This PDF file includes:

Legend for Movie S1
Legends for Datasets S1

Other supplementary materials for this manuscript include the following:

Movie S1
Dataset S1
Oligonucleotide List S2

Supplementary Information Text

Subhead. We have provided the raw mass cytometry data used to generate the viSNE plot for the complete H7 HA library shown in Figure 2C.

Movie S1 (separate file). 3-dimensional visualization of mini-library. (Note: Antibody 2F04 is labelled as DY).

Dataset S1 (separate file). Raw mass cytometry counts for the full H7 HA library. (Note: Antibody 2F04 is labelled as DY and antibody 2B06 is labelled as MP).

Oligonucleotide List S2 (separate file). List of oligonucleotides used to construct individual H7 HA barcodes and complete H7 HA library.
