Received 2015 October 29; accepted 2015 November 16; published 2016 February 10

Equation (11) is incorrect in the article as it was published. This led to a miscalculation in the estimation of the dipole anisotropy upper limit.

The correct expression is

$$\int_0^{\hat{\delta}_{\text{meas}}} P(\hat{\delta}|\delta) d\hat{\delta} = 1 - \text{C.L.} \quad (11)$$

where  $\hat{\delta}_{\text{meas}}$  represents the dipole anisotropy corresponding to the measured value of the dipole coefficient  $\hat{C}_1$  of the power spectrum.

The resulting upper limit, after integration, is  $\delta = 0.166$  at 95% C.L.
