

## **Abstract**

**Author:** Jan Procházka

**Title:** Analysis and Comparison of Power Plays at 2022 Men's World Floorball Championship and 2021 Junior's World Floorball Championship

**Objectives:** Purpose of the bachelor thesis is to analyse and compare the game situations with uneven number of players on the play field at 2022 Men's and 2021 Junior's World Floorball Championships. Thesis analyses the offences that lead to power plays.

**Methods:** The main method is indirect observation of power plays from match replays at the 2021 Junior's World Championship and 2022 Men's World Championship, their analysis and statistical comparison.

**Results:** Results of the thesis are knowledges about the power plays at the 2021 World Junior's Championships and the 2022 World Men's Championships. The results present an analysis of power plays according to their success rate and shooting areas in goalscoring situations. The resulting data highlights the formations that leads to goal score and highlights the formations to defend power play. The formation with one player on the top was the most used for power play goal. Slashing recorded the most frequent incidence for penalty box ejection. These findings are used to compare between the national teams and both championships.

**Keywords:** penalty, match, short-handed, statistics
