# Minimally invasive total mesorectal excision

Assessing the surgical treatment of rectal carcinoma

## Proefschrift

ter verkrijging van de graad van doctor aan de  
 Rijksuniversiteit Groningen  
 op gezag van de  
 rector magnificus prof. dr. C. Wijmenga  
 en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

maandag 11 december 2023 om 12.45 uur

door

**Thijs Adriaan Burghgraef**

geboren op 13 april 1991  
 te Zaanstad

**Promotor**

Prof. dr. E.C.J. Consten

**Copromotores**

Dr. P.M. Verheijen

Dr. R. Hompes

**Beoordelingscommissie**

Prof. dr. S. Kruijff

Prof. dr. W.B. Nagengast

Prof. dr. W.A. Bemelman

# TABLE OF CONTENTS

Chapter 1	General introduction and outline of this thesis	11
<b>PART 1</b>	<b>DEFINING THE RECTUM</b>	<b>21</b>
Chapter 2	Implications of the new MRI-based rectum definition according to the sigmoid take-off: a multicentre cohort study. DOI: <a href="https://doi.org/10.1093/bjsopen/zrad018">10.1093/bjsopen/zrad018</a> <i>BJS Open (2023)</i>	23
<b>PART 2</b>	<b>ASSESSING THE LEARNING CURVE OF MINIMALLY INVASIVE RECTAL CANCER RESECTIONS</b>	<b>39</b>
Chapter 3	The learning curve of laparoscopic, robot-assisted and transanal total mesorectal excisions: a systematic review. DOI: <a href="https://doi.org/10.1007/s00464-022-09087-z">10.1007/s00464-022-09087-z</a> <i>Surgical Endoscopy (2022)</i>	41
Chapter 4	Assessing the learning curve of robot-assisted total mesorectal excision for rectal cancer. A multicentre study considering procedural safety, pathological safety and efficiency. DOI: <a href="https://doi.org/10.1007/s00384-022-04303-7">10.1007/s00384-022-04303-7</a> <i>International Journal of Colorectal Disease (2022)</i>	71
Chapter 5	Local recurrence of robot-assisted total mesorectal excision: a multicentre cohort study evaluating the initial cases. DOI: <a href="https://doi.org/10.1007/s00384-022-04199-3">10.1007/s00384-022-04199-3</a> <i>International Journal of Colorectal Disease (2022)</i>	91
<b>PART 3</b>	<b>RESULTS OF MINIMALLY INVASIVE RECTAL CANCER RESECTIONS AFTER THE LEARNING CURVE</b>	<b>109</b>
Chapter 6	Robot-assisted total mesorectal excision versus laparoscopic total mesorectal excision: a retrospective propensity-score matched cohort analysis in experienced centres. DOI: <a href="https://doi.org/10.1097/DCR.0000000000002031">10.1097/DCR.0000000000002031</a> <i>Diseases of the Colon and Rectum (2021)</i>	111

Chapter 7	Comparison of laparoscopic versus robot-assisted versus transanal total mesorectal excision surgery for rectal cancer: a retrospective propensity-score matched cohort study of short-term outcomes. DOI: <a href="https://doi.org/10.1093/bjsopen/zrad018">10.1093/bjsopen/zrad018</a> <i>British Journal of Surgery (2021)</i>	131
Chapter 8	Total mesorectal excision (TME) in MRI defined low rectal cancer: are robotic and transanal TME delivering compared to laparoscopic TME? <i>Submitted to BJS Open</i>	151
Chapter 9	Laparoscopic versus robot-assisted versus transanal low anterior resection: 3-year oncological results for a population-based cohort in experienced centres. DOI: <a href="https://doi.org/10.1245/s10434-021-10805-5">10.1245/s10434-021-10805-5</a> <i>Annals of Surgical Oncology (2021)</i>	171
Chapter 10	Comparison of three-year oncological results after restorative low anterior resection, nonrestorative low anterior resection and abdominoperineal resection for rectal cancer. DOI: <a href="https://doi.org/10.1016/j.ejso.2022.11.100">10.1016/j.ejso.2022.11.100</a> <i>European Journal of Surgical Oncology (2022)</i>	189
Chapter 11	Completion total mesorectal excision: a case-matched comparison with primary resection. DOI: <a href="https://doi.org/10.1097/AS9.0000000000000327">10.1097/AS9.0000000000000327</a> <i>Annals of Surgery Open (2023)</i>	207
<b>PART 4</b>	<b>ASSESSING QUALITY OF LIFE AFTER MINIMALLY INVASIVE RECTAL CANCER RESECTIONS</b>	<b>227</b>
Chapter 12	Permanent stoma rate and long-term stoma complications in laparoscopic, robot-assisted and transanal total mesorectal excision: a retrospective cohort study. <i>Accepted in Surgical Endoscopy</i>	229

Chapter 13	Quality of life in robot-assisted versus laparoscopic total mesorectal excision for rectal cancer: results of a prospective cohort. <i>Submitted to Journal of Robotic Surgery</i>	255
Chapter 14	Prospective multicentre observational cohort to assess quality of life, functional outcomes and cost-effectiveness following minimally invasive surgical techniques for rectal cancer in ‘dedicated centres’ in the Netherlands (VANTAGE trial): a protocol. DOI: <a href="https://doi.org/10.1136/bmjopen-2021-057640">10.1136/bmjopen-2021-057640</a> <i>BMJ Open (2022)</i>	277
Chapter 15	General summary	293
Chapter 16	Discussion and future perspectives	299
Addendum	Dutch summary	316
	List of publications	320
	Dankwoord	326
	Curriculum Vitae	333
