Economic evaluations of precision medicine: case studies in diabetes

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. J.M.A. Scherpen
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on
 Wednesday 8 November 2023 at 11.00 hours

by

Sajad Emamipour

born on 1 August 1986
 in Ivan, Iran

Supervisors

Prof. T.L. Feenstra
Prof. M.J. Postma

Co-supervisor

Prof. J.F.M. van Boven

Assessment Committee

Prof. E. Buskens
Prof. S.J.L. Bakker
Prof. V. Coupe

TABLE OF CONTENTS

Chapter 1	General introduction and outline of the thesis.	7
Chapter 2	Economic evaluation of precision medicine in diabetes: a scoping review. <i>Manuscript in preparation.</i>	19
Chapter 3	A personalised screening strategy for diabetic retinopathy: a cost-effectiveness perspective. <i>Diabetologia 63 (2020): 2452-2461.</i>	61
Chapter 4	Benefits and risks of two screening strategies for diabetic foot ulcer: a cost-effectiveness study based on real-world data. <i>Manuscript in preparation.</i>	87
Chapter 5	The transferability and validity of a population-level simulation model for the economic evaluation of interventions in diabetes: the MICADO model. <i>Acta diabetologica 59, no. 7 (2022): 949-957.</i>	109
Chapter 6	Personalizing the Use of a Intermittently Scanned Continuous Glucose Monitoring (isCGM) Device in Individuals With Type 1 Diabetes: A Cost-Effectiveness Perspective in the Netherlands (FLARE-NL 9). <i>Journal of Diabetes Science and Technology (2022): 19322968221109841.</i>	141
Chapter 7	General discussion and future perspectives.	169
Appendices	English Summary	183
	Nederlandse Samenvatting	187
