The editorial and scientific publishing process relies on the sustained work of volunteer reviewers, and evaluating the inter-disciplinary and broad interest papers published in G-Cubed can be a particular challenge. As editors and associated editors, we are therefore hugely appreciative of the efforts of our reviewers, and would like to thank and acknowledge them in this editorial. G-Cubed published 271 manuscripts in 2018, and for this we were able to rely on the efforts of 873 dedicated reviewers. A big thank you from the G-Cubed team!

This article has been accepted for publication and undergone full peer review but has not been through the copyediting, typesetting, pagination and proofreading process which may lead to differences between this version and the Version of Record. Please cite this article as doi: 10.1029/2019GC008571

Referees for 2018

Individuals in italics provided three or more reviews for G-Cubed during the year.
