half PREMONITIONS

half PREMONITIONS  
of the MOON

**FOR A GOOD PERFORMANCE OF THE WORK**  
*The performer embraces the limited range of the instruments and the slow pace of change. The performer stays sagged and in 'performance mode' during the rest, particularly the long ones.*

**VARIATION FOR MULTIPLE PERFORMERS**  
*Half Premonitions of the Moon may be performed simultaneously by multiple performers, each using their own version of the score. Performers begin and end together.*

**PROGRAM NOTES**  
*Half Premonitions of the Moon is a piece for custom-designed bullroarer and modular score. The performer chooses a set of cards to be assembled in any order and orientation to form the score. Bullroarers are some of the oldest and most widespread instruments in human cultures. They can be found across the globe from Australasia to Africa and the Americas. They are often used to evoke natural phenomena such as wind and rain during ritual events.*
