources, students improve their listening, speaking, reading and writing skills. Students develop critical thinking skills as they evaluate and synthesize ideas from the texts. Not for degree credit in the Fulbright College of Arts and Sciences. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / UofA ELPT (writing) / TOEFL Alternative. (Typically offered: Fall and Spring)

ELAC 2012. English Phonology for Non-Native Speakers. 2 Hours In this course students study the basic principles of phonetics and phonology of English in order to develop their ability to produce the standard American accents. Not for degree credit in the Fulbright College of Arts and Sciences. (Typically offered: Fall and Spring)

\section*{ELAC 2023. Business English Communications. 3 Hours.}

This is a course for non-native English speakers to develop their oral communication skills for professional business settings. From informal dialogues to formal business presentations, students learn appropriate verbal and non-verbal communication strategies and develop confidence to communicate effectively and comprehensibly. Not for degree credit in the Fulbright College of Arts and Sciences. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / UofA ELPT (writing) / TOEFL Alternative. (Typically offered: Fall and Spring)

ELAC 2043. Seminar in United States Culture, Communication, and Institutions. 3 Hours.
Through an in-depth study of American life, culture, communicative style and institutions, non-native speakers of English improve their oral and written communication skills. Not for degree credit in the Fulbright College of Arts and Sciences. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / UofA ELPT (writing) / GRE Analytical Writing / GMAT Analytical Writing / TOEFL Alternative. (Typically offered: Fall and Spring)

\section*{ELAC 2053. Academic Presentations. 3 Hours.}

For advanced non-native speakers of English to build skills and strategies for delivering effective, clear presentations in academic and professional settings. Students learn about organization, best use of visual aids, connecting with an audience, facilitating questions and answers, and intercultural issues that affect perception and comprehensibility. Not for degree credit in the Fulbright College of Arts and Sciences. Prerequisite: At the request of an instructor or through TOEFL (iBT) exam, spoken portion of the International English Language Testing System (IELTS), or the University of Arkansas Spoken Language Proficiency Test (SLPT). (Typically offered: Fall and Spring)
ELAC 5033. Research Writing for the Social Sciences and Education. 3 Hours. This research-focused writing class will help graduate-level non-native English speakers in the social sciences and education communicate their understanding of course material and research more accurately and effectively. Students will focus on the genres specific to their fields. They will also improve their ability to orally present their ideas. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / U of A ELPT (writing) / GRE Analytical Writing / GMAT Analytical Writing / TOEFL Alternative. (Typically offered: Fall and Spring)

\section*{ELAC 5043. Research Writing in the STEM Fields. 3 Hours.}

A research-based writing class for graduate-level non-native speakers of English that focuses on the demands of writing in the STEM fields. Students will develop their ability to accurately and effectively use the conventions of scientific writing. Students will improve their ability to orally present their research. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / U of A ELPT (writing) / GRE Analytical Writing / GMAT Analytical Writing / TOEFL Alternative. (Typically offered: Fall and Spring)
ELAC 5053. International Graduate Teaching Assistant Training. 3 Hours. To prepare international graduate assistants to assist or teach in U.S. university classes. The course focuses on enhancing teaching and communication skills, and cultural knowledge. Students are non-native speakers of English who currently have a teaching assistantship or plan to obtain one in the following semester. Not for degree credit. Prerequisite: Language assessment required. (Typically offered: Fall and Spring)

\section*{Entomology (ENTO)}

\section*{Courses}

ENTO 1021L. Insects, Science and Society Lab. 1 Hour.
To educate students on the importance of insects in biology and science, human and animal medicine, ecosystems, agriculture, pollination, genetic research, the arts, and human culture and history. The lab will be a hands-on approach to reinforcing entomological concepts addressed in lecture. Corequisite: ENTO 1023. (Typically offered: Fall and Spring)
ENTO 1023. Insects, Science and Society. 3 Hours.
To educate students on the importance of insects in biology and science, human and animal medicine, ecosystems, agriculture, pollination, genetic research, the arts, and human culture and history. Corequisite: ENTO 1021L. (Typically offered: Spring)

ENTO 3011L. Introduction to Insect Identification Lab. 1 Hour.
Introductory lab course on insect identification, collection, and curation techniques, primarily designed as an intensive add-on to ENTO 3013 for students wanting a more in-depth examination of insect diversity. Insect collection required. Course includes field trips. Students are encouraged to contact instructor before enrolling. Pre- or Corequisite: ENTO 3013. (Typically offered: Fall)
This course is cross-listed with BIOL 3011L.
ENTO 3013. Introduction to Entomology. 3 Hours.
Fundamentals of insect biology including structure and function, development, ecology, behavior, plant feeding and disease transmission. Lecture 3 hours/week. Students interested in a more intensive examination of insects, including collection, curation, and identification techniques, should sign up for the separate one credit lab ENTO 3011L. Students are strongly encouraged to take BIOL 1543 before registering for this course. (Typically offered: Fall)
This course is cross-listed with BIOL 3013.
ENTO 400V. Special Problems. 1-4 Hour.
Special problems. (Typically offered: Fall, Spring and Summer)
ENTO 4013. Insect Behavior and Chemical Ecology. 3 Hours.
Basic concepts in insect senses and patterns of behavioral responses to various environmental stimuli. Previous knowledge of basic entomology is helpful, but not required. Lecture 2 hours, laboratory/discussion 2 hours per week. Corequisite: Lab component (Typically offered: Spring Even Years)
This course is cross-listed with BIOL 4013.
ENTO 4024. Insect Diversity and Taxonomy. 4 Hours.
Principles and practices of insect classification and identification with emphasis on adult insects. Corequisite: Lab component. Prerequisite: ENTO 3013. (Typically offered: Fall Even Years)
This course is cross-listed with BIOL 4024.

\section*{ENTO 4043. Honey Bee Biology and Beekeeping. 3 Hours.}

To acquaint the student with social insects in general and honey bees in particular, to promote an interest in beekeeping as a hobby, occupation, and/or science, to give the students the basic knowledge of how to keep honey bees, and to increase awareness of the contribution that pollinating insects make to agriculture, natural ecosystems, and human life. Lecture 3 hours, plus beekeeping field day. (Typically offered: Spring)

\section*{ENTO 4053. Insect Ecology. 3 Hours.}

To develop understanding of important ecological concepts through study of dynamic relationships among insects and their environment. To become familiar with the literature of insect ecology, and interpretation and critique of ecological research. Previous knowledge of basic entomology and/or ecology will be assumed. Corequisite: Lab component. (Typically offered: Fall Even Years)
This course is cross-listed with BIOL 4053.
ENTO 410V. Special Topics. 1-3 Hour.
Topics not covered in other courses or a more intensive study of specific topics in entomology. (Typically offered: Irregular) May be repeated for degree credit.

\section*{ENTO 4123. Insect Pest Management. 3 Hours.}

Study of principles and concept of insect pest management. Areas covered include survey of arthropod pests and damage, population dynamics, damage thresholds, physiological units, prediction models, surveillance, arthropod sampling, strategies and tactics utilized to maintain pest populations below economic injury levels. Prerequisite: ENTO 3013. (Typically offered: Spring Odd Years)

\section*{ENTO 4133. Advanced Applied Entomology. 3 Hours.}

Biology and ecology of major arthropod pests as model applied management systems. Activities include independent study, literature review and group discussions. Knowledge of general entomology and pest management is required. Self-learning modules are available. Lecture 2 hours/week and direct self-study laboratory 2 hours/week. Corequisite: Lab component. Prerequisite: ENTO 3013. (Typically offered: Spring Even Years)

\section*{ENTO 500V. Special Problems. 1-4 Hour.}

Special problems. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 4 hours of degree credit.

ENTO 5013. Morphology of Insects. 3 Hours.
Origin, evolution, and functional significance of external insect structure. Structure and function of major internal systems. Previous knowledge of basic entomology is helpful, but not required. Lecture 2 hours, laboratory 4 hours per week. Corequisite: Lab component. (Typically offered: Fall Odd Years)

ENTO 5024. Insect Diversity and Taxonomy. 4 Hours.
Principles and practices of insect classification and identification with emphasis on adult insects. 2.5 hours lecture, 4 hours lab. Prerequisite: ENTO 3013 or instructor consent. Corequisite: Lab component. (Typically offered: Fall)
This course is cross-listed with BIOL 5024.

\section*{ENTO 5043. Honey Bee Biology and Beekeeping. 3 Hours.}

To acquaint the student with social insects in general and honey bees in particular, to promote an interest in beekeeping as a hobby, occupation, and/or science, to give the students the basic knowledge of how to keep honey bees, and to increase awareness of the contribution that pollinating insects make to agriculture, natural ecosystems, and human life. (Typically offered: Spring)
ENTO 5053. Insect Ecology. 3 Hours.
To develop an understanding of important ecological concepts through study of dynamic relationships among insects and their environment. To become familiar with the literature of insect ecology, and interpretation and critique of ecological research. Previous knowledge of basic entomology and/or ecology will be assumed. 2 hours lecture/2 hours lab. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Fall Even Years)
This course is cross-listed with BIOL 5053.

\section*{ENTO 510V. Special Topics. 1-3 Hour.}

Topics not covered in other courses or a more intensive study of specific topics in entomology. (Typically offered: Irregular) May be repeated for degree credit.

\section*{ENTO 5113. Insect Behavior and Chemical Ecology. 3 Hours.}

Basic concepts in insect senses and patterns of behavioral responses to various environmental stimuli. Previous knowledge of basic entomology is helpful, but not required. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Spring Even Years)
This course is cross-listed with BIOL 5113.
ENTO 5123. Biological Control. 3 Hours.
Theoretical and practical basis for biological control of arthropod pests and weeds via parasites, predators, and pathogens. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Fall Odd Years)

\section*{ENTO 5153. Insect Pest Management. 3 Hours.}

Study of principles and concept of insect pest management. Areas covered include a survey of arthropod pests and damage, population dynamics, damage thresholds, physiological units, prediction models, surveillance, arthropod sampling, strategies and tactics utilized to maintain pest populations below economic injury levels.
Prerequisite: Instructor consent. (Typically offered: Spring Odd Years)
ENTO 5163. Advanced Applied Entomology. 3 Hours.
Topics will include the integration of tactics, integration of disciplines and specific case histories in insect management, or use of insects to manage weeds.
Prerequisite: Instructor consent. (Typically offered: Spring Even Years)
ENTO 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{ENTO 6071. Seminar. 1 Hour.}

Fall: special topics not covered in regular course work. Spring: critical review of research papers in entomology. Seminar will be taken by graduate student majors for both semesters. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ENTO 6113. Insect Physiology and Molecular Biology. 3 Hours.
Overview of insect physiology and modern molecular techniques to study physiological processes. Previous knowledge of basic entomology is helpful, but not required. Two lectures per week (1 hour 20 minutes each). (Typically offered: Spring Even Years)

ENTO 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

\section*{Environmental Dynamics (ENDY)}

\section*{Courses}

ENDY 5053. Quaternary Environments. 3 Hours.
An interdisciplinary study of the Quaternary Period including dating methods, deposits soils, climates, tectonics and human adaptations. (Typically offered: Fall) This course is cross-listed with ANTH 5053, GEOS 5053.

\section*{ENDY 5113. Global Change. 3 Hours.}

Examines the interacting natural and anthropogenic factors involved in global change, concentrating on climate variability and change. Prerequisite: Graduate standing or instructor's approval. (Typically offered: Spring)
This course is cross-listed with GEOS 5113.
ENDY 5653. GIS Analysis and Modeling. 3 Hours.
Unlike conventional GIS courses that focus on studying "where", this course will teach students to address beyond "where" using various GIS analysis and modeling techniques to explore "why" and "how". The course will provide theoretical and methodological reviews of the principles of cartographic modeling and multi-criteria decision-making. Students will receive degree credit for only one of ENDY 5653, GEOS 5653, or ANTH 5653. (Typically offered: Spring)
This course is cross-listed with GEOS 5653.
ENDY 5853. Environmental Isotope Geochemistry. 3 Hours.
Introduction to principles of isotope fractionation and distribution in geological environments isotopic analytical methods, and extraction of isotope samples; application of isotopes in characterization of geologic processes and interaction with hydrologic, surficial, and biologic attenuation, paleothermometry soil and biochemical processes. (Typically offered: Spring)
This course is cross-listed with GEOS 5853.
ENDY 600V. ENDY Thesis Research. 1-6 Hour.
Master's Thesis. May be repeated for degree credit. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

\section*{ENDY 6013. Environmental Dynamics. 3 Hours.}

Required course for ENDY doctoral candidates. Overview of Earth Systems: Lithosphere; Hydrosphere, Atmosphere, Biosphere, Cryosphere, and human interaction across Earth systems. Emphasis on understanding of processes within Earth systems and interactions across Earth Systems as they pertain to global selfregulation, secular variation, climate stability, development and sustainability of human societies. Prerequisite: Graduate standing. (Typically offered: Fall)
ENDY 602V. Current Topics Seminar. 1-2 Hour.
Various aspects of the environment will be explored through topic specific seminars. Subject matter will change each semester addressing current environmental issues and research. Seminars will be one or two hours credit. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

\section*{ENDY 6033. Society and Environment. 3 Hours.}

This course examines the complex interrelationships between human societies and the natural environment. Drawing on diverse and interdisciplinary perspectives in archaeology, ethnography, history, geography, and palaeo-environmental studies, readings and discussion will explore the co-production of social and environmental systems over time. (Typically offered: Spring)
This course is cross-listed with ANTH 6033.
ENDY 689V. Special Problems in Environmental Dynamics. 1-6 Hour. Independent study of a topic related to environmental dynamics under the guidance of an ENDY faculty member. (Typically offered: Fall, Spring and Summer) May be repeated for up to 12 hours of degree credit.

ENDY 6991. Environmental Dynamics Colloquium. 1 Hour.
Weekly meetings for discussion of current research in environmental dynamics. Graduate students must register for colloquium each semester during their first three semesters. Colloquium credit does not count towards minimum hours required for the doctorate. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for up to 20 hours of degree credit.

ENDY 700V. Doctoral Dissertation. 1-18 Hour.
