Table of Contents

General Introduction

Surgical Interventions for Cervical Radiculopathy without Myelopathy: A Systematic Review and Meta-Analysis

Long-term clinical outcome after anterior cervical discectomy with polymethylmethacrylate (PMMA) as intervertebral spacer: a propensity score matched analysis

The Odom criteria validated at last: a clinimetric evaluation in cervical spine surgery

Anterior or posterior approach in the surgical treatment of cervical radiculopathy; neurosurgeons' preference in the Netherlands

Study protocol for a randomized controlled multicenter study: the Foraminotomy ACDF Cost-Effectiveness Trial (FACET) in patients with cervical radiculopathy

Noninferiority of Posterior Cervical Foraminotomy vs Anterior Cervical Discectomy with Fusion for Procedural Success and Reduction in Arm Pain Among Patients with Cervical Radiculopathy at 1 Year

Posterior versus Anterior Surgery for Cervical Radiculopathy: 2-year results of a randomized noninferiority trial (FACET)

Short-Term Neck Pain After Posterior Foraminotomy Compared with Anterior Discectomy with Fusion for Cervical Foraminal Radiculopathy

Cost-Effectiveness of Posterior versus Anterior Surgery
for Cervical Radiculopathy
