Partial inventory updated 2017 March, 2018-2019

Folders were numbered as they were in the donated boxes. Some materials were reboxed into smaller boxes to prevent slumping. Folder titles in parentheses were added by the archives assistant to enable searching, because no title was present. Folder titles are in the inventory as they appeared on folders except that abbreviations and years have been completed to make searching easier.

A lot of this material is copies of news articles from various sources.
