Due to an error at the publisher, there were several mistakes introduced in the published version of this article. The corrections are as follows.

In the Abstract, the fifth sentence should read: We find not only a relation between the measured peak energy E_p and the corresponding energy flux, but also a strong $E_{p,i}$ versus L_{iso} correlation within each burst and merging together the time-resolved data points from different GRBs.

The full title of Table 4 should be: Correlation Analysis Results between the Intrinsic (Redshift-corrected) Peak Energy $E_{p,i}$ and the GRB Luminosity for Individual GRBs with Known Redshift (990123, 990510) and for the Entire Sample of GRBs with Known Redshift.

In the caption of Figure 6, the first sentence should be: Intrinsic $E_{p,i}$ as a function of the 2–2000 keV isotropic luminosity, L_{iso} , obtained by merging together all the available data for GRBs 990123 and 990510.

IOP Publishing sincerely regrets these errors.
