TABLE OF CONTENTS

Account 9

Abbreviations 11

Preamble 12

PART 1 SETTING THE STAGE 15

Chapter 1 Introduction 17
- 1.1 Neonatal care 18
- 1.2 Focus of the thesis 22

Chapter 2 Research framework and questions 25
- 2.1 Learning health systems (LHS) 26
- 2.2 The PhD framework 30
- 2.3 Research questions 31

Chapter 3 Research design 33
- 3.1 Study context 34
- 3.2 Methodology 37
- 3.3 Research validity 43
- 3.4 Ethical considerations 43
- 3.5 Next steps 44

PART 2 FINDINGS

Chapter 4 Implementing an Open Source EHR 55
- 4.1 Abstract 56
- 4.2 Introduction 58
- 4.3 Methods 63
- 4.4 Results 64
- 4.5 Discussion 73

Chapter 5 Digital health systems in Kenya **81**
5.1 Abstract 82
5.2 Introduction 84
5.3 Methods 85
5.4 Results 88
5.5 Discussion 97
5.6 Conclusion 101

PART B FINDINGS

Chapter 6 Scoping review on how paper-based records are designed **111**
6.1 Abstract 112
6.2 Introduction 114
6.3 Methods 115
6.4 Results 118
6.5 Discussion 123
6.6 Conclusions 126

Chapter 7 Designing and piloting a newborn monitoring chart using HCD **141**
7.1 Abstract 142
7.2 Background 143
7.3 Human-Centred Design Approach 145
7.4 Methods 147
7.5 Results 153
7.6 Reflection on the design process 162
7.7 Discussion 163
7.8 Conclusions 166

Chapter 8 Chart implementation experience **175**
8.1 Abstract 176
8.2 Introduction 177
8.4 Results 183
8.5 Discussion 198
8.6 Conclusions 202

Chapter 9 Quantitative evaluation of chart implementation **213**
9.1 Abstract 214
9.2 Introduction 215
9.3 Methods 216
9.4 Results 224
9.5 Discussion 231
9.6 Conclusion 235

PART 3

Chapter 10 Discussion and conclusion **247**

Part A: Understanding the digital health landscape in Kenya **250**
10.1 Can the digital information systems in Kenyan public hospitals be used as a platform for a hospital level learning health system? 250
10.2 What efforts have been made towards digitising health information systems in public hospitals in Kenya? Can the systems in place support a learning health system? 250
Part B: Empirical design **252**
10.3 What is the global evidence on the development of structured paper-based tools to support documentation of inpatient nursing care? 252
10.4 How can a human-centred design approach, typically used for developing digital systems, be adapted to develop a paper-based vital signs, and feed and fluid monitoring chart to support care for babies admitted in the newborn unit as part of efforts to build a learning health system? 252
10.5 What lessons can be learned from implementing a newly designed paper-based monitoring chart in a network of hospitals? How does the implementation process unfold in a network of hospitals? 253
10.6 To what extent does a new vital signs, feed and fluid monitoring chart improve documentation for newborns admitted in a network of hospitals? 254

10.7 Contributions of theoretical findings to research framework and learning health systems 255
Implications for practice / or policy **258**
10.8 Practical use of charts 258
10.9 Continuous stakeholder engagement 258
10.10 Contextual considerations 259
Methodological reflections **260**
10.12 Stakeholder engagement 261
10.13 Implementation during the COVID-19 Pandemic 263
10.14 Designing data systems for LHS 264
Recommendations for future research **265**
Concluding remarks **267**

Appendix **271**

Summary **273**

Acknowledgement **279**

All publications by the Author **283**
