

	Pages
Introduction and aim.....	1-28
Chapter 1 – First example of silicone coatings highly adherent to metals by electrochemistry in supercritical carbon dioxide.....	29-49
Chapter 2 – Electrografting on nanoparticles: A new way toward polymer stabilized nanoparticle suspensions.....	50-75
Chapter 3 – Electrografting on nanoparticles: Investigating the effect of process parameters.....	76-109
Chapter 4 – Electrografting on nanoparticles in water: An environmentally viable and convenient way toward polymer stabilized nanoparticle suspensions	110-134
Conclusion and prospects.....	135-139
