Completing this PhD has been a true rollercoaster. The thesis delves into the science, but the journey itself, filled with challenges and triumphs, was made richer by the incredible people like you who stood by me. From the bottom of my heart, thank you for being a part of this incredible ride.

This journey started with my supervisor, **Anna**. Right from the first interview we had online, your warm and friendly personality was palpable, even through the screen. I've learnt a lot from you and I admire your passion for science and your motivation. Thanks, Anna, for giving me the chance to do this PhD in your group and your endless patience is something I'll forever be grateful for. **Jan Maarten**, even though you officially became my supervisor late in the game, it always felt like you were right there with me. Our collaboration, starting with Elisa, and your help in the final stretch of writing, means a lot. Thanks for the support. **Klaas**, your down-to-earth approach and fresh perspectives in our meetings were a breath of fresh air. And let's not forget that wonderful Dutch feast at your place. It was great working with you, especially towards the end with that short stint of endless PCRs.

I extend my gratitude to the evaluation committee members, **Wim, Inge**, and **Colin**, for dedicating their time to assess my thesis. **Francesco**, thank you for opening your lab to me. It was a valuable learning experience, and I met some wonderful people along the way.

Now, for the amazing people I've met along the way, starting with **Elisa**. We spent so much time together those first two years, and it was a blast. From late-night chats to battling the finicky flow cytometry machine, our journey was filled with highs and lows. And those memories of conferences in London, Sheffield, and New York, as well as our spontaneous trips to Iceland and Hamburg - they'll stay with me forever. Thanks for being an awesome colleague, Elisa.

Next up, my paranympths - Roberta, Francis, and Eleonora. **Roberta**, your infectious smile and perfect hugs are unforgettable. From the early days in the lab during your PhD to sharing an office during your postdoc, our conversations have always been fun. I'm glad we're still in touch. **Francis**, I remember us sitting together during those interview days, complaining about the wait. We didn't know each other well at first, but things changed after that conference in Sheffield. I appreciate your sense of humor, especially during the last phase while writing our theses and the never ending coffee breaks. Your quirky personality, Russian music, and late-night experiments made it all the more fun. **Eleonora**, even though we didn't spend as much time together, I can still picture that "what have I gotten myself into" expression on your face on your first rainy day in the lab. You've been my music buddy, and our dinners, karaoke sessions, and concerts have been so much fun.

Coming to the amazing NDT group, a big shout-out to my former roommates - **Valentina, Keni, and Aldy**. Valentina, your no-nonsense attitude is a breath of fresh air, and we definitely need to catch up at the next Fasnacht. Skateboarding in the halls, playing the ukelele late at night, darts in the office and the loud music on weekends - they're etched in my memory. Keni, I'll never forget how you turned our office into a jungle with all those plants and fish. Thanks for keeping me company during those random weekend experiments and for all the Chinese food, the late-night dinners and great conversations. Aldy, your ever-present smile and laid-back attitude during your PhD have been a source of inspiration. You are by far the calmest PhD I've met, and I really enjoyed the get togethers at your place, and ASOT.

Coming to the amazing NDT group, **Daphne**, you're the most sincere and meticulous colleague I've had the pleasure of working with. No matter the task, you always give it your all. **Hector**, your help with proteomics and your sense of humor during dinners and get-togethers made everything more enjoyable. **Natalia**, you brought a different energy to the group, and I'm in awe of your amazing networking skills. You seem to know everyone and have tried everything everywhere. **Sarah**, your calm and knowledgeable presence made my early months in the lab so much better, especially when there was so much to learn. It was also nice to have a connection to Belgium. **Sander**, you're a ton of fun to be around. Those dinners at your place, your cooking, and our relaxed conversations about life - they've been much appreciated. **Raquel**, I'm amazed at how you juggled your studies and the PhD simultaneously, and I enjoyed working alongside you the last few months. To the newer members of the NDT group - Feng, Heba, Xinyu, and Zhiyi, best of luck with everything ahead. To our temporary visitors - **Riccardo** and **Bea** - it was great having you around. The Italian invasion was complete! **Valeria**, your boundless optimism always puts me in a good mood. Thanks for teaching me ping pong, so I actually hit the table now instead of the walls and ceiling. **Greta**, you were an exceptional student, smart and hardworking. You made it really easy to be your supervisor, I never had to tell you anything more than once, and I had a really nice time working with you. A big thank you to the other ex **PTT/NDT members** - Barbro, Leonie, Inge, Adhy, Fransien, Annieke, Laura, Natalia, Viktoriia, Habibie, Marina, and all the students, for creating a great atmosphere in the lab and engaging discussions during lunches, group meetings and lab outings.

And of course, the one of a kind **Gillian**. It is hard to imagine the group without you. Always up for coffee and a chat, your amazing sense of humor brightens everyone's day.

To the lab technicians who keep things running - **Catharina, Eduard, Ilse, Marina, and Marry** - you're the real heroes. Catharina, the lab would be chaos without you, and your knack for juggling everything is impressive. I enjoyed hearing about your building and renovating home projects. Ilse, I enjoyed having you around, especially during those early pandemic days with just three of us on the floor.

Acknowledgements

Filming Keni's video with you was a lot of fun, and you were always up for a good chat. Eduard, your expertise with all things computer and all things lab were so helpful. Marry, thanks for the coffees and letting me practice my Dutch with you.

A big shout-out to the **Molbac team** for creating a fun lab environment, helping with equipment whenever I asked (which was quite often), and just being great colleagues. **Marines** and **Laura**, thank you for the help right at the beginning with getting started with infection experiments. **Marina**, you're a ball of energy, thanks for always listening, and the Iceland road trip was one of the best experiences I've had. **Tobi**, you're an amazing chef and I always enjoy the dinners with you. To everyone else in the group - Lisanne, Sjouke, Margarita, Jolanda, Usma, Rodrigo, Giorgio, Bimal, Suruchi, Min, Gaby, Elias, and the (so) many students - thanks for the wonderful atmosphere in the lab and the many many coffee breaks.

My short stay at Lausanne was a wonderful experience. **Matteo**, thanks for teaching me the ropes, and **Camilla**, thanks for the company and friendship. To everyone else at **SUNMIL** - Suiyang, Francesca, Nicolò, Łukasz, Ting, Yong, Anna and Simone - it was a pleasure working alongside you, and thank you for the lunches, good times and discussions.

Hjalmar and **Marcel**, your help with proteomics was invaluable.

Jeroen, your guidance and training in EM made for a very enjoyable working experience and led to my short but rewarding stint at UMIC. **Ben**, thanks for the opportunity, and for giving me the inspiration for my cover. **Kim, Roos, Anouk, Noura, Ahmet, Peter, Anusha, Axel and Klaas** - our conversations on various topics were memorable. Pool nights and the UMCG Queen concert will always bring a smile to my face.

Thank you to **ALERT** and to all the PhD fellows that were part of my consortium. We met in 2016 during the selection days and it was really nice to see all of us growing scientifically during the years. **Patricia**, we have the most bizarre friendship, somehow works perfectly, and every time we see each other is a blast.

To everyone at **FFUND**, thanks for being the best colleagues.

Mrudula, Martin, Joris, and Gillat, you kept me sane through it all! **Joris**, you are an amazing listener, great company for any movie or series, and you were a lifeline during the initial lockdown. **Gillat**, you always helped put things in perspective and forced me to look inward. **Martin**, thanks for being there for all the random stuff I threw at you, from being a sounding board to proofreading to writing parody lyrics for cabaret songs.

Mrudula, my brilliant (big) sister, our 30+ year journey from Hyderabad to Manipal to Europe has been incredible. Thank you for all the support, listening to my rants, the many trips and holidays, and here's to many more.

Acknowledgements

Finally, to my **family**, spread all over the world, thank you for being there for me despite distance and time. To the Hyderabad Hindi gang, it's always a good time meeting up, no matter how long it's been. To my brother and sister-in-law, thanks for encouraging and always believing in me. I cannot overlook the littlest member of our family, Arinjay, your laughter and curiosity remind me of the simple joys in life. To my **parents**, your unwavering love and support mean the world to me. I couldn't have made it here without you. Thank you for the freedom you always gave me to follow my own dreams and for believing in my passions.
