Spotlight

The University of Maine Graduate School celebrates 100 years of excellence

We invite you to join us for a year-long celebration of the centennial anniversary of the creation of the Graduate School at the University of Maine.

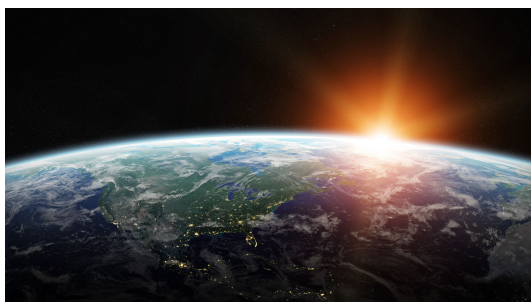

The university has granted graduate degrees since 1881, when the first master's degree was conferred to Walter Balentine in Agriculture, and a year later to the first female graduate student Percia Vinal White in Literature. Then in 1923, the Division of the Faculty of Graduate Studies was formally created as a distinct administrative unit at the university, with professor of classics Dr. George Davis Chase serving as the first dean.

Since then, the Graduate School, in collaboration with academic and research units, alongside partnerships across the state, has been at the forefront of advancing graduate education in support of the workforce and economic development in Maine and beyond.
