(Not required if you have taken HDFS 311,
313 and 314 with a 3.0 or higher GPA)
ED 309. Field Practicum (3) (Can be waived with 60 hours supervised/documented volunteer service)
ED 472. Foundations of ESOL Education (3) ED 479. Linguistics for Teachers (3)

## Language Arts Content Mastery

 Course Work (68-71 credits)To be completed prior to beginning the Professional Level. These Standards are based on the National Council of Teachers of English Program Standards for Initial Preparation of Teachers of English Language Arts for Middle and High School Teaching (http://www.ncte.org/ standards/common-core).

- Must have 3.0 accumulative GPA on all course work to fulfill content mastery requirements.
- All grades must be taken as A-F graded courses; no P/N or S/U grades accepted for content mastery courses.
- Experiences in these areas are highly valued and may be considered in place of course work.

## Standard 1. Knowledge and

Understanding of the English

## Language (3 credits)

WR 330. *Understanding Grammar (3)
Standard 2. Knowledge of the Practices of Oral, Visual, and
Written Literacy (9-11 credits)
Choose 1 course from each area:
Communication (3-4): Any COMM Course
Writing (3): Any 200-Level Writing Course

## Film (3-4):

COMM 380. Image and Myth in Film (3)
FILM 110. *Introduction to Film Studies: 1895-1945 (3)
FILM 125. *Introduction to Film Studies: 1945-Present (3)
FILM 245. *The New American Cinema (4)
FILM 265. *Films for the Future (4)
FILM 452. ^Studies in Film (4)
Standard 3. Knowledge and
Understanding of the Reading

## Process (8 credits)

ENG 345. Introduction to Literary Criticism and Theory (4)
ENG 488. Literature and Pedagogy (4)

## Standard 4. Knowledge and

 Understanding of Different Composing Processes ( 8 credits)WR 411. ^The Teaching of Writing (4) and another upper-division writing course (3-4)
Standard 5. Knowledge and
Understanding of an Extensive
Range of Literature ( 32 credits)
American Literature Sequence (8):
ENG 253. *Survey of American Literature: Colonial to 1900 (4)
ENG 254. *Survey of American Literature: 1900 to Present (4)
Shakespeare - choose 1 course (4):
ENG 201. *Shakespeare (4)
ENG 202. *Shakespeare (4)
World Literature - choose 2 courses (8):

ENG 204. *Survey of British Literature: Beginnings to 1660 (4)
ENG 205. *Survey of British Literature: Restoration to Romantic Era (4)
ENG 206. *Survey of British Literature: Victorian Era to 20th Century (4)
ENG 210. *Literatures of the World: Asia (4)
ENG 211. *Literatures of the World: Africa (4)

ENG 212. *Literatures of the World: Meso/
South American, Caribbean (4)
ENG 213. *Literatures of the World: Middle East (4)
ENG 215. *Classical Mythology (4)
ENG 221. *African-American Literature (4)
Literature before 1800 (4): Choose 1 upper-division course
Literature after 1800 (8): Choose 2 upper-division courses
Standard 6. Knowledge and Understanding of the Range and Influence of Print and Nonprint Media and Technology in Contemporary Culture (3-4 credits)
Choose 1 course from below (3-4):
COMM 482. The Media in Culture and Society (3)

ENG 495. Language, Technology, and Culture (4) [Terminated spring 2017]
NMC 260. New Media Futures (3)
WR 414. Advertising and Public Relations Writing (4)
WR 495. ^Introduction to Literacy Studies (4)
WR 497. Digital Literacy and Culture (4)

## Standard 7. Knowledge and <br> Understanding of Research

 Knowledge, Understanding of Research Theory, and Findings in English Language Arts (5 credits)ENG 200. Library Skills for Literacy Study (1) ENG 488. Literature and Pedagogy (4)

## Professional Level

To be accepted into the Professional Level, a student must have completed the required Pre-Education General Courses and the Content Mastery Requirements with a minimum 3.0 GPA or by special petition. In addition, students need two letters of recommendation and pass-
ing scores on all required Oregon

## licensure exams.

## Professional Level Course Work

 (37-38 credits)Taken in order during the professional year-long program.
ED 340. ${ }^{\wedge}$ Supported Differentiated Environments (3)
ED 407. Seminar (1)
ED 409. Practicum/Clinical Experience (2) (September Experience)
ED 409. Practicum/Clinical Experience (3)
(Fall Practicum)
ED 410. Internship/Work Experience (3) (Part-time Student Teaching)
ED 410. Internship/Work Experience (10) (Full-time Student Teaching)
ED 412. Learning Styles and Needs in Adolescence (2)
ED 424. Teacher as Reflective Practitioner (2)
ED 425. Curriculum Implementation and Instructional Strategies 7-12 (4)
ED 427. Alternative Assessment for Middle and High School (2)
ED 493. Reading, Literature, and Language Development in the Content (2) or ED 473. Instructional Approaches for ESOL Education (3)
ED 494. Content Standards and Curriculum Development for High School (3)
or ED 491. Content Standards and
Curriculum Development for Mid Level (3)

## Footnotes:

*Baccalaureate Core Course
^ Writing Intensive Course (WIC)

## Option Code: 68

## PHYSICS TEACHING OPTION

This option is for students wanting to earn a bachelor's degree in Education and qualify for an Oregon Teaching License to teach physics at the high school level (grades 9-12).

## Pre-Education Level

Students at this level will be taking general education prerequisite courses and
required content course work
Note: Pre-Education students should meet with the Double Degree Advisor at least once a year in order to ensure they are on track to meet the prerequisite and content mastery requirements prior to applying to the Professional Level.

## Pre-Education General Course Work

## (18 credits)

Taken prior to Professional Level:
ED 216. *Purpose, Structure, \& Function of Education in a Democracy (3)
ED 219. Civil Rights and Multicultural Issues in Education (3)
ED 253. Learning Across the Lifespan (3)
(Not required if you have taken HDFS 311,
HDFS 313, and HDFS 314 with a 3.0 or higher GPA)
ED 309. Field Practicum (3) (Can be waived with 60 hours supervised/documented volunteer service)
ED 472. Foundations of ESOL Education (3)
ED 479. Linguistics for Teachers (3)

## Physics Content Mastery Courses

 (50-51 credits)Complete prior to the Professional Level. Most of this course work will meet student's first degree requirements.

- Must have 3.0 accumulative GPA on all course work to fulfill content mastery requirements.
- All grades must be taken as A-F graded courses; no P/N or S/U grades accepted for content mastery courses. All grades must be at C- or above.
Standard 1. Introductory Physics
Sequence (15 Credits)
Choose 1 series from below (15):
PH 201, PH 202, PH 203. *General Physics $(5,5,5)$
PH 211, PH 212, PH 213. *General Physics with Calculus $(4,4,4)$
and PH 221, PH 222, PH 223. Recitation
for Physics 211, 212, $213(1,1,1)$

## Standard 2. Introductory Chemistry

## Sequence (15 Credits)

CH 231, CH 232, CH 233. *General Chemistry $(4,4,4)$
CH 261, CH 262, CH 263. *Laboratory for Chemistry 231, 232, 233 ( $1,1,1$ )
Standard 3. Advanced Physics (10

## Credits)

Choose 5 courses from below (10 credits):
PH 422. Paradigms in Physics: Static Fields (3)

PH 423. Paradigms in Physics: Energy and Entropy (3)
PH 424. Paradigms in Physics: Oscillations and Waves (3)
PH 425. Paradigms in Physics: Quantum Fundamentals (3)
PH 426. Paradigms in Physics: Central Forces (3)
PH 427. Paradigms in Physics: Periodic Systems (3)
PH 429. Paradigms in Physics: Reference
Frames (2) [Terminated winter 2017]
Standard 4. Modern Physics and Electives (7-8 Credits)
PH 314. Introductory Modern Physics (4)

## [Terminated fall 2018]

Choose 1 additional course (3-4):
PH 411. Electronics (3)
PH 415. Computer Interfacing and
Instrumentation (3)
PH 465. Computational Physics (3)
PH 481. Physical Optics (4)
PH/ECE 482. Optical Electronic Systems (4)
PH/ECE 483. Guided Wave Optics (4)
Standard 5. Science Education (3 cr)
SED 413. Inquiry in Science and Science Education (3)

## Professional Level

To be accepted into the Professional Level, a student must have completed the required Pre-Education General Courses and the Content Mastery Requirements with a minimum 3.0 GPA or by special petition. In addition, students need two letters of recommendation and passing scores on all required Oregon licensure exams.

## SOCIAL STUDIES TEACHING

OPTION
This option is for students wanting to earn a bachelor's degree in Education and qualify for an Oregon Teaching License to teach social studies at the middle school (grades 6-9) and/or the high school (grades 9-12) levels.

## Pre-Education Level

Students at this level will be taking general education prerequisite courses and required content course work.

Note: Pre-Education students should meet with the Double Degree Advisor at least once a year in order to ensure they are on track to meet the prerequisite and content mastery requirements prior to applying to the Professional Level.

## Pre-Education General Course Work

## (18 credits)

Taken prior to Professional Level:
ED 216. *Purpose, Structure, \& Function of Education in a Democracy (3)
ED 219. Civil Rights and Multicultural Issues in Education (3)
ED 253. Learning Across the Lifespan (3)
(Not required if you have taken HDFS 311, 313 and 314 with a 3.0 or higher GPA)
ED 309. Field Practicum (3) (Can be waived with 60 hours supervised/documented volunteer service)
ED 472. Foundations of ESOL Education (3)
ED 479. Linguistics for Teachers (3)
Social Studies Content Mastery Requirements (57-67 credits) Completed prior to Professional Level. These Standards are based on the National Council for the Social Studies (revised 2010), http://www.socialstudies. org/. Most of these courses will also meet requirements for student's first degree.

- Must have 3.0 accumulative GPA on all course work to fulfill content mastery requirements.
- All grades must be taken as A-F graded courses; no $\mathrm{P} / \mathrm{N}$ or $\mathrm{S} / \mathrm{U}$ grades accepted for content mastery courses.
- Experiences in these areas are highly valued and may be considered in place of course work.
You need depth and breadth of knowledge including both analytical and methodological expertise in at least one social studies discipline. Met with a major in one of the following disciplines:
- Anthropology
- Economics
- Ethnic Studies
- Geography
- History
- Liberal Studies
- Political Science
- Psychology
- Sociology

You are required to have extensions of learning into a non-campus environment or new culture. (6 credits or 180 volunteer hours): Internship or one term abroad at 6 credits or 180 hours of volunteer experience. This should be documented with transcripted hours or with a letter from a supervisor verifying volunteer hours.

## Standard 1: Culture and Cultural

 Diversity (3-4 credits)Social studies program should include experiences that provide for the study of culture and cultural diversity.

[^1]ANTH 251. *Language in the USA (3)
GEOG 105. *Geography of the Non-Western World (3)
GEOG 106. *Geography of the Western World (3)

## EDUCATION MINOR

Also offered via Ecampus.
The Education undergraduate minor is composed of a selection of courses that represent careers and key topics in educa-tion-related fields. The minor is open and intended for majors outside of education to obtain an overview of educational
careers and concepts. An undergraduate minor in education would be valuable to anyone interested in education and workplace training in their chosen field or in doing outreach education. This degree is not part of a licensure program and does not result in a teaching or counseling license.
A grade of C - or better is required for all courses used to complete minor requirements. Such courses cannot be taken for an S/U grade.

## Core Courses ( 9 credits)

ED 216. *Purpose, Structure, \& Function of Education in a Democracy (3)
ED 219. Civil Rights and Multicultural Issues in Education (3)
ED 253. Learning Across the Lifespan (3)

## Electives (18 credits)

Select 18 credits from the nonlicensure undergraduate courses offered though the College of Education. These include but are not limited to:
COUN 441. Introduction to Professional Counseling (3)
ED 309. Field Practicum (3-6)
ED 411. Educational Psychology, Learning, and Development (3)
ED 412. Learning Styles and Needs in Adolescence (2)
ED 472. Foundations of ESOL Education (3)
ED 476. Partnerships and Ideologies in ESOL Education (3) (For Corvallis oncampus students only)
ED 479. Linguistics for Teachers (3)
SED 413. Inquiry in Science and Science Education (3)
SED 414. Inquiry in Mathematics and Mathematics Education (3)
SED 431. Overview of Free-Choice Learning (3)

Additional undergraduate Counseling (COUN) and Adult and Higher Education (AHE) courses will be added as electives in AY 2017-18.
Total $=27$

## GRADUATE MAJORS

## ADULT AND HIGHER EDUCATION

 (EdD, EdM, PhD, MAIS)
## Offered via Ecampus only.

The College of Education offers graduate work leading to Master of Education (EdM), Doctor of Education (EdD), and Doctor of Philosophy (PhD) degrees with a major in Adult and Higher Education, as well as Masters of Arts in Interdisciplinary Studies (MAIS).

## Master of Education (EdM)

The Masters of Education (EdM) degree in Adult and Higher Education is a professional program designed for working adults to enhance their current knowledge, skills, and abilities in work-
place adult and community education. The program prepares professionals in education, curriculum development, and training to be able to work with adult learners in the following areas: human resources within for-profit corporations and not-for-profit agencies, organizations involved in systems development, developmental education programs in community colleges, and in a variety of additional higher education settings. This program is guided by the Academy of Human Resource Development Standards, a professional organization recognized internationally.

The EdM degree in Adult and Higher Education is a cohort-based that meet face-to-face and online, and designed to be completed within a three to four-year period.
The EdM in Adult Education degree requires a minimum of 45 credits beyond the baccalaureate degree to complete the program.

## Core Courses

AHE 522-AHE 525. Instructional
Technology I-IV ( $1,1,1,1$ )
AHE 531. Instructional Design (4)
AHE 532. Program Evaluation (4)
AHE 533. Needs Assessment and Research (4)
AHE 534. Organizations and Systems
Theory (4)
AHE 547. Instructional Strategies for Adult Learners (4)
AHE 549. Ethical and Professional Issues (4)
AHE 553. Adult Learning and Development (4)

AHE 567. Leadership Development and Human Relations (4)

## Additional Requirements

AHE 506. Project (4)
AHE 510. Internship (5)

## Admission to the EdM Degree

Admission is selective and competitive.
Factors considered in making admission decisions include completion of a bachelor's degree, cumulative grade-point average ( 3.00 in the last 90 graded credits of the bachelor's degree and all postbaccalaureate course work), written and oral communication skills, career objectives and commitment, career experience, and professional references.

Applicants submit a letter of intent, résumé, transcripts, three letters of recommendation, writing sample, and application questionnaire. Following an initial screening, applicants may be interviewed by a member of the faculty by telephone or in person.

## EdD, PhD Degrees

The Adult and Higher Education major offers two options: Community College Leadership (CCL) and Leadership in Higher Education (LHE). Candidates will pursue their chosen option either in an EdD or PhD designation, depending upon the purpose and approach of their research study and the intended
role to be sought after successful completion of the degree. Both options require completion of courses in foundational and research cores, internship hours, and thesis courses. A minimum of 12 credits of content specialty courses must be taken for each option.

Note: Both options are part-time, cohort-based that meet face-to-face and online, and designed to be completed within a three- to four-year period.

## Doctor of Education (EdD) Degree

The Doctor of Education degree prepares professionals for faculty/administrative leadership roles in a variety of positions in community colleges or other higher education settings. Candidates must have appropriate professional experience that enables them to benefit from the stated program outcomes. Examples of experience include teaching, student services, administration, finance, curriculum specialist, support staff, or supervisor in an educational related setting.

## EdD Requirements

1. Complete a minimum of 114 graduate credits beyond the baccalaureate degree.
2. An earned master's degree. Up to 36 credits may be credited toward the required graduate credits.
3. At least 24 thesis/dissertation credits.
4. A mentored internship in an appropriate work setting for a minimum of 6 credits.

## Doctor of Philosophy (PhD) Degree

The Doctor of Philosophy degree prepares professionals for research, administration, and professorial roles in higher education settings. Candidates must have significant experience in an education or education-related setting such as teaching, leadership administration, curriculum specialist, supervisor, etc., where the primary function is education. Knowledge of educational research methodology is highly desirable.

## PhD Requirements

1. Complete a minimum of 120 graduate credits beyond the baccalaureate degree.
2. An earned master's degree. Up to 33 credits may be credited toward the required graduate credits.
3. A mentored internship in an appropriate work setting for a minimum of 3 credits.
4. At least 36 thesis/dissertation credits.

Major Code: 2075

## OPTIONS

## COMMUNITY COLLEGE <br> LEADERSHIP OPTION

An overview of the growing literature related to community colleges, with an emphasis on the role of research in understanding and interpreting the unique
nature of community college leadership. The option is committed to developing tomorrow's leaders based on the principle that leadership can be learned and enhanced. Effective leadership is a combination of commitment, management, and vision related to the role and mission of community colleges. This option is dedicated to developing student competencies in communications, resource management, organizational strategy, collaboration, leadership, and community college advocacy. Ethics and a commitment to social justice are critical foundations that undergird all course work.

This option is designed for the scholarpractitioner wanting to examine through research particular elements of community college organization, learning, and/ or leadership.

## Content Specialty (12 credits)

AHE 612. Research Perspectives in
Education (3)
AHE 613. Research Analysis and
Interpretation in Education (3)
AHE 614. Advanced Research Methods in Education (3)
AHE 615. Research Issues (3)

## Option Code: 2076

## LEADERSHIP IN HIGHER EDUCATION OPTION

An overview of the extensive literature related to four-year colleges and universities, with an emphasis on the role of research in understanding and interpreting the nature of higher education leadership. The option of leadership in higher education is committed to developing tomorrow's leaders based on the principle that leadership can be learned and enhanced. Effective leadership is a combination of commitment, management, and vision related to the role and mission of higher education institutions. This option is dedicated to developing student competencies in communications, resource management, organizational strategy, collaboration, leadership, and higher education advocacy. Ethics and a commitment to social justice are critical foundations that undergird all course work.

This option is designed for the scholarpractitioner wanting to examine through research particular elements of higher education organization, learning, and/or leadership.

## Content Specialty (12 credits)

AHE 672. Research Perspectives in Four-Year Higher Education (3)
AHE 673. Research Interpretation in FourYear Higher Education (3)
AHE 674. Advanced Research Methods in Four-Year Higher Education (3)
AHE 675. Four-Year Higher Education Research Issues (3)
Option Code: 2077

## COUNSELING (MCoun, PhD) Also available at OSU-Cascades and via Ecampus.

The mission of the Oregon State University graduate program in counseling is to prepare counseling professionals who promote the social, psychological and physical well-being of individuals, families, communities and organizations. We believe that such professional leaders stand for social, economic and political justice and therefore must be prepared to be proactive educators, change agents and advocates in the face of injustice. Counseling professionals are sensitive to life span developmental issues, demonstrate multicultural awareness and recognize a global perspective as integral to the preparation of counselors and counselor educators.

Two graduate degrees are offered in counseling: the Master of Counseling (MCoun) and the Doctor of Philosophy (PhD). The Master of Counseling has two transcript-visible graduate options, Clinical Mental Health Counseling, and School Counseling.

OSU's counselor education degree programs are accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

The School Counseling graduate option is accredited by the National Council for Accreditation of Teacher Education (NCATE) and by Oregon's Teacher Standards and Practices Commission (TSPC).

## Master of Counseling Degree (MCoun), School Counseling Option: Offered via Ecampus and OSU-Cascades

The Master of Counseling degree with a School Counseling option is a 75 -credit program offered through two campuses: on-campus through OSU-Cascades in Bend, or as a hybrid program 50 percent online through Ecampus and 50 percent at the Chemeketa Community College Center for Business and Industry in Salem. The OSU-Cascades program offers a two-year full-time or three-year parttime format while the Ecampus program is presented in a three-year part-time format for working individuals.

The Master of Counseling degree uses a competency-based approach to preparing school counselors. The program prepares the counselor to provide comprehensive school counseling programs that serve all students. Counselors will learn to utilize strategies to work with their students' academic, personal/social, and career development needs. Preparation consists of a sequential program that integrates academic knowledge and theory with closely supervised counseling practice. Self-exploration and personal development are integral components of the program.

Graduates are eligible for the Initial I School Counselor License upon completion of additional steps required by the Oregon Teacher Standards and Practices Commission.

## Master of Counseling Degree (MCoun), Clinical Mental Health

 Option: Offered via OSU-Cascades The Master of Counseling degree with a Clinical Mental Health Counseling option is a 90 -credit program offered at OSU-Cascades in a two year full-time or three-year part-time format.The Clinical Mental Health Counseling option is designed for individuals who want to work in community agencies, treatment programs, community colleges, and other counseling centers.

## Master of Counseling Degree (MCoun) Written Exam Requirement For students admitted to MCoun program prior to June 2017:

Students admitted to the MCoun degree program prior to June 2017 must successfully pass a written project portfolio that demonstrates mastery (G.L.O.b.) of the MCoun learning outcomes. Students will specifically address G.L.O.a. by describing how they have and/or how they would utilize research/evidencebased counseling practice in their clinical work. Students will address G.L.O.c. by describing an ethical dilemma they have faced in their clinical practice to date and include an ethical decision model when describing their ethical decision-making processes. The written project portfolio will assess the 8 CACREP areas, in which the MCoun learning outcome objectives are based. These areas include:

1. Human growth and development
2. Social and cultural foundations
3. Helping relationships
4. Group work
5. Career and lifestyle development
6. Appraisal
7. Research and program evaluation (G.L.O.a.)
8. Professional orientation and ethics (G.L.O.c.)

The student's major advisor and one additional faculty member from the unit will serve as the student's committee. A student shall receive a Pass when the grading committee unanimously grades the portfolio as a Pass. In cases where consensus is not reached (one member votes Pass and one member votes No Pass) a third faculty member will serve as a third voter. Two outcomes are then possible: the candidate has passed with one dissenting vote or the candidate has not passed (two or more negative votes). In cases where the student has not passed, the committee recommends, by majority vote, that the student's work toward the degree be terminated. The committee recommends, by majority vote, that the
student be allowed to resubmit a modified written project portfolio, but not before the end of the term in which the written project portfolio was completed. No more than two modified written project portfolios are permitted.

For students admitted to

## MCoun program beginning

June 2017: Students admitted to the MCoun degree program beginning June 2017 must successfully pass a nationally administered exam (i.e., Counselor Preparation Comprehensive Examination) as determined by program faculty. The written exam will evaluate all three G.LO.'s. Successful completion of the national exam will evidence the candidate's mastery of MCoun subject material (G.L.O.b.) covered in the program and assess the candidate's ability to apply research (G.L.Oa.) and ethical (G.L.O.c.) proficiencies on the exam. The exam will assess the 8 CACREP areas, in which the MCoun learning outcome objectives are based. These areas include:

1. Human growth and development
2. Social and cultural foundations
3. Helping relationships
4. Group work
5. Career and lifestyle development
6. Appraisal
7. Research and program evaluation
8. Professional orientation and ethics

The minimum passing score for the national exam is defined as one standard deviation below the national mean at the time of administration. Candidates who do not pass the national exam are allowed to take re-examination, but not before the end of the term in which the exam was administered. No more than two re-exams are permitted.

## Admission to the Master of Counseling (MCoun) Programs-

 The application must be made online via the Graduate School website, http:// gradschool.oregonstate.edu/admissions/ process. The minimal prerequisite is a bachelor's degree. Admission is not based exclusively on academic success in courses. Screening includes a minimum GPA of 3.00 and a personal interview in which the applicant's educational goals, experience, and employment background are reviewed. Academic background, personal and emotional stability, commitment to diversity, and educational and professional goals of each candidate are evaluated before admission is granted. Prior counseling-related academic work from an accredited institution may meet, in part, the requirements of the program. Admission is competitive, by cohort, and begins with the summer session.Academic performance is not the sole criterion for admission to and continuation in certain courses, such as practicum courses and internships. The university may evaluate an individual's
background to determine the likelihood that he or she will maintain standards of professional conduct necessary in the discipline. An evaluation may consider current performance along with past experiences and actions that could affect a student's ability to perform in the particular course or program.

It should also be noted that individuals who want to become school counselors but who do not have a teaching license are eligible to apply for the school counselor track.

## Doctor of Philosophy in

 Counseling: Offered via Ecampus The PhD degree in Counseling is designed to prepare experienced counseling professionals to extend their roles in the counseling profession. The doctoral program is appropriate for those whose career path is that of research and teaching in counselor preparation programs, in student development at a college or university level, or in supervisory or leadership positions in schools or agencies.
## Requirements for the PhD

A minimum of 150 credits is required beyond the baccalaureate degree. The program includes thesis, internship, and the balance of credits in specialty areas, including participation in doctoral seminars. Doctoral students can meet the majority of their residency and course requirements in two years of full-time study or three years of part-time study.

## Admission to the PhD Program

 It is expected that individuals entering the PhD program will have completed a master's degree in counseling that covers the nine areas of concentration required by the Council for Accreditation of Counseling and Related Educational programs (CACREP). The nine areas are human growth and development, social and cultural foundations, helping relationships, groups, career and lifestyle development, appraisal, research and program evaluation, professional orientation, and clinical instruction. Areas not covered in the student's master's program or through continuing higher education must be taken in doctoral study.Applicants are preferred who have a minimum of two years of post-master's experience as a counselor. Preference will be given to National Certified Counselors (NCCs), state Licensed Professional Counselors (LPCs), and those who are licensed through a school counseling licensing body, such as Oregon Teacher Standards and Practices. It is also expected that applicants will have participated in counseling as a client prior to admission to the program. Desirable, but not essential, is work in the field of education such as teaching, school administration, curriculum or instruction, and/or educationally related work in child, youth, or adult development programs.

The application must be made online via the Graduate School website, http:// gradschool.oregonstate.edu/admissions/ process. A personal interview is a final step in the application process.
Admission is by cohort to begin each summer term

## Counseling Major Core (54 credits):

COUN 513. Counseling Pre-Practicum (3)
COUN 514. Practicum in Counseling (1-3)
(n.b., taken 2 quarters for 6 credits total)

COUN 531. Developmental Perspectives in Counseling (3)
COUN 532. Social and Cultural Perspectives in Counseling (3)

Major Code: 2970

## OPTIONS

CLINICAL MENTAL HEALTH COUNSELING OPTION
Available only via Ecampus and at OSU-Cascades.
The Master of Counseling (MCoun) degree offers a Clinical Mental Health Counseling option for individuals who want to work in community agencies, treatment programs, community colleges and other counseling centers.

This is a 90 -credit option offered through different campuses and delivery methods: OSU-Cascades is an on-campus program which offers two-year full-time or three-year part-time formats at the Bend campus. Ecampus offers a part-time three to four year format as a hybrid program with online course work and face-to-face weekend meetings at a convenient Willamette Valley location.
Clinical Mental Health Counseling Option-Specialty Courses (36 credits)
COUN 515. Counseling Internship (24) (taken in clinical mental health settings over multiple quarters)
COUN 536. Applied Psychopharmacology for Counselors (3)
COUN 550. Foundations of Mental Health Counseling (3)
COUN 595. Group Counseling II (3)

COUN 597. Introduction to Counselor Supervision (3)

## Total credits=90

Option Code: 2975

## SCHOOL COUNSELING OPTION

Available via Ecampus and at OSUCascades.
The Master of Counseling (MCoun) degree offers a School Counseling option which prepares counselors to provide comprehensive school counseling programs that serve all students using a competency-based approach. Counselors learn to utilize strategies to work with their students' academic, personal/social and career development needs. Preparation consists of a sequential program that integrates academic knowledge and theory with closely supervised counseling practice. Self-exploration and personal development are integral components of the program.

This is a 75-credit option offered through two different campuses and delivery methods: OSU-Cascades is an on-campus program which offers twoyear full-time or three-year part-time formats at the Bend campus. Ecampus offers a three-year part-time format as a hybrid program with online course work and face-to-face meetings in Salem, OR.

Graduates are eligible for a School Counselor License upon completion of additional steps required by the Oregon Teacher Standards and Practices Commission.

## School Counseling Option-

Specialty Courses (21 credits)
COUN 515. Counseling Internship (15) (taken in school settings over multiple quarters)
COUN 546. Leadership of School
Counseling Programs (3)
COUN 548. Special Education Issues In Counseling (3)

## Total credits=75

Option Code: 2980

## EDUCATION (EdD, EdM, MS,

 PhD, MAIS)The College of Education offers graduate work leading to the Master of Education (EdM), Master of Science in Education (MS), Doctor of Education (EdD; not available at this time), and Doctor of Philosophy (PhD) degrees with a major in education.

## Master of Education (EdM) Degree (Ecampus)

The Master of Education (EdM) degree advances the knowledge and teaching of PK-12 teachers and other educators who are interested in continued professional development in the field of education in order to create inclusive, supportive learning environments that contribute to student learning and growth. Candidates
take courses in educational research, technology, cultural competency, and leadership. They also further their pedagogical content knowledge and instruction in a specific area/option.

The Master of Education degree requires completion of one graduate option for a total of 45 quarter credits. All options require completion of 18 credits of core courses, $12-15$ credits of content specialty courses, and 12-15 credits of elective courses from the other EdM options or OSU Colleges. Up to 15 graduate credits may be transferred if they meet OSU Graduate School requirements.

Note: Completion of this degree does not lead to initial (preliminary) teaching licensure; it is an advanced degree for continued professional development in targeted areas.

There are four EdM options, all online and approved by the Oregon Teacher Standards and Practices Commission (TSPC) and nationally accredited by NCATE.

1. Advanced Science and Mathematics Education
2. Free-Choice Learning
3. PK-12 English to Speakers of Other Languages (ESOL)
4. Social Justice in Education

Applicants to the EdM program must possess teaching experience in a $\mathrm{K}-12$ classroom or in an education-related setting. Because this major is practitionerbased, it requires access to a classroom or informal learning environment to apply educational research, theory, and pedagogical practices, and for completion of a final project.

All courses are offered online through Ecampus to meet the needs of working professionals.

## EdM Core Courses (18 credits)

ED 506. Projects (3)
ED 522. Racial and Cultural Harmony in the K-12 Classroom (3)
ED 542. Teacher Leadership (3)
or LEAD 542. Leadership Skills for Career Success (3)
ED 561. Action Research (3)
ED 562. Introduction to Educational Research (3)
ED 596. Technology for Educators (3) or SED 520. Technology for Math and Science Education (3)

## Content Specialty Courses (12-15 credits)

## Electives (12-15 credits)

Total Credits $=45$

## Master of Science Degree

The Master of Science (MS) in Education prepares candidates to be secondary science and mathematics teachers who are skilled professionals drawing upon current educational research to create innovative and inclusive science and math learning environments. Candidates work within a cohort of peers in science and
mathematics education and are taught by faculty who specialize in and conduct educational research in science, mathematics, and equity.

The program is comprised of a coherent set of courses that emphasize research-based instruction, educational equity, innovation, and communitypartnerships. Candidates work with community partners in public school settings during every term. As part of the program, candidates complete a master's project that integrates research, theory, and practice.
The program consists of 55 graduatelevel credits including 18 credits of core courses, 20 credits of practicum and internships, and 17 credits in a content specialty: Science Education or Mathematics Education. Both options are offered on-campus at OSU in Corvallis.

Upon completion of the program, candidates will have:

- A Master of Science degree in one option:
- Science Education
- Mathematics Education
- An Oregon preliminary teaching license; and
- One or more endorsements in Advanced Mathematics, Biology, Chemistry, Integrated Science or Physics.
- It is also possible to earn an ESOL endorsement which includes additional courses and field experiences beyond the required number of credits.

## Admission Requirements

- 60 hours of reflective classroom experience* (e.g., ED 309, ED 409)
- A course in technology for teaching mathematics or science* (e.g., SED 412/512)
- A course that addresses the connection between the discipline and the current standards in science and mathematics education* (e.g., SED 413/513 or SED 414/514)
- A course in adolescent psychology* (e.g., ED 412, ED 512, HDFS 313, HDFS 229 at LBCC)
- Passing scores on required state licensure tests
*These courses may be waived if the candidate has completed similar courses at OSU or other institutions.

## MS Core Courses (18 credits)

ED 520. Classroom Management (3)
ED 572. Foundations of ESOL Education (3)
ED 599. Special Topics: Funds of Knowledge (3)

SED 506. Projects: Science-Math Ed Research (3)
SED 511. Analysis of Classrooms I (3)
SED 550. High-Quality Science and Mathematics Instruction (3)

## Internship and Practicum (20 credits)

SED 509. Practicum (5)
SED 510. Internship (15)

## Content Specialty (17 credits)

Total Credits = 55
Doctor of Philosophy Degree
The Doctor of Philosophy (PhD) in Education provides advanced theory and methods in educational research and in specific content areas. This is a research-oriented degree intended for doctoral candidates interested in becoming educational researchers and assume professional positions in a variety of settings, including colleges and universities, non-profit organizations, and government agencies. This degree aims to prepare professional researchers, scholars, or other scholar practitioners. Candidates develop competencies in educational scholarship and research that focus on acquiring new knowledge.

The Education PhD degree requires at least 108 credits, including a core curriculum (48 credits) in quantitative and qualitative research, practicum, and dissertation/thesis, and 13-18 credits in a specialty area. Additional research methods and elective courses are approved by the major professor.

Candidates select from three PhD options. All options are offered on-campus at OSU in Corvallis:

1. Agricultural Education
2. Language Equity and Educational Policy
3. Science/Mathematics Education

This program is designed for can-
didates already possessing education beyond the undergraduate level (master's degree or equivalent). Applicants to the PhD program must have significant experience in an education-related setting such as teaching, leadership administration, curriculum specialist, supervisor, or in a setting where the primary function is education. Some knowledge of educational research methodology is highly desirable.
PhD Core Courses (48 credits)
SED 580. Research and Evaluation (3)
SED 603. Dissertation (36)
or AED 603. Dissertation (36)
or ED 603. Thesis (36)
SED 612. Quantitative Research Design and Critical Analysis (3)
SED 615. Practicum in Mathematics/Science in College Teaching (3)
or ED 609. Practicum/Clinical Experience (3)

SED 622. Qualitative Research Techniques (3)
Content Specialty Courses (13-18 cr)

## Electives

Total Credits = 108
Major Code: 2310

## options

## ADVANCED SCIENCE AND MATHEMATICS EDUCATION OPTION

This EdM option aims to prepare PK-12 teachers and educators to specialize in science and mathematics education in public or private schools or informal settings. Courses emphasize using theory to inform classroom practice and practice to inform understanding of educational research in the context of science and math education.
Content Specialty Courses (12 cr) SED 566. Fostering Reflective Discourse in Science and Math Contexts (3)
SED 594. Advanced Instructional Strategies in Science and Mathematics (3)
SED 595. Assessment and Evaluation (3)
SED 598. Mathematics and Science Curriculum (3)

## Electives

Select 15 elective credits. Must be approved by program advisor.

## Total Credits = 45

Option Code: 2311

## AGRICULTURAL EDUCATION OPTION

This option is for the PhD degree.
The Agricultural Education doctoral option has a primary focus of preparing candidates to assume faculty positions in colleges or universities in agricultural education programs. Candidates assemble an individual program of study that provides a comprehensive knowledge of the teaching and learning process with a strong theoretical foundation and practical research experience in agricultural education.

## Content Specialty (13 credits)

AED 501. Research (4)
AED 553. Applied Instructional Strategies (3)
AED 556. Link Research, Teaching, and
Practice (3)
AED 640. Instrumentation and Data
Collection in Social Science (3)

## Electives

Two additional research methods courses and other courses approved by the major professor.

## Option Code: 2312

## FREE-CHOICE LEARNING OPTION

This EdM graduate option prepares educators to support learning in museums, zoos and aquariums, national parks, on the Internet, libraries, afterschool programs and other informal settings and contexts. The program emphasizes the self-directed, voluntary and lifelong nature of learning and courses utilize current learning theory and research to further an understanding of the nature of learning and cultivate better practice.

Content Specialty Courses (12 cr)
SED 535. Communicating Ocean Science To Informal Audiences (3)
SED 582. Personal Dimensions of FreeChoice Learning (3)
SED 583. Socio-cultural Dimensions of FreeChoice Learning (3)
SED 584. Physical Dimensions of FreeChoice Learning (3)

## Electives

Select 15 elective credits. Must be approved by program advisor.

## Option Code: 2319

## LANGUAGE EQUITY AND

 EDUCATIONAL POLICY OPTIONThis option is for the PhD degree.
The Language Equity and Educational Policy (LEEP) PhD option has a primary focus of preparing candidates to assume various positions in post-secondary education, leadership in community education, faculty positions in colleges or universities, or teacher education programs. Working with faculty advisors, candidates create and implement a program of study that provides comprehensive knowledge of research with bi/multilingual communities, equity in education contexts, and educational policies.

## Content Specialty (14 credits) <br> ED 607. Seminar (2)

ED 650. Equity and Education Policy (3)
ED 651. Research Bilingualism and
Multilingualism (3)
ED 652. Ethnographic Methods (3)
ED 653. Discourse and Identity in Education (3)

## Electives

One additional research methods course and other courses approved by the major professor.
Option Code: 2313

## MATHEMATICS EDUCATION OPTION

This option is for the MS degree. This graduate option is for students wanting to earn both a Master's of Science degree in Education and qualify for an Oregon teaching license in advanced mathematics.
Content Specialty ( 17 credits)
SED 574. Mathematics Pedagogy and
Technology I (4)
SED 576. Mathematics Pedagogy and
Technology II (4)

## Electives

9 credits of 500 - or 600 -level mathematics (MTH) courses, or graduate level mathematics related courses in other disciplines with approval from advisor.
Total=17
Option Code: 2314

## PK-12 ENGLISH TO SPEAKERS OF OTHER LANGUAGES (ESOL) OPTION

This EdM option focuses on how to effectively work with children and adolescents who are learning English as an additional language. It is designed for pre-kindergarten through twelfth grade (PK-12) teachers in the United States. Courses incorporate state and national learning standards for PK-12 students, as well as state and national ESOL standards for PK-12 teacher preparation programs.

Candidates who wish to add the ESOL endorsement to a current Oregon teaching license need to contact the ESOL endorsement program coordinator in the College of Education regarding additional licensure requirements.

## Content Specialty Courses (12 cr)

ED 572. Foundations of ESOL Education (3)
ED 573. Instructional Approaches for ESOL Education (3)
ED 576. Partnerships and Ideologies in ESOL Education (3)
ED 579. Linguistics for Teachers (3)

## Electives

Select 15 elective credits. Must be approved by program advisor.
Total Credits = 45
Option Code: 2315

## SCIENCE EDUCATION OPTION

This option is for the MS degree.
This option is for students wanting to earn both a Master's of Science degree in Education and qualify for an Oregon teaching license in one or more of the following endorsements: biology, chemistry, integrated science, physics.

## Content Specialty (17 credits)

SED 573. Science Pedagogy and Technology I (4)
SED 577. Science Pedagogy and Technology II (4)

## Electives

9 credits of 500 - or 600 -level courses in the history or philosophy of science, or other graduate-level courses in the sciences with approval from advisor.

## Option Code: 2316

## SCIENCE/MATHEMATICS EDUCATION OPTION

This option is for the PhD degree.
The Science/Mathematics Education PhD option has a primary focus of preparing candidates to assume various positions in collegiate/university, K-12, or free-choice education organizations. Working with faculty advisors, candidates create and implement a program of study that fosters theory-based knowledge and skills and practical research experience necessary for future career ambitions in STEM education.
Content Specialty (18 credits)
SED 607. Seminar (6)

SED 611. Survey of Research on Teaching (3)
SED 613. Learning Theory (3)
SED 621. Survey of Research on Learning (3) SED 623. Curriculum Theory (3)

## Electives

Two additional research methods courses and other courses approved by the major professor.

## Option Code: 2317

## SOCIAL JUSTICE EDUCATION OPTION

This option is for the EdM degree.
This EdM option prepares PK-12 teachers and educators in informal settings to be agents of change for equity and social justice. Candidates will learn about social justice curriculum and teaching, will engage in effective collaboration with schools and community, and will become advocates for the educational success of all students.

## Content Specialty Courses (12 credits)

ED 544. Teaching Critical Literacy (3)
ED 549. Teaching in a Differentiated and Diverse Classroom (3)
ED 590. Social Justice in Education (3)
ED 599. Special Topics [Funds of
Knowledge] (3)

## Electives

Select 15 elective credits. Must be approved by program advisor.

## Total credits=45

Option Code: 2318
MATHEMATICS EDUCATION (MA, MS, PhD)
Graduate Areas of Concentration
Elementary school mathematics, freechoice learning, mathematics education, middle school mathematics, secondary mathematics
This graduate major to be suspended pending approval of 97910.

## Master of Science Program (MS)

The master's program offers three areas of concentration:

1. Free-Choice Learning-This concentration offers the study of learning across the life span in learning environments such as science centers; aquariums; outdoor education, broadcast media, and after-school programs.
2. Professional Teacher

Licensure-In this concentration, students earn a professional teaching license in mathematics for grades 5 through 12 and a concurrent master of science degree (MS).
3. School-Based EducationThis concentration offers study for specializing in mathematics education in K-12 schools.

## Doctor of Philosophy Program (PhD)

The doctoral program offers advanced study and preparation for research in three areas of concentrations.

1. Collegiate Education-Advanced study of science education or mathematics education at the collegiate level that includes but is not limited to curriculum, assessment, instruction and instructional design, student and teacher learning, psychological factors such as motivation or selfregulation.
2. Free-Choice Learning-Advanced study of science or mathematics free-choice learning includes but is not limited to investigations of personal dimensions of learning such as motivation and identity; sociocultural issues such as gender and culture; and environmental issues such as the influence of instructional design and setting.
3. School-Based EducationAdvanced study of science education or mathematics education at the precollege level that includes but is not limited to curriculum, assessment, instruction and instructional design, student and teacher learning, psychological factors such as motivation or self-regulation. All three concentrations require two years of research content courses and five quarters of research methods courses. A program of study typically involves graduate study in a cognate field. A dissertation is required.

## Major Code: 5620

## SCIENCE EDUCATION (MA, MS, PhD)

## Graduate Areas of Concentration

Elementary school science, free-choice learning, middle school science, science education, secondary science
This graduate major to be suspended pending approval of 97919 .

## Master of Science Program (MS)

The master's program offers three areas of concentration:

1. Free-Choice Learning-This concentration offers the study of learning across the life span in learning environments such as science centers; aquariums; outdoor education; broadcast media; national, state and local parks; and after-school programs.
2. Professional Teacher Licensure-In this concentration, students earn a professional teaching license in science (biology, chemistry, integrated sciences, physics) for grades 5 through 12 and a concurrent master of science degree (MS).
3. School-Based Education-

This concentration offers study for specializing in science or mathematics education in K-12 schools.

## Doctor of Philosophy Program

 (PhD)The doctoral program offers advanced study and preparation for research in three areas of concentrations.

1. Collegiate Education-Advanced study of science education or mathematics education at the collegiate level that includes but is not limited to curriculum, assessment, instruction and instructional design, student and teacher learning, psychological factors such as motivation or selfregulation.
2. Free-Choice LearningAdvanced study of science education or mathematics education freechoice learning includes but is not limited to investigations of personal dimensions of learning such as motivation and identity; sociocultural issues such as gender and culture; and environmental issues such as the influence of instructional design and setting.
3. School-Based EducationAdvanced study of science education or mathematics education at the precollege level that includes but is not limited to curriculum, assessment, instruction and instructional design, student and teacher learning, psychological factors such as motivation or self-regulation.
All three concentrations require two years of research content courses and five quarters of research methods courses. A program of study typically involves graduate study in a cognate field. A dissertation is required.

## Major Code: 6100

## TEACHING (MAT)

Completion of the Teaching program results in a Master of Arts in Teaching (MAT) and recommendation for an Oregon teaching license in a particular subject area or in multiple subjects (elementary). This program requires a minimum of 45 credits which includes a course in foundations of ESOL instruction and at least 15 credits in internships and/or practicum that provide classroom observation and teaching practice. In addition, a minimum of 3 credits is required in each of the InTASC categories:

- The Learner and Learning,
- Instructional Practice,
- Professional Responsibility, and
- Content Specialty.

Professional Teaching Core ( $\mathbf{3} \mathbf{~ c r}$ )
ED 572. Foundations of ESOL Education (3)

## Graduate Options:

Clinically Based Elementary (Only via Ecampus)

The graduate options below are only offered at OSU-Cascades:
Elementary
Language Arts
Mathematics
Music
Science
Social Studies
Major Code: $\mathbf{2 1 0 0}$

## OPTIONS

## CLINICALLY BASED

 ELEMENTARY OPTION
## Offered only via Ecampus

The Clinically Based Elementary option in the Masters of Arts in Teaching (MAT) is a two-year program that features culturally literate education, teaching for social justice, and science and math topics leading to a preliminary license. This option takes advantage of a partnership between a school district and the College of Education to put teacher candidates in district classrooms. Each term course work includes fully online courses, hybrid courses that are a combination of online and face-to-face learning in local districts, and field practicums in school district classrooms.
Only School Districts that have entered into a formal partnership with OSU are available for student placement. Please check with the program coordinator for a list of participating schools.

## Admission Requirements:

ED 216. *Purpose, Structure, \& Function of Education in a Democracy (3)
ED 219. Civil Rights and Multicultural Issues in Education (3)
ED 253. Learning Across the Lifespan (3)
Professional Core ( 3 credits)
ED 572. Foundations of ESOL Education (3)
Internship and Practicum (18 cr)
ED 509. Practicum $(1,1,1)$
ED 509. Practicum: Formative edTPA (1)
ED 509. Practicum: edTPA Preparation (2)
ED 510. Internship: Student Teaching (12)
The Learner and Learning ( $\mathbf{7} \mathbf{~ c r}$ )
ED 520. Classroom Management (3)
ED 548. Students with Special Needs (2)
ED 597. K-5 STEM Integration in Diverse Classrooms (2)

## Instructional Practice (9 cr)

ED 528. Assessment for Learning (3)
ED 590. Social Justice in Education (3)
ED 596. Technology for Educators (3)
Professional Responsibility ( $\mathbf{3} \mathbf{~ c r}$ )
ED 524. Teacher as Reflective Practitioner (3) (Project)

## Content Specialty (12 cr)

ED 559. Strategies for Teaching Humanities (3)

ED 582. Strategies for Developing Literacy (3)

SED 552. Mathematics Methods: Practicum I (3)
SED 553. Science Methods: Practicum I (3)
Total Credits=52
Footnote:

* Baccalaureate Core Course

Option Code: 2107

## ELEMENTARY OPTION

Offered at OSU-Cascades in Bend only.
The Elementary graduate option is for students wanting to earn both a Master of Arts in Teaching (MAT) degree in elementary education and qualify for an Oregon teaching license to teach multiple subjects in a self-contained classroom.
Professional Teaching Core ( $\mathbf{3} \mathbf{c r}$ ) ED 572. Foundations of ESOL Education (3)

## The Learner and Learning (11 cr)

ED 513. Learning Environments I: Fostering Class Engagement (3)
ED 514. Learning Environments II:
Advancing Every Student (2)
ED 515. Learning Environments III:
Cultures and Communities (2)
ED 594. Development and Differentiation K-12 (4)

## Instructional Practice (13 cr)

ED 550. The Effective Teaching Cycle I: Foundations and Planning (4)
ED 551. The Effective Teaching Cycle II: Assessment (4)
ED 552. The Effective Teaching Cycle III:
Data and Differentiation (3)
ED 592. Technology Tools for Teaching (2)
Professional Responsibility ( $6 \mathbf{c r}$ )
ED 518. Professional Practice in the
Teaching Community (2)
ED 519. Capstone: Teaching as a Profession (3)

## Content Specialty (12 cr)

ED 565. Elementary Methods: Literacy (4)
ED 566. Elementary Methods: Mathematics (4)

ED 567. Elementary Methods: Natural and Social Science (4)

## Internship and Practicum (17 cr)

ED 510. Internship (17)
Total Credits = $\mathbf{6 1}$
Option Code: 2101

## LANGUAGE ARTS OPTION

## Offered at OSU-Cascades in Bend

## only.

The Language Arts graduate option is for students wanting to earn both a Master of Arts in Teaching (MAT) degree in language arts and qualify for an Oregon teaching license in language arts.
Professional Teaching Core ( $\mathbf{3} \mathbf{~ c r}$ ) ED 572. Foundations of ESOL Education (3)

## The Learner and Learning (11 cr)

ED 513. Learning Environments I: Fostering Class Engagement (3)
ED 514. Learning Environments II:
Advancing Every Student (2)

ED 515. Learning Environments III: Cultures and Communities (2)
ED 594. Development and Differentiation K-12 (4)
Instructional Practice ( $\mathbf{1 3} \mathbf{~ c r}$ )
ED 550. The Effective Teaching Cycle I:
Foundations and Planning (4)
ED 551. The Effective Teaching Cycle II: Assessment (4)
ED 552. The Effective Teaching Cycle III:
Data and Differentiation (3)
ED 592. Technology Tools for Teaching (2)
Professional Responsibility (5 cr)
ED 518. Professional Practice in the
Teaching Community (2)
ED 519. Capstone: Teaching as a Profession (3)

Content Specialty (12 cr)
ED 584. Language Arts Methods I: Adolescent Literacy (4)
ED 585. Language Arts Methods II: Strategies for Grades 5-12 (4)
ED 586. Language Arts Methods III:
Curriculum and the Profession (4)
Internship and Practicum (17 cr)
ED 510. Internship (17)
Total Credits = $\mathbf{6 1}$
Option Code: 2102

## MATHEMATICS OPTION

## Offered at OSU-Cascades in Bend

 only.The Mathematics graduate option is for students wanting to earn both a Master of Arts in Teaching (MAT) degree in mathematics and qualify for an Oregon teaching license in mathematics.
Professional Teaching Core ( 3 cr) ED 572. Foundations of ESOL Education (3)
The Learner and Learning ( $11 \mathbf{c r )}$
ED 513. Learning Environments I: Fostering Class Engagement (3)
ED 514. Learning Environments II:
Advancing Every Student (2)
ED 515. Learning Environments III:
Cultures and Communities (2)
ED 594. Development and Differentiation K-12 (4)

## Instructional Practices (13 cr)

ED 550. The Effective Teaching Cycle I: Foundations and Planning (4)
ED 551. The Effective Teaching Cycle II: Assessment (4)
ED 552. The Effective Teaching Cycle III:
Data and Differentiation (3)
ED 592. Technology Tools for Teaching (2)
Professional Responsibility (5 cr)
ED 518. Professional Practice in the Teaching Community (2)
ED 519. Capstone: Teaching as a Profession (3)

## Content Specialty (12 cr)

ED 537. Mathematics Methods I:
Foundations of Numerical Thought (4)
ED 538. Mathematics Methods II: Cycles of Enactment (4)
ED 539. Mathematics: Methods III:
Mathematics for Every Learner (4)

## Internship and Practicum (17 cr)

ED 510. Internship (17)
Total Credits = $\mathbf{6 1}$
Option Code: 2103

## MUSIC OPTION

Offered at Corvallis Campus only.
The Music graduate option is an intensive, one-year graduate program for students wanting to earn both a Master of Arts in Teaching (MAT) degree in music and qualify for an Oregon teaching license in music.
Professional Teaching Core ( $\mathbf{3} \mathbf{~ c r}$ ) ED 572. Foundations of ESOL Education (3)
The Learner and Learning ( 3 cr ) Select one course from one of the following areas:
Education
Counseling
Psychology
Human Development and Family Sciences
Instructional Practice ( $\mathbf{6} \mathbf{c r}$ )
MUED 591. Curriculum Foundations in Music Education (3)
MUED 592. Curriculum Implementation and Evaluation (3)
Professional Responsibility (8-10 cr)
MUED 506. Projects (5-7)
MUED 562. Research in Music Education (3)

## Content Specialty ( $\mathbf{9} \mathbf{~ c r}$ )

MUED 574. Middle Level Music Education (3)

MUED 580. Secondary Vocal Music Education (3)
MUED 581. Secondary Instrumental Music Education (3)

## Internship and Practicum (19 cr)

MUED 507. Theory and Practicum Seminar (4)

MUED 510. Professional Internship (15)

## Elective Courses

Select relevant graduate-level Music courses including performance ensembles or lessons. You must get approval from your advisor before registering for these courses.
Total Credits $\mathbf{= 4 8 - 5 0}$
Option Code: 2104

## SCIENCE OPTION

Offered at OSU-Cascades in Bend only.
The Science graduate option is for students wanting to earn both a Master of Arts in Teaching (MAT) degree in science and qualify for an Oregon teaching license in one of the following areas: biology, chemistry, integrated science, physics.
Professional Teaching Core ( $3 \mathbf{c r}$ ) ED 572. Foundations of ESOL Education (3)
The Learner and Learning ( $\mathbf{1 1} \mathbf{~ c r}$ )
ED 513. Learning Environments I: Fostering Class Engagement (3)
ED 514. Learning Environments II:
Advancing Every Student (2)

ED 515. Learning Environments III: Cultures and Communities (2)
ED 594. Development and Differentiation K-12 (4)
Instructional Practice ( $\mathbf{1 3} \mathbf{~ c r}$ )
ED 550. The Effective Teaching Cycle I:
Foundations and Planning (4)
ED 551. The Effective Teaching Cycle II: Assessment (4)
ED 552. The Effective Teaching Cycle III:
Data and Differentiation (3)
ED 592. Technology Tools for Teaching (2)
Professional Responsibility (5 cr)
ED 518. Professional Practice in the
Teaching Community (2)
ED 519. Capstone: Teaching as a Profession (3)

## Content Specialty (12 cr)

ED 531. Science Methods I: Inquiry and the Nature of Science (4)
ED 532. Science Methods II: Supporting Students' Conceptual Change (4)
ED 533. Science Methods III: Science for All Learners (4)
Internship and Practicum (17 cr)
ED 510. Internship (17)
Total Credits = 61
Option Code: 2105

## SOCIAL STUDIES OPTION

## Offered at OSU-Cascades in Bend

 only.The Social Studies graduate option is for students wanting to earn both a Master of Arts in Teaching (MAT) degree in social studies and qualify for an Oregon teaching license in social studies.
Professional Teaching Core ( $3 \mathbf{c r}$ )
ED 572. Foundations of ESOL Education (3)
The Learner and Learning ( $11 \mathbf{c r}$ )
ED 513. Learning Environments I: Fostering Class Engagement (3)
ED 514. Learning Environments II:
Advancing Every Student (2)
ED 515. Learning Environments III:
Cultures and Communities (2)
ED 594. Development and Differentiation K-12 (4)

## Instructional Practice (13 cr)

ED 550. The Effective Teaching Cycle I: Foundations and Planning (4)
ED 551. The Effective Teaching Cycle II: Assessment (4)
ED 552. The Effective Teaching Cycle III:
Data and Differentiation (3)
ED 592. Technology Tools for Teaching (2)
Professional Responsibility (5 cr)
ED 518. Professional Practice in the
Teaching Community (2)
ED 519. Capstone: Teaching as a Profession (3)

Content Specialty (12 cr)
ED 587. Social Studies Methods I:
Adolescent Literacy (4)
ED 588. Social Studies Methods II: Strategies for Grades 5-12 (4)
ED 589. Social Studies Methods III:
Curriculum and the Profession (4)

Internship and Practicum (17 cr)
ED 510. Internship (17)
Total Credits = $\mathbf{6 1}$
Option Code: 2106

## GRADUATE MINORS

## ADULT EDUCATION GRADUATE MINOR

The Adult Education graduate minor is offered with focus areas in organization development and training, workforce development, and workplace development, and requires a minimum of 15 credits of approved course work.

## Minor Code: 2070

COUNSELING GRADUATE MINOR
For more details, see the program advisor.
Minor Code: 2970

## EDUCATION GRADUATE MINOR

For more details, see an advisor in the College of Education, 104 Furman Hall, 541-737-4661 or email the advisor at askcoed@oregonstate.edu.
Minor Code: 2310

## MATHEMATICS EDUCATION GRADUATE MINOR

Graduate Areas of Concentration Elementary school science, free-choice learning, middle school science, science education, secondary science
For more details, see the advisor.

## Minor Code: 5620

## SCIENCE EDUCATION GRADUATE MINOR

Graduate Areas of Concentration
Elementary school science, free-choice learning, middle school science, science education, secondary science
For more details, see the advisor.

## Minor Code: 6100

## ADULT EDUCATION <br> AND HIGHER EDUCATION <br> LEADERSHIP COURSES

AHE 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
AHE 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
AHE 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
AHE 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
AHE 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits.
AHE 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.
AHE 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
AHE 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.
AHE 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

AHE 410. INTERNSHIP/WORK EXPERIENCE (1-16). This course is repeatable for a maximum of 16 credits.

AHE 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

AHE 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required
AHE 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits.
AHE 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits
AHE 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

AHE 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

AHE 507. SEMINAR (1-5). This course is repeatable for a maximum of 16 credits.

AHE 508. WORKSHOP (1-3). This course is repeatable for a maximum of 16 credits.

AHE 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

AHE 510. INTERNSHIP (1-18). By special permission and arrangement. This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required
AHE 517. EDUCATION AND WORK (3). Issues related to work in the U.S. and other countries. The role of public, private, corporate, government, military and other education and training programs in meeting changing individual, corporate, and social work-related needs.
AHE 520. MULTICULTURAL ISSUES IN HIGHER EDUCATION (3). Developing understanding knowledge, and skills of multiculturalism affecting the student affairs profession and careers in student affairs administration.

AHE 521. CROSS CULTURAL
COMMUNICATIONS (3). Cultural diversity in schools, work places and communities; serving all students or clients in a pluralistic society. This course is repeatable for a maximum of 9 credits.
AHE 522. INSTRUCTIONAL TECHNOLOGY I (1).
Explores technologies used in distance education to deliver content and facilitate active learning through learner creation of digital portfolios and artifacts using online tools and apps.
AHE 523. INSTRUCTIONAL TECHNOLOGY II (1). An overview of best practices in digital-age learning design, including implementation of backward design principles. PREREQS: AHE 522 [C]

AHE 524. INSTRUCTIONAL TECHNOLOGY III
(1). Students will develop the knowledge and skills needed to design and create complete online teachings/courses within a learning management system. PREREQS: (AHE 522 [C] and AHE 523 [C] )
AHE 525. INSTRUCTIONAL TECHNOLOGY
IV (1). Learners will research and demonstrate how to use a current innovative instructional technology, as well as develop skills in understanding trends and preparing for future innovations in instructional technology. PREREQS: (AHE 522 [C] and AHE 523 [C] and AHE 524 [C] )
AHE 531. INSTRUCTIONAL DESIGN (4). Designed for instructors, trainers, managers, organizational consultants or others who are responsible for the development of programs and courses in community colleges, the workplace or other settings. Using systems concepts and methods, students will learn to design learnercentered instructional programs and courses.
AHE 532. PROGRAM EVALUATION (4). Assessing outcomes in college curriculum and workplace training programs from a
systems perspective and evaluation of program effectiveness. Particular emphasis on formative and summative evaluation, frameworks for program evaluation, quantitative and qualitative methods and analysis, communicating and reporting evaluation findings, and the ethics and standards of evaluation practice.

AHE 533. NEEDS ASSESSMENT AND
RESEARCH (4). Introduces workplace learning needs assessment (WLNA) and research principles and practices for individual and collaborative learning groups. PREREQS: AHE 553 [C]

AHE 534. ORGANIZATIONS AND SYSTEMS
THEORY (4). Introduces principles and practices underlying individual and collaborative work group learning. Participants will learn how to create an environment that promotes effective and efficient workplace learning.
AHE 547. INSTRUCTIONAL STRATEGIES
FOR ADULT LEARNERS (4). Exploration of and practice using instructional strategies to enhance adult learning. Acquisition of an instructional strategy tool kit as well as a method for evaluating adult learning events. This course is repeatable for a maximum of 60 credits.
AHE 549. ETHICAL AND PROFESSIONAL
ISSUES (4). Focuses on issues facing professionals working with adult learners as well as ethical issues relevant to the practice and scholarship in the field. Combines instruction in inquiry-based teaching methods and learning theory with work in professional settings, such as for-profit and non-profit organizations and government agencies.
AHE 553. ADULT LEARNING \& DEVELOPMENT
(4). Introduce participants to key theories, orientations, models, and principles of learning and development in adulthood.
AHE 567. LEADERSHIP DEVELOPMENT AND HUMAN RELATIONS (4). Exploration of multiple theories of leadership in different organizational contexts; synthesize theory with experience to construct a personal framework for leadership practice.
AHE 575. EDUCATIONAL FINANCE (3). Finance, budgeting and accounting for sources of revenue; deferral, state and local financing, budgeting and accounting models, practical experience combined with examination of theory, trends and issues.
Focus in either public schools, community colleges or higher education through practical experience.
AHE 582. LEGAL ISSUES IN HIGHER
EDUCATION (3). A comprehensive presentation and discussion of the law governing administration within community colleges and college/universities with a special emphasis on student services administration.
AHE 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
AHE 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
AHE 602. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits PREREQS: Departmental approval required.

AHE 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.
AHE 605. READING AND CONFERENCE (116). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
AHE 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
AHE 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

AHE 608. WORKSHOP (1-16). This course
is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

AHE 609. PRACTICUM CLINICAL EXPERIENCE (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required
AHE 610. INTERNSHIP (1-15). This course is repeatable for a maximum of 15 credits. PREREQS: Departmental approval required.
AHE 611. QUANTITATIVE ANALYSIS IN EDUCATIONAL RESEARCH I (3). Foundational course to methods and statistics used in quantitative educational research. Examines data analysis, statistical procedures, and interpretation of results within postsecondary environments.
AHE 612. RESEARCH PERSPECTIVES IN EDUCATION (3). Research perspectives, how they are influenced by worldviews, and how these worldviews influence research. PREREQS: AHE 562; an introductory statistics course (may be taken concurrently).

## AHE 613. RESEARCH ANALYSIS AND

INTERPRETATION IN EDUCATION (3). Critical analysis of scholarly studies in education from a variety of research perspectives. PREREQS: AHE 612; an intermediate statistics course (may be taken concurrently).
AHE 614. ADVANCED RESEARCH METHODS
IN EDUCATION (1-3). Selected topics in research methods as appropriate for research perspectives in education. May be repeated. This course is repeatable for a maximum of 6 credits. PREREQS: AHE 613

AHE 615. RESEARCH ISSUES (3). A core course in the College of Education's doctoral program that focuses on research issues. PREREQS: (AHE 612 [C] and AHE 613 [C] and AHE 614 [C] )
AHE 616. QUANTITATIVE ANALYSIS IN EDUCATIONAL RESEARCH II (3). Develop conceptual and practical understanding of research and evaluation in higher education Course topics include basic statistics, survey design, data analysis, and assessment issues. As an advanced statistics course, students will have the opportunity to apply concepts and gain direct research experience by conducting an original research project. PREREQS: AHE 611 [C]

## AHE 618. QUALITATIVE ANALYSIS IN

 EDUCATIONAL RESEARCH (3). Introduces learners to a variety of qualitative research perspectives and methodologies. Participants will examine these approaches by critiquing a scholarly article containing qualitative methods; formulating qualitative questions; writing a short proposal; collecting, coding, and analyzing data; and writing a final synthesis paper.
## AHE 621. LEADERSHIP IN STUDENT

SERVICES (3). Exploration of significant issues in design and delivery of student services in community college and higher education settings. Group discussion, model building, problem posing, issues analysis, and theory applications are employed. Students will reflect on current and future practices in student services, including emerging approaches to leadership.

AHE 638. HISTORY OF HIGHER EDUCATION (3). Surveys American higher education across 200-plus years of American history, with a specific emphasis in this section on the American community college.
AHE 640. HIGHER EDUCATION
ADMINISTRATION (3). Current leadership and management theories and models, systems of organization, patterns of internal and external governance, and issues in institutional planning and advancement in higher education.
AHE 643. ORGANIZATION THEORY-HIGHER EDUCATION (3). An introduction to organizational theory (OT). The texts allow us to explore how systems thinking is applied to our world, and how we can use it to better understand the nature of
human social engagement. Both OT and living systems theories are deeply associated with improvement and change theories in higher education settings and business
AHE 645. ETHICAL PRACTICE (3). Reviews major ethical theories with an emphasis on practical applications related to community college professional practice.

AHE 653. INSTRUCTIONAL LEADER I (3). A core course in the College of Education's doctoral program. Introduces major theories, theorists, and theoretical principles that will assist the learner in the understanding and development of systemic frameworks for instructional leadership.
AHE 654. INSTRUCTIONAL LEADER II (3). Focuses on the current realities of instructional leadership in community and technical colleges at present. PREREQS: AHE 653 [C]
AHE 672. RESEARCH PERSPECTIVES IN FOUR-YEAR HIGHER EDUCATION (3). An overview of the extensive research related to four-year colleges and universities, with an emphasis on the role of research in understanding and interpreting the nature of higher education. Explore research epistemologies, theories, and approaches related to social science and higher education, and how these ideas influence worldview and subsequent research. Identify a significant research topic/problem statement which will carry forward into the second year research courses in moving toward the dissertation topic for research related to four-year higher education.
AHE 673. RESEARCH INTERPRETATION IN FOUR-YEAR HIGHER EDUCATION (3). Critical analysis and interpretation of journal articles and scholarly research related to a problem statement in four-year higher education organization, learning, and/or leadership. Refinement of Sections 1 (Research Focus and Problem Statement) and II (Manuscript and Literature Review) of a Dissertation Proposal in four-year higher education. PREREQS: AHE 672 [C]
AHE 674. ADVANCED RESEARCH METHODS IN FOUR-YEAR HIGHER EDUCATION (3). Identification and evaluation of an appropriate quantitative or qualitative study focused on fouryear higher education. This includes a requirement that students demonstrate the ability to analyze and interpret data associated with their research question(s) as identified in their research proposal and that they outline the methodology that will be used to answer their research question(s)/ proposal. PREREQS: AHE 673 [C]
AHE 675. FOUR-YEAR HIGHER EDUCATION RESEARCH ISSUES (3). Finalize a dissertation proposal related to a research question on fouryear education institutions that reflects research epistomologies, theories and approaches. Develop a dissertation draft for review by the student's dissertation committee outlining: (a) Purpose of the student's study and its significance within the context of research on four-year colleges and universities, (b) Review of related literature on the specific topic of the dissertation, and (c) Design of the dissertation study. PREREQS: AHE 674 [C]
AHE 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
AHE 805. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.
AHE 808. WORKSHOP (1-4). This course is repeatable for a maximum of 16 credits.

## - COUNSELING COURSES

COUN 441. INTRODUCTION TO
PROFESSIONAL COUNSELING (3). Provides students with an overview of the counseling profession that includes the history and philosophical foundations of the profession and roles and functions of professional counselors. The course content will critically engage the privilege and responsibility of the counseling profession in
a multicultural society. PREREQS: Sophomore standing or higher.

COUN 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
COUN 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
COUN 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.
COUN 505. READING AND CONFERENCE
(1-3). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

COUN 506. PROJECTS (1-3). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
COUN 507. SEMINAR (1-3). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
COUN 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
COUN 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Admission to program. Departmental approval required.
COUN 510. INTERNSHIP (1-18). This course is repeatable for a maximum of 16 credits. PREREQS: By special permission and arrangement.
COUN 513. COUNSELING PRE-PRACTICUM
(3). Designed to develop competencies in basic counseling skills and processes. Self-critique, peer critique, and supervisor critique of videotaped interviews with peer clients. A pass requires at least This course is repeatable for a maximum of 6 credits. PREREQS: Admission to program.
COUN 514. PRACTICUM IN COUNSELING (1-3) Designed to develop competencies in basic skills, facilitative dimensions, and counseling process. Self-critique, peer-critique, and supervisor critique of videotaped interview. Written self-critique, oral case presentation and charting skills are learned. Practicals are graded on a pass/no pass credit basis only. A pass requires at least This course is repeatable for a maximum of 9 credits. PREREQS: Admission to program. Departmental approval required.
COUN 515. COUNSELING INTERNSHIP (1-15). The internship is the culminating field experience of the MS in Counseling program. It is designed to provide the student with an on-site placement in a public or private mental health or school setting that will create the necessary bridge between training and professionalism. Graded P/N. This course is repeatable for a maximum of 24 credits.

COUN 530. FUNDAMENTALS OF COUNSELING (3). A course designed for students planning on working in a human service profession, such as counseling, teaching, nursing, medicine, law. Exploration of basic helping processes appropriate in a variety of settings. Review of ethical standards of conduct. A variety of skills and techniques are demonstrated and practiced through videotape and role play.
COUN 531. DEVELOPMENTAL PERSPECTIVES IN COUNSELING (3). A study of affective, behavioral, cognitive, physical, and moral development for human growth and maturation. Theories of personality and learning that affect normal and non-normal development. Relationship of understanding human development to the counseling profession.
COUN 532. SOCIAL AND CULTURAL
PERSPECTIVES IN COUNSELING (3). Social and cultural factors effecting counseling. Includes studies of change, ethnic groups, subcultures, changing roles of women, sexism, urban and rural
societies, population patterns, cultural mores, use of leisure time, and differing life patterns. PREREQS: Admission to program.

## COUN 533. ADDICTIVE BEHAVIOR

COUNSELING (3). Techniques for addictive behavior assessment and counseling. Specific addictions covered include substance abuse, gambling, and eating disorders.
COUN 536. APPLIED
PSYCHOPHARMACOLOGY FOR
COUNSELORS (3). Acquaints counseling students with the fundamentals of psychotropic drugs. Basics of pharmacology, adverse effects, indications, and drug interactions will be discussed. Boundaries of practice and practical issues of assessment and referral will be covered. The overall aim of the course is to provide information about psychopharmacology to the non-medical mental health care provider so that she or he can be a more informed member of the mental health care team. This course does not purport to prepare the student to be any part of the pharmacological prescriptive process. That is the purview of the medically trained person.

## COUN 540. NEW VISION SCHOOL

COUNSELING: ACADEMIC ACHIEVEMENT (3).
Participants will be able to implement researchbased educational practices in: 1. Individual and group academic achievement counseling. 2. Consulting with parents, teachers, and schools regarding academic achievement. 3. Utilizing culturally competent practices in addressing academic achievement issues. 4. Applying the appropriate legal and ethical guidelines to work in the academic domain.
COUN 541. THE COUNSELING PROFESSION
(3). Provides the foundation for becoming a counselor and explores the psychological and philosophical ramifications of the counselor in a changing world. Topics will include values in counseling, ethical and legal issues in counseling, research in counseling, and maintaining a professional identity. PREREQS: Admission to program.

COUN 546. LEADERSHIP OF SCHOOL COUNSELING PROGRAMS (3). Designed to prepare school counselors to lead teams in the development and implementation of comprehensive school counseling programs. Principles of leadership, system change, and advocacy are introduced. State and National Comprehensive School Counseling models are examined. PREREQS: Admission to program.
COUN 548. SPECIAL EDUCATION ISSUES IN COUNSELING (3). Addresses various educational disability categories, the fundamentals of special education law, the special education assessment process, the special education definition of emotional/behavioral disorders, and the counselor's role in supporting children with special emotional needs. PREREQS: Admission to counselor education program.

COUN 550. FOUNDATIONS OF MENTAL HEALTH COUNSELING (3). Addresses the foundations of mental health counseling: (1) historical, philosophical, societal, cultural, economic, and political dimensions of, and current trends in, the mental health movement; (2) roles, functions, preparation standards, credentialing, licensure and professional identity of mental health counselors, (3) policies, laws, legislation, recognition, reimbursement, right-to-practice, and other issues relevant to mental health counseling.

## COUN 551. THEORY AND TECHNIQUES

OF COUNSELING I (3). Basic concepts and facilitative skills of helping relationships. Introduction and overview of counseling theories and their related processes and techniques. PREREQS: Admission to program.
COUN 552. THEORY AND TECHNIQUES OF COUNSELING II (3). Continued development of the theories and techniques of counseling including identification of the counseling process.

Emphasis on personality development and affective, behavioral and cognitive approaches. PREREQS: COUN 551

COUN 562. INTRODUCTION TO RESEARCH METHODS IN COUNSELING (3). An introductory course for master's level students. Explains basic evaluation, quantitative and qualitative research methods in the counseling profession; action research and the fundamental statistical procedures used in the interpretation and use of research studies.
COUN 567. APPRAISAL OF THE INDIVIDUAL
(3). Development of framework for understanding the individual; methods for data gathering and assessment; individual and group testing; case study approaches; observational, sociometric, and environmental procedures; study of individual differences. Ethnic, cultural, and sex factors are emphasized. PREREQS: Basic statistics course.
COUN 568. LIFESTYLE AND CAREER
DEVELOPMENT (3). Major theoretical approaches to career development; available resources for educational and occupational assessment; procedures to enhance career exploration, planning and placement. Emphasis is on the decision-making process and issues of career counseling with special populations.

COUN 571. GROUP COUNSELING PROCEDURES (3). A conceptual and experiential introduction to group dynamics. Group counseling approaches and models; issues of group leadership; styles of leadership and group facilitation skills. Consideration is given to group counseling goals, composition, phases and research. PREREQS: Admission to the program.
COUN 575. FAMILY COUNSELING (3). An overview of the major theoretical approaches to family counseling will be covered. Through the use of readings, demonstrations, and videos the student will become familiar with systems foundations, the history of family counseling, family roles, interaction patterns, and decisionmaking processes.
COUN 577. APPLIED PSYCHOPATHOLOGY AND PSYCHODIAGNOSTICS (3). Addresses the principles of diagnosis of psychopathology and the use of current diagnostic tools, including the current edition of the Diagnostic and Statistical Manual (DSM). Includes psychiatric terminology, treatment, current research, cross cultural impact, ethical implications, and goal planning related to mental health processes and case management. PREREQS: COUN 541 and COUN 551 and COUN 552.
COUN 578. CRISIS, TRAUMA, AND GRIEF
COUNSELING (3). The theory and pragmatics of crisis, trauma and grief counseling are addressed.
COUN 581. CROSS-CULTURAL COUNSELING (3). Cognitive and experimental study of social and psychological variables influencing the cross-cultural counseling relationship. Social and psychological experiences of selected subcultures Relevant assessment instruments and current literature, methods and outcome studies. PREREQS: Instructor approval required.
COUN 582. MULTICULTURAL COUNSELING II (3). Further explores multicultural counseling by studying in-depth the experience of specific student populations and their unique strengths and needs. Students will gain understanding of the specialized school programs and state and national regulations that support a variety of learners as well as the theories and research related to language acquisition to support ELL and bilingual students in the PK-12 system. Students will engage in authentic experiences and assignments to enrich their understanding of sub-populations of students and their families to enhance their cultural responsiveness with those specific groups of learners. PREREQS: COUN 581 [C]
COUN 591. STUDY OF SCHOOLS: K-12 (3).
Structured observation in selected K-12 school
sites. Total of 125 hours of observation, as required by the Oregon Teacher Standards and Practices Commission for persons without prior teaching experience. PREREQS: Admission to Track II program.
COUN 592. CLASSROOM INSTRUCTION FOR
COUNSELORS (3). 75 hours of supervised instruction in a public school setting. PREREQS: COUN 591.

COUN 595. GROUP COUNSELING II (3). Group counseling theories and pragmatics for clients with mental and emotional disorders.
COUN 597. INTRODUCTION TO COUNSELOR SUPERVISION (3). Introduction to the theory and pragmatics of counselor supervision.
COUN 598. COUNSELOR CONSULTATION
(3). Development of consultation skills as a supervisor and counselor educator. Consultation theory and practice are studied. Students practice consultation skills and receive feedback. PREREQS: Admission to master's program.
COUN 599. SPECIAL TOPICS (1-4). This course is repeatable for a maximum of 90 credits. PREREQS: Departmental approval required.
COUN 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
COUN 602. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

COUN 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.
COUN 605. READING AND CONFERENCE
(1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
COUN 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
COUN 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required. COUN 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
COUN 609. PRACTICUM IN COUNSELING (1-12). Specialized counseling experiences supervised by a professional. Emphasis is on development of advanced skills in counseling specific to a population. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
COUN 610. INTERNSHIP IN COUNSELING (1-15). Designed to provide experiences in development of teaching and supervision skills in preparation as a counselor educator and supervisor. This course is repeatable for a maximum of 15 credits. PREREQS: Departmental approval required.
COUN 612. RESEARCH PERSPECTIVES IN
EDUCATION (3). Research perspectives, how they are influenced by worldviews, and how these worldviews influence research. PREREQS: COUN 562 and an introductory statistics course (may be taken concurrently).
COUN 613. RESEARCH ANALYSIS AND
INTERPRETATION IN EDUCATION (3). Critical
analysis of scholarly studies in education from a variety of research perspectives. PREREQS: (TCE 612 or COUN 612) and an intermediate statistics course (may be taken concurrently).
COUN 614. ADVANCED RESEARCH METHODS IN EDUCATION (1-3). Selected topics in research methods as appropriate for research perspectives in education. This course is repeatable for a maximum of 6 credits. PREREQS: COUN 613

## COUN 616. UNIVERSITY LEVEL

INSTRUCTIONAL THEORY AND METHODS (3).
Addresses general university level instructional theory and methods as well as pedagogy specific to counselor education. PREREQS: Admission to PhD program in counseling or EdD in education.

## COUN 617. ADVANCED COUNSELOR

SUPERVISION (3). Advanced theory and techniques in counselor supervision. Pedagogical issues in training supervisors are addressed. PREREQS: Admission to PhD program in counseling.
COUN 618. PRACTICUM IN COUNSELING (1-12). Specialized counseling experiences supervised by a professional. Emphasis is on development of advanced skills in counseling specific to a population. This course is repeatable for a maximum of 16 credits. PREREQS:
Departmental approval required.
COUN 619. INTERNSHIP IN COUNSELING (1-12). Designed to provide experiences in development of teaching and supervision skills in preparation as a counselor educator and supervisor. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required
COUN 621. ADVANCED TOPICS IN EDUCATION (3). Advanced critical study of theory and research related to specific topics of counseling and counselor education. This course is repeatable for a maximum of 18 credits.

COUN 632. ADVANCED COUNSELING THEORY
(3). The goal of this course is to develop in each student an advanced level of understanding and skill in emergent counseling models.

COUN 633. ADVANCED COUNSELING
PRACTITIONER I (3). Assists the advanced counseling practitioner with their knowledge and skills in training, leadership, and writing.

## COUN 634. ADVANCED COUNSELING

PRACTITIONER II (3). Addresses the theory, science, pragmatics and pedagogy of evidencebased practices in professional counseling.
COUN 662. COUNSELOR EDUCATION QUANTITATIVE RESEARCH METHODS I (3). Part I of a three-course sequence designed to prepare students to meet the CACREP doctoral standards for quantitative research methods in counselor education. Topics addressed in course I include application of the following in counselor education research: (1) data scales and scale transformation, (2) frequency distributions and histograms, (3) measures of central position,
(4) variability, (5) characteristics of data curves (6) normality, (7) measures of variability, (8) the statistical hypothesis, (9) statistical errors (Type I/ Type II), (10) power analysis, and (11) statistical correlation. PREREQS: COUN 562.

## COUN 663. COUNSELOR EDUCATION

QUANTITATIVE RESEARCH METHODS II (3).
Part II of a three-part course sequence designed to prepare students to meet the CACREP doctoral standards for quantitative research methods in counselor education. Topics addressed in course I include application of the following in counselor education research: (1) a review of the dependent variable, normal curve, Type I and Type II errors, power analysis, and criteria for selecting statistical tools, (2) significance tests, including Chi-square t-test, one-factor analysis of variance, multiple comparison tests (L.S.D. and Tukey's HSD), twofactor analysis of variance, statistical interaction (ordinal and disordinal), linear regression, factor analysis, and analysis of covariance.

## COUN 664. COUNSELOR EDUCATION

QUANTITATIVE RESEARCH METHODS III (3). Part III of a three-course sequence designed to prepare students to meet the CACREP doctoral standards for quantitative research methods in counselor education. Topics addressed in course III include application of the following in counselor education research: (1) multiple regression, (2) path analysis, (3) confirmatory factor analysis,
analysis, (4) logistic regression, (5) reliability and generalizability theory, (6) cluster analysis, (7) structural equation modeling, and (8) single subject designs.
COUN 665. PUBLICATION METHODS IN COUNSELOR EDUCATION (3). Teaches doctoral students how to write theses, grant reports, peerreviewed journal articles, and textbook chapters.

## COUN 667. ADVANCED ASSESSMENT IN

COUNSELING (3). Explores current issues in the use of assessment in counseling, best practices in instrument development, and best practices in assessment pedagogy. PREREQS: Admission to PhD program in counselor education.
COUN 668. ADVANCED CAREER
DEVELOPMENT AND CONSULTATION IN
COUNSELING (3). An advanced course surveying past, current, and possible future technical and philosophical perspectives concerning career development and counseling. Issues in consultation, social change theory, and advocacy action planning are also reviewed in light of their impact on future counseling practitioners Pedagogical methods for presenting current issues in career development, consultation, social change theory and advocacy action planning are a major focus of the class. PREREQS: COUN 568 and COUN 598

COUN 671. ADVANCED GROUP COUNSELING
(3). Provides learning experiences beyond the entry level in group counseling. Theoretical and pedagogical innovations in this area are discussed. PREREQS: Admission to doctoral program in counseling.

COUN 681. ADVANCED DIVERSITY AND SOCIAL JUSTICE IN COUNSELOR EDUCATION (3). Addresses pedagogy relevant to multicultural, diversity, and social justice issues and the role of racial, ethnic, and cultural heritage, nationality, socioeconomic status, family structure, age, gender, sexual orientation, religious and spiritual beliefs, occupation, physical, and mental status, local, regional, national, international perspective, and issues of equity such as oppression, power and privilege in counselor education. PREREQS: COUN 581

COUN 696. COUNSELOR EDUCATION (3). Orientation to the profession of counselor education. Specific topics include: (1) history and organization of the profession, (2) program accreditation standards and practices, (3) instructional theory and methods relevant to counselor education, and (4) ethical and legal considerations in counselor education

COUN 697. COUNSELOR SUPERVISION (3). Practical experience for counseling professionals who have responsibility directing personal and professional development of counselors, promoting counselor competency, and developing and implementing counseling services and programs. Theoretical models of supervision are utilized to develop supervisor roles. PREREQS: Admission to doctoral program.

## - EDUCATION COURSES

ED 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
ED 216. *PURPOSE, STRUCTURE, AND FUNCTION OF EDUCATION IN A DEMOCRACY (3). Examines the system of education in a democratic society --past, present, and future. Historical, social, philosophical, political, legal, and economic foundations of education in Oregon, the USA, and other countries provide a framework for analyzing contemporary educational issues in schools, communities, and workplaces. (Bacc Core Course)

ED 219. CIVIL RIGHTS AND MULTICULTURAL ISSUES IN EDUCATION (3). Examination of the context of working with students, schools communities, and workplaces; the diversity of learning cultures (e.g., urban, suburban, rural) and
the diversity among learners within those different cultures; and the influence of culture on oness learning.

ED 253. LEARNING ACROSS THE LIFESPAN
(3). An exploration of how learning occurs at all ages from early childhood through adulthood. Covers major and emerging theories and styles, self-reflection on implications of how learning occurs for self and others, and the impact of these issues on the development and delivery of instruction.
ED 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
ED 309. FIELD PRACTICUM (3-6). Placement in either an elementary, middle or secondary school. To assist students to develop competencies in dealing with children or adolescents according to the individual major of the university student. This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.
ED 340. ^SUPPORTIVE DIFFERENTIATED ENVIRONMENTS (3). Addresses special abilities and needs of learners and helps prepare teachers to develop strategies and instructional practices for diverse learners and students with exceptionalities in a supportive and inclusive classroom. (Writing Intensive Course) PREREQS: Admission to the Education Double Degree Program.

ED 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ED 401. RESEARCH (1-16). This course
is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ED 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ED 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ED 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ED 406. PROJECTS (1-3). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ED 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ED 408. WORKSHOP (1-3). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ED 408H. WORKSHOP (1-3). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required. Honors College approval required.
ED 409. PRACTICUM/CLINICAL EXPERIENCE (1-16). This course is repeatable for a maximum of 16 credits.
ED 410. INTERNSHIP/WORK EXPERIENCE (1-18). This course is repeatable for a maximum of 18 credits.
ED 411. EDUCATIONAL PSYCHOLOGY,
LEARNING AND DEVELOPMENT (3). An
opportunity to begin the transition from student to teacher. Explores the relationship between human development and learning through the life cycle.
ED 412. LEARNING STYLES AND NEEDS IN ADOLESCENCE (2). Exploration of the particular learning styles and needs of the adolescent, major and emerging learning theories, individual learning styles including oness own learning styles, self-reflection on implications of how learning occurs, and the impact of these issues on the development and delivery of instruction.
ED 416. FOUNDATIONAL PERSPECTIVES
IN EDUCATION (2). Introduction to historical, philosophical, social, and political foundations of
education in America providing the framework for analysis of educational issues. PREREQS: Admission to the Professional Teacher Education Program or instructor approval required.

ED 420. CLASSROOM MANAGEMENT (3). Build knowledge and learn techniques for cultivating a positive learning environment and for managing classrooms. Learn through examining the literature and observing relevant learning environments and classrooms. Explore factors that influence student behavior, including those associated with social and/or multicultural student populations.

## ED 424. TEACHER AS REFLECTIVE

PRACTITIONER (2-3). Designed to help teachers make complex judgments based upon their knowledge and understanding of their students, the curriculum, and larger social and cultural issues through reflective practice. Problem solving related to teaching with strong focus on generating new knowledge about teaching, learning, and assessment. This course is repeatable for a maximum of 3 credits. PREREQS: ED 407 [D-] or TCE 407 [D-]
ED 425. CURRICULUM IMPLEMENTATION AND NSTRUCTIONAL STRATEGIES 7-12 (4). The relationship of theory to practice in teaching the content areas in grades 7-12 is examined. Genera curriculum trends as well as content selection in specific endorsement/subject areas are explored. This course is preparation for and is coordinated with part-time student teaching. PREREQS: 1) Admission into the Education Double Degree Program. 2) Student is entering part-time student teaching in high school or middle school.

ED 427. ALTERNATIVE ASSESSMENT FOR MIDDLE AND HIGH SCHOOL (2). Introduces methods of assessment that encourage effective learning. Students will design assessments aligned to national, state, and local standards as they prepare and implement a teaching unit n their practicum. Taken concurrently with TCE 410, Part-Time Student Teaching in Middle or High School. PREREQS: (ED 491 or ED 494) and admission to the Education Double Degree Program.

ED 429. CURRICULUM, INSTRUCTION, AND ASSESSMENT FOR CTE (3). Build knowledge and skills in curriculum design, instructional strategies, and assessment for successful teaching in a Career and Technical Education and other specialty areas: (a) Agriculture Food and Natural Resource Systems, (b) Arts, Information and Communications, (c) Business Management, (d) Health Sciences (e) Human Resources, (f) Industrial and Engineering Systems, (g) Family and Consumer Sciences, (h) Career Trades.

## ED 456. STRATEGIES FOR TEACHING

## ANGUAGE ARTS AND SOCIAL STUDIES

(3). Exploration of language arts and social studies programs (e.g., children's literature, writing, special needs, spelling, and cultural factors). Development of research-based teaching strategies and assessment. Focuses on the development of inquiry approaches that reflect interdisciplinary curriculum as well as subjectspecific pedagogy in the teaching of both social studies and language arts. PREREQS: (ED 216 and ED 219 and ED 253) and admission to the Education Double Degree Program.
ED 457. TEACHING ELEMENTARY
MATHEMATICS FOR UNDERSTANDING (3). Part of the Education Double Degree. Explores the teaching of mathematics in K-8 classrooms in a manner consistent with state and national standards. Students learn teaching strategies that incorporate the development of mathematical models and mental constructs. PREREQS: (MTH 211 and MTH 212 and MTH 390) and admission to the Elementary Double Degree Program.

ED 458. STRATEGIES FOR TEACHING WELLNESS AND FINE ARTS (2). Exploration of recent trends in wellness and fine arts. Development of research-based practices in the teaching of wellness and fine arts. Emphasizes
the value of developing holistic learners through effective wellness and fine arts programs. PREREQS: (ED 216 and ED 219 and ED 253) and admission to the Education Double Degree Program.
ED 472. FOUNDATIONS OF ESOL EDUCATION (3). Examines characteristics of English language earners (ELLs), key theories in language acquisition, the role of culture in language development, and instructional program models for ELLs, while considering implications for classroom instruction.
ED 473. INSTRUCTIONAL APPROACHES FOR
ESOL EDUCATION (3). Examines characteristics of standards-based content-area instruction for emergent bilinguals. Includes integration of content and language development, classroombased assessment, and use of technology to support student learning. PREREQS: ED 472 [C]
ED 476. PARTNERSHIPS AND IDEOLOGIES IN ESOL EDUCATION (3). Considers social and political issues pertaining to educating English language learners. Focuses on exploring multiple deologies in ESOL and building partnerships across schools, families, and communities. PREREQS: ED 472 [C]

## ED 479. LINGUISTICS FOR TEACHERS

(3). Explores linguistic categories: phonology, morphology, syntax, semantics, pragmatics, and discourse. Focuses on teaching implications-from psycholinguistic, sociolinguistic, and critical perspectives--for emergent bilingual students in P-12 contexts. PREREQS: ED 472 [C]

ED 480. TEACHING MATH TO SECONDARY LEARNERS IN CONTEXT (3). Enhance and reinforce mathematics embedded within occupational-specific curricula taught at the secondary level to prepare Career and Technical Education teachers for licensure.

## ED 481. READING AND WRITING FOR

SECONDARY LEARNERS IN CONTEXT (3).
Enhance and reinforce the authentic reading and writing embedded within occupationally relevant materials to prepare Career and Technical Education teachers for licensure.
ED 483. DEVELOPMENTAL READING (3). Development of pedagogy in teaching of reading to elementary-aged students, including teaching of vocabulary, comprehension, phonics, fluency and motivation to read. Use of children’s literature, assessment approaches, and special needs students are also addressed. This is a PTCE course in the elementary Double Degree Program. PREREQS: Admission to the Education Double Degree Program required.
ED 484. INTRODUCTION TO CAREER AND TECHNICAL EDUCATION (3). A study of the history of Career and Technical Education, the impact of the educational reform on Career and Technical Education and workforce development. Topics include leaders in vocational education; legislative initiatives, social issues, and organizations involved in and impacting Career and Technical Education.

## ED 491. CONTENT STANDARDS AND

 CURRICULUM DEVELOPMENT FOR MID LEVEL (3). Exploration of content standards, materials, and methods appropriate for middle school students. Develops skills in work sample methodology through the design of effective instruction, integrating a variety of methods with existing understandings of content area, how people learn, and the diverse communities in which they work. PREREQS: Admission to the Education Double Degree Program required.ED 493. READING, LITERATURE, AND LANGUAGE DEVELOPMENT IN THE CONTENT (2). Examination of reading, literature, and language development methods that can be used by middle school and high school teachers to support students' learning of content area information. Development of specific reading strategies in content areas. PREREQS: Admission
to the Education Double Degree Program required.

ED 494. CONTENT STANDARDS AND CURRICULUM DEVELOPMENT FOR HIGH SCHOOL (3). Exploration of content standards, materials and methods appropriate for high school students. Develops skills in work sample methodology through the design of effective instruction, integrating a variety of methods with existing understandings of content area, how people learn, and the diverse communities in which they work. PREREQS: Admission to the Education Double Degree Program required.

ED 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ED 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ED 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ED 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.
ED 505. READING \& CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ED 506. PROJECTS (1-3). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ED 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ED 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ED 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.
ED 510. INTERNSHIP (1-18). By special permission and arrangement. This course is repeatable for a maximum of 40 credits.

ED 512. PSYCHOLOGY OF THE ADOLESCENT (3). Examines research from psychology, human development, and neuroscience to provide a holistic understanding of adolescents and learning with a focus on the middle/secondary student. nvestigates the influence of family, neighborhood, peer, and school contexts on brain development, dentity formation, and the challenges and opportunities of adolescence.
ED 513. LEARNING ENVIRONMENTS I:
FOSTERING CLASS ENGAGEMENT (3).
Creating a positive culture in the classroom, managing student behavior, and engaging students in critical learning discourse are challenges faced by all educators. Students will learn to develop the components of a productive and safe learning environment.
ED 514. LEARNING ENVIRONMENTS II:
ADVANCING EVERY STUDENT (2). Students will expand their knowledge about constructing a positive K-12 classroom environment to a productive learning environment accommodated to fit the needs of a diversified student population. PREREQS: ED 513 [B]
ED 515. LEARNING ENVIRONMENTS III: CULTURES AND COMMUNITIES (2). The third in a series of courses to assist the Teacher candidate in developing a classroom culture of learning that challenges every student to succeed and thrive. Teacher candidates will understand the important role that culture and community play in the teaching and learning process, and develop culturally responsive teaching practices. PREREQS: ED 513 [B] and ED 514 [B]
ED 517. ACADEMIC WRITING FOR MASTER'S STUDENTS (1). A writing refresher that addresses academic voice, style, tone, construction, conventions, and writing style appropriate for
master>s-level research papers and capstones This course is repeatable for a maximum of 2 credits.

## ED 518. PROFESSIONAL PRACTICE IN THE

 TEACHING COMMUNITY (2). The professional themes of communication, collaboration, reflection, knowledge of learners, professional ethics, social justice and cultural understanding will be explored and applied to teaching contexts, behaviors, dispositions, and actions.
## ED 519. CAPSTONE: TEACHING AS A

PROFESSION (3). Capstone course for the MAT in which teacher candidates further develop their educational philosophy and analyze their professional growth in alignment with national standards. PREREQS: Acceptance into the MAT program, permission of department.
ED 520. CLASSROOM MANAGEMENT AND DISCIPLINE K-12 (3). Knowledge of discipline and classroom management techniques through examination of the literature and school observations. Explore factors that influence behavior problems, including those associated with social and/or multicultural students populations
ED 522. RACIAL AND CULTURAL HARMONY IN THE K-12 CLASSROOM (3). An overview of many issues relevant to the increasingly diverse student population in public schools today. It explores how a culturally competent perspective can be incorporated into curriculum design, teaching strategies, and interactions with students and parents. The course is both self-directed and communal, requiring students to respond to the materials and each other, yet at their own pace.

## ED 524.TEACHER AS REFLECTIVE

PRACTITIONER (2-3). Designed to help teachers make complex judgements based upon their knowledge and understanding of their students, the curriculum, and larger social and cultural issues through reflective practice. Problem solving related to teaching with strong focus on generating new knowledge about teaching, learning, and assessment.
ED 528. ASSESSMENT FOR LEARNING (3).
Applies the formative learning cycle to through development of an assessment plan. Examines various formative assessment practices that promote higher order thinking and empower students to show evidence of their learning through self-assessment and feedback.
ED 531. SCIENCE METHODS I: INQUIRY AND THE NATURE OF SCIENCE (4). Introduction to (1) fundamentals of science teaching including the nature of science and inquiry, (2) designing instructional sequences and selecting curriculum resources aligned to state science standards and research-based learning progressions, (3) effective teaching moves, (4) supporting acquisition of academic language, and (5) productive and safe science learning environments
ED 532. SCIENCE METHODS II: SUPPORTING STUDENTS' CONCEPTUAL CHANGE (4). Development of skill in identifying and addressing misconceptions or naive conceptions as part of the individualized conceptual change process. Integration of technology tools for instruction and assessment. Development of high-leverage science teaching practices with a focus on enhancing classroom discourse and evidencebased argumentation with a survey of science curriculum models. PREREQS: ED 531 [B]
ED 533. SCIENCE METHODS III: SCIENCE FOR ALL LEARNERS (4). Teaching science as a community of practice means addressing the needs of all learners, particularly those underrepresented in science. Uses technology to enhance high-leverage teaching practices and practices safe and effective laboratory teaching methods. Explores contextualized and interdisciplinary approaches to science education. PREREQS: ED 531 [B] and ED 532 [B]

ED 537. MATHEMATICAL METHODS I: FOUNDATIONS OF NUMERICAL THOUGHT (4). Introduction to the fundamentals of mathematics teaching including the nature and goals of mathematical thinking, numeracy, inquiry, and related academic language of mathematics. Students are introduced to the high highleverage practices of ambitious mathematics teaching, designing instructional sequences and selecting curriculum resources aligned to state science standards and research-based learning progressions.

ED 538. MATHEMATICS METHODS II: CYCLES OF ENACTMENT (4). Teacher candidates create instructional units based on student knowledge and skill while attending to needed accommodations. Designed to help the teacher candidate select or modify instructional materials based on student prior knowledge, experience, and interests; make accommodations for students and provide for multiple representations across a unit of instruction. PREREQS: ED 537 [B]

## ED 539. MATHEMATICAL METHODS III:

MATHEMATICS FOR EVERY LEARNER (4).
Teacher candidates will develop practices that support all students, regardless of background or ability. The teacher candidate will design a unit of instruction with complex learning goals that are cross- and multi-disciplinary, draw on multiple perspectives, and invoke higher order thinking and communication skills. PREREQS: ED 537 [B] and ED 538 [B]

ED 542. TEACHER LEADERSHIP (3). Examines current conceptions, research, and philosophies of educational leadership. The goal is to promote teacher-leadership in effective teaching and learning and influence in local educational policies and programs.

ED 544. TEACHING CRITICAL LITERACY
(3). Examines literacy curriculum and teaching practices in various real world contexts, such as critical literacy, supporting second language earners, argumentation, reading engagement and social justice. While still addressing technical dimensions of literacy education, students write critical literacy curricula, take turns leading critical book discussions, and learn to critique text bias. Course challenges students to develop critical consciousness as teachers of literacy in a democracy.
ED 548. STUDENTS WITH SPECIAL NEEDS (2).
Explores the broad range of special needs that are represented in today's classrooms. Addresses various types and characteristics of disabilities as well as collaborating with specialists and families with children with special needs. Discussion strategies and instructional practices to enhance the learning of diverse students in the inclusive classroom.

## ED 549. TEACHING IN A DIFFERENTIATED

 AND DIVERSE CLASSROOM (3). Addresses the philosophical framework, strategies, and assessment of differentiation to meet the needs of all students in the classroom.
## ED 550. THE EFFECTIVE TEACHING CYCLE

 I: FOUNDATIONS AND PLANNING (4). The first of three courses examining the iterative cycle of curriculum planning, instruction, and assessment. An introduction to learning theory and the relationship between teaching and learning provides the foundation. An overview of the complete teaching cycle leads to a focus on curriculum planning based on state standards.ED 551. THE EFFECTIVE TEACHING CYCLE II: ASSESSMENT (4). The second of three courses examining the iterative cycle of curriculum planning, instruction, and assessment. Learning in this class will concentrate on assessment for and of learning and its importance to student engagement and advancement. PREREQS: ED 550 [B]

ED 552. THE EFFECTIVE TEACHING CYCLE III: DATA AND DIFFERENTIATION (3). The third of three courses examining the iterative cycle of curriculum planning, instruction, and assessment. The focus of this course is on data analysis to support whole class, group, and individual differentiated instruction and learning.

ED 559. STRATEGIES FOR TEACHING
HUMANITIES (3). Pedagogical approaches to teaching language arts and social studies in K-5, multiple subject classrooms. Focus on developing research-based daily lessons and unit plans that integrate curriculum, support national standards, and use an inquiry approach for student learning

ED 561. ACTION RESEARCH (1-3). Examines action research as a vehicle for teacher and administrator professional development. Specific topics of study include problem posing, data collection and analysis, theory building, and writing the report. This course is repeatable for a maximum of 3 credits.

## ED 562. INTRODUCTION TO EDUCATIONAL

RESEARCH (3). Explores the purpose and use of social science research in education with emphasis on action and applied research. Designed to help teachers and informal educators to critically read, interpret, and apply research findings to the diverse contexts in which they work, and to become informed consumers of educational research.

## ED 564. ADVANCED INSTRUCTIONAL

STRATEGIES (3). Addresses research-based
teaching strategies and collaboration with colleagues to improve instruction for all students in the standards-based classroom.

## ED 565. ELEMENTARY METHODS

LITERACY (4). Understanding the theoretical and developmental foundations for literacy programs K-9; targeted reading, writing, listening, vocabulary, and speaking skill development and needs assessments; organizational strategies for teaching literacy; and the integration of cultural diversity and social justice into literacy learning

## ED 566. ELEMENTARY METHODS:

MATHEMATICS (4). Exploration of the teaching of early childhood/elementary school mathematics with emphases on problem solving, connections, representation, communication, reasoning and proof. Course will incorporate the development of mathematical models and mental constructs. Research-based, developmentally appropriate and culturally relevant practices will be incorporated into lessons.

ED 567. ELEMENTARY METHODS: NATURAL AND SOCIAL SCIENCE (4). Inquiry approaches to the teaching and learning of the natural and social sciences are used to explore the structure of the disciplines and support the creation of instructional units that develop disciplinary knowledge and practices/skills while highlighting cross-cutting themes. Scientific literacy and civic competence are emphasized.
ED 572. FOUNDATIONS OF ESOL EDUCATION (3). Examines characteristics of English language learners (ELLs), key theories in language acquisition, the role of culture in language development, and instructional program models for ELLs, while considering implications for classroom instruction.
ED 573. INSTRUCTIONAL APPROACHES FOR
ESOL EDUCATION (3). Examines characteristics of standards-based content-area instruction for emergent bilinguals. Includes integration of content and language development, classroombased assessment, and use of technology to support student learning. PREREQS: ED 572 [C]
ED 576. PARTNERSHIPS AND IDEOLOGIES IN ESOL EDUCATION (3). Considers social and political issues pertaining to educating English language learners. Focuses on exploring multiple ideologies in ESOL and building partnerships across schools, families, and communities.
PREREQS: ED 572 [C]

## ED 579. LINGUISTICS FOR TEACHERS

(3). Explores linguistic categories: phonology, morphology, syntax, semantics, pragmatics, and discourse. Focuses on teaching implications-from psycholinguistic, sociolinguistic, and critical perspectives--for emergent bilingual students in P-12 contexts. PREREQS: ED 572 [C]

ED 582. STRATEGIES FOR DEVELOPING LITERACY (3). Focus on teaching of reading to K-5 students. Instruction in pedagogical techniques and assessment on teaching vocabulary, comprehension, phonics and fluency. Strategies related to motivation to read, integration of cultural diversity and social justice and the needs of diverse learners in literacy development are also addressed.
ED 584. LANGUAGE ARTS METHODS I: ADOLESCENT LITERACY (4). Teaching language arts to middle and high school students requires a deep understanding of how reading and writing to learn occur. Guided by current professional and state literacy standards, students will learn to assess and advance adolescent reading comprehension, and writing and speaking skills.

ED 585. LANGUAGE ARTS METHODS II: STRATEGIES FOR GRADES 5-12 (4). Explores the integration and implementation of curriculum and high leverage instructional practices that respond to the learning needs of adolescents in language arts classrooms. Examines the importance of metacognitive strategies in the teaching of content-related skills and concepts, and how to create school cultures that support high achievement.
ED 586. LANGUAGE ARTS METHODS III: CURRICULUM AND THE PROFESSION (4).
Learning to teach language arts as a community of practice including the development of highleverage instructional practices. Focus on enhancing classroom discourse and building student comprehension, meaning construction interpretation, and response to complex text. Integration of technology tools for instruction and assessment. PREREQS: ED 584 [B] and ED 585 [B]
ED 587. SOCIAL STUDIES METHODS I:
ADOLESCENT LITERACY (4). Teaching social studies to middle and high school students requires a deep understanding of how reading and writing to learn occur. Guided by current professional and state literacy standards, students will learn to assess and advance adolescent content reading comprehension, writing and speaking skills.

ED 588. SOCIAL STUDIES METHODS II: STRATEGIES FOR GRADES 5-12 (4). Explores the integration and implementation of curriculum and high leverage instructional practices that respond to the learning needs of adolescents in secondary social studies classrooms. Examines the importance of metacognitive strategies in the teaching of content-related skills and concepts, and how to create school cultures that support high achievement.
ED 589. SOCIAL STUDIES METHODS III: CURRICULUM AND THE PROFESSION (4). Learning to teach social studies as a community of practice including the development of highleverage instructional practices. Focus on curriculum strategies that provide opportunities for learners to develop and use facts, concepts, interpretations, and analyses to build and support arguments. Integration of technology tools for instruction and assessment. PREREQS: ED 587 [B] and ED 588 [B]
ED 590. SOCIAL JUSTICE IN EDUCATION (3). Examines social, environmental and ecological justice in educational settings focusing on bias critique in text, development of social justice curriculum, and creation of an action related to a social justice issue. The interconnectedness of social and ecological justice is also explored. Various international justice standards are used to
ground students' work in curriculum development.
ED 592. TECHNOLOGY TOOLS FOR TEACHING
(2). Exploration of how digital tools can be used in instruction, assessment, communication, and collaboration in educational settings to bring vibrant energy into student learning and engagement.
ED 593. READING AND WRITING IN THE MIDDLE AND SECONDARY SCHOOL (3).
Reading and writing methods that can be used by middle/secondary school teachers to individualize instruction, correct basic reading and writing skills in content area; promote learning and the use of reading materials as supplementary teaching materials.

ED 594. DEVELOPMENT AND
DIFFERENTIATION K-12 (4). Issues of K-12 learner socio/emotional/cognitive development across multiple areas of learning and motivation theory. The role of culture, language, and group dentification in learning will be examined and applied to the consideration of differentiated instructional strategies.
ED 596. TECHNOLOGY FOR EDUCATORS (3). Explore the integration of current and emerging technologies into $\mathrm{K}-12$ content areas by engaging students in real world issues and learning in a social context. Integrate technologies that promote critical thinking, communication, collaboration, and creativity. Discuss technologies in terms of cultural linguistic diversity. Gain transferrable skills. Taught via Ecampus only. PREREQS: Basic computer literacy.

ED 597. K-5 STEM INTEGRATION IN DIVERSE
CLASSROOMS (2). An investigation of theory and practice related to science teaching and learning in diverse classrooms through integration of science, math, literacy and social studies.
ED 599. SPECIAL TOPICS (1-4). This course is repeatable for a maximum of 90 credits. PREREQS: Departmental approval required.
ED 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ED 602. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ED 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.
ED 605. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ED 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ED 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ED 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ED 609. PRACTICUM/CLINICAL EXPERIENCE (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ED 610. INTERNSHIP (1-15). This course is repeatable for a maximum of 15 credits. PREREQS: Departmental approval required.
ED 621. SELECTED TOPICS IN EDUCATION (3). This course is repeatable for a maximum of 18 credits.
ED 650. EQUITY AND EDUCATION POLICY (3). Introduces students to key educational policy debates, with a particular focus on attempts to use education policy to advance equity. Examines different visions for the purpose of education and different definitions of equity. Explores the roles of
different actors within education policy, including legislators, courts, and non-governmental organizations. Provides students with frameworks for analyzing education policy, which students will then apply to analyze a current policy debate that is of interest to them.

ED 651. RESEARCH BILINGUALISM AND
MULTILINGUALISM (3). Develops critical research skills to create new knowledge in the field of multilingualism. Examines interdisciplinary and intersectional perspectives to consider notions of identity among multilinguals and explore the historical trajectory of bilingualism and multilingualism research. Provides a broad understanding of the theoretical and methodological frameworks used to study bilingualism and multilingualism in globalized contexts.

ED 652. ETHNOGRAPHIC METHODS (3). As an advanced qualitative method class, this course introduces theory and ethnographic research methods by presenting the various ways by which socio-cultural anthropologists observe and analyze phenomena, groups or individuals in everyday language and social practices in their local and global contexts, taking into account issues of language, equity and educational policy. Students will carry out an ethnographic research project of a particular phenomenon they wish to earn more about. PREREQS: SED 622 [B]

ED 653. DISCOURSE, IDENTITY AND
EDUCATION (3). Builds a foundation in discourse theory and its applications to identity and education. Includes empirical studies that draw from particular lenses of discourse theory, exemplifying how these scholars organize the design, implementation, and discussion of research around discourse theory. Develops knowledge of discourse theory to propose a study that could be conducted drawing from discourse analytic perspectives.
ED 808. WORKSHOP (1-4). This course is repeatable for a maximum of 16 credits.

## - SCIENCE AND MATHEMATICS EDUCATION COURSES

SED 321. TEACHING AND LEARNING WITH COMPUTER-BASED TECHNOLOGIES (3). Explore teaching that promotes the use of computer-based technologies as an integral component for learning within the context of academic subject matter. PREREQS: Basic computer and computer application knowledge.

SED 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

SED 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.
SED 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
SED 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.
SED 409. FIELD PRACTICUM: SCIENCE AND MATHEMATICS (3). Placement in middle or high school (grades 7-12) to assist in developing competencies with adolescents in science/ mathematics classes. This course is repeatable for a maximum of 18 credits.

## SED 410. PROFESSIONAL INTERNSHIP:

## SCIENCE OR MATHEMATICS EDUCATION

(1-16). Supervised teaching experience at the elementary, middle or high school level; students experience general classroom and professional responsibilities common to the regular science or mathematics teacher. This course is repeatable for a maximum of 16 credits.
SED 412. TECHNOLOGY FOUNDATIONS FOR TEACHING MATH AND SCIENCE (3). Integration of instructional technologies with other strategies to teach math and science in elementary, middle, and secondary schools in the 21st century.

SED 413. INQUIRY IN SCIENCE AND SCIENCE EDUCATION (3). Investigation of inquiry and the nature of inquiry in science as it relates to science education. Students will examine issues relating to integrating scientific understandings and practice into K-12 instruction.

## SED 414. INQUIRY IN MATHEMATICS

AND MATHEMATICS EDUCATION (3).
Investigation of mathematics as it relates to mathematics education. Students will examine issues related to integrating mathematical understanding, mathematics standards/curricula, and mathematics-specific strategies in K-12 instruction. Lec/lab.

## SED 416. INQUIRY IN SCIENCE AND

MATHEMATICS EDUCATION (3). Investigation of inquiry and the nature of inquiry in mathematics and science as it relates to education. Students will examine issue relating to integrating mathematical and scientific understandings and practices into K-12 education.

SED 417. QUANTITATIVE REASONING IN STEM (3). Provides students an overview of the content requirements in the Common Core Standards for Mathematics and the teaching practices that are central to those standards with a focus on the role of quantitative reasoning. Students experience content lessons and lessons focused on supporting students in developing understanding of that content. PREREQS: Participants should be a prospective pre-service teacher at any level, a K-12 teacher, a free-choice learning educator, or have access to an educational setting.

## SED 419. TEACHING MATHEMATICAL

MODELING IN STEM (3). Provides students an overview of the content requirements in the Common Core Standards for Mathematics and the teaching practices that are central to those standards with a focus on the role of mathematica modeling. Students experience content lessons and lessons focused on supporting students in developing understanding of that content. PREREQS: Participants should be a prospective pre-service teacher at any level, a K-12 teacher, free-choice learning educator or have access to an educational setting.

## SED 431. OVERVIEW OF FREE-CHOICE

LEARNING (3). Examines learning that occurs when people believe they have choices over what and how they learn, how much time they spend learning, and what their sources of information are. Covers current research on learning in museums, aquariums, zoos, botanical gardens, science centers, after-school programs, media and apprenticeships.
SED 435. COMMUNICATING OCEAN SCIENCES TO INFORMAL AUDIENCES (3). For students interested in improving their ability to communicate their scientific knowledge by helping general public and student audiences learn about ocean sciences in a wide variety of learning settings. Combines instruction in inquiry-based teaching methods and learning theory with work in student's local informal learning settings like museums, zoos, aquariums and libraries.
SED 459. SCIENCE AND THE NATURE OF INQUIRY (3). Focuses on inquiry approaches to the teaching and learning of science. Development of teaching strategies including materials and resources for teaching science using an inquiry approach as well as more teacher-directed approaches.

## SED 473. SCIENCE PEDAGOGY AND

TECHNOLOGY I (4). Development of
pedagogical content knowledge in grades 6-12 science instruction: learning theory, nature of science, technology integration, and reform recommendations. Lec/lab/rec.

## SED 474. MATHEMATICS PEDAGOGY

AND TECHNOLOGY I (4). Development of pedagogical content knowledge in grades 6-12 mathematics instruction: learning theory, nature of mathematics, technology integration, and reform
recommendations. PREREQS: SED Professional Teacher Licensure Cohort Only. Does not meet Graduate School's stand-alone requirement. Investigation of mathematics as it relates to mathematics education must be completed prior to SED 574. SED 414 is recommended; please speak to the program coordinator. SED 474 Restrictions: Prereq course SED 414 required prior to SED 474.
SED 476. MATHEMATICS PEDAGOGY AND TECHNOLOGY II (4). Development of additional pedagogical content knowledge in grades
6-12; stress on dominant themes of the school mathematics curriculum including problem solving, reasoning, communication, and connections as well as the integration of technology into the mathematics classroom. PREREQS: SED 474 [D-] and Education Double Degree only

## SED 477. SCIENCE PEDAGOGY AND

TECHNOLOGY II (4). Development of pedagogical content knowledge in grades 6-12; science instruction; learning theory, nature of science, technology integration, and reform recommendations. PREREQS: SED 473 [C] and Professional Teacher Education Master's Program.
sed 491. SCIENCE/MATH CONTENT
STANDARDS AND CURRICULUM
DEVELOPMENT FOR MIDDLE SCHOOL (3).
Exploration of curriculum development and teaching strategies appropriate for middle school students as well as a range of organizational structures to effectively organize middle school students for educational experiences. Explore how curriculum, instruction, and assessment are interrelated and how theory and practice must be combined to make appropriate decisions. Development of skills in designing effective curriculum and instruction integrating these methods with existing understandings of their content area, how people learn, and the diverse communities in which they work.
SED 494. SCIENCE/MATH CONTENT STANDARDS AND CURRICULUM DEVELOPMENT FOR HIGH SCHOOL (3).
Exploration of curriculum development and teaching strategies appropriate for high school students as well as a range of organizational structures to effectively organize high school students for educational experiences. Explore how curriculum, instruction, and assessment are interrelated and how theory and practice must be combined to make appropriate decisions. Development of skills in designing effective curriculum and instruction integrating these methods with existing understandings of their content area, how people learn, and the diverse communities in which they work.
SED 499. SPECIAL TOPICS (3). This course is repeatable for a maximum of 18 credits.
SED 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
SED 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.
SED 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.

SED 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

SED 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

SED 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.
SED 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.
SED 510. PROFESSIONAL INTERNSHIP: SCIENCE OR MATHEMATICS EDUCATION
(1-16). Supervised teaching experience at the elementary, middle or high school level; students experience general classroom and professional responsibilities common to the regular science or mathematics teacher. This course is repeatable for

## a maximum of 16 credits.

SED 511. ANALYSIS OF CLASSROOMS I (3).
Observation and analysis of the complex science/ mathematics classroom (grades 3-12) and school culture and their impact on student learning.
SED 512. TECHNOLOGY FOUNDATIONS FOR TEACHING MATH AND SCIENCE (3). Integration of instructional technologies with other strategies to teach math and science in elementary, middle, and secondary schools in the 21st century.

SED 513. INQUIRY IN SCIENCE AND SCIENCE
EDUCATION (3). Investigation of inquiry and the nature of inquiry in science as it relates to science education. Students will examine issues relating to integrating scientific understandings and practice into K-12 instruction.

## SED 514. INQUIRY IN MATHEMATICS

AND MATHEMATICS EDUCATION (3).
Investigation of mathematics as it relates to mathematics education. Students will examine issues related to integrating mathematical understanding, mathematics standards/curricula, and mathematics-specific strategies in K-12 instruction. Lec/lab.

SED 516. INQUIRY IN SCIENCE AND
MATHEMATICS EDUCATION (3). Investigation of inquiry and the nature of inquiry in mathematics and science as it relates to education. Students will examine issue relating to integrating mathematical and scientific understandings and practices into K-12 education.

SED 517. QUANTITATIVE REASONING IN STEM (3). Provides students an overview of the content requirements in the Common Core Standards for Mathematics and the teaching practices that are central to those standards with a focus on the role of quantitative reasoning. Students experience content lessons and lessons focused on supporting students in developing understanding of that content. PREREQS: Participants should be a prospective pre-service teacher at any level, a K-12 teacher, a free-choice learning educator, or have access to an educational setting.

## SED 519. TEACHING MATHEMATICAL

MODELING IN STEM (3). Provides students an overview of the content requirements in the Common Core Standards for Mathematics and the teaching practices that are central to those standards with a focus on the role of mathematical modeling. Students experience content lessons and lessons focused on supporting students in developing understanding of that content. PREREQS: Participants should be a prospective pre-service teacher at any level, a K-12 teacher, free-choice learning educator or have access to an educational setting.
SED 520. TECHNOLOGY FOR MATH AND
SCIENCE EDUCATION (3). Explore current and emerging technologies applied to math and science learning that promote critical thinking, communication, collaboration, and creativity. Gain technology skills and resources that can be transferred to formal and informal learning environments. PREREQS: Basic computer literacy.

## SED 521. TEACHING MATH AND SCIENCE

## WITH DIGITAL AND VIDEO TECHNOLOGIES

(3). Examine and incorporate digital image and video technologies to support learners in becoming critical thinkers and creative producers of their knowledge and understanding in mathematics/science. PREREQS: Participants must be teachers of mathematics/science in K-12 formal or informal learning environments.

SED 522. DYNAMIC SPREADSHEETS AS LEARNING TOOLS IN SCIENCE AND MATH (3).
Provides opportunities to explore the algebraic reasoning involved when engaging students in learning with spreadsheets in science and mathematics classes. Students redesign units of instruction for grades 3-12 that integrate learning about designing dynamic and dependable spreadsheets as learning tools in science and mathematics. Explore how dynamic spreadsheets
encourage students to extend problems and considering alternative questions.

SED 523. SCIENCE/MATHEMATICS STRATEGIES AND ORGANIZATIONAL
STRUCTURES (4). Builds on content developed in SED 491. Students learn new instructional skills and deepen abilities with basic teaching skills from SED 491. Students develop in-depth lesson plans and coordinate instructional and assessment plans supporting a unit of science or mathematics content for middle level students. PREREQS: SED 491 and provisional admission to Professional Education Program
SED 525. SCIENCE/MATHEMATICS
CURRICULUM IMPLEMENTATION AND INSTRUCTIONAL STRATEGIES FOR HIGH
SCHOOL (4). Exploration of science/mathematics teaching strategies appropriate for high school science/mathematics learners as well as a range of organizational structures to effectively organize high school science/mathematics students for educational experiences. PREREQS: SED 494 and provisional admission to Professional Education Program
SED 531. OVERVIEW OF FREE-CHOICE LEARNING (3). Examines learning that occurs when people believe they have choices over what and how they learn, how much time they spend learning, and what their sources of information are. Covers current research on learning in museums, aquariums, zoos, botanical gardens, science centers, after-school programs, media and apprenticeships.

## SED 535. COMMUNICATING OCEAN

SCIENCES TO INFORMAL AUDIENCES (3). For students interested in improving their ability to communicate their scientific knowledge by helping general public and student audiences learn about ocean sciences in a wide variety of learning settings. Combines instruction in inquiry-based teaching methods and learning theory with work in studentss local informal learning settings like museums, zoos, aquariums and libraries.

SED 540. FIELD AND ONLINE LEARNING OF GEOSCIENCE CONCEPTS (3). Science content and pedagogy in learning and teaching standardsbased geologic content for K -12 teachers. This is a hybrid class combining distance learning and at least one field research trip. PREREQS: Participants should be either a K-12 teacher or a free-choice learning educator. Participants should be prepared to camp during field trips and able to walk moderate distances that may involve offtrail maneuvering. Participants should be able to integrate graphics and images into different media (e.g., PowerPoint, Prezi, video), acquire images from web pages and use Google Earth. Some instruction in using Google Earth will be provided.
SED 541. WEATHER CONCEPTS FOR SCIENCE AND MATH TEACHING (3). Science content and pedagogy in learning and teaching basic weather concepts. PREREQS: Participants should be either a K-12 teacher, free-choice learning educator or have access to an educational setting.
SED 550. HIGH QUALITY SCIENCE AND MATHEMATICS INSTRUCTION (3). Explores high quality science and mathematics instruction to prepare professional teachers in science and mathematics. Develops skills in highleverage instructional practices and reviews research literature that supports these practices. Investigates social justice issues related to systems of schooling in the United States.

## SED 552. MATHEMATICS METHODS:

PRACTICUM I (3). Theoretical background, practical knowledge, and skills for teaching in mathematics classrooms (grades 3-12). Instructional methods/modes, classroom management, contemporary curriculum goals and instructional planning.

SED 553. SCIENCE METHODS/PRACTICUM I
(3). Theoretical background, practical knowledge, and skills for teaching in science classrooms
grades 3-12). Instructional methods/modes, classroom management, contemporary curriculum goals and instructional planning.

## SED 564. ENGINEERING AND SCIENCE IN

 THE LIVES OF STUDENTS (3). Explore the use of construction engineering as a vehicle to make science and math more relevant and useful for the everyday life of students. PREREQS: Assignments assume the participant is a K -12 teacher, freechoice learning educator (in museum, science camp, etc.) and has access to an educational setting.
## SED 565. INQUIRING INTO SCIENCE AND

 MATHEMATICS LEARNING AND TEACHING (3).Participants prepare to lead instructional changes in their communities by planning inquiries into the learning they foster in their own contexts, critiquing relevant literature, making connections to national standards, and constructing a documentary Web site or writing a journal article that reports upon ways to foster science and/or mathematics learning. PREREQS: Student must be a licensed teacher, enrolled in a teacher education program, or have experience in working with youth in an educational setting.

SED 566. FOSTERING REFLECTIVE DISCOURSE IN SCIENCE AND MATH CONTEXTS (3). Examines ways of speaking that foster learning in science and mathematics contexts such as K -16 classrooms and free-choice learning settings (i.e., museums, zoos, science camps, etc.). Assignments assume the participant is a K -12 teacher or free-choice learning educator enrolled in a graduate licensure program or has access to an educational setting.
SED 568. ENHANCING LITERACY LEARNING IN SCIENCE AND MATH CONTEXTS (3). Examining ways of enhancing literacy learning will include analyzing research on learning to speak clearly, listen closely, write coherently, read with comprehension, and make and critique media resources competently in science and mathematics contexts. Settings include K-12 classrooms and free-choice learning environments such as zoos, museums and science camps.

## SED 573. SCIENCE PEDAGOGY AND

 TECHNOLOGY I (4). Development of pedagogical content knowledge in grades 6-12 science instruction: learning theory, nature of science, technology integration, and reform recommendations. Lec/lab/rec.
## SED 574. MATHEMATICS PEDAGOGY

 AND TECHNOLOGY I (4). Development of pedagogical content knowledge in grades 6-12 mathematics instruction: learning theory, nature of mathematics, technology integration, and reform recommendations. PREREQS: SED Professional Teacher Licensure Cohort Only. Does not meet Graduate School's stand-alone requirement. Investigation of mathematics as it relates to mathematics education must be completed prior to SED 574. SED 414 is recommended; please speak to the program coordinator. SED 474 Restrictions: Prereq course SED 414 required prior to SED 474.SED 576. MATHEMATICS PEDAGOGY AND TECHNOLOGY II (4). Development of additional pedagogical content knowledge in grades $6-12$; stress on dominant themes of the school mathematics curriculum including problem solving, reasoning, communication, and connections as well as the integration of technology into the mathematics classroom. PREREQS: SED 574 [C] and Education Double Degree only

## SED 577. SCIENCE PEDAGOGY AND

TECHNOLOGY II (4). Development of pedagogical content knowledge in grades 6-12; science instruction; learning theory, nature of science, technology integration, and reform recommendations. PREREQS: SED 573 [C] and Professional Teacher Education Master's Program

SED 580. RESEARCH AND EVALUATION (3). Analysis of qualitative and quantitative empirical
research in science education, mathematics education and education in general. Development of data collection instruments for use by researchers and teachers of science education, mathematics education and education in general, including portfolio and other forms of alternative assessment.

SED 581. PROFESSIONAL DEVELOPMENT AND PRACTICUM IN MATHEMATICS (3). Developing and implementing a program for continuing learning and evaluation in mathematics education.

## SED 582. PERSONAL DIMENSIONS OF

FREE-CHOICE LEARNING (3). Investigates
the fundamental roles that identity, motivation, interest, prior knowledge and experience, and choice and control play in supporting learning and how learning leaders can build on these dimensions of learning in order to successfully engage lifelong learners.

SED 583. SOCIO-CULTURAL DIMENSIONS OF FREE-CHOICE LEARNING (3). Investigates connections between theories of free-choice learning and the fundamental concepts of sociology, social psychology and anthropology: social stratification, social structure and interaction, social institutions, and cultural background. Real world examples will be included to support learning leaders, efforts to facilitate the socio-cultural dimensions of lifelong science and mathematics learning.
SED 584. PHYSICAL DIMENSIONS OF
FREE-CHOICE LEARNING (3). Learning is influenced by the interaction of variables within three contexts--personal, socio-cultural and physical. This course focuses on how macro-scale environmental factors (e.g. space, crowding, novelty) and micro-scale environmental factors (e.g. design elements, real objects, different media) support free-choice learning.
SED 588. MATHEMATICS CURRICULUM (3). Current trends, history of these trends, and the rationale for mathematics reform
SED 589. ADVANCED TOPICS: MATHEMATICS EDUCATION (3). Current issues in mathematics education. May be repeated for credit with different topics. Lec/lab. This course is repeatable for a maximum of 99 credits.

SED 592. PROFESSIONAL DEVELOPMENT AND PRACTICUM IN SCIENCE (3). Developing and implementing a program for continuing learning and evaluation in science education.
SED 593. ADVANCED STRATEGIES
SCIENCE (3). Provides additional exposure and development of instructional strategies and models of science teaching. Special emphasis is placed upon promoting critical thinking and decision making.

## SED 594. ADVANCED INSTRUCTIONAL

STRATEGIES IN SCIENCE AND MATHEMATICS
(3). Explore instructional strategies and skills or K-12 science and math teachers to support student learning rigorous content.

## SED 595. ASSESSMENT AND EVALUATION

(3). Examines education assessment focusing on formative assessment in multiple contexts across learning environments.
SED 596. METHODS OF COLLEGE TEACHING N MATHEMATICS AND SCIENCE (3). Focuses on methods and problems in planning and implementing mathematics or science instruction at the college level. Particular emphasis is placed upon selecting teaching strategies, organizing materials, and evaluating student assessment.
SED 597. PROFESSIONAL DEVELOPMENT IN MATHEMATICS AND SCIENCE EDUCATION (3). Development of strategies and skills for developing, implementing and evaluating a program of professional development for mathematics or science educators considering various choices of program settings.

SED 598. MATHEMATICS AND SCIENCE CURRICULUM (3). Current trends, history of these trends, and rationale for mathematics and science curriculum reform across learning environments.
SED 599. TOPICS IN SCIENCE EDUCATION
(3). Current issues, trends, and topics in science education. May be repeated for credit with different topics. This course is repeatable for a maximum of 18 credits.

SED 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
SED 603. DISSERTATION (1-16). This course is repeatable for a maximum of 999 credits.
SED 605. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.
SED 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
SED 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.
SED 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.
SED 611. SURVEY OF RESEARCH ON TEACHING (3). Critical analysis of perspectives of research in science/math education with a focus on teaching as the unit of analysis. PREREQS: SED 580 [C]
SED 612. QUANTITATIVE RESEARCH DESIGN
AND CRITICAL ANALYSIS (3). A study of
quantitative research designs and analytical procedures with specific applications in science or mathematics education. PREREQS: SED 580* [C]

SED 613. LEARNING THEORY (3). Provides a critical overview and analysis of current theories of learning and development, beginning with a discussion about what learning is, how it has been viewed and studied over time, and how seminal theories inform an understanding of lifelong learning and its facilitation. PREREQS: SED 580* [C]
SED 615. PRACTICUM IN MATHEMATICS/ SCIENCE IN COLLEGE TEACHING (3).
Supervised field practicum in college
mathematics/science teaching. This course is repeatable for a maximum of 9 credits.

## SED 621. SURVEY OF RESEARCH ON LEARN

(3). Critical analysis of perspectives on student thinking and learning in science/math education. PREREQS: SED 580* [C]
SED 622. QUALITATIVE RESEARCH
TECHNIQUES (3). A study of qualitative
research designs and analytical procedures with specific applications in science and mathematics education. PREREQS: SED 580* [C]

## SED 623. CURRICULUM THEORY (3).

Establishes theoretical grounding of curriculum.
Includes theoretical background, practical
knowledge, and skills related to science and
mathematics curriculum, including the history, curriculum theory and practice. PREREQS: SED 580* [C]
SED 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
SED 808. WORKSHOP (1-16). This course is repeatable for a maximum of 99 credits.

Founded in 1889, our college endeavors to create solutions that promote strong economies, healthy people, and a sustainable natural environment. Our program has a long history of graduating world-class engineers who have made major impacts on civilization through significant contributions in science and technology. Alumni achievements include breakthrough innovations such as the first artificial heart valve, the computer mouse, and the concept of email.

By emphasizing authentic, experiential engineering experiences within our curriculum, we equip students with the knowledge, skills, and passion to advance innovative solutions to today's most complex engineering challenges. Through nearly 30 unique degree programs at the graduate and undergraduate level, we produce top-notch engineers who are grounded in integrity, ingenuity, and a keen understanding of the inter-relatedness of global economies, cultures, and natural systems. Our faculty collaborates across disciplines to leverage synergies in teaching, research, and innovation. And we cultivate strategic partnerships to turn research results into new companies and products that create jobs while helping people to lead better lives.

The College of Engineering offers degrees in engineering, computer science, construction engineering management, energy systems engineering, and radiation health physics. Students may choose engineering majors from biological, chemical, civil, ecological, electrical and computer, environmental, industrial, manufacturing, mechanical, and nuclear engineering. Educational preparation for land surveying, a licensed profession in all states, is offered through civil engineering. Forest engineering is offered by the College of Forestry.

## THE ENGINEERING PROFESSION

Engineering is the profession in which knowledge of the mathematical and natural sciences gained through education and practice is applied with judgment to develop ways to economically utilize the materials and forces of nature for the benefit of humankind. It is a licensed profession in all of the states of the USA, and educational programs must meet high professional standards. Engineers are not only responsible for planning, designing, manufacturing, construction, and management, but also for the safety and welfare of the public that relies on their work.

## MISSION AND GOALS

The college's undergraduate educational mission is to provide high quality engineering programs that prepare students for successful careers, lifelong learning, and service to their profession and society. OSU engineering graduates will be known for their technical competence
and creativity; for their ability to apply, adapt, and extend their knowledge to solve a wide variety of problems; and for their effective communication skills. Their education will provide them with an understanding of the ways in which the humanities, social sciences, basic sciences, and technology interact to affect society. These programs will foster an environment that stimulates learning and promotes diversity.

The college's undergraduate programs have four goals:

1. Educate students thoroughly in mathematics, basic science and engineering sciences relevant to their discipline's professional work, including fundamental concepts, experimental techniques, methods of analysis, and computational applications.
2. Develop the ability of students to communicate effectively and to work collaboratively in diverse team environments.
3. Develop in students an awareness of the historical evolution of knowledge and technical applications, the state of current professional practice, their need for lifelong learning, contemporary issues, and the impact of engineering actions and solutions in a societal and global context; and to develop an understanding of their professional and ethical responsibilities.
4. Develop the ability of students to formulate and solve problems, to integrate and synthesize knowledge, and to think creatively, leading to the capability to analyze and design components, processes, or systems; plan and carry out experiments effectively; and troubleshoot and modify processes and systems.

## PREPARING FOR AN ENGINEERING CAREER

To prepare for the practice of engineering, students complete an accredited program of study leading to a bachelor of science degree in an established engineering field. Most engineering curricula require 180 credits; exceptions include programs in chemical, ecological, environmental and bioengineering. All programs include a balance of course work in mathematics, science, liberal arts, engineering science, and engineering design.

Upon graduation, engineering students are eligible to take the Fundamentals of Engineering Examination of the State Board of Engineering Examiners in any state. After passing the examination and completing four years of progressively responsible engineering work, graduates are eligible to take the professional engineering license examination of the state in which they intend to practice.

Director of Leadership and
Professional
Development

Although some fields of industrial and government employment do not require formal professional licensure, the educational preparation for the bachelor's degree is a necessity for virtually all such employment.
Preparation for the professional practice of land surveying follows a pattern of education, experience, examination, and professional licensure similar to that required for professional engineering practice.

Students completing the BS in Radiation Health Physics degree will be eligible to take part I of the Certified Health Physics (CHP) Examination of the American Board of Health Physics after one year of applied health physics practice. After six years of responsible professional experience in health physics, graduates will be eligible to take part II of the CHP examination.

## CHOOSING A MAJOR

The selection of a major is often difficult for students who have not had close association with engineering activities. Students should not be overly concerned with this problem since the pre-professional curricula of all engineering programs during the first year are similar. This flexibility allows students to change majors during the first year without loss of progress. Engineering students who are unsure about their choice of a major are advised to register in pre-general engineering until they make a decision.

## HUMANITARIAN ENGINEERING MINOR (\#769)

The humanitarian engineering minor provides multidisciplinary academic course work for students interested in the application of engineering, science, and technology-based solutions to global development challenges such as access to basic resources (e.g., clean water, clean energy), improved quality of life, and increased ability to earn a livelihood particularly in rural, resource-limited or low-to-middle income settings. A core of course work in humanitarian engineering, science and technology (HEST) is required with an emphasis on engineering as demonstrated by completion of the engineering design class (with engineering prerequisites). Both in the core course work and in the electives, there is an emphasis on context including social, cultural, economic, resource, political, and environmental. For more information, see the Humanitarian Engineering minor page at http:// catalog.oregonstate.edu/MinorDetail. aspx?minor=769\&college=16.

## INTERNATIONAL ENGINEERING MINOR (\#476)

The minor in International Engineering offers undergraduate engineering
students an opportunity to certify their global competencies and demonstrate their understanding of the intercultural needs of modern engineers. By combining an engineering experience abroad, courses from a generalized global core, thematic elective courses, and the signature course for the minor, students may demonstrate their readiness for the increasingly global field of engineering. For more information, see the International Engineering minor page at http:// catalog.oregonstate.edu/MinorDetail. aspx?minor=476\&college=16.

## GRADUATE STUDY

Because of the growing complexity of modern engineering practice, graduate study is important for those students who wish to specialize. Students who have established satisfactory undergraduate records and who are looking for the greatest opportunity in their professional field should consider continuation of their education beyond the baccalaureate degree. Study for the Master of Science (MS) and Master of Engineering (MEng) degrees normally requires one or two years. The Doctor of Philosophy (PhD) degree requires three to four additional years.

## ACCREDITATION

The Bachelor of Science degrees in Bioengineering, Chemical, Civil, Ecological, Electrical and Computer, Energy Systems, Environmental, Industrial, Manufacturing, Mechanical, and Nuclear Engineering baccalaureate programs are accredited by the Engineering Accreditation Commission of the ABET, Inc. 111 Market Place, Suite 1050, Baltimore, MD 21202-4012; 410-347-7700. The Construction Engineering Management program is accredited by the American Council for Construction Education. The Bachelor of Science degree in Computer Science-Computer Systems option is accredited by the Computing Accreditation Commission of the ABET, Inc. 111 Market Place, Suite 1050, Baltimore, MD 21202-4012; 410-347-7700. The Bachelor of Science degree in Radiation Health Physics is accredited by the Applied Science Accreditation Commission of the ABET, Inc. 111 Market Place, Suite 1050, Baltimore, MD 21202-4012; 410-347-7700.

## PRE-PROFESSIONAL PROGRAM

 Courses included in the first and sophomore years comprise a pre-professional program of study that produces a solid foundation for professional program studies at the junior, senior, and advanced degree levels. The pre-professional program may be taken at Oregon State University or at any accredited college or university that offers equivalent courses transferable to OSU.The required pre-professional courses in the program listings are designated with a superscript ( $\mathbf{E}$ ). These courses must be completed before the student is eligible for admission to the professional program. The other courses listed are important and may constitute prerequisites for junior-level courses.
All engineering programs have similar required pre-professional courses. This allows the flexibility of selecting a major after one year of study. Other majors offered by the college have different required pre-professional courses appropriate to that major.

## PROFESSIONAL PROGRAM

The professional program consists of various curricula offered at the junior and senior levels that are designed to prepare students for a professional career.

Each curriculum provides an opportunity for specialization through judicious selection of elective courses; however, to become fully versed in a specialty requires additional study at the graduate level.

## ADMISSION REQUIREMENTS

## Pre-professional Program

Admission to the pre-professional program requires that students meet general university admission requirements, as published in the OSU General Catalog. Students admitted to the pre-professional program are assigned to the department or school of their choice after their first year for advising and program planning.

## Professional Program

Enrollment in professional program courses is restricted to those students who have clearly demonstrated an ability to achieve the high standards required for professional studies.
Students must apply to the College of Engineering for admission to starting professional level courses prior to starting professional level courses. To apply, grades of C or better and a minimum of 2.25 cumulative GPA must be earned in required classes. The minimum GPA for admissions will typically be higher than 2.25 , but will never be lower.

Students who have completed their pre-professional studies at a college or university other than Oregon State University must apply both to the OSU Office of Admissions for admission to OSU and to the College of Engineering for admission to the professional program. Application links and information on policies and programs are available from the College of Engineering.

## ENGINEERING SCIENCE

Each engineering curriculum includes a number of courses that are appropriate for all engineering students. Because of their commonality, these are called
engineering science courses.
Engineering sciences have their roots in mathematics and basic science and serve as a bridge between science and engineering. They involve the application of scientific methods to practical engineering situations and lead to solutions of problems that are fundamental in analysis, design, and synthesis.
"Sophomore standing in engineering" refers to a student registered in an accepted program, who has completed 45 credits (with minimum grades of C), including MTH 251 , MTH 252 , plus three additional science or mathematics courses listed in an engineering curriculum. Many engineering courses require sophomore standing in engineering as a prerequisite.

## FOREST ENGINEERING

See College of Forestry. Also see College of Forestry for information on the Forest Engineering-Civil Engineering program.

## GENERAL ENGINEERING

The first year of the general engineering curriculum meets the requirements of all other engineering curricula except bioengineering, chemical engineering, environmental engineering, and ecological engineering, which require a different chemistry sequence. Students who have not decided upon a major are encouraged to register in general engineering during their pre-professional studies.

## CURRICULUM

The pre-general engineering curriculum below will prepare students to enter many of the engineering department or school programs. Students may transfer into another program at any time during the first year; they must transfer by the end of the year.

## Pre-General Engineering (One-year

 Program, Major Code: 345)
## First Year

CH 201, CH 202. *Chemistry for
Engineering Majors ( $3^{\mathbf{E}}, 3$ )
COMM 111. *Public Speaking (3) ${ }^{\mathbf{E}}$
or COMM 114. *Argument and Critical Discourse (3) ${ }^{\mathbf{E}}$
ENGR 111. Engineering Orientation I (3)
ENGR 112. Introduction to Engineering Computing (3) ${ }^{\mathbf{E}}$
HHS 231. *Lifetime Fitness for Health (2)
HHS 241. *Lifetime Fitness (1) or any PAC course (1-2)
MTH 251. *Differential Calculus (4) ${ }^{\mathbf{E}}$
MTH 252. Integral Calculus (4) ${ }^{\mathbf{E}}$
MTH 254. Vector Calculus I (4) ${ }^{\mathbf{E}}$
PH 211. *General Physics with Calculus (4) ${ }^{\text {E }}$
WR 121. *English Composition (3) ${ }^{\mathbf{E}}$
Biological science elective (4) ${ }^{1}$
Perspectives (9) ${ }^{1}$

## Footnotes:

* Baccalaureate Core Course
${ }^{\mathbf{E}}$ Required for entry into the professional
program.
${ }^{1}$ Must be selected to satisfy the requirements of the baccalaureate core.

## COLLEGE OF ENGINEERING <br> GRADING AND GPA

REQUIREMENTS

- All technical, writing and communications courses must be taken for letter grades (A through F): C or better grades are passing.
- Pre-engineering students must have at least a 2.25 Pre-core GPA for admission to the professional program.
- Professional engineering students must have at least a 2.25 Pro-core GPA and a 2.25 institutional GPA for graduation.
The Pre- and Pro-core GPAs are computed based on graded course work (only the second graded attempt is used for a repeated course). See the College of Engineering advising website for details.

## Satisfactory Academic Progress for Professional School Students

A student in good academic standing satisfies university, college, and program academic requirements. The university may change a student's status to warning, probation, or suspension following guidelines contained in the Schedule of Classes. The College of Engineering has a similar, but independent, process for students in the professional program.

At the conclusion of each term, pro-core term and cumulative GPA are calculated and academic standings are determined for students according to the criteria outlined below. Students whose standings evidence a lack of satisfactory progress will be warned of this condition and advised to seek help from their academic advisors.

1. Academic Warning: Students with a term pro-core GPA below 2.25 and fewer than 10 credits of procore course work will be placed on academic warning. The student must meet with their academic program advisor before they will be allowed to register for subsequent terms.
2. Academic Probation: Students who have completed 10 or more credits of pro-core course work and have a cumulative pro-core GPA below 2.25 will be placed on academic probation. A registration hold ("dean's hold") will be placed on the student's account until the student meets with an academic program advisor. The student and academic program advisor will complete an academic success agreement.
3. Academic Suspension: Students who are on academic probation and fail to meet the terms of their academic success agreement will be placed on academic suspension.

Students who are academically suspended are removed from the professional program and are not allowed to take additional upperdivision College of Engineering courses.
4. Reinstatement to the College: Suspended students may be reinstated to the professional program after one year, or completion of a minimum of 24 quarter credits of acceptable transferable college-level work at an accredited college or university, with a GPA of 2.5 or above. These 24 credits must be pre-approved in writing by the program head advisor. Students reinstated to the professional program who are subsequently suspended may only apply for reinstatement under the "one year" option.
Reinstatement requests from students will be considered by the College Committee on Reinstatement (CCR) made up of three College of Engineering school advisors and college head advisor (or their designee). Reinstatement guidelines are available electronically in the College of Engineering Undergraduate Policy Manual.

## GRADUATION REQUIREMENTS

To graduate with a baccalaureate degree in any of the engineering or computer science majors, a student must complete 180 credits; exceptions include programs in chemical, environmental, ecological, and bioengineering, which require 192 credits. In addition, students must have a minimum 2.25 institutional GPA and minimum 2.25 GPA in all professional core course work as defined in the respective major. A student must also meet all university degree requirements published each year in the printed and electronic "Academic Regulations and Procedures" section of the Registration Information Handbook and in the General Catalog.

## ACADEMIC DISHONESTY POLICY

Students that violate the academic honesty policy a second time will be suspended from the College of Engineering for a period of one year.

## BIOLOCICAL AND <br> ECOLOCICAL ENCINEERING

## FACULTY

Professors Bolte, CuencaI, English ${ }^{1}$, Godwin, Selker
Associate Professors Bachelet, Chaplen ${ }^{1}$, Ely ${ }^{1}$, Liu, Murthy, Tullos
Assistant Professors Fan, Guzy, Higgins, Vache
${ }^{I}$ Licensed Professional Engineer.

## Undergraduate Major

Ecological Engineering (BS, CRED, HBS)
Undergraduate Minor
Irrigation Engineering
Graduate Major
Biological and Ecological Engineering (MEng, MS, PhD)
Graduate Areas of Concentration
Bio-based Products and Fuels
Biological Systems Analysis
Bioprocessing
Ecosystems Analysis and Modeling
Water Quality
Water Resources

## Graduate Minor

Biological and Ecological Engineering
The Department of Biological and Ecological Engineering at OSU is involved in teaching, research and extended education relevant to the application of engineering analysis to biological, ecological and hydrological systems. The department has strength in graduate training and research and offers both an MS and PhD degree in Biological and Ecological Engineering. The graduate degree program is focused on the professional development of engineers and the analysis of environmental systems, hydrology and water resources. Activities within the department include water resource analysis, fate and transport of biologically relevant chemicals, bioreactor design and analysis, watershed analysis and resource management, simulation modeling of ecological and biological systems, regional and global hydrology, geographical information systems for environmental modeling, and the development of biobased products and fuels.

## ECOLOGICAL ENGINEERING

 (BS, CRED, HBS)Ecological engineering is the design of sustainable systems consistent with ecological principles that integrate human activities into the natural environment to the benefit of both. This approach emphasizes diversity, resilience, and adaptation to maintain sustainability. Ecological engineering deals with both fundamental processes and engineering applications on scales that range from microscopic to watersheds and beyond. This discipline is rapidly developing as an important new area of engineering based on the science of ecological systems, with a number of dedicated journals, national and international professional societies, and new application areas emerging over the last decade. The Biological and Ecological Engineering Department at OSU has considerable expertise in this area and is among the national leaders in this discipline.
The ABET Inc. Accredited Bachelor of Science degree in Ecological Engineering (EcoE) program is the first of its kind nationally, reflecting Oregon's leadership in this new and exciting multidisciplinary field. The curriculum is divided into an ecological engineering core and a set of upper-division science and engineering electives. The ecological engineering core contains the introductory and upperdivision course work that provides the common engineering and scientific basis for our students. The core consists of preprofessional courses, baccalaureate core requirements, required upper-division engineering courses, and required science courses. The upper-division engineering and science electives are presented as options. Selections are made to a total of 23 credits of engineering and science/ public policy electives. This organization provides students with considerable flexibility in selecting their degree path.

Graduates with an Ecological Engineering degree will work to optimize the interface between humankind and the environment. Specific activities undertaken might include riparian restoration, optimizing sensor arrays for ecological monitoring, improving agricultural water quality, mitigating toxic materials migration from landfills, developing sustainable industrial systems (agricultural and otherwise), developing closed systems for space travel, or dealing with issues associated with global climate change. Oregon State University has strong programs in many of the basic and engineering sciences that underpin the Ecological Engineering degree program.

Graduates with an ecological engineering skill set may find employment with industrial clients, engineering consulting companies, governmental agencies, and entrepreneurial start-ups.

## BIOLOGICAL AND ECOLOGICAL ENGINEERING (MEng, MS, PhD)

Graduate Areas of Concentration
Bio-based products and fuels,
bioprocessing, biological systems analysis, ecosystems analysis and modeling, water quality, water resources
The Department of Biological and Ecological Engineering offers graduate programs leading to the Master of Engineering, Master of Science, and Doctor of Philosophy degrees.

The Biological and Ecological Engineering program serves at the interface of life sciences and engineering. Bioresource engineering is the application of engineering and life science principles and problem-solving techniques to the optimum use and sustainability of biological resources. The curriculum is engineering-based with a strong emphasis on the life sciences. Courses focus on biological systems modeling, bioprocess engineering, thermophysical and molecular properties of biological materials, regional hydrologic analysis, groundwater systems, irrigation and water resource optimization. The department concentrates its research effort on two major thrusts: bioprocess engineering and water resources engineering. Specific research topics include biosensors, molecularlevel biosystems analysis, nanosensors, microbial fuel cells, biological hydrogen production, and bio-based products and fuels. Research topics in water resources engineering include constructed wetland treatment systems, crop growth modeling, optimum irrigation management, crop-water requirements, groundwater and subsurface contaminant transport, hydrologic modeling, agricultural and ecological systems analysis, geographical information systems, artificial intelligence technologies, livestock production odor control, livestock waste treatment, and non-point source water pollution control.

Bolte, Head, Department of Biological and Ecological Engineering, OSU, Corvallis, OR 97331-3906.

## Major Code: 4500

## BIOLOGICAL AND ECOLOGICAL ENGINEERING GRADUATE MINOR

For more details, see the departmental advisor.

## Minor Code: 4500

## BIOLOGICAL AND ECOLOGICAL ENGINEERING COURSES

BEE 101. ECOLOGICAL ENGINEERING I (3). Introduction to engineering at OSU and the emerging field of ecological engineering. Topics include engineering analysis and problem solving, professional ethics, the design process and teamwork.

BEE 102. ECOLOGICAL ENGINEERING II (3). Introduction to common problems and solutions in ecological engineering, emphasizing the multiplicity of approaches to constraining, analyzing, and resolving challenges of ecosystem management. Two overnight field trips to local ecological monitoring and engineering sites will be required.
BEE 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
BEE 221. FUNDAMENTALS OF ECOLOGICAL
ENGINEERING (3). Introduction to the concepts and practice of ecological engineering including characteristics, classification, and modeling of ecosystems; ecosystem protection; and sustainable uses of ecosystems, including treatment wetlands, land treatment systems, and ecologically sensitive stormwater management, to meet the needs of human societies. PREREQS: (BI 211 [C] or BI 211H [C] ) and (MTH 256 [C] or MTH 256H [C] )

## BEE 222. ECOLOGICAL ENGINEERING

 COMPUTATION (3). Programming methods relevant to ecological engineering, including hardware/software integration. PREREQS: Sophomore standing, consent of instructor.BEE 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## BEE 311. ECOLOGICAL FLUID MECHANICS

(4). Fluid properties, fluid statics, fluid motion, conservation of mass, momentum and energy for incompressible fluids, dimensional analysis, ecological engineering applications. Lec/rec. PREREQS: Consent of instructor.

BEE 312. ECOHYDRAULICS (4). Theory and design of hydraulic systems for ecological engineering applications. Lec/rec. PREREQS: BEE 311 [C] or CE 311 [C] or CHE 331 [C] or CHE 331H [C]
BEE 313. ECOHYDROLOGY (4). Provides quantitative description of fundamental hydrologic processes and the hydrologic cycle, the interactions of water between atmosphere, soils, and plants, and models for estimating the generation and transport of water in the environment. Lec/rec. PREREQS: BEE 312 [C]
BEE 320. BIOSYSTEMS ANALYSIS AND
MODELING (4). An introduction to simulation modeling and analysis of a variety of biological and ecological systems. Systems approaches to describing ecological systems. PREREQS: MTH 256 and consent of instructor.
BEE 322. ECOLOGICAL ENGINEERING THERMODYNAMICS AND TRANSFER PROCESS (4). A study of the transport processes of fluid flow, heat transfer and mass transfer applied to biological organisms and ecological systems. PREREQS: BEE 320 [C]

BEE 361. ECOLOGICAL ENGINEERING
LABORATORY (3). Introduction to modern measurement methods for ecological and environmental applications includes sensors and systems for measuring soil, water and atmospheric properties. No final exam; field trip required. Lec/lab. PREREQS: Professional engineering program standing.
BEE 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
BEE 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
BEE 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.
BEE 407. SEMINAR (1-16). Departmental seminars. Graded P/N. This course is repeatable for a maximum of 16 credits.
BEE 407H. SEMINAR (1-16). Departmental seminars. Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required
BEE 410. ECOLOGICAL ENGINEERING
INTERNSHIP (1-12). Internship in ecological engineering to provide students with an opportunity to apply course work and theory to the real world. Requires internship opportunity dentification by student. This course is repeatable for a maximum of 12 credits. PREREQS: Departmental approval required

## BEE 411. GLOBAL ENVIRONMENTAL

CHANGE: USING DATA TO INFORM DECISIONS (3). Empowers students interested in global change research to focus on the interactions between changes in human land use and climate. Using an innovative online data and mapping tool called Data Basin, students will explore topics accessing the highest quality datasets available in an all-in-one platform.

BEE 415. PROFESSIONAL DEVELOPMENT (1). Preparation for student professional careers. Students will interact with and hear seminars from professionals working in the ecological engineering field to learn from their experiences. PREREQS: Junior or senior standing.
BEE 433. IRRIGATION SYSTEM DESIGN (4).
Principles of soil physics and plant water use applied to irrigation system design. Design of gravity, pressurized, and trickle irrigation systems, improving on-farm water management, performance characteristics of pumps and other irrigation equipment. Lec/lab. Offered alternate years.

## BEE 439. IRRIGATION PRINCIPLES AND

 PRACTICES (4). Survey of irrigation systems, system configurations, factors that influence irrigation efficiency, crop water requirements, energy requirements, pumps, irrigation scheduling For non-engineers. Lec/lab/rec. PREREQS: MTH 111 [C]BEE 446. RIVER ENGINEERING (4).
Multipurpose river use; natural physical processes in alluvial rivers; channel modification practices; river structures; design practices; impact of river modification; problem analysis; and impact minimization. Offered alternate years. PREREQS: CE 313

BEE 458. NONPOINT SOURCE POLLUTION ASSESSMENT AND CONTROL (3). Problem solving in nonpoint source pollution. Methods for evaluating the extent, rate, timing, and fate of NonPoint Source (NPS) pollutants in agricultural and urban environments.

BEE 461. ECOLOGICAL ENGINEERING
LABORATORY (3). Introduction to modern measurement methods for ecological applications, includes sensors and systems for measuring soil, water and atmospheric properties. Lec/lab. PREREQS: One year college physics.

BEE 468. BIOREMEDIATION ENGINEERING
(4). Examines strategies for using a variety of biological processes for treating municipal, agricultural and industrial contaminants. Lec/lab. PREREQS: Must be a pro-school engineering student or graduate student.
BEE 469. ^ECOLOGICAL ENGINEERING
DESIGN I (4). Engineering design processes for ecological engineering applications, including specifications, performance criteria, timelines, and project logistics, principles and practices of working in engineering teams. (Writing Intensive Course) PREREQS: BEE 322 [C] and (ENGR 391 or ENGR 391H), senior standing or consent of instructor

BEE 470. ECOLOGICAL ENGINEERING
DESIGN II (4). Engineering design processes for ecological engineering applications, including specifications, performance criteria, timelines, and project logistics, principles and practices of working in engineering teams.

## BEE 472. INTRODUCTION TO FOOD

ENGINEERING PRINCIPLES (5). Fundamental engineering principles for scientists and nonprocess engineers. Topics include fluid flow, mass and energy transfer, and material and energy balances. Directed at food scientists and other majors who need or would like a working knowledge of food engineering principles. PREREQS: MTH 112 [C-] and (MTH 241 [C-] or MTH 251 [C-] or MTH 251H [C-] ) and PH 201 [C-]
BEE 473. INTRODUCTION TO FOOD ENGINEERING PROCESS DESIGN (3).
Fundamental engineering process design principles for food scientists and non-process engineers. Directed at those who need or would like a working knowledge of applied food engineering process design. Lec/rec. PREREQS: (BEE 472 or BEE 572) and consent of instructor.

BEE 499. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits.

BEE 499H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
BEE 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

BEE 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.
BEE 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.
BEE 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
BEE 507. SEMINAR (1). Section 1: Graduate Student Orientation Seminar to acquaint new graduate students with graduate school and departmental requirements, policies and expectations, and departmental research programs. Section 2: Graduate Research Publication Seminar to expose students to requirements for successful proposals and publication of research results. Section 3: Oral Presentation Improvement--A highly participatory educational effort designed to improve performance in presenting research reports, technical papers and in responding to oral examination questions. Graded $\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 99 credits.
BEE 511. GLOBAL ENVIRONMENTAL
CHANGE: USING DATA TO INFORM DECISIONS (3). Empowers students interested in global change research to focus on the interactions between changes in human land use and climate. Using an innovative online data and mapping tool called Data Basin, students will explore topics accessing the highest quality datasets available in an all-in-one platform.
BEE 512. PHYSICAL HYDROLOGY (3).
Principles of hydrologic processes and the integration of these processes into the hydrologic cycle. Topics include atmospheric processes,
precipitation and runoff, storm response in streamflow on a watershed scale, and major concepts in groundwater systems. PREREQS: One year of calculus.
BEE 525. STOCHASTIC HYDROLOGY (3). Study the elements of randomness embedded in the hydrological processes with emphasis on time series analysis, stationarity, periodic/ trend component, stochastic component, time series synthesis, ARMA model, spatial sampling and scale variability. Offered alternate years. PREREQS: BEE 512
BEE 529. BIOSYS MODELING TECHNIQUES
(3). Development of mathematical models of biological and ecological systems; linear and nonlinear systems analysis; stochastic modeling and random processes; model solution and analysis techniques.
BEE 533. IRRIGATION SYSTEM DESIGN (4).
Principles of soil and plant water use applied to irrigation system design. Design of gravity, pressurized, and trickle irrigation systems, improving on-farm water management, performance characteristics of pumps and other irrigation equipment. Lec/lab. Offered alternate years. PREREQS: ENGR 332
BEE 542. VADOSE ZONE TRANSPORT (4).
Introduction to the physical and hydraulic properties involved in flow from the soil surface to groundwater. Classical infiltration equations will be derived and presented with exact and approximate solutions. Attention is focused on application to pollutant transport and recent advances in nonideal flow. PREREQS: MTH 254

BEE 544. OPEN CHANNEL HYDRAULICS (4). Steady, uniform, and nonuniform flow in natural and artificial open channels; unsteady flow; interaction of flow with river structures; and computational methods. Offered alternate years. PREREQS: CE 313

BEE 545. SEDIMENT TRANSPORT (4). Principles of sediment erosion, transportation and deposition in rivers, reservoirs, and estuaries; measurement, analysis, and computational techniques. Offered even years in winter term. CROSSLISTED as FE 545. PREREQS: CE 313 or FE 330

BEE 546. RIVER ENGINEERING (4).
Multipurpose river use; natural physical processes in alluvial rivers; channel modification practices; river structures; design practices; impact of river modification; problem analysis; and impact minimization. Offered alternate years. PREREQS: CE 313

BEE 549. REGIONAL HYDROLOGIC
MODELING (3). Challenges in regional-scale water resource analysis and management with emphasis on application to production agriculture. Application of geostatistical techniques to spatially variable systems and remote sensing to largescale water resource systems. Development of soil-water-atmosphere-plant models. Analysis of evapotranspiration estimating methods. Offered alternate years. PREREQS: BEE 512 and MTH 256
BEE 558. NONPOINT SOURCE POLLUTION
ASSESSMENT AND CONTROL (3). Problem solving in nonpoint source pollution. Methods for evaluating the extent, rate, timing, and fate of NonPoint Source (NPS) pollutants in agricultural and urban environments.
BEE 568. BIOREMEDIATION ENGINEERING (4)
Examines strategies for using a variety of biological processes for treating municipal, agricultural and industrial contaminants. Lec/lab. PREREQS: Must be a pro-school engineering student or graduate student.
BEE 572. INTRODUCTION TO FOOD ENGINEERING PRINCIPLES (5). Fundamental engineering principles for scientists and nonprocess engineers. Topics include fluid flow, mass and energy transfer, and material and energy balances. Directed at food scientists and other majors who need or would like a working knowledge of process engineering principles. PREREQS: MTH 112 and (MTH 241 or MTH 251 or MTH 251H) and PH 201
BEE 573. INTRODUCTION TO FOOD
ENGINEERING PROCESS DESIGN (3).
Fundamental engineering process design principles for food scientists and non-process engineers. Directed at those who need or would like a working knowledge of applied food engineering process design. Lec/rec. PREREQS: (BEE 472 or BEE 572) and consent of instructor.

BEE 585. METABOLIC SYSTEMS
ENGINEERING (3). Quantitative and experimental approaches for describing and engineering biological networks and an introduction to the principles and methodologies of metabolic engineering and synthetic biology. PREREQS Statistics, biology, biochemistry or microbiology.

## BEE 586. PROBLEM SOLVING FOR

 METABOLIC SYSTEMS ENGINEERING (1).Matrix algebra and linear optimization for engineers and life scientists who lack linear algebra, linear optimization, and differential equations. Real-world analysis and optimization problems applied to the design and engineering of biological networks. Lab. PREREQS: Graduate standing. MTH 251 and MTH 252 or equivalent. COREQS: BEE 585
BEE 590. BIOPROCESS CONTROL SYSTEMS (3). Analysis and control of biological and biochemical systems. Stability, observability, controllability, pole-placement methods. Introduction to optimal control and feed back systems. PREREQS: MTH 251 and MTH 306 and BEE 571 or equivalent.
BEE 599. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits.
BEE 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
BEE 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

BEE 605. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.

BEE 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

BEE 607. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

BEE 691. MICROBIAL FUEL CELLS (2).
Fundamentals of microbial fuel cells. MFC reactor configuration. Potential applications of MFC. Comparison with other H 2 generation technologies.
BEE 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## SCHOOL OF CHEMICAL, <br> BIOLOGICAL AND <br> ENVIRONMENTAL <br> ENGINEERING

James (Jim) D. Sweeney, Head
116 Johnson Hall
Oregon State University
Corvallis, OR 97331-2702

## FACULTY

Professors Chang, Herman, Jovanovic, Koretsky, McGuire ${ }^{1}$, Rorrer, Semprini ${ }^{1}$, Wildenschild, Wood, Yokochi
Associate Professors Bothwell, Dolan, Harper, Higgins, Kelly, Levien ${ }^{1}$, Nason, Rochefort,
Assistant Professors Arnadottir, Baio, Feng, Fu, Montfort, Navab Daneshmand, Radiecki, Schilke, Walker
Professional Practice Engineers Carlisle, Mallette
Linus Pauling Engineer Harding ${ }^{1}$
${ }^{1}$ Licensed professional engineer

## Undergraduate Majors

Bioengineering (BA, BS, CRED, HBA, HBS)
Chemical Engineering (BA, BS,
CRED, HBA, HBS)
Environmental Engineering (BA, BS, CRED, HBA, HBS)

## Minor

Environmental Engineering

## Graduate Majors

Bioengineering (MEng, MS, PhD)

## Graduate Areas of Concentration

 BiomaterialsBiomedical Devices and Instrumentation
Human Performance Engineering
Medical Imaging
Systems and Computation Biology
Chemical Engineering (MEng, MS, PhD)
Graduate Areas of Concentration
Chemical Engineering
Environmental Engineering (MEng, MS, PhD, MAIS)
Graduate Areas of Concentration
Bioremediation
Environmental Fluid Mechanics
Environmental Microbiology
Environmental Modeling
Multiphase Phenomena
Subsurface Flow and Transport
Water and Wastewater Treatment

## Graduate Minors

Chemical Engineering
Environmental Engineering
The School of Chemical, Biological, and

Environmental Engineering (CBEE) offers three undergraduate programs: Chemical Engineering (CHE), Bioengineering (BIOE), and Environmental Engineering (ENVE). The Bachelor of Science degrees in CHE, BIOE, and ENVE are each separately accredited by ABET, the Accreditation Board for Engineering and Technology. The Bachelor of Art degrees in CHE, BIOE, and ENVE are not accredited by ABET.

The goals of the CBEE undergraduate program are consistent with the mission and goals of the College of Engineering, and focus on creating work- and leader-ship-ready graduates who will be successful in professional careers as a chemical engineer, bioengineer, or environmental engineer in the private or public sectors, including industry, government, and consulting, as well as for continued graduate study in the same or closely related fields.

Chemical engineering (CHE) is the engineering discipline that focuses on the science and engineering of processes to convert raw materials into valued chemicals and products on a manufacturing scale.

Bioengineering (BIOE) is an interdisciplinary field that applies scientific and engineering principles to the development of new biologics, materials, devices, and processes in the broad areas of bioprocess, biomedical, and bioenvironmental technology.

Environmental engineering (ENVE) is the engineering discipline that applies scientific and engineering principles to improve the natural environment, to provide healthy water, air, and land, and to remediate polluted sites.

The educational objectives and curriculum are described separately for each CHE, BIOE, and ENVE program. The school has a core undergraduate curriculum where CHE, BIOE, and ENVE students take common courses in first through senior years, including first-year engineering, process material and energy balances, thermodynamics and transport phenomena, and senior year laboratory.

The school also offers graduate programs in bioengineering, chemical engineering, and environmental engineering leading to MEng, MS, and PhD degrees.

## UNDERGRADUATE MAJORS WITH OPTIONS

## BIOENGINEERING (BA, BS, CRED, HBA, HBS)

The School of Chemical, Biological, and Environmental Engineering (CBEE) offers three undergraduate programs: Chemical Engineering (CHE), Bioengineering (BIOE), and Environmental Engineering (ENVE). Each program is separately accredited by the Engineering Accredita-
tion Commission of ABET (http://www. abet.org).

## About Bioengineering

Bioengineering is an interdisciplinary field that applies engineering principles and quantitative methods to the development of new and novel biologicals, materials, devices, and processes. In practice, bioengineers address issues surrounding the broad areas of bioprocess, biomedical, and bioenvironmental technology.

## About the OSU Bioengineering

 Undergraduate Program (BIOE) The Bioengineering Undergraduate Program provides a solid background in biology, chemistry, physics and math, in addition to the engineering sciences. Up-per-level course work in bioengineering includes analysis and design of processes involving suspension and immobilized microbial cultures and the recovery of therapeutic products from bioreactors, as well as selection courses in biomedical materials engineering, metabolic engineering, and cell engineering. All students complete course work in drug and medical device regulation as well as a capstone-design experience.Bioengineering graduates are prepared to contribute to the rapidly growing bioscience-based industries with the ability to formulate and solve problems pertaining to enzyme and microbial process technologies, mammalian cell culture, and downstream processing in biotechnology. They also generate solutions to problems with medical relevance, including the design of devices and systems to replace lost organ function, deliver therapeutic agents, and otherwise improve human health.

Alumni of the Bioengineering program will be work-ready engineers, problem solvers, responsible professionals, and interdisciplinary collaborators. Specifically, within a few years after graduation, they will have:

1. obtained employment in the bioprocess and biotechnology industries and/or entered graduate studies in bioengineering, chemical, environmental, or biomedical engineering and/or gained admission to professional schools including health-professional programs and law programs;
2. created value through solving problems at the interface of engineering and biology, whether in a manufacturing, research, or clinical environment;
3. pursued professional development in order to fulfill their professional and ethical responsibilities, and they will have recognized and responded to evolving contemporary questions at the interface of biosciences, technology, and society; and
4. created value through effectively communicating with a diverse set of professionals, and facilitating meaningful collaboration between bioscientists and other engineers. The Bioengineering undergraduate curriculum is designed to meet these objectives through relevant course content, hands-on laboratory and design experiences at the first year through the senior levels, and structured, collaborative learning experiences. The school has a core curriculum where students from all three programs housed within the school (CHE, BIOE, ENVE) take common courses in the areas of first-year engineering, materials and energy balances, thermodynamics, transport phenomena and senior laboratory.

## Pre-Professional Bioengineering

## First Year

CBEE 101. Chemical, Biological, and Environmental Engineering Orientation (3)

CBEE 102. Engineering Problem Solving and Computations (3) ${ }^{\mathbf{E}}$
CH 231. *General Chemistry (4) ${ }^{\text {E }}$ and CH 261. *Laboratory for Chemistry 231 (1) ${ }^{\text {E }}$
CH 232, CH 233. *General Chemistry $(4,4)$ and CH 262, CH 263. *Laboratory for Chemistry 232, $233(1,1)$
COMM 111. *Public Speaking (3)
or COMM 114. *Argument and Critical Discourse (3) ${ }^{\mathbf{E}}$
MTH 251. *Differential Calculus (4) ${ }^{\mathbf{E}}$
MTH 252. Integral Calculus (4) ${ }^{\text {E }}$
MTH 254. Vector Calculus I (4) ${ }^{\mathbf{E}}$
PH 211. *General Physics with Calculus (4) ${ }^{\text {E }}$
WR 121. *English Composition (3) ${ }^{\text {E }}$
HHS 231. *Lifetime Fitness for Health (2)
HHS 241-HHS 248. *Lifetime Fitness (various activities) (1)
or any PAC course (1-2)
*Perspectives (3)

## Second Year

BI 231, BI 233. Introduction to Human Anatomy and Physiology $(3,3)$
CBEE 211. Material Balances and Stoichiometry (3)
CBEE 212. Energy Balances (3)
CBEE 213. Process Data Analysis (4)
CH 331, CH 332. Organic Chemistry $(4,4)$
ENGR 201. Electrical Fundamentals I (3) ${ }^{\text {E }}$
ENGR 211. Statics (3) ${ }^{\mathrm{E}}$
MTH 256. Applied Differential Equations (4) ${ }^{\mathbf{E}}$

MTH 306. Matrix and Power Series Methods (4) ${ }^{\text {E }}$

PH 212, PH 213. *General Physics with Calculus $(4,4)^{\mathbf{E}}$
*Biology selection (2 or 4) ${ }^{\mathbf{1}}$

## Professional Engineering Program

## Third Year

BB 450, BB 451. General Biochemistry $(4,3)$

## CHEMICAL ENGINEERING

(BA, BS, CRED, HBA, HBS)
The School of Chemical, Biological, and Environmental Engineering (CBEE) offers three undergraduate programs: Chemical Engineering (CHE), Bioengineering (BIOE), and Environmental Engineering (ENVE). Each program is separately accredited by the Engineering Accreditation Commission of ABET (http://www. abet.org).

## About the Chemical Engineering Undergraduate Program (CHE):

Chemical engineering is the engineering discipline that focuses on the science and engineering of processes to convert raw materials into valued chemicals and products at a manufacturing scale. These include products found in everyday life such as transportation and heating fuels, plastics, pharmaceuticals, household and paper products (soaps, cosmetics, health care and cleaning products, etc.), as well as more advanced products like solar cells, computer chips, and advanced composites for jet aircraft.

Chemical engineers find employment in traditional chemical industries such as pulp and paper manufacturing and petroleum refining, high-tech industries such as semiconductor device manufacturing, biopharmaceutical production, aerospace, and emerging industries, particularly in sustainable energy.
Alumni of the Chemical Engineering program will be work-ready engineers, problem solvers, responsible professionals, and interdisciplinary collaborators. Specifically, based on the needs of the program's constituencies, within a few years of graduation chemical engineering alumni will have:

1. Obtained professional employment in a company, institute or agency within the chemical or related industries, entered a graduate program in chemical engineering or a related field or gained admission to a professional program such as medicine, law or business.
2. Created value by applying appropriate modern chemical engineering tools to the analysis, design, and control of chemical, physical, and/or biological processes, including the hazards associated with these processes.
3. Continued to develop their skills and knowledge through professional activities including FE/PE certifications, memberships in professional organizations and continuing education courses in order to fulfill their professional and ethical responsibilities though lifelong learning.
4. Demonstrated good communication skills and worked effectively in cross-functional team environments comprised of a diverse set of members with varying organizational backgrounds, positions, and geographic locations.
The chemical engineering undergraduate curriculum is designed to meet these objectives through relevant course content, hands-on laboratory and design experiences at the first year through senior levels, and structured, collaborative learning experiences. The school has a core curriculum where students from all three programs housed within the school (CHE, BIOE, ENVE) take common courses in the areas of first-year engineering, material and energy balances, thermodynamics, transport phenomena, and senior year laboratory.

Chemical engineering students have opportunities to obtain internships offered through the School of CBEE, and through the Multiple Engineering Cooperative Program (MECOP) program. Many scholarships are also available on a competitive basis for chemical engineering undergraduate students.

Pre-Professional Chemical

## ENVIRONMENTAL ENGINEERING (BA, BS, CRED, HBA, HBS)

The School of Chemical, Biological, and Environmental Engineering (CBEE) offers three undergraduate programs: Chemical Engineering (CHE), Bioengineering (BIOE), and Environmental Engineering (ENVE). Each program is separately accredited by the Engineering Accreditation Commission of ABET (http://www. abet.org).

The school also offers an undergraduate Environmental Engineering option for civil engineering students and a minor in Environmental Engineering.

## About the Environmental Engineering Undergraduate Program (ENVE)

The ENVE program draws upon a strong foundation in the basic sciences and prepares students for environmental engineering careers in consulting, industry, and state and local governments. It is a rigorous program incorporating course work in civil and chemical engineering, water and wastewater treatment, hazardous substance management, air pollution, and environmental health. The concept of environmental engineering design is introduced during the freshman year, with most of the design skills developed at the junior and senior level. Training culminates in a team approach to the solution of open-ended, realistic problems that incorporate aspects of economics, process operation and maintenance, process stability and reliability, and consideration of constraints. A more detailed explanation of the design experience and design course sequences is contained in the "Undergraduate Advising Guide for the Environmental Engineering Program," which may be obtained from the school or viewed on the school's website at http://cbee.oregon-state.edu/undergraduate-advising.

Alumni of the environmental engineering program will be work-ready engineers prepared with the knowledge and skills necessary to solve contemporary environmental engineering problems. Specifically, within a few years of graduation, they will have:

1. gained employment in the field of environmental engineering and/or matriculated in an environmental engineering or related graduate or professional program;
2. created value by analyzing and designing sustainable solutions to problems involving water, air, and soil pollution abatement and prevention;
3. successfully communicated or defended designs and decisions through reference to fundamental concepts of math, science, and engineering;
4. facilitated collaboration and built
strong professional relationships by working successfully in multidisciplinary teams and effectively communicating with a diverse group of stakeholders;
5. actively participated in professional development activities that demonstrate a commitment to sound professional and ethical practices, and the protection of human health and the environment; and
6. achieved Engineer in Training (EIT) certification by passing the Fundamentals of Engineering exam and gained experience relevant for professional licensure.
The environmental engineering undergraduate curriculum is designed to meet these objectives through relevant course content, hands-on laboratory and design experiences in the first year through senior levels, and structured collaborative learning experiences. The school has a core curriculum where students from all three programs housed within the school (CHE, BIOE, ENVE) take common courses in the areas of first-year engineering, materials and energy balances, thermodynamics, transport phenomena, and senior year unit operations.
Environmental engineering students have opportunities to obtain internships offered through the School of CBEE, and through the College of Engineering Multiple Engineering Cooperative Program (MECOP) program. Many scholarships are also available on a competitive basis for environmental engineering undergraduate students.

## GRADUATE MAJORS

## BIOENGINEERING (MEng, MS,

 PhD)Graduate Areas of Concentration
Biomaterials, biomedical devices and instrumentation, human performance engineering, medical imaging, systems and computation biology
Students enrolled in the MEng and MS degree programs will complete at least 45 graduate credits. For students in the MS program, 12 of those credits must be thesis credits (BIOE 503). Students enrolled in the PhD program will complete at least 108 graduate credits. At least 36 of those credits must be non-blanket course work, and at least 36 must be thesis credits (BIOE 603).

Students in all Bioengineering graduate programs (MEng, MS and PhD) will be required to complete the program core curriculum for a total of 15 credits. The remaining credits required for completion of the degree program will be electives, and may include courses in science, mathematics, engineering or other topics (e.g., entrepreneurship). An abundance of courses are currently offered at OSU that could fulfill the elective requirements, including several courses related to bioengineering offered within the College of Engineering. In addition, the College of Veterinary Medicine's graduate program in Comparative Health Sciences includes various course offerings that can serve as electives for Bioengineering graduate students. These include courses in Animal Models (VMB 521) and Molecular Tools (VMB 671), as well as courses in bioinformatics, epidemiology, genomics and immunology.

All students submit a program of study during their first quarter in the program specifying the elective courses they plan to take to complete their degree requirements. Programs of study will be reviewed by a committee of BIOE program faculty to ensure that the program
has sufficient breadth and depth in the context of the student's planned research activities.

## Core (15 credits)

BIOE 507. Bioengineering Seminar (1 credit/ term, 3 credits required)
BIOE 5\#\#. Physiology for Engineers (4)
BIOE 5\#\#. Cellular and Molecular
Bioengineering (3)
BIOE 5\#\#. Bioengineering Analysis (3)
BIOE 5\#\#. Drug and Medical Device
Regulations in Technology Development (2)

## Electives

The number of credits depends on the degree type.
Footnote:
5\#\# are courses under development
Major Code: 3080

## CHEMICAL ENGINEERING (MEng,

 MS, PhD)
## Graduate Areas of Concentration Chemical engineering

The School of Chemical, Biological and Environmental Engineering offers graduate programs leading to the Master of Engineering, Master of Science, and Doctor of Philosophy degrees. All programs are tailored to individual student needs and professional goals. A diversity of faculty interests, broadened and reinforced by cooperation between the school and other engineering departments and schools and research centers on campus, makes tailored individual programs possible. The school originates and encourages programs ranging from those that are classically chemical engineering to those that are distinctly interdisciplinary.

For more information, contact Dr. Gregory Rorrer, School Head, School of Chemical, Biological and Environmental Engineering, Oregon State University, Corvallis, OR 97331-2904, or email cbee@oregonstate.edu.

CHE 443. Chemical Reaction Engineering (4)

## Major Code: 3030

## ENVIRONMENTAL ENGINEERING (MEng, MS, PhD, MAIS)

## Graduate Areas of Concentration

Bioremediation, environmental fluid mechanics, environmental microbiology, environmental modeling, multiphase phenomena, subsurface flow and transport, water and wastewater treatment
The School of Chemical, Biological and Environmental Engineering offers graduate curricula leading to the Master of Engineering, Master of Science, and Doctor of Philosophy degrees in Environmental Engineering. The ENVE program prepares individuals to apply mathematical and scientific principles to the design, development and operational evaluation of systems for controlling contained living environments and for monitoring and controlling factors in the external natural environment. Specific application areas include pollution control, waste and hazardous material disposal, health and safety protection, conservation, life support, and requirements for protection of special materials and related work
environments, as well as emerging areas including sustainability, detection and treatment of emerging contaminants and their fate in the natural environment, water supply for a growing world population, and mitigation of the effects of climate change, among others. All programs are tailored to individual student needs and professional goals. A diversity of faculty interests, broadened and reinforced by cooperation between the school and other engineering departments and schools and research centers on campus, make tailored individual programs possible.
For more information, contact Dr. Gregory Rorrer, School Head, School of Chemical, Biological and Environmental Engineering, Oregon State University, Corvallis, OR 97331-2904, or email cbee@oregonstate.edu.

BIOE 340. BIOMEDICAL ENGINEERING
PRINCIPLES (3). Application of engineering concepts (mass and energy conservation, thermodynamics, and transport phenomena) to cellular- and system-level human physiology; design considerations for biomedical interventions and devices. PREREQS: (BI 231 [C] or Z 331 [C] ) and (CHE 332 [C] or CHE 332H [C] ) and BI 233* and (CHE 333* or CHE 333H*)
BIOE 351. BIOMATERIALS AND
BIOINTERFACES (3). Material interactions with human tissue, with emphasis on the role of interfacial chemistry and physics in cell adhesion,
infection, blood coagulation and thrombosis
Preparation of functional hydrogels, material coatings, and derivitizations, including immobilized bio-active molecules. Issues surrounding
regulation of implants and device failure.
PREREQS: (BB 451* [C] or BB 451H* [C] ) and (CHE 333* [C] or CHE 333H* [C] )
BIOE 399. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits.

BIOE 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

BIOE 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
BIOE 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.
BIOE 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
BIOE 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.
BIOE 415. BIOENGINEERING LABORATORY
(3). Laboratory experimentation with unit operations and processes in bioengineering preparation of technical reports. PREREQS: CBEE 414 [C]
BIOE 420. SOCIAL JUSTICE, ETHICS, AND
ENGINEERING (3). Examination of difference,
power, and discrimination in engineering education and practice. Lec/rec. PREREQS: Upper-division standing in engineering.
BIOE 440. BIOCONJUGATION (3). Survey of theory and practical current methods for chemical modification and conjugation of proteins and other biomolecules. Topics include permanent and cleavable cross-linkers, protein modification reagents, immobilization of enzymes/DNA, enzyme-antibody conjugates, protein-protein interactions, PEGylation and labeling of proteins, and solid-phase peptide synthesis. PREREQS: BB 450 [C] and /or equivalent
BIOE 445. SURFACE ANALYSIS (3). The characterization of molecular, biological, and engineered surfaces by modern surface analytical techniques. Topics include surface sensitive modes of electron spectroscopy, vibrational spectroscopy, and mass spectrometry. Students will interpret surface analytical data and gain access to the surface science literature. PREREQS: BIOE 351 [C]
BIOE 457. BIOREACTORS (3). Design and analysis of bioreactors using suspension and immobilized microbial cultures. PREREQS: (BB 451 [C] or BB 451H [C] ) and (CHE 333 [C] or CHE 333H [C] )
BIOE 459. CELL ENGINEERING (3). Application of engineering methods and principles to the study of mammalian cells. Emphasis on mathematical models of cellular processes (e.g., cellular mass transport, protein-ligand interactions, cellular mechanics) and methods for probing the physical characteristics of biological molecules and cells. PREREQS: BB 451 and CHE 333

BIOE 462. BIOSEPARATIONS (3). Application of basic mass transfer, reaction kinetics and thermodynamic principles to understanding, selection, and development of strategies for the recovery of products from bioreactors. PREREQS: (BB 451 [C] and (CHE 332 [C] or CHE 332H [C] ))
BIOE 470. REGULATION OF DRUGS AND MEDICAL DEVICES (2). Overview of regulations for pharmaceutical products and medical devices. Food and Drug Administration's approval process. Current good manufacturing practices and process validation is emphasized. Quality control and assurance, compliance, and important analytical methods will be introduced. PREREQS: Upper-division standing in engineering.
BIOE 490. BIOENGINEERING PROCESS DESIGN (4). Engineering economic analysis.

Design of bioprocesess: Development of process flow diagrams, equipment sizing, operation, and safety. Quality control and FDA regulations. PREREQS: CHE 333 [C] or CHE 333H [C] COREQS: BIOE 457
BIOE 491. BIOENGINEERING PRODUCT DESIGN (4). Design of biomedical and biotechnology-based products. Applications of a structured design process, meeting customer needs and regulatory considerations to design. PREREQS: BIOE 490 [C]
BIOE 492. BIOENGINEERING CAPSTONE DESIGN (4). Culminating experience in bioengineering design of processes and devices. Includes capstone project prototyping, testing and documentation, and constraints in ethics, intellectual property, standards, regulatory, and manufacturing. PREREQS: BIOE 491 [C]
BIOE 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
BIOE 520. SOCIAL JUSTICE, ETHICS, AND ENGINEERING (3). Examination of difference, power, and discrimination in engineering education and practice. Lec/rec. PREREQS: Upper-division standing in engineering.
BIOE 540. BIOCONJUGATION (3). Survey of theory and practical current methods for chemical modification and conjugation of proteins and other biomolecules. Topics include permanent and cleavable cross-linkers, protein modification reagents, immobilization of enzymes/DNA, enzyme-antibody conjugates, protein-protein interactions, PEGylation and labeling of proteins, and solid-phase peptide synthesis. PREREQS: BB 450 or equivalent
BIOE 545. SURFACE ANALYSIS (3). The characterization of molecular, biological, and engineered surfaces by modern surface analytical techniques. Topics include surface sensitive modes of electron spectroscopy, vibrational spectroscopy, and mass spectrometry. Students will interpret surface analytical data and gain access to the surface science literature PREREQS: BIOE 351
BIOE 557. BIOREACTORS (3). Design and analysis of bioreactors using suspension and immobilized microbial cultures. PREREQS: (BB 451 or BB 451 H ) and (CHE 333 or CHE 333 H )
BIOE 559. CELL ENGINEERING (3). Application of engineering methods and principles to the study of mammalian cells. Emphasis on mathematical models of cellular processes (e.g., cellular mass transport, protein-ligand interactions, cellular mechanics) and methods for probing the physical characteristics of biological molecules and cells. PREREQS: BB 451 and CHE 333

BIOE 562. BIOSEPARATIONS (3). Application of basic mass transfer, reaction kinetics and thermodynamic principles to understanding, selection, and development of strategies for the recovery of products from bioreactors. PREREQS: BB 451 and CHE 332
BIOE 570. REGULATION OF DRUGS AND
MEDICAL DEVICES (2). Overview of regulations for pharmaceutical products and medical devices. Food and Drug Administration’s approval process. Current good manufacturing practices and process validation is emphasized. Quality control and assurance, compliance, and important analytical methods will be introduced. PREREQS: Upper-division standing in engineering.
BIOE 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## - CHEMICAL, BIOLOGICAL AND ENVIRONIMENTAL ENGINEERING COURSES

CBEE 101. CHEMICAL, BIOLOGICAL, AND ENVIRONMENTAL ENGR ORIENTATION (3). Introduction to the engineering profession in general and in particular the CHE, BIOE, and

ENVE programs; development of problem solving strategies and teamwork; analysis and presentation of experimental data, basic process calculations, and design methodologies. Lec/rec/ lab.
CBEE 101H. CHEMICAL, BIOLOGICAL, AND ENVIRONMENTAL ENGR ORIENTATION (3).
Introduction to the engineering profession in general and in particular the CHE, BIOE, and ENVE programs; development of problem solving strategies and teamwork; analysis and presentation of experimental data, basic process calculations, and design methodologies. Lec/ rec/lab. PREREQS: Honors College approval required.
CBEE 102. ENGINEERING PROBLEM SOLVING AND COMPUTATIONS (3). Elementary programming and problem-solving concepts implemented using MATLAB software; emphasis on problem analysis and development of algorithms in engineering including dimensional analysis; application experiences are established through team-based activities including projects using the LEGO-NXT microprocessor for data acquisition. Lec/lab. PREREQS: MTH 112 [C] or MTH 251 [C] or MTH 251H [C]

CBEE 102H. ENGINEERING PROBLEM
SOLVING AND COMPUTATIONS (3). Elementary programming and problem-solving concepts implemented using MATLAB software; emphasis on problem analysis and development of algorithms in engineering including dimensional analysis; application experiences are established through team-based activities including projects using the LEGO-NXT microprocessor for data acquisition. Lec/lab. PREREQS: MTH 112 [C] or MTH 251 [C] or MTH 251H [C]

CBEE 211. MATERIAL BALANCES AND STOICHIOMETRY (3). Material balances, thermophysical, and thermochemical calculations. Lec/rec. PREREQS: MTH 252 [C] or MTH 252H [C] and general chemistry and second-year standing in engineering.

CBEE 211H. MATERIAL BALANCES AND STOICHIOMETRY (3). Material balances, thermophysical, and thermochemical calculations. Lec/rec. PREREQS: MTH 252 [C] or MTH 252H [C] and general chemistry and second-year standing in engineering. Honors College approval required.

CBEE 212. ENERGY BALANCES (3). Energy balances, thermophysical and thermochemical calculations. Lec/rec. PREREQS: (CBEE 211 [C] or CBEE 211H [C] ) and (MTH 256* [C] or MTH $256 \mathrm{H}^{*}[\mathrm{C}]$ ) and one year general chemistry and second-year standing in engineering.
CBEE 212H. ENERGY BALANCES (3). Energy balances, thermophysical and thermochemical calculations. Lec/rec. PREREQS: (CBEE 211 [C] or CBEE 211H [C] ) and (MTH 256* [C] or MTH $256 \mathrm{H}^{*}$ [C] ) and one year general chemistry and second-year standing in engineering. Honors College approval required.
CBEE 213. PROCESS DATA ANALYSIS (4).
Applications of material and energy balances, with an emphasis on data analysis important to chemical engineers, bioengineers, and environmental engineers. Contextual learning is emphasized through the laboratory component and the use of process flow simulation modeling and analysis software. Lec/lab/rec. PREREQS: (CBEE 212 [C] or CBEE 212H [C] )

## CBEE 280. MATERIAL AND ENERGY

BALANCES (6). Material balances,
thermophysical, and thermochemical calculations. Energy balances, thermophysical and thermochemical calculations. PREREQS: (MTH 256* [C] or MTH 256H* [C] )

## CBEE 320. PROFESSIONALISM AND

ENGINEERING ETHICS (3). Introduction to engineering ethics. Topics include ethical theory, professional engineering responsibility, codes of ethics, ethical assessment, conflicts of interest,
risk and safety, loyalty and dissent, as well as overarching professional concerns.

CBEE 414. ^PROCESS ENGINEERING
LABORATORY (3). Unit operations and unit processes; preparation of technical reports. Lec/ lab. (Writing Intensive Course) PREREQS: CBEE $213^{*}$ [C] and CHE 311 [C] and (CHE 333 [C] or CHE 333H [C] )
CBEE 414H. ^PROCESS ENGINEERING
LABORATORY (3). Unit operations and unit processes; preparation of technical reports. Lec/ lab. (Writing Intensive Course) PREREQS: CBEE $213^{*}$ [C] and CHE 311 [C] and (CHE 333 [C] or CHE 333H [C] )
CBEE 416. CBEE LABORATORY II (3).
Integration of overall knowledge of chemical biological, and environmental engineering through group project activities culminating with public demonstration or display of project results. PREREQS: (CHE 415 [C] or CHE 415 H [C] or BIOE 415 [C] or ENVE 415 [C] )
CBEE 507. SEMINAR (1). Graded P/N. This course is repeatable for a maximum of 3 credits.

## - CHEMICAL ENGINEERING COURSES

CHE 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 99 credits.
CHE 199H. SPECIAL TOPICS (1-16). PREREQS: Honors College approval required.

CHE 299. PROFESSIONAL WORKSKILLS (1-16).
This course is repeatable for a maximum of 99 credits.
CHE 311. THERMODYNAMICS (3). Entropy, the second law of thermodynamics, equations of state, and thermodynamic network. PREREQS: (CBEE 212 [C] or CBEE 212H [C] ) and (MTH 256 [C] or MTH 256 H [C] )
CHE 312. CHEMICAL ENGINEERING
THERMODYNAMICS (3). Thermodynamic mixtures, fugacity, phase equilibrium, and chemical reactions equilibrium. PREREQS: CHE 311 [C]
CHE 320. SAFETY, ENGINEERING ETHICS
AND PROFESSIONALISM (3). Introduction to engineering ethics and safety concepts. Topics include professional engineering responsibility, codes of ethics, ethical assessment, conflicts of interest, loyalty and dissent, life-long learning, hazard identification, risk and safety, and process safety management. Lec/rec. PREREQS: Engineering Professional School Standing (+16)

CHE 331. TRANSPORT PHENOMENA I (4). Fundamentals and application of momentum and energy transfer phenomena to fluid flow for the design of industrial chemical engineering equipment PREREQS: (MTH 256 [C] or MTH 256H [C] ) and (CBEE 212* [C] or CBEE 212H* [C] )

CHE 331H. TRANSPORT PHENOMENA I (4). Fundamentals and application of momentum and energy transfer phenomena to fluid flow for the design of industrial chemical engineering equipment. PREREQS: (MTH 256 [C] or MTH $256 \mathrm{H}[\mathrm{C}]$ ) and (CBEE 212* [C] or CBEE 212H* [C] ) and Honors College approval required.

CHE 332. TRANSPORT PHENOMENA II (3).
A unified treatment using control volume and differential analysis of heat transfer, prediction of heat transport properties, and introduction to heat transfer operations. PREREQS: CHE 311 [C] and (CHE 331 [C] or CHE 331H [C] )
CHE 332H. TRANSPORT PHENOMENA II (3).
A unified treatment using control volume and differential analysis of heat transfer, prediction of heat transport properties, and introduction to heat transfer operations. PREREQS: CHE 311 [C] and (CHE 331 [C] or CHE 331H [C] ) and Honors College approval required.

CHE 333. TRANSPORT PHENOMENA III (3).
A unified treatment using control volume and differential analysis of binary mass transfer, prediction of mass transport properties, and introduction to mass transfer operations. Lec/ studio. PREREQS: CHE 331 [C] or CHE 331H [C] or CHE 332 [C] or CHE 332H [C]

CHE 333H. TRANSPORT PHENOMENA III (3). A unified treatment using control volume and differential analysis of binary mass transfer, prediction of mass transport properties, and introduction to mass transfer operations. Lec/ studio. PREREQS: CHE 331 [C] or CHE 331H [C] or CHE 332 [C] or CHE 332H [C] and Honors College approval required.

## CHE 334. TRANSPORT PHENOMENA

LABORATORY (2). Engineering lab practices and the application of the macroscopic balances of mass, energy, and chemical species; fluid flow, heat and mass transfer experiments by teams for demonstrations of principles established in previous transport phenomena courses. PREREQS: CBEE 213* [C] and (CHE 333* [C] or CHE 333H* [C] )
CHE 361. CHEMICAL PROCESS DYNAMICS
AND SIMULATION (3). Fundamental principles for process dynamic modeling used in the control of process variables such as pressure, temperature, flow rate and chemical composition. PREREQS: (MTH 256 [C] or MTH 256H [C] ) and (CHE 331* or CHE $331 \mathrm{H}^{*}$ ) and CBEE 102 recommended.

CHE 399. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits.

CHE 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

CHE 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

CHE 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.
CHE 405H. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.

CHE 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

CHE 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

CHE 410. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

CHE 411. MASS TRANSFER OPERATIONS (4). Mass transfer operations; design of separation processes. Lec/rec. PREREQS: (CHE 312 [C] and (CHE 333 [C] or CHE 333H [C] ))

## CHE 415. CHEMICAL ENGINEERING

LABORATORY I (3). Theoretical and empirical analysis of several unit operations, use of formal work processes, safety, teamwork, oral and written communication, and personal accountability. Lec/ $\mathrm{lab} / \mathrm{rec}$. PREREQS: CBEE 414 [C]

## CHE 417. INSTRUMENTATION IN CHEMICAL,

 BIOLOGICAL, AND ENVIRONMENTALENGINEERING (4). Equips students with a toolbox of instrumental techniques important in chemical, biological, and environmental engineering and the background required to determine the appropriate instrumental technique to address a specific problem. Lec/lab/rec.
PREREQS: (CH 231 or CH 231 H ) and (CH 261 or CH 261 H ) and (CH 232 or CH 232 H ) and (CH 262 or CH 262 H ) and ( CH 233 or CH 233 H ) and (CH 263 or CH 263 H ) and enrollment in chemical, biological or environmental engineering professional programs.
CHE 431. CHEMICAL PLANT DESIGN I (3).
Short-cut techniques and other abbreviated and useful methods for specifying equipment sufficient for the preliminary design of processes and equipment; estimating capital and manufacturing
costs based on equipment specifications PREREQS: (CHE 312 [C] and CHE 411 [C] and CHE 443 [C] )
CHE 432. CHEMICAL PLANT DESIGN II (3).
Transformation of preliminary design to detailed design; introduction to safety, ethical, economical, and environmental considerations in chemical plant design. Lec/rec. PREREQS: CHE 431 [C]

## CHE 443. CHEMICAL REACTION

ENGINEERING (4). Design of chemical reactors for economical processes and waste minimization Contacting patterns, kinetics and transport rate effects in single phase and catalytic systems. PREREQS: (CHE 312 [C] and (CHE 333 [C] or CHE 333H [C] )) and CHE graduate students may not enroll.

CHE 444. THIN FILM MATERIALS PROCESSING
(4). Solid state devices are based on the patterning of thin films. This lecture and lab course is primarily an introduction to the technology associated with processing thin films. Topics include chemical vapor deposition, physical vapor deposition, plasma etching, and thin-film characterization. Lec/lab/rec. PREREQS: CHE 443
CHE 445. POLYMER ENGINEERING AND SCIENCE (4). Polymer engineering and science with an emphasis on practical applications and recent developments. Topics include polymer synthesis, characterization, mechanical properties, rheology, and processing at a level suitable for most engineering and science majors. Lec/lab/rec PREREQS: CH 334 and CH 335 and CH 336 or equivalent and (MTH 256 or MTH 256H) and/or junior standing in engineering or science.

## CHE 450. CONVENTIONAL AND ALTERNATIVE

 ENERGY SYSTEMS (3). Principles of energy conversion from chemical/mechanical energy to electrical energy including an overview of conventional energy systems and of likely renewable energy systems with a focus on the fundamental physico-chemical and thermodynamic concept for each technology. The economics of energy systems will also be discussed.CHE 451. SOLAR ENERGY TECHNOLOGIES
(3). A foundation in the principles of solar energy processes is provided. Topics covered include photovoltaics and solar thermal, and will cover the fundamental solid state physics of semiconductors to applied heat transfer analysis of solar collectors. The course objective is to equip students with an adequate depth of understanding of the operational principles of solar energy systems, and to cover the breadth of the various approaches employed in active solar energy systems. PREREQS: CHE 311 or equivalent.
CHE 461. PROCESS CONTROL (3). Principles of PID feedback control based on models of chemical processes; analysis and implementation of proportional, integral and derivative tuning; cascade, feedforward, ratio and deadtime compensation; multivariable control and control system design issues and methods. PREREQS: (CHE 331 [C] or CHE 331H [C] ) and (CHE 332* [C] or CHE $332 \mathrm{H}^{*}$ [C] ) and CHE 361 [C]
CHE 499. SPECIAL TOPICS (0-4). This course is repeatable for a maximum of 8 credits.
CHE 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
CHE 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.
CHE 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.
CHE 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

CHE 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

CHE 514. FLUID FLOW (4). Fundamentals of fluid dynamics for Newtonian and non-Newtonian fluids; flow through porous media; two-phase flow. Lec/rec

## CHE 517. INSTRUMENTATION IN CHEMICAL, BIOLOGICAL, AND ENVIRONMENTAL

ENGINEERING (4). Equips students with a toolbox of instrumental techniques important in chemical, biological, and environmental engineering and the background required to determine the appropriate instrumental technique to address a specific problem. Lec/lab/rec. PREREQS: (CH 231 and CH 261 and CH 232 and CH 262 and CH 233 and CH 263 ) and enrollment in chemical, biological or environmental engineering professional programs.
CHE 520. MASS TRANSFER I (4). Diffusion in gases, liquids, solids, membranes, and between phases. Effects of reactions on mass transfer. Mass transfer rates by convection and dispersion. Rates of dispersion. Rates of combined heat and mass transfer

CHE 525. CHEMICAL ENGINEERING ANALYSIS
(4). Modeling of physical and chemical processes; mathematical analysis of models with appropriate advanced techniques.
CHE 537. CHEMICAL ENGINEERING
THERMODYNAMICS I (4). Applications of the fundamental laws of thermodynamics to complex systems. Properties of solutions of nonelectrolytes. Phase and chemical equilibrium.
CHE 540. CHEMICAL REACTORS I (4).
Catalysis, reactions coupled with transport phenomena. Reactors for high tech applications.
CHE 541. CATALYSIS (3). Introduction to topics related to catalysts and catalytic reactions. Course covers catalytic reaction mechanisms and kinetics, catalyst characterization and testing, and catalyst preparation and manufacturing processes
CHE 544. THIN FILM MATERIALS PROCESSING
(4). Solid state devices are based on the patterning of thin films. This lecture and lab course is primarily an introduction to the technology associated with processing thin films. Topics include chemical vapor deposition, physical vapor deposition, plasma etching, and thin-film characterization. Lec/lab/rec. PREREQS: CHE 443 or CHE 543
CHE 545. POLYMER ENGINEERING AND
SCIENCE (4). Polymer engineering and science with an emphasis on practical applications and recent developments. Topics include polymer synthesis, characterization, mechanical properties, rheology, and processing at a level suitable for most engineering and science majors. Lec/lab/rec PREREQS: CH 334 and CH 335 and CH 336 or equivalent and MTH 256 and/or junior standing in engineering or science.
CHE 550. CONVENTIONAL AND ALTERNATIVE ENERGY SYSTEMS (3). Principles of energy conversion from chemical/mechanical energy to electrical energy including an overview of conventional energy systems and of likely renewable energy systems with a focus on the fundamental physico-chemical and thermodynamic concept for each technology. The economics of energy systems will also be discussed. PREREQS: CHE 311 or ME 311 or ME 311H
CHE 551. SOLAR ENERGY TECHNOLOGIES
(3). A foundation in the principles of solar energy processes is provided. Topics covered include photovoltaics and solar thermal, and will cover the fundamental solid state physics of semiconductors to applied heat transfer analysis of solar collectors. The course objective is to equip students with an adequate depth of understanding of the operational principles of solar energy systems, and to cover the breadth of the various approaches employed in active solar energy systems. PREREQS: CHE 311 or equivalent.

CHE 581. SELECTED TOPICS (3). Non-sequence course designed to acquaint students with recent advances in chemical engineering. Topics vary from term to term and from year to year. May be repeated for credit. This course is repeatable for a maximum of 9 credits.
CHE 599. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits.

CHE 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

CHE 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

CHE 605. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.

CHE 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

## CHE 611. ELECTRONIC MATERIALS

PROCESSING (3). Technology, theory, and analysis of processing methods used in integration circuit fabrication. Offered alternate years. CROSSLISTED as ECE 611. PREREQS: Graduate standing or instructor approval.

CHE 612. PROCESS INTEGRATION (3).
Process integration, simulation, and statistical quality control issues related to integrated circuit fabrication. Offered alternate years. CROSSLISTED as ECE 612. PREREQS: CHE 611 or ECE 611 or instructor approval

CHE 613. ELECTRONIC MATERIALS AND CHARACTERIZATION (3). Physics and chemistry of electronic materials and methods of materials characterization. Offered alternate years. CROSSLISTED as ECE 613. PREREQS: Graduate standing or instructor approval.

## I ENVIRONMENTAL <br> ENGINEERING COURSES

ENVE 199. SPECIAL TOPICS (1-16). Seminar course that includes invited speakers. Open to all students interested in learning about the Environmental Engineering undergraduate program and potential career opportunities. Graded P/N. This course is repeatable for a maximum of 16 credits.

ENVE 299. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits.

ENVE 299H. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
ENVE 321. ENVIRONMENTAL ENGINEERING FUNDAMENTALS (4). Application of engineering principles to the analysis of environmental problems. Topics include water, wastewater, solid wastes, and air pollution. PREREQS: (MTH 256 [C] or MTH 256H [C] )
ENVE 322. FUNDAMENTALS OF
ENVIRONMENTAL ENGINEERING (4).
Application of engineering principles to the analysis of environmental problems. Topics include water, wastewater, solid wastes, and air pollution PREREQS: ((CH 222 [C] or CH 232 [C] or CH 232 H [C] or CH 225H [C] ) and (MTH 256 [C] or MTH 256 H [C] )) and environmental engineering majors only.
ENVE 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
ENVE 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ENVE 405. READING AND CONFERENCE (116). This course is repeatable for a maximum of 16 credits.

ENVE 406. SPECIAL PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

ENVE 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

ENVE 407H. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required. ENVE 410. OCCUPATIONAL INTERNSHIP (112). This course is repeatable for a maximum of 12 credits.
ENVE 415. ENVIRONMENTAL ENGINEERING LABORATORY (3). Theoretical and empirical analysis of several unit operations, use of formal work processes, safety, teamwork, oral and written communication, and personal accountability. Lec/ lab/rec. PREREQS: CBEE 414 [C]
ENVE 421. WATER AND WASTEWATER
CHARACTERIZATION (4). Measurement of physical and chemical characteristics of water and wastewater. Engineering principles for the selection and design of treatment processes. PREREQS: (ENVE 321 [C] or ENVE 322 [C] )
ENVE 422. ENVIRONMENTAL ENGINEERING DESIGN (4). Design of water and wastewater treatment facilities including physical, chemical, and biological processes. PREREQS: ENVE 421 [C]
ENVE 425. AIR POLLUTION CONTROL
(3). Study of air pollution sources, transport, and control, including engineering, chemical, meteorological, social, and economic aspects. Lec/rec. PREREQS: (ENVE 321 [C] or ENVE 322 [C] )
ENVE 431. FATE AND TRANSPORT OF
CHEMICALS IN ENVIRONMENTAL SYSTEMS
(4). Fundamentals of organic chemistry and engineering principles applied to the movement and fate of xenobiotic compounds. Lec/lab/rec. PREREQS: ( $(\mathrm{CH} 123$ [C] or CH 223 [C] or CH 226 H [C] or CH 233 [C] ) and (CH 440 [C] or CHE 331 [C] or CHE 331H [C] ) and (ENVE 321 [C] or ENVE 322 [C] ) and ENVE 421 [C] )

## ENVE 456. SUSTAINABLE WATER

RESOURCES DEVELOPMENT (3). Sustainable water resources engineering principles, assessing the impact of engineering practices. Use of engineering analyses and sustainable principles to design projects and minimize their environmental impact.

ENVE 490. ENVIRONMENTAL ENGINEERING DESIGN (4). Open-ended design of environmental processes including development of process flow diagrams, control strategies, process simulators, and financial analysis of processes. PREREQS: (ENVE 421 [C] and ENVE 422 [C] )
ENVE 499. SPECIAL TOPICS IN ENVIRONMENTAL ENGINEERING (1-4). A critical examination of topics selected by the instructor from among topics not covered in other environmental engineering courses. This course is repeatable for a maximum of 4 credits.
ENVE 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

ENVE 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Graduate standing.
ENVE 505. READING AND CONFERENCE (116). This course is repeatable for a maximum of 16 credits.
ENVE 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
ENVE 507. SEMINAR (1-16). One-credit seminar. Graded P/N. This course is repeatable for a maximum of 16 credits.

ENVE 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

ENVE 521. WATER AND WASTEWATER CHARACTERIZATION (4). Measurement of physical and chemical characteristics of water and wastewater. Engineering principles for the selection and design of treatment processes. PREREQS: ENVE 321 or ENVE 322

ENVE 522. ENVIRONMENTAL ENGINEERING DESIGN (4). Design of water and wastewater treatment facilities including physical, chemical, and biological processes. PREREQS: ENVE 421
ENVE 525. AIR POLLUTION CONTROL
(3). Study of air pollution sources, transport, and control, including engineering, chemical, meteorological, social, and economic aspects. Lec/rec. PREREQS: ENVE 321 or ENVE 322

ENVE 531. FATE AND TRANSPORT OF CHEMICALS IN ENVIRONMENTAL SYSTEMS (4). Fundamentals of organic chemistry and engineering principles applied to the movement and fate of xenobiotic compounds. Lec/lab/rec. PREREQS: (CH 123 or CH 223 or CH 226 H or CH 233) and (CH 440 or CHE 331 or CHE 331H) and (ENVE 321 or ENVE 322) and ENVE 421
ENVE 532. AQUATIC CHEMISTRY: NATURAL AND ENGINEERED SYSTEMS (4). Low temperature thermodynamic and selective kinetic treatments primarily of the inorganic chemistry groups, but also organic ligands and surface active groups, of natural and engineered waters; thermodynamic principles and computational techniques for prediction of equilibrium speciation; comparison of predictions to observations; computer laboratory. Lec/rec. PREREQS: One year of college-level chemistry ( CH 221 and CH 222 and CH 223 ) or ((CH 231 or CH 231 H$)$ and (CH 232 or CH 232 H ) and ( CH 233 or CH 233 H )) or equivalent, plus a minimum of one year organic or physical chemistry. Recommended corequisites ENVE 536 Aqueous Environmental Laboratory and/or OC 652 Chemical Oceanography Laboratory.
ENVE 535. PHYSICAL AND CHEMICAL
PROCESSES FOR HAZARDOUS WASTE
TREATMENT (4). Principles and design of unit operations and processes for the treatment of hazardous waste and contaminated soils. PREREQS: ENVE 532 [C]
ENVE 536. AQUEOUS ENVIRONMENTAL
CHEMISTRY LABORATORY (1). Laboratory investigation of acid/base equilibria, coordination chemistry, and precipitation/dissolution chemistry. COREQS: ENVE 532

ENVE 541. MICROBIAL PROCESSES
IN ENVIRONMENTAL SYSTEMS (4).
Energetics kinetics and stoichiometry of microbial transformations of organic and inorganic compounds. Mathematical models of biodegradation.

ENVE 542. MICROBIAL PROCESS DESIGN FOR MUNICIPAL AND HAZARDOUS WASTES (4). Principles and design of microbial processes for treatment of municipal and hazardous wastes PREREQS: ENVE 541 [C]
ENVE 554. GROUNDWATER REMEDIATION (4). Theory and practice of groundwater remediation. Environmental site assessments. Physical, chemical, and biological methods for in situ treatment of contaminated aquifers. Modeling of remediation technologies.
ENVE 556. SUSTAINABLE WATER
RESOURCES DEVELOPMENT (3). Sustainable water resources engineering principles, assessing the impact of engineering practices. Use of engineering analyses and sustainable principles to design projects and minimize their environmental impact.
ENVE 599. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits.
ENVE 601. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.
ENVE 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: PhD only.

ENVE 699. SELECTED TOPICS IN ENVIRONMENTAL ENGINEERING (1-4). A
critical examination of topics selected by the
instructors from among topics not covered in other environmental engineering courses. This course is repeatable for a maximum of 8 credits. PREREQS: Instructor approval required.

## FACULTY

Professors Ashford ${ }^{1}$, Belli ${ }^{1}$, Cox,
Gambatese ${ }^{\mathrm{I}}$, Higgins ${ }^{\mathrm{I}}$, Istok $^{\mathrm{I}}$, Liu, OzkanHaller, Schultz1, Trejo ${ }^{1}$, Yeh ${ }^{1}$, Weiss, Yim ${ }^{1}$
Associate Professors Brown ${ }^{1}$, Evans, Haller, Hill, Hunter-Zaworski', Isgor ${ }^{1}$, Lundy ${ }^{\mathrm{I}}$, Miller ${ }^{1}$, Ozkan-Haller, Parrish, Scott, Sillars ${ }^{1}$
Assistant Professors Arocho, BabbarSebens, Barbosa ${ }^{1}$, Coleri, Borello, Gillins, Hernandez, Hurwitz, Ideker, Lee, Leon, Mason, Olsen, Park ${ }^{1}$, Stuedlein ${ }^{1}$, Wang
Adjuncts Gupta, Sinha
Senior Instructors Arras, FradellaI
Instructors Bergerl, Martin
Academic Advisors Nave-Abele, Whitehead
Emeritus Bell¹, Bella¹, Huber ${ }^{\text {¹, }}$ Hudspeth ${ }^{1}$, Klingeman ${ }^{1}$, Layton ${ }^{1}$, Pritchett ${ }^{1}$, Rogge ${ }^{1}$, Schroeder ${ }^{1}$, Sollitt
${ }^{\text {I }}$ Licensed Professional Engineer

## Undergraduate Majors

Civil Engineering (BA, BS, CRED, HBA, HBS)
Option
Environmental Engineering
Construction Engineering Management (BA, BS, CRED, HBA, HBS)

## Graduate Major

Civil Engineering (MAIS, MEng, MS, PhD)
Graduate Areas of Concentration
Civil Engineering
Coastal and Ocean Engineering
Construction Engineering Management
Engineering Education
Geomatics
Geotechnical Engineering
Infrastructure Materials
Structural Engineering
Transportation Engineering
Water Resources Engineering

## Graduate Minor <br> Civil Engineering

The mission of the School of Civil and Construction Engineering is that of the College of Engineering (see college statement on mission and goals), as well as providing a comprehensive, state-of-the-art education to prepare students for professional and responsible engineering and constructor positions with business, industry, consulting firms, or government.
Education in the basic sciences occurs primarily in the freshman and sophomore years. Engineering science is introduced at the sophomore year and continues through to graduation with a combination of required courses and technical electives. Completion of the OSU Baccalaureate Core provides experience in the humanities, social sciences, and other nontechnical areas as additional preparation for a student's profession and life.

The CCE School offers an undergraduate option in environmental engineering that provides education in water pollution, air pollution, solid wastes, and hazardous wastes.
The growing complexity of modern engineering practice requires further specialization in one or more engineering disciplines. This is generally attained through postgraduate study. The CCE School offers MEng, MS, and PhD programs with concentrations in civil engineering, coastal and ocean engineering, construction engineering management, geomatics, geotechnical engineering, infrastructure materials, structural engineering, transportation engineering, and water resources engineering.

Areas of concentration may be combined to form an integrated civil engineering MS program, MEng program, or MEng, MS, and PhD minors.

The school also participates in the Master of Arts in Interdisciplinary Studies program.

## UNDERGRADUATE MAJORS WITH OPTIONS

CIVIL ENGINEERING (BA, BS, CRED, HBA, HBS)
Shane Brown, Associate School Head 101 Kearney Hall
Oregon State University
Corvallis, OR 97331-3212
541-737-1759
Email: cce@engr.orst.edu
Website: http://cce.oregonstate.edu/
The Bachelor of Science degree in Civil Engineering is accredited by the Engineering Commission of ABET, http:// www.abet.org.

Civil engineering is a diverse professional field with discipline specialties in
structures, transportation, water supply and water pollution control, geotechnical engineering, hydrology, hydraulics and water resources, geomatics, ocean engineering, construction, and engineering planning and economics. All CE students receive basic instruction in the various disciplines, with the option for additional elective courses in desired areas. The program is supported by highly qualified faculty and staff that maintain the programs and facilities at the highest level of quality.

The civil engineering curriculum within the School of Civil and Construction Engineering (CCE) includes the basic sciences, social sciences, humanities, communication skills, engineering sciences, and engineering design in order to teach students an integrated approach to practical solutions.

The mission of the civil engineering program is to provide a comprehensive, state-of-the-art education to prepare students for professional and responsible engineering positions with business, industry, consulting firms or government.

## Program Educational Objectives-

 Civil EngineeringNote: The Bachelor of Science degree in Civil Engineering is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org), which requires stated program educational objectives and student outcomes to support these.
OSU Civil Engineering graduates receive a compelling education, and within 3 to 5 years of graduation will have:

1. Assembled, analyzed and synthesized/evaluated information to solve engineering problems and perform modern civil engineering design by applying mathematics, engineering sciences and fundamentals of civil engineering.
2. Participated in modern professional practice or a graduate program in a specialty area of civil engineering, demonstrating effective communication, collaborative work and leadership in diverse teams, ethical decision-making, successful management of personal and professional career objectives, and continual development through lifelong learning and professional involvement.
3. Recognized the importance of professional licensure and have achieved or prepared to achieve this significant accomplishment. In this endeavor, consideration of the public health, welfare and safety is seen as the paramount priority.
4. Applied an understanding of public policy and contemporary societal issues with sensitivity to the challenge of meeting social,
environmental, and economic constraints within a global community.

## Student Outcomes for Civil Engineering Programs

The OSU Civil Engineering program prepares its graduates to achieve the Program Educational Objectives above several years into their careers. This is achieved by having students able to perform the following on graduation, well preparing them for active immediate and lifelong service in the profession:

1. Ability to apply knowledge of mathematics, science, and engineering to solve engineering problems
2. Ability to design and conduct experiments as well as analyze and interpret data
3. Ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, social, political, ethical, health and safety, manufacturability and sustainability
4. Ability to function on multidisciplinary teams
5. Ability to identify, formulate, and solve engineering problems
6. Understanding of professional and ethical responsibility
7. Ability to communicate effectively
8. Broad education necessary to understand impact of engineering solutions in global, economic, environmental and societal context
9. Recognition of need for and ability to engage in lifelong learning
10. Knowledge of contemporary issues
11. Ability to use techniques, skills, and modern engineering tools necessary for engineering practice
12. Knowledge of basic concepts in leadership
13. Ability to include non-engineering considerations, including business, regulatory and safety issues in problem-solving
14. Ability to incorporate effective negotiation or consensus-gaining in group decision-making
15. Knowledge and application of project planning and management practices and tools
16. Ability to assess imperfect or incomplete data conditions, risks and alternatives into problem-solving decisions
17. Exposure to current industry design practices, construction methods and materials, and overall project delivery considerations
Design is the essence of civil engineering. Junior and senior level courses include extensive design content, culminating in a team approach to the solution of open-ended, realistic problems, including capstone design and
professional practice courses. Courses with design content include those with "design" in their titles. A more detailed explanation of the design experience and design course sequences is contained in the "Civil Engineering Advising Guide," which may be viewed on the school's website at http://cce.oregonstate.edu/ academic-advising.

A student may also earn a concurrent Bachelor of Arts (BA) or Honors Bachelor of Arts (HBA) degree by completing 32 additional credits in residence including language proficiency equivalent to that attained at the end of the second year of a foreign language as certified by the School of Language, Culture, and Society. Neither the BA nor the HBA degree in civil engineering is accredited by the Engineering Commission of ABET.

## CIVIL ENGINEERING-FOREST

## ENGINEERING

A five-year dual-degree program in civil engineering and forest engineering is offered jointly by the School of Civil and Construction Engineering in the College of Engineering and Forest Engineering in the College of Forestry. Advising is done through either academic unit. See Forest Engineering, Resources and Management in the College of Forestry.

## Geomatics (Surveying and Mapping)

Graduates of civil engineering are eligible to take the Fundamentals of Land Surveying Examination in pursuit of the Professional Land Surveying license by selecting courses as follows.
CE 361. Surveying Theory (4)

## Plus 12 credits from the following:

CE 365. Highway Location and Design (3)

CE 461/CE 561. Photogrammetry (3)
CE 463/CE 563. Control Surveying (4)
CE 465/CE 565. Oregon Land Survey Law (3)
CE 469/CE 569. Property Surveys (3)
CE 562. Digital Terrain Modeling (4)
Pre-Civil Engineering Major Code:
336
Major Code: 306

## ENVIRONMENTAL ENGINEERING OPTION

CCE students may elect a transcript-visible Environmental Engineering option. A minimum of 21 credits is required.

## Core Courses (21)

CH 123. *General Chemistry (5)
or CH 223. *General Chemistry (5)
CE 407. Seminar: Water Resource Issues (1)

## CONSTRUCTION ENGINEERING MANAGEMENT (BA, BS, CRED, HBA, HBS)

Oregon State University
Corvallis, OR 97331-3212
541-737-4934
Email: cce@engr.orst.edu
Website: http://cce.oregonstate.edu/
The School of Civil and Construction Engineering offers BA and BS degrees in Construction Engineering Management (CEM). This unique program blends principles of basic science, engineering, and technology with a strong component of business subjects to prepare graduates for a productive career in the construction industry. The BS in Construction Engineering Management is ACCE accredited.
The CEM program is built on a rigorous four-year curriculum that emphasizes practical applications as well as basic principles. Students are given hands-on experiences in the laboratory and are involved in field trips as a supplement to their classroom activities. A more detailed explanation of the CEM Program is contained in the "Construction Engineering Management Advising Guide," which may be viewed on the school's website at http://cce.oregonstate.edu/ academic-advising.

The mission of the CEM program is to provide a comprehensive, state-of-the-art education to prepare students for professional and responsible constructor positions with business, industry, consulting firms or government. The program's educational objectives are to:

1. Provide a compelling education based in the natural sciences, mathematics, engineering sciences, and business, and in the fundamental paradigms, concepts, understandings, applications, and knowledge of civil and construction engineering and construction management.
2. Develop students' abilities through
their education to analyze, synthesize, and evaluate information, solve engineering problems, and be prepared to effectively perform project engineering and management tasks for effective execution of construction projects.
3. Provide education for modern professional practice including the abilities for effective communication, collaborative work in diverse teams, ethical decision-making, successful management of personal and professional career objectives, and continual development through lifelong learning and professional involvement.
4. Prepare our graduates for either immediate employment or for graduate school opportunities in construction or business.
5. Provide students with knowledge of contemporary societal issues and a sensitivity to the challenge of meeting social, environmental, and economic constraints within a global community.

## CIVIL ENGINEERING (MEng, MS,

 PhD, MAIS)Graduate Areas of Concentration
Civil engineering, coastal and ocean engineering, construction engineering management, engineering education, geomatics, geotechnical engineering, infrastructure materials, structural engineering, transportation engineering, and water resources engineering
The School of Civil and Construction Engineering offers graduate work leading to the Master of Engineering, Master of Science, and Doctor of Philosophy degrees. The MEng, MS, and PhD degrees offer concentrations in civil engineering, coastal and ocean engineering, construction engineering and management, engineering education, geomatics, geotechnical engineering, infrastructure materials, structural engineering, transportation engineering, water resources engineering, and interdisciplinary areas. Areas of concentration can also be combined to form an integrated civil engineering MS program or MS and PhD minors. The MEng is a course work-only degree requiring a final oral exam. For the MS degree, a thesis or project is required. The PhD degree requires a dissertation.

Degree programs prepare the student for advanced-level entry into professional engineering practice and for careers in research and teaching. Majors within the department constitute approximately two-thirds of the total program. Minor fields may be selected from departmental offerings in different subject areas, from other engineering disciplines, or from other fields of study that support the major. The school also participates in the Master of Arts in Interdisciplinary Studies program.

■ CIVIL AND CONSTRUCTION ENGINEERING COURSES
CCE 101. CIVIL AND CONSTRUCTION ENGINEERING ORIENTATION (2). Introduction to civil and construction engineering professions; problem solving, communication skills. This course is required by the CE, CEM and FE programs. PREREQS: (MTH 112* or MTH $251^{*}$ ) and MTH 111
CCE 102. CIVIL AND CONSTRUCTION ENGINEERING: PROBLEM-SOLVING AND TECHNOLOGY (3). A skills-based course that focuses on introducing freshman students to the use of technology in solving civil engineering
problems. Topics to be covered include units, homework professionalism, professional presentations, Internet tools, software for numeric methods and programming. Students use laptop computers during class. Some class involvement with professional societies or chapters. Projects from the areas of civil and construction engineering. Lec/lab. PREREQS: (MTH 112* or MTH 251*) and MTH 111

## CCE 201. CIVIL AND CONSTRUCTION

ENGINEERING GRAPHICS AND DESIGN
(3). Introduces the engineering design process and graphic skills that are used by civil and construction engineers. Topics include design process, geometric construction, multiviews, auxiliary views, sections, dimensioning,
tolerances and engineering drawing standards. Students participate in team design projects and presentations. Graphic and design projects from the areas of civil and construction engineering. Lec/lab. PREREQS: (MTH 111 [C] or MTH $112^{*}$ [C] or MTH 241* [C] or MTH 251* [C] )
CCE 203. INTRODUCTION TO VIRTUAL DESIGN
AND CONSTRUCTION (3). Basic principles of
virtual design and construction (VDC) focusing on skills required for generating design and construction information models. Parametric modeling and design constraints are introduced. Students will utilize construction drawings and documentation to create accurate 3D models. Use of design and construction information models for making estimates of quantities and cost, and for determination of constructability problems. Lec/lab. PREREQS: CCE 201 [C] or ENGR 248 [C]
CCE 321. CIVIL AND CONSTRUCTION ENGINEERING MATERIALS (4). Highway materials; aggregate, concrete and asphalt Standard test methods. PREREQS: ((ENGR 213 [C] or ENGR 213 H [C] ) and (ST 314 [C] or BA 276 [C] ))
CCE 321H. CIVIL AND CONSTRUCTION ENGINEERING MATERIALS (4). Highway materials; aggregate, concrete and asphalt. Standard test methods. PREREQS: (ENGR 213 [C] or ENGR 213 H [C] ) and (ST 314 [C] or BA 276 [C] ) and Honors College approval required.

## CCE 421. ADVANCED CONCRETE

## PROPERTIES AND PERFORMANCE (4).

 Cement production, hydration, supplementary cementitious materials, mixture design and proportioning, heat of hydration, volume stability, shrinkage, cracking, expansion, creep, relaxation, admixtures, alternative binders, strength gain, durability. PREREQS: CCE 321 [C] and senior standing.CCE 422. GREEN BUILDING MATERIALS (3). Introduces concepts of construction with green building materials. Specific concepts include evaluation of what truly makes a material "green", long-term performance (e.g., durability) of materials, material production and life cycle cost analysis. Concepts of green building programs, guidelines and specifications will be introduced. PREREQS: (CE 321 [C] or CCE 321 [C] ) and (ECON 201 or ECON 201H or ECON 202 or ECON 202H) and ST 314 or equivalent.
CCE 520. SELECTED TOPICS IN
INFRASTRUCTURE MATERIALS (0-4). A
critical examination of in-depth topics selected by the instructor from among topics not covered in other infrastructure materials courses. This course is repeatable for a maximum of 16 credits. PREREQS: Depending on the selected topic covered there may be prerequisites such as "graduate standing" or "undergraduate materials course such as CCE 321"
CCE 522. GREEN BUILDING MATERIALS (3). Introduces concepts of construction with green building materials. Specific concepts include evaluation of what truly makes a material "green", long-term performance (e.g., durability) of materials, material production and life cycle cost analysis. Concepts of green building programs, guidelines and specifications will be introduced.

PREREQS: (CE 321 or CCE 321) and (ECON 201 or ECON 201 H or ECON 202 or ECON 202H) and ST 314 or equivalent.

CCE 523. CONCRETE DURABILITY (4). Cement production, supplementary cementitious materials, mixture proportioning, concrete durability,
freeze-thaw attack, sulfate attack, corrosion, alkali-silica reaction, long-term performance, durability prediction and modeling, durability of alternative cement, multi-scale assessment dimensional stability. PREREQS: CCE 321, Civil and Construction Engineering Materials or similar introductory materials course or CCE 421, Advanced Concrete Properties and Performance.

CCE 525. CONSTRUCTION SITE SYSTEMS
ENGINEERING (3). Design and planning of construction site field operations and engineered systems. Systems analysis and design as it applies to civil engineering projects. Design of construction systems: blasting; rock crushing and conveying; dewatering; cranes, pile driving, and rigging; and concrete pumping and placement. Construction site design and process design. PREREQS: Graduate standing or consent of instructor.

CCE 526. DESIGN FOR SAFETY (3). Theoretical concepts and industry practices used to model, evaluate, and improve construction worker safety through the design of the project features, construction operations, and site safety program elements. Causes of construction site accidents, hazard recognition and comprehension, safety risk valuation and mitigation, and the true costs of injuries and fatalities. PREREQS: Graduate standing or consent of instructor.
CCE 529. LEAN CONSTRUCTION (3). Introduction to the basics of lean production management, especially about how they are applied to the AEC industry to improve the operation management and product development. Class topics include theory of manufacturing science, principles of the lean production system, application of production management to project management, variability management in design and construction, improving project performance in the AEC industry, data gathering and process evaluation for productivity improvement.
CCE 552. PROJECT RISK MANAGEMENT (4). An introduction to the concept of project risk in producing constructed engineering projects. Course content includes project baselining, risk definition and identification, risk assessment and management techniques, risk control, risk response, and risk management. CROSSLISTED as IE 586. PREREQS: Graduate standing in College of Engineering, or instructor's consent.

CCE 554. PROFESSIONAL RESPONSIBILITY
AND ETHICS (3). An in-depth exploration of professional engineering ethics. Course content includes conceptual theoretical basis of ethics, ethics among professional organizations, ethical consideration of design, critical analysis of ethical situations, ethics in the workplace, and ethical considerations regarding the broader environment CROSSLISTED as IE 589. PREREQS: Graduate standing in College of Engineering, or instructor's consent.

## CIVIL ENGINEERING COURSES

CE 199. SPECIAL TOPICS (1-4).
CE 202. CIVIL ENGINEERING: GEOSPATIAL INFORMATION AND GIS (3). Introductory design principles presented with the use of GIS and geospatial information (remote sensing, GPS, surveying, and aerial photography) for civil engineering problem solving. Introduction to the integration of geospatial data and analysis for decision making and management for site selection, mitigation, change analysis, modeling and assessment. Standard software and custom programming used in course. Students participate in both individual and team projects and presentations. Projects from the area of civil
engineering. Lec/lab. PREREQS: (CE 201 [C] or CCE 201 [C] or ENGR 248 [C] )
CE 299. SPECIAL TOPICS (1-4). Graded P/N.
CE 299H. SPECIAL TOPICS (1-4). Graded P/N.
PREREQS: Honors College approval required.
CE 301. CE JUNIOR SEMINAR (1). Professional practices of civil engineering. PREREQS: Junior standing in civil engineering.
CE 311. FLUID MECHANICS (4). Fluid properties, fluid statics, fluid motion, conservation of mass, momentum and energy for incompressible fluids, dimensional analysis, civil engineering applications.

## CE 313. HYDRAULIC ENGINEERING (4).

Analysis of large civil engineering fluid systems including conduit flow, multiple reservoirs, pipe networks, pumps, turbines, open channel flow, and hydraulic structures. PREREQS: CE 311 [C] or CHE 331 [C] or CHE 331H [C]
CE 361. SURVEYING THEORY (4). Use of surveying equipment, Gaussian error theory applied to measurements, calculations of position on spherical and plane surfaces, state plane coordinate systems, introduction to global positioning systems.
CE 365. HIGHWAY LOCATION AND DESIGN
(3). Curve problems in highway design, including circular, vertical, compound curves and spirals; earth distribution analysis; preliminary office studies; paper location procedures and field layout problems. PREREQS: (CE 361 [C] or CEM 263 [C] or FE 208 [C] )
CE 372. GEOTECHNICAL ENGINEERING I (4). Basic soil mechanics including the identification and classification of soil, principles of compaction and consolidation, flow through porous media, effective stress, and shear strength. Lec/lab. PREREQS: ENGR 213 [C] or ENGR 213H [C] and (CE 311* [C] or CEM 311* [C] or CHE 331* [C] or CHE 331 ${ }^{*}$ [C] )
CE 373. GEOTECHNICAL ENGINEERING II
(4). Application of fundamental soil mechanics principles to analyses of slope stability, retaining structures, and foundation support. Lec/rec. PREREQS: (CE 372 [C] or FE 315 [C] )
CE 381. STRUCTURAL THEORY I (4). Analysis of statically determinate structures (beams, frames, trusses, arches, and cables). Approximate analysis, influence lines, deflections. PREREQS: (ENGR 213 [C] or ENGR 213H [C] )
CE 382. STRUCTURAL THEORY II (4). Analysis of statically indeterminate structures (beams, frames, trusses). Deflections. Energy methods, introduction to matrix methods. PREREQS: CE 381 [C]
CE 383. DESIGN OF STEEL STRUCTURES
(4). Introduction to design of steel members, connections and structural systems. Lec/lab. PREREQS: CE 382 [C]

## CE 392. INTRODUCTION TO HIGHWAY

ENGINEERING (4). Highway engineering standards, geometric design, cross section and roadside design, highway surfaces, pavement design, highways and the environment, highway construction and maintenance. PREREQS:
((ENGR 212 [C] or ENGR 212H [C] ) and CE 361 [C])
CE 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
CE 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS:
Departmental approval required.
CE 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.

CE 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

CE 407. SEMINAR (1-3). Understanding
complexity and systems thinking. This course is repeatable for a maximum of 16 credits.

CE 407H. SEMINAR (1-3). Understanding complexity and systems thinking. This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
CE 408. WORKSHOP (1-3). This course is repeatable for a maximum of 3 credits.
CE 410. INTERNSHIP (1-12). This course is repeatable for a maximum of 16 credits.
CE 411. OCEAN ENGINEERING (4). Introduction to linear wave theory and wave forces on piles. Guided design of wave gauge facility at Coos Bay, Oregon, that requires synthesizing fluid mechanics, structural design and foundation design. PREREQS: CE 313 [C] or CEM 311 [C]
CE 412. HYDROLOGY (4). Fundamentals of hydrology, the hydrologic cycle, precipitation, streamflow, hydrograph analysis and hydrologic measurements.
CE 413. GIS IN WATER RESOURCES (3).
Course presents Geographic Information System (GIS) technology for developing solutions to water resource problems: water quality, availability, flooding, the natural environment, and management of water resources. Typical GIS data models for hydrologic information are presented. Synthesis of geospatial and temporal water resources to support hydrologic analysis and modeling are covered. PREREQS: Senior or graduate standing in engineering or a previous introductory GIS course.

CE 415. COASTAL INFRASTRUCTURE
(3). Planning and design criteria of coastal infrastructure, including breakwaters, jetties, sea walls, groins, piers, submerged pipelines, harbor design, and tsunami defense. Use of laboratory models, numerical simulations, and field observations for design. PREREQS: CE 313 [C] CE 417. HYDRAULIC ENGINEERING DESIGN
(4). Theory, planning, analysis, and design of hydraulic structures. Application of basic principles detailed analysis and design. Engineering planning and design of water resource systems. PREREQS: CE 313 [C]
CE 418. ^CIVIL ENGINEERING PROFESSIONAL
PRACTICE (3). Engineering career paths; ethics and professionalism, project planning, execution and delivery; team building/management; marketing proposals; engineering overseas; dispute resolution; partnering; effective decision making; uncertainty and risk analysis; and current industry design and construction methods. (Writing Intensive Course) PREREQS: CE 382 [C] and CE 313 [C] and (CE 372 [C] or FE 315 [C] ) and civil and environmental engineering majors within three terms of graduation.

CE 419. ^CIVIL INFRASTRUCTURE DESIGN (3). A capstone design project experience exposing students to problems and issues similar to those encountered in the practice of civil engineering. Students should have completed ALL other required courses in their degree program prior to registering for this course. Lec/rec. PREREQS: CE 418 [C] and civil and environmental engineering majors within three terms of graduation.
CE 420. ENGINEERING PLANNING (4). The application of systems analysis to structuring, analyzing, and planning for civil engineering projects. Concept of the system and its environment; setting goals, objectives, and standards; evaluation criteria; solution generation and analysis; evaluation and optimization. Project management using precedence node diagramming; resource allocation and leveling; time-cost trade-off; and PERT.

CE 424. CONTRACTS AND SPECIFICATIONS
(4). Fundamentals of construction industry contracts, including technical specifications, and issues related to time, money, warranty, insurance, and changed conditions.

CE 427. TEMPORARY CONSTRUCTION
STRUCTURES (4). Design and construction of temporary structures including formwork, shoring, and earth retaining structures. PREREQS: ((CE 321 [C] or CCE 321 [C] ) and (FE 315 [C] or CE 372 [C] ) and (CEM 383 [C] or CE 383 [C] )) CE 428. PROJECT MANAGEMENT FOR CIVIL ENGINEERS (4). Provides the prospective civil engineer with the technical knowledge and familiarity necessary to successfully and confidently manage projects of different sizes and complexity levels. It relies on basic knowledge and techniques developed by the Project Management Institute (PMI) and real-world examples (through lectures, example projects, case studies, and guest speakers) from the public and private sectors.
CE 461. PHOTOGRAMMETRY (3). Geometry of terrestrial and vertical photographs, flightline planning, stereoscopy and parallax, stereoscopic plotting instruments, analytical photogrammetry, orthophotography, introduction to photo interpretation, and aerial cameras. PREREQS: (CE 361 [C] or CEM 263 [C] or FE 208 [C] )
CE 463. CONTROL SURVEYING (4). Global Positioning Systems (GPS) theory, networks, and fieldwork; control specifications, methods and problems in obtaining large area measurements; precise leveling; network adjustments using least square techniques; field instrument adjustments. PREREQS: (CE 361 [C] or CEM 263 [C] or FE 208 [C] )

CE 465. OREGON LAND SURVEY LAW (3). Introduction to U.S. public land survey; Oregon state statutes, common law decisions, and administrative rules dealing with boundary law; case studies; unwritten land transfers; original and resurvey platting laws; guarantees of title; deed descriptions. PREREQS: (CE 361 [C] or CEM 263 [C] or FE 208 [C] )
CE 469. PROPERTY SURVEYS (3). U.S. public land survey: restoration of corners, subdivision of sections; topographic mapping; subdivision and partition plats, resurvey plats, subdivision design; introduction to LIS/GIS; field astronomy. PREREQS: (CE 361 [C] or CEM 263 [C] or FE 208 [C])
CE 471. FOUNDATIONS FOR STRUCTURES
(3). Criteria, theory, design, and construction for foundations of structures; use of in-situ tests for geotechnical engineering; computer applications. PREREQS: CE 373 [C] or FE 316 [C]

CE 479. SLOPE AND EMBANKMENT DESIGN
(3). A comprehensive overview of evaluating stability and performance for natural and engineered slopes. Design aspects include construction of road embankments, slope remediation techniques and application of geosynthetics for slope stabilization, slope and wall construction, and drainage. CROSSLISTED as FE 479/FE 579. PREREQS: CE 373 [C] or FE 316 [C]
CE 481. REINFORCED CONCRETE I (4). Basic principles of reinforced concrete design; strength, stability, and serviceability criteria; design of reinforced concrete members for flexure and shear. Detailing, development length and splices. PREREQS: CE 382 [C] and /or equivalent.
CE 482. MASONRY DESIGN (3). A critical examination in depth of masonry design topics. PREREQS: CE 481 [C] and /or equivalent.
CE 484. WOOD DESIGN (4). Study of basic wood properties and design considerations. Design and behavior of wood connectors, beams, columns and beam columns. Introduction to plywood and glued laminated members. Analysis and design of structural diaphragms and shear walls. Lec/lab. PREREQS: CE 383 [C] or CE 481 [C] and senior or graduate standing.

CE 486. PRESTRESSED CONCRETE (3). Prestressed concrete analysis and design, systems of prestressing, materials, economics.

## PREREQS: CE 481 [C]

CE 491. TRANSPORTATION ENGINEERING
(3). Introduction to transportation engineering systems characteristics, traffic estimation, comprehensive transportation planning, highway economics, driver and vehicle characteristics, highway operations and capacity, signalization and control. Introduction to intelligent transportation.
PREREQS: (CE 392 [C] and ST 314 [C] )
CE 492. PAVEMENT STRUCTURES (3). Design and rehabilitation of pavement structures for streets, highways, and airports. PREREQS: CE 392 [C]
CE 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
CE 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.
CE 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

CE 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

CE 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

CE 508. WORKSHOP (1-3). Graded P/N. This course is repeatable for a maximum of 3 credits.

CE 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

CE 511. OCEAN ENGINEERING (4). Introduction to linear wave theory and wave forces on piles. Guided design of wave gauge facility at Coos Bay, Oregon, that requires synthesizing fluid mechanics, structural design and foundation design. PREREQS: CE 313 or CEM 311

CE 512. HYDROLOGY (4). Fundamentals of hydrology, the hydrologic cycle, precipitation, streamflow, hydrograph analysis and hydrologic measurements.
CE 513. GIS IN WATER RESOURCES (3).
Course presents Geographic Information System (GIS) technology for developing solutions to water resource problems: water quality, availability, flooding, the natural environment, and management of water resources. Typical GIS data models for hydrologic information are presented. Synthesis of geospatial and temporal water resources to support hydrologic analysis and modeling are covered. PREREQS: Senior or graduate standing in engineering or a previous introductory GIS course.

## CE 514. GROUNDWATER HYDRAULICS (4).

Principles of groundwater flow and chemical transport in confined and unconfined aquifers, aquifer testing and well construction. Design of dewatering and contaminant recovery systems. PREREQS: CE 547 [B] and or CE 313 and MTH 252 or equivalent.
CE 515. COASTAL INFRASTRUCTURE
(3). Planning and design criteria of coastal infrastructure, including breakwaters, jetties, sea walls, groins, piers, submerged pipelines, harbor design, and tsunami defense. Use of laboratory models, numerical simulations, and field observations for design. PREREQS: CE 313
CE 517. HYDRAULIC ENGINEERING DESIGN
(4). Theory, planning, analysis, and design of hydraulic structures. Application of basic principles detailed analysis and design. Engineering planning and design of water resource systems. PREREQS: CE 313
CE 518. GROUNDWATER MODELING (4).
Application of numerical methods to the solution of water flow and solute transport through saturated and unsaturated porous media. Analysis of confined and unconfined aquifers. Computer solution of large-scale field problems including groundwater contamination and aquifer yield. PREREQS: CE 514 [C]

CE 520. ENGINEERING PLANNING (4). The application of systems analysis to structuring, analyzing, and planning for civil engineering projects. Concept of the system and its environment; setting goals, objectives, and standards; evaluation criteria; solution generation and analysis; and evaluation and optimization. Project management using precedence node diagramming; resource allocation and leveling; time-cost trade-off; and PERT.
CE 524. CONTRACTS AND SPECIFICATIONS
(4). Fundamentals of construction industry contracts, including technical specifications, and issues related to time, money, warranty, insurance, and changed conditions.
CE 526. ADVANCED CONCRETE MATERIALS
(3). Cement hydration, supplementary cementing materials, micro to macro scale property development, mixture design and proportioning including material selection for sustainable design practices, durability aspects including freeze-thaw attack, corrosion of reinforcing steel, sulfate attack and alkali-silica reaction, recent advances in concrete technology. PREREQS: (CE 321 or CCE 321) or equivalent.

CE 527.TEMPORARY CONSTRUCTION
STRUCTURES (4). Design and construction of temporary structures including formwork, shoring, and earth retaining structures. PREREQS: (CE 321 or CCE 321) and (FE 315 or CE 372) and (CEM 383 or CE 383)
CE 528. PROJECT MANAGEMENT FOR CIVIL
ENGINEERS (4). Provides the prospective civil engineer with the technical knowledge and familiarity necessary to successfully and confidently manage projects of different sizes and complexity levels. It relies on basic knowledge and techniques developed by the Project Management Institute (PMI) and real-world examples (through lectures, example projects, case studies, and guest speakers) from the public and private sectors.
CE 530. SELECTED TOPICS IN STRUCTURAL ANALYSIS AND MECHANICS (3). A critical, in-depth examination of topics selected by the instructor from among topics not covered in other structural analysis and mechanics courses. This course is repeatable for a maximum of 16 credits. PREREQS: CE 585 [C]
CE 531. STRUCTURAL MECHANICS (3).
Theories of failure, multi-axial stress conditions, torsion, shear distortions, energy methods of analysis, beams on elastic foundations. Nonlinear and inelastic behavior. PREREQS: Graduate standing.
CE 532. FINITE ELEMENT ANALYSIS (4). Applications of the finite element method to structural analysis, fluid flow and elasticity problems. Use and development of large finite element computer programs. PREREQS: (CE 585 [C] or ME 520 [C] ) and /or equivalent.
CE 533. STRUCTURAL STABILITY (3). Stability theory and applications, with emphasis on design of steel structures. PREREQS: CE 383 or equivalent.

CE 534. STRUCTURAL DYNAMICS (4).
Analytical and numerical solutions for single, multi-degree of freedom and continuous vibrating systems. Behavior of structures, dynamic forces and support motions. Seismic response spectra analysis. PREREQS: CE 382 or equivalent.

## CE 535. INTRODUCTION TO RANDOM

VIBRATIONS (4). Introduction to probability theory and stochastic processes. Correlation and spectra density functions. Response of linear systems to random excitations. First excursion and fatigue failures. Applications in structural and mechanical system analysis and design. PREREQS: CE 534 [C] or (ME 422 [C] or ME 522 [C] ) and CE 534 or ME 422 or ME 522 or equivalent.

CE 537. NONLINEAR STRUCTURAL ANALYSIS (4). Material and geometric nonlinear analysis of
frame and truss structures. Solution strategies for nonlinear structural analysis. Nonlinear constitutive models of steel and reinforced concrete members. Development and use of computer programs for nonlinear analysis. PREREQS: CE 585 [C]

CE 540. SPECIAL TOPICS IN HYDRAULIC ENGINEERING (3-4). This course is repeatable for a maximum of 16 credits.

CE 543. APPLIED HYDROLOGY (4).
Advanced treatment of hydrology covering major components of the hydrological cycle with special emphasis on surface water; hydrologic analysis and design of water resource systems; runoff prediction; and simulation of surface water systems. Offered alternate years. PREREQS: BEE 512 and CE 412 or equivalent.

CE 544. OPEN CHANNEL FLOW (3). Steady, uniform, and nonuniform flow in natural and artificial open channels; unsteady flow; interaction of flow with river structures; and computational methods. PREREQS: (CE 311 and CE 313) or CE 547 or equivalent.

CE 547. WATER RESOURCES ENGINEERING I: PRINCIPLES OF FLUID MECHANICS (4). Fluid mechanics for water resources engineers, classifications of fluid flows; fluid statics and dynamics, incompressible viscous flows; dimensional analysis; applications to fluid machinery, flow through porous media, fluid motion in rivers, lakes, oceans. PREREQS: Graduate standing.
CE 548. WATER QUALITY DYNAMICS (3). Mass balance, advection and diffusion in streams, lakes and estuaries; thermal pollution, heat balance, oxygen balance, and eutrophication; mathematical models; and numerical solutions.

CE 551. COMPUTER-AIDED SITE AND ROAD
DESIGN (4). Site development and road design principles and application to a comprehensive design project using computer-based digital terrain model software tools. Lec/lab/rec. PREREQS: CE 392*

CE 552. ISOLATED SIGNALIZED
INTERSECTIONS (3). Relationships between signal display, user response, vehicle detection, and signal timing parameters are examined in detail. Traffic simulation is introduced to visualize and design the various elements of isolated signalized intersections. PREREQS: CE 595, Traffic Operations and Design, is recommended but not required.
CE 553. RAILROAD ENGINEERING (3). The principal subject of this course is the railway infra-structure and operational issues related to high speed passenger rail and freight rail (class 1 and regional rail). The course will cover the techniques used to design, construct, monitor and maintain railway track. Class will include field trips. PREREQS: Or permission of instructor. COREQS: CE 392

CE 554. DRIVING SIMULATION (3).
Relationships between the functional elements of driving simulation (simulation computer processing, sensory feedback generation, sensory display devices, and the human operator) are examined in detail. The role of driving simulation in transportation engineering research and practice is also considered in depth. Students will design experiments, analyze and interpret data, and extrapolate simulator results to real-world scenarios. PREREQS: CE 595 is recommended but not required.

CE 560. SELECTED TOPICS IN GEOMATICS
ENGINEERING (0-4). Selected topics on contemporary problems in geomatics engineering; application of ongoing research from resident and visiting faculty. This course is repeatable for a maximum of 16 credits.
CE 561. PHOTOGRAMMETRY (3). Geometry of terrestrial and vertical photographs, flightline planning, stereoscopy and parallax, stereoscopic plotting instruments, analytical photogrammetry,
orthophotography, introduction to photo interpretation, and aerial cameras. PREREQS: CE 361 or CEM 263 or FE 208

CE 562. DIGITAL TERRAIN MODELING (4). Fundamentals of LIDAR and creating digital terrain models. Computational geometry, Delaunay triangulations, spline interpolations, statistical gridding methods, ground filtering, data optimizations, and advanced topics in 3D modeling. PREREQS: CE 361 or CEM 263 or equivalent surveying or GIS course.
CE 563. CONTROL SURVEYING (4). Global Positioning Systems (GPS) theory, networks, and fieldwork; control specifications, methods and problems in obtaining large area measurements; precise leveling; network adjustments using least square techniques; field instrument adjustments PREREQS: CE 361 or CEM 263 or FE 208
CE 565. OREGON LAND SURVEY LAW (3). Introduction to U.S. public land survey; Oregon state statutes, common law decisions, and administrative rules dealing with boundary law; case studies; unwritten land transfers; original and resurvey platting laws; guarantees of title; deed descriptions. PREREQS: CE 361 or CEM 263 or FE 208

CE 566. 3D LASER SCANNING AND IMAGING
(4). Fundamentals of lidar acquisition, registration processing, modeling, analysis, and verification. Use of sensor platforms for 3D acquisition. Effective data management procedures. Introduction to other imaging techniques including structure from motion and structured light. Lec/lab.

CE 568. LEAST SQUARES ADJUSTMENTS
(3). Examines the theory of random error and statistical testing. Discusses the propagation of error in both indirect observations and direct observations from survey. Studies weights of observations and the principles of least squares. Explains how to adjust redundant observations in level nets, horizontal surveys, GNSS networks, and GNSS and terrestrial survey networks by least squares. Estimates the error ellipses of the adjusted observations. Evaluates methods for performing coordinate transformations. PREREQS: CE 361 or CEM 263 or FE 208

CE 569. PROPERTY SURVEYS (3). U.S. public land survey: restoration of corners, subdivision of sections; topographic mapping; subdivision and partition plats, resurvey plats, subdivision design; introduction to LIS/GIS; field astronomy. PREREQS: CE 361 and CEM 263 or FE 208

CE 570. GEOTECHNICAL SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## CE 571. ADVANCED FOUNDATION

ENGINEERING (4). Presents the planning, analysis, and design of shallow and deep foundations from the geotechnical engineering perspective. Topics supporting course objectives include planning and execution of subsurface investigations, interpretation of in-situ tests, analysis and design of deep and shallow foundations, including geotechnical capacity, and immediate settlement. Assessment of deep foundation installation, axial and lateral loading tests, and group effects is presented. Evaluation of foundation performance is conducted under deterministic and probabilistic frameworks. PREREQS: CE 373 and CE 471 or equivalent, or consent of instructor.

## CE 572. ADVANCED GEOTECHNICAL

LABORATORY (4). Examination of soil composition and engineering properties of soils including volume change, pore pressure generation, strength, and deformation behavior of soils in the laboratory. Advanced static and cyclic shear strength testing of soils will also be discussed. Lec/lab. PREREQS: (CE 373 and CE 471) or equivalent, or consent of instructor.

CE 574. ENGINEERING PROPERTIES OF
SOILS (5). Advanced laboratory experimental methods for measurement of soil properties.

Analysis of experimental data, and methods to display data for 2D and 3D experiments. Compositional and environmental factors affecting the stress-strain, volume change, compressibility, shear strength behavior of sand, clay, and compacted soils in 2D and 3D. Stress and strain invariants and modeling of failure criteria. PREREQS: CE 471

CE 575. EARTH RETENTION AND SUPPORT
(4). Presents the theory and practice of design and construction of earth retaining structures. Topics include rigid and flexible retaining structures, ranging from gravity and cantilever systems, cantilever and anchored sheet piling, tied-back shoring elements, soil nailing, and mechanically stabilized earth walls. These topics are developed with a view on compaction stresses and surface loading, and invokes approaches that range from the static equations of equilibrium to empirical rules of thumb. PREREQS: CE 373
CE 576. GROUND IMPROVEMENT (3). Presents the analysis and design of ground improvement techniques. Topics supporting course objectives include design for accelerated settlement (surcharge design) with and without pre-fabricated vertical drains, vibro-compaction, vibroreplacement (stone columns) and aggregate piers, deep soil mixing, jet grouting, EPS geofoam, and other improvement techniques for improving soil strength and stability, and limiting deformations and the effects of liquefaction. PREREQS: CE 572 [C] and CE 577 [C] and /or equivalent, or consent of the instructor.

## CE 577. STATIC AND DYNAMIC SOIL

BEHAVIOR (3). An advanced coverage of volume change and strength behavior of soil. Specific course topics include effective stress, one-dimensional compression of soil, rate of soil consolidation, Mohr circle analysis, shear strength of sands, clays, and silts, and dynamic soil properties, strength, and testing. PREREQS: CE 372 and CE 373 or equivalent or consent of instructor.

## CE 578. GEOTECHNICAL EARTHQUAKE

 ENGINEERING (4). Major course topics include engineering seismology, strong ground motion, seismic hazard analysis, soil dynamics, seismic site response, earthquake motion selection, liquefaction, and seismic slope stability. Attention will be given to earthquakes created by the Cascadia Subduction Zone. Lec/lab. PREREQS: CE 373 and CE 471 or equivalent, or consent of the instructor.CE 579. SLOPE AND EMBANKMENT DESIGN
(3). A comprehensive overview of evaluating stability and performance for natural and engineered slopes. Design aspects include construction of road embankments, slope remediation techniques and application of geosynthetics for slope stabilization, slope and wall construction, and drainage. CROSSLISTED as FE 479/FE 579. PREREQS: CE 373 or FE 316
CE 580. SELECTED TOPICS IN STRUCTURAL
DESIGN (3). A critical examination in depth of topics selected by the instructor from among topics not covered in other structural design courses. This course is repeatable for a maximum of 18 credits.

CE 581. REINFORCED CONCRETE I (4). Basic principles of reinforced concrete design; strength, stability, and serviceability criteria; design of reinforced concrete members for flexure and shear. Detailing, development length and splices. PREREQS: CE 382 or equivalent.

CE 582. MASONRY DESIGN (3). A critical examination in depth of topics selected by the instructor from among topics not covered in other structural design courses. PREREQS: CE 581 or equivalent.
CE 583. BRIDGE DESIGN (3). AASHTO specifications for bridge design; load models; design for moving loads; design and analysis of bridge decks and simple and continuous bridge
spans. PREREQS: CE 381 and CE 382 and (CE 481 or CE 581). It's recommended that students take CE 383 concurrently with CE 583.
CE 584. WOOD DESIGN (4). Study of basic wood properties and design considerations. Design and behavior of wood connectors, beams, columns and beam columns. Introduction to plywood and glued laminated members. Analysis and design of structural diaphragms and shear walls. Lec/lab. CROSSLISTED as WSE 558. PREREQS: CE 383 or CE 481 with a minimum grade of C, senior or graduate standing.
CE 585. MATRIX STRUCTURAL ANALYSIS
(4). Development of matrix methods for linear structural analysis. Force and displacement methods of analysis. Virtual work principles. Use of computer programs to analyze structures. Introduction to finite-element method. PREREQS: CE 382 or equivalent.
CE 586. PRESTRESSED CONCRETE (3).
Prestressed concrete analysis and design, systems of prestressing, materials, economics. PREREQS: CE 581

CE 588. PROBABILITY-BASED ANALYSIS AND DESIGN (4). Application of probability and statistics in the analysis and design of civil and mechanical engineering systems. Probabilistic modeling of loading and resistance. Probabilitybased design criteria including load and resistance factor design. PREREQS: ST 314 or equivalent.
CE 589. SEISMIC DESIGN (4). Design of structures to resist the effects of earthquakes. Introduction to structural dynamics, dynamic analysis, seismic design philosophy, code requirements, and detailing for steel and reinforced concrete. PREREQS: CE 383 or CE 481 or equivalent.

CE 590. SELECTED TOPICS IN
TRANSPORTATION ENGINEERING (1-3). Selected topics on contemporary problems in transportation engineering; application of ongoing research from resident and visiting faculty. This course is repeatable for a maximum of 9 credits.
CE 591. TRANSPORTATION SYSTEMS
ANALYSIS, PLANNING, AND POLICY (3).
The systems approach and its applications to transportation engineering and planning. The making of transportation plans and policies. Development of transportation models. Transportation system performance. Decision analysis. Evaluation of transportation projects. Environmental and social impacts of transportation.

CE 592. PAVEMENT STRUCTURES (3). Design and rehabilitation of pavement structures for streets, highways, and airports. PREREQS: CE 392
CE 593. TRAFFIC FLOW ANALYSIS AND
CONTROL (4). Traffic operations and control systems; traffic flow theory and stream characteristics; capacity analysis; traffic models and simulation; accident and safety improvement. Offered alternate years.
CE 594. TRANSPORT FACILITY DESIGN (4). Location and design of highways, and other surface transportation terminals; design for safety, energy efficiency, and environmental quality. Offered alternate years. Lec/rec. PREREQS: CE 392

CE 595. TRAFFIC OPERATIONS AND DESIGN
(3). Traffic operations and engineering; human and vehicular characteristics; traffic stream characteristics; highway capacity analysis; intersection operation, control and design.
PREREQS: CE 491*
CE 596. PAVEMENT EVALUATION AND
MANAGEMENT (3). Advanced topics in pavement evaluation techniques and pavement management procedures. PREREQS: CE 492

CE 597. PUBLIC TRANSPORTATION (3).
Characteristics and nature of public transportation systems, including bus, light and heavy rail; financing policy considerations; planning transit service; managing and operating transit systems for small and large urban areas. Offered alternate years.

CE 598. AIRPORT PLANNING AND DESIGN
(3). Characteristics and nature of the air transport system. Airport financing, air traffic control. Analysis and design of airports and the airport planning processes. Airport appurtenances. Airport pavement design, environmental facilities and drainage. Offered alternate years.

CE 599. INTELLIGENT TRANSPORTATION
SYSTEMS (3). Introduction to intelligent transportation systems, including enabling surveillance, navigation, communication and computer technologies. Application of technologies for monitoring, analysis evaluation and prediction of transportation system performance. Intervention strategies, costs and benefits, safety, human factors, institutional issues and case studies. Offered alternate years. PREREQS: CE 491 is a corequisite for new graduate students.

CE 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

CE 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

CE 605. READING AND CONFERENCE (1-16) This course is repeatable for a maximum of 16 credits.
CE 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
CE 607. OCEAN ENGINEERING SEMINAR (1). Presentations from on-campus and off-campus speakers discussing state of technology topics in ocean engineering research, development, and construction. Graded P/N. This course is repeatable for a maximum of 16 credits.

CE 630. OCEAN WAVE MECHANICS I (3). Linear wave boundary value problem formulation and solution, water particle kinematics, shoaling, refraction, diffraction, and reflection. Linear long wave theory with applications to tides, seiching, and storm surge. CROSSLISTED as OC 630. Lec/ lab.

## CE 631. OCEAN WAVE MECHANICS II

(3). Second in the sequence of ocean wave engineering mechanics, covers the following topics: introduction to long wave theory, wave superposition, wave height distribution, and the wind-wave spectrum, introduction to wave forces, and basic nonlinear properties of water waves. May include additional selected topic in wave mechanics. CROSSLISTED as OC 631. PREREQS: (CE 630 [C] or OC 630 [C] )
CE 634. LONG WAVE MECHANICS (3). Theory of long waves. Depth-integrated Euler's equation and its jump conditions. Evolution equations and their solutions. Nonlinear shallow-water waves, the Korteweg-deVries equation and Boussinesq equation. Boundary-layer effects. Shallow-water waves on beaches. Applications of the fundamentals to problems of tsunamis. CROSSLISTED as OC 634. PREREQS: (CE 630 [C] and CE 631 [C] ) and OC 670 or equivalent.
CE 635. APPLIED MODELING OF NEARSHORE PROCESSES (4). An introduction to numerical modeling of the nearshore ocean, providing hands-on experience with state-of-the-art numerical models for wave propagation, nearshore circulation, planform shoreline evolution and bathymetric profile evolution. The focus is on review of model requirements, detailed study of several specific models for several domains of interest, application to coastal phenomena, and the interpretation of model results. Offered alternate years. CROSSLISTED as OC 635.
CE 639. DYNAMICS OF OCEAN STRUCTURES (3). Dynamic response of fixed and compliant structures to wind, wave and current loading;

Morison equation and diffraction theory for wave and current load modeling, time and frequency domain solution methods; application of spectral and time series analyses; system parameter identification; and stochastic analysis of fatigue and response to extreme loads. Offered alternate years.

CE 640. SELECTED TOPICS IN OCEAN AND COASTAL ENGINEERING (1-3). Selected topics on contemporary problems in ocean and coastal engineering; application of ongoing research from resident and visiting faculty. Offered alternate years. This course is repeatable for a maximum of 9 credits. PREREQS: CE 630

CE 642. RANDOM WAVE MECHANICS (3). Random wave theories, probability and statistics of random waves and wave forces, time series analyses of stochastic processes, ocean wave spectra. Offered alternate years. PREREQS: CE 630 [C]

CE 643. COASTAL ENGINEERING (3). Coastal sediment transport including nearshore currents, longshore onshore-offshore transport, and shoreline configuration; equilibrium beach profile concept with application to shore protection; shoreline modeling; tidal inlet hydrodynamics and inlet stabilization; design criteria for soft structures Offered alternate years. PREREQS: CE 630 [C]

## CE 645. WAVE FORCES ON STRUCTURES

(3). Wave forces on small and large members, dimensional analyses and scaling of equations, identification and selection of force coefficients for Morison equation; compatibility of wave kinematics and force coefficients in Morison equation, diffraction and radiation of surface gravity waves by large floating bodies, wavemaker problem, and reciprocity relations. PREREQS: CE 630 [C]
CE 647. OCEAN AND COASTAL ENGINEERING
MEASUREMENTS (3). Hands-on experience in the conduct of field and laboratory observations, including waves, currents, wind, tides, tsunami, sediments, bathymetry, shore profiles, wave forces on structures, and structural response. Online data archival and retrieval systems. PREREQS: CE 630 [C]

CE 808. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

## - CONSTRUCTION ENGINEERING MANAGEMENT COURSES

CEM 263. PLANE SURVEYING (3). Use of field surveying equipment; error analysis; plane surveying methods applied to construction; plane coordinate computations; topographic mapping; and introduction to GPS. Lec/lab. PREREQS: (ENGR 211 [C] or ENGR 211H [C] ) and sophomore standing in engineering.
CEM 311. HYDRAULICS (4). Pressure and energy concepts of fluids, fluid measurements, flow in pipes and open channels. PREREQS: (ENGR 211 [C] or ENGR 211H [C] )
CEM 341. CONSTRUCTION ESTIMATING I (4). Fundamentals of estimating and bidding construction projects; plan reading, specification interpretation; quantity take-off; types of estimates; estimating and methods of construction for sitework, concrete, and carpentry; estimating subcontracts, estimating job overhead and home office overhead; estimating profit, and computeraided estimating. PREREQS: CE 102 and CE 201. CEM 341 and CEM 342 must be taken in order.
CEM 342. CONSTRUCTION ESTIMATING II (4). Fundamentals of estimating and bidding construction projects; plan reading, specification interpretation; quantity take-off; types of estimates; estimating and methods of construction for sitework, concrete, and carpentry; estimating subcontracts, estimating job overhead and home office overhead; estimating profit, and computeraided estimating. PREREQS: CEM 341 [C]
CEM 343. CONSTRUCTION PLANNING AND SCHEDULING (4). Principles of construction
planning, scheduling, and resource optimization; scheduling techniques and calculations; methods for integrating project resources (materials, equipment, personnel, and money) into the schedule. PREREQS: CEM 342* [C]
CEM 381. STRUCTURES I (4). Introduction to statically determinate analysis and design of steel structures. Lec/rec. PREREQS: (ENGR 213 [C] or ENGR 213H [C] )
CEM 383. STRUCTURES II (4). Analysis and design of building elements of concrete and timber; detailing and fabrication. Lec/rec. PREREQS: (CCE 321* [C] and CEM 381 [C])
CEM 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
CEM 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

CEM 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

CEM 407. SEMINAR (1). Professional practices of construction engineering management.

CEM 431. OBTAINING CONSTRUCTION
CONTRACTS (4). Preparing and effectively presenting detailed and complete proposals for the execution of construction projects. PREREQS: CEM 341 [C]

## CEM 432. CONSTRUCTION PROJECT

PLANNING (3). Planning and preparing cost estimates, schedules, site logistics plans for executing construction projects; presenting written and oral construction proposals. PREREQS: CEM 341 [C]
CEM 441. HEAVY CIVIL CONSTRUCTION
MANAGEMENT (4). Heavy civil construction management methods. Construction equipment types, capabilities, costs, productivity, and the selection and planning of equipment needed for a project. Soil characteristics, quantity analysis, and movement on construction sites. PREREQS: (FE 315 [C] or CE 372 [C] )
CEM 442. BUILDING CONSTRUCTION MANAGEMENT (4). Building construction management and methods.

## CEM 443. ^PROJECT MANAGEMENT FOR

CONSTRUCTION (4). Project management concepts for construction; concepts, roles and responsibilities, labor relations and supervision, administrative systems, documentation, quality management, and process improvement. (Writing Intensive Course)

CEM 471. ELECTRICAL FACILITIES (4).
Principles and applications of electrical
components of constructed facilities; basic electrical circuit theory, power, motors, controls, codes, and building distribution systems. Lec/lab.
CEM 472. MECHANICAL FACILITIES (3).
Principles and applications of mechanical components of constructed facilities; heating, ventilating, air conditioning, plumbing, fire protection, and other mechanical construction.
CEM 541. HEAVY CIVIL CONSTRUCTION
MANAGEMENT (4). Heavy civil construction management methods. Construction equipment types, capabilities, costs, productivity, and the selection and planning of equipment needed for a project. Soil characteristics, quantity analysis, and movement on construction sites. PREREQS: FE 315 or CE 372
CEM 543. PROJECT MANAGEMENT FOR CONSTRUCTION (4). Project management concepts for construction; concepts, roles and responsibilities, labor relations and supervision, administrative systems, documentation, quality management, and process improvement.
CEM 550. CONTEMPORARY TOPICS
IN CONSTRUCTION ENGINEERING
MANAGEMENT (4). Contemporary topics
of emerging technologies and processes, construction engineering and management, how industry environmental change causes development of new technologies, and the applications of the technologies in the field. PREREQS: CEM or CE degree or 3 years professional construction experience or instructor approval required.

CEM 551. PROJECT CONTROLS (4). Advanced methods of project controls including advanced technologies and methodologies for quality, time, and cost management; project management organization models, and intra-organizational relationships. PREREQS: Graduate standing and CEM or CE degree or 3 years professional construction experience, or instructor approval.

## CEM 552. RISK MANAGEMENT IN

CONSTRUCTION (4). An introduction to the concept of risk in construction projects and construction firms, including risk definition, identification, assessment and management techniques; contractual risk control, sharing and shedding; and contingency management. PREREQS: Graduate standing and CEM or CE degree or 3 years of professional construction experience or instructor approval required.

## CEM 553. CONSTRUCTION BUSINESS

MANAGEMENT (4). Introduction to concepts of business structures associated with the construction industry; enterprise-level management techniques; extra-organizational risk management; and operational management structuring. PREREQS: Graduate standing and CEM or CE degree or three years professional construction experience or instructor approval.

## SCHOOL OF ELECTRICAL ENGINEARING AND COMPUTER SCIENCE

V. John Mathews, School Head 1148 Kelley Engineering Center Oregon State University
Corvallis, OR 97331-5501
541-737-3617
Website: http://eecs.oregonstate.edu/

## FACULTY

Distinguished Professor Dietterich Professors Bailey, Bose, Burnett, Conley, Cull (Emeritus), Erwig, A. Fern, Fiez, Lee, Liu, Mayaram, Moon, Pancake (Emeritus), Tadepalli, Temes, von Jouanne, Wager, Weisshaar

## Associate Professors

Borradaile, Brekken, Budd
(Emeritus), Chiang, Dhagat, X. Fern, Groce, Hamdaoui, Hanumolu, Jander, Jensen, Magaña, Minoura (Emeritus), Nguyen, Plant, Raich, Scaffidi, Todorovic, Wong, E. Zhang
Assistant Professors T. Anand, Bobba, L. Chen, Cheng, CotillaSanchez, Dig, Hendrix, L. Huang, Hutchinson, Johnston, Kim, F. Li, Natarajan, Nayyeri, Ramsey, Rosulek, Sarma, Termehchy, Walkingshaw, Wang, Yavuz, J. Zhang
Senior Instructor Traylor
Instructors Alcon, Brewster, Ehsan,
McGrath, O'Hara, Parham-Mocello, Redfield, Rooker, Schutfort, Shuman, Sweet, Van Londen, Wolford
Faculty Research Assistant 1 Irvine

Faculty Research Assistant Heer, Presley
Assistant Professor Senior
Research Y. Zhang

## Undergraduate Majors

Computer Science (BA, BS, CRED, HBA, HBS)
Options
Applied Computer Science
Computer Science Double Degree
Computer Systems
Electrical and Computer Engineering (BS, CRED, HBS)

Undergraduate Minor
Computer Science
Graduate Majors
Computer Science (MA, MAIS, MEng, MS, PhD)
Graduate Areas of Concentration Algorithms and Cryptography Artificial Intelligence, Machine Learning and Data Science
Computer Graphics, Visualization, and Vision
Computer Systems and Networking Human-Computer Interaction
Programming Languages Software Engineering
Electrical and Computer Engineering (MEng, MS, PhD)
Graduate Areas of Concentration Analog and Mixed Signal
Artificial Intelligence and Machine Learning
Communications and Signal Processing Computer Systems
Energy Systems
Materials and Devices
RF/Microwaves/optoelectronics

## Graduate Minors <br> Computer Science <br> Electrical and Computer Engineering

Consistent with the mission of the university and college, the mission of the School of Electrical Engineering and Computer Science at Oregon State University is to provide a comprehensive, state-of-the-art education that prepares our students to be successful in engineering and computing practice and advanced studies.

The school has traditionally strong undergraduate programs and one of the largest graduate programs within the university, with internationally recognized research programs in the areas of mixed signal integration, artificial intelligence and machine learning, computer graphics and vision, energy systems, multimedia and networking, materials and devices, end-user software, humancomputer interaction, and signal processing and communications systems.

## ELECTRICAL AND COMPUTER ENGINEERING

The School of EECS offers programs leading to the BS, MS, MEng, and PhD degrees in Electrical and Computer Engineering (ECE).
Electrical and computer engineers engage in the design, construction and programming, and applications of electronic and integrated circuits, digital computers and embedded systems, power generation and utilization, communication and computer networks, electronic materials and devices, electromagnetic, microwave and optical circuits and systems, control systems, and signal processing and conditioning.

Course work leading to the BS degree consists of courses in many of these topics, as well as courses in the supporting disciplines of mathematics, physical sciences, and computer science. Students select further study beyond the required courses for either more depth in a subdiscipline or further breadth across engineering. Students fulfill humanities and social science requirements as specified by the university's baccalaureate core program. The BS program is supported by well-equipped laboratories providing hands-on experience with electronic circuits, digital logic, electronic and photonic materials, electric machines, IC design, optoelectronics, RF techniques, instrumentation, and microprocessors.

The program incorporates engineering design principles throughout the undergraduate curriculum. This includes the integration of societal, economic, legal, regulatory, ethical, environmental, and other factors into the technical aspects of engineering design. Design activities begin in the freshman orientation sequence, which incorporates openended design problems, and continues throughout the curriculum. The design experience culminates with a yearlong senior design project. Within the senior design experience, students working in teams complete all phases of a design project under the supervision of a faculty member.
Graduates of this program are prepared to either seek industrial employment or pursue advanced graduate degrees.
The BS degree in Electrical and Computer Engineering (ECE) is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone 410-347-7700.

The Electrical and Computer Engineering graduate program provides opportunities for both MS and PhD thesis programs and a MEng course work-based program in the following areas: analog and mixed signals, communications and signal processing, computer systems and networking, energy systems, materi-
als and devices, and RF/microwave optoelectronics. Graduate work is supported by the school's well-equipped laboratory facilities. Opportunities exist for graduate students to participate in many research projects sponsored by private industry and government agencies.

The School of Electrical and Computer Science faculty, advising procedures, undergraduate programs' educational objectives, graduate program application procedures, research areas, and many other aspects may be found at the school's website: http://eecs.oregonstate. edu/.

The Multiple Engineering Cooperative Program (MECOP) offers industrial internships to selected students in the discipline areas of computer science, electrical engineering, and computer engineering.

## COMPUTER SCIENCE

The School of EECS offers programs leading to BA, BS, MA, MAIS, MEng, MS, and PhD degrees in Computer Science (CS).

Computer science is the heart of cut-ting-edge computing software. Computer scientists invent software that enables computers to do new things. They design programming languages, compilers, operating systems, games, databases, computer networks, and user interfaces. They solve complex challenging problems in a wide range of fields that can make a positive difference in the world.

Computer science majors learn skills to create realistic graphics, design new problem-solving tools that anyone can use, and create new solutions for business, medical diagnoses, games and entertainment. Their programming skills enable computers to "learn" as they process data, as well as assist in social communication and technologies for the disadvantaged.

Computer science offers a foundation that permits graduates to learn how to make software work well, how to make it fast, how to make it correct, how to find where innovation is needed, and how to understand the people who will be using it, so as to make it genuinely useful and compelling to people. Much of computer science course work is carried out in teams, and students gain experience in teamwork, in professionalism in writing, in working with clients, and in making presentations of their teams' efforts.

Course work leading to the BS degree consists of required courses in many of these topics, as well as courses in supporting disciplines such as mathematics. The BS program is supported by well-equipped computer laboratories. Students select further study beyond the required core courses, opting for either more depth in computer science, for breadth in business and entrepreneurship, or for grounding in an applications
area for their computing skills. The BS program culminates with a yearlong senior capstone project. Within the senior capstone experience, students working in teams complete all phases of a software project under the supervision of a faculty member.

Graduates of this program are prepared either to pursue advanced graduate degrees or to seek employment in business, industry or government.

The BS degree in Computer Science (CS) with Computer Systems option is accredited by Computing Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone 410-347-7700. The BA degree is not ABET accredited.

The computer science graduate program provides opportunities for MS and PhD thesis, MS non-thesis, and MEng course work-based programs in the following areas: artificial intelligence and machine learning, computer systems and networking, graphics and visualization, human-computer interaction, programming languages, software engineering, algorithms. Graduate work is supported by the school's well-equipped laboratory facilities. Opportunities exist for graduate students to participate in many research projects sponsored by private industry and government agencies.
The School of Electrical and Computer Science faculty, advising procedures, undergraduate programs' educational objectives, graduate program application procedures, research areas, and many other aspects may be found at the school's website: http://eecs.oregonstate. edu/.
The Multiple Engineering Cooperative Program (MECOP) offers internships to selected students in the discipline areas of computer science, electrical engineering, and computer engineering.

## UNDERGRADUATE MAJORS WITH OPTIONS

COMPUTER SCIENCE (BA, BS, CRED, HBA, HBS)

## Also available at OSU-Cascades campus and via Ecampus.

The computer science undergraduate curriculum has the following objectives:

1. Graduates of the program will have successful careers.
2. Graduates of the program will continue to learn and adapt to a changing world.
Entering undergraduate students must choose and complete options 1 or 2 to earn a degree in Computer Science. Entering post-baccalaureate students may select options 1 and 2 that are offered on campus or the online Computer Science Double Degree option offered by Ecampus.
3. Applied Computer Science (BA, BS, HBA, HBS)
4. Computer Systems (BA, BS, HBA, HBS)
5. Computer Science Double Degree (BS, HBS)
For students entering the undergraduate program, the recommended high school preparation is four years of mathematics, science, and English. High school programming or computer applications courses should not be taken in place of other college preparatory courses.

Each option has its own requirements. Please select a specific option for details.
Pre-Computer Science Major Code: 335
Major Code: 307

## OPTIONS

## APPLIED COMPUTER SCIENCE OPTION

## Also offered at OSU-Cascades

 campus.The Applied Computer Science option is for students who want to combine the study of computer science with an indepth examination of a field in which computer science plays an important role. This option requires an approved program of study for each student. Students build their own program of study to include their choice of CS electives plus an Applied CS program. The Computer Science Undergraduate Curriculum Committee reviews these programs of study for approval. Existing OSU minors may be proposed for use both as an Applied CS program and as a minor.

## Program for Applied Computer

 Systems OptionPre-Professional Program: Computer Science

## Required for Pro-School

## Admittance:

COMM 111. *Public Speaking (3)
or COMM 114. *Argument and Critical

## Option Code: 354

## COMPUTER SCIENCE DOUBLE

 DEGREE OPTION
## Also available via Ecampus.

The Computer Science Double Degree option is for students who want to combine a bachelor's degree in computer science with a bachelor's degree in another field. Since computer science is relevant in so many diverse disciplines, students
can obtain a computer science degree in combination with virtually any other degree. Those who already hold a bachelor's degree-a BA or BS-from an accredited institution can add to their existing skill set and enhance their job prospects by earning a computer science degree online from OSU. The program of study includes the core courses in computer science, and also includes courses at the leading edge of computing technologies, software design, web development, and mobile/cloud computing.

All of the courses in the Double Degree option are offered through Ecampus, and most of the courses are also offered oncampus. This degree requires students to be enrolled as online students selecting DSC-Distance Degree Corvallis as their campus.

## Second Bachelor's Degree in <br> Another Discipline

Students who choose the Computer Science Double Degree option may pursue a degree in computer science concurrently while earning a second bachelor's degree, or may pursue the computer science
degree as a post-baccalaureate degree.

## Required Computer Science

## Courses

CS 161. Introduction to Computer Science I (4)

CS 352. Introduction to Usability Engineering (4)
CS 373. Defense Against the Dark Arts (4)
CS 464. Open Source Software Development (4)

CS 475. Introduction to Parallel Programming (4)
CS 496. Mobile and Cloud Software Development (4)

## Total=60 credits

Pre-Computer Science Major

## Option Code: 297

## COMPUTER SYSTEMS OPTION

The Computer Systems option is for students who want to take up computer science as a career and seek an in-depth understanding of computer science as an academic discipline. This option provides excellent preparation for those who plan to work for companies developing systems software or embedded systems. It also provides excellent preparation for those who plan to pursue an MS or PhD in computer science.

## ELECTRICAL AND COMPUTER

 ENGINEERING (BS, CRED, HBS)The curriculum in Electrical and Computer Engineering provides a wide range of opportunities in undergraduate study in the electrical engineering areas of communications, signal processing and controls, electronics and integrated circuits, power electronics and energy systems, materials and devices, electromagnetism, microwaves and optics, and the computer engineering areas of computer architecture, digital hardware design, and computer networks.

The Electrical and Computer Engineering undergraduate program has the following objectives:

1. Graduates of the program will have successful careers.
2. Graduates of the program will
continue to learn and adapt to a changing world.
The Electrical and Computer Engineering undergraduate degree program includes a common set of core courses that provides a solid foundation, plus 29 -credits of restricted electives. The restricted electives allow students to prepare for industry, graduate study, or other career paths, specializing or broadening further their knowledge and skills. Elective course work is available focusing on sustainability and renewable energy, computers and networks, energy systems, integrated circuits, systems signals and communications, materials and devices, RF/microwaves and optoelectronics, and robotics and control. The sustainability and renewable energy focus addresses global technological challenges balancing societal needs with environmental and economic tradeoffs. Further details on restricted electives can be found on the EECS website: http://eecs.oregonstate.edu/.

Except as approved by the ECE curriculum committee, the 29 credits of restricted electives must include either CS 344 or ECE 390, plus four ECE 400-level electives and one additional 400-level elective from the approved list.

The ECE curriculum has been designed to meet the following minimum requirements, which still must be met if specific courses are waived:

- Mathematics and basic sciences: 45 credits
- Engineering science and design: 67.5 credits
- Upper-division courses: 60 credits

## Professional Electrical and

## Computer Engineering Curriculum

## Junior Year

ECE 322. Electronics I (3)
ECE 323. Electronics II (3)
ECE 341. Junior Design I (3)
ECE 342. Junior Design II (3)
ECE 351. Signals and Systems I (3)
ECE 352. Signals and Systems II (3)
ECE 353. Introduction to Probability and Random Signals (3)
ECE/CS 372. Introduction to Computer Networks (4) ${ }^{6}$
ECE 375. Computer Organization and
Assembly Language Programming (4)
ECE 391. Transmission Lines (3) ${ }^{6}$
Difference, Power and Discrimination course (3) ${ }^{\mathbf{1}}$

## Restricted Electives:

ECE 390. Electric and Magnetic Fields (4) or CS 344. Operating Systems I (4)
Contemporary Global Issues course (3) ${ }^{\mathbf{1}}$
WR 327. *Technical Writing (3)

## Senior Year

CS 391. *Social and Ethical Issues in Computer Science (3)
ECE 441, ECE 442, ECE 443. ${ }^{\wedge}$ Engineering Design Project $(3,3,2)$
Perspectives course (3) ${ }^{\mathbf{1}}$
Restricted Electives: four 400-level ECE courses (12-16) ${ }^{6}$
Restricted Electives: one 400-level course $(3-4)^{6}$

## Restricted Electives (5-10) ${ }^{6}$

## Current List of Restricted Electives:

CH 411. Inorganic Chemistry (3)
CHE 444. Thin Film Materials Processing (4)
CHE 499. Special Topics [Conventional
Alternative Energy Systems] (3)
CS 325. Analysis of Algorithms (4)
CS 331. Introduction to Artificial Intelligence (4)
CS 344. Operating Systems I (4)
CS 434. Machine Learning and Data Mining (4)

CS 444. Operating Systems II (4)
CS 450. Introduction to Computer Graphics (4)

ECE 331. Electromechanical Energy Conversion (4)
ECE 390. Electric and Magnetic Fields (4)
ECE 406. Projects (1-6)
ECE 411. Engineering Magnetics (3)
ECE 413. Sensors (3)
ECE 415. Material Science of

Nanotechnology (3)
ECE 416. Electronic Materials and Devices (4)

ECE 417. Basic Semiconductor Devices (4)
ECE 418. Semiconductor Processing (4)
ECE 422. CMOS Integrated Circuits I (4)
ECE 423. CMOS Integrated Circuits II (4)
ECE 428. Data Converters (4)
ECE 431. Power Electronics (4)
ECE 432. Dynamics of Electromechanical Energy Conversion (4)
ECE 433. Power System Analysis (4)
ECE 437. Smart Grid (3)
ECE 438. Electric and Hybrid Vehicles (4)
ECE 451/ME 430. Systems Dynamics and Control (4)
ECE 461. Introduction to Analog and Digital Communications (4)
ECE 462. Digital Communications and Channel Coding (4)
ECE 463. Wireless Communications Network (4)
ECE 464. Digital Signal Processing (4)
ECE 468. Digital Image Processing (3)
ECE 471. Energy-Efficient VLSI Design (4)
ECE/CS 472. Computer Architecture (4)
ECE 473. Microcontroller System Design (4)
ECE 474. VLSI System Design (4)
ECE/CS 476. Advanced Computer
Networking (4)
ECE 477. Multimedia Systems (4)
ECE 478. Network Security (4)
ECE/PH 482. Optical Electronic Systems (4)
ECE/PH 483. Guided Wave Optics (4)
ECE 484. Antennas and Propagation (4)
ECE 485. Microwave Design Techniques (4)
ECE 499. Special Topics (3-4)
ECE 520. Analog CMOS Integrated Circuits (4)

ECE 530. Contemporary Energy Applications (4)
ECE 534. Advanced Electrical Machines (3)
ECE 536. Power System Protection (3)
ECE 550. Linear Systems (4)
ME/NSE 311. Introduction to Thermal-Fluid Sciences (4)
ME 317. Intermediate Dynamics (4)
MTH 341. Linear Algebra I (3)
MTH 342. Linear Algebra II (4)
MTH 351. Introduction to Numerical Analysis (3)
PH 315. Physics of Contemporary
Challenges (3)
PH 481. Physical Optics (4)
ROB 421. Applied Robotics (4)
ROB 456. Intelligent Robots (4)

## Footnotes:

* Baccalaureate Core Course (BCC)
${ }^{\wedge}$ Writing Intensive Core Course (WIC)
${ }^{\text {E }}$ Required for entry into the professional program.
${ }^{\mathbf{1}}$ Must be selected to satisfy the requirements of the baccalaureate core.
${ }^{5}$ Prerequisite for required upper-division courses. Recommended for completion prior to entry into the professional engineering program.
${ }^{6}$ Must be selected from approved restricted elective list.
Pre-Electrical and Computer Engineering Major Code: 030
Major Code: 039

## COMPUTER SCIENCE MINOR

## Also available at OSU-Cascades

Computing has become pervasive, touching nearly every aspect of our lives. A minor in Computer Science can open up opportunities for employment in the software development industry, but also in many areas including healthcare, business, science, medicine, graphics, utilities and education. Courses will teach theory, problem-solving skills, and programming.

## Computer Science Minor

## Requirements ( $\mathbf{3 6}$ credits total)

To earn the minor upon graduation, students must meet all of the following:

1. Earn a C in each of their minor courses (all courses must be taken A-F grading)
2. Have a minimum 2.25 GPA in all required minor course work (36 credits)
Lower-Division Computer Science
Minor Requirements ( $\mathbf{2 0}$ credits)
CS 161. Introduction to Computer Science I (4)
CS 162. Introduction to Computer Science II (4)
CS 261. Data Structures (4)
CS 271. Computer Architecture and Assembly Language (4) ${ }^{\mathbf{1}}$
MTH 231. Elements of Discrete Mathematics (4)
or CS 225. Discrete Structures in
Computer Science (4)
Students may declare the Computer Science minor after completing the required lower-division courses with a GPA of 2.25 or higher and after becoming eligible to take 300-level courses in their major. Please speak with an EECS advisor to declare the minor.

## Upper-Division Computer Science

Minor Requirements ( 16 credits) ${ }^{2,3}$
CS 362. Software Engineering II (4)

## Recommended elective courses

might include (but not limited to) ( 12 credits):
CS 344. Operating Systems (4)
CS 352. Introduction to Usability
Engineering (4)
CS 361. ^ ^Software Engineering I (4)
CS 440. Database Management Systems (4)
CS 475. Introduction to Parallel
Programming (4)
CS 496. Mobile and Cloud Software Development (4)
Other upper-division courses are acceptable; please speak with an advisor about which courses might create the best path for your goals.
Courses that cannot be used for minor requirements:
CS 391. *Social and Ethical Issues in Computer Science (3)
CS 395. Website Multimedia (4)
CS 401. Research (1-16)
CS 405. Reading and Conference (1-16)
CS 407. Seminar (1-16)
CS 410. Occupational Internship (1-16)
CS 461. ${ }^{\wedge}$ Senior Software Engineering

Project I (3)
CS 462. ^ Senior Software Engineering
Project II (3)
CS 463. Senior Software Engineering Project (2)

CS 494. Web Development (4)
CS 495. Interactive Multimedia Projects (4)

## Footnotes:

${ }^{1}$ Electrical and Computer Engineering (ECE) students who wish to minor in Computer Science must take ECE 271 (3) and ECE 272 (1), instead of CS 271.
${ }^{2}$ Electrical and Computer Engineering
(ECE) students will take ECE 375. Computer Organization and Assembly Language Programming (4) and CS/ECE 372. Introduction to Computer Networks (4) plus 4 credits of upper-division computer science courses.
${ }^{3}$ Electrical and Computer Engineering (ECE) students can take the following courses that will count both as an ECE restrictive elective for the ECE major and as well as towards the CS minor: CS 344, CS 325, CS 331, CS 444, CS 434,
CS 450, CS/ECE 472, CS/ECE 476

* Baccalaureate Core Course (BCC)
$\wedge$ Writing Intensive Course (WIC)

## Minor Code: 249

## GRADUATE MAJORS

COMPUTER SCIENCE (MA, MEng, MS, PhD, MAIS)

Graduate Areas of Concentration
Algorithms and cryptography; artificial
intelligence, machine learning and data
science; computer graphics, visualization, and vision; computer systems and networking; human-computer
interaction; programming languages; software engineering
See EECS website for complete information: http://eecs.oregonstate.edu/ research.

The master's program provides advanced instruction beyond the undergraduate degree. It prepares students for careers in which a higher level of experience is required. The PhD program prepares students for work in government or industry research laboratories or industry research laboratories or for careers at universities.

Additional areas of concentration may be arranged with other departments, for example, numerical analysis or computer algebra with the Department of Mathematics.

For additional information, contact Nicole Thompson, Graduate Coordinator, School of EECS, OSU, Corvallis, OR 97331-5501, 541-737-7234, email: eecs. gradinfo@oregonstate.edu. Additional information concerning courses, advising, procedures, faculty and many other aspects of the program may be found on the school's website at http://eecs.or-egonstate.edu/future-students/graduate/ research-interest-areas.
Major Code: 3070

## ELECTRICAL AND COMPUTER ENGINEERING (MEng, MS, PhD)

Graduate Areas of Concentration
Analog and mixed signal; artificial intelligence and machine learning, communications and signal processing, computer systems; energy systems; materials and devices; RF/microwaves/ optoelectronics
See EECS website for complete information: http://eecs.oregonstate.edu/ research.

The School of Electrical and Computer Engineering offers graduate programs leading to MEng, MS, and PhD degrees focusing on the major areas listed below. The MS and MEng programs provide advanced instruction beyond the undergraduate degree. They prepare students for careers in which a higher level of experience is required. The MEng degree is a course work-only degree with no required thesis or project report. The PhD program prepares students for work in government or industry research laboratories or careers at universities. Students are encouraged to develop programs of study in close cooperation with the faculty members in their areas of interest.

Graduate work is supported by the school's well-equipped laboratory facilities. Opportunities exist for graduate students to participate in many research projects sponsored by private industry and government agencies.

For more information, contact Nicole Thompson, Graduate Coordinator, School of Electrical Engineering and Computer Science, OSU, Corvallis, OR 97331-5501; 541-737-7234; email: eecs. gradinfo@oregonstate.edu.

Additional information concerning courses, advising procedures, faculty, and many other aspects of the school may be found on the school's website at http:// eecs.oregonstate.edu/.

## GRADUATE MINORS

## COMPUTER SCIENCE GRADUATE

 MINORFor more details, see the school advisor.
Minor Code: 3070

## ELECTRICAL AND COMPUTER ENGINEERING GRADUATE MINOR

For more details, see the school advisor.

## Minor Code: 3110

## - COMPUTER SCIENCE COURSES

CS 101. COMPUTERS: APPLICATIONS AND IMPLICATIONS (4). The varieties of computer hardware and software. The effects, positive and negative, of computers on human lives. Ethical implications of information technology. Hands-on experience with a variety of computer applications Lec/lab.
CS 151. INTRODUCTION TO PROGRAMMING I WITH EMBEDDED CONTROL LAB (4).

Thorough treatment of the basic elements of C , bitwise operations, flow of control, input/output, functions, arrays, strings, and structures. Lec/lab. CROSSLISTED as ECE 151. PREREQS: (MTH 111 [C] or MTH 112 [C] or (MTH 251 [C] or MTH 251H [C] )) or Placement Test MPT(23)
CS 160. COMPUTER SCIENCE ORIENTATION (3). Introduction to the computer science field and profession. Team problem solving. Introduction to writing computer programs. Lec/lab. PREREQS: Wireless laptop required
CS 160H. COMPUTER SCIENCE ORIENTATION (3). Introduction to the computer science field and profession. Team problem solving. Introduction to writing computer programs. Lec/lab. PREREQS: Wireless laptop required. Honors College approval required.
CS 161. INTRODUCTION TO COMPUTER
SCIENCE I (4). Overview of fundamental concepts of computer science. Introduction to problem solving, software engineering, and object-oriented programming. Includes algorithm design and program development. Lec/lab/rec. PREREQS: MTH 112* [C] or Placement Test MPT(33) or Placement Test MPAL(061) and for CS Double Degree students: BA/BS and (MTH 111 or MPT>=24 or MPAL>=061)

CS 162. INTRODUCTION TO COMPUTER SCIENCE II (4). Basic data structures. Computer programming techniques and application of software engineering principles. Introduction to analysis of programs. Lec/lab/rec. PREREQS: CS 161 [C] or EECS 161 [C]
CS 165. ACCELERATED INTRODUCTION TO COMPUTER SCIENCE (8). Overview of the fundamental concepts of computer science. Introduction to problem solving, algorithm development, data types, and basic data structures. Introduction to analysis of algorithms and principles of software engineering. System development and computer programming using procedural/object-oriented paradigms. Offered via Ecampus only. PREREQS: MTH 111 [C] or Placement Test MPAL(060) and CS Double Degree students must have a BA/BS degree.
CS 175. *COMMUNICATIONS SECURITY AND SOCIAL MOVEMENTS (3). Equipping students with the theory and practice of communications security, this course explores how social movements can remain effective in the context of mass surveillance and state repression. Lec/rec. (Bacc Core Course) PREREQS: Wireless laptop required.

CS 195. WEBSITE DESIGN (4). How to design and publish a static website using an existing publishing platform: Techniques and tools for designing and publishing on the World Wide Web; hypertext and HTMTL; site and page design; media integration; issues raised by Internet publishing.
CS 199. ST/COMPUTER SCIENCE (1-16). This course is repeatable for a maximum of 16 credits. CS 201. COMPUTER PROGRAMMING FOR NON-CS MAJORS (3). Covers a variety of fundamental topics in computer programming relevant to anyone who wants to write or work with computer code in their work or studies. Teaches basic computational thinking and programming skills which will allow students to solve a variety of real-world problems. In addition, students will learn more advanced topics such as how some basic algorithms work and can be written in computer code. PREREQS: This course may not be used to count towards the CS major or minor.
CS 225. DISCRETE STRUCTURES IN
COMPUTER SCIENCE (4). An introduction to the discrete mathematics of computer science, including logic, set and set operations, methods of proof, recursive definitions, combinatorics, and graph theory. (Note: Students may take either MTH 231 or CS 225, but cannot receive credit for both.) PREREQS: MTH 111 [C] or Placement Test MPT(24) or Placement Test MPAL(061) or MTH
$112^{*}$ [C] and for CS Double Degree students: BA/ BS and (MTH 111 or MPT>=24 or MPAL>=61)

CS 261. DATA STRUCTURES (4). Abstract data types, dynamic arrays, linked lists, trees and graphs, binary search trees, hash tables, storage management, complexity analysis of data structures. Lec/rec. PREREQS: (CS 162 [C] or CS 165 [C] ) and (CS 225 [C] or MTH 231 [C] )
CS 262. PROGRAMMING PROJECTS IN C++ 4). Learning a second computer programming language. Elements of C++. Object-oriented programming. Experience team work on a large programming project. PREREQS: CS 261 [C]
CS 271. COMPUTER ARCHITECTURE AND ASSEMBLY LANGUAGE (4). Introduction to functional organization and operation of digital computers. Coverage of assembly language; addressing, stacks, argument passing, arithmetic operations, decisions, macros, modularization, linkers and debuggers. PREREQS: (CS 151 [C] or CS 161 [C] or CS 165 [C] or ECE 151 [C] )
CS 290. WEB DEVELOPMENT (4). How to design and implement a multi-tier application using web technologies: Creation of extensive custom clientand server-side code, consistent with achieving a high-quality software architecture. PREREQS: CS 162 [C] or CS 165 [C]
CS 295. WEBSITE MANAGEMENT (4). How to create and promote a dynamic website using existing frameworks/libraries: Designing, developing, publishing, maintaining, and marketing dynamic websites; web security and privacy issues; emerging web technologies; running a website marketing campaign. PREREQS: CS 195 [C] and /or equivalent (i.e., basic HTML and CSS)
CS 312. LINUX SYSTEM ADMINISTRATION
(4). Introduction to LINUX system administration. Network administration and routing. Internet services. Security issues. PREREQS: CS 344 [C] or CS 311 [C] and /or instructor approval.
CS 321. INTRODUCTION TO THEORY OF COMPUTATION (3). Survey of models of computation including finite automata, formal grammars, and Turing machines. PREREQS: CS 261 [C] and (CS 225 [C] or MTH 231 [C] ) CS 321H. INTRODUCTION TO THEORY OF COMPUTATION (3). Survey of models of computation including finite automata, formal grammars, and Turing machines. PREREQS: CS 261 [C] and (CS 225 [C] or MTH 231 [C] ) and Honors College approval required.

CS 325. ANALYSIS OF ALGORITHMS (4).
Recurrence relations, combinatorics, recursive algorithms, proofs of correctness. PREREQS: CS 261 [C] and (CS 225 [C] or MTH 231 [C] )
CS 325H. ANALYSIS OF ALGORITHMS (4). Recurrence relations, combinatorics, recursive algorithms, proofs of correctness. PREREQS: CS 261 [C] and (CS 225 [C] or MTH 231 [C] ) and Honors College approval required.

CS 331. INTRODUCTION TO ARTIFICIAL NTELLIGENCE (4). Fundamental concepts in artificial intelligence using the unifying theme of an intelligent agent. Topics include agent architectures, search, games, logic and reasoning and Bayesian networks. PREREQS: (CS 325 [C] or CS 325H [C] )
CS 340. INTRODUCTION TO DATABASES (4). Design and implementation of relational databases, including data modeling with ER or UML, diagrams, relational schema, SQL queries, relational algebra, user interfaces, and administration. PREREQS: CS 290 [C]

CS 344. OPERATING SYSTEMS I (4). Introduction to operating systems using UNIX as the case study. System calls and utilities, undamentals of processes and interprocess communication. PREREQS: CS 261 [C] and (CS 271 [C] or ECE 271 [C]) and experience programming in the $C$ language.

CS 352. INTRODUCTION TO USABILITY
ENGINEERING (4). Basic principles of usability engineering methods for the design and evaluation of software systems. Includes the study of humanmachine interactions, user interface characteristics and design strategies, software evaluation methods, and related guidelines and standards. PREREQS: (CS 151 [C] or CS 161 [C] or CS 165 [C] or CS 295 [C] or ECE 151 [C] )
CS 361. SOFTWARE ENGINEERING I (4). Introduction to the "front end" of the software engineering lifecycle; requirements analysis and specification; design techniques; project management. PREREQS: CS 261 [C]
CS 362. SOFTWARE ENGINEERING II (4). Introduction to the "back end" of the software engineering lifecycle implementation; verification and validation; debugging; maintenance.
PREREQS: CS 261 [C] and Experience with object-oriented programming and data structures (e.g., CS 161, CS 162, CS 261). CS 361 is recommended but not required.
CS 370. INTRODUCTION TO SECURITY (4). Introductory course on computer security with the objective to introduce concepts and principles of computer systems security. Notions of security, basic crytographic primitives and their application, basics of authentication and access control, basics of key-management, basics of malware and software security. PREREQS: CS 344* [C]

## CS 372. INTRODUCTION TO COMPUTER

 NETWORKS (4). Computer network principles, fundamental networking concepts, packetswitching and circuit switching, TCP/IP protocol layers, reliable data transfer, congestion control, flow control, packet forwarding and routing, MAC addressing, multiple access techniques. Lec. CROSSLISTED as ECE 372. PREREQS: CS 261 [C] and (ECE 271 [C] or CS 271 [C] ) and C programming and Unix familiarity.CS 373. DEFENSE AGAINST THE DARK ARTS
(4). Introduction to the current state of the art in anti-malware, computer forensics, and networking messaging, and web security. Broad introduction to the field of computer security. PREREQS: CS 344 [C] and CS 340 [C] and CS 372 [C]

## CS 381. PROGRAMMING LANGUAGE

FUNDAMENTALS (4). An introduction to the concepts found in a variety of programming languages. Programming languages as tools for problem solving. A brief introduction to languages from a number of different paradigms. PREREQS: CS 261 [C] and (CS 225 [C] or MTH 231 [C] )

## CS 391. *SOCIAL AND ETHICAL ISSUES IN

 COMPUTER SCIENCE (3). In-depth exploration of the social, psychological, political, and ethical issues surrounding the computer industry and the evolving information society. (Bacc Core Course) PREREQS: CS 101 or computer literacy.CS 395. WEBSITE MULTIMEDIA (4). How to create and deploy interactive digital multimedia through static websites: Technological, aesthetic, and pedagogical issues of communication using interactive multimedia and hypermedia; techniques for authoring interactive multimedia projects using a variety of digital media roots. PREREQS: CS 195 [C] or (ART 120 [C] and (CS 162 [C] or CS 165 [C] ))
CS 401. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
CS 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
CS 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approva required.
CS 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

CS 407. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

CS 407H. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
CS 410. OCCUPATIONAL INTERNSHIP (1-16).
Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
CS 419. SELECTED TOPICS IN COMPUTER
SCIENCE (0-5). Topics of special and current interest not covered in other courses. This course is repeatable for a maximum of 99 credits. PREREQS: Varies by class offering, senior standing in computer science.
CS 419H. SELECTED TOPICS IN COMPUTER
SCIENCE (1-5). Topics of special and current interest not covered in other courses. This course is repeatable for a maximum of 99 credits. PREREQS: Varies by class offering, senior standing in computer science. Honors College approval required.
CS 420. GRAPH THEORY WITH APPLICATIONS TO COMPUTER SCIENCE (3). Directed and undirected graphs; paths, circuits, trees, coloring, planar graphs, partitioning; computer representation of graphs and graph algorithms; applications in software complexity metrics, program testing, and compiling. PREREQS: (CS 325 [C] or CS 325H [C] )
CS 427. CRYPTOGRAPHY (4). Introduction to the theory and practice of modern cryptography. Fundamental primitives including pseudorandom generators, block ciphers, hash functions. Symmetric-key cryptography for privacy and authenticity. Public-key cryptography based on number-theoretic problems. PREREQS: CS 261 [C] or MTH 355 [C]
CS 434. MACHINE LEARNING AND DATA
MINING (4). Introduction to machine learning and data mining algorithms (supervised learning, unsupervised learning, and reinforcement learning) tools that are widely employed in industrial and research settings. PREREQS: (CS 325 [C] or CS 325H [C] )
CS 440. DATABASE MANAGEMENT SYSTEMS
(4). Relational database design, normalization, file structures, disk storage, query processing and optimization, team development of database applications. PREREQS: CS 261 [C] and (CS 275 [C] or CS 340 [C] )
CS 444. OPERATING SYSTEMS II (4). Principles of computer operating systems: concurrent processes, memory management, job scheduling, multiprocessing, file systems, performance evaluation, and networking. Lec/rec. PREREQS: (CS 311 [C] or CS 344 [C] ) and (CS 271 [C] or ECE 375 [C] )
CS 446. NETWORKS IN COMPUTATIONAL
BIOLOGY (3). An introduction to biological networks and computational methods for their analysis, inference, and functional modeling. Various network centralities, topological measures, clustering algorithms, and probabilistic annotation models are introduced in the context of protein interaction, gene regulatory, and metabolic networks. The course also surveys bioinformatics methods for data-driven inference of network structure. PREREQS: CS 261 [C] and CS 325* (recommended) or by instructor permission
CS 447. WIRELESS EMBEDDED SYSTEMS (4). A hands-on introduction to programming wireless embedded systems (aka the "Internet of Things"). Topics include sensors, actuators, state machines, scheduling, wireless communications, time synchronization, localization, fault tolerance, and security related to cyber-physical systems. PREREQS: CS 344 [C]
CS 450. INTRODUCTION TO COMPUTER GRAPHICS (4). 2-D and 3-D graphics APIs.
Modeling transformations. Viewing specification and transformations. Projections. Shading. Texture
mapping. Traditional animation concepts. 3-D production pipeline. Keyframing and kinematics. Procedural animation. PREREQS: (CS 261 [C] and (MTH 306 [C] or MTH 306H [C] or MTH 341 [C]))
CS 453. SCIENTIFIC VISUALIZATION (4).
Applies 3D computer graphics methods to visually understand scientific and engineering data. Methods include hyperbolic projections; mapping scalar values to color spaces; data visualization using range sliders; scalar visualization (point clouds, cutting planes, contour plots, isosurfaces); vector visualization (arrow clouds, particle advection, streamlines); terrain visualization; Delauney triangulation; and volume visualization. PREREQS: Prior experience with Unix or Windows, programming experience.
CS 457. COMPUTER GRAPHICS SHADERS (4).
Theoretical and practical treatment of computer graphics shaders, including both RenderMan and GPU shaders. Programming in both RenderMan and OpenGL shading languages. PREREQS: Previous graphics pipeline programming experience.
CS 458. INTRODUCTION TO INFORMATION VISUALIZATION (4). Tools and techniques for designing, developing, and deploying interactive visualizations of abstract data sources. Discusses techniques based on principles from design, cognitive science, and perceptual psychology. Topics include 1D, 2D, 3D, multivariate representations, time-series, graphs and trees, text and documents, and interaction techniques. PREREQS: CS 361 [C] and junior standing or above.

## CS 461. ^SENIOR SOFTWARE ENGINEERING

PROJECT I (3). Utilize software engineering methodology in a team environment to develop a real-world application. Teams will be responsible for all phases of software development, including project planning, requirements analysis, design, coding, testing, configuration management, quality assurance, documentation, and delivery. Threeterm sequence required. This course fulfills the WIC requirement for computer science majors. (Writing Intensive Courses). PREREQS: CS 361 [C] and senior standing
CS 462. ^SENIOR SOFTWARE ENGINEERING PROJECT II (3). Utilize software engineering methodology in a team environment to develop a real-world application. Teams will be responsible for all phases of software development, including project planning, requirements analysis, design, coding, testing, configuration management, quality assurance, documentation, and delivery. Three-term sequence required. (Writing Intensive Courses) PREREQS: (CS 362 [C] and CS 461 [C]) and senior standing

## CS 463. SENIOR SOFTWARE ENGINEERING

 PROJECT (2). Utilize software engineering methodology in a team environment to develop a real-world application. Teams will be responsible for all phases of software development, including project planning, requirements analysis, design, coding, testing, configuration management, quality assurance, documentation, and delivery. Threeterm sequence required. PREREQS: CS 462 [C]CS 464. OPEN SOURCE SOFTWARE (4).
Provides a theoretical foundation of the history, key concepts, technologies, and practices associated with modern Free and Open Source Software (FOSS) projects, and gives students an opportunity to explore and make contributions to FOSS projects with some mentoring and guidance. PREREQS: CS 261 [C] or CS 361 [C]
CS 466. WEB-BASED START-UP PROJECT (4). Real-world, hands-on learning in a high-tech web/ mobile-based company environment. Research in the development of product ideas, hypotheses, and business models to create customer experiments. Prototyping and statistical analysis to develop, optimize, and evaluate solutions. Rapid iteration/refactoring based on customer input, web analytics, and user engagement metrics. Offered at OSU-Cascades only. COREQS: CS 461

CS 467. ONLINE CAPSTONE PROJECT (4).
Real-world team-based experience with the software engineering design and delivery cycle, including requirements analysis and specification, design techniques, and requirements and final project written documentation. For students in the online CS double-degree program only. PREREQS: CS 361 [C] and for students in the online CS double-degree program only.
CS 468. INCLUSIVE DESIGN (HCI) (4). Inclusive design is designing software that works for a wide variety of differently abled customers. Teaches the skills needed to design inclusively without having to have a separate design for each differently abled customer. PREREQS: CS 352 [C] and /or CS 565 [C]
CS 472. COMPUTER ARCHITECTURE (4). Computer architecture using processors, memories, and I/O devices as building blocks. Issues involved in the design of instruction set architecture, processor, pipelining and memory organization. Design philosophies and trade-offs involved in Reduced Instruction Set Computer (RISC) architectures. Lec/lab. CROSSLISTED as ECE 472/ECE 572. PREREQS: ECE 375 [C]

CS 475. INTRODUCTION TO PARALLEL
PROGRAMMING (4). Theoretical and practical survey of parallel programming, including a discussion of parallel architectures, parallel programming paradigms, and parallel algorithms. Programming one or more parallel computers in a higher-level parallel language. PREREQS: (CS 325 [C] or CS 325H [C] )

## CS 476. ADVANCED COMPUTER

NETWORKING (4). Advanced networking concepts: source/channel coding, queuing theory, router design, network architectures (Intserv, DiffServ, MPLS), multimedia protocols (TFRC, RTP), overlay networks, and wireless standards (Bluetooth 802.11b, 3/4G). CROSSLISTED as ECE 476/ECE 576. PREREQS: (CS 372 [C] or ECE 372 [C] ) and (ECE 353 [C] or ST 314 [C] or ST 314H [C] )

CS 478. NETWORK SECURITY (4). Basic concepts and techniques in network security, risks and vulnerabilities, applied cryptography and various network security protocols. Coverage of high-level concepts such as authentication, confidentiality, integrity, and availability applied to networking systems. Fundamental techniques including authentication protocols, group key establishment and management, trusted intermediaries, public key infrastructures, SSL/ TLS, IPSec, firewalls and intrusion detection CROSSLISTED as ECE 478. PREREQS: (CS 372 [C] or ECE 372 [C] ) and recommended prerequisite: CS 370, Introduction to Security
CS 480. TRANSLATORS (4). An introduction to compilers; attribute grammars, syntax-directed translation, lex, yacc, LR(1) parsers, symbol tables, semantic analysis, and peep-hole optimization. PREREQS: (CS 344 [C] or CS 311 [C] ) and CS 321 [C]

## CS 491. COMPUTER SCIENCE SKILLS FOR

 SIMULATION AND GAME PROGRAMMING (4). Game and simulation development is very much a data and math-intensive activity. A certain number of actions must be produced, and producing them by hand is hard. This is a middleware CS course that fills in many of the missing pieces for those wanting to enter the simulation and game development worlds in a software tool-building capacity. PREREQS: CS 261 [C] and (CS 225 [C] or MTH 231 [C] ) and MTH 252 [C]
## CS 495. INTERACTIVE MULTIMEDIA

PROJECTS (4). Students apply principles and procedures of digital art, design, communication, and software authoring while working on large integrated media projects. PREREQS: CS 395

## CS 496. MOBILE AND CLOUD SOFTWARE

DEVELOPMENT (4). Introduction to the concepts and techniques for developing mobile and cloud applications. PREREQS: CS 344 [C] or CS 311
[C] and students need a working knowledge of at least one operating system in order to be successful in developing mobile and cloud software.
CS 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
CS 501. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 99 credits. PREREQS: Departmental approval required.
CS 503. CS MS THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Instructor's consent required.

CS 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 20 credits. PREREQS: Departmental approval required.
CS 506. PROJECTS (1-16). Graded P/N. This course is repeatable for a maximum of 99 credits. PREREQS: Departmental approval required.
CS 507. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Graduate standing.

CS 515. ALGORITHMS AND DATA
STRUCTURES (4). Greedy algorithms, divide and conquer, dynamic programming, network flow, data structures. PREREQS: Graduate standing in computer science and an undergraduate course in algorithms.

CS 516. THEORY OF COMPUTATION AND FORMAL LANGUAGES (4). Models of computation. Universal machines. Unsolvable problems. Nondeterministic computation. Chomsky hierarchy: regular, context-free, context-sensitive and unrestrictive grammars; characterization, closure properties, algorithms, and limitations. PREREQS: Graduate standing in computer science.

CS 517. THEORY OF COMPUTATION (4).
Turing machines, decidability, NP-completeness, complexity classes, randomized computation, relativization, circuit complexity, interactive proof systems, lower bounds, cryptography. PREREQS: Graduate standing in computer science.

CS 519. SELECTED TOPICS IN COMPUTER
SCIENCE (0-5). Topics of special and current interest not covered in other courses. May not be offered every year. This course is repeatable for a maximum of 99 credits. PREREQS: Varies by class offering.

CS 520. GRAPH THEORY WITH APPLICATIONS TO COMPUTER SCIENCE (3). Directed and undirected graphs; paths, circuits, trees, coloring, planar graphs, partitioning; computer representation of graphs and graph algorithms applications in software complexity metrics, program testing, and compiling. PREREQS: CS 325 and MTH 232

## CS 521. COMPUTABILITY (4). Recursive

functions. Turing machines. Undecidability. Relativized computation. Complexity classes PREREQS: CS 516

CS 523. ADVANCED ALGORITHMS (4).
Approximation algorithms, randomized and probabilistic algorithms, online algorithms. PREREQS: CS 515

CS 524. NP-COMPLETE AND HARDER
PROBLEMS (4). Complexity classes and reducibilities. NP-Complete problems, proof techniques, and heuristics, approximation algorithms. Provably hard problems. Hierarchies. PREREQS: CS 523

CS 527. ERROR-CORRECTING CODES (4). Hamming codes, linear codes, cyclic codes, BCH and Reed-Solomon codes. Introduction to Galois fields. Encoding and decoding algorithms. Burst error correcting codes, asymmetric and unidirectional codes. Applications of codes for computer systems. PREREQS: Discrete math and probability

CS 529. SELECTED TOPICS IN THEORETICAL COMPUTER SCIENCE (1-5). Topics of interest in algorithms and theory of computation. Topics include approximation algorithms, planar graph algorithms, distributed algorithms, combinatorial optimization, computational geometry. This course is repeatable for a maximum of 99 credits. PREREQS: CS 515

CS 531. ARTIFICIAL INTELLIGENCE (4). Intelligent agents. Problem-solving as heuristic search. Adversarial search. Constraint satisfaction methods; Arc-consistency. Knowledge representation and reasoning. Propositional logic. Reasoning with propositional logic: algorithms for satisfiability. First-order logic. Proof theory, model theory, resolution refutation, forward and backward chaining, representing events and actions. Lec/ lab. PREREQS: Graduate standing in computer science.

CS 532. ADVANCED ARTIFICIAL
INTELLIGENCE (4). Knowledge representation, reasoning, and learning with relational and firstorder representations. First-order logic: proof theory, model theory, resolution refutation, Prologstyle resolution. Inductive logic programming. Complex belief networks: Hidden Markov models, Viterbi algorithm, Forward-backward algorithm. Learning HMMs with EM. Probabilistic relational models: exact and stochastic inference algorithms. Learning methods for probabilistic relational models. PREREQS: CS 531

CS 533. INTELLIGENT AGENTS AND DECISION
MAKING (4). Representations of agents, execution architectures. Planning: non-linear planning, graphplan, SATplan. Scheduling and resource management. Probabilistic agents. Dynamic belief networks. Dynamic programming (value iteration and policy iteration). Reinforcement learning: Prioritized sweeping, Q learning, value function approximation and SARSA (lamda), policy gradient methods. PREREQS: CS 531
CS 534. MACHINE LEARNING (4). Continuous representations. Bias-variance tradeoff. Computational learning theory. Gaussian probabilistic models. Linear discriminants. Support vector machines. Neural networks. Ensemble methods. Feature extraction and dimensionality reduction methods. Factor analysis. Principle component analysis. Independent component analysis. Cost-sensitive learning. PREREQS: Graduate standing.
CS 535. DEEP LEARNING (4). An introduction to the concepts and algorithms in deep learning; basic feedforward neural networks, convolutional neural networks, recurrent neural networks including long short-term memory models, deep belief nets, autoencoders and deep networks applications in computer vision, natural language processing and reinforcement learning PREREQS: CS 534 [B] and /or equivalent.

CS 536. PROBABILISTIC GRAPHICAL MODELS
(4). Representation of probabilistic graphical models, both directed (Bayesian networks) and undirected (Markov networks). Exact and approximate inference techniques. Parameter and structure learning from data. PREREQS: Graduate standing with strong programming skills.

CS 539. SELECTED TOPICS IN ARTIFICIAL
INTELLIGENCE (1-5). Advanced topics in artificial intelligence. Typical topics include machine learning for sequential and spatial data, knowledge representation and inference, probabilistic modeling of complex systems, data mining and information extraction. This course is repeatable for a maximum of 12 credits. PREREQS: Instructor's approval required.
CS 540. DATABASE MANAGEMENT SYSTEMS
(4). Purpose of database systems, levels of data representation. Entity-relationship model. Relational systems: data definition, data manipulation, query language (SQL), relational calculus and algebra, data dependencies and normal forms. DBTG network model. Query
optimization, recovery, concurrency control. PREREQS: CS 261 or graduate standing in computer science.

CS 544. OPERATING SYSTEMS II (4). Principles of computer operating systems: concurrent processes, memory management, job scheduling, multiprocessing, file systems, performance evaluation, and networking. Lec/rec. PREREQS: (CS 311 or CS 344) and (CS 271 or ECE 375)

CS 546. NETWORKS IN COMPUTATIONAL BIOLOGY (3). An introduction to biological networks and computational methods for their analysis, inference, and functional modeling. Various network centralities, topological measures, clustering algorithms, and probabilistic annotation models are introduced in the context of protein interaction, gene regulatory, and metabolic networks. The course also surveys bioinformatics methods for data-driven inference of network structure. PREREQS: CS 325* (recommended) or by instructor permission.

## CS 549. SELECTED TOPICS IN INFORMATION-

 BASED SYSTEMS (1-5). Current topics in information-based systems, e.g. information management for CAD, geographical information systems, distributed information systems, data models for complex applications. This course is repeatable for a maximum of 99 credits. PREREQS: CS 540
## CS 550. INTRODUCTION TO COMPUTER

GRAPHICS (4). 2-D and 3-D graphics APIs.
Modeling transformations. Viewing specification and transformations. Projections. Shading. Texture mapping. Traditional animation concepts. 3-D production pipeline. Keyframing and kinematics. Procedural animation. PREREQS: CS 261 and (MTH 306 or MTH 306H or MTH 341)
CS 551. COMPUTER GRAPHICS (4). 3-D graphics hardware: Line and polygon scan conversion, modeling transformations, viewing transformations, matrix stacks, hierarchical models, perspective and orthographic projections, visible surface determination, illumination models, shading models, texture mapping, ray tracing. PREREQS: CS 450 or CS 550
CS 552. COMPUTER ANIMATION (4). Traditional animation concepts: production pipeline, keyframing implementation, interpolation, pointmass dynamics, spring-mass systems, rigid body dynamics, forward and inverse kinematics, human motion control, motion capture. PREREQS: CS 551
CS 553. SCIENTIFIC VISUALIZATION (4).
Applies 3D computer graphics methods to visually understand scientific and engineering data. Methods include hyperbolic projections; mapping scalar values to color spaces; data visualization using range sliders; scalar visualization (point clouds, cutting planes, contour plots, isosurfaces); vector visualization (arrow clouds, particle advection, streamlines); terrain visualization; Delauney triangulation; and volume visualization. PREREQS: Prior experience with Unix or Windows, programming experience.

## CS 554. GEOMETRIC MODELING IN

 COMPUTER GRAPHICS (4). Advanced topics in computer graphics focusing on representation and processing of polygonal models and their application. Surface fundamentals; discrete differential geometry and topology; data structures for representing 3-D surfaces; surface subdivision and smoothing; mesh simplification and multiresolution representation of 3-D surfaces; geometry compression; surface parameterization; geometry remeshing; topological simplification; implicit surfaces. PREREQS: CS 450CS 555. SIGNAL AND IMAGE PROCESSING
(4). Fundamental aspects of signal and image processing including image acquisition and display, histograms, level-set and geometric operations, convolutions, Fourier transform, image filtering, sampling theory, image transforms, human vision, color, morphological operations,
and image compression. PREREQS: Graduate standing and knowledge of C/C++

CS 556. COMPUTER VISION (4). Algorithm development for automatic interpretation of the three-dimensional world that is captured in a set of images; cameras and image formation; color; keypoint and edge detection; perceptual grouping; segmentation; shape representation; texture; object recognition; optical flow; motion estimation and tracking; and 3-D scene reconstruction from motion and stereo. PREREQS: Basic statistics, probability, calculus, linear algebra, good programming skills,machine learning or Al (recommended).

CS 557. COMPUTER GRAPHICS SHADERS (4). Theoretical and practical treatment of computer graphics shaders, including both RenderMan and GPU shaders. Programming in both RenderMan and OpenGL shading languages. PREREQS: Previous graphics pipeline programming experience.

CS 559. SELECTED TOPICS IN COMPUTER GRAPHICS AND VISION (1-5). Advanced topics in graphics, animation, and vision. Topics include distribution ray tracing, globalillumination, radiosity, image-based modeling and rendering, vision-assisted image and video editing, 3-D vision, 3-D virtual environments, 3-D interaction, control for physical simulation, motion graphs, computational geometry, etc. This course is repeatable for a maximum of 12 credits. PREREQS: Instructor approval and graduate standing.

## CS 560. DATA-DRIVEN SOFTWARE

ENGINEERING (4). An overview of data-driven empirical research methods that can be used to understand the different aspects of software engineering. PREREQS: CS 561 [C] and graduate standing in CS or instructor consent.

CS 561. SOFTWARE ENGINEERING (4). Utilize software engineering methodology in a team environment to develop a real-world application. Teams will be responsible for all phases of software development, including project planning, requirements analysis, design, coding, testing, configuration management, quality assurance, documentation, and delivery. Two-term sequence required. PREREQS: CS 362
CS 562. APPLIED SOFTWARE ENGINEERING
(4). Application of software engineering methodology to the development of a complete software system. PREREQS: CS 561

CS 564. FIELD STUDIES IN SE AND HCI (4). Deals with the type of empirical study known as the "case" study. These are studies that collect data from natural software development situations as they really occur in the field, in which the researcher does not manipulate or "control" anything. The course is an end-to-end coverage of the process. Mainly focuses on case studies involving human software developers in the field. The student will conduct a field study as part of this course. PREREQS: Graduate standing in CS or permission of instructor.

## CS 565. HUMAN-COMPUTER INTERACTION

(4). Basic principles of Human-Computer Interaction $(\mathrm{HCl})$ for the design and evaluation of software systems. Includes research methods for studying human-machine interactions and user interfaces, design strategies, software evaluation methods, and related guidelines and standards. PREREQS: Graduate standing in CS or instructor consent.
CS 567. LABORATORY STUDIES IN SE
AND HCl (4). Empirical lab studies of software development. Covers how to go about designing, preparing for, running, analyzing, and writing-for-publication lab experiments of programming situations involving human subjects. This is an end-to-end coverage of the entire process, and will put students in a position to conduct lab studies of their own with human subjects. PREREQS: Graduate standing in CS or instructor consent.

CS 568. INCLUSIVE DESIGN (HCL) (4). Inclusive design is designing software that works for a wide variety of differently abled customers. Teaches the skills needed to design inclusively without having to have a separate design for each differently abled customer. PREREQS: CS 352 [C] or CS 565 [C]
CS 569. SELECTED TOPICS IN SOFTWARE
ENGINEERING (1-5). Topics include new programming methodologies, productivity, software development, software complexity metrics. This course is repeatable for a maximum of 99 credits. PREREQS: CS 561
CS 570. HIGH PERFORMANCE COMPUTER
ARCHITECTURE (4). Advanced concepts in computer architecture. Performance improvement employing advanced pipelining and multiple instruction scheduling techniques. Issues in memory hierarchy and management. CROSSLISTED as ECE 570. PREREQS: ECE 472 or ECE 572

CS 572. COMPUTER ARCHITECTURE (4). Computer architecture using processors, memories, and I/O devices as building blocks. Issues involved in the design of instruction set architecture, processor, pipelining and memory organization. Design philosophies and trade-offs involved in Reduced Instruction Set Computer (RISC) architectures. Lec/lab. CROSSLISTED as ECE 472/ECE 572. PREREQS: ECE 375
CS 575. INTRODUCTION TO PARALLEL
PROGRAMMING (4). Theoretical and practical
survey of parallel programming, including a discussion of parallel architecture, parallel programming paradigms, and parallel algorithms. Programming one or more parallel computers in a higher-level parallel language.

## CS 576. ADVANCED COMPUTER

NETWORKING (4). Advanced networking
concepts: source/channel coding, queuing theory, router design, network architectures (Intserv, DiffServ, MPLS), multimedia protocols (TFRC, RTP), overlay networks, and wireless standards (Bluetooth 802.11b, 3/4G). CROSSLISTED as ECE 476/ECE 576. PREREQS: (CS 372 or ECE 372) and (ECE 353 or ST 314 or ST 314H)

CS 578. CYBER-SECURITY (4). A broad overview of the field of computer and network security. Essential cryptographic mechanisms such as symmetric and public-key cryptography (e.g., encryption, signatures), network security and authentication protocols (e.g., Kerberos, TLS, IPSec), system security (e.g., access control, firewalls), advanced topics (e.g., searchable encryption, cloud security, secure computation). CROSSLISTED as ECE 578. PREREQS: Graduate standing

CS 579. TOPICS IN COMPUTER
ARCHITECTURE AND PARALLEL
PROCESSING (1-5). Current topics in advanced computer architecture and parallel processing. This course is repeatable for a maximum of 99 credits. PREREQS: CS 575 or CS 572 or ECE 572

CS 581. PROGRAMMING LANGUAGES I (4).
Graduate-level introduction to functional programming and programming language theory. Strongly typed functional programming in Haskell, abstract syntax and grammars, interpreters, denotional semantics, domain theory, and lambda calculus. PREREQS: Graduate standing in Computer Science
CS 582. PROGRAMMING LANGUAGES II (4).
Essentials of programming language theory for understanding and conducting programming language research. Dependently typed programming in Agda, Coq, or Idris; operational semantics; type systems; unification and type inference. PREREQS: CS 581 [C] and graduate standing in Computer Science
CS 583. ADVANCED FUNCTIONAL
PROGRAMMING (4). Advanced functional programming concepts and strategies, with a
focus on techniques useful for the design and implementation of programming languages Includes higher-order abstract syntax, functors and monads, generalized algebraic data types, functional data structures, and graph reduction. PREREQS: CS 581 [C] and graduate standing in Computer Science

CS 584. HUMAN FACTORS PROGRAMMING
LANGUAGES (4). Principles and evaluation methods for designing and evaluating programming languages to emphasize human productivity. Overall goals are (a) to enable students to understand and apply these principles and methods, and (b) to introduce at least four programming languages that aim specifically at supporting human problem solving. PREREQS: Graduate standing in computer science or instructor approval required.
CS 585. DOMAIN-SPECIFIC LANGUAGES (4).
Graduate-level introduction to the design and implementation of domain-specific languages (DSLs). Domain analysis; review and revision of language designs; binding constructs to support abstraction; definition of syntax and semantics of DSLs; prototype implementation of embedded DSL. PREREQS: CS 581 [C] and graduate standing in Computer Science
CS 589. SELECTED TOPICS IN PROGRAMMING LANGUAGES (1-5). An in-depth examination of a specific topic of interest in programming language design and implementation. Example topics include object-oriented programming, parallel programming, compiler optimization, programming language semantics. This course is repeatable for a maximum of 99 credits.
CS 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
CS 601. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 99 credits. PREREQS: Departmental approval required.

CS 603. CS PhD THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Instructor's consent required.

CS 605. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
CS 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.
CS 637. COMPUTER VISION II (4). An introduction to recent advances in visual recognition, including object detection, semantic segmentation, multimodal parsing of images and text, image captioning, face recognition, and human activity recognition. The course covers common formulations of these problems, including energy minimization on graphical models, and supervised machine learning approaches to lowand high-level recognition tasks. PREREQS: CS 556 [B] and CS 519, Selected Topics/Computer Sci/Deep Learning or equivalent.

## ELECTRICAL AND COMPUTER ENGINEERING COURSES

ECE 111. INTRODUCTION TO ECE: TOOLS (3). Introduction to the electrical and computer engineering professional practice. Covers the foundations of engineering problem solving and other skills necessary for success. Students will be taught engineering practice through handson approaches. Recommended for electrical and computer engineering majors, and for those interested in engineering as a profession. Lec/lab. Has extra fees. PREREQS: MTH 111 recommended (concurrent OK if needed)
ECE 112. INTRODUCTION TO ECE: CONCEPTS (3). Basic electrical and computer engineering concepts, problem solving and hands-on laboratory project. Topics include electronic circuit and device models, digital logic, circuit analysis, and simulation tools. Lec/lab. Has extra fees. PREREQS: (MTH 111 [C] or MTH 112 [C] or MTH

251 [C] or MTH 251H [C] ) or Placement Test MPT(23)

ECE 151. INTRODUCTION TO PROGRAMMING I with EMBEDDED CONTROL LAB (4).
Thorough treatment of the basic elements of C bitwise operations, flow of control, input/output, functions, arrays, strings, and structures. Lec/lab. CROSSLISTED as CS 151. PREREQS: (MTH 111 [C] or MTH 112 [C] or MTH 251 [C] or MTH 251H [C] ) or Placement Test MPT(23)
ECE 152. INTRODUCTION TO PROGRAMMING II WITH EMBEDDED CONTROL LAB (4). Control using microcontrollers with the $C$ language. Interfacing to PCs using on Object Oriented Programming language. Lec/lab. PREREQS: ((ECE 151 [C] or CS 151 [C] ) and MTH 231* [C] )
ECE 199. SPECIAL STUDIES (0-16). One-credit section. Graded P/N. This course is repeatable for a maximum of 16 credits.
ECE 271. DIGITAL LOGIC DESIGN (3). A first course in digital logic design. Data types and representations, Boolean algebra, state machines, simplification of switching expressions, and introductory computer arithmetic. Lec/rec. PREREQS: (MTH 251* [C] or MTH 251H* [C] or MTH 231* [C] )
ECE 272. DIGITAL LOGIC DESIGN
LABORATORY (1). This laboratory course accompanies ECE 271, Digital Logic Design.
This also illustrates topics covered in the lectures of ECE 271 using computer-aided design, verification tools, and prototyping hardware. PREREQS: Corequisite or prerequisite of ECE 271 is strongly recommended.
ECE 322. ELECTRONICS I (3). Fundamental device characteristics including diodes, MOSFETs and bipolar transistors; small- and large-signal characteristics and design of linear circuits. PREREQS: ENGR 203 [C]
ECE 322H. ELECTRONICS I (3). Fundamental device characteristics including diodes, MOSFETs and bipolar transistors; small- and large-signal characteristics and design of linear circuits. PREREQS: ENGR 203 [C-] and Honors College approval required.

ECE 323. ELECTRONICS II (3). Transient operation of MOSFETs and bipolar transistors; multistage amplifiers; frequency response; feedback and stability. PREREQS: ECE 322 [C]
ECE 331. ELECTROMECHANICAL ENERGY CONVERSION (4). Energy conversion principles for electric motors. Steady-state characteristics and analysis of induction, synchronous and direct machines. Lec/lab. PREREQS: ENGR 202 [C] or ENGR 202H [C]
ECE 341. JUNIOR DESIGN I (3). Introduction to system design and group projects. Design and fabrication of an electrical engineering project in a small group. PREREQS: CS 261* [C] and ENGR 203 [C]
ECE 342. JUNIOR DESIGN II (3). Introduction to system design and group projects. Design and fabrication of an electrical engineering project in a small group. PREREQS: ECE 341 [C]
ECE 351. SIGNALS AND SYSTEMS I (3).
Analytical techniques for continuous-time and discrete-time signal, system, and circuit analysis Lec. PREREQS: (ENGR 203 [C] and (MTH 256 [C] or MTH 256H [C] ))
ECE 352. SIGNALS AND SYSTEMS II (3). Analytical techniques for continuous-time and discrete-time signal, system, and circuit analysis PREREQS: (ECE 351 [C] and (MTH 306 [C] or MTH 306H [C] )
ECE 353. INTRODUCTION TO PROBABILITY
AND RANDOM SIGNALS (3). Introductory discrete and continuous probability concepts, single and multiple random variable distributions, expectation, introductory stochastic processes, correlation and power spectral density properties
of random signals, random signals through linear filters. Lec. PREREQS: ((MTH 254 [C] or MTH 254H [C] ) and ECE 351 [C] )
ECE 372. INTRODUCTION TO COMPUTER
NETWORKS (4). Computer network principles, fundamental networking concepts, packetswitching and circuit-switching, TCP/IP protocol layers, reliable data transfer, congestion control, flow control, packet forwarding and routing, MAC addressing, multiple access techniques. Lec CROSSLISTED as CS 372. PREREQS: CS 261 [C] and (ECE 271 [C] or CS 271 [C] ) and C programming and Unix familiarity.
ECE 375. COMPUTER ORGANIZATION AND
ASSEMBLY LANGUAGE PROGRAMMING
(4). Introduction to computer organization, how major components in a computer system function together in executing a program, and assembly language programming. Lec/lab. PREREQS: ECE 271 [C] and C/C++ programming (e.g., CS 261).

ECE 390. ELECTRIC AND MAGNETIC FIELDS (4). Static and quasi-static electric and magnetic fields. PREREQS: ((MTH 255 [C] or MTH 255H [C] ) and ENGR $203^{*}$ [C] )
ECE 391. TRANSMISSION LINES (3). Transient and steady-state analysis of transmission line circuits with application to engineering problems. PREREQS: (ENGR 203 [C] and (MTH 254 [C] or MTH 254H [C] ) and (MTH 256 [C] or MTH 256H [C] ) and ECE 322* [C] )
ECE 399. SPECIAL TOPICS (1-16). Course work to meet students' needs in advanced or specialized areas and to introduce new, important topics in electrical and computer engineering at the undergraduate (junior/senior) level. This course is repeatable for a maximum of 16 credits.

ECE 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ECE 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required
ECE 405. READING AND CONFERENCE (116). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ECE 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ECE 410. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ECE 411. ENGINEERING MAGNETICS (3). Application of magnetic materials in the design of magnetic devices. Properties of magnetic materials; engineering design of actuators, sensors and data storage devices. Introduction to spintronics. PREREQS: ECE 390 [C]
ECE 413. SENSORS (3). Overview of sensor technologies including materials, physics of operation, applications and system integration. PREREQS: (ECE 322 [C] and ECE 323 [C] )
ECE 415. MATERIAL SCIENCE OF
NANOTECHNOLOGY (3). Introductory physical chemistry of solid surfaces, thermodynamics, and kinetics applied to synthesis of nanomaterials such as nanoparticles, nanowires, thin films, carbon nanotubes, fullerenes, graphene, etc. Characterization of nanomaterials, applications of nanomaterials, nano-synthesis techniques, integration of nanotechnology, and emerging nanotechnology topics. PREREQS: (ECE 416 [C] or ENGR 321 [C] or ENGR 321H [C] )
ECE 416. ELECTRONIC MATERIALS AND DEVICES (4). Semiconductor fundamentals and physical principles of pn junctions and Schottky barrier diodes. PREREQS: ENGR 201 [C]

ECE 417. BASIC SEMICONDUCTOR DEVICES
(4). Theory and physical principles of bipolar junction and field-effect transistors. Lec/rec.

## PREREQS: ECE 416 [C]

ECE 418. SEMICONDUCTOR PROCESSING
(4). Theory and practice of basic semiconductor processing techniques. Introduction to process simulation. Lec/lab/rec. PREREQS: ECE 416 [C] and /or equivalent.
ECE 422. CMOS INTEGRATED CIRCUITS I (4). Analysis and design of analog integrated circuits in CMOS technology; current mirrors, gain stages, single-ended operational amplifier, frequency response, and compensation. PREREQS: (ECE 322 [C] and ECE 323* [C] )
ECE 423. CMOS INTEGRATED CIRCUITS II
(4). Analysis and design of analog integrated circuits in CMOS technology; cascaded current mirrors, cascaded gain stages, single-ended and fully differential operational amplifier, commonmode feedback, noise, and distortion. Lec/lab. PREREQS: ECE 422 [C]
ECE 428. DATA CONVERTERS (4). The functions, characterization, algorithms, architectures and implementation of A/D and D/A data converters. Lec/lab. PREREQS: (ECE 323 [C] and ECE 352 [C] )
ECE 431. POWER ELECTRONICS (4). Fundamentals and applications of devices, circuits and controllers used in systems for electronic power processing. Lec/lab. PREREQS: (ECE 322 [C] and ECE 323* [C] and ECE 351 [C] )

## ECE 432. DYNAMICS OF

ELECTROMECHANICAL ENERGY
CONVERSION (4). Generalized machine theory. Techniques for dynamic analysis of electromechanical machines including arbitrary reference frame theory. Lec/lab. PREREQS: ECE 331 [C] COREQS: ECE 431

## ECE 433. POWER SYSTEM ANALYSIS (4).

Fundamentals and control of real and reactive power, steady-state load flow studies, unbalance, stability and transient system analysis. PREREQS: (ECE 323 [C] and ECE 352 [C] ) and three-phase power
ECE 437. SMART GRID (3). Fundamentals of smart power grids. Technology advances in transmission and distribution systems, policy drivers, assets and demand management, and smart grid security. PREREQS: ECE 433 [C] and Background in power systems analysis equivalent to ECE 433
ECE 438. ELECTRIC AND HYBRID ELECTRIC VEHICLES (4). Transportation electrification history, hybrid electric vehicle architecture, powertrain components and their modeling and control, vehicle system dynamics and controls. PREREQS: ECE 331 [C] and ECE 431 [C]
ECE 441. ^ENGINEERING DESIGN PROJECT (3). First term of an extended, 3-term team design project to expose students to problem situations and issues in engineering design similar to those encountered in industry. (Writing Intensive Courses) PREREQS: (ECE 322 [C] and ECE 351 [C] ) and senior standing in ECE.
ECE 442. ^ENGINEERING DESIGN PROJECT
(3). Second term of an extended, 3-term team design project to expose students to problem situations and issues in engineering design similar to those encountered in industry. (Writing Intensive Courses) PREREQS: ECE 441 [C]
ECE 443. ^ENGINEERING DESIGN PROJECT
(2). An extended team design project to expose students to problem situations and issues in engineering design similar to those encountered in industry. (Writing Intensive Courses) PREREQS: ECE 442 [C] and senior standing in electrical or computer engineering.
ECE 451. SYSTEMS DYNAMICS AND
CONTROL (4). Modeling and analysis of linear continuous systems in time and frequency domains. Fundamentals of single-input-singleoutput control system design. CROSSLISTED as ME 430. PREREQS: (ME 317 [C] or (ECE 351 [C]
and ECE 352 [C] and (ENGR 212 [C] or ENGR 212H [C] )))
ECE 461. INTRODUCTION TO ANALOG AND DIGITAL COMMUNICATIONS (4). Fundamental concepts of analog and digital telecommunication systems: modeling, analysis, and design of analog amplitude and angle modulation systems; probabilistic performance assessment of modulated signals over noisy channels; introduction to baseband digital modulation techniques such as binary pulse amplitude modulation and pulse position modulation and their demodulation in the presence of random noise. Lec. PREREQS: (ECE 351 [C] and ECE 352 [C] and ECE 353 [C] )
ECE 462. DIGITAL COMMUNICATIONS
AND CHANNEL CODING (4). Modeling, analysis, design of baseband and passband digital communications systems: geometric representation of signals; correlator receivers for M-ary digital communications systems; decision theory and its application to digital communication systems in additive white Gaussian noise environment; generation, transmission, and reception of passband digital modulated signals (BPSK, QPSK, FSK PAM); basics of information theory and channel encoding. Lec. PREREQS: (ECE 461 [C] and ECE 351 [C] and ECE 352 [C] and ECE 353 [C] )
ECE 463. WIRELESS COMMUNICATIONS NETWORK (4). Wireless networks: personal area (IEEE 802.15.4a), local area (IEEE 802.11), metropolitan area (IEEE 802.16), and mobile cellular networks (e.g., CDMA); physical-layer techniques for data modulation and multiple access; RF system engineering aspects of mobile cellular networks (e.g., system capability for voice and packet data traffics, RF coverage for a certain propagation environment.) Lec. PREREQS: (ECE 351 [C] and ECE 352 [C] ) and probability background. Recommended: ECE 461.
ECE 464. DIGITAL SIGNAL PROCESSING (4). Analysis and design of discrete-time linear-time invariant systems for processing discrete-time signals: DT-LTI system properties, DT signal analysis using Discrete-Time Fourier Transform, Discrete Fourier Transform and z-Transform, frequency response and transfer function. Signal sampling and reconstruction, digital processing of continuous-time signals, FIR and IIR digital filter design, and filter structures. PREREQS: (ECE 351 [C] and ECE 352 [C] )
ECE 468. DIGITAL IMAGE PROCESSING (3). Introduction to digital image processing including fundamental concepts of visual perception, image sampling and quantization, image enhancement in spatial and frequency domains (through 2D Fourier transform), image restoration, and color image processing. Implementation of algorithms using Matlab Image Processing Toolbox
PREREQS: (ECE 351 [C] and ECE 352 [C] )
ECE 471. ENERGY-EFFICIENT VLSI DESIGN
(4). Combinational and sequential logic design using CMOS transistors; analysis of power consumption and logic delay of digital logic; clock design including skew, jitter, and dynamic clock energy consumption; supply voltage and power supply noise sources; dynamic voltage frequency scaling (DVFS); sub-threshold logic design and effect on energy/robustness; custom digital integrated circuit design including transistor layouts and CAD entry; CMOS scaling and the effect on process variability and power consumption. Lec/lab. PREREQS: (ECE 271 [C] and ECE 322 [C] and ECE 323* [C] )

## ECE 472. COMPUTER ARCHITECTURE

(4). Computer architecture using processors, memories, and I/O devices as building blocks. Issues involved in the design of instruction set architecture, processor, pipelining, and memory organization. Design philosophies and trade-offs involved in Reduced Instruction Set Computer (RISC) architectures. Lec/lab. CROSSLISTED as CS 472/CS 572. PREREQS: ECE 375 [C]

ECE 473. MICROCONTROLLER SYSTEM
DESIGN (4). Implementation of embedded computer systems focusing on the development of hardware and software for an embedded microcontroller system. Topics include internal microcontroller architecture, interfacing peripheral devices, mixed analog and digital systems, and hardware and software implementation of several systems using a microcontroller and peripherals. Lec/lab. PREREQS: ECE 322 [C] and ECE 375 [C] and CS 261 [C]
ECE 474. VLSI SYSTEM DESIGN (4). Introduction to custom and semi-custom digital integrated circuit design as used in VLSI systems. The use of CAD/CAE tools, design management, and design methodology are introduced. PREREQS: (ECE 322 [C] and ECE 375 [C] )
ECE 476. ADVANCED COMPUTER
NETWORKING (4). Advanced networking concepts: source/channel coding, queuing theory, router design, network architectures (Intserv, DiffServ, MPLS), multimedia protocols (TFRC, RTP), overlay networks, and wireless standards (Bluetooth 802.11b, 3/4G). CROSSLISTED as CS 476/CS 576. PREREQS: (CS 372 [C] or ECE 372 [C] ) and (ECE 353 [C] or ST 314 [C] or ST 314H [C] )
ECE 477. MULTIMEDIA SYSTEMS (4). Design of multimedia systems used in information technology covering the hardware, software, applications, and networks. Components covered include multimedia representation, coding and compression techniques, wireless networks, networking for multimedia, and embedded system for multimedia. Lec. PREREQS: ECE 375
ECE 478. NETWORK SECURITY (4). Basic concepts and techniques in network security, risks and vulnerabilities, applied cryptography and various network security protocols. Coverage of high-level concepts such as authentication, confidentiality, integrity, and availability applied to networking systems. Fundamental techniques including authentication protocols, group key establishment and management, trusted intermediaries, public key infrastructures, SSL/ TLS, IPSec, firewalls and intrusion detection. CROSSLISTED as CS 478. PREREQS: (CS 372 [C] or ECE 372 [C] ) and recommended prerequisite: CS 370, Introduction to Security

ECE 482. OPTICAL ELECTRONIC SYSTEMS
(4). Photodetectors, laser theory, and laser systems. Lec/lab. CROSSLISTED as PH 482/PH 582. PREREQS: ECE 391 or (PH 481 or PH 581) or equivalent.
ECE 483. GUIDED WAVE OPTICS (4). Optical fibers, fiber mode structure and polarization effects, fiber interferometry, fiber sensors, optical communication systems. Lec/lab. CROSSLISTED as PH 483/PH 583. PREREQS: (ECE 391* [C] or PH 481* [C] )
ECE 484. ANTENNAS AND PROPAGATION
(4). Introduction to antennas and radiowave propagation. Offered alternate years. PREREQS: (ECE 390 [C] and ECE 391 [C] ) and /or equivalent.

ECE 485. MICROWAVE DESIGN TECHNIQUES
(4). Introduction to basic design techniques required for the design of high-frequency circuits and systems. Lec/Lab. PREREQS: (ECE 390 [C] and ECE 391 [C] ) and /or equivalent.
ECE 499. SPECIAL TOPICS (0-16). Course work to meet students' needs in advanced or specialized areas and to introduce new important topics in electrical and computer engineering at the undergraduate level. This course is repeatable for a maximum of 16 credits.
ECE 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ECE 503. ECE MS THESIS (1-16). This course is repeatable for a maximum of 999 credits.

ECE 505. READING AND CONFERENCE (1-
16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ECE 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ECE 507. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Graduate standing.

ECE 511. ELECTRONIC MATERIALS
PROCESSING (3). Technology, theory, and analysis of processing methods used in integration circuit fabrication. Offered alternate years.
PREREQS: Graduate standing or instructor approval required.
ECE 516. ELECTRONIC MATERIALS AND
DEVICES (4). Semiconductor fundamentals and physical principles of pn junctions and Schottky barrier diodes. PREREQS: ENGR 201

## ECE 517. BASIC SEMICONDUCTOR DEVICES

(4). Theory and physical principles of bipolar junction and field-effect transistors. Lec/rec. PREREQS: ECE 416
ECE 518. SEMICONDUCTOR PROCESSING
(4). Theory and practice of basic semiconductor processing techniques. Introduction to process simulation. Lec/lab/rec. PREREQS: ECE 416 or equivalent.

## ECE 520. ANALOG CMOS INTEGRATED

CIRCUITS (4). Principles and techniques of design of electronic circuits with focus on a design methodology for analog integrated circuits. Practical aspects of using CAD tools in analyzing and laying out circuits will be discussed.

## ECE 521. ANALOG CIRCUIT SIMULATION (4).

Formulation/solution of circuit equations; sparse matrix techniques; DC, transient, sensitivity, noise and Fourier analyses; RF circuit simulation. PREREQS: ECE 423 or ECE 520

ECE 522. CMOS INTEGRATED CIRCUITS I (4).
Analysis and design of analog integrated circuits in CMOS technology; current mirrors, gain stages, single-ended operational amplifier, frequency response, and compensation. PREREQS: ECE 322 and ECE 323*
ECE 523. CMOS INTEGRATED CIRCUITS II
(4). Analysis and design of analog integrated circuits in CMOS technology; cascaded current mirrors, cascaded gain stages, single-ended and fully differential operational amplifier, commonmode feedback, noise, and distortion. Lec/lab.
PREREQS: ECE 422 or ECE 522
ECE 528. DATA CONVERTERS (4). The
functions, characterization, algorithms, architectures and implementation of $A / D$ and $D / A$ data converters. Lec/lab. PREREQS: ECE 323 and ECE 352

## ECE 530. CONTEMPORARY ENERGY

APPLICATIONS (4). Contemporary energy issues and applications; fundamental physics of renewable energy sources (e.g. wind, wave, and solar), devices used to harvest energy from these sources, state-of-the-art renewable energy technology, power transmission, transformers, and energy storage. PREREQS: Graduate standing in engineering; Matlab, basic circuit analysis with RLC components and diodes.

ECE 531. POWER ELECTRONICS (4).
Fundamentals and applications of devices, circuits and controllers used in systems for electronic power processing. Lec/lab. PREREQS: ECE 322 and ECE 323* and ECE 351

## ECE 532. DYNAMICS OF

ELECTROMECHANICAL ENERGY
CONVERSION (4). Generalized machine theory. Techniques for dynamic analysis of electromechanical machines including arbitrary reference frame theory. Lec/lab. PREREQS: ECE 331 COREQS: ECE 531

ECE 533. POWER SYSTEM ANALYSIS (4).
Fundamentals and control of real and reactive power, steady-state load flow studies, unbalance, stability and transient system analysis. PREREQS: ECE 323 and ECE 352 and three-phase power
ECE 534. ADVANCED ELECTRICAL MACHINES (3). Development of models for the dynamic performance of all classes of electrical machines; synchronous, induction, permanent magnet and reluctance motors. Dynamic motor simulations. PREREQS: ECE 530
ECE 535. ADJUSTABLE SPEED DRIVES AND MOTION CONTROL (3). Adjustable speed drives, associated power electronic converters, simulation and control. Lec. PREREQS: ECE 530

ECE 536. POWER SYSTEM PROTECTION (3). Fundamentals of protective relaying. Relay input sources. Generation, transmission, and distribution systems protection. Stability and load shedding. PREREQS: ECE 433 or ECE 533 or equivalent.
ECE 537. SMART GRID (3). Fundamentals of smart power grids. Technology advances in transmission and distribution systems, policy drivers, assets and demand management, and smart grid security. PREREQS: Background in power systems analysis equivalent to ECE 433
ECE 538. ELECTRIC AND HYBRID ELECTRIC VEHICLES (4). Transportation electrification history, hybrid electric vehicle architecture, powertrain components and their modeling and control, vehicle system dynamics and controls. PREREQS: ECE 331 and ECE 431

ECE 550. LINEAR SYSTEMS (4). Linear dynamic systems theory and modeling. PREREQS: ECE 351 and ECE 352 or equivalent

## ECE 560. STOCHASTIC SIGNALS AND

SYSTEMS (4). Stochastic processes, correlation functions, spectral analysis applicable to communication and control systems. PREREQS: ECE 461 or ECE 561

ECE 561. INTRODUCTION TO ANALOG AND
DIGITAL COMMUNICATIONS (4). Fundamental concepts of analog and digital telecommunication systems: modeling, analysis, and design of analog amplitude and angle modulation systems; probabilistic performance assessment of modulated signals over noisy channels; introduction to baseband digital modulation techniques such as binary pulse amplitude modulation and pulse position modulation and their demodulation in the presence of random noise. Lec. PREREQS: ECE 351 and ECE 352 and ECE 353
ECE 562. DIGITAL COMMUNICATIONS AND CHANNEL CODING (4). Modeling, analysis, design of baseband and passband digital communications systems: geometric representation of signals; correlator receivers for M-ary digital communications systems; decision theory and its application to digital communication systems in additive white Gaussian noise environment; generation, transmission, and reception of passband digital modulated signals (BPSK, QPSK, FSK PAM); basics of information theory and channel encoding. Lec. PREREQS: ECE 461 and ECE 351 and ECE 352 and ECE 353

ECE 563. WIRELESS COMMUNICATIONS NETWORK (4). Wireless networks: personal area (IEEE 802.15.4a), local area (IEEE 802.11), metropolitan area (IEEE 802.16), and mobile cellular networks (e.g., CDMA); physical-layer techniques for data modulation and multiple access; RF system engineering aspects of mobile cellular networks (e.g., system capability for voice and packet data traffics, RF coverage for a certain propagation environment.) Lec. PREREQS: Probability background. Recommended: ECE 461
ECE 564. DIGITAL SIGNAL PROCESSING (4).
Analysis and design of discrete-time linear-time invariant systems for processing discrete-time signals: DT-LTI system properties, DT signal
analysis using Discrete-Time Fourier Transform, Discrete Fourier Transform and z-Transform, frequency response and transfer function. Signal sampling and reconstruction, digital processing of continuous-time signals, FIR and IIR digital filter design, and filter structures. PREREQS: ECE 351 and ECE 352

ECE 565. ESTIMATION, FILTERING, AND
DETECTION (4). Principles of estimation, linear filtering, and detection. PREREQS: ECE 353 or equivalent.
ECE 566. INFORMATION THEORY (4).
Introduction to information theory: entropy, differential entropy, entropy rates, mutual information, data compression, channel capacity, source coding, channel coding, network information theory. PREREQS: ECE 353 or equivalent; strong mathematical background.
ECE 567. DIGITAL SIGNAL PROCESSING (3). Advanced methods in signal processing, optimum filter design, decimation and interpolation methods, quantization error effects, spectral estimation. PREREQS: ECE 464 or ECE 564 or instructor approval required
ECE 568. ADVANCED DIGITAL IMAGE
PROCESSING (3). Advanced topics in digital image processing including wavelet and multiresolution image processing, image compression, image segmentation, image representation and description, and object recognition. Implementation of digital image processing algorithms using Matlab Image Processing Toolbox. PREREQS: ECE 468 or CS 555
ECE 570. HIGH PERFORMANCE COMPUTER
ARCHITECTURE (4). Advanced concepts in computer architecture. Performance improvement employing advanced pipelining and multiple instruction scheduling techniques. ssues in memory hierarchy and management. CROSSLISTED as CS 570. PREREQS: ECE 472 or ECE 572

ECE 571. ENERGY-EFFICIENT VLSI DESIGN
(4). Combinational and sequential logic design using CMOS transistors; analysis of power consumption and logic delay of digital logic; clock design including skew, jitter, and dynamic clock energy consumption; supply voltage and power supply noise sources; dynamic voltage frequency and scaling (DVFS); sub-threshold logic design and effect on energy/robustness; custom digital integrated circuit design including transistor layouts and CAD entry; CMOS scaling and the effect on process variability and power consumption. Lec/lab. PREREQS: ECE 271 and ECE 322 and ECE 323* with a minimum grade of C.

ECE 572. COMPUTER ARCHITECTURE (4).
Computer architecture using processors, memories, and I/O devices as building blocks. Issues involved in the design of instruction set architecture, processor, pipelining, and memory organization. Design philosophies and trade-offs involved in Reduced Instruction Set Computer (RISC) architectures. Lec/lab. CROSSLISTED as CS 472/CS 572. PREREQS: ECE 375

ECE 573. MICROCONTROLLER SYSTEM DESIGN (4). Implementation of embedded computer systems focusing on the development of hardware and software for an embedded microcontroller system. Topics include internal microcontroller architecture, interfacing peripheral devices, mixed analog and digital systems, and hardware and software implementation of several systems using a microcontroller and peripherals. ec/lab. PREREQS: ECE 322 and ECE 375 and CS 261

ECE 574. VLSI SYSTEM DESIGN (4).
introduction to custom and semi-custom digital integrated circuit design as used in VLSI systems. The use of CAD/CAE tools, design management, and design methodology are introduced. PREREQS: ECE 322 or ECE 375

ECE 575. DATA SECURITY AND
CRYPTOGRAPHY (3). Secret-key and publickey cryptography, authentication and digital signatures, protocols, implementation issues, privacy enhanced mail, data and communication security standards. PREREQS: Graduate standing.

ECE 576. ADVANCED COMPUTER
NETWORKING (4). Advanced networking concepts: source/channel coding, queuing theory, router design, network architectures (Intserv, DiffServ, MPLS), multimedia protocols (TFRC, RTP), overlay networks, and wireless standards (Bluetooth 802.11b, 3/4G). CROSSLISTED as CS 476/CS 576. PREREQS: (CS 372 or ECE 372) and (ECE 353 or ST 314 or ST 314H)
ECE 577. MULTIMEDIA SYSTEMS (4).
Design of multimedia systems for information technology covering the hardware, software, applications, and networks. Components covered include multimedia representation, coding and compression techniques, wireless networks, networking for multimedia, and embedded system for multimedia. Lec. PREREQS: ECE 375
ECE 578. CYBER-SECURITY (4). A broad overview of the field of computer and network security. Essential cryptographic mechanisms such as symmetric and public-key cryptography (e.g., encryption, signatures), network security and authentication protocols (e.g., Kerberos, TLS, IPSec), system security (e.g., access control, firewalls), advanced topics (e.g., searchable encryption, cloud security, secure computation). CROSSLISTED as CS 578. PREREQS: Graduate standing
ECE 580. NETWORK THEORY (4). Linear graphs, multiport networks, and other topics in advanced network theory. PREREQS: Graduate standing in ECE.

ECE 582. OPTICAL ELECTRONIC SYSTEMS
(4). Photodetectors, laser theory, and laser systems. Lec/lab. CROSSLISTED as PH 482/ PH 582. PREREQS: (PH 481 or PH 581) or equivalent
ECE 583. GUIDED WAVE OPTICS (4). Optical fibers, fiber mode structure and polarization effects, fiber interferometry, fiber sensors, optical communication systems. Lec/lab. CROSSLISTED as PH 483/PH 583. PREREQS: (ECE 391* or PH 481* or PH 581*)
ECE 584. ANTENNAS AND PROPAGATION (4). Introduction to antennas and radiowave propagation. Offered alternate years.
ECE 585. MICROWAVE DESIGN TECHNIQUES
(4). Introduction to basic design techniques required for the design of high-frequency circuits and systems. Lec/Lab.
ECE 590. ANALYTICAL TECHNIQUES IN ELECTROMAGNETIC FIELDS (4). Basic analytical techniques required to solve meaningful field problems in engineering. PREREQS: Graduate standing in ECE.
ECE 591. ADVANCED ELECTROMAGNETICS
(3). Advanced techniques for analyzing problems in electromagnetics, primarily numerical. Offered alternate years. PREREQS: ECE 590
ECE 592. ADVANCED OPTOELECTRONICS (3).
Principles of quantum exchange devices, fieldmaterial interaction and theory, and applications of optical circuits and devices. Offered alternate years. PREREQS: (ECE 482 or ECE 582) and ECE 590

ECE 593. RF MICROWAVE CIRCUIT DESIGN (3). Active/passive RF and microwave circuit design with emphasis to wireless systems. PREREQS: ECE 390 and ECE 391 or equivalent
ECE 599. SPECIAL TOPICS (0-16). Course work to meet students' needs in advanced or specialized areas and to introduce new important topics in electrical and computer engineering at the graduate level. This course is repeatable for a
maximum of 99 credits.
ECE 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ECE 603. ECE PhD THESIS (1-16). This course is repeatable for a maximum of 999 credits.

ECE 605. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ECE 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ECE 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.
ECE 611. ELECTRONIC MATERIALS
PROCESSING (3). Technology, theory, and analysis of processing methods used in integration circuit fabrication. Offered alternate years. CROSSLISTED as CHE 611. PREREQS: Graduate standing or instructor approval.
ECE 612. PROCESS INTEGRATION (3).
Process integration, simulation, and statistical quality control issues related to integrated circuit fabrication. Offered alternate years. CROSSLISTED as CHE 612. PREREQS: ECE 611 or CHE 611 or instructor approval.
ECE 613. ELECTRONIC MATERIALS AND CHARACTERIZATION (3). Physics and chemistry of electronic materials and methods of materials characterization. Offered alternate years. CROSSLISTED as CHE 613. PREREQS: Graduate standing or instructor approval.
ECE 614. SEMICONDUCTORS (3). Essential aspects of semiconductor physics relevant for an advanced understanding of semiconductor materials and devices. Offered alternate years. PREREQS: Exposure to quantum mechanics and solid state physics.
ECE 615. SEMICONDUCTOR DEVICES I (3). Advanced treatment of two-terminal semiconductor electronic devices. Offered alternate years. PREREQS: Graduate standing or instructor approval; ECE 614 recommended.
ECE 616. SEMICONDUCTOR DEVICES II (3).
Advanced treatment of three-terminal semiconductor electronic devices. Offered alternate years. PREREQS: ECE 615 or instructor approval.
ECE 619. SELECTED TOPICS IN SOLID STATE
(3). Special courses taught on various topics in solid state as interests and demands vary. This course is repeatable for a maximum of 99 credits.

ECE 621. RADIO FREQUENCY IC DESIGN (3). Radio frequency (RF) circuits. Principles, analysis, and design of bipolar and MOS RF IC building blocks: low noise amplifiers, mixers, oscillators, frequency synthesizers. PREREQS: (ECE 422 or ECE 522) and (ECE 423 or ECE 523) or ECE 520
ECE 626. ANALOG CMOS CIRCUIT DESIGN (3). Switched-capacitor circuit design, on-chip filters, data converters. Practical aspects of analog CMOS IC design.
ECE 627. OVERSAMPLED DELTA-SIGMA
DATA CONVERTERS (3). Noise-shaping theory in first, second, and higher-order modulators. Design, simulation, and realization in hardware of converters using this popular architecture.

ECE 659. SELECTED TOPICS IN SYSTEMS AND CONTROL (3). Course work to meet students, needs in advanced or specialized areas and to introduce the newest important results in systems and control. This course is repeatable for a maximum of 18 credits. PREREQS: Graduate standing in ECE.

ECE 662. COMMUNICATION SYSTEMS-CODING AND INFORMATION THEORY (3). Various aspects of information theory, with particular emphasis on the coding process; data
compression problems, and the development of rate distortion theory. PREREQS: (ECE 462 or ECE 562) and ECE 560

ECE 669. SELECTED TOPICS IN

## COMMUNICATIONS AND SIGNAL

PROCESSING (3). Course work to meet students' needs in advanced or specialized areas and to introduce the newest important results in signal processing. This course is repeatable for a maximum of 18 credits. PREREQS: Graduate standing in ECE.
ECE 679. SELECTED TOPICS IN COMPUTER ENGINEERING (1-16). Topics to be presented at various times include information storage and retrieval, computer architecture, fault-tolerant computing, asynchronous sequential circuits, automata, data transmission, coding theory. This course is repeatable for a maximum of 99 credits. PREREQS: Graduate standing in ECE.
ECE 699. SPECIAL TOPICS (3). Advanced studies in field and wave theories and special devices. Topic examples are microwave and acoustic devices, advanced lasers and masers, electron beam interactions with traveling waves, MHD device dynamics. This course is repeatable for a maximum of 99 credits. PREREQS: Graduate standing in ECE.

## - HUMANITARIAN ENGINEERING SCIENCE AND TECHNOLOGY COURSES

HEST 299. SPECIAL TOPICS (1-6). This course is repeatable for a maximum of 9 credits.
HEST 310. *INTRO TO COMMUNITY
ENGAGEMENT AND COMMUNITY-BASED
DESIGN (3). Includes study of civic problems and issues, design-thinking concepts and application to co-design of engineering, science and technology-based solutions with social impact, and development of dispositions for effective community engagement through field study and service-learning. Recommended course for student wanting to complete a HEST internship. (Bacc Core Course)
HEST 320. *ENGINEERING FOR GLOBAL
HEALTH SOLUTIONS (3). An introduction to the critical processes and drivers involved in the development of engineering solutions to address global health problems. Topics include world health challenges, accessing and interpreting health and economic data, basic healthcare systems around the world, the importance of ethical guidelines in ensuring the protection of human subjects, the process of cost effectiveness assessment of a technology, and the timescale and hurdles to adoption of a technology. (Bacc Core Course)
HEST 399. SPECIAL TOPICS (1-6). This course is repeatable for a maximum of 9 credits.
HEST 411. ENGINEERING DESIGN
FOR EMERGENCY \& LOW-RESOURCE
ENVIRONMENTS (3). Introduces the challenges of engineering in emergency and low-resource environments, concepts of appropriate technologies and response, and engineering design of discrete services and technologies such as water systems, environmental health systems and infrastructure. PREREQS: Completion of an undergraduate engineering fluid mechanics course or equivalent.
HEST 412. *MULTIDISCIPLINARY CASE STUDIES IN HUMANITARIAN ENGINEERING, SCIENCE AND TECHNOLOGY (3). Introduces students to multidisciplinary methods and perspectives applied to case studies in humanitarian engineering, science and technology. Applications to real world issues with global implications at the interface of humanity and nature are addressed from a systems perspective using a case study approach.
HEST 499. SPECIAL TOPICS (1-6). This course is repeatable for a maximum of 9 credits.

HEST 511. ENGINEERING DESIGN FOR EMERGENCY \& LOW-RESOURCE ENVIRONMENTS (3). Introduces the challenges of engineering in emergency and low-resource environments, concepts of appropriate technologies and response, and engineering design of discrete services and technologies such as water systems, environmental health systems and infrastructure. PREREQS: Completion of an undergraduate engineering fluid mechanics course or equivalent.
HEST 512. MULTIDISCIPLINARY CASE STUDIES IN HUMANITARIAN ENGINEERING, SCIENCE AND TECHNOLOGY (3). Introduces students to multidisciplinary methods and perspectives applied to case studies in humanitarian engineering, science and technology. Applications to real world issues with global implications at the interface of humanity and nature are addressed from a systems perspective using a case study approach.
HEST 599. SPECIAL TOPICS (1-6). This course is repeatable for a maximum of 9 credits.

## SCHOOL OF MECHANICAL, INDUSTRIAL, AND <br> MANUFAGTURING ENGINEERING

## EAC/ABET Accredited

Robert B. Stone, Head
David P. Cann, Associate Head for
Graduate Programs
Brady J. Gibbons, Associate Head for
Undergraduate Programs
204 Rogers Hall
Oregon State University
Corvallis, OR 97331-6001
541-737-3441
Email: info-mime@oregonstate.edu
Website: http://mime.oregonstate.edu/

## FACULTY

Professors Batten, Campbell, Cann, Doolen, Kim, Kruzic, Liburdy, Logendran, Narayanan, Paasch, B. Paul, Pence, Sharp, Stone, I. Tumer, K. Tumer
Associate Professors Albertani, Apte, Atre, Bay, Funk, Gibbons, Grimm, Hurst, Porter, Smart, Warnes

## Assistant Professors

Balasubramanian, Blunck, Calvo, DuPont, Eseonu, Feuerbacher, Fronk, Greaney, Haapala, Hagen, Hatton, Hollinger, Hoyle, Malhotra, Menguc, Ng, Niemeyer, Parmigiani, Sencer, Tucker, Vergara, Wang
Instructors Ettringer, Feldman, Natarajan, Shea, Squires

## PROFESSIONAL FACULTY

Barber, Borntrager, DeAdder, Finn, Helvie, Jensen, Marx, G. Newcomb, L. Paul, Randall, J. Robinson, T.A. Robinson

## Undergraduate Majors

Energy Systems Engineering (BS, HBS)
[OSU-Cascades/COCC only]
Industrial Engineering (BS, CRED, HBS)

## Option

Business Engineering
Manufacturing Engineering (BS, CRED, HBS)
Mechanical Engineering (BS, CRED, HBS)
Undergraduate Minor
Aerospace Engineering
Graduate Majors
Industrial Engineering (MAIS, MEng, MS, PhD)
Graduate Options
Advanced Manufacturing
Engineering Management
Human Systems Engineering
Information Systems Engineering
Manufacturing Systems Engineering
Materials Science (MS, PhD)
Graduate Areas of Concentration
Chemistry
Chemical Engineering
Civil Engineering
Electrical and Computer Engineering
Forest Products
Mathematics
Mechanical Engineering
Nuclear Engineering
Physics
Mechanical Engineering (MEng, MS, PhD)
Graduate Options
Advanced Manufacturing
Design
Materials Mechanics
Renewable Energy
Robotics
Thermal Fluids
Robotics (MEng, MS, PhD)
Graduate Areas of Concentration
Assistive Robots
Autonomous Robots
Human-Robot Interaction
Legged Locomotion
Manipulation
Mobile Robots
Multi-robot Coordination

## Graduate Minors

Industrial Engineering
Mechanical Engineering
Robotics

The School of Mechanical, Industrial, and Manufacturing Engineering (MIME) at OSU offers three ABET-accredited undergraduate degrees: Mechanical Engineering, Industrial Engineering, and Manufacturing Engineering and one undergraduate degree that is currently undergoing ABET accreditation: Energy Systems Engineering (offered at OSUCascades campus).
The mission of the School of MIME is two-fold:

- To prepare our students as
entrepreneurial, team-oriented, work-
ready graduates and lifelong learners in mechanical, industrial and manufacturing engineering, and
- To engage in collaborative, cuttingedge research whose applications lead to greater prosperity and a sustainable future for Oregon and the world.

## MIME PROGRAM OBJECTIVES

ABET requires that each program establishes educational objectives defined as "broad statements that describe the career and professional accomplishments that the program is preparing graduates to achieve." While each program has specific objectives, all MIME programs' program objectives may be summarized by the following statements in three broad areas of student participation and graduate achievement:

1. Our graduates will be systems thinkers. MIME graduates will be able to analyze, evaluate, improve, and design engineered systems and processes using modern engineering tools (hardware and software) and approaches. They will demonstrate in-depth knowledge of mechanical, industrial and/or manufacturing systems.
2. Our graduates will be global collaborators. MIME graduates will be able to communicate effectively across disciplines and cultures. They will provide management and leadership skills within their organizations and work effectively in diverse environments.
3. Our graduates will be innovative designers and problem solvers. MIME graduates will use both structured and unstructured methodologies to innovate systems and processes. They will apply technical knowledge and creativity in solving real-world problems. They will demonstrate a sound understanding of engineering and project management fundamentals and breadth of experience with engineering design and problem-solving processes.

## MECHANICAL ENGINEERING

Mechanical engineers design and develop small devices, large equipment, and processes for society. They play major roles in the design, testing and operation of mechanisms, machines, and systems, including processes for energy conversion and equipment used in households, businesses, transportation, and manufacturing.

In addition to the university baccalaureate core, the mechanical engineering curriculum has its base in mathematics, science, engineering science, and design. Mathematics and science courses occur primarily in the first two years. Engineer-
ing science is a major component, which is treated from the sophomore year to graduation in a combination of required and technical elective sources.

OSU's Mechanical Engineering Program has all the attributes needed for the best learning environment: ABET accredited curriculum, excellent faculty, modern facilities, quality students, and strong industrial interaction.

Engineering design is an integral element of the program. The philosophy is to "plant the seed" for design at the freshman level and grow it throughout the program. Most of the skills are developed at the junior and senior levels when students have achieved proficiency in the basic technical requirements. At the junior level, the design process is extensively developed in three courses. At the senior year, design experiences occur in several areas, culminating in the twoterm senior project in which students in small teams carry out the design of some product or process under the supervision of a faculty advisor. Attention to handson activity adds a very desirable "feel" for many aspects of the design process.

A good choice of senior electives enables students to achieve a degree of specialization and depth to match their interests. The areas include applied stress analysis; design, dynamics, and analysis of mechanical and thermal/fluid systems; concurrent engineering; control system design; mechatronics; heat transfer; and metallurgy and materials.

The faculty encourages a vibrant extracurricular program for professional and leadership experiences. Students are encouraged to obtain at least three months of work experience through an industrial or research internship or to participate in a foreign exchange program. The school's goal is to have more than 95 percent of its students graduate with such experience. In addition to students having general internships, many of the professional-level students participate in the industry-driven Multiple Engineering Cooperative Program (MECOP). This program provides two paid six-month internships at over 60 Pacific Northwest companies where interns work with a company mentor and improve their capabilities for the work environment.

Mechanical engineers can be found in a wide variety of industries including aerospace, electronics, biomedical, transportation, manufacturing, energy, automotive, and government labs. Because of the increasing complexity of mechanical engineering, graduate study for the MS and PhD degrees is advisable for students who wish to specialize in depth in any of the above areas. The undergraduate curriculum provides an excellent foundation for graduate study.

## INDUSTRIAL ENGINEERING

Industrial engineers (IEs) apply science, mathematics, and engineering methods to complex system integration and operation. Because the systems with which they work are often large and complex, IEs utilize knowledge and skills in a wide variety of disciplines, have the ability to work well with people, and take a broad, systems perspective. The Industrial Engineering degree is a very flexible degree that allows students to tailor their program of study to meet their individual career goals. A large number of restricted elective credits allows students to pursue the Business Engineering option or to customize their program to a field of interest.

IEs are key players in the integration and operation of systems in all sectors of industry and government including the following (with examples):

- aerospace (NASA space shuttle prelaunch processing systems)
- automotive (automobile final assembly plants)
- communications (telephone services)
- computers (factory information systems)
- electronics/semiconductors (silicon wafer fabrication facilities)
- food (canneries and fast food restaurant chains)
- government (department of motor vehicles service centers)
- health care (hospital central stores and operating rooms)
- manufacturing (circuit board fabrication facilities)
- retail (product distribution centers)
- transportation (airlines, overnight delivery services)
In their role as system integrators, IEs analyze and design systems. For example: - facilities layout,
- material handling systems,
- manufacturing and other production systems,
- information systems,
- individual and group workplaces.

In the operations realm, IEs analyze, design and manage processes. For example:

- manufacturing processes-service processes,
- production system planning and control,
- resource allocation and scheduling,
- personnel assignment and scheduling,
- quality assurance,
- inventory control,
- system and personnel safety.

## ENERGY SYSTEMS ENGINEERING

Energy systems engineers oversee complex energy conversion and distribution systems, work to improve energy storage systems, and manage the efficient use of energy in building, manufacturing, and
processing systems. ESE professionals also study the secondary effects of energy usage from a local environmental impact, regional and national economic impact, and global climate change perspective.

Energy systems engineers pursue a variety of jobs and occupations. For example, they might be hired to do any of the following:

- Manage operations of a wind turbine farm
- Analyze efficiency of hydroelectric power systems
- Oversee production of innovative fuel-cell technologies
- Evaluate the economic viability of new solar power installations
- Assess the environmental impact of alternative energy systems

## MANUFACTURING ENGINEERING

The Manufacturing Engineering degree is a more specialized degree, focusing on both high-tech manufacturing and traditional manufacturing. In particular, it is a specialization of industrial engineering that focuses on the making of physical products. The Manufacturing Engineering degree offers a hands-on education, and manufacturing engineering students are encouraged to participate in the college's MECOP program, a nationally recognized industrial cooperative education program.

Students who complete the requirements for the Manufacturing Engineering degree plus 32 additional credits (at least 16 of these credits must be from the list of industrial engineering restricted electives) can earn two separate degrees, one in manufacturing engineering and the other in industrial engineering. The additional 32 credits typically take two additional quarters to complete.

## UNDERGRADUATE MAJORS WITH OPTIONS

ENERGY SYSTEMS ENGINEERING (BS, CRED, HBS)

## Offered at OSU-Cascades only.

## ABET Accredited

For more information, please contact program advisor Apolo Aguirre, 541-3222054, apolo.aguirre@oregonstate.edu.

Note: The Pre-Energy Systems Engineering undergraduate major (major code 257) is available on the Corvallis campus, but the pro-school courses for the Energy Systems Engineering major (major code 293) are only offered on the OSU-Cascades campus. To earn the HBS degree, students must take Honors courses on the Corvallis campus; Honors courses are not available at OSU-Cascades.

## GRADUATE MAJORS

INDUSTRIAL ENGINEERING (MEng, MS, PhD, MAIS)
Also available via Ecampus.
Industrial engineering is the application of science, mathematics, and engineering methods to complex system integration and operation. Because the systems with which they work are so large and complex, industrial engineers (IEs) must develop expertise in a wide variety of disciplines, the ability to work well with people, and a broad, systems perspective. All IE graduate students learn advanced methods of system integration and operation. As practitioners, MEng and MS graduates analyze and design facilities, material handling systems, manufacturing processes, information systems, and workstations. They also develop, apply, and oversee policies, procedures, and algorithms for production planning, inventory control, resource allocation and scheduling, quality assurance, and supply chain management. As researchers, MS and PhD graduates advance the field of industrial and manufacturing engineering by their work in industrial corporations and government agencies. As educators, PhD graduates teach and perform research in industrial and manufacturing engineering in universities around the world.
Major Code: 3190

## OPTIONS

## ADVANCED MANUFACTURING OPTION

The Advanced Manufacturing graduate option is offered under both the Industrial Engineering and Mechanical Engineering majors. Advanced Manufacturing (AM) focuses on the integration of nanomaterial synthesis and microfabrication techniques and conventional macroscale manufacturing technologies to produce nano- and microscale systems in an economically, environmentally, and socially sustainable manner.

A minimum of 12 credits from the following set of specific courses will be required of students wishing to declare the IE Advanced Manufacturing (AM) graduate option:

## One materials science course:

ME/MATS 570. Structure-Property Relations in Materials (4)
One or more manufacturing systems course(s):
IE 552. Design of Industrial Experiments (3)
MFGE 535. Industrial Sustainability
Analysis (3)
MFGE 536. Lean Manufacturing Systems Engineering (4)
One or more manufacturing
processes course(s):

MFGE 531. Meso-Scale Manufacturing (3)
MFGE 534. Ceramics Processing (3)
MFGE 538. Composites Manufacturing (4)
Option Code: 3191

## ENGINEERING MANAGEMENT OPTION

## Also available via Ecampus.

The graduate option in Engineering Management at Oregon State University is designed for engineers who are conversant in the language and methods of engineering and technology who are motivated to become managers and leaders. The curriculum will equip engineers with the knowledge and skills necessary to effectively manage technical resources to accomplish complex technical tasks.

## Required

IE 571. Project Management in Engineering (3)

IE 581. Operations Management (4)
IE 582. Introduction to Management for
Engineers and Scientists (4)
IE 583. Advanced Engineering Economics Analysis (4)
Option Code: 3195

## HUMAN SYSTEMS ENGINEERING OPTION

This graduate option within the Industrial Engineering major distinguishes an area of specialization, human systems engineering, within the broader discipline of industrial engineering. Human Systems Engineering (HSE) uses engineering methods and knowledge from the physical, biological, information, social, and management sciences to develop, implement, operate, evaluate, and improve human-machine, human-human, and human-organization systems. Topical areas include management systems engineering and human factors and ergonomics.

The following set of specific courses will be required of students wishing to declare the IE Human Systems Engineering (HSE) graduate option:
IE 545. Human Factors Engineering (4) or IE 570. Management Systems Engineering (4)
IE 546. Human-Machine Systems Engineering (3)
or MFGE 536. Lean Manufacturing Systems Engineering (4)
IE 548. Cognitive Engineering (3) or IE 571. Project Management in Engineering (3)
One course from the list below:
H 594. Applied Ergonomics (3)
IE 515. Simulation and Decision Support Systems (4)
ME 515. Risk and Reliability Analysis in Engineering Design (4)
MFGE 535. Industrial Sustainability Analysis (3)
PSY 537. Motivation (4)
PSY 540. Cognition Research (4)
PSY 544. Learning and Memory (4)

PSY 596 Industrial and Organizational
Psychology (4)
SOC 518. Qualitative Research Methods (4)
ST 531. Sampling Methods (3)
ST 539. Survey Methods (3)
ST 559. Bayesian Statistics (3)
Option Code: 3192

## INFORMATION SYSTEMS ENGINEERING OPTION

This graduate option within the Industrial Engineering major distinguishes an area of specialization, information systems engineering, within the broader discipline of industrial engineering. Information Systems Engineering (ISE) uses information systems to integrate organizational mechanisms, people, and processes for purposes of improving organizational performance. Typical ISE technologies include database management systems, networks, wireless communications, Web-enabled technologies, and automatic identification and data collection using bar codes, RFID, EDI, and other such devices.

The following set of specific courses will be required of students wishing to declare the IE Information Systems Engineering (ISE) graduate option:
IE 511. Visual Programming for Industrial Applications (4)
IE 512. Information Systems Engineering (4)

IE 518. Telecommunication Concepts (3)
IE 519. Wireless Networks (3)

## Total=14

Option Code: 3193

## MANUFACTURING SYSTEMS ENGINEERING OPTION

This graduate option within the Industrial Engineering major distinguishes an area of specialization within the broader discipline of industrial engineering. Manufacturing Systems Engineering (MSE) focuses on the development of reliable, economically competitive, and environmentally benign manufacturing processes and systems. Topical areas include operations research, computer integrated manufacturing, environmentally responsible manufacturing, simulation, and statistical quality engineering.

## Required Courses (6):

IE 521. Industrial Systems Optimization I (3) or IE 522. Industrial Systems Optimization II (3)
IE 563. Advanced Production Planning and Control (3)

## Plus six (6) or more credits of

 course work from the following alternatives:IE 512. Information Systems Engineering (4)
IE 515. Simulation and Decision Support Systems (4)
IE 545. Human Factors Engineering (4) IE 564. Design and Scheduling of Cellular Manufacturing Systems (3)

ME 515. Risk and Reliability Analysis in Engineering Design (4)
ME 516. Modeling and Analysis of Complex Systems (4)
ME 517. Optimization in Design (4)
MFGE 536. Lean Manufacturing Systems Engineering (4)

## Total=12

Option Code: 3196

## MATERIALS SCIENCE (MS, PhD)

## Graduate Areas of Concentration

Chemistry, chemical engineering, civil engineering, electrical and computer engineering, forest products, mathematics, mechanical engineering, nuclear engineering, physics
The discipline of materials science is inherently interdisciplinary, involving fundamental aspects of chemistry, physics, biology, geoscience, agricultural science, mathematics, and engineering.

Reflecting this characteristic, the Materials Science Program at Oregon State University, initiated in the 1980s, is distributed over nine departments spanning three OSU colleges. This allows students to earn MS and PhD degrees in Materials Science in many different areas of concentration, including all classes of materials, and in a wide range of materials behavior. The course work requirements are extremely flexible to allow students to tailor their program of study to directly support their research activities.
Applications and other inquiries should be forwarded to Prof. Bill Warnes, Materials Science Program Director, 204 Rogers Hall, Oregon State University, Corvallis, OR, 97331, USA. Email: william.warnes@oregonstate.edu.
For more information, visit the website at http://matsci.oregonstate.edu/

## MECHANICAL ENGINEERING

 (MEng, MS, PhD)The School of Mechanical, Industrial, and Manufacturing Engineering offers graduate programs leading to the Master of Engineering, Master of Science, and Doctor of Philosophy degrees. Master's degree candidates may pursue thesis or nonthesis options; students in the nonthesis option must complete additional course work where an individual project may be included.
The mechanical engineering field is diverse, therefore, research activities in the school encompass a broad range of technical endeavors. Areas of research include applied mechanics, solid mechanics, biomechanics, dynamics, stress analysis, design, systems and control, energy, applied thermodynamics, heat transfer, fluid mechanics, metallurgy, and materials science.
In addition, research activities have been directed toward areas of current
interest and need, including wind energy, microscale energy conversion, combustion, composite materials, superconductors, advanced materials, impact dynamics, mechatronics, microscale fluid mechanics, diagnostics in design, design for manufacture and computer-aided design and manufacturing, design and control of complex systems.

## DESIGN OPTION

## Required

ME 507. Seminar: Design and Mechanics (1)
Choose 15 credits from the following courses:
ME 511. CAD/CAM III (3)
ME 512. Design of Mechanisms (4)
ME 515. Risk and Reliability Analysis in Engineering Design (4)
ME 516. Modeling and Analysis of Complex Systems (4)
ME 517. Optimization in Design (4)
ME 611. Modern Product Design (4)
MFGE 536. Lean Manufacturing Systems
Engineering (4)

## Total=16

Option Code: 3215

## ENGINEERING

MANAGEMENT OPTION

## Also available via Ecampus.

The graduate option in Engineering Management at Oregon State University is designed for engineers who are conversant in the language and methods of engineering and technology who are motivated to become managers and leaders. The curriculum will equip engineers with the knowledge and skills necessary to effectively manage technical resources to accomplish complex technical tasks.

## Required

IE 571. Project Management in Engineering (3)

IE 581. Operations Management (4)
IE 582. Introduction to Management for
Engineers and Scientists (4)
IE 583. Advanced Engineering Economics Analysis (4)

## MATERIALS MECHANICS OPTION

Required
ME 507. Seminar: Materials Science (1)
ME 520. Applied Stress Analysis (4)
ME 570. Structure-Property Relations in Materials (4)
Choose one course from the following (mechanical behavior):
ME 583. Composite Materials (3)
ME 584. Advanced Fracture of Materials (4)
ME 585. Fatigue of Materials (4)
ME 587. Dislocations, Deformation, and Creep (4)
Choose one course from the following (mechanics):
ME 523. Advanced Stress Analysis (4)
ME 524. Finite Element Modeling of
Mechanical Engineering Systems (4)
ME 553 Structure and Mechanics
Laboratory (4)
Total=16-17
Option Code: 3220

## RENEWABLE ENERGY OPTION

This graduate option within the Mechanical Engineering graduate major distinguishes an area of interdisciplinary specialization, Renewable Energy (RE).

Renewable Energy is inherently interdisciplinary and thus is being proposed as an interdisciplinary option within ME which requires students to select 16 credits of ME courses from across all four ME primary graduate options and then choose from a set of courses which equip students to understand the underlying physical phenomena governing renewable energy technologies and be able to understand overarching themes in US energy policy pertaining to renewables.
Students wishing to declare the ME Renewable Energy (RE) graduate option must first fulfill core mechanical engineering requirements in one of two ways:

1. Declare an interdisciplinary option in mechanical engineering, or
2. Fulfill the requirements of one of the four ME Primary Options.

## Required:

Select and complete 8 credits of
technical electives from:
CE 630. Ocean Wave Mechanics I (3)
CE 639. Dynamics of Ocean Structures (3)
CE 647. Ocean and Coastal Engineering
Measurements (3)
CHE 550. Conventional and Alternative Energy Systems (3)
CHE 551. Solar Energy Technologies (3)
ECE 530. Contemporary Energy
Applications (4)
ECE 532. Dynamics of Electromechanical
Energy Conversion (4)
ECE 533. Power Systems Analysis (4)
ME 507. Seminar/ Marine Forum (1)
ME 543. Renewable Energy: Thermal Fluid Systems (4)
Select and complete 4 credits of technical electives from:
PS 573. US Energy Policy (4)
PS 578. Renewable Energy Policy (4)

## Total=16 minimum

Option Code: 3222

## ROBOTICS OPTION

## Required:

ME 507. Seminar: Robotics and Control (1)
Choose 16 credits from the following:
ME 531. Linear Multivariable Control Systems I (4)
ME 532. Linear Multivariable Control Systems II (4)
ME 533. Nonlinear Dynamic Analysis (4)
ROB 521. Applied Robotics (4)
ROB 536. Actuator Dynamics (4)
[Terminated summer 2016]
ROB 537. Learning-Based Control (4)
ROB 538. Autonomous Agents and MultiAgent Systems (4)
Total=17
Option Code: 3225

## THERMAL FLUID <br> SCIENCES OPTION

## Required:

ME 507. Seminar: Thermal Fluid Science Seminar (1)
ME 526. Numerical Methods for
Engineering Analysis (4)
ME 550. Applied Heat Transfer (4)
ME 552. Measurements in Fluid Mechanics and Heat Transfer (4)
ME 560. Intermediate Fluid Mechanics (4)

## Total=17

Option Code: 3230

## ROBOTICS (MEng, MS, PhD)

Graduate Areas of Concentration
Assistive robots, autonomous robots, human-robot interaction, legged locomotion, manipulation, mobile robots, multi-robot coordination
The interdisciplinary robotics program offers Master of Engineering, Master of Science, and Doctor of Philosophy degrees in Robotics.

Master's degree candidates may pursue thesis or nonthesis options. The PhD program prepares students for careers in industry, research laboratories or universities. Students are encouraged to develop programs of study in close cooperation with the faculty members in their areas of interest.
The program includes core areas of robotics, including actuation, locomotion, manipulation, dynamics, control, sensing, artificial intelligence, and human/ robot interactions.

Additional information concerning courses, advising procedures, faculty, and many other aspects of the program may be found in the programs' website at http://robotics.oregonstate.edu/

Course work for all degrees in Robotics (including minors) will consist of at least 15 credits of core courses, selected from the following list:
CS 515. Algorithms and Data Structures (4)
CS 531. Artificial Intelligence (4)
CS 532. Advanced Artificial Intelligence (4)
CS 533. Intelligent Agents and Decision Making (4)
CS 534. Machine Learning (4)
CS 536. Probabilistic Graphical Models (4)
CS 556. Computer Vision (4)
ECE 550. Linear Systems (4)
ME 531. Linear Multivariable Control Systems I (4)
ME 532. Linear Multivariable Control Systems II (4)
ME 533. Nonlinear Dynamic Analysis (4)
ROB 521. Applied Robotics (4)
ROB 537. Learning-Based Control (4)
ROB 538. Autonomous Agents and Multiagent Systems (4)
ROB 551. Biomechanisms (4) [Pending submission and approval of curriculum proposal.]
ROB 554. Geometric Mechanics (4)
[Pending submission and approval of curriculum proposal.]
ROB 557. Programming Mobile Robots (4)
[Pending submission and approval of curriculum proposal.]
ROB 558. Intelligent Mobile Robotics (4) [Pending submission and approval of curriculum proposal.]
Totals: MS/MEng = 45 (minimum);
PhD = 108 (minimum)
Major Code: 3250

## GRADUATE MINORS

INDUSTRIAL ENGINEERING
GRADUATE MINOR

## Minor Code: 3255

## - AERONAUTICAL AND ASTRONAUTICAL ENGINEERING COURSES

AAE 210. INTRODUCTION TO AEROSPACE
ENGINEERING (3). Topics will include the engineering fundamentals of aeronautics and astronautics, including an introduction to aerodynamics, propulsion, structures, orbital mechanics and mission planning. Current industry practices in aerospace vehicle specifications, manufacturing, flight testing and certification will be presented. PREREQS: ENGR 211 [C] and /or equivalent
AAE 412. SPACE SYSTEMS ENGINEERING (4).
Topics will include the fundamentals of astronautics, orbital mechanics and trajectory design, flight dynamics, guidance and navigation, stability and control of spacecraft. Rocket propulsion concepts, including chemical rockets (liquid, gas and solid propellants), hybrid rocket engines and modern advances in satellite power systems will be discussed. Current design practices in space systems engineering will be emphasized. PREREQS: ME 317 [C] and ME 373 [C] and /or equivalent. This partially satisfies the requirements for the minor in Aerospace Engineering and Senior Restricted Electives in Mechanical Engineering.

## - ENERGY SYSTEMS ENGINEERING COURSES

ESE 355. ENERGY REGULATION (4). Introductory course to the policies and laws governing energy generation and transmission in the United States with a focus on electricity. History of regulations give context to understand current regulation and potential future policies. Laws regulating the use of alternative energy resources covered in a practical setting. Offered at OSU-Cascades only. PREREQS: BA 360* [C] or ENGR 390* [C] and junior standing in ESE pro school.
ESE 360. ENERGY CONSUMPTION ANALYSIS
(4). Analysis of energy use in transportation, residential and industrial sectors to understand how new technologies improve energy efficiency. Tradeoff techniques applied to decide between less efficient, less expensive systems versus more efficient, more expensive systems. International energy consumption compared, and energy losses evaluated for heating, cooling and electronic systems. Offered at OSU-Cascades only. PREREQS: (BA 360* [C] or ENGR 390* [C] ) and ME 311 [C] and junior standing in ESE pro school.
ESE 450. ENERGY GENERATION SYSTEMS (4). Survey of technical fundamentals and operational principles of conventional and renewable energy conversion systems to understand the environmental and sustainable issues for energy systems currently in use or may be used in the future to power our industrial society. Offered at OSU-Cascades only. PREREQS: ME 312 [C]
ESE 470. ENERGY DISTRIBUTION SYSTEMS
(4). Detailed coverage of the electrical energy distribution system, its operation, control and design. Design considerations and impacts to meet emerging and evolving customer needs. Broader understanding of natural gas and oil pipeline distribution for these infrastructure
commodities. Offered at OSU-Cascades only. PREREQS: ENGR 202 [C] and ME 311 [C]
ESE 471. ENERGY STORAGE SYSTEMS (4).
Coverage of energy storage techniques involving electrochemical, mechanical and emerging options. Integration of the energy storage media, its effects on the bulk power system, and design tradeoffs to understand environmental impacts, cost, reliabilities, and efficiencies for commercialization of bulk energy storage. Offered at OSU-Cascades only. PREREQS: ENGR 202 [C] and ME 312 [C]
ESE 497. ^MIME CAPSTONE DESIGN (4). Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. CROSSLISTED as IE 497 and ME 497. (Writing Intensive Course) PREREQS: ((IE 355 [C] and IE 356 [C] and IE 366 [C] and IE 367 [C] and IE 368 [C] and WR 327 [C] )) or ((ENGR 322 [C] or MATS 322 [C] ) and (ENGR 391 [C] or ENGR 391H [C]) and ME 250 [C] and (ME 312 [C] or ME 312H [C] ) and (ME 317 [C] or ME 317H [C] ) and ME 383 [C] and WR 327 [C] and (ST 314 [C] or ST 314H [C] )) or ((ENGR 390 [C] or BA 360 [C] ) and IE 425 [C] and (ME 312 [C] or ME 312H [C]) and (ME 331* [C] or ME $331 \mathrm{H}^{*}$ [C] ) and ESE 355 [C] and ESE 360 [C] and WR 327 [C] and (ST 314 [C] or ST 314H [C] ))
ESE 498. ^MIME CAPSTONE DESIGN (4). Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. CROSSLISTED as IE 498 and ME 498. (Writing Intensive Course) PREREQS: ESE 497 [C] or IE 497 [C] or ME 497 [C]
ESE 499. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits. PREREQS: Permission by the instructor.

## INDUSTRIAL AND MANUFACTURING ENGINEERING COURSES

IE 199. SPECIAL TOPICS (1-16). Special topics in industrial engineering. This course is repeatable for a maximum of 16 credits.
IE 212. COMPUTATIONAL METHODS FOR INDUSTRIAL ENGINEERING (4). Engineering problem solving using computational methods. Data structures. Modular programming. Sorting and search algorithms. Algorithms for inventory models, production scheduling, production line analysis, and optimization. PREREQS: ENGR 112 [C] and algebra, calculus, differentiation and integration.
IE 255. INTRODUCTORY QUANTITATIVE
ANALYSIS OF INDUSTRIAL AND
MANUFACTURING SYSTEMS (3). An
introduction to basic analysis concepts that will be utilized in subsequent industrial and manufacturing engineering courses. Emphasis will be placed on fundamental concepts such as data collection, commonly applied quantitative analysis methods, and how these are utilized to support decisions in different industrial and manufacturing system applications. Examples include resource utilization calculations, equipment fraction equations, queuing models, basic statistical inference procedures, and probability models used in discrete event simulation. PREREQS: MTH 252 [C]
IE 285. INTRODUCTION TO INDUSTRIAL AND MANUFACTURING ENGINEERING (3). Introduction to selected topics in industrial and manufacturing engineering, including history and philosophy, product design and manufacturing cycle, integrate role of engineering and business, and multi-objective nature of organizations. Surveys of selected design problems in resource
allocation, operations and quality management, and production engineering. CROSSLISTED as MFGE 285.

IE 299. SPECIAL TOPICS (1-16). Special topics in industrial engineering. This course is repeatable for a maximum of 16 credits.
IE 355. STATISTICAL QUALITY CONTROL (4). Control of quality through the use of statistical analysis; typical control techniques and underlying theory. Development of reliability models and procedures for product assurance. Lec/lab. PREREQS: IE 255 [C] or ST 314 [C]
IE 356. EXPERIMENTAL DESIGN FOR INDUSTRIAL PROCESSES (4). Systematic analysis of processes through the use of statistical analysis, methods, and procedures. Application of statistical techniques including use of classic process analysis techniques, regression and design of experiments. Lec/rec. PREREQS: IE 255 [C] or ST 314 [C]
IE 366. WORK SYSTEMS ENGINEERING (4). Principles and techniques of work measurement, methods engineering, workplace design, work sampling, and predetermined time systems. Basic human factors engineering and ergonomics principles applied to workplace design. The work systems engineering process. Lec/lab/rec. PREREQS: IE 255 [C] or ST 314 [C]
IE 367. PRODUCTION PLANNING AND CONTROL (4). Forecasting techniques, inventory analysis, master production scheduling, material and capacity requirements, planning and scheduling methods. PREREQS: IE 255 [C] or ST 314 [C]
IE 368. FACILITY DESIGN AND OPERATIONS
MANAGEMENT (4). Design and analysis of industrial facilities including just-in-time systems, queuing, material handling systems, material flow analysis, line balancing, systematic layout planning, design of warehouse facilities, and facilities location. PREREQS: IE 255 [C] or ST 314 [C]
IE 380. *THE RESPONSIBLE ENGINEER (3).
The idea of responsibility and the ethical responsibilities of the engineer. Introduction to value, ethics, and ethical systems. Engineering as value creation and the ethical ramifications of engineering. Codes of engineering ethics. Recognizing and addressing ethical dilemmas in engineering. Examination of the individual, social, and environmental effects of engineering and technology. (Baccalaureate Core Course)
IE 399. SPECIAL TOPICS (1-16). Special topics in industrial engineering. This course is repeatable for a maximum of 16 credits.

E 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required

IE 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
IE 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
IE 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

IE 410. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.
IE 411. VISUAL PROGRAMMING FOR INDUSTRIAL APPLICATIONS (4). Objectoriented modeling, Unified Modeling Language, software development concepts, file and database connectivity, and visual programming skills (Microsoft Visual Basic) for use in developing industrial applications, such as process monitoring and supply chain management. PREREQS: IE 212 [C]
IE 412. INFORMATION SYSTEMS
ENGINEERING (4). Framework for enterprise
information systems. Engineering and scientific systems. Requirements definition, enhanced entity relationship modeling, logical modeling, structured query language, relational model, referential integrity. Lec/lab.
IE 415. SIMULATION AND DECISION SUPPORT SYSTEMS (4). Analysis of operations and production systems through the application of computer simulation modeling techniques. Fundamentals of computer simulation including random number generation, input/output data analysis, model validation and verification. Lec/lab. PREREQS: IE 255 [C] or ST 314 [C]

IE 418. TELECOMMUNICATION CONCEPTS (3).
Telecommunication concepts for industrial applications. OSI reference model, local area networks, wide area networks, internet architecture. Taught fall in even years. PREREQS: IE 212 [D-] and previous programming experience.
IE 419. WIRELESS NETWORKS (3). RF fundamentals, ISO 802.11 standards, spread spectrum technology, narrow band technology, direct sequence and frequency hopping transmission schemes, electromagnetic interference, design of indoor wireless networks. PREREQS: IE 418 [C]
IE 425. INDUSTRIAL SYSTEMS OPTIMIZATION
(4). A first course in operations research. Topics include mathematical programming formulations and solutions, the simplex method, network optimization, introduction to metaheuristics, and linear programming under uncertainty. PREREQS: (IE 255 [C] or ST 314 [C] ) and (MTH 306 [C] or MTH 341 [C] ) and /or equivalent

E 426. STOCHASTIC MODELS OF INDUSTRIAL SYSTEMS (4). The application of probabilistic and stochastic modeling methodologies to analyze the performance of production and service systems. Major topics include probability models for space planning, Poisson arrival processes, discrete and continuous time Markov chain models of machine cycle times, and queuing models applied to various industrial systems. Other applications of these tools to model inventories, process behavior, and equipment reliability is illustrated. PREREQS: (IE 255 [C] or ST 314 [C] ) and IE 425 [C]

## IE 470. MANAGEMENT SYSTEMS

ENGINEERING (4). Improvement of organizational performance through the design and implementation of systems that integrate personnel, technological, environmental, and organizational variables. Topics include performance assessment and measurement as well as improvement methodologies. PREREQS: Senior standing.

## IE 471. PROJECT MANAGEMENT IN

ENGINEERING (3). Critical issues in the
management of engineering and high-technology projects are discussed. Time, cost, and performance parameters are analyzed from the organizational, people, and resource perspectives. Network optimization and simulation concepts are introduced. Resource-constrained project scheduling case discussions and a term project are included. PREREQS: Junior standing in engineering.

## IE 475. ADVANCED MANUFACTURING

COSTING TECHNIQUES (3). Costing techniques applicable in advanced manufacturing enterprises: activity-based costing, economic value added, Japanese cost management techniques, life cycle costing, throughput accounting, cost of quality, and financial versus operational performance measures. Emphasis on linkages to such advanced manufacturing systems as cellular manufacturing, flexible manufacturing, JIT, Lean, and ERP. PREREQS: ENGR 390 [C]
IE 497. ^MIME CAPSTONE DESIGN (4). Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. CROSSLISTED as ESE

497 and ME 497. (Writing Intensive Course) PREREQS: ( $($ IE 355 [C] and IE 356 [C] and IE 366 [C] and IE 367 [C] and IE 368 [C] and WR 327 [C] )) or ((ENGR 322 [C] or MATS 322 [C] ) and (ENGR 391 [C] or ENGR 391H [C] ) and ME 250 [C] and (ME 312 [C] or ME 312H [C]) and (ME 317 [C] or ME 317H [C] ) and (ME 383 [C] or ME 383H [C] ) and WR 327 [C] and (ST 314 [C] or ST 314 H [C] )) or ((ENGR 390 [C] or BA 360 [C] ) and IE 425 [C] and (ME 312 [C] or ME 312H [C]) and (ME 331 [C] or ME 331H [C] ) and ESE 355 [C] and ESE 360 [C] and WR 327 [C] and (ST 314 [C] or ST 314H [C] ))
E 498. ^MIME CAPSTONE DESIGN (4). Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. CROSSLISTED as ESE 498 and ME 498. (Writing Intensive Course) PREREQS: ESE 497 [C] or IE 497 [C] or ME 497 [C]
IE 499. SPECIAL TOPICS (1-5). This course is repeatable for a maximum of 99 credits.
IE 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.

IE 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
IE 506. PROJECTS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
IE 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.
IE 511. VISUAL PROGRAMMING FOR INDUSTRIAL APPLICATIONS (4). Objectoriented modeling, Unified Modeling Language, software development concepts, file and database connectivity, and visual programming skills (Microsoft Visual Basic) for use in developing industrial applications, such as process monitoring and supply chain management. PREREQS: IE 212

## IE 512. INFORMATION SYSTEMS

ENGINEERING (4). Framework for enterprise information systems. Engineering and scientific systems. Requirements definition, enhanced entity relationship modeling, logical modeling, structured query language, relational model, referential integrity. Lec/lab.

IE 515. SIMULATION AND DECISION SUPPORT
SYSTEMS (4). Analysis of operations and production systems through the application of computer simulation modeling techniques Fundamentals of computer simulation including random number generation, input/output data analysis, model validation and verification. Lec/lab PREREQS: ST 314

IE 518. TELECOMMUNICATION CONCEPTS
(3). Telecommunication concepts for industrial
applications. OSI reference model, local
area networks, wide area networks, internet architecture. Taught fall in even years. PREREQS:
IE 212 and previous programming experience.
IE 519. WIRELESS NETWORKS (3). RF fundamentals, ISO 802.11 standards, spread spectrum technology, narrow band technology, direct sequence and frequency hopping transmission schemes, electromagnetic interference, design of indoor wireless networks. PREREQS: IE 518 [C]
IE 521. INDUSTRIAL SYSTEMS OPTIMIZATION
I (3). Techniques for analysis and solution of problems in industrial and management systems. Emphasis on application of linear and integer programming and extensions. PREREQS: MTH 341

IE 522. INDUSTRIAL SYSTEMS OPTIMIZATION
I (3). Techniques for analysis and solution
of problems in industrial and management
systems. Emphasis on applications of dynamic programming. Markovian processes, and questions as applied to industrial problems. PREREQS: ST 314
IE 545. HUMAN FACTORS ENGINEERING (4). Analysis and design of work systems considering human characteristics, capabilities and limitations. Analysis and design of displays, controls, tools, and workstations. Human performance analysis. Human factors research methods. PREREQS: Graduate standing.
IE 546. HUMAN-MACHINE SYSTEMS
ENGINEERING (3). Development of safe, high performance human-machine systems. System/ function/task analysis, function allocation, design, mockups and rapid prototyping, human factors test and evaluation. Critical examination of the humanfactors and domain-specific literature to identify human factors problems, and knowledge and methods to address those problems. PREREQS: IE 545

IE 548. COGNITIVE ENGINEERING (3). Theories and models of human sensory, cognitive, and motor performance pertaining to the operation of complex systems. Applications to humanmachine systems engineering. Research topics and methods related to cognitive engineering. PREREQS: Graduate standing in science or engineering and IE 545

## IE 552. DESIGN OF INDUSTRIAL

EXPERIMENTS (3). A first course in design of experiments with an emphasis on applications and fundamental data analysis methods. Basic statistical inference, analysis of variance, blocking general factorial designs, and two-level factorial designs are covered. PREREQS: ST 314

## IE 553. DESIGN OF INDUSTRIAL

EXPERIMENTS II (3). This second course in design of experiments is a continuation of IE 552. The same textbook is used. Topics covered include two-level fractional factorial designs, regression models, response surface methods, rules for expected sum of squares and expected mean squares, a summary of the "no-name" approach to DOE, and analysis of experiments with unbalanced data (time permitting).
PREREQS: IE 552 [C]
IE 563. ADVANCED PRODUCTION PLANNING AND CONTROL (3). Application of quantitative and heuristic methods to problems of production, material, and capacity planning. Mathematical models for inventory systems, sequencing, and scheduling. Assembly line balancing methods. Just-in-time manufacturing. PREREQS: IE 521 and ST 314

## IE 564. DESIGN AND SCHEDULING OF

CELLULAR MANUFACTURING SYSTEMS (3).
Designing manufacturing cells. Impact of alternate process plan on cell design. Part-machine assignment to cells. Disaggregated manufacturing cells. Group scheduling. PREREQS: Graduate standing, computer experience.

## IE 570. MANAGEMENT SYSTEMS

ENGINEERING (4). Improvement of
organizational performance through the design and implementation of systems that integrate personnel, technological, environmental and organizational variables. Topics include performance assessment and measurement as well as improvement methodologies. PREREQS: Graduate standing.

## IE 571. PROJECT MANAGEMENT IN

ENGINEERING (3). Critical issues in the
management of engineering and high-technology projects are discussed. Time, cost, and performance parameters are analyzed from the organizational, people, and resource perspectives Network optimization and simulation concepts are introduced. Resource-constrained project scheduling case discussions and a term project are included. PREREQS: Junior standing in engineering.

IE 575. SYSTEMS THINKING THEORY AND
PRACTICE (4). An introduction to systems science theory and practice. Systems science theory is explored through the fundamentals of systems thinking theory, and theory of knowledge. Systems science practice is explored through system dynamics modeling techniques for simulating socio-technical systems, structures, and processes. PREREQS: IE or similar engineering BS degree or with instructor approval.
IE 581. OPERATIONS MANAGEMENT (4). Critical and current issues on the implementation of operations management strategies for the engineering manager. Includes aspects of operations in an engineering management environment such as work systems design, forecasting, strategy, facilities location and design, management of quality and resources planning and management. PREREQS: IE 571

## IE 582. INTRODUCTION TO MANAGEMENT

 FOR ENGINEERS AND SCIENTISTS (4). An introduction to concepts, tools, and practices necessary for a broad understanding of the roles of engineering and technical managers. A mix of research results, case studies, and experiential learning is used to bolster theories of management, with focus on technical organizations.
## IE 583. ADVANCED ENGINEERING

ECONOMICS ANALYSIS (4). Examines
the economics dimension of engineering management, from costing techniques to financial analysis. Topics include industrial cost analysis and estimation, economic planning, forecasting, and budgeting, and financial analysis for engineering and engineering management. PREREQS: Basic courses in engineering economic analysis (ENGR 390) or instructor's consent.
IE 584. SYSTEMS ENGINEERING (4). An overview of systems engineering within engineering management practice. Principles of systems engineering are explored through traditional and contemporary hard and soft systems of engineering techniques and practices, and through current future developments in the field. PREREQS: IE 582 [B-] and IE 581 and IE 583 and IE 586 and IE 587

IE 585. LEGAL ASPECT OF ENGINEERING MANAGEMENT (3). A survey of legal topics relevant to engineers, including basic of legal system, labor law, intellectual property, torts, and contracts. This is an introductory course, emphasizes on legal principles that can provide engineers with the ability to recognize legal issues that are likely to arise in the engineering profession and engineering management. Note: This is an introductory class and will in no way make a student a lawyer. Students are advised to seek legal representation if he/she encounters a legal issue. PREREQS: IE 582 [B] and IE 581 and IE 583 and (IE 586 or CCE 552) and graduate standing.
IE 586. PROJECT RISK MANAGEMENT (4). An introduction to the concept of project risk in producing constructed engineering projects. Course content includes project baselining, risk definition and identification, risk assessment and management techniques, risk control, risk response, and risk management. CROSSLISTED as CCE 552. PREREQS: Graduate standing in College of Engineering, or instructor's consent.

## E 587. MANAGEMENT OF INFORMATION

SYSTEMS (4). An introduction to the management of information systems and their strategic importance in business. Topics covered include global e-business and collaboration, databases and information management, basics of telecommunications and wireless technology, security vulnerabilities of information systems, basics of business intelligence and business analytics, knowledge management and enhanced decision making. PREREQS: IE 582 [B]

IE 589. PROFESSIONAL RESPONSIBILITY
AND ETHICS (3). An in-depth exploration of professional engineering ethics. Course content includes conceptual theoretical basis of ethics, ethics among professional organizations, ethical consideration of design, critical analysis of ethical situations, ethics in the workplace, and ethical considerations regarding the broader environment. CROSSLISTED as CCE 554.

## IE 594. RESEARCH METHODS IN

ENGINEERING (3). Introduction to research methodologies including surveys, interviews, quasi-experimentation, and case studies. Methods for research design, and collection and analysis of data. PREREQS: Graduate standing or instructor approval.
IE 599. SPECIAL TOPICS (1-5). This course is repeatable for a maximum of 99 credits. PREREQS: Graduate standing only.
IE 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.

IE 605. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
IE 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
IE 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

- MATERIALS SCIENCE COURSES MATS 221. THE SCIENCE, ENGINEERING AND SOCIAL IMPACT OF NANOTECHNOLOGY (3). Nanotechnology is an emerging engineering field that manipulates atoms and molecules to fabricate new materials and tiny devices. Properties of nanostructured materials, manufacturing methods, characterization methods, and impact on health and safety. Benefits and concerns about nanotechnology will be assessed. Lec/rec. CROSSLISTED as ENGR 221. PREREQS: One year of college science.
MATS 321. INTRODUCTION TO MATERIALS SCIENCE (4). Crystal structure, microstructure, and physical properties of metals, ceramics, polymers, composites, and amorphous materials. Also includes elementary mechanical behavior and phase equilibria. Lec. CROSSLISTED as ENGR 321. PREREQS: (CH 202 [C] or CH 222 [C] or CH 232 [C] or CH 232 H [C] or CH 224H [C] )

## MATS 322. MECHANICAL PROPERTIES

OF MATERIALS (3). Mechanical behavior of materials, relating laboratory test results to material structure, and elements of mechanical analysis. Lec/lab. CROSSLISTED as ENGR 322. PREREQS: (ENGR 213 [C] or ENGR 213H [C] ) and (ENGR 321 [C] or ENGR 321 H [C] or MATS 321 [C])
MATS 455. EXPERIMENTAL TECHNIQUES IN MATERIAL SCIENCE (4). Materials processing, characterization, computational and data analysis techniques in materials science. Focus on processing-structure-property relationships. Lec/ lab. This course is repeatable for a maximum of 8 credits. PREREQS: (ENGR 321 [C] or ENGR 321 H [C] ) and ME 570 or equivalent.

## MATS 478. THIN FILM MATERIALS

 CHARACTERIZATION AND PROPERTIES (4). Processing of thin films and characterization of the microstructure; diffusion and solid state reactions; mechanical, magnetic and electronic properties of thin films. PREREQS: (ME 311 [C] or ME 311H [C] ) and (ENGR 321 [C] or ENGR 321H [C] or MATS 321 [C] ) and (ENGR 322 [C] or MATS 322 [C])MATS 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
MATS 509. MATERIALS SCIENCE SEMINAR (1). Student participation seminar experience for one
credit; students will listen to seminars concerning ongoing research activities within materials science. Students will also have the opportunity to present their own research results periodically. Graded P/N. CROSSLISTED as ME 509.
MATS 555. EXPERIMENTAL TECHNIQUES IN MATERIAL SCIENCE (4). Materials processing, characterization, computational and data analysis techniques in materials science. Focus on processing-structure-property relationships. Lec/ lab. This course is repeatable for a maximum of 8 credits. PREREQS: ME 570 [C] and (ENGR 321 or ENGR 321H)

## MATS 570. STRUCTURE-PROPERTY

RELATIONS IN MATERIALS (4). Fundamentals of the interactions between the structure and properties of materials. Atomic bonding and atom interactions. Geometric and algebraic representations of symmetry. Introduction to phase equilibria. Phenomenological background of elasticity and plasticity in materials. Anisotropic materials and tensor representations. Influence of structure on thermal, electrical, and optical properties of materials. CROSSLISTED as ME 570.

## MATS 571. ELECTRONIC PROPERTIES OF

 MATERIALS (4). Development of a quantitative description of the electronic structure of solids starting with the quantum mechanical model of the atom, atomic bonding, and band theory of solids. Quantitative description of the electronic properties of metals, semiconductors, and insulators. CROSSLISTED as ME 571 PREREQS: CH 545 or ME 570 or equivalent.
## MATS 578. THIN FILM MATERIALS

CHARACTERIZATION AND PROPERTIES (4). Processing of thin films and characterization of the microstructure; diffusion and solid state reactions; mechanical, magnetic and electronic properties of thin films. PREREQS: Instructor permission for ME/MATS 578.

MATS 581. THERMODYNAMICS OF SOLIDS
(4). Thermodynamics of solutions and phase equilibrium. Phase diagrams and invariant reactions. Order and disorder in solutions. Applications to advanced materials development. Lec/lab. CROSSLISTED as ME 581.

## MATS 582. RATE PROCESSES IN MATERIALS

(4). Diffusion in solids, including vacancy and interstitial and short-circuit diffusion. Phase transformations including classic nucleation and growth theory. Applications to materials development. Laboratory will emphasize microstructural evaluation and quantitative metallography. Lec/lab. CROSSLISTED as ME 582.

MATS 584. ADVANCED FRACTURE OF
MATERIALS (4). Fracture mechanics will be used as a basis for predicting failure of materials, understanding failure mechanisms, and identifying causes of failure. Course will include discussion of recent journal articles, experimental demonstrations, and analysis of real fracture data. CROSSLISTED as ME 584. PREREQS: ENGR 322 or equivalent is recommended.

MATS 587. DISLOCATIONS, DEFORMATION, AND CREEP (4). The effects of point, line, and planar defects on plastic deformation and creep behavior in solids will be discussed with emphasis on the role of dislocations and vacancies. CROSSLISTED as ME 587. PREREQS: ENGR 322 or equivalent.

MATS 588. COMPUTATIONAL METHODS IN MATERIALS SCIENCE (4). A broad introduction to important materials science simulation methods. These include molecular dynamics, density functional theory, and Monte Carlo methods. Learning is through a mixture of lecture and hands-on lab projects in which students use computational methods to explore and reinforce fundamental concepts in materials science. Lec/ lab. CROSSLISTED as ME 588. PREREQS: Experience with Matlab or Mathematica or an equivalent numerical and programming
environment.
MATS 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

MATS 671. ELECTRONIC PROPERTIES OF
OXIDES (4). Band theory of solids applied to metal oxide materials. Includes metallic oxides, non-stoichiometric semiconductors and associated defect chemistry, high temperature superconductors, electrostatics, linear dielectrics, non-linear dielectrics, piezoelectrics, and the optical properties of oxides. CROSSLISTED as ME 671. PREREQS: ME 571 or MATS 571 or PH 575

## 1 MECHANICAL ENGINEERING COURSES

ME 101. INTRODUCTION TO MECHANICAL
ENGINEERING (3). Orientation to mechanical engineering: methods used in solving engineering problems; experience with typical mechanical engineering projects and problems; ethics, curricula and engineering careers. Lec/rec. PREREQS: Trigonometry.
ME 206. PROJECTS (1-16). PREREQS: Sophomore standing.
ME 250. INTRODUCTION TO MANUFACTURING
PROCESSES (1). Use of measuring and layout tools, interpretation of blueprints and drawings, identification of engineering materials. Operation of machine tools, including calculation of machining parameters. Operation of gas and MIG welding equipment. Lec/lab. Graded P/N. PREREQS: ENGR 248 [C] and ME or IE professional school admission.
ME 299. SPECIAL TOPICS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.
ME 299H. SPECIAL STUDIES (1-16). Graded $\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.

ME 306. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Junior standing.
ME 311. INTRODUCTION TO THERMALFLUID SCIENCES (4). Basic concepts of fluid mechanics, thermodynamics and heat transfer are introduced. Conservation of mass, energy, moment and the second law of thermodynamics are included. CROSSLISTED as NSE 311. PREREQS: ((ENGR 212 [C] or ENGR 212H [C] ) and (MTH 256 [C] or MTH 256H [C] ))
ME 311H. INTRODUCTION TO THERMALFLUID SCIENCES (4). Basic concepts of fluid mechanics, thermodynamics and heat transfer are introduced. Conservation of mass, energy, moment and the second law of thermodynamics are included. CROSSLISTED as NSE 311H. PREREQS: ((ENGR 212 [C] or ENGR 212H [C] ) and (MTH 256 [C] or MTH 256H [C] )) and Honors College approval required

ME 312. THERMODYNAMICS (4). Exergy destruction, machine and cycle processes, law of corresponding states, non-reactive gas mixtures, reactive mixtures, thermodynamics of compressible fluid flow. CROSSLISTED as NSE 312. PREREQS: (MTH 256 [C] or MTH 256H [C]) and (ME 311 [C] or ME 311H [C] or NSE 311 [C] or NSE 311H [C] or NE 311 [C] or NE 311H [C])
ME 312H. THERMODYNAMICS (4). Energy destruction, machine and cycle processes, law of corresponding states, non-reactive gas mixtures, reactive mixtures, thermodynamics of compressible fluid flow. CROSSLISTED as NSE 312H. PREREQS: (MTH 256 [C] or MTH 256H [C] ) and (ME 311 [C] or ME 311H [C] or NSE 311 [C] or NSE 311H [C] or NE 311 [C] or NE 311H [C] ) and Honors College approval required.
ME 316. MECHANICS OF MATERIALS (3).
Determination of stresses, deflections, and stability of deformable bodies with an introduction
to finite element analysis. PREREQS: (ENGR 213 [C] or ENGR 213H [C] ) and (MTH 256 [C] or MTH 256H [C] )
ME 317. INTERMEDIATE DYNAMICS (4).
Continuation of the study of kinematics and kinetics of particles and rigid bodies, with applications to mechanical systems of current interest to engineers. PREREQS: ((ENGR 212 [C] or ENGR 212H [C] ) and (MTH 256 [C] or MTH 256H [C] ))
ME 317H. INTERMEDIATE DYNAMICS (4).
Continuation of the study of kinematics and kinetics of particles and rigid bodies, with applications to mechanical systems of current interest to engineers. PREREQS: ((ENGR 212 [C] or ENGR 212H [C] ) and (MTH 256 [C] or MTH 256 H [C] )) and Honors College approval required.
ME 331. INTRODUCTORY FLUID MECHANICS
(4). Introduces the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. CROSSLISTED as NSE 331 PREREQS: ((MTH 254 [C] or MTH 254H [C] ) and (MTH 256 [C] or MTH 256H [C] ) and (ENGR 212 [C] or ENGR 212H [C] ) and (ENGR 311 [C] or ME 311 [C] or ME 311H [C] or NSE 311 [C] or NSE 311 H [C] or NE 311 [C] or NE 311H [C] ))
ME 331H. INTRODUCTORY FLUID MECHANICS
(4). Introduces the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. CROSSLISTED as NSE 331H. PREREQS: ((MTH 254 [C] or MTH 254H [C] ) and (MTH 256 [C] or MTH 256H [C] ) and (ENGR 212 [C] or ENGR 212H [C] ) and (ENGR 311 [C] or ME 311 [C] or ME 311H [C] or NSE 311 [C] or NSE 311 H [C] or NE 311 [C] or NE 311H [C] )) and Honors College approval required.
ME 332. HEAT TRANSFER (4). A treatment of conductive, convective and radiative energy transfer using control volume and differential analysis and prediction of transport properties. CROSSLISTED as NSE 332. PREREQS: ((MTH 256 [C] or MTH 256H [C] ) and (ENGR 212 [C] or ENGR 212H [C] ) and (ME 311 [C] or ME 311H [C] or NE 311 [C] or NE 311H [C] ) and (ME 331 [C] or ME 331H [C] or NSE 331 [C] or NSE 331H [C] or NE 331 [C] or NE 331H [C] ))

ME 332H. HEAT TRANSFER (4). A treatment of conductive, convective and radiative energy transfer using control volume and differential analysis and prediction of transport properties. CROSSLISTED as NSE 332H. PREREQS: ((MTH 256 [C] or MTH 256H [C] ) and (ENGR 212 [C] or ENGR 212H [C] ) and (ME 311 [C] or ME 311H [C] or NE 311 [C] or NE 311H [C] ) and (ME 331 C] or ME 331H [C] or NSE 331 [C] or NSE 331H C] or NE 331 [C] or NE 331H [C] )) and Honors College approval required.

ME 348. ADVANCED SOLID MODELING (1). Practical application of graphical communication theory using advanced solid modeling software to capture design intent and generate engineering drawings. Lec/lab. Graded P/N. PREREQS: ENGR 248 [C]

ME 373. MECHANICAL ENGINEERING
METHODS (3). Analytical and numerical methods for solving representative mechanical engineering problems. Lec/rec. PREREQS: (ENGR 112 [C] or ENGR 112H [C] ) and (MTH 256 [C] or MTH 256H [C] ) and /or equivalent.

ME 373H. MECHANICAL ENGINEERING
METHODS (3). Analytical and numerical methods for solving representative mechanical engineering problems. Lec/rec. PREREQS: (ENGR 112 [C] or ENGR 112H [C] ) and (MTH 256 [C] or MTH 256 H [C] ) and /or equivalent. Honors College approval required.

ME 382. INTRODUCTION TO DESIGN (4).
Organization, planning, economics, and the use of creativity and optimization in solving mechanical design problems. Case studies and/or industrial design problems. Lec/lab. PREREQS: ENGR 248 [C] and ME 250* [C]

## ME 382H. INTRODUCTION TO DESIGN (4).

Organization, planning, economics, and the use of creativity and optimization in solving mechanical design problems. Case studies and/or industrial design problems. Lec/lab. PREREQS: ENGR 248 [C] and ME 250* [C] and Honors College approval required.
ME 383. MECHANICAL COMPONENT DESIGN
(4). Failure analysis and design of machine components. Lec/lab. PREREQS: ME 316 [C] and ME 250* [C]
ME 383H. MECHANICAL COMPONENT DESIGN (4). Failure analysis and design of machine components. Lec/lab. PREREQS: (ME 316 [C] and (ME 382 [C] or ME 382H [C] )) and Honors College approval required.

ME 401. RESEARCH (1-16). This course is repeatable for a maximum of 9 credits.

ME 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS:
Departmental approval required.
ME 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 9 credits.
ME 405H. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 9 credits. PREREQS: Honors College approval required.

ME 406. PROJECTS (1-16). This course is repeatable for a maximum of 15 credits.

ME 407. SEMINAR (1-16). This course is repeatable for a maximum of 2 credits.

ME 410. INTERNSHIP (1-16). Credits may not apply toward BS degree in Mechanical Engineering. Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

## ME 411. AEROSPACE APPLICATIONS IN

 MECHANICAL ENGINEERING (4). Provides students with the fundamentals of mechanical engineering applications to aerospace. Topics covered include an overview of modern aircraft and spacecraft analysis, with an emphasis on performance, stability, structures, materials, FAA and FAR standards and current professional practices in the conceptual design of aerospace vehicles. Student projects will integrate course topics. PREREQS: (ME 316 [C] and ME 317 [C] and ME 331 [C] and ME 373 [C] )ME 412. DESIGN OF MECHANISMS (4). Analysis and study of the function, classification, position, velocity, and acceleration of multi-element mechanical linkages and mechanisms. Synthesis of mechanisms for specified multiple point paths, quick return, dwell, and straight-line motion. The lecture will instruct students in the kinematic analysis and synthesis of mechanisms through the use of theory and software packages. The laboratory will familiarize students with a modern mechanism design and animation software package. Lec/lab. PREREQS: (ME 317 [C] or ME 317 H [C] ) and ME 383 [C]

## ME 413. COMPUTER-AIDED DESIGN AND

 MANUFACTURING (4). Introduces students to the use of computers in several extended areas of product design and manufacturing. These areas include product data management in a sustaining engineering environment; computer-aided manufacturing (CAM) and computer numerical control (CNC) operations and technology; the use of programmable logic controllers (PLCs) for industrial control systems; and the use of simulation software for virtual prototyping for Design/Manufacturing/Validation. Lec/lab. PREREQS: (ME 382 [C] or ME 382H [C] or IE 366 [C] )ME 420. APPLIED STRESS ANALYSIS (4). Elasticity theory, failure theories, energy methods, finite element analysis. PREREQS: ME 316 [C]
ME 422. MECHANICAL VIBRATIONS (4). Dynamic response of single and multiple degree-of-freedom systems. PREREQS: (ME 317 [C] or ME 317H [C] )
ME 422H. MECHANICAL VIBRATIONS (4). Dynamic response of single and multiple degree-of-freedom systems. PREREQS: ME 317 [C] or ME 317H [C] and Honors College approval required.

## ME 424. FINITE ELEMENT MODELING OF

MECHANICAL ENGINEERING SYSTEMS (3).
Application of modern finite element code in the analysis of complex mechanical engineering systems. Extensive use of engineering workstations. Lec/lab. PREREQS: (ME 420 [C] or ME 520 [C] )
ME 430. SYSTEMS DYNAMICS AND CONTROL
(4). Modeling and analysis of linear continuous systems in time and frequency domains.
Fundamentals of single-input-single-output control system design. CROSSLISTED as ECE 451. PREREQS: (ME 317 [C] or ME 317H [C] or (ECE 351 [C] and ECE 352 [C] and (ENGR 212 [C] or ENGR 212H [C] )))
ME 430H. SYSTEMS DYNAMICS AND
CONTROL (4). Modeling and analysis of linear continuous systems in time and frequency domains. Fundamentals of single-input-singleoutput control system design. CROSSLISTED as ECE 451. PREREQS: (ME 317 [C] or ME 317H [C] or (ECE 351 [C] and ECE 352 [C] and (ENGR 212 [C] or ENGR 212H [C] ))) and Honors College approval required.
ME 443. RENEWABLE ENERGY: THERMAL FLUID SYSTEMS (4). Evaluates several thermal/ fluid power conversion strategies that deal with both thermal and fluid energy sources in terms of basic conversion technology, resource potential and developmental challenges. There are four modules, each targeting a particular renewable energy system in thermal and fluid sciences. PREREQS: (ME 311 [C] or ME 311H [C] or NE 311 [C] or NE 311H [C] ) and (ME 331 [C] or ME 331 H [C] or NE 331 [C] or NE 331H [C] ) and (ME 332 [C] or ME 332H [C] or NE 332 [C] or NE 332H [C] )

## ME 444. ADVANCED POWER GENERATION

SYSTEMS (4). Thermal mechanical evaluation of modern power generation technologies, including fossil and nuclear Rankine cycle power plants, gas turbines, cogeneration power plants, distributed power generation and fuel cells. Lec/ rec. PREREQS: (ME 312 [C] or ME 312H [C] ) and (ME 332 [C] or ME 332H [C] )
ME 445. INTRODUCTION TO COMBUSTION
(4). Study of combustion science based on the background of chemistry, thermodynamics, fluid mechanics, heat and mass transfer. Stoichiometry, energetics of chemical reactions, flame temperature, equilibrium product analyses, chemical kinetics, and chain reactions. PREREQS: (ME 312 [C] or ME 312H [C] and (ME 332 [C] or ME 332H [C] ))
ME 450. APPLIED HEAT TRANSFER (4). An intermediate heat transfer course seeking to lay a foundation for determining the heating and cooling characteristics with a variety of modern and classical processes. Included is design of multi-component heat transfer systems. Lecture, 110 minutes twice per week. PREREQS: (ME 332 [C] or ME 332H [C] )

## ME 451. INTRODUCTION TO

INSTRUMENTATION AND MEASUREMENT
SYSTEMS (4). Function, operation, and application of common mechanical engineering instruments, measurement principles, and statistical analysis. Major elements of measurement systems, including transduction, signal conditioning, and data recording. Function and operation of digital data acquisition systems.

Lec/lab. PREREQS: ((ENGR 202 [C] or ENGR 202 H [C] ) and (ME 311 [C] or ME 311H [C] ) and ME 316 [C] and (ME 317 [C] or ME 317H [C] ) and (ME 373 [C] or ME 373H [C] ) and (ST 314 [C] or ST 314H [C] ))
ME 452. THERMAL AND FLUIDS SCIENCES
LABORATORY (4). Course emphasis is on experiments related to thermodynamics, heat transfer, and fluid mechanics. Proper experimental methods, data and uncertainty analysis related to thermal and fluids measurements are discussed.
PREREQS: (ME 311 [C] or ME 311H [C] ) and
(ME 331 [C] or ME 331H [C] ) and (ME 332 [C] or ME 332H [C] )
ME 452H. THERMAL AND FLUIDS SCIENCES
LABORATORY (4). Course emphasis is on experiments related to thermodynamics, heat transfer, and fluid mechanics. Proper experimental methods, data and uncertainty analysis related to thermal and fluids measurements are discussed. PREREQS: (ME 311 [C] or ME 311H [C] ) and (ME 331 [C] or ME 331H [C] ) and (ME 332 [C] or ME 332 H [C] ) and Honors College approval required.
ME 453. STRUCTURE AND MECHANICS
LABORATORY (4). Techniques for measurement of structural response and material properties. Proper use of rosette strain gauges, load cells, and displacement transducers. Full-field strain measurement using photoelasticity and digital image correlation. Proper implementation of material testing standards. Characterization of anisotropic composite materials. PREREQS: ME 451 [C]
ME 460. INTERMEDIATE FLUID MECHANICS
(4). Ideal fluid flow including potential flow theory. Introduction to compressible flow. Viscous flow and boundary layer theory. Introduction to turbulence. PREREQS: (ME 331 [C] or ME 331H [C] )
ME 461. GAS DYNAMICS (4). Studies onedimensional isentropic flow, nozzles, diffusers, normal and oblique shocks, compressible flow with friction and heating, and an introduction to propulsion systems. PREREQS: (ME 312 [C] or ME 312H [C] ) and (ME 331 [C] or ME 331H [C] )
ME 480. MATERIALS SELECTION (3). Selecting materials for engineering applications. The major families of materials, their properties, and how their properties are controlled; case studies and design projects emphasizing materials selection. PREREQS: MATS 322 [C] or ENGR 322 [C]
ME 483. COMPOSITE MATERIALS (3). Fibers and matrices, mechanics of composites, reinforcement and failure mechanisms, properties and applications. Lec/lab. PREREQS: MATS 322 [C] or ENGR 322 [C]
ME 484. FRACTURE OF MATERIALS (3).
Fracture mechanics and fatigue mechanisms: mechanisms of ductile and brittle fracture. Environmentally induced fracture and fatigue. Considerations in design of engineering materials and structures will be discussed. PREREQS: MATS 322 [C] or ENGR 322 [C]
ME 497. ^MIME CAPSTONE DESIGN (4). Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. CROSSLISTED as ESE 497 and IE 497. (Writing Intensive Course) PREREQS: ((IE 355 [C] and IE 356 [C] and IE 366 [C] and IE 367 [C] and IE 368 [C] and WR 327 [C] )) or ((ENGR 322 [C] or MATS 322 [C] ) and (ENGR 391 [C] or ENGR 391H [C] ) and ME 250 [C] and (ME 312 [C] or ME 312H [C] ) and (ME 317 [C] or ME 317H [C] ) and (ME 383 [C] or ME 383H [C] ) and WR 327 [C] and (ST 314 [C] or ST 314H [C] )) or ((ENGR 390 [C] or BA 360 [C] ) and IE 425 [C] and (ME 312 [C] or ME 312H [C] ) and (ME 331 [C] or ME 331H [C] ) and ESE 355 [C] and ESE 360 [C] and WR 327 [C] and (ST 314 [C] or ST 314H [C] ))

ME 498. ^MIME CAPSTONE DESIGN (4).
Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. CROSSLISTED as ESE 498 and IE 498. (Writing Intensive Course) PREREQS: ESE 497 [C] or IE 497 [C] or ME 497 [C]
ME 499. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits.
ME 499H. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
ME 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
ME 502. INDEPENDENT STUDIES (1-16). This course is repeatable for a maximum of 16 credits. ME 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

ME 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.

ME 506. PROJECTS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

ME 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

ME 508. THERMAL FLUID SCIENCE SEMINAR
(1). Student participation seminar experience for 1 course credit. Students will present and listen to seminars concerning ongoing research within the thermal fluid sciences

ME 509. MATERIALS SCIENCE SEMINAR (1).
Student participation seminar experience for one credit; students will listen to seminars concerning ongoing research activities within materials science. Students will also have the opportunity to present their own research results periodically. Graded P/N. CROSSLISTED as MATS 509.

ME 511. PRECISION MACHINE DESIGN (3).
Tolerance analysis and application in design/ manufacturing practice, principles of machine design and computational analysis of errors in machine design, sensor mounting and sensor calibration, machine level error budget with geometric and thermal errors, structural design of joints and supports, deterministic damping, exact constraint design for flexures and couplings, bearing systems design, motion and power system design for machine tools. CROSSLISTED as MFGE 511. PREREQS: An understanding of mechanical component design and solid mechanics.

ME 512. DESIGN OF MECHANISMS (4). Analysis and study of the function, classification, position, velocity, and acceleration of multi-element mechanical linkages and mechanisms. Synthesis of mechanisms for specified multiple point paths, quick return, dwell, and straight-line motion. The lecture will instruct students in the kinematic analysis and synthesis of mechanisms through the use of theory and software packages. The laboratory will familiarize students with a modern mechanism design and animation software package. Lec/lab. PREREQS: (ME 317 or ME 317 H ) and ME 383
ME 513. BIO-INSPIRED DESIGN (4). Intersection of design and biology that seeks to systematically mine biological knowledge to solve design problems. Investigates inspiration from nature from three different types: visual, conceptual, and computational. Includes design rules, heuristics, principles or patterns to solve engineering problems. Algorithmic bio-inspiration emulates natural algorithms for control or optimization problems. PREREQS: Graduate standing.
ME 515. RISK AND RELIABILITY ANALYSIS IN ENGINEERING DESIGN (4). Fundamentals of risk, uncertainty, and reliability. Methods to analyze and quantify the risk of failures, and the
reliability of complex systems, including fault tree analysis, reliability block diagrams, probabilistic risk assessment. Introduction to research methods for risk and reliability analysis during the early design stages.
ME 516. MODELING AND ANALYSIS OF
COMPLEX SYSTEMS (4). Introduction to challenges and considerations when designing complex systems. Fundamentals of systems engineering and methods used in practice. Models and tools used to enable the use of models for trade studies during the design of complex systems. Model-based design environments and methodologies. Introduction to decision support tools in design.
ME 517. OPTIMIZATION IN DESIGN (4).
Optimization methods as applied to engineering design, theory and application of nonlinear optimization techniques for multivariate unconstrained and constrained problems. Model boundedness and sensitivity. PREREQS: Graduate standing.
ME 519. SELECTED TOPICS IN DESIGN (3-4). Topics in mechanical design selected from the following: design processes, quality engineering, design for assembly, statistical machine design, the Tagucchi method, and parametric design. This course is repeatable for a maximum of 32 credits.

ME 520. APPLIED STRESS ANALYSIS (4). Elasticity theory, failure theories, energy methods, finite element analysis. PREREQS: ME 316
ME 521. LINEAR ELASTICITY (4). A general introduction to the theory of elasticity. The solution of 2-D problems using the Airy stress function in rectangular and polar coordinates. The solution of 3-D problems using the Galerkin vector, the Papkovich-Neuber solution, and complex variable methods. Applications to asymptotic fields at discontinuities, contact and crack problems, and thermoelasticity. PREREQS: ME 520 [C] and ME 316 or equivalent and graduate standing in mechanical engineering, civil engineering, or material science, or instructor approval.
ME 522. MECHANICAL VIBRATIONS (4).
Dynamic response of single and multiple degree-of-freedom systems. PREREQS: ME 317
ME 523. ADVANCED STRESS ANALYSIS (4).
An introduction to the mechanics of nonlinear elastic, plastic, and viscoelastic material behavior including large deformations. PREREQS: ME 316 or equivalent and graduate standing in mechanical engineering, civil engineering, or material science, or instructor approval.

## ME 524. FINITE ELEMENT MODELING OF

 MECHANICAL ENGINEERING SYSTEMS (3). Application of modern finite element code in the analysis of complex mechanical engineering systems. Extensive use of engineering workstations. Lec/lab. PREREQS: ME 520 [C]
## ME 526. NUMERICAL METHODS FOR

ENGINEERING ANALYSIS (3). Numerical
solutions of linear equations, difference equations, ordinary and partial differential equations. CROSSLISTED as NSE 526. PREREQS: Programming experience and previous exposure to numerical methods, or instructor approval.

## ME 529. SELECTED TOPICS IN SOLID

MECHANICS (3-4). Advanced topics in solid mechanics emphasizing research applications of current interest. This course is repeatable for a maximum of 32 credits.
ME 531. LINEAR MULTIVARIABLE CONTROL SYSTEMS I (4). Theoretical design of control systems for systems modeled by linear multivariable differential equations. Topics covered include controllability, observability, state feedback control, pole placement, output feedback, estimator design, and control designs that include both estimators and regulators.
ME 532. LINEAR MULTIVARIABLE CONTROL SYSTEMS II (4). Focuses on designing control systems where the device to be controlled is an
uncertain system, yet can be described by a set of linear differential equations. Lec. PREREQS: ME 531 [C] and /or equivalent.
ME 533. NONLINEAR DYNAMIC ANALYSIS (4).
Course focuses on understanding the behavior of nonlinear dynamic systems of interest to mechanical engineers. Lec. PREREQS: ME 317 or equivalent.
ME 534. NONLINEAR MULTIVARIABLE
CONTROL SYSTEMS (4). Focuses on designing control systems when the device to be controlled is mathematically described by a nonlinear set of differential equations. Lec. PREREQS: ME 533 [C] and /or equivalent.
ME 539. SELECTED TOPICS IN DYNAMICS
(1-16). Advanced topics in dynamics emphasizing research applications of current interest. This course is repeatable for a maximum of 30 credits.

## ME 540. INTERMEDIATE THERMODYNAMICS

(4). Students are expected to master classical thermodynamics by way of solving extended problems using software tools. Statistical thermodynamics concepts are also introduced and exercised. PREREQS: ME 312

ME 541. LIQUID-VAPOR PHASE CHANGE AND HEAT TRANSFER (4). Advanced treatment of underlying physics and engineering modeling approaches for heat transfer associated with vapor/liquid phase change processes. Topics include thermodynamics and mechanical aspects of phase change processes, pool boiling, filmwise and dropwise condensation, internal convective boiling and condensation, and other emerging areas in phase change heat transfer. PREREQS: Graduate standing

ME 543. RENEWABLE ENERGY: THERMAL FLUID SYSTEMS (4). Evaluates several thermal/ fluid power conversion strategies that deal with both thermal and fluid energy sources in terms of basic conversion technology, resource potential and developmental challenges. There are four modules, each targeting a particular renewable energy system in thermal and fluid sciences. PREREQS: (ME 311 or ME 311 H or NE 311 or NE 311H) and (ME 331 or ME 331H or NE 331 or NE 331H) and (ME 332 or ME 332H or NE 332 or NE 332H)

ME 544. ADVANCED POWER GENERATION SYSTEMS (4). Thermal mechanical evaluation of modern power generation technologies, including fossil and nuclear Rankine cycle power plants, gas turbines, cogeneration power plants, distributed power generation and fuel cells. Lec/rec. PREREQS: ME 312 and (ME 332 or ME 332H)

ME 545. INTRODUCTION TO COMBUSTION (4). Study of combustion science based on the background of chemistry, thermodynamics, fluid mechanics, heat and mass transfer. Stoichiometry, energetics of chemical reactions, flame temperature, equilibrium product analyses, chemical kinetics, and chain reactions PREREQS: ME 312 and (ME 332 or ME 332H)
ME 546. CONVECTION HEAT TRANSFER (3). An advanced treatment of forced and natural convection heat transfer processes emphasizing underlying physical phenomena. Current topical literature will be considered; analytical and numerical problem solving is included. PREREQS (ME 332 or ME 332 H ) and ME 373
ME 547. CONDUCTIVE HEAT TRANSFER (3). Analytical and numerical solutions to steady state and transient conduction problems. PREREQS: (ME 332 or ME 332H) and ME 373

## ME 548. RADIATION HEAT TRANSFER (3).

Analytical and numerical methods of solution of thermal radiation problems. PREREQS: (ME 332 or ME 332H) and ME 373

ME 549. SELECTED TOPICS IN HEAT
TRANSFER (3). Topics in heat transfer including advanced problems in conduction, radiation, and convection. Additional examination of heat transfer in multiphase systems, inverse problems,
combined modes, equipment design, solution techniques and other topics of current interest considered, including extensive use of current literature. Not all topics covered each year. This course is repeatable for a maximum of 9 credits.
ME 550. APPLIED HEAT TRANSFER (4). An intermediate heat transfer course seeking to lay a foundation for determining the heating and cooling characteristics with a variety of modern and classical processes. Included is design of multi-component heat transfer systems. Lecture, 110 minutes twice per week. PREREQS: ME 332 or ME 332H

ME 552. MEASUREMENTS IN FLUID
MECHANICS AND HEAT TRANSFER (4). Course emphasis is on measurement techniques and data analysis methods related to fluid mechanics and heat transfer. Proper experimental methods, data and uncertainty analyses related to thermal and fluids measurements are discussed. Local and spatial mapping of fluid and thermal fields are highlighted. PREREQS: (ME 331 or ME 331H) and (ME 332 or ME 332 H ) and ME 451.
ME 553. STRUCTURE AND MECHANICS LABORATORY (4). Techniques for measurement of structural response and material properties. Proper use of rosette strain gauges, load cells, and displacement transducers. Full-field strain measurement using photoelasticity and digital image correlation. Proper implementation of material testing standards. Characterization of anisotropic composite materials. PREREQS: ME 451

ME 560. INTERMEDIATE FLUID MECHANICS
(4). Ideal fluid flow including potential flow theory. Introduction to compressible flow. Viscous flow and boundary layer theory. Introduction to turbulence. PREREQS: ME 331 or equivalent

ME 561. GAS DYNAMICS (4). Studies onedimensional isentropic flow, nozzles, diffusers, normal and oblique shocks, compressible flow with friction and heating, and an introduction to propulsion systems. PREREQS: ME 312 and (ME 331 or ME 331H)
ME 564. TURBULENCE MODELING (3).
An introductory course on theory of different turbulence modeling techniques such as Reynolds Averaged Navier Stokes (RANS), Large Eddy Simulation (LES), and Direct Numerical Simulation (DNS) applied to a range of turbulent flows including free shear flows, boundary layers, and internal flows. PREREQS: ME 560 [C] and (ME 565 [C] or ME 566 [C] ) and /or instructor's consent.

## ME 565. INCOMPRESSIBLE FLUID

MECHANICS (3). Generalized fluid mechanics; kinematics; methods of description, geometry of the vector field, dynamics of nonviscous fluids, potential motion, two-dimensional potential flow with vorticity.
ME 566. VISCOUS FLOW (3). Boundary layer, stability, transition prediction methods, computational methods in fluid mechanics, recent developments.
ME 567. ENGINEERING APPLICATIONS OF COMPUTATIONAL FLUID DYNAMICS (4). Basic concepts of computational fluid dynamics, a technique used for solving fully three-dimensional fluid flow problems with no exact solution, will be discussed and applied to general engineering applications using commercially available software. Lec. PREREQS: ME 312 and (ME 331 or ME 331H)

ME 568. TURBULENT FLOW DYNAMICS (4).
An introductory course of the basic physics of turbulent flows, coverage will include statistical methods and physical interpretation of a range of flows including boundary layer flows, internal flows, and environmental flows. PREREQS: ME 560 [C] and A first course in fluid mechanics such as ME 331, Introduction to Fluid Mechanics.

ME 569. SELECTED TOPICS IN FLUID MECHANICS (2-4). Topics in fluid mechanics emphasizing research applications of current interest. This course is repeatable for a maximum of 32 credits.
ME 570. STRUCTURE-PROPERTY RELATIONS
IN MATERIALS (4). Fundamentals of the interactions between the structure and properties of materials. Atomic bonding and atom interactions. Geometric and algebraic representations of symmetry. Introduction to phase equilibria. Phenomenological background of elasticity and plasticity in materials. Anisotropic materials and tensor representations. Influence of structure on thermal, electrical, and optical properties of materials. CROSSLISTED as MATS 570.

## ME 571. ELECTRONIC PROPERTIES OF

 MATERIALS (4). Development of a quantitative description of the electronic structure of solids starting with the quantum mechanical model of the atom, atomic bonding, and band theory of solids. Quantitative description of the electronic properties of metals, semiconductors, and insulators. CROSSLISTED as MATS 571. PREREQS: CH 545 or ME 570 or equivalent.ME 580. MATERIALS SELECTION (3). Selecting materials for engineering applications. The major families of materials, their properties, and how their properties are controlled; case studies and design projects emphasizing materials selection. Lec/lab. PREREQS: MATS 322 or ENGR 322

ME 581.THERMODYNAMICS OF SOLIDS (4). Thermodynamics of solutions and phase equilibrium. Phase diagrams and invariant reactions. Order and disorder in solutions. Applications to advanced materials development. Lec/lab. CROSSLISTED as MATS 581.
ME 582. RATE PROCESSES IN MATERIALS (4).
Diffusion in solids, including vacancy and interstitial and short-circuit diffusion. Phase transformations including classic nucleation and growth theory. Applications to materials development. Laboratory will emphasize microstructural evaluation and quantitative metallography. Lec/lab. CROSSLISTED as MATS 582.

ME 583. COMPOSITE MATERIALS (3). Fibers and matrices, mechanics of composites, reinforcement and failure mechanisms, properties and applications. Lec/lab. PREREQS: MATS 322 or ENGR 322

ME 584. ADVANCED FRACTURE OF
MATERIALS (4). Fracture mechanics will be used as a basis for predicting failure of materials, understanding failure mechanisms, and identifying causes of failure. Course will include discussion of recent journal articles, experimental demonstrations, and analysis of real fracture data. CROSSLISTED as MATS 584. PREREQS: MATS 322 or ENGR 322 or equivalent is recommended.
ME 585. FATIGUE OF MATERIALS (4). Analyzes the failure of materials by fatigue including how fatigue behavior is characterized, how fatigue failure is predicted, the physical mechanisms responsible for fatigue failure of various materials, and how such behavior is related to the atomic structure and microstructure of the material. PREREQS: (ME 570 [C] or MATS 570 [C] )

## ME 587. DISLOCATIONS, DEFORMATION,

AND CREEP (4). The effects of point, line, and planar defects on plastic deformation and creep behavior in solids will be discussed with emphasis on the role of dislocations and vacancies. CROSSLISTED as MATS 587. PREREQS: MATS 322 or ENGR 322 or equivalent.
ME 588. COMPUTATIONAL METHODS IN
MATERIALS SCIENCE (4). A broad introduction to important materials science simulation methods. These include molecular dynamics, density functional theory, and Monte Carlo methods. Learning is through a mixture of lecture and hands-on lab projects in which students use
computational methods to explore and reinforce fundamental concepts in materials science. Lec/ lab. CROSSLISTED as MATS 588. PREREQS: Experience with Matlab or Mathematica or an equivalent numerical and programming environment.
ME 589. SELECTED TOPICS IN MATERIALS (3).
Topics in materials science to correspond to areas of graduate research. Topics will be chosen from the following list: optical materials, dielectrics, oxidation and corrosion, ceramics, thermophysical properties, polymers and viscoelasticity, coatings and thin films. Lec/rec. This course is repeatable for a maximum of 32 credits.

## ME 596. SELECTED TOPICS IN

THERMODYNAMICS (3). Topics in
thermodynamics including advanced problems in classical thermodynamics and statistical thermodynamics of current interest. Topics will likely be considered, including extensive use of literature. Not all topics covered each year. This course is repeatable for a maximum of 32 credits.
ME 597. PRECISION MOTION GENERATION (4). Introduces fundamental knowledge in mechatronic systems used in manufacturing equipment such as CNC machine tools, and their computer numerical controls. Students will be exposed to sensors and actuators utilized in machine tools, industrial robots and for process automation. Fundamental knowledge to model and identify dynamics of motion delivery systems, design and analysis of accurate position control algorithms for precision motion generation will be covered. Digital motion control design will be introduced. Motion planning and real-time path interpolation algorithms will be covered. Students will be able to design NC systems for 2D motion platforms. PREREQS: ME 430 or equivalent, and graduate standing in Mechanical Engineering, Manufacturing Engineering, Robotics, or instructor approval.
ME 599. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 32 credits.
ME 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
ME 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: PhD students only.

ME 605. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: PhD students only.

ME 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: PhD students only.
ME 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: PhD students only.
ME 611. MODERN PRODUCT DESIGN (4).
Modern product development, design and prototyping are covered. Product development and prototyping is examined from a research standpoint in this course. Customer outcomes gathering, functional modeling, product architecture, modern techniques for concept generation and selection are explored. Also covered are recently developed theories and techniques for prototyping. The topics, place in the overall design process is shown through a product development and prototyping project.
ME 615. DESIGN UNDER UNCERTAINTY (4).
Tackles the problem of decision making in engineering design. The fundamental challenge faced in making decisions in engineering designs is that they are almost exclusively decisions made under uncertainty. Sources of uncertainty could result from engineering models, experiments conducted, or lack of knowledge of future events. The course will cover three basic topics 1) how do we quantify uncertainty, 2) how do we account for the uncertainty in decision making, and 3) how do we make design selection decisions about products or systems we design. PREREQS: ME 517 [C] and graduate standing

ME 617. DESIGN AUTOMATION (4). Design automation is the field of study whereby advanced numerical methods are used to automate difficult or tedious design decisions. Typically, such methods are based on numerical optimization and artificial intelligence. They work in tandem with other engineering digital tools like computer-aided design, computer-aided manufacturing, and finite-element analysis. This course builds upon a fundamental understanding of optimization to introduce students to a range of different techniques that may be used to support engineering decision-making. This includes heuristic methods, Al tree-search, discrete and stochastic algorithms. The course concludes with discussion of recent innovations in multi-objective, multi-disciplinary and robust optimization.
PREREQS: ME 517 [C]
ME 667. COMPUTATIONAL FLUID DYNAMICS (3). Application of modern computational techniques to solve a wide variety of fluid dynamics problems including both potential and viscous flow with requirements for computer code development. PREREQS: (ME 560 [C] or ME 565 [C] or ME 566 [C] ) and (ME 526 [C] or ME 575 [C] ) and /or equivalent.
ME 671. ELECTRONIC PROPERTIES OF OXIDES (4). Band theory of solids applied to metal oxide materials. Includes metallic oxides, non-stoichiometric semiconductors and associated defect chemistry, high temperature superconductors, electrostatics, linear dielectrics, non-linear dielectrics, piezoelectrics, and the optical properties of oxides. CROSSLISTED as MATS 671. PREREQS: ME 571 or MATS 571 or PH 575

## ■ MANUFACTURING ENGINEERING COURSES

MFGE 285. INTRODUCTION TO INDUSTRIAL AND MANUFACTURING ENGINEERING (3). Introduction to selected topics in industrial and manufacturing engineering, including history and philosophy, product design and manufacturing cycle, integrated role of engineering and business, and multi-objective nature of organizations. Surveys of selected design problems in resource allocation, operations and quality management, and production engineering. CROSSLISTED as IE 285.
MFGE 336. PRODUCTION ENGINEERING (4). Provides a general understanding of the production engineering function within industry and the means by which to achieve tight tolerances through machining. Geometric dimensioning and tolerancing, fixture and gage design, and fundamentals of metal cutting mechanics are introduced, and their interactions are explored. Lec/lab. PREREQS: (ENGR 213 [C] or ENGR 213H [C] ) and ENGR 248 [C] and (ENGR 321 [C] or ENGR 321H [C] or MATS 321 [C] or MATS 321 H [C] ) and ME 250 [C]

## MFGE 337. MATERIALS AND

MANUFACTURING PROCESSES (4). Introduces mechanical manufacturing methods by which materials are economically shaped into valuable products. The overall goal is to develop an understanding of how the functionality, shape, materials, cost and sustainability of a product influence manufacturing process selection and design. Lec/lab. PREREQS: ((ENGR 321 [C] or ENGR 321 H [C] or MATS 321 [C] or MATS 321H [C] ) and ME 250 [C] and MFGE 336 [C] )
MFGE 436. LEAN MANUFACTURING SYSTEMS ENGINEERING (4). The planning, evaluation, deployment, and integration of lean manufacturing theory and methods. Examines manufacturing processes/equipment and systems, e.g., planning/ control, product design, supply chain resource management. Lec/lab.
MFGE 437. COMPUTER CONTROL OF
MANUFACTURING PROCESSES (4). Introduces fundamental knowledge in the automation of manufacturing systems and processes. Automated
manufacturing system design and operations-computer numerical control (CNC) technology; NC part programming; sensors and actuators, their modeling and dynamic simulation; feedback motion delivery systems design and tuning; programmable logic controls (PLC) for industrial control systems, and path planning for numerical controlled (NC) machinery. Lec/lab. PREREQS: (ME 317 [C] or ME 317H [C] or MFGE 336 [C] ) and (ENGR 212 [C] or ENGR 212H [C] )
MFGE 438. COMPOSITES MANUFACTURING
(4). Introduction to fiber-reinforced composite materials and their applications. Topics include matrices and reinforcement; open and closed molding processes; filament winding, quality, testing, damage assessment; basics of factory operations and sustainability of composites. Students will complete laboratory projects using fiber-reinforced laminates. Lec/lab. PREREQS: (ENGR 213 [C] or ENGR 213H [C] )
MFGE 499. SPECIAL TOPICS (0-5). This course is repeatable for a maximum of 99 credits.
MFGE 507. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.
MFGE 511. PRECISION MACHINE DESIGN (3). Tolerance analysis and application in design/ manufacturing practice, principles of machine design and computational analysis of errors in machine design, sensor mounting and sensor calibration, machine level error budget with geometric and thermal errors, structural design of joints and supports, deterministic damping, exact constraint design for flexures and couplings, bearing systems design, motion and power system design for machine tools. CROSSLISTED as ME 511. PREREQS: An understanding of mechanical component design and solid mechanics.
MFGE 531. MESO-SCALE MANUFACTURING
(3). Meso-scale processing techniques for fabricating microfluidic devices, especially microtechnology-based energy, chemical and biological systems. Introduction to microlamination and techniques for lamina patterning, registration and bonding. Lec/lab. PREREQS: Graduate standing in science or engineering.
MFGE 534. CERAMICS PROCESSING (3). Introduction to materials, manufacturing methods, properties and applications of ceramics. The emphasis of the course is on understanding and exploring the inter-relationships between material characteristics, processing variables and component geometry in the context of ceramics. PREREQS: Graduate standing in engineering or science, or senior standing in manufacturing engineering.
MFGE 535. INDUSTRIAL SUSTAINABILITY
ANALYSIS (3). Students are exposed to the role of business and engineering in the design and implementation of sustainable industrial systems. Drivers, metrics, and analysis concepts, methods, and tools are introduced. Students incorporate business and engineering considerations in making product, manufacturing process, and supply chain design considerations. PREREQS: Graduate standing or instructor approval.
MFGE 536. LEAN MANUFACTURING SYSTEMS ENGINEERING (4). The planning, evaluation, deployment, and integration of lean manufacturing theory and methods. Examines manufacturing processes/equipment and systems, e.g., planning/ control, product design, supply chair resource management. Lec/lab.
MFGE 538. COMPOSITES MANUFACTURING
(4). Introduction to fiber-reinforced composite materials and their applications. Topics include matrices and reinforcement; open and closed molding processes; filament winding, quality, testing, damage assessment; basics of factory operations and sustainability of composites. Students will complete laboratory projects using fiber-reinforced laminates. Lec/lab. PREREQS: (ENGR 213 or ENGR 213H)

MFGE 599. SPECIAL TOPICS (0-5). This course is repeatable for a maximum of 99 credits. PREREQS: Graduate standing only.

## ■ MECHANICAL/INDUSTRIAL/ MANUFACTURING ENGINEERING COURSES

MIME 101. INTRODUCTION TO MIME (3).
Provides students with an overview of mechanical, industrial, manufacturing, and energy systems engineering careers and an introduction to technical areas of study. Skills necessary for success in both the academic curriculum and in the engineering profession will also be emphasized, including communication and ethics. Lec/rec.
MIME 101H. INTRODUCTION TO MIME (3).
Provides students with an overview of mechanical, industrial, manufacturing, and energy systems engineering careers and an introduction to technical areas of study. Skills necessary for success in both the academic curriculum and in the engineering profession will also be emphasized, including communication and ethics. Lec/rec. PREREQS: Honors College approval required.
MIME 199. SPECIAL TOPICS (0-4).
MIME 299. SPECIAL TOPICS (0-4). This course is repeatable for a maximum of 4 credits.
MIME 399. SPECIAL TOPICS (0-4). Special topics in mechanical, industrial, and manufacturing engineering. This course is repeatable for a maximum of 16 credits.

## MIME 504. WRITING AND CONFERENCE/

EXPLORATION (1-9). Students will be allowed to register for a variable number of MIME 504 credits to bring their registration up to full-time status (9 credits). Graded P/N. This course is repeatable for a maximum of 15 credits.
MIME 507. SEMINAR/NEW STUDENT
ORIENTATION (1).

## ■ ROBOTICS COURSES

ROB 421. APPLIED ROBOTICS (4).
Multidisciplinary teams of students design, build, and demonstrate a robotic system, including all sensing, computation, and actuation. The specific task, such as checkers-playing robots, changes each year, and is designed to be challenging for ambitious students. Robots will compete in a friendly competition at the end of the term. Lec/ lab. PREREQS: College of Engineering students (pro-school or graduate students) or approval of instructor.
ROB 456. INTELLIGENT ROBOTS (4).
Foundations of probabilistic reasoning for robotics. Topics include state estimation, robot motion, perception, localization and decision making under uncertainty. PREREQS: ME 373 or ME 373H or ECE 353 or CS 331
ROB 501. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 99 credits.
ROB 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.
ROB 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.
ROB 506. PROJECTS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.
ROB 507. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

## ROB 514. INTRODUCTION TO ROBOTICS (4).

 A broad introduction to the field of robotics, and to the graduate Robotics program. The goal of the class is to take students with different backgrounds (mechanical engineering, computer science, electrical engineering, physics, etc.) and give them a common base in the fundamentals of robotics. A secondary goal is to introduce studentsto the Robotics program, and to give them some of the skills that will make them successful, both in the program and as a professional roboticist. PREREQS: Student must be enrolled in graduate Robotics Program.
ROB 521. APPLIED ROBOTICS (4).
Multidisciplinary teams of students design, build, and demonstrate a robotic system, including all sensing, computation, and actuation. The specific task, such as checkers-playing robots, changes each year, and is designed to be challenging for ambitious students. Robots will compete in a friendly competition at the end of the term. Lec/ lab. PREREQS: College of Engineering students (pro-school or graduate students) or approval of instructor.
ROB 534. SEQUENTIAL DECISION MAKING IN ROBOTICS (4). Examines sequential decision making in robotics with a focus on motion planning and related optimization problems applied to fielded systems in marine, aerial, and ground domains. Discussions regarding both fundamental background material as well as cutting edge research in the following areas: discrete planning, sampling-based planning, planning under uncertainty, multi-robot systems, optimization, and performance guarantees.
ROB 537. LEARNING-BASED CONTROL (4).
Provides an introduction to learning systems and their application to the control of nonlinear systems. Covered topics include neural networks, reinforcement learning, and evolutionary algorithms. Includes project component in which students write a technical paper and give a conference style presentation based on their project.
ROB 538. AUTONOMOUS AGENTS AND MULTI-
AGENT SYSTEMS (4). Provides an introduction to autonomous agents and multi-agent systems. In particular, it focuses on how to use agents as building blocks for different autonomous systems. Covered topics include reinforcement learning, game theory, swarms, auctions, and collectives. Because this course covers a constantly evolving field, there will be a significant paper reading component in addition to the regular lectures. Students are expected to spend at least three hours a week reading, discussing and critiquing assigned papers.
ROB 541. GEOMETRIC MECHANICS (4). An introduction to geometric methods in the analysis of dynamic systems. Using the kinematics of simple robotic systems as a motivating example, we explore topics such as manifolds and Lie groups, representations of velocity, holonomic and nonholonomic constraints, constraint curvature and response to cyclic inputs, distance metrics. PREREQS: Graduate standing, along with prior exposure to linear algebra and differential equations.
ROB 542. ACTUATOR DYNAMICS (4). Focuses on how inertia, spring compliance, and other passive dynamics affect highly dynamic, softwarecontrolled systems. Examples include robotic manipulation tasks, robot-human interaction, CNC machines, or legged locomotion. Lec/lab. PREREQS: Graduate standing and prior courses on dynamics and control (at the discretion of the instructor) such as ME 531, ME 533, ME 535.

## ROB 562. HUMAN CONTROL SYSTEMS (4)

Covers mechanisms of human motor systems and control of the neuromusculoskeletal anatomy followed by functional analysis of these system components. Then all the components are integrated to study feedback control dynamics Covers classic to modern theories of motor control, adaptation, cognitive involvement, and rehabilitation techniques. PREREQS: Basic feedback control systems, linear algebra, differential equations, or instructor permission.

ROB 564. SOFT ROBOTICS (4). Soft robotics researchers propose building intelligent machines purely out of stretchable compressible soft materials. The course is centered on term-long projects that will result in real soft robots with the
goal of presenting to the international community. The topics covered include rapid digital manufacturing, soft actuators, soft sensors, soft logic, soft energy, applications of soft robotics, and modeling soft mechanics. PREREQS: Graduate standing. Seniors must contact instructor.
ROB 567. HUMAN ROBOT INTERACTION (4).
The field of human-robot interaction brings together research and application of methodology from robotics, human factors, human-computer interaction, interaction design, cognitive psychology, education and other fields to enable robots to have more natural and more rewarding interactions with humans throughout their spheres of functioning. PREREQS: Recommended background in one of human factors, usability/hci, programming experience, design.
ROB 599. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 32 credits.
ROB 601. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 99 credits.
ROB 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.
ROB 605. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.

Risk Assessment

## Graduate Minors

Nuclear Engineering
Radiation Health Physics
The School of Nuclear Science and
Engineering at Oregon State University offers BS, MEng, MS, and PhD degrees in Nuclear Engineering. In addition, it offers a BS, MS, MHP (Master of Health Physics) degrees in Radiation Health Physics and an MMP (Master of Medical Physics), MS, and PhD in Medical Physics. The BS in Radiation Health Physics degree may also be taken as a premedical track.

Excellent facilities are available for the instructional and research programs at the Radiation Center, including a TRIGA Mark II nuclear reactor and the AP-600 $1 / 4$ scale test facility. Instruction is integrated with an extensive research program, with opportunities to participate at both the undergraduate and graduate levels.

The mission of the School of Nuclear Science and Engineering is to educate students to become nuclear engineers and health physicists with the ability to achieve the highest standards of the profession and to support the needs of industry, government, and the nation.

The nuclear engineering undergradu-
ate program objectives are:

1. To produce graduates with a high level of competency in the nuclear engineering core curriculum.
2. To produce graduates with a high level of competency in engineering and science.
3. To produce graduates that can work effectively in both individual and team environments.
4. To produce graduates with effective communication skills.
5. To produce graduates with a high regard for their profession and their responsibility to lifelong learning.
The objectives of the nuclear engineering and radiation health physics undergraduate curricula are to prepare students for careers related to the many beneficial uses of nuclear technology and energy. Nuclear engineers apply scientific principles to the research, design, and operation of a wide variety of nuclear technology applications including power generation, medicine, and radioactive waste management. Radiation health physicists study methods used to protect people and their environment from radiation hazards while enabling the beneficial uses of radiation and radioactive materials. In addition, an emphasis is provided in nuclear instrumentation, nuclear systems and materials, radiation protection, reactor analysis and nuclear power economics and, particularly, safety and regulation in nuclear operations.

The School of Nuclear Science and Engineering aims to educate students majoring in radiation health physics to become radiation health physicists with the ability to achieve the highest standards of the profession and to support the needs of industry, government, and the nation.

The radiation health physics undergraduate program objectives are:

1. To produce graduates with a high level of competency in the radiation health physics core curriculum.
2. To produce graduates with a high level of competency in the biological and physical sciences.
3. To produce graduates who can work effectively in both individual and team environments.
4. To produce graduates with effective communication skills.
5. To produce graduates with a high regard for their profession and their responsibility to lifelong learning. Radiation health physics is a specialized program in the School of Nuclear Science and Engineering for students with a professional interest in the field of radiation protection, also known as health physics. It involves an integrated study of the physical aspects of ionizing and nonionizing radiation, their biological effects, and the methods used to pro-
tect people and their environment from radiation hazards while still enabling the beneficial uses of radiation and radioactive material.

## PRE-MED OPTION

Students in radiation health physics can also pursue a pre-med option in which they fulfill the requirements for the BS in Radiation Health Physics degree, as well as the course work expected for entrance into most medical schools.

## CERTIFIED HEALTH PHYSICIST

Students completing the Radiation Health Physics degree will be eligible to take Part I of the Certified Health Physics (CHP) Examination of the American Board of Health Physics after one year of applied health physics practice. After six years of responsible professional experience in health physics, graduates will be eligible to take Part II of the CHP examination.

## UNDERGRADUATE MAJORS WITH OPTIONS

## NUCLEAR ENGINEERING

(BS, CRED, HBS)
The objectives of the nuclear engineering and radiation health physics undergraduate curricula are to prepare students for careers related to the many beneficial uses of nuclear technology and energy. Nuclear engineers apply scientific principles to the research, design, and operation of a wide variety of nuclear technology applications including power generation, medicine, and radioactive waste management. Radiation health physicists study methods used to protect people and their environment from radiation hazards while enabling the beneficial uses of radiation and radioactive materials. In addition, an emphasis is provided in nuclear instrumentation, nuclear systems and materials, radiation protection, reactor analysis and nuclear power economics and, particularly, safety and regulation in nuclear operations.

GRADUATE MAJORS

## MEDICAL PHYSICS (MMP, MS, PhD)

## Graduate Areas of Concentration

Medical health physics, therapeutic radiologic physics
Medical physics examines and applies numerous aspects of nuclear science to medicine. Graduates can move to clinical residencies or research jobs which apply physics to medicine in imaging and radiation therapy.

The programs consist of a minimum of 45 credits, 39 of which must be didactic. The following courses are required and the remaining credits can be compiled of any 500 - or 600 -level course taught in the department or from outside the department if approved by an advisor. A comprehensive oral exam must be passed to complete the degree. MS students, in addition to the exam, must present their work to a committee of graduate faculty.

## NUCLEAR ENGINEERING (MEng, MS, PhD)

Graduate Areas of Concentration
Application of nuclear techniques, arms control technology, nuclear instrumentation and applications, nuclear medicine, nuclear power generation, nuclear reactor engineering, nuclear systems design and modeling, nuclear waste management, numerical methods for reactor analysis, radiation shielding, radioisotope production, space nuclear power, thermal hydraulics
The School of Nuclear Science and Engineering offers graduate work leading toward the Master of Engineering, Master of Science, and Doctor of Philosophy degrees in Nuclear Engineering, Master of Science, Master of Health Physics, and Doctor of Philosophy degrees in Radiation Health Physics, and Master of Medical Physics, Master of Science, and Doctor of Philosophy in Medical Physics.
The nuclear engineering and radiation health physics graduate degree programs are designed to prepare students for careers involved with the many beneficial applications of nuclear energy, radiation, and radioactive materials. The nuclear engineering and radiation health physics professions are essential to society's well-being since they enable significant public benefits through energy security, national defense, medical health, and industrial competitiveness.

In nuclear engineering particular attention is directed toward the application of scientific principles to the safe design and operation of nuclear installations. In addition, an emphasis is provided in system safety and thermal hydraulic testing, high-performance computational methods development, nuclear instrumentation, nuclear systems and materials, radiation protection, reactor analysis, nuclear power economics, and the regulation of nuclear operations.

Competitive fellowships and research and teaching assistantships are available to incoming graduate students. The U.S. Department of Energy and National Academy for Nuclear Training support a number of fellowship programs each year. Oregon State University is one of eight participating universities in the U.S. where students may attend graduate school on the Nuclear Engineering, Health Physics, and Applied Health Physics fellowships sponsored by the U.S. Department of Energy. Each year the National Academy for Nuclear Training also supports fellowships for students entering nuclear engineering and radiation health physics at OSU. Research and teaching assistant opportunities are also available for students to support the educational and research programs conducted by the department.

World-class facilities are available for the instructional and research programs
of the department. These are housed in the OSU Radiation Center and include a TRIGA Mark II nuclear reactor, the Advanced Thermal Hydraulic Research Laboratory, the APEX nuclear safety scaled testing facility, and laboratories specially designed to accommodate radiation and the use of radioactive materials.

For more information, visit the department's website at http://ne.oregonstate. edu/.

NSE 114. INTRO TO NUCLEAR ENGINEERING AND RADIATION HEALTH PHYSICS I (3). Introduction to the nuclear engineering and radiation health physics fields; problem-solving techniques; careers in the nuclear industry; nuclear history; elementary nuclear and reactor physics; basic nuclear fission and fusion theory; reactor types; nuclear safety; nuclear fuel cycle; and radiation protection.
NSE 115. INTRO TO NUCLEAR ENGINEERING AND RADIATION HEALTH PHYSICS II (3). introduction to the nuclear engineering and radiation health physics fields; problem-solving techniques; careers in the nuclear industry; nuclear history; elementary nuclear and reactor physics; basic nuclear fission and fusion theory; reactor types; nuclear safety; nuclear fuel cycle; and radiation protection.
NSE 233. MATHEMATICAL METHODS FOR NSE
(3). Development and application of analytical and numerical methods with applications to problems in the NE/RHP field. Major topics will include solution of ODEs and systems of ODEs, root finding techniques and numerical integration and differentiation. Major applications will include solution of the Bateman Equations and solution of the diffusion equation. PREREQS: MTH 254* [C] or MTH $254 \mathrm{H}^{*}$ [C]
NSE 234. NUCLEAR AND RADIATION PHYSICS I (3). Relativistic dynamics; basic nuclear
physics; basic quantum mechanics; radioactivity; electromagnetic waves; interaction of ionizing radiation with matter; cross sections; basic atomic structure. PREREQS: MTH 251 [C] or MTH 251H [C]
NSE 235. NUCLEAR AND RADIATION PHYSICS II (3). Radioactivity; radioactive decay modes; decay kinetics, interaction of neutrons with matter; nuclear reactions; fission and fusion basics; cross sections. PREREQS: (NSE 234 [C] or NE 234 [C] or RHP 234 [C] ) and (MTH 252 [C] or MTH 252 H [C])
NSE 236. NUCLEAR RADIATION DETECTION AND INSTRUMENTATION (4). Principles and mechanisms underlying nuclear radiation detection and measurements; operation of nuclear electronic laboratory instrumentation; application of gas-filled, scintillation and semiconductor laboratory detectors for measurement of alpha, beta, gamma, and neutron radiation; experimental investigation of interactions of radiation with matter. Lec/lab. PREREQS: NSE 235 [C] or NE 235 [C] or RHP 235 [C]
NSE 311. INTRODUCTION TO THERMALFLUID SCIENCES (4). Basic concepts of fluid mechanics, thermodynamics and heat transfer are introduced. Conservation of mass, energy, moment and the second law of thermodynamics are included. CROSSLISTED as ME 311. PREREQS: (ENGR 212 [C] or ENGR 212H [C] ) and (MTH 256 [C] or MTH 256 [C] )
NSE 311H. INTRODUCTION TO THERMALFLUID SCIENCES (4). Basic concepts of fluid mechanics, thermodynamics and heat transfer are introduced. Conservation of mass, energy, moment and the second law of thermodynamics are included. CROSSLISTED as ME 311H. PREREQS: (ENGR 212 [C] or ENGR 212H [C] ) and (MTH 256 [C] or MTH 256H [C] ) and Honors College approval required.
NSE 312. THERMODYNAMICS (4). Energy destruction, machine and cycle processes, law of corresponding states, non-reactive gas mixtures, reactive mixtures, thermodynamics of compressible fluid flow. CROSSLISTED as ME 312. PREREQS: (NSE 311 [C] or NSE 311H [C] or NE 311 [C] or NE 311 [C] or ME 311 [C] or ME 311 H [C] ) and (MTH 256 [C] or MTH 256H [C] )
NSE 312H. THERMODYNAMICS (4). Energy destruction, machine and cycle processes, law of corresponding states, non-reactive gas mixtures, reactive mixtures, thermodynamics of compressible fluid flow. CROSSLISTED as ME 312H. PREREQS: (NSE 311 [C] or NSE 311H [C] or NE 311 [C] or NE 311H [C] or ME 311 [C] or ME 311H [C] ) and (MTH 256 [C] or MTH 256H [C] ) and Honors College approval required.

NSE 319. *SOCIETAL ASPECTS OF NUCLEAR TECHNOLOGY (3). Description and discussion of nuclear-related issues as they impact society. (Bacc Core Course)
NSE 331. INTRODUCTORY FLUID MECHANICS
(4). Introduces the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. CROSSLISTED as ME 331
PREREQS: (MTH 254 [C] or MTH 254H [C] ) and (MTH 256 [C] or MTH 256H [C] ) and (ENGR 212 [C] or ENGR 212 H [C] ) and (ENGR 311 [C] or ENGR 311H [C] or ME 311 [C] or ME 311H [C] or NSE 311 [C] or NSE 311H [C] or NE 311 [C] or NE 311H [C] )

## NSE 331H. INTRODUCTORY FLUID

MECHANICS (4). Introduces the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. CROSSLISTED as ME 331H. PREREQS: (MTH 254 [C] or MTH 254H [C] ) and (MTH 256 [C] or MTH 256H [C] ) and

ENGR 212 [C] or ENGR 212 H [C]) and (ENGR 311 [C] or ENGR 311H [C] or ME 311 [C] or ME 311 H [C] or NSE 311 [C] or NSE 311H [C] or NE 311 [C] or NE 311H [C] ) and Honors College approval required.
NSE 332. HEAT TRANSFER (4). A treatment of conductive, convective and radiative energy transfer using control volume and differential analysis and prediction of transport properties. CROSSLISTED as ME 332. PREREQS: (MTH 256 [C] or MTH 256 H [C]) and (ENGR 212 [C] or ENGR 212H [C] ) and (NSE 311 [C] or NSE 311H [C] or NE 311 [C] or NE 311H [C] or ME 311 [C] or ME 311H [C] ) and (ME 331 [C] or ME 331H [C] or NSE 331 [C] or NSE 331H [C] or NE 331 [C] or NE 331H [C] )
NSE 332H. HEAT TRANSFER (4). A treatment of conductive, convective and radiative energy transfer using control volume and differential analysis and prediction of transport properties. CROSSLISTED as ME 332H. PREREQS: (MTH 256 [C] or MTH 256 H [C] ) and (ENGR 212 [C] or ENGR 212H [C] ) and (NSE 311 [C] or NSE 311H C] or NE 311 [C] or NE 311H [C] or ME 311 [C] or ME 311H [C] ) and (ME 331 [C] or ME 331H [C] or NSE 331 [C] or NSE 331H [C] or NE 331 [C] or NE 331 H [C] ) and Honors College approval required.
NSE 401. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 99 credits.
NSE 403. THESIS/DISSERTATION (1-16). This course is repeatable for a maximum of 16 credits.
NSE 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.
NSE 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

NSE 407. SEMINAR (1). Graded P/N. This course is repeatable for a maximum of 16 credits.

NSE 410. INTERNSHIP (1-12). Supervised technical work experience at approved organizations. Graded P/N. This course is repeatable for a maximum of 12 credits.
PREREQS: Upper-division standing.
NSE 415. NUCLEAR RULES AND
REGULATIONS (2). An introduction to the
key nuclear regulatory agencies; major nuclear legislation; current radiation protection standards and organizations responsible for their implementation. Offered alternate years. PREREQS: NSE 481 or NE 481 or RHP 481
NSE 429. SELECTED TOPICS IN NUCLEAR ENGINEERING (1-3). Topics associated with nuclear engineering not covered in other undergraduate courses; topics may vary from year to year. This course is repeatable for a maximum of 45 credits. PREREQS: Instructor approval required.
NSE 435. RADIATION SHIELDING AND EXTERNAL DOSIMETRY (4). Theoretical principles of shielding for neutron and gamma radiation; external dosimetry fundamentals for neutrons, photons, and charged particles; applications to problems of practical interest; analytical, numerical, and computer solutions emphasized. PREREQS: (NSE 234 [C] or NE 234 [C] or RHP 234 [C] ) and (NSE 235 [C] or NE 235 [C] or RHP 235 [C] ) and (NSE 481 [C] or NE 481 [C] or RHP 481 [C] ) and /or instructor approval.
NSE 440. NUCLEAR FUEL CYCLE AND WASTE MANAGEMENT (4). Mining, milling, conversion, enrichment, fuel fabrication, reprocessing, and waste management of nuclear fuel, including disposal of low- and high-level radioactive waste. PREREQS: NSE 235 [C] or NE 235 [C] or RHP 235 [C]
NSE 450. PRINCIPLES OF NUCLEAR
MEDICINE (3). Basic principles of nuclear medicine; detectors; radiopharmaceutical; dosimetry; imaging procedures.

NSE 451. NEUTRONIC ANALYSIS I (3). Physical models of neutronic systems; nuclear physics; steady state and transient neutronic system behavior; introductory neutron transport theory, one speed diffusion theory; numerical methods; fast and thermal spectrum calculations; multigroup methods; transmutation and burnup; reactor fuel management; reactivity control; perturbation theory; neutronic laboratory sessions. PREREQS: (MTH 256 [C] or MTH 256H [C] ) and (NSE 235 C] or NE 235 [C] or RHP 235 [C] ) and (NSE 333 C] or NE 333 [C] or RHP 333 [C] ) and NSE 451 and NSE 452 must be taken in order.

NSE 452. NEUTRONIC ANALYSIS II (3). Physical models of neutronic systems; nuclear physics; steady state and transient neutronic system behavior; introductory neutron transport theory, one speed diffusion theory; numerical methods; fast and thermal spectrum calculations; multigroup methods; transmutation and burnup; reactor fuel management; reactivity control; perturbation theory; neutronic laboratory sessions. Lec/lab. PREREQS: NSE 451 [C] or NE 451 [C] and NSE 451 and NSE 452 must be taken in order

NSE 455. REACTOR OPERATOR TRAINING I (3). The Oregon State University TRIGA reactor Operator Training I class is one of a two-course series. Students interested in participating in this course are expected to enroll in both the NSE 455/NSE 555 and NSE 456/NSE 556 classes taught during spring and summer terms. Students successfully completing the NSE 455/NSE 555 and NSE 456/NSE 556 series will culminate their course work with the opportunity to take a certification test proctored by the Nuclear Regulatory Commission. PREREQS: (NSE 236 [C] or NE 236 [C] or RHP 236 [C] ) and (MTH 256 [C] or MTH 256H [C] )
NSE 456. REACTOR OPERATOR TRAINING II
(4). The Oregon State University TRIGA reactor Operator Training II class is one of a two-course series. Students interested in participating in this course must have already taken and successfully passed NSE 455/NSE 555. Students successfully completing NSE 455/NSE 555 will culminate their course work with the opportunity to take a certification test proctored by the Nuclear Regulatory Commission. PREREQS: NSE 455 [C] or NE 455 [C] and instructor approval required.
NSE 457. NUCLEAR REACTOR LABORATORY (2). Experimental investigation of the principles of nuclear reactor operation. Use of the OSU TRIGA Reactor and other laboratory facilities. Preparation and presentation of laboratory reports. Lec/lab. PREREQS: (NSE 451 [C] or NE 451 [C] or NSE 551 [C] or NE 551 [C] ) and (NSE 452 [C] or NE 452 [C] or NSE 552 [C] or NE 552 [C] )

## NSE 467. NUCLEAR REACTOR THERMAL

HYDRAULICS (4). Hydrodynamics and conductive, convective and radiative heat transfer in nuclear reactor systems. Core heat removal design; critical heat flux, hot spot factors, singleand two-phase flow behavior. Advanced thermal hydraulic computer codes. PREREQS: ME 332 [C] or ME 332H [C] or NSE 332 [C] or NSE 332H [C] or NE 332 [C] or NE 332H [C]

NSE 468. NUCLEAR REACTOR SAFETY (3). Focused on probability risk assessment and system reliability analysis techniques applied to nuclear reactor safety. Application of these methods will be performed specifically through examination of neutronics and thermal hydraulic transients, effectiveness of emergency systems, accident prevention and mitigation, and assessment of radioactive release to the environment. PREREQS: (NSE 451 [C] or NE 451 [C] ) and (NSE 467 [C] or NE 467 [C] )

NSE 473. NUCLEAR REACTOR SYSTEMS ANALYSIS (3). Analysis of nuclear light water reactor (pressurized water reactor and boiling water reactor) design and operation, including the nuclear steam supply system, engineered safety features and balance of plant systems; regulatory design requirements; industry standards; plant
engineering and instrumentation drawings Advanced reactor system designs. PREREQS: NSE 452 [C] or NE 452 [C] and approval of the instructor or graduate standing.
NSE 474. ${ }^{\wedge}$ NUCLEAR SYSTEMS DESIGN I (4). Part I of a two-part series aimed at developing the student's ability to utilize fundamental nuclear and radiation protection skills to transform concepts into practical designs. Design projects involve the integration of neutronics, thermal hydraulics, safety and risk analysis, power production materials, radiation protection, economic optimization, statistics and other skills. (Writing Intensive Course) PREREQS: Senior standing. NSE 474 and NSE 475 must be taken in order.

NSE 475. ^NUCLEAR SYSTEMS DESIGN II (4). Part II of a two-part series aimed at developing the student's ability to utilize fundamental nuclear and radiation protection skills to transform concepts into practical designs. Design projects involve the integration of neutronics, thermal hydraulics, safety and risk analysis, power production, materials, radiation protection, economic optimization, statistics and other skills. (Writing Intensive Course) PREREQS: (NSE 452 [C] or NE 452 [C] ) and (NSE 474 [C] or NE 474 [C] or RHP 474 [C] ) and senior standing. NSE 474 and NSE 475 must be taken in order.
NSE 481. RADIATION PROTECTION (4). Fundamental principles and theory of radiation protection; regulatory agencies, dose units; source of radiation; biological effects and risk; dose limits; applications of external and internal dosimetry; shielding and atmospheric dispersion. PREREQS: NSE 235 [C] or NE 235 [C] or RHP 235 [C]
NSE 483. RADIATION BIOLOGY (3). Biological effects of ionizing radiation at the molecular, cellular, and organismal levels with emphasis on vertebrates; both acute and chronic radiation effects are considered. PREREQS: NSE 481 [C] or RHP 481 [C] or MP 481 [C] and /or senior standing.
NSE 488. RADIOECOLOGY (3). Radionuclides in the environment: their measurement and identification, uptake and transfer through food chains. Effect of radiation on natural populations of plants and animals. PREREQS: NSE 481 [C] or RHP 481 [C] or NE 481 [C] and /or graduate standing.
NSE 499. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits.

NSE 501. RESEARCH (1-16). This course is repeatable for a maximum of 99 credits.
NSE 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits

NSE 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.

NSE 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

NSE 507. SEMINAR (1). Graded P/N. This course is repeatable for a maximum of 16 credits.

NSE 510. INTERNSHIP (1-12). Supervised technical work experience at approved organizations. Graded $P / N$. This course is repeatable for a maximum of 16 credits. PREREQS: Graduate standing.
NSE 515. NUCLEAR RULES AND
REGULATIONS (2). An introduction to the
key nuclear regulatory agencies; major nuclear legislation; current radiation protection standards and organizations responsible for their implementation. Offered alternate years.
NSE 516. RADIOCHEMISTRY (4). Selected methods of radiochemical analysis. Actinide chemistry, activation analysis, radionuclide solvent extraction, and microbial reactions with radionuclides. Designed for majors in chemistry, chemical engineering, nuclear engineering, and radiation health physics. Lec/lab. CROSSLISTED
as CH 516. PREREQS: (NSE 531 [C] or NE 531 [C] or RHP 531 [C] ) and (NSE 536 [C] or NE 536 [C] or RHP 536 [C] ) and /or instructor approval.

NSE 517. RADIONUCLIDES IN LIFE SCIENCES (4). Chemistry of actinides and fission products, radioseparations, selected medical generators, radiolabeling of organic molecules. Designed for majors in medical physics, radiation health physics, chemistry, pharmacy. PREREQS: (NSE 531 [C] or NE 531 [C] or RHP 531 [C] ) and (NSE 536 [C] or NE 536 [C] or RHP 536 [C] )
NSE 519. RADIOCHEMICAL ANALYSIS (4). Hands-on learning of radiochemistry, practical training with open radiation sources for preparation of irradiation targets, counting samples from contaminated soils or separation of medical radionuclides. Fundamentals of chemical dosimetry are also covered. Designed for a broad range of majors in chemistry, nuclear engineering, radiation health physics, radioecology, chemical and environmental engineering. Lec/lab. The lecture part of the course also is delivered online as video stream via Canvas. PREREQS: NSE 536 [C] or NE 536 [C] or RHP 536 [C] and NSE 516 recommended but not required. Graduate standing.

NSE 521. RADIOLOGICAL ANATOMY AND PHYSIOLOGY (4). Anatomy and physiology with correlating images for use by medical physicists, therapists, dosimetrists. This course adheres to the AAMD requirements for Cross Sectional Anatomy. PREREQS: Instructor approval and advanced standing.

NSE 526. NUMERICAL METHODS FOR
ENGINEERING ANALYSIS (3). Numerical solutions of linear equations, difference equations, ordinary and partial differential equations. CROSSLISTED as ME 526. PREREQS: Programming experience and previous exposure to numerical methods, or instructor approval.

NSE 531. RADIOPHYSICS (3). Expands understanding of concepts and applications of atomic and nuclear physics to enable continued study in nuclear engineering and health physics. Includes fundamental concepts of nuclear and atomic physics, atomic and nuclear shell structure, radioactive decay, radiation interactions, radiation biology, and the characteristics of fission PREREQS: Graduate standing.

NSE 535. RADIATION SHIELDING AND EXTERNAL DOSIMETRY (4). Theoretical principles of shielding for neutron and gamma radiation; external dosimetry fundamentals for neutrons, photons, and charged particles; applications to problems of practical interest; analytical, numerical, and computer solutions emphasized.

NSE 536. ADVANCED RADIATION DETECTION AND MEASUREMENT (4). Principles and mechanisms underlying nuclear radiation detection and measurements; operation of nuclear electronic laboratory instrumentation; application of gas-filled, scintillation and semiconductor laboratory detectors for measurement of alpha, beta, gamma, and neutron radiation, liquid scintillation equipment; use of Bonner spheres for neutron energy profiles; experimental investigation of interactions of radiation with matter. Lec/lab. PREREQS: NSE 531 [C] or NE 531 [C] or RHP 531 [C] or MP 531 [C]
NSE 537. DIGITAL RADIATION MEASUREMENT
AND SPECTROSCOPY (3). Principles of digital spectroscopy; application of digital filters in digital processing of detector pulses; hardware implementation of a typical digital spectrometer; introduction of Field-Programmable Gate Array (FPGA) devices programming a digital spectrometer using Hardware Description Language (VHDL); simulation, synthesis and spectroscopy; experimental design tests and evaluation. Lec/lab. PREREQS: NSE 536 [C] or NE 536 [C] or RHP 536 [C] and instructor approval required.

NSE 539. SELECTED TOPICS IN INTERACTION OF NUCLEAR RADIATION (1-6). Topics
associated with interactions of nuclear radiation not covered in other graduate courses; topics may vary from year to year. PREREQS: Instructor approval required

NSE 540. NUCLEAR FUEL CYCLE AND WASTE
MANAGEMENT (4). Mining, milling, conversion, enrichment, fuel fabrication, reprocessing, and waste management of nuclear fuel, including disposal of low- and high-level radioactive waste.
NSE 541. DIAGNOSTIC IMAGING PHYSICS I
(3). An introduction to the production and usage of ionizing radiation in medicine. The course will cover x-ray production, x-ray spectrum, characteristics and manipulation, and how x-rays are utilized to obtain anatomical information in diagnostics imaging. Imaging modalities to be covered in this course are general and portable planar radiography, mammography, and fluoroscopy (including interventional radiography). PREREQS: NSE 531 [C] or MP 531 [C] or RHP 531 [C] and instructor approval and graduate standing.
NSE 542. DIAGNOSTIC IMAGING PHYSICS II (3). An introduction to Computed Tomography (CT) and Ultrasound (US) imaging, and their applications in medicine. The course will cover x-ray production, detection, and image processing as it relates specifically to CT, as well as general acoustic physics principles and how they are applied to US imaging. Additionally, clinical radiation protection and dosimetry in diagnostic imaging will be taught. PREREQS: NSE 531 [C] or PP 531 [C] or RHP 531 [C] and instructor approval and graduate standing.

NSE 543. ADVANCED DIAGNOSTIC IMAGING
PHYSICS (3). An introduction to the areas of health informatics and magnetic resonance imaging (MRI). The health informatics portion of the course will specifically cover picture archiving and communication systems (PACS), including DICOM standards, data transfer and storage, digital image displays, and clinical implementation of PACS systems. The MRI portion of the course will provide instruction on the physical principles behind nuclear magnetic response (NMR) and how these phenomenon are exploited in MRI. Advanced MRI techniques and applications, along with clinical testing requirements, will also be covered. PREREQS: NSE 531 [C] or MP 531 [C] or RHP 531 [C] and instructor approval, graduate standing.
NSE 544. NUCLEAR MEDICINE IMAGING (3).
An introduction to the uses of radionuclides in medical imaging. The theory and application of detectors and imaging systems in nuclear medicine including collimators, scintillation probes cameras, SPECT, PET, and hybrid technologies (SPECT/CT, PET/CT, and PET/MRI) will be covered. PREREQS: (NSE 541 [C] or MP 541 [C] ) and (NSE 531 [C] or RHP 531 [C]) and instructor approval and graduate standing.
NSE 545. DIAGNOSTIC IMAGING PRACTICUM (3). Provides an introduction to the medical physicist's role in a clinical department; an opportunity to integrate principles learned throughout the graduate program as they apply to diagnostic imaging physics. Observations of procedures in radiography, fluoroscopy, ED, OR, interventional radiology, CT, MRI, ultrasound, and nuclear medicine. Experience in regulatory testing of x-ray equipment; observations of testing of CT and other x-ray modalities. Graded P/N. PREREQS: (NSE 541 [C] or MP 541 [C] ) and (NSE 531 [C] or MP 531 [C] or RHP 531 [C] ) and instructor approval and graduate standing.

NSE 549. SELECTED TOPICS IN NUCLEAR FUEL CYCLE ANALYSIS (1-6). Topics associated with the nuclear fuel cycle not covered in other graduate courses; topics may vary from year to year. This course is repeatable for a maximum of 45 credits.

NSE 550. PRINCIPLES OF NUCLEAR
MEDICINE (3). Basic principles of nuclear medicine; detectors; radiopharmaceutical; dosimetry; imaging procedures.
NSE 551. NEUTRONIC ANALYSIS I (3). Physical models of neutronic systems; nuclear physics; steady state and transient neutronic system behavior; introductory neutron transport theory; one speed diffusion theory; numerical methods; fast and thermal spectrum calculations; multigroup methods; transmutation and burnup; reactor fuel management; reactivity control; perturbation theory; neutronic laboratory sessions. PREREQS: NSE 551 and NSE 552 must be taken in order.

NSE 552. NEUTRONIC ANALYSIS II (3). Physical models of neutronic systems; nuclear physics; steady state and transient neutronic system behavior; introductory neutron transport theory; one speed diffusion theory; numerical methods; fast and thermal spectrum calculations; multigroup methods; transmutation and burnup; reactor fuel management; reactivity control; perturbation theory; neutronic laboratory sessions. PREREQS: NSE 551 [C] or NE 551 [C] and NSE 551 and NSE 552 must be taken in order.

NSE 553. ADVANCED NUCLEAR REACTOR PHYSICS (3). Advanced analytic and numerical techniques for the prediction of the neutron population in nuclear reactor systems. Topic will include long characteristic neutron transport, collision probabilities, nodal methods, equivalence theory, and perturbation theory. PREREQS: (NSE 551 [C] or NE 551 [C] ) and (NSE 552 [C] or NE 552 [C] ) and computer programming experience or instructor approval.
NSE 555. REACTOR OPERATOR TRAINING I
(3). The Oregon State University TRIGA Reactor Operator I class is one of a two-course series. Student interested in participating in this course are expected to enroll in both the NSE 455/555 and NSE 456/556 classes taught during spring and summer terms. Students successfully completing the NSE 455/555 and NSE 456/556 series will culminate their course work with the opportunity to take a certification test proctored by the Nuclear Regulatory Commission.
NSE 556. REACTOR OPERATOR TRAINING II (4). The Oregon State University TRIGA Reactor Operator Training II class is one of a two-course series. Students interested in participating in this course must have already taken and successfully passed NSE 455/NSE 555. Students successfully completing NSE $456 /$ NSE 556 will culminate their course work with the opportunity to take a certification test proctored by the Nuclear Regulatory Commission. PREREQS: NSE 555 [C] or NE 555 [C] and instructor approval required.
NSE 557. NUCLEAR REACTOR LABORATORY (2). Experimental investigation of the principles of nuclear reactor operation. Use of the OSU TRIGA Reactor and other laboratory facilities. Preparation and presentation of laboratory reports. Lec/lab. PREREQS: (NSE 551 [C] or NE 550 [C] ) and (NSE 552 [C] or NE 552 [C] )
NSE 559. SELECTED TOPICS IN NUCLEAR REACTOR ANALYSIS (1-3). Topics associated with nuclear reactor theory not covered in other graduate courses; topics may vary from year to year. This course is repeatable for a maximum of 45 credits.

NSE 561. NUCLEAR REACTOR SYSTEMS LABORATORY (3). Operational aspects of nuclear reactor systems; neutronic and thermalhydraulic characterization of nuclear reactors; examination of design basis accident prevention and mitigation; loss of coolant accidents; loss of flow accidents; station blackouts. Lec/lab. PREREQS: (NSE 553 [C] or NE 553 [C]) and (NSE 567 [C] or NE 567 [C] )
NSE 562. RADIATION THERAPY (3). The physics of radiation generation and delivery relevant to the field of clinical radiation oncology. Topics will include external beam radiation therapy;
dosimetric calculations; high dose-rate and low dose-rate brachytherapy; electron beam dosimetry and treatment planning; special techniques in radiotherapy; and clinical radiation protection and quality assurance. PREREQS: NSE 531 [C] or MP 531 [C] or NE 531 [C] or RHP 531 [C] and graduate standing
NSE 563. APPLIED RADIATION THERAPY PHYSICS LABORATORY I (3). The applied practice of therapeutic radiation physics for clinical radiation oncology. Topics will include current methodologies in treatment delivery and planning algorithms, best practices and protocols for quality assurance, special techniques in radiotherapy, and oncology. PREREQS: NSE 562 [C] or MP 562 [C]

## NSE 564. APPLIED RADIATION THERAPY

 PHYSICS LABORATORY II (3). Covers the applied practice of therapeutic radiation physics for clinical radiation oncology. Topics include current methodologies in SRS and ARC QA treatment planning QA, adaptive radiotherapy, eye plaque brachytherapy and HDR braytherapy.NSE 565. APPLIED THERMAL HYDRAULICS (3). Advanced topics in the computational modeling of the hydrodynamic and heat transfer phenomena of nuclear reactors. Steady-state and transient solutions of one-dimensional nuclear reactor thermal hydraulic models. Nuclear reactor behavior analysis during various accident scenarios.
NSE 567. NUCLEAR REACTOR THERMAL HYDRAULICS (4). Hydrodynamics and conductive, convective and radiative heat transfer in nuclear reactor systems. Core heat removal design; critical heat flux, hot spot factors, singleand two-phase flow behavior. Advanced thermal hydraulic computer codes.
NSE 568. NUCLEAR REACTOR SAFETY
(3). Focused on probability risk assessment and system reliability analysis techniques applied to nuclear reactor safety. Application of these methods will be performed specifically through examination of neutronics and thermal hydraulic transients, effectiveness of emergency systems, accident prevention and mitigation, and assessment of radioactive release to the environment. PREREQS: (NSE 551 [C] or NE 551 [C] ) and (NSE 567 [C] or NE 567 [C] )

## NSE 569. SELECTED TOPICS IN NUCLEAR

 REACTOR ENGINEERING (1-6). Advanced nuclear engineering design concepts, reactor systems analysis techniques and innovative nuclear engineering applications. Artificial intelligence and expert system applications to nuclear engineering problems. Topics may vary from year to year. This course is repeatable for a maximum of 30 credits.NSE 573. NUCLEAR REACTOR SYSTEMS
ANALYSIS (3). Analysis of nuclear light water reactor (pressurized water reactor and boiling water reactor) design and operation, including the nuclear steam supply system, engineered safety eatures and balance of plant systems; regulatory design requirements; industry standards; plant engineering and instrumentation drawings. Advanced reactor system designs. PREREQS: NSE 552 [C] or NE 552 [C]
NSE 574. NUCLEAR SYSTEMS DESIGN I (4). Part I of a two-part series aimed at developing the student's ability to utilize fundamental nuclear and radiation protection skills to transform concepts into practical designs. Design projects involve the integration of neutronics, thermal hydraulics, safety and risk analysis, power production, materials, radiation protection, economic optimization, statistics and other skills. PREREQS: NSE 574 and NSE 575 must be taken in order.
NSE 575. NUCLEAR SYSTEMS DESIGN II (4). Part II of a two-part series aimed at developing the student's ability to utilize fundamental nuclear and radiation protection skills to transform concepts into practical designs. Design projects involve the integration of neutronics, thermal hydraulics,
safety and risk analysis, power production, materials, radiation protection, economic optimization, statistics and other skills. PREREQS: (NSE 551 [C] or NE 551 [C] ) and (NSE 552 [C] or NE 552 [C] ) and (NSE 574 [C] or NE 574 [C] ) and NSE 574 and NSE 575 must be taken in order.

NSE 582. APPLIED RADIATION SAFETY (4). Application of radiation protection as practiced in the fields of nuclear science and engineering; application of health physics principles to reduce health hazards at each of the following stages: design, prevention, assessment, and post-incident A history of key nuclear regulatory agencies; early and current radiation protection standards and organizations responsible for their formulation; major nuclear legislation; pertinent nuclear rules and regulations and their application. Lec/lab.

NSE 583. RADIATION BIOLOGY (3). Biological effects of ionizing radiation at the molecular, cellular, and organismal levels with emphasis on vertebrates; both acute and chronic radiation effects are considered.
NSE 584. RADIATION BIOLOGY II (3).
Application of radiobiological models in radiation therapy. Some background in radiation biology is strongly recommended.

NSE 588. RADIOECOLOGY (3). Radionuclides in the environment: their measurement and identification, uptake and transfer through food chains. Effect of radiation on natural populations of plants and animals. PREREQS: NSE 481 or RHP 481 or NE 481 or graduate standing.
NSE 590. INTERNAL DOSIMETRY (3). Further development and more in-depth treatment of internal dosimetry concepts introduced in NE/ RHP 582, in NE/RHP 582, theoretical basis of energy deposition, biokinetics, and estimation of radiation risk from ingested, inhaled, or injected radionuclides. PREREQS: (NSE 531 [C] or NE 531 [C] or RHP 531 [C] ) and (NSE 535 [C] or NE 535 [C] or RHP 535 [C] ) and /or equivalent or instructor approval.
NSE 599. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits.
NSE 601. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 99 credits.
NSE 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits
NSE 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

NSE 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

NSE 607. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits

NSE 610. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

NSE 654. COMPUTATIONAL PARTICLE TRANSPORT (3). Properties of and methods for solution of the linear Boltzmann equation for nuclear reactors; spherical and double-spherical harmonics; integral equation methods; Monte Carlo methods. PREREQS: (NSE 551 [C] or NE 551 [C] ) and (NSE 552 [C] or NE 552 [C] )
NSE 667. ADVANCED THERMAL HYDRAULICS
(3). Advanced topics in single- and two-phase hydrodynamics and heat transfer for nuclear reactors. Two-phase flow patterns, flow instabilities, condensation induced transients, convective boiling heat transfer, and current topics in reactor safety thermal hydraulics. Offered alternate years. PREREQS: NSE 567 [C] or NE 567 [C]
NSE 699. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits.
NSE 808. WORKSHOP (1-4). This course is repeatable for a maximum of 16 credits.

## OTHER DECBEES $\varepsilon_{2}$ <br> PROCRAMS WITHIN THE COLLECE OF ENCINEERING

## UNDERGRADUATE MAJORS

 WITH OPTIONS
## INTERNATIONAL STUDIES (BA, HBA)

See International Programs for information on the International Studies undergraduate major.

## Major Code: 910

## SUSTAINABILITY (BS, HBS)

## Also available via Ecampus.

## OSU Main Campus Contact: Ann

Scheerer, 3017B Agricultural and Life Sciences Building, Oregon State University, Corvallis, OR 97331; 541-737-5687; Ann. Scheerer@oregonstate.edu or the Sustainability Double Degree academic advisor, Sus.Advising@oregonstate.edu.
OSU-Cascades Campus Contact: Matt Shinderman, Forest Ecosystems and Society, Oregon State University Cascades; 541-322-3159; matt.shinderman@ osucascades.edu.

## Sustainability Core (17-20)

All Sustainability Majors and Minors must take the five courses that make up the Sustainability Core: SUS 304, SUS 350, an ecological sustainability course (SUS 102 recommended), a social sustainability course (choose one below), and an economic sustainability course (choose one below):
SUS 304. *Sustainability Assessment (4) SUS 350. *Sustainable Communities (4)

## Ecological Dimensions of

## Sustainability (3-4)

Select 3 to 4 credits from the following:
BI 301. *Human Impacts on Ecosystems (3)
SUS 102. *Introduction to Environmental Science and Sustainability (4)

## Social Dimensions of Sustainability

 (3-4)
## Select 3 to 4 credits from the

## following:

SOC 381. Social Dimensions of
Sustainability (4)(Ecampus only)
SOC 480. *Environmental Sociology (4)
SOC 481. *Society and Natural Resources (4)
SOC/FES/ANS/FW 485. *Consensus and
Natural Resources (3)
SUS 420. Social Dimensions of Sustainability (3)(Ecampus, Cascades Campus )

## Economic Dimensions of

Sustainability (3-4)
Select 3 to 4 credits from the

## following:

AEC 250. *Introduction to Environmental Economics and Policy (3)
AEC 351. *Natural Resources Economics and Policy (3)
AEC/ECON 352. *Environmental
Economics and Policy (3)

AEC 434. ${ }^{\wedge}$ Measuring Resource and Environmental Impacts (4)

## Practicum (3-12)

Sustainability majors are required to complete a minimum of 3 Practicum credits. Before registering for a practicum, students must get practicum approved by Sustainability Double Degree advisor. Email: Sus.advising@oregonstate.edu.
SUS 401. Research (3-12)
SUS 410. Internship (3-12)
SUS 499. Special Topics (3-12)
Note: SUS 410 credits may be achieved by participation in an $\mathrm{IE}_{3}$ Global Internship with advisor approval.
Remaining Elective Credits (4-16)
In addition to the required credits specified above, students must work with the sustainability program advisor to select courses relevant to their discipline and career path interests.

## Credits total=36

Classes that can be used to fulfill remaining requirements are listed below. Students are NOT limited to taking courses within their primary major of study. The Sustainability advisor(s) will approve courses not listed here if they have an obvious link to sustainability and fulfill the intent of the double degree. See the OSU Sustainability Office list of sustain-ability-related courses.

## Business

AEC 250. *Introduction to Environmental
Economics and Policy (3)
AEC 253. *Environmental Law, Policy and Economics (4)
AEC 351. *Natural Resource Economics and Policy (3)
AEC/ECON 352. *Environmental
Economics and Policy (3)
AEC 434. ${ }^{\wedge}$ Measuring Resource and
Environmental Impacts (4)
BA 302. Business Process Management (4)
BA 351. Managing Organizations (4)
BA 352. Managing Individual and Team Performance (4)
BA 362. Social Entrepreneurship and Social Initiatives (4)

Major Code: $\mathbf{8 7 0}$
UNDERGRADUATE MINORS

## HUMANITARIAN

## ENGINEERING MINOR

The Humanitarian Engineering minor provides multidisciplinary academic course work for students interested in the application of engineering, science, and technology-based solutions to global development challenges such as access to basic resources (e.g., clean water, clean energy), improved quality of life, and increased ability to earn a livelihood particularly in rural, resource-limited or low-to-middle income settings. A core of course work in humanitarian engineering, science and technology (HEST) is required with an emphasis on engineering as demonstrated by completion of the engineering design class (with engineering prerequisites). Both in the core course work and in the electives, there is an emphasis on context including social, cultural, economic, resource, political, and environmental.
Humanitarian Engineering, Science
and Technology (HEST) Core with
Engineering Emphasis (13)
All humanitarian engineering
students must take (7)
ANTH 482/ANTH 582. *Anthropology of International Development (4)
HEST 411/HEST 511. Engineering
Design For Emergency \& Low-Resource Environments (3)
Select from the following courses, or new HEST courses that will be approved (6):
HEST 310. *Introduction to Community
Engagement and Community-Based Design (3)
HEST 412/HEST 512. *Multidisciplinary
Case Studies in Humanitarian
Engineering, Science and Technology (3)

## Thematic Electives (11-14)

Students will work with their academic advisor/humanitarian engineering advisor to select electives relevant to their interests from the HEST Bacc Core Playlist included at the end of this block. Electives related to HEST outside of the Bacc Core Playlist can be approved on a case-by-case basis based on relevance to HEST and the student's interest in HEST. Case-by-case approvals may be granted,
for example, for non-Bacc core courses in political science, public health, anthropology, sociology, engineering, economics, business, geography or others.

## International or Service Learning

 Component (0-3)Study abroad, HEST 310, internship, Engineers without Borders (EWB) or other service learning/civic engagement as approved by an academic advisor. OSU's Center for Civic Engagement can serve to connect students with service opportunities.
Note on counting credits towards each category: The credits from a single course cannot be applied to satisfy the credit requirements for more than one category (Core, Thematic Electives, International or Service Learning Component). For example, 3 credits of HEST 310 cannot count towards both 11-credit minimum for thematic electives AND 3 credits of service learning. However, 3 credits of HEST 310 could count towards a total of 14 credits thematic electives AND satisfy the service learning requirement at the 0 -credit level. Similarly, 4 credits of ANTH 482 cannot be counted towards the 13 -credit HEST Core and towards the 11-credit minimum of thematic electives.

## Bacc Core Playlist for Thematic Electives

There are two categories of baccalaureate core courses that will count for thematic electives.

1. List I shows courses that are particularly recommended because of the relevance of material and/ or instructor affiliation with the program.
2. List II contains all of the courses that will fulfill thematic elective credits for the minor.

## List I (recommended):

Cultural Diversity
WGSS 280. *Women Worldwide (3)

## Literature and the Arts

ENG 322. *Studies in Globalism, Text, and Event (4)

## Physical Science

WSE 210. *Renewable Materials Technology and Utilization (4)

## Social Processes and Institutions

H 225. *Social and Individual Health Determinants (4)
WGSS 223. *Women: Self and Society (3)

## Western Culture

PHL 205. *Ethics (4)

## Difference, Power, and Discrimination

ENG 220/FILM 220. *Topics in Difference,
Power, and Discrimination (4)
FW 340. *Multicultural Perspectives in Natural Resources (3)

## INTERNATIONAL

## ENGINEERING MINOR

The International Engineering minor offers undergraduate engineering students an opportunity to certify their global competencies and demonstrate their understanding of the intercultural needs of modern engineers. By combining an engineering experience abroad, courses from a generalized global core, thematic elective courses, and the signature course for the minor, students may demonstrate their readiness for the increasingly global field of engineering.

## Requirements

## Global Core (9-12 credits)

Each course in the global core also satisfies a baccalaureate core requirement. Students may complete some of these courses to fulfill their baccalaureate core while also applying those credits to the International Engineering minor if they choose.
ANTH 210. *Comparative Cultures (3)
ANTH 330. *Evolution of People,
Technology, and Society (3)
FW 325. *Global Crises in Resource Ecology (3)

GEOG 105. *Geography of the Non-Western World (3)
PHL 205. *Ethics (4)
PS 205. *Introduction to International Relations (4)

## Engineering Abroad (0-6 credits)

## Study Abroad

International Internship
Service Learning (e.g., EWB)
Thematic Electives (6-15 credits)
Courses related to the location of the abroad experience.

## Signature Course (3 credits)

ENGR 399. Special Topics: Cultural
Competencies for Engineering (3)

## Upper-Division Credits

A minimum of 12 credits in any student's minor must be upper-division courses.

## Total=27+

## Footnotes:

* Baccalaureate Core Course
${ }^{\wedge}$ Writing Intensive Course

## Minor Code: 476

## SUSTAINABILITY MINOR

Available on the Corvallis and OSU-Cascades campuses, and via Ecampus.

## OSU Main Campus Contact: Ann

Scheerer, 3017B Agricultural and Life Sciences Building, Oregon State University, Corvallis, OR 97331; 541-737-5687; Ann. Scheerer@oregonstate.edu or the Sustainability Double Degree academic advisor, Sus.Advising@oregonstate.edu.

OSU-Cascades Campus Con-
tact: Matt Shinderman, Forest Ecosystems and Society, Oregon State University Cascades; 541-322-3159; matt. shinderman@osucascades.edu.

The Sustainability minor includes core sustainability courses (5) and tailored elective courses to expand students' knowledge and experience of their primary major in the context of sustainability principles and frameworks. Courses from a student's major course of study will not count towards minor requirements. Completion of the Sustainability minor requires 27 credits beyond the 180-credit minimum for graduation.

## Sustainability Core (17-20)

All Sustainability students must take (8):
SUS 304. *Sustainability Assessment (4)
SUS 350. *Sustainable Communities (4)

## Social Dimensions of

## Sustainability:

## Select 3 to 4 credits from the

 following:SOC 381. Social Dimensions of Sustainability (4)
SOC 480. *Environmental Sociology (4)
SOC 481. *Society and Natural Resources (4)
SOC 485/ANS 485/FES 485/FW 485.
*Consensus and Natural Resources (3)
SUS 420. Social Dimensions of Sustainability (3)
Ecological Dimensions of Sustainability:

## Select 3 to 4 credits from the

 following:BI 306. *^Environmental Ecology (3)
SUS 102. *Introduction to Environmental Science and Sustainability (4)
Economic Dimensions of
Sustainability:
Select 3 to 4 credits from the following:
AEC 250. *Introduction to Environmental Economics and Policy (3)
AEC/ECON 352. *Environmental Economics and Policy (3)
AEC 434. ${ }^{\wedge}$ Measuring Resource and Environmental Impacts (4)

## Sustainability Individualized Study/

## Elective Credits (7-10)

Students will work with their primary academic advisor and the Sustainability academic advisor to select electives in the theme relevant to their interests for a total of 7-10 credits. Students should discuss with Sustainability advisor to apply elective courses that may not be listed below.
Total Credits=27

## Elective Courses:

## Business

AEC 250. *Introduction to Environmental Economics and Policy (3)
AEC 253. *Environmental Law, Policy and Economics (4)
AEC 351. *Natural Resource Economics and Policy (3)

## ■ ENGINEERING SCIENCE COURSES

ENGR 111. ENGINEERING ORIENTATION I (3). Engineering as a profession, historical development, ethics, curricula and engineering careers. Introduction to problem analysis and solution, data collection, accuracy and variability. Lec/rec.
ENGR 112. INTRODUCTION TO ENGINEERING COMPUTING (3). Systematic approaches to engineering problem solving using computers. Logical analysis, flow charting, input/output design, introductory computer programming and use of engineering software. Lec/lab/rec.

## ENGR 112H. INTRODUCTION TO

ENGINEERING COMPUTING (3). Systematic approaches to engineering problem solving using computers. Logical analysis, flow charting, input/ output design, introductory computer programming and use of engineering software. Lec/lab/rec.
PREREQS: Honors College approval required.
ENGR 199. SPECIAL TOPICS (0-16). Graded $P / N$. This course is repeatable for a maximum of 16 credits.
ENGR 201. ELECTRICAL FUNDAMENTALS I
(3). Analysis of linear circuits. Circuit laws and theorems. DC responses of circuits. Operational amplifier characteristics and applications. Lec/lab. PREREQS: ((MTH 251 [C] or MTH 251H [C] ) and (MTH 252 [C] or MTH 252H [C] )) and sophomore standing in engineering.
ENGR 201H. ELECTRICAL FUNDAMENTALS
I (3). Analysis of linear circuits. Circuit laws and theorems. DC responses of circuits. Operational amplifier characteristics and applications. Lec/lab. PREREQS: (MTH 251 [C] or MTH 251H [C] ) and (MTH 252 [C] or MTH 252 H [C] ) and sophomore standing in engineering. Honors College approval required.
ENGR 202. ELECTRICAL FUNDAMENTALS II
(3). Sinusoidal steady-state analysis and phasors. Application of circuit analysis to solve singlephase and three-phase circuits including power, mutual inductance, transformers and passive filters. Lec/lab. PREREQS: ENGR 201 [C] or ENGR 201H [C]
ENGR 203. ELECTRICAL FUNDAMENTALS
III (3). Laplace transforms, Fourier series, Bode plots, and their application to circuit analysis. PREREQS: (ENGR 201 [C] or ENGR 201H [C] ) and (ENGR 202 [C] or ENGR 202H [C] ) and (MTH 256 [C] or MTH 256 H [C] )
ENGR 211. STATICS (3). Analysis of forces induced in structures and machines by various types of loading. Lec/rec. PREREQS: (MTH 252 [C] or MTH 252 H [C] ) and sophomore standing in engineering.
ENGR 211H. STATICS (3). Analysis of forces induced in structures and machines by various types of loading. Lec/rec. PREREQS: (MTH 252 [C] or MTH 252 H [C] ) and sophomore standing in engineering. Honors College approval required.
ENGR 212. DYNAMICS (3). Kinematics, Newton's laws of motion, and work-energy and impulsemomentum relationships applied to engineering systems. Lec/rec. PREREQS: (ENGR 211 [C] or ENGR 211H [C] ) and (PH 211 [C] or PH 211H [C] )
ENGR 212H. DYNAMICS (3). Kinematics, Newton's laws of motion, and work-energy and impulse-momentum relationships applied to engineering systems. Lec/rec. PREREQS: (ENGR 211 [C] or ENGR 211H [C] ) and (PH 211 [C] or PH 211 H [C] ) and Honors College approval required.
ENGR 213. STRENGTH OF MATERIALS (3).
Properties of structural materials; analysis of stress and deformation in axially loaded members, circular shafts, and beams, and in statically indeterminate systems containing these components. Lec/rec. PREREQS: (ENGR 211 [C]

## or ENGR 211H [C] )

ENGR 213H. STRENGTH OF MATERIALS (3).
Properties of structural materials; analysis of stress and deformation in axially loaded members, circular shafts, and beams, and in statically indeterminate systems containing these components. Lec/rec. PREREQS: (ENGR 211 [C] or ENGR 211 H [C] ) and Honors College approval required.

ENGR 221.THE SCIENCE, ENGINEERING AND SOCIAL IMPACT OF NANOTECHNOLOGY (3).
Nanotechnology is an emerging engineering field that manipulates atoms and molecules to fabricate new materials and tiny devices. Properties of nanostructured materials, manufacturing methods, characterization methods, and impact on health and safety. Benefits and concerns about nanotechnology will be assessed. Lec/rec. CROSSLISTED as MATS 221. PREREQS: One year of college science.
ENGR 231. UNDERSTANDING ENERGY (3).
Provides a basic knowledge of how the many different types of energy, e.g., mechanical, thermal, chemical, nuclear, potential, kinetic, can be compared, how energy can be converted from one form into another for convenient use, storage, or transmission, and how to assess the validity of energy claims by scientists, engineers, manufacturers, marketers, and hucksters.
ENGR 248. ENGINEERING GRAPHICS AND 3-D MODELING (3). Introduction to graphical communication theory, including freehand sketching techniques, geometric construction, multi-view, pictorial, sectional and auxiliary view representation and dimensioning techniques. Practical application of theoretical concepts using solid modeling software to capture design intent and generate engineering drawings. Lec/Lab.
ENGR 299. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits.

## ENGR 299H. SPECIAL TOPICS (0-16). This

 course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.ENGR 321. INTRODUCTION TO MATERIALS
SCIENCE (4). Crystal structure, microstructure, and physical properties of metals, ceramics, polymers, composites, and amorphous materials. Also includes elementary mechanical behavior and phase equilibria. Lec. CROSSLISTED as MATS 321. PREREQS: (CH 202 [C] or CH 222 [C] or CH 224 H [C] or ((CH 232 [C] or CH 232 H [C] ) and (CH 262 [C] or CH 262 H [C] or CH 272 [C] )))
ENGR 321H. INTRODUCTION TO MATERIALS
SCIENCE (4). Crystal structure, microstructure,
and physical properties of metals, ceramics, polymers, composites, and amorphous materials. Also includes elementary mechanical behavior and phase equilibria. Lec. CROSSLISTED as MATS 321. PREREQS: (CH 202 [C] or CH 222 [C] or CH 224 H [C] or ((CH 232 [C] or CH 232 H [C] ) and (CH 262 [C] or CH 262 H [C] or CH 272 [C] ))) and Honors College approval required.
ENGR 322. MECHANICAL PROPERTIES OF MATERIALS (3). Mechanical behavior of materials, relating laboratory test results to material structure, and elements of mechanical analysis. Lec/lab. CROSSLISTED as MATS 322. PREREQS: ((ENGR 213 [C] or ENGR 213H [C] ) and (ENGR 321 [C] or ENGR 321 H [C] or MATS 321 [C] ))
ENGR 350. *SUSTAINABLE ENGINEERING (3).
Examination of technological innovations and alternatives required to maintain human quality of life and environmental sustainability. (Bacc Core Course)
ENGR 350H. *SUSTAINABLE ENGINEERING
(3). Examination of technological innovations and alternatives required to maintain human quality of life and environmental sustainability. (Bacc Core Course) PREREQS: Honors College approval required.

ENGR 352. *CREATIVE COLLABORATION: DESIGNING AND BUILDING (3). Working in multi-disciplinary teams, design, implement, and document a piece of public art work or science museum display. Projects may be made of any media, but must demonstrate creativity both in the engineering used to create them and the technology and society message they convey. (Bacc Core Course) CROSSLISTED as ART 352.

## ENGR 363. *ENERGY MATTERS (3).

Establishes a basic energy vocabulary, applies the fundamental concepts of identifying energy use and determining efficiency, and studies the implications of energy decisions in the context of traditional, alternative, and sustainable energy resources. (Bacc Core Course) PREREQS: MTH 112 or higher
ENGR 363H. *ENERGY MATTERS (3).
Establishes a basic energy vocabulary, applies the fundamental concepts of identifying energy and determining efficiency, and studies the implications of energy decisions in the context of traditional, alternative, and sustainable energy resources. (Bacc Core Course) PREREQS: MTH 112 or higher

## ENGR 390. ENGINEERING ECONOMY (3).

Time value of money; economic study techniques, depreciation, taxes, retirement, and replacement of engineering facilities. PREREQS: Sophomore standing in engineering.
ENGR 391. ENGINEERING ECONOMICS AND PROJECT MANAGEMENT (3). Critical issues in the management of engineering and hightechnology projects are discussed. Economic, time, and performance parameters of engineering projects are analyzed from the organizational and resource perspectives. Network optimization and simulation concepts are introduced. Fundamental engineering economics concepts are introduced and applied to planning and managing projects. PREREQS: Sophomore standing in engineering.

## ENGR 391H. ENGINEERING ECONOMICS AND

 PROJECT MANAGEMENT (3). Critical issues in the management of engineering and hightechnology projects are discussed. Economic, time, and performance parameters of engineering projects are analyzed from the organizational and resource perspectives. Network optimization and simulation concepts are introduced. Fundamental engineering economics concepts are introduced and applied to planning and managing projects. PREREQS: Sophomore standing in engineering. Honors College approval required.ENGR 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
ENGR 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
ENGR 407. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.
ENGR 407H. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

## ENGR 421. APPLIED ROBOTICS (4).

Multidisciplinary teams of students design, build, and demonstrate a robotic system, including all sensing, computation, and actuation. The specific task, such as checkers-playing robots, changes each year, and is designed to be challenging for ambitious students. Robots will compete in a friendly competition at the end of the term. Lec/ lab. PREREQS: College of Engineering students (pro-school or graduate students) or approval of instructor.
ENGR 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
ENGR 499H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
ENGR 521. APPLIED ROBOTICS (4).
Multidisciplinary teams of students design, build, and demonstrate a robotic system, including all sensing, computation, and actuation. The specific task, such as checkers-playing robots, changes each year, and is designed to be challenging for ambitious students. Robots will compete in a friendly competition at the end of the term. Lec/ lab. PREREQS: College of Engineering students (pro-school or graduate students) or approval of instructor.

## ENGR 555. FOUNDATIONS OF ENGINEERING

EDUCATION RESEARCH AND PRACTICE
(3). An examination as to why engineering education is practiced and researched the way that it is through reading, discussion and writing. The focus of the course will be on written and verbal interactions informed by careful reading of assigned texts.
ENGR 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

The College of Forestry at Oregon State University is one of the world's premier education, research, and outreach institutions that focuses on broad areas related to forest resources, terrestrial systems, wood products, ecosystem services, recreation, tourism, and their management.
We provide our graduates with an understanding of the complexity of forests and the economic and social systems that depend upon them; to work with nature to keep land healthy for future generations; to know the science, technology and business associated with managing and using forests and related resources; and to work effectively with others in a culturally diverse, global society.
The OSU College of Forestry has educated students for over 100 years. We offer a breadth of undergraduate and graduate programs that prepare students for a variety of careers in the public and private sectors. Our programs are ranked among the very best in the world. Our world-class faculty and modern facilities, combined with remarkable access to local forests, private industries, public agencies, international travel, and research through paid internships, cooperative education, and mentored work experiences, provide our students with necessary knowledge and skills for fulfilling careers.

## DEGREES AND ACCREDITATIONS

The college offers Bachelor of Science (BS, HBS) degrees in Forest Engineering, Forestry, Natural Resources, Recreation Resource Management, Renewable Materials, and Tourism and Outdoor Leadership; and, in coordination with the College of Engineering, a double degree in Forest EngineeringCivil Engineering.
BS degrees in Forestry, Forest Engineering, and Forest Engineering-Civil Engineering are accredited by the Society of American Foresters (SAF). In addition, the BS degree in Forest Engineering and the BS double degree in Forest Engineering-Civil Engineering are accredited by the Engineering Accreditation Commission of ABET, www.abet.org. The BS degree in Renewable Materials is accredited by the Society of Wood Science and Technology (SWST).
Graduate programs in Sustainable Forest Management, Forest Ecosystems and Society, and Wood Science and Engineering include the Master of Forestry (MF), Master of Science (MS), and Doctor of Philosophy (PhD). Each department also participates in the Master of Arts in Interdisciplinary Studies (MAIS). The college also offers an online-only Master of Natural Resources (MNR) and an online-only graduate certificate in Sustainable Natural Resources (SNR).

## DOUBLE DEGREES

Undergraduates with majors in the College of Forestry also can earn secondary degrees in education, innovation management, international studies, or sustainability. See the College of Education, College of Business, International Programs or College of Agricultural Sciences sections of this catalog for more information.

## MINORS

The college offers minors in Forestry, Recreation Resource Management, Natural Resources, Renewable Materials, and Tourism and Outdoor Leadership.

## HIGH SCHOOL PREPARATION

Students planning to study at Oregon State University should include the following subjects in their high school programs: English, 4 years; mathematics, 3 years; science, 3 years (to include at least one year each of two different sciences-biology, chemistry, physics, etc.); social studies, 3 years; and foreign language, 2 years.

## TRANSFER STUDENTS

Because of the technical and professional nature of the college's curricula, the college reserves the right to determine whether courses taken at another institution satisfy the college's curricular requirements. In general, equivalent college-level courses successfully completed at an accredited college or university are accepted. OSU students requesting a transfer to the College of Forestry must be in good academic standing at the university. Please contact the Head Advisor at 541-737-1592 for additional information.

## ADVISING

The College of Forestry is committed to helping students succeed. Students are required to meet with an advisor each term. Advisors are valuable sources of information about degree programs, mentoring, and other special opportunities in line with students' interests. Advising personnel and the Student Services Office are available to help with university rules and regulations, job placement, exchange programs, and referrals to cross-campus programs and services. Students are encouraged to take an active role in their program planning, and to use their time at OSU to develop themselves both academically and professionally.

The college and the OSU Career Development Center provide up-to-date information for both seasonal and permanent work and offer a full array of career services to prepare undergraduates and graduates for jobs.

## EDUCATION FACILITIES

Richardson Hall contains modern classroom, laboratory, computer, and study facilities that support learning. We also offer a Self-Learning Center where students

## Nicole Kent,

Head Advisor, 541-737-1592, nicole. kent@oregonstate. edu
have access to educational materials, computers, and group study space. Our Wood Innovation Center promotes great relationships between students, employers, and faculty.

Classes use the nearby college forests for field instruction and research projects. In addition to the 11,500 acres in the McDonald-Dunn Forests, the college manages other forests in Oregon for education and research.

The college also makes extensive use of various public and private programs and facilities for student benefit. Numerous field trips to forests, wood processing and manufacturing operations, recreation facilities, and research sites enable students to observe contemporary problems and practices.

Corvallis is one of the largest forestry and wood science research centers in the world. An innovative research program is conducted by the college through its Forest Research Laboratory and by the campus-based Forest Sciences Laboratory of the U.S. Forest Service. These organizations offer state-of-the-art facilities for educational and employment opportunities for superior students.
A Forest Products Collection contains approximately 2,500 species of wood, primarily from North and South America, Southeast Asia, and Africa, while the grounds around the college are planted with an extensive collection of Pacific Northwest trees and shrubs.

## STUDENT ACTIVITIES

Numerous opportunities exist for students to participate in social and academic activities related to forestry and natural resources, sports logging, and international travel. Clubs and student chapters of several professional societies are active in the college, as well as Xi Sigma Pi, a national honorary society to which College of Forestry students may belong. These clubs offer students the chance to develop leadership and teambuilding skills.

## SCHOLARSHIPS

The College of Forestry offers over $\$ 500,000$ in undergraduate scholarships annually. Many scholarships are merit based, and awards range from between $\$ 1,000$ and $\$ 9,000$ per year. Online applications are available at http://undergrad. forestry.oregonstate.edu/student-services/ scholarships and are due February 15 of each year.

Graduate students are commonly supported with teaching and research assistantships, as well as fellowships with awards totaling over $\$ 300,000$ per year. Information is available at http://www. forestry.oregonstate.edu/fellowships.

Scholarships and fellowships are awarded each spring for the following academic year.

## GRADUATION

## Academic Requirements

To earn a bachelor of science degree, a student must complete 180 quarter credits of university-level courses for the Forestry, Natural Resources, Recreation Resource Management, Renewable Materials, and Tourism and Outdoor Leadership programs. 192 quarter credits of university-level courses are required for the BS in Forest Engineering, and 242 credits are required for the double degree in Forest Engineering and Civil Engineering. These curricula include:

- Written and oral communications, 12-13 credits including a senior writing intensive course.
- OSU Baccalaureate Core curriculum.
- Completion of an approved departmental curriculum.
- Students majoring in Recreation Resource Management, Renewable Materials, and Tourism and Outdoor Leadership must earn grades of C- or better in all required forestry courses (with FE, FOR, FES, TOL, WSE course designators or crosslisted courses or approved substitutions for majors, minors, and options). Students majoring in Natural Resources must earn a C- or better in upper-division core or breadth courses.
- Forestry, Forest Engineering, and Forest/Civil Engineering majors must earn grades of C or better in all required forestry courses or approved substitutions for majors, minors, and options.
- No courses used to complete major requirements in Forest Engineering, Forest/Civil Engineering, Forestry, Recreation Resource Management, Tourism and Outdoor Leadership, and Renewable Materials can be taken with S/U grading. Natural Resources majors can take up to two S/U graded courses in their major.
- All undergraduate College of Forestry courses serving as prerequisites for other undergraduate College of Forestry courses must be completed with a grade of $\mathrm{C}, \mathrm{C}-$ or better, depending on the program.
- Approved work experience as noted below.

## PROFESSIONAL AND PERSONAL REQUIREMENTS

Those majoring in Forest Engineering, Forest Engineering-Civil Engineering, Forestry, Recreation Resource Management, and Renewable Materials must complete six months of satisfactory employment in an area related to their major. Forestry students may opt into our Cooperative Education program, which requires two six-month internships with our external partners. Those majoring in Tourism and Outdoor Leadership
must satisfactorily complete a supervised internship.

Students are personally responsible for fulfilling all curricular requirements in proper sequence. Work performance and personal conduct are thoroughly appraised by the college. Since the profession of forestry and natural resources are highly regarded for their ethical and academic standards, students are responsible for observing the Professional Code of Conduct of the college in its entirety. Departure from these ethical requirements may result in dismissal from the college.

Fisheries Management
Forests and Climate Change
Geographic Information Systems
Sustainable Natural Resources Urban Forestry
Water Conflict Management
Wildlife Management
Affiliated Interdisciplinary

## Graduate Major

Applied Economics (MA, MS, PhD) (See Graduate School)

## Graduate Certificates

Forests and Climate Change
Sustainable Natural Resources
Urban Forestry

The faculty, staff, and students in the Department of Forest Ecosystems and Society are dedicated to the discovery and dissemination of knowledge related to the interactions among landscapes, forests, and people. Humans are dependent on forests in many ways. We seek to understand the diversity of benefits derived from forests and expand our knowledge of how forests function to provide those benefits. We provide the expertise needed by scientists, managers, and the general public as they jointly decide how these values can be sustained in the face of climate change, land use pressures and economic uncertainties. We contribute scientific understanding to decisions that lead to sustaining these important values on forestlands in Oregon, in the U.S., and around the globe now and in the future.

The Department of Forest Ecosystems and Society offers a graduate program in Forest Ecosystems and Society. The program includes Master of Forestry (MF), Master of Science (MS), and Doctor of Philosophy (PhD) degrees. The department also offers an online-only Master of Natural Resources (MNR) degree and online-only graduate certificates in Sustainable Natural Resources; Urban Forestry; and Forests and Climate Change.

## RESEARCH

Research in the Department of Forest Ecosystems and Society focuses on fundamental and applied research to help solve complex natural resource challenges. We integrate biophysical and social sciences across scales within natural and managed forest ecosystems. Graduate education emphasizes the ability to define and solve researchable problems and function in interdisciplinary terms. Graduate students are encouraged to participate actively in the department's large, diverse program of seminars, continuing education courses and workshops, international research, and other professional and educational activities.

## FOREST ECOSYSTEMS AND SOCIETY GRADUATE DEGREE PROGRAMS

## The MS and PhD degrees in Forest

 Ecosystems and Society are structured specifically for those interested in careers in resource management, research, teaching, and specialized areas of forest science, social science, and interdisciplinary science. The degrees are available in seven areas of concentration: forest, wildlife and landscape ecology; genetics and physiology; integrated social and ecological systems; the science of conservation, restoration and sustainable management; social science, policy, and natural resources; soil-plant-atmosphere continuum; and sustainable recreation and tourism.The Master of Forestry degree is a non-thesis degree that supports advancement in non-research professional forestry and forestry-related professional positions. The degree emphasizes one of two areas: biology or silviculture. Students in either area prepare for careers as professional forest biologists, silviculturists, or other specialists capable of analyzing opportunities for natural resource management for landowners. This degree typically takes 12-15 months to complete and requires the student work on a capstone project.

The Master of Natural Resources (MNR) degree is offered as a nonthesis option only. Certificates in Sustainable Natural Resources, Urban Forestry, and Forests and Climate Change are available in association with the MNR program. The MNR curriculum facilitates learning by natural resource professionals who work in settings that require crossdisciplinary competency to find solutions to natural resource problems. The MNR is taught entirely online through OSU Ecampus (although it may be possible for some students to work toward the MNR degree while in residence at OSU).

## INTERDISCIPLINARY GRADUATE DEGREE PROGRAMS

The Department of Forest Ecosystems and Society participates in a number of other interdisciplinary graduate degree programs at OSU, including the Master of Arts in Interdisciplinary Studies (MAIS), Master of Environmental Arts and Humanities, PhD in Molecular and Cellular Biology, Environmental Sciences, Water Resources, and Applied Economics.

## UNDERGRADUATE MAJORS WITH OPTIONS

## NATURAL RESOURCES (BS, CRED, HBS)

Also available at OSU-Cascades, Eastern Oregon University, and via Ecampus.

## Undergraduate Major

Natural Resources (BS, HBS) -
An interdisciplinary program offered by the colleges of Forestry, Agricultural Sciences, Science, and Liberal Arts. It is administered by the College of Forestry.
Options
Arid Land Ecology
Conservation and Technology
Ecological Restoration
Fish and Wildlife Conservation
Forest Ecosystems
Human Dimensions in Natural Resources
Individualized Specialty Option
Landscape Analysis
Law Enforcement in Natural Resources
Natural Resource Education
Natural Resource Policy and
Management
Recreation and Tourism Management
Sustainable Agroforestry
Urban Forest Landscapes
Watershed Management
Wildland Fire Ecology

## Minor

Natural Resources
Students who graduate with a BS degree in Natural Resources from OSU should be able to integrate technical field or laboratory skills with analytical skills to solve important natural resource problems. The curriculum is designed to help students acquire knowledge about a range of natural resource issues, work with experts in a variety of resource fields, and deal with social and political aspects of resource management. This program is an interdisciplinary offering supported by the colleges of Agricultural Sciences, Forestry, Liberal Arts, and Science. It is administered by the College of Forestry.

The Natural Resources major is also available at the OSU-Cascades Campus in Bend, the OSU Agricultural Program at Eastern Oregon University, and through the OSU Extended Campus program.

Students acquire knowledge and background in physical and biological systems, math and statistics, natural resource policy, ecology, economics, and decision making. Breadth is acquired in seven key areas of resource management. Finally, students develop depth in their specialty option, choosing from a number of pre-approved options, or creating an individualized specialty option. An option is required to earn the Natural Resources major.

In addition to the baccalaureate core, the three main areas for course work include the natural resources core ( 74 credits), breadth requirements ( 21 credits), and the specialty option ( 40 credits). Within these areas, students have many courses to choose from to fulfill requirements.
Only two courses used to complete the natural resources major requirements may be taken S/U. The Natural Resources Core and Breath will have a minimum GPA of 2.0. The Natural Resources Specialty Option will have a minimum GPA
of 2.25 .
Core and Breadth Requirements for the Natural Resources (BS):
Natural Resources Core (74)

## Animal ID

Choose one course from below:
FW 312. Systematics of Birds (2)
FW 316. Systematics of Fishes (3)
FW 318. Systematics of Mammals (2)
Z 477. Aquatic Entomology (4)

## Atmospheric Science

Choose one course from below:
ATS 201. Climate Science (4)
ATS 320. *The Changing Climate (3)
[Terminated fall 2017]
GEOG 323. ^Climatology (4)

## Biology

BI 101, BI 102, BI 103. *General Biology (4,4,4) or BI 204, BI 205, BI 206. *Introductory Biology I, II, III (4,4,4)
or BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)

## Chemistry

CH 121. General Chemistry (5)
or CH 231. *General Chemistry (4) and
CH 261. *Laboratory for Chemistry 231 (1)

## Communications

Choose one course from below:
ANS/FES/FW/SOC 485. *Consensus and Natural Resources (3)
COMM 321. Introduction to
Communication Theory (3)
COMM 328. Nonverbal Communication (3)
COMM 385. Communication and Culture in Cyberspace (3)
COMM 440. Theories of Conflict and Conflict Management (3)
COMM 442. Bargaining and Negotiation Processes (3)
FES 430. Forest as Classroom (4)
FES 493. Environmental Interpretation (4)
NR 312. Critical Thinking for Natural Resource Challenges (3)

## Earth Science

Choose one course from below:
GEO 101. *The Solid Earth (4)
GEO 201. *Physical Geology (4)
GEO 202. *Earth Systems Science (4)
GEO 221. *Environmental Geology (4)
GEOG 102. *Physical Geography (4)

## Environmental Assessment and Planning <br> Choose one course from below:

FES/FW 445. Ecological Restoration (4)
FES/FW/SOC 485. *Consensus and Natural Resources (3)
FW 435. ^Wildlife in Agricultural
Ecosystems (3)
GEOG 450. Land Use in the American West (3)

PS 449. ^Topics in Comparative Politics (4)
PS 477. International Environmental
Politics and Policy (4)
RNG 421. Wildland Restoration and Ecology (4)
RNG 490. Rangeland Management Planning (4)
SUS 304. *Sustainability Assessment (4) SUS 350. *Sustainable Communities (4)

## General Ecology

Choose one course from below:
BI 370. Ecology (3)
BOT 341. Plant Ecology (4)
FES 240. *Forest Biology (4)
FES 341. Forest Ecology (3)

## GIS

## Choose one course from below:

CROP/HORT 414. Precision Agriculture (4)
FE 257. GIS and Forest Engineering
Applications (3)
FW 303. Survey of Geographic Information
Systems in Natural Resource (3)
GEOG 360. GIScience I: Geographic
Information Systems and Theory (4)

## Managing Natural Resources for

## the Future

NR 201. Managing Natural Resources for the Future (3)
or Seminars-Natural Resources (1)+(1)

## Mathematics

Choose one course from below:
MTH 112. *Elementary Functions (4)
MTH 241. *Calculus for Management and Social Science (4)
MTH 245. *Mathematics for Management,
Life, and Social Sciences (4)
MTH 251. *Differential Calculus (4)

## Measurements

Choose one course from the area most related to student's interests:

## Biological/Physical Science

Choose one course from below:
BI 371. ^Ecological Methods (3)
BOT 440. Field Methods in Plant Ecology (4)

FE 208. Forest Surveying (4)
FOR 321. Forest Mensuration (5)
FW 255. Field Sampling of Fish and Wildlife (3)

GEOG 452. Sustainable Site Planning (3)
RNG 441. Rangeland Analysis (4)

## Social Science

FES 422. Research Methods in Social Science (4)

Natural Resource Decision Making
NR 455. Natural Resource Decision Making (4)

## Natural Resource Policy

Choose one course from below:
AEC 454. Rural Development Economics and Policy (3)
FOR 460. ^Forest Policy (4)
FOR 462. Natural Resource Policy and Law (3)
GEOG 340. *Introduction to Water Science and Policy (3)
PS 475. Environmental Politics and Policy (4)
PS 477. International Environmental
Politics and Policy (4)

## Resource Economics

Choose one course from below:
AEC 351. *Natural Resource Economics and Policy (3)
AEC/ECON 352. *Environmental
Economics and Policy (3)
AEC 454. Rural Development Economics and Policy (3)
FES 432. Economics of Recreation and Tourism (3)
FOR 330. Forest Resource Economics I (4)

## Society and Natural Resources

Choose one course from below:
ANTH 110. *Introduction to Cultural
Anthropology (3)
FES 251. Recreation Resource Management (4)

FES 355. Management for Multiple Resource Values (3)
GEOG 240. *Climate Change, Water and Society (3)

## Soil Science

CSS 205. *Soil Science (4)
or CSS 305. Principles of Soil Science (4)
or SOIL 205. Soil Science (3) [Bacc core course only when taken in conjunction with a laboratory course]
and FOR 206. *Forest Soils Laboratory for SOIL 205 (1) or SOIL 206. *Soil Science Laboratory for SOIL 205 (1)

## Statistics

Choose one course from below:
ST 201. Principles of Statistics (4)
ST 351. Introduction to Statistical Methods (4)

## Vegetation ID

## Choose one course from below:

BOT 321. Plant Systematics (4)
BOT 414. Agrostology (4)
BOT 425. Flora of the Pacific Northwest (3)
FES 241. Dendrology (3)
HORT 226. Landscape Plant Materials I:
Deciduous Hardwoods and Conifers (4)
HORT 228. Landscape Plant Materials II:
Spring Flowering Trees and Shrub (4)
RNG 353. Wildland Plant Identification (4)

## Water Science

## Choose one course from below:

FE 430. Watershed Processes (4)
FW 326. Integrated Watershed Management (3)

OC 201. *Oceanography (4)
OC 332. Coastal Oceanography (3)
RNG 355. Desert Watershed Management (4)
Note: Particular option programs may specify additional core courses to assure that students meet prerequisites for option courses, or develop the background in fields important for the option. Students should not assume that the core courses listed above include all of the necessary background in science or math for every option.

## Breadth (21)

Students must complete one course from each of the following groups:
Fisheries and Wildlife (Choose one)
FES 440. Wildland Fire Ecology (3)
FES/FW 445. Ecological Restoration (4)
FES/FW 452. Biodiversity Conservation in Managed Forests (3)
FOR 346. Topics in Wildland Fire (3)
FW 311. Ornithology (3)
FW 315. Ichthyology (3)
FW 317. Mammalogy (3)
FW 320. Introductory Population Dynamics (4)

FW 321. Applied Community and
Ecosystem Ecology (3)
FW 323. Management Principles of Pacific Salmon in the Northwest (3)

FW 350. *Endangered Species, Society and Sustainability (3)
FW 426. Coastal Ecology and Resource
Management (5)
FW 427. Principles of Wildlife Diseases (4)
FW 435. ${ }^{\wedge}$ Wildlife in Agricultural
Ecosystems (3)
FW 451. Avian Conservation and
Management (3)
FW 454. ^Fishery Biology (4)
FW 458. Mammal Conservation and Management (4)
FW 465. Marine Fisheries (4)
FW 473. Fish Ecology (4)
FW 481. Wildlife Ecology (3)

## Forestry (Choose one)

FE 370. Harvesting Operations (4)
FE/FOR 456. *International Forestry (3)
FES 341. Forest Ecology (3)
FES 342. Forest Types of the Northwest (3)
FES/HORT 350. Urban Forestry (3)
FES 412. Forest Entomology (3)
FES 440. Wildland Fire Ecology (3)
FES/FW 445. Ecological Restoration (4)
FES/FW 452. Biodiversity Conservation in
Managed Forests (3)
FES/NR/RNG 477. *Agroforestry (3)
FOR 346. Topics in Wildland Fire (3)
FOR/BOT 413. Forest Pathology (3)
FOR 436. Wildland Fire Science and Management (4)
FOR 441. Silviculture Principles (4)
FOR 460. ${ }^{\wedge}$ Forest Policy (4)
WSE 470. *Forests, Wood, and Civilization (3)

## Land and Water (Choose one)

FE 430. Watershed Processes (4)
FW 456. Limnology (5)
FW 479. Wetlands and Riparian Ecology (3)
GEO 306. *Minerals, Energy, Water, and the Environment (3)
GEO 307. *National Park Geology and Preservation (3)
GEO 308. *Global Change and Earth
Sciences (3)
GEOG 340. *Introduction to Water Science and Policy (3)
GEOG 440. Water Resources Management in the United States (3)
GEOG 441. International Water Resources Management (3)
RNG 355. Desert Watershed Management (4)

RNG 455. Riparian Ecology and
Management (4)
SOIL 395. *World Soil Resources (3)
SOIL 466. Soil Morphology and Classification (4)
Political Dimensions (Choose one)
AEC 432. Environmental Law (4)
ANS/FES/FW/SOC 485. *Consensus and
Natural Resources (3)
ENT 300/HORT 330. *Plagues, Pests, and Politics (3)
BI 301. *Human Impacts on Ecosystems (3)
FES 351. Outdoor Recreation Management on Public Lands (3)
FES 352. Wilderness Management (3)
FES 365. *Issues in Natural Resources Conservation (3)
FES 454. Managing at the Wildland-Urban Interface (3)
FOR 462. Natural Resource Policy and Law
(3)

FW 325. *Global Crises in Resource Ecology (3)

FW 350. *Endangered Species, Society and Sustainability (3)
GEOG 300. *Sustainability for the Common Good (3)
GEOG 340. *Introduction to Water Science and Policy (3)
GEOG 450. Land Use in the American West (3)

HST 481. *Environmental History of the
United States (4)
PS 449. ${ }^{\wedge}$ Topics in Comparative Politics:
Environmental Politics and Policy (4)
PS 455. *The Politics of Climate Change (4)
PS 475. Environmental Politics and Policy (4)

PS 476. *Science and Politics (4)
PS 477. International Environmental Politics and Policy (4)

## Range (Choose one)

FES 440. Wildland Fire Ecology (3)
FES/FW 445. Ecological Restoration (4)
FES/NR/RNG 477. *Agroforestry (3)
FOR 346. Topics in Wildland Fire (3)
FOR 436. Wildland Fire Science and Management (4)
RNG 341. Rangeland Ecology and Management (3)
RNG 351. Range Ecology I-Grasslands (3)
RNG 352. Range Ecology II-Shrublands (3)
RNG 421. Wildland Restoration and Ecology (4)
RNG 441. Rangeland Analysis (4)
RNG 442. Rangeland-Animal Relations (4)
RNG 490. Rangeland Management Planning (4)
Resource Values/Philosophy (Choose one)
AG 301. *Ecosystem Science of Pacific NW Indians (3)
ANTH 477. Ecological Anthropology (4)
ANTH 481. *Natural Resources and Community Values (3)
ANTH 482. *Anthropology of International Development (4)
FW 340. *Multicultural Perspectives in Natural Resources (3)
GEO 309. *Environmental Justice (3)
GEOG 430. Resilience-Based Natural
Resource Management (3)
HST 481. *Environmental History of the United States (4)
PHL 440. *Environmental Ethics (3)
PHL/REL 443. *World Views and
Environmental Values (3)
Social Issues (Choose one)
ANS/FES/FW/SOC 485. *Consensus and Natural Resources (3)
ANTH 330. *Evolution of People,
Technology, and Society (3)
FE/FOR 459. Forest Management Planning and Design I (4)
FES 351. Outdoor Recreation Management on Public Lands (3)
FES 352. Wilderness Management (3)
FES 353. Nature, Eco, and Adventure Tourism (3)
FES 493. Environmental Interpretation (4)
SOC 360. *Population Trends and Policy (4)
SOC 381. Social Dimensions of Sustainability (4)

SOC 424. Social Psychology (4)
SOC 454. *Leisure and Culture (4)
SOC 456. *Science and Technology in Social Context (4)
SOC 475. Rural Sociology (4)
SOC 480. *Environmental Sociology (4)
SOC 481. *Society and Natural Resources (4)
WGSS 440. *Women and Natural Resources (3)

## Footnotes:

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)
Major Code: 671

## OPTIONS

## ARID LAND ECOLOGY OPTION

The student pursuing this option will develop the skills and knowledge necessary to manage natural resources in the arid lands of western North America.
No more than 24 credits from one department; no more than 20 lowerdivision credits.

## Rangeland Resources (18 credits)

RNG 341. Rangeland Ecology and Management (3)
RNG 352. Range Ecology II-Shrublands (3)
RNG 353. Wildland Plant Identification (4)
RNG 421. Wildland Restoration and
Ecology (4)
RNG 442. Rangeland-Animal Relations (4)
Animals, Plants, Soils, and Ecology ( 23 credits)
BOT 313. Plant Structure (4)
BOT 321. Plant Systematics (4)
BOT 414. Agrostology (4)
FOR 436. Wildland Fire Science and Management (4)
FOR 446. Wildland Fire Ecology (3)
[Terminated winter 2017]
SOIL 466. Soil Morphology and Classification (4)
Additional courses required in Natural Resources Core and Breadth:
RNG 441. Rangeland Analysis (4)
RNG 490. Rangeland Management Planning (4)

## Total=41

Option Code: 669

## CONSERVATION AND <br> TECHNOLOGY OPTION

Available at OSU-Cascades Campus only.
Students will develop the skills necessary to apply natural resources techniques and ecological concepts on the ground and to acquire the knowledge necessary to assist management within both the ecosystem and socio-political components of natural resource management.
Note: This option is designed for the OSU-Cascades Campus. Students utilize course work from the Cascades campus partner institution Central Oregon Community College (COCC). The option may be modified to provide ap-
propriate transfer of courses from other community colleges with forest technology degree programs.
No more than 24 credits from one department; no more than 20 lowerdivision credits.
These courses in the lists below are only available at Central Oregon Community College (COCC): FW 251, FOR 220A, FOR 230A, FOR 230B, FOR 240B.
COCC Course Catalog: http://www.
cocc.edu/admissions/catalog/
Conservation Courses ( 3 courses, 9 credits)
FES 365. *Issues in Natural Resources Conservation (3)
FW 251. Principles of Fish and Wildlife
Conservation (3) [COCC]
FW 325. *Global Crises in Resource Ecology (3)

FW 350. *Endangered Species, Society and Sustainability (3)
Technology Courses (3 courses, 8-9 credits)
BI 371. ^Ecological Methods (3)
FOR 199. Special Studies [Datasets in NR]
(3) [OSU-Cascades]

FOR 220A. Aerial Photo (3) [COCC]
FOR 230A. Map, Compass, and GPS (3)
[COCC]
FOR 230B. Forest Surveying (3) [COCC]
SOIL 408. Workshop [Soil Judging] (1) and NR 499. Special Topics [Field Instruments] (1)
Sustainability ( 1 course, 4 credits)
SUS 350. *Sustainable Communities (4)

## Ecology and Ecosystems

Choose 18-19 credits from the following or electives approved by petition by OSU-Cascades:
ENSC 479. *^Environmental Case Studies (3)
FES 342. Forest Types of the Northwest (3)
FES 444. Ecological Aspects of Park
Management (3)
FES/FW 445. Ecological Restoration (4)
FOR 240B. Wildlife Ecology (3) [COCC]
FW 311. Ornithology (3)
FW 317. Mammalogy (3)
FW 320. Introductory Population Dynamics (4)

FW 326. Integrated Watershed Management (3)

FW 479. Wetlands and Riparian Ecology (3)
FW 481. Wildlife Ecology (4)
GEO 322. Surface Processes (4)
PS 475. Environmental Politics and Policy (4)

RNG 351. Range Ecology I-Grasslands (3)
SOIL 366. Ecosystems of Wildland Soils (3)
Z 349. *Biodiversity: Causes, Consequences and Conservation (3)
Z 477. Aquatic Entomology (4)

## Minimum Total=40

## Footnotes:

* Baccalaureate Core Course (BCC)
${ }^{\wedge}$ Writing Intensive Course (WIC)
Option Code: 688

## ECOLOGICAL RESTORATION

 OPTIONThis option will help students understand complexities associated with restoration of terrestrial and aquatic ecosystems, and how restoration decisions involve significant interactions between ecological and social systems.
No more than 24 credits from one department; no more than 20 lower-division credits.

## Required Courses (28-30 credits)

BI 345. *Introduction to Evolution (3) or PBG 430. Plant Genetics (3)
BOT 321. Plant Systematics (4)
CH 122. *General Chemistry (5)
or CH 232 . *General Chemistry (4) and
CH 262. *Laboratory for Chemistry 232
(1)

FES/FW 445. Ecological Restoration (4)
FOR 436. Wildland Fire Science and Management (4)
FW 479. Wetlands and Riparian Ecology (3)
or RNG 455. Riparian Ecohydrology and Management (4)
GEO 423/GEOG 450. Land Use in the American West (3)
SOIL 466. Soil Morphology and Classification (4) or SOIL 366. Ecosystems of Wildland Soils (3)
Social and Ethical Considerations
Choose one course from below:
PHL 440. Environmental Ethics (3)
PHL 443. *World Views and Environmental Values (3)
SOC 480. *Environmental Sociology (4)
SOC 481. *Society and Natural Resources (4)
Ecological and Natural Resource

## Electives

Choose a minimum of $\mathbf{8}$ credits:
BI 351. Marine Ecology (3)
BI/FW 464. Marine Conservation Biology (3)

BOT 415. Forest Insect and Disease Management (5) [Terminated winter 2017]
BOT 488. Environmental Physiology of Plants (3)
FES/FW 452. Biodiversity Conservation in Managed Forests (3)
FOR 441. Silviculture Principles (4)
FW 320. Introductory Population Dynamics (4)

FW 321. Applied Community and Ecosystem Ecology (3)
FW 426. Coastal Ecology and Resource Management (5) Hatfield Marine Science Center only.
FW 451. Avian Conservation and Management (3)
FW 454. ^Fishery Biology (4)
FW 456. Limnology (5)
FW 458. Mammal Conservation and Management (4)
FW 473. Fish Ecology (4)
FW 481. Wildlife Ecology (4)
RNG 421. Wildland Restoration and Ecology (4)
SOIL 468. Soil Landscape Analysis (4)
Total=39-42

Footnotes:

* Baccalaureate Core Course (BCC)
$\wedge$ Writing Intensive Course (WIC)
Option Code: 663

## FISH AND WILDLIFE

 CONSERVATION OPTIONAlso available on the OSU-Cascades campus and via Ecampus.
This option prepares students for a career in the broad arena of natural resource and wildlife conservation. It emphasizes understanding the relationship between animal species and their habitat requirements and the ability to apply this knowledge to the management of ecosystems as a means of conserving fish and wildlife.

No more than 24 credits from one department; no more than 20 lowerdivision credits.

## Required (23-24 credits)

FES/FW 445. Ecological Restoration (4)
FOR 111. Introduction to Forestry (3)
or FES 342. Forest Types of the Northwest (3)

FOR 346. Topics in Wildland Fire (3) or FES 440. Wildland Fire Ecology (3)
or FOR 436. Wildland Fire Science and
Management (4)
FW 251. Principles of Fish and Wildlife Conservation (3)
FW 323. Management Principles of Pacific Salmon in the Northwest (3) or FW/HSTS 470. *Ecology and History: Landscapes of the Columbia Basin (3) or FW 360. *Origins of F\&W Management-Evolution, Genetics, and Ecology (3)
RNG 341. Rangeland Ecology and Management (3)
RNG 455. Riparian Ecology and Management (4)
Fish and Wildlife Biology
Choose three of the following:
FW 311. Ornithology (3)
FW 315. Ichthyology (3)
FW 317. Mammalogy (3)
FW 320. Introductory Population Dynamics (4)

FW 321. Applied Community and Ecosystem Ecology (3)

## Habitat Management

Choose two of the following:
FW 326. Integrated Watershed Management (3)

FW 435. ^Wildlife in Agricultural
Ecosystems (3)
FW 479. Wetlands and Riparian Ecology (3)
Natural Resources Policy
Choose one of the following:
PS 475. Environmental Politics and Policy (4)
SOC 481. *Society and Natural Resources (4)

## Total=42-44

## Footnotes:

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)
Option Code: 672

## FOREST ECOSYSTEMS OPTION

This option will assist students in understanding the nature of forest ecosystems and the processes by which they function. Course work includes an understanding of the multiple resources and values associated with forest ecosystems and some of the techniques involved in managing them.
Ecological Foundations ( $\mathbf{2 2}$ credits)
FES 341. Forest Ecology (3)
FES 412. Forest Entomology (3)
FES/FW 452. Biodiversity Conservation in
Managed Forests (3)
FOR 346. Topics in Wildland Fire (3)
FOR/BOT 413. Forest Pathology (3)
FOR 441. Silviculture Principles (4)
FW 251. Principles of Fish and Wildlife Conservation (3)

## Ecology Breadth Courses (Choose

## at least 9 credits)

BOT 321. Plant Systematics (4)
BOT 442. Plant Population Ecology (3)
FES/FW 445. Ecological Restoration (4)
FES/NR/RNG 477. *Agroforestry (3)
FOR 436. Wildland Fire Science and
Management (4)
or FES 440. Wildland Fire Ecology (3)
FW 458. Mammal Conservation and
Management (4)
RNG 351. Range Ecology I-Grasslands (3)
RNG 352. Range Ecology II-Shrublands (3)
RNG 455. Riparian Ecology and
Management (4)

## Technical Electives (Choose at least

## 10 credits)

BOT 425. Flora of the Pacific Northwest (3)
FE 208. Forest Surveying (4)
FE 209. Forest Photogrammetry and Remote Sensing (4)
FE 370. Harvesting Operations (4)
FOR 321. Forest Mensuration (5)
ST 352. Introduction to Statistical Methods (4)

Total=41

Option Code: 673

## HUMAN DIMENSIONS IN

 NATURAL RESOURCES OPTIONAlso available via Ecampus.
The student will develop an understanding of the interconnectedness of human behavior and natural resource issues. It includes skills and knowledge to better understand the cultural, social, and philosophical issues associated with natural resources.
No more than 24 credits from one department; no more than 20 lowerdivision credits.

## Ethical Issues

Select 6 credits from the following:
ANTH 110. *Introduction to Cultural Anthropology (3)
BI/FES/TOX 435. *Genes and Chemicals in Agriculture: Value and Risk (3)
PHL 201. *Introduction to Philosophy (4)

PHL 205. *Ethics (4)
PHL 439. Philosophy of Nature (3)
PHL 440. Environmental Ethics (3)
PHL/REL 443. *World Views and
Environmental Values (3)
PHL 470. Philosophy of Science (3)

## Management and Communication

## Issues

Select 13 credits from the following:
AEC 253. *Environmental Law, Policy, and Economics (4)
AEC 351. *Natural Resource Economics and Policy (3)
AEC/ECON 352. *Environmental
Economics and Policy (3)
ANS/FES/FW/SOC 485. *Consensus and Natural Resources (3)
FES 351. Outdoor Recreation Management on Public Lands (3)
FES 352. Wilderness Management (3)
FES 355. Management for Multiple Resource Values (3)
FES 365. *Issues in Natural Resources
Conservation (3) (Ecampus only)
FES 440. Wildland Fire Ecology (3)
FW 251. Principles of Fish and Wildlife Conservation (3)
FW 326. Integrated Watershed Management (3)

NR 202. Natural Resource Problems and Solutions (3)

## Social Issues ( 21 credits)

Required background course
SOC 204. *Introduction to Sociology (3)
Select 18 credits from the following:
AEC 432. Environmental Law (4)
ANTH 477. Ecological Anthropology (4)
ANTH 481. *Natural Resources and
Community Values (3)
FW 340. *Multicultural Perspectives in
Natural Resources (3)
FW 350. *Endangered Species, Society, and Sustainability (3)
GEOG 300. *Sustainability for the Common Good (3)
HST 481. *Environmental History of the United States (4)
PS 475. Environmental Politics and Policy (4)

SOC 360. *Population Trends and Policy (4)
SOC 454. *Leisure and Culture (4)
SOC 456. *Science and Technology in Social Context (4)
SOC 480. *Environmental Sociology (4)
SOC 481. *Society and Natural Resources (4)
SUS 350. *Sustainable Communities (4)
WGSS 440. *Women and Natural Resources (3)

WGSS 450. Ecofeminism (3)
Total=40

Option Code: 675

## INDIVIDUALIZED SPECIALTY <br> OPTION

Natural Resources Specialty Option

## (40 credits)

Incorporated in a student's course of study is the specialty option, 40 credits that support an academic theme related
to natural resources. It is in the specialty option that the student develops depth and a particular focus on natural resources.

## Individualized Specialty Options

If you are interested in creating your own specialty area, discuss this with your advisor as soon as possible. The advisor will be able to guide you in creating an option that works for you and satisfies the program requirements.

Student-designed specialty op-

## tions must:

- contain at least 20 credits of upperdivision courses
- consist of a minimum of 40 credits, encompassing at least three departments, with not more than 24 credits from one department
- have course work that reflects stated knowledge and skill "goals"
- not come close to "duplicating" existing majors

## Option Code: 676

## LANDSCAPE ANALYSIS OPTION

## Also available via Ecampus.

This option prepares students to work with Geographic Information Science technology in a natural resource field such as wildfire ecology, land use planning, ecological restoration, and more. The pairing of the technical skills of GIScience with a disciplinary knowledge in a natural resource area will prepare students for the practical application of technical skills in the real world.

In addition, this specialty option will allow students to earn the GIScience Undergraduate Certificate through the College of Earth, Ocean, and Atmospheric Sciences concurrently with their BS degree through the College of Forestry. The student will apply to the GIS Certificate Program as well as the Natural Resources Program.

Students should contact Kuuipo Walsh, GIScience Certificate Program Director, to enroll in the GIScience Certificate Program. The GIScience Undergraduate Certificate is not currently a stand-alone Ecampus certificate but can be completed online through this option. More information about the certificate program is available here at http://ceoas. oregonstate.edu/giscience/.

No S/U grades are accepted for the GEO courses that are counted for the GIS Certificate.

No more than 24 credits from one department; no more than 20 lowerdivision credits.

## GIScience Required Courses (16 credits) <br> GEOG 201. *Foundations of Geospatial

 Science and GIS (4)GEOG 370. Geovisualization: Cartography (4)

GEOG 480. Remote Sensing I: Principles
and Applications (4)
ST 202. Principles of Statistics (4)
or ST 352. Introduction to Statistical Methods (4)

## GIScience Electives (Choose 7-8

## credits)

CE 413. GIS In Water Resources (3)
ECE 468. Digital Image Processing (3)
FE 209. Forest Photogrammetry and Remote Sensing (4)
FE 310. Forest Route Surveying (4)
FE 423. Unmanned Aircraft System Remote Sensing (3)
FW 303. Survey of Geographic Information
Systems in Natural Resources (3)
GEOG 360. GIScience I: Geographic
Information Systems and Theory (4)
GEOG 361. GIScience II: Analysis and Applications (4)
GEOG 371. Geovisualization: Web Mapping (4)

GEOG 451. Planning Principles and
Practices for Resilient Communities (4)
GEOG 462. GIScience III: Programming for
Geospatial Analysis (4)
GEOG 463. GIS IV: Spatial Modeling (4)
GEOG 464. Geospatial Perspectives on
Intelligence, Security, and Ethics (3)
GEOG 472. Geovisualization: Geovisual Analytics (3)
GEOG 481. Remote Sensing II: Digital
Image Processing (4)
HORT/CROP 414. Precision Agriculture (4)
RNG 430. Applied GIS in Rangeland Science (4)

SOIL 468. Soil Landscape Analysis (4)
ENSC 410. Internship (4)
or FOR 410. Internship (4)
or GEO 410. Internship (4)
or GEOG 410. Internship (4)
Natural Resources Electives (16-17
credits minimum)

- Choose a minimum of 16-17 credits in a disciplinary area related to GIScience to reach a minimum of 40 credits in the option.
- Students will be required to submit an academic plan for completion of the option which will be approved by the Natural Resources Program Director.
The following courses in the NR Core and Breadth are required
prerequisites for courses in this

## option:

NR Core Mathematics Requirement: MTH
112. *Elementary Functions (4)

NR Core Measurements Requirement: FE
208. Forest Surveying (4)

NR Core GIS Requirement: GEOG 360.
GIScience I: Geographic Information Systems and Theory (4) or FE 257. GIS and Forest Engineering Applications (3)

## Minimum Total=40

## Footnotes:

* Baccalaureate Core Course (BCC)
^ Writing Intensive Course (WIC)
Option Code: 689

## LAW ENFORCEMENT NATURAL

## RESOURCES OPTION

The student will develop skills and knowledge necessary to practice natural resource law enforcement.

No more than 24 credits from one department; no more than 20 lowerdivision credits.
COMM 440. Theories of Conflict and Conflict Management (3)
FES 251. Recreation Resource Management (4)

FES/FW 452. Biodiversity Conservation in Managed Forests (3)
FW 251. Principles of Fish and Wildlife Conservation (3)
FW 316. Systematics of Fishes (3)
FW 318. Systematics of Mammals (2)
FW 341. Fish and Wildlife Law Enforcement (2)

FW 458. Mammal Conservation and Management (4)
SOC 204. *Introduction to Sociology (3)

## Choose four of the following classes:

SOC 340. Deviant Behavior and Social

## Control (4)

SOC 440. Juvenile Delinquency (4)
SOC 441. Criminology and Penology (4)
SOC 442. Sociology of Drug Use and Abuse (4)

SOC 448. Law and Society (4)

## Recommended additional train-

ing (not required): Students may
consider attending an approved law enforcement training program.

## Total=41

Option Code: 677

## NATURAL RESOURCE <br> EDUCATION OPTION

This option will prepare students for careers as educators within the broad field of natural resources and to help them learn to bridge the gap in knowledge that exists between experts and others. The focus is on youth or community education that occurs outside of formal school settings. Those interested in becoming K-12 teachers should explore options offered by the College of Education, including their dual degree option.
No more than 24 credits from one department; no more than 20 lowerdivision credits.

## Natural Resource Base (17 credits)

FES 251. Recreation Resource Management (4)

FW 251. Principles of Fish and Wildlife Conservation (3)
RNG 341. Rangeland Ecology and Management (3)
Plus 7 additional credits from AG, FE, FOR, FW, GEO or another area of natural resources.

## Education/Communication <br> Processes ( 23 credits)

ED 216. *Purpose, Structure, and Function of Education in a Democracy (3)
ED 219. Civil Rights and Multicultural Issues in Education (3)

ED 253. Learning Across the Lifespan (3)
FES 493. Environmental Interpretation (4)
or FES 430. Forest as Classroom (4)
SOC 450. Sociology of Education (4)
WR 327. *Technical Writing (3)
Plus 3 upper-division credits in speech communication, education (see especially Teacher and Counselor Education), agriculture education, writing, or an allied communication/education field; supervised internships can be used to meet this requirement, if approved in advance.

Note: Writing I, Writing II, and Speech are required by the baccalaureate core, and may not be used toward the "3 upper-division credits" requirement above. WR 327 must be taken in addition to Writing I, Writing II, and Speech.

## Minimum Total=40

The course below should be taken in the Natural Resources Core: From the Vegetation ID area of the Natural Resources Core:
FES 241. Dendrology (3)
Footnote:

* Baccalaureate Core Course (BCC)

Option Code: 679

## NATURAL RESOURCE POLICY

 AND MANAGEMENT OPTION
## Also available via Ecampus.

This option will prepare students for careers in the broad arena of natural resource and environmental conservation, with an emphasis on the social and political aspects of resource issues.

No more than 24 credits from one department; no more than 20 lowerdivision credits.

## Social Science Foundation

Students must take at least two courses from the following. [PS and SOC are prerequisites for certain upper-division courses]
PHL 201. *Introduction to Philosophy (4)
PS 201. *Introduction to United States
Government and Politics (4)
PSY 201. *General Psychology (3)
or PSY 202. *General Psychology (3)
SOC 204. *Introduction to Sociology (3)

## Social Sciences and Natural

## Resources

Students must take at least three courses from the following, with no more than two from any one department:
AG 301. *Ecosystem Science of Pacific NW Indians (3)
ANS/FES/FW/SOC 485. *Consensus and Natural Resources (3)
COMM 321. Introduction to Communication Theory (3)
FOR 111. Introduction to Forestry (3)
FW 251. Principles of Fish and Wildlife Conservation (3)
FW 323. Management Principles of Pacific Salmon in the Northwest (3)
FW 340. *Multicultural Perspectives in Natural Resources (3)

FW/HSTS 470. *Ecology and History:
Landscapes of the Columbia Basin (3)
GEOG 300. *Sustainability for the Common Good (3)
SOC 360. *Population Trends and Policy (4)
SOC 454. *Leisure and Culture (4)
SOC 456. *Science and Technology in Social Context (4)
SOC 480. *Environmental Sociology (4)
SOC 481. *Society and Natural Resources (4)

## Natural Resource Policy and

Management
Students choose 25 credits from the

## list of courses below.

AEC 253. *Environmental Law, Policy, and Economics (4)
BOT 440. Field Methods in Plant Ecology (4)
ENSC 479. *^Environmental Case Studies (3)
FES 342. Forest Types of the Northwest (3)
FES 352. Wilderness Management (3)
FES 365. *Issues in Natural Resources

## Conservation (3)

FES 440. Wildland Fire Ecology (3)
FES/FW 445. Ecological Restoration (4)
FOR 346. Topics in Wildland Fire (3)
FOR 436. Wildland Fire Science and
Management (4)
FW 303. Survey of Geographic Information Systems in Natural Resources (3)

URBAN FOREST

## LANDSCAPES OPTION

## Available via Ecampus.

This option will help students understand the complexities surrounding the culture and management of urban forest ecosystems. It includes an examination of the economic, social, and environmental benefits and values of trees in urban areas, and the relationship between people and trees.

No more than 24 credits from one department; no more than 20 lowerdivision credits.

## Urban Forest Foundations (22-23

## credits)

FES/HORT 350. Urban Forestry (3)
FES/FW 445. Ecological Restoration (4)
FES/HORT 447. Arboriculture (4)
FES/HORT 455. Urban Forest Planning, Policy and Management (4)
HORT 226. Landscape Plant Materials I: Deciduous Hardwoods and Conifers (4)
HORT 318. ^Applied Ecology of Managed Ecosystems (3)
or HORT 315. Sustainable Landscapes: Maintenance, Conservation, Restore (4)

ANS/FES/FW/SOC 485. *Consensus and
Natural Resources (3)

Option Code: 687
TOURISM, RECREATION, AND ADVENTURE LEADERSHIP (BS, HBS)
Available on the Corvallis and OSU-

## Cascades campuses.

The Bachelor of Science (BS) in Tourism, Recreation and Adventure Leadership (TRAL) explores the importance of tourism and recreation in natural settings for community development, human health and quality of life, and the sustainable use of natural resources. Students will learn about management practices and public preferences to address contemporary tourism, recreation and outdoor leadership opportunities, and issues in natural settings. Studies include decision making within applicable laws and across cultural contexts, as well as communication to a variety of audiences, and successful supervision of employees and volunteers. The TRAL program covers best practices for planning, developing, and managing recreation resources in natural settings. Students learn to evaluate and integrate experiential, economic, biophysical, and social concepts. They
study interaction across natural resources and the consequences of development, management, and marketing decisions.

Completion of an approved option is required for the Tourism, Recreation, and Adventure Leadership degree. Declaration of the option must be done by the end of the sophomore year, or at least six (6) terms prior to graduation. Courses for an option are in addition to the core curriculum. Some courses may require prerequisites not included in the core curriculum.

The following two options are available to Corvallis-based students majoring in TRAL:

1. Outdoor Recreation Management
2. Sustainable Tourism Management

The following two options are available to Cascades-campus students majoring in TRAL:

1. Nature, Eco and Adventure Tourism
2. Adventure Leadership Education

All students pursuing the BS in TRAL must earn grades of $C$ or better in all courses for the major (or approved substitutions).

All students pursuing the BS in TRAL
must complete at least six months of work experience related to the major.

## TRAL Core

## OUTDOOR RECREATION

## MANAGEMENT OPTION

Available only on the Corvallis campus.
Designed for students pursuing careers as outdoor recreation planners and
managers in public land management agencies and non-profit organizations at local, state, and federal levels. Students study land management, the process of permitting, and laws relevant to outdoor recreation. They create monitoring and assessment protocols for recreation resources in natural settings, and they learn to respectfully engage with individuals and groups that may have diverse perspectives and priorities regarding recreation opportunities. Students are trained to facilitate understanding and conflict resolution across these individuals and groups.

## SUSTAINABLE TOURISM

## MANAGEMENT OPTION

## Available only on the Corvallis campus.

Designed for students pursuing careers as tourism destination planners, developers, and marketers in government, non-profit, or the private sector, in both domestic and international locations. This option applies business concepts to tourism, and explains best practices for planning, developing, and managing sustainable nature-based tourism. Students learn to create a business plan, apply business law principles, create marketing strategies, create financial statements, explain land management goals and permit processes. They learn to plan, develop and manage sustainable nature-based tourism in a manner that integrates experiential, economic, biophysical, and social data. They explore the consequences of development of natural resources in domestic and international tourism.

## First Year (7)

FES 251. Recreation Resource Management (4)

NR 201. Managing Natural Resources for the Future (3)
or NR 202. Natural Resource Problems and Solutions (3)
or FOR 111. Introduction to Forestry (3)

## Sophomore Year (11)

ECON 202. *Introduction to
Macroeconomics (4)
FES 354. Communities, Natural Areas, and Sustainable Tourism (3)
ST 202. Principles of Statistics (4)

## Junior Year (17-18)

BA 260 Introduction to Entrepreneurship (4)
FES 485. Consensus and Natural Resources (3)
or FES 360. Collaboration and Conflict Management (3)
GEOG 360. GIScience I: Geographic
Information Systems and Theory (4)
or FE 257. GIS and Forest Engineering
Applications (3)
or FW 303. Survey of Geographic
Information Systems in Natural Resource (3)

GEOG 450. Land Use in the American West (3)

GEOG 451. Planning Principles and
Practices for Resilient Communities (4)

Senior Year (20-22)
AEC 454. Rural Development Economics and Policy (3)
or FES 432. Economics of Recreation and Tourism (3)
BA 432 Environmental Law, Sustainability, and Business (4)
FES 457. Planning for Sustainable Tourism (4)

FOR 460. ${ }^{\wedge}$ Forest Policy (4)
or AG 421. ${ }^{\wedge}$ Leadership Development (3)
or ENSC 479. *^Environmental Case Studies (3)
or TOL 375. ^Experiential Education (4)
GEOG 452. Sustainable Site Planning (3)
PS 477. International Environmental
Politics and Policy (4)
or AEC 432. Environmental Law (4) or FOR 460. ^Forest Policy (4)
or FOR 462. Natural Resource Policy and Law (3)
or TOL 478. Legal Issues in Tourism and Outdoor Leadership (3)

## Total=55-58

Plus additional free electives if necessary to meet university requirement of 180 minimum credits.

Note: FOR 460 is listed in two places but may be counted only once. If se-
lected to meet one requirement then a different class must be selected to meet the other requirement.

## UNDERGRADUATE MINORS

## NATURAL RESOURCES MINOR

Also available at OSU-Cascades and

## via Ecampus.

Students majoring in other programs at OSU can choose to complete the Natural Resources minor. The minor is intended to provide a broad exposure to the natural resources field. It offers course work that integrates a number of natural resource disciplines.
Choose four of the following five courses:
FES 251. Recreation Resource Management (4)

FOR 111. Introduction to Forestry (3)
FW 251. Principles of Fish and Wildlife Conservation (3)
NR 201. Managing Natural Resources for the Future (3)
RNG 341. Rangeland Ecology and Management (3)
One upper-division course from each of the following breadth requirements courses list:
Land and Water (3-5)
Political Dimensions (3-4)
Resource Values/Philosophy (3)
Any additional classes from the breadth
requirements course list to total 28 credits.

## Total=28

Minor Code: 643

## RECREATION RESOURCE

## MANAGEMENT MINOR

Students may elect to earn the Recreation Resource Management minor.
This minor provides basic knowledge about recreation resource planning and management.

## Core

FES 251. Recreation Resource Management (4)

FES 351. Outdoor Recreation Management on Public Lands (3)
FES 352. Wilderness Management (3) or FES 357. Parks and Protected Areas Management (3)
FES 356. Planning for Recreation and Tourism (4)
or FES 456. Planning for Sustainable Recreation (4)
or FES 457. Planning for Sustainable Tourism (4)
FES/ANS/FW/SOC 485. *Consensus and Natural Resources (3)
or FW 340. *Multicultural Perspectives in Natural Resources (3)

## Select 10 credits from below:

FES 353. Nature, Eco, and Adventure Tourism (3)

FES 354. Communities, Natural Areas, and Sustainable Tourism (3)
FES 432. Economics of Recreation and Tourism (3)
or AEC 351. *Natural Resource Economics and Policy (3)
FES/FW 445. Ecological Restoration (4)
FES 493. Environmental Interpretation (4)

## Total=27

## TOURISM AND OUTDOOR

## LEADERSHIP MINOR

The Tourism and Outdoor Leadership program is only available at the OSUCascades Campus. Corvallis Campus students may enroll in the program but will have to attend some courses in Bend. All lower-division courses listed below are Central Oregon Community College courses.

## Lower Division (12 credits)

FOR 255. Resource Interpretation (3) (COCC course)
Plus 9 credits from the following COCC courses:
HHP 253. Wilderness Advanced First Aid (3) or HHP 255. Outdoor Living Skills (3) or HHP 294RC. Teaching Rock Climbing (3)
or HHP 294CC. Challenge Course Practices (3)
or HTRM 233. Event Planning (3)
or HHP 294WG. Whitewater Raft Guiding
(3) (only one of these skills courses can be taken in the minor)
HHP 111. Introduction to Outdoor Leadership (3)
HHP 244. Psychology of Risk and Adventure (3)

HHP 271. Facilitating Group Experiences (3)
HHP 273. Outdoor Recreation Leadership (3)

## Upper Division ( $\mathbf{1 5}$ credits)

TOL 373. Wilderness and Adventure Education (4)
Plus additional credits from other upper-division TOL courses for a total of 15 credits:
TOL 372. Ethics and Adventure Leadership (3)

TOL 375. ^Experiential Education (4)
TOL 377. Expeditions I (4)
TOL 378. Tourism and Recreation Data Analysis (3)
TOL 471. Sustainability in Tourism and Outdoor Leadership (3) [Terminated winter 2017]
TOL 474. Entrepreneurship in Tourism and Outdoor Leadership (3)
TOL 476. Risk Management in Tourism and Outdoor Leadership (3)
TOL 478. Legal Issues in Tourism and Outdoor Leadership (3)
TOL 479. *Nature and the Human Experience (3)
Total=27

## GRADUATE MAJORS

## FOREST ECOSYSTEMS AND SOCIETY (MF, MS, PhD, MAIS)

Graduate Areas of Concentration
Forest biology; forest, wildlife and landscape ecology; genetics and physiology; integrated social and ecological' systems; silviculture; science of conservation, restoration and sustainable management; social science, policy, and natural resources; soil-plant-atmosphere continuum; sustainable recreation and tourism
This graduate program combines a strong social science faculty with a strong biological and ecological science faculty and so provides a rare opportunity to focus on the interface of social science and ecological science. The FES graduate program provides specific disciplinary opportunities in both ecological and social sciences in natural resource settings and also strives to develop interdisciplinary skills and knowledge. Our program objective is to develop interdisciplinary thinkers, highly capable scientists, and natural resource leaders who are prepared to solve complex socio-ecological problems. The students will be able to identify and contribute to collaborative science-based solutions in ecology and natural resourc-es-related social science.

## Master of Forestry (MF) in Forest Ecosystems-Areas of <br> Concentration

1. Forest Biology. Management of natural resources is an increasingly complex and technical undertaking. In some cases, breadth or depth of specialization beyond the BS degree is required or is highly desirable in entry-level professional forestry positions or for advancement in non-research professional forestry positions. The MF in Forest Biology program emphasizes graduate course work in one of five areas of emphasis in forest biology, with supporting work in another area. The program can be completed in 12 months, but it may be extended in accordance with personal needs and the policies of the OSU Graduate School.
2. Silviculture. The MF in Silviculture program provides graduate-level preparation in the full range of disciplines essential for analyzing opportunities, solving problems, and making decisions in silviculture and forest resource management. Graduates from this program must demonstrate competence in the preparation of well-documented silvicultural prescriptions and in the supervision of prescription implementation. The program also provides the
background for sustained career development in forest resource management.

## Master of Science and Doctor

 of Philosophy in Forest Ecosystems and Society-Areas of concentrationMS and PhD students may focus their work in one of these areas of concentration or a hybrid of them: forest, wildlife and landscape ecology; genetics and physiology; integrated social and ecological systems; science of conservation, restoration and sustainable management; social science, policy, and natural resources; soil-plant-atmosphere continuum; sustainable recreation and tourism

1. Forest, Wildlife and Landscape Ecology. The many dimensions of biodiversity are the focus of this area of concentration. Species and communities of species, act, react and interact at many spatial and temporal scales. These dynamics take place in an environment that can change gradually or quite rapidly and that can have a large impact on dynamics through direct and indirect effects on species and interspecific relationships.
2. Genetics and Physiology. This concentration explores the genetic and physiological mechanisms, from the scale of molecules and tissues to whole organisms, populations, and species, that determine how plants grow, reproduce, respond to the environment, and are managed and modified for human benefit.
3. Integrated Social and Ecological Systems. Many issues in the broad natural resources arena are truly interdisciplinary across the biophysical and the social sciences. This area of concentration focuses on the integration of these sciences in developing basic concepts and in resolving management issues.
4. Science of Conservation, Restoration and Sustainable Management. The bases for these applied sciences are found in the more basic biophysical and social sciences but their application to these complex goals generates new scientific challenges. This area of concentration seeks to develop these new scientific understandings.
5. Social Science, Policy, and Natural Resources. This concentration involves exploration of social aspects, human dimensions, and policy aspects of natural resource issues by examining linkages among humans, society, and the natural resources on which humans and society depend.
6. Soil-Plant-Atmosphere Continuum. The movement
of energy and matter within and among ecosystems controls how these systems function and the services they provide. This area of concentration investigates the mechanisms controlling ecosystem behavior over a range of levels from the whole-plant to the globe.
7. Sustainable Recreation and Tourism. This concentration explores social and/or ecological topics in sustainable recreation and tourism including recreation and tourism behavior; social and ecological impacts; and planning, management, and policy.
For more information, contact the head of the department or any faculty member.

## Major Code: 1100

## NATURAL RESOURCES (MNR)

Graduate Areas of Concentration Fisheries management, forests and climate change, geographic information science (GIScience), sustainable natural resources, urban forestry, water conflict management, and wildlife management

## Also available via Ecampus.

The MNR is a 45 -credit online degree program with curriculum organized into three sections: core ( 18 credits), area of emphasis (18 credits), and capstone project ( 9 credits). It is taught entirely online through OSU Ecampus, although some students work toward the MNR degree while inresidence at OSU.

The MNR degree is offered as a nonthesis program with a capstone project, rather than a thesis. The MNR's contemporary content is for natural resource professionals who work in settings that require cross-disciplinary competency to find solutions to natural resource problems. Integration of multiple disciplines occurs through the curriculum, assignments, and a capstone project. All MNR students integrate concepts and approaches developed throughout the entire program in a final capstone project.

## Core Courses

18 credits are required from four thematic areas. These must be courses that are not already being used to satisfy units in the area of emphasis.

## Theme: Overview/Introduction

Select 3 credits from below:
MNR 511. Introduction to Sustainable Natural Resources (3)
WR 525. Advanced Scientific and Technical Writing (4)

## Theme: Ecology/Production

Select 6 credits from below:
BI/FW 564. Marine Conservation Biology (3)
CROP 599. Special Topics in Crop Science
and Social Science (1-3)
FE 530. Watershed Processes (4)
FES 536. Carbon Sequestration in Forests (2)

FES 537. Belowground Ecosystems (3)
FES/FW 545. Ecological Restoration (4) FES/HORT 547. Arboriculture (4)
FES 548. Invasive Plants: Biology, Ecology and Management (3)
FES/BI/TOX/MCB 535. Genes and
Chemicals in Agriculture: Value and Risk (3)

FES/FW 552. Forest Wildlife Habitat
Management (4)
FES 560. Green Infrastructure (4)
FOR 526. Forest Carbon Measurements and
Analysis (4) (pending approval \#97452)
FW 519. The Natural History of Whales and
Whaling (3)
FW 520. Ecology and Management of
Marine Fishes (3)
FW 521. Aquatic Biological Invasions (4)
FW 527. Principles of Wildlife Diseases (4)
FW 531. Dynamics of Marine Biological Resources (4)
FW 535. Wildlife in Agricultural Ecosystems (3)

FW 538. Structured Decision Making in Natural Resource Mgmt Lab (2)
FW 540. Vertebrate Population Dynamics (4)
FW 551. Avian Conservation and
Management (3)
FW 554. Fishery Biology (4)
FW 556. Limnology (5)
FW 558. Mammal Conservation and Management (4)
FW 562. Ecosystem Services (3)
FW 563. Conservation Biology of Wildlife (3)
FW 565. Marine Fisheries (4)
FW/HSTS 570. Ecology and History:
Landscapes of the Columbia Basin (3)
FW 571. Environmental Physiology of Fishes (4)
FW 573. Fish Ecology and Conservation (4)
FW/OC 574. Early Life History of Fishes (4)
FW 575. Wildlife Behavior (4)
FW 576. Fish Physiology (4)
FW 579. Wetlands and Riparian Ecology (3)
FW 580. Stream Ecology (3)
FW 581. Wildlife Ecology (3)
FW 583. Species Recovery Planning and
Restoration (3)
FW 597. Aquaculture (3)
FOR 526. Forest Carbon Measurements and Analysis (4)
MNR 530. Tropical Forest Ecology and Management: A Global Perspective (3)
MNR 538. Adapting Forests to Climate Change (3)
MNR 550. Climate Change Impacts on
Forest Ecosystems (3)
MRM 530. Principles and Practice of Marine
Resource Management (3)
MRM 535. Rights-Based Fisheries
Management (3)
NSE 540. Nuclear Fuel Cycle and Waste
Management (4)
NSE 583. Radiation Biology (3)
NSE 588. Radioecology (3)
OEAS 540. The Biogeochemical Earth (4)
SNR 511. Sustainable Natural Resource Development (1)
SNR 530. Ecological Principles of Sustainable Natural Resources (3)
SNR 531. Sustainable Silviculture and Forest Certification (3)
SNR 532. Planning Agroforestry Projects (2)

SNR 533. Alternative (Nontimber) Forest
Products (2)
SNR 534. Reduced Impact Timber Harvest (2)
SNR 535. Sustainable Management of
Aquatic and Riparian Resources (3)
SNR 540. Global Environmental Change (3)
TOX 555. Ecotoxicology: Aquatic
Ecosystems (3)

## Theme: Human Systems

Select 6 credits from at least 3 of the 5 areas below:

## Economics

AEC 534. Environmental and Resource Economics (3)
AEC/MRM 552. Marine Economics (3)
FES/MNR 500. Market Tools for Managing Greenhouse Gas Emissions (3)
FW 537. Structured Decision Making in Natural Resource Management (2)
SNR 521. Economics of Sustainable Natural Resource Management (3)

## Policy

AEC 532. Environmental law (4)
BA 532. Environmental law, Sustainability, and Business (4)
ES 544. Native American Law: Tribes, Treaties, and the U.S. (4)
FES/HORT 555. Urban Forest Planning,
Policy and Management (4)
FES 565. Urban Forestry Leadership (2)
FW 515. Fisheries and Wildlife Law and Policy (3)
FW 522. Introduction to Ocean Law (3)
FW 620. Ecological Policy (3)
GEO 599. Special Topics (1-3)
GEOG 540. Water Resources Management in the United States (3)
GEOG 541. International Water Resources Management (3)
GEOG 552. Sustainable Site Planning (3)
PS 575. Environmental Politics and Policy (4)

PS 577. International Environmental Politics and Policy (4)
WRP 521. Water Conflict Management and Transformation (3)

## Sociology

ANS/FES/FW/SOC 585. Consensus and
Natural Resources (3)
ANTH 581. Natural Resources and Community Values (4)
FES 554. Managing at the Wildland-Urban Interface (3)
SOC 554. Leisure and Culture (4)
SOC 580. Environmental Sociology (4)
SOC 581. Society and Natural Resources (4)
SNR 520. Social Aspects of Sustainable
Natural Resources (3)

## Ethics

FW 549. History of Fisheries Science (3)
GEOG 564. Geospatial Perspectives on
Intelligence, Security, \& Ethics (4)
PHL 540. Environmental Ethics (3)
PHL/REL 543. World View and
Environmental Values (3)
SNR 522. Basic Beliefs and Ethics in Natural Resources (3)

## Communication

COMM 550. Communication and the
Practice of Science (3)
FES 593. Environmental Interpretation (4)
FW 514. Professional Development:
Meeting Communications (1)

GEO 518. Geosciences Communication (3)

## Theme: Methodology

Select 3 credits from below:
BOT 540. Field Methods in Plant Ecology (4)
CH 590. Computer Programming for Scientists (3)
FW 524. Introduction to Fisheries Assessment (3)
GEOG 560. GIScience I: Introduction to
Geographic Information Science (4)
GEOG 561. GIScience II: Analysis and Applications (4)
GEOG 580. Remote Sensing I: Principles and Applications (4)

## Area of Emphasis (18 credits)

Students may select a certificate listed below or design their own option. A certificate may not be used to satisfy core requirements.
Geographic Information Science (GIScience) Contact: Kuuipo Walsh
Sustainable Natural Resources (SNR)
Contact: Badege Bishaw
Water Conflict Management and
Transformation (WCMT)

Capstone Project (1-9 credits)
Choose one option below:
Option 1: MNR 560. Master's Case Study (1-9)
Option 2: 6-7 credits of MNR plus 2-3 credits from an independent study project that was completed as part of an 18-credit graduate certificate.
Major Code: 2430

## CERTIFICATES

## SUSTAINABLE NATURAL RESOURCES GRADUATE CERTIFICATE

## Available via Ecampus only.

The Sustainable Natural Resources graduate certificate is an 18-credit interdisciplinary program offered online through OSU Extended Campus. Students have a choice among 12 courses designed to build personal and organizational capacity to examine the many aspects of natural resource problems-environmental, economic, and social-in the search for innovative solutions. The courses are organized into three main sections: integration, human dimensions, and ecology and management of sustainable
natural resources. All courses in the certificate program are integrated through a student-designed capstone project that addresses a specific sustainability problem in the student's own organization or region. Throughout the program, students will work with faculty members and other students, and under the guidance of an assigned mentor to design and complete the project.

Traditional university training provides rigor in individual disciplines. However, natural resource problems require synthesis of multiple perspectives and fields of knowledge. In addition, natural resource problems can be international in scope. Globalization clearly reveals how decisions and practices in any part of the world affect natural resources elsewhere and highlights a need for natural resource professionals who can apply multidisciplinary systems-thinking to address these complex issues. The SNR graduate certificate program is designed to meet that need.

By offering this program as an online series of courses, it is possible for people from around the world to participate and to receive their graduate certificate without having to take a leave of absence from their work. The opportunity to collaborate with natural resource managers or graduate students from other regions or countries offers all participants a broader perspective on management issues and potential solutions.

For additional information and advising, contact Badege Bishaw, Program Director, 208 Richardson Hall, Oregon State University, Corvallis, OR 97331; 541-737-9495, badege.bishaw@oregonstate.edu.

More information, including international admissions requirements, may also be found at http://ecampus. oregonstate.edu/online-degrees/graduate/ sustainable-natural-resources/.

## Required courses (12 credits)

SNR 506. Independent Project in Natural Resource Sustainability (2)
SNR 511. Sustainable Natural Resource Development (1)
SNR 520. Social Aspects of Sustainable Natural Resources (3)
SNR 521. Economics of Sustainable Natural Resource Management (3)
SNR 530. Ecological Principles of
Sustainable Natural Resources (3)

## Elective courses ( 6 credits)

Select at least 2 or 3 courses for a minimum 6 credits from below:
SNR 522. Basic Beliefs and Ethics in Natural Resources (3)
SNR 531. Sustainable Silviculture and Forest Certification (3)
SNR 532. Planning Agroforestry Projects (2)
SNR 533. Alternative (Non-Timber) Forest Products (2)
SNR 534. Reduced Impact Timber Harvest (2)

SNR 535. Sustainable Management of
Aquatic and Riparian Resources (3)
SNR 540. Global Environmental Change (3)

## Total=18

Major Code: CG01

## URBAN FORESTRY GRADUATE CERTIFICATE

## Only available via Ecampus.

Urban forestry involves the planning, planting, and management of trees and related vegetation in and around cities. The urban forest is made up of the mosaic of the planted landscape and native forest remnants left behind as cities have developed. Urban forestry is an academic discipline that is related to forestry, horticulture, urban planning, landscape architecture, and land use planning. Urban foresters work in municipal governments, non-profit organizations, other public agencies, and the private sector.
The Graduate Certificate in Urban Forestry helps prepare students for leadership roles in a variety of different urban forestry programs. The course work covers important aspects of program management, policy development, and leadership. The capstone study allows the student to tailor the program to a particular interest within the field.

Students complete 14 required credits, and take one or two elective courses resulting in a combined credits total of between 18 and 20 depending on the electives selected.

## Required Courses (14 credits)

FES 506. Projects: Urban Forestry Capstone (3)

FES/HORT 555. Urban Forest Planning,
Policy, and Management (4)
FES 560. Green Infrastructure (4)
FES 565. Urban Forestry Leadership (2)
SNR 511. Sustainable Natural Resource
Development (1)

## Elective Courses

## Choose one or two courses from the

list below (4-6 credits total):
FES/FW 545. Ecological Restoration (4)
FES/HORT 547. Arboriculture (4)
FES 554. Managing at the Wildland-Urban Interface (3)
FES 585. Consensus and Natural Resources (3)

FES 593. Environmental Interpretation (4)
FW 562. Ecosystem Services (3)
GEOG 551. Planning Principles and
Practices for Resilient Communities (4)
GEOG 560. GIScience I: Introduction to
Geographic Information Science (4)

## Total=18-20

Major Code: CG13

## FORESTS AND CLIMATE CHANGE

## GRADUATE CERTIFICATE

This certificate is delivered primarily by Ecampus though some courses may also be offered on the Corvallis campus.
Forests worldwide have begun to be
impacted by global climate change, and over the coming century, they will be profoundly altered by it. The adaptation of managed forests to climate change may require both silvicultural and genet-ics-based options. Because forests have the capacity to both emit and sequester carbon dioxide, a leading greenhouse gas contributing to climate change, there is tremendous interest in managing forests for the mitigation of climate change. These considerations suggest that a good understanding of the relationship between forests and climate change will be a critical requirement for the sustainable management of forest resources. The Forests and Climate Change (FCC) graduate certificate is designed to provide a thorough grounding in methods for assessing the impacts of climate change on forests, the evaluation of proposed adaptation strategies, and the development of management practices to enhance forest carbon sequestration for the mitigation of climate change.
The Forests and Climate Change graduate certificate is appropriate for many students, especially mid-career, company, industry or agency employees who want more training and experience in natural resources management and climate change.

## Required Core Courses

FES/MNR 500. Market Tools for Managing Greenhouse Gas Emissions (3)
FES 536. Carbon Sequestration in Forests (2)
MNR 538. Adapting Forests to Climate Change (3)
MNR 550. Climate Change Impacts on Forest Ecosystems (3)
SNR 506. Independent Project in Natural Resource Sustainability (2)

## Recommended Electives

FOR 526. Forest Carbon Measurements and Analysis (4) [Pending approval]
SNR 511. Sustainable Natural Resource Development (1)
SNR 530. Ecological Principles of
Sustainable Natural Resources (3)
SNR 540. Global Environmental Change (3)
Additional elective courses will be
considered in consultation with the FCC
Program Director Badege Bishaw.

## Total=19

Major Code: CG15

## - FOREST ECOSYSTEMS AND

 SOCIETY COURSESFES 115. ECOLOGY OF OREGON COAST
FOREST (1). A combination of lecture, lab, and field exercises to explore the ecology and development of Oregon coastal forests. Lec/lab. Graded P/N

FES 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
FES 240. *FOREST BIOLOGY (4). Structure, function, development and biology of forest vegetation and their relationships to forestry and natural resource applications. Field trips required. Lec/lab/rec. (Bacc Core Course)

FES 240H. *FOREST BIOLOGY (4). Structure, function, development and biology of forest vegetation and their relationships to forestry and natural resource applications. Field trips required. Lec/lab/rec. (Bacc Core Course) PREREQS: Honors College approval required.
FES 241. DENDROLOGY (3). Learn to identify the principal forest trees of North America, and the principal trees and shrubs of the Pacific Northwest. Also learn about forested regions of the world. Lec/lab/rec.
FES 242. FOREST PLANTS OF THE PACIFIC NORTHWEST (3). Field course on the identification and ecology of forest trees, shrubs, and herbs of the Pacific Northwest. Overnight camping required. Students should be prepared to hike 3-5 miles per day.

## FES 251. RECREATION RESOURCE

MANAGEMENT (4). Overview of recreation resource management including study of land and water resources used for outdoor recreation. The planning and management of natural and cultural resources for long-term resource productivity, with a focus on rural and wildlife areas of the forest, range and coast.
FES 341. FOREST ECOLOGY (3). Basic physiological characteristics of trees, succession, climax, and related concepts. Vegetation classification. Stand structure, diversity, competition, growth, soils-forests interactions, biomass and nutrient distribution, energy relations, nutrient element dynamics, ecology of disturbances.

## FES 342. FOREST TYPES OF THE

NORTHWEST (3). Forest trees in nature are aggregated into stable or transitory associations known as forest cover types. Knowledge of forest cover types, their species composition and ecology, is applicable to the fields of forestry, fire management, wildlife management, and forest ecology.
FES 350. URBAN FORESTRY (3). Introduction to principles and practices of planting and managing trees as a system of urban environment;
understanding the economic, environmental, social aspects of urban forests, and an overview of contemporary land use issues and societal perspectives between people and plants.
CROSSLISTED as HORT 350. PREREQS:
Foundational forestry and horticulture courses are recommended.

## FES 351. OUTDOOR RECREATION

MANAGEMENT ON PUBLIC LANDS (3).
Explores current issues and problems in outdoor recreation management on public lands and approaches to address these. Emphasis on day-to-day, field-based management of recreation resources, rather than broad-scale planning.

## PREREQS: FES 251 [C-]

FES 352. WILDERNESS MANAGEMENT (3). Wilderness as land use concept. Wilderness history, preservation, planning and management. Wilderness in the context of other land uses.
FES 353. NATURE, ECO, AND ADVENTURE TOURISM (3). Introduces students to natural resource-based tourism issues in both domestic and international contexts. Explores distinctions between nature, eco, and adventure tourism and other forms of tourism, positive and negative impacts, and contemporary issues such as accreditation/certification, and sustainable design.
FES 354. COMMUNITIES, NATURAL AREAS, AND SUSTAINABLE TOURISM (3). Introduces students to macro-level community and regional issues associated with tourism in natural areas. Explores positive and negative community impacts associated with tourism, traditional government-based tourism management and policies; community-based tourism management, and partnerships and stakeholder collaboration. Domestic and international examples are used to illustrate concepts and principles.

FES 355. MANAGEMENT FOR MULTIPLE RESOURCE VALUES (3). Management of a variety of resource attributes in multiple use context, including considerations for recreation, fish, wildlife, aesthetics, watersheds, and forest products. This course is repeatable for a maximum of 6 credits.

FES 357. PARKS AND PROTECTED AREAS
MANAGEMENT (3). Provides a broad yet comprehensive understanding of the theories, problems, and techniques of managing parks, wild and scenic rivers, wilderness, and other protected areas. Covers the evolution of policies and recent issues in management of these protected areas, in the United States and around the world.
FES 360. COLLABORATION AND CONFLICT MANAGEMENT (3). Conflict assessment, negotiation, and consensus building in contentious forest resource situations. Topics addressed include conflict and negotiation theory, collaboration principles, analysis techniques to determine when collaboration might be fruitful, and approaches to joint fact-finding and mutual learning in public and private forest management. Specific cases of real conflicts in forest management will be examined.

FES 365. *ISSUES IN NATURAL RESOURCES
CONSERVATION (3). Background of major current issues in natural resources conservation with emphasis on forests, soils, and water and potential sustainable carrying capacity. Focus on evaluating facts and opinions related to issues. Basics of terrestrial and aquatic ecology, recent and current issues of soil, water, and forest use and management. (Bacc Core Course)
FES 399. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits.
FES 401. RESEARCH AND SCHOLARSHIP
(1-16). This course is repeatable for a maximum of 16 credits.
FES 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
FES 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.
FES 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
FES 410. INTERNSHIP (1-16). Full-time supervised professional experience emphasizing functional proficiency under joint sponsorship of university and agency personnel. Graded P/N. This course is repeatable for a maximum of 16 credits.
FES 412. FOREST ENTOMOLOGY (3). Role of insects in natural and managed forests. Recognition of important forest insect pest groups and species, prediction of forest insect responses to environmental changes, and management strategies and treatments to protect forest resource values. PREREQS: BI 204 [C] or BI 211 [C] or $\mathrm{BI} 211 \mathrm{H}[\mathrm{C}]$ or $\mathrm{BI} 212[\mathrm{C}]$ or $\mathrm{BI} 212 \mathrm{H}[\mathrm{C}]$ and /or equivalent.
FES 422. RESEARCH METHODS IN SOCIAL
SCIENCE (4). An introduction to research methods applied to social science issues and problems. Emphasis is on the nature of the research process, how to conduct research, and how to interpret and disseminate research results. Lec/lab. PREREQS: ST 351 [D-] or ST 351H [D-]
FES 430. FOREST AS CLASSROOM (4).
Investigates instructional methods used to teach K-12 students about natural resources. Reveals how forest exploration can be used as a means to teach others about science, ecology, mathematics, social science, and history. Provides an opportunity for future teachers, naturalists, interpreters, and scientists to improve their teaching and communication skills.
FES 432. ECONOMICS OF RECREATION AND TOURISM (3). Applications of economic theory,
concepts, and methods to outdoor recreation and nature-based tourism resources, projects and plans. Key topics include analyses of economic impacts, benefits and costs, demand and supply, and non-market valuation (e.g., revealed, stated, and benefit transfer methods). PREREQS: (AEC 250 [D-] or ECON 201 [D-] or ECON 202 [D-] ) and (ST 202 [D-] or ST 352 [D-] )

## FES 433. PLANNING AGROFORESTRY

PROJECTS (2). Helps forestry and other natural resource students understand various agroforestry concepts, systems and technologies and practices worldwide. Lays the groundwork for students to identify different systems, characterize socio-economic conditions and plan sustainable agroforestry systems. Class activities examine how biological, economic, and social factors influence agroforestry farming decisions. PREREQS: BOT 341 [D-] and /or equivalent course in ecology.
FES 435. *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK (3). A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSLISTED as BI 435/BI 535, BI 435H, MCB 535, TOX 435/TOX 535, TOX 435H. (Bacc Core Course) PREREQS: One quarter each of biology and chemistry helpful but not essential.

FES 440. WILDLAND FIRE ECOLOGY (3).
Fire histories and ecology of major forest, rangeland, and wetland ecosystems. Includes fire interactions with physical and biotic components of ecosystems, role of fire in ecological processes, and utilization in natural resource management. PREREQS: Junior or senior standing, with course work in ecology and natural resource management.
FES 444. ECOLOGICAL ASPECTS OF PARK MANAGEMENT (3). Ecological principles applied to the management of park recreation uses. The relationship between biological and physical science information and recreation management decisions is explored. CROSSLISTED as TOL 444. PREREQS: (FES 251* or FOR 251*) plus an ecology course.
FES 445. ECOLOGICAL RESTORATION
(4). Fundamentals of restoring and reclaiming disturbed landscapes and ecosystems. Topics to be covered include types and assessment of site conditions; determining restoration goals and feasibility; hydrologic, biotic, and soil functions and their importance in restoration; and measures of successful restoration. Lec/lab/rec. CROSSLISTED as FW 445. PREREQS: BI 370 or BI 370 H , equivalent course work, or instructor approval required
FES 447. ARBORICULTURE (4). The principles and practices of arboriculture, the art and science of selecting, planting, establishing and maintaining trees in urban, suburban, commercial and residential landscapes. Lec/lab. CROSSLISTED as HORT 447. PREREQS: (FES 141 or FES 241 or HORT 226 or HORT 228) and (FOR 111 or HORT 112)

FES 452. BIODIVERSITY CONSERVATION IN MANAGED FORESTS (3). Designed for students in forestry, wildlife, fisheries and related fields. Introduces the concepts of, and approaches to, managing forest stands, landscapes and regions to achieve desired habitat conditions for indicator species and conservation of biological diversity. CROSSLISTED as FW 452. PREREQS: FES 240 or FES 341 or BI 370
FES 454. MANAGING AT THE WILDLANDURBAN INTERFACE (3). Course targets
fire-prone communities where resource professionals need to work cooperatively with ocal and federal agencies and citizens to gain acceptance for fire management programs and build joint responsibility for fuel reduction activities PREREQS: FOR 111 (Not required of Ecampus
students)
FES 455. URBAN FOREST PLANNING, POLICY
AND MANAGEMENT (4). Examination of
planning, policy, and management strategies used in the stewardship of urban natural resources. Fundamentals for developing effective programs to maximize the economic, environmental, and social values and benefits of urban forest landscapes. CROSSLISTED as HORT 455. PREREQS: FES 350 or HORT 350
FES 456. PLANNING FOR SUSTAINABLE
RECREATION (4). Concepts related to the creation and design of outdoor recreation plans. Techniques for collecting data pertaining to visitor experiences and preferences. Recreation planning at several levels, both for public and private lands, with emphasis on larger scale site planning where recreation is integrated with other resource uses. PREREQS: FES 251 [D-]
FES 457. PLANNING FOR SUSTAINABLE TOURISM (4). Examines relationships among tourists, tourism developments, and the planning of tourist attractions and services. Focuses on planning tourist resources and programs within a geographic region, as well as at both the destination and site levels. Planning tools and design concepts are reviewed, analyzed, and applied. PREREQS: FES 251 [C]
FES 477. *AGROFORESTRY (3). Theory and worldwide practice of multiple-crop low input sustainable systems involving concurrent production of tree and agricultural products. Biological, economic, social, and political factors that underlie the application of agroforestry technology. CROSSLISTED as NR 477, RNG 477/RNG 577. (Bacc Core Course) PREREQS: Introductory course in biology.
FES 485. *CONSENSUS AND NATURAL
RESOURCES (3). Students will use a working group approach. They will select a natural resource topic, study the team process and interaction as a method of learning, explore the issue using systems practice, and strive for consensus on solutions to their issue. CROSSLISTED as ANS 485, FW 485/FW 585, SOC 485/SOC 585. (Bacc Core Course)
FES 493. ENVIRONMENTAL INTERPRETATION
(4). Interpretation of natural and cultural features in parks, museums, and similar settings. Emphasis on learning and applying effective communication techniques in the development of brochures, exhibits, talks, museums, and visitor centers.

FES 499. SELECTED TOPICS IN FOREST SCIENCE (0-16). In-depth studies of specific topics within a field of specialization. Examples include biotechnology in forestry, mycorrhizal ecology, tree improvement, landscape ecology, global climatic change in relation to forestry, advanced silviculture prescriptions, agroforestry, and others. This course is repeatable for a maximum of 16 credits.
FES 500. MARKET TOOLS FOR MANAGING GREENHOUSE GAS EMISSIONS (3). Examines the use of market-based approaches to managing greenhouse gas emissions; the role of forestry and natural resource management in mitigating greenhouse gas emissions; and the design of carbon and offset markets in the context of broader climate change policies. CROSSLISTED as MNR 500. PREREQS: MTH 111 or equivalent.
FES 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

FES 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

FES 505. READING AND CONFERENCE (116). Some sections graded $P / N$. This course is repeatable for a maximum of 16 credits.
FES 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
FES 507. SEMINAR (1-16). Some sections
graded A-F. This course is repeatable for a maximum of 16 credits.

FES 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

## FES 511. COMMUNITIES AND NATURAL

RESOURCES (5). Provides students from diverse backgrounds with interdisciplinary, experiential learning exposure to contemporary community and natural resource issues in rural Oregon. Social science concepts are employed to critically appraise current conditions and future prospects for rural, natural resource-dependent communities. This course is repeatable for a maximum of 15 credits.
FES 512. FOREST ENTOMOLOGY (3). Role of insects in natural and managed forests. Recognition of important forest insect pest groups and species, prediction of forest insect responses to environmental changes, and management strategies and treatments to protect forest resource values. PREREQS: BI 204 or BI 211 or Bl 211 H or BI 212 or BI 212 H or equivalent.

FES 520. POSING RESEARCH QUESTIONS (3). Acquaints beginning graduate students in the natural resources to the scientific method and formation of good researchable questions.
The course consists of lectures, readings and discussions. Concepts in the course are reinforced and amplified by discipline-specific companion modules. Students prepare and orally present a researchable question in their area of interest that is critiqued by the class and instructors.
FES 521. NATURAL RESOURCE RESEARCH
PLANNING (3). Research planning and study plan development, investigative procedures, the principles and ethics of natural resource science, principles and practices in scientific communication.
FES 522. RESEARCH METHODS SOCIAL SCIENCE (4). An introduction to research methods applied to social science issues and problems. Emphasis is on the nature of the research process, how to conduct research, and how to interpret and disseminate research results. Lec/lab. CROSSLISTED as MNR 522. PREREQS: Upper-division or graduate level statistics.
FES 523. QUANTITATIVE ANALYSIS IN SOCIAL SCIENCE (4). Application and interpretation of statistical approaches to human dimensions of natural resources, recreation, and other social sciences. Emphasis is on an applied approach focusing on understanding data, selecting appropriate statistics for theoretical and managerial problems, using statistical software for analyses, and interpreting findings. PREREQS: (FES 522 or FOR 522) or equivalent and ST 511 or equivalent. Discuss course equivalency with professor.

FES 524. NATURAL RESOURCES DATA
ANALYSIS (4). Hands-on experience in applied statistical modeling and data analysis for natural resources. Emphasis is on understanding of statistical models and the application and actual implementation of statistical analysis techniques, use of statistical software for analyses (e.g., R), and interpretation of findings. Students analyze data from their own research for final projects. PREREQS: ST 511 [B] and ST 512 [B]
FES 530. FOREST AS CLASSROOM (4). Investigates instructional methods used to teach K-12 students about natural resources. Reveals how forest exploration can be used as a means to teach others about science, ecology, mathematics, social science, and history. Provides an opportunity for future teachers, naturalists, interpreters, and scientists to improve their teaching and communication skills.
FES 533. PLANNING AGROFORESTRY PROJECTS (2). Helps forestry and other natural resource students understand various agroforestry concepts, systems and technologies and practices worldwide. Lays the groundwork for students to identify different systems,
characterize socio-economic conditions and plan sustainable agroforestry systems. Class activities examine how biological, economic, and social factors influence agroforestry farming decisions. PREREQS: BOT 341 and/or equivalent course in ecology.
FES 535. GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK (3). A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSLISTED as B 435/BI 535, BI 435H, MCB 535, TOX 435/TOX 535, TOX 435H. PREREQS: One quarter each of biology and chemistry helpful but not essential.
FES 536. CARBON SEQUESTRATION IN FORESTS (2). Examines processes controlling the sequestration of carbon in the forest system including the forest itself and wood products. Also examines how forests can be managed to sequester carbon as well as the important economic, policy, and other constraints. Lectures readings, discussion, simulation models, and home work will be used to cover the material. PREREQS: Undergraduate-level biology or ecology.
FES 537. BELOWGROUND ECOSYSTEMS (3). Physical and biological components and their interactions in different soil ecosystems with description and examination of the relationships between producers and decomposers in the soil. PREREQS: Undergraduate level Biology or Ecology courses. BS degree in arts, humanities or science.

## FES 538. VALUATION OF NON-MARKET

 RESOURCES (3). Focuses on the theory and methods for estimating the economic value of non-market resources (e.g. clean air and water, biodiversity, nature-based recreation, etc.) Blends the theory and econometrics of nonmarket valuation through hands-on applications of methods with real datasets. The valuation of non-market resources is a burgeoning field within applied economics and should continue to grow in both importance and applications. PREREQS: AREC 512 or ECON 512 or equivalent.FES 540. WILDLAND FIRE ECOLOGY (3). Fire histories and ecology of major forest, rangeland, and wetland ecosystems. Includes fire interactions with physical and biotic components of ecosystems, role of fire in ecological processes, and utilization in natural resource management.
PREREQS: Junior or senior standing, with course work in ecology and natural resource management.

FES 543. ADVANCED SILVICULTURE (3).
The scientific basis of forest regeneration and silvicultural practices and prescriptions in immature and mature stands. Field trips are required. Lec/lab. PREREQS: FOR 442 and FOR 443

FES 545. ECOLOGICAL RESTORATION
(4). Fundamentals of restoring and reclaiming disturbed landscapes and ecosystems. Topics to be covered include types and assessment of site conditions; determining restoration goals and feasibility; hydrologic; biotic, and soil functions and their importance in restoration; and measures of successful restoration. CROSSLISTED as FW 545. PREREQS: BI 370 or BI 370H, equivalent course work, or instructor approval required
FES 546. ADVANCED FOREST COMMUNITY ECOLOGY (4). Fundamental concepts of community including disturbance, diversity and succession. Strong emphasis on field skills and data interpretation. Saturday field trip required Lec/lab.
FES 547. ARBORICULTURE (4). The principles and practices of arboriculture, the art and science of selecting, planting, establishing and maintaining trees in urban, suburban, commercial and residential landscapes. Lec/lab. CROSSLISTED
as HORT 547. PREREQS: (FES 141 or FES 241 or HORT 226 or HORT 228) and (FOR 111 or HORT 112)

FES 548. INVASIVE PLANTS: BIOLOGY,
ECOLOGY AND MANAGEMENT (3). Concepts of plant physiology, genetics and population dynamics are used to understand how plant invasions occur and some communities continue to exist. Management implications are explored.

FES 550. TROPHIC CASCADES (2-3).
Theory and empirical analysis of terrestrial carnivore effects on plants and ecosystems as mediated through herbivores. Emphasis on large carnivores, frequency/strength of trophic cascades, implications for ecosystem function, management, and restoration. Lectures, current literature, discussions, field exercise, term paper and student presentations. CROSSLISTED as FW 550. This course is repeatable for a maximum of 3 credits.

FES 552. FOREST WILDLIFE HABITAT
MANAGEMENT (4). Management of terrestrial vertebrates in forest ecosystems. Effects on silvicultural practices and landscape pattern on habitats and populations. Lec/lab. CROSSLISTED as FW 552. PREREQS: FOR 341 or equivalent course in ecology.

FES 554. MANAGING AT THE WILDLAND-
URBAN INTERFACE (3). Course targets fire-prone communities where resource professionals need to work cooperatively with ocal and federal agencies and citizens to gain acceptance for fire management programs and build joint responsibility for fuel reduction activities PREREQS: FOR 111 (Not required of Ecampus students)
FES 555. URBAN FOREST PLANNING, POLICY AND MANAGEMENT (4). Examination of planning, policy, and management strategies used in the stewardship of urban natural resources. Fundamentals for developing effective programs to maximize the economic, environmental, and social values and benefits of urban forest landscapes. CROSSLISTED as HORT 555. PREREQS: FES 350 or HORT 350 for undergraduates.

FES 558. CONCEPTS OF FOREST
RECREATION PLANNING AND MANAGEMENT (3). Examines research that forms the conceptual basis for tools, techniques, and approaches used in recreation planning and management. PREREQS: Senior or graduate standing.
FES 560. GREEN INFRASTRUCTURE (4).
Explores the relationship between the natural and built environments in cities and examines how planning for and managing green infrastructure assets (such as urban tree canopy, watersheds, and natural areas) increases economic health, community livability and ecological resilience in cities.

FES 561. PHYSIOLOGY OF WOODY PLANTS
(3). The structure, growth and physiological processes of trees and shrubs. PREREQS: ((CH 231 or CH 231 H ) and ( CH 232 or CH 232 H ) and (CH 233 or CH 233 H )) and CH 331 and CH 332 and BOT 331

FES 565. URBAN FORESTRY LEADERSHIP (2).
Examines the application of leadership theories and principles to the decision-making, policy creation, and effective administration of urban forestry programs in the public, private, and nonprofit sectors. Taught via Ecampus only.
FES 577. AGROFORESTRY (3). Theory and worldwide practice of multiple-crop low input sustainable systems involving concurrent production of tree and agricultural products Biological, economic, social, and political factors that underlie the application of agroforestry technology. CROSSLISTED as NR 477, RNG 477/ RNG 577. PREREQS: Any basic ecology course.

FES 580. WRITING SCIENTIFIC MANUSCRIPTS (1). Discussion of parts of a scientific manuscript and the submission, review, and publication
process. Brief presentations and discussion of examples provided by the instructor and students. Students write their own manuscripts and work in teams to provide feedback on manuscript components. PREREQS: Instructor permission required (students must be in the proper stage of their research and writing).

FES 585. CONSENSUS AND NATURAL
RESOURCES (3). Students will use a working group approach. They will select a natural resource topic, study the team process and interaction as a method of learning, explore the issue using systems practice, and strive for consensus on solutions to their issue. CROSSLISTED as ANS 485, FW 485/585, SOC 485/SOC 585.
FES 593. ENVIRONMENTAL INTERPRETATION
(4). Interpretation of natural and cultural features in parks, museums, and similar settings. Emphasis on learning and applying effective communication techniques in the development of brochures, exhibits, talks, museums, and visitor centers.
FES 599. SELECTED TOPICS IN FOREST SCIENCE (1-16). In-depth studies of specific opics within a field of specialization. Examples include biotechnology in forestry, mycorrhizal ecology, tree improvement, landscape ecology, global climatic change in relation to forestry, advanced silviculture prescriptions, agroforestry, and others. This course is repeatable for a maximum of 16 credits.
FES 600. GLOBAL CHANGE ECOLOGY: IMPACTS, MITIGATION, AND ADAPTATION (3). An interdisciplinary discourse on what is known about global change and dynamics of the earth system, including principles of climate, influences on ecosystem functioning and connectivity needed to understand responses of the earth system to human activities.

FES 601. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

FES 603. THESIS (1-16). This course is
repeatable for a maximum of 999 credits.
FES 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.
FES 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
FES 629. TEACHING PRACTICUM IN FOREST SCIENCE (1). Preparation of graduate students in forest science and related disciplines for their first teaching experiences. Using concepts and information introduced in the class, students will develop the curriculum for one credit of collegelevel instruction (or an equivalent approved by the instructor) in a topic of their choice.

FES 646. FOREST ECOSYSTEMS ANALYSIS AND APPLICATION (4). The structure and function of forests and associated streams in natural and managed landscapes; application of ecosystem analysis to policy management decisions; roles of models; scaling from individual processes to ecosystems, landscapes, and beyond. Required classroom discussions, field trip. PREREQS: College-level ecology/biology, chemistry, and math; familiarity with Excel.
FES 699. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## - MASTER OF NATURAL RESOURCES COURSES

MNR 500. MARKET TOOLS FOR MANAGING GREENHOUSE GAS EMISSIONS (3). Examines the use of market-based approaches to managing greenhouse gas emissions; the role of forestry and natural resource management in mitigating greenhouse gas emissions; and the design of carbon and offset markets in the context of broader climate change policies. CROSSLISTED as FES 500. PREREQS: MTH 111 or equivalent.

MNR 511. INTRODUCTION TO SUSTAINABLE NATURAL RESOURCES (3). Overview of economic, environmental, social, cultural, ethical, and policy considerations of sustainable natural resource management. International collaborative efforts to address global natural resource issues. Key policy drivers, key stressors, balancing competing interests. Introductory course required for all Master of Natural Resources students; open to other graduate students. Taught via Ecampus only. PREREQS: Bachelor's degree. Recommended: Undergraduate biology or ecology course.

## MNR 522. RESEARCH METHODS SOCIAL

SCIENCE (4). An introduction to research methods applied to social science issues and problems. Emphasis is on the nature of the research process, how to conduct research, and how to interpret and disseminate research results. Lec/lab. CROSSLISTED an FES 522. PREREQS: Upper-division or graduate level statistics.
MNR 530. TROPICAL FOREST ECOLOGY AND MANAGEMENT: A GLOBAL PERSPECTIVE (3).
Study of tropical forest ecology and the common ecological patterns found within tropical forests. The threats and challenges that tropical forests face in the 21st century and the issues of human use and their impacts. Developing strategies for sustainable management and restoration approaches to alleviate pressure on remaining tropical forests. Taught via Ecampus only.

## MNR 538. ADAPTING FORESTS TO CLIMATE

 CHANGE (3). Climate change is expected to have profound effects on forests. Society can respond by managing in forests in ways that can help mitigate climate change or help forests adapt. Nonetheless, changes in climate and forest responses are uncertain, making management and policy decisions difficult and controversial. We will investigate the effects of climate change on forests, focusing on potential forest management and policy responses.MNR 550. CLIMATE CHANGE IMPACTS ON FOREST ECOSYSTEMS (3). Forest management responses to climate change will rely on understanding the mechanisms of interaction between forests and climate, as well as the capacity to evaluate impacts of future climate scenarios on forests. This course will consider effects of rising CO2 and changing climate at the level of ecophysiological processes, changes in species distribution, changes in disturbance regimes, and ecosystem-level impacts mediated by the water, carbon, and nitrogen cycles. Modeling approaches will include statisticallybased bioclimatic envelopes, and dynamic global vegetation models that treat ecosystem processes and changes in biome distribution. PREREQS: A basic ecology course is highly recommended. Students should have a bachelor's degree in the arts, humanities, or science and preferably at least two years experience working in a natura resources-related field. Students seeking the FCC Graduate Certificate should take SNR 511 their first term because it explains overall certificate program goals.
MNR 560. MASTER'S CASE STUDY (1-9).
Capstone project integrating course work, readings, and assignments to address complex natural resource problems of local or regional importance. Taught via Ecampus only. Graded $\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 9 credits.
NR 201. MANAGING NATURAL RESOURCES
FOR THE FUTURE (3). Overview of the
complexities involved in managing natural resources of the Pacific Northwest. Exposure to major natural resource issues of the region. Development of critical thinking skills useful in seeking solutions.
NR 202. NATURAL RESOURCE PROBLEMS
AND SOLUTIONS (3). Exploration of the multiple components (ecological, social, political, ethical)
of selected natural resource problems. Uses case studies to illustrate how social and biophysical characteristics of environmental problems influence the methods used to try to solve these problems and their potential for success. PREREQS: NR 201 is recommended but not required.

NR 312. CRITICAL THINKING FOR NATURAL RESOURCE CHALLENGES (3). Provides an introduction to critical thinking as it applies to issues and problems in natural resources. Attention is given to formal argument analysis, fallacies of argumentation, and critical scientific and philosophical concepts. PREREQS: Sophomore standing desirable

## NR 325. SCIENTIFIC METHODS FOR

ANALYZING NATURAL RESOURCE
PROBLEMS (3). Approaches to disciplinary and interdisciplinary problem analysis in natural resources. Introduces systems thinking and the benefits and limitations of different tools used to integrate information from multiple disciplines and stakeholders. Applications of alternative analysis tools are illustrated through selected forest-related case studies. Lec/lab. PREREQS: MTH 111 [C-] or Placement Test MPAL(060) and /or (ST 201 or ST 351 or equivalent) and NR 201
NR 351. *WHEN SCIENCE ESCAPES THE LAB:
SCIENCE AND RESOURCE MANAGEMENT
(3). Role of science in solving natural resource problems. Selecting the "best available science." How science is portrayed, filtered, and used by the media and interests groups to affect policy and management. Analysis of case studies on use of science in natural resource decision making. Lec/ lab. (Bacc Core Course) PREREQS: Sophomore standing. NR 312 recommended.

NR 399. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits.

NR 401. RESEARCH AND SCHOLARSHIP (1-
16). This course is repeatable for a maximum of 16 credits.
NR 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
NR 405. READING AND CONFERENCE (1-9). This course is repeatable for a maximum of 18 credits.

NR 406. PROJECTS (1-9). This course is repeatable for a maximum of 16 credits.

NR 407. SEMINAR (1-9). This course is
repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.

NR 410. INTERNSHIP (1-6). This course is repeatable for a maximum of 12 credits.

NR 455. NATURAL RESOURCE DECISION
MAKING (4). Students will participate on collaborative planning teams that effectively engage stakeholders in the decision making process, and offer sound natural resource decisions that are supported by multiple interests. PREREQS: Senior standing.
NR 477. *AGROFORESTRY (3). Theory and worldwide practice of multiple-crop low input sustainable systems involving concurrent production of tree and agricultural products. Biological, economic, social, and political factors that underlie the application of agroforestry technology. CROSSLISTED as FES 477/FES 577, RNG 477/RNG 577. (Bacc Core Course) PREREQS: Introductory course in biology.
NR 499. SPECIAL TOPICS (1-16). This is a hybrid course when offered by Ecampus. This course is repeatable for a maximum of 16 credits.

NR 499H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.

## © SUSTAINABLE NATURAL RESOURCES COURSES

SNR 506. INDEPENDENT PROJECT IN
NATURAL RESOURCE SUSTAINABILITY (2).
Students identify, pose, frame, and analyze the various components of an important natural resource sustainability problem within their country, region, or organization and, at the end of term, present a workplan for its resolution. Oral and written reports are expected. Graded P/N. PREREQS: Admission to SNR Graduate Certificate Program and non-degree/credential seeking students.
SNR 511. SUSTAINABLE NATURAL
RESOURCE DEVELOPMENT (1). Using
readings, class discussions, and field trips, we introduce the program sessions and pedagogical methods, familiarize students with basic working definitions of sustainability, and build capacity to work as group on a common project. PREREQS This is an introduction to the 18-credit Graduate Certificate in Sustainable Natural Resources (SNR) and is also open to other graduate students and non-degree/credential seeking students. For students who have been admitted to the SNR Graduate Certificate Program, this course should be taken during the first term.
SNR 520. SOCIAL ASPECTS OF SUSTAINABLE
NATURAL RESOURCES (3). Using readings, personal experiences, and class discussions, students explore five principles of socially sustainable natural resource management, and review the role they play in creating natural resource-based sustainable communities. PREREQS: Graduate standing. Highly recommended: SNR 511. Recommended: Students should have a bachelor's degree in the arts, humanities, or science and preferably at least two years' experience working in a natural resources-related field. Students seeking the SNR Graduate Certificate should take SNR 511 their first term because it explains overall certificate program goals. There are no prerequisites for non-degree seeking students other than graduate standing. Part of the Sustainable Natural Resources Graduate Certificate program; also open to other graduate students and non-degree/ credential seeking students.
SNR 521. ECONOMICS OF SUSTAINABLE NATURAL RESOURCE MANAGEMENT (3)
Focuses on the sources of market failure, the means of correcting market failure, and the real-world examples of making progress toward sustainable resource use by means of market mechanisms. PREREQS: Recommended: Students should have a bachelor's degree in the arts, humanities, or science and preferably at least two years' experience working in a natura resources-related field. Students seeking the SNR Graduate Certificate should take SNR 511 their first term because it explains overall certificate program goals. There are no prerequisites for non-degree seeking students other than graduate standing. Part of the Sustainable Natural Resources Graduate Certificate program; also open to other graduate students and non-degree/ credential seeking students.

## SNR 522. BASIC BELIEFS AND ETHICS IN

 NATURAL RESOURCES (3). Examines basic philosophies and ethical systems in American forestry, including Pinchot's agricultural/utilitarian approach and Leopold's biotic/ecological model, compares them to contemporary public attitudes and considers their implications for sustainability. PREREQS: Part of SNR Graduate Certificate, and also open to other graduate students and nondegree/credential seeking students.SNR 530. ECOLOGICAL PRINCIPLES OF SUSTAINABLE NATURAL RESOURCES (3). Focus an ecological sustainability and ecological concepts and principles, with examples drawn from forests and arid lands. Exploration of global ecosystems, ecological processes and services, factors that create and maintain
diversity, ecosystem health and integrity. Principles for sustainable natural resource management and use. PREREQS: Graduate standing. Highly recommended: Basic ecology course. Recommended: Students should have a bachelor's degree in the arts, humanities, or science and preferably at least two years' experience working in a natural resourcesrelated field. Students seeking the SNR Graduate Certificate should take SNR 511 their first term because it explains overall certificate program goals. There are no prerequisites for non-degree seeking students other than graduate standing. Part of the Sustainable Natural Resources Graduate Certificate program; also open to other graduate students and non-degree/credential seeking students.

SNR 531. SUSTAINABLE SILVICULTURE AND FOREST CERTIFICATION (3). Strategies for sustainable silviculture, and measuring and verifying environmental performance (including certification systems) are examined using classroom lectures, case studies, and field exercises. Part of the 18-credit Sustainable Natural Resources (SNR) Graduate Certificate; also open to other graduate students. PREREQS: Graduate standing. Recommended: Students should have a bachelor's degree in the arts, humanities, or science and preferably at least two years' experience working in a natural resourcesrelated field. Students seeking the SNR Graduate Certificate should take SNR 511 their first term because it explains overall certificate program goals. There are no prerequisites for non-degree seeking students other than graduate standing. Part of the Sustainable Natural Resources Graduate Certificate program; also open to other graduate students and non-degree/credential seeking students.

SNR 532. PLANNING AGROFORESTRY PROJECTS (2). Develop basic understanding and appreciation of agroforestry concepts, systems, technologies and practices as used and applied in tropical and temperate zones of the world. PREREQS: SNR 530 or equivalent course in ecology and SNR 511 are corequisites. Part of SNR Graduate Certificate; also open to other graduate students and non-degree/credentia seeking students.
SNR 533. ALTERNATIVE (NONTIMBER) FOREST PRODUCTS (2). Explores the economic, environmental, and sociocultural components of understanding and managing alternative forest products, also known as nontimber forest products (NTFPs), while considering other natural/social resources. Part of the 18-credit Sustainable Natural Resources (SNR) Graduate Certificate; also open to other graduate students. PREREQS: Graduate standing. Recommended: Students should have a bachelor's degree in the arts, humanities, or science and preferably at least two years' experience working in a natural resourcesrelated field. Students seeking the SNR Graduate Certificate should take SNR 511 their first term because it explains overall certificate program goals. There are no prerequisites for non-degree seeking students other than graduate standing. Part of the Sustainable Natural Resources Graduate Certificate program; also open to other graduate students and non-degree/credential seeking students.

## SNR 534. REDUCED IMPACT TIMBER

HARVEST (2). Explores planning, implementation, monitoring, and evaluation of reduced impact timber harvesting. Part of the 18-credit Sustainable Natural Resources (SNR) Graduate Certificate; also open to other graduate students. PREREQS: Graduate standing. Recommended: Students should have a bachelor's degree in the arts, humanities, or science and preferably at least two years' experience working in a natural resourcesrelated field. Students seeking the SNR Graduate Certificate should take SNR 511 their first term because it explains overall certificate program goals. There are no prerequisites for non-degree
seeking students other than graduate standing and non-degree/credential seeking students

SNR 535. SUSTAINABLE MANAGEMENT OF AQUATIC AND RIPARIAN RESOURCES (3). Explores integrated strategies for sustainable management of watersheds, estuaries, coastal zones, and aquatic resources. Special emphasis given to links between land uses and aquatic environments. Part of the 18-credit Sustainable Natural Resources (SNR) Graduate Certificate; also open to other graduate students. PREREQS: Graduate standing. Recommended: Students should have a bachelor's degree in the arts, humanities, or science and preferably at least two years' experience working in a natural resourcesrelated field. Students seeking the SNR Graduate Certificate should take SNR 511 their first term because it explains overall certificate program goals. There are no prerequisites for non-degree seeking students other than graduate standing. Part of the Sustainable Natural Resources Graduate Certificate program; also open to other graduate students and non-degree/credential seeking students.

SNR 540. GLOBAL ENVIRONMENTAL CHANGE
(3). Explore biophysical and social sciences that underlie contemporary global change issues: global biogeochemical cycles, climate system, climate change, threats to biodiversity; human dimensions of climate change, globalization, land cover and land use change, global environmental governance and management tools. PREREQS: Graduate standing. Highly recommended: Basic biology course. Recommended: Bachelor's degree in arts, sciences, or humanities; preferably at least two years working in a natural resourcesrelated field. Part of the SNR Graduate Certificate Program; also open to other graduate students and non-degree/credential seeking students

SNR 808. WORKSHOP (1-4). This course is repeatable for a maximum of 4 credits.

## - TOURISM AND OUTDOOR LEADERSHIP COURSES

TOL 130. INTRODUCTION TO OUTDOOR AND ADVENTURE PROFESSIONS (3). Outdoor and adventure professions will be explored. Introduces students to practical and conceptual aspects of land and water trips in outdoor tourism, adventure, and educational settings. Innovative people and products will be examined in the context of outdoor and adventure professions and their impact; past, present, and future.
TOL 132. *FOUNDATIONS AND HISTORY OF OUTDOOR AND ADVENTURE PROFESSIONS (3). History, evolution, and theoretical underpinning of outdoor and adventure professions as an important and evolving feature of Western culture within the United States and beyond. Influential ideas, paradigm shifts, events, and developments that have led to professionalism, institutionalization, dissemination, and impact on other subject areas and professions. Impact of other cultures on current state of the professions. (Bacc Core Course)
TOL 270. PRE-INTERNSHIP SEMINAR
(1). Exploration of career goals, internship opportunities, and the variety of practice areas in the tourism and outdoor leadership (TOL) professions. Student preparation in planning, obtaining, and completing TOL internships. The course is designed to assist undergraduate majors in TOL prepare for the required internship. PREREQS: Tourism and Outdoor Leadership (TOL) majors only.

## OL 370. DESIGN AND MANAGEMENT OF

 OUTDOOR EXPERIENCES (4). Introduction to pedagogical, administrative, and organizational knowledge, skills, and dispositions for effective design and management of effective short and extended duration outdoor experiences in wilderness-like areas. Covers personnel logistics, site planning, itinerary planning, educational and skills progression, communication with volunteersand program contacts, budgets. PREREQS: TOL 375 [D-] and /or similar WIC class, junior standing

TOL 372. ETHICS AND ADVENTURE LEADERSHIP (3). Examines ethical issues and situations inherent in adventure leadership and other experiential education settings. Leading adventure programs entails judgment-laden decisions that are made every hour of every day with regards to participants, leaders, and programs. Students will become familiar with predominant ethical theories and apply these theories to practical situations with a view to assessing the values that influence their decisions and subsequent actions. Students will better understand how their decisions influence their professional work and those of others within the context of adventure leadership. PREREQS: TOL 375 or other writing intensive course

TOL 373. WILDERNESS AND ADVENTURE
EDUCATION (4). Rationale for and methods used in the application of wilderness and outdoor adventure education programs in education, recreation, corporate and human service settings. Covers historical and contemporary philosophies and practices in adventure education, with a primary emphasis on outdoor adventure education. Explores the educational, social, and ethical consequences of outdoor adventure education programs. Also explores the role of wilderness in the context of the United States and differing views of what constitutes wilderness from an international perspective. PREREQS: TOL 375

TOL 375. ^EXPERIENTIAL EDUCATION (4). Theory, techniques, and practice of experiential education. Students will define learning objectives, design curriculum, develop teaching materials and effectively teach a variety of audiences. (Writing Intensive Course)

TOL 377. EXPEDITIONS I (4). Students will research, design, and plan a three- to fourweek extended backcountry expedition. Content includes determination of expedition purpose, length, and location, followed by planning and programming. Includes logistical arrangements, risk management procedures, and required permits. Students will design skill and knowledge progressions for participants. PREREQS: Instructor approval

TOL 378. TOURISM AND RECREATION DATA ANALYSIS (3). Introduce students to descriptive and inferential statistics. The focus is on 1) applying relevant statistical analyses to tourism and recreation data and 2 ) interpreting results. PREREQS: MTH 111
TOL 379. EXPEDITIONS II-LAND (10). Fieldbased course that develops the knowledge, skills, and dispositions needed to safely and effectively lead and participate in an extended land-based backcountry expedition of three weeks or longer. Includes a service component tied to a relevant local organization. PREREQS: TOL 377 [D-] and (HHP 253 (WAFA) or Wilderness First Responder (WFR)) and HHP 111 and HHP 255 and HHP 271 and HHP 273 and (HHP 294WG or HHP 294RC) and instructor approval.
TOL 380. EXPEDITIONS II-WATER (3). Fieldbased course that develops the knowledge, skills, and dispositions needed to safely and effectively lead and participate in an extended water-based backcountry expedition of one week or longer. ncludes a service component tied to a relevant local organization. PREREQS: TOL 377 [D-] and (HHP 253 (WAFA) or Wilderness First Responder (WFR)) and HHP 111 and HHP 255 and HHP 271 and HHP 273 and (HHP 294WG or HHP 294RC) and instructor approval.
TOL 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.
TOL 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
TOL 410. INTERNSHIP (1-16). Full-time supervised professional experience emphasizing
functional proficiency under joint sponsorship of university and agency personnel. Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: FES 251 and FES 351 and FES 356 and FOR 391 and FOR 407-Section 020 are recommended and may be taken concurrently. Departmental approval required.

TOL 474. ENTREPRENEURSHIP IN TOURISM AND OUTDOOR LEADERSHIP (3). Creation and management of tourism and outdoor leadership businesses. Covers principles of running a successful business and includes special considerations for operations on public lands (e.g. concessionaires). PREREQS: BA 101

TOL 476. RISK MANAGEMENT IN TOURISM AND OUTDOOR LEADERSHIP (3). Risk management in tourism and outdoor leadership from an operational perspective. Focuses on risk in tourism and outdoor education programs as a contributing factor for learning, growth, and satisfaction of client motivations. Covers the nature of accidents in outdoor settings, addresses the practitioner's perspective of risk in the field, and describes theories and methods of implementing risk management. Covers the ethics of utilizing risk and potentially dangerous activities as a basis for enhancing client education and experience. PREREQS: TOL 478 [D-]
TOL 477. ADVENTURE THERAPY (3). Provides students with an overview of adventure therapy, including its history, theory, current status and future trends. Includes program design, ethical issues, and best practices in the field.
TOL 478. LEGAL ISSUES IN TOURISM AND OUTDOOR LEADERSHIP (3). Covers the legal dimensions of tourism and outdoor leadership activities. Students will learn about the civil and criminal judicial system from a tourism and outdoor leadership perspective. They will learn to apply risk management methodologies and instruments, such as contracts, insurance, waivers and releases to address legal liability. The basic principles of intentional and negligent torts will be discussed, with an emphasis on practical applications. Also covers employment issues and general business law, including business structure and the use of entities as liability shields. PREREQS: TOL 375 [D-] or FOR 375 [D-]

## TOL 479. *NATURE AND THE HUMAN

EXPERIENCE (3). Examines the human experience with (and within) nature from biological, psychological, spiritual, and international/cultural perspectives. Identifies opportunities for fostering the human-nature connection to achieve organizational goals and individual and societal health. (Bacc Core Course) PREREQS: TOL 375 or other equivalent WIC course.
TOL 499. SPECIAL TOPICS (1-16). Topics of current importance in forest resources issues, education, policies, economics, management, business, social values, silviculture, and biometrics. Topics will change from term to term. May be repeated with different topics for credit. Section 8: Social aspects of natural resource management (3 credits) graded. This course is repeatable for a maximum of 16 credits. PREREQS: Senior or graduate standing.

## FOREST ENCINEERING, RESOURCES AND <br> MAMACEMENT

Claire Montgomery, Professor and Department Head
280 Peavy Hall
Oregon State University
Corvallis, OR 97331-8615

## FACULTY

Professors Bailey, Fitzgerald,
J. Johnson, Landgren, Maguire, Montgomery, Reed, Sessions ${ }^{\mathrm{PE}}$, Temesgen Associate Professors Bennett, Bowers, Chung, Davis, Hatten, Olsen, Parker, Punches, Shaw, Wing ${ }^{\text {cwre, Pe, PIS }}$
Assistant Professors Belart, Bladon, Cushing, Gonzalez-Benecke, Kuusela, LeBoldus, Leshchinsky ${ }^{\text {PE }}$, Segura, Souder, Strimbu
Senior Instructors Huntington, Wimer
Instructors Kiser, Powers
Emeritus D. Adams, P. Adams, Atkinson, Bell, Boyle, Brodie, Brown, Elwood, Fletcher, Garland ${ }^{\mathrm{PE}}$, Hann, Hermann, Hobbs, Kellogg, Murphy, Newton, Olsen, Pyles ${ }^{\mathrm{PE}}$, Skaugset ${ }^{\text {RPF }}$,Tappeiner, Tesch, Walstad

## COURTESY/AFFILIATE FACULTY

Ager, Amisher, Anderson, Argerich, Brungardt, Clark, Danehy, Dombeck, Ferreiro, Fried, Kerns, Gould, Latta, Light, McDonnell, McNassar, Monleon, Moriarty, Sloat, Sobota, Stednick, Strunk, White, Zald, Zamora
cwre Certified Water Right Examiner
${ }^{\text {PE }}$ Registered Professional Engineer in one or more states
${ }^{\text {RPF }}$ Registered Professional Forester in one or more states
${ }^{\text {PLS }}$ Registered Professional Land Surveyor in one or more states

## Undergraduate Majors

Forest Engineering (BS, CRED, HBS)
Forest Engineering-Civil Engineering
(Two BS degrees) (BS, CRED, HBS)
Forestry (BS, HBS)

## Options

Forest Management
Forest Operations Management
Forest Restoration and Fire
Undergraduate Minor
Forestry

## Graduate Major

Sustainable Forest Management (MF, MS, PhD)
Graduate Areas of Concentration Engineering for Sustainable Forestry
Forest Biometrics and Geomatics

Forest Operations Planning and Management
Forest Policy Analysis and Economics
Forest Soil and Watershed Processes
Silviculture, Fire, and Forest Health

## Affiliated Interdisciplinary <br> Graduate Major

Applied Economics (MA, MS, PhD) (See
Graduate School)
Water Resources Engineering
Water Resources Policy and Management
Water Resources Science

## Graduate Minor

Sustainable Forest Management
The mission of the Department of Forest Engineering, Resources and Management (FERM) is to develop, communicate, and teach the science, knowledge and engineering necessary for the sustainable management of forest, land, and water resources to achieve economic, environmental, and social objectives. Teaching and research focus on support and enhancement of active forest management across the full range of owner objectives, from ecosystem restoration to timber production. FERM includes biologists, engineers, economists, biometricians, hydrologists, silviculturists and applied ecologists.
The Department of Forest Engineering, Resources and Management offers undergraduate degree programs leading to professional practice in forestry and forest engineering. It also offers more broadly defined graduate programs at the master's and doctorate levels in Sustainable Forest Management, including six areas of concentration.

## FORESTRY <br> UNDERGRADUATE PROGRAM

The forest management profession requires an understanding of natural resource systems and the management of forest resources for multiple uses. The Bachelor of Science (BS) degree in Forestry provides a broad-based education with the goal of preparing students to be successful forest managers. Graduates must understand biological and physical processes occurring in forests, the social and economic forces that influence policies and actions affecting forests, natural resource systems, and management of forest resources for multiple uses. Students also learn how values affect forest management planning so they can communicate effectively with others and make relevant decisions.
The core curriculum provides a broadbased education which includes basic courses in the biological, physical, social sciences, as well as professional courses designed to prepare students to manage forest resources. The Forestry BS also re-
quires six months of relevant work experience intended to provide the enhanced understanding of the professional workplace. Students are required to select one of three options and serves to fulfill the 180 credits for graduation:

## - Forest Management

- Forest Operations

## Management

- Forest Restoration and Fire

Graduates are employed by private and public organizations. The private sector includes the timber and forest products industry, forestry consulting firms, environmental organizations, and selfemployment. Public employers include federal, state, and local government agencies such as the U.S. Forest Service, Bureau of Land Management, National Park Service, and state departments of forestry and natural resources.

The Bachelor of Science degree in Forestry is accredited by the Society of American Foresters.

## FOREST ENGINEERING

UNDERGRADUATE PROGRAM
The Forest Engineering Undergraduate Program provides an engineering education within a strong forestry context. The program is founded on fundamental principles of forest science and engineering science. Forest Engineering program objectives are to prepare graduates to plan and implement complex forestry and natural resource operations that help meet global demands for wood products while sustaining water, habitat, and other forest resources. It provides "work-ready" graduates for entry into the diverse professional field of forest engineering. Early career accomplishments include harvest unit design, forest road location and design, contract inspection and administration, cost analysis, and forest transportation management. Mid-career accomplishments commonly expand to involve aspects of engineering management, including planning and budgeting, supervision, wood supply procurement, harvest and road design reviews, and scheduling and controlling forest operations.

Specifically, the Forest Engineering Undergraduate Program provides fundamental coverage of the following:

- Fundamental engineering and forestry principles
- Physical and biological aspects of soil and water resources
- Surveying and measurement of land and forest resources
- Analysis and design of the forest transportation system
- Analysis and design of harvesting operations
- Economics and operational planning principles
Integration of these topics enables forest engineering graduates to develop
and manage safe, economical, and environmentally sound forest operations. Design experiences that integrate the topics listed above and steadily build on previous course material are distributed throughout the upper-division portion of the program. The Forest Engineering capstone sequence during the senior year provides an opportunity for students to bring together all the topics from the curriculum in a project framework that includes the field and office engineering tasks associated with the planning and design of forest operations. The capstone sequence is integrated with the Forestry capstone sequence to provide realistic interdisciplinary planning and design experience.

Forest engineering graduates are employed by private forestry firms, public forestry agencies, logging and construction companies, engineering consulting firms, and surveying firms. Some graduates establish their own consulting businesses after a few years of field experience. Career progression following graduation can be quite varied. Some graduates gravitate toward technical positions while others move quickly toward management of harvesting and other forest operations, or more broadly defined management of the forest land base.

The Bachelor of Science degree in Forest Engineering can be earned through completion of the Forest Engineering program or the Forest Engineering-Civil Engineering double degree program. The BS degree in Forest Engineering is accredited by the Engineering Accreditation Commission of ABET, http://www. abet.org/.

The BS in Forest Engineering is also accredited by the Society of American Foresters.

Completion of the five-year, doubledegree Forest Engineering-Civil Engineering program results in a BS in Forest Engineering and a BS in Civil Engineering, offered by the School of Civil and Construction Engineering. The BS in Civil Engineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org/.

Forest engineering is a licensed profession in the state of Oregon. The BS in Forest Engineering meets the administrative rules established by the Oregon State Board of Examiners for Engineering and Land Surveying (OSBEELS) as evidence of adequate preparation for the Fundamentals of Engineering Examination, the first of two examinations required for professional engineering licensing. The BS in Forest Engineering, with the completion of appropriate program electives, also meets the OSBEELS administrative rules for evidence of adequate preparation for the Fundamentals of Land Surveying Examination, the first of two examinations
required for professional land surveyor licensing.

## UNDERGRADUATE MAJORS WITH OPTIONS

## FOREST ENGINEERING

(BS, CRED, HBS)
The BS degree in Forest Engineering is offered through a four-year resident curriculum and as part of a five-year double degree program from which graduates receive two bachelor of science degrees, one in forest engineering and one in civil engineering. The BS degree in Forest Engineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. The BS degree in Forest Engineering is also accredited by the Society of American Foresters. The double degree program is offered in cooperation with the School of Civil and Construction Engineering. Curricula for the double degree program is listed under a separate heading. Both programs begin with basic science and mathematics, progress on through engineering science and forest science, to arrive at profession-al-level courses in forest engineering that include surveying, soil and water resources, timber harvesting, operations analysis, road design, and planning. Graduates are eligible to take the Fundamentals of Engineering Examination.

In addition to the listed courses, all students are required to complete a total of six months of satisfactory employment in an area related to their major. This is usually accomplished by two or more summers of work, but it may include work during the academic year. Work performance and personal conduct are thoroughly appraised by the College of Forestry.

## PRE-PROFESSIONAL FOREST ENGINEERING PROGRAM

Admission to the pre-professional program requires that students be admitted as a degree-seeking undergraduate or post-baccalaureate level student at Oregon State University. Courses included in the first and sophomore years comprise a pre-professional program of study that produces a solid foundation for professional program studies at the junior, senior, and advanced degree levels. The pre-professional program may be taken at Oregon State University or at any accredited college or university that offers equivalent courses transferable to OSU in conjunction with foundation forestry available via OSU Ecampus.

## PROFESSIONAL FOREST ENGINEERING PROGRAM

Students must be admitted to the professional Forest Engineering program following completion of the pre-professional forest engineering course work in order
to progress to the junior year in forest engineering. Students in the double degree program also must be admitted to the College of Engineering professional program following completion of the pre-engineering course work.

Enrollment in professional program courses is restricted to those students who have clearly demonstrated an ability to achieve the standards required for professional studies. The number of students admitted to the program is based on available resources. Students meeting the minimum pre-forest engineering GPA of 2.25 may or may not be admitted depending on available resources.

Admission to the professional program will be granted for students meeting the admission requirements prior to fall term of the junior year. Application for the professional program will be made as of the end of winter term for the following fall term. For admission, students must earn:

1. a grade of " C " or better is required in all courses for the major (marked E on course list). Grade repeat (replacement) policy will follow OSU Academic Regulation 20.
2. a minimum GPA of 2.25 in all courses required for the major.
Students who have completed their pre-professional studies at a college or university other than Oregon State University must apply both to the OSU Office of Admissions for admission to OSU as a degree-seeking undergraduate or post-baccalaureate level student and to the College of Forestry for admission to the professional program. Application forms for the Forest Engineering professional program and information on policies and programs are available from the College of Forestry.

Students who have not satisfactorily completed all of the pre-professional courses when they apply may be provisionally accepted. Final acceptance is contingent on completion of any remaining pre-professional course work with grade of " C " or better by the end of the summer term prior to entrance into the professional program. Students who receive provisional acceptance and then fail to attain a grade of "C" or better in remaining pre-professional course work prior to the beginning of fall term will be re-directed to the pre-professional forest engineering program.

All required courses for admission to the professional program must be completed before entering the professional program. Students may only enter the professional program in the fall term each academic year.

The professional program begins with Forestry Field School prior to fall term of the professional program.

Pre-Professional Forest Engineering
Program (Major code 825)
Grade standards for the pre-professional program as listed in the program description apply.

## First Year (46-47 credits)

CH 201. Chemistry for Engineering Majors (3) ${ }^{\text {E }}$

COMM 111. *Public Speaking (3) ${ }^{\mathbf{1 E}}$
or COMM 114. *Argument and Critical
Discourse (3) ${ }^{1 \mathbf{E}}$
ECON 201. *Introduction to

Pre-Forest Engineering Major Code: 825

## Major Code: 380

FOREST ENGINEERING - CIVIL ENGINEERING (BS, CRED, HBS)
The Forest Engineering-Civil Engineering program results in a BS degree in Forest Engineering and a BS degree in Civil Engineering. The BS degree in Forest Engineering and the BS degree in Civil Engineering are both accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. The BS in Forest Engineering is also accredited by the Society of American Foresters. This unique five-year, double degree program is offered in cooperation with the School of Civil and Construction Engineering. This program begins with basic science and mathematics and progresses on through engineering science and forest science to arrive at professional-level courses in forest engineering that include surveying, soil and water resources, timber harvesting, operations analysis, road design, and planning. Graduates are eligible to take the Fundamentals of Engineering Examination.

In addition to the listed courses, all students are required to complete a total of six months of satisfactory employment in an area related to their major. This is usually accomplished by two or more summers of work, but it may include work during the academic year.

## Admission to the Pre-Professional Forest Engineering - PreProfessional Civil Engineering <br> Program

Admission to the pre-professional program requires that a student is admitted as a degree-seeking undergraduate or post-baccalaureate level student at Oregon State University. Courses included in the first and sophomore years comprise a pre-professional program of study that produces a solid foundation for professional program studies at the junior, senior, and advanced degree levels. The pre-professional program may be taken at Oregon State University or at any accredited college or university that offers equivalent courses transferable to OSU in conjunction with foundation forestry available via OSU Ecampus.

## Professional Forest EngineeringCivil Engineering Program

Students must be admitted to the professional forest engineering program following completion of the pre-professional forest engineering course work in order
to progress to the junior year in forest engineering. Students in the double degree program must also be admitted to the College of Engineering professional program prior to beginning the civil engineering junior year. Students should consult the College of Engineering for requirements of the College of Engineering professional program.

Enrollment in professional forest engineering program courses is restricted to those students who have clearly demonstrated an ability to achieve the standards required for professional studies. The number of students admitted to the program is based on available resources. Students meeting the minimum pre-forest engineering GPA of 2.25 may or may not be admitted depending on available resources.

Admission to the professional forest engineering program will be granted for students meeting the admission requirements prior to fall term of the junior year. Application for the professional program will be made at the end of winter term for the following fall term. For admission, students must earn:

1. a grade of "C" or better in all preprofessional courses required for entry into the professional program (marked with an $\mathbf{E}$ ). Grade repeat (replacement) policy will follow OSU Academic Regulation \#20.
2. a minimum GPA of 2.25 based on the pre-professional courses (or transfer equivalents) satisfactorily completed.
Students who have completed their pre-professional studies at a college or university other than Oregon State University must apply both to the OSU Office of Admissions for admission to OSU as a degree-seeking undergraduate or post-baccalaureate level student and to the College of Forestry for admission to the professional program. Application forms for the forest engineering professional program and information on policies and programs are available from the College of Forestry.

Students who have not satisfactorily completed all of the pre-professional courses when they apply may be provisionally accepted. Final acceptance is contingent on completion of any remaining pre-professional course work with grade of "C" or better by the end of the summer term prior to entrance into the professional program. Students who receive provisional acceptance and then fail to attain a grade of "C" or better in remaining pre-professional course work prior to the beginning of fall term will be re-directed to the pre-professional forestry program.

All required courses for admission to the professional program must be completed before entering the professional program. Students may only enter the
professional program in the fall term of each academic year.

The professional forest engineering program begins with Forestry Field School prior to fall term of the professional program.
Pre-Professional Forest Engineering
(825)-Pre-Professional Civil

Engineering (336) Program
Grade standards for the pre-professional program as listed in the program description apply.

ST 314. Introduction to Statistics for Engineers (3) ${ }^{\mathbf{E}++}$

## Professional Forest Engineering (380)-Professional Civil Engineering (306) Program

Grade standards for the professional program as listed in the program description apply.

## All students pursuing the

 BS in Forest Engineering-Civil Engineering:1. must earn grades of " C " or better in all required professional courses, or approved substitutions for majors and options, and
2. must maintain a 2.0 GPA in all major course work, and courses used for substitution of required courses.
College of Engineering specific

## requirements:

1. Must earn grades of " $C$ " or better in all required civil engineering major courses in the pre-professional and professional core.
2. Must maintain a cumulative 2.25 GPA in all civil engineering major course work and an overall OSU GPA of 2.25 .

## Forest Engineering Junior Year

( 48 credits)
FE/FOR 307. Junior Seminar (1)
FE 310. Forest Route Surveying (4)
FE/FOR 312. Forestry Field School (2)

Civil Engineering Program
${ }^{\mathbf{E}}$ Required for entry into the Forest Engineering
Professional Program.
${ }^{1}$ Must be selected to satisfy baccalaureate core requirements.

## Pre-Professional Forest <br> Engineering-Civil Engineering <br> Program Major Code: 361 <br> Major Code: 381

## FORESTRY (BS, HBS)

The successful forester must understand the biological and physical processes of forest ecosystems, as well as the social, economic, and operational forces that influence forest policies and management actions. The forestry core curriculum includes basic courses in the biological, physical, social sciences, and six months of work experience as well as professional courses designed to prepare students to manage forest resources.

Students are required to select one of the following required options:

- Forest Restoration and Fire
- Forest Management
- Forest Operations Management

The Bachelor of Science degree in Forestry is accredited by the Society of American Foresters (SAF).

In addition to the listed courses, all students are required to complete a total of six months of satisfactory employment in an area related to their major. This is usually accomplished by two or more summers of work, but it may include work during the academic year. Work performance and personal conduct are thoroughly appraised by the College of Forestry.

Six months of forestry or related natural resource work experience and completion of an option is required in the forestry degree program. The option courses compliment the forestry core and serve to fulfill the 180 credits for graduation.

## Pre-Professional Forestry Program

Admission to the pre-professional program requires that a student be admitted as a degree-seeking undergraduate or post-baccalaureate level student at Oregon State University. Courses included in the first and sophomore years comprise a pre-professional program of study that
produces a solid foundation for professional program studies at the junior, senior, and advanced degree levels. The pre-professional program may be taken at Oregon State University or at any accredited college or university that offers equivalent courses transferable to OSU in conjunction with foundation forestry available via OSU Ecampus.

## Professional Forestry Program

Successful completion of the pre-professional program will result in acceptance into the professional program. This requires selection of an option and: 1. a grade of "C" or better in all preprofessional courses required for entry into the professional program (marked with an E on the course list). Grade repeat (replacement) policy will follow OSU Academic Regulation 20.
2. a minimum GPA of 2.25 based on the pre-professional courses (or transfer equivalents) satisfactorily completed. Admission to the professional program will be granted for students meeting the admission requirements prior to fall term of the junior year. Application for the professional program will be made as of the end of winter term for the following fall term.

Enrollment in professional program courses is restricted to those students who have clearly demonstrated an ability to achieve the standards required for professional studies. The number of students admitted to the program is determined based on available resources. Students meeting the minimum Pre-Forestry GPA of 2.25 may or may not be admitted depending on available resources.

Students who have completed their pre-professional studies at a college or university other than Oregon State University must apply both to the OSU Office of Admissions for admission to OSU as a degree-seeking undergraduate or post-baccalaureate level student and to the College of Forestry for admission to the professional program. Application forms and information on policies and programs are available from the College of Forestry.

Students who have not satisfactorily completed all of the pre-professional courses when they apply may be provisionally accepted. Final acceptance is contingent on completion of any remaining pre-professional course work with grade of "C" or better by the end of the summer term prior to entrance into the professional program. Students who receive provisional acceptance and then fail to attain " C " or better grades in any remaining pre-professional course work prior to the beginning of fall term will be re-directed to the pre-professional forestry program.
All courses required for admission to
the professional program must be completed before entering the professional program. Students may only enter the professional program for fall term each academic year.

The professional program begins with Forestry Field School during the two weeks prior to the first fall term of the professional program.

## Pre-Professional Forestry (Major code 810)

Grade standards for the pre-professional program as listed in the program description apply.

## FOREST OPERATIONS <br> MANAGEMENT OPTION

The Forest Operations Management option requires the completion of 7 business courses that can be taken as a minor if the student gains entrance to the College of Business Entrepreneurship minor.

## Pre-Professional Forestry

Grade standards for the pre-professional program as listed in the program description apply.

## Sophomore Year (12 credits)

BA 215. Fundamentals of Accounting (4) ${ }^{\mathbf{E}}$ BA 230. Business Law I (4) ${ }^{\mathbf{E}}$
BA 260. Introduction to Entrepreneurship (4) ${ }^{\mathbf{E}}$

## Professional Forestry

Grade standards for the professional program as listed above apply.

## Junior Year (11 credits)

BA 390. Marketing (4)
FE 440. Forest Operations Analysis (4) Plus additional Bacc Core Courses (3)

## Senior Year (23 credits)

BA 351. Managing Organizations (4)
BA 460. Venture Management (4)
FE 471. Harvesting Management (3)
Plus additional Bacc Core Courses (12)

## Footnotes:

${ }^{\text {E }}$ Required for entry into the professional
program

* Baccalaureate Core Course (BCC)

SAMPLE FOUR-YEAR PLAN:

## FOR FOREST OPERATIONS

MANAGEMENT

## Year 1

## Fall Term

FES 240. *Forest Biology (4)
FOR 111. Introduction to Forestry (3)
or NR 201. Managing Natural Resources for the Future (3)
MTH 111. *College Algebra (4)
WR 121. *English Composition (3)

## Winter Term

CH 231. *General Chemistry (4)
CH 261. *Laboratory for Chemistry 231 (1)
FOR 112. Computing Applications in Forestry (3)
HHS 231. *Lifetime Fitness for Health (2)
HHS 241. *Lifetime Fitness (1)
or any PAC course (1-2)
MTH 112. *Elementary Functions (4)

## Spring Term

COMM 111. *Public Speaking (3)
or COMM 114. *Argument and Critical
Discourse (3)

AEC 250. *Introduction to Environmental Economics and Policy (3)
or ECON 201. *Introduction to
Microeconomics (4)
FES 241. Dendrology (3)
MTH 241. *Calculus for Management and Social Science (4)

## Year 2

## Fall Term

BA 260. Introduction to Entrepreneurship (4) FE 208. Forest Surveying (4)
PH 201. *General Physics (5)

## Free Elective (3)

Free Elective (1)
Option Code: 823

## FOREST RESTORATION <br> AND FIRE OPTION

Disturbance processes, such as wildland fire, insect or disease outbreak, landslide, and windthrow, are important considerations in any actively managed forest, regardless of the specific management objective. The Forest Restoration and Fire option prepares students to understand, manage, mitigate and/or use forest dis-
turbance processes, especially wildland
fire, as part of a forest management plan.

## Sophomore Year (12)

ATS 201. *Climate Science (4) ${ }^{\mathbf{E}}$
or ATS 210. Introduction to the
Atmospheric Sciences (3) ${ }^{\mathbf{E}}$
or ATS 310. Meteorology (4) ${ }^{\mathbf{E}}$
Bacc Core Courses (9)

## Junior Year (16)

FES 341. Forest Ecology (3)
FES 360. Collaboration and Conflict
Management (3)
or FES/ANS/FW/SOC 485 *Consensus and Natural Resources (3)
FES/FW 445. Ecological Restoration (4)

## SUSTAINABLE FOREST MANAGEMENT (MF, MS, PhD)

## Graduate Areas of Concentration

Engineering for sustainable forestry; forest biometrics and geomatics; forest operations planning and management;
forest policy analysis and economics; forest soil and watershed processes; silviculture, fire, and forest health
The Sustainable Forest Management (SFM) graduate program emphasizes the conservation of forest-dominated landscapes to meet a defined set of ecological, economic and social criteria over long time frames. The program follows the
sustainable principles outlined by the Montreal Process Criteria and Indicators. These principles have been adopted by the state of Oregon.

The program provides a strong grounding in the principles and techniques of active management of forests to improve forest health and condition while producing a full range of products and ecosystems services. It consists of a common core in the principles and criteria of sustainable forest management; statistics for design and interpretation of experiments; and specialization in one of six areas of concentration. The MF degree requires a project, MS a thesis, and PhD a dissertation.

## Areas of Concentration

Engineering for Sustainable For-estry-Designing forest operations to achieve sustainable forest management objectives; ecological restoration operations; road design and construction. Supporting course work often draws from slope and embankment, industrial systems optimization, watershed impacts of forest disturbance,

GIScience II: analysis and applications, forest transportation systems, forest hydrology, forest geomatics, forest road engineering, forest road system management, water quality and forest land use, forest operations analysis, advanced logging mechanics, harvesting management, advanced silviculture, heuristics for combinatorial optimization, economics of the forest resource, and human factors engineering. Contacts: Belart, Chung, Leshchinsky, Olsen, Segura, Sessions, Wing

Forest Biometrics and Geomat-ics-Modeling tree and stand development; forest data sampling and monitoring methods; forest measurements and assessments; mapping and data management technologies. Supporting course work often draws from forest biometrics, forest geomatics, geospatial data and analysis, digital terrain modeling, GIScience II: analysis and applications, geodesy, spatio-temporal variation in ecology and earth sciences, remote sensing, advanced landscape and seascape ecology, generalized regression models, scientific visualization, forest models, statistical methods, forest policy analysis, advanced silviculture, aerial and terrestrial LiDAR applications. Contacts: Hailemariam, Kiser, Maguire, Strimbu, Wing

Forest Operations Planning and Management-Planning, organizing, and executing forest plans; enhancing supply chain efficiency and improving international competitiveness. Supporting course work often draws from tactical and operational planning, geospatial data and analysis, forest policy analysis, industrial systems optimization, advanced
silviculture, harvesting management, spatial analysis of forested landscapes, organization leadership and management, marketing and innovation in renewable materials forestry supply chain management, forest geomatics, production planning, forest transportation systems, forest operations regulations and policy issues, heuristics for combinatorial optimization, forest wildlife habitat management, industrial systems optimization, statistical methods, forest biometrics, lean systems manufacturing, advanced production planning and control. Contacts: Belart, Chung, Sessions, Strimbu

## Forest Policy Analysis and

Economics-Analyzing tradeoffs in the forest and resource policy decision process; public land use policy; interpretations of regulations; markets for forest products; forest certification; theoretical and applied research related to ecosystem services. Supporting course work often draws from natural resource policy and law, micro and macroeconomic theory, environmental policy and law interactions, forest policy analysis, industrial systems optimization, preliminaries for quantitative methods economics of the forest resource, spatial analysis of forested landscapes, applied econometrics, markets and prices in the forest sector, valuation of non-market resources, analytic techniques for forest managers, heuristics for combinatorial optimization; and work in other fields to support thesis or dissertation research. This area of concentration is jointly sponsored by FERM, the Applied Economics Graduate Program and the Applied Economics Department. Contacts: Cushing, Huntington, Kuusela, Montgomery, Souder

## Forest Soil and Watershed

Processes-Understanding watershed conditions and processes in forested ecosystems and the effects of management activities; evaluating and improving soil and water quality and related practices and policies for forest operations. Supporting course work often draws from forest hydrology, soil physics, environmental soil chemistry, geomorphology and landscape ecology, geospatial data analyses, principles of fluid mechanics, stream ecology, nutrient cycling, snow hydrology, hydrogeology, river engineering, natural resources and forest ecosystems analysis, mineral organic matter interactions, open channel flow, managing forest nutrition, GIS in water resources, ecological restoration stream ecology, mineral-organic matter interactions, limnology, water quality and forest land use, hillslope and watershed hydrology, design and analysis of planned experiments, statistical methods, riparian ecology and management, sediment transport, and principles of stable isotopes. Contacts: Bladon, Hatten,

## Segura, Souder

Silviculture, Fire, and Forest Health-Manipulating vegetation to achieve management objectives, from restoration to intensive timber production; fire ecology and fire management; forest ecosystem health. Supporting course work often draws from advanced silviculture, geospatial data analysis, forest Pathology, forest entomology, environmental policy and law interactions, natural resource policy and law, plant pathology, advanced forest community ecology, community structure and analysis, spatial analysis of forested landscapes, wildland fire science and management, ecological restoration, forest policy analysis, statistical methods, sampling methods, forest hydrology, water quality and forest land use, natural resource data analysis, advanced forest community ecology, wildland fire ecology, biology of invasive plants, forest wildlife habitat management, global change ecology, weed management, and wildlife ecology. Contacts: Bailey, Fitzgerald, Davis, Gonzalez-Benecke, Kiser, LeBoldus, Maguire, Powers, Shaw

## Major Code: 1090 <br> - FOREST ENGINEERING COURSES

FE 101. INTRODUCTION TO FOREST
ENGINEERING (2). Introduction to the forest engineering discipline. Discussion of critical issues, available resources, career opportunities and professional opportunities. Overview of field instruments and analytical approaches.
FE 102. FOREST ENGINEERING PROBLEM SOLVING AND TECHNOLOGY (3). A technology applications course designed to introduce students to formulating and implementing computational solutions to engineering analysis and design problems in a digital environment. Students will learn to evaluate engineering problems, formulate one or more solution techniques or algorithms, and code the solution using spreadsheet and/or programming software. Professionalism in completing and presenting laboratory exercises is emphasized. Laboratory examples draw from a variety of engineering topics. This course may be substituted for CE 102, Civil Engineering I: Problem Solving and Technology. PREREQS: Calculus
FE 208. FOREST SURVEYING (4). Introduction to theory and practice of surveying methods and measurements as applied to the specifics of forestry problems and their solutions. This is the first of a four-course sequence (FE 208, 209, 310, 311). Together with FE 257 it is designed to prepare students for the Fundamentals of Land Surveying exam, which is necessary to become a professional land surveyor. PREREQS: MTH 112 [C] or MTH 241 [C] or MTH 251 [C] or MTH 251H [C] or MTH 252 [C] or MTH 252H [C] and with a grade of C or better.

## FE 209. FOREST PHOTOGRAMMETRY AND

 REMOTE SENSING (4). Management and conservation of natural resources with the fundamentals of spatial data acquisition from airborne and spaceborne sensors. Introduction to theory of spectral reflectance properties of vegetation, the principles of photographic analysis and aerial photo-interpretation and new advances such as LIDAR. PREREQS: MTH 112 [C] or MTH 241 [C] or MTH 251 [C] or MTH 251H [C] or MTH 252 [C] or MTH 252H [C]FE 257. GIS AND FOREST ENGINEERING APPLICATIONS (3). An introduction to the appropriate use and potential applications of geographic information systems (GIS) and related technologies (GPS and remote sensing) in forest management and operational planning and problem solving. Students are presented with lectures and exercises that cover a wide range of GIS and GIS-related topics and issues including spatial database creation, structure, analysis, and modeling. Lec/lab.
FE 307. JUNIOR SEMINAR (1). College is the time to develop the skills necessary for the transition between academics and career. In conjunction with the expertise already available on campus, this course will guide students through career planning, exploration, placement, and employer expectations. CROSSLISTED as FOR 307. PREREQS: Professional forestry students only.
FE 310. FOREST ROUTE SURVEYING (4). Route surveying and site surveying applied to forestry problems. Use of surveying equipment; traversing; computations; leveling; horizontal, vertical, compound, reverse and spiral curves; earthwork; construction staking as applied to new road and existing road P-line survey. Includes rapid survey techniques. Lec/lab. PREREQS: (FE 208 [C] or FE 308 [C] ) or CE 361 [C] or CEM 263 [C]
FE 312. FORESTRY FIELD SCHOOL (2).
A hands-on experience in the major aspects of forestry, including regeneration surveys, silviculture, cruising, recreation, forest disturbances, logging site and mill visits, east and west of the Cascades Range. CROSSLISTED as FOR 312. PREREQS: Admission to a professional school in the Forestry, Forest Engineering, or Forest-Civil Engineering program.
FE 315. SOIL ENGINEERING (4). Use of soil in engineering and construction. Identification and classification. Engineering properties of soil: permeability, compressibility, and strength. Compaction principles and methods. Field control of soil engineering projects. PREREQS: ENGR 213* [D-] and CE 311 or CEM 311 or FE 330
FE 316. SOIL MECHANICS (4). Soil strength and soil mechanics theories applied to analysis of slope stability, retaining structures, foundations, and pavements. Lec/lab. PREREQS: (FE 315* [C-] or CE 372* [D-] )
FE 330. FOREST ENGINEERING FLUID MECHANICS AND HYDRAULICS (3). Fluid properties, pressure, fluid statics, continuity, energy equation, single and series pipe flow, open channel hydraulics, peakflow estimates for culvert design, stream crossing design. Lec/lab. PREREQS: (ENGR 213* [D-] and FE 102* [C-] )
FE 370. HARVESTING OPERATIONS (4). Timber harvesting and transport methods from the forest to the mill. Technical feasibility, economic, and environmental relationships in forestry operations. PREREQS: Junior standing in forestry. For nonforest engineering students.
FE 371. HARVESTING PROCESS
ENGINEERING (4). Timber harvesting equipment and systems. Harvesting process evaluation and decisions aided by forest engineering analysis. Lec/lab. PREREQS: ENGR 211 [C] and FE 102 [C] and COREQS: FE 208 and FE 357
FE 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits.
FE 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.

FE 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

FE 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

FE 411. COOPERATIVE EDUCATION MENTORED WORK EXPERIENCE (1). College is the time to develop the skills necessary
for the transition between academics and career. Cooperative Education Mentored Work Experience is a graded field experience in which the student protege will apply academic study in a This course is repeatable for a maximum of 4 credits. PREREQS: Professional forestry students only.

FE 415. FOREST ROAD ENGINEERING (3). Location, surveying, design, cost estimation, and construction practices for forest roads. Lecture on principles, and laboratory field practice in locating, surveying, designing, and cost estimating.
PREREQS: FE 310 [C-]

## FE 416. FOREST ROAD SYSTEM

MANAGEMENT (4). Structural characteristics of bridges, load rating, structural design of culverts, aggregate testing and evaluation, environmental assessment of forest road systems, road maintenance cycles and management. PREREQS: ((ENGR 211 [D-] or ENGR 211H [D-] ) and (ENGR 213 [D-] or ENGR 213H [D-] ) and FE 316 [C-] and FE 415 [C-] )
FE 422. FOREST GEOMATICS (4). Topics include digital techniques for geospatial database creation, computer programming techniques for database manipulation and analysis, and applications of geospatial data for natural resource measurement and analysis. Class meetings include lectures and applied spatial analysis laboratory assignments. A final term project must be designed, conducted, and presented. Lec/lab. PREREQS: (CE 202 [D-] or FE 357 [C-] or GEO 365 [D-] or (GEO 465 [D-] or GEO 565 [D-] ))

## FE 423. UNMANNED AIRCRAFT SYSTEM

REMOTE SENSING (3). Unmanned Aircraft System (UAS) Geomatics presents techniques in UAS design and applications for remote sensing measurements of both natural and constructed landscapes. PREREQS: FE 309 [C] or GEO 444 [C] or GEO 466 [C]
FE 430. WATERSHED PROCESSES (4). Effects of land use practices on the physical hydrology (interception, infiltration, evapotranspiration, subsurface flow and surface runoff, water yields, and peak flows) of forested watersheds. Surface erosion, mass soil movements, stream temperatures, nutrient levels and effects of management activities upon riparian systems; forest practice rules. Lec/lab. PREREQS: Junior standing.

FE 434. FOREST WATERSHED MANAGEMENT
(4). Physical hydrology, erosion processes, streams, and riparian areas of forested ecosystems. The material can be widely applied, but is applicable primarily to the humid, temperate rainforests of the Pacific Northwest. PREREQS: (CH 121 [C] or CH 201 [C] or CH 231 [C] ) and (SOIL 205 [C] or CSS 305 [C] or CSS 205 [C] ) and (MTH 241 [C] or MTH 251 [C] or MTH 251 H [C] )
FE 435. FOREST WATERSHED MANAGEMENT
IMPACTS (3). Impacts of forest disturbance,
timber harvest, wildfire, insect outbreaks, and low frequency storms and floods on watershed hydrology and streams. PREREQS: FE 434 [C] and /or equivalent
FE 440. FOREST OPERATIONS ANALYSIS (4). Identification and measurement of production components in harvesting systems. Methods analysis, productivity improvement and engineering economics. Report writing skills emphasized. Lec/lab. PREREQS: FE 102 [C-] and (FE 370 [C-] or FE 371 [C-] ) and basic statistics
FE 456. *INTERNATIONAL FORESTRY (3). An introduction to the biological, physical, and sociological factors that shape the world's forests and the activities used to manage those forests. What influence these factors have on forest policies, practices, and outcomes. CROSSLISTED as FOR 456. (Bacc Core Course) PREREQS: Introductory course in biology.
FE 457. TECHNIQUES FOR FOREST
RESOURCE ANALYSIS (4). Use of linear
programming, nonlinear programming, dynamic programming, and simulation to solve complex forest management problems, with emphasis on intertemporal multiple-use scheduling. Forestry transportation problems, multiple-use allocation, and investment analysis. Filed trips required. CROSSLISTED as FOR 457/FOR 557. PREREQS: AREC 351 [C] or FOR 330 [C]
FE 459. FOREST MANAGEMENT PLANNING AND DESIGN I (4). Integration of environmental, economic, and social aspects of forestry in management planning. Development of strategic and tactical plans using diverse data types and sources. Senior capstone class projects. Lec/lab. CROSSLISTED as FOR 459. PREREQS: FE 457 or FOR 457 and senior standing or departmental approval required.

## FE 460. ^FOREST OPERATIONS

REGULATIONS AND POLICY ISSUES (3).
Reviews regulations and other policies that affect timber harvesting and other forest practices, particularly policies that address concerns of environment, safety, employment and transportation. Discusses how such rules and other policies evolve, including the role of public perceptions, forestry professionals and other key policy players. (Writing Intensive Course) PREREQS: Senior standing.
FE 469. FOREST MANAGEMENT PLANNING
AND DESIGN II (4). A team-based, project-centric course for integrated timber harvest planning. Establish tactical and operational planning goals and constraints, identify feasible harvesting and transportation systems, and design harvest units to meet objectives and constraints. Lec/lab. CROSSLISTED as FOR 469. PREREQS: FE 459 [C] or FOR 459 [C]

FE 470. LOGGING MECHANICS (4). Relationship of torque, power, and thrust to the operation of cable and ground-based harvesting systems. Onhighway and off-highway heavy truck performance. PREREQS: ((ENGR 211 [D-] or ENGR 211H [D-] ) and ENGR 213 [D-] and FE 371 [C-] )
FE 471. HARVESTING MANAGEMENT (3).
Verification of harvesting assessment plans and operational planning/field layout. Practical logging skills related to harvest planning, operations monitoring, and designing worker training programs. Lec/lab. PREREQS: FE 371 and FE 470

FE 479. SLOPE AND EMBANKMENT DESIGN
(3). A comprehensive overview of evaluating stability and performance for natural and engineering slopes. Design aspects include construction of road embankments, slope remediation techniques and application of geosynthetics for slope stabilization, slope and wall construction, and drainage. CROSSLISTED as CE 479/CE 579. PREREQS: CE 373 [C] or FE 316 [C]
FE 480. FOREST ENGINEERING PRACTICE
AND PROFESSIONALISM (1). Personal and professional skills, attributes, and issues in forest engineering practice. Includes topics such as ethics, land stewardship, media relations and risk management. PREREQS: Senior standing.
FE 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 8 credits.
FE 501. RESEARCH AND SCHOLARHSIP (116). This course is repeatable for a maximum of 16 credits.
FE 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.
FE 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.

FE 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

FE 507. SEMINAR (1-16). Subject matter as required by graduate programs. This course is repeatable for a maximum of 16 credits.

FE 515. FOREST ROAD ENGINEERING (3).
Location, surveying, design, cost estimation, and construction practices for forest roads. Lecture on principles, and laboratory field practice in locating, surveying, designing, and cost estimating. PREREQS: Basic surveying and permission of instructor.

FE 516. FOREST ROAD SYSTEM
MANAGEMENT (4). Structural characteristics of bridges, load rating, structural design of culverts, aggregate testing and evaluation, environmental assessment of forest road systems, road maintenance cycles and management. PREREQS: FE 415 or FE 515

FE 522. FOREST GEOMATICS (4). Topics include digital techniques for geospatial database creation, computer programming techniques for database manipulation and analysis, and applications of geospatial data for natural resource measurement and analysis. Class meetings include lectures and applied spatial analysis laboratory assignments. A final term project must be designed, conducted, and presented. Lec/lab.
PREREQS: CE 202 or FE 357 or GEO 365 or (GEO 465 or GEO 565)

FE 523. UNMANNED AIRCRAFT SYSTEM
REMOTE SENSING (3). Unmanned Aircraft System (UAS) Geomatics presents techniques in UAS design and applications for remote sensing measurements of both natural and constructed landscapes. PREREQS: GEO 544 [C] or GEO 566 [C] or OC 678 [C]

FE 530. WATERSHED PROCESSES (4). Effects of land use practices on the physical hydrology (interception, infiltration, evapotranspiration, subsurface flow and surface runoff, water yields, and peak flows) of forested watersheds. surface erosion, mass soil movements, stream temperatures, nutrient levels and effects of management activities upon riparian systems; forest practice rules. Lec/lab. PREREQS: Junior standing.
FE 532. FOREST HYDROLOGY (4). Physical hydrology, erosion processes, and attributes of stream ecosystems for forested watersheds. Material can be widely applied, but is applicable primarily to the humid, temperate rainforests of the Pacific Northwest. Lec/rec. PREREQS: BEE 512 or equivalent Intro to Hydrology course.
FE 535. WATER QUALITY AND FOREST LAND USE (3). Influence of natural and land-use factors on water quality; monitoring strategies and analytical methods; municipal watershed management. PREREQS: FE 430 or FE 530
FE 536. WATERSHED IMPACTS OF FOREST
DISTURBANCE (4). Impacts of forest
disturbances that include timber harvest; wildfire; insect outbreaks; and large, low frequency storms and floods on the watershed hydrology, erosion processes, and stream ecosystems of forested watersheds. Lec/rec. PREREQS: FE 532 [C]
FE 537. HILLSLOPE AND WATERSHED
HYDROLOGY (4). Advanced course on hillslope hydrology covering the physical, chemical and isotopic nature of runoff generation from the pore scale to the catchment scale.

FE 540. FOREST OPERATIONS ANALYSIS (4). Identification and measurement of production components in harvesting systems. Methods analysis, productivity improvement and engineering economics. Report writing skills emphasized. Lec/lab. PREREQS: FE 102 and (FE 370 or FE 371) and basic statistics.

FE 545. SEDIMENT TRANSPORT (4). Principles of sediment erosion, transportation and deposition in rivers, reservoirs, and estuaries; measurement, analysis, and computational techniques. Offered even years in winter term. CROSSLISTED as BEE 545. PREREQS: CE 313 or FE 330

FE 552. FOREST TRANSPORTATION SYSTEMS (4). Analysis of interactions between harvesting and road systems. Advanced topics in road and
landing spacing, determination of road standards, analysis of logging road networks, transfer and sort yard facility location. Simultaneous resource scheduling and transportation planning. PREREQS: FE 102 and (FE 440 or FE 540)
FE 555. FOREST SUPPLY CHAIN MGMT (3). Develop and implement operational planning and logistics scheduling systems to manage a forestry supply chain for typical forest organizations in the Pacific Northwest. Once developed, these supply chain plans will be implemented using simulation software that will allow students to view the results of their forest operations plans. PREREQS: (CS 151 or FE 102) and FE 357 and FOR 457

## FE 557. TECHNIQUES FOR FOREST

RESOURCE ANALYSIS (4). Use of linear programming, nonlinear programming, dynamic programming, and simulation to solve complex forest management problems, with emphasis on intertemporal multiple-use scheduling. Forestry transportation problems, multiple-use allocation, and investment analysis. Field trips required. CROSSLISTED as FOR 457/FOR 557. PREREQS: AREC 351 or FOR 330
FE 560. FOREST OPERATIONS REGULATIONS AND POLICY ISSUES (3). Reviews regulations and other policies that affect timber harvesting and other forest practices, particularly policies that address concerns of environment, safety, employment and transportation. Discusses how such rules and other policies evolve, including the role of public perceptions, forestry professionals and other key policy players. PREREQS: Senior standing.
FE 570. LOGGING MECHANICS (4). Relationship of torque, power, and thrust to the operation of cable and ground-based harvesting systems. Onhighway and off-highway heavy truck performance. PREREQS: ENGR 211 and ENGR 213 and FE 371
FE 571. HARVESTING MANAGEMENT (3). Verification of harvesting assessment plans and operational planning/field layout. Practical logging skills related to harvest planning, operations monitoring, and designing worker training programs. PREREQS: FE 371 and FE 470
FE 579. SLOPE AND EMBANKMENT DESIGN
(3). A comprehensive overview of evaluating stability and performance for natural and engineering slopes. Design aspects include construction of road embankments, slope remediation techniques and application of geosynthetics for slope stabilization, slope and wall construction, and drainage. CROSSLISTED as CE 479/CE 579. PREREQS: CE 373 or FE 316
FE 599. SPECIAL TOPICS (0-16). Advanced topics in isotope hydrology. This course is repeatable for a maximum of 16 credits.

FE 601. RESEARCH AND SCHOLARSHIP (116). This course is repeatable for a maximum of 16 credits.

FE 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

FE 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.
FE 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
FE 607. SEMINAR (1-16). Subject matter is required by graduate programs. This course is repeatable for a maximum of 16 credits.

## FE 640. SPECIAL TOPICS IN FOREST

ENGINEERING (1-3). Recent advances in logging engineering, forest engineering, and forest operations. Content will vary with instructor. May be retaken for credit. This course is repeatable for a maximum of 99 credits.

## FORESTRY COURSES

FOR 111. INTRODUCTION TO FORESTRY (3).
Forest resources in the world; forests and human well-being; where and how forests grow; environmental and human values; products, characteristics, and uses; basic elements of use, planning and management. Interpretation of forestry literature; professional origins in the U.S. Field trips required.

FOR 112. COMPUTING APPLICATIONS IN FORESTRY (3). An overview of computing applications used in all aspects of forestry work, but largely focused on development of intermediate and advanced spreadsheet skills using Microsoft Excel (e.g., complex formulas and functions, charting, and pivot tables). Additionally, the course rounds out essential skills in document formatting and presentation development.
FOR 199. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 16 credits.
FOR 206. *FOREST SOILS LABORATORY FOR SOIL 205 (1). Laboratory exercise and field trips designed to develop student competency in soil processes, description, analysis, and assessment with a particular emphasis on the role of soils in managed and unmanaged forest ecosystems. (Bacc Core Course if taken with SOIL 205) COREQS: SOIL 205

FOR 208. FOREST SOILS RECITATION (1). Readings, exercises, discussions designed to develop student competency in forest soil processes, description, analysis, and assessment. A particular emphasis will be placed on the role of soils in managed and unmanaged forest ecosystems. PREREQS: An introductory soils course.

FOR 307. JUNIOR SEMINAR (1). College is the time to develop the skills necessary for the transition between academics and career. In conjunction with the expertise already available on campus, this course will guide students through career planning, exploration, placement, and employer expectations. CROSSLISTED as FE 307.

FOR 312. FORESTRY FIELD SCHOOL (2). A hands-on experience in the major aspects of forestry, including regeneration surveys, silviculture, cruising, recreation, forest disturbances, logging site and mill visits, east and west of the Cascades Range. CROSSLISTED as FE 312. PREREQS: Admission to a professional school in the Forestry, Forest Engineering, or Forest-Civil Engineering program.

FOR 321. FOREST MENSURATION (5). Theory and practice of sampling and cruising techniques; stratified and nonstratified sampling systems with fixed plots, variable plots, and 3-P designs. PREREQS: (FOR 141 [C] or FES 141 [C] or FOR 241 [C] or FES 241 [C] ) and FE 208 [C] and FE 209 [C] and (MTH 241 [C] or MTH 245 [C] or MTH 251 [C] or MTH 251H [C] ) and (ST 201 [C] or ST 314 [C] or ST 314 H [C] or ST 351 [C] or ST 351 H [C] )
FOR 322. FOREST MODELS (3). Introduction to static and dynamic forest models: defining what they are, how they might be used, and, in general terms, how they are developed. PREREQS: FOR 321 [C-] and MTH 241 [D-] and (ST 201 [D-] or ST 351 [D-] )
FOR 330. FOREST RESOURCE ECONOMICS I (4). Basic arithmetic of interest and capital budgeting. Basic wood products markets. Forest resource markets and market failures. Nonmarket valuation and multiple-use forestry. Impacts of forest management and policy decisions on forest resource use. Lec/lab. PREREQS: ((AEC 250 [C] or AREC 250 [C] or ECON 201 [C] or ECON 201H [C] ) and (MTH 241 [C] or MTH 245 [C] or MTH 251 [C] or MTH 251 H [C] or MTH 252 [C] or MTH 252H [C] ))
FOR 331. FOREST RESOURCE ECONOMICS II (4). Forest products markets, appraisal, rotation,
thinning, uneven-aged management and forest regulation. Economics of timber management and harvest scheduling. PREREQS: FOR 330 [C] and (ST 201 [C] or ST 351 [C] ) and /or instructor approval.
FOR 346. TOPICS IN WILDLAND FIRE (3). An interdisciplinary survey of concepts relating to fire science, ecology, management, and policy Includes case studies of several representative ecosystems, ranging from west- and eastside forests of the Pacific Northwest to shrub steppe ecosystems of the Intermountain West and chaparral ecosystems of southern California. Distance and campus-based delivery using videos, website, and discussion. PREREQS: Course work in forest biology or ecology (e.g., (FOR 240 or FES 240 or FES 341) or equivalent.
FOR 399. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits.
FOR 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.

FOR 401. RESEARCH AND SCHOLARSHIP
(1-16). This course is repeatable for a maximum of 16 credits.

FOR 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
FOR 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.
FOR 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
FOR 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.
FOR 408. WORKSHOP (1-3). This course is repeatable for a maximum of 16 credits.
FOR 410. INTERNSHIP (1-16). Full-time supervised professional experience emphasizing functional proficiency under joint sponsorship of university and agency personnel. Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
FOR 411. COOPERATIVE EDUCATION MENTORED WORK EXPERIENCE (1). College
is the time to develop the skills necessary for the transition between academics and career. Cooperative Education Mentored Work Experience is a graded field experience in which the student protege will apply academic study in a This course is repeatable for a maximum of 4 credits. PREREQS: Professional forestry students only.
FOR 413. FOREST PATHOLOGY (3). Effects of diseases on forest ecosystems. Recognition of important groups, prediction of pathogen responses to environmental changes, and management strategies for protection of forest resources. Field trips. Lec/lab. CROSSLISTED as BOT 413. PREREQS: BI 204 [C] or BI 212 [C] or BI 212 H [C] or BI 213 [C] or BI 213 H [C] and /or equivalent.
FOR 417. ADVANCED FOREST SOILS (4). Synthesize current information on fundamental properties and processes of forest soils with emphasis on applications to silviculture, soil conservation, and sustainable management of forested ecosystems. Lec/lab. PREREQS: SOIL 205 [C-] and ( CH 231 [C-] or $\mathrm{CH} 231 \mathrm{H}[\mathrm{C}-]$ ) and (CH 261 [C-] or CH 261 H [C-] ) or CH 201 [C-]) and (MTH 241 [C-] or MTH 251 [C-] or MTH 251H [C-] or MTH 252 [C-] or MTH 252H [C-] )
FOR 429. INTEGRATED PRESCRIPTIONS (3). Using an actual stand and real data, we will cultivate systematic approaches for: 1) characterizing site conditions and limiting factors; 2) harmonizing multiple management objectives; 3) modeling long-term responses to silvicultural manipulations; 4) assessing environmental impacts; 5) building public acceptance; and 6)
communicating alternatives and rationales for decisions. This expanded course will allow a deeper project experience and more integration among the faculty in the co-requisite course, and providing the lab component of three other interrelated forest management courses. PREREQS: (FOR 240 [C-] or FES 240 [C-] and FOR 321 [C-] and /or equivalents. COREQS: FOR 443

## FOR 431. ECONOMICS AND POLICY OF

 FOREST WILDLAND FIRE (3). General overview of the history of fire and the interaction of people with fire on forested landscapes. Forest fire policy history and current issues in the U.S. Basic legal concepts relevant to forest fire policy. An economic framework for understanding spatial externalities, decision-making under certainty, institutional economics, and incentives. PREREQS: AEC 35 [C] or FOR 331 [C]
## FOR 436. WILDLAND FIRE SCIENCE AND

MANAGEMENT (4). Principles and applications of fire as a natural resource management tool; the role of fire in conservation management, restoration, and preservation of ecosystems Covers basic techniques and current research used to describe fire behavior and spread, fuels and fuel manipulation, and fire effects on the biota. Focus will be on fire as a natural process in ecosystem dynamics. Lec/lab.
FOR 441. SILVICULTURE PRINCIPLES (4). Nursery operation, vegetation management, herbivores, fire, seeding and planting techniques. Introduction to principles and techniques involving vegetation control, thinning, fertilizing, and harvesting. Environmental considerations related to forest stand treatments. Lec/lab. PREREQS: ((FES 240 [C] or FOR 240 [C] ) and (FES 141 [C] or FES 241 [C] ))

FOR 442. SILVICULTURE REFORESTATION (4). Silvicultural principles and practices needed to successfully regenerate forestlands in North America. Topics include artificial and natural regeneration, genetic improvement, seed orchards, forest tree nurseries, site preparation, seedling quality and handling, vegetation management, animal damage protection, early stand management, and ecological and ecophysiological considerations. Emphasis is placed on regeneration methods applied to plantations in western Oregon. Field trips required PREREQS: (SOIL 205 [C] and (FES 240 [C] or FES 240 H [C] or FOR 240 [C] )) COREQS: FOR 443
FOR 443. SILVICULTURAL PRACTICES (4).
Manipulation of forest stand structure and dynamics to meet various resource management objectives. Covers key concepts and practices associated with vegetation control, thinning, fertilization, even-aged and uneven-aged regeneration systems including social and environmental considerations associated with treatments. Two-day field trip required. Lec/ lab. PREREQS: (FES 240 [C] or FES 240H [C] or FOR 240 [C] ) and FOR 321 [C] and /or equivalents. COREQS: FOR 442
FOR 456. *INTERNATIONAL FORESTRY (3). An introduction to the biological, physical, and sociological factors that shape the world's forests and the activities used to manage those forests. What influence these factors have on forest policies, practices, and outcomes. CROSSLISTED as FE 456. (Bacc Core Course) PREREQS: Introductory course in biology.

FOR 457. TECHNIQUES FOR FOREST RESOURCE ANALYSIS (4). Use of linear programming, nonlinear programming, dynamic programming, and simulation to solve complex forest management problems, with emphasis on intertemporal multiple use scheduling. Forestry transportation problems, multiple-use allocation, and investment analysis. Field trips required CROSSLISTED as FE 457/FE 557. PREREQS: AREC 351 [C] or FOR 330 [C]

FOR 459. FOREST MANAGEMENT PLANNING AND DESIGN I (4). Integration of environmental, economic, and social aspects of forestry in management planning. Development of strategic and tactical plans using diverse data types and sources. Senior capstone class projects. Lec/lab. CROSSLISTED as FE 459. PREREQS: FE 457 or FOR 457 and senior standing or departmental approval required.
FOR 460. ^FOREST POLICY (4). Policy formulation and analysis for forest resources Consideration of policy affecting land management approaches to planning, management, and social and economic development. Major forestry policy areas covered include outdoor recreation, range, timber, wilderness, and wildlife and fish. Lec/lab. (Writing Intensive Course) PREREQS: Senior standing.
FOR 462. NATURAL RESOURCE POLICY
AND LAW (3). First of two offerings designed to provide an introduction to current environmental and natural resource law issues and disputes for students who will have to meet, consult, and work with lawyers throughout their professional career. Focus is on mechanisms governing resource allocation within the constraints of private property rights. Emphasis is placed on the federal Endangered Species Act and its relation to water allocation and public trust doctrines. Students will also gain a broad understanding of regulatory

FOR 469. FOREST MANAGEMENT PLANNING AND DESIGN II (4). A team-based, project-centric course for integrated timber harvest planning. Establish tactical and operational planning goals and constraints, identify feasible harvesting and transportation systems, and design harvest units to meet objectives and constraints. Lec/lab CROSSLISTED as FE 469. PREREQS: FE 459 [C] or FOR 459 [C]
FOR 499. SPECIAL TOPICS (0-16). Topics of current importance in forest resources issues, education, policies, economics, management, business, social values, silviculture, and biometrics. Topics will change from term to term. May be repeated with different topics for credit. Section 8: Social aspects of natural resource management (3 credits) graded. This course is repeatable for a maximum of 16 credits. PREREQS: Senior or graduate standing.

FOR 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits

FOR 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.
FOR 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

FOR 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
FOR 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.
FOR 508. WORKSHOP (1-3). This course is repeatable for a maximum of 16 credits.
FOR 510. INTERNSHIP (1-9). This course is repeatable for a maximum of 16 credits.
FOR 513. FOREST PATHOLOGY (3). Effects of diseases on forest ecosystems. Recognition of important groups, prediction of pathogen responses to environmental changes, and management strategies for protection of forest resources. Field trips. Lec/lab. CROSSLISTED as BOT 513. PREREQS: BI 204 or BI 212 or BI 212 H or Bl 213 or Bl 213 H or equivalent.

FOR 517. ADVANCED FOREST SOILS (4). Synthesize current information on fundamenta properties and processes of forest soils with emphasis on applications to silviculture, soil conservation, and sustainable management of forested ecosystems. Lec/lab. PREREQS: SOIL 205 and (((CH 231 or CH 231 H$)$ and $(\mathrm{CH} 261$ or CH 261H)) or CH 201) and (MTH 241 or MTH 251
or MTH 251 H or MTH 252 or MTH 252 H ) all with C- or instructor's permission.

FOR 518. MANAGING FOREST NUTRITION
(3). Synthesize current information on nutrient limitations of forest productivity, long-term forest productivity, and mitigating and managing forest nutrition with emphasis on forests of the Pacific Northwest. PREREQS: Graduate student standing or consent of instructor.

FOR 520. GEOSPATIAL DATA ANALYSIS
WITH MATLAB (3). An introduction into analysis of spatial and other data using Matlab. The course will provide a practical introduction and is designed as a hands-on learning experience.
FOR 524. FOREST BIOMETRICS (3). Advanced topics in forest biometrics, including measurement of forest structure and dynamics, application of sampling theory and methods, and statistical techniques for interpreting forestry data.
PREREQS: FOR 322 and ST 511
FOR 525. FOREST MODELING (3). Examination of regression techniques and assumptions used to develop static and dynamic equations of tree and stand attributes. PREREQS: ST 552 [C] and /or instructor approval.

## FOR 534. ECONOMICS OF THE FOREST

RESOURCE (3). Economic aspects of forest production, regulation, and silvicultural applications. Microeconomic interactions of forest production and regulation and environmenta constraints. Offered alternate years. PREREQS: FOR 330 and FOR 331 or equivalent

FOR 536. WILDLAND FIRE SCIENCE AND MANAGEMENT (4). Principles and applications of fire as a natural resource management tool the role of fire in conservation management, restoration, and preservation of ecosystems Covers basic techniques and current research used to describe fire behavior and spread, fuels and fuel manipulation, and fire effects on the biota. Focus will be on fire as a natural process in ecosystem dynamics. Lec/lab.

FOR 542. INTERNATIONAL INTENSIVE SILVICULTURE (2). Operational and ecological aspects of intensive silvicultural management of planted forests around the world. Guest speakers in different countries will describe the type of silvicultural management that is carried out in the speakerss country from species and genetic selection, to harvest and rotation length, including site preparation and planting techniques Emphasis on comparing silvicultural practices in each country to the management of plantations in western Oregon. PREREQS: Graduate standing.

FOR 543. SILVICULTURAL PRACTICES (5).
Manipulation of immature and mature forest stands for various resource management objectives. Principles and techniques involving vegetation control, thinning, fertilizing, and harvesting. Environmental considerations related to stand treatments. Two-day field trips required. PREREQS: (FOR 240 or FES 240) and FOR 321 or equivalents. COREQS: FOR 429.
FOR 549. SILVICULTURAL INFLUENCES ON FOREST ECOSYSTEM DYNAMICS (3). Fundamental biological and ecological principles for the design and implementation of silvicultura regimes that achieve a wide diversity of forest ecosystem management objectives. PREREQS: Undergraduate course in silviculture and in forest mensuration.

## FOR 550. SUSTAINABLE FOREST

MANAGEMENT (3). Sustainable forestry as part of the global sustainability movement. History of sustainability and its influence on decisionmaking in forest management. Current dimensions of sustainability: forest certification, climate change, role of environmental ethics, biodiversity conservation, maintenance of long-term site productivity, conservation of soil and water resources, roles of social institutions, and links to concerns for social justice. PREREQS: Graduate student standing or permission of instructor.

FOR 557.TECHNIQUES FOR FOREST RESOURCE ANALYSIS (4). Use of linear programming, nonlinear programming, dynamic programming, and simulation to solve complex forest management problems, with emphasis on intertemporal multiple use scheduling. Forestry transportation problems, multiple-use allocation, and investment analysis. Field trips required. CROSSLISTED as FE 457/FE 557. PREREQS: AREC 351 or FOR 330
FOR 561. FOREST POLICY ANALYSIS (3).
Basic elements of forest policy problems, including resource allocation and efficiency, distribution, and interpersonal equity, taxation, regulation, and control, and planning and uncertainty. Emphasis on policy and analysis and its uses in policy decision.
FOR 562. NATURAL RESOURCE POLICY
AND LAW (3). First of two offerings designed to provide an introduction to current environmental and natural resource law issues and disputes for students who will have to meet, consult, and work with lawyers throughout their professional career. Focus is on mechanisms governing resource allocation within the constraints of private property rights. Emphasis is placed on the federal Endangered Species Act and its relation to water allocation and public trust doctrines. Students will also gain a broad understanding of regulatory
FOR 563. ENVIRONMENTAL POLICY AND
LAW INTERACTIONS (3). Second of two offerings designed to provide an introduction to current environmental and natural resource law issues and disputes for students who will have to meet, consult, and work with lawyers throughout their professional career. Focus is on the arena of regulatory environmental laws. Environmental torts, regulation of point and non-point source pollution under the federal Clean Water Act, wetlands protection, and laws governing agricultural and forest practices will be examined as examples of regulatory frameworks for achieving resource protection. Students will be exposed to the basic framework of federal laws regulating air and hazardous waste pollutants.
FOR 599. SPECIAL TOPICS (1-16). Topics of current importance in forest resources issues, education, policies, economics, management, business, social values, silviculture, and biometrics. Topics will change from term to term. May be repeated with different topics for credit. Section 8: Social aspects of natural resource management (3 credits) graded. This course is repeatable for a maximum of 16 credits. PREREQS: Senior or graduate standing.
FOR 601. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.
FOR 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits
FOR 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

FOR 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
FOR 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

FOR 699. SPECIAL TOPICS (1-16). Topics of current importance in forest resources issues, education, policies, economics, management, business, social values, silviculture, and biometrics. Topics will change from term to term. May be repeated with different topics for credit. This course is repeatable for a maximum of 16 credits.

FOR 808. WORKSHOP (1-9). This course is repeatable for a maximum of 16 credits.

## FACULTY

Professors Gupta, Hansen, Kamke, Li, Milota ${ }^{1}$, Morrell, Nairn, Simonsen Associate Professors Leavengood, Muszyski
Assistant Professors Knowles, Robinson, Riggio, Sinha
Instructor Smith

## AFFILIATE FACULTY

Boehner, Broline, Leichti, Panwar, Tokarczyk, Toppinen

## ADJUNCT FACULTY

A. Barbosa (Civil and Construction Engineering), B. Lachenbruch (Forest Ecosystems and Society), T. Miller (Civil and Construction Engineering) ${ }^{1}$

## ${ }^{1}$ Licensed Professional Engineer

## Undergraduate Major

Renewable Materials (BS, CRED, HBS)
Options
Art and Design
Science and Engineering
Management and Marketing

## Minor

Renewable Materials

## Graduate Major

Wood Science (MAIS, MS, PhD)
Graduate Areas of Concentration
Biodeterioration and Materials Protection
Chemistry and Chemical Processing
Forest Products Business and Marketing
Physics and Moisture Relations
Process Modeling and Analysis
Renewable Materials Science and Engineered Composites
Wood Anatomy and Quality
Wood Engineering and Mechanics

## Graduate Minor <br> Wood Science

Use of renewable materials is increasing as the world becomes more concerned about climate change and population growth. Americans use thousands of different products from renewable wood each year-by weight more than we do of steel, cement and plastic combined. To meet the growing demand for renewable
materials and to maximize the benefits of bio-energy and renewable products we must be smarter in how and where we use them. New opportunities for the world through renewable materials is the core of wood science and engineering at OSU.

The department is a world leader in research, outreach and education related to renewable wood-based materials and products. It offers an undergraduate degree program that prepares students for diverse careers in the private sector that is a major component of the Pacific Northwest economy and around the world. Graduates are in high demand as climate change concerns and advanced technology accelerate the transformation to a globally competitive, green renewable materials-based industry.
The department also offers MS and PhD degrees in Wood Science. These graduate programs ensure a foundation in science that is supplemented with programs tailored to student interest. Many students pursue dual majors in science or engineering fields. Interested students should see the department Web page for more information or contact the department head.

## RENEWABLE MATERIALS

## (BS, CRED, HBS)

The Bachelor of Science degree in Renewable Materials program is a multidisciplinary professional program that prepares students to work with renewable, plant-based materials to solve challenging world problems. Renewable materials such as wood, bamboo, canes, and agricultural fibers are examined to understand their characteristics and how to make useful products. Students gain broad perspectives on current issues associated with the sustainable utilization of renewable materials, including global trade, business innovation, energy production, and environmental impacts.

Graduates with degrees in renewable materials are highly sought after to work in business, manufacturing operations, and technical support where they use their knowledge and expertise to help develop sustainable products, industrial systems, and economies.
The curriculum includes a lowerdivision core in science and math with a choice of one of the required upper-division options in Art and Design (A\&D), Marketing and Management (M\&M), or Science and Engineering (S\&E).

- The A\&D option prepares students to engage with renewable materials on an aesthetic level. Artisticallyoriented students learn how materials function within the human space and gain an understanding of green buildings and architecture.
- The M\&M option is designed for students interested in business.

Completion of the M\&M option and meeting additional grade requirements of the College of Business will fulfill the requirements for a transcript-visible Business and Entrepreneurship minor.

- The S\&E option is a flexible program that allows technically oriented students to design a personalized curriculum that opens doors to jobs that solve complex problems or to graduate school. Students select courses (often minors) that complement their interests.
In addition to the course work, all students must have six months of work experience in an area related to their major. This is usually accomplished by two summers of employment in business or industry, but it may include work during the academic year. The department has an established network of connections to help place students in internships and summer employment.

## Renewable Materials Core

## Curriculum (46)

CH 121. General Chemistry (5)
CH 122. *General Chemistry (5)
FOR 112. Computing Applications in Forestry (3)
ST 351. Introduction to Statistical Methods (4)

ST 352. Introduction to Statistical Methods (4)

WSE 111. Renewable Materials for a Green Planet (2)
WSE 210. *Renewable Materials Technology and Utilization (4)
WSE 321. Chemistry of Renewable Materials (3)

WSE 322. Physical and Mechanical Properties of Renewable Materials (4)
WSE 324. Renewable Materials Laboratory (3)
WSE/DHE 415. *Renewable Materials in the Modern Age (3)
WSE 455. Marketing and Innovation in Renewable Materials (4)
WSE 465. Renewable Materials
Manufacturing Experience (2)

## Baccalaureate Core Courses (12)

Required to fulfill Renewable Materials Core Requirements.
Fitness: HHS 231. *Lifetime Fitness for Health (2)
and HHS 241. *Lifetime Fitness (1) or any PAC course (1-2)
Writing I: WR 121. *English Composition (3)
Writing II: WR 214. *Writing in Business (3) or WR 327. *Technical Writing (3)
Speech: COMM 111. *Public Speaking (3) or COMM 114. *Argument and Critical Discourse (3)
These courses must be taken for grades (not $S / U$ ).

## Footnotes:

* Baccalaureate Core Course (BCC)
${ }^{\wedge}$ Writing Intensive Course (WIC)
Major Code: 238

## OPTIONS

## ART AND DESIGN OPTION

The Art and Design option prepares students to engage with renewable materials on an aesthetic level, whether as interior designers, fine artists, or entrepreneurs. Students will gain not only an in-depth knowledge of renewable materials but also how these materials can function visually within the human space. In addition to the aesthetic aspect, students will gain an understanding of green building materials and green architecture. Students in the A\&D option may also earn a visual arts minor by completing 31 credits of applicable course work.

## Art and Design Core (

## 60 or 61 credits)

ART 115. Foundations: 2-D (4)
ART 117. Foundations: 3-D (4)
ART 121. Foundations: Computers in Visual Arts (4)
ART 131. Foundations: Drawing I (4)
ART 206. *Introduction to Art History Western (3)
ART 234. Drawing II/Figure (4)
ART 263. Digital Photography (4)
ART 291. Sculpture I (4)
ART 331. Drawing Concepts (4)
MTH 111. *College Algebra (4)
MTH 245. *Mathematics for Management,
Life, and Social Sciences (4)
WSE 266. *Industrial Hemp (3)
WSE 392. *Bamboolooza: The Fascinating World of Bamboo (3)
WSE 414. ${ }^{\wedge}$ Art and Design Capstone (3)
WSE 461. Manufacturing with Renewable Materials I (4)
or WSE 462. Manufacturing with
Renewable Materials II (4)
WSE 465. Renewable Materials
Manufacturing Experience (2)
WSE 471. Renewable Materials in Building Construction (3)
or WSE 475. Environmental Assessment of Building Materials (4)

## Approved Area of Concentra-

tion: A 30-credit program of study proposed by the student and approved by the WSE Department Head, including 12 upper division studio credits plus 12 credits of Restricted Electives from the list below.

## Restricted Electives (minimum of

## 12 credits)

ART 101. *Introduction to the Visual Arts (4)

ART 204. *Introduction to Art History Western (3)
ART 205. *Introduction to Art History Western (3)
ART 208. *Introduction to Asian Art (3)
ART 215. Color in the Visual Arts (4)
ART 310. *Early Chinese Art and Archaeology (3)
ART 311. *Late Chinese Art and Culture (3)
ART 313. *Art of Japan (3)
ART 351. Installation (4)
ART 367. *History of Design (3)
FES 341. Forest Ecology (3)

WSE 373. Wood Machining I (3)
WSE 374. Wood Machining II (3)
WSE 375. Wood Machining III (3)
WSE 499. Special Topics [Peru Study Abroad] (6)

## Total=90 or 91

Baccalaureate Core Courses (15-18)
(Not satisfied by the Renewable
Materials core or the option.)
Courses meeting other Baccalaureate requirements for the following categories not specified by the Renewable Materials Core or the option can be found in the OSU Catalog online at http://catalog. oregonstate.edu/bcc.aspx.
Biological Science (4)
One additional lecture/lab combination from either Physical Science or Biological Science (4)
Cultural Diversity (3) [If not met by a Restricted Elective]
Difference, Power, and Discrimination (3)
Contemporary Global Issues (3)
Plus additional Free Electives sufficient to ensure 180 total credits ( 60 must be upper division).
Note: Completion of the A\&D option and meeting additional studio and grade requirements will fulfill the requirements for a transcript visible Visual Arts minor.

## Footnotes:

* Baccalaureate Core Course
${ }^{\wedge}$ Writing Intensive Course (WIC)

## Option Code: 478

## MANAGEMENT AND

## MARKETING OPTION

The option provides students with the skills to manage organizations to be competitive in the global renewable materials marketplace or develop innovative and effective marketing programs for green products.
Marketing and Management Core (71)

BA 211. Financial Accounting (4)
BA 213. Managerial Accounting (4)
BA 230. Business Law (4)
BA 260. Introduction to Entrepreneurship (4)

BA 351. Managing Organizations (4)
BA 360. Introduction to Financial
Management (4)
BA 390. Marketing (4)
ECON 201. *Introduction to
Microeconomics (4)
ECON 202. *Introduction to
Macroeconomics (4)
FES 141. Tree and Shrub Identification (3)
[Terminated winter 2017]
FES 240. *Forest Biology (4)
or BI 101. *General Biology (4)
or BI 211. *Principles of Biology (4)
FOR 111. Introduction to Forestry (3)
MTH 111. *College Algebra (4)
MTH 241. *Calculus for Management and Social Science (4)
WSE 453. ^Global Trade in Renewable Materials (3)
WSE 461. Manufacturing with Renewable Materials I (4)

WSE 462. Manufacturing with Renewable Materials II (4)
WSE 471. Renewable Materials in Building Construction (3)
WSE 473. Bioenergy and Environmental Impact (3)

## Restricted Electives

(minimum of 12)
Select a minimum of 12 credits from the following list, as a base for an "Area of Concentration" as described below:
AEC/ECON 352. *Environmental
Economics and Policy (3)
BA 357. Operation Management (4)
BA 458. Innovation and New Product Development (4)
BA 460. Venture Management (4)
ECON 340. International Economics (4)
MGMT 364. Project Management (4)
MGMT 452. Leadership (4)
MRKT 396. Fundamentals of Marketing Research (4)
MRKT 497. Global Marketing (4)
COF Study Abroad courses, various (6)
Approved "Area of Concentration" - A 24-credit program of study proposed by the student and approved by the WSE Department Head. Must include 12 credits of Restricted Electives from the list above, and 20 upper-division credits.

## Total=95

Baccalaureate Core Courses (22)
Not satisfied by the Renewable Materials core or the option.
Courses meeting other Baccalaureate requirements for the following categories not specified by the Renewable Materials Core or the option can be found in the
OSU Catalog online at http://catalog. oregonstate.edu/bcc.aspx.
One additional lecture/lab combination
from either Physical Science or Biological
Science (4)
Cultural Diversity (3)
Difference, Power, and Discrimination (3)
Literature and Arts (3)
Western Culture (3)
Science, Technology, and Society Synthesis (3)

Contemporary Global Issues (3)
Plus additional Free Electives sufficient to ensure 180 total credits ( 60 must be upper division).
Note: Completion of the Management and Marketing option and meeting additional grade requirements of the College of Business will fulfill the requirements for a transcript-visible Business and Entrepreneurship minor. Students who graduate and complete the minor may also apply to the College of Business to enroll in a 58-credit, four-term MBA

## degree program.

## Footnotes:

* Baccalaureate Core Course (BCC)
$\wedge$ Writing Intensive Course (WIC)
Option Code: 288

## SCIENCE AND

## ENGINEERING OPTION

This is a flexible, math- and scienceintensive program that allows students to design a personalized curriculum that opens doors to jobs that solve complex problems, create efficiencies, foster intelligent use of renewable materials, or to graduate school. Students select a group of courses (often minors) that complement their interests.

## Science and Engineering Core (72)

BA 215. Fundamentals of Accounting (4)
BA 230. Business Law I (4)
CH 123. *General Chemistry (5)
ECON 201. *Introduction to
Microeconomics (4)
ECON 202. *Introduction to
Macroeconomics (4)
FES 141. Tree and Shrub Identification (3)
[Terminated winter 2017]

## RENEWABLE MATERIALS MINOR

The minor in Renewable Materials exposes students to the world of renewable materials science and technology and will enable students in other majors to gain a specialization that will make them more competitive for careers associated with green materials and allied industries.

## Core Courses ( 16 credits)

CH 122 . *General Chemistry (5)
WSE 210. *Renewable Materials Technology and Utilization (4)
WSE 321. Chemistry of Renewable Materials (3)

WSE 322. Physical and Mechanical
Properties of Renewable Materials (4)
Select from the following courses
(minimum of 11 credits)
FOR 111. Introduction to Forestry (3)
WSE 266. Industrial Hemp (3)
WSE 324. Renewable Materials Laboratory (3)

WSE 373. Wood Machining I (3)
WSE/DHE 415. *Renewable Materials in the Modern Age (3)
WSE 453. ^Global Trade in Renewable
Materials (3)
WSE 455. Marketing and Innovation in
Renewable Materials (4)
WSE 458. Design of Wood Structures (3)
[Effective winter 2015]
WSE 461. Manufacturing with Renewable Materials I (4)
WSE 462. Manufacturing with Renewable Materials II (4)
WSE 465. Renewable Materials
Manufacturing Experience (2)
WSE 470. *Forests, Wood, and Civilization (3)

WSE 471. Renewable Materials in Building
Construction (3)
WSE 473. Bioenergy and Environmental Impact (3)
WSE 475. Environmental Assessment of Building Materials (4)
Students must complete a minimum of 27
credits for the minor, at least 12 of which must be upper division.

## Footnotes:

* Baccalaureate Core Course (BCC)
$\wedge$ Writing Intensive Course (WIC)

## Minor Code: 238

WOOD SCIENCE (MS, PhD, MAIS)
Graduate Areas of Concentration
Biodeterioration and materials protection, chemistry and chemical processing, forest products business and marketing, physics and moisture relations, process modeling and analysis, renewable materials science and engineered composites, wood anatomy and quality, wood engineering and mechanics
The Department of Wood Science and Engineering offers graduate programs leading toward the Master of Science and Doctor of Philosophy degrees in Wood Science. Thesis research and academic programs can be developed in the many special disciplines represented by the faculty. Minors are most commonly selected
from statistics, engineering, chemistry, botany, plant pathology, or business.
Many students pursue a dual major degree in wood science and a field of engineering or science. A wide variety of science, engineering and business opportunities are available.
Graduate students in wood science come from a wide range of undergraduate degree programs in science, engineering, and business.

Excellent laboratories are available for teaching and research in Richardson Hall, Peavy Hall, and the Oak Creek Laboratory. Student research involves seeking solutions to current problems in renewable materials science, other sciences such as chemistry, physics and biology, engineering, business or related fields. Most graduate students are employed as part-time graduate research assistants.
Graduates with advanced degrees find employment in research and development, management or technical positions in the private sector, as university faculty or in technical public service positions.

## MS in Wood Science (45 Credits)

## Required

WSE 503. Thesis (6-12)
WSE 507. Seminar: Section 1 (1) Required to be taken during 1st year
WSE 507. Seminar: Section 2 (1)
WSE 520. The Global Context of the Forest Sector (3)
WSE 521. Wood Science I (4)
WSE 522. Wood Science II (4)
Integrated minor course work or outside
minor course work* (Minimum of 15)
Additional approved courses** (6-8)

## PhD in Wood Science (108 Credits)

## Required

WSE 520. The Global Context of the Forest Sector (3)
WSE 521. Wood Science I (4)
WSE 522. Wood Science II (4)
WSE 603. Thesis (36+)
WSE 607. Seminar: Section 1 (1) Required to be taken during 1st year
WSE 607. Seminar: Section $2(1,1)$ To be taken twice
Integrated minor course work or outside
minor course work* (Minimum of 18)
Additional approved courses ** (40+)

* Course work to be determined by your committee at program of study meeting
** Approved courses include all 500- and 600-level courses in Wood Science and Engineering
Major Code: 3690

## WOOD SCIENCE

## GRADUATE MINOR

For more details, see the departmental advisor or major professor.
Minor Code: 3690

## ■ WOOD SCIENCE AND ENGINEERING COURSES

WSE 111. RENEWABLE MATERIALS FOR A GREEN PLANET (2). Renewable materials are an integral part of modern lifestyles, and current societal trends point to increased use of renewable materials. This course provides an overview of renewable materials and their current applications in society. As an overview course, it covers a breadth of renewable material uses and exposes students to life-cycle thinking.
WSE 210. *RENEWABLE MATERIALS
TECHNOLOGY AND UTILIZATION (4).
Characteristics and uses of renewable fiber products including wood, bamboo and grasses; manufacturing processes; effect of tree growth and harvesting on renewable products manufacturing and properties. Wood identification. Lec/lab. (Bacc Core Course)

WSE 211. WOODTURNING WITH SCIENCE I (4). An introduction to scientific woodturning. Students will get a grounding in tools, lathes, sharpening, and set-up, and then will transition into turning basic forms (spindle and bowl). Particular relevance will be placed upon grain orientation, wood moisture content, wood anatomy, wood chemistry, wood species and extractive effects, and how all of these attributed affect both form and function. Class instruction will be entirely studio based. CROSSLISTED as ART 211. This course is repeatable for a maximum of 8 credits. PREREQS: WSE 210* [D-]
WSE 266. *INDUSTRIAL HEMP (3). Introduction to the botany, biology and agronomy of the hemp plant, and the origins, historical contexts and implications of contemporary legal and social issues surrounding its use for food, fiber, and building products. Taught via Ecampus only. (Bacc Core Course)
WSE 299. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits.
WSE 321. CHEMISTRY OF RENEWABLE
MATERIALS (3). Chemical structures and chemical properties of renewable plant-based materials will be taught at molecular levels. Chemical compositions of different renewable materials will be covered. Chemical and biochemical modifications and applications or renewable materials will be discussed in detail. Lec/lab. PREREQS: CH 122 [D-] or CH 202 [D-] or CH 232 [D-] or CH 232H [D-]
WSE 322. PHYSICAL AND MECHANICAL PROPERTIES OF RENEWABLE MATERIALS
(4). Introduction to thermodynamics and mechanics of plant fibers, solid wood and biobased composites: hygroscopicity; heat and mass transport; statics, elasticity and strength of materials; mechanical properties. PREREQS: WSE 321 [C-]

## WSE 324. RENEWABLE MATERIALS

LABORATORY (3). Integrates the knowledge gained in the core science courses (WSE 321 and WSE 322) to help students obtain a deeper understanding of how chemistry, physics, and anatomy affect renewable material properties. The course uses renewable fiber materials such as hardwoods, softwoods, natural fibers, bamboo, composite wood products (e.g. OSB, plywood, MDF, etc.) and fiber-based products (e.g. woodplastic composites, natural fiber composites, straw panels, paper, etc.) to examine the intricate relationships between fundamental properties and performance. Lec/lab. PREREQS: (WSE 321 [C-] and WSE 322 [C-] )

WSE 373. WOOD MACHINING I (3). Familiarizes students with precision, accuracy standards and procedures necessary in the manufacture of value-added secondary wood products. Lab fee. Lec/lab.
WSE 374. WOOD MACHINING II (3). Students will become familiar with using CAD/CAM software and CNC techniques to take 3D product designs
from concept through planning, to manufacturing, using modern wood product production workflows Skills, software and concepts developed through the course are applicable to a wide variety of industrial design and production situations. Lec/ lab/rec. Lab fee. PREREQS: Instructor's approval required. WSE 373 is recommended.

WSE 375. WOOD MACHINING III (3). An experiential learning environment in which students design, produce, market, and sell a custom wood product in a virtual business setting. This course is intended to foster creativity, innovation, entrepreneurship, and problem solving, as well as enhance skills with woodworking equipment. Lec/lab. PREREQS: WSE 373 and WSE 374 highly recommended.
WSE 392. *BAMBOOLOOZA: THE
FASCINATING WORLD OF BAMBOO (3)
An exploration of the world of bamboo and its application to renewable products. This course provides an in-depth understanding of a renewable material bamboo from its native form to processed products. Additionally, this course discusses the utilization and perception of bamboo in different societies of the world. Taught via Ecampus only. (Bacc Core Course) PREREQS: Junior in good academic standing.

WSE 399. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits.

WSE 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
WSE 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits.
PREREQS: Departmental approval required.
WSE 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

WSE 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

WSE 413. WOODTURNING WITH SCIENCE
II (4). An in-depth look at how character in wood (figure, spalting, knots, etc.) affects machinability and output in both functional and aesthetic turning. Students will work with a wide range of spalted wood types and figure across numerous species while working on advanced turning forms. Particular emphasis will be placed upon how figure affects grain orientation, how spalting affects density and stability, and how the challenges with character wood can be overcome without specialty tools. Class instruction will be entirely studio based. CROSSLISTED as ART 413. This course is repeatable for a maximum of 8 credits. PREREQS: WSE 210 [C-] and WSE 211 [C-]

WSE 414. ^ART AND DESIGN CAPSTONE (3). For the final term of a student's last year in the Renewable Materials Industrial Design program, this course brings together the basic collaborative design elements and technical background of each student in the creation of collaborative design projects with the intention of giving students real-world, problem-based design experience. (Writing Intensive Course) PREREQS: Senior standing
WSE 415. *RENEWABLE MATERIALS IN THE MODERN AGE (3). Micro-renewable materials anatomy course taught within an interdisciplinary, hands-on format. Suitable for all majors and backgrounds. Course covers the micro- and macro-anatomy of wood and other common renewable materials like bamboo and cellulose fibers. Utilizes studio-based learning. CROSSLISTED as DHE 415. (Bacc Core Course)

WSE 415H. *RENEWABLE MATERIALS IN
THE MODERN AGE (3). Micro-renewable materials anatomy course taught within an interdisciplinary, hands-on format. Suitable for all majors and backgrounds. Course covers the micro- and macro-anatomy of wood and other common renewable materials like bamboo and cellulose fibers. Utilizes studio-based learning.

CROSSLISTED as DHE 415H. (Bacc Core Course) PREREQS: Honors College approval required.

## WSE 444. STRAND-BASED COMPOSITES

 MANUFACTURE (1). The strand-based composites manufacturing process uses the results of research projects and the instructor's mill experience. All aspects of the process from wood procurement through pressing are discussed. This course will be valuable to those interested in a manufacturing career.WSE 453. ^ GLOBAL TRADE IN RENEWABLE MATERIALS (3). Provides basic skills to operate in the global business environment. To include understanding the role of culture in international business, types of international business, policy considerations, ethics, trade barriers, exchange rates, shipping, global industry structure, and other current issues. Examines specific examples from renewable materials industries. (Writing Intensive Course) PREREQS: ECON 201 and ECON 202 or instructor consent.

WSE 455. MARKETING AND INNOVATION IN RENEWABLE MATERIALS (4). Marketing, innovation and their application in the renewable products industries.
WSE 458. DESIGN OF WOOD STRUCTURES
(3). Study of basic wood properties and design considerations. Design of wood connectors, beams, columns, and beam columns. Introduction to plywood and glue laminated members. Design of structural diaphragms and shear walls. Taught via Ecampus only. PREREQS: CE 381 [C] and /or equivalent or instructor permission.

## WSE 461. MANUFACTURING WITH

RENEWABLE MATERIALS I (4). Manufacturing renewable materials such a wood, bamboo, hemp, and cereal straws into products requires size reduction and separation of components. The components are then further processed, in many cases by joining with glue or fasteners, to create a usable product. The major processing steps for the conversion of raw materials into products will be discussed. PREREQS: WSE 210 [C-] and WSE 321 and WSE 324

WSE 462. MANUFACTURING WITH RENEWABLE MATERIALS II (4). The second of a two-term series exploring technologies and management practices associated with manufacturing products from renewable materials. Subjects covered include process automation, quality control, safety, and preventive maintenance programs. PREREQS: WSE 461 or WSE 561; may be waived with instructor approval.

## WSE 465. RENEWABLE MATERIALS

MANUFACTURING EXPERIENCE (2). Learning about and visiting a number of renewable materials industrial and commercial operations representing all parts of the renewable materials value chain. The class will meet daily for one 5 -day week immediately prior to the start of fall term. During the week, the students and at least one instructor will meet daily. Lectures will precede visits to industrial plants, mills and sites. At the end of the day, an instructor will participate in a debriefing session, reiterating what was learned during the day. Students will then submit a report on the day's activities. The class includes daily travel and overnight stays. This course is repeatable for a maximum of 4 credits.

## WSE 470. *FORESTS, WOOD, AND

CIVILIZATION (3). Multidisciplinary examination of issues related to the roles of forests, trees, and wood in civilization, as providers of commodities, ecosystem services, and spiritual and artistic inspiration. Issues include global supply and demand, wood ownership and political power, and perceptions and uses of forest resources in different societies. (Bacc Core Course)
WSE 470H. *FORESTS, WOOD, AND
CIVILIZATION (3). Multidisciplinary examination of issues related to the roles of forests, trees, and wood in civilization, as providers of commodities,
ecosystem services, and spiritual and artistic inspiration. Issues include global supply and demand, wood ownership and political power, and perceptions and uses of forest resources in different societies. (Bacc Core Course) PREREQS: Honors College approval required.

WSE 471. RENEWABLE MATERIALS IN BUILDING CONSTRUCTION (3). Building construction is a major application of renewable materials, primarily wood. This course explores material selection options, applications, and performance characteristics. Residential construction is emphasized, but non-residential construction applications will also be discussed. Concepts and interpretation of life cycle assessment are introduced. PREREQS: Junior standing.
WSE 473. BIOENERGY AND ENVIRONMENTAL IMPACT (3). Explores world's use of woody biomass fuels, their potential to contribute to our region's energy supply, and conversion technologies such a direct combustion, pyrolysis, and thermochemical modification. Also examines emissions and other environmental impacts of utilizing renewable materials to generate energy and manufacture products. PREREQS: ((MTH 111 [D-] or MTH 112 [D-] or MTH 231 [D-] or MTH 241 [D-] or MTH 245 [D-] or MTH 251 [D-] or MTH 251 H [D-] ) and (CH 122 [D-] or CH 222 [D-] or CH 232 [D-] or CH 232 H [D-] )) and /or graduate standing.
WSE 475. ENVIRONMENTAL ASSESSMENT OF BUILDING MATERIALS (4). Study of sustainability in the built environment from a building material perspective. Understanding the ecology of building materials and assessing their environmental sustainability performance using life cycle analysis. Critical discussion of case studies and future of LCA in the built environment. PREREQS: Junior in good academic standing.
WSE 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 99 credits.
WSE 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.
WSE 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

WSE 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.

WSE 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

WSE 507. SEMINAR (1). Section 1: Beginning Seminar. Section 2: Seminar. Graded P/N. This course is repeatable for a maximum of 99 credits.
WSE 514. ART AND DESIGN CAPSTONE
(3). For the final term of a student's last year in the Renewable Materials Industrial Design program, this course brings together the basic collaborative design elements and technical background of each student in the creation of collaborative design projects with the intention of giving students real-world, problem-based design experience. PREREQS: Senior standing

WSE 515. RENEWABLE MATERIALS IN THE MODERN AGE (3). Micro-renewable materials anatomy course taught within an interdisciplinary, hands-on format. Suitable for all majors and backgrounds. Course covers the micro- and macro-anatomy of wood and other common renewable materials like bamboo and cellulose fibers. Utilizes studio-based learning. CROSSLISTED as DHE 515.
WSE 520. THE GLOBAL CONTEXT OF THE FOREST SECTOR (3). Provides a broad knowledge base of business and marketing practices in the global forest industry. Includes a module on research ethics that fulfills OSU Graduate School requirements.
WSE 521. WOOD SCIENCE I (4). A
comprehensive overview and integration of wood
anatomy, wood physics, wood chemistry and wood mechanics; global contemporary issues impacting the wood and fiber sector; integration of basic wood sciences to understand the complex relationships between environment and wood material properties, and the influence of both on the use of wood-based materials.

WSE 522. WOOD SCIENCE II (4). Continuation of the comprehensive overview and integration of wood and fiber anatomy, physics, chemistry, and mechanics; integration of basic wood science to understand relationships with wood and fiber properties and their impact on final use. Focus on biological, chemical and physical degradation of wood; adhesion; and physical and engineering properties of wood. Lec/lab.
WSE 530. POLYMER COMPOSITES (3). A comprehensive survey of the material and mechanical properties of polymer-based composite materials including failure mechanisms, interfacial and nanoscale effects, and transport and thermal properties. PREREQS: CHE 545. Recommended: multivariable calculus.
WSE 535. POLYMER SYNTHESIS AND STRUCTURE (3). A comprehensive overview of various synthetic methods for various synthetic polymers; structures of various synthetic and natural polymers. PREREQS: 3 credits of undergraduate organic chemistry or CH 331 or CH 334 are recommended.
WSE 553. GLOBAL TRADE IN RENEWABLE MATERIALS (3). Provides basic skills to operate in the global business environment. To include understanding the role of culture in international business, types of international business, policy considerations, ethics, trade barriers, exchange rates, shipping, global industry structure, and other current issues. Examines specific examples from renewable materials industries. PREREQS: ECON 201 and ECON 202 or instructor consent.

WSE 555. MARKETING AND INNOVATION IN RENEWABLE MATERIALS (4). Marketing, innovation and their application in the renewable products industries.
WSE 558. WOOD DESIGN (4). Study of basic wood properties and design considerations. Design and behavior of wood connectors, beams, columns and beam columns. Introduction to plywood and glue laminated members. Analysis and design of structural diaphragms and shear walls. Lec/lab. CROSSLISTED as CE 584. PREREQS: CE 383 or CE 481 with minimum grade of C, senior standing or graduate

## WSE 561. MANUFACTURING WITH

RENEWABLE MATERIALS I (4). Manufacturing renewable materials such a wood, bamboo, hemp, and cereal straws into products requires size reduction and separation of components. The components are then further processed, in many cases by joining with glue or fasteners, to create a usable product. The major processing steps for the conversion of raw materials into products will be discussed. PREREQS: WSE 210 and WSE 321 and WSE 324

WSE 562. MANUFACTURING WITH RENEWABLE MATERIALS II (4). The second of a two-term series exploring technologies and management practices associated with manufacturing products from renewable materials. Subjects covered include process automation, quality control, safety, and preventive maintenance programs. Graduate students are responsible or preparing case studies to demonstrate how manufacturing management programs are integrated into operations. PREREQS: WSE 461 or WSE 561; may be waived with instructor approval.
WSE 571. RENEWABLE MATERIALS IN
BUILDING CONSTRUCTION (3). Building construction is a major application of renewable materials, primarily wood. This course explores material selection options, applications, and performance characteristics. Residential
construction is emphasized, but non-residential construction applications will also be discussed. Concepts and interpretation of life cycle assessment are introduced. PREREQS: Junior standing.
WSE 573. BIOENERGY AND ENVIRONMENTAL
IMPACT (3). Explores world's use of woody biomass fuels, their potential to contribute to our region's energy supply, and conversion technologies such as direct combustion, pyrolysis, and thermochemical modification. Also examines emissions and other environmental impacts of utilizing renewable materials to generate energy and manufacture products. PREREQS: (MTH 111 or MTH 112 or MTH 231 or MTH 241 or MTH 245 or MTH 251 or MTH 251 H ) and (CH 122 or CH 222) or graduate standing.

WSE 575. ENVIRONMENTAL ASSESSMENT OF BUILDING MATERIALS (4). Study of sustainability in the built environment from a building material perspective. Understanding the ecology of building materials and assessing their environmental sustainability performance using life cycle analysis. Critical discussion of case studies and future of LCA in the built environment. PREREQS: Junior in good academic standing.

## WSE 592. ADVANCED WOOD DESIGN (4)

 Study of advanced concepts in wood properties and design. Design and analysis of specialty wood connectors. Design of wood members for adverse conditions including fire design. Common failure mechanisms and forensic engineering concepts. Design for durability. Lec/lab. PREREQS:Graduate only. Undergraduates can take it for graduate credits. Understanding of basic concepts in mechanics and timber design is preferred.
WSE 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 99 credits.
WSE 601. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

WSE 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

WSE 605. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.
WSE 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
WSE 607. SEMINAR (1). Section 1: Beginning Seminar. Section 2: Graduate Seminar. This course is repeatable for a maximum of 99 credits.
WSE 611. SELECTED TOPICS IN WOOD AND FIBER SCIENCE (1-3). This course is repeatable for a maximum of 6 credits.

WSE 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## Major Code: 910

## SUSTAINABILITY (BS, HBS)

Also available via Ecampus.
OSU Main Campus Contact: Ann
Scheerer, 3017B Agricultural and Life Sciences Building, Oregon State University, Corvallis, OR 97331; 541-737-5687; Ann.

Scheerer@oregonstate.edu or the Sustainability Double Degree academic advisor, Sus.Advising@oregonstate.edu.

OSU-Cascades Campus Contact:
Matt Shinderman, Forest Ecosystems and Society, Oregon State University Cascades; 541-322-3159; matt.shinderman@ osucascades.edu.

## Sustainability Core (17-20)

All Sustainability Majors and Minors must take the five courses that make up the Sustainability Core: SUS 304, SUS 350, an ecological sustainability course (SUS 102 recommended), a social sustainability course (choose one below), and an economic sustainability course (choose one below):

SUS 304. *Sustainability Assessment (4)
SUS 350. *Sustainable Communities (4)

## Ecological Dimensions of

 Sustainability (3-4)Select 3 to 4 credits from the following:
BI 301. *Human Impacts on Ecosystems (3)
SUS 102. *Introduction to Environmental Science and Sustainability (4)

## Social Dimensions of Sustainability

 (3-4)Select 3 to 4 credits from the

## following:

SOC 381. Social Dimensions of
Sustainability (4)(Ecampus only)
SOC 480. *Environmental Sociology (4)
SOC 481. *Society and Natural Resources (4)
SOC/FES/ANS/FW 485. *Consensus and Natural Resources (3)
SUS 420. Social Dimensions of Sustainability (3)(Ecampus, Cascades Campus )

## Economic Dimensions of

Sustainability (3-4)
Select 3 to 4 credits from the following:
AEC 250. *Introduction to Environmental Economics and Policy (3)
AEC 351. *Natural Resources Economics and Policy (3)
AEC/ECON 352. *Environmental
Economics and Policy (3)
AEC 434. ${ }^{\wedge}$ Measuring Resource and
Environmental Impacts (4)

## Practicum (3-12)

Sustainability majors are required to complete a minimum of 3 Practicum credits. Before registering for a practicum students must get practicum approved by Sustainability Double Degree advisor. Email: Sus.advising@oregonstate.edu.
SUS 401. Research (3-12)
SUS 410. Internship (3-12)
SUS 499. Special Topics (3-12)
Note: SUS 410 credits may be achieved by participation in an $\mathrm{IE}_{3}$ Global Internship with advisor approval.

## Remaining Elective Credits (4-16)

In addition to the required credits specified above, students must work with the sustainability program advisor to select
courses relevant to their discipline and career path interests.

## Credits total=36

Classes that can be used to fulfill remaining requirements are listed below. Students are NOT limited to taking courses within their primary major of study. The Sustainability advisor(s) will approve courses not listed here if they have an obvious link to sustainability and fulfill the intent of the double degree. See the OSU Sustainability Office list of sustain-ability-related courses.

## Business

AEC 250. *Introduction to Environmental Economics and Policy (3)
AEC 253. *Environmental Law, Policy and Economics (4)
AEC 351. *Natural Resource Economics and Policy (3)
AEC/ECON 352. *Environmental
Economics and Policy (3)
AEC 434. ${ }^{\wedge}$ Measuring Resource and
Environmental Impacts (4)

Exciting and diverse educational opportunities are offered through the graduate programs of Oregon State University's 11 colleges which encompass 73 major disciplines and 19 different graduate degree types. A land, sea, space, and sun grant university, OSU enrolls more than 4,400 graduate students, representing more than 70 countries and every state in the nation.

$\Delta$t OSU, maximum opportunity is provided for the integration of graduate instruction and research. The graduate faculty ( 1,800 members) is selected on the basis of training, experience, research, and evidence of the ability to successfully direct and supervise graduate students.

All study beyond the bachelor's degree at Oregon State University is conducted through the Graduate School. The establishment of departmental graduate programs and the formulation and direction of individual student programs are responsibilities of the departments, under the general rules and requirements of the Graduate School.

## INTRODUCTION

Oregon State University has a global reputation for excellence in teaching, research, and engagement.

Oregon State is one of only two land, sea, space and sun grant universities in the nation and is the only university in Oregon to have the Carnegie Classifications for both Very High Research Activity and Community Engagement. OSU is comprised of 11 academic colleges with strengths in natural resources, earth dynamics and sustainability, life sciences, innovation and entrepreneurship, and the arts and sciences. OSU has facilities and/ or programs in every county in the state, including 11 regional experiment stations, 35 county extension offices, a branch campus in Bend, a major marine science center in Newport, and a range of programs and facilities in Portland. OSU is Oregon's largest public research university, conducting more than 60 percent of the research funded throughout the state's university system.

A dedicated and highly regarded graduate faculty, a well-equipped library, comprehensive special collections, and exceptional research facilities keep Oregon State at the leading edge of graduate education. Linus Pauling, an Oregon State alumnus and the only person to win individual Nobel prizes in two different categories, selected OSU as the repository for his papers.

Research and teaching assistantships are available to allow you the opportunity to work with people who are leaders in their fields while furthering your education. In addition to being outstanding teachers, many OSU faculty members are internationally renowned for their research. In fiscal year 2012, Oregon State University received more than $\$ 81$ million in external support for research and scholarship.

With these strengths in research and teaching, Oregon State produces degree holders who can compete successfully with the best in their fields.
But life isn't all study and research, and when you're ready to take a break, you'll find that Oregon State is the ideal location
for that as well. Whether you want to be active or relax, attend a sports event or a lecture, go to a concert or a play, or do just about anything else, you're likely to find what you want at Oregon State or just a short distance away.

OSU is located in Corvallis, a community of 54,670 people situated in the Willamette Valley between Portland and Eugene. Ocean beaches, lakes, rivers, forests, high desert, the rugged Cascade and Coast Ranges, and the urban amenities of the Portland metropolitan area are all within a 100 mile drive of Corvallis. More than 24,500 undergraduate, 590 first professional, and 4,400 graduate students are enrolled at OSU, including more than 7,200 students of color and 3,500 international students.

The stunning, park-like setting of the OSU campus is comprised of 400 acres of stately buildings, seasonal landscaping and green, open spaces. Housing for many OSU undergraduate and graduate students is provided by residence halls on campus, and cooperatives, sororities, fraternities, and family student housing just off the central campus.

In addition to the main campus, the state owns and leases many acres of forest and farmland that are used by the university for instruction and research. OSU's Hatfield Marine Science Center at Newport serves as the main coastal facility for Sea Grant, oceanography, and fisheries programs. For many graduate students, study and research through these offcampus facilities means a direct look at the natural resources and characteristics of the Pacific Northwest.

The institution that is now OSU opened in 1858 as Corvallis College, a small academy. College-level study began about 1865, and the first three baccalaureate degrees were awarded in 1870. Graduate programs began a short time later. In 1868, Corvallis College was designated by the Oregon Legislature as the "agricultural college of the state of Oregon." From 1868 until 1885, the college continued under the direction of the Methodist Episcopal Church but was partly state supported. In 1885, the state of Oregon assumed full control of the institution.

Oregon State granted its first advanced degree (A.M.) in 1876. Residence requirements for the master's degree were announced in 1897.

Responsibility for graduate study at OSU has changed a number of times over the years. In 1910 it was placed under a standing committee of the faculty. In 1933 all graduate work in the State System of Higher Education was placed in an interinstitutional graduate division. At Oregon State, an associate dean and an institutional graduate council were put in immediate charge of graduate study. The

first doctor of philosophy degrees were conferred by Oregon State in 1935. In October 1946, the State Board of Higher Education again gave the institutions direct responsibility for their graduate programs and assigned graduate work at Oregon State to the Graduate School.

The primary aims of the Oregon State University Graduate School are to prepare students to create new knowledge and to assist students in acquiring specialized knowledge in one or more disciplines(s). At the same time, graduate programs may provide the student with the opportunity to acquire an educational background broader than his or her specialty. The Graduate School and graduate programs provide additional opportunities to learn and practice vital professional and leadership skills.
The graduate educational process is designed to help the student attain a high level of scholarship. The student is assisted in developing the skills of assimilation, interpretation, organization, evaluation, and application of knowledge. Such scholarship increases the student's breadth of learning and prepares him or her for roles of leadership and participation in the broader areas of culture and society. The ideal graduate program permits the student to specialize, but at the same time develop a broad educational base.

The communication of new knowledge to both technical and non-technical audiences is an important part of the educational process. Creating, interpreting, and communicating knowledge are related processes at OSU. The Graduate School provides opportunities for students to develop these skills. Graduate students have the opportunity to distinguish themselves from their peers by taking advantage of a broad range of additional educational offerings. These include professional and leadership skills vital for student success in their future employment.

GRADUATE MAJORS, MINORS, AND ACADEMIC UNITS

| Graduate Major <br> Note: Most graduate majors may be used as a graduate minor. Also see Graduate Minor chart for additional fields approved as graduate minors only. | Graduate Degrees | Academic Unit <br> Note: The academic unit is responsible for directing and managing the majors and minors. | Graduate Areas of Concentration <br> Note: Areas of concentration are for reference only. They do not appear on transcripts or diplomas. |
| :---: | :---: | :---: | :---: |
| Adult and Higher Education | EdD, EdM, MAIS, PhD | College of Education |  |
| Agricultural Education | MS | Dept. of Agricultural Education and General Agriculture | Teacher preparation, leadership and communication in agriculture |
| Animal Science | MS, PhD | Dept. of Animal and Rangeland Sciences | Animal nutrition, dairy production (MS only), embryo physiology, endocrinology, growth and development, livestock management (MS only), nutritional biochemistry, reproductive physiology |
| Applied Anthropology | MA, PhD | School of Language, Culture, and Society |  |
| Applied Biotechnology | PSM | Graduate School |  |
| Applied Economics | MA, MS, PhD | College of Agricultural Sciences | Resource and environmental economics, trade and development, public health economics, transportation economics (MA, MS only) |
| Applied Ethics | MA | School of History, Philosophy and Religion | Bioethics, environmental ethics, and art and morality |
| Applied Systematics in Botany | PSM | Dept. of Botany and Plant Pathology |  |
| Applied Physics | PSM | Dept. of Physics |  |
| Athletic Training | MATRN | College of Public Health and Human Sciences or School of Biological and Population Health Sciences |  |
| Biochemistry and Biophysics | MA, MS, PhD | Dept. of Biochemistry and Biophysics | Biochemistry, biophysics |
| Bioengineering | MEng, MS, PhD | School of Chemical, Biological, and Environmental Engineering | Biomaterials, biomedical devices and instrumentation, human performance engineering, medical imaging, systems and computation biology |
| Biological and Ecological Engineering | $\begin{aligned} & \text { MEng, MS, } \\ & \text { PhD } \end{aligned}$ | Dept. of Biological and Ecological Engineering | Bio-based products and fuels, bioprocessing, biological systems analysis, ecosystems analysis and modeling, water quality, water resources |
| Botany and Plant Pathology | MA, MS, PhD | Dept. of Botany and Plant Pathology | Ecology, genetics, genomics and computational biology, molecular and cellular biology, mycology, plant pathology, plant physiology, systemics |
| Business Administration | MBA, PhD | College of Business | Clean technology, commercialization, executive leadership, global operations, marketing, research thesis, wealth management |
| Business Administration and Accountancy | MBAA | College of Business |  |
| Chemical Engineering | $\begin{array}{\|l} \text { MEng, MS, } \\ \text { PhD } \end{array}$ | School of Chemical, Biological, and Environmental Engineering | Chemical engineering |
| Chemistry | MA, MS, PhD | Dept. of Chemistry | Analytical chemistry, inorganic chemistry, materials chemistry, nuclear chemistry, organic chemistry, physical chemistry |
| Civil Engineering | $\begin{array}{\|l} \text { MEng, MS, } \\ \text { PhD } \end{array}$ | School of Civil and Construction Engineering | Civil engineering, coastal and ocean engineering, construction engineering management, engineering education, geomatics, geotechnical engineering, infrastructure materials, structural engineering, transportation engineering, water resources engineering |
| College Student Services Administration | EdM, MS | College of Liberal Arts | College and university characteristics and environments; history, development, and current issues in higher education; leadership and management of administrative departments; program oversight in specialized administrative areas such as financial aid, student activities, career services, multicultural affairs, recreational sports, and student housing; student development theory and application |
| Comparative Health Sciences | MS, PhD | Graduate School |  |
| Computer Science | MA, MEng, MS, PhD | School of Electrical <br> Engineering and Computer Science | Algorithms and cryptography, artificial intelligence, machine learning and data science; computer graphics, visualization, and vision; computer systems and networking; human-computer interaction; programming languages; software engineering |
| Contemporary Hispanic Studies | MA | School of Language, Culture, and Society | Contemporary Hispanic studies |
| Counseling | MCoun, PhD | College of Education | Counseling (PhD only) |
| Creative Writing | MFA | School of Writing, Literature, and Film | Fiction, poetry, and nonfiction writing |
| Crop Science | MS, PhD | Dept. of Crop and Soil Science | Crop breeding, genetics and cytogenetics (cereals, oilseeds, potatoes), forage and pasture management, grain crop production, post-harvest seed technology, seed biology, seed crop physiology, seed production, weed biology, weed management |
| Data Analytics | MS | College of Science |  |

## GRADUATE MAJORS, MINORS, AND ACADEMIC UNITS

| Graduate Major <br> Note: Most graduate majors may be <br> used as a graduate minor. ## MISSION, GOALS, AND VALUES

## Preamble

Oregon State University is a comprehensive, public, research-intensive university and a member of the Oregon University System serving as the state's land, sea, space and sun grant institution-one of only two universities with such designation in the country. OSU programs and faculty are located in every county of the state and are dedicated to investigating the state's greatest challenges. OSU considers the state of Oregon its campus and works in partnership with the P-12 school system, Oregon community colleges and other OUS institutions to provide access to high quality educational programs. Strong collaborations with industry and state and federal agencies drive OSU's research enterprise.

## Mission

As a land grant institution committed to teaching, research, and outreach and engagement, Oregon State University promotes economic, social, cultural and environmental progress for the people of Oregon, the nation and the world. This mission is achieved by producing graduates competitive in the global economy, supporting a continuous search for new knowledge and solutions, and maintaining a rigorous focus on academic excellence, particularly in the three Signature Areas: Advancing the Science of Sustainable Earth Ecosystems; Improving Human Health and Wellness; and Promoting Economic Growth and Social Progress.

## Vision

To best serve the people of Oregon, Oregon State University will be among the Top 10 land grant institutions in America.

## Goals

1. Provide outstanding academic programs that further strengthen our performance and pre-eminence in three Signature Areas of Distinction: Advancing the Science of Sustainable Earth Ecosystems; Improving Human Health and Wellness; and Promoting Economic Growth and Social Progress.
2. Provide an excellent teaching and learning environment and achieve student access, persistence, and success through graduation and beyond that matches the best land grant universities in the country.
3. Substantially increase revenues from private fundraising, partnerships, research grants, and technology transfers while strengthening our ability to more effectively invest and allocate resources to achieve success. OSU Strategic Plan: http://leadership.
oregonstate.edu/strategicplan/

## Core Values

Accountability. We are committed stewards of the loyalty and good will of our alumni and friends of the human, fiscal, and physical resources entrusted to us.
Diversity. We recognize that diversity and excellence go hand-in-hand, enhancing our teaching, scholarship, and service as well as our ability to welcome, respect, and interact with other people.

Integrity. We practice honesty, freedom, truth, and integrity in all that we do.

Respect. We treat each other with civility, dignity, and respect.
Social responsibility. We contribute to society's intellectual, cultural, spiritual, and economic progress and well-being to the maximum possible extent.

## ORGANIZATION

## Graduate School

Graduate work at Oregon State University is administered by the Graduate School. The regulations, policies, and procedures governing graduate education are implemented by the dean of the Graduate School. The dean coordinates graduate programs, courses, admission standards, and certificate and degree requirements; enforces current regulations; recommends changes in graduate policy to the Graduate Council; acts on petitions to deviate from existing regulations; and is responsible for the efficient and effective operation of the Graduate School. The Graduate School office is in room A300 of OSU's Kerr Administration Building (relocating to Heckart Lodge in fall 2017). The telephone number is 541-737-4881, and the FAX number is 541-737-3313. The email address is Graduate. School@oregonstate.edu, and the Web address is http://gradschool.oregonstate. edu.

## Mission

The Graduate School contributes to OSU's goal of achieving top ten land grant status by providing leadership in all aspects of graduate education, through advocacy for the critical importance of the graduate enterprise to the university's mission, and by providing core centralized services to the graduate community. In partnership with the graduate faculty, the Graduate School plays a leadership and advocacy role to ensure that OSU attracts the best graduate students and delivers a compelling and high-quality graduate experience that prepares them to create new ideas and knowledge, to educate others, to make positive impacts on society, and to lead innovation.

## GRADUATE COUNCIL

The Graduate Council formulates the basic policy, procedures, and requirements for all graduate work at OSU, within the general authority granted by the State Board of Higher Education. The council establishes admission standards, basic degree requirements, and general policies; approves all graduate faculty members, new programs, and courses; and periodically reviews all existing graduate programs. Graduate Council members are appointed by the Executive Committee of the Faculty Senate, with each academic college having one representative. Major actions of the Graduate Council are referred to the Faculty Senate for review and approval.
Current and past Graduate Council membership and information can be found at: http://senate.oregonstate.edu/ graduate-council

## GRADUATE FACULTY

Graduate faculty members are chosen from the university faculty based on their academic training, experience, demonstrated potential for scholarship, and evidence of their ability and competency to direct and supervise graduate students in the pursuit of advanced knowledge.

Each graduate faculty member is authorized to perform specific activities within a particular graduate program. The head and academic dean of each unit are responsible for nominating faculty members for these activities, subject to review and approval by the Graduate Council.

## ACADEMIC UNITS

An academic unit is the administrative unit responsible for directing and managing a graduate major or minor field of study. An academic unit may be an academic program, department, school, or college, or composite of these. The chief administrative officer of the academic unit is responsible for managing the graduate programs in that unit and is responsible to the dean of the Graduate School for all graduate work performed by the unit.
Academic units have a major role in the success of graduate education. Within the general rules of the Graduate School, the academic units establish and teach courses, maintain a graduate faculty to teach and supervise research, establish their own admission standards and specific graduate certificate and degree requirements, make graduate student appointments, and provide advice and supervision for their graduate students.

## EQUAL OPPORTUNITY

Oregon State University, in compliance with state and federal laws and regulations, does not discriminate on the basis of age, color, disability, gender identity or expression, national origin, race, religion, sex, sexual orientation, or veteran status in any of its policies, procedures, or practices. This nondiscrimination policy covers admission and access to, and treatment and employment in, university programs and activities, including but not limited to academic admissions, financial aid, educational services, and employment. Inquiries regarding the university's equal opportunity policies may be directed to the Office of Equal Opportunity and Access, 541-737-3556 or visit http://eoa.oregonstate.edu/.

## GRADUATE ADMISSIONS

## REQUIREMENTS

Oregon State University offers admission to applicants whose records demonstrate the highest potential for graduate study and promise for substantial contribution to both their academic professions and to a diverse, global society. The university fosters an environment that welcomes inclusiveness.

Admission decisions are based on many factors, such as the quality of the applicant's prior academic degree and record of accomplishment, statement of purpose, letters of recommendation from professors or others familiar with the applicant's academic work, performance in aptitude and achievement tests, relevant work experience, preparation in the proposed field of study, and the connection of the applicant's academic goals with the faculty's research interests.

## Requirements

The following minimum entrance requirements guide the university and its graduate programs in the consideration of applicants for graduate admission:

- A four-year baccalaureate degree (or international equivalent), a professional degree (such as BPharm, BVsc, MBBS, MD, DVM, DPharm, etc.), or an appropriate U.S./Canadian alternative degree, from a regionally accredited (US) or recognized (International) college or university, with
- A cumulative B average (equivalent 3.00 on a U.S. 4.00 grading scale) on the most recent baccalaureate degree or equivalent or any subsequent graduate degree from a regionally accredited (US) or recognized (International) college or university, plus all work completed thereafter.

The graduate program may choose to calculate the GPA on the last 90 quarter credits ( 60 semester credits [last two years on an international record]) of graded undergraduate work on the most recent baccalaureate degree, plus all work completed thereafter, as the basis for admission.

Minimum GPA for admission to only graduate certificate programs is set by the departments that supervise the certificates. Applicants requesting admission to only graduate certificate programs should contact their academic program to learn about minimum GPA and other admission requirements.

## OR:

- A four-year baccalaureate degree (or international equivalent), a professional degree, or an appropriate U.S./Canadian alternative degree, from an regionally accredited (US) or recognized (International) college or university, and
- A 45 -quarter credit equivalent graduate degree from a regionally accredited (US) or recognized (International) college or university, with
- A cumulative B average (equivalent 3.00 on a U.S. 4.00 grading scale) on the most recent graduate degree. If the applicant has completed his or her baccalaureate degree in a country that is a signatory of the Bologna Declaration, then:
- A Bologna compliant baccalaureate degree of at least three years duration from a recognized college or university, with
- A cumulative B average (equivalent 3.00 on a U.S. 4.00 grading scale) on the degree, plus all subsequent graded course work.
OR (Other three-year bachelor

## degree holders):

- A non-Bologna compliant baccalaureate degree of at least three years duration from a recognized college or university, and
- A 45 -quarter credit equivalent graduate degree from a recognized college or university, with
- A cumulative GPA of at least 3.00 on the most recent graduate degree.

## INTERNATIONAL

REQUIREMENTS
All international graduate applicants must meet the following additional requirements:

- Documentation of sufficient financial resources to attend Oregon State University as a graduate student. AND:
- Documentation of English language proficiency

| Graduate Applicants |  |  |
| :---: | :---: | :---: |
|  | Regular Admission | Transitional <br> Admission-TAP <br> (formerly <br> Conditional <br> Admission-CAP) |
| TOEFL <br> Paper based | 550 | 500-547 |
| Internet (iBT) TOEFL | $80$ <br> Minimum score of 18 on each section | 60-79 <br> Or any sub-score less than 18 |
| Internet (iBT) TOEFL Applicants awarded GTA | 80 <br> Minimum score of 22 on Speaking subscore and Minimum score of 18 on all other sections |  |
| IELTS | 6.5 | 6.0 |

Please note: OSU requires graduate applicants to meet or exceed all five iBT scores to be eligible for full admission. Scores must be no more than two years old at the time of the applicant's first term of registration.

## Waived from English Language Testing:

The English language proficiency requirement is waived for applicants who have demonstrated success by achieving an overall GPA greater than 3.0 on a 4.0 scale for two or more semesters/quarters in a rigorous undergraduate or postgraduate program in the U.S. or from one of the following English speaking countries**: Australia, Canada, New Zealand, and United Kingdom.
** Waivers for applicants in other countries are considered on a case-bycase basis if the medium of instruction is English. The individual program must petition the Graduate School for a waiver. Not all programs will request a waiver. Please contact your proposed graduate program to inquire about their policy.

## English Language Exceptions:

Individual programs may request exceptions to the minimum English language proficiency requirements. Exceptions to the minimum TOEFL score/sub-score requirements will be considered by the Graduate School Dean on request if:

- Applicant's GRE Verbal score is greater than 500 (153 - revised GRE) OR
- The chair of the Graduate Program (or designated faculty member)
- Has personally interviewed the applicant and established a plan for language support for the applicant, if needed, which may include additional English

## Language Training, OR

- The Graduate Program arranges for the applicant to complete language training at INTO OSU equivalent to the admission status as designated by the Transitional Admission Program-TAP

## TRANSITIONAL ENGLISH ADMISSION

Transitional admission based on English language proficiency may be granted to applicants seeking admission to a graduate degree program. University transitional admission of international applicants may be granted only if the applicant is otherwise fully admissible.
Transitional admission for degreeseeking applicants requires:

- On-campus testing of English language proficiency prior to enrollment, and
- Compliance with the subsequently specified plan for English and academic course work during each quarter until such time as the applicant qualifies for regular admission.
- Individual graduate programs may require additional documents such as GRE and GMAT test results or set higher English and academic standards. For detailed information, refer to the website for Graduate Admissions and individual graduate program websites.
Transitional admission based on English language proficiency may not be granted to applicants seeking admission to only a graduate certificate program.
All international applicants seeking graduate teaching assistantships should refer to the International Graduate Teaching Assistant English Language Requirement section of this catalog for more details.

## ADMISSION REQUIREMENTS CONTINUED

Applicants not meeting minimum academic requirements still may be considered for admission with the support of their academic program, plus review and approval by the University Graduate Admissions Committee. For these applicants, decisions may rely more heavily on noncognitive criteria. However, the university encourages those applicants whose overall cumulative undergraduate GPA is less than an equivalent 3.00 on a U.S. 4.00 grading scale to take the GRE.

Applicants whose baccalaureate degrees are awarded by an institution that issues non-graded transcripts will be considered for admission with the support of the program's written evaluation of the quality of the applicant's transcript
record.
Satisfaction of minimum entrance requirements does not guarantee admission, since the number of qualified applicants far exceeds the number of places available. As a consequence, many well-qualified applicants may not be accommodated.

Please note that academic performance is not the sole criterion for admission to the university. The university may evaluate a person's behavior and background to determine their ability to maintain the standards of academic and professional conduct expected at the university. An evaluation may take into consideration current behavior and performance as well as past experiences and actions.

## POLICY REGARDING STUDENTS' ELIGIBILITY TO RETURN TO PRIOR COLLEGE

Applicants who disclose that they are ineligible to re-enroll at any college or university that they attended within the last seven years for student conduct reasons will be automatically declined admission to OSU. Applicants who disclose that the reason for their ineligibility is for academic reasons will be admitted only if they meet OSU's minimum academic requirements.
All applicants who are denied admission for conduct reasons have the right to appeal that decision, and appeals will be reviewed on a case-by-case basis.

## APPLICATION PROCESS

Application forms required for admission to the Graduate School are available electronically at https://oregonstate.Force. com/AppLogin.
The applicant's proposed academic program will examine material submitted to determine the adequacy of scholastic background and to decide whether departmental facilities are adequate for the expressed aims of the applicant. Upon the positive recommendation of the academic program, the Graduate School will determine whether minimum university requirements for admission have been met and, subsequently, will provide to the applicant formal notification as to the action taken.
Applicants must upload application materials, unless a program specifies differently. Applicants should contact their academic program(s) of interest to determine whether additional admission materials are required beyond those listed below. Applicants seeking admission to only a graduate certificate program must provide items a., b., and c. below and contact their academic programs to determine what other program-specific materials may be required for admission to the graduate certificate program. a. One electronic version of the graduate application for each
major to which the applicant seeks admission.
b. $\$ 75$ nonrefundable application fee (domestic students); \$85 nonrefundable fee (international students). Applying online requires payment by credit card.
c. Transcripts/Academic Records* of all previous academic work, undergraduate and graduate. International applicants must provide a certified English translation of academic records in addition to original language records.
*Unofficial records but not grade slips/reports, computer printouts, or internal transcripts may be submitted for evaluation and admission purposes.

If admitted, before registering for courses:

1. Applicants from U.S. schools must provide official transcripts from all colleges attended, including final transcripts showing degrees awarded and dates earned.
2. International applicants must provide equivalent documentation from all colleges attended, including final academic records showing degrees awarded and dates earned in the original language plus certified English translations.
d. Three letters of professional reference are required of most applicants applying for admission to a graduate degree program.

If you have a master's degree, please include a letter from your major professor. Applicants applying only to graduate certificate programs are encouraged to consult with their academic program to determine whether this or other materials are required.
e. Certain graduate programs require the GRE of all applicants. Address inquiries regarding GRE requirements to your proposed academic program. See specific Program Information, http://gradschool.oregonstate.edu/ programs.
International applicants must also upload the following documents with their application materials:
a. One photocopy of TOEFL or IELTS scores. If admitted, official test scores must be received by the Graduate School prior to the start of the applicant's first term of enrollment.
b. Certification of Finances form with supporting documentation, demonstrating sufficient financial resources for the desired academic program.

Financial documentation is not required at the time of application. If the application is accepted, the Graduate School will contact the applicant via email to request the financial materials.

Note: If you will be taking courses as a distance student through OSU Extended Campus and not entering the U.S., we ask that you complete a special certification form. Proof of funding is not required. Please contact graduate admissions to request the form.

## APPLICATION DEADLINES

## Department Deadlines

Academic programs establish their own application deadlines, which are often substantially earlier than the general university deadlines described below. In such cases, program deadlines supersede the more general university deadline. Some academic programs also admit applicants for specific terms only (e.g., fall term). Applicants should contact the proposed graduate program for deadlines and any other restrictions. See specific program information, http://gradschool. oregonstate.edu/programs.

In the absence of earlier program deadlines, the following university deadlines exist:

## U.S. CITIZENS AND PERMANENT

 RESIDENTSAbsolutely no later than 30 days prior to the first day of classes.

## INTERNATIONAL APPLICANTS

To allow adequate time for students to obtain visas and make travel arrangements, the following deadlines have been established for international applicants:

|  | General <br> University <br> Deadline <br> International <br> Intudents <br> Stud <br> Applying from <br> Outside the U.S. <br> *Program <br> deadlines <br> supersede this <br> deadline. SUMMER SESSION ADMISSION
See Summer Session, http://summer.
oregonstate.edu/.

## ADMISSION STATUS

Students may be admitted to the Graduate School under the following categories.

## ADVANCED-DEGREE STUDENTS

## 1. Regularly Admitted Graduate

Students. These students have been accepted by the university and by a major program to work toward an advanced degree.
2. Conditionally Admitted Graduate Students. Students who have not met the formal admission requirements but whose accomplishments have convinced the University Graduate Admissions Committee and their major program that they have potential for success as advanced degree candidates may be conditionally admitted as follows:

1. Students from nonaccredited institutions must complete at least one term of satisfactory work at Oregon State, after which they may be admitted with full standing in the Graduate School.
2. Students whose preparation does not warrant full admission to the Graduate School but who may prove acceptable later must satisfactorily complete specified conditions to demonstrate their ability to carry out graduate-level work.
3. Transitionally Admitted Graduate Students. International students who lack minimum English language proficiencies but otherwise meet all other formal admission requirements may be transitionally admitted under the following:
4. TOEFL total score is in the range of 61 to 79 (iBT).
5. IELTS total score is 6.0. Students who score below the minimum on one or more iBT subtests but meet the minimum overall iBT score requirement may be considered for transitional admission. Transitional admission based on English language proficiency may not be granted to students seeking admission to only a graduate certificate program.
6. Provisionally Admitted

Graduate Students. Students who have met all of the university standards for formal admission but whose academic program or major department may have placed additional restrictions upon their admission may be provisionally admitted. These restrictions may include certain prerequisite courses that must be completed, completion of the GRE or GMAT, submission of additional reference letters or scores, etc.

Conditionally and transitionally admitted students cannot schedule and hold preliminary oral exams or final oral exams for their degree until they have satisfied the requirements of their admission and have been reclassified as regular graduate students.

Provisionally admitted students cannot take the final exam for their degree until they have satisfied their provisions and have been reclassified as regular graduate students.
Credit for graduate courses that students have completed acceptably while registered as conditional, transitional or provisional students may count toward the residence requirement for advanced degrees.
If students fail to satisfactorily complete their conditions or provisions, they will be dismissed from the Graduate School.

## GRADUATE CERTIFICATE STUDENTS

Students admitted to only a graduate certificate program may be considered for reclassification as degree-seeking graduate students by following the procedure in the section below regarding reclassification.

## NONDEGREE-SEEKING <br> GRADUATE STUDENTS

The nondegree-seeking graduate student category may be used by holders of a baccalaureate degree who do not wish to pursue an advanced degree at Oregon State University. Those nondegreeseeking graduate students who wish to be reclassified as degree-seeking graduate students must follow the procedure in the next section.
International students who are currently in the U.S. on visas such as an F-1, F-2, B-2, J-1, etc. should consult with OSU's Office of International Services (OIS) (email: isas.advisor@oregonstate. edu) before submitting the OSU nondegree application for admission. Only certain visa types allow an individual to pursue part-time or non-degree-seeking course work and still maintain one's visa status.

Graduate international students who wish to enroll as nondegree students with OSU for one or more terms, but who will not participate in an established exchange program, should contact the OIS Office isas.advisor@oregonstate.edu for further information before applying.

International students who plan to enroll with OSU as nondegree exchange students should use the application form that is made available at each partner institution. For a list of exchange partner institutions, go to http://international. oregonstate.edu/sites/international.or-egonstate.edu/files/atosu/osu-exchange-partner-institutions.pdf.

## RECLASSIFICATION OF POSTBACCALAUREATE STUDENTS, NONDEGREESEEKING STUDENTS, AND GRADUATE CERTIFICATE STUDENTS

A postbaccalaureate, nondegree-seeking graduate, or graduate certificate student may be considered for status as a regular degree-seeking graduate student under one of the following provisions, depending upon prior academic records:

If the student would have been eligible for graduate admission at the time of entering as a postbaccalaureate, nonde-gree-seeking graduate, or graduate certificate student, the student is eligible for admission consideration at any time but must submit an application for admission to the appropriate level to begin the process.

If the student, prior to entering as a postbaccalaureate, nondegree-seeking graduate, or graduate certificate student had been denied graduate admission or would have been ineligible for graduate admission, as determined a posteriori by the University Graduate Admissions Committee, the postbaccalaureate, nondegree-seeking graduate, or graduate certificate student must complete option $\mathrm{A}, \mathrm{B}$, or C below and reapply or reactivate an application for admission to graduatelevel study:
a. complete 24 credits of courses each with a grade of B (3.00) or better, or
b. complete 15 credits of graduate course work involving lecture and textbook instruction, each eligible to transfer into the degree program and with a grade of B (3.00) or better, or
c. complete sufficient credits to bring the cumulative grade-point average (that for the last 90 credits of undergraduate work plus that for courses taken as part of the 24 -credit rule) to 3.00 or better before being eligible to apply for graduate admission.
These courses will normally be regular graduate courses relevant to the specific field, except that seminars and other blanket number graduate courses may not be used. Upper-division undergraduate courses are acceptable, provided that they eliminate specific deficiencies in requirements for entry into an identified graduate program. Lower-division undergraduate courses may not be used. All courses should be carefully selected in consultation with an academic advisor from the graduate field into which the student desires admission.

Completion of either 2(a) or 2(b) above does not guarantee graduate admission. Reclassification decisions employ the same procedures and requirements as those for admission. Postbaccalaureate, nondegree-seeking graduate, and graduate certificate students who
seek reclassification must be acceptable to the program in which they plan to major. The university does not have the capacity to accommodate all who meet the minimum requirements for regular graduate student status; when selecting among students who meet minimum requirements, the university treats students requesting reclassification the same as those applying for admission as regular graduate students.

A postbaccalaureate or nondegreeseeking graduate student may use graduate credit earned in this status toward an advanced degree or graduate certificate if the student is later reclassified as a regular graduate student. This credit cannot be used to satisfy residence requirements for an advanced degree. A graduate certificate student may use graduate credit earned in this status toward an advanced degree if the student is later reclassified as a regular graduate student. In either case, the amount of usable credit will depend on the size of the individual student's program (e.g., a maximum of 15 graduate credits could be used on a 45 -credit master's program or a maximum of 6 graduate credits may be applied toward an 18 -credit graduate certificate.) See section entitled "Transfer Credit" for complete details.
Students should initiate all requests for reclassification at the Graduate School.

## SECOND OSU MASTER'S DEGREE

A candidate for a second master's degree from Oregon State University may request the application of up to 15 credits, appropriate to both programs, from the first master's degree program to another, subject to the following three requirements:

1. Credits used to satisfy the residency requirements of one master's degree may not be used to satisfy the residency requirements of another master's degree.
2. Students who earn two master's degrees at Oregon State University must complete all degree
requirements for each degree. This requires filing separate programs of study forms for each degree, filing separate commencement applications for each degree, completing separate projects or theses for each degree, scheduling separate final oral examinations for each degree, and passing final oral examinations for each degree.
3. Such credit will be granted only for graded course work earned at Oregon State University and completed with a grade of B or higher.

## PURSUIT OF THE SECOND PhD

The doctor of philosophy degree is the highest academic degree granted by North American universities. It is a
research degree designed to prepare a student to become a scholar; that is, to discover, integrate, and apply knowledge, as well as communicate and disseminate it. The doctor of philosophy degree is to be distinguished from other doctorates such as the MD, JD, or EdD degrees, which are designed for professional training or which focus on applied rather than basic research.

Students may enroll for a second PhD degree if they have previously obtained a PhD from OSU or elsewhere. Concurrent pursuit of dual PhD degrees is not allowed. In the case of a student pursuing a second PhD degree, requirements for the second PhD must be met without overlap with the first PhD degree including, but not limited to: successful completion of a second preliminary exam, a separate thesis with no overlap with the first PhD thesis, a final defense exam for the second PhD , a different major advisor from the first PhD , a thesis committee of different faculty than the first PhD degree (although some, but not complete, overlap between committee members would be acceptable in the case of two PhD degrees from OSU), and all other requirements for the second PhD degree program. Courses from the first PhD degree relevant to the second degree may be allowed to transfer between the two degrees. However, the student's program of study committee must approve all course transfers, should pay particular attention to the relevancy, overlap, and currency of any courses to be transferred from one PhD degree to another, and are advised to proceed conservatively when approving course transfers from a first PhD to a second PhD degree.

## RE-ENROLLMENT

All credential-seeking graduate students will be subject to the continuous enrollment policy. Continuous graduate enrollment refers to the policy of requiring continuous registration of graduate students from original matriculation until all graduate degree requirements are met. Please refer to Registration Requirements under Policies Governing All Graduate Programs for complete details.

A graduate student who takes an unauthorized break in registration by failing to maintain continuous enrollment or by failing to obtain regular or planned leave of absence will relinquish his/her graduate standing in the university. Students who wish to have their graduate standing reinstated will be required to file an Application for Graduate Readmission and pay the readmission fee. Readmission is not guaranteed even if the student left in good standing.

International students who wish to re-enroll after an absence should contact the Office of International Services (OIS) to make sure they have the required documents to return to the US.

## GRADUATE TUITION AND FEES

The official Graduate Tuition and Fee Schedule can be found on the OSU Business Affairs website: http:// fa.oregonstate.edu/business-affairs/ tuition-and-fee-information.

Tuition and fees for the next year are usually finalized during the month of July prior to the academic year start.

For information about residency status, visit http://admissions.oregonstate. edu/residency.

## POLICIES GOVERNING ALL GRADUATE PROGRAMS

## GRADUATE MAJOR

A graduate major is the area of academic specialization in which the student chooses to qualify for a graduate degree. Upon completion of a graduate degree, the degree awarded and the graduate major are listed on the student's transcript.

## GRADUATE OPTION

Options are for students of a specific major. An option is one of several distinct variants of course aggregations within a major that focus on an area of study designed to provide a student with specialized knowledge, competence, and skills while sharing a minimum core of courses.

A graduate option consists of a minimum of 12 designated quarter credits of related course work (excluding thesis credits), comprised of course work offered by the sponsoring unit as well as by other academic units. The option may be comprised of specific courses, completion of a designated number of credits from a longer list of alternative courses, or a combination of specific and alternative course lists. Approved options may be added to a graduate program of study, and approved by the faculty advisor(s) and the director of the sponsoring unit. On the program of study, there should be no overlap in course credits between options (the same course cannot be used to satisfy credit requirements in multiple options). When the unit submits the final examination card to validate awarding of the major to the Graduate School, the unit will also validate that the requirements of the option have been completed.

## GRADUATE AREA OF CONCENTRATION

A graduate area of concentration is a subdivision of a major or minor in which a strong graduate program is available. Areas of concentration may be referenced on the student's program of study, but they are not listed on the student's transcript.

## GRADUATE MINOR

A graduate minor is an academic area that clearly supports the major. Master's program minors must include a minimum of 15 quarter credits of graduate course work; doctoral minors require a minimum of 18 credits. On a master's or doctoral program, a minor may be:

1. an academic area available only as a minor,
2. a different major,
3. the same major with a different area of concentration, or
4. an integrated minor.

An integrated minor consists of a series of cognate courses from two or more areas. These courses must be outside the major area of concentration, with most of the courses being outside the major department. The graduate faculty member representing the integrated minor must be from outside the major department. Graduate minors are listed on the student's transcript.

## CONCURRENT MASTER'S

 DEGREESStudents who earn two master's degrees at Oregon State University must complete all degree requirements for each degree. This requires filing separate programs of study forms for each degree, filing separate commencement applications for each degree, completing separate projects or theses for each degree, scheduling separate final oral examinations for each degree, and passing final oral examinations for each degree. For additional information, please refer to the Transfer Credit section of this catalog.

## DUAL MAJORS

For the MA, MS, EdM, MF, or PhD degree, a student may select two graduate major areas to pursue instead of the traditional single major. Only one degree is awarded, and the student basically must satisfy all degree requirements for majors in both areas. For more details, contact the Graduate School.

## GRADUATE CERTIFICATE

A graduate certificate program is a structured progression of graduate-level courses that constitute a coherent body of study with a specific defined focus within a single discipline or a logical combination of disciplines. It is designed for a student who has completed a baccalaureate degree and is in pursuit of advanced-level learning. Graduate certificates reflect the educational mission of the university.

## TRANSFER CREDIT

Students may only transfer course credits from regionally accredited institutions (or equivalently recognized institutions outside the U.S.). Students who wish
to transfer graduate credits from other schools must provide transcripts for courses already completed to the Graduate School prior to the submission of a study program. Undergraduate students at OSU may receive credit for graduate courses ( 500 and 600 level) in excess of the requirements for a baccalaureate degree. Graduate courses taken at OSU while the student was a non-degree graduate student, a post-baccalaureate student, a professional degree-seeking student (PharmD or DVM), or an undergraduate student, are considered transfer courses.
Courses to be transferred must be graduate level. It is the responsibility of the student wishing to transfer the course to provide the necessary documentation to satisfy the OSU guidelines.
All courses on a program of study require final approval by the student's program of study committee and the Graduate School. Committees are free to deny inclusion of any course if they believe that the earned grade is not sufficient; the course is not appropriate, sufficiently current, sufficiently rigorous based on syllabus content; or for any other reason. To be considered for inclusion on a graduate program of study, OSU courses whether taken as either an enrolled graduate student or pre-graduate admission, must have an earned grade of C or better. To be considered for inclusion on a graduate program of study, courses from another institution (transfer courses) must have an earned grade of B minus or better.
If the transfer credit is from a foreign university, the student must provide copies of the original transcript and an English translation of the transcript, with the courses to be transferred clearly indicated. Grades and credits for the courses must be clearly identified. In some countries, the first university degree, which OSU considers to be equivalent to a baccalaureate degree, may take five years or more to complete. All of the course work toward such a degree is considered a requirement for the first university degree, and hence none of it can be transferred to a graduate certificate or graduate degree at OSU.
Students may not transfer courses graded on a nonstandard basis (e.g., Pass/ No Pass, Credit/No Credit, Satisfactory/ Unsatisfactory) to their graduate certificate or degree programs unless it can be verified from the registrar of the university offering the course that the grade is equivalent to a $\mathrm{B}(3.00)$ or better.

Graduate courses to be transferred from another institution to an OSU master's degree must not have been used to satisfy the requirements for a bachelor's degree, master's degree (or equivalent) or a doctoral degree.

Graduate courses to be transferred from an OSU master's degree to a second OSU master's degree must meet the following three requirements:

1. Credits used to satisfy the residency requirements of one master's degree may not be used to satisfy the residency requirements of another master's degree.
2. Students who earn two master's degrees at Oregon State University must complete all degree requirements for each degree. This requires filing separate programs of study forms for each degree, filing separate commencement applications for each degree, completing separate projects or theses for each degree, scheduling separate final oral examinations for each degree, and passing final oral examinations for each degree.
3. Such credit will be granted only for graded course work earned at Oregon State University and completed with a grade of B or higher.
Up to 15 graduate credits may be transferred toward a 45 -credit master's degree. Up to 6 graduate credits may be transferred toward an 18-credit graduate certificate.
Graduate courses to be transferred to a doctoral degree program can be courses that were used to satisfy the graduate course requirements for a graduate certificate or a master's degree (or equivalent). Selected 700 -level courses that have been deemed equivalent to graduatelevel learning may be used on doctoral programs of study upon approval of the student's graduate committee. There is no limit on transfer credit toward the doctoral degree as long as the doctoral residence requirement is satisfied.

Credits earned in fulfillment of a graduate certificate program may be applied to a graduate degree, so long as they meet the appropriate standards for use in the degree and the criteria to transfer credit as defined herein. Courses completed for a degree program may likewise be applied toward a certificate program.

## PREPARATION REQUIRED FOR GRADUATE MAJOR

Preparation for a graduate major is ordinarily an undergraduate major in the same subject, or a fair equivalent. Preparation for a graduate minor is ordinarily at least one year of upper-division work in addition to foundation courses in the subject.

Academic performance is not the sole criterion for admission to and continuation in certain courses and programs at the university, such as practicum courses and internships. The university may find it necessary to evaluate a person's background to determine his or her likeli-
hood of maintaining standards of professional conduct necessary in the academic discipline or profession. An evaluation may consider current performance as well as past experiences and actions that could affect a student's ability to perform in the particular course or program.

Qualifying Examinations. Some departments and programs require graduate students working for advanced degrees to take oral and/or written examinations in their major and minor fields to determine overall preparation and background. The examination serves as a guidance examination, the results of which are used in setting up the graduate study program. A poor showing in any area may result in a student's taking undergraduate courses without graduate credit to gain the necessary background to proceed with the graduate program. The examination usually is taken during the first quarter of graduate enrollment.

In lieu of their own qualifying examination, departments and programs may accept a satisfactory showing in the Graduate Record Examination (GRE), or some other standard test. Check with the anticipated major department or program to find out which exams are appropriate.

## REGISTRATION REQUIREMENTS

## Introduction

Full-time status as a graduate student is defined by Oregon State University as enrollment in 9 credits per term. The maximum load for a full-time graduate student is 16 credits. A student may exceed this limit only with the approval of the Graduate School. Students receiving approval to exceed 16 credits will be assessed a per-credit overload fee.

Full-time status (i.e., a minimum of 9 credits per term) may be sufficient to qualify for purposes of veterans' benefits, visa requirements, external fellowships, and federal financial aid.

To assure full compliance with visa regulations, international students must consult with the Office of International Services (OIS) for additional information about registration requirements.

## CONTINUOUS ENROLLMENT

## I. Minimum Registration

Unless on approved leave of absence (see Section II), all graduate students in graduate degree programs must register continuously for a minimum of 3 graduate credits until their degree is granted or until their status as a credential-seeking graduate student is terminated. This includes students who are taking only preliminary comprehensive or final examinations or presenting terminal projects. Students must register for a minimum of 3 credits and pay fees if they will be using university resources (e.g.,
facilities, equipment, computing and library services, or faculty or staff time) during any given term, regardless of the student's location. If degree requirements are completed between terms, the student must have been registered during the preceding term.

Graduate students who have successfully completed all course and noncourse requirements in accordance with diploma deadlines (see the Graduate School website) are not required to register during the subsequent term.

Nonthesis master's degree students who complete all degree requirements during a term for which they are registered will not be required to register for the subsequent term.
Doctoral and thesis master's students who fail to meet all deadlines and complete all course and noncourse requirements during the term will be required to register for a minimum of 3 graduate credits during the subsequent term. However, only if library copies of the thesis have been submitted to the Graduate School within the first two weeks of the subsequent term and the thesis is the only outstanding requirement remaining for certification of the student's graduate degree may an exception to this rule be considered.

Graduate students who use facilities or faculty/staff time during summer session to engage in academic or research activities in support of their thesis/ pursuit of degree are required to register for a minimum of 3 credits during the summer session. Graduate students who use facilities or faculty staff time during summer session purely in service to the university and not to engage in academic or research activities in support of their thesis/pursuit of degree are not required to register during the summer session.

Graduate students do not need to submit a Leave of Absence/Intent to Resume Graduate Study form if they do not enroll in summer term.

It should be noted that graduate assistantship eligibility requires enrollment levels that supersede those contained in this continuous enrollment policy. Various agencies and offices maintain their own registration requirements that also may exceed those specified by this continuous enrollment policy (e.g., those of the Veterans Administration, Immigration and Naturalization Service for international students, and those required for federal financial aid programs.) Therefore, it is the student's responsibility to register for the appropriate number of credits that may be required for funding eligibility and/or compliance as outlined by specific agency regulations under which they are governed.

## II. Leave of Absence

On-leave status is available to students
who need to suspend their program of study for good cause. Students who desire a leave of absence will work with their major professor, program administrator, and the Graduate School to arrange authorized leave. Students understand that while on leave they will not use university resources. Graduate faculty members are students' most important resource at the university and will work closely with graduate students to ensure timely completion of academic goals, understanding of the continuous graduate enrollment policy, and that graduate students enroll each term other than when they are on authorized leave. The Graduate School will assist graduate students and graduate faculty members with administrative procedures related to the continuous graduate enrollment policy. The Graduate School recognizes the diverse circumstances and unpredictability of graduate students' lives and will work in partnership with the graduate community in arranging leaves and responding to unanticipated situations.
A graduate student intending to resume active graduate student status following interruption of his or her study program for one or more terms, excluding summer session, must apply for leave of absence to maintain graduate student standing in his or her degree program. (See Section IV below). Leave of Absence/ Intent to Resume Graduate Study Forms must be received by the Graduate School at least 15 working days prior to the first day of the term involved. The time the student spends in approved on-leave status will be included in any time limits relevant to the degree (See Sections C.1. and C.2. below). Students in on-leave status may not a) use any university facilities, b) make demands upon faculty time, c) receive a fellowship or financial aid, or d) take course work of any kind at Oregon State University.

## A. Eligibility

Only graduate students in good standing are eligible for leave of absence.

## B. Leave of Absence Categories

1. Regular. Regular leave of absence is granted on a term-by-term basis in cases where the student demonstrates good cause (e.g., illness, temporary departure from the university for employment, family issues, financial need, personal circumstances). Students who request a leave of absence must:
2. be in good standing,
3. submit the Leave of Absence/ Intent to Resume Graduate Status form indicating each term for which leave is requested, and
4. complete all degree requirements within the time limits established in this catalog.
5. Family and Medical Leave. This leave is different from regular leave in that it is for 12 continuous weeks that may span multiple terms and must meet FMLA leave requirements as determined by the Office of Human Resources. See policy at http://gradschool.oregonstate.edu/ sites/gradschool.oregonstate.edu/ files/imce/progress/graduate-student-family-and-medical-leave-policy.pdf.

## C. Limits

1. Regular Leave of Absence is granted for a specified time period that may not exceed three terms, excluding summer session.
2. Time spent in on-leave status will be included in all time limits pertaining to the student's degree program.
3. Students who matriculate fall term 2016 or later may use unlimited leaves as long as time to degree constraints are met (7 years for master's degrees and graduate certificates; 9 years for doctoral degrees). Leaves of absence may be approved for up to three terms at a time, but must be renewed to retain student status. Failure to renew the leave of absence or register will result in the loss of student status.
4. Family and Medical Leave is available for 12 continuous weeks that may span multiple terms and must meet FMLA leave requirements as determined by the Office of Human Resources. These absences will not be included in all time limits pertaining to the student's degree program. Contact the Graduate School for additional details.

## D. Approval

Approval of the major professor, department/program chair, and graduate dean are required.

## III. Student Fees

Students with approved on-leave status are not required to pay tuition or fees. However, students who must register as per section I, "Minimum Registration," must pay both tuition and student fees.

## IV. Unauthorized Break in Registration

A graduate student who takes an unauthorized break in registration by failing to maintain continuous enrollment or by failing to obtain regular or planned leave of absence will relinquish his or her graduate standing in the university. Students who wish to have their graduate standing reinstated will be required to file an Application for Graduate Readmission and pay the readmission fee. The readmission application must be approved by the student's major professor, department/school/program chair, and graduate dean. Acceptance back into a graduate program is not guaranteed
even if the student departed in good standing. The petitioner for readmission will be required to meet university and departmental admission requirements and degree completion requirements that are in effect on the date of readmission. Review of the Application for Graduate Readmission may also result in a change of residency status from resident to nonresident.
V. Appeal

In the case of extraordinarily extenuating circumstances, students may appeal the provisions of the continuous graduate enrollment policy by submitting a detailed request in writing to the dean of the Graduate School.

## IMPLEMENTATION OF CONTINUOUS ENROLLMENT POLICY

All graduate students, excluding cer-tificate-only students, including those enrolled prior to fall 2002, are subject to this policy.
All graduate students should be enrolled for a reasonable number of credits sufficient to represent their use of university space, facilities or faculty time.

## REGISTRATION REQUIREMENTS FOR GRADUATE ASSISTANTS

In addition to the above registration requirements, the following requirements apply to graduate teaching assistants (GTA) and graduate research assistants (GRA).

As a condition of their academic appointments, graduate teaching and research assistants are required to register for 3 credits above the minimum fulltime load (i.e., a minimum of 12 credits) each term of the appointment during the academic year (fall, winter, and spring.) During summer session, a minimum registration of 3 credits is required for graduate assistants. Audit registrations, course withdrawals, and enrollment in INTO OSU courses may not be used to satisfy enrollment requirements for graduate assistant salary/stipend, tuition remission, salary supplement or health insurance benefits. Tuition charges associated with INTO OSU enrollment are not covered under graduate assistant tuition remission.

## GRADE REQUIREMENT

A grade-point average of 3.00 (a B average) is required: 1 ) for all courses taken as a degree-seeking graduate student, and 2) for courses included in the graduate degree or graduate certificate program of study. Grades below C (2.00) cannot be used on a graduate program of study. A grade-point average of 3.00 is required before the final oral or written exam may be undertaken. Enforced graduate-level prerequisite courses must be completed with a minimum grade of $C$.

## COURSE NUMBERS

## Graduate Courses

All graduate courses will be designed around well-defined objectives or student learning outcomes, and instructional opportunities should be designed to help students achieve these outcomes. Student learning outcomes encompass the range of student attributes and abilities that students should be able to demonstrate after successful completion of the course.

## 500-Level Courses

These courses are graduate courses offered primarily in support of graduate certificate or master's degree programs but which are also available for use on doctoral level degree programs.

Undergraduates of superior scholastic achievement may be admitted to these courses on the approval of the instructor, and they may, if admitted, under some conditions, use a limited number of these courses toward a graduate certificate or a graduate degree program. These courses have one or more of the following characteristics:

1. They require upper-division prerequisites in the discipline.
2. They require an extensive theoretical base in the discipline.
3. They increase or re-examine the existing knowledge or database of the discipline.
4. They present core components or important peripheral components of the discipline at an advanced level.

## 600-Level Courses

These are graduate courses offered principally in support of doctoral level instructional programs but also are available for use on graduate certificate or master's level degree programs. In addition to exhibiting the characteristics of 500-level courses, these courses typically require 500 -level prerequisites and they build on and increase the information presented in 500 -level courses.

## OTHER COURSES:

## 700-Level Courses

These are advanced professional or technical courses that may be applied toward a first professional degree (e.g., DVM, PharmD). They make up the bulk of the course work for these professional degree programs. In general, these courses are not considered graduate-level courses, and may not be applied toward graduate certificate, master's level or doctoral level (PhD or EdD) degree programs. However, selected 700-level courses that have been deemed equivalent to graduatelevel learning may be used on doctoral programs of study upon approval of the student's graduate committee.

## 800-Level Courses

These courses are in-service courses aimed at practicing professionals in the
discipline. These courses have an inservice or retraining focus, and provide the professionals new ways to examine existing situations or new tools to treat existing problems. These courses generally have none of the characteristics of $500-$ level courses. They are not graduatelevel courses, and they may not be applied to graduate certificate or graduate degree programs nor to professional degree programs.

## BLANKET-NUMBERED COURSES

Blanket-numbered courses have a zero middle digit. Those that carry graduate credit may be repeated up to the maximum totals indicated below.

- Research (501 or 601) is for research that is not part of the thesis. Data obtained from such research should not be incorporated into the thesis.
- Thesis (503 or 603 ) covers the thesis research and writing. A student may register for thesis credit each term.
- Reading and Conference (505 or 605 ) and Projects (506 or 606) are used for special work not given under a formal course number.
- Seminar (507 or 607) is used both for departmental seminars and for special group work not given in a formal course.
- Workshop (508 or 608) is usually a special, short-term course covering a variety of topics.
- Practicum (509) is used for courses whose emphasis is the application of academic theory to the work environment.
No more than 9 credits of blanketnumbered courses, other than thesis (or research-in-lieu-of-thesis for nonthesis programs), may be applied toward the minimum 45 -credit master's degree. While internship credit (510) is not considered a blanket-numbered course, no more than 6 credits of internship may be applied toward a 45 -credit master's degree. The internship credit limit is in addition to the 9 -credit blanket-hour limit.

No more than 15 blanket-numbered credits may be applied toward the minimum 108-credit doctoral program.

No more than 3 credits of blanketnumbered courses in each field of study may be used in the MAIS program; thesis credits or research paper credits are exempt from this limitation.

Blanket-numbered transfer courses will count toward the maximum totals specified above.

## COURSES GRADED ON NONSTANDARD BASIS

Graduate students may elect to take courses on an $\mathrm{S} / \mathrm{U}$ basis only if those courses are not in their graduate certificate or graduate degree program or are
not required for the removal of deficiencies. Graduate students may use courses taken at OSU on a P/N basis in their graduate certificate or graduate degree programs.

## 4XX/5XX COURSES

No more than $50 \%$ of courses used for a graduate program of study may be the 500-level component of a dual-listed course. Courses bearing dual-listed numbers (400/500) must provide students who are enrolled for 500 -level credit with graduate-level learning.

Expectations for learning outcomes in the graduate component of dual listed (400/500 level) courses are the same as for stand-alone 500-level courses. A distinction should be made between learning outcomes for students taking the course for undergraduate credit (400 level) and those taking the course for graduate credit ( 500 level). In most cases this distinction should include emphasis on developing skills in analysis, synthesis, and/or evaluation for the 500 -level credit. The different student learning outcomes should be accompanied by appropriate differences in instructional opportunities and evaluation procedures.

## Repeating 4xx/5xx Courses

A graduate student who has taken a 4 xx course may not normally include the corresponding 5xx course on his or her graduate program.

## REMOTE ACCESS FOR GRADUATE COMMITTEE <br> MEETINGS

It is generally expected that all members of graduate committees should be physically present at all required graduate committee meetings (i.e., program meetings, preliminary examinations, and final examinations). However, it is permissible for the student, and/or committee members to participate from a remote location provided the conditions listed below are met:
a. Advance agreement of the student and all committee members has been obtained;
b. All participants join in with two-way audio and video connections; audioonly connections must be approved by the major professor if the video connection is not possible. When the student is the remote participant, his or her connection must be an audio and video connection;
c. Any visual aids or other materials have been distributed in advance to the remote participants;
d. The committee members participate in the complete meeting, discussion, presentation, and evaluation; and
e. The student is responsible for making arrangements.

## PETITIONS

A student wishing to deviate from normal Graduate School regulations and procedures may submit a request and the reasons for it to the Graduate School in a letter signed by the student and his or her major professor. In reaching a decision, the Graduate School may seek advice from the Graduate Council. The student will be advised of the decision when it has been made. Action taken on a petition will not be considered precedent for future action.

## DIPLOMA APPLICATION

Graduate students wishing a printed diploma must complete a Diploma Application form. This form should be submitted prior to taking the final examination, indicating the term the student intends to graduate. Participation in Commencement ceremonies requires earlier submission of this form.

## INSTITUTIONAL REVIEW BOARD APPROVAL OF HUMAN SUBJECTS RESEARCH

It is Oregon State University policy that the OSU Institutional Review Board (IRB) must review all research that involves human subjects. The results from studies conducted without obtaining IRB review and approval may not be published or widely distributed, nor can such data be used to satisfy master's thesis or doctoral dissertation requirements.

The requirements for IRB review of research involving human subjects is based upon research ethics and federal law, and the implications of conducting human subjects research without IRB approval are significant. Failure to follow this policy places both the individual and the institution at risk: the individual may be subject to university sanctions and/or incur personal liability for negligence and harm; the university could lose access to federal funding or be forced to cease all human subjects research. For more information, please send an email to irb@oregonstate.edu or visit the IRB website at http://research.oregonstate. edu/irb/.

## INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE IACUC

The Oregon State University Institutional Animal Care and Use Committee (IACUC) requires prior review and approval for all live vertebrate animal use in research, teaching, testing, per the IACUC Scope of Work Policy. An eligible principal investigator must be identified in order to submit an ACUP to the committee, per PI Eligibility Policy. Review leading to approval is accomplished via submission of an Animal Care and Use Protocol form (ACUP) to the IACUC.
The requirements for IACUC review are based on the ethics of animal use,
and our assurances to agencies that provide federal oversight, funding, and program accreditation. Implications regarding conduct of animal research without IACUC approval and oversight are significant. Failure to secure and maintain approval can result in the student's inability to continue research or publish data. In addition, OSU could lose accreditation, lose access to funding and/ or be required to pay significant fines. Please contact IACUC@oregonstate.edu for more information.

## OSU SCIENTIFIC DIVING AND SCIENTIFIC BOATING

## Scientific Diving

OSU personnel (graduate or undergraduate students, faculty, staff, approved volunteers) who work underwater as a part of their research must have their diving activity pre-approved by the OSU Diving and Small Boat Safety Officer (DBSO) and the OSU Diving Control Board. OSU is an organizational member of the American Academy of Underwater Sciences (AAUS) and all OSU scientific diving is conducted in accordance with AAUS standards. For more information visit http://research.oregonstate.edu/diving/ or contact the Diving and Small Boat Safety Office (diving.safety@oregonstate.edu).

## Scientific Boating

OSU personnel (graduate or undergraduate students, faculty, staff, approved volunteers) who operate vessels (motorboats, personal watercraft, and non-motorized craft) as a part of their research must conduct their activities in accordance with OSU scientific boating standards. For more information visit http:// research.oregonstate.edu/boating/ and contact the Diving and Small Boat Safety Office (diving.safety@oregonstate.edu) to ensure that your planned research boating activities are in compliance with OSU standards. OSU is a member of the Scientific Boating Safety Association (SBSA).

## GRADUATE WORK BY FACULTY MEMBERS

The Faculty as Student policy specifies that one may not simultaneously be an Oregon State University faculty member and an OSU graduate student. This policy pertains to all OSU faculty members (both ranked and professional), is consistent with practices at most universities, and is in keeping with recognized appropriate graduate education practice.

Although faculty members are eligible to enroll for courses at staff fee rates, such course work may not be applied to a graduate certificate or graduate degree without prior approval from the graduate dean.

## GRADUATE STUDENT TEACHING

## Appointment as Instructor of

Record. For a graduate student to be appointed as the Instructor of Record for a graduate course (including the 500-level component of a slash course):

- The unit/program of employment must be separate and distinct from the unit/program of enrollment.
- The instructor must be appointed to the graduate faculty based on their academic/professional qualification by the unit/program of employment.
- In the event that graduate students from the instructor's unit/program of enrollment are enrolled in the course, alternative arrangements must be made for evaluating the work of those graduate students.
Appointment as Teaching As-
sistant. For a graduate student to be appointed as the Teaching Assistant for a graduate course (including the 500-level component of a slash course), the Director of the Graduate Program must ensure that potential conflicts of interest are avoided to the maximum extent possible. This may include:
- Making alternative arrangements to evaluate the work of graduate students from the same unit/program as the Teaching Assistant, OR
- Ensuring that the Teaching Assistant has advanced to candidacy status (after prelims) and all graduate students in the class have not advanced to candidacy
If neither of these criteria are met, the program must have a conflict of interest plan approved by the Graduate School.

## GRADUATE APPOINTMENTS

Graduate assistants are represented by the Coalition of Graduate Employees, American Federation of Teachers Local 6069 (CGE). Terms and conditions of employment for service not performed as a requirement for their degrees are prescribed in the collective bargaining agreement between OSU, OUS, and CGE. The CGE contract can be found on the OHR website at http://hr.oregonstate. edu/ercc/gradstud.
Persons interested in assistantships should write directly to the department program concerned.

To qualify for appointment as a graduate assistant the student must:

1. Be a regularly admitted, conditionally admitted, or provisionally admitted graduate student at Oregon State University (i.e., not a graduate nondegree-seeking, postbaccalaureate student, or PharmD or DVM student).
2. Be enrolled as a full-time degreeseeking graduate student at Oregon State University, completing a minimum of 12 credits of instruction each term ( 9 credits during summer
session). Audit registrations, course withdrawals, and enrollment in INTO OSU may not be used to satisfy these minimum enrollment requirements.
3. Be making satisfactory progress toward an advanced degree.
Graduate assistants may be appointed on an academic term basis, an academicyear basis (nine months) or a full-year basis (12 months). No appointment can be for less than . 30 FTE or more than .49 FTE per term. A graduate assistant on less than . 49 FTE may take on extra duties; however, the total stipend plus salary from all sources at Oregon State University may not exceed the equivalent of . 49 FTE for any term.

All graduate assistants are required to provide duties to OSU to justify their stipends. Teaching assistants are expected to provide duties related to the university's instructional program (e.g., teaching laboratories or discussion sections, grading papers, advising). Research assistants provide duties related to the research function of the university. Whatever the type of appointment, the graduate assistant should be regarded as a student providing service as part of a learning experience rather than as an employee whose education is secondary.

The work schedule and the duties to be performed by the graduate assistant shall be established by the department or program sponsoring the assistantship.

Graduate assistants must register for and complete a minimum of 12 credits of instruction each term except during summer session, when a minimum of 9 credits is required. Audit registrations, course withdrawals, and enrollment in INTO OSU courses may not be used to satisfy these minimum enrollment requirements. (See section on 'Registration Requirements for Graduate Assistants' for complete details.)
Persons interested in assistantships should write directly to the department or program concerned.

## INTERNATIONAL GRADUATE TEACHING ASSISTANT ENGLISH LANGUAGE REQUIREMENT

 If the Graduate School determines that an applicant or current student's native language is not English, the proposed IGTA is required to take the Internet Based TOEFL (iBT) test before being appointed as a graduate teaching assistant.Potential IGTAs scoring below 22 on the speaking section of the iBT can be appointed, but will be required to undertake further English language training.

If a department wishes to offer a student with an iBT speaking score of 18 to 21 an assistantship, the unit must:
a. Affirm that the graduate student will be enrolled in IEPA 098NC
Communication for IGTAs (with the
unit paying the cost of this training).
b. If at all possible, assign the graduate student assignments (such as paper grading, reagent preparation, etc.) that do not require personal contact with undergraduate students.
c. If (b) above is not possible, and if possible, pair the IGTA in the laboratory or classroom with another TA who is a native speaker of English.
d. Monitor the quality of IGTA performance using student evaluations and the evaluations of the supervising professors. The unit will document for each student the results of their evaluation of the student's performance as a GTA.
If the unit agrees to meet these conditions, the IGTA appointment can be made.

The scheduling of IEPA 098NC will be coordinated with the units so that students can attend the course and conduct teaching assistantship duties. Please check the OSU online schedule of classes for confirmation of the time and date: http://catalog.oregonstate.edu/CourseDetail.aspx?subjectcode=IEPA\&coursenumb er=098NC

Students with an iBT speaking score of less than 18 cannot be assigned teaching assistantships.

## DISMISSAL FROM GRADUATE SCHOOL

Advanced-degree students (regularly, conditionally, and provisionally admitted) are expected to make satisfactory progress toward a specific academic degree. This includes maintaining a GPA of 3.00 or better for all courses taken as a graduate student and for courses included in the graduate program, meeting departmental or program requirements, and participating in a creative activity such as a thesis.

If a student is failing to make satisfactory progress toward an academic degree, as determined by the major department/ program or the Graduate School, the student may be dismissed from the Graduate School.

Any doctoral student who fails the preliminary oral examination with a committee recommendation that the student's work toward this degree be terminated may be dismissed from the Graduate School.

Any student who fails a final oral examination may be dismissed from the Graduate School.
Academic dishonesty and other violations of the Student Conduct Code may serve as grounds for dismissal from the Graduate School.

## STUDENT CONDUCT REGULATIONS

Graduate students enrolled at Oregon State University are expected to conform
to basic regulations and policies developed to govern the behavior of students as members of the university community. The regulations have been formulated by the Student Conduct Committee, the Student Activities Committee, the university administration, and the State Board of Higher Education. Violations of the regulations subject a student to appropriate disciplinary or judicial action. The regulations and the procedures for disciplinary action and appeal are available via the Office of Student Conduct and Community Standards website at http://studentlife.oregonstate.edu/ studentconduct/.

## GRIEVANCE PROCEDURE

All students desiring to appeal matters relating to their graduate education should request a copy of Grievance Procedures for Graduate Students at Oregon State University from the Graduate School. These procedures are also available on the Web at http://gradschool.oregon-state.edu/progress/grievance-procedures. Graduate assistants whose terms and conditions of employment are prescribed by the collective bargaining agreement between OSU and the Coalition of Graduate Employees, American Federation of Teachers Local 6069 should also refer to that document.

## POLICIES GOVERNING

GRADUATE CEBTIFICATE
PROCRAM
GENERAL REQUIREMENTS
The Graduate Certificate Program at Oregon State University is a structured progression of graduate-level courses that constitute a coherent body of study with a defined focus within a single discipline or a logical combination of disciplines. It is designed for a student who has completed a baccalaureate degree and is in pursuit of advanced-level learning. Graduate certificates reflect the educational mission of the university. Students desiring a graduate certificate must be admitted to the university as a credential-seeking graduate student, but are not required to be on track for a specific degree. There is no formal committee requirement for graduate certificates. Certificate students are subject to all general policies governing the courses for the master's degree, unless specified within the Graduate Catalog.

## GRADUATE CERTIFICATE STUDY PROGRAM

The graduate certificate curriculum consists of a minimum of 18 graduate credits, and may include a final project, portfolio, or report for integration of the sequence of course materials. All graduate student programs of study submitted
to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone credits. The remaining credits may be the 500 component of 400/500 slash courses. No final examination is required.

## TIME LIMITS

Courses completed no more than seven years prior to the graduate certificate award may be used to satisfy certificate requirements. Students enrolled in certificates without concurrent enrollment in a graduate degree program are not subject to the continuous enrollment policy during the time allowed for certificate completion.

## FINANCIAL AID ELIGIBILITY

Students enrolled in only graduate certificate programs may qualify for federal loan and work-study financial aid. Students must complete the federal FAFSA form to begin the financial aid application process.

## POLICIES GOVERNING MASTER'S DEGREE <br> PROGRAMS

## GENERAL REQUIREMENTS

All master's degree programs require a minimum of 45 graduate credits including thesis ( 6 to 12 credits), research-in-lieu-of-thesis (3 to 6 credits), or an integrative capstone experience (3 to 6 credits). Exceptions to this capstone requirement are specified under the degree descriptions that follow these universal master's degree requirements. Effective fall 2005, all graduate student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone courses. The remaining credits may be the 500 component of 400/500 slash courses. General regulations for all master's programs are cited here, with certain exceptions provided for master's degrees in the professional areas listed on the following pages.

All master's students must:
a. Conduct research, produce some other form of creative work, or participate in an integrative capstone experience; and
b. Demonstrate mastery of subject material; and
c. Be able to conduct scholarly or professional activities in an ethical manner
The assessment of these outcomes and the specification of learning objectives related to these outcomes are to be carried out at the program level.

## RESIDENCE REQUIREMENTS

The residence requirement for the master's degree is 30 graduate Oregon State

University credits after admission as a degree-seeking graduate student. These 30 graduate credits must appear on the master's degree program. (This does not include graduate credits taken as a postbaccalaureate or graduate nondegreeseeking student, nor transfer courses.) Deviation from the residence requirement requires a petition to the Graduate School.

## LANGUAGE REQUIREMENTS

For the master of arts degree, the student must show foreign language proficiency (including American Sign Language) equivalent to that attained at the end of a second-year university course in that language with a grade of "C" (2.00) or better. English is not considered a foreign language for purposes of this requirement. There is no language requirement for the Master of Arts in Interdisciplinary Studies degree. For other master's degrees, there is no foreign language requirement unless a language is required in the individual student's program. A student must be enrolled to complete their foreign language requirement before they take the final oral examination for the degree.

GRADUATE PROGRAM OF STUDY A regular master's degree student must complete a program of study in consultation with an advisor/advisory committee before completing 18 graduate credits. This includes credits earned as a postbaccalaureate, graduate nondegree-seeking student, or graduate student.
Students who wish to transfer credit must submit a Transfer Credit Request form before the end of their first year of study.

The final program of study must be submitted to the Graduate School at least 15 weeks prior to the date of the student's final examination.

Effective fall 2005, all graduate student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate standalone courses. The remaining credits may be the 500 component of $400 / 500$ slash courses.

If a minor is declared, approximately two-thirds of the work (30 graduate credits) should be listed in the major field and one-third ( 15 graduate credits) in the minor field. In such cases, the student's advisory committee must include a member from the minor department.

The program is developed under the guidance of the major professor, and minor professor when a minor is included, and signed by those professors and the chair of the academic unit before filing in the Graduate School. Each candidate's program should include substantial work with at least three faculty members offering graduate instruction. Changes in
the program may be made by submitting a Petition for Change in Program form, available in the Graduate School.

## TIME LIMIT

All work toward a master's degree, including transferred credits, course work, thesis (if required), and all examinations, must be completed within seven years. Time in which the student is on a leave of absence is included in the seven year limit.

## THESIS

When scheduling their final oral examinations, thesis option master's students are required to submit the pretext pages of their thesis to the Graduate School at least two weeks prior to the final oral examination. Pretext pages include the abstract, copyright, title page, approval page, acknowledgment page, contribution of authors, table of contents, list of figures, tables, appendices, dedication (optional), and preface (optional). It is expected that students will distribute examination copies to all their committee members, including the Graduate Council representative, sufficiently early to permit thorough review of the thesis prior to the student's final oral examination.
Within six weeks after the final oral examination or before the first day of the following term, whichever comes first, students must upload one PDF copy of the thesis, without signatures, electronically to ScholarsArchive and submit the signed ETD submission approval form with a copy of the title page to the Graduate School. If final submission requirements are after the initial sixweek period, the student may be subject to re-examination. Please refer to the Graduate School's website for complete details (http://gradschool.oregonstate. edu/progress/thesis-guide).
Signatures on the ETD submission approval form can be electronic, signed, scanned and emailed or faxed. The thesis will not be accepted for graduate requirements until it has received approval by the graduate dean, which the thesis editor will obtain.

Full information concerning the prescribed style for theses is given in the booklet, Thesis Guide: Preparing a Thesis or Dissertation at OSU, available on the Web at http://gradschool.oregonstate. edu/progress/thesis-guide.

The results from studies conducted using human subjects without obtaining Institutional Review Board approval shall not be used to satisfy master's thesis or doctoral dissertation requirements. For more information, please send an email to irb@oregonstate.edu or visit the IRB website at http://research.oregonstate. edu/irb/.

The credit allowed for the thesis, including research and preparation of the manuscript, varies from 6 to 12 credits. In certain departments and programs, the MS or MA thesis is optional, to be determined in each case by the department/school/program and the major professor. See departmental descriptions.

## FINAL EXAMINATION

Successful completion of a final oral examination is required for all master's degrees with the exception of the following graduate programs:

- EdM students who complete the nonthesis option must take a final written examination;
- MBA students submit capstone projects that are assessed at the curricular core and graduate option levels, in addition to being assessed upon their fulfillment of graduate learning outcomes;
- MCoun students admitted to the degree program prior to June 2017 must successfully pass a written project portfolio that demonstrates mastery of the MCoun learning outcomes;
- MCoun students admitted to the program beginning June 2017 must successfully pass a nationally administered exam determined by program faculty.
Some departments also require the student to pass a written exam prior to the oral exam.

The final oral examination for master's candidates may, at the discretion of the graduate program, consist of a public thesis defense followed by a closed session of the examining committee with the candidate. Under normal circumstances, the final oral examination should be scheduled for two hours.

For master's candidates whose programs require a thesis, not more than half of the examination period should be devoted to the presentation and defense of the thesis; the remaining time can be spent on questions relating to the student's knowledge of the major field, and minor field if a minor is included in the program of study. Graduate faculty serving on thesis-oriented master's degree programs may contribute to the direction of the student's thesis, will assess the student's thesis and his or her defense of it in the final oral examination, will vote to pass or fail the student, and may sign the thesis when it is in acceptable final form. The examining committee consists of at least four members of the graduate fac-ulty-two in the major field, one in the minor field if a minor is included, and a Graduate Council representative. When a minor is not included, the fourth member may be from the graduate faculty at large. All members of the student's graduate committee must approve the schedul-
ing of the final examination.
Students writing a thesis must have a Graduate Council representative on their committee. It is the student's responsibility to obtain his or her own Graduate Council representative from a list provided by the Graduate School. This must be done prior to scheduling the final exam.

When no thesis is involved, not more than half of the examination period should be devoted to the presentation of the research project; the remaining time can be spent on questions relating to the student's knowledge of the major field, and minor field if one is included in the program. For nonthesis master's degree programs, the major professor is responsible for directing and assigning a final grade for the research or culminating project. Other members of the nonthesis committee will assess the student's defense of the project in the final oral examination, as well as the student's knowledge of his or her field, and vote to pass or fail the student. No more than two re-examinations are permitted by the Graduate School, although academic units may permit fewer re-examinations. The examining committee consists of three members of the graduate facultytwo in the major field and one in the minor field if a minor is included. When a minor is not included, the third member may be from the graduate faculty at large.

## MASTER OF ARTS IN INTERDISCIPLINARY STUDIES

The Master of Arts in Interdisciplinary Studies (MAIS) degree is granted for attainment of broad, advanced knowledge and achievement integrated from three fields of study. Most graduate majors or minors may serve as a field for this degree. The current list of approved majors is at http://catalog.oregonstate. edu/MajorDetail.aspx?id=333. Two of the three fields may be from one department if the areas of concentration within these two fields are different. A minimum of 9 credits in each of the three fields of study is required. The degree requires a minimum of 49 credits, including 4 credits of course work on interdisciplinary research methods.

No more than 21 credits (excluding thesis or research paper credit) may be taken in any field unless the total program exceeds 49 credits. There is no foreign language requirement. No more than 3 credits of blanket-numbered courses in each field of study may be used in the program; thesis credits (Option A) or research paper credits (Option B) are exempt from this limitation. The student's committee consists of four members of the graduate faculty-one from each of the three fields-and a Graduate Council representative. A formal program meeting must be held prior
to the completion of 18 graduate credits. A final oral examination is required.
Two options under the program:
Option A: Thesis option. The thesis must coordinate work in the three fields. The requirement is 6 to 9 credits of Thesis 503. The thesis advisor must be a member of the graduate faculty authorized to direct theses.

Option B: Research paper option. The research paper must integrate work from at least two of the three fields. The requirement is 4 to 7 credits, registered as Research 501, Reading and Conference 505, or Projects 506.

## MASTER OF ARTS IN TEACHING (MAT)

The Master of Arts in Teaching is an intensive professional degree program intended to prepare teachers for careers in public school education. Students who successfully complete the MAT can be recommended for the Oregon basic teaching license upon the positive evaluations of the university and public school supervisors.
The professional program in teacher education is full-time and one calendar year in length. Students will enroll with their subject area cohort group and complete the program in one year. Teacher licensure is offered in the following areas:

- Advanced Mathematics Education
- Agricultural Education
- Biology Education
- Chemistry Education
- Elementary Education
- Family and Consumer Sciences Education
- Integrated Science Education
- Language Arts Education (English) Cascades Campus only
- Music Education
- Physics Education
- Spanish Education

The professional teacher education program begins with a 15 -credit professional education core that is foundational to and a prerequisite for the 48 -credit Master of Arts in Teaching degree. The 48-credit MAT includes a professional education concentration (3 credits), professional course work in the teaching specialty ( 18 to 21 credits), a public school professional internship ( 15 to 18 credits), and a minimum of 9 graduate credits in the subject matter specialization (mathematics, physics, literature, etc.). Because the professional teacher education program is a two-part program, including the professional core and the MAT, future students may plan their programs as either five-year (with a nine-month MAT) or as fifth year programs (with 12 months of graduate study including both the professional core and the MAT).
The MAT degree requires successful completion of a final oral examination.

MASTER OF ATHLETIC TRAINING The Master of Athletic Training (MATRN) degree program consists of a combination of didactic, laboratory and clinical education experiences, from which students in athletic training attain the entry-level educational competencies stipulated by the national accrediting agency for the athletic training profession, the Commission on the Accreditation of Athletic Training Education (CAATE). Graduates are expected to take and pass the certification examination offered by the Board of Certification and embark on careers as Certified Athletic Trainers.

## MASTER OF BUSINESS

## ADMINISTRATION

The MBA program represents a broad, yet responsive general management education with an entrepreneurial focus that crosses the functional disciplines of business. Its advanced management emphasis and entrepreneurial focus creates practical value-added content for all students, both business and nonbusiness undergraduates, enabling them to solve complex business problems and successfully compete in the business marketplace.
The MBA program is concentrated in length-three academic terms for fulltime students with a BA/BS in business or who have completed the foundation courses. Full-time students with no previous business or business-related course work can complete the program in as few as six terms. The MBA degree requires no thesis. MBA students submit capstone projects that are assessed at the curricular core and graduate option levels, in addition to being assessed upon their fulfillment of graduate learning outcomes.

## MASTER OF BUSINESS ADMINISTRATION AND ACCOUNTANCY

The Master of Business Administration and Accountancy is a one-year master's program for students with an undergraduate degree in accounting. It allows accounting students to receive an undergraduate degree and a master's degree during their five years of university study required to become a CPA. As an integrated program, the MBAA is designed to allow students the opportunity to plan early enough in their accounting education program to enable them to receive both an undergraduate degree and a graduate degree. The MBAA is also designed to accommodate postbaccalaureate students wishing to prepare for accounting careers.

## MASTER OF COUNSELING <br> (MCoun) <br> Students admitted to the MCoun degree program prior to June <br> 2017 must successfully pass a writ-

ten project portfolio that demonstrates mastery of the MCoun learning outcomes. Students will specifically address graduate learning outcomes (G.L.O.'s) by describing how they have and/or how they would utilize research/evidencebased counseling practice in their clinical work. Students will be required to describe an ethical dilemma they have faced in their clinical practice to date and include an ethical decision model when describing their ethical decision-making processes. The written project portfolio will assess the 8 CACREP areas, in which the MCoun learning outcome objectives are based. A student shall receive a Pass when the grading committee unanimously grades the portfolio as a Pass.

Students admitted to the MCoun degree program beginning June 2017 must successfully pass a nationally administered exam determined by program faculty. The written exam will evaluate all three graduate learning outcomes (G.LO.'s). Successful completion of the national exam will evidence the candidate's mastery of MCoun subject material covered in the program and assess the candidate's ability to apply research and ethical proficiencies on the exam. The exam will assess the 8 CACREP areas, in which the MCoun learning outcome objectives are based.

The minimum passing score for the national exam is defined as one standard deviation below the national mean at the time of administration. Candidates who do not pass the national exam are allowed to take re-examination, but not before the end of the term in which the exam was administered. No more than two re-exams are permitted.

Please contact the College of Education for additional information regarding additional MCoun examination requirements, graduate learning outcomes, and the CACREP national examination.

## MASTER OF EDUCATION

The Master of Education (EdM) is a professional degree requiring a minimum of 45 credits in graduate courses (including a maximum of blanket-numbered courses); additional credits may be required in some areas of concentration. A minimum of 9 additional credits in graduate courses is required for the master's degree in College Student Services Administration (CSSA).
The EdM degree requires successful completion of a final written examination.
A candidate for the EdM degree qualifies for the degree under one of these options:

1. The student submits a thesis that meets all standards for a master's thesis on some applied or professional aspect of education. For the thesis the student receives

6 credits. He or she must complete a major of 24 credits (which may include the 6 thesis credits) and 21 elective credits determined under the direction of an advisor.
2. For adult education, the student completes 30 credits in the major and at least 15 credits in the minor. The minor may be completed either inside education or from approved minors outside education and serves students focusing on training and development and developmental education.
3. The student completes 45 credits with 24 credits in specific courses for the major. No minor is identified. The remaining 21 credits are elective under the direction of an advisor. No thesis or field studies are required. This option is designed primarily for in-service teachers working on standard licensure.
4. The student majors in College Student Services Administration and completes at least 39 credits in the major and 15 credits in a minor for a minimum of 54 credits.

## MASTER OF ENGINEERING

The Master of Engineering (MEng) degree is designed to provide students the opportunity to pursue advancedlevel study in a field of engineering. The degree is concerned with application of specialized, graduate-level engineering and managerial knowledge to specific engineering disciplines. The degree is a course work-only degree, with the option of substituting research or internship credits for a few courses. No thesis or project is required.
The MEng program requires a minimum of 45 credits. The examining committee consists of a minimum of three members of the graduate faculty in the engineering specialization. A final oral examination is required.

## MASTER OF FINE ARTS

The Master of Fine Arts is an appropriate terminal degree for those who wish to teach in creative, performing, and studio arts in higher education. The MFA in Creative Writing is a program that helps students define and advance their literary ambitions and develop their skills as artists and teachers. Students will be introduced to three broad areas of knowledge within the field of creative writing that they need in order to become successful writers, editors, or teachers. These areas involve writing, reading, and marketing skills within contemporary literary fiction, poetry, and nonfiction. The degree requires a minimum of 60 credits comprised of 24 credits in creative writing workshops, 24 credits in literature and/or composition and rhetoric and one course emphasizing literary roots, and 12 credits
in thesis and/or writing and conference. All MFA candidates are required to complete a thesis, which is to be a sustained piece of imaginative writing of literary merit. A final oral examination is required.

## MASTER OF FORESTRY

The professional Master of Forestry degree is intended for potential administrators and professional forestry specialists in public and private organizations where persons of broad ability are demanded and a broad technical education is needed. The degree requires a minimum of 45 credits. At least 21 credits are to be selected from a series of designated courses within the College of Forestry. As many as 24 credits may be elected from other courses offered by the college or university according to guidelines set forth in the program descriptions prepared by each department. The electives must contribute to a unified program that will meet the objectives of the student. A thesis is not required, but a technical report on an approved topic, correlated with courses in the major field, must be submitted. A final oral examination is required.

## MASTER OF HEALTH PHYSICS

The Master of Health Physics degree is designed to be a professional, advanced graduate degree that emphasizes fundamental learning and professional development for those wishing the master's credential, but not requiring a research focus for their planned profession. The degree directs students toward professional licensing as a certified health physicist in the field of radiation protection. The program will consist of a minimum of 45 graduate credits, with 30 graduate credits in the major, and 15 elective graduate credits. A final oral examination is required.

## MASTER OF MEDICAL PHYSICS

The Master of Medical Physics (MMP) degree prepares the graduate for a professional career in applied medical physics, focused on practical hands-on experience. The MMP program is designed as a clinical specialization for individuals with an undergraduate degree in science or engineering, offering areas of concentration in therapeutic radiologic physics or medical health physics. The degree requires a minimum of 45 graduate credits, including 30 graduate credits within the major and 15 elective graduate credits. The program does not require a thesis, however, candidates are required to pass a final oral examination.

## MASTER OF NATURAL RESOURCES

The Master of Natural Resources (MNR) degree is designed to engage university scientists and world-wide natural resource professionals in a process that integrates diverse perspectives to address natural resource challenges at the state, regional, national, and international levels. The program is intended for individuals with at least two years of experience in natural resource disciplines who seek an advanced degree in natural resource management. The MNR curriculum, consisting of 45 credits, is organized into three sections: core ( 18 credits), area of emphasis ( 18 credits), and capstone project ( 9 credits). It is taught as a distance, online curriculum, although it may be possible for some students to work toward the MNR degree while in residence at Oregon State University. The MNR degree is offered as a non-thesis option only. A final oral examination is required.

## MASTER OF PUBLIC HEALTH

The Master of Public Health (MPH) degree program combines broad training in public health with specific training in one of the specialty options.

The MPH program is designed for persons who already have a bachelor's degree and who wish to obtain further formal education in the field of public health. Persons with experience in the health field or who have training in a specialized area of health may increase their knowledge regarding populationbased health to prepare them for expanded administrative and service careers. Persons who do not have prior experience in health fields may prepare themselves for a broad variety of careers depending upon their choice of specialty option.
The Master of Public Health degree is offered by Oregon State University with graduate options in biostatistics; environmental and occupational health; epidemiology; global health; health management and policy; health promotion and health behavior.

The MPH program consists of 17 credits of core courses, plus additional units of required and elective courses, an internship, and a thesis or nonthesis project depending upon the specific track. Programs are approximately 60 credits in length. All students will be required to take a final oral examination as determined by their specific option.

## MASTER OF PUBLIC POLICY

The Master of Public Policy is a professional degree intended to prepare students for careers in the public, nonprofit, and international sectors and offer training for in-service students desiring professional growth and advancement. The degree is designed to be a generalist program, with an emphasis on analytic skills and policy knowledge. The degree requires a minimum of 62 graduate credits, 44 of which are in the required core. The core curriculum provides an important foundation in statistics, research methods, computer applications, public policy analysis, public administration and ethics, and economics. The remaining 18 credits support the student's preferred area of concentration, consisting of environmental policy, international policy, rural policy, science policy, or social policy. Students with little work experience in public service, the nonprofit sector, or the international context will be required to engage in a supervised internship that will allow them to work closely with experienced mentors who will help them integrate theory with practice and introduce them to a professional network. Students with relevant work experience will substitute course work for internship credits. A final oral examination is required.

## PROFESSIONAL SCIENCE MASTER'S DEGREE (PSM)

The Professional Science Master's (PSM) allows students to pursue advanced training in science while simultaneously developing workplace skills highly valued by employers. PSM programs consist of two years of academic training in an emerging or interdisciplinary area in science, along with a professional component that includes internships and "cross-training" in workplace skills, such as business, communications, and regulatory affairs. All have been developed in concert with employers and are designed to dovetail into present and future professional career opportunities.

The Professional Science Master's Degree (PSM) is offered with five graduate majors:

1. Applied Biotechnology [To be terminated, pending approval]
2. Applied Physics [To be terminated, pending approval]
3. Applied Systematics in Botany [To be terminated, pending submission and approval of a proposal.]
4. Environmental Sciences
5. Fisheries and Wildlife Administration

For further information on Environ-
mental Sciences, email: carolyn.fonyo@ oregonstate.edu.

For further information on Fisheries and Wildlife, email: fw.gradadvising@ oregonstate.edu.

## POLICIES GOVERNING <br> DOCTORAL DECREE <br> PROCRAMS

## GENERAL REQUIREMENTS

The doctor of philosophy degree is granted primarily for creative attainments. There is no rigid credit requirement; however, the equivalent of at least three years of full-time graduate work beyond the bachelor's degree (at least 108 graduate credits) is required. Effective fall 2005, all graduate student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone courses. The remaining credits may be the 500 component of 400/500 slash courses.

After admission into the doctoral program, a minimum of one full-time academic year (at least 36 graduate credits) should be devoted to the preparation of the thesis. A minimum of 27 regular non-blanket credits must be included on a doctoral program.

By completing the requirements necessary for the PhD, students shall: (a) produce and defend an original significant contribution to knowledge; (b) demonstrate mastery of subject material; and (c) be able to conduct scholarly activities in an ethical manner. Additional program specific learning outcomes, the assessment of all outcomes and the specification of learning objectives related to these outcomes are to be carried out at the program level.

GRADUATE PROGRAM OF STUDY
The student's doctoral program of study is formulated and approved subject to departmental policies at a formal meeting of his or her doctoral committee. The committee is comprised of a minimum of five members of the graduate faculty, including two from the major department and a representative of the Graduate Council. If a minor is declared, it must consist of at least 18 credits (15 credits for an integrated minor) and the committee must include a member from the minor department. All committee members must be on the graduate faculty with appropriate authorization to serve on the student's committee.

Doctoral students must complete the program of study in consultation with their advisory committee. This signed plan must be submitted to the Graduate School by the end of the fifth term of study.

The student must be registered for a minimum of 3 credits for the term in which the program meeting is held. When the program is approved by the doctoral committee, the departmental chair, and the dean of the Graduate School, it becomes the obligation of the student to complete the requirements as
formulated. Changes in the program may be made by submitting a Petition for Change of Program form available in the Graduate School.

Selected 700-level courses that have been deemed equivalent to graduatelevel learning may be used on doctoral programs of study upon approval of the student's graduate committee.

No more than 15 credits of blanketnumbered courses, other than thesis, may be included in the minimum 108-credit program.

Students who wish to transfer credit must submit a Transfer Credit Request form before the end of their first year of study.

## TIME LIMIT

Effective beginning with students matriculating fall term 2016, all work toward a doctoral degree, including course work, thesis (if required), and all examinations, must be completed within nine years of the indicated start term on the Departmental Action Form. Extensions of this time limit may be requested by submitting a petition to the Graduate School.

## RESIDENCE

For the doctoral degree, the residence requirement consists of two parts:

1. a minimum of 36 graduate Oregon Administration
2. State University credits must be completed; and
3. the student must spend at least three terms of full-time graduate academic work (at least 9 credits per term) on campus or at an off-campus site approved by the Graduate School. The latter requirement of three terms of full-time enrollment does not have to take place in consecutive terms.
Adequate fulfillment of the residence requirement shall be determined by the Graduate School.

## LANGUAGE REQUIREMENTS

The foreign language requirement is determined by the student's doctoral committee, subject to the same approval required for the graduate study program, and is so designated in the official doctoral program. Foreign language requirements must be completed before the oral preliminary examination.

## PRELIMINARY EXAMINATIONS

The student working toward a doctoral degree must pass a comprehensive preliminary examination. The purpose of this exam is to determine the student's understanding of his or her major and minor fields and also to assess the student's capability for research. Students must enroll for a minimum of 3 credits during terms in which they undertake departmental written or oral preliminary examinations.

## Written Comprehensive Examination

Most programs require a written comprehensive examination to be taken before the oral preliminary examination. If a written examination is required, it must be completed prior to the oral preliminary examination. The content, length, timing, passing standard, and repeatability of this examination are at the discretion of the major department. The general rules and structure of this examination, however, must be provided in writing to all candidates for this examination and a current copy of these guidelines must be on file with the Graduate School. Copies of the written examination (questions and student's answers) must be available to all members of the student's doctoral committee at least one week prior to the oral preliminary examination.

## Oral Preliminary Examination

The oral preliminary examination is taken near the completion of the student's course work. The oral examination is conducted by the student's doctoral committee, and should cover the student's knowledge in his or her major and minor subjects. The exam may cover the student's proposed research topic, although no more than one-half the time should be devoted to specific aspects of the proposal. The examination should be scheduled for at least two hours, and the exam date must be scheduled in the Graduate School at least two weeks in advance. If more than one negative vote is recorded by the examining committee, the candidate will have failed the oral examination. No more than two re-examinations are permitted by the Graduate School, although academic units may allow fewer re-examinations.

At least one complete academic term must elapse between the time of the preliminary oral examination and the final oral examination. If more than five years elapse between these two examinations, the candidate will be required to take another preliminary oral examination.

## THESIS

Each candidate for the PhD degree must submit a thesis embodying the results of research and giving evidence of originality and ability in independent investigation. The thesis must be a real contribution to knowledge, based on the candidate's own investigation. It must show a mastery of the literature of the subject and be written in creditable literary form. The preparation of an acceptable thesis will require at least one fulltime academic year. The booklet, Thesis Guide: Preparing a Thesis or Dissertation at OSU, is available electronically on the Web at http://gradschool.oregonstate. edu/progress/thesis-guide.

The results from studies conducted using human subjects without obtaining Institutional Review Board approval shall not be used to satisfy master's thesis or doctoral dissertation requirements. For more information, please send an email to irb@oregonstate.edu or visit the IRB website at http://research.oregonstate. edu/irb/.
A formal thesis proposal meeting is recommended but not required by the Graduate School; however, it is required for some majors. This meeting should be held with the student's doctoral committee prior to the start of any substantial doctoral thesis research.
When scheduling their final oral examinations, doctoral students are required to submit the pretext pages of their dissertations to the Graduate School at least two weeks prior to the final oral examination. Pretext pages include the abstract, copyright (optional), title page, approval page, acknowledgment page, contribution of authors, table of contents, list of figures, tables, appendices, dedication (optional), and preface (optional). It is expected that students will distribute examination copies of their thesis to all committee members, including the Graduate Council representative, sufficiently early to permit thorough review of the thesis prior to the student's final oral examination.
Within six weeks after the final oral examination or before the first day of the following term, whichever comes first, upload one PDF copy of your thesis, without signatures, electronically to ScholarsArchive and submit the signed ETD submission approval form with a copy of the title page to the Graduate School. If final submission requirements are after the initial six-week period, the student may be subject to re-examination. Please refer to the Graduate School's website for complete details (http:// gradschool.oregonstate.edu/progress/ thesis-guide).

Signatures on the ETD submission approval form can be electronic, signed, scanned and emailed or faxed. The thesis will not be accepted for graduate requirements until it has received approval by the graduate dean, which the thesis editor will obtain.

## FINAL EXAMINATION

After completion of or while concurrently registered for all work required by the program, the student must pass a final doctoral examination that may be written in part but must include an oral examination. The final oral examination must be scheduled in the Graduate School office at least two weeks prior to the date of the examination. All incomplete course work appearing on the program of study must be completed prior to scheduling the final oral examination.

The final oral examination consists of a public thesis defense followed by a closed session of the examining committee with the candidate. Under normal circumstances, the final oral examination should be scheduled for two hours.
All members of the student's graduate committee must approve the scheduling of the final examination.

It is expected that the thesis defense portion of the final oral exam be open to all interested persons and should be limited to one hour. After the open portion of the exam, the examining committee should exclude all other persons and continue with the examination of the candidate's knowledge of his or her field and the evaluation of the candidate's performance.

If the department favors a more elaborate presentation, it should be scheduled as a separate seminar. In any case, the time involved for the open presentation may not impinge upon time required for the examining committee to conduct appropriate, iterative oral inquiry with the candidate, to evaluate the candidate's performance, and to deliberate fully within the time constraints of the scheduled oral examination.

The examining committee consists of the student's doctoral committee and any additional members, including professors from other institutions, whom the major department may recommend. In the oral examination, the candidate is expected to defend the thesis and show a satisfactory knowledge of his or her field. If more than one negative vote is recorded by the examining committee, the candidate will have failed the examination. No more than two re-examinations are permitted by the Graduate School, although academic units may permit fewer re-examinations.

The final oral examination must be taken within five years after the oral preliminary examination. If more than five years elapse, the candidate will be required to take another oral preliminary examination.

## DOCTOR OF EDUCATION REQUIREMENTS

The EdD program is a degree program with a major in education. It is intended for the educational professional whose career path is that of educational or teaching specialist, administrator, or other practitioner in the public schools, postsecondary institutions of higher education, or in business and industry. Its focus is on the application of knowledge to learning and teaching environments in public and private settings. The EdD program is designed to prepare educational leaders in community college education, middle-level education, or related educational settings.

A masters' degree in education or a
related field, or equivalent to a master's degree in postbaccalaureate course work is required for admission. In addition, the College of Education requires the following:

1. minimum professional experience as defined by each program,
2. letter or statement of professional objectives for doctoral study and area of specialization within education,
3. three letters of recommendation, and
4. either the Graduate Record Examination or the Miller Analogies Test.
Applicants to the EdD program must have significant experience in an education or education-related setting such as teaching, school administration, curriculum specialist, instructional specialist, child/youth counselor, supervisor; or in a setting where the primary function is education.

In general, the following requirements are in effect for the EdD:

1. A minimum of 108 credits beyond the baccalaureate degree.
2. Effective fall 2005, all graduate student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone courses. The remaining credits may be the 500 component of 400/500 slash courses.
3. Completion of the same residence requirements as listed for the PhD degree.
4. A dissertation of no less than 24 credits.
5. A mentored internship in an appropriate work setting for a minimum of 12 credits.
6. A minimum of 48 graduate credits in an area of specialty in education.
7. Completion of 24 credits of core seminars.
8. Completion of the core courses in research.
Procedures and requirements for preliminary and final examinations and thesis are the same as those for the doctor of philosophy degree.

## GRADUATE FELLOWSHIPS, SCHOLARSHIPS, AND FINANCIAL AID

Graduate Fellowships and Scholarships
A number of Oregon State University fellowships and scholarships sponsored by industry, foundations and government agencies are available to superior students for graduate study in various graduate programs at OSU. For a listing of many these fellowships and scholarships, visit the Scholarship Management System database at https://scholarship. ucsadm.oregonstate.edu/prod/search_ schol.php.

For more information about scholarships and fellowships in the database above, including application instructions, as well as additional opportunities in individual programs, contact the individual program of interest.

Students interested in general information regarding graduate student funding opportunities are encouraged to explore Financing Your Education on the Graduate School's website: http://gradschool. oregonstate.edu/finance.

## GRADUATE STUDENT EMPLOYMENT

Each year, OSU receives grants from federal and state agencies, public and private foundations, and business and industry to support institutional and individual projects. Funding is awarded to the various departments in most academic colleges and to other research organizations on campus, including experiment stations, centers and institutes. Many of these grants include financial support for graduate students. Interested students should direct inquiries and applications to the department concerned.
Graduate students may be employed as Graduate Teaching or Graduate Research assistants by departments on campus. In addition to monthly stipends, graduate assistants appointed at .20 FTE or above are eligible for a tuition and fee subsidy.

In addition to graduate assistantships, graduate students may be appointed to student hourly positions on campus. These appointments are not eligible for a tuition or fee subsidy.
The maximum combined appointment FTE for all jobs on campus is 49 FTE.

For more information on student employment, contact the department of interest or the Office of Human Resources.

## FINANCIAL AID

FOR GRADUATE STUDENTS
The OSU Office of Financial Aid and Scholarships administers federal financial aid programs to assist graduate students with meeting the cost of higher education. To determine eligibility for specific federal aid programs at OSU, graduate students are required to complete the Free Application for Federal Student Aid (FAFSA) each year. Graduate students must be degree-seeking or in an approved certificate program and enrolled at least half-time (5 credits) to qualify for financial aid. Graduate students are not eligible for federal Title IV grants or subsidized loans. Students in graduate certificate programs are only eligible for aid for courses required for their certificate program.
For additional information about Financial Aid for graduate students, visit http://financialaid.oregonstate.edu, http://financialaid.oregonstate.edu/sites/ financialaid.oregonstate.edu/files/grad_
students_.pdf, or contact the OSU Office of Financial Aid and Scholarships.

## GRADUATE RESEARCH SUPPORTING SERVICES

For information on Graduate Student Success, please see the Graduate School's Graduate Student Success Guide http://gradschool.oregonstate.edu/ graduate-student-success.

## INFORMATION SERVICES, COMPUTERS, AND <br> ACADEMIC TECHNOLOGIES

Information Services supports OSU students by providing accounts, technologies, equipment checkout, printing, computing networks and computing labs. The OSU Computer Helpdesk provides students with technical support for laptops, mobile devices, and campus systems like Canvas. If you need inperson support, please visit the Walkup Helpdesk in the Valley Library.
Student employment opportunities are available from a variety of units within IS, including the OSU Computer Helpdesk and Academic Technology, with the greatest opportunities announced just prior to each new term.

## Accounts and Passwords

http://is.oregonstate.edu/ accounts-support

- Accounts \& Technologies Guide for New Students: This guide is for new OSU students who need to get connected to OSU systems such as email and Canvas. Even if you are already connected to one or more OSU systems, we recommend you go through this guide, just to be sure you've covered the bases and know where to get computing help.
- ONID: ONID stands for OSU Network ID. It's a universal computer account available to all OSU students, employees and associates. You use your ONID username and password to access Online Services, Canvas, email, the wireless network and many other university computing services.
- Google Apps for OSU: ONID email is accessed via Google Apps for OSU. All OSU students, instructors, and employees may access all the supported core apps: Drive, Mail, Calendar, Site and Groups.
- Office365 for OSU: All OSU students, instructors and employees may collaborate using native Microsoft Office tools: Word, Excel, PowerPoint and OneNote.

## Learning Technologies

http://is.oregonstate.edu/
learning-technologies

- Canvas, OSU's Learning Management

System used by both off-campus and on-campus students for classwork.

- Classroom Technology Services
- Event Support
- Technology Consulting
- Computing Labs
- Equipment Loan and Rental
- Standard Printing
- Media Creation
- Virtual Computing Lab

## Software

http://is.oregonstate.edu/
accounts-support/software

- Many software packages are available to students.

## Technical Support

- OSU Computer Help Documents, http://oregonstate.edu/helpdocs, 24/7 help guides and FAQs
- OSU Service Desk, http:// is.oregonstate.edu/service-desk, Monday-Friday support via phone, 541-737-3474, and webform
- Walkup Helpdesk, in-person support at the Valley Library, Sunday-Friday

## Student Employment

(Opportunities subject to availability)
Student workers provide program-
ming, development, and support services for the OSU community. Potential employment is contingent upon eligibility per university policy on student employment.

- OSU Service Desk
- Technical support, programmers
- Central Web Services
- Web app and mobile app developers
- Customer service and support, system maintenance

## OREGON STATE UNTVERSTTY LIBRARIES AND PRESS

121 The Valley Library
Corvallis, OR 97331-4501
541-737-3331
Faye A. Chadwell, Donald and Delpha Campbell University Librarian and OSU Press Director
541-737-7300
Oregon State University Libraries and Press cultivate superior scholarship and creativity, empowers discovery, and preserves and disseminates knowledge. We develop user-focused services, share our expertise through teaching and research, and build gateways to unique resources to further the growth of the OSU community, the people of Oregon, and the global scholarly community. OSU Libraries supports the instructional and research needs of OSU students, faculty, and staff through both traditional and innovative services and collections. We advance OSU's land grant mission, contributing to learner success, scholarly excellence, and community engagement.

## RESOURCES

The Oregon State University Libraries is the second largest research library in Oregon with three locations: The Valley Library at the main campus in Corvallis, The Marilyn Potts Guin Library at the Mark O. Hatfield Marine Science Center in Newport, and The OSU Cascades Library co-located at Central Oregon Community College in Bend.

The Valley Library collection includes materials in all subject areas, containing nearly 2 million printed volumes; subscriptions to more than 74,000 journal titles, most of which are available online; 500,000 maps and government documents; and hundreds of video and DVD recordings. As of 2014, more than 100,000 electronic books were available via the OSU Libraries' catalog. In addition to the primary research collection, a robust resource sharing program ensures access to information for research and pedagogical needs. OSU Libraries has digitized thousands of documents, photographs, and maps to make them more widely accessible for researchers, students, and the general public. Additionally, a notable collection of contemporary Northwest artwork is on display throughout The Valley Library with over 80 different artists represented.

The Valley Library provides a flexible learning environment that supports community and engaged learning. Two of its learning spaces are the Learning Commons and the Collaborative Learning Center (CLC). The Learning Commons offers a variety of spaces for groups to collaborate, as well as 118 computers (both Windows PCs and iMacs) that give students access to a wide variety of software. The CLC offers a variety of academic and student support services. Peer tutors and graduate teaching assistants from the College of Science, the Academic Success Center, and the Writing Center are available to assist students during scheduled hours in the CLC.

Partnering with Academic Technologies gives students access to video editing and multimedia production software, large format printing, along with hardware including video cameras, microphones and audio recording equipment. In addition, The Valley Library has 31 three-hour group study rooms, 37 90-day research rooms, six long-term research rooms, one media preview room and three designated floors for quiet study. A drop-in daycare facility is available on the third floor. Laptop computers and tablets are available to OSU students, staff and faculty for six-hour checkout and can be used with the wireless network anywhere in the library.

OSU Libraries supports faculty and student research not only through the purchased collection, but also through unique and rare materials held by the Li-
braries' Special Collections and Archives Research Center. Content in signature collecting areas is made freely accessible on the web to facilitate use by students, faculty, and other researchers. This includes extensive documents from the Ava Helen and Linus Pauling Papers, the History of Science Collections, the Oregon Multicultural Archives, the Natural Resources Collections, the Oregon Hops and Brewing Archives, and the University Archives.

OSU Libraries also manages the ScholarsArchive@OSU institutional repository. This database makes a wide variety of information resources produced at OSU freely available on the web. Examples include faculty articles, OSU theses and dissertations, and all experiment and extension publications. ScholarsArchive@ OSU is consistently ranked among the top ten institutional repositories in the United States, according to Webometrics.

OSU Libraries extends services and resources to the campus and off-campus community in a variety of ways. The collections can be accessed both online and through mobile devices. Hours at The Valley Library have been extended to 24 hours, five days a week (24/5), allowing OSU students and faculty access to collections as well as computers. The Valley Library has wireless throughout the building. Reference assistance is available in person and by phone, by e-mail, by text message, and by instant message during most hours when The Valley Library is open. Subject specialists are available by appointment for individual research consultation.
The Autzen Electronic Classroom in The Valley Library is an enhanced electronic classroom for library-related instruction. It provides a hands-on setting with 24-networked Mac mini dualboot student workstations, white boards, 6 large-format projectors and screens, and built-in sound. Additional furniture provides seating for classes up to 50 students, clickers, and white boards.

OSUL\&P teaching librarians provide workshops, tutorials and digital learning objects to help students develop their research skills. In partnership with faculty, they provide targeted learning experiences in classes and lend their expertise to assignment design and assessment project. Over 7,200 students participate in more than 400 library classes and workshops each year. Teaching librarians also provide individual, in-depth consultations for over 300 students each year in addition to consultations with OSU faculty, staff, and community members.
OSU Libraries has two off-site branches. The Guin Library houses the research and teaching collection of Oregon State University's Hatfield Marine Science Center. The library's collection of more than 35,000 books and journals covers
a broad range of marine-related topics including fisheries, aquaculture, oceanography, geology, environmental studies, and biology. Particular attention is paid to collecting material on marine fisheries, marine mammals, and information specific to the Northeast Pacific Ocean.

The Cascades Library in Bend, housed in the Barber Library of Central Oregon Community College, supports OSU-Cascades upper-division programs, including tourism and outdoor leadership and graduate programs in education. This is a relatively new branch campus that relies on the Cascades Library sharing the space and collections of the Central Oregon Community College Library to deliver services.

One on-campus branch facility is located in the College of Veterinary Medicine on campus. Open 24/7 to the college's academic community, the library has one full-time staff member, along with student employees paid by the college. OSU Libraries handles acquisitions and cataloging for the veterinary medicine collection, while the Veterinary Medicine Library fills interlibrary loan requests for items in the OSU Libraries' collection.

Since 2007, OSU Press has been a department of the OSU Libraries. OSU Press supports the university's strategic plan through its publication of scholarly and general interest books in forestry, natural resources management, and natural history as well as the cultural and social history of Oregon and the Pacific Northwest. The Press and Libraries collaborate on several projects including an open textbook initiative that supports the development of free online textbooks by OSU faculty.

## COLLABORATION

As libraries move away from ownership to access, consortial memberships give OSU faculty and students a wide variety of information in a timely and efficient manner.

- OSU Libraries is a member of the Orbis Cascade Alliance which includes 37 Washington, Idaho, and Oregon universities, colleges, and community colleges with total holdings of 28.7 million titles.
- Membership in the Greater Western Library Alliance (GWLA) enables the Libraries to increase its digital presence through such sites as the Western Waters Digital Library. GWLA is a consortium of 33 research libraries from 17 Midwestern and Western states.
- OSU Libraries is a founding member and active contributor to the Archives West, a consortium of 43 archives and special collections in Oregon, Washington, Idaho, Montana, and Alaska. NWDA
provides enhanced access to archival and manuscript collections across the northwest through a union database of Encoded Archival Description (EAD) finding aids.
- OSU Libraries participates in the Oregon Statewide Database Licensing Program that provides a suite of 22 general periodicals and reference database products from Gale/Cengage Learning, the database vendor that was awarded the state contract in 2013.
- As a member of the Center for Research Libraries, the OSU Libraries can provide unlimited access to all CRL resources - approximately five million publications, archives, and collections to supplement our holdings, especially in the areas of humanities and social science. OSU faculty can borrow CRL materials for extended loan periods.
- OSU Libraries is a member of the Western Regional Storage Trust (WEST), a distributed retrospective print journal repository program serving research libraries, college and university libraries, and library consortia in the Western Region of the United States.
- OSU Libraries is a member of the Coalition for Network Information, the Council on Library and Information Resources, OCLC (the world's largest library cooperative), the Library Publishing Coalition, and the Scholarly Publishing and Academic Resources Coalition."
OSU Libraries also collaborates with the University of Oregon Libraries on making joint decisions on collections, expanding access to each library's collections, sharing software, providing joint faculty/ staff development opportunities, and, in general, viewing the two libraries as a single library with shared purposes. This collaboration is especially visible in "Oregon Digital" (https://oregondigital. org/catalog/), which provides integrated online access to digitized materials from both libraries.
OSU Libraries partners with the Institute for Natural Resources on the Oregon Explorer, a comprehensive, natural resources digital library designed to provide easy and rapid access to reliable, up-to-date information about the state's natural resources.
The most notable addition to the library's instruction program since 2010 has been the implementation of a library course designator that will allow OSU Libraries and Press to develop and offer a for-credit library sciences curriculum to partner with other academic departments to enhance student success in learning and development of critical thinking and life-long learning.

## ENVIRONMENTAL SCIENCES

Carolyn Fonyo Boggess, Interim
Program Director
Environmental Sciences
Graduate Program
104 Wilkinson Hall
Oregon State University
Corvallis, OR 97331
541-737-5095
Website: http://envsci.science. oregonstate.edu/

## Graduate Major

Environmental Sciences (MA, MS, PhD, PSM)

## Graduate Minor

Environmental Sciences

Environmental sciences consists of curricula that foster interdisciplinary education for students seeking to better understand earth systems. The undergraduate curriculum leads to the BS degree in Environmental Sciences and requires students to complete courses that develop a broad base of knowledge in basic science disciplines, social sciences, and an area of specialization. A minor in environmental sciences is also available for those undergraduate students completing their degrees in other fields. The theme of the Environmental Sciences Program is central to the mission of OSU and reflects the strengths of OSU and other agencies and institutions in Corvallis and throughout the state of Oregon. The BS degree in Environmental Sciences provides excellent training for careers with agencies responsible for environmental protection and natural resource use, consulting firms, and those seeking opportunities for graduate studies.

## ENVIRONMENTAL SCIENCES (MA, MS, PhD, PSM)

## Graduate Areas of Concentration

 Biogeochemistry, ecology, environmental education, natural resources, quantitative analysis, social science, water resources
## Also available via Ecampus (PSM degree only).

The Environmental Sciences Graduate Program provides curricula leading to MA, MS and PhD degrees in Environmental Science. The curriculum integrates thinking across disciplines, especially life, physical, and social sciences. Environmental science explores natural processes on earth and their alteration by human activity. OSU has exceptional strength in many of the disciplines, including science, agriculture, forestry, engineering, public health, liberal arts, social science, and oceanography and atmospheric science. Strength in these disciplines allows the ES Graduate Pro-
gram to provide high-quality interdisciplinary education for environmental scientists and continuing postgraduate educational opportunities to scientists who are already active in the field. The degrees administered by the program are OSU's contribution to the Joint-Campus Graduate Program in Environmental Sciences, Studies, and Policy, which links environmental graduate programs among the major research universities in Oregon.
The ES Graduate Program develops scientists who will be able to analyze and understand environmental systems, predict environmental change, and participate in the management of the environment. Each student completing a major in the ES Graduate Program will perform research and complete a thesis, dissertation, or research project. Each student will complete a core of ES graduate courses that will integrate concepts across the physical sciences, life sciences, and social sciences. Each student will also develop depth in a carefully designed, interdisciplinary area of concentration or track. Tracks that are currently available include ecology, biogeochemistry, social science, quantitative analysis, water resources, and environmental education. Methods and numerical skill courses, electives, and thesis make up the remainder of a student's program.
Students in the ES Graduate Program may choose advisors from faculty members already appointed at OSU, as well as other scientists who apply and are accepted in the environmental sciences graduate faculty. The Environmental Sciences Graduate Program fosters interdisciplinary education and seeks connections between institutions.
For more information, contact Carolyn Fonyo Boggess, Interim Director, Environmental Sciences Graduate Program, Oregon State University, Corvallis, OR 97331-2904, or email: esgp@oregonstate. edu.

## Degree Requirements

## MA and MS Degrees (45 credits)

Environmental science core courses (9)
Methods and numerical skills courses (6)
ES area of concentration (Track) (15)
Elective courses (3-9)
Thesis (6-12)
Note: The MA degree requires proficiency in a foreign language.

## PROFESSIONAL SCIENCE MASTER'S DEGREE IN ENVIRONIMENTAL SCIENCE

## Also available via Ecampus.

Carolyn Fonyo Boggess, Interim Director
Environmental Sciences Graduate
Program;
Professional Science Master's in
Environmental Sciences Program Advisor 104 Wilkinson Hall
Corvallis, OR 97331
Email: carolyn.fonyo@oregonstate.edu
Website: http://psm.science.oregonstate. edu/environmental-sciences
The Professional Science Master's degree in Environmental Sciences (PSM@ENSC) provides advanced training for early- and mid-career professionals with a need for expertise in environmental sciences. Preferably applicants would have at least two years of experience working in the environmental field, but this is not mandatory for admission. The PSM@ ENSC degree is offered as a non-thesis program only. Students have an advisor and graduate committee to review their program of study, provide career and internship advice, and evaluate a final report based on the internship or project experience.

## PSM Degrees Requirements

## (45 credits)

Environmental Sciences core courses (9 credits)
Numerical skills (6-8 credits)
Environmental Sciences track electives
(8-10 credits)
Professional core courses (8 credits)
Professional electives ( 6 credits)
Internship or project (6 credits)
For general information about the PSM@ENSC degree option, visit the website: http://psm.science.oregonstate.edu/ environmental-sciences or contact the Interim Director of Environmental Sciences, Carolyn Fonyo Boggess at carolyn. fonyo@oregonstate.edu or 541-760-4196.

Course substitutions must be approved by the program advisor. Many of our courses are offered through Ecampus, but some may be offered through Corvallis, Cascades or Hatfield Marine Science Center. Please check course offerings through the online catalog or consult with the program advisor.

## Major Code: 6420

## ENVIRONMENTAL SCIENCES GRADUATE MINOR

For more details, see the departmental advisor.

## Minor Code: 6421

■ ENVIRONMENTAL SCIENCES COURSES
ENSC 101. ENVIRONMENTAL SCIENCES
ORIENTATION (1). Introduction to the
Environmental Sciences Program and related
professional and educational opportunities. Recommended for all freshman and first-year transfer environmental sciences majors, but open to all students interested in learning about career options in the environmental sciences. Graded P/N.
ENSC 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
ENSC 401. RESEARCH AND SCHOLARSHIP
(1-16). This course is repeatable for a maximum of 24 credits. PREREQS: Instructor and departmental approval required.
ENSC 402. INDEPENDENT STUDIES (1-16).
This course is repeatable for a maximum of 24 credits. PREREQS: Departmental approval required.
ENSC 403. THESIS (1-16). This course is repeatable for a maximum of 24 credits. PREREQS: Departmental approval required.

ENSC 405. READING AND CONFERENCE (1-12). This course is repeatable for a maximum of 16 credits. PREREQS: Instructor and departmental approval required.
ENSC 406. PROJECTS (1-16). This course is repeatable for a maximum of 24 credits. PREREQS: Departmental approval required.
ENSC 407. SEMINAR (1-16). This course is repeatable for a maximum of 12 credits. PREREQS: Departmental approval required.
ENSC 407H. SEMINAR (1-16). This course is repeatable for a maximum of 12 credits. PREREQS: Departmental approval required. Honors College approval required.
ENSC 408. WORKSHOP (1-16). This course is repeatable for a maximum of 12 credits. PREREQS: Departmental approval required.

## ENSC 410. ENVIRONMENTAL SCIENCE

INTERNSHIP (1-12). Supervised practical
experience working with professionals at selected cooperating institutions, agencies, laboratories, or companies. Graded P/N. This course is repeatable for a maximum of 48 credits. PREREQS: Instructor and departmental approval required
ENSC 479. *^ENVIRONMENTAL CASE
STUDIES (3). Improves students' ability to ask questions, gather and synthesize information, and communicate ideas on environmental topics. Instruction and information necessary for the course is entirely Web based. (Bacc Core Course) (Writing Intensive Course) PREREQS: One year of college biology or chemistry and junior standing required.

ENSC 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ENSC 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ENSC 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.
ENSC 505. READING AND CONFERENCE
(1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ENSC 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required
ENSC 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ENSC 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.
ENSC 510. INTERNSHIP (1-12). This course is repeatable for a maximum of 12 credits. PREREQS: Departmental approval required.
ENSC 515. ENVIRONMENTAL PERSPECTIVES AND METHODS (3). Unique perspective or
method each quarter. Possibilities include: remote sensing, modeling over a range of scales in time, space, and levels of system organization; and risk analysis.
ENSC 520. ENVIRONMENTAL ANALYSIS (3).
Develop analytical thinking, explore analytical approaches, enhance writing skills, and gain experience in oral communication about environmental issues.

ENSC 530. RESEARCH PROFILES (1-2) Faculty and graduate student environmental research presentations.
ENSC 599. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
ENSC 601. RESEARCH AND SCHOLARSHIP
(1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ENSC 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.
ENSC 605. READING AND CONFERENCE
(1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ENSC 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ENSC 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ENSC 630. RESEARCH PROFILES (1-2).
Faculty and graduate student environmental research presentations.

ENSC 699. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## MTEBDISCIPLINARY

## STUDIES

David A. Bernell, Director
MAIS Program
School of Public Policy
312 Gilkey Hall
Oregon State University
Corvallis, OR 97331
541-737-6281
Email: david.bernell@oregonstate.edu
Also email: graduate.school@oregonstate. edu
Website: http://oregonstate.edu/dept/ grad_school/interdisciplinary.php

## Graduate Major

Master of Arts Interdisciplinary Studies (MAIS)
Graduate Areas of Concentration
Selected from three fields offering graduate majors and minors

The Master of Arts in Interdisciplinary Studies (MAIS) degree program is designed to permit students to formulate programs that integrate work from three separate disciplines. Breadth of study is important in designing the program. A research paper or thesis offers the opportunity to integrate the three disciplines.
Any graduate major or minor may serve as a discipline or field for this degree. Two of the three fields may be from one department if the areas of concentra-
tion within these two fields are different. Program participation varies

## from year to year.

Graduate programs that are participating in this degree are listed in the Graduate School website at http://gradschool. oregonstate.edu/programs.

## ADMISSION

The applicant must satisfy university admission requirements at the graduate level and must gain acceptance at the point of admission by the departments offering the fields that will make up the program.

## ADMINISTRATION

The Graduate School will handle general administration and recordkeeping. Students with general questions about the MAIS degree are encouraged to confer with the director of the MAIS graduate program.

The student should select a committee in consultation with the department/ school chair of the emphasized field or with his or her designated representative. With the advice of the committee chair, the student will select a committee member from each of the remaining two fields. The student will select the fourth committee member, a Graduate Council representative, from a list of names to be obtained in the Graduate School office. All members of the committee must be on the graduate faculty.

Before the completion of 18 credits of graduate course work, the student must file the official program form, approved by the committee. Program planning meetings are required, and the student has the responsibility for arranging the committee meetings necessary in the planning of the program. In the event that the student subsequently desires to change one or more disciplines on his or her program, the student must file a change in degree program with the Graduate School and schedule another program meeting in order to gain committee approval.

## PROGRAM REQUIREMENTS

The Master of Arts in Interdisciplinary Studies (MAIS) degree is granted for attainment of broad, advanced knowledge and achievement integrated from three fields of study. Any graduate major or minor may serve as a field for this degree. Two of the three fields may be from one department if the areas of concentration within these two fields are different. A minimum of 9 credits in each of the three fields of study is required. The degree requires a minimum of 49 credits, including 4 credits of course work on interdisciplinary research methods.

No more than 21 credits (excluding thesis or research paper credit) may be taken in any field unless the total pro-
gram exceeds 49 credits. There is no foreign language requirement. No more than 3 credits of blanket-numbered courses in each field of study may be used in the program; thesis credits (Option A) or research paper credits (Option B) are exempt from this limitation. The student's committee consists of four members of the graduate faculty-one from each of the three fields-and a Graduate Council representative. A formal program meeting must be held prior to the completion of 18 graduate credits. A final oral examination is required.

## There are two options under the program:

Option A: Thesis option. The thesis must coordinate work in the three fields. The requirement is 6 to 9 credits of Thesis 503. The thesis advisor must be a member of the graduate faculty authorized to direct theses.

Option B: Research paper option. The research paper must integrate work from at least two of the three fields. The requirement is 4 to 7 credits, registered as Research 501, Reading and Conference 505, or Projects 506.

## Major Code: 9900 <br> ■ INTERDISCIPLINARY <br> PROGRAMS COURSES

IST 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

## AFFILIATE FACULTY

Over ninety faculty members drawn from 20 departments in seven colleges participate in the MCB program.

## Graduate Majors

Applied Biotechnology (PSM)
[To be terminated.]
Molecular and Cellular Biology (MS, PhD)
Graduate Areas of Concentration
Bioinformatics
Biotechnology
Cell Biology
Developmental Biology
Genome Biology
Molecular Biology
Molecular Pathogenesis
Molecular Virology
Plant Molecular Biology
Structural Biology

## Graduate Minor <br> Molecular and Cellular Biology

The Molecular and Cellular Biology Program provides students with comprehensive interdisciplinary training in molecular and cellular biology while reserving sufficient flexibility for students to specialize in their areas of interest. The elements of the core curriculum include courses in molecular genetics and cell structure and function, bioinformatics and genomics, scientific skills and ethics, along with research rotations with individual faculty members. Additional course work is custom-tailored to the individual student's interests and needs. Each program requires 36 units of grad-uate-level course work, participation in seminar programs, two quarters of supervised teaching experience, written and oral preliminary examinations, supervision by an individual committee of five faculty members, and presentation of a thesis containing the results of publishable original research.
The program also offers access to all of the participating faculty as potential research advisors. Students do three research rotations in the first year and select their advisor from over 90 faculty members in the 20 participating departments in seven colleges. Therefore, the

MCB Program lowers interdisciplinary barriers and allows the students to select the advisors that most closely match their interests after they have been on campus for one or more terms.

## GRADUATE MAJORS

## APPLIED BIOTECHNOLOGY (PSM)

## Program to be terminated upon

 approval of proposal \#93584.The worlds of science and business are increasingly interconnected - creating strong demand for individuals who can bridge these two disciplines. Biomedical industries and start-up companies need employees who can combine their scientific and technical knowledge with good business management and communication skills. The Professional Science Master's (PSM) in Applied Biotechnology at OSU is the first program of its kind in the Pacific Northwest and was created with the help of professional affiliates employed in leadership roles in the biotech industry. The objective of this degree is to train students to be able to function effectively in industrial environments. Special training in business management, communications, and ethics complement core science curriculum, and students are required to complete an internship in lieu of thesis research.
The PSM program can usually be completed in two years, based on full-time study and at least 54 credit hours. Core lecture courses provide the conceptual framework necessary in the biotechnology sector. Microbial genetics, structure and function of eukaryotic cells, eukaryotic molecular genetics, and cell signaling and development are some of the topics that are covered (MCB 554, MCB 555, МСВ 556, and MCB 575). An intensive laboratory experience (MCB 525) is a 2-week summer course that has attracted students from around the country for 8 years to learn molecular biology theory and practice. Bioinformatics training is also an option. Approved electives in an Area of Concentration give focus and identity to each student's curriculum and allow for flexibility in response to changing employment demands. Current Areas of Concentration include Bioinformatics, Biotechnology, Cell Biology, Developmental Biology, Genome Biology, Molecular Biology, Molecular Pathogenesis, Molecular Virology, Plant Molecular Biology and Structural Biology. Professional courses are required in communication, research ethics, and business management (PSM 513, PSM 565, PSM 566, PSM 567, COMM 550 and PHL 547). These courses are designed to be taken in sequence during the first academic year. Students are required to complete a 3 - to 6 -month internship ( $6-12$ credits) in lieu
of thesis research (MCB 510).
For general information about PSM programs, contact the PSM Director, Dee Denver, 3021 Agricultural and Life Sciences Building, 541-737-3799, denvedee@cgrb.oregonstate.edu and millimag@ cgrb.oregonstate.edu.

## Degree Requirements (54 credits) <br> Core science courses (19)

Approved electives (11)
Professional courses (18)
Internship (6)
Major Code: 4502
MOLECULAR AND CELLULAR BIOLOGY (MS, PhD)

Graduate Areas of Concentration
Bioinformatics, biotechnology, cell biology, developmental biology, genome biology, molecular biology, molecular pathogenesis, molecular virology, plant molecular biology, structural biology
MCB doctoral students do research rotations in three laboratories during the first year, and then carry out their thesis research in subsequent years under the direction of a member of the MCB faculty. The MCB Program lowers interdisciplinary barriers and allows each individual the opportunity to select the most suitable advisor and committee.

## BIOLOGY COURSES

MCB 501. RESEARCH AND SCHOLARSHIP
(1-16). This course is repeatable for a maximum of 99 credits.
MCB 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.
MCB 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 99 credits.
MCB 507. SEMINAR (1-16). This course is repeatable for a maximum of 99 credits.
MCB 508. WORKSHOP (1-16). This course is repeatable for a maximum of 99 credits.
MCB 509. PRACTICUM (1-16). This course is repeatable for a maximum of 99 credits.

MCB 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 99 credits.

MCB 511. RESEARCH PERSPECTIVES IN MOLECULAR AND CELLULAR BIOLOGY (3). Provides graduate students with an in-depth exposure to faculty members at OSU involved in molecular and cellular biology and their specific fields of research.
MCB 524. MOLECULAR AND CELLULAR BIOLOGY TECHNIQUES (1). Modern methods
for manipulation of cellular macromolecules Recombinant DNA technology and protein chemistry methods will be covered. Includes daily lectures over a two-week period. Lec/lab. Graded P/N. PREREQS: BB 451 or equivalent. May not be taken concurrently with MCB 525.
MCB 525. TECHNIQUES IN MOLECULAR AND CELLULAR BIOLOGY (3). An intensive laboratory course introducing modern methods for the manipulation of cellular macromolecules. Recombinant DNA technology, protein chemistry, and in situ hybridization methods presented in a format that emphasizes experimental continuity. The course requires two weeks of intensive full-time involvement. PREREQS: Departmental approval required.
MCB 530. INTRODUCTION TO POPULATION GENETICS (3). Genetic polymorphisms, inbreeding, genetic drift, population subdivision and gene flow, mutation and selection. Emphasis on applied rather than theoretical questions. Offered alternate years. PREREQS: BI 311 and ST 351 and ST 352
MCB 535. GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK (3). A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSLISTED as BI 435/BI 535, BI 435H, FES 435/FES 535, TOX 435/ TOX 535, TOX 435H. PREREQS: One quarter each of biology and chemistry helpful but not essential.

MCB 541. PLANT TISSUE CULTURE (4).
Principles, methods, and applications of plant tissue culture. Laboratory is important part of course. Topics include callus culture, regeneration, somaclonal variation, micropropagation, anther culture, somatic hybridization, and transformation. CROSSLISTED as PBG 441/PBG 541. PREREQS: (BI 311 and BOT 331) or PBG 430
MCB 554. GENOME ORGANIZATION, STRUCTURE, AND MAINTENANCE (4). How diverse organisms store their individual sets of genetic information (genomes). Evolution of genomes and gene families. Structures of DNA and chromatin. Biochemical and regulatory pathways that protect cellular genomes against environmental and endogenous damage and ensure transmission of faithful copies to progeny. Remodeling of genomes by recombination and transposition. CROSSLISTED as TOX 554. PREREQS: BI 311 (genetics or equivalent) and (BB 450 and BB 451 and BB 452) or (BB 490 and BB 491 and BB 492) or equivalent.

MCB 555. GENOME EXPRESSION AND REGULATION (4). Prokaryotic and eukaryotic systems will be used to describe recent advances in understanding transcriptional and posttranscriptional control mechanisms. Topics include: microbial, yeast and mouse model systems; transcriptional control mechanisms; RNA processing, silencing and microRNAs; protein synthesis and posttranslational modification; microarray- and mass spectrometry-based expression genomics. PREREQS: BB 451 or equivalent.

MCB 556. CELL AND DEVELOPMENTAL
BIOLOGY (4). Examination of molecular and structural elements in eukaryotic cells and their relationship to function and development. Topics include nuclear organization, membranes, organelles, intracellular sorting, cell energetics, cell signaling, cell motility, cell division cycle, and developmental processes of selected model organisms. Critical reading and writing skills will be emphasized. PREREQS: BB 450 and BB 451 (biochemistry) or equivalent; BI 311 (genetics) or equivalent. Recommended: BI 460 (cell biology) or equivalent; MCB 554 and MCB 555.
MCB 557. SCIENTIFIC SKILLS AND ETHICS
(3). Offers instruction, guest lectures and case-study based discussions of ethical issues
relevant to scientists on topics such as mentoring, best practices of conducting research, research misconduct and compliance, intellectual property, peer review, ethical use of animal and human subjects and managing conflicts of interest. Training in the preparation and presentation of scientific seminars and grant writing. PREREQS: Graduate standing.
MCB 563. CANCER AND CHEMOPREVENTION (2). A summary of mechanisms of cancer progression, how cancer is detected, and introduction to chemoprevention using targeted therapy and alternative medicine. PREREQS: BB 451 and BI 314 and BI 460 or equivalent courses.

MCB 575. COMPARATIVE GENOMICS (4). Principles of comparative genomics. Methods for genome assembly and annotation. Genomic approaches for the study of structural change, whole genome duplication, gene family evolution, gene networks, gene regulation and epigenetics. Lab topics include the analysis of next generation sequencing data and conducting comparative genome analyses. Lec/lab. CROSSLISTED as BOT 575. PREREQS: Students will require a basic working knowledge of cell and molecular biology and genetics. BI 314 and (BI 311 or CSS 430)
MCB 576. INTRODUCTION TO COMPUTING IN THE LIFE SCIENCES (3). Introduction to management of large datasets (e.g., nucleic acids, protein), computer programming languages application of basic mathematical functions, and assembly of computational pipelines pertinent to life sciences. CROSSLISTED as BOT 476/BOT 576. PREREQS: Cell and molecular biology or genetics, or by approval of instructor. Familiarity with text editing software and unix/linux operating system is advantageous.

MCB 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

MCB 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

MCB 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

MCB 605. READING AND CONFERENCE (1-16)
This course is repeatable for a maximum of 16 credits.
MCB 609. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.
MCB 610. INTERNSHIP (1-9). Laboratory rotation. This course is repeatable for a maximum of 16 credits. PREREQS: MCB graduate students only.
MCB 620. DNA FINGERPRINTING (1). Principles
and methods for producing and analyzing
DNA fingerprints. Offered alternate years.
CROSSLISTED as PBG 620. PREREQS: BI 311 or CSS 430 or CSS 530 or PBG 430 or PBG 530 or HORT 430 or HORT 530 or equivalent.
MCB 621. GENETIC MAPPING (1). Principles and methods for constructing genetic maps comprised of molecular and other genetic markers. Offered alternate years. CROSSLISTED as PBG 621. PREREQS: BI 311 or CSS 430 or CSS 530 or PBG 430 or PBG 530 or HORT 430 or HORT 530 or equivalent.
MCB 622. MAPPING QUANTITATIVE TRAIT LOCI (1). Principles and methods for mapping genes underlying phenotypically complex traits. Offered alternate years. CROSSLISTED as PBG 622. PREREQS: CSS 590 or ST 513 or equivalent.
MCB 637. MOLECULAR HOST-MICROBE
INTERACTIONS (3). Lecture and discussionbased presentation of the molecular bases for interactions between organisms. Addresses bacterial, algal, and fungal symbionts of eukaryotes and considers pathogenesis, commensalism, and mutualism. A focus on the evolution of host-microbe interactions is included.

MCB 651. MOLECULAR BASIS OF PLANT PATHOGENESIS (3). Analysis of current concepts in the physiology, biochemistry, and genetics of host-parasite interactions. Topics covered include specificity, recognition, penetration, toxin production, altered plant metabolism during disease, resistance mechanisms and regulatory aspects of gene expression during host-parasite interactions. Offered alternate years. CROSSLISTED as BOT 651. PREREQS: BOT 550

MCB 662. HORMONE ACTION (3). Mechanisms of action of peptide and steroid hormones and related compounds at the cellular level. CROSSLISTED as ANS 662, BB 662. PREREQS: BB 451 [C] or BB 551 [C] or BB 492 [C] or BB 592 [C]
MCB 671. MOLECULAR TOOLS (3). Intended for personnel with some scientific background who are seeking basic- and advanced-level molecular biology knowledge and who wish to become involved with molecular biology-related and biotechnological research. CROSSLISTED as VMB 671. PREREQS: Graduate standing or advanced undergraduate standing in science or engineering, with permission of instructor.

MCB 699. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits.

## GRADUATE MINORS

## WATER RESOURCES GRADUATE MINOR

## Graduate Areas of Concentration

Hydrology, water quality, water resources planning and management
A Water Resources graduate minor for the master of science, master of arts, and doctor of philosophy degree programs is offered with specialization in hydrology, water quality, or water resources planning and management. The first two options are technically oriented while the third gives added socioeconomic emphasis. Seminars, readings, and conferences are offered by Water Resources Graduate Program.

The graduate minor options are structured around core groups of courses and complementary courses designed to broaden the student's education. University departments and schools that offer courses related to water resources include the departments of Applied Economics; Anthropology; Biochemistry and Biophysics; Biological and Ecological Engineering; Botany and Plant Pathology; Business Administration; Chemistry; Crop and Soil Science; Entomology; Fisheries and Wildlife; Forest Engineering; Forest Resources; Mathematics; Microbiology; Public Health; Rangeland Ecology and Management; Statistics; and Zoology; the School of Chemical, Biological, and Environmental Engineering; the School of Civil and Construction Engineering; the School of Mechanical, Industrial, and Mechanical Engineering; School of Public Policy; and the College of Earth, Ocean, and Atmospheric Sciences. About 20 departments conduct teaching or research programs in water resources.

For more information, contact gradwater_director@oregonstate.edu or visit http://oregonstate.edu/gradwater/.

## WATER RESOURCES ENGINEERING GRADUATE MINOR

Graduate Areas of Concentration
Groundwater engineering, surface water engineering, watershed engineering
A graduate minor in Water Resources Engineering for the master of science, master of arts, and doctor of philosophy degree programs is offered with specialization in groundwater engineering, surface water engineering, or watershed engineering. Seminars, courses, and reading and conference courses in water resources engineering are offered by Water Resources Graduate Program.
The graduate minor options are structured around courses designed to broaden the student's education in one of the above areas of concentration. University departments and schools that offer courses related to water resources engineering include the departments of Biochemistry and Biophysics; Biological and Ecological Engineering; Botany and Plant Pathology; Chemistry; Crop and Soil Science; Geosciences; Mathematics; Rangeland Ecology and Management; Statistics; the School of Forest Engineering, Resources and Management; the School of Biological and Population Health Sciences; the School of Chemical, Biological, and Environmental Engineering; the School of Civil and Construction Engineering; the School of Mechanical, Industrial, and Mechanical Engineering; and the College of Earth, Ocean, and Atmospheric Sciences. About 20 departments conduct teaching or research programs in water resources.

For more information, contact gradwater_director@oregonstate.edu or visit http://oregonstate.edu/gradwater/.

## Minor Code: 3100

## WATER RESOURCES POLICY AND MANAGEMENT GRADUATE MINOR

## Graduate Areas of Concentration

Water resources policy and management
A graduate minor in Water Resources Policy and Management for the master of science, master of arts, and doctor of philosophy degree programs is offered with specialization in the human dimensions of water resources policy and management. Seminars, readings, and conferences in water resources policy and management are offered by Water Resources Graduate Program and several affiliated departments.
The graduate minor options are structured around courses designed to broaden the student's education in water resources policy and management. University departments that offer courses related to water resources policy and management include the departments of Applied Economics; Anthropology;

Fisheries and Wildlife; Geosciences; Rangeland Ecology and Management; Statistics; and Zoology; the School of Public Policy; the School of Forest Engineering, Resources and Management; the School of Biological and Population Health Sciences; the College of Business Administration, and the College of Earth, Ocean, and Atmospheric Sciences.

For more information, contact gradwater_director@oregonstate.edu or visit http://oregonstate.edu/gradwater/.

## Minor Code: 0990

## WATER RESOURCES SCIENCE GRADUATE MIINOR

## Graduate Areas of Concentration Water resources science

A graduate minor in Water Resources Science for master of science, master of arts, and doctor of philosophy degree programs is offered with specialization in hydrology or geochemistry. Seminars, readings, and conferences are offered by Water Resources Graduate Program.
The graduate minor options are structured around courses designed to broaden the student's education in water resources science, specifically in hydrology or geochemistry. University departments and schools that offer courses related to water resources science include the departments of Biochemistry and Biophysics; Biological and Ecological Engineering; Botany and Plant Pathology; Chemistry; Crop and Soil Science; Entomology; Fisheries and Wildlife; Geosciences; Mathematics; Microbiology; Rangeland Ecology and Management; Statistics; and Zoology; and the School of Forest Engineering, Resources and Management; the School of Biological and Population Health Sciences; the School of Chemical, Biological, and Environmental Engineering; the School of Civil and Construction Engineering; the School of Mechanical, Industrial, and Mechanical Engineering; the School of Public Policy; and the College of Earth, Ocean, and Atmospheric Sciences. About 20 departments conduct teaching or research programs in water resources.
For more information, contact gradwater_director@oregonstate.edu or visit http://oregonstate.edu/gradwater/.

WRE 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
WRE 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.
WRE 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

WRE 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
WRE 507. SEMINAR (1-16). This course is
repeatable for a maximum of 16 credits.
WRE 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.
WRE 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

WRE 599. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits.

WRE 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

WRE 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

WRE 605. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.
WRE 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

WRE 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.
WRE 610. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.
WRE 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## I WATER RESOURCES POLICY COURSES

WRP 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
WRP 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.
WRP 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.

WRP 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

WRP 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

WRP 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

WRP 509. PRACTICUM (1-16). This nontraditional class explores tools, models and concepts in the collaborative decision-making process in water resources. Emphasis is on group projects and self-directed practical application of community-based natural resources. This course is repeatable for a maximum of 16 credits.

WRP 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

WRP 517. WRITING IN WATER RESOURCES
(4). An intensive summer course to develop proficiency in writing at a graduate level for the wide range of writing tasks common to water resource professionals. Students will complete individual in-class writing assignments and collaborate on a draft of a technical report. While it is designed for students in the Water Cooperation and Peace joint degree program (many of whom will be international students) the course will also be useful for other students. Lec/rec.

WRP 521. WATER CONFLICT MANAGEMENT
AND TRANSFORMATION (3). Examines ways to work effectively in contentious water situations. Explores conflict tolerance, prevention, management, and transformation through collaborative structures as well as through models of negotiation and dialogue.
WRP 523. ENVIRONMENTAL WATER
TRANSACTIONS (3). Covers the theory and practice of using water rights transactions to reallocate water rights to environmental purposes. Different transactional techniques and contexts appropriate to their use are presented through case studies primarily from the western United States, with some reference to the use transactions in other countries such as Australia. PREREQS: Graduate standing.

WRP 524. SOCIOTECHNOLOGICAL ASPECTS OF WATER RESOURCES (3). Core curriculum, graduate-level course in the Water Resources Graduate Program focusing on an interdisciplinary approach to water resources research that integrates the human and the technological dimensions of water resource issues. It is comprised of lecture and discussion sessions with guest lectures by visiting seminar speakers. PREREQS: Graduate student standing.
WRP 548. CONDUCTING COLLABORATIVE PROJECTS (3). Focuses on development of the abilities needed to complete a directed waterrelated collaborative project, delivered through experiential learning. The course specifically addresses development of collaborative skills needed to work in interdisciplinary teams. The course activities are centered around a collaborative project on which students will be conducting research, collecting data synthesizing information; and providing classmates with constructive peer-review. Lec/rec.
WRP 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
WRP 808. WORKSHOP (1-4). This course is repeatable for a maximum of 4 credits.

## - WATER RESOURCES SCIENCE COURSES

WRS 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

WRS 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

WRS 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.
WRS 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
WRS 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.
WRS 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.
WRS 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.
WRS 532. APPLIED FIELD PROBLEMS (3). Introduces graduate students to real-world water resources problems and approaches to solving them. Students will assess and analyze the various constraints and limitations to integrated water management that often cannot be adequately simulated in classroom exercises. They will acquire the practical tools necessary to become effective water resources professionals in a rapidly changing world.

WRS 536. FUNDAMENTALS OF HYDROLOGY (3). Teaches students from a non-technical background in the Water Cooperation and Peace program the fundamentals of hydrology. Students will be introduced to hydrology and the hydrological cycle at the graduate level with a focus on key concepts. Students will apply these concepts to understanding of real world problems in the associated course, WRS 532, Applied Field Problems. Lec/lab.
WRS 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

WRS 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

WRS 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

WRS 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

WRS 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
WRS 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

WRS 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

WRS 610. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

WRS 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## OTHER DECREES $\boldsymbol{E}_{2}$ <br> PROCRAMS WHTHIN THE CRADUATE SCHOOL

## COMPARATIVE HEALTH

 SCIENCES (MS, PhD)The Comparative Health Sciences graduate major is an interdisciplinary program administered by the Graduate School. Participating colleges include Veterinary Medicine, Public Health and Human Sciences, Pharmacy, and the Graduate School.

For further information about the graduate major, see the proposal at https://secure.oregonstate.edu/ap/cps/ proposals/view/84096 and contact the Graduate School and College of Veterinary Medicine.

MS degree students complete a total of 45 graduate credits, including 12 thesis credits.
PhD degree students complete a total of 108 graduate credits beyond the bachelor's or professional (DVM, MD) degree, including at least 36 credits of non-blanket course work.

All students complete the core curriculum and at least two electives for a total of 12 credits. Students must also complete the Biomedical Sciences option.

## Required Core

Research Perspectives Lab Rotations (3) (PhD only)
ST 511. Methods of Data Analysis (4)
Biomedical Ethics (1)
Grant Application Preparation (1)
Seminar (1)

## Electives

BB 550. General Biochemistry (3)
MCB 524. Molecular and Cellular Biology Techniques (1)
(New course) Introduction to
Bioinformatics
(New course) Introduction to Epidemiology
(New course) Introduction to Genomics
(New course) Introduction to Immunology
Major Code: 9300

## OPTIONS

BIOMEDICAL SCIENCES OPTION
Students must also complete the Biomedical Sciences option:

## MS Students

VMB 521. Animal Models (3)
VMC/VMB 501. Research (5)
VMC/VMB 503. Thesis (12)
VMC/VMB 507/607. Seminar (1)
Electives (24)
PhD Students:
VMB 521. Animal Models (3)

VMB 603. Thesis (36)
VMB 671. Molecular Tools (3)
VMB 607. Seminar: Dissertation Defense (1) Electives (53)
Option Code: 9305

## CLINICAL SCIENCES OPTION

The College of Veterinary Medicine, in collaboration with partners in the Division of Health Sciences, has established a new interdisciplinary graduate program in Comparative Health Sciences. This program offers both MS and PhD degrees and focuses on health sciences graduate education and research at the whole animal level, but will be complementary to and supportive of existing programs at the molecular and cellular level. Students are encouraged to study topics that bridge two distinct areas of study in order to benefit from the interdisciplinary structure of the program. Administered by the Graduate School, this interdisciplinary program provides an opportunity for all units within the College of Veterinary Medicine to participate in graduate education and encourages the integration of several related areas of emphasis currently existing in other units. Students are required to complete a program core curriculum as well as an option-specific curriculum. The program's other transcript-visible option, Biomedical Sciences, is intended to accommodate students with advisors in the College of Veterinary Medicine.

The Clinical Sciences graduate option will reflect the unique program of dual clinical residents/graduate students. The purpose of this option is to educate veterinarians in the conduct of research in a specialty clinical environment, consistent with the overall goals of comparative veterinary medicine.
This option is available only to dual clinical residents/graduate students of the College of Veterinary Medicine, in conjunction with 2 -, 3 - or 4 -year residencies in a veterinary specialty.

## Select 6 credits of one of the <br> following courses:

VMC 682. Topics in Internal Medicine (2-4)
VMC 684. Topics in Surgery (2-4) or other
clinical specialty

## Select 6 credits of one of the

following courses:
VMC 632. Postgraduate Medicine (3-7)
VMC 634. Postgraduate Surgery (3-7) or other clinical specialty

## Option Code: 9306

## GRADUATE MINORS

## BIOLOGICAL DATA SCIENCES GRADUATE MINOR

The graduate minor in Biological Data Sciences will familiarize MS and PhD graduate students in the life sciences with research concepts and methodolo-
gies in quantitative sciences, and those in the quantitative sciences with research concepts and methodologies in life sciences. The disciplinary learning goals of the minor are by nature foundational. Thus, for example, students with advanced expertise in life sciences would receive foundational training in computer science, statistics and/or mathematics. Students with advanced expertise in computer science would receive foundational training in life science, statistics and, if needed, mathematics. A capstone collaborative problem-solving course will be required by all students. Students may complete all the course work in a single year (encouraged), or may choose spread the courses out over several years. With approval by the director of the minor, students may receive credit for courses taken for their major.

The minor is open to both MS and PhD students. PhD students must complete at least 18 credits for the minor and MS students must complete 15 credits.

Students must select courses from at least two disciplinary focal areas outside their undergraduate and graduate majors. For example a life sciences student might take courses in mathematics and computer science, while a statistics student might take courses in computer science and life sciences. In each focal area, PhD students must take at least 5 credits and MS students at least 3 credits. Some courses span more than one focal area; these courses may not be counted towards two focal areas simultaneously.

Some courses that are electives in an MS or PhD major may also be counted towards the BLDS minor. For example, a PhD student in Molecular and Cellular Biology (MCB) may select "MCB 576 Introduction to Computing in the Life Sciences" as an elective for their MCB requirements, and also as computer science credit for the BLDS minor.

## Required by All Students:

BOT 599. Special Topics [Collaborative
Problem-Solving in Biological Data Science] (3)

Students who do not complete an ethics and professionalism class as part of their PhD major must take MCB 557, Scientific Skills and Ethics (3), or an equivalent course.
Students are recommended to choose their courses from the following lists, depending on their prior preparation as an undergraduate. Equivalent or more advanced courses may be substituted after consultation with the BLDS director Some courses require prerequisites. Some courses span more than one focal area; such courses can be counted towards one or other of those focal areas, but not both.

## Life Sciences Focal Area

BB 585. Applied Bioinformatics (3)§

## Minor Code: 9310

## COLLEGE AND UNIVERSITY TEACHING GRADUATE CERTIFICATE

## Also available via Ecampus.

The 18 -credit graduate certificate in College and University Teaching is designed to provide advanced course work and experiential learning opportunities to current graduate students who plan to pursue careers in teaching and instruction in higher education settings or who plan to pursue careers that require similar skill sets in facilitation.

Core courses focus on educational/ learning theory and instructional strategies for working with adult learners. The specialized course work includes student-selected course work, workshops, and/or other approved experiences appropriate to the student's field of study. The supervised teaching internship will allow students to engage in supervised field experiences to practice and refine instructional skills. The capstone teaching portfolio will provide a culminating professional development experience for students.
For further information, Jessica Beck, Assistant Dean of Graduate Student Development, 413 Learning Innovation Center, 541-737-8576, jessica.beck@oregonstate.edu; website: http://gradschool. oregonstate.edu/graduate-certificate-college-and-university-teaching.
The general structure of the certificate is:

- Core course work (6 credits; fulfilled by GRAD 560 (3) and GRAD 561 (3))
- Supervised teaching internship (3
credits; fulfilled by GRAD 610 (3))
- Capstone teaching portfolio (3 credits; fulfilled by GRAD 607 (3))
Specialized course work and experiences ( 6 credits; fulfilled by any of the courses listed below)
AED 553. Applied Instructional Strategies (3)

BI 507. Seminar (1)
CH 584. Instruments and Online
Interactions in the Sciences (3)
ED 562. Introduction to Educational
Research (3)
ED 596. Technology for Educators (3)
ENGR 555. Foundation of Engineering
Education Research and Practice (3)
ES 599. Special Topics (3)
GRAD 505. Reading and Conference (2)
GRAD 512. Current Issues in Higher
Education (3)
GRAD 520. Responsible Conduct of
Research (1)
GRAD/WGSS 542. The Inclusive Classroom:
Difference, Power \& Discrimination (3)
GRAD 550. Introduction to Online Course
Development and Facilitation (2)

Conversations (3)
PSY 599. Special Topics (4)
SED 596. Methods of College Teaching in
Mathematics and Science (3)
SED 599. Topics in Science Education (3) TOX 507/607. Seminar (1)
WGSS 535. Feminist Teaching and Learning (4)

WLC 599. Special Topics (1-3)
WR 520. Studies in Writing (4)

## Major Code: CG11 <br> - GRADUATE EDUCATION COURSES

GRAD 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits.
GRAD 420. GRADUATE SCHOOL
PREPARATION (1). Applying for graduate or professional school can be a daunting task. How and where to apply, how to choose an advisor, what to look for in a school, and how to obtain funding are hurdles to overcome during the application process. Supplemental materials will be provided as part of the course materials.

GRAD 430. INTRODUCTION TO SCIENTIFIC DIVING (4). Incorporates academic, confined water and open water training to prepare the student to manage the task loading associated with performing scientific tasks underwater. Introduces the diver to basic techniques and equipment used in underwater data collection. Qualifies the student for acceptance into the OSU Scientific Diving Program as a Scientific Diver-in-Training, at the discretion of the DSO and OSU Diving Control Board. Includes field trips. PREREQS: Minimum Course Prerequisites* Submission of an AAUS/OSU Scientific Diving Application and Diving Medical History to the OSU DSO* Submission of an AAUS/OSU Medical Evaluation of Fitness for Scuba Diving to the OSU DSO showing no contraindications for diving* Ability to complete the OSU scientific diver swim evaluation* Advanced Open Water certification from a recognized training agency (Rescue Diver strongly preferred). Experience in lieu of training may be recognized by the DSO* Current certifications in CPR, First Aid, AED, and Emergency Oxygen Administration* Proof of diving accident insurance (Divers Alert Network or equivalent)* Student must provide basic snorkeling
gear, exposure protection, suitable cutting tool, light, slate, and underwater timing device

GRAD 499. SPECIAL TOPICS (4). Graduate school preparation. PREREQS: Junior or senior standing, preferably with GPA greater than 3.0.
GRAD 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits.
GRAD 505. READING AND CONFERENCE
(1-16). Reading and discussions on special
topics. Graded P/N. This course is repeatable for a maximum of 16 credits.
GRAD 506. PROJECTS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.
GRAD 509. PRACTICUM (1-16). Graded P/N.
This course is repeatable for a maximum of 16 credits.

GRAD 511. DESIGNING A PATH FOR SUCCESS
(1). Graduate student learners will be oriented onto paths that will help lead them toward degree completion and success. Students will receive foundational knowledge about graduate school requirements, effective mentor/mentee relationships, financing their education, research integrity and professional conduct, innovation and commercialization, and other soft skills essential for their progress through their graduate program. PREREQS: Graduate student standing only.

GRAD 512. CURRENT ISSUES IN HIGHER
EDUCATION (3). Explores current, work-relevant issues in higher education nationally. Development of plan to stay current with important issues. PREREQS: Graduate standing only
GRAD 520. RESPONSIBLE CONDUCT OF RESEARCH (1). Covers 10 topics in responsible conduct of research: ethical decision making; human subjects; animal welfare; data acquisition; sharing and ownership; research misconduct; conflicts of interest; authorship; peer review; mentor/trainee responsibilities; and collaborative science. Useful to all students who conduct scholarly activity. Graded P/N. PREREQS: Graduate standing.

## GRAD 521. RESEARCH DATA MANAGEMENT

(2). Careful examination of all aspects of research data management best practices. Designed to prepare students to exceed funder mandates for performance in data planning, documentation, preservation and sharing in an increasingly complex digital research environment. Open to students of all disciplines.
GRAD 522. PREPARING AN IRB SUBMISSION (1). Workshop-style course resulting in applications that are ready for IRB review. Ethical issues in research will be discussed. Students will draft all submission materials outside of class and participate in the critique of each other's protocols and consent forms. IRB approval will not be granted as part of this class. Graded P/N. PREREQS: (a) CITI Course - Curriculum 1 Human Subjects Protection (Group 1 Social/ Behavioral Research Investigators and Key Personnel OR Group 2 Biomedical Researchers) Register at https://www.citiprogram.org/ and affiliate with OSU.(b) Students must have prior sign-off from their mentor/major professor indicating that their research topic has been approved and that the student has successfully completed the basic research methods requirements in their program. Level Limitations: +02 (Graduate)
GRAD 530. INTRODUCTION TO SCIENTIFIC DIVING (4). Incorporates academic, confined water and open water training to prepare the student to manage the task loading associated with performing scientific tasks underwater. Introduces the diver to basic techniques and equipment used in underwater data collection. Qualifies the student for acceptance into the OSU Scientific Diving Program as a Scientific Diver-in-Training, at the discretion of the DSO and OSU Diving Control Board. Includes field trips. PREREQS: Minimum Course Prerequisites*

Submission of an AAUS/OSU Scientific Diving Application and Diving Medical History to the OSU DSO* Submission of an AAUS/OSU Medical Evaluation of Fitness for Scuba Diving to the OSU DSO showing no contraindications for diving* Ability to complete the OSU scientific diver swim evaluation* Advanced Open Water certification from a recognized training agency (Rescue Diver strongly preferred). Experience in lieu of training may be recognized by the DSO* Current certifications in CPR, First Aid, AED, and Emergency Oxygen Administration* Proof of diving accident insurance (Divers Alert Network or equivalent)* Student must provide basic snorkeling gear, exposure protection, suitable cutting tool, light, slate, and underwater timing device
GRAD 540. INTERVENING THE ISMS:
DIVERSITY AWARENESS (3). Students will be afforded an opportunity to explore the ISMS within individual, societal, cultural and institutional contexts. Students will examine, document and analyze the influence of ISMS in their own lives--in their personal, community, social and professional relationships.

GRAD 542. THE INCLUSIVE CLASSROOM: DIFFERENCE, POWER AND DISCRIMINATION
(3). An examination of multidisciplinary scholarship on difference, power, and discrimination; critical pedagogies; and curriculum transformation. Discussions of theory and research are coupled with practical hands-on opportunities for students to develop and hone their teaching and course development skills. CROSSLISTED as WGSS 542. PREREQS: Graduate level standing.

GRAD 550. INTRODUCTION TO ONLINE COURSE DEVELOPMENT AND FACILITATION (2). Prepares students to develop and teach distance courses. Students explore practical aspects of course development and facilitation: a brief history of distance education and pedagogical theory; course design principles; engagement of adult learners; active learning; and investigation of how online instruction, in addition to offering flexibility and convenience, also offers distinct pedagogical benefits. Open to students in all disciplines. PREREQS: Graduate standing.
GRAD 560. THEORIES OF TEACHING AND LEARNING IN HIGHER EDUCATION (3). Examination and analysis of theories and research related to teaching and learning in higher education contexts with emphasis on theoretical applications for GTAs, instructors, and other who teach in the college and university classroom. PREREQS: Graduate level standing.
GRAD 561. COURSE DESIGN AND METHODS FOR COLLEGE \& UNIVERSITY TEACHING
(3). Exploration of research and research-based practices related to teaching and learning in higher education contexts with emphasis on course design, facilitation, and other instructional techniques for GTAs, instructors, and others who teach in the college and university classroom. PREREQS: GRAD 560 [C] and graduate level standing.
GRAD 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 99 credits.

GRAD 605. READING AND CONFERENCE
(1-16). Reading and discussions on special topics. Graded P/N. This course is repeatable for a maximum of 16 credits.
GRAD 606. PROJECTS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.
GRAD 607. CAPSTONE SEMINAR (3). Provides a culminating experience required for all graduate students pursuing the Graduate Certificate in College and University Teaching and for other graduate students seeking a structured opportunity to develop their teaching portfolio. PREREQS: GRAD 560 [C] and GRAD 561 [C]
GRAD 609. PRACTICUM (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

GRAD 610. INTERNSHIP (3). Provides a
framework for the in-depth internship experiences
required of all graduate students pursuing the
Graduate Certificate in College and University
Teaching and for other graduate students seeking
a structured opportunity to reflect on and improve their teaching. PREREQS: GRAD 560 [C] and
GRAD 561 [C] and graduate level standing.
n an increasingly complex world, solutions to issues of emerging societal importance often require crossing traditional boundaries. Recognizing that students will need information from many available sources, Oregon State University offers a variety of undergraduate and graduate opportunities for interdisciplinary exploration and enrichment.

Interdisciplinary programs depend fundamentally upon the existence of strong disciplinary programs and place signifi-
cant responsibility upon students to integrate and synthesize information.
Because there are so many choices of subjects and so many ways to approach a given interest, it is crucial that students obtain guidance in order to understand the advantages and the limitations of particular disciplinary and interdisciplinary alternatives. Students are encouraged to contact the individuals identified at the beginning of each certificate, department, and degree listing for more information and advice.

## INTERNATIONAL PROGRAMS

The Division of International Programs plays a leadership and collaborative role in the university's comprehensive internationalization strategy by advancing international education for U.S. and international students, scholars and faculty; furthering the integration of global learning in OSU's teaching, research and outreach; and promoting OSU as a premier international research university through partnerships and regional initiatives. The division is led by the vice provost for International Programs, and includes the Office of International Services (OIS), International Degree (ID), OSU Global Opportunities (OSU GO), and International Scholar and Faculty Services (ISFS).

The division works collaboratively with INTO Oregon State University, the university center that offers a range of English language programs including preparatory programs for international students aiming to enter OSU at both graduate and undergraduate levels via pathway programs, rather than via direct admission. As part of this collaboration, the vice provost has oversight responsibilities for INTO OSU Academic Programs and International Admissions.

## OSU OFFICE OF GLOBAL OPPORTUNITIES (OSU GO)

Caine Francis, Interim Director
University Plaza
1600 SW Western Blvd., Suite 290
Oregon State University
Corvallis, Oregon 97333
541-737-6434
Website: http://international.oregonstate. edu/osugo
OSU Office of Global Opportunities (OSU GO) is the centralized hub for supporting students and faculty who wish to explore, travel, study, and go global: whether studying abroad in diverse countries, participating in specialized international internships, joining service-learning and experiential programs that delve into unique projects and communities, and/or conducting comprehensive and rigorous international research. OSU GO is committed to supporting the university's goal of tripling student study abroad participation over the next 3 to 5 years.

## Overseas Study, Exchange, and Internship Programs

OSU students may broaden their education by taking part in one or a number of OSU GO's international study programs. Many of the programs allow qualified students from a wide variety of disciplines to earn academic credit from Oregon State University while pursuing their studies internationally. For academic programs approved for OSU credit, financial aid may apply to help cover the costs. $\mathrm{IE}_{3}$ Global is the programmatic
development unit within OSU GO to support the strategic mission of study abroad.
$\mathrm{IE}_{3}$ Global offers wide and diverse program options for OSU students: direct exchange, study abroad, faculty-led, international internships and research, and supports faculty sabbatical opportunities. Furthermore, $\mathrm{IE}_{3}$ Global supports OSU GO working with colleges and departments on new program opportunities, development, and implementation that aligns with OSU's strategic internationalization goals and evolving international curriculum.

More information about OSU GO programs can be obtained by writing to caine.francis@oregonstate.edu or calling 541-737-6434.

## OFFICE OF INTERNATIONAL SERVICES (OIS)

## Grace Atebe, Director

University Plaza
1600 SW Western Blvd., Suite 130
Oregon State University
Corvallis, Oregon 97333
541-737-6310
grace.atebe@oregonstate.edu
Website: http://international.oregonstate edu/ois/

The Office of International Services (formerly International Student Advising and Services, and International Scholar and Faculty Services) collaborates with campus and community partners to support the success and retention of all OSU international visitors from approximately 100 different countries. This includes over 500 international faculty and staff, and over 4,000 students in degree, exchange and INTO OSU (English Language and academic preparation (Pathway) programs). OIS is responsible for all international student and scholar immigration related advising, orientation, cultural, financial, scholarships, travel, employment, personal or academic related challenges. OIS manages select merit and need based financial scholarships for international students including the International Cultural Service Program (ICSP).
OIS also maintains the regulatory compliance and integrity of OSU's international student and international employee visa programs. Through trainings, workshops and consultation, the unit serves as a liaison and resource to OSU colleges and departments, as well as community groups to enhance understanding of student and scholar immigration regulations and cross cultural competency.

## INTERNATIONAL DEGREE

Kerry Thomas, Academic Advisor, International Degree
International Degree and Education Abroad
University Plaza
1600 SW Western Blvd., Suite 130
Oregon State University
Corvallis, Oregon 97333
541-737-5223
Website: http://international.oregonstate. edu/id

## Undergraduate Major <br> International Studies (BA, HBA) <br> (Major code 910)

The International Degree is Oregon State University's unique double-degree program. It allows any interested undergraduate student the opportunity to explore the international dimensions of any primary major. International Degree students complete Advanced Proficiency in a Second Language, Four additional Baccalaureate Core Courses in International Studies, an International Experience, and a Senior Thesis.
As an International Degree participant, you will earn two degrees. The first degree, the primary degree, will be your chosen major in any department on campus. The International Degree, or concurrent degree, will be in International Studies in your primary degree department.
For example, if your primary degree is a BS in Environmental Sciences, then the International Degree would be a BA in International Studies in Environmental Sciences.

## Admission Requirements to the International Degree Program

1. A minimum 2.75 cumulative GPA after completing at least 32 credits of college-level courses and good standing within your department, college and the university. The dean of your college may give you special consideration if you fall below this minimum. See the International Degree office for more information about this process.
2. Proficiency in a foreign language equivalent to that attained by the end of a second-year language sequence at OSU*. This may be met in one of the following ways:
3. Successful completion of four or more years of consecutive study of the same foreign language at the high school level preceding admission to Oregon State University;
4. Completion of the AP College Board test in a foreign language with a score of 4 or 5 ;
5. Completion of the third term of
a second-year foreign language sequence at OSU or another accredited university with a GPA of 3.0 or better. This course must constitute a minimum of 4 quarter or 3 semester credits.
6. Completion of one term of a third-year foreign language course (i.e., any course designated 311,312 or 313 ) at OSU or another accredited university with a GPA of 3.0 or better. This course must constitute a minimum of 3 quarter or 2 semester credits.
7. An international student whose native language is not English who wishes to use English to satisfy the foreign language entrance requirement will have satisfied the requirement upon admission to OSU.
8. Meet any additional requirements established by your major department or college.

## SPECIAL NOTES ABOUT <br> ADMISSION

If you change majors after admission to the International Degree Program, you will have to reapply for admission to the International Degree Program in your new department.

If you are pursuing two degrees besides the International Degree, you only need to apply for the International Degree in one department. The choice of departments is up to you, but you should consult your advisors before determining where to apply.
*You may be admitted to the program as a pre-International Degree student if you meet all the requirements listed above except for the two-year language requirement.

## GENERAL INTERNATIONAL DEGREE REQUIREMENTS

1. You must successfully complete all departmental, college, and institutional requirements for your primary degree.
2. You must also complete a minimum of 32 credits in residence beyond the minimum 180 to 204 credits required for most primary degrees. Courses taken through an OSU-sponsored program abroad are considered inresidence credits. Depending on the level of previous foreign language study and experience abroad, you could take anywhere from a minimum of 32 additional credits to a maximum range of 70-plus additional credits to complete the degree.
3. Additional International Degree requirements may be established for your primary degree, so check with your major advisor or the

International Degree contact in your department to make sure that you know what they are and that you are able to complete them. When you meet with your advisor, have a transcript in hand.
4. As is currently true for all degrees, your academic dean will verify that you have completed the International Degree requirements. The graduation audit will be done along with and in the same fashion as for your primary degree by your major department. Confirmation of the International Degree will be appropriately noted on your transcripts, and you will receive separate diplomas.

## SPECIFIC INTERNATIONAL DEGREE REQUIREMENTS

1. You must demonstrate advanced level achievement or proficiency in a foreign language in one of the approved ways. Typically, this requirement is met by completing the third term of a fourth-year language sequence at OSU. Students must take language courses for letter grades and earn a cumulative GPA of 3.0. Exceptions may be considered only by petition (see International Degree office for details). To find out about additional ways to demonstrate advanced proficiency, contact the International Degree office.
2. You must successfully complete a minimum of four courses selected from the baccalaureate core curriculum, with the approval of your departmental International Degree advisor. These courses are in addition to the university's baccalaureate core requirements. The International Degree course requirements from the baccalaureate core are as follows:

- One course selected from the Western Culture category (3-4 credits);
- Two courses selected from the Cultural Diversity category (6-8 credits);
- One course selected from the Western Culture, Cultural Diversity, or Contemporary Global issues categories (3-4 credits). Note: Not all four courses may focus on the same culture or language. For example, you cannot take all four of the additional baccalaureate core courses focusing on Spanish speaking countries/peoples.
- To see the entire baccalaureate core list go to http://catalog. oregonstate.edu/BCC.aspx.

3. The third requirement of the degree is to spend a minimum of

10 weeks in a country where your International Degree language is spoken and be engaged in a study abroad program, an international internship or an international research project.
4. The final requirement for the degree is to prepare a rigorous and integrative senior thesis, which demonstrates a fundamental and comprehensive understanding of global issues and of the international dimensions of your primary degree. Requirements for the senior thesis include successful completion of INTL 407, Seminar: International Issues: Introduction to Thesis for 1 credit, and 3 to 6 credits of 403 (Thesis) in your department.

## GRADUATION LANGUAGE

## REQUIREMENTS

Students must demonstrate advanced level achievement or proficiency in a single foreign language in one of the following ways:

- Completion of a fourth-year foreign language sequence (designated 411 , 412,413 ) at OSU with a minimum 3.00 GPA cumulative in all foreign language courses. Courses must be taken for a letter grade and may not be graded S/U.
- Completion of a fourth-year foreign language sequence at another accredited university with a minimum 3.00 GPA , in a program in which the combined third-year and fourth-year language courses constitute a minimum of 18 quarter or 12 semester credits.
- Completion of a minimum of 9 quarter ( 6 semester) credits with a minimum 3.00 GPA, at Oregon State University or another accredited university, of any 400-level course work (in any discipline) taught in a foreign language, if approved by the student's primary degree department or school.
- Demonstration of end of fourthyear level proficiency in a foreign language by successful completion of an achievement test administered by the School of Language, Culture, and Society at OSU.
- Demonstration of fourth-year level proficiency in a foreign language as evidenced by an oral proficiency test administered by a certified foreign language proficiency tester that is approved by the OSU School of Language, Culture, and Society.
- For languages not offered at OSU, the requirement may also be completed by a minimum of nine-month residency (study, research, work), after fulfilling the foreign language entrance requirement, in a country in which the language is spoken.
- Completion of a minimum of one term international internship using the target language after completion of a third-year language sequence $(311,312,313)$ at OSU with a cumulative GPA of 3.0 or above.

## EXPERIENCE ABROAD

Students must spend a minimum of 10 weeks in another country where the language used to meet the International Degree requirement is spoken and be engaged in one of the following:

- A study abroad program offered by OSU, another university, or a program designed by the student. Programs administered by other universities or those designed by students must be approved by the International Degree Program and the student's primary department. Currently OSU has universitysponsored programs in over 70 countries.
- An international internship or work program that receives academic credit, such as the $\mathrm{IE}_{3}$ Global Internship Program offered by OSU.
- A pre-approved research project abroad.
- Previous international experience, such as the Peace Corps, approved by the primary academic department and the International Degree Program.

## SENIOR THESIS

The final requirement for the degree is to prepare a rigorous and integrative senior thesis that demonstrates a fundamental and comprehensive understanding of global issues and of the international dimensions of your primary degree. This thesis places your academic discipline in an international context, often in a comparative fashion. Because it fulfills the writing intensive course requirement for the International Degree, it will involve multiple drafts and revisions. The final product will represent polished, formal writing, in a format appropriate to your academic field.

## DUAL THESIS REQUIREMENTS:

You may write one thesis to meet the International Degree requirement and the thesis requirement in your department. If you will complete a senior thesis to meet another academic requirement in your primary degree, it is important to consult with academic advisors in your major as well as in the International Degree office.

- Example: If you are in the University Honors College, you will work with both the Honors College and the International Degree office to ensure that you fulfill both sets of requirements.
Thesis proposal: A copy of the thesis proposal form will be on file in the

International Degree Program office. The topic will evolve as you work, and may change substantially, but identifying an appropriate advisor and developing a proposal form are crucial steps in your progress toward completion of the thesis requirement of the International Degree. If your thesis ideas change significantly, it is important to file a revised proposal with the International Degree Program office.

Thesis credit: Before graduating, you will spend two to three terms working on the thesis and will receive credits through your major department. You will register for a minimum of 3 thesis credits under the department prefix appropriate to your major (403), with your thesis advisor as the professor of record. These credits may be distributed over multiple terms, and you may receive an incomplete for the credits taken during the earlier term(s) until you have finished your thesis work. You will register for these credits during the year you plan to complete your thesis work, as incomplete grades should be removed within 12 months. Please note that credits for which you receive an incomplete do not count toward credits satisfactorily completed during that term. If you receive financial aid, you should plan ahead to ensure that this does not affect your aid eligibility.

- Example: If you are a sociology major, you would register for a minimum of 3 credits of SOC 403. If you are a mathematics major, you would register for MTH 403. Some departments already have a thesis course listed in the schedule of classes, but other departments may ask the registration schedule desk to set up a CRN for that course number during the term(s) for which you wish to register for thesis credit.
These credits may be graded or pass/ no pass. If you and your advisor agree that the scope of your thesis warrants additional credit, and your college and department's policies allow it, you may register for additional credits. The suggested maximum is 6 credits.

Colleges, departments, or advisors may elect to set different requirements for thesis credits that meet the needs of their programs. In this case, the requirements or preferences of the college/department take precedence over general International Degree requirements.

## REQUIREMENTS FOR THE SENIOR THESIS INCLUDE:

Thesis class: As a part of your program, you will enroll in the 1-credit class INTL 407, Seminar: International Issues: Introduction to Thesis, offered on a pass/no pass grading basis. The course is offered twice a year during fall and winter terms. It is designed to help you define and
focus your areas of interest, get an overview of research methods, develop your thesis ideas, identify a suitable advisor in your major department who will assist you throughout the process, complete a thesis proposal form, and develop a realistic and effective timetable for completion. During this course, you will receive a copy of the guide, Preparing a Senior Thesis. Note: If you are also a student in the University Honors College, you may enroll in either the UHC thesis class or the International Degree Program's thesis class.

Final thesis: This represents polished, formal writing. Theses average 30 to 50 pages, but to ensure fulfillment of the WIC requirement, even a thesis with a nonverbal component such as art, music, or photography must include a minimum of 8 to 10 pages of formal writing and place the thesis in the appropriate historical/cultural context by incorporating and documenting outside sources.

- Example: A graphic arts student who interned in Russia compared contemporary posters in the U.S. and Russia, and displayed examples. He also wrote an analysis of his findings.
Presentation: When your thesis is complete, you will make a public presentation of your work. The format may vary depending on your topic and your own preferences, but you will present your thesis to a group including your advisor, other interested faculty in your department, representatives of the International Degree program, and other guests whom you may want to invite.

Final copies of the log and thesis must be turned in to your major department and the International Degree office two weeks prior to the date that grades are due for graduating seniors for the term you plan to graduate. This is usually a week before finals week.

## ADDITIONAL COLLEGE

## AND DEPARTMENTAL

 REQUIREMENTS
## Foreign Language Majors

To earn the International Degree you must complete the second foreign language required of a language major through the fourth-year level. You must also spend two 10-week periods abroad, one in each of the countries where the two languages you are studying are spoken. For example, if you are a German major and have decided to take Russian as your second foreign language, you must complete the 400 -level Russian course and study abroad in both Germany and Russia.

Additionally, you may not complete major/minor requirements without taking upper-division courses in the OSU School of Language, Culture, and Society
even if you complete the hour requirements abroad.

## College of Forestry Majors

As part of the four additional baccalaureate core courses required for the International Degree, you must take FE/FOR 456, *International Forestry (3).

## SCHOLARSHIPS

In support of the overseas learning experience, the International Degree Program has funds available to assist students traveling abroad and to assist with costs associated with research for your thesis. These are awarded on a competitive basis. Please talk to the International Degree office for more information.

The College of Liberal Arts offers major programs in the arts, humanities, and social sciences that comprise the core of human knowledge. Students can earn degrees and minors in the college's many disciplines and interdisciplinary programs, as well as certificates of specialized training in seven other fields. Qualified students can also participate in a joint program with the College of Law at Willamette University, in which they can earn their bachelor's and law degrees in six years.

$\square$uccess follows opportunity. In the College of Liberal Arts opportunities for academic success and enhanced professionalism are provided to all. Students gain the skills and knowledge required to integrate creative problem-solving with a sense of social responsibility and involvement in activities that enrich the cultural life of the university, Corvallis, the state of Oregon and the entire world.
Students in the College of Liberal Arts receive individual attention in student learning communities and have the opportunity to interact in small groups with their professors, many of whom are also their academic advisors. This more personal environment and interaction results in the possibility of going beyond surface knowledge to a deeper understanding of the discipline being studied and how it impacts human knowledge, commerce, art and science.
The qualifications and accomplishments of the faculty members in the College of Liberal Arts are truly impressive. A strong commitment to teaching by a faculty of great personal achievement and learning ensures that students will receive an excellent education by enrolling in one of the majors offered in the College of Liberal Arts...where successful futures begin.

## MAJORS

The College of Liberal Arts offers major programs leading to the bachelor of arts (BA) or bachelor of science (BS) degree in the following:
American Studies (OSU-Cascades Campus only)
Anthropology
Options: Archaeology, Biocultural Option, Cultural/Linguistic, General Anthropology
Art
Options: Art History, Photography and Digital Studio, Photography and Digital BFA, Studio Art, Studio Art BFA
Digital Communication Arts
Economics
Options: Law, Economics and Policy; Managerial Economics; Mathematical Economics
English
Ethnic Studies
French
German
Graphic Design
History
Liberal Studies
Option: Pre-Education
Music
Options: Instrumental Performance, Music Education, Music Production, Piano
Performance, Vocal Performance

## Philosophy

Political Science
Options: Environmental and Energy
Politics, International Affairs, Law and Politics
Psychology
Religious Studies

Sociology
Options: Crime and Justice, Environmental and Natural Resource Sociology
Social Science (OSU-Cascades Campus only)
Option: Community Development and Leadership
Spanish
Speech Communication
Options: Communication, Theatre Arts
Women, Gender, and Sexuality Studies

Graduate Majors
Applied Anthropology (MA, PhD, MAIS)
Applied Ethics (MA, MAIS)
College Student Services Administration (EdM, MS)
Contemporary Hispanic Studies (MA)
Creative Writing (MFA)
English (MA, MAIS)
Environmental Arts and Humanities (MA)
History of Science (MA, MS, PhD, MAIS)
Psychology (MS, PhD, MAIS)
Public Policy (MPP, PhD)
Women, Gender, and Sexuality Studies (MA, PhD, MAIS)

Graduate Minors
Anthropology
Applied Anthropology
Applied Ethics
Art

## MINORS

Students throughout the university may elect to pursue the following undergraduate minors: Anthropology; Art History; Asian Languages and Cultures; Asian Studies; Communication; Economics; English; Ethnic Studies; Film Studies; French; German; History; Multimedia; Music; Music Performance; New Media Communications; Philosophy; Photography; Political Science; Popular Music Studies; Psychology; Queer Studies, Religious Studies; Russian (suspended); Social Justice; Sociology; Spanish; Theatre Arts; Visual Arts; Women, Gender, and Sexuality Studies; and Writing.

The College of Liberal Arts also offers many courses in the arts, humanities, and social sciences that are of value to all students and are basic to a liberal education. Such courses help students in their personal development and enrichment through a deeper understanding of themselves and appreciation of human cultural development.

## TEACHER EDUCATION

The College of Liberal Arts offers excellent undergraduate preparation for elementary, middle or high school teachers. The Liberal Studies pre-education program is ideal for elementary school teachers.

Students wanting to teach at the high school level may major in English, French, German, history/social studies, music or Spanish.

## CERTIFICATE PROGRAMS

Certificate programs in Applied Ethics; Food in Culture and Social Justice; Language in Culture; Latin American Affairs; Medical Humanities; Peace Studies; Religion and Culture; Russian Studies (suspended); and Women, Gender, and Sexuality Studies are offered to all students and may be taken concurrently with any major degree program.

## PRE-LAW PREPARATION

OSU provides opportunities for a complete and rigorous preparation for students interested in attending law school. Our accomplished graduates attend some of the finest schools in the nation.

Law school is one of the few professional schools that do not require a particular set of courses as a prerequisite for admission. Students may major in any subject. Students should choose a major that engages and challenges them, a course of study where they can excel. They are advised to supplement their major courses with a diverse selection of classes that offer depth, rigor, and skill in three areas: written and oral communication, deductive reasoning and logic, and
a general knowledge of the institutions and values of our society.

The College of Liberal Arts offers many effective and engaging ways to prepare for law school, rather than one single pre-law program. Students interested in law school may contact Professor Jason Tanenbaum in the School of Public Policy. Call 541-737-3663 for his office hours. Students also may call the CLA Student Services Office, 541-737-0561. Students should also obtain the College of Liberal Arts pre-law advising brochure, which is available online at http:// liberalarts.oregonstate.edu/content/ pre-law-program.

## ACCELERATED BA/BS AND LAW (JD) PROGRAM WITH WILLAMETTE UNIVERSITY COLLEGE OF LAW AND LEWIS AND CLARK COLLEGE LAW SCHOOL

This program enables OSU students to earn a BA or BS degree and a law degree in a total of six years, three years at OSU and three at either the Willamette University College of Law or the Lewis and Clark College Law School.
Students may be admitted to the program any time during their first two years of undergraduate study provided they have a 3.5 high school GPA and a minimum combined SAT score of 1950 or composite ACT score of 29 . Students will complete all but 45 credits of upperdivision electives for a BA or BS degree in defined majors ${ }^{1}$ in the College of Liberal Arts. For admission to law school, students must have earned a cumulative GPA of 3.4 or higher and a Law School Admission Test (LSAT) score no lower than the median LSAT for the prior year's entering class.
At Willamette University and at Lewis and Clark College, the students' firstyear law courses will satisfy the 45 -credit upper-division elective requirements for their OSU degree. After completing the additional two years at Willamette or at Lewis and Clark, students will have completed both the bachelors and JD degrees in six years.
Note: OSU Honors College students are currently not eligible for this program due to the senior year thesis requirement.

## Footnote:

${ }^{1}$ American Studies (OSU-Cascades Branch Campus in Bend); Anthropology; Economics; English; Ethnic Studies; French; German; History; Philosophy; Political Science; Sociology; Spanish; Speech Communication; Women, Gender, and Sexuality Studies.

## ACADEMIC ADVISING

Mission Statement: The College of Liberal Arts academic advising is a teaching and learning process dedicated to student success. Academic advising engages students in developing a plan to realize their educational, career and life goals.

Values Statement: The values associated with advising in the College of Liberal Arts are closely aligned with the stated values of the university.

## - Accountability: We are

 committed to providing timely, accurate and intentional advising.- Diversity: We honor the unique nature and interests of each student. Advising services and delivery methods will be shaped to fit the diverse needs of our campus populations.
- Respect: We seek to establish a reciprocal relationship with students based on an ethic of care and shared responsibility.
- Social Responsibility: We foster a culture of independent thinking and global awareness so that students make informed, socially responsible choices consistent with their academic, career and life goals.
- Integrity: We seek to engage students in a fair and professional process of meaningful self-reflection and authentic inquiry.

## COLLEGE OF LIBERAL ARTS REQUIREMENTS

A liberal arts education involves exploration and broad study beyond one's major field. Students are encouraged to understand other cultures, other ways of knowing, and other fields of study. Students are also encouraged to take more courses in areas outside their major field to enhance their experience.

Liberal Arts students are required to satisfy four sets of requirements:

- Oregon State University Baccalaureate Core
- College of Liberal Arts Core
- BA or BS requirements
- Major program requirements

The University Baccalaureate Core course requirements are explained in a separate section, "Earning a Degree at Oregon State." The College of Liberal Arts Core and the BA and BS requirements are explained below. The major program requirements are explained in the appropriate section in the pages that follow. If you want to add a minor program, you will also need to complete the requirements for that minor. Specific requirements for interdisciplinary minors are listed in the Interdisciplinary Programs section of this catalog. Specific requirements for disciplinary minors are usually given in the appropriate school or departmental section; for example see the School of Public Policy section for requirements for the Economics minor.

You may not use a single course to satisfy more than one of these requirements. In addition, you may not use courses within your major field to satisfy either baccalaureate core or liberal arts core requirements. (However, courses
taken to satisfy the baccalaureate core requirements or the liberal arts core may also be used to satisfy requirements for a minor.)

## LIBERAL ARTS CORE

The liberal arts core consists of five courses (at least 15 credits) as follows:

- Humanities (3): Critical examination of influential traditions and ideas as defined by major scholarly works (includes English literature; ethnic studies; film studies; foreign language and literatures, including culture; history; and philosophy).
- Fine Arts (3): Participation in or appreciation of different forms (includes art, music, theater, and creative writing in poetry, fiction, or drama).
- Social Science (3): Scientific investigation and theory pertaining to human individuals, social groups, institutions, and ideologies (includes anthropology; economics; political science; psychology; sociology; women, gender, and sexuality studies; and selected geography courses).
- Nonwestern Culture (3): Study in any of the following areas focusing outside of Western culture-Africa, Asia, Russia, South America, Central America, Caribbean, Middle East, the Pacific, or Native North Americans.
- One additional course from one of the preceding four areas (3).
For a list of specific courses that satisfy the liberal arts core requirements, use the Schedule of Classes Searcher website and scroll down to the CLA Liberal Arts Core Courses search feature: http://catalog. oregonstate.edu/SOCSearcher.aspx.

## BA/BS REQUIREMENTS

Nearly all liberal arts students graduate with either a bachelor of arts or bachelor of science degree.

- BA Requirement: Second-year proficiency in a second language, including ASL, at the college level with at least a C-.
- BS Requirement: A minimum 15 -credit block of science, computer science, and quantitative studies as follows:

1. Any computer science (CS) course approved by the student's major school or department (3-4), and
2. Any course from the College of Science approved by the student's major school or department except math (MTH) or statistics (ST) courses (3-4), and
3. One of the following ( $8-12$ ):

- ST 351 and ST $352(4,4)$.
- MTH 111 and MTH 245 $(4,4)$.
- Any 8 credits of MTH
courses at the 200 level or above (not including MTH 211 and MTH 212).
- MTH 211, MTH 212, and MTH 390 (4,4,4). Preelementary education majors only.
- MTH 241, MTH 245 or MTH 251, and ST 351 $(4,4,4)$.
Many schools or departments require specific courses to satisfy the BS degree requirements; students should consult their academic advisors for details. Courses used to satisfy the BS degree requirements may not also be used to satisfy baccalaureate core requirements.

Bachelor of Fine Arts (BFA) degrees in Applied Visual Arts, Digital Communication Arts, and Graphic Design are offered by the School of Arts and Communication. BFA degree requirements differ from those in other College of Liberal Arts programs. Students in the BFA degree program must complete the baccalaureate core and a minimum of 105 credits in art or digital communication arts.

## AMERICAN STUDIES

Neil Browne, Director
2600 NW College Way
OSU-Cascades Campus
Bend, OR 97701
541-322-3129
Email: neil.browne@osucascades.edu Website: http://osucascades.edu/ academics/american-studies

## Undergraduate Major

American Studies (BA, BS, CRED)
American Studies is only offered on the OSU-Cascades Campus in Bend, Oregon. Honors degrees are not available on the OSU-Cascades Campus.

## AMERICAN STUDIES (BA, BS, CRED, HBA, HBS) Offered only on the OSU-Cascades Campus.

An interdisciplinary major that engages American culture in its historical, contemporary, and global contexts. Examines American culture through a variety of media including film, music, literature, history, politics, and art. Teaching faculty members are from several different disciplines and students approach course objectives from many scholarly vantage points.

## Lower Division (20 credits)

## Required Courses:

ENG 253. *Survey of American Literature: Colonial to 1900 (4)
ENG 254. *Survey of American Literature: 1900 to Present (4)

## Choose 2 below:

HST 201. *History of the United States (4)

HST 202. *History of the United States (4)
HST 203. *History of the United States (4)

## Choose 1 AMS Elective from the

## following list:

ANTH 210. *Comparative Cultures (3)
ANTH 251. *Language in the USA (4)
ENG 260. *Literature of American
Minorities (4)
HST 101. *History of Western Civilization (4)
HST 102. *History of Western Civilization (4)
HST 103. *History of Western Civilization (4)
HST 106. *World History III: The Modern and Contemporary World (3)
PS 201. *Introduction to United States
Government and Politics (4)
SOC 204. *Introduction to Sociology (3)
Upper Division (33 Credits)

## Required Courses:

AMS 311. Topics in American Studies (4)
(this course is repeatable with different topics)
AMS 350. *American Culture and the
Vietnam Experience (4)
AMS 406. Projects [American Studies
Portfolio] (1)
ART/ENG 386. American Art and Literature: Part 1 (4)
ART/ENG 387. American Art and Literature: Part 2 (4)
ART/ENG 388. American Art and Literature (4)

## AMS Upper-Division Electives:

Select 12 credits from the following list:
ANTH 311. *Peoples of the World-North America (3)
ANTH 350. Language, Culture and Society (4)
ANTH 352. *Anthropology, Health, and Environment (3)
ART 462. Directions and issues in Contemporary Art (3)
COMM 326. Intercultural Communication (3)

COMM 412. Topics in Speech
Communication (3)
COMM 416. Ethnography of Communication (3)
COMM 427. Cultural Codes of Communication (3)
ENG 317. *The American Novel: Beginnings to Chopin (4)
ENG 318. *The American Novel: Modernist Period (4)
ENG 319. *The American Novel: Post-World War II (4)
ENG 360. *Native American Literature (4)
ENG 362. *American Women Writers (4)
ENG 470. ^Studies in Poetry (4)
ENG 482. Studies in American Literature, Culture, and Environment (4)
ENG 485. ^Studies in American Literature (4)
PS 363. *Gender and Race in American
Political Thought (4)
PS 370. *Science, Religion, and Politics (4)
PS 375. *The Civil Rights Movement and Policies (4)
PS 475. Environmental Politics and Policy (4)
SOC 381. Social Dimensions of
Sustainability (4)
SOC 426. *Social Inequality (4)
SOC 430. Gender and Society (4)
SOC 475. Rural Sociology (4)
SOC 480. *Environmental Sociology (4)

## Required:

AMS 406. Projects (1)
American Studies Final Portfolio (Must be submitted during the student's final term)

1. Pick three essays you wrote during the course of your program in American Studies that you feel are representative of your most meaningful work. These may be your best essays, but they may be essays in which you struggled with difficult material in an attempt to better understand it. In other words, which essays are most meaningful to you in your experience earning an American Studies degree at OSU Casacades?
2. Incorporating at least one of the American Studies Outcomes, write a three-page cover letter explaining why you chose these essays and how they reflect what you have learned and experienced in the process of earning your degree in American Studies at OSU-Cascades.

## Footnotes:

* Baccalaureate Core Course (BCC)
${ }^{\wedge}$ Writing Intensive Course (WIC)

## ■ AMERICAN STUDIES <br> PROGRAM COURSES

AMS 311. TOPICS IN AMERICAN STUDIES (4).
Selected topics, changed annually, that investigate
American ideas, regions, events, or periods. Fulfills the requirement for an integrated course in the major. May be repeated as topics vary. Open to nonmajors. This course is repeatable for a maximum of 99 credits.
AMS 350. *AMERICAN CULTURE AND THE VIETNAM EXPERIENCE (4). Examines through literature, film, and popular media the effects of the Vietnam War on American culture. Taught at OSU-Cascades only. (Bacc Core Course) PREREQS: Sophomore standing.

AMS 405. READING AND CONFERENCE (1-16). Independent, individual studies supervised by the director, members of the American Studies Board, or assigned professors, as arranged by the student and the director. This course is repeatable for a maximum of 16 credits.

AMS 406. PROJECTS (1-16). Studies of American culture and society centered around topical events or cultural programs of current interest in American studies. This course is repeatable for a maximum of 16 credits. PREREQS: Sophomore standing and departmental approval.

AMS 407. ${ }^{\wedge}$ SEMINAR (1-16). May be repeated for credit as topics vary. (Writing Intensive Course) CROSSLISTED as ENG 407/ENG 507. This course is repeatable for a maximum of 16 credits.
AMS 410. AMERICAN STUDIES INTERNSHIP
(1-16). Supervised and evaluated work in a variety of professional fields to enhance students' career preparation; arranged at the initiative of the student one semester in advance. This course is repeatable for a maximum of 16 credits. PREREQS: Sophomore standing
AMS 507. SEMINAR (1-16). May be repeated for credit as topics vary. CROSSLISTED as ENG 407/ENG 507. This course is repeatable for a maximum of 16 credits.

## Undergraduate Major

Liberal Studies (BA, BS, HBA, HBS)
Option
Pre-Education

## LIBERAL STUDIES (BA, BS, CRED, HBA, HBS)

## Also available via Ecampus.

A BA or BS degree in Liberal Studies is available for students whose academic and career interests suggest greater curricular breadth and flexibility than is available in other major programs.
Candidates for the Liberal Studies major must complete the following:

- Oregon State University Baccalaureate Core
- College of Liberal Arts Core requirements
- A program consisting of 45 or more credits that are thematic in nature and include at least 27 upper-division credits developed from the course offerings of two or more departments within the College of Liberal Arts. The plan of study and statement of justification must be approved in advance by the head advisor or designee.
- At least one Writing Intensive Course (WIC) with a grade of C or better.
- Maintain a 2.0 or better university GPA.
- Maintain a 2.3 or better major GPA.

The typical program is designed to meet the needs and interests of the particular student and is unique in content. In some cases, a prestructured program may provide a suitable match.

## Major Code: 920

## PRE-EDUCATION OPTION

The BA or BS degree in Liberal Studies may be used to prepare for a teacher licensure program.
Pre-Education Option Core (94-105)
(This fulfills the baccalaureate core.) Computer Science (4)
Contemporary Global Issues (3)
Cultural Diversity (3)
Difference, Power, and Discrimination (3) Education (3)
HDFS 311. Infant and Child Development (4)
HDFS 313. Adolescent Development (4)
HHS 231. *Lifetime Fitness for Health (2)
HHS 241. *Lifetime Fitness (1) or any PAC course (1-2)

GEOG 105. *Geography of the Non-Western World (3)
and GEOG 106. *Geography of the
Western World (3)
Literature (9)
MTH 211, MTH 212, MTH 390.
*Foundations of Elementary Mathematics $(4,4,4)$
PSY 201, PSY 202. *General Psychology $(3,3)$
Science (Bacc core plus two additional from approved list) (18-20)
Science, Technology and Society (3)
Spanish: strongly recommended
Speech, Writing I, II (9)
Select one of three U.S. history courses below for 4 credits:
HST 201. *History of the United States (4)
HST 202. *History of the United States (4)
HST 203. *History of the United States (4)
Plus 6 additional history credits (6)
College of Liberal Arts Core (12)
One Specialization (45)
Select one from six distinct interdisciplinary specializations listed below. Contact Tristen Shay at 541-737-0561 for detailed specifications.

## Specializations (select one):

Behavioral Science
Fine Arts
Language Arts
Russian Language and Culture Social Studies
Spanish Language and Latino(a) Studies

## ART

The Art Area of the School of Arts and Communication offers Bachelor of Fine Arts (BFA), Bachelor of Arts (BA), and Bachelor of Science (BS) degrees through extensive course work in fine arts, graphic design, photography, and art history.

The curriculum provides an awareness and understanding of the historical and contemporary significance of art as a unique feature of society. Major programs offer the opportunity for professional artistic development while incorporating subjects that lead to a liberal education. These programs prepare the student for a range of professional opportunities or later graduate study in photography, fine art, and art history, as well as many related fields. As a cultural enrichment for our students, the Art Area sponsors exhibitions, lectures, workshops, and other events related to the visual arts.
Candidates for the BFA degree may select an option in fine arts or photography. Candidates for the BS degree may select the fine arts or photography option. Candidates for the BA degree may select an option in fine arts, art history, or photography. The BFA is a pre-professional degree. The College of Liberal Arts requirements for the BFA differ from other degree programs. (See BFA/Applied Visual Arts.) Admission into either the Fine Arts or Photography option is selective and competitive. See program requirements for specific details.

The Art History minor combines an introduction to art history with an opportunity to explore advanced topics. The Visual Arts minor is a studio concentration in either fine arts or photography. The Art Area also participates in the New Media Communications minors and Digital Communication Arts major, as well as the Master of Arts in Interdisciplinary Studies (MAIS).

## Monthly Art Exhibitions

The Art Area of the School of Arts and Communication, based in Fairbanks Hall, features monthly exhibitions by nationally and internationally recognized artists in the Fairbanks Gallery. The school is also the sponsor of the Visiting Artists and Scholars Lecture Series, which has brought in renowned artists including

Philip Pearlstein, Ann Hamilton, Marina Abromovíc, Bill Viola, and Do Ho Suh. In 1995, the school created the JumpstART Precollege Visual and Performing Arts Workshop held each summer for talented high school students in art, music and theater.

## MUSIC

The Music Area of the School of Arts and Communication offers programs leading to the Bachelor of Arts (BA) or Bachelor of Science (BS) degree, a variety of baccalaureate core courses for students with little or no background in music, and opportunities for qualified students to perform in bands, choirs, and the symphony orchestra. Students wishing a greater curricular choice may wish to combine music study with courses in another school or department in the College of Liberal Arts for a liberal studies major. The Music Area also offers minors in Music and Popular Music Studies.

The Music Area also teaches graduate courses in music education, literature and history, conducting, performance and special projects. Graduate students may pursue the Master of Arts in Teaching: Music Education (MAT) degree or the Master of Arts in Interdisciplinary Studies (MAIS) degree in a broad range of fields. OSU's graduate programs in music have been approved by Oregon's Teacher Standards and Practices Commission and the National Council for Accreditation of Teacher Education. Programs are available for individuals seeking both the initial and/or continuing license in music at all levels of authorization.

Performance instruction at the intermediate and advanced levels is available with instructor consent. Students should contact the school office for application procedures and fee schedules.

The Music Area proudly presents upwards of 200 musical events of all types throughout the academic year and summer. Choral, instrumental, orchestral ensembles of all sizes and types provide students from across campus the chance to participate in and/or simply enjoy listening to music. Many ensembles and events include the chance to work with and learn from professional musicians and nationally and internationally-recognized music educators.

## Scholarships are available for

 music majors and for outstanding performers. Auditions and interviews take place in February and March each year. Selection is based on musical and academic achievement.The Sound Design Lab in Benton Hall includes state-of-the-art digital recording and editing hardware and software and is open to all OSU students. Work-study students are available to help students learn how to use the facilities.

Career possibilities in music include
teaching in the schools, private instruction, performing in orchestras or ensembles, music librarianship, arts management, music business, and recording engineering.

## NEW MEDIA COMMUNICATIONS

The New Media Communications (NMC) Area of the School of Arts and Communication offers Bachelor of Fine Arts (BFA), Bachelor of Arts (BA), and Bachelor of Science (BS) degrees in Digital Communication Arts. There is also a minor in New Media Communications. Course work explores the storytelling capacity of contemporary media and technologies. When pursuing an NMC degree students acquire the skills they need to use today's media effectively in sharing knowledge, imagination, and information. Students also learn to anticipate how future changes in the media are likely to influence their lives. In NMC courses, students explore how to make abstract concepts or hidden processes visible, how to anticipate people's reactions to innovation, how to write professionally, how to recognize the influence of media, how to produce creative content in a variety of media formats, and much more. A New Media Communications major prepares students for a lifetime of change and involvement in the digital world.
NMC courses are taught in multiple venues on campus including the MotionCapture and Gaming labs, both currently located on the fourth floor of Strand Ag Hall.

Each year numerous New Media students participate in internships with on-campus organizations and off campus with local and regional companies. Selected students participate in the National Association of Broadcasters annual convention and other regional and national organizations and events.

## SPEECH COMMUNICATION

The Communication Area of the School of Arts and Communication offers a major program leading to a Bachelor of Arts (BA) or Bachelor of Science (BS) degree. The degree examines both theoretical and practical aspects of human communication as a liberal art, as a social science, as background for further study, or as pre-professional experience. All students initially pursuing a Speech Communication major with an option in Communication take basic courses in public speaking, argumentation, and interpersonal communication. Further studies focus on areas such as rhetorical and communication theory, methods of criticism and research, and history. Students pursuing an option in Communication enhance the skills inherent in all human interactions, preparing themselves for a range of potential vocational pursuits, avocations, and graduate study.

The area also offers a Communication minor.

The Communication Area is located in cottage-esque Shepard Hall on Campus Way. Communication Area students are active in Lambda Pi Eta, the National Communication Association's honor society for four-year colleges and universities. Students from across the university also compete on the nationally-recognized OSU Forensics Team in individual events and debate. Faculty and graduate students participate regularly in national and regional conferences as well as areasponsored colloquia on campus.

The Communication Area also takes part in the Master of Arts in Interdisciplinary Studies (MAIS), with many master's students pursuing two areas of concentration within the area's graduate curriculum.

## THEATRE ARTS

The Theatre Arts Area offers a Bachelor of Arts (BA) or Bachelor of Science (BS) degree option in theatre within the Speech Communication major. The Theatre Arts option emphasizes a liberal arts approach to theatre history, practice, and production. All students pursuing the degree complete a core of classes designed to introduce them to fundamental elements of the art. The large remaining portion of the option is split between courses in history/theory/literature and those focusing on design/technical/performance matters. Students select specific classes within each disciplinary area to match their interests (performance, design, literature, etc.) while meeting key degree requirements. The result is a theatre education grounded in a liberal arts perspective and emphasizing a basic knowledge of all theatre elements. The area offers a similarly structured minor in Theatre Arts.

The Theatre Arts Area facilities are located in Withycombe Hall. The Main Stage Theatre seats approximately 350 in a modified-proscenium arrangement while the flexible Laboratory Theatre seats around 100 . Both spaces function as classrooms as well as performance venues.
The University Theatre (UT) is the producing arm of the Theatre Arts Area. Students from across campus collaborate with UT faculty, staff, and guest artists to create theatre productions throughout the academic year and summer. Students from all colleges and departments across campus are encouraged and welcome to participate.

The Theatre Arts Area also participates in the Master of Arts in Interdisciplinary Studies (MAIS) degree program.

## UNDERGRADUATE MAJORS WITH OPTIONS

## APPLIED VISUAL ARTS (BFA,

 CRED, HBFA)Major to be suspended/terminated pending approval of https://secure.oregonstate.edu/ap/cps/proposals/view/100538.

## The Applied Visual Arts (BFA) is

 also available on the OSU-Cascades campus.We offer two options in Applied Visual Arts:

1. Fine Arts BFA [Terminated summer 2017. Replaced by 'Studio Arts BFA' under Art major]
2. Photography BFA [Terminated summer 2017. Replaced by 'Photography and Digital Art BFA' under Art major]
The Applied Visual Arts program is an interdisciplinary curriculum that enables students to gain a deeper understanding of their own ideas and how they relate to larger historical and cultural contexts. Courses at the 100 level stress fundamental aspects of visual literacy. Courses numbered 200 through 499 offer increasingly intensive study in art history, painting, printmaking, photography, sculpture, expanded media, and drawing.

Completion of an option is required to earn a degree in Applied Visual Arts.

## Requirements for BFA studio

 options in Applied Visual Arts:Applied Visual Arts majors may not take required Art courses on an $\mathrm{S} / \mathrm{U}$ graded basis. Students may not use courses in which they have earned less than a C- to satisfy BFA requirements. A minimum 3.00 grade-point average must be maintained in all art courses used to meet BFA requirements.
The core curriculum studio courses must be completed before taking upperdivision studio courses for a major program. Applied Visual Arts majors are required to see the Art advisor on an annual basis.

* Baccalaureate Core Course (BCC)
${ }^{\wedge}$ Writing Intensive Course (WIC)
Option Code: $\mathbf{8 3 0}$

## DIGITAL COMMUNICATION ARTS (BA, BFA, BS, CRED, HBA, HBFA, HBS)

Students have the opportunity to focus their studies on a particular part of the discipline of New Media Communications.

## BA/BS/HBA/HBS

The BA/BS/HBA/HBS of Digital Communication Arts studies the intersection of media and social life. Throughout history, new media have produced profound changes in human interaction. Family life, politics, commerce, religion, and the distribution of privileges have all been subject to fundamental revision in the wake of new technologies for communication. This provides students with a theoretical and practical understanding of the nature of these changes and prepares them to anticipate and manage inevitable future changes as the media landscape continues to evolve. This is particularly appropriate for students who seek careers in media research and criticism, graduate studies in media, work in media policy, and gain skills needed to manage media communications enterprises. A BA/BS/HBA/HBS of Digital Communication Arts can be earned by completing the core requirements as well as the intermediate and advanced levels of study.

## BFA

The BFA in Digital Communication Arts focuses on media production. The BFA is designed to provide a foundation in media aesthetics, story conceptualization and preproduction planning for linear and nonlinear/interactive projects, video production, sound design and 3D modeling and animation. Students are encouraged to explore their own creativity within a carefully constructed curriculum that serves as a basis for independent work and portfolio development. Faculty members include artists, videographers, editors and composers from professional production environments. A BFA can be earned by completing the Core Requirements, Foundation Course Work and the Production Specialty Requirements.

## BA/BS Additional Requirements

All students receiving a BA degree shall have proficiency in a second language, including American Sign Language (ASL), equivalent to that attained at the end of the second year sequence with a grade of C- or better as certified by the School of Language, Culture, and Society.
The BS degree is conferred for focused curricula that emphasize scientific ways of knowing and quantitative approaches to understanding in the sciences and the social sciences and for curricula in professional fields. Students satisfying BS degree requirements shall have completed additional math, science and computer science courses beyond the University

Baccalaureate Core.
Both the BA and BS degrees require completion of the College of Liberal Arts Core.

The BFA degree does not require the College of Liberal Arts Core or the college's BA/BS requirements. The requirements within the major exceed those of the CLA Core, making it redundant.
The Digital Communication Arts major requires a 2.0 GPA for admittance and a 2.3 GPA for graduation. Students must receive a C - or better in all degree course work. Classes for the major must be A-F grading and not $\mathrm{S} / \mathrm{U}$.

## BA/BS/HBA/HBS in Digital

Communication Arts (45-49):
Core Requirements (15)
ART 121. Foundations: Computers in Visual arts (4)
NMC 100. New Media and Culture (3)
NMC 101. Introduction to New Media Communications (3)
NMC 260. New Media Futures (3)
NMC 301. ${ }^{\wedge}$ Writing for the Media Professional (3)

## Intermediate Level (18-21):

- Only three of six courses can come from non-NMC courses.
- Both NMC and non-NMC courses may have prerequisities in the department offered. See Online Course Catalog.
COMM 324. Communication in Organizations (3)
COMM 368. Propaganda and Social Control (3)

COMM 372. Visual Rhetoric (3)
COMM 385. Communication and Culture in Cyberspace (3)
NMC 240. Survey of Social Media (3)
NMC 255. Introduction of Sound Design (3)
NMC 320. History of Telecommunications (3)

NMC 321. History of Broadcasting (3)
NMC 322. Landmarks in Media Content (3)
NMC 330. The Meaning of Video Games (3)
NMC 340. Social Media Strategy (3)
NMC/ART 349. Video Art (4)
NMC 351. New Media Visualization (3)
NMC 355. Applied Sound Design (3)
NMC 380. Pre-Production (3)
NMC 383. Field Production (4)
NMC/COMM 388. Social Media and
Interpersonal Relationships (3)
NMC 399. Special Topics (1-16)
PS 315. *Politics of Media (4)

## Advanced Level (12-13):

- Only one of four courses can come from non-NMC courses.
- Both NMC and non-NMC courses may have prerequisities in the department offered. See Online Course Catalog.
COMM 440. Theories of Conflict and Conflict Management (3)
COMM 476. Issues in the Freedom of Speech (3)
COMM 484. Media Criticism (3)
NMC 409. Practicum (1-3)
or NMC 410. Internship (1-3) (Taken as three 1-credit courses or two 1-credit and one 2-credit courses or one 3-credit course. Must equal a minimum total of 3 credits to count as one course in this level. Can combine NMC 409 and NMC 410 credits to equal three.)
NMC 421. Diffusion of Innovations (3)
NMC 427. *Digital Pornography (3)
NMC 430. Media Theory (3)
NMC 435. Media Effects (3)
NMC 437. New Media and Society (3)
NMC 490. Media Ethics (3)
NMC 498. Advanced Collaborative
Experience (3-4)
NMC 499. Special Topics (1-16)
Students will complete a total of 45-49
credits in the BA/BS degree in Digital Communication Arts.

## BFA/HBFA in Digital

Communication Arts (Production)

## (91-98):

## Core Requirements (15)

ART 121. Foundations: Computers in Visual Arts (4)
NMC 100. New Media and Culture (3)
NMC 101. Introduction to New Media
Communications (3)
NMC 260. New Media Futures (3)
NMC 301. ${ }^{\wedge}$ Writing for the Media Professional (3)

## Foundation Course Work (39-40)

## Complete all of the following:

ART 101. *Introduction to the Visual Arts (4)
ART 115. Foundations: 2-D (4)
ART 131. Foundations: Drawing I (4)
ART 263. Digital Photography (4)
NMC 322. Landmarks in Media Content (3)
NMC 351. New Media Visualization (3)
TA 242. Visual Principles of Theatre (3)
TA 346. Scene and Stage Design (3)
WR 407. Seminar: Screenwriting (4)

## One of the following:

ART 206. *Introduction to Art HistoryWestern (3)
FILM 125. *Introduction to Film Studies: 1945-Present (3)
FILM 245. *The New American Cinema (4)
FILM 265. *Films for the Future (4)

## NMC Electives (6)

Complete two of the following:
NMC 240. Survey of Social Media (3)
NMC 320. History of Telecommunications (3)
NMC 321. History of Broadcasting (3)
NMC 330. The Meaning of Video Games (3)
NMC 340. Social Media Strategy (3)
NMC/COMM 388. Social Media and
Interpersonal Relationships (3)
NMC 399. Special Topics (1-16)
NMC 421. Diffusion of Innovations (3)
NMC 427. *Digital Pornography (3)
NMC 430. Media Theory (3)
NMC 435. Media Effects (3)
NMC 437. New Media and Society (3)
NMC 490. Media Ethics (3)
NMC 499. Special Topics (1-16)
Production Course Work (31-37)
Select 10 courses from the following:
MUS 493. Basic Recording Techniques (3)
MUS 494. Intermediate Recording

Techniques (3)
MUS 495. Advanced Recording Techniques (3)

MUS 496. Surround Sound Recording and Mastering (2)
NMC 255. Introduction to Sound Design (3)
NMC/ART 349. Video Art (4)
NMC 355. Applied Sound Design (3)
NMC 380. Pre-Production (3)
NMC 383. Field Production (4)
NMC 409. Practicum (1-3)
or NMC 410. Internship (1-3) (Taken as three 1-credit courses or two 1-credit and one 2 -credit courses or one 3 -credit course. Must equal a minimum total of 3 credits to count as one course in this level. Can combine NMC 409 and NMC 410 credits to equal three.)
NMC 481. Post Production (4)
NMC 482. Documentary (4)
NMC 483. New Media 3-D (4)
NMC 484. New Media Animation (4)
NMC 498. Advanced Collaborative
Experience (3-4)
Students pursuing the BFA in Digital Communication Arts, Production will take a total of approximately 91-98 total credits from the course work listed above to complete the major.

## Total $=45-49$ credits for the BA/BS degrees <br> Total= 91-98 credits for the BFA <br> degree <br> Footnotes: <br> * Baccalaureate Core Course (BCC) <br> ${ }^{\wedge}$ Writing Intensive Course (WIC)

## Major Code: 473

## GRAPHIC DESIGN (BFA, CRED, HBFA)

The Bachelor of Fine Arts degree in Graphic Design (GD) is an exciting and rigorous program at OSU. The disciplinary foundations of graphic design are rooted in visual problem solving, design theory and history, as well as professional practices that tie into business and marketing for specific audiences. Examples of the work graphic designers engage in include both print and digital media such as the design of:

- branding and visual identities
- publication design (magazines,
newspapers, catalogs)
- information design
- package design
- exhibition design
- interactive design (Web, video)

The discipline of graphic design is constantly changing due to new technologies, broader target audiences, and softer boundaries between disciplines. Students learn to be adaptable, flexible and collaborative in how they work. Graphic designers are creative thinkers and makers and may have strengths and interests in drawing, printmaking and photography.

The Graphic Design major is a professional program. Entering students are
designated as Pre-Graphic Design majors (major code 479).

The pre-professional Graphic Design program typically takes one year to complete. After completing the pre-professional program requirements, students may apply to the professional Graphic Design program. Students will not be permitted to take professional Graphic Design course work without acceptance into the professional Graphic Design program. If admitted into the professional Graphic Design program, it will take students three additional years to complete the professional program regardless of transfer credit standing.

Admission into the professional Graphic Design program is subject to a competitive application process. To apply and be considered for admission, all pre-professional students must meet the following requirements:

- Be declared as a Pre-Graphic Design major.
- Have completed and received a C- or better in ALL courses within the PreGraphic Design major by the end of spring term before applying.
Criteria for acceptance. Students will be evaluated on the following:
- Completion and grade in GD 126.
- Completion and grades in GD Foundation courses: ART 101, ART 115, ART 121, and ART 131.
- Competion and grades in Bacc Core First-Year Skills Requirements: WR 121, Speech course (choose one: COMM 111, COMM 114, or COMM 218) and College Level Math course: MATH 105 or higher.
- Overall GPA.

MUSIC (BA, BS, CRED, HBA, HBS)
Departmental degree requirements are 47 credits, of which 24 must be upper division. Note: College of Liberal Arts allows only 12 credits of MUP courses to be applied toward a degree.

A grade of C - or better is required for all courses used to complete music major requirements. These courses cannot be taken with $\mathrm{S} / \mathrm{U}$ grading.

Transfer students must demonstrate competency in the areas of music history, music theory, aural skills, and piano skills. Placement examinations in each of these areas must be completed by

Wednesday of the first week of classes. Required Core Classes for ALL options/ emphases:
MUS 177. Group Lessons, Piano (1)
MUS 121, MUS 122, MUS 123. Literature and Materials of Music I $(3,3,3)$
MUS 125, MUS 126. Literature and
Materials of Music Lab I, II (1,1)
MUS 135, MUS 136. Aural Skills I $(1,1)$
MUS 221, MUS 222, MUS 223. Literature and Materials of Music $(3,3,3)$
MUS 315. Introduction to Conducting (2)
MUS 321. Literature and Materials of Music III (3)
MUS 324. History of Western Music (3)
MUS 325. *History of Western Music (3)
MUS 326. History of Western Music (3)
Upper-division Electives (10)

MUS 474. French Diction for Singers (2)
Junior Recital (0)
Senior Recital (0)
Total=40
Option Code: 954

## SPEECH COMMUNICATION (BA

 BS, CRED, HBA, HBS)Students majoring in Speech Communication must choose between a Communication option and a Theatre Arts option. Both options function as standalone majors.

## The Communication option

consists of 48 credits of course work. Students who choose the Communication option will be required to satisfactorily complete an undergraduate prerequisite core before applying (through the School of Arts and Communication) to the major. Students who are working on completing the prerequisite core are placed in pre-communication.

The Theatre Arts option consists of 51 credits of course work. Students in theatre arts do not need to complete the undergraduate prerequisite core required in the Communication option. The course requirements for students pursuing a Theatre Arts option are held to a minimum with the intention of allowing the student and his or her faculty advisor to devise a program most suited to the student's specific needs and objectives.
Students pursuing the Bachelor's degree in Speech Communication must successfully complete the requirements of either the Communication option (48 credits) or Theatre Arts option ( 51 credits); the requirements of the Liberal Arts Core ( 15 cr.); the Oregon State Baccalaureate Core ( 48 credits); and the requirements for the BA or BS.

## Major Code: 985

## OPTIONS

## COMMUNICATION OPTION

The Communication option in the School of Arts and Communication consists of 48 credits. The undergraduate prerequisite core must be successfully completed before the student applies to the major through the School of Arts and Communication. Students completing the prerequisite core are placed in precommunication until then.

## Prerequisite Core:

COMM 111. *Public Speaking (3)
COMM 114. *Argument and Critical
Discourse (3)
COMM 218. *Interpersonal
Communication (3)
Completion of the Writing I and Writing II requirements of the baccalaureate core.
A cumulative GPA of 2.00 or better

## Communication Option:

COMM 320. Introduction to Rhetorical Theory (3)
COMM 321. Introduction to
Communication Theory (3)
Choose one Communication Theory course (3):
COMM 418. ${ }^{\wedge}$ Interpersonal
Communication Theory and Research (3)
COMM 422. ${ }^{\wedge}$ Small-Group Communication

Theory and Research (3)
COMM 426. Intercultural Communication:
Theories and Issues (3)
COMM 430. Theoretical Issues in Communication Theory (3)
COMM 440. Theories of Conflict and Conflict Management (3)
Choose one Rhetorical Theory course (3):

COMM 454. Advanced Argumentation (3)
COMM 456. ^Rhetoric: 500 BC to 500 AD (3)
COMM 458. $\wedge$ Rhetoric: 500 AD to 1900 (3)
COMM 459. ${ }^{\wedge}$ Contemporary Theories of Rhetoric (3)
COMM 466. Ethics of Rhetoric (3)
Choose one Methods course (3):
COMM 414. Communication Research Methods (3)
COMM 416. Ethnography of
Communication (3)
COMM 464. Rhetorical Criticism (3) or another methods course outside the Dept. of Speech Communication as approved by advisor.

- Electives: 24 credits of electives are required in the Communication option with the following stipulations.
- A minimum of 2.0 GPA in course work used for the option is required (including the prerequisite core).
- One Writing Intensive Course (WIC) in the major is required.
- Six (6) elective credits must be taken at the 400 level. Variable credit courses cannot be used for this requirement.
- Limitations: Only 3 credits maximum of lower-division courses will be allowed for the elective portion of this option.
- Only 6 credits maximum of variable credit course work will apply to this option.

## Footnotes:

* Baccalaureate Core Course (BCC)
${ }^{\wedge}$ Writing Intensive Course (WIC)

## Option Code: 983

## THEATER ARTS OPTION

Through the Degree Partnership Program (dual admission/enrollment) with LinnBenton Community College, the Theatre Arts program at Oregon State University is building closer ties with LBCC's drama program. As this innovative program grows, theatre students from both schools will have more performance and production opportunities with greater access to a variety of performance venues and theatre faculty.
TA 147. *Introduction to the Theatre (3)
TA 244. Scenecrafts (3)
TA 247. Stage Makeup (3)
TA 248. Fundamentals of Acting (3)
TA 344. Playscript Analysis (3)
History/Theory/Criticism courses (15)
Performance studies courses (21)
In addition to course work, all majors must work on a production crew, act in a
production, and serve in a front-of-house position.

Option Code: 987

## UNDERGRADUATE MINORS

## ART HISTORY MINOR

Art minors may not elect to take required art courses on an S/U graded basis.
ART 101. *Introduction to the Visual Arts (4) ART 204, ART 205, ART 206. *Introduction
to Art History-Western $(3,3,3)$
ART 208. *Introduction to Asian Art (3)
Upper-division art history courses including at least 3 credits at the 400 level (15)
Total=31
Footnotes:

* Baccalaureate Core Course (BCC)
${ }^{\wedge}$ Writing Intensive Course (WIC)

## Minor Code: 881

## COMMUNICATION MINOR

Communication minors must complete 27 credits, 18 of which must be upper division.

## Requirements

COMM 111. *Public Speaking (3)
COMM 114. *Argument and Critical Discourse (3)
COMM 218. *Interpersonal
Communication (3)
COMM 320. Introduction to Rhetorical
Theory (3)
or COMM 321. Introduction to
Communication Theory (3)
One 400-level course in COMM (3)
Additional 12 credits of upper-division COMM courses (12)
Students may not use any variable credit courses toward their minor. Minors must take courses used to fulfill the requirements for a letter grade. A minimum GPA of 2.00 must be earned in communication course work.

* Baccalaureate Core Course (BCC)

Minor Code: 983

## MULTIMEDIA MINOR

New Media Communications
541-737-1492
Email: NewMedia@oregonstate.edu Website: http://liberalarts.oregonstate. edu/school-arts-and-communication/ new-media-communications

## Offered on Corvallis campus and

 via Ecampus.The Multimedia minor is designed to prepare students for a variety of careers in media and allied fields in which knowledge of and skills in mediated communications are an integral part of professional activity. A Multimedia minor will allow students from across campus to complement their chosen field of study with an understanding of multiple disciplines from a new media perspective. It
is possible for students to complete the minor entirely through Ecampus or at the Corvallis campus.
For students majoring in any subject offered at OSU, the minor must include 20 credits not used as part of the student's major program and all courses for the Multimedia minor must be taken for graded credit.
A total of 32-36 credits is required for the minor, with 12 of these at the upperdivision level (300-400).
BA 260 can only be added during Phase II of the registration process for non-Business majors.

## Multimedia Core (20)

BA 260. Introduction to Entrepreneurship (4) CS 195. Website Design (4)
NMC 101. Introduction to New Media Communications (3)
NMC 240. Survey of Social Media (3)

## NEW MEDIA COMMUNICATIONS

 MINOR
## New Media Communications

## Program

541-737-4580
Email: newmedia@oregonstate.edu Website: http://liberalarts.oregonstate. edu/school-arts-and-communication/ new-media-communications
New Media Communications (NMC) minor focuses on mediated storytelling and the new media technology that makes it possible. This focus within the broader discipline of mediated communications capitalizes on the historic strengths of Oregon State University.
NMC takes an innovative approach to the study of mediated communications. New Media Communications is devoted to the study of mediated communications and its impact on culture, technology and society.
Courses in the New Media Communications minor are designed to prepare students for a variety of careers in media and allied fields in which knowledge of and skills in mediated communications are an integral part of professional activity. NMC offers students the opportunity to pursue a range of theoretical and practical courses in media.

An NMC minor will allow students from across campus to complement their chosen field of study with an understanding of mediated communications from a new media perspective. Students will better understand how to process the information they receive about their chosen field and how to distribute information about their own work effectively in society. The minor in New Media Communications will assist students in attaining the background necessary for leadership roles in their chosen fields.
All courses for the New Media Communications minor must be taken for graded credit.

A total of 27-29 credits is required for the minor, at least 15 of which must be upper division (300-400).

## Core Requirements (9)

NMC 101. Introduction to New Media Communications (3)
NMC 260. New Media Futures (3)
NMC 301. ${ }^{\wedge}$ Writing for the Media
Professional (3)
Electives (18-21)
Students must select 18-21 credits, about 6 courses, from the following list of electives:

NMC 240. Survey of Social Media (3)
NMC 255. Introduction to Sound Design (3)
NMC 320. History of Telecommunications (3)

NMC 321. History of Broadcasting (3)
NMC 322. Landmarks in Media Content (3)
NMC 340. Social Media Strategy (3)
NMC 351. New Media Visualization (3)
NMC 355. Applied Sound Design (3)
NMC 380. Pre-Production (3)
NMC 383. Field Production (4)
NMC 399. Special Topics (1-16) (Can be
taken for up to 6 credits)
NMC 409. Practicum ( $1,1,1$ )
NMC 410. Internship (3-6) (Can be taken
for up to 6 credits)
NMC 419. Reefer Madness in the Media (3);
NMC 421. *Diffusion of Innovations (3)
NMC 427. *Digital Pornography (3)
NMC 430. Media Theory (3)
NMC 483. New Media 3-D (4)
NMC 484. New Media Animation (4)

## Total Requirements=27-29

## PHOTOGRAPHY MINOR

The Photography minor creates an opportunity for non-Photography majors to study and practice photography, digital imaging and collaborative digital arts practices. Through the study of a diverse range of photographic genres and techniques, students actively practice photography, develop critical-thinking skills, study the histories of photography and key photographic practitioners, have the option to experience other time-based media genres, and further their photography skills by creating professional-level projects.
The role of photography to improve creative thinking skills is invaluable for students studying in other fields where the role of creativity as an aspect of inventiveness and independent project generation is encouraged. Furthermore, a photography minor is an ideal companion to students majoring in the design fields or in Digital Communication Arts students in these areas already share several courses in common with art/photography students.

To qualify as a Photography minor, students must declare the minor when filing the application for graduation, and must have 27 credits in photography and art history, at least 12 of which must be upper division. For further information, please contact the academic advisor.
Required Photography Courses (16 credits)
ART 263. Digital Photography (4)
ART 340. Darkroom Photography I (4)
ART 345. Intermediate Photography (4)
ART 347. Photography: Studio Lighting (4)

Photography Electives ( 11 credits)
Choose 11 credits from the following:
ART 222. Introduction to Time-Based Art (4)
ART 264. *Photography: History,
Technology, Culture, and Art (3)
ART 339. Professional Practices in Photography (3)
ART 341. Darkroom Photography II (4)
ART 346. Photo Illustration I (3)
ART 348. Concepts in Digital Imaging (4)
ART/NMC 349. Video Art (4)
ART 350. Photography on Assignment (4)
ART 354. Alternative Processes in
Photography (4)
ART 359. *Photography: Activism and
Social Change (3)
ART 368. ^History of Photography (3)
ART 409. Practicum Student Media (1) Repeatable to 4 credits
ART 422. New Media: Interactive (4)
ART 432. *Gender, Sexuality, and the
Photographic Image (3)
ART 441. Photography III (4)

POPULAR MUSIC STUDIES MINOR

## Also available via Ecampus.

The online Popular Music Studies minor, offered only via Ecampus, creates an opportunity for students to examine popular music as a cultural and social practice. The minor provides students with literacy in several popular music genres of their choice, including rock $n^{\prime}$ roll, hip hop, film music, reggae, Broadway music, music technology and jazz. Through the study of a diverse range of genres, stylistic practices, performance media, and music as a commercial enterprise, students will develop analytical and critical skills to examine musical meaning through the lens of community, music production, and identity.

This minor does not require an audition or ability to read music.
Choose 12 Lower-Division credits from below:
MUS 102. *Music Appreciation II: Periods and Genres: Hip Hop. Theory and Practice (3)

MUS 102. *Music Appreciation II: Periods and Genres: Film Music. Theory and Practice (3)
MUS 102. *Music Appreciation II: Periods and Genres: Musical Theater (3)
MUS 102. *Music Appreciation II: Periods
and Genres: Rock and Roll (3)
MUS 102. *Music Appreciation II: Periods and Genres: Jazz (3)
MUS 102. *Music Appreciation II: Periods and Genres: Reggae (3)
MUS 102. *Music Appreciation II: Periods and Genres: Introduction to Popular Music Theory and Practice (3)
MUS 103. *Music Appreciation III: Great Composers: The Beatles (3)
MUS 103. *Music Appreciation III: Great Composers: Bob Marley (Reggae) (3)
MUS 103. *Music Appreciation III: Great Composers: Bob Dylan (Folk) (3)
MUS 103. *Music Appreciation III: Great Composers: Madonna and Video Culture (3)

MUS 108. *Music Cultures of the World (3)
Choose 15 Upper-Division credits from below:
MUS 402. Independent Study: Capstone Project (3)
MUS 410. Internship (3)
MUS 442. Genre Studies: Advanced Studies in Popular Music Theory and Practice (3)
MUS 442. Genre Studies: Women in Popular Music (3)
MUS 442. Genre Studies: Advanced Studies in Hip Hop (3)
MUS 442. Genre Studies: Regional Studies in World Popular Music (India, Indonesia, Africa, Latin America) (3)
MUS 442. Genre Studies: Advanced Studies in Rock and Roll (3)
MUS 442. Genre Studies: The Blues and African American Music (3)
MUS 442. Genre Studies: Music Video, MTV and American Culture (3)
MUS 443. Theory and Composition Studies: Advanced Studies in Film and Gaming Music (3)
MUS 493. Basic Recording Techniques (3)

## STUDIO ART MINOR

Art minors may not elect to take required art courses on an S/U graded basis.
ART 115. Foundation: 2-D (4)
ART 117. Foundation: 3-D (4)
ART 131. Foundations: Drawing I (4)
Studio Art courses in an approved program that includes at least 12 credits of upper-division courses from the following list ( 15 credits). Studio Art can be any combination of courses in drawing, painting, printmaking, sculpture, expanded media, photography, and digital studio. Note: A relevant 200-level studio art class is a prerequisite for many of these upper-division courses.
ART 215. Color In The Visual Arts (4)
ART 222. Introduction To Time-Based Art (4)
ART 234. Drawing II/Figure (4)
ART 263. Digital Photography (4)
ART 271. Printmaking I (4)
ART 281. Painting I (4)
ART 291. Sculpture I (4)
ART 331. Drawing Concepts (4)
ART 334. Drawing III: Figure (4)

ART 340. Darkroom Photography I (4)
ART 341. Darkroom Photography II (4)
ART 345. Intermediate Photography (4)
ART 347. Photograph: Studio Lighting (4)
ART 348. Concepts In Digital Imaging (4)
ART/NMC 349. Video ART (4)
ART 351. Installation (4)
ART 354. Alternative Processes In
Photography (4)
ART 375. Printmaking: Relief (4)
ART 376. Printmaking: Intaglio (4)
ART 377. Printmaking: Lithography (4)
ART 378. Printmaking: Monotype (4)
ART 379. Printmaking: Screen Printing (4)
ART 381. Painting The Figure (4)
ART 382. Painting II: Concepts (4)
ART 383. Painting II: Abstract And
Multimedia (4)
ART 384. Painting II: New Genre (4)
ART 391. Sculpture II (4)
ART 422. New Media: Interactive (4)
ART 431. Drawing IV (3-5)
ART 434. Drawing IV/Figure (3-5)
ART 441. Photography III (4)
ART 443. Combined Media: Photo Installation (4)
ART 444. The Constructed Image (4)
ART 446. Documentary Photography (4)
ART 447. Advanced Studio Lighting (4)
ART 454. Alternative Processes In
Photography II (4)
ART 475. Printmaking Studio (3-5)
ART 479. Printmaking: Advanced Screen
Printing (4)
ART 481. Painting III (3-5)

## GRADUATE MINORS

## ART GRADUATE MINOR

Graduate Areas of Concentration Art history, fine arts, photography
The School of Arts and Communication offers graduate work leading to the Master of Arts in Interdisciplinary Studies (MAIS) and toward minors in other advanced degree programs. Emphasis may
be in fine arts, art history, or photography. These fields offer sufficient depth to provide a strong minor.

## Minor Code: $\mathbf{8 8 0 0}$

## MUSIC GRADUATE MINOR

Graduate Areas of Concentration
Composition, conducting, music
education, performance
The School of Arts and Communication participates in the Master of Arts in Interdisciplinary Studies degree and Master of Arts in Teaching degree. Contact the school for entrance requirements for the MAT degree. Areas of specialization include performance, conducting, composition, music history, and music education.

## Music Education

Through the School of Arts and Communication, graduate students may participate in the following programs: Professional Music Teacher Education, the Master of Arts in Teaching (MAT), the Master of Arts in Interdisciplinary Studies (MAIS), and the Master of Education (EdM) with a focus in music education. The school offers graduate courses in music, music education, and music performance. OSU's music education program is approved by the state of Oregon Teachers Standards and Practices Commission (TSPC) and the National Council for Accreditation of Teacher Education (NCATE). With careful planning, students may complete both the initial and continuing teaching licensure requirements, as well as a master's degree. For more information, contact the Music Education Coordinator, Oregon State University, 101 Benton Hall, Corvallis, OR 97331.

## SCIENTIFIC, TECHNICAL,

AND PROFESSIONAL

## COMMUNICATION CERTIFICATE

## Also available via Ecampus.

The undergraduate certificate in Scientific, Technical, and Professional Communication is an interdisciplinary program offered by the School of Writing, Literature and Film and the School of Arts and Communication.

The core will consist of courses in writing, communications, and new media arts. These courses are production-orient-
ed and focused on writing and communication skills that students will transfer into other work. Electives are divided between course work in these and other fields, including one course from the Writing Intensive Curriculum (WIC) and up to six credits in upper-division courses in writing and communication. The program is capped by a one-credit course (face-to-face and Ecampus) focused on the creation of a portfolio of technical and scientific communication materials that will be valuable for students as they begin their careers.

## Required Courses ( 6 credits)

WR 327. *Technical Writing (3)
WR 362. *Science Writing (3)

## Core Courses (12 credits)

Select at least 12 credits from below:
COMM 218. *Interpersonal
Communication (3)
COMM 316. Advanced Persuasion (3)
COMM 322. Small-Group Problem Solving (3)

COMM 324. Communication in Organizations (3)
COMM 326. Intercultural Communication (3)

NMC 240. Survey of Social Media (3)
NMC 260. New Media Futures (3)
WR 201. *Writing for Media (3)
WR 214. *Writing in Business (3)
WR 303. *Writing for the Web (3)
WR 330. *Understanding Grammar (3)

## Writing Intensive Course (3-4 cr)

Complete one WIC course of 3 to 4
credits, preferably from the primary discipline and major program of study.

## Electives (Up to $\mathbf{8}$ credits)

Select up to 8 credits from below:
AG 351. *Communicating Agriculture to
the Public (3)
COMM 402. Independent Study (1-2)
COMM 414. Communication Research
Methods (3)
COMM 416. Ethnography of
Communication (3)
COMM 426. Intercultural Communication:
Theories and Issues (3)
COMM 437. Health Communication (3)
COMM 454. Advanced Argumentation (3)
COMM 464. Rhetorical Criticism (3)
FES 493. Environmental Interpretation (4)
WR 402. Independent Study (1-2)
WR 414. Advertising and Public Relations Writing (4)
WR 448. Magazine Article Writing (4)
WR 462. Environmental Writing (4)
WR 466. Professional Writing (4)
WR 493. ^The Rhetorical Tradition and the Teaching of Writing (4)
WR 495. ^Introduction to Literacy Studies (4)

WR 497. Digital Literacy and Culture (4)

## Capstone Portfolio (1 credit)

- ART COURSES

ART 100. ART ORIENTATION (1). Introduction to the study of art and career options in fine arts, graphic design, photography, and art history.
ART 101. *INTRODUCTION TO THE VISUAL ARTS (4). An introductory lecture course using visual materials with emphasis on methods and motivations that generate the visual experience, both past and present. (FA) (Bacc Core Course)
ART 115. FOUNDATIONS: 2-D (4). Studio course that introduces the visual language, the elements of design, and the principles of organization. Emphasizes skills, concepts, and problem solving in the areas of two-dimensional design and color. (FA)
ART 117. FOUNDATIONS: 3-D (4). Studio course examining three-dimensional design elements and their spatial organization. Emphasizes innovative problem solving and exposure to varied media. Gives students a sound conceptual basis to apply to more advanced media-oriented courses. PREREQS: ART 115 [D-]
ART 121. FOUNDATIONS: COMPUTERS IN
VISUAL ARTS (4). An introductory studio art class using computers in the visual arts. Projectbased exploration of digital imaging, layout, 3-D rendering, and video. Examination of the impact of digital technology on the visual arts from contemporary and historical perspectives.

ART 131. FOUNDATIONS: DRAWING I (4).
Introductory studio course in drawing techniques with emphasis on developing skills in perception and visual organization. (FA)
ART 199. SPECIAL STUDIES (0-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ART 204. *INTRODUCTION TO ART HISTORY WESTERN (3). A historical survey of architecture, painting, sculpture, and crafts, from prehistory to the present, with emphasis on the development of Western art. Recommended that sequence be taken in order. (H) (Bacc Core Course)
ART 205. *INTRODUCTION TO ART HISTORY WESTERN (3). A historical survey of architecture, painting, sculpture, and crafts, from prehistory to the present, with emphasis on the development of Western art. Recommended that sequence be taken in order. (H) (Bacc Core Course)
ART 206. *INTRODUCTION TO ART HISTORY WESTERN (3). A historical survey of architecture, painting, sculpture, and crafts, from prehistory to the present, with emphasis on the development of Western art. Recommended that the sequence be taken in order. (H) (Bacc Core Course)
ART 208. *INTRODUCTION TO ASIAN ART (3). Introduces the distinctive, yet related, aesthetic traditions of South and Southeast Asia, Inner Asia, and East Asia. It focuses on architectural sites, sculptures, and paintings from prehistory to the present. (Bacc Core Course)

## ART 210. *HISTORY OF WESTERN

ARCHITECTURE (3). A survey of buildings and architectural thought in the West from antiquity to the twentieth century; focuses on major periods and movements of architectural history by examining building types, patrons, materials, building traditions, structural innovations and other critical aspects inherent to architecture. (Bacc Core Course)
ART 211. WOODTURNING WITH SCIENCE I (4). An introduction to scientific woodturning. Students will get a grounding in tools, lathes, sharpening, and set-up, and then will transition into turning basic forms (spindle and bowl). Particular relevance will be placed upon grain orientation, wood moisture content, wood anatomy, wood
chemistry, wood species and extractive effects and how all of these attributed affect both form and function. Class instruction will be entirely studio based. CROSSLISTED as WSE 211. This course is repeatable for a maximum of 8 credits. PREREQS: WSE 210 [D-]
ART 215. COLOR IN THE VISUAL ARTS (4). Studio course following ART 115 and ART 117 that examines the properties of colors and their interaction. Emphasizes problem solving and the experimental use of color. PREREQS: ART 115 [D-]
ART 222. INTRODUCTION TO TIME-BASED ART
(4). Introduction to time-based media using the computer as a tool. Studio art class developing skills in video art, sound art, performance, and other time-based digital arts. Exploration of sequential, experimental, historical, and contemporary themes and the role of the audience in time-based art. PREREQS: ART 121 [C-]

ART 234. DRAWING II/FIGURE (4). Drawing from the life model with emphasis on skill and conceptual awareness as well as anatomical consideration. PREREQS: ART 131 [D-]
ART 263. DIGITAL PHOTOGRAPHY (4).
Studio course in digital photography. The digital camera. Digital exposure. Digital color. Workflow. Digital output. Location lighting. Students must have the use of a digital single lens reflex camera. PREREQS: ART 115 and ART 120 are recommended.

## ART 264. *PHOTOGRAPHY: HISTORY,

## TECHNOLOGY, CULTURE AND ART (3).

 Introduction to the history of photography through aesthetic, cultural and technical contexts. This course covers the history of photography and its technologies, photography in art, some photographers and their photographs and the purposes of photography. (Bacc Core Course)ART 271. PRINTMAKING I (4). Introduction to the basic processes of printmaking, with options among relief, lithography, intaglio, screen printing and monotype. PREREQS: (ART 115 [D-] and ART 131 [D-])
ART 281. PAINTING I (4). Introductory studio course with emphasis on basic materials and techniques in painting. (FA) This course is repeatable for a maximum of 12 credits. PREREQS: ART 131 [D-]

ART 291. SCULPTURE I (4). Studio course in basic materials and approaches used in sculpture; a foundation for further three-dimensional work. (FA) PREREQS: ART 117 [C-] and Art core strongly recommended.
ART 306. ADVISOR REVIEW (1). A review, conducted by the student's advisor and another faculty member of the student's choosing, of work produced to date in the student's area of concentration. Graded P/N. PREREQS: Placement Test ART1(1) and departmental approval required. For BFA students only.

## ART 310. *EARLY CHINESE ART AND

ARCHAEOLOGY (3). Introduces major forms of Chinese art from the Neolithic period to the Tang dynasty (618-907 CE) and related major archaeological finds. Stresses the materials and processes of making art, development of representational art, and the role of visual arts in an aristocratic and religious culture. (Bacc Core Course)

ART 311. *LATE CHINESE ART AND CULTURE (3). Introduction to the major forms of Chinese art and visual culture from the eleventh century to the early twentieth century. (Bacc Core Course)
ART 312. *CONTEMPORARY CHINESE ART (3). Introduces origins and development of contemporary Chinese art and visual culture in its domestic and global contexts. (Bacc Core Course)

ART 313. *ART OF JAPAN (3). Surveys the arts of Japan from the prehistoric period to the twentieth century. (Bacc Core Course)

ART 320. *ANCIENT GREEK ART (3). Focuses on the major artistic developments in Ancient Greece from the Middle Bronze Age to 31 BCE, and especially on the city-state of Athens during the Fifth Century. (Bacc Core Course)

## ART 321. *ANCIENT ROMAN ART AND

ARCHITECTURE (3). Survey of ancient Roman art and culture between the sixth century BCE and fifth century CE, covering principal media, styles, and subject matter. (Bacc Core Course)

## ART 322. *MEDIEVAL ART AND

ARCHITECTURE (3). Survey of the art and architecture of the major periods and cultures of Europe and the Mediterranean between the fourth and the fourteenth century. Traces salient developments in thought and material culture of western civilization. (Bacc Core Course)
ART 323. *ITALIAN RENAISSANCE ART AND ARCHITECTURE (3). Survey of Italian Renaissance art and culture, covering the principal artists, patrons, media, styles, and subject matter. (Bacc Core Course)

ART 331. DRAWING CONCEPTS (4). Studio course emphasizing drawing composition as an investigative, conceptualizing and communicative nonverbal language. Independent thinking, problem solving, and creative development encouraged. This course is repeatable for a maximum of 12 credits. PREREQS: ((ART 131* [D-] and ART 234* [D-] ))
ART 334. DRAWING III: FIGURE (4). Intermediate study of the human figure utilizing life models, the skeleton, and anatomy texts. Emphasis on gaining greater knowledge of the body's underlying structure and potential for aesthetic expression. This course is repeatable for a maximum of 12 credits. PREREQS: (ART 234 [D-] ) and Art core curriculum.
ART 339. PROFESSIONAL PRACTICES IN PHOTOGRAPHY (3). Professional practices appropriate for photographic-artists and those planning to run a photographic business. Topics include portfolio development, presentation skills, project-planning, contracts, permissions, copyright, promotional campaigns, pricing, grants, exhibition opportunities, business structures, and marketing strategies. This course is repeatable for a maximum of 6 credits. PREREQS: ART 263 [C-] and an additional two photography courses are recommended as prerequisites for this course.
ART 340. DARKROOM PHOTOGRAPHY I (4). Studio course in black-and-white film exposure and development, and printing in the darkroom. The medium of silver-based black-and-white photography is explored as a communication mode and art form. Historical, conceptual, technical and legal aspects of traditional wet processing are surveyed. Access to a single lens reflex (SLR) film camera is required. Course fee. PREREQS: ART 263 Digital Photography is required for Photography majors. No prerequisite or prior darkroom experience is required for nonPhotography majors.
ART 341. DARKROOM PHOTOGRAPHY II (4). Improving silver-gelatin printing and photographic presentation techniques. Emphasis on furthering creative visual language and individual photographic project development. Studio and lecture course. Student must supply a medium format or 35 mm single lens reflex (SLR) film camera. Lec/studio. PREREQS: ART 340 [D-]

ART 345. INTERMEDIATE PHOTOGRAPHY (4). Emphasis is on both technical and aesthetic expression of digital color photography, from initial image capture, color management to finished print along with color symbolism and composition. Exploration of narrative, sequencing and imageseries concepts. Introduction to contemporary color photographers. Studio. PREREQS: ART 263 [C+]
ART 346. PHOTO ILLUSTRATION I (3). Studio lighting. The $4 \times 5$ view camera. Sheet film. Black-and-white and color illustration. PREREQS: ART

262 and Art core curriculum
ART 347. PHOTOGRAPH: STUDIO LIGHTING
(4). Practical studio class surveying the basic principles and application of light in the creation of photographs. The development of craft and technique inside the studio will be emphasized but formal and conceptual considerations related to light and photography will also be explored. PREREQS: ART 263 [C] and ART 345

ART 348. CONCEPTS IN DIGITAL IMAGING (4). Approaches to non-traditional and the manipulated image in digital photography with an emphasis on producing personal imagery. Introduction to the history of the manipulated image in photography and to contemporary approaches to digital photography. PREREQS: ART 263 [D-] and ART 121 are recommended as some prior Photoshop knowledge is required.
ART 349. VIDEO ART (4). Studio course in video art and time-based media projects. Emphasis on experimental approaches to video art in a contemporary art context, linear and nonlinear video production and the projection and screening of video art projects. Introduction to the history of video art as an art form. Lec/studio CROSSLISTED as NMC 349. This course is repeatable for a maximum of 8 credits. PREREQS: ART 122 [C-] and ART 263 [C-]

ART 350. PHOTOGRAPHY ON ASSIGNMENT (4). An introduction to shooting photographs on assignment. Students will create, edit, caption, and submit photographs for print publications, online media, and alternative/independent media venues. Students will experiment with text, audio slideshows, and other creative means of illustrating concepts and ideas. Also covered are history, law, and ethics of photojournalism. PREREQS: ART 263 or active knowledge of camera operations, shooting RAW files and Adobe Lightroom.
ART 351. INSTALLATION (4). Studio/lecture course designed to acquaint the student with the possibilities of using non-traditional means such as site, time, and interaction to communicate deas. PREREQS: (ART 291 [D-] and foundation curriculum.

ART 352. *CREATIVE COLLABORATION: DESIGNING AND BUILDING (3). Working in multi-disciplinary teams, design, implement, and document a piece of public art work or science museum display. Projects may be made of any media, but must demonstrate creativity both in the engineering used to create them and the technology and society message they convey. (Bacc Core Course) CROSSLISTED as ENGR 352.

ART 354. ALTERNATIVE PROCESSES IN PHOTOGRAPHY (4). Historical photographic printing methods in use today e.g., cyanotype, gum bichromate and more. Use of digital and analog negatives, mixing emulsions and coating paper by hand. PREREQS: ART 263 [C-] and ART 345 [C-] and ART 340
ART 359. *PHOTOGRAPHY: ACTIVISM, AND SOCIAL CHANGE (3). Explores photography as an agent of social change through creative projects and topical discussions. Emphasis on the visual language, ethical considerations, and strategies employed by activist photographers that disrupt dominant ideologies and address institutionalized inequality and privilege in the United States. No prior photography experience necessary. (Bacc Core Course) PREREQS: Junior standing
ART 360. HISTORY OF ART (3). Early
Renaissance art. Lecture course on the principal stylistic manifestations of European architecture, painting, and sculpture from the late Middle Ages to 1750. PREREQS: ART 204 and ART 205 and ART 206
ART 361. HISTORY OF ART (3). High
Renaissance art and mannerism. Lecture course on the principal stylistic manifestations of

European architecture, painting, and sculpture from the late Middle Ages to 1750. This course is repeatable for a maximum of 6 credits. PREREQS: ART 204 and ART 205 and ART 206
ART 363. HISTORY OF ART (3). Baroque art. Lecture course on the principal stylistic manifestations of European architecture, painting, and sculpture from the late Middle Ages to 1750. This course is repeatable for a maximum of 6 credits. PREREQS: ART 204 and ART 205 and ART 206
ART 364. *NINETEENTH-CENTURY ART
(3). Lecture course covering the principal movements and trends in late eighteenth-century and nineteenth-century architecture, painting, and sculpture in Europe and America, from Neoclassicism to Symbolism. (Bacc Core Course)
ART 365. *HISTORY OF MODERN ART 1900-
1945 (3). Lecture course covering the principal movements and trends in early twentieth-century Western art, from Expressionism to early American Modernism. (Bacc Core Course)

ART 366. ART SINCE 1945 (3). Lecture course covering the principal movements, theories and ideas in visual art since 1945, including painting, sculpture, photography, installation, performance and participatory art. PREREQS: ART 204 and ART 205 and ART 206
ART 367. *HISTORY OF DESIGN (3). A survey of the impact of technology on the visual qualities of graphic, advertising, fashion, architecture, and industrial design from the Victorian Arts and Crafts Movement to the computer age. (Bacc Core Course)
ART 368. ^HISTORY OF PHOTOGRAPHY (3).
The development of photographic processes and applications. Influential figures. From the early beginnings to contemporary trends. (Writing Intensive Course)
ART 375. PRINTMAKING: RELIEF (4). Studio course in relief printmaking with emphasis on linocut and woodcut; may include other relief processes, i.e. photo polymer plate. Black-andwhite and color. PREREQS: Art core curriculum.

ART 376. PRINTMAKING: INTAGLIO (4). Studio course in intaglio printmaking with emphasis on drypoint, line etching, aquatint, softground and photo process. Black-and-white and possibly color for final project. PREREQS: Art core curriculum.
ART 377. PRINTMAKING: LITHOGRAPHY
(4). Studio course in lithographic printmaking with emphasis on graining the stone, drawing with crayon and tusche, etching and reworking, inking and printing lithographic limestone. Black-and-white and possibly color for final project. PREREQS: Art core curriculum.
ART 378. PRINTMAKING: MONOTYPE (4). Studio course in monotype printmaking with emphasis on drawing/painting with brushes, oil pastels, watercolors, water-based crayons, inking with a lithographic roller and printing with an etching press. Black-and-white and color. PREREQS: Art core curriculum.
ART 379. PRINTMAKING: SCREEN PRINTING (4). Studio course in screen printing with emphasis on paper stencil, drawing fluid and photo emulsion processes. Students are exposed to a range of techniques and concepts are encouraged to investigate personal motivations while making multiple color prints. PREREQS: (ART 115 [C-] and Art core curriculum. ART 100, ART 101, ART 117, ART 131, ART 204, ART 205, ART 206 are recommended. Or instructor approval.
ART 381. PAINTING THE FIGURE (4). Studio course with emphasis on painting from the live model; understanding the figure in terms of color, form and composition, the figure as symbol, implied narrative and vehicle of expression. This course is repeatable for a maximum of 9 credits. PREREQS: (ART 281 [D-] and ART 234 and Art core curriculum.

ART 382. PAINTING II: CONCEPTS (4). Painting with emphasis on experimentation and an exploratory investigation of mixed media, new media, collage, and assemblage, utilizing either representation or abstraction. This course is repeatable for a maximum of 8 credits. PREREQS: (ART 281 [D-] and Art core curriculum.

## ART 383. PAINTING II: ABSTRACT AND

 MULTIMEDIA (4). Intermediate studio course with emphasis on contemporary directions in painting: abstraction and non-literal approaches.This course is repeatable for a maximum of 12 credits. PREREQS: (ART 281 [D-] and Art core curriculum.

ART 384. PAINTING II: NEW GENRE (4). Exploration of current directions in painting using traditional and non-traditional concepts and techniques. This course is repeatable for a maximum of 12 credits. PREREQS: (ART 281 [D-]
ART 385. PAINTING III: ENCAUSTICS (4).
Exploration and application of a variety of traditional and non-traditional techniques using encaustics paint; beeswax and pigment fused to a surface. PREREQS: ART 131 [D-] and ART 281 recommended or instructor approval.
ART 386. A CULTURAL HISTORY OF
AMERICAN ART AND LITERATURE: PART
I (4). The first in an interdisciplinary sequence of courses that examines the development and interrelationships of American art and literature from contact to the present. ART 386, Part I, covers Conquest to Civil War. CROSSLISTED as ENG 386. PREREQS: Sophomore standing.
ART 387. A CULTURAL HISTORY OF AMERICAN ART AND LITERATURE: PART II (4). The second course an interdisciplinary sequence that examines the development and interrelationships of American art and literature from contact to the present. ART 387, Part II, covers Civil War to Harlem Renaissance. CROSSLISTED as ENG 387. PREREQS: Sophomore standing.

## ART 388. A CULTURAL HISTORY OF

AMERICAN ART AND LITERATURE: PART
III (4). The second course an interdisciplinary sequence that examines the development and interrelationships of American art and literature from contact to the present. ART 388, Part III, covers Great Depression to Postmodernity. CROSSLISTED as ENG 388. PREREQS: Sophomore standing.
ART 391. SCULPTURE II (4). Intermediate studio course with emphasis on developing greater skills and technical knowledge in moldmaking, welding, carving, plaster or metal casting. This course is repeatable for a maximum of 12 credits. PREREQS: (ART 291 [D-] and Art core curriculum.
ART 395. SPECIAL TOPICS IN EARLY ART HISTORY (3). This course is repeatable for a maximum of 99 credits.

ART 396. SELECTED TOPICS IN MODERN ART HISTORY (3). This course is repeatable for a maximum of 99 credits.
ART 397. SELECTED TOPICS IN GLOBAL ART HISTORY (3). This course is repeatable for a maximum of 99 credits.
ART 398. SPECIAL TOPICS IN ART HISTORY (3). This course is repeatable for a maximum of 99 credits.
ART 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Junior or senior standing.
ART 400. THE DISCERNING PEN: ART CRITICISM (3). Writing on art history provides students with an opportunity to write about art using three distinct structures and styles while drawing on the student's own ideas and opinions. PREREQS: ((ART 101 [D-] or WR 121 [C-] ) and ART 200 [D-] and ART 206 [D-] )

ART 401. RESEARCH AND SCHOLARSHIP
(1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ART 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ART 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ART 405. READING AND CONFERENCE (1-
16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ART 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: departmental approval required.
ART 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: ART 206 and departmental approval required.
ART 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: departmental approval required.
ART 409. PRACTICUM STUDENT MEDIA (1).
Practical workshop class offering experiential learning in student media on the Oregon State University campus. This course is repeatable for a maximum of 12 credits.
ART 410. INTERNSHIP (1-16). A one-quarter residency with an appropriate, approved agency or organization where a student may receive practical experience related to the objectives of the Department of Art. The intern observes and produces; the work is supervised and evaluated, both by the agency and the art faculty. This course is repeatable for a maximum of 16 credits. PREREQS: departmental approval required.
ART 411. ${ }^{\wedge}$ CONTEMPORARY ISSUES IN ART (3). Examination of relevant issues and realities facing working artists today through research projects, writing, gallery visits, guest lectures, videos and panel discussions. (Writing Intensive Core) PREREQS: Placement Test ART1(1) and Art core curriculum plus 12 credits of upperdivision studio credits.

## ART 413. WOODTURNING WITH SCIENCE

II (4). An in-depth look at how character in wood (figure, spalting, knots, etc.) affects machinability and output in both functional and aesthetic turning. Students will work with a wide range of spalted wood types and figure across numerous species while working on advanced turning forms. Particular emphasis will be placed upon how figure affects grain orientation, how spalting affects density and stability, and how the challenges with character wood can be overcome without specialty tools. Class instruction will be entirely studio based. CROSSLISTED as WSE 413. This course is repeatable for a maximum of 8 credits. PREREQS: WSE 210 [C-] and WSE 211 [C-]
ART 415. ART FOR TEACHERS I (4). A
studio course covering basic art materials and techniques. Integrates aesthetics and art criticism, creating art, and the cultural and historical context of works of art for K-12. May be taken in any order. PREREQS: Fine Arts Portfolio Review (ART1) and Graphic Design Portfolio Review (ART2)
ART 416. ART FOR TEACHERS II (4). A
studio course covering basic art materials and techniques. Integrates aesthetics and art criticism, creating art, and the cultural and historical context of works of art for K-12. May be taken in any order
ART 418. PORTFOLIO SEMINAR (2). An
advanced lecture course providing an overview of pertinent issues in creating a professional graphic design portfolio. Graded P/N. PREREQS: Placement Test ART2(1) and Junior block in graphic design.

ART 422. NEW MEDIA: INTERACTIVE (4). An advanced course designing digital experiences with emphasis on innovative navigation, architectural structures, theoretical, and historical issues of new media. PREREQS: Placement Test ART2(1) and junior block in graphic design and CS 295

ART 431. DRAWING IV (3-5). Development of an individual approach to the varied aspects of drawing, emphasis on exploration of traditional and contemporary techniques and styles. Course offered 3 to 5 credits per term. This course is repeatable for a maximum of 15 credits. PREREQS: 9 credits of ART 331.

ART 432. *GENDER, SEXUALITY, AND THE PHOTOGRAPHIC IMAGE (3). A creative and discussion-based course focusing on ways in which photography can and has addressed issues of gender and sexuality. An introduction to key concepts and intersections in Women's, Gender and Sexuality Studies; Queer Studies and photography theory. Students will create written and photographic responses to artworks, texts, personal experience and pop-culture. (Bacc Core Course) CROSSLISTED as QS 432, WGSS 432. PREREQS: Junior or senior standing.
ART 434. DRAWING IV/FIGURE (3-5).
Development of an individual approach to the varied aspect of figure drawing; emphasis on exploration of traditional and contemporary techniques and styles. Course offered 3-5 credits per term; maximum 15 credits. Departmental approval required for 5 credits. This course is repeatable for a maximum of 15 credits. PREREQS: 9 credits of ART 334.
ART 441. PHOTOGRAPHY III (4). Using the camera as a tool to sharpen aesthetic and visual perception. Creation of exhibition-quality silvergelatin prints. Introduction to the view camera. Advanced darkroom techniques. Lec/lab/studio. This course is repeatable for a maximum of 12 credits. PREREQS: ART 341 [D-] and junior or senior standing.

## ART 443. COMBINED MEDIA: PHOTO

INSTALLATION (4). This studio course explores the use the photographic image in conjunction with other studio media to create multi-media works and site-specific installations. Designed to remove and release the photographic image from its ubiquitous tradition, it looks to reassign the association of photography as merely a two dimensional pursuit. Emphasizing the relationship between objects, the course investigates installation art as a contemporary practice and focuses on the roll photography or the photographic image has played in expanding this dialogue. Issues involved with using photography for the purposes of creating multimedia spatial experiences are discussed and compared with ideas related to traditional photographic presentation. This course is repeatable for a maximum of 8 credits. PREREQS: ART 345 [C] and students must understand basic camera functions and be competent using digital printing techniques to fully engage in this class.
ART 444. THE CONSTRUCTED IMAGE (4). An advanced studio photography course that explores directed, manipulated, and constructed photographs. It investigates this rich tradition by looking at both historical and contemporary photography. Issues involved with making clearly artificial photographs are discussed and compared with traditional ideas related to veracity of the photographic image. PREREQS: ART 345 [C] and students need to have a pre-established foundation of technical camera operations and digital printing skills to participate wholly with the required course projects.

## ART 446. DOCUMENTARY PHOTOGRAPHY

 (4). Intensive in-depth documentary photography course designed to develop skill in telling stories with pictures. The course requires pitching a photographic project, reading and writing about documentary photography, and producing asustained photographic essay with a self-selected documentary subject. Expanded documentary mediums and socially concerned photography are also covered. Hybrid Course. This course is repeatable for a maximum of 12 credits. PREREQS: ART 263 [C] and ART 345 [C-]
ART 447. ADVANCED STUDIO LIGHTING (4).
Practical studio course focusing on the advanced applications of studio and location lighting Students will use digital cameras in combination with professional strobe and mixed artificial lighting. Real-world location lighting challenges will be mastered: scouting locations, hauling and setting up gear, working with models and products, and learning to work on-location. This course is repeatable for a maximum of 8 credits.
PREREQS: ART 263 [C] and ART 347 [C]
ART 451. INTRODUCTION TO ARTS ENTREPRENEURSHIP (3). Survey of the business strategies behind a successful career in the arts. Emphasizes the importance of entrepreneurial thinking, engages students with the fundamentals of the arts "business" and explores ways to influence and shape the industry's future. (FA) CROSSLISTED as MUS 451, TA 451. PREREQS: Junior standing and above. For majors.
ART 454. ALTERNATIVE PROCESSES IN PHOTOGRAPHY II (4). Advanced projects using historical photographic processes. This course is repeatable for a maximum of 8 credits. PREREQS: ART 354 [C-]

ART 456. PORTFOLIO-PHOTOGRAPHY/VIDEO
ART (4). Culmination-level course for the creation of an exhibition-level photographic portfolio or other artistic product using lens-based media. Taught using lectures, critiques, readings, writing and self-reflection. This course is repeatable for a maximum of 12 credits. PREREQS: ART 340 [C-] and ART 345 [C-] and ART 347 [C-] and junior or senior standing.
ART 460. HISTORY OF AMERICAN ART (3). Specialized study of the visual arts in the United States focusing on such issues as landscape, mass culture, and American responses to European culture. Art and ideas from the colonial period to 1900. Not offered every year. PREREQS: 9 credits of art history and American literature or American history.
ART 461. HISTORY OF AMERICAN ART (3).
Specialized study of the visual arts in the United States focusing on such issues as landscape, mass culture, and American responses to European culture. American modernism since 1900. Not offered every year. PREREQS: 9 credits of art history and American literature or American history.

ART 462. DIRECTIONS AND ISSUES IN CONTEMPORARY ART (3). Specialized study of current trends, developments, and critical issues, including the study of new media such as video and photography, as they manifest themselves in the contemporary art world. May be repeated with different topics. Not offered every year. This course is repeatable for a maximum of 9 credits. PREREQS: 9 credits of art history or instructor approval required
ART 463. TOPICS IN RENAISSANCE AND
BAROQUE ART (3). Specialized study of selected areas of special interest, including such topics as Michelangelo, Leonardo da Vinci, Bernini, and art in the Medici's Florence. Subject matter may vary year to year. Not offered every year. This course is repeatable for a maximum of 6 credits. PREREQS: 9 credits of art history or instructor approval required.

ART 464. CULTURAL STUDIES OF THE
MUSEUM (3). Overview of the history, visual culture, and cultural significance of the Western museum. Special attention paid to the development of the art museum and artist's projects that pertain to museums. PREREQS: 9 credits of art history or instructor approval
required.
ART 468. HISTORY OF PRINTMAKING (3).
Survey of the social, economic, intellectual, and technical history of printmaking between the early Middle Ages and the twentieth century in Asia, Europe, and the Americas. Treats the major printmaking processes of woodcut, intaglio, lithography, silkscreen, and photography.

ART 469. ^METHODS AND THEORY OF ART
HISTORY (3). Seminar designed to improve writing and library skills, develop interdisciplinary approaches, and explore art historical theory from Plato to the present. PREREQS: 9 credits of art history or instructor approval required.
ART 475. PRINTMAKING STUDIO (3-5). Studio workshop in relief, intaglio, lithographic, and silkscreen media on an individual project basis. Course offered 3-5 credits per term; maximum 15 credits. This course is repeatable for a maximum of 15 credits. PREREQS: 9 credits of 300 -level printmaking.
ART 479. PRINTMAKING: ADVANCED SCREEN PRINTING (4). Studio course in screen printing with an emphasis on photo emulsion processes. Students are encouraged to integrate these processes with other art-making methods in their creative work. This course is repeatable for a maximum of 12 credits. PREREQS: (ART 379 [D-]
ART 481. PAINTING III (3-5). Development of individual interests and directions in painting. Course offered 3-5 credits per term; maximum 15 credits. This course is repeatable for a maximum of 15 credits. PREREQS: 9 credits of 300 -level painting.
ART 491. SCULPTURE III (3-5). Development of individual interests and directions in sculpture. Course offered 3-5 credits per term; maximum 15 credits. This course is repeatable for a maximum of 15 credits. PREREQS: 9 credits of 300 -level sculpture.
ART 492. SPECIAL TOPICS IN ASIAN ART
(3). Specialized study of selected areas of Asian art history such as Chinese calligraphy, Song Dynasty painting, and storytelling in Asian art. May be repeated with different topics. This course is repeatable for a maximum of 99 credits.
ART 494. SPECIAL TOPICS IN EARLY ART HISTORY (3). This course is repeatable for a maximum of 99 credits.
ART 495. EXHIBITION DESIGN (1). Participatory experience in art gallery exhibition design working in Fairbanks Gallery. Includes specialized study in visual design, lighting, and technical installation. Course offered 1 credit per term, maximum 3 credits. This course is repeatable for a maximum of 3 credits.
ART 496. SELECTED TOPICS IN MODERN ART HISTORY (3). This course is repeatable for a maximum of 99 credits.

ART 497. SELECTED TOPICS IN GLOBAL ART HISTORY (3). This course is repeatable for a maximum of 99 credits.

ART 498. SPECIAL TOPICS IN ART HISTORY (3). This course is repeatable for a maximum of 99 credits.
ART 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 99 credits.
ART 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ART 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ART 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.
ART 505. READING AND CONFERENCE (1-
16). This course is repeatable for a maximum of

16 credits. PREREQS: Departmental approval required

ART 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ART 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: ART 206 and departmental approval required.
ART 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ART 510. INTERNSHIP (1-12). A one-quarter residency with an appropriate, approved agency or organization where a student may receive practical experience related to the objectives of the Department of Art. The intern observes and produces; the work is supervised and evaluated, both by the agency and the art faculty. This course is repeatable for a maximum of 15 credits. PREREQS: Departmental approval required.
ART 515. ART FOR TEACHERS I (4). A studio course covering basic art materials and techniques. Integrates aesthetics and art criticism, creating art, and the cultural and historical context of works of art for K-12. May be taken in any order.

ART 516. ART FOR TEACHERS II (4). A studio course covering basic art materials and techniques. Integrates aesthetics and art criticism, creating art, and the cultural and historical context of works of art for K-12. May be taken in any order

## ART 532. GENDER, SEXUALITY, AND THE

 PHOTOGRAPHIC IMAGE (3). A creative and discussion-based course focusing on ways in which photography can and has addressed issues of gender and sexuality. An introduction to key concepts and intersections in Women's, Gender and Sexuality Studies; Queer Studies and photography theory. Students will create written and photographic responses to artworks, texts, personal experience and pop-culture. CROSSLISTED as QS 532, WGSS 532.PREREQS: Junior or senior standing.
ART 546. DOCUMENTARY PHOTOGRAPHY
(3). An intensive shooting course in 35 mm photography designed to develop skill in telling stories using pictures. Single picture and multiple picture stories. Lec/lab. This course is repeatable for a maximum of 9 credits. PREREQS: ART 350
ART 556. PORTFOLIO-PHOTOGRAPHY/VIDEO ART (4). Culmination-level course for the creation of an exhibition-level photographic portfolio or other artistic product using lens-based media. Taught using lectures, critiques, readings, writing and self-reflection. This course is repeatable for a maximum of 12 credits. PREREQS: junior or senior standing.

## ART 562. DIRECTIONS AND ISSUES IN

CONTEMPORARY ART (3). Specialized study of current trends, developments, and critical issues, including the study of new media such as video and photography, as they manifest themselves in the contemporary art world. Not offered every year. May be repeated with different topics. This course is repeatable for a maximum of 9 credits. PREREQS: 9 credits of art history or instructor approval required.
ART 564. CULTURAL STUDIES OF THE
MUSEUM (3). Overview of the history, visual culture, and cultural significance of the Western museum. Special attention paid to the development of the art museum and artist's projects that pertain to museums. PREREQS: 9 credits of art history or instructor approval required.
ART 569. METHODS AND THEORY OF ART
HISTORY (3). Seminar designed to improve writing and library skills, develop interdisciplinary approaches, and explore art historical theory from Plato to the present. PREREQS: 9 credits of art history or instructor approval required.

ART 581. PAINTING III (3-5). Development of individual interests and directions in painting. Course offered 3 to 5 credits per term; maximum 15 credits. This course is repeatable for a maximum of 15 credits. PREREQS: 9 credits of 300-level painting.
ART 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 99 credits.

## COMMUNICATION COURSES

COMM 111. *PUBLIC SPEAKING (3). Public communication as it relates to informative and persuasive discourse. The theory and practice of public speaking in informative and persuasive contexts. Lec/rec. (Bacc Core Course)

COMM 111H. *PUBLIC SPEAKING (3). Public communication as it relates to informative and persuasive discourse. The theory and practice of public speaking in informative and persuasive contexts. Lec/rec. (Bacc Core Course) PREREQS: Honors College approval required.

COMM 114. *ARGUMENT AND CRITICAL DISCOURSE (3). Examination of argumentation as a part of human interaction and investigation. The course emphasizes the processes by which people give reasons to gain adherence and to justify beliefs and actions. The course includes readings, writing, and presentations concerned with the nature of arguments, processes of arguing, and argument criticism. Lec/rec. (Bacc Core Course)
COMM 114H. *ARGUMENT AND CRITICAL DISCOURSE (3). Examination of argumentation as a part of human interaction and investigation. The course emphasizes the processes by which people give reasons to gain adherence and to justify beliefs and actions. The course includes readings, writing, and presentations concerned with the nature of arguments, processes of arguing, and argument criticism. Lec/rec. (Bacc Core Course) PREREQS: Honors College approval required.
COMM 180. INTRODUCTION TO THE
RHETORIC OF THE FILM (3). The motion
picture from prephotographic eras to the present; individuals responsible for major advances in theory and technique. The motion picture and social influence. Films viewed for discussion and analysis. Film fee required.
COMM 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits
COMM 211. *COMMUNICATING ONLINE (3). In our increasingly technological world, we use mediated communication to build relationships. Introduces students to the theoretical and practica dimensions on online communication in order to facilitate more informed analysis and performance of online communication as a means of developing both interpersonal and public relationships. (Bacc Core Course)

## COMM 218. *INTERPERSONAL

COMMUNICATION (3). Introduction to dyadic and relational communication. Overview of current research in such areas as verbal and nonverbal messages, self-concept and perception, culture and gender stereotypes and styles, relational development and dissolution, deception, compliance gaining and conflict management. (Bacc Core Course)
COMM 221. FORENSICS (3). Laboratory experience in debate, public speaking, and interpretation of literature. Preparation for intercollegiate debate and forensics participation.

COMM 280. MEDIA COMMUNICATION IN THE INFORMATION AGE (3). A survey of the traditional media of mass communication and the new and emerging media technologies: their development, role in contemporary society and impact upon the public. The influence of mediated communication upon living in the information society. (SS)

COMM 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

COMM 312. ADVANCED PUBLIC SPEAKING
(3). Advanced theory and practice in public speaking. Simulated public speaking situations, audience analysis, and rhetorical strategies will be emphasized. Students will prepare and present a variety of public speeches. PREREQS: (COMM 111 [D-] or COMM 111H [D-] or COMM 114 [D-] or COMM 114H [D-] )
COMM 314. ARGUMENTATION (3). Concepts and processes of argumentation, systems of logic, critical analysis of contemporary efforts to influence. Examination of arguing to gain adherence and argumentation as a way of knowing. Development of cases and argument briefs for presentation. (H) PREREQS: (COMM 114 [D-] or COMM 114H [D-] )
COMM 316. ADVANCED PERSUASION (3). Advanced theory and practice in persuasion, with evidence on social and behavioral science research. Examination of the cognitive and affective aspects of persuasion, focusing particularly on the audience. Consideration of persuasion in interpersonal relations, organizations, public advocacy, and public relations. (H) PREREQS: COMM 111

COMM 318. ADVANCED INTERPERSONAL COMMUNICATION (3). Advanced theory and practice in communication in interpersonal relations. (SS) PREREQS: (COMM 218 [D-] or COMM 218H [D-] )
COMM 320. INTRODUCTION TO RHETORICAL
THEORY (3). Introduction to the basic theories of rhetoric, as well as the background of rhetoric as a discipline in speech communication. (H)

## COMM 321. INTRODUCTION TO

COMMUNICATION THEORY (3). Introduction to 20th century models, theories, and empirical research programs in communication. Survey of selected theories and social scientific methods across diverse contexts in communication. (SS)

COMM 322. SMALL-GROUP PROBLEM SOLVING (3). Theory and practice of small-group decision making. Group processes of problem solving and decision by consensus. The history and role of group problem solving in a democratic society. Group power, leadership, and roles. Experience with problems of fact, value, and policy. (SS) PREREQS: COMM 218
COMM 323. COMMUNITY DIALOGUE (4). Examination of the nature and role of community dialogue in formal and informal social scenes in which participants communicate differing perspectives, values and beliefs. Taught at OSUCascades only. PREREQS: Sophomore standing.

## COMM 324. COMMUNICATION IN

 ORGANIZATIONS (3). Examination of the nature and role of communication in formal and informal organizations. Introductory survey of central issues in the study of organizations, including corporate communication, leadership, organizational effectiveness, power, organizational culture, management styles, organizational conflict, and decision making. (SS)COMM 325. COMMUNICATING LEADERSHIP
(4). Theory and practice of communicating eadership. Communication processes of facilitating productive climates, innovative and creative leading, and goal-oriented community leading. Offered at OSU-Cascades only. PREREQS: Sophomore standing.
COMM 326. INTERCULTURAL
COMMUNICATION (3). Perspectives, theories, and experiences of communication in intercultural, cross-cultural, and pan-cultural relations. (SS)

COMM 328. NONVERBAL COMMUNICATION (3). The study of human communication behavior that transcends the spoken and written word; nondiscursive symbolism. The course examines the relationship between nonverbal and verbal communication behavior and
nonverbal communication skill development Topics addressed include space, distance, the environment, touch, gesture, facial expression, and gaze as communication. (SS)
COMM 332. FAMILY COMMUNICATION (3).
How various elements of communication impact familial relationships. Two main discussions: general communication patterns in the family, and various understudied types of family relationships. Provides students with insights into past familial experiences and skills for future family relationships. PREREQS: COMM 218 [D]
COMM 350. DEBATE AND FORENSICS
WORKSHOP (1-3). Laboratory experience in debate, public speaking, and interpretation of literature. Preparation for intercollegiate debate and forensics participation. This course is repeatable for a maximum of 15 credits. PREREQS: Departmental approval required.
COMM 368. PROPAGANDA AND SOCIAL
CONTROL (3). Case studies, examples, and analyses of direct and indirect influences upon thought, belief, and action involving mass media of communication, including film, theatre, radio, television, posters, and art objects. Historical approach using film, tape, and recordings for student analysis and discussion. (SS)

COMM 372. VISUAL RHETORIC (3). The course will survey the major theories of semiotics. Using semiotics as a foundation, students will explore the nature of the rhetoric of the visual image. (H)
COMM 380. IMAGE AND MYTH IN FILM (3).
Film as a medium for creating, reflecting, and defining values, roles, styles, conflicts, problems, strategies, expectations, and institutions in American life. Various methods of analysis and evaluation are applied to film as an agent and artifact. Film images of the frontier, war, women, men, justice, America, progress, and beauty are explored. Film fee required. (H)

COMM 382. TELEMEDIA DESIGN AND
PRODUCTION (4). Study and practice of communication through telemedia (video, audio, computer), and emphasis on the principles of telemedia authorship. The study includes telemedia distribution systems and effects on audiences. Lec/lab.

COMM 385. COMMUNICATION AND CULTURE
IN CYBERSPACE (3). Covers history and
culture of the Internet, as well as social, political, and economic issues of computer-mediated communication. (H)
COMM 388. SOCIAL MEDIA AND
INTERPERSONAL RELATIONSHIPS (3).
Examines how individuals build and maintain close relationships through new media and social networks. Currently, scholars are seeing a shift in how individuals self-report building close relationships, as people use elements of new media more and more frequently. This course is designed to look into the similarities and differences of these relationships as compared to face-to-face relationships. CROSSLISTED as NMC 388.
COMM 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
COMM 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

COMM 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
COMM 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
COMM 405. READING AND CONFERENCE
(1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

COMM 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required

COMM 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required
COMM 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
COMM 410. COMMUNICATION INTERNSHIP (116). An assignment in a private or public business or agency. The student observes or works in one or more departments of the enterprise, perhaps in one area of interest or specialization (e.g. public relations, training, personnel, research and planning). Work is supervised by the agency staff, supervising school faculty members(s) provide academic evaluation. 12 credits maximum. This course is repeatable for a maximum of 12 credits. PREREQS: Major with minimum of 21 credits and school approval required.

## COMM 412. TOPICS IN SPEECH

COMMUNICATION (3). Contemporary issues in speech communication: appraisal and discussion of current theories, trends, research methods, problems, or applications. This course is repeatable for a maximum of 9 credits. PREREQS: 9 credits of speech communication.

## COMM 414. COMMUNICATION RESEARCH

METHODS (3). Communication research and its relationship to theory. Quantitative and qualitative methods of investigation in speech communication. Experimental and non-experimental research design; naturalistic observation; issues of reliability and validity; statistical analysis. Standards and principles of writing and reporting research. PREREQS: COMM 321 [D-] and /or instructor approval required

## COMM 416. ETHNOGRAPHY OF

COMMUNICATION (3). Study and practice of using ethnography of communication as a research method for developing theory in communication studies; topics include data collection, analysis, and writing ethnographic reports. (SS) PREREQS: COMM 321 [D-]

## COMM 418. ^INTERPERSONAL

COMMUNICATION THEORY AND RESEARCH
(3). Current theory, research, and practice in interpersonal communication. Issues addressed may include compliance gaining, nonverbal behavior, family communication, gender issues, impression formation, rules, and human relations. (SS) (Writing Intensive Course) PREREQS: COMM 321 [D-] and /or instructor approval required.

## COMM 422. ^SMALL-GROUP

COMMUNICATION THEORY AND RESEARCH
(3). Current theory, research, and practice in communication and small-group communication Issues addressed may include leadership, decision making, problem solving, training, and human relations. (SS) (Writing Intensive Course) PREREQS: COMM 321 [D-] and /or instructor approval required
COMM 425. COMMUNICATION AND YOUTH
OUTREACH (4). Examines the role of communication outreach when working with youth. Study and examination of applied youth communication theory and research. Topics may include establishing communication boundaries, communicating identity, anti-smoking and antidrug campaigns, social exclusion, effects of media, and pro-social communication. Students are required to volunteer in a youth context coordinated by the instructor. Taught only on the OSU-Cascades Campus.

## COMM 426. INTERCULTURAL

COMMUNICATION: THEORIES AND ISSUES
(3). Advanced study in intercultural communication theoretical developments and research directions. Topics addressed may include intercultural research methods, training, language and culture, acculturation, and intercultural effectiveness. (SS)

PREREQS: (COMM 321 [D-] and COMM 326 [D-] ) and /or instructor approval required

COMM 427. CULTURAL CODES IN
COMMUNICATION (3). Study and examination of the contextualized use of communication within speech communities and cultures; topics include the cultural patterning of communication and cultural communication theory.
COMM 430. THEORETICAL ISSUES IN COMMUNICATION INQUIRY (3). Review of conceptual, philosophical, ontological, epistemological, and methodological issues in the development of theories in human communication application to contemporary, empirical human communication research. (SS) PREREQS: COMM 321 [D-] and /or instructor approval required.

COMM 432. GENDER AND COMMUNICATION
(3). Investigation of impact of sex and gender on communication in conflict, decision-making, leadership, nonverbal messages, language, and interpersonal relationships. Focus on definitions of sex and gender in regard to knowledge, social constructs, and self-development. PREREQS: COMM 321 [D-] and /or instructor approval required.
COMM 435. SCIENTIFIC, TECHNICAL, \& PROFESSIONAL COMMUNICATION CAPSTONE (1). Students complete a portfolio comprised of material generated throughout previous courses in the Certificate in Scientific, Technical, and Professional Communication. CROSSLISTED as WR 435. PREREQS: Completion of 18 credits towards the Certificate in Scientific, Technical, and Professional Communication.

## COMM 437. HEALTH COMMUNICATION

(3). This class is designed to unpack various elements of how communication impacts health, and vice versa. There are three main sections to this course: 1) discussing doctor-patient communication, 2) discussing the effects of health campaigns, and 3) discussing the link between communication and both psychological and physiological health.
COMM 440. THEORIES OF CONFLICT AND CONFLICT MANAGEMENT (3). Conflict on a variety of levels: intrapersonal, interpersonal, group, public, and social. Conflict in a variety of contexts: relationships, family, organizations, community, and society. Constructive and destructive means of confronting and managing conflict; social and psychological aspects of conflict; conflict analysis; causes of conflict; conflict and peace, social order, and social change; case studies of conflict. (SS) PREREQS: COMM 321 or instructor approval required.
COMM 442. BARGAINING AND NEGOTIATION
PROCESSES (3). Theory and practice of bargaining and negotiation as means of settling disputes, with emphasis on the role of communication. Strategies and tactics of distributive and integrative bargaining orientations. Negotiation preparation and experience through case studies and simulations. (SS) PREREQS: COMM 321 or instructor approval required.

## COMM 444. THIRD PARTIES IN DISPUTE

RESOLUTION: MEDIATION AND ARBITRATION (3). Philosophies, strategies, practices, and characteristics of mediation and arbitration processes in the settlement of conflicts and disputes. Study of the role of the third party neutral in the peace making process. Case studies and simulations in mediation and arbitration. (SS) PREREQS: COMM 321 or instructor approval required.
COMM 446. *COMMUNICATION IN
NTERNATIONAL CONFLICT AND DISPUTES
(3). Examination of the nature of international conflicts and disputes and the roles culture and communication play in resolving them constructively. Analysis of negotiation, mediation and international law as approaches to dealing with international political, economic, cultural, and
religious disputes. Scrutiny of contemporary world conflicts. (SS) (Bacc Core Course) PREREQS: COMM 321 or instructor approval required.

COMM 454. ADVANCED ARGUMENTATION (3). Advanced study in classical and current theories of the persuasive and epistemological functions of argumentation. Examination of the dominant contemporary theorists, including Toulmin, Perelman, and Willard. Analysis of research and applied perspectives, including conversational argument, argument fields, the philosophy of argument, argument as rhetoric, and argument in contexts. (H) PREREQS: COMM 320 [D-] and /or instructor approval required.

COMM 456. ^RHETORIC: 500 BC TO 500 AD (3) History and philosophy of rhetorical principles. (H) (Writing Intensive Course) PREREQS: COMM 320 [D-] and /or instructor approval required.
COMM 458. ^RHETORIC: 500 AD TO 1900 (3). History and philosophy of rhetorical principles. (H) (Writing Intensive Course) PREREQS: COMM 320 [D-] and /or instructor approval required.

COMM 459. ^CONTEMPORARY THEORIES
OF RHETORIC (3). A survey of contemporary
rhetorical theories from 1900 to the present. (H) (Writing Intensive Course) PREREQS: COMM 320 [D-] and /or instructor approval required.
COMM 460. RHETORIC OF REVOLUTIONARIES AND REACTIONARIES: 1750 TO 1900 (3).
Speech criticism; great American speakers, relation of their speaking to the history of ideas; rhetoric and political, social, and religious movements. (H) PREREQS: COMM 320 [D-] and/ or instructor approval required.
COMM 462. RHETORIC OF REVOLUTIONARIES AND REACTIONARIES: 1900-PRESENT (3).
Speech criticism; great American speakers; relation of their speaking to the history of ideas; rhetoric and political, social, and religious movements. (H) PREREQS: COMM 320 [D-] and / or instructor approval required.
COMM 464. RHETORICAL CRITICISM (3).
Explores the approaches to the criticism of rhetoric, including aesthetic, social movement, genre, feminist, and other modes of criticism. PREREQS: COMM 320 [D-]
COMM 466. ETHICS OF RHETORIC (3).
Examines the ethical questions raised by the use of persuasive discourse, including the derivation of standards of ethical persuasion and approaches to ethical judgment about persuasion. (H) PREREQS: COMM 320 [D-] and /or instructor approval required.
COMM 470. HISTORY OF SPEECH
COMMUNICATION (3). Examines the theories and practices involved in the development of speech communication as a field and a discipline, with a special emphasis on the central roles played by rhetorical theory and criticism. PREREQS: COMM 320 [D-] and COMM 321 [D-]
COMM 472. THE RHETORIC OF POPULAR CULTURE (3). A survey of theories of popular culture from Arnold to Hall. Students will examine various artifacts of popular culture and the influences they exert. (H)

COMM 476. ISSUES IN THE FREEDOM OF SPEECH (3). Examination of the theories of free expression and case materials related to tests of free speech in key U.S. Supreme Court cases. The course emphasizes the context of social and political movements from which the cases arise. (H) PREREQS: COMM 320 or instructor approval required.
COMM 478. POLITICAL CAMPAIGN RHETORIC (3). Theory, research and methods of political campaign rhetoric. Topics include rhetorical strategies and tactics in advertising, national conventions, broadcast debates, media coverage and public opinion polls. (H) PREREQS: COMM 320 or instructor approval required.

COMM 482. THE MEDIA IN CULTURE AND
SOCIETY (3). The study of the societal-cultura impact on the media, and their effect upon individuals, social, cultural, political, economic, and leisure structures and systems. Special focus on the issues of media in shaping values, molding opinions, and reflecting/projecting attitudes, beliefs, and behaviors, including media's role in racial, gender, and familial relations. (SS) PREREQS: COMM 280
COMM 484. MEDIA CRITICISM (3). A critical examination of the media analysis of content, forms and deployment of media messages and products. A critical study of the structure, functions and economics of media systems. A consideration of media ethics and responsibilities in relation to news and information, entertainment, advertising and marketing, and social-cultural influence. (SS) PREREQS: COMM 280

COMM 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

COMM 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required
COMM 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
COMM 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.

COMM 505. READING AND CONFERENCE
(1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
COMM 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required
COMM 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
COMM 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

COMM 510. COMMUNICATION INTERNSHIP (112). An assignment in a private or public business or agency. The student observes or works in one or more departments of the enterprise, perhaps in one area of interest or specialization (e.g., public relations, training, personnel, research and planning). Work is supervised by the agency staff, supervising school faculty member(s) provide academic evaluation. 12 credits maximum. Graded $\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 12 credits. PREREQS: Graduate committee approval required.

## COMM 512. TOPICS IN SPEECH

COMMUNICATION (3). Contemporary issues in speech communication: appraisal and discussion of current theories, trends, research methods, problems, or applications. This course is repeatable for a maximum of 9 credits. PREREQS: 9 credits of speech communication.

## COMM 514. COMMUNICATION RESEARCH

 METHODS (3). Communication research and its relationship to theory. Quantitative and qualitative methods of investigation in speech communication. Experimental and non-experimental research design; naturalistic observation; issues of reliability and validity; statistical analysis. Standards and principles of writing and reporting research. PREREQS: COMM 321 or instructor approval required.COMM 516. ETHNOGRAPHY OF
COMMUNICATION (3). Study and practice of using ethnography of communication as a research method for developing theory in communication studies; topics include data collection, analysis, and writing ethnographic reports. PREREQS: COMM 321

COMM 518. INTERPERSONAL
COMMUNICATION THEORY AND RESEARCH
(3). Current theory, research, and practice in interpersonal communication. Issues addressed may include compliance gaining, nonverbal behavior, family communication, gender issues, impression formation, rules, and human relations PREREQS: COMM 321 or instructor approval required.
COMM 520. GRADUATE SEMINAR IN
COMMUNICATION (3). Introductory graduate seminar in the field of communication. Emphasis on the breadth and depth of the discipline, graduate study, and research directions.

COMM 522. SMALL-GROUP COMMUNICATION THEORY AND RESEARCH (3). Current theory, research, and practice in communication and small-group communication. Issues addressed may include leadership, decision making, problem solving, training, and human relations. PREREQS: COMM 321 or instructor approval required.

## COMM 524. COMMUNICATION IN

ORGANIZATIONS: THEORIES AND ISSUES
(3). Analysis of human interaction within the informal and formal systems of organizations. Theory, research, and practice relevant to the analysis of the nature and role of communication within small, mid-range and highly complex organizations. The course addresses structural, functional, and cultural features of communication in organizational environments.
COMM 526. INTERCULTURAL
COMMUNICATION: THEORIES AND ISSUES
(3). Advanced study in intercultural communication theoretical developments and research directions. Topics addressed may include intercultural research methods, training, language and culture, acculturation, and intercultural effectiveness. PREREQS: COMM 321 and COMM 326 or instructor approval required.
COMM 527. CULTURAL CODES IN
COMMUNICATION (3). Study and examination of the contextualized use of communication within speech communities and cultures; topics include the cultural patterning of communication and cultural communication theory.
COMM 530. THEORETICAL ISSUES IN COMMUNICATION INQUIRY (3). Review of conceptual, philosophical, ontological, epistemological, and methodological issues in the development of theories in human communication; application to contemporary, empirical human communication research. PREREQS: COMM 321 or instructor approval required.
COMM 532. GENDER AND COMMUNICATION
(3). Investigation of impact of sex and gender on communication in conflict, decision-making, leadership, nonverbal messages, language, and interpersonal relationships. Focus on definitions of sex and gender in regard to knowledge, social constructs, and self-development. PREREQS: COMM 321 or instructor approval required.
COMM 537. HEALTH COMMUNICATION
(3). This class is designed to unpack various elements of how communication impacts health, and vice versa. There are three main sections to this course: 1) discussing doctor-patient communication, 2) discussing the effects of health campaigns, and 3) discussing the link between communication and both psychological and physiological health.

COMM 540. THEORIES OF CONFLICT AND CONFLICT MANAGEMENT (3). Conflict on a variety of levels: intrapersonal, interpersonal, group, public, and social. Conflict in a variety of contexts: relationships, family, organizations, community, and society. Constructive and destructive means of confronting and managing conflict; social and psychological aspects of conflict; conflict analysis; causes of conflict; conflict and peace, social order, and social change; case studies of conflict. PREREQS: COMM 321 or instructor approval required.

COMM 542. BARGAINING AND NEGOTIATION
PROCESSES (3). Theory and practice of bargaining and negotiation as means of settling disputes, with emphasis on the role of communication. Strategies and tactics of distributive and integrative bargaining orientations. Negotiation preparation and experience through case studies and simulations. PREREQS: COMM 321 or instructor approval required.

## COMM 544. THIRD PARTIES IN DISPUTE

RESOLUTION: MEDIATION/ARBITRATION
(3). Philosophies, strategies, practices, and characteristics of mediation and arbitration processes in the settlement of conflicts and disputes. Study of the role of the third party neutral in the peace making process. Case studies and simulations in mediation and arbitration. PREREQS: COMM 321 or instructor approval required.

COMM 546. COMMUNICATION IN

## NTERNATIONAL CONFLICT AND DISPUTES

(3). Examination of the nature of international conflicts and disputes and the roles culture and communication play in resolving them constructively. Analysis of negotiation, mediation, and international law as approaches to dealing with international political, economic, cultural, and religious disputes. Scrutiny of contemporary world conflicts. PREREQS: COMM 321 or instructor approval required.

COMM 550. COMMUNICATION AND THE PRACTICE OF SCIENCE (3). Communication is central to science-based decision-making, the function of science teams, the reporting and critique of scientific knowledge, and the interface between science and policy making. This seminar emphasizes communication competence in the arena of applied science; that is, science as practiced in government agencies, private corporations, and nonprofit organizations.
COMM 554. ADVANCED ARGUMENTATION (3). Advanced study in classical and current theories of the persuasive and epistemological functions of argumentation. Examination of the dominant contemporary theorists, including Toulmin, Perelman, and Willard. Analysis of research and applied perspectives, including conversational argument, argument fields, the philosophy of argument, argument as rhetoric, and argument in contexts. PREREQS: COMM 320 or instructor approval required.
COMM 556. RHETORIC: 500 BCTO 500 AD (3). History and philosophy of rhetorical principles. PREREQS: COMM 320 or instructor approval required.

COMM 558. RHETORIC: 500 AD TO 1900 (3). History and philosophy of rhetorical principles. PREREQS: COMM 320 or instructor approval required.
COMM 559. CONTEMPORARY THEORIES
OF RHETORIC (3). A survey of contemporary rhetorical theories from 1900 to the present. PREREQS: COMM 320 or instructor approval required.
COMM 560. RHETORIC OF REVOLUTIONARIES AND REACTIONARIES: 1750 TO 1900 (3).
Speech criticism; great American speakers, relation of their speaking to the history of ideas; rhetoric and political, social, and religious movements. PREREQS: COMM 320 or instructor approval required.

COMM 562. RHETORIC OF REVOLUTIONARIES AND REACTIONARIES: 1900-PRESENT (3).
Speech criticism; great American speakers; relation of their speaking to the history of ideas; rhetoric and political, social, and religious movements. PREREQS: COMM 320 or instructor approval required.

COMM 564. RHETORICAL CRITICISM (3). Explores the approaches to the criticism of rhetoric, including aesthetic, social movement, genre, feminist, and other modes of criticism. PREREQS: COMM 320 or instructor approval
required.
COMM 565. RESEARCH METHODS IN
RHETORIC (3). A graduate-level introduction to research methods in rhetorical studies. Topics include rhetorical criticism, discourse analysis, and historiography. Course goals include the ability to understand and critique common methodological approaches in rhetorical studies.

COMM 566. ETHICS OF RHETORIC (3).
Examines the ethical questions raised by the use of persuasive discourse, including the derivation of standards of ethical persuasion and approaches to ethical judgment about persuasion. PREREQS: COMM 320 or instructor approval required.
COMM 572. THE RHETORIC OF POPULAR CULTURE (3). A survey of theories of popular culture from Arnold to Hall. Students will examine various artifacts of popular culture popular culture and the influences they exert.
COMM 576. ISSUES IN THE FREEDOM OF SPEECH (3). Examination of the theories of free expression and case materials related to tests of free speech in key U.S. Supreme Court cases. The course emphasizes the context of social and political movements from which the cases arise. PREREQS: COMM 320 or instructor approval required.
COMM 578. POLITICAL CAMPAIGN RHETORIC
(3). Theory, research and methods of political campaign rhetoric. Topics include rhetorical strategies and tactics in advertising, national conventions, broadcast debates, media coverage and public opinion polls. PREREQS: COMM 320 or instructor approval required.
COMM 582. THE MEDIA IN CULTURE AND SOCIETY (3). The study of the societal-cultural impact on the media, and their effect upon individuals, social, cultural, political, economic, and leisure structures and systems. Special focus on the issues of media in shaping values, molding opinions, and reflecting/projecting attitudes, beliefs, and behaviors, including media's role in racial, gender, and familial relations. PREREQS: COMM 280
COMM 584. MEDIA CRITICISM (3). A critical examination of the media analysis of content, forms and deployment of media messages and products. A critical study of the structure, functions and economics of media systems. A consideration of media ethics and responsibilities in relation to news and information, entertainment, advertising and marketing, and social-cultural influence.
PREREQS: COMM 280
COMM 590. GRADUATE SEMINAR IN
RHETORIC (3). Examines topics dealing with the current state of research in rhetorical studies. This includes discussing a number of approaches to the history, theory, and criticism of rhetoric, as well as to the relationship between rhetoric and related disciplines. Course goals include increased competence in understanding the current state of rhetorical theory and research in the area being explored. This course is repeatable for a maximum of 9 credits.
COMM 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
COMM 808. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

## - GRAPHIC DESIGN COURSES

GD 121. ADOBE SOFTWARE BASICS (3). Instruction in drawing, editing, and layout techniques using Adobe Illustrator, and Photoshop CS6 and CC. PREREQS: Declared pre-graphic design as a major.

GD 126. GRAPHIC DESIGN PRO APPLICATION (1). Required pre-graphic design course. Course will focus on the development of a final portfolio to be reviewed by the graphic design faculty at the end of the spring term. Graded P/N. This course is repeatable for a maximum of 2 credits. PREREQS:

DHE 121 [C-] and DHE 160 [C-] and DHE 161 [C-] and ART 120 and ART 122 and ART 131 and DHE 121

GD 224. INTERACTIVE DESIGN 1 (4).
Introductory class to interactive design principles
in the graphic design professional core.
PREREQS: GD 126 [C-] and GD 226* [C-] and GD 228* [C-]

GD 226. TYPOGRAPHY 1 (4). An introductory course in the discipline, function and tradition of typography as it relates to visual and verbal communication. PREREQS: GD 126 [C-] and acceptance into the Graphic Design professional program.
GD 227X. DRAWING FOR GRAPHIC DESIGN
(4). Focuses exclusively on hand drawing skills with an emphasis on various ways graphic designers use drawing in their creative process. Students develop a working knowledge of various visual methods for communicating design concepts. PREREQS: GD 126 [D-] and students must be accepted into the graphic design professional program cohort.

GD 228. PROCESS: MAKING AND MEANING
(4). Course utilizes creative problem solving techniques, communication theories, combined with media explorations to bring together message, meaning, medium, and form. PREREQS: GD 126 [C-] and acceptance into the Graphic Design professional program.
GD 269. GRAPHIC DESIGN HISTORY (3). A historical and theoretical overview of the evolution and innovations in graphic design. PREREQS: GD 126 [D-] and acceptance into the professional graphic design cohort.

## GD 312. ^CONTEMPORARY ISSUES IN

DESIGN (3). For all graphic design students in the professional graphic design program. The course examines contemporary design issues through reading, research, writing, presentations and discussion. (Writing Intensive Course) PREREQS: GD 126 [D-] and Must have junior standing in the graphic design professional program.
GD 325. GRAPHIC DESIGN: COLLABORATIVE PROCESSES (4). Intermediate course in graphic design. Emphasis on collaborative projects exploring principles of group problem solving in typography. PREREQS: sophomore block in graphic design.

GD 326. TYPOGRAPHY 2 (4). An intermediate course exploring the design of organizational typographic structures and systems. PREREQS: GD 126 [C-] and acceptance into the Graphic Design professional program.
GD 327. TYPOGRAPHY 3 (4). An intermediate course exploring the visual, expressive vocabulary of typography, using innovative experimentation. PREREQS: GD 126 [C-] and acceptance into the Graphic Design professional program.
GD 328. INTERACTIVE 2 (4). An introduction to the contemporary issues of interactive design: experience design, application design, e-publication design, and from a visual communications perspective. PREREQS: GD 126 [C-] and acceptance into the Graphic Design professional program.
GD 369. GRAPHIC DESIGN HISTORY (3). An intermediate lecture course providing a historical and theoretical overview of the evolution and innovation in graphic design. PREREQS: ART 204 and ART 205 and ART 206 and ART 367

GD 412. ^CONTEMPORARY ISSUES IN DESIGN (3). How contemporary culture shapes the practice of graphic design and how design shapes the culture in which we live. Issues examined through lectures, readings, discussion and writing. (Writing Intensive Course)
GD 419. PORTFOLIO REVIEW (2). A course to advise students during their final portfolio preparation. The objective is to complete the portfolio and hone presentation skills and
techniques. Graded P/N. PREREQS: junior block in graphic design.

GD 420. PROFESSIONAL PRACTICES (3). Professional ethics and standards, business practices and tactics, and pre-press production techniques and concerns for graphic designers. PREREQS: GD 126 [D-] and junior standing in graphic design professional program and acceptance into professional graphic design cohort.

## GD 421. INFORMATION AND PUBLICATION

DESIGN (4). Theoretical and historical issues of organizing and visualizing statistics, numbers, and/or complex relationships. Emphasis on conceptualization, visual diagramming, and analysis of subtle visual relationships. PREREQS: junior block in graphic design.
GD 422. NEW MEDIA: INTERACTIVE (4). An advanced course designing digital experiences with emphasis on innovative navigation, architectural structures, theoretical, and historical issues of new media. PREREQS: Junior block in graphic design and CS 295.
GD 423. EXPERIMENTAL TYPOGRAPHY (4). An advanced course in experimental typography focusing on intent, meaning, and method.
PREREQS: junior block in graphic design.
GD 424. BRAND IDENTITY SYSTEMS (4). Studio course that explores both the theory and the practice of brand identity systems, through the creation of a comprehensive visual branding project. This course is repeatable for a maximum of 12 credits. PREREQS: GD 126 [C-] and acceptance into the Graphic Design professional program.
GD 426. GRAPHIC DESIGN CAPSTONE 1 (3). The first in a two-course sequence of senior-level graphic design capstone courses. The focus is on applying more in-depth design research methods to graphic design senior capstone projects. PREREQS: Senior standing in professional graphic design program.

GD 427. CAPSTONE 2 (4). The second in a twocourse sequence of senior-level graphic design capstone courses. The focus is on the design and development of the senior capstone project. PREREQS: (GD 126 [C-] and GD 426 [C-] ) and senior standing in graphic design professional program.

GD 429. GRAPHIC DESIGN STUDIO (4). Provides opportunity for students to work with clients on actual projects in a professional environment. Lec/lab. This course is repeatable for a maximum of 16 credits. PREREQS: junior block in graphic design. Admission through portfolio review.

GD 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## ■ MUSIC EDUCATION COURSES

MUED 277. INSTRUMENTAL TECHNIQUES (1). MUED 277: High Brass; MUED 277: Low Brass; MUED 277: Single Reeds/Flute; MUED 277: Double Reeds/Flute; MUED 277: High Strings; MUED 277: Low Strings; MUED 277: Percussion. Basic instruction for each instrumental family. Emphasis is on techniques for teaching each group of instruments. Includes a survey and evaluation of instrumental methods texts. Emphasis on pedagogical skills as they relate to a beginning instrumentalist rather than upon performance skills. This course is repeatable for a maximum of 7 credits.

MUED 353. MUSIC EDUCATION IN PUBLIC SCHOOLS (3). Examines historical practices, philosophical differences and pedagogical approaches that influence public school music programs. Field experiences provide contextual models with genuine teaching opportunities each week. PREREQS: MUS 121 [D-]

MUED 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.
MUED 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 18 credits PREREQS: Departmental approval required.
MUED 405. READING AND CONFERENCE
(1-16). This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.

MUED 406. PROJECT (1). Editing and refining of portfolio materials representing professional growth in teaching throughout the Professiona Teacher and Counselor Education Program. Includes work samples, assessments, reflections, and videotapes. This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.
MUED 408. WORKSHOP (1-16). This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required
MUED 413. THEORY AND PRACTICUM: FIELD (1-4). Field experience in music classroom. For pre-MAT students taking 4 credits, the experience is approximately 10 hours per week in elementarylevel classroom.

MUED 460. PSYCHOLOGY OF MUSIC (3).
The study and evaluation of psychological,
physiological, and neurological aspects of musical behavior and experience; including but not limited to acoustics, human hearing, perception and cognition, development and expertise, affective response and preference, unusual abilities, and selected special topics. PREREQS: Junior standing and instructor approval.
MUED 470. METHODS AND MATERIALS FOR
THE PUBLIC SCHOOL WIND BAND (3). Includes examination of method books, instructional materials, and music for middle school and high school band. Class format is lecture, discussions, and microteaching demonstrations. Includes study of past and current methods of improving student musical understanding and performance through band literature and rehearsal techniques. PREREQS: MUS 318 and MUS 319 (Instrumental conducting). Must have senior standing as a music education major.

## MUED 471. INVESTIGATING MUSICAL

CULTURES (3). Immerse yourself in an unfamiliar musical culture and learn how to teach students about it. Become better prepared to work effectively with multicultural materials, and to use culturally appropriate pedagogical approaches. Music will be emphasized as a gateway to cultural understanding, but previous musical experience is not required. PREREQS: Declared major or minor in Music or Education, upper-division status or higher, completed collegiate-level degree in Music or Education, or permission of instructor.

## MUED 473. METHODS FOR TEACHING

ELEMENTARY MUSIC (3). Focuses on
pedagogical content knowledge in music for specialists preparing to teach Kindergarten through grade five. Students will focus on the developmental characteristics of learners, repertoire and instructional techniques appropriate for the elementary music classroom, and lesson planning incorporating state and national standards. Issues related to diverse and special needs populations will be interwoven throughout each segment of the course. PREREQS: MUED 353 [D-] and admission to the Professional Music Teacher Education program or permission of instructor.
MUED 477. CLASSROOM INSTRUMENTAL
TECHNIQUES (2). A brief overview of
fundamental principles and playing techniques of brass, percussion, string, and woodwind instruments designed for the choral music educator who uses instrumental accompaniment or conducts an instrumental ensemble.
PREREQS: MUS 222 and MUS 234 and MUS 319

MUED 478. TECHNIQUES FOR THE VOCAL
INSTRUCTOR (2). Vocal techniques for the public school music teacher. Offered alternate years. PREREQS: MUS 185 or instructor approval required.
MUED 499. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.

MUED 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.
MUED 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 18 credits PREREQS: Departmental approval required.
MUED 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.
MUED 505. READING AND CONFERENCE
(1-16). This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.
MUED 506. PROJECTS (1-16). This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.
MUED 507. THEORY AND PRACTICUM SEMINAR (1-4). Field experience in music classroom. This course is repeatable for a maximum of 10 credits. PREREQS: Departmental approval required

MUED 508. WORKSHOP (1-16). This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.
MUED 510. PROFESSIONAL INTERNSHIP
(3-15). A supervised teaching experience at a variety of public school levels. The student works with an experienced mentor teacher, accepting the professional responsibilities of teaching. This course is repeatable for a maximum of 15 credits PREREQS: Departmental approval required.
MUED 521. SPECIAL TOPICS IN MUSIC ED (3). Advanced pedagogy in one particular area within music education, such as jazz band techniques, computer design of marching band drills, advanced technology in music education. Topics will vary. PREREQS: Departmental approval required.
MUED 560. PSYCHOLOGY OF MUSIC (3). The study and evaluation of psychological, physiological, and neurological aspects of musical behavior and experience; including but not limited to acoustics, human hearing, perception and cognition, development and expertise, affective response and preference, unusual abilities, and selected special topics. PREREQS: Junior standing and instructor approval.

MUED 562. RESEARCH IN MUSIC EDUCATION (3). Introduction to the historical, philosophical, quantitative and qualitative research methodologies in music education. Includes interpretation and application of findings published in major research journals. PREREQS: Admission to the Professional Teacher and Counselor Licensure program or instructor approval required.
MUED 570. METHODS AND MATERIALS FOR THE PUBLIC SCHOOL WIND BAND (3). Includes examination of method books, instructional materials, and music for middle school and high school band. Class format is lecture, discussions, and microteaching demonstrations. Includes study of past and current methods of improving student musical understanding and performance through band literature and rehearsal techniques. PREREQS: Designed for vocal students enrolled in the Professional Music Teacher Education Program. Departmental approval required.

## MUED 571. INVESTIGATING MUSICAL

CULTURES (3). Immerse yourself in an unfamiliar musical culture and learn how to teach students about it. Become better prepared to work
effectively with multicultural materials, and to use culturally appropriate pedagogical approaches. Music will be emphasized as a gateway to cultural understanding, but previous musical experience is not required. PREREQS: Declared major or minor in Music or Education, upper-division status or higher, completed collegiate-level degree in Music or Education, or permission of instructor.

## MUED 573. METHODS FOR TEACHING

 ELEMENTARY MUSIC (3). Focuses on pedagogical content knowledge in music for specialists preparing to teach Kindergarten through grade five. Students will focus on the developmental characteristics of learners, multiple representations of the subject matter, and lesson planning incorporating state and national standards. Issues related to diverse and special needs populations will be interwoven throughout each segment of the course. PREREQS: Admission to the Professional Music Teacher Education program or permission of instructor. MUED 353MUED 574. MIDDLE LEVEL MUSIC EDUCATION (3). This methods course focuses on general music education, grades four through eight. Students explore relationships between teaching and learning in order to effectively plan for instruction. PREREQS: Departmental approval required.
MUED 580. SECONDARY VOCAL MUSIC
EDUCATION (3). This methods course focuses on vocal music education, grades nine through twelve. Students explore relationships between teaching and learning in order to effectively plan for instruction. PREREQS: Departmental approval required.

## MUED 581. SECONDARY INSTRUMENTAL

MUSIC EDUCATION (3). This methods course focuses on instrumental music education, grades nine through twelve. Students explore relationships between teaching and learning in order to effectively plan for instruction. PREREQS: Departmental approval required.

MUED 591. CURRICULUM FOUNDATIONS
N MUSIC EDUCATION (3). Examination of historical, philosophical, and social influences on contemporary music education emphasizing 1950 through the present, culminating in the National
Standards for Arts Education. PREREQS:
Departmental approval required.
MUED 592. FOUNDATIONS OF MUSIC
EDUCATION II: (3). CURRICULUM
IMPLEMENTATION AND EVALUATION Students design and construct a comprehensive music education curriculum grounded in current research, the National Standards for Arts Education and Oregon's Common Curriculum Goals. PREREQS: Departmental approval required.
MUED 593. MUSIC TECHNOLOGY (3). Specific applications for teaching music incorporating appropriate software and hardware for curricular integration and curricular evolution.
MUED 599. SPECIAL STUDIES (1-16). This
course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.

## I MUSIC STUDIO COURSES

MUP 160. INDIVIDUAL LESSONS: BEGINNING PIANO (1-2). This course is repeatable for a maximum of 12 credits. PREREQS: Departmental approval required.

MUP 161. INDIVIDUAL LESSONS: BEGINNING STRINGS (1-2). This course is repeatable for a maximum of 12 credits.

MUP 162. INDIVIDUAL LESSONS: BEGINNING BRASS (1-2). This course is repeatable for a maximum of 12 credits.
MUP 163. INDIVIDUAL LESSONS: BEGINNING WOODWINDS (1-2). This course is repeatable for a maximum of 12 credits.

MUP 164. INDIVIDUAL LESSONS: BEGINNING
VOICE (1-2). This course is repeatable for a maximum of 12 credits.

MUP 165. INDIVIDUAL LESSONS: BEGINNING
PERCUSSION (1-2). This course is repeatable for a maximum of 12 credits.
MUP 170. INDIVIDUAL LESSONS:
INTERMEDIATE PIANO (1-2). This course
is repeatable for a maximum of 12 credits. PREREQS: Departmental approval required.
MUP 171. INDIVIDUAL LESSONS:
INTERMEDIATE STRINGS (1-2). This course is repeatable for a maximum of 12 credits.

MUP 172. INDIVIDUAL LESSONS:
INTERMEDIATE BRASS (1-2). This course is repeatable for a maximum of 12 credits.

## MUP 173. INDIVIDUAL LESSONS:

INTERMEDIATE WOODWINDS (1-2). This course is repeatable for a maximum of 12 credits.
MUP 174. INDIVIDUAL LESSONS:
INTERMEDIATE VOICE (1-2). This course
is repeatable for a maximum of 12 credits. PREREQS: Simultaneous participation in one OSU choir is required.
MUP 175. INDIVIDUAL LESSONS:
INTERMEDIATE PERCUSSION (1-2). This course is repeatable for a maximum of 12 credits.
MUP 190. INDIVIDUAL LESSONS: KEYBOARD
(1-2). This course is repeatable for a maximum of 12 credits. PREREQS: Departmental approval required.

MUP 191. INDIVIDUAL LESSONS: VOICE (1-2). This course is repeatable for a maximum of 12 credits.
MUP 192. INDIVIDUAL LESSONS: STRINGS
(1-2). This course is repeatable for a maximum of 12 credits.
MUP 193. INDIVIDUAL LESSONS: WOODWINDS (1-2). This course is repeatable for a maximum of 12 credits.
MUP 194. INDIVIDUAL LESSONS: BRASS (1-2).
This course is repeatable for a maximum of 12 credits.

MUP 195. INDIVIDUAL LESSONS:
PERCUSSION (1-2). This course is repeatable for a maximum of 12 credits.

MUP 290. INDIVIDUAL LESSONS: KEYBOARD
(1-2). This course is repeatable for a maximum of 12 credits. PREREQS: Departmental approval required.
MUP 291. INDIVIDUAL LESSONS: VOICE (1-2).
This course is repeatable for a maximum of 12 credits.
MUP 292. INDIVIDUAL LESSONS: STRINGS
(1-2). This course is repeatable for a maximum of 12 credits.

MUP 293. INDIVIDUAL LESSONS: WOODWINDS
(1-2). This course is repeatable for a maximum of 12 credits.
MUP 294. INDIVIDUAL LESSONS: BRASS (1-2). This course is repeatable for a maximum of 12 credits.
MUP 295. INDIVIDUAL LESSONS:
PERCUSSION (1-2). This course is repeatable for a maximum of 12 credits.

MUP 390. INDIVIDUAL LESSONS: KEYBOARD (1-2). This course is repeatable for a maximum of 12 credits. PREREQS: Departmental approval required.
MUP 391. INDIVIDUAL LESSONS: VOICE (1-2). This course is repeatable for a maximum of 12 credits. PREREQS: Simultaneous participation in one OSU choir ensemble is required.
MUP 392. INDIVIDUAL LESSONS: STRINGS (1-2). This course is repeatable for a maximum of 12 credits.

MUP 393. INDIVIDUAL LESSONS: WOODWINDS
(1-2). This course is repeatable for a maximum of 12 credits.

MUP 394. INDIVIDUAL LESSONS: BRASS (1-2).
This course is repeatable for a maximum of 12 credits.
MUP 395. INDIVIDUAL LESSONS:
PERCUSSION (1-2). This course is repeatable for a maximum of 12 credits.
MUP 490. INDIVIDUAL LESSONS: KEYBOARD
(1-2). This course is repeatable for a maximum of 12 credits. PREREQS: Departmental approval required.

MUP 491. INDIVIDUAL LESSONS: VOICE (1-2).
This course is repeatable for a maximum of 12 credits. PREREQS: Simultaneous participation in one OSU choir ensemble is required.
MUP 492. INDIVIDUAL LESSONS: STRINGS
(1-2). This course is repeatable for a maximum of 12 credits.
MUP 493. INDIVIDUAL LESSONS: WOODWINDS
(1-2). This course is repeatable for a maximum of 12 credits.

MUP 494. INDIVIDUAL LESSONS: BRASS (1-2).
This course is repeatable for a maximum of 12 credits.
MUP 495. INDIVIDUAL LESSONS:
PERCUSSION (1-2). This course is repeatable for a maximum of 12 credits.
MUP 590. INDIVIDUAL LESSONS: KEYBOARD
(1-2). This course is repeatable for a maximum of 12 credits. PREREQS: Departmental approval required.

MUP 591. INDIVIDUAL LESSONS: VOICE (1-2).
This course is repeatable for a maximum of 12 credits.
MUP 592. INDIVIDUAL LESSONS: STRINGS
(1-2). This course is repeatable for a maximum of 12 credits.
MUP 594. INDIVIDUAL LESSONS: BRASS (1-2). This course is repeatable for a maximum of 12 credits.
MUP 595. INDIVIDUAL LESSONS:
PERCUSSION (1-2). This course is repeatable for a maximum of 12 credits.

## ■ MUSIC COURSES

MUS 101. *MUSIC APPRECIATION I: SURVEY
(3). Dealing primarily with the Western classical tradition, the course focuses on developing perceptive listening skills through the study of musical forms and styles. For non-majors. (FA) (Bacc Core Course)
MUS 101H. *MUSIC APPRECIATION I: SURVEY (3). Dealing primarily with the Western classical tradition, the course focuses on developing perceptive listening skills through the study of musical forms and styles. For non-majors. (FA) (Bacc Core Course) PREREQS: Honors College approval required.
MUS 102. *MUSIC APPRECIATION II: PERIODS AND GENRES (3). A study of the masterworks of a single era (such as Baroque, classic, romantic, twentieth century) or a genre (such as orchestra, chamber, opera, musical theatre). See Schedule of Classes for topic being offered. For non-majors. Need not be taken in order. (FA) (Bacc Core Course) This course is repeatable for a maximum of 12 credits.

MUS 102H. *MUSIC APPRECIATION II: PERIODS AND GENRES (3). A study of the masterworks of a single era (such as Baroque, classic, romantic, twentieth century) or a genre (such as orchestra, chamber, opera, musical theatre). See Schedule of Classes for topic being offered. For non-majors. Need not be taken in order. (FA) (Bacc Core Course) This course is repeatable for a maximum of 12 credits. PREREQS: Honors College approval required.

MUS 103. *MUSIC APPRECIATION III: GREAT COMPOSERS (3). The life and works of one or more significant composers including Bach, Haydn, Mozart, Beethoven, and others. (See Schedule of Classes for composers being offered.) For non-majors. Does not need to be taken in sequence. (FA) (Bacc Core Course) This course is repeatable for a maximum of 18 credits.
MUS 104. SURVEY OF JAZZ (3). Explores the historical, sociological and artistic development of jazz, America's musical art form. A concise review of the first 100 years of the music from its blues-based roots at the turn of the 20th century to its current eclectic state will constitute the main framework of the course. While the focus will be on the important performers and composers of jazz, key historical and social events that contributed to the evolution of the idiom will also be discussed.
MUS 108. *MUSIC CULTURES OF THE WORLD (3). Survey of the world's music with attention to musical styles and cultural contexts. Included are Oceania, Indonesia, Africa, Asia, Latin America. (See Schedule of Classes for subject being offered.) For non-majors. (NC) (Bacc Core Course) This course is repeatable for a maximum of 18 credits.

MUS 108H. *MUSIC CULTURES OF THE WORLD (3). Survey of the world's music with attention to musical styles and cultural contexts. Included are Oceania, Indonesia, Africa, Asia, Latin America. (See Schedule of Classes for subject being offered.) For non-majors. (NC) (Bacc Core Course) This course is repeatable for a maximum of 18 credits. PREREQS: Honors College approval required.
MUS 121. LITERATURE AND MATERIALS OF MUSIC I (3). Covers fundamentals of music theory along with a brief introduction to Western art music. This requires students to learn to read and write all notes in treble and bass clef, and all common scales, intervals, triads and seventh chords, using key signatures. They also learn to recognize basic rhythms and write them down This course is repeatable for a maximum of 6 credits. PREREQS: A grade of $80 \%$ on the final exam is required to move on to MUS 122.
MUS 122. LITERATURE AND MATERIALS OF MUSIC I (3). An integrated, team-taught approach to the study of Western art music, including repertory, melodic, harmonic, and rhythmic components, formal organization, and composition. Recitation included. PREREQS: Placement exam and MUS 121
MUS 123. LITERATURE AND MATERIALS OF MUSIC I (3). An integrated, team-taught approach to the study of Western art music, including repertory, melodic, harmonic, and rhythmic components, formal organization, and composition. Recitation included. Lec/lab/rec. PREREQS: Placement exam and MUS 122
MUS 125. LITERATURE AND MATERIALS LAB I (1). Scales, all major and harmonic form of minor, interval drill. PREREQS: MUS 121. Music majors must take concurrently with MUS 122.
MUS 126. LITERATURE AND MATERIALS LAB II (1). Transpose scores, harmonic idioms, harmonic progressions. Lec/lab. PREREQS: MUS 122 and MUS 125. Music majors must take course concurrently with MUS 123.
MUS 135. AURAL SKILLS II (1). Aural comprehension of the basic melodic, rhythmic, and harmonic elements of music. PREREQS: Students should take concurrently with MUS 122.

MUS 136. AURAL SKILLS I (1). Aural
comprehension of the basic melodic, rhythmic, and harmonic elements of music. PREREQS: MUS 135. Students must take concurrently with MUS 123.
MUS 137. JAZZ IMPROVISATION (1-3).
Instrumental and vocal improvisation including composition and arranging techniques. This course is repeatable for a maximum of 9 credits.

PREREQS: Departmental approval required.
MUS 140. OSU CHAMBER CHOIR (1-2). A select ensemble of approximately 40 mixed voices. Performances each term. Annual tours. (FA) This course is repeatable for a maximum of 9 credits. PREREQS: Departmental approval required.
MUS 146. WOMEN'S CHOIR (1-2). A women's ensemble designed for vocal development and exploration of treble choral literature. Performances each term. This course is repeatable for a maximum of 9 credits. PREREQS: Departmental approval required.
MUS 147. MEN'S CHOIR (1-2). A men's ensemble designed for vocal development and exploration of TTBB choral literature. Performances each term. This course is repeatable for a maximum of 9 credits.

MUS 150. SYMPHONIC BAND (1). A select ensemble of approximately 80 wind and percussion players. Performance each term. (FA) This course is repeatable for a maximum of 9 credits.
MUS 151. CONCERT BAND (1). Wind and percussion ensemble of approximately 70 players. Performance each term. Open to all students. This course is repeatable for a maximum of 9 credits.

MUS 152. RHYTHM AND BEAVS PEP BAND (1). An auditioned group of 12 musicians who perform at university, community, and athletic events throughout the year. This course is repeatable for a maximum of 9 credits. PREREQS: Departmental approval required.

MUS 153. MARCHING BAND (1-2). A marching and playing unit of more than 160 musicians. Performs for home football games. This course is repeatable for a maximum of 6 credits.
MUS 154. BASKETBALL BAND (1). An ensemble of approximately 50 players. Performs for home games. This course is repeatable for a maximum of 3 credits.
MUS 155. COLOR GUARD (1). A derivative of the Marching Band Color Guard, this ensemble performs and competes around the Pacific Northwest during winter term. Audition required. This course is repeatable for a maximum of 9 credits. PREREQS: Departmental approval required.
MUS 156. INDOOR DRUM LINE (1-2). A derivative of the Marching Band Drum Line, this ensemble performs and competes around the Pacific Northwest during winter term. Audition required. This course is repeatable for a maximum of 9 credits. PREREQS: Departmental approval required.
MUS 157. SMALL JAZZ ENSEMBLE (1).
Concentration on current jazz styles. Performance each term. This course is repeatable for a maximum of 9 credits. PREREQS: Departmental approval required.
MUS 158. LARGE JAZZ ENSEMBLE (1). Concentration on current jazz styles. Performance each term. This course is repeatable for a maximum of 9 credits. PREREQS: Departmental approval required.

## MUS 160. UNIVERSITY SYMPHONY

ORCHESTRA (1). An ensemble of 65-80 players.
Performance of orchestral repertoire from the eighteenth, nineteenth, and twentieth centuries. Performance each term. (FA) This course is repeatable for a maximum of 9 credits. PREREQS: Departmental approval required.
MUS 163. ACCOMPANYING (1). Piano accompanying and chamber music skills, studio experience and weekly performance class. This course is repeatable for a maximum of 9 credits. PREREQS: Departmental approval required. Must enroll concurrently in MUS 190 or MUS 290.

MUS 164. CHAMBER ENSEMBLE: STRINGS (1). This course is repeatable for a maximum of 9 credits. PREREQS: Departmental approval
required.
MUS 165. CHAMBER ENSEMBLE:
WOODWINDS (1). This course is repeatable for a maximum of 9 credits. PREREQS: Departmental approval required.

MUS 166. CHAMBER ENSEMBLE: BRASS
(1). This course is repeatable for a maximum of 9 credits. PREREQS: Departmental approval required.
MUS 167. CHAMBER ENSEMBLE:
PERCUSSION (1). This course is repeatable for a maximum of 9 credits. PREREQS: Departmental approval required.

MUS 168. CHAMBER ENSEMBLE:
MISCELLANEOUS (1). This course is repeatable for a maximum of 9 credits. PREREQS:
Departmental approval required.
MUS 169. OPERA WORKSHOP (1-2). See
Schedule of Classes for term offered. This
course is repeatable for a maximum of 3 credits. PREREQS: Departmental approval required.
MUS 171. GROUP LESSONS: PIANO I (1).
Part 1 of the first-year group piano sequence. Group instruction in piano skills and basic theory. See Schedule of Classes for section offered. PREREQS: Departmental approval required.
MUS 172. GROUP PIANO II (1). Part 2 of the first-year group piano sequence. A continuation of MUS 171. See Schedule of Classes for section offered. PREREQS: MUS 171 [C-]

MUS 173. GROUP PIANO III (1). Part 3 of the first-year group piano sequence. A continuation of MUS 172. See Schedule of Classes for section offered. PREREQS: MUS 172 [C-]
MUS 177. GROUP LESSONS: PIANO (1). Beginning Piano I, elementary group instruction in piano skills for non-majors. This course is repeatable for a maximum of 2 credits.

MUS 178. GROUP LESSONS: PIANO (1). Beginning Piano II: Continuation of MUS 177, piano for non-majors. This course is repeatable for a maximum of 2 credits. PREREQS: Departmental approval required.
MUS 180. GROUP LESSONS: PIANO (1). (Basic Levels - A, B, C). Elementary group instruction in piano skills and basic theory. This course is repeatable for a maximum of 9 credits. PREREQS: Departmental approval required.
MUS 182. GROUP LESSONS: PIANO (1). (Intermediate Level II). Group instruction in piano skills. (See Schedule of Classes for section offered.) This course is repeatable for a maximum of 9 credits. PREREQS: Departmental approval required.
MUS 183. GROUP LESSONS: PIANO (1).
(Intermediate Level III.) Group instruction in piano skills. See Schedule of Classes for section offered. This course is repeatable for a maximum of 3 credits. PREREQS: Departmental approval required.

MUS 185. VOICE CLASS (1). Students improve and strengthen the voice as a solo instrument. This course is repeatable for a maximum of 9 credits.
MUS 186. GROUP GUITAR (1). Teaches fundamentals of the guitar in a small-group setting. Emphasis on practical use of the instrument. This course is repeatable for a maximum of 9 credits.

MUS 187. GROUP GUITAR II (1). A continuation of MUS 186, MUS 187 focuses on helping students learn higher functionality in techniques and attain greater ability to perform solo or in ensemble. This course is repeatable for a maximum of 9 credits. PREREQS: MUS 186 [D-]
MUS 199. SPECIAL STUDIES (1-3). First-year level. This course is repeatable for a maximum of 18 credits.

MUS 221. LITERATURE AND MATERIALS OF
MUSIC (3). Advanced harmony, techniques of analysis, musical form, composition. Continued study of the repertory of Western music through the mid-twentieth century. PREREQS: MUS 123 or departmental approval required. MUS 221, MUS 222, MUS 223 must be taken in sequence

MUS 222. LITERATURE AND MATERIALS OF MUSIC (3). Advanced harmony, techniques of analysis, musical form, composition. Continued study of the repertory of Western music through the mid-twentieth century. Three lectures weekly. PREREQS: MUS 221 or departmental approval required. MUS 221, MUS 222, MUS 223 must be taken in sequence.
MUS 223. LITERATURE AND MATERIALS OF MUSIC (3). Advanced harmony, techniques of analysis, musical form, composition. Continued study of the repertory of Western music through the mid-twentieth century. Three lectures weekly PREREQS: MUS 222 or departmental approval required. MUS 221, MUS 222, MUS 223 must be taken in sequence.
MUS 234. AURAL SKILLS II (1). Sight-singing; melodic and harmonic dictation. To be taken in sequence. PREREQS: MUS 123 and MUS 136 or departmental approval required.

MUS 235. AURAL SKILLS II (1). Sight-singing; melodic and harmonic dictation. To be taken in sequence. PREREQS: MUS 234 or departmental approval required.
MUS 236. AURAL SKILLS II (1). Sight-singing; melodic and harmonic dictation. To be taken in sequence. PREREQS: MUS 235 or departmental approval required.
MUS 271. GROUP PIANO IV (1). Part of the second-year group piano sequence. Group instruction in piano skills and basic theory. See Schedule of Classes for section offered PREREQS: Departmental approval required.
MUS 272. GROUP PIANO V (1). Part of the second-year group piano sequence. Group instruction in piano skills and basic theory. See Schedule of Classes for section offered PREREQS: MUS 271 [C-]

MUS 273. GROUP PIANO VI (1). Part of the second-year group piano sequence. Group instruction in piano skills and basic theory. See Schedule of Classes for section offered PREREQS: MUS 272 [C-]
MUS 299. SPECIAL STUDIES (1-3). Sophomore level. This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.
MUS 315. INTRODUCTION TO CONDUCTING
(2). Basic terminology, beat patterns, and baton
technique. Introduction to score preparation.
Philosophy and history of conducting are also addressed. PREREQS: MUS 223 and MUS 236 and piano proficiency exam.

MUS 316. CHORAL CONDUCTING (2).
Continuation of MUS 315. Hand gesture
technique, score reading, and score preparation of literature from all major historical periods. Focus upon principles of developing choral excellence. Includes conducting practice with a campus ensemble. To be taken in sequence. PREREQS: MUS 315
MUS 317. CHORAL CONDUCTING (2).
Continuation of MUS 315. Hand gesture
technique, score reading, and score preparation of literature from all major historical periods. Focus upon principles of developing choral excellence. To be taken in sequence. PREREQS: MUS 315

MUS 318. INSTRUMENTAL CONDUCTING
(2). Continuation of MUS 315, including types of instrumental groups, seating arrangements, score preparation, and instrumental transposition and ranges. Advanced baton technique. To be taken in sequence. PREREQS: MUS 315

MUS 319. INSTRUMENTAL CONDUCTING
(2). Continuation of MUS 315, including types of instrumental groups, seating arrangements, score preparation, and instrumental transposition and ranges. Advanced baton technique. To be taken in sequence. PREREQS: MUS 315

MUS 321. LITERATURE AND MATERIALS OF
MUSIC III (3). Twentieth century harmony and counterpoint, including contrapuntal composition Continued study and analysis of repertoire into the 21st century. PREREQS: MUS 223 or departmental approval.
MUS 324. HISTORY OF WESTERN MUSIC
(3). Chronological survey of the Euro-American traditions in music to be taken in sequence PREREQS: MUS 123 [D-] and MUS 223 recommended.
MUS 325. ^HISTORY OF WESTERN MUSIC (3). Traces the development of music history from the early Classic period through the end of the 19th century. Major trends in orchestral, solo, chamber and vocal music are explored through lectures, readings, research, discussion, score studies, and intensive writing assignments. (Writing Intensive Course) PREREQS: MUS 123 [D-] and MUS 223 recommended.
MUS 326. HISTORY OF WESTERN MUSIC
(3). Chronological survey of the Euro-American traditions in music to be taken in sequence. PREREQS: MUS 123 [D-] and MUS 223 recommended.
MUS 330. ALEXANDER TECHNIQUE FOR MUSICIANS (1). A theoretical and practical introduction to the Alexander Technique, a psychophysical reeducation process developed by F.M. Alexander. The course will provide the opportunity for instrumentalists and singers to integrate the Alexander Technique into their practice and performance, enabling more freedom of choice in their approach to music making. This course is repeatable for a maximum of 6 credits. PREREQS: MUS 123 [D-]
MUS 337. JAZZ IMPROVISATION (1-3). Instrumental and vocal improvisation including composition and arranging techniques. This course is repeatable for a maximum of 9 credits. PREREQS: Two years college-level MUS 137 experience or equivalent. Departmental approval required.
MUS 340. OSU CHAMBER CHOIR (1-2). A select ensemble of approximately 40 mixed voices. Performance each term. Annual tours. Students must have two years college-level vocal experience or equivalent. (FA) This course is repeatable for a maximum of 9 credits. PREREQS: Departmental approval required.
MUS 346. WOMEN'S CHOIR (1-2). A women's ensemble designed for vocal development and exploration of treble choral literature. Performances each term. This course is repeatable for a maximum of 9 credits. PREREQS: Students must have two years of college-level choral singing or equivalent.
MUS 347. MEN'S CHOIR (1-2). A men's ensemble designed for vocal development and exploration of TTBB choral literature. Performances each term. This course is repeatable for a maximum of 9 credits. PREREQS: Students must have two years of college-level choral singing or equivalent.
MUS 350. SYMPHONIC BAND (1). A select ensemble of approximately 80 wind and percussion players. Performance winter and spring terms. (FA) This course is repeatable for a maximum of 9 credits. PREREQS: Students must have two years college-level band experience or equivalent.
MUS 351. CONCERT BAND (1). Wind and percussion ensemble of approximately 70 players. Performance each term. Open to all students. This course is repeatable for a maximum of 9 credits. PREREQS: Students must have two years college-level band experience or equivalent.

MUS 352. RHYTHM AND BEAVS PEP BAND (1)
An auditioned group of 12 musicians who perform at university, community, and athletic events throughout the year. This course is repeatable for a maximum of 9 credits. PREREQS: Students must have two years of college-level band experience or equivalent. Departmental approval required.
MUS 353. MARCHING BAND (1-2). A marching and playing unit of more than 160 musicians. Performs for home football games; one trip each year to an off-campus game. This course is repeatable for a maximum of 6 credits. PREREQS: Students must have two years of college-level band experience or equivalent.
MUS 354. BASKETBALL BAND (1). An ensemble of approximately 50 players. Performs for home games. Students must have two years collegelevel experience. This course is repeatable for a maximum of 3 credits. PREREQS: Students must have two years of college-level band experience or equivalent.
MUS 355. COLOR GUARD (1). A derivative of the Marching Band Color Guard, this ensemble performs and completes around the Pacific Northwest during winter term. Audition required. This course is repeatable for a maximum of 3 credits. PREREQS: Students must have two years of college-level color guard experience or equivalent. Departmental approval required.
MUS 356. INDOOR DRUM LINE (1-2). A derivative of the Marching Band Drum Line, this ensemble performs and competes around the Pacific Northwest during winter term. Audition required. This course is repeatable for a maximum of 3 credits. PREREQS: Departmental approval required.
MUS 357. SMALL JAZZ ENSEMBLE (1).
Concentration on current jazz styles. Performance each term. This course is repeatable for a maximum of 9 credits. PREREQS: Students must have two years college-level jazz band experience or equivalent. Departmental approval required.
MUS 358. LARGE JAZZ ENSEMBLE (1). Concentration on current jazz styles. Performance each term. This course is repeatable for a maximum of 9 credits. PREREQS: Students must have two years college-level jazz band experience or equivalent. Departmental approval required.

## MUS 360. UNIVERSITY SYMPHONY

ORCHESTRA (1). An ensemble of 65-80 players. Performance of orchestral repertoire from the 18th, 19th, and 20th centuries. Performance each term. (FA) This course is repeatable for a maximum of 9 credits. PREREQS: Students must have two years college-level orchestra experience or equivalent. Departmental approval required.
MUS 363. ACCOMPANYING (1). Piano accompanying and chamber music skills, studio experience, and weekly performance class. This course is repeatable for a maximum of 9 credits. PREREQS: Students must have two years college-level ensemble or equivalent. Departmental approval required. Students must simultaneously take MUS 390 or MUS 490.

## MUS 364. CHAMBER ENSEMBLE: STRINGS

 (1). This course is repeatable for a maximum of 9 credits. PREREQS: Students must have two years college-level ensemble experience or equivalent. Departmental approval required.MUS 365. CHAMBER ENSEMBLE:
WOODWINDS (1). This course is repeatable for a maximum of 9 credits. PREREQS: Students must have two years college-level ensemble experience or equivalent. Departmental approval required.

MUS 366. CHAMBER ENSEMBLE: BRASS (1). This course is repeatable for a maximum of 9 credits. PREREQS: Students must have two years college-level ensemble experience or equivalent. Departmental approval required.
MUS 367. CHAMBER ENSEMBLE:
PERCUSSION (1). This course is repeatable for a
maximum of 9 credits. PREREQS: Students must have two years college-level ensemble experience or equivalent. Departmental approval required.

## MUS 368. CHAMBER ENSEMBLE:

MISCELLANEOUS (1). This course is repeatable for a maximum of 9 credits. PREREQS: Students must have two years college-level ensemble experience or equivalent. Departmental approval required.

MUS 369. OPERA WORKSHOP (1-2). See
Schedule of Classes for term offered. This course is repeatable for a maximum of 3 credits. PREREQS: Students must have two years college-level vocal performance experience or equivalent. Departmental approval required.

MUS 371. GROUP PIANO VII (1). Part of the thirdyear group piano sequence. Group instruction in piano skills and basic theory. See Schedule of Classes for section offered. PREREQS: Departmental approval required.
MUS 372. GROUP PIANO VIII (1). Part of the third-year group piano sequence. Group instruction in piano skills and basic theory. See Schedule of Classes for section offered PREREQS: MUS 371 [C-]
MUS 373. GROUP PIANO IX (1). Part of the thirdyear group piano sequence. Group instruction in piano skills and basic theory. See Schedule of Classes for section offered. PREREQS: MUS 372 [C-]
MUS 375. INTRODUCTION TO PIANO
TUNING (3). Provides an introduction to the science of piano tuning and general piano maintenance. Students will acquire knowledge of the construction of the modern piano and its predecessors. They will learn about the temperaments and the science of tuning. Finally, through supervised instruction and practice, students will learn the skill of how to tune a modern piano. This course is repeatable for a maximum of 6 credits. PREREQS: Departmental approval required.

MUS 378. MUSICAL WELLNESS FOR PIANISTS
(3). Pianists are offered a body of knowledge that enables them to cultivate mindful, healthful learning and performance processes for themselves and their students. Special focus is given to dealing with fatigue, physical limitations, and injuries. This course is repeatable for a maximum of 6 credits. PREREQS: Departmental approval required.
MUS 399. SPECIAL STUDIES (1-3). Junior level. This course is repeatable for a maximum of 18 credits.
MUS 401. RESEARCH AND SCHOLARSHIP
(1-6). This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.

MUS 402. INDEPENDENT STUDY (1-6). This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.
MUS 403. THESIS (1-6). This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.
MUS 405. READING AND CONFERENCE (1-
6). This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.

MUS 406. PROJECTS (1-6). This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.
MUS 407. SEMINAR (1-6). This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.
MUS 408. WORKSHOP (1-6). This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.
MUS 409. PIANO PEDAGOGY PRACTICUM (2). A practical application course offering experiential
earning and supervised teaching experiences to piano pedagogy students. Serves as a practicum co-requisite for the final two terms of Piano Pedagogy (MUS 446 and MUS 447). This course is repeatable for a maximum of 8 credits. PREREQS: Departmental approval required. COREQS: MUS 446, MUS 447

MUS 410. INTERNSHIP (3). Provides experience in field settings, opportunity to develop personal and professional skills. See school for details. This course is repeatable for a maximum of 12 credits. PREREQS: School approval required.
MUS 442. GENRE STUDIES (3). Intensive study of selected genres, such as orchestra, chamber music, keyboard literature, vocal literature, music theatre and opera. See Schedule of Classes for topic. This course is repeatable for a maximum of 18 credits.
MUS 443. THEORY AND COMPOSITION
STUDIES (3). Intensive study of selected subjects, such as analysis, composition, choral arranging, band arranging, and orchestration. See Schedule of Classes for topic. This course is repeatable for a maximum of 18 credits. PREREQS: MUS 223

## MUS 444. FOUNDATIONS OF PIANO

PEDAGOGY (3). Introduction to foundationa principles of piano instruction and addresses topics surrounding methodology, materials, and the techniques of teaching piano. This course is repeatable for a maximum of 6 credits.

## MUS 445. PIANO PEDAGOGY I: BEGINNING

 AND ELEMENTARY STUDENTS (3). Introduces basic foundational ideas of piano instruction at the beginning and elementary levels. Students will engage with topics surrounding methodology, materials, and the techniques of teaching piano to the beginning and elementary student. PREREQS: Departmental approval required.MUS 446. PIANO PEDAGOGY II (3). The second in a three-term sequence. The course reinforces foundational ideas and skills learned in Pedagogy I , and continues on to address methodology, materials, and techniques surrounding group piano teaching, teaching preschoolers, and teaching adults. Students will engage in supervised teaching experiences in class as well as in a corresponding lab practicum course which should be taken in conjunction with Pedagogy II. Students must also register for MUS 409. PREREQS: MUS 445 [D-] and /or departmental approval. COREQS: MUS 409
MUS 447. PIANO PEDAGOGY III (3). The third in a three-term sequence. The course reinforces foundational ideas learned in Pedagogy I and Pedagogy II, and continues with emphasis on special topics and projects preparing students for a professional career as independent piano teachers. Students must also register for MUS 409. PREREQS: MUS 446 [D-] and /or departmental approval. COREQS: MUS 409

## MUS 451. INTRODUCTION TO ARTS

ENTREPRENEURSHIP (3). Survey of the business strategies behind a successful career in the arts. Emphasizes the importance of entrepreneurial thinking, engages students with the fundamentals of the arts "business", and explores ways to influence and shape the industry's future. (FA) CROSSLISTED as ART 451, TA 451. PREREQS: Junior standing and above. For majors.

MUS 472. ITALIAN AND LATIN DICTION FOR
SINGERS (2). Presents the principles of lyric diction in Italian and liturgical Latin and provides practice in the skills needed to sing the languages accurately and expressively.
MUS 473. GERMAN DICTION FOR SINGERS (2). Presents the principles of German lyric diction and provides practice in the skills needed to sing the language accurately and expressively.

MUS 474. FRENCH DICTION FOR SINGERS (2). Presents the principles of French lyric diction and provides practice in the skills needed to sing the
language accurately and expressively.

## MUS 481. PIANO LITERATURE I: 18TH

THROUGH EARLY 19TH CENTURIES (3).
Examines the evolution of piano literature from the Baroque period through the early 19th Century. Examines individual styles and composers' works in the context of the surrounding cultural and social history, beginning with the birth of the piano and continuing with the piano's growing popularity in Western European society. An emphasis will be placed on listening experience and the aural identification of landmark piano works. Students to gain familiarity with a rich body of piano repertoire in the historical and social context in which it was composed. PREREQS: Departmental approval required.
MUS 482. PIANO LITERATURE II: 19TH
AND 20TH CENTURIES (3). Examines the evolution of piano literature in the 19th and 20th centuries. Students will learn about individual styles and composers' works in the context of the surrounding cultural and social history of the piano. An emphasis will be placed on listening experience and the aural identification of landmark piano works. The overall objective of the course is for students to gain familiarity with a rich body of piano repertoire in the historical and social context in which it was composed. PREREQS: Departmental approval required.

## MUS 485. PIANO LITERATURE III:

REPERTOIRE FOR TEACHING THE PIANO
(3). This specialized area of Piano Pedagogy includes repertoire for piano students of varying levels, analytical skills for evaluating repertoire for students, and repertoire requirements for national and international piano teaching organizations. PREREQS: Departmental approval required.

MUS 493. BASIC RECORDING TECHNIQUES
(3). The first of a three-term sequence on analog and digital recording and editing techniques. The first term deals with issues such as signal processing, microphone design and placement, and an introduction to Digidesign Pro-Tools. This course is repeatable for a maximum of 9 credits. PREREQS: MUS 123 and instructor's approval required.
MUS 494. INTERMEDIATE RECORDING TECHNIQUES (3). The second of a three-term sequence on analog and digital recording and editing techniques. The second term deals with multi-track recording, MIDI interfacing and recording, advanced microphone placement, intermediate Pro-tools, and an introduction to E-magic Logic. PREREQS: MUS 493 and instructor's approval required.

MUS 495. ADVANCED RECORDING TECHNIQUES (3). The third of a three-part sequence on analog and digital recording and editing techniques. The third term deals with advanced multi-track recording, sampling MIDI interfacing and recording, mixing and mastering using Waveburner, advanced Pro-Tools, advanced use of E-magic Logic recording and editing and portable ADAT recording and editing. PREREQS: MUS 494 and instructor approval required.
MUS 496. SURROUND SOUND RECORDING AND MASTERING (2). Survey of the concepts, equipment, and standard procedures used in surround sound audio and audio-for-video, including basic equipment and software configuration, surround recording and editing techniques, advanced automation using Pro Tools, and layback/sync to video. PREREQS: MUS 495 [D-] and /or instructor approval.

MUS 499. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.
MUS 501. RESEARCH AND SCHOLARSHIP (1-6). This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.
MUS 502. INDEPENDENT STUDY (1-6). This course is repeatable for a maximum of 18 credits.

PREREQS: Departmental approval required.
MUS 503. THESIS (1-6). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.

MUS 505. READING AND CONFERENCE (1-
6). This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.
MUS 506. PROJECTS (1-6). This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.
MUS 507. SEMINAR (1-6). This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.

MUS 508. WORKSHOP (1-6). This course is repeatable for a maximum of 18 credits. PREREQS: Departmental approval required.
MUS 510. INTERNSHIP (3). Provides experience in field settings, opportunity to develop personal and professional skills. See school for details. This course is repeatable for a maximum of 12 credits. PREREQS: School approval required.

MUS 516. ADVANCED CONDUCTING: CHORAL (3). Baton technique, interpretation and the study of major choral scores. PREREQS: MUS 317

MUS 517. ADVANCED CONDUCTING: CHORAL (3). Baton technique, interpretation and the study of major choral scores. PREREQS: MUS 317

## MUS 518. ADVANCED CONDUCTING:

INSTRUMENTAL (3). Baton technique, interpretation and the study of major instrumental scores. PREREQS: MUS 319

MUS 519. ADVANCED CONDUCTING:
INSTRUMENTAL (3). Baton technique, interpretation and the study of major instrumental scores. PREREQS: MUS 319
MUS 540. OSU CHAMBER CHOIR (1-2). A select ensemble of approximately 40 mixed voices. Performance each term. Annual tours. 500 -level credit available only to students who can demonstrate proficiency and experience to perform at the graduate level. This will be evaluated by the instructor through audition. This course is repeatable for a maximum of 6 credits.
MUS 543. THEORY AND COMPOSITION STUDIES (3). Intensive study of selected subjects, such as analysis, composition, choral arranging, band arranging, and orchestration. See Schedule of Classes for topic. This course is repeatable for a maximum of 18 credits. PREREQS: MUS 223
MUS 546. WOMEN'S CHOIR (1-2). A women's ensemble designed for vocal development and exploration of treble choral literature. Performances each term. This course is repeatable for a maximum of 9 credits. PREREQS: Students must be in a graduate-level program of study.
MUS 547. MEN'S CHOIR (1-2). A men's ensemble designed for vocal development and exploration of TTBB choral literature. Performances each term. This course is repeatable for a maximum of 9 credits. PREREQS: Students must be in a graduate-level program of study.
MUS 550. SYMPHONIC BAND (1). A select ensemble of approximately 80 wind and percussion players. Performance winter and spring terms. 500-level credit available only to students who can demonstrate proficiency and experience sufficient to perform at the graduate level. This will be evaluated by the instructor by audition. This course is repeatable for a maximum of 6 credits.
MUS 560. UNIVERSITY SYMPHONY
ORCHESTRA (1). An ensemble of 65-80 players. Performance of orchestral repertoire from the 18th, 19th, and 20th centuries. Performance each term. 500 -level credit available only to students who can demonstrate proficiency and experience to perform at the graduate level. This will be evaluated by the instructor through audition. This
course is repeatable for a maximum of 6 credits.
MUS 563. ACCOMPANYING (1). Piano
accompanying and chamber music skills, studio experience and weekly performance class. 500-level credit available only to students who can demonstrate proficiency and experience sufficient to perform at the graduate level. This will be evaluated by the instructor by audition. This course is repeatable for a maximum of 6 credits PREREQS: Should take MUP 590 concurrently.
MUS 572. ITALIAN AND LATIN DICTION FOR SINGERS (2). Presents the principles of lyric diction in Italian and liturgical Latin and provides practice in the skills needed to sing the languages accurately and expressively.
MUS 573. GERMAN DICTION FOR SINGERS
(2). Presents the principles of German lyric diction and provides practice in the skills needed to sing the language accurately and expressively.
MUS 599. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 6 credits. PREREQS: Departmental approval required.

## ■ NEW MEDIA <br> COMIMUNICATIONS COURSES

NMC 100. *NEW MEDIA AND CULTURE (3).
Provides students with the basic critical skills to analyze the cultural, social, and political impact of new media technologies, new media texts, and new media institutions. Students will be exposed to a variety of social scientific and humanistic conceptual approaches to analyzing new media and culture. Special emphasis will be placed on historical analyses of how new media have shaped culture, as well as how culture has shaped new media. (Bacc Core Course)
NMC 101. INTRODUCTION TO NEW MEDIA COMMUNICATIONS (3). Principles of new media communications. Perspectives on the communications media. How the communications media operate and how they interact with society.

## NMC 183. INTRODUCTION TO MEDIA

PRODUCTION (3). Provides core competency in media production: an introduction to audio and video production, and the elements of the media production and post-production processes.

NMC 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

NMC 240. SURVEY OF SOCIAL MEDIA (3). Social media are curiously positioned as being both emergent media and convergent media--they function because of the coalescence of existing media forms and the creation of new ones. This class will use multiple perspectives to explore the past, present, and future of social media. PREREQS: NMC 101 [C-]

NMC 255. INTRODUCTION TO SOUND DESIGN
(3). The principals and practices of sound design for motion pictures, television and radio. Through reading, viewing, listening and discussion, students will learn the art and science of sound design. Topics include the soundtrack and film narrative--basic terms and concepts; narrative, psychological and emotive functions of sound design; components of the soundtrack--dialogue, music and sound effects; sound design process-recording, editing, mixing and exhibition.

NMC 260. NEW MEDIA FUTURES (3). Historical context and current perspectives on the various aspects of new multimedia communications, including linear and nonlinear or time-based and interactive media. Primary topics include digital cinema (compositing and nonlinear access), visual music, information visualization, interactive narrative, and virtual space. PREREQS: NMC 101 [C-]
NMC 279. MEDIA LITERACY (3). From the days of cave paintings to our current digital world, we have told stories and created mythologies that guided our collective, daily actions. Using a critical approach, we will analyze various different media
to shed light on the underlying structure that shapes our understandings of gender, ethnicity, the self, and our everyday practices as citizens and media consumers.

NMC 280. GLOBAL MEDIA (3). Explores theoretical and practical concepts of global media. Both historical and contemporary perspectives on the topic are addressed, particularly as they relate to cultural autonomy, political rights, social justice, communication flow debates, media systems of different world regions, global representations in U.S. media, and developments in global technology and economic media developments.

NMC 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

NMC 301. ${ }^{\wedge}$ WRITING FOR THE MEDIA
PROFESSIONAL (3). Fundamentals of gathering information, evaluating information, writing information of the media and editing media content in written form. (Writing Intensive Course) PREREQS: NMC 101
NMC 302. REPORTING (3). An introduction to the practices, procedures, techniques, and organizational structures of basic news gathering and writing. PREREQS: WR 201
NMC 305. COPYEDITING (3). Copyreading, headline writing, newspaper layout and design.
NMC 306. ART AND CULTURE CONTENT CREATION (3). Explores various forms of the arts and culture using criticism/reviewing/feature writing's forms, principles and ethics. Encourages students to be artful in response, given certain time and space boundaries, but also to discuss pushing the boundaries, exploding those boundaries and doing excellent, artful creation in response to the arts that affect our lives.

## NMC 311. INTRODUCTION TO NONPROFIT

 MANAGEMENT (3). Introduction to the principles of effective nonprofit management and lays a foundation for future leaders and managers in the nonprofit sector. Focuses on historical perspectives, ethics, governance and leadership, legal structure and standards, financial management, strategic planning principles, fundraising principles, volunteer management, marketing and communications, and the future of the nonprofit sector.
## NMC 320. HISTORY OF

TELECOMMUNICATIONS (3). A historica overview of the telecommunications industry. The goal is to understand how the industry got where it is today and, by analyzing principles, events, and trends, suggest what directions it may take in the future. The emphasis is on constructing a causal chronology, interrelating developments in technology, organization, and structure of the industry. This course will focus on the technological developments in the industry. PREREQS: NMC 101 [C-] and NMC 260 [C-] and WR II completed with a passing grade.

NMC 321. HISTORY OF BROADCASTING (3). The technological, economic and corporate, legal and political, artistic, and social developments that shaped American broadcasting in the 20th century are examined. Implications for the future of broadcasting are addressed as well. PREREQS: NMC 260 [C-] and WR II completed with a passing grade.

NMC 322. LANDMARKS IN MEDIA CONTENT (3). Introduces students to media content that represents advances in the art and science of creative use of media technology. Some of these advances were recognized immediately, some only after time had passed. PREREQS: NMC 101 [C-] and NMC 260 [C-] and WR II completed with a passing grade.

## NMC 330. THE MEANING OF VIDEO GAMES

(3). Examines approaches to understanding the experience of playing video games, including the role of storytelling in diverse games, the relationship between the player and the game, the game as art, and intersections between games
and real life. PREREQS: NMC 301 [C-] and NMC 101

NMC 340. SOCIAL MEDIA STRATEGY (3).
Designing systems of interaction is important for understanding how people come to be a part of social networks. Students will participate in a series of simulation games that will explore the dimensions of the interaction between publics and social networks, culminating in an original research project. PREREQS: NMC 240 [C-] and NMC 260 [C-] and completion of NMC 301 recommended.
NMC 349. VIDEO ART (4). Studio course in video art and time-based media projects. Emphasis on experimental approaches to video art in a contemporary art context, linear and nonlinear video production and the projection and screening of video art projects. Introduction to the history of video art as an art form. Lec/studio. CROSSLISTED as ART 349. This course is repeatable for a maximum of 8 credits. PREREQS: ART 122 [C-] and ART 263 [C-]
NMC 351. NEW MEDIA VISUALIZATION (3). Principles of visual composition, sequential imagery, interactive design, narrative structure, and cinematic language as they relate to new media communications. PREREQS: NMC 101

NMC 355. APPLIED SOUND DESIGN (3). In this hands-on course, students will apply their conceptual knowledge of sound design principles to create soundtracks for radio, TV and film projects. Students will learn how to record, edit, and mix dialogue, sound effects and music using the industry standard software, Pro Tools. Class projects will include producing a radio spot, TV commercial, short film scene and movie trailer. This course will prepare students to take the Avid Pro Tools certification exam. PREREQS: NMC 255 [C-] and NMC 101

NMC 380. PRE-PRODUCTION (3). Focuses on pre-production or the planning phase of multimedia production, which includes concept development, scriptwriting, storyboarding, budgeting, and talent/location scouting. Class projects emphasize brainstorming, story concept/ structure, conceptual art, storyboards, animatics, and interactive design. Class examines narrative structure and the languages of graphic design, cinema, and interactive story. Lec/studio. PREREQS: NMC 101

NMC 382. STUDIO AND MULTICAMERA PRODUCTION (4). Proficiency in organizing, producing, directing, and evaluating television programs using multicamera studio techniques, including graphics, set design, audio for television and digital video production, and lighting. Emphasis on bringing ideas from conception to realization in a studio setting. Lec/lab. PREREQS: NMC 101
NMC 383. FIELD PRODUCTION (4). Development of the technical abilities and conceptual approaches to audio, film, video and multimedia production. Emphasis on singlecamera production techniques and concepts. Students will begin the study of post-production process. Students will also begin to study lighting and audio as they relate to single-camera field production. PREREQS: NMC 380 [C-] and NMC 351

NMC 388. SOCIAL MEDIA AND INTERPERSONAL RELATIONSHIPS (3).
Examines how individuals build and maintain close relationships through new media and social networks. Currently, scholars are seeing a shift in how individuals self-report building close relationships, as people use elements of new media more and more frequently. This course is designed to look into the similarities and differences of these relationships as compared to face-to-face relationships. CROSSLISTED as COMM 388.

NMC 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

NMC 401. RESEARCH AND SCHOLARSHIP
(1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
NMC 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits PREREQS: Departmental approval required.
NMC 403. THESIS/DISSERTATION (1-16). This course is repeatable for a maximum of 16 credits PREREQS: Departmental approval required.
NMC 404. WRITING AND CONFERENCE (1-
16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

## NMC 405. READING AND CONFERENCE (1-

16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
NMC 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required

NMC 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
NMC 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required
NMC 409. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
NMC 410. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Students must have completed 15 credits with the NMC prefix to be eligible for an NMC internship. Departmental approval required.
NMC 418. VIRAL CONTENT (3). Online media is often filled with memes, likes, shares, tweets and even hilarious cat videos. Companies like Buzzfeed exist to create, maintain and drive traffic to content. In 2015, collectively the top 10 YouTube content creators made 70.5 million dollars. So, what's the secret to going viral? This class is designed to look at this question by examining the culture of viral content, the social and psychological influences that shape online behavior and the business of creating and spreading viral content. Throughout the term, students will apply these principle concepts in an attempt to make their own viral content.

NMC 419. REEFER MADNESS IN THE MEDIA (3). Critically examines the history of hemp and marijuana prohibition, issues of propaganda and the media's role during the transition between prohibition and the current state of reform. The purpose of this course is to better understand the role media plays in shaping our political, cultural and personal experiences. For students, this knowledge is invaluable for analysis, evaluation and critical thinking skills. The framework of this class is based on four modules: "History of Marijuana Prohibition", "Marijuana, Media and Culture", "Medicinal Marijuana Movement" and "Legalizing Marijuana Campaigns".
NMC 421. DIFFUSION OF INNOVATIONS (3). An introduction to old and emerging theories that explain the spread of innovative ideas and technologies among members of a society, emphasizing the role of communication processes and the special problems for diffusion in communication technology. PREREQS: NMC 301 [C-] and NMC 101
NMC 425. LATINOS IN THE MEDIA (3).
Examines the sociohistorical context for the underrepresention of Latinos in mainstream media, the narrow roles and issues ascribed to Latinos and the ways in which media moguls attempt to attract Latino consumers. Focus on Latino filmakers, actors, and writers as they rewrite traditional scripts to create a vibrant, multifaceted picture of Latinos in the U.S. today. PREREQS: NMC 101 [D-]

NMC 427. *DIGITAL PORNOGRAPHY (3).
Exploration of the prominent role pornography plays in digital communication innovation globally including the examination of social consequences; diffusion of technology, business models and economic impact; legal, ethical, and moral issues; and community health and well-being. (Bacc Core Course) PREREQS: Junior or senior standing. This requirement is to ensure all students are over the age of 18 and are able to synthesize complex social and technological concepts and trends appropriate for an STS course.

NMC 430. MEDIA THEORY (3). Specifies the concepts, hypotheses, and theoretical paradigms that have characterized the study of media since the early 20th century. The evolution of theory as new media has changed the media economy is emphasized, as well as the need for new concepts to describe phenomena unique to the Internet era (concepts such as PREREQS: NMC 301 [C-] and NMC 101
NMC 433. NEW MEDIA STORY TELLING (3). Students will study and develop storytelling methods using new media communications technology. Storytelling will focus on telling stories using non-linear, interactive, multidimensional, multi-sensory, multimedia techniques. PREREQS: NMC 101
NMC 435. MEDIA EFFECTS (3). Reviews the potential for media technology and media content to influence the beliefs and behaviors of individuals. The media's ability to bring about specific changes in people's attitudes, values, political agendas, purchasing habits, and jury decisions are discussed. The impact of new media's interactive technology and content on people's beliefs and behaviors is emphasized. PREREQS: NMC 301 [C-]
NMC 437. NEW MEDIA AND SOCIETY (3). Traces the impact of new media--from the telegraph to the Internet--on American society. Emphasizes the way that existing social institutions (e.g., schools and churches) and opinion leaders (e.g., presidents and scholars) greeted the arrival of new media with an increasingly predictable mixture of fear and euphoria. Social changes such as the westward expansion of the U.S. in the 19th century, the arrival of immigrants in the late 19th and early 20th centuries, and the rise of youth culture in the mid-20th century are discussed in terms of their connection to developments in the technology and structure of media. The integration of Internetbased services into contemporary American society is the focus of one-half of the course. PREREQS: NMC 301 [C-] and NMC 101
NMC 440. MEDIA MANAGEMENT (3). Principles of management and their application to new media. The practice of new media management including personnel, programming, sales and promotions. Students will gain an understanding of the business side of the media industries. Students will also develop the analytical methods and problem solving techniques used in the management decision-making process as they relate to the mass media. Students will study the media of radio, broadcast television, cable television, DBS, MMDS, SMATV, satellite, telephony, Internet, film, the recording industry, advertising and public relations, as well as emerging media businesses. PREREQS: NMC 301 [C-]

## NMC 441. MEDIA ENTREPRENEURSHIP

(3). Studies the entrepreneurial process as it relates uniquely to the arts and sciences of new media. Students will study the basic entrepreneurial processes of law, finance, accounting, organizational structure, budgeting, business plans, market analyses, taxes, licensing, and insurance as they relate to new media enterprises. Students will also study the sales/ revenue generation side of new media ventures. PREREQS: NMC 301 [C-]

NMC 470. MEDIA LAW (3). The relevant laws and regulations that govern the mass media; the participants in the law making process; he analytical methods and problem solving techniques used in the law making process; the laws and policies affecting journalists. Issues such as libel, privacy, obscenity, indecency, fair trail/ free press and copyright are covered. PREREQS: NMC 301 [C-]
NMC 471. TELECOMMUNICATIONS POLICY
(3). Covers past and present telecommunications policy. Examines the agencies that govern the telecommunications industry, including the Federal Communications Commission. Studies the differences and similarities between the regulations associated with public and private telecommunications systems and services. Students will gain knowledge of telecommunications industry ownership regulations, including antitrust regulation of the telecommunications industry. PREREQS: NMC 301 [C-]
NMC 481. POST PRODUCTION (4). Advanced film and video production with emphasis on techniques, equipment, and theories involved in editing film and video. Emphasis on the use of computer-based nonlinear editing systems. Students will also study the use of special effects in visual production. PREREQS: NMC 383 [C-] and NMC 101 and NMC 351 and NMC 380

NMC 482. DOCUMENTARY (4). Theory and production of the documentary genre. The class covers all stages of producing a documentary film from the idea through development, marketing, planning, shooting, editing, and post-production. Lec/lab. PREREQS: NMC 383 [C-] and NMC 351 and NMC 380

NMC 483. NEW MEDIA 3-D (4). Hands-on introduction to the world of 3-D computer modeling and animation, including investigations of light, texture, form, spatial design and motion. Course includes discussions of professional and artistic practice and critique of student and professional work. Lec/lab.

NMC 484. NEW MEDIA ANIMATION (4). An in-depth theoretical and hands-on investigation of advanced animation tools and techniques used for educational, scientific, entertainment, and expressive communication projects. Tools and techniques covered include motion capture (full body, face, hand), automated lip-sync dialogue processing, dynamic simulation, particle motion, and other simulation or performancebased animation approaches. Students will work individually and in teams to explore the communicative and creative possibilities of the described technologies. PREREQS: NMC 101

NMC 487. VIRTUAL MEDIA (4). Explores the topics of interactivity in virtual space from conceptual, historical, theoretical, and practical perspectives. The course will compare and contrast real world physical space with virtual space in an attempt to create a virtual world designed with an audience in mind. Color, light, form, motion, and sound will all be examined and applied throughout this course. Lec/lab. PREREQS: NMC 101 [C] and NMC 483* [C]

NMC 490. MEDIA ETHICS (3). Exploration of the ethical issues surrounding new media communications. Topics include professionalism in journalism, new media visual production, new media management, advertising, film, and public relations. Topics also include new media's relationship with society, violence in the media, and sex in the media. PREREQS: NMC 301 [C-] and NMC 101

NMC 498. ADVANCED COLLABORATIVE EXPERIENCE (3-4). Senior-level course designed to integrate the skills and knowledge obtained through NMC course work into a group research, group project, and/or group production that will be useful to students for their professional portfolio or serve as the basis for academic publication. Topic changes per term. This course is repeatable
for a maximum of 4 credits. PREREQS: NMC 101 [C-] and NMC 301 [C-] and senior standing and departmental approval prior to term course offered. Taken within last three senior terms.
NMC 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## ■ THEATRE ARTS COURSES

TA 121. ORAL INTERPRETATION I (3). Analysis and presentation of literature. Exploration of emotional reactions, expressive vocal and physical responses, and performing techniques for effective communication. (FA)
TA 144. PLAYREADING (1). Reading/discussion/ examination of plays from world theatre of past and present from the perspective of production and theatre history. This course is repeatable for a maximum of 2 credits.
TA 147. *INTRODUCTION TO THE THEATRE (3). Origins, history, nature, elements, and style of theatre production; function of artists and craftspersons of the theatre. (FA) (Bacc Core Course)

TA 147H. *INTRODUCTION TO THE THEATRE
(3). Origins, history, nature, elements, and style of theatre production; function of artists and craftspersons of the theatre. (FA) (Bacc Core Course) PREREQS: Honors College approval required.

TA 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

TA 242. VISUAL PRINCIPLES OF THEATRE (3). An introduction to visual creativity, creative thinking, and visual problem solving as applied to theatre arts as a whole, and to scene and costume design. (FA)
TA 243. PRINCIPLES OF COSTUMING FOR THE STAGE (3). Principles and techniques of costume construction; practical application in the costume shop on theatre production. PREREQS: TA 147 and TA 242
TA 244. SCENE CRAFTS (3). Constructing scenery and stage properties; practical experience in backstage procedures and scene painting. Lec/ lab. (FA)
TA 245. STAGE LIGHTING (3). Fundamentals of electricity as used in stage lighting; color and light, lighting instruments and control systems, theory and practice of lighting stage production. PREREQS: TA 244
TA 247. STAGE MAKEUP (3). Basic principles and theory with laboratory experience in most-used applications of theatrical makeup. PREREQS: Preference given to TA majors.
TA 248. FUNDAMENTALS OF ACTING I (3). Examination of basic principles and techniques of acting. Exploration of relaxation/focus, personal vocal/physical awareness, the actor's craft, and the performance process. (FA) PREREQS: TA 147 or instructor approval required.
TA 249. FUNDAMENTALS OF ACTING II (3).
Continued work in the basic principles and techniques of acting. Emphasis on improvisation, character analysis, and creation, the balance between truth and technique. PREREQS: TA 248 [D-] and TA 248 or instructor approval required.
TA 250. WORKSHOP: THEATRE ARTS (1-3). Practical experience in performance, technical theatre, or design. Maximum for 6 credits may be applied toward graduation. This course is repeatable for a maximum of 6 credits. PREREQS: Departmental approval required.
TA 250H. WORKSHOP: THEATRE ARTS (1-3). Practical experience in performance, technical theatre, or design. Maximum for 6 credits may be applied toward graduation. This course is repeatable for a maximum of 6 credits. PREREQS: Departmental approval required and Honors College approval required.

TA 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

TA 330. *HISTORY OF THE THEATRE (3). The rise and development of the composite arts of the theatre in their cultural and social context. Origins to 1500. Offered alternate years. (H) (Bacc Core Course)
TA 331. *HISTORY OF THE THEATRE (3). The rise and development of the composite arts of the theatre in their cultural and social context. 1500 to 1870. Offered alternate years. (H) (Bacc Core Course) PREREQS: TA 144 and TA 147 are recommended.
TA 332. *^HISTORY OF THE THEATRE (3). The rise and development of the composite arts of the theatre in their cultural and social context. 1870 to present. Offered alternate years. (H) (Bacc Core Course) (Writing Intensive Course) PREREQS: TA 144 and TA 147 are recommended.
TA 344. PLAYSCRIPT ANALYSIS (3). Study of major approaches to playscript analysis and detailed application of these systems to the theatrical production process. (H) PREREQS: TA 147 [D-] and TA 144

TA 346. SCENE AND STAGE DESIGN (3). Designs for stage productions including elements of color, mass, line, and lighting for various types of theatre architecture and plays. Offered alternate years. PREREQS: TA 147 and TA 244
TA 348. ADVANCED ACTING: REALISM (3).
Discussion, research, rehearsal, performance, and criticism of scenes from realistic drama. Emphasis on the craft of acting, emotional availability/ honesty, personal awareness. Offered alternate years. PREREQS: TA 248 [D-] and instructor approval required.
TA 349. ADVANCED ACTING: STYLES (3). Discussion, research, rehearsal, performance, and criticism of scenes from a range of period and genre styles. Offered alternate years. PREREQS: TA 248 [D-] and instructor approval required.
TA 350. WORKSHOP: THEATRE ARTS (1-3). Advanced work in acting, directing or technical theatre in dramatic productions; laboratory experience. Maximum of 6 credits may be applied toward graduation. This course is repeatable for a maximum of 6 credits. PREREQS: Departmental approval required.
TA 351. PRINCIPLES OF PLAYWRITING (3). Basic principles and techniques of playwriting. Offered alternate years. PREREQS: TA 144 and TA 344

TA 352. PLAYWRITING WORKSHOP (3).
Intensive work on student playscripts generated in TA 351, through re-writes, revision and rehearsals. Offered alternate years. PREREQS: TA 351
TA 354. FUNDS PLAY DIRECTION (3). History, theories and techniques of stage direction. Script analysis, study of the audience, staging, working with actors and designers, the production process Emphasis on practical exploration and application. Offered alternate years. PREREQS: TA 244 and TA 248 and instructor approval required.
TA 360. *MULTICULTURAL AMERICAN THEATRE (3). Examines the rich panorama of multicultural-American theatre (e.g., AfricanAmerican, gay and lesbian, Hispanic, Asian American). (H) (Bacc Core Course)

TA 360H. *MULTICULTURAL AMERICAN THEATRE (3). Examines the rich panorama of multicultural-American theatre (e.g., AfricanAmerican, gay and lesbian, Hispanic, Asian American). (H) (Bacc Core Course) PREREQS: Honors College approval required.

TA 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

TA 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

TA 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
TA 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
TA 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

TA 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

TA 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

TA 407H. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
TA 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
TA 410. THEATRE ARTS INTERNSHIP (1-16). One- to three-term residency in a producing theatre, for a maximum allowable total of 15 credits. Student works in a department of the theatre and in related production activities, according to areas of interest or specialization. Work supervised and evaluated by agency staff; academic evaluation by supervising department faculty member(s). Available to upper-division theatre arts majors and graduate students approved by faculty and selected by intern agency. This course is repeatable for a maximum of 15 credits. PREREQS: 27 credits of theatre arts, with a minimum of 6 credits in area of skill specialization, or 12 credits of upper-division theatre arts courses, with a minimum of 6 credits in area of skill specialization. Must be arranged with instructor prior to registration. Departmental approval required.

TA 416. TOPICS IN THEATRE ARTS (3). Lectures and explorations of theories, issues, methods, problems, and applications in theatre arts. Concentrated work in a variety of selected theatre topics. Offered as demand and staffing allow. This course is repeatable for a maximum of 12 credits. PREREQS: 9 credits of theatre arts or instructor's approval required.
TA 443. COSTUME DESIGN (3). Theory and practice of designing costumes for a theatrical production. PREREQS: TA 243
TA 444. ^THEORY AND CRITICISM OF
THEATRE ARTS (3). Major theories that have influenced and motivated theatre practice in Western civilization throughout its development. Offered on alternate years. (Writing Intensive Course) PREREQS: 6 credits of theatre history, or 6 credits of dramatic literature.
TA 450. STUDIO: THEATRE ARTS (3-6).
Advanced individual study on approved projects in one of the arts of the theatre: acting, directing or scene/costume/lighting design; or in stage or theatre management. This course is repeatable for a maximum of 6 credits. PREREQS: 9 credits of upper-division theatre arts. Departmental approval required.

TA 451. INTRODUCTION TO ARTS ENTREPRENEURSHIP (3). Survey of the business strategies behind a successful career in the arts. Emphasizes the importance of entrepreneurial thinking, engages students with the fundamentals of the arts "business", and explores ways to influence and shape the industry's future. (FA) CROSSLISTED as ART 451, MUS 451. PREREQS: Junior standing and above. For majors.
TA 454. ADVANCED PLAY DIRECTION (3).
Expanded exploration of directing theories and techniques. Practical application through the production of a one-act play in a laboratory theatre. Offered alternate years. PREREQS: TA

354 [D-] and instructor approval required.
TA 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
TA 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

TA 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.
TA 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
TA 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

TA 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

TA 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
TA 510. THEATRE ARTS INTERNSHIP (6-15). One- to three-term residency in a producing theatre, for a maximum allowable total of 15 credits. Student works in a department of the theatre and in related production activities, according to areas of interest or specialization Work supervised and evaluated by agency staff; academic evaluation by supervising department faculty member(s). Available to upper-division theatre arts majors and graduate students approved by faculty and selected by intern agency. This course is repeatable for a maximum of 15 credits. PREREQS: 27 credits in theatre arts, with a minimum of 6 credits in area of skill specialization, or 12 credits of upper-division theatre arts courses, with a minimum of 6 credits in area of skill specialization. Must be arranged with instructor prior to registration. Departmental approval required.
TA 516. TOPICS IN THEATRE ARTS (3). Lectures and explorations of theories, issues, methods, problems, and applications in theatre arts. Concentrated work in a variety of selected theatre topics. Offered as demand and staffing allow. This course is repeatable for a maximum of 12 credits. PREREQS: 9 credits of theatre arts or instructor's approval required.

TA 543. COSTUME DESIGN (3). Theory and practice of designing costumes for a theatrical production. PREREQS: TA 243
TA 550. STUDIO: THEATRE ARTS (3-6). Advanced individual study on approved projects in one of the arts of the theatre: acting, directing or scene/costume/lighting design; or in stage or theatre management. This course is repeatable for a maximum of 6 credits. PREREQS: 9 credits of upper-division theatre arts. Departmental approval required.
TA 554. ADVANCED PLAY DIRECTION (3).
Expanded exploration of directing theories and techniques. Practical application through the production of a one-act play in a laboratory theatre. Offered alternate years. PREREQS: TA 354 and instructor approval required.

SCHOOL OF HISTORY, PHILOSOPHY, AND RELIGION

Ben Mutschler, Director
Stacey Smith, Associate Director, History

Robert Figueroa, Associate Director, Philosophy
Courtney Campbell, Associate
Directory, Religious Studies
Dwance Howard, Assistant to the Director

David Bishop, Academic Coordinator 322 Milam Hall
Oregon State University

## FACULTY

Professors Campbell, Carson, Clough, Ferngren, Guerrini, Hamblin, Husband, Kaplan, Katz, Kopperman, Leibowitz, Luft, Osborne, von Germeten
Associate Professors Chappell, Figueroa, Ip, Koehlinger, Mutschler, Nichols, Orosco, Sarbacker, Smith, Thompson
Assistant Professors Barstow, Hogg, Jenkins, Lauer, Muraca, Osterloh, Ritzheimer

## Undergraduate Majors

History (BA, BS, HBA)
Philosophy (BA, BS, HBA, HBS)
Religious Studies (BA, BS, HBA, HBS)
Minors
History
Philosophy
Religious Studies
Undergraduate Certificates
Applied Ethics
Medical Humanities
Peace Studies
Religion and Culture
Graduate Majors
Applied Ethics (MA, MAIS)
Graduate Areas of Concentration
Art and Morality
Bioethics
Environmental Ethics
History of Science (MA, MAIS, MS, PhD)
Graduate Minors
Applied Ethics
History
Graduate Areas of Concentration
American History (U.S.)
Western U.S. History
European History

Non-American and Non-European History (Asian, African, Latin American, Islamic)

## History of Science

Graduate Areas of Concentration
Development of the Physical, Biological, and Environmental Sciences
History of Science and Medicine
Intellectual and Social History of Science in Europe and the U.S.

## Philosophy

Graduate Areas of Concentration Aesthetic Theory
Ethics (including environmental ethics and biomedical ethics)
History of Philosophy
Logic and Philosophy of Science
Religious Studies

## HISTORY

The School of History, Philosophy, and Religion offers a BA or BS degree in History. Courses provide fundamental background for the social sciences and humanities and are of special value to students of government, education, law, science, journalism, and business. History majors go on to careers in teaching and many jobs benefitting from a liberal arts background.

BA candidates must have proficiency at the second-year college level of a foreign language.

The school also offers a minor program for undergraduates with majors in other fields.

## PHILOSOPHY

The School of History, Philosophy, and Religion offers a BA or BS degree in Philosophy, a Philosophy minor, an undergraduate and postbaccalaureate certificate in Applied Ethics, an MA in Applied Ethics, and participates in the Master of Arts in Interdisciplinary Studies (MAIS) program with a focus on applied ethics and other areas of philosophy. The school's Program for Ethics, Science, and the Environment (PESE) supports multidisciplinary education and scholarship on ethical and policy issues that are raised by advances in scientific knowledge, biotechnology, and natural resource use.

The Spring Creek Project seeks to bring together the practical wisdom of the environmental sciences, the clarity of philosophical analysis, and the creative, expressive power of the written word, to find new ways to understand and re-imagine our relation to the natural world.

Baccalaureate core courses are taught for students interested in broadening their intellectual horizons, developing their abilities for intellectual criticism, and enlarging their understanding of social, ethical, religious, political, and aesthetic values in contemporary society
and world cultures. Many philosophy courses have content that is relevant to the interests of women and minority students.
The school invites non-majors to combine the study of philosophy with their major program by enrolling in the philosophy minor or the Applied Ethics certificate program.
Students interested in philosophy programs should contact or visit the school's undergraduate advisor or director of graduate studies.

## HISTORY OF SCIENCE

The School of History, Philosophy, and Religion offers the degrees of Master of Arts (MA), Master of Science (MS) and Doctor of Philosophy (PhD) in History of Science. The History of Science graduate program provides professional training in the interdisciplinary subject of the history of science. The program connects the humanities, social sciences, and natural sciences by studying and interpreting the development of the sciences within particular historical settings and analyzing the changing roles of the sciences within modern cultures. The emphasis in the program is on scientific traditions since the sixteenth century in Europe and North America, in the physical, earth, biological, medical, and social sciences, as well as on environmental history and the history of the environmental sciences.

## MA IN APPLIED ETHICS DEGREE

The MA in Applied Ethics provides students skills in moral reasoning and an understanding of the ethical values and dilemmas in today's world. Students will be able to identify, analyze and suggest solutions to ethical problems that arise in their professional and civic lives.

## MAIS DEGREE

The school also participates in the Master of Arts in Interdisciplinary Studies (MAIS) degree program. In other advanced degree programs, philosophy may be used as a minor. See the graduate section of this catalog for details.

## UNDERGRADUATE MAJORS WITH OPTIONS

HISTORY (BA, BS, CRED, HBA, HBS)

## Also available via Ecampus.

The History undergraduate major is available to Ecampus students as a BA or BS degree only.

## Minimum Total Credits (49)

Minimum Upper-Division Credits (33)
I. History Surveys ( 15 credits): 15 credits from the following courses:

HST 101 *History of Western Civilization (4)
HST 102 *History of Western Civilization (4)
HST 103 *History of Western Civilization (4)
HST 104. *World History I: Ancient
Civilizations (3)
HST 105. *World History II: Middle and Early Modern Ages (3)
HST 106. *World History III: The Modern and Contemporary World (3)
HST 201 *History of the United States (4)
HST 202 *History of the United States (4)
HST 203 *History of the United States (4)
HST/PHL 210 *Religion in the United States (4)

History majors must take at least one of the following courses that cover a period prior to 1800 CE: HST 101, HST 102, HST 104, HST 105, and/or HST 201.

## II. Global Historical Literacy (12 credits):

4 upper-division credits in each of the following areas, for a total of 12 credits:

- European history
- U.S. history
- Non-European/Non-U.S. history
III. History Electives (12 credits):

12 additional credits in any 300- or $400-\mathrm{level}$ HST or HSTS courses. Only 4 of these credits may come from HST 410: Internship.

## IV. History Capstone Courses:

HST 310. The Historian's Craft (4)
HST 407. ^Seminar (5)
Students must complete HST 310 before attempting HST 407.
A minimum grade of C is required for both HST 310 and HST 407.

## Footnotes:

* Baccalaureate Core Course
${ }^{\wedge}$ Writing Intensive Course (WIC)

## Major Code: 900

## PHILOSOPHY (BA, BS, CRED,

 HBA, HBS)An undergraduate major in philosophy provides a broad education and intellectual skills that are useful in many occupations and areas of life. It is also a valuable background for graduate study in philosophy and religious studies and for advanced study in such professional fields as law and public service.

- At least 32 credits must be upper division.
- At least 12 credits must be 400 level.
- All courses offered by the School of History, Philosophy, and Religion must be graded, no $\mathrm{S} / \mathrm{U}$.
- Only courses with C- or better will be accepted for the major.
- Students must have a 2.5 GPA in those courses offered by the school.
Philosophical Foundations (10-12)
PHL 101. Critical Thinking (4)
or PHL 121. *Reasoning and Writing (3)
PHL 205. *Ethics (4)
PHL 251. *Knowers, Knowing, and the Known (4)

Philosophical Perspectives (24-27)
PHL 301, PHL 302, PHL 303. *History of
Western Philosophy ( $4,4,4$ )

## Select one Logic course:

PHL 321. Deductive Logic (4)
PHL 325. *Scientific Reasoning (4)
PHL 421. Mathematical Logic (3)
Select one Value Theory or one Metaphysics/Epistemology course from the two lists below (3-4):

## Value Theory:

PHL 207. *Political Philosophy (4)
PHL 342. Contemporary Ethics (4)
PHL 344. *Pacifism, Just War, and Terrorism (4)

PHL 360. *Philosophy and the Arts (4)
PHL 365. *Law in Philosophical Perspective
(4)

PHL 390. Moral Theories (3)
PHL 417. Feminist Philosophies (3)
PHL 430. History of Buddhist Philosophy (4)
PHL 439. Philosophy of Nature (3)
PHL 440. *Environmental Ethics (3)
PHL 499. Topics in Philosophy [some qualify; check with professor] (1-4)
OR:
Metaphysics/Epistemology:
PHL 325. *Scientific Reasoning (4)
PHL 365. *Law in Philosophical Perspective (4)

PHL 430. History of Buddhist Philosophy (4)
PHL 436. Philosophy and Religion (3)
PHL 451. Knowledge and Reality (3)
PHL 470. Philosophy of Science (3)
PHL 474. Philosophy of Biology (4)
PHL 499. Topics in Philosophy [some
qualify; check with professor] (1-4)
Diversity: Select one course from below (3-4):
PHL 208. Introduction to Buddhist Traditions (4)
PHL 280. *Ethics of Diversity (4)
PHL 312. *Asian Thought (4)
PHL 316. Intellectual Issues of Mexico and Mexican Americans (4)
PHL 371. *Philosophies of China (4)
PHL 417. Feminist Philosophies (3)
PHL 430. History of Buddhist Philosophy (4)
PHL 448. Native American Philosophies (4)
PHL 499. Topics in Philosophy: [some qualify; check with professor] (1-4)
PHL 407. Seminar (3)
Electives (12-16) Consultation with advisor is required.

## Total=46-55 (14-15 courses)

## Philosophical Pathways:

Students are encouraged to select their Diversity, Value Theory, or Metaphysics and Epistemology, Seminar, and Elective courses so as to form a Philosophical Pathway. These are groups of courses that allow the student to concentrate on different subject areas within engaged philosophy. Here are sample pathways, with themes that interest many students:

## Science and Technology:

PHL 325. *Scientific Reasoning (4)
PHL 371. *Philosophies of China (4)
PHL 417. Feminist Philosophies (3)
PHL 439. Philosophy of Nature (3)

PHL 440. *Environmental Ethics (3)
PHL 443. *World Views and Environmental Values (3)
PHL 448. Native American Philosophies (4)
PHL 451. Knowledge and Reality (3)
PHL 470. Philosophy of Science (3)
PHL 474. ^Philosophy of Biology (4)
Health and Wellbeing:
PHL 208. Introduction to Buddhist Traditions (4)
PHL 213. *Introduction to Hindu Traditions (4)

PHL 360. *Philosophy and the Arts (4)
PHL 417. Feminist Philosophies (3)
PHL 430. History of Buddhist Philosophy (4)
PHL 432. *Yoga and Tantric Traditions (4)
PHL 444. *Biomedical Ethics (4)
PHL 455. Death and Dying (3)
PHL 474. ^Philosophy of Biology (4)

## Social Justice and Civic

Engagement:
PHL 207. *Political Philosophy (4)
PHL 280. *Ethics of Diversity (4)
PHL 315. *Gandhi and Nonviolence (4)
PHL 316. Intellectual Issues of Mexico and Mexican Americans (4)
PHL 342. Contemporary Ethics (4)
PHL 344. *Pacifism, Just War, and Terrorism (4)

PHL 365. *Law in Philosophical Perspective (4)

PHL 417. Feminist Philosophies (3)
PHL 431. Buddhism, Nonviolence and
Social Justice (4)
PHL 443. *World Views and Environmental Values (4)
PHL 448. Native American Philosophies (4)
PHL 461. Art and Morality (3)
Faith in Philosophical Perspective:
PHL 207. *Political Philosophy (4)
PHL 208. Introduction to Buddhist Traditions (4)
PHL 210. *Religion in the United States (4)
PHL 213. *Introduction to Hindu Traditions (4)

PHL 214. *Introduction to Islamic Traditions (4)
PHL 316. Intellectual Issues of Mexico and Mexican Americans (4)
PHL 344. *Pacifism, Just War, and Terrorism (4)

PHL 371. *Philosophies of China (4)
PHL 430. History of Buddhist Philosophy (4)
PHL 436. Philosophy and Religion (3)
PHL 443. *World Views and Environmental Values (3)
PHL 448. Native American Philosophies (4)

## The Examined Life:

PHL 207. *Political Philosophy (4)
PHL 208. Introduction to Buddhist Traditions (4)
PHL 280. *Ethics of Diversity (4)
PHL 316. Intellectual Issues of Mexico and Mexican Americans (4)
PHL 325. *Scientific Reasoning (4)
PHL 342. Contemporary Ethics (4)
PHL 344. *Pacifism, Just War, and Terrorism (4)

PHL 360. *Philosophy and the Arts (4)
PHL 365. *Law in Philosophical Perspective (4)

PHL 371. *Philosophies of China (4)
PHL 390. Moral Theories (3)
PHL 417. Feminist Philosophies (3)
PHL 430. History of Buddhist Philosophy
(4)

PHL 436. Philosophy and Religion (3)
PHL 440. *Environmental Ethics (3)
PHL 439. Philosophy of Nature (3)
PHL 448. Native American Philosophies (4)
PHL 451. Knowledge and Reality (3)
PHL 470. Philosophy of Science (3)
PHL 474. ^Philosophy of Biology (4)
Courses numbered PHL 299, 399, and
499 (Special Topics) as well as PHL 407
(Seminar) and PHL 411 (Great Figures)
vary in their content from term to term, and will sometimes satisfy the Diversity, Value Theory, or Metaphysics/Epistemology requirements. To determine whether a particular course of this type may be counted toward a particular degree requirement, ask your professor.

${ }^{\wedge}$ Writing Intensive Course (WIC)

## Major Code: 955

## RELIGIOUS STUDIES (BA, BS,

 CRED, HBA, HBS)The School of History, Philosophy, and Religion offers a BA or BS degree in Religious Studies as well as a minor in Religious Studies, and undergraduate certificates in religion and culture and in medical humanities. Courses emphasize skills in critical thinking, argumentative and expository writing, cultural literacy, citizenship, and global diversity. Majors in religious studies pursue graduate studies and careers in numerous fields, including education, government, humanitarian services, journalism, law, medicine, and politics.

## Foundations and Concepts

## Required Core Courses (12):

PHL 160. *Quests for Meaning: World Religions (4)
PHL 202. Introduction to Religious Studies (4)

REL 407. ^Seminar: Theories and Methods of Religion (4) [Pending approval]

## Global Literacy in Religion

Select 12 credits from courses below:
PHL 206. *Religious Ethics and Moral Problems (4)
PHL 208. Introduction to Buddhist Traditions (4)
PHL/HST 210. *Religion in the United States (4)

PHL 213. *Introduction to Hindu Traditions (4)

PHL 214. *Introduction to Islamic Traditions (4)
PHL 220. World-Views and Values in the Bible (4)
REL 215. Introduction to Jewish Traditions (4)

## Studies in Religion and Culture Select 24 credits from courses below, at least 12 from SHPR courses:

SHPR Courses:
HST 325. History of Early Christianity: Origins to 600 (4)
HST 327. History of Medieval Europe (4)
HST 328. History of Medieval Europe (4)
HST 330. History of Early Modern Europe (4)

HST 333. Medieval and Early Modern Spanish History (4)
HST 350. *Modern Latin America (4)
HST 352. *Africans in Latin American History (4)
HST 387. *Islamic Civilization (4)
HST 388. *Islamic Civilization (4)
HST 425. *The Holocaust in Its History (4)
HST 466. Religion and U.S. Foreign
Relations (4)
HST 485. *Politics and Religion in the
Modern Middle East (4)
PAX 201. Study of Peace and the Causes of Conflict (3)
PHL 170. *The Idea of God (4)
PHL 312. *Asian Thought (4)
PHL 315. *Gandhi and Non-violence (4)
PHL 316. Intellectual Issues of Mexico and Mexican Americans (4)
PHL 344. *Pacifism, Just War, and Terrorism (4)

PHL 345. *Freedom First: Religious Liberty and Intolerance (4)
PHL 371. *Philosophies of China (4)
PHL 411. Great Figures in Philosophy (4)
PHL 430. History of Buddhist Philosophy (4)

PHL 431. Buddhism, Non-Violence, and Social Justice (4)
PHL 432. *Yoga and Tantric Traditions (4)
PHL 436. Philosophy and Religion (3)
REL 437. Religious Dimensions of Modern
Literature (3) [Pending submission
and approval of a proposal]
PHL 443. *World Views and Environmental Values (3)
PHL 444. *Biomedical Ethics (4)
PHL/ES 448. Native American Philosophies (3)

PHL 455. Death and Dying (3)
PHL 461. Art and Morality (3)
REL 199. Selected Studies (4)
REL 299. Selected Topics (4)
REL 399. Special Topics (4)
REL 402. Independent Study (4)
REL 405. Reading and Conference (4)
REL 415. Selected Topics (4)

## Non-SHPR Courses:

ANTH 452. Folklore and Expressive Culture (4)

ANTH 472. Contemporary Indian Issues (4)
ENG 275. *The Bible as Literature (4)
ENG/PHL/WGSS 295. *Feminism and the Bible (4)
ENG 330. *The Holocaust in Literature and Film (4)
ENG 360. *Native American Literature (4)
NMC 437. New Media and Society (3)
PS 361. *Classical Political Thought (4)
PS 370. *Science, Religion, and Politics (4)
SOC 452. Sociology of Religion (4)
WGSS 223. *Women: Self and Society (3)
WGSS 380. *Muslim Women (3)
WGSS 495. *Global Feminist Theologies (4)
WGSS 496. *Feminist Theologies in the United States (4)

## Total=Min. 48 credits

UNDERGRADUATE MINORS

## HISTORY MINOR

Also available via Ecampus.
Undergraduate students may elect a minor in History to complement course work in their major discipline. History minors must complete 28-29 credits, depending on the area:

## U.S. History

HST 201, 202, 203. *History of the United States ( $4,4,4$ ) (or equivalent)
Minimum of 12 upper-division credits in U.S. history courses ( $300+$ level)

Additional history credits (any history courses) (4)

## European History

HST 101, 102, 103. *History of Western Civilization ( $4,4,4$ ) (or equivalent)
Minimum 12 upper-division credits in
"European" history (300+ level)
Additional history credits (any history courses) (8)
Non-European, Non-U.S. History
(African, Asian, Islamic World,

## Latin American History)

HST 104. *World History I: Ancient Civilizations (3) (or equivalent)
HST 105. *World History II: Middle and Early Modern Ages (3) (or equivalent)
HST 106. *World History III: The Modern and Contemporary World (3) (or equivalent)
Minimum 12 upper-division credits in nonEuropean, non-U.S. history ( $300+$ level)
Additional history credits (any history courses) (8)
All courses for a History minor must be taken for graded credit. Minor courses may be used to fulfill baccalaureate core, CLA, and minor requirements.

## Footnote:

* Baccalaureate Core Course (BCC)

## Minor Code: 900

## PHILOSOPHY MINOR

The Philosophy minor allows students to specialize in such areas as ethics, legal and political philosophy, philosophy and religion, non-Western philosophies and religious ideas, philosophy of art, logic, philosophy of science, and the history of philosophy.

## History of Philosophy-Select one

 course from:PHL 301. *History of Western Philosophy (4)

PHL 302. *History of Western Philosophy (4)

PHL 303. *History of Western Philosophy (4)

Logic-Select one course from:
PHL 101. Critical Thinking (4)
PHL 121. *Reasoning and Writing (3)

PHL 321. Deductive Logic (4)
PHL 325. *Scientific Reasoning (4)
PHL 421. Mathematical Logic (3)

## Concentration:

Students must arrange a minor area of concentration with approval of a faculty advisor.

## Electives:

As many as needed to complete the total credit requirement.

Total must include 12 credits of upperdivision with at least 3 credits at the 400 level.

## Total=27

A grade of C - or better is required in all courses used to complete minor requirements. Only one elective may be taken with $\mathrm{S} / \mathrm{U}$ grading.

## GRADUATE MAJORS

## APPLIED ETHICS (MA, MAIS)

Graduate Areas of Concentration Art and morality, bioethics, environmental ethics
The MA in Applied Ethics is designed to provide students with skills of moral reasoning and an understanding of ethical values and dilemmas in today's world. Students will be able to identify, analyze and suggest solutions to ethical problems that arise in their professional and civic lives.
Students are required to take courses in ethical theory, as well as courses in applied ethics and in an appropriate disciplinary or integrated minor. Completion of the degree requires a practicum and thesis. Please note that Oregon State University also requires completion of two years of a foreign language for the master of art's degree.

## Required Course of Study (45 credits minimum)

## A. Philosophy Core (9)

PHL 525. Philosophical Methods (3)
PHL 541. Classical Moral Theories (3)
PHL 542. Contemporary Moral Theories (3)

## B. Applied Ethics (15 credits, with

 maximum of 6 from PHL 501, PHL
## 502, PHL 505)

PHL 501. Research (1-16)
PHL 502. Independent Study (1-16)
PHL 505. Reading and Conference (1-16)
PHL 507. Seminar (1-16)
PHL 517. Feminist Philosophies (3)
PHL 540. Environmental Ethics (3)
PHL 543. World View and Environmental Values (3)
PHL 544. Biomedical Ethics (4)
PHL 547. Research Ethics (3)
PHL 555. Death and Dying (3)
PHL 561. Art and Morality (3)
PHL 570. Philosophy of Science (3)
PHL 599. Topics in Philosophy (1-4)
C. PHL 510. Practicum (3-6)
D. PHL 503. Thesis (6-9)
E. Disciplinary or Integrated Minor (12)

Major Code: 9580

## HISTORY OF SCIENCE (MA, MS, PhD, MAIS)

Graduate Areas of Concentration
Development of the physical, biological, and environmental sciences; history of science and medicine; intellectual and social history of science in Europe and the U.S.
The graduate program leading to the MS, MA, and PhD is offered through the School of History, Philosophy, and Religion. Graduate work in the school may apply to the Master of Arts in Interdisciplinary Studies and to minors in other advanced-degree programs.

Students applying for graduate work in history must meet the following requirements:

1. Minimum overall undergraduate GPA of 3.00
2. Appropriate undergraduate course work in history
3. Have Graduate Record Examination scores sent to the School of History, Philosophy, and Religion
Course work in the history of science graduate major provides a critical perspective on the scientific enterprise through the centuries. It is valuable for graduate students in a variety of disciplines in the sciences and the humanities.

## Admission Requirements

Students must have completed a fouryear baccalaureate degree from an accredited college or university and have achieved a combined GPA of 3.00 for the last 90 quarter ( 60 semester) credits of graded undergraduate work of the first baccalaureate and all subsequent graded credits.

The applicant must submit photocopies of official transcripts of all previous academic work at the college or university level.

Applicants must also provide:

- A statement of the student's particular fields of interest and overall aims and purpose in the study of the history of science. An additional writing sample (no more than 25 pages) would be helpful to the graduate admissions committee.
- A photocopy of the official Graduate Record Examination (GRE) scores.
- Three letters of recommendation that specifically evaluate academic abilities and professional potential.

## Graduate Degree Requirements

Requirements for a Master's Degree:
Either the MA or MS may be earned. The

MA requires demonstration, either by course work or examination, of a reading knowledge of a foreign language appropriate for research. Both degrees require the successful completion of 45 graduate credits. Candidates are required to have a major field of at least 24 credits of course work (including historiography) from a list of approved history of science courses and a minor field of 15 credits of course work in science, history, or a related (or integrated) field; a thesis is optional.

## Requirements for a Doctoral

 Degree:The equivalent of three years of graduate work beyond the bachelor's degree is required including a doctoral thesis. This must include the requirements for, or the equivalent of, a master's degree in history of science. Course work should have history of science as a major; the minor field can be in science, history, or a related (or integrated) field. Generally, one foreign language is required.

## Major Code: 5440

## GRADUATE MINORS

## APPLIED ETHICS GRADUATE MINOR

For more information, see the departmental advisor.
Minor Code: 9580

## HISTORY GRADUATE MINOR

Graduate Areas of Concentration
American history (U.S.) Western U.S.
history, European history, non-American and non-European history (Asian,
African, Latin American, Islamic), history of science
Graduate work in the School of History, Philosophy, and Religion may apply to the Master of Arts in Interdisciplinary Studies degree and to minors in other advanced degree programs.

Students applying for graduate work in history must meet the following requirements:

1. Minimum overall undergraduate GPA of 3.00
2. Appropriate undergraduate course work in history
3. Have Graduate Record Examination scores sent to the School of History, Philosophy, and Religion.
Minor Code: 9000

## HISTORY OF SCIENCE GRADUATE MINOR

## Graduate Areas of Concentration

History of science and medicine, development of the physical, biological, and environmental sciences, intellectual and social history of science in Europe and the U.S.
Graduate work in the School of History, Philosophy, and Religion may apply to the Master of Arts in Interdisciplinary

Studies and to minors in other advanced degree programs.
Students applying for graduate work in history must meet the following requirements:

1. Minimum overall undergraduate GPA of 3.00
2. Appropriate undergraduate course work in history
3. Have Graduate Record Examination scores sent to the School of History, Philosophy, and Religion.

## Minor Code: 5440

PHILOSOPHY GRADUATE MINOR
Graduate Areas of Concentration
Aesthetic theory, ethics (including environmental ethics and biomedical ethics), history of philosophy, logic and philosophy of science, religious studies
The School of History, Philosophy, and Religion is committed to teaching students the skills and knowledge they need to reason cogently and decide wisely about difficult issues they will confront as citizens and professionals. The school offers graduate work leading to the Master of Arts in Interdisciplinary Studies degree with a specialization in applied ethics and in other areas of philosophy and religious studies. The MAIS thesis option is encouraged. The study of applied ethics builds on a special strength among school faculty.
Graduate credit is offered in logic, ethics (including environmental ethics and biomedical ethics), aesthetics, religious studies, philosophy of science, contemporary philosophy, and history of philosophy. PHL 550 Ideas Matter is offered in conjunction with the "IDEAS MATTER" lecture series.

Prospective students should request additional program literature from the school. Some teaching assistantship support is available.

## Minor Code: 9550

## CERTIFICATES

## APPLIED ETHICS CERTIFICATE

The Applied Ethics undergraduate certificate builds upon the various courses in ethics taught in the School of History, Philosophy, and Religion and courses with ethics-related content found throughout the university, in order to provide students with a systematic and thorough understanding of the moral world for their civic, professional, and personal lives.
Students pursuing a major in any academic or professional field may also pursue applied ethics for educational interest and for professional preparation. The certificate adds a critical philosophical dimension to students' understanding of their professional aspirations.
Students seeking a baccalaureate de-
gree at OSU may earn the Applied Ethics certificate by completing a minimum of 28 credits of approved course work.
For more information, contact Courtney Campbell, 541-737-5651, ccampbell@oregonstate.edu.

## Philosophy Requirements

PHL 205. *Ethics (4)
12 credits from any of the following courses:
PHL 150. *Great Ideas in Philosophy (3)
PHL 280. *Ethics of Diversity (4)
PHL 325. *Scientific Reasoning (4)
PHL 342. Contemporary Ethics (4)
PHL 390. Moral Theories (3)
PHL 405. Reading and Conference (1-16)
PHL 417. Feminist Philosophies (3)
PHL 440. *Environmental Ethics (3)
PHL 443. *Worldviews/Environmental Values (3)
PHL 444. *Biomedical Ethics (4)
PHL 450. Topics (1)
PHL 499. Topics in Contemporary
Philosophy [w/approval] (1-4)

## Elective Requirements (12)

Three concentrations of courses to achieve the 12 elective credits for the Applied Ethics certificate have already been established, but creating an individualized program is possible. The established concentrations are:

1. Ethics and scientific inquiry
2. Ethics and the environment
3. Ethics, health and medicine

## Total=28

The Applied Ethics certificate coordinator will assist students in course selection from a list available in the School of History, Philosophy, and Religion.

$\wedge$ Writing Intensive Course

## Major Code: C200

## MEDICAL HUMANITIES <br> CERTIFICATE

The undergraduate certificate in Medical Humanities offers OSU students a multi-disciplinary integrated program to study health, medicine, and the healing professions. The certificate relies on key courses in medical anthropology, literature and medicine, medical history, and biomedical ethics for its core content foundations. Courses from additional different disciplines-biology; ethnic studies; exercise science; philosophy; political science; psychology; public health; religious studies; sociology; and women, gender, and sexuality studies-can fulfill complementary elective courses. In addition, the certificate program provides a team-taught colloquium on "the art of healing" that emphasizes skills in professional identity, reflective writing, cultural competency, and diversity as a complement to the scientific features of the healing professions. The certificate will prepare students to empathize with
the sufferings of others, reflect critically on medical knowledge and discourse, create new representations of the medical experience, and confront moral, psychological, and ethical dilemmas.
For further information, please contact Courtney Campbell, 541-737-5651, ccampbell@oregonstate.edu.
Current students in the Medical Humanities Certificate program should contact David Bishop, 541-737-8918, david. bishop@oregonstate.edu.

## Medical Humanities Core

(minimum 10 credits)
ANTH 345. *Biological and Cultural
Constructions of Race (3)

Major Code: C815

## RELIGION AND CULTURE

## CERTIFICATE

The Religion and Culture undergraduate certificate is designed to provide undergraduate students with both breadth and depth in the academic study of religion, with a focus on how religious practice and ideas are manifested as both a shaper and critic of broader cultures nationally and globally.

The certificate is open to all OSU undergraduates as a supplement to any undergraduate degree program. It builds on a core curriculum of courses in the study of religion in the School of History, Philosophy, and Religion and extends student learning to courses in religion and culture, diversity, literature, and western religious experience in many other academic units. The certificate is recognized with a transcript-visible notation.

For advising, contact David Bishop, Academic Coordinator, School of History, Philosophy, and Religion, 322B Milam Hall, 541-737-8918, David.Bishop@ oregonstate.edu.

## Required Core (8):

PHL 160. *Quests for Meaning: World Religions (4)

## ■ ENVIRONMENTAL ARTS AND hUMANITIES COURSES

## EAH 411. *^PERSPECTIVES IN

ENVIRONMENTAL ARTS AND HUMANITIES (4). Introduction to methods of inquiry in the field of environmental arts and humanities. Students will learn key concepts in approaches to environmental humanities scholarship and environmental art, informed by ecological principles and other perspectives from the natural sciences. Disciplinary approaches include history, literature, philosophy, and the formal arts (Bacc Core Course) (Writing Intensive Course)
PREREQS: Upper-division standing
EAH 412. *^ENVIRONMENTAL SCIENCE IN
CONTEXT (4). Introduction to environmental science methods and practice, especially for students studying in the arts and humanities. Students will gain a working understanding of the scientific method, theory, and analysis, including how to interpret and evaluate risk assessment, statistics-based arguments, and visual representations of data. Students will also gain an understanding of the history and role of the sciences in environmental discourse. (Bacc Core Course) (Writing Intensive Course) PREREQS: Upper-division standing.
EAH 501. RESEARCH (1-4). Graded $P / N$. This course is repeatable for a maximum of 8 credits.

EAH 503. THESIS (1-4). Graded P/N. This course is repeatable for a maximum of 8 credits.

EAH 505. READING AND CONFERENCE (1-4). Graded P/N. This course is repeatable for a maximum of 4 credits.

EAH 506. FIELD COURSE PROJECTS (3).
EAH 507. SEMINAR (2-4). This course is repeatable for a maximum of 10 credits.

EAH 508. PROFESSIONAL DEVELOPMENT WORKSHOP (1). Graded P/N. This course is repeatable for a maximum of 6 credits.
EAH 510. WORK AND FIELD EXPERIENCE
(1-4). Graded $P / N$. This course is repeatable for a maximum of 8 credits.
EAH 511. PERSPECTIVES IN ENVIRONMENTAL ARTS AND HUMANITIES (4). Introduction to methods of inquiry in the field of environmental arts and humanities. Students will learn key concepts in approaches to environmental humanities scholarship and environmental art, informed by ecological principles and other perspectives from the natural sciences. Disciplinary approaches include history, literature, philosophy, and the formal arts. PREREQS: Graduate standing
EAH 512. ENVIRONMENTAL SCIENCE IN
CONTEXT (4). Introduction to environmental science methods and practice, especially for students studying in the arts and humanities. Students will gain a working understanding of the scientific method, theory, and analysis, including how to interpret and evaluate risk assessment, statistics-based arguments, and visual representations of data. Students will also gain an understanding of the history and role of the sciences in environmental discourse. PREREQS: Graduate standing.
EAH 599. SPECIAL TOPICS (4). This course is repeatable for a maximum of 12 credits.

## HISTORY COURSES

HST 101. *HISTORY OF WESTERN
CIVILIZATION (4). Provides an awareness and understanding of the Western cultural heritage. Stresses the major ideas and developments that have been of primary importance in shaping the Western tradition. Covers the Ancient World to 1000 A.D. HST 101, HST 102 and HST 103 need not be taken in sequence. (H) (SS) (Bacc Core Course)

HST 102. *HISTORY OF WESTERN
CIVILIZATION (4). Provides an awareness and understanding of the Western cultural heritage. Stresses the major ideas and developments that have been of primary importance in shaping the Western tradition. Covers 1000 A.D. to 1789. HST 101, HST 102 and HST 103 need not be taken in sequence. (H) (SS) (Bacc Core Course)

## HST 103. *HISTORY OF WESTERN

CIVILIZATION (4). Provides an awareness and understanding of the Western cultural heritage. Stresses the major ideas and developments that have been of primary importance in shaping the Western tradition. Covers 1789 to the present. HST 101, HST 102 and HST 103 need not be taken in sequence. (H) (SS) (Bacc Core Course)

## HST 104. *WORLD HISTORY I: ANCIENT

 CIVILIZATIONS (3). A survey of the historical development of several world civilizations from antiquity to roughly 600 to 700 A.D. Exploration of religious, cultural, social, political, and economic institutions of various societies. Cultural diversity analysis of both ancient Western and non-Western civilizations. Not offered every year. (H) (Bacc Core Course)
## HST 105. *WORLD HISTORY II: MIDDLE

 AND EARLY MODERN AGES (3). A survey of the historical development of several world civilizations roughly from the 8th century to the late 18th century. Exploration of religious, cultural, social, political, and economic institutions of various societies. Cultural diversity analysis of both ancient Western and non-Western civilizations. (H) (Bacc Core Course)HST 105H. *WORLD HISTORY II: MIDDLE AND EARLY MODERN AGES (3). A survey of the historical development of several world civilizations roughly from the 8th century to the late 18th century. Exploration of religious, cultural, social, political, and economic institutions of various societies. Cultural diversity analysis of both ancient Western and non-Western civilizations. (H) (Bacc Core Course) PREREQS: Honors College approval required.

HST 106. *WORLD HISTORY III: THE MODERN AND CONTEMPORARY WORLD (3). A survey of the historical development of several world civilizations from the 18th century to the contemporary period. Exploration of religious, cultural, social, political, and economic institutions of various societies. Cultural diversity analysis of both ancient Western and non-Western civilizations. Not offered every year. (H) (Bacc Core Course)

## HST 106H. *WORLD HISTORY III: THE

MODERN AND CONTEMPORARY WORLD (3). A survey of the historical development of several world civilizations from the 18th century to the contemporary period. Exploration of religious, cultural, social, political, and economic institutions of various societies. Cultural diversity analysis of both ancient Western and non-Western civilizations. Not offered every year. (H) (Bacc Core Course) PREREQS: Honors College approval required.
HST 199. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 16 credits.
HST 201. *HISTORY OF THE UNITED STATES (4). Provides an overview of the development of the U.S. from the pre-Columbian era to the present. Attention is given to economic, political, and social trends, as well as to international relations. Covers pre-Columbian and colonial origins to 1820. HST 201, HST 202, HST 203 need not be taken in sequence. (H) (SS) (Bacc Core Course)

HST 202. *HISTORY OF THE UNITED STATES (4). Provides an overview of the development of the U.S. from the pre-Columbian era to the present. Attention is given to economic, political, and social trends, as well as to international relations. Covers 1820 to 1920. HST 201, HST 202, HST 203 need not be taken in sequence. (H)
(SS) (Bacc Core Course)
HST 202H. *HISTORY OF THE UNITED STATES
(4). Provides an overview of the development of the U.S. from the pre-Columbian era to the present. Attention is given to economic, political, and social trends, as well as to international relations. Covers 1820 to 1920. HST 201H, HST 202H, and HST 203H need not be taken in sequence. (H) (SS) (Bacc Core Course) PREREQS: Honors College approval required.
HST 203. *HISTORY OF THE UNITED STATES
(4). Provides an overview of the development of the U.S. from the pre-Columbian era to the present. Attention is given to economic, political, and social trends, as well as to international relations. Covers 1920 to present. HST 201, HST 202, HST 203 need not be taken in sequence. (H) (SS) (Bacc Core Course)
HST 203H. *HISTORY OF THE UNITED STATES (4). Provides an overview of the development of the U.S. from the pre-Columbian era to the present. Attention is given to economic, political, and social trends, as well as to international relations. Covers 1920 to present. HST 201H, HST 202H, and HST 203H need not be taken in sequence. (H) (SS) (Bacc Core Course) PREREQS: Honors College approval required.

HST 210. *RELIGION IN THE UNITED STATES (4). A thematic overview of the historical study of religion in the United States, with an eye toward ways that social and cultural contexts have shaped the religious experience of Americans in different places and times. Surveys a wide array of religious movements, groups, and individuals from the colonial period to present. CROSSLISTED as PHL 210, REL 210. (Bacc Core Course)
HST 210H. *RELIGION IN THE UNITED STATES (4). A thematic overview of the historical study of religion in the United States, with an eye toward ways that social and cultural contexts have shaped the religious experience of Americans in different places and times. Surveys a wide array of religious movements, groups, and individuals from the colonial period to present. CROSSLISTED as PHL 210H, REL 210H. (Bacc Core Course) PREREQS: Honors College approval required.

## HST 215. *INTRODUCTION TO JEWISH

TRADITIONS (4). An introduction to Judaism's traditions, histories, and practices. Covers historical origins and developments from the biblical period through the Middle Ages, and considers Judaism in the modern world. Topics include the Jewish calendar (including holidays and their traditions), Jewish life cycle events, Jewish prayer, and traditional texts such as the Mishnah and Talmud. CROSSLISTED as HST 215. (Bacc Core Course)

HST 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

HST 299H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
HST 310. THE HISTORIAN'S CRAFT (4). A study of the practice as well as theory of historical work. Combines training in reading, writing, and thinking historically with a survey of the development of history, philosophies of history, types and use of historical evidence, varieties of historical investigation, and factors that influence the writing of history. (H) PREREQS: 9 credits of history or upper-division standing.
HST 315. THE EUROPEAN MILITARY, 1400-1815 (4). Major aspects of European military history, 1400-1815, notable developments in weaponry and strategy, the social history of the military, impact of war on the civilian front, and pacifism and antimilitarism. Not offered every year. (H)
HST 316. THE AMERICAN MILITARY, 1607-1865 (4). Major aspects of American military history, 1607-1865, notable developments in weaponry and strategy, the social history of the military, impact of war on the civilian front, and pacifism
and antimilitarism. Not offered every year. (H)
HST 317. *WHY WAR: A HISTORICAL
PERSPECTIVE (4). An inquiry into the origins of mass violence. Theory and case studies are used to suggest possible causes of international war, civil war, revolution, and genocide. (H) (Bacc Core Course)
HST 317H. *WHY WAR: A HISTORICAL
PERSPECTIVE (4). An inquiry into the origins of mass violence. Theory and case studies are used to suggest possible causes of international war, civil war, revolution, and genocide. (H) (Bacc Core Course) PREREQS: Honors College approval required.
HST 318. THE AMERICAN MILITARY,
1865-PRESENT (4). Major aspects of American military history, 1865-present: evolution of strategy, tactics, and technology in war; the impact of the military on American society in peace and war; historiographic aspects of U.S. military history. Not offered every year. (H)
HST 320. *ANCIENT NEAR EAST (4). A detailed survey of the peoples and cultures of the ancient Near East, including Assyria, Babylon, Egypt, Israel, Mesopotamia, and Persia, from the earliest recorded beginnings of civilization to about 500 B.C. Particular attention is given to the art, religion, law, and literature of these civilizations. (H) (NC) (Bacc Core Course)

HST 321. GREECE (4). The history of the Greek city-states and the civilization they produced; the archaeological discovery of early Greece; the development of the polis; Sparta, Athenian democracy, the Persian and Peloponnesian Wars; Greek private life and religion. (H)
HST 322. ROMAN REPUBLIC (4). The rise of Rome from a city-state to a world power, Rome's wars with Carthage, her growing domination of the Mediterranean, the ensuing breakdown of Roman society and traditional values, and the rise of ambitious leaders who ultimately destroyed the Republic. (H)
HST 323. ROMAN EMPIRE (4). Roman history from 31 B.C. to A.D. 493. The establishment of the Principate, Roman social and private life, the rise of Christianity, the decline and fall of the Western Empire, Rome's contributions to arts, religion, and law. Not offered every year. (H)
HST 324. *ANCIENT JEWISH HISTORY (4).
History of Judaism from the Second Temple through the early Rabbinic period (539 BCE--200 CE). Covers historical origins and developments of Judaism including the canonization of the Bible, Jewish life in the Persian and GrecoRoman worlds, and the beginnings of Diasporic and Rabbinic Judaism. (Bacc Core Course) CROSSLISTED as REL 324.

HST 325. *EARLY CHRISTIANITY: ORIGINS TO 600 (4). Traces early Christianity from its origins to the beginning of the Middle Ages. It deals with the origins and Jewish background of Christianity in Palestine, the ministry and teachings of Jesus, the spread of Christianity throughout the Roman Empire by his disciples and early missionaries, the formation of the New Testament canon, the development of Christian doctrine, controversies over heresy, and the origin of monasticism and the Papacy. (Bacc Core Course) CROSSLISTED as REL 325.
HST 327. HISTORY OF MEDIEVAL EUROPE (4).
Cultural, political, and economic history of the European Middle Ages from the fall of the Roman Empire in the West to the Renaissance. Covers 284 A.D. to 1000. Not offered every year. (H) CROSSLISTED as REL 327. PREREQS: HST/ REL 327 and HST/REL 328 need not be taken in sequence.
HST 328. HISTORY OF MEDIEVAL EUROPE (4). Cultural, political, and economic history of the European Middle Ages from the fall of the Roman Empire in the West to the Renaissance. Covers 1000 to 1400 . Not offered every year. (H)

CROSSLISTED as REL 328. PREREQS: HST/ REL 327 and HST/REL 328 need not be taken in sequence.
HST 329. HISTORY OF EARLY MODERN
EUROPE (4). Political, social, intellectual, and cultural history of Europe from 1400-1789. Focuses on the Renaissance. HST 329, HST 330, and HST 331 need not be taken in sequence. Not offered every year. (H)

## HST 330. HISTORY OF EARLY MODERN

EUROPE (4). Political, social, intellectual, and cultural history of Europe from 1400-1789.
Focuses on the Reformation. Not offered every year. (H) CROSSLISTED as REL 330. PREREQS: HST/REL 329, HST/REL 330, and HST/REL 331 need not be taken in sequence.

HST 331. HISTORY OF EARLY MODERN
EUROPE (4). Political, social, intellectual, and cultural history of Europe from 1400-1789. Focuses on the scientific revolution. HST 329, HST 330, and HST 331 need not be taken in sequence. Not offered every year. (H)

HST 333. MEDIEVAL AND EARLY MODERN SPANISH HISTORY (4). From Islamic conquest to conquest of America, the social, religious, political and economic history of Spain from 1000 to 1700. Offered fall term in odd years. (H) CROSSLISTED as REL 333.
HST 335. *NINETEENTH-CENTURY EUROPE
(4). A thematic overview of the "long" nineteenth century, from the French Revolution (1789) to the outbreak of the first World War (1914): the industrial revolution and the class struggles that accompanied it; the growing importance of the nation in politics and culture; imperial expansion and Europeans' contacts with non-Europeans; urbanization; Darwinism and Social Darwinism; and the developments leading to the cataclysm of Europe's first "modern" war. Not offered every year. (H) (Bacc Core Course)

## HST 336. TWENTIETH-CENTURY EUROPE

(4). Examines the politics, culture, and society of Europe from World War I to the present. Themes include total war; ways that art and literature influenced politics; communist and fascist visions of the relationship of the individual to the society or collective; racial theories and genocide; the cold war division of Europe into East and West; decolonization; and the development of the European Community. Not offered every year. (H)
HST 338. *HITLER'S EUROPE (4). Examines WWII and Nazi Germany's efforts to construct an empire. Themes include: the Nazi Party's rise to power in 1933 and pursuit of war, battles and occupation policies in Western and Eastern Europe, anti-Semitism and the concept of Lebensraum, collaboration among occupied peoples and Germans, and the Holocaust. (Bacc Core Course)

HST 340. HISTORY OF RUSSIA (4). Survey of political, economic, and social developments from the origin of Russia to the post-Soviet period Focuses on the period from 862 to 1917. Not offered every year. HST 340 and HST 341 need not be taken in sequence. (H)
HST 341. HISTORY OF RUSSIA (4). Survey of political, economic, and social developments from the origin of Russia to the post-Soviet period. Focuses on the period from 1917 to the present. Not offered every year. HST 340 and HST 341 need not be taken in sequence. (H)

## HST 344. SPECIAL TOPICS IN RUSSIAN

HISTORY (4). Special topics and problems in Russian history not covered in other courses. May be repeated when topic varies. Not offered every year. (H) This course is repeatable for a maximum of 8 credits.
HST 345. SOCIETY IN MODERN RUSSIA
(4). Development of Russian/Soviet/Post-

Soviet society since 1861, focusing on gender, urbanization, and the general social ramifications of modernization. Not offered every year. (H)

HST 350. *MODERN LATIN AMERICA (4).
History of Latin America leading up to and after Spanish and Portuguese conquest. Focus on indigenous American, European and African cultures and religions in contact under colonial government and economic systems. Covers the period from 1400 to 1810. (H) (NC) (Bacc Core Course) CROSSLISTED as REL 350. PREREQS: HST 350 and HST 351 need not be taken in sequence.
HST 350H. *MODERN LATIN AMERICA (4). History of Latin America leading up to and after Spanish and Portuguese conquest. Focus on indigenous American, European and African cultures and religions in contact under colonial government and economic systems. Covers the period from 1400 to 1810. (H) (NC) (Bacc Core Course) PREREQS: HST 350 and HST 351 need not be taken in sequence. Honors College approval required.
HST 351. *MODERN LATIN AMERICA (4).
History of the development of Latin America, emphasizing the issues of imperialism, economic dependency, social stratification, political instability, and nationalism within an international context. Covers 1850 to the present. (H) (NC) (Bacc Core Course) PREREQS: HST 350 and HST 351 need not be taken in sequence.
HST 352. *AFRICANS IN LATIN AMERICAN HISTORY (4). A survey of the role of Africans and their descendants in Latin American history, linking the history of the Americas, Europe and Africa. (Baccalaureate Core Course) CROSSLISTED as REL 352. PREREQS: HST 350 and HST 351 suggested.
HST 353. *SLAVERY IN THE AMERICAS (4). A comparative examination of slavery and bound labor in the Americas, the Caribbean, and the Atlantic World from the 1600-1900s. Focuses on slavery as an economic system, a set of social and cultural practices, and power relationships. Examines legacies of racial discrimination and social and cultural consequences of slave resistance, rebellion, manumission, emancipation, and abolition. (Bacc Core Course)

## HST 362. WOMEN IN UNITED STATES

HISTORY (4). Women in the United States--their roles in and contribution to American political, economic, social, cultural, and intellectual life. Course sequence pays particular attention to the diversity of American women's backgrounds and experiences. Covers 1620 to 1890. Not offered every year. HST 362 and HST 363 need not be taken in sequence. (H)

## HST 363. WOMEN IN UNITED STATES

HISTORY (4). Women in the United States--their roles in and contribution to American political, economic, social, cultural, and intellectual life. Course sequence pays particular attention to the diversity of American women's backgrounds and experiences. Covers 1890 to the present. Not offered every year. HST 362 and HST 363 need not be taken in sequence. (H)
HST 364. *UNITED STATES RELIGION AND SOCIAL REFORM (4). Provides an awareness of how various religious groups have thought about and engaged with social change pertaining to slavery, feminism, civil rights, same-sex marriage, and immigration. Focus on reading primary sources related to each of these issues. (Bacc Core Course) CROSSLISTED as REL 364

## HST 365. *THE CIVIL RIGHTS MOVEMENT

 IN THE MODERN U.S. (4). An exploration of the "long civil rights movement" among African Americans and their allies during the 20th century United States, with attention to the structure of racial inequality, movement philosophies and strategies, white allies and opponents, relationships to other freedom movements, and the movement's legacies. (Bacc Core Course)HST 365H. *THE CIVIL RIGHTS MOVEMENT IN THE MODERN U.S. (4). An exploration of the "long civil rights movement" among African

Americans and their allies during the 20th century United States, with attention to the structure of racial inequality, movement philosophies and strategies, white allies and opponents, relationships to other freedom movements, and the movement's legacies. (Bacc Core Course) PREREQS: Honors College approval required.

HST 366. HISTORY OF THE AMERICAN INDIAN (4). A study of the American Indian north of Mexico from before European contact to the present. Focuses on the indigenous population prior to European contact; initial alterations in and continued disruption of Indian society and culture; Indian-white conflict; emergence of U.S. Government Indian policy to 1848 . Not offered every year. (H)
HST 368. *LESBIAN AND GAY MOVEMENTS IN MODERN AMERICA (4). Examination of lesbian and gay male identities, lives, and collectivities in American culture from the post-Civil War period to the present. The political and cultural participation, rather than human sexual behaviors, orientations, or values. Not offered every year. (H) (Bacc Core Course)
HST 369. *^IMMIGRATION TO THE U.S. SINCE 1880 (4). The history of immigrants to the U.S. after 1880. Focuses on the experience of immigrants and their children in the U.S. and on the history of U.S. immigration policy. Includes several types of writing assignments: nongraded, drafts and revisions, and a research paper using outside primary and secondary sources and scholarly notations specific to the discipline of history. HST 369 satisfies WIC requirement for Liberal Studies majors but not History majors. (Baccalaureate Core Course) (Writing Intensive Course) Taught via Ecampus only.

## HST 370. *SOCIAL CHANGE AND AMERICAN

POPULAR MUSIC (4). An examination of the interactions between social history and popular music, including creation, performance, production, distribution, and reception. Social, ethnic, and economics groups have notoriously used popular music to identify themselves and their boundaries. This course examines how the functions of popular music in our culture and economy have changed over time, and the ways in which popular music reflects and sometimes helps precipitate social change. (Bacc Core Course)
HST 381. *HISTORY OF AFRICA (4). History of Africa from earliest times to present, including origins of human society, slave trade, European imperialism and African nationalism. Covers Africa before 1830. HST 381 and HST 382 need not be taken in sequence. (H) (NC) (Bacc Core Course)
HST 382. *HISTORY OF AFRICA (4). History of Africa from earliest times to present, including origins of human society, slave trade, European imperialism and African nationalism. Covers Nineteenth and Twentieth century Africa. (H) (NC) (Bacc Core Course) PREREQS: HST 381 and HST 382 need not be taken in sequence.

HST 382H. *HISTORY OF AFRICA (4). History of Africa from earliest times to present, including origins of human society, slave trade, European imperialism and African nationalism. Covers Nineteenth and Twentieth century Africa. (H) (NC) (Bacc Core Course) PREREQS: HST 381 and HST 382 need not be taken in sequence. Honors College approval required.
HST 385. *THE ARAB-ISRAELI CONFLICT (4). Examination of the origins of the Arab-Israeli conflict and subsequent efforts to find a lasting solution. (H) (Bacc Core Course)
HST 385H. *THE ARAB-ISRAELI CONFLICT
(4). Examination of the origins of the Arab-Israeli conflict and subsequent efforts to find a lasting solution. (H) (Bacc Core Course) PREREQS: Honors College approval required.
HST 386. *MODERN IRAN: REVOLUTION
AND ITS AFTERMATH (4). The history of 20th century Iran with a focus on the Islamic revolution and its consequences. Readings will provide the
cultural and political background for understanding contemporary Iran and its place in the world. (Bacc Core Course)

## HST 386H. *MODERN IRAN: REVOLUTION

AND ITS AFTERMATH (4). The history of 20th century Iran with a focus on the Islamic revolution and its consequences. Readings will provide the cultural and political background for understanding contemporary Iran and its place in the world. (Bacc Core Course) PREREQS: Honors College approval required.
HST 387. *ISLAMIC CIVILIZATION (4). Political, social, and religious developments from 600 to 1400. Early history and the formation of Islamic society to the Mongol invasion. (H) (NC) (Bacc Core Course) CROSSLISTED as REL 387. PREREQS: HST/REL 387 and HST/REL 388 need not be taken in sequence
HST 388. *ISLAMIC CIVILIZATION (4). Political, social, and religious developments from 1400 to the present. The expansion of Islam, Turkic, and Asian dynasties, impact of Western imperialism and modern Islamic world. (H) (NC) (Bacc Core Course) CROSSLISTED as REL 388. PREREQS: HST/REL 387 and HST/REL 388 need not be taken in sequence.
HST 390. *MIDEAST WOMEN: IN THEIR OWN WORDS (4). The lives of modern Middle Eastern women as told in memoirs, autobiography and film. First-person narratives and film portrayals provide the means for understanding historical events and contemporary trends in the region. (Bacc Core Course)
HST 390H. *MIDEAST WOMEN: IN THEIR OWN WORDS (4). The lives of modern Middle Eastern women as told in memoirs, autobiography and film. First-person narratives and film portrayals provide the means for understanding historical events and contemporary trends in the region. (Bacc Core Course) PREREQS: Honors College approval required.

HST 391. *TRADITIONAL CHINA AND JAPAN
(4). Prehistory to Western encounters in the middle of the nineteenth century, with emphasis on the philosophical, artistic heritage, and social institutions of these two countries which form East Asia. HST 391 and HST 392 need not be taken in sequence. (H) (NC) (Bacc Core Course)

HST 392. *MODERN CHINA AND JAPAN (4). From the opening of East Asia in the midnineteenth century to the present, with emphasis on modern political movements and cultural transformation. HST 391 and HST 392 need not be taken in sequence. (H) (NC) (Bacc Core Course)
HST 396. *GENDER, FAMILY AND POLITICS IN TRADITIONAL CHINA (4). Study of the interaction between gender, family and politics as major factors shaping traditional Chinese experience. (Bacc Core Course)
HST 397. *GENDER, FAMILY AND POLITICS
IN MODERN CHINA (4). Study of the interaction between gender, family and politics as three factors shaping modern Chinese experience. Elective for history majors. (Bacc Core Course)
HST 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
HST 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
HST 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
HST 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
HST 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required

HST 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
HST 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
HST 407. ^SEMINAR (5). (Writing Intensive Course) This course is repeatable for a maximum of 20 credits.

HST 410. HISTORY INTERNSHIP (1-12).
Supervised work of a historical nature with historical societies, archives, museums, or other public or private organizations. No more than 6 of the maximum 12 credits may be used to satisfy the history major requirement of 51 credits. This course is repeatable for a maximum of 12 credits. PREREQS: Departmental approval required.

HST 415. SELECTED TOPICS (4). Selected topics of special or current interest not covered in other courses. (H) This course is repeatable for a maximum of 99 credits.
HST 415H. SELECTED TOPICS (4). Selected topics of special or current interest not covered in other courses. (H) This course is repeatable for a maximum of 99 credits. PREREQS: Honors College approval required.
HST 416. *FOOD IN WORLD HISTORY (4).
Historical analysis of food and cooking from pre-history to the present, with an emphasis on cross-cultural differences of food production and consumption. (Bacc Core Course) (H)
HST 421. HELLENISTIC GREECE (4). History of the Greek world from the end of the Peloponnesian War to the Roman conquest of Greece; the careers of Alexander the Great and his successors; the art, literature, science, religion, and philosophy of the post-classical or Hellenistic world. Not offered every year. (H)

HST 425. *THE HOLOCAUST IN ITS HISTORY (4). An inquiry into the causes, course, and impact of the Holocaust. The general theme of anti-Semitism in European history is explored for background. Topics discussed for comparative purposes include anti-Semitism in American history; other episodes of mass murder in the 20th century. Not offered every year. (H) (Bacc Core Course) CROSSLISTED as REL 425, REL 525.
HST 425H. *THE HOLOCAUST IN ITS HISTORY
(4). An inquiry into the causes, course, and impact of the Holocaust. The general theme of anti-Semitism in European history is explored for background. Topics discussed for comparative purposes include anti-Semitism in American history; other episodes of mass murder in the 20th century. Not offered every year. (Bacc Core Course) PREREQS: Honors College approval required.

HST 426. WORLD WAR I: A GLOBAL HISTORY
(4). Examines World War I from a global perspective, its origins, the course of the conflict and its aftermath, looking especially at Great Britain, France, Russia, Germany and their colonial possessions. Topics will include the concept of total war and the home fronts of a number of nations. PREREQS: HST 103 [D-]
HST 427. TEACHING THE HOLOCAUST (4). Provides a broad sense of the Holocaust; reviews the event itself, its long-term background (the history of anti-Semitism), and the rise of Nazism and Fascism in the years before World War II. Examines what has been learned from the Holocaust and addresses the broader issue of genocide, especially in the 20th century.
HST 428. HISTORY OF WESTERN THOUGHT (4). A synthesis of major developments in philosophy, science, social, and political theory and the arts in the European Enlightenment (1715-1789). Not offered every year. HST 428, HST 429, HST 430 need not be taken in sequence. (H)

HST 429. HISTORY OF WESTERN THOUGHT
(4). A synthesis of major developments in philosophy, science, social, and political theory and the arts between 1789 and 1890. Not offered every year. HST 428, HST 429, HST 430 need not be taken in sequence.
HST 430. HISTORY OF WESTERN THOUGHT
(4). A synthesis of major developments in philosophy, science, social, and political theory and the arts between 1890 and 1945. Not offered every year. HST 428, HST 429, HST 430 need not be taken in sequence. (H)
HST 432. THE HISTORY OF SEXUALITY (4). The history of human sexuality from ancient Greece to the present. (H) (SS)
HST 432H. THE HISTORY OF SEXUALITY (4).
The history of human sexuality from ancient Greece to the present. (H) (SS) PREREQS: Honors College approval required.
HST 433. ENGLISH HISTORY (4). The major political, cultural, economic, social and religious developments that have shaped the history of England and ultimately of America and much of the world. Medieval and Tudor-Stuart England. HST 433/HST 533, HST 434/HST 534 need not be taken in sequence. Not offered every year. (H)
HST 434. ENGLISH HISTORY (4). The major political, cultural, economic, social and religious developments that have shaped the history of England and ultimately of America and much of the world. England since 1688. HST 433/HST 533, HST 434/HST 534 need not be taken in sequence. Not offered every year. (H)
HST 435. THE HISTORY OF EUROPEAN WOMEN FROM 1400 TO 1789 (4). Focuses on the social, economic, and cultural roles women in Europe between 1400 and 1789. Topics include Christianity and women, the Renaissance lady, the European witch craze, women rulers, the debate about female intellectual abilities, and the beginning of the campaign for female equality. PREREQS: HST 102 and HST 103 recommended.

HST 436. HISTORY OF MODERN GERMANY
(4). Political, economic, social and intellectual developments from 1815 through the imperial, Weimar, and Nazi eras to the present. Not offered every year. (H)
HST 438. THE WILL AND THE SELF (4). A seminar on three major figures of nineteenthcentury German intellectual history: Arthur Schopenhauer, Friedrich Nietzsche, and Robert Musil. The central theme is the emergence of philosophical irrationalism, a distinctive view of human nature that developed in the context of modern science from Newton to Darwin to Einstein.
HST 452. MODERN MEXICO (4). History of
Mexico since 1810--economic, political, and social change and relations with the United States. Not offered every year. (H) PREREQS: HST 350 or HST 351 or upper-division standing.

HST 456. PROBLEMS IN LATIN AMERICAN
HISTORY (4). A focused examination of the origins and development of selective institutions and problems important to understanding the region, such as the church, the military, labor, political instability, economic stagnation, and social stratification. (H) PREREQS: HST 350 or HST 351 or upper-division standing.
HST 460. AMERICAN THOUGHT AND CULTURE
(4). An examination of the main currents of American thought and culture, emphasizing ideas and concepts that have influenced the development and growth of American institutions and values from 1776 to 1860 . Not offered every year. HST 460/HST 560, HST 461/HST 561, HST 462/HST 562 need not be taken in sequence. (H) PREREQS: HST 201 and HST 202 and HST 203 or upper-division standing.

HST 461. AMERICAN THOUGHT AND CULTURE
(4). An examination of the main currents of American thought and culture, emphasizing ideas and concepts that have influenced the development and growth of American institutions and values from 1860 to 1930. HST 460/HST 560, HST 461/HST 561, HST 462/HST 562 need not be taken in sequence. Not offered every year. (H) PREREQS: HST 201 and HST 202 and HST 203 or upper-division standing.
HST 462. AMERICAN THOUGHT AND CULTURE
(4). An examination of the main currents of American thought and culture, emphasizing ideas and concepts that have influenced the development and growth of American institutions and values from 1930 to the present. HST 460/ HST 560, HST 461/HST 561, HST 462/HST 562 need not be taken in sequence. Not offered every year. (H) PREREQS: HST 201 and HST 202 and HST 203 or upper-division standing.
HST 464. AMERICAN DIPLOMATIC HISTORY
(4). American diplomatic relations from the nation's founding to 1898. HST 464/HST 564 and HST 465/HST 565 need not be taken in sequence. Not offered every year. (H) PREREQS: HST 201 and HST 202 and HST 203 or upper-division standing.

## HST 465. *AMERICAN DIPLOMATIC HISTORY

(4). American diplomatic relations from 1898 to the present. HST 464/HST 564 and HST 465/HST 565 need not be taken in sequence. Not offered every year. (H) (Bacc Core Course) PREREQS: HST 201 and HST 202 and HST 203 or upperdivision standing.

## HST 465H. *AMERICAN DIPLOMATIC HISTORY

(4). American diplomatic relations from 1898 to the present. HST 464/HST 564 and HST 465/HST 565 need not be taken in sequence. Not offered every year. (H) (Bacc Core Course) PREREQS: HST 201 and HST 202 and HST 203 or upper-division standing. Honors College approval required.

## HST 466. RELIGION AND U.S. FOREIGN

RELATIONS (4). An examination of the intersection of religion and U.S. foreign relations from the late nineteenth century to the present. Surveys major events in U.S. diplomacy, including war and peace and explores the role of religion and religious ideas in shaping national identity, core values, and civil religion. CROSSLISTED as REL 466/REL 566. PREREQS: HST 202 and HST 203 or upper-division standing.

## HST 467. HISTORY OF THE AMERICAN WEST

(4). Important themes in the transformation of western America from the pre-industrial world of native Americans to the emergence of the region as a major force in the cultural, economic, and political life of the United States. HST 467/HST 567 and HST 468/HST 568 need not be taken in sequence. Not offered every year. (H) PREREQS: HST 201 and HST 202 and HST 203 or upperdivision standing.
HST 468. HISTORY OF THE AMERICAN WEST
(4). Important themes in the transformation of western America from the pre-industrial world of native Americans to the emergence of the region as a major force in the cultural, economic, and political life of the United States. HST 467/HST 567 and HST 468/HST 568 need not be taken in sequence. Not offered every year. (H) PREREQS: HST 201 and HST 202 and HST 203 or upperdivision standing.

## HST 469. HISTORY OF THE PACIFIC

NORTHWEST (4). The demographic, ecological, and cultural transformation of Oregon,
Washington, and Idaho from Indian times to the present. Not offered every year. (H) PREREQS: HST 201 and HST 202 and HST 203 or upperdivision standing.
HST 470. RELIGION IN THE AMERICAN WEST (4). The history of religion in the American West. Examines four themes in the religious history of the American West: locations (the designation of particular places as special), migrations
(movement in and out of the region), adaptations (changes over time, in response to changing conditions), and discrimination (recognition of difference, as well as prejudicial treatment based on difference). Engages with various primary and secondary sources, including texts, films, and photographs. CROSSLISTED as REL 470.

HST 471. COLONIAL AMERICA (4). Economic, political, social, religious, and intellectual development of colonial North America from the English background to 1689. HST 471/HST 571, HST 472/572 need not be taken in sequence. Not offered every year. (H) PREREQS: HST 201 or upper-division standing.

HST 472. COLONIAL AMERICA (4). Economic, political, social, religious, and intellectual development of colonial North America from 1689 to 1763. HST 471/HST 571, HST 472/572 need not be taken in sequence. Not offered every year. (H) PREREQS: HST 201 or upper-division standing.
HST 473. THE ERA OF THE AMERICAN
REVOLUTION (4). The American Revolution, the drafting of the Constitution, and the launching of the new nation, 1763 to 1789. Not offered every year. (H) PREREQS: HST 201 or upper-division standing.
HST 474. JEFFERSONIAN AND JACKSONIAN DEMOCRACY (4). American political, economic, religious, and social development during the early and middle national era with emphasis on the formation and growth of political parties, territorial expansion and western settlement, and the beginnings of sectional conflict. Not offered every year. (H) PREREQS: HST 201 and HST 202 or upper-division standing.
HST 475. CIVIL WAR AND RECONSTRUCTION (4). Origins of the war, nature of the war, and the critical postwar era, 1830s to 1880s, with special attention to the changing historiography of the period. Not offered every year. (H) PREREQS: HST 202 or upper-division standing.
HST 477. THE PROGRESSIVE AND NEW DEAL ERAS (4). Twentieth-century U.S. history from 1900 to 1939, with emphasis on political and economic developments; attention given to diplomatic, cultural, and social change. Not offered every year. (H) PREREQS: HST 203
HST 478. THE U.S. SINCE 1939 (4). United States political, cultural, and diplomatic history from the Second World War through the 1970s, with specia emphasis on the Cold War at home and abroad. Not offered every year. (H) PREREQS: HST 203 or upper-division standing.
HST 481. *ENVIRONMENTAL HISTORY OF THE UNITED STATES (4). A study of human interaction with the environment and the transformation of the landscape and ecology of North America from the Indian period to the present, with special attention to the progressive alterations induced by the modernizing world of agriculture, industry, urbanism, and their relation to the market system in the United States. Not offered every year. (H) (Bacc Core Course) PREREQS: Upper-division standing. HST 201, HST 202, HST 203 are recommended.

HST 485. *POLITICS AND RELIGION IN THE MODERN MIDDLE EAST (4). The role of religious and secular ideologies in the politics of the 20th century Middle East. Topics include the impact of liberal and nationalist thought, the Iranian revolution, radical Islamist movements, and Zionism. (H) (NC) (Bacc Core Course) CROSSLISTED as REL 485/REL 585. PREREQS: Upper-division standing or instructor approval required.
HST 486. A HISTORY OF CHRISTIANITY IN AFRICA (4). An investigation of the historical development and changing character of Christianity in Africa. Topics include the examination of the role of Christianity in the development of social identity and politics in historic Ethiopia from the early first millennium CE;

Portuguese missionary efforts in Central Africa during the period of the Atlantic slave trade from the 15th to the 18th centuries; the role of 19th century missionaries in both spreading Christianity in Africa and during the European colonization of Africa at the end of the 19th century, the emergence of African independence churches and prophetic Christianity in the 20th century; and the PREREQS: HST 381 and/or HST 382
HST 487. WORLD WAR II: A GLOBAL HISTORY (4). Examines World War II from a global perspective, its origins, the course of the conflict and its aftermath, looking especially at the US USSR, Britain, Germany and Japan. Topics will include the concept of total war and the home fronts of a number of nations. PREREQS: HST 103
HST 488. *THE UNITED STATES AND VIETNAM
1945-1995 (4). Examines the Vietnam War from both the US and Vietnamese perspective within the context of the Cold War. Political, military, social and moral issues will be covered within the concept of American exceptionalism. (Bacc Core Course)
HST 494. MODERN JAPAN: A CULTURAL HISTORY (4). Japanese history from the Meiji to the contemporary period (1980s/1990s). Examination of Japanese tradition and the Tokugawa period. Investigation of Westernization/ modernization, imperialism, national identity, gender, atomic bomb(s), and post-war culture. (H)
HST 495. CHINA IN 20TH CENTURY (4). Treats the decline of the Confucian tradition, shifts in the economy, and metamorphoses of the political system. Attention is given to China's attempt to balance her Communistic revolutionary legacies with her current modernizing goals. (H) (NC) PREREQS: HST 391 and HST 392 or upperdivision standing.

HST 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

HST 499H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
HST 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
HST 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.
HST 505. READING AND CONFERENCE (116). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
HST 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
HST 507. SEMINAR (5). This course is repeatable for a maximum of 20 credits.
HST 510. HISTORY INTERNSHIP (1-12). Supervised work of a historical nature with historical societies, archives, museums, or other public or private organizations. No more than 6 of the maximum 12 credits may be used to satisfy the history major requirement of 51 credits. This course is repeatable for a maximum of 12 credits. PREREQS: Departmental approval required.
HST 513. HISTORY OF SCIENCE (4). Stresses the interaction of scientific ideas with their social and cultural context. Development of modern science in the 18th and 19th centuries and to the present. HST 511, HST 512, HST 513 need taken in sequence. PREREQS: Graduate standing; at least one science sequence.
HST 515. SELECTED TOPICS (4). Selected topics of special or current interest not covered in other courses. This course is repeatable for a maximum of 16 credits.
HST 516. FOOD IN WORLD HISTORY (4). Historical analysis of food and cooking from
pre-history to the present, with an emphasis on cross-cultural differences of food production and consumption.

HST 521. HELLENISTIC GREECE (4).
History of the Greek world from the end of the Peloponnesian War to the Roman conquest of Greece; the careers of Alexander the Great and his successors; the art, literature, science, religion and philosophy of the post-classical or Hellenistic world. Not offered every year. PREREQS: HST 101 or graduate standing.
HST 525. THE HOLOCAUST IN ITS HISTORY
(4). An inquiry into the causes, course, and impact of the Holocaust. The general theme of anti-Semitism in European history is explored for background. Topics discussed for comparative purposes include anti-Semitism in American history; other episodes of mass murder in the 20th century. Not offered every year. CROSSLISTED as REL 425, REL 525.

HST 526. WORLD WAR I: A GLOBAL HISTORY (4). Examines World War I from a global perspective, its origins, the course of the conflict and its aftermath, looking especially at Great Britain, France, Russia, Germany and their colonial possessions. Topics will include the concept of total war and the home fronts of a number of nations. PREREQS: HST 103

HST 527. TEACHING THE HOLOCAUST (4).
Provides a broad sense of the Holocaust; reviews the event itself, its long-term background (the history of anti-Semitism), and the rise of Nazism and Fascism in the years before World War II. Examines what has been learned from the Holocaust and addresses the broader issue of genocide, especially in the 20th century.
HST 528. HISTORY OF WESTERN THOUGHT
(4). A synthesis of major developments in philosophy, science, social, and political theory and the arts in the European Enlightenment (1715-1789). Not offered every year. HST 528, HST 529, HST 530 need not be taken in sequence.
HST 529. HISTORY OF WESTERN THOUGHT
(4). A synthesis of major developments in philosophy, science, social, and political theory and the arts between 1789 and 1890. Not offered every year. HST 528, HST 529, HST 530 need not be taken in sequence.
HST 530. HISTORY OF WESTERN THOUGHT
(4). A synthesis of major developments in philosophy, science, social, and political theory and the arts between 1890 and 1945. Not offered every year. HST 528, HST 529, HST 530 need not be taken in sequence.
HST 532. THE HISTORY OF SEXUALITY (4). The history of human sexuality from ancient Greece to the present.
HST 533. ENGLISH HISTORY (4). The major political, cultural, economic, social and religious developments that have shaped the history of England and ultimately of America and much of the world. Medieval and Tudor-Stuart England. HST 433/HST 533, HST 434/HST 534 need not be taken in sequence. Not offered every year.
HST 534. ENGLISH HISTORY (4). The major political, cultural, economic, social and religious developments that have shaped the history of England and ultimately of America and much of the world. England since 1688. HST 433/HST 533 HST 434/HST 534 need not be taken in sequence Not offered every year.
HST 535. THE HISTORY OF EUROPEAN WOMEN FROM 1400 TO 1789 (4). Focuses on the social, economic, and cultural roles women in Europe between 1400 and 1789. Topics include Christianity and women, the Renaissance lady, the European witch craze, women rulers, the debate about female intellectual abilities, and the beginning of the campaign for female equality. PREREQS: HST 102, HST 103 recommended.

HST 536. HISTORY OF MODERN GERMANY
(4). Political, economic, social and intellectual developments from 1815 through the imperial, Weimar, and Nazi eras to the present. Not offered every year.
HST 552. MODERN MEXICO (4). History of Mexico since 1810--economic, political, and social change and relations with the United States. Not offered every year. PREREQS: HST 350 or HST 351 or graduate standing.
HST 556. PROBLEMS IN LATIN AMERICAN HISTORY (4). A focused examination of the origins and development of selective institutions and problems important to understanding the region, such as the church, the military, labor, political instability, economic stagnation, and social stratification. PREREQS: HST 350 or HST 351 or graduate standing.
HST 560. AMERICAN THOUGHT AND CULTURE (4). An examination of the main currents of American thought and culture, emphasizing ideas and concepts that have influenced the development and growth of American institutions and values from 1776 to 1860. HST 460/HST 560, HST 461/HST 561, HST 462/HST 562 need not be taken in sequence. Not offered every year. PREREQS: HST 201 and HST 202 and HST 203 or graduate standing.
HST 561. AMERICAN THOUGHT AND CULTURE
(4). An examination of the main currents of American thought and culture, emphasizing ideas and concepts that have influenced the development and growth of American institutions and values from 1860 to 1930. HST 460/HST 560, HST 461/HST 561, HST 462/HST 562 need not taken in sequence. Not offered every year. PREREQS: HST 201 and HST 202 and HST 203 or graduate standing.
HST 562. AMERICAN THOUGHT AND CULTURE
(4). An examination of the main currents of American thought and culture, emphasizing ideas and concepts that have influenced the development and growth of American institutions and values from 1930 to the present. HST 460/ HST 560, HST 461/HST 561, HST 462/HST 562 need not be taken in sequence. Not offered every year. PREREQS: HST 201 and HST 202 and HST 203 or graduate standing.
HST 564. AMERICAN DIPLOMATIC HISTORY
(4). American diplomatic relations from the nation's founding to 1898. HST 464/HST 564 and HST 465/HST 565 need not be taken in sequence. Not offered every year. PREREQS: HST 201 and HST 202 and HST 203 or graduate standing.
HST 565. AMERICAN DIPLOMATIC HISTORY (4). American diplomatic relations from 1898 to the present. HST 464/HST 564 and HST 465/HST 565 need not be taken in sequence. Not offered every year. PREREQS: HST 201 and HST 202 and HST 203 or graduate standing.
HST 566. RELIGION AND U.S. FOREIGN
RELATIONS (4). An examination of the intersection of religion and U.S. foreign relations from the late nineteenth century to the present. Surveys major events in U.S. diplomacy, including war and peace and explores the role of religion and religious ideas in shaping national identity, core values, and civil religion. CROSSLISTED as REL 466/REL 566. PREREQS: HST 202 and HST 203 or upper-division standing.
HST 567. HISTORY OF THE AMERICAN WEST
(4). Important themes in the transformation of western America from the pre-industrial world of native Americans to the emergence of the region as a major force in the cultural, economic, and political life of the United States. HST 467/HST 567 and HST 468/HST 568 need not be taken in sequence. Not offered every year. PREREQS: HST 201 and HST 202 and HST 203 or graduate standing.
HST 568. HISTORY OF THE AMERICAN WEST
(4). Important themes in the transformation of western America from the pre-industrial world of
native Americans to the emergence of the region as a major force in the cultural, economic, and political life of the United States. HST 467/HST 567 and HST 468/HST 568 need not be taken in sequence. Not offered every year. PREREQS: HST 201 and HST 202 and HST 203 or graduate standing.

HST 569. HISTORY OF THE PACIFIC
NORTHWEST (4). The demographic, ecological, and cultural transformation of Oregon,
Washington, and Idaho from Indian times to the present. Not offered every year. PREREQS: HST 201 and HST 202 and HST 203 or graduate standing.

HST 570. RELIGION IN THE AMERICAN WEST
(4). The history of religion in the American West. Examines four themes in the religious history of the American West: locations (the designation of particular places as special), migrations movement in and out of the region), adaptations (changes over time, in response to changing conditions), and discriminations (recognition of difference, as well as prejudicial treatment based on difference). Engages with various primary and secondary sources, including texts, films, and photographs. CROSSLISTED as REL 570.

HST 571. COLONIAL AMERICA (4). Economic, political, social, religious, and intellectual development of colonial North America from the English background to 1689. HST 471/HST 571 , HST 472/572 need not be taken in sequence. Not offered every year. PREREQS: HST 201 or graduate standing.
HST 572. COLONIAL AMERICA (4). Economic, political, social, religious, and intellectual development of colonial North America from 1689 to 1763. HST 471/HST 571, HST 472/572 need not be taken in sequence. Not offered every year. PREREQS: HST 201 or graduate standing.
HST 573. THE ERA OF THE AMERICAN
REVOLUTION (4). The American Revolution, the drafting of the Constitution, and the launching of the new nation, 1763 to 1789. Not offered every year. PREREQS: HST 201 or graduate standing.
HST 574. JEFFERSONIAN AND JACKSONIAN
DEMOCRACY (4). American political, economic, religious, and social development during the early and middle national era with emphasis on the formation and growth of political parties, territorial expansion and western settlement, and the beginnings of sectional conflict. Not offered every year. PREREQS: HST 201 and HST 202 or graduate standing.
HST 575. CIVIL WAR AND RECONSTRUCTION (4). Origins of the war, nature of the war, and the critical postwar era, 1830s to 1880s, with special attention to the changing historiography of the period. Not offered every year. PREREQS: HST 202 or graduate standing.

HST 577. THE PROGRESSIVE AND NEW
DEAL ERAS (4). Twentieth-century U.S. history from 1900 to 1939, with emphasis on political and economic developments; attention given to diplomatic, cultural, and social change. Not offered every year. PREREQS: HST 203
HST 578. THE U.S. SINCE 1939 (4). United States political, cultural, and diplomatic history from the Second World War through the 1970s, with special emphasis on the Cold War at home and abroad. Not offered every year. PREREQS: HST 203 or graduate standing.
HST 581. ENVIRONMENTAL HISTORY OF
THE UNITED STATES (4). A study of human interaction with the environment and the transformation of the landscape and ecology of North America from the Indian period to the present, with special attention to the progressive alterations induced by the modernizing world of agriculture, industry, urbanism, and their relation to the market system in the United States. Not offered every year. PREREQS: Graduate standing. HST 201, HST 202, HST 203 recommended.

HST 585. POLITICS AND RELIGION IN THE MODERN MIDDLE EAST (4). The role of religious and secular ideologies in the politics of the 20th century Middle East. Topics include the impact of liberal and nationalist thought, the Iranian revolution, radical Islamist movements, and Zionism. CROSSLISTED as REL 485/REL 585. PREREQS: Graduate standing or instructor approval required.
HST 586. A HISTORY OF CHRISTIANITY IN AFRICA (4). An investigation of the historical development and changing character of Christianity in Africa. Topics include the examination of the role of Christianity in the development of social identity and politics in historic Ethiopia from the early first millennium CE Portuguese missionary efforts in Central Africa during the period of the Atlantic slave trade from the 15th to the 18th centuries; the role of 19th century missionaries in both spreading Christianity in Africa and during the European colonization of Africa at the end of the 19th century; the emergence of African independence churches and prophetic Christianity in the 20th century; and the PREREQS: HST 381 and/or HST 382

HST 587. WORLD WAR II: A GLOBAL HISTORY (4). Examines World War II from a global perspective, its origins, the course of the conflict and its aftermath, looking especially at the US, USSR, Britain, Germany and Japan. Topics will include the concept of total war and the home fronts of a number of nations. PREREQS: HST 103*
HST 588. THE UNITED STATES AND VIETNAM 1945-1995 (4). Examines the Vietnam War from both the US and Vietnamese perspective within the context of the Cold War. Political, military, social and moral issues will be covered within the concept of American exceptionalism.
HST 594. MODERN JAPAN: A CULTURAL HISTORY (4). Japanese history from the Meiji to the contemporary period (1980s/1990s). Examination of Japanese tradition and the Tokugawa period. Investigation of Westernization/ modernization, imperialism, national identity, gender, atomic bomb(s), and post-war culture.
HST 595. CHINA IN 20TH CENTURY (4). Treats the decline of the Confucian tradition, shifts in the economy, and metamorphoses of the political system. Attention is given to China's attempt to balance her Communistic revolutionary legacies with her current modernizing goals. PREREQS: HST 391 and HST 392 or graduate standing.
HST 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## HISTORY OF SCIENCE COURSES

HSTS 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
HSTS 405. READING AND CONFERENCE
(1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
HSTS 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

HSTS 411. *HISTORY OF SCIENCE (4). Stresses the interaction of scientific ideas within their social and cultural contexts. Scientific thought from ancient civilizations to the post-Roman era. Not offered every year. HSTS 411/HSTS 511, HSTS 412/HSTS 512, HSTS 413/HSTS 513 need not be taken in sequence. (H) (SS) (Bacc Core Course) PREREQS: Upper-division standing; at least one science sequence.
HSTS 412. *HISTORY OF SCIENCE (4). Stresses the interaction of scientific ideas within their social and cultural context. Origin of modern science in the 16th and 17th centuries. HSTS 411/HSTS 511, HSTS 412/HSTS 512, HSTS 413/HSTS 513 need not be taken in sequence. (Bacc Core Course) PREREQS: Upper-division standing and at least
one science sequence.
HSTS 413. *HISTORY OF SCIENCE (4). Stresses
the interaction of scientific ideas with their social and cultural context. Development of modern science in the 18th and 19th centuries and to the present. HSTS 411/HSTS 511, HSTS 412/HSTS 512, HSTS 413/HSTS 513 need not be taken in sequence. (Bacc Core Course) PREREQS: Upper-division standing and at least one science sequence.
HSTS 414. *HISTORY OF TWENTIETH-
CENTURY SCIENCE (4). Focuses on the organization, practice, and theories of the natural sciences in the twentieth century, with emphasis primarily on the European and American scientific traditions from the 1890s to the present. (H) (SS) (Bacc Core Course)
HSTS 415. *^THEORY OF EVOLUTION AND FOUNDATION OF MODERN BIOLOGY (4). Origin and development of Darwin's theory of evolution. Reception of theory and history of evolution to the present. (H) (SS) (Bacc Core Course) (Writing Intensive Course) PREREQS: Upper-division standing.
HSTS 415H. *^THEORY OF EVOLUTION AND FOUNDATION OF MODERN BIOLOGY (4). Origin and development of Darwin's theory of evolution. Reception of theory and history of evolution to the present. (H) (SS) (Bacc Core Course) (Writing Intensive Course) PREREQS: Upper-division standing and Honors College approval required.
HSTS 416. *HISTORY OF MEDICINE PRE-1800 (4). History of medical theory and the changing role of the physician; internal development of medicine as a discipline as well as a profession; relationship of medicine's development to general changes in science and culture, to 1800. (Bacc Core Course)
HSTS 417. *^HISTORY OF MEDICINE (4). History of medical theory and the changing role of the physician; internal development of medicine as a discipline as well as a profession; relationship of medicine's development to general changes in science and culture. (H) (SS) (Bacc Core Course) (Writing Intensive Course) PREREQS: Upperdivision standing.

HSTS 418. *SCIENCE AND SOCIETY (4). Historical study of the interaction of science and society. Case studies are used from the 18th through 20th centuries. Topics vary by term. (Bacc Core Course)
HSTS 419. *^STUDIES IN SCIENTIFIC
CONTROVERSY: METHODS AND PRACTICES
(4). Course focuses on accounts of scientific discoveries that have been controversial, to understand the rational, psychological, and social characteristics which have defined the meaning and procedures of the natural sciences. Case studies are used from the 18th through 20th centuries. (H) (SS) (Bacc Core Course) (Writing Intensive Course)
HSTS 419H. *^STUDIES IN SCIENTIFIC
CONTROVERSY: METHODS AND PRACTICES
(4). Course focuses on accounts of scientific discoveries that have been controversial, to understand the rational, psychological, and social characteristics which have defined the meaning and procedures of the natural sciences. Case studies are used from the 18th through 20th centuries. (H) (SS) (Bacc Core Course) (Writing Intensive Course) PREREQS: Honors College approval required.

HSTS 421. *TECHNOLOGY AND CHANGE (4). Current views of technology and associated cultural changes and the contexts in which these developed; the changing role of technology in modern industrial society, especially in the United States; recent efforts to predict and control technological developments and the social and cultural consequences. (H) (SS) (Bacc Core Course) PREREQS: Upper-division standing.

HSTS 422. *^HISTORICAL STUDIES OF SCIENCE AND POLITICS (4). The historical study of scientists, their work, their political and ethical choices mainly in the United States and Europe from the 1920s to the 1950s. (H) (Bacc Core Course) (Writing Intensive Course)
HSTS 423. *SCIENCE AND RELIGION (4).
A historical survey of critical issues in the relationship of Western science and religion from ancient times to the end of the twentieth century. (H) (Bacc Core Course)

HSTS 425. *^HISTORY OF THE LIFE SCIENCES
(4). History of ideas about life from Greeks to present day. Cultural background and development of major theories of the life sciences with emphasis on natural history. (Bacc Core Course) (Writing Intensive Course) PREREQS: Upperdivision standing plus one year college sciences.
HSTS 437. ^HISTORY OF ANIMALS IN
SCIENCE (4). Using a variety of sources, this course explores the ways humans have thought about and used animals in science and medicine from the seventeenth century to the present. How has science constructed the boundaries between humans and animals, and what have the consequences been for each? (Writing Intensive Course)

HSTS 440. *HISTORY OF PSYCHOTHERAPY
(4). The history of psychotherapy in modern Western societies, from biomedical, cultural, political, and psychosocial perspectives. Not offered every year. (H) (Bacc Core Course)
HSTS 440H. *HISTORY OF PSYCHOTHERAPY
(4). The history of psychotherapy in modern Western societies, from biomedical, cultural, political, and psychosocial perspectives. Not offered every year. (H) (Bacc Core Course) PREREQS: Honors College approval required.
HSTS 451. *THE HISTORY OF OUTER SPACE
(4). Advancements in technology and science has made it possible to observe, robotically explore, personally visit, and daily use outer space including an overview of what we have learned, how this endeavor has shaped human civilization and culture, and what may lie ahead. (Bacc Core Course)
HSTS 470. *ECOLOGY AND HISTORY:
LANDSCAPES OF THE COLUMBIA BASIN (3).
Integrates environmental history and landscape ecology of the Columbia River Basin from geologic origins to the present, to create an understanding of change caused by natural processes and human activities. CROSSLISTED as FW 470/FW 570. (H) (Bacc Core Course) PREREQS: (HST 201 and HST 202 and HST 203) or BI 370 or equivalent course work.
HSTS 499. SPECIAL TOPICS (1-16). (H) This course is repeatable for a maximum of 16 credits.
HSTS 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
HSTS 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Graduate standing; departmental approval required.

HSTS 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
HSTS 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.
HSTS 511. HISTORY OF SCIENCE (4). Stresses the interaction of scientific ideas within their social and cultural context. Scientific thought from ancient civilizations to the post-Roman era. Not offered every year. HSTS 411/HSTS 511, HSTS 412/HSTS 512, HSTS 413/HSTS 513 need not be taken in sequence. PREREQS: Graduate standing and at least one science sequence.

HSTS 512. HISTORY OF SCIENCE (4). Stresses the interaction of scientific ideas with their social and cultural context. Origin of modern science in the 16th and 17th centuries. HSTS 411/HSTS 511 HSTS 412/HSTS 512, HSTS 413/HSTS 513 need not be taken in sequence. PREREQS: Graduate standing and at least one science sequence.

HSTS 513. HISTORY OF SCIENCE (4). Stresses the interaction of scientific ideas with their social and cultural context. Development of modern science in the 18th and 19th centuries and to the present. HSTS 411/HSTS 511, HSTS 412/HSTS 512, HSTS 413/HSTS 513 need not be taken in sequence. PREREQS: Graduate standing and at least one science sequence.
HSTS 514. HISTORY OF TWENTIETH-CENTURY SCIENCE (4). Focuses on the organization, practice, and theories of the natural sciences in the twentieth century, with emphasis primarily on the European and American scientific traditions from the 1890s to the present.

## HSTS 515. THEORY OF EVOLUTION AND

 FOUNDATION OF MODERN BIOLOGY (4). Origin and development of Darwin's theory of evolution. Reception of theory and history of evolution to the present. PREREQS: Graduate standing.HSTS 516. HISTORY OF MEDICINE PRE-1800 (4). History of medical theory and the changing role of the physician; internal development of medicine as a discipline as well as a profession; relationship of medicine's development to general changes in science and culture, to 1800
HSTS 517. HISTORY OF MEDICINE (4). History of medical theory and the changing role of the physician; internal development of medicine as a discipline as well as a profession; relationship of medicine's development to general changes in science and culture. PREREQS: Graduate standing.
HSTS 518. SCIENCE AND SOCIETY (4).
Historical study of the interaction of science and society. Case studies are used from the 18th through 20th centuries. Topics vary by term.

## HSTS 519. STUDIES IN SCIENTIFIC

CONTROVERSY: METHOD AND PRACTICE
OF (4). Course focuses on accounts of scientific discoveries that have been controversial, to understand the rational, psychological, and social characteristics which have defined the meaning and procedures of the natural sciences. Case studies are used from the 18th through 20th centuries.

HSTS 521. TECHNOLOGY AND CHANGE (4).
Current views of technology and associated cultural changes and the contexts in which these developed; the changing role of technology in modern industrial society, especially in the United States; recent efforts to predict and control technological developments and the social and cultural consequences. PREREQS: Graduate standing.
HSTS 522. HISTORICAL STUDIES OF SCIENCE AND POLITICS (4). The historical study of scientists, their work, their political and ethical choices mainly in the United States and Europe from the 1920s to the 1950s.

## HSTS 523. SCIENCE AND RELIGION (4)

A historical survey of critical issues in the relationship of Western science and religion from ancient times to the end of the twentieth century PREREQS: Graduate standing.
HSTS 525. HISTORY OF THE LIFE SCIENCES
(4). History of ideas about life from Greeks to present day. Cultural background and development of major theories of the life sciences with emphasis on natural history. PREREQS: Graduate standing plus one year college sciences.
HSTS 537. HISTORY OF ANIMALS IN SCIENCE
(4). Using a variety of sources, this course explores the ways humans have thought about and used animals in science and medicine
from the seventeenth century to the present. How has science constructed the boundaries between humans and animals, and what have the consequences been for each? PREREQS: Upperdivision standing.
HSTS 540. HISTORY OF PSYCHOTHERAPY (4). The history of psychotherapy in modern Western societies, from biomedical, cultural, political, and psychosocial perspectives. Not offered every year.

## HSTS 570. ECOLOGY AND HISTORY:

LANDSCAPES OF THE COLUMBIA BASIN (3). Integrates environmental history and landscape ecology of the Columbia River Basin from geologic origins to the present, to create an understanding of change caused by natural processes and human activities. CROSSLISTED as FW 470/FW 570. PREREQS: (HST 201 and HST 202 and HST 203) or BI 370 or equivalent course work.

HSTS 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 36 credits.
HSTS 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Graduate standing and departmental approval required.

## ■ PEACE STUDIES COURSES

PAX 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
PAX 201. STUDY OF PEACE AND THE CAUSES OF CONFLICT (3). Examination of the causes of personal, social, and institutional conflict and peaceful, constructive means of dealing with conflict. The history and current status of peace movements within and outside governments; prospects for world peace. Case studies in peace and conflict. (H) CROSSLISTED as REL 201.
PAX 402. INDEPENDENT STUDY (1-16). Individual basic and applied study projects on peace-related issues, designed in consultation with the Peace Studies Program director or a member of the Peace Studies faculty. This course is repeatable for a maximum of 16 credits.
PAX 405. READING AND CONFERENCE (1-
16). Study supervised and directed by members of the Peace Studies Program committee or approved faculty, as arranged by the student and Peace Studies Program director. This course is repeatable for a maximum of 16 credits.
PAX 407. SEMINAR (1-16). Close examination of peace-related topics, including theory, method, research, and application. May be taken more than one time as topics vary. This course is repeatable for a maximum of 16 credits.
PAX 410. PEACE STUDIES INTERNSHIP (1-16). Directed, supervised, and evaluated field work, to supplement the student's classroom work, arranged one term in advance. This course is repeatable for a maximum of 16 credits.

PAX 415. TOPICS IN PEACE STUDIES (1-16). Selected topics relevant to the study of conflict, peace, and war. May be taken more than one time as topics vary.
PAX 499. TOPICS IN PEACE STUDIES (1-4). Examination of the work of a particular nonviolence theorist or of a specific problem; e.g., pacifism and humanitarian intervention, nonviolence and gender. Course may be repeated as appropriate. Not offered every year. This course is repeatable for a maximum of 8 credits.
PAX 502. INDEPENDENT STUDY (1-16). Individual basic and applied study projects on peace-related issues, designed in consultation with the Peace Studies Program director or a member of the Peace Studies faculty. This course is repeatable for a maximum of 16 credits.
PAX 505. READING AND CONFERENCE (1-16). Study supervised and directed by members of the Peace Studies Program committee or approved faculty, as arranged by the student and Peace Studies Program director. This course is
repeatable for a maximum of 16 credits.
PAX 507. SEMINAR (1-16). Close examination of peace-related topics, including theory, method, research, and application. May be taken more than one time as topics vary. This course is repeatable for a maximum of 16 credits.
PAX 510. PEACE STUDIES INTERNSHIP (1-16). Directed, supervised, and evaluated field work, to supplement the student's classroom work, arranged one term in advance. This course is repeatable for a maximum of 16 credits.
PAX 515. TOPICS IN PEACE STUDIES (1-16). Selected topics relevant to the study of conflict, peace, and war. May be taken more than one time as topics vary.
PAX 599. TOPICS IN PEACE STUDIES (1-4). Examination of the work of a particular nonviolence theorist or of a specific problem; e.g., pacifism and humanitarian intervention, nonviolence and gender. Course may be repeated as appropriate. Not offered every year. This course is repeatable for a maximum of 8 credits.

## ■ PHILOSOPHY COURSES

PHL 101. CRITICAL THINKING (4). Analysis of arguments, basic patterns of inductive and deductive reasoning, logical relations, and logical fallacies. Intended to improve analytical, critical and reasoning skills.

PHL 110. CRITICAL ANALYSIS (3). Development of a question-asking attitude for academic study. Enables students to explore issues and make informed decisions. PREREQS: EOP students only.
PHL 121. *REASONING AND WRITING (3). Develops critical thinking skills to increase clarity and effectiveness of student writing; uses writing experiences to teach critical thinking skills. Subjects include identifying and evaluating arguments, analyzing assumptions, justifying claims with reasons, avoiding confused or dishonest reasoning, applying common patterns of reasoning in everyday contexts, and writing cogent complex arguments. (Bacc Core Course)
PHL 150. *GREAT IDEAS IN PHILOSOPHY (3). Explores the assumptions and deeper meanings of familiar concepts and experiences. An introduction to some basic and famous ideas in Western thought. Topics may include truth, beauty, infinity, perception, freedom, pleasure, knowledge, mind and body, morality, justice, and political authority. (H) (Bacc Core Course)
PHL 160. *QUESTS FOR MEANING: WORLD RELIGIONS (4). A survey and analysis of the search for meaning and life fulfillment represented in major religious traditions of the world, such as Hinduism, Buddhism, Taoism, Zen, Confucianism, Judaism, Christianity, and Islam. Lec/rec. (H) (Bacc Core Course) CROSSLISTED as REL 160.
PHL 160H. *QUESTS FOR MEANING: WORLD RELIGIONS (4). A survey and analysis of the search for meaning and life fulfillment represented in major religious traditions of the world, such as Hinduism, Buddhism, Taoism, Zen, Confucianism, Judaism, Christianity, and Islam. Lec/rec. (H) (Bacc Core Course) CROSSLISTED as REL 160. PREREQS: Honors College approval required.
PHL 170. *THE IDEA OF GOD (4). Concepts and images of God and their connections to worldviews, experience, science, gender, society, selfunderstanding, and religions. (Bacc Core Course) CROSSLISTED as PHL 170.
PHL 199. SPECIAL STUDIES (1-16). May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits.
PHL 201. *INTRODUCTION TO PHILOSOPHY
(4). An in-depth introduction to the methods and ideas of Western philosophy, concentrating on such great figures as Socrates, Plato, Aristotle, Descartes, Kant and Nietzsche and such topics as the nature of reality, the existence
of God, knowledge and doubt, the relation of consciousness to the world, free will and determinism, good and evil, and minds and machines. Philosophers and ideas covered will vary by the section. Written assignments are required. (H) (Bacc Core Course)
PHL 202. INTRODUCTION TO RELIGIOUS
STUDIES (4). An introduction to the academic study of religion. It examines the concepts of religion and the sacred, approaches to the study of religion, ubiquitous features of religious experience, including symbol, myth, ritual, and community, understandings of the human condition in diverse religious traditions, and ways religious communities address challenges of pluralism and secularization. CROSSLISTED as REL 202.
PHL 205. *ETHICS (4). Introduction to ethical theory and to the evaluation of ethical issues in society such as sexual ethics and euthanasia. Includes the study of philosophical theories of moral responsibility and moral virtue, and the philosophical ideas behind ethics debates in society. Students are encouraged to develop their own positions on ethical issues through discussion projects and term papers. Lec/rec. (H) (Bacc Core Course)
PHL 205H. *ETHICS (4). Introduction to ethical theory and to the evaluation of ethical issues in society such as sexual ethics and euthanasia. Includes the study of philosophical theories of moral responsibility and moral virtue, and the philosophical ideas behind ethics debates in society. Students are encouraged to develop their own positions on ethical issues through discussion projects and term papers. Lec/rec. (H) (Bacc Core Course) PREREQS: Honors College approval required.

## PHL 206. *RELIGIOUS ETHICS AND MORAL

PROBLEMS (4). An examination of the practical ethics of the monotheistic religious traditions of the West--Judaism, Christianity, Islam--and their different approaches to concrete moral problems. Topics include sexuality and marriage, euthanasia, capital punishment, pacifism and just war, and environmentalism. (Bacc Core Course) CROSSLISTED as REL 206.

## PHL 207. *POLITICAL PHILOSOPHY

(4). Introductory study of the philosophical justifications of political systems and philosophical theories about the rights and obligations of citizens and governments. (H) (Bacc Core Course)

## PHL 208. INTRODUCTION TO BUDDHIST

TRADITIONS (4). Survey of the historical development of Buddhism in India and its spread throughout Asia and beyond by investigating the literature, rituals, history and social structure of the Buddhist traditions of Sri Lanka and Southeast Asia, Tibet and the Himalayan region, China, Taiwan, Korea, Japan, and finally its growth in the West. CROSSLISTED as REL 208.

## PHL 210. *RELIGION IN THE UNITED STATES

(4). A thematic overview of the historical study of religion in the United States, with an eye toward ways that social and cultural contexts have shaped the religious experience of Americans in different places and times. Surveys a wide array of religious movements, groups, and individuals from the colonial period to present. CROSSLISTED as HST 210, REL 210. (Bacc Core Course)

PHL 210H. *RELIGION IN THE UNITED STATES (4). A thematic overview of the historical study of religion in the United States, with an eye toward ways that social and cultural contexts have shaped the religious experience of Americans in different places and times. Surveys a wide array of religious movements, groups, and individuals from the colonial period to present. CROSSLISTED as HST 210H, REL 210H. (Bacc Core Course) PREREQS: Honors College approval required.
PHL 213. *INTRODUCTION TO HINDU
TRADITIONS (4). Survey of the historical development of Hinduism in India and the "Hindu

Diaspora." Topics will include the Indus Valley civilization, the Vedic tradition, yoga, and Hindu renunciation, "Classical" Hindu theism and devotion, Hindu philosophy and ritual, and modern and contemporary Hinduism. (Bacc Core Course) CROSSLISTED as REL 213.
PHL 214. *INTRODUCTION TO ISLAMIC
TRADITIONS (4). Development of Islamic traditions in the Arab world and in the global context. Origins of Islam, the narrative of the Prophet Muhammad, the development of the Qur'an, and the central tenets of Islamic faith and practice. Transformation of Islam from a regional to a global tradition. (Bacc Core Course) CROSSLISTED as REL 214.

PHL 220. *WORLD-VIEWS AND VALUES IN THE BIBLE (4). A study of central portions of the Bible (in the Old Testament: Torah, prophets, psalms, and wisdom; in the New Testament: Jesus, gospels, and letters) from the perspective of the academic discipline of biblical scholarship, exploring the philosophical questions of the relationships between story, myth, thought, values, and understandings of life. (H) (Bacc Core Course) CROSSLISTED as REL 220.
PHL 251. *KNOWERS, KNOWING, AND THE
KNOWN (4). An introduction to the major debates in Western philosophy concerning the nature of reality, and the ways we come to know about that reality. One example concerns debates about the problem of skepticism: Is it possible that humans could be completely mistaken about the way the world is? Another example concerns debates about human identity and free will. Beginning with historical figures such as Descartes and Hume, the course also provides an introduction to more contemporary thinkers. (Bacc Core Course)

PHL 251H. *KNOWERS, KNOWING, AND THE KNOWN (4). An introduction to the major debates in Western philosophy concerning the nature of reality, and the ways we come to know about that reality. One example concerns debates about the problem of skepticism: Is it possible that humans could be completely mistaken about the way the world is? Another example concerns debates about human identity and free will. Beginning with historical figures such as Descartes and Hume, the course also provides an introduction to more contemporary thinkers. (Bacc Core Course)
PREREQS: Honors College approval required
PHL 275. *INTRODUCTION TO DISABILITY
STUDIES (4). Introduces core concepts and themes in the multidisciplinary field of disability studies. Analyzes disability as a product of discriminatory, oppressive, and inaccessible built environments and societies. Explores disability pride, culture, and community as alternatives to medical and charity models of disability. (Bacc Core Course)
PHL 280. *ETHICS OF DIVERSITY (4). Uses moral philosophy to examine difference-based discrimination and prejudice in the human community. (H) (Bacc Core Course)
PHL 295. *FEMINISM AND THE BIBLE (3). Examines feminist interpretations of the Bible and pays special attention to intersections of race, social class, sexual identity, and nation in biblical interpretation. (Bacc Core Course) CROSSLISTED as ENG 295, WGSS 295.

PHL 295H. *FEMINISM AND THE BIBLE (3). Examines feminist interpretations of the Bible and pays special attention to intersections of race, social class, sexual identity, and nation in biblical interpretation. (Bacc Core Course) CROSSLISTED as ENG 295, ENG 295H, WGSS 295, WGSS 295H.

PHL 299. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 99 credits.

## PHL 301. *HISTORY OF WESTERN

PHILOSOPHY (4). A study of the history of Western philosophy from the early Greeks into the twentieth century. Designed to give an appreciation and understanding of the Western
philosophical tradition and the philosophical foundations of Western civilization. May be taken independently. PHL 301: Greek and Roman philosophy. PHL 302: The rise of modern philosophy through Hume. PHL 303: Kant and the nineteenth century. (H) (Bacc Core Course) PREREQS: 3 credits of philosophy recommended

## PHL 302. *HISTORY OF WESTERN

PHILOSOPHY (4). A study of the history of Western philosophy from the early Greeks into the twentieth century. Designed to give an appreciation and understanding of the Western philosophical tradition and the philosophical foundations of Western civilization. May be taken independently. PHL 301: Greek and Roman philosophy. PHL 302: The rise of modern philosophy through Hume. PHL 303: Kant and he nineteenth century. (H) (Bacc Core Course) PREREQS: 3 credits of philosophy recommended

## PHL 303. *HISTORY OF WESTERN

PHILOSOPHY (4). A study of the history of Western philosophy from the early Greeks into the twentieth century. Designed to give an appreciation and understanding of the Western philosophical tradition and the philosophical foundations of Western civilization. May be taken independently. PHL 301: Greek and Roman philosophy. PHL 302: The rise of modern philosophy through Hume. PHL 303: Kant and the nineteenth century. (H) (Bacc Core Course) PREREQS: 3 credits of philosophy recommended.

## PHL 310. *CRITICS OF RELIGION (4). An

 introduction to critiques of religion by Nietzsche, Freud, Marx, and other influential thinkers. Examines the nature, scope, and effects of criticisms that challenge the psychological, moral, political, and epistemological foundations of religious belief, practice, and institutions. (Bacc Core Course) CROSSLISTED as REL 310.PHL 312. *ASIAN THOUGHT (4). Familiarizes students with key figures in the history of Asian religious ideas and philosophy. While the emphasis will be on the philosophical traditions of Asia, it will quickly become apparent that philosophy and religion are not so easily distinguishable in many Asian traditions. Areas of thought studied will include Hindu, Buddhist, Confucian, and Taoist. (NC) (Bacc Core Course) CROSSLISTED as REL 312.

PHL 315. *GANDHI AND NONVIOLENCE (4). An examination of the life and work of Mohandas K. Gandhi, the 20th century activist and author, and the theory and practice of nonviolence in his life and work. Emphasis will be placed upon Gandhi's biographical narrative, the development of satyagraha, Gandhi's nonviolent approach to social transformation, and post-Gandhian nonviolent movements. (Bacc Core Course) CROSSLISTED as REL 315.
PHL 316. INTELLECTUAL ISSUES OF
MEXICO AND MEXICAN AMERICANS (4). The
philosophical, social, cultural, and political reality of Mexican Americans and their historical roots in Mexico since the Spanish Conquest. Analysis of internal colonialism, racism, machismo, fatalism, alienation, cultural identity, as well as more contemporary including NAFTA, immigration, and U.S.-Mexican relations. (NC) CROSSLISTED as REL 316.
PHL 321. DEDUCTIVE LOGIC (4). Development of formal language and deductive systems for first-order, quantificational logic. Emphasis on translation of ordinary English statements into formal language. Discussion of the contrast between semantic and syntactic treatment of logical concepts. PREREQS: Upper-division standing or PHL 101.
PHL 325. *SCIENTIFIC REASONING (4).
Introduction to and analysis of scientific reasoning. Emphasis on understanding and evaluation of theoretical hypotheses, causal and statistical models, and uses of scientific knowledge to make personal and public decisions. (Bacc Core Course)

PHL 342. CONTEMPORARY ETHICS (4). A study of significant ethical developments and issues in contemporary society, including ethical principles and concepts behind social debates on such matters as sexual ethics, abortion, discrimination, the uses of animals in scientific research, and responsibilities of corporations. Not offered every year. (H) PREREQS: PHL 205 recommended.

## PHL 344. *PACIFISM, JUST WAR, AND

TERRORISM (4). An examination of the philosophical and theological issues pertaining to pacifism, justified war, and forms of terrorism in Islamic and Western traditions. Special attention is given to concepts of jihad, justifications of war, and restraints on conduct in war. (Bacc Core Course) CROSSLISTED as REL 344.
PHL 345. *FIRST FREEDOM: RELIGIOUS LIBERTY AND INTOLERANCE (4). An examination of the religious, philosophical, political, and historical issues regarding religious freedom, conscience, and disestablishment as enshrined in the First Amendment and as illustrated by historical and contemporary examples of religious intolerance in the United States. (Bacc Core Course) CROSSLISTED as REL 345.

PHL 360. *PHILOSOPHY AND THE ARTS (4). Major philosophical theories about art and its meaning, from ancient to modern times. How philosophers have understood beauty, the imagination, art and knowledge, art and pleasure, art and emotion. Offered every other year. (H) (Bacc Core Course) PREREQS: 3 credits of philosophy, or upper-division standing recommended.

## PHL 365. *LAW IN PHILOSOPHICAL

PERSPECTIVE (4). A study of philosophical issues in the law through the examination of legal cases and major essays in jurisprudence. Special attention given to concepts of justice, responsibility, liberty, law, and legal ethics. Offered every other year. (H) (Bacc Core Course) PREREQS: 3 credits of philosophy or upperdivision standing.

PHL 371. *PHILOSOPHIES OF CHINA (4). A study of the traditional philosophies of China, including Confucianism, Taoism, Mohism, Legalism, and Buddhism. Not offered every year. (NC) (Bacc Core Course) CROSSLISTED as REL 371. PREREQS: 3 credits of philosophy or upperdivision standing.

## PHL 371H. *PHILOSOPHIES OF CHINA (4).

 A study of the traditional philosophies of China, including Confucianism, Taoism, Mohism, Legalism, and Buddhism. Not offered every year. (NC) (Bacc Core Course) PREREQS: 3 credits of philosophy or upper-division standing. Honors College approval required.PHL 390. MORAL THEORIES (3). Examines the evolution of moral philosophy from the beginning of Western, Greek-based philosophy through contemporary moral theory, and will include philosophical questions about moral philosophy generally, virtue ethics, deontology, utilitarianism, environmental ethics, animal rights, and feminism and ecofeminism. PREREQS: PHL 205 [D-]

## PHL 399. SPECIAL TOPICS IN PHILOSOPHY

 (1-4). Examination of the work of a philosopher or of a specific philosophical problem; e.g., Wittgenstein, determinism, perception, philosophy of mind. May be repeated for credit when topic varies. Not offered every year. This course is repeatable for a maximum of 16 credits. PREREQS: 3 credits of upper-division philosophy recommended.PHL 399H. SPECIAL TOPICS IN PHILOSOPHY
(1-4). Examination of the work of a philosopher or of a specific philosophical problem; e.g., Wittgenstein, determinism, perception, philosophy of mind. May be repeated for credit when topic varies. Not offered every term. This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval
required. 3 credits of upper-division philosophy recommended.

PHL 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Sophomore standing.
PHL 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PHL 405. READING AND CONFERENCE (116). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required and sophomore standing.

PHL 407. ^SEMINAR (1-16). (Writing Intensive Course) This course is repeatable for a maximum of 16 credits. PREREQS: Two upper-division philosophy courses or the equivalent and sophomore standing.
PHL 407H. ^SEMINAR (1-16). (Writing Intensive Course) This course is repeatable for a maximum of 16 credits. PREREQS: Two upper-division philosophy courses or the equivalent and sophomore standing. Honors College approval required.
PHL 410. INTERNSHIP (1-12). This course is repeatable for a maximum of 16 credits. PREREQS: Sophomore standing.
PHL 411. GREAT FIGURES IN PHILOSOPHY (4). Study of the works of a major philosopher such as Plato, Aristotle, Descartes, Hume, Kant, or Marx. Each course normally devoted to the work of a single figure. Need not be taken in sequence. Not offered every year. (H) CROSSLISTED as REL 411/REL 511. This course is repeatable for a maximum of 16 credits. PREREQS: 6 credits of philosophy and sophomore standing.
PHL 417. FEMINIST PHILOSOPHIES (3). Diverse forms of feminist philosophy, including a variety of critiques, especially those based on race and class, with in-depth consideration of selected social issues such as rape and pornography. CROSSLISTED as WGSS 417/WGSS 517. (H) PREREQS: 6 credits of philosophy or upperdivision standing.
PHL 421. MATHEMATICAL LOGIC (3). Rigorous definition of a formal logic and investigation of its characteristics. Emphasis on the distinction and relation between semantic and syntactic methods (model theory and proof theory) and on the meta-mathematical analysis of axiomatic theories. Not offered every year. PREREQS: PHL 321 or 6 credits of 400-level mathematics or computer science and sophomore standing.

## PHL 430. HISTORY OF BUDDHIST

PHILOSOPHY (4). Examination of the major philosophical schools, texts, and thinkers in Buddhist history, emphasizing its Indian origins, but looking beyond to the various Buddhist traditions throughout Asia. (NC) CROSSLISTED as REL 430/REL 530.

## PHL 430H. HISTORY OF BUDDHIST

PHILOSOPHY (4). Examination of the major philosophical schools, texts, and thinkers in Buddhist history, emphasizing its Indian origins, but looking beyond to the various Buddhist traditions throughout Asia. (NC) PREREQS: Honors College approval required.
PHL 431. BUDDHISM, NON-VIOLENCE, AND SOCIAL JUSTICE (4). Investigates the philosophical grounding of Buddhist ideas about non-violence, justice and social responsibility. Looks at broad-based Buddhist social activism movements and leaders; their methods of training, issues and types of actions taken by "Socially Engaged Buddhists" living Buddhist traditions. CROSSLISTED as REL 431.
PHL 431H. BUDDHISM, NON-VIOLENCE,
AND SOCIAL JUSTICE (4). Investigates the philosophical grounding of Buddhist ideas about non-violence, justice and social responsibility. Looks at broad-based Buddhist social activism
movements and leaders; their methods of training, issues and types of actions taken by PREREQS: Honors College approval required.
PHL 432. *YOGA AND TANTRIC TRADITIONS
(4). An examination of the theory and practice
of yoga and tantra in the traditions of Hinduism, Buddhism, and Jainism, and in their contemporary popular manifestations. Emphasis on the representation of yoga and tantra in Indian literature and history, including contemplative practices, bodily disciplines, and ritual. (Bacc Core Course) CROSSLISTED as REL 432/REL 532.
PHL 433. *THEORY AND PRACTICE OF
MODERN YOGA (4). An examination of the phenomenon of modern yoga in theory and in practice. Emphasis on the roots of contemporary forms of yoga in the intersection between traditional Hindu and Buddhist formulations of yoga, Indian wrestling and martial arts, European gymnastics, and cosmopolitan conceptions of "bodily culture" of both European and Indian origins. CROSSLISTED as REL 433, REL 533. (Bacc Core Course)
PHL 434. *SPIRITUALITY AND ECOLOGY: GREEN YOGA (4). An exploration of the relationship between spirituality and ecological engagement in traditional contexts and in contemporary spirituality, with a global focus on contemplative practices rooted in Indian tradition, such as yoga. CROSSLISTED as REL 434, REL 534.

PHL 434H. *SPIRITUALITY AND ECOLOGY:
GREEN YOGA (4). An exploration of the relationship between spirituality and ecological engagement in traditional contexts and in contemporary spirituality, with a global focus on contemplative practices rooted in Indian tradition, such as yoga. CROSSLISTED as REL 432H/ REL 532H. PREREQS: Honors College approval required.
PHL 436. PHILOSOPHY AND RELIGION (3). Examination of significant philosophical issues or movements and their relationship to theology and religion. CROSSLISTED as REL 436/REL 536. PREREQS: 6 credits of philosophy and sophomore standing.
PHL 439. PHILOSOPHY OF NATURE (3). Intensive one-week field course taught in the Cascade Range. What is nature? What is the relation of humans to the rest of the natural world? How are our concepts of nature and decisions about land use shaped by the words and metaphors we use? What is the value of wild places? What can we learn from a close study of the natural world about right ways of acting in communities, both civic and biotic? The course will draw on many ways of knowing--philosophical analysis, close observation, and especially writing. Camping required. PREREQS: Admission by application, departmental approval required.
PHL 440. *ENVIRONMENTAL ETHICS (3). Philosophical ideas about our ethical relationships with parts of the non-human world and future generations, with applications to current environmental issues. Includes a study of different conceptions of environmental ethics, philosophical problems in environmental ethics (such as the moral status of animals, plants, species, and ecosystems), the uses of environmental ethics by environmental groups, and selected contemporary global environmental issues such as global warming and loss of biodiversity. (H) (Bacc Core Course) PREREQS: PHL 205 and PHL 342 and PHL 365 or 6 credits of philosophy and sophomore standing.
PHL 440H. *ENVIRONMENTAL ETHICS (3). Philosophical ideas about our ethical relationships with parts of the non-human world and future generations, with applications to current environmental issues. Includes a study of different conceptions of environmental ethics, philosophical problems in environmental ethics (such as the moral status of animals, plants, species, and ecosystems), the uses of environmental ethics by
environmental groups, and selected contemporary global environmental issues such as global warming and loss of biodiversity. (H) (Bacc Core Course) PREREQS: PHL 205 and PHL 342 and PHL 365 or 6 credits of philosophy and sophomore standing and Honors College approval required.

## PHL 443. *WORLD VIEWS AND

ENVIRONMENTAL VALUES (3). A comparative study of world-views (secular and religious, Western and Eastern, modern and ancient) and how they affect concepts of nature, environmental values, and selected environmental issues. (Bacc Core Course) (NC) CROSSLISTED as REL 443, REL 543. PREREQS: One introductory-level science course and sophomore standing.

## PHL 443H. *WORLD VIEWS AND

ENVIRONMENTAL VALUES (3). A comparative study of world-views (secular and religious, Western and Eastern, modern and ancient) and how they affect concepts of nature, environmental values, and selected environmental issues. (Bacc Core Course) CROSSLISTED as REL 443H.
PREREQS: One introductory-level science course and sophomore standing and Honors College approval required

PHL 444. *BIOMEDICAL ETHICS (4). Application of ethical principles and decision-making processes to selected problems in medicine, health care, and biotechnology. Special attention given to end-of-life choices, reproductive rights and technologies, organ transplantation, research ethics, genetic engineering, and allocating scarce resources. An interdisciplinary focus that draws on social, legal, economic, and scientific issues in ethical decisions in medicine. (H) (Bacc Core Course) CROSSLISTED as REL 444/REL 544. PREREQS: Sophomore standing

PHL 444H. *BIOMEDICAL ETHICS (4). Application of ethical principles and decisionmaking processes to selected problems in medicine, health care, and biotechnology. Special attention given to end-of-life choices, reproductive rights and technologies, organ transplantation, research ethics, genetic engineering, and allocating scarce resources. An interdisciplinary focus that draws on social, legal, economic, and scientific issues in ethical decision in medicine. (H) (Bacc Core Course) PREREQS: Sophomore standing and Honors College approval required.
PHL 448. NATIVE AMERICAN PHILOSOPHIES
(4). Native American perspectives on ways of knowing, sources of meaning and ethics, the nature of reality, self, community, and cosmos. Includes lectures, scholarship, story-telling, poetry theater, and music as forums for this exploration. Introduces ideas of leading Native American thinkers about the human relation to the natural world, sources of strength and wisdom, the nature of time and place and spirit, right ways of acting in communities, both civic and biotic, and the place of beauty in a well-lived life. (NC) CROSSLISTED as ES 448/ES 548, REL 448/REL 548.
PHL 450. TOPICS (1-16). Uses the IDEAS MATTER lectures as the focus for an exploration of ideas that make a difference in the world. Students read background materials, attend lectures, meet with the speakers, and write essays on the ideas they learn. This course is repeatable for a maximum of 16 credits. PREREQS: Sophomore standing.

## PHL 451. KNOWLEDGE AND REALITY (3).

Examination of significant theories of knowledge, theories concerning the nature of reality, and their connections. Includes an analysis of important concepts and problems, such as perception, induction, belief, empiricism, rationalism, and skepticism. Not offered every year. (H) PREREQS: 6 credits of philosophy, sophomore standing.

PHL 455. DEATH AND DYING (3). A
multidisciplinary study of cultural, philosophical, and religious perspectives on death, dying, and grieving. Not offered every year. CROSSLISTED as REL 455, REL 555. PREREQS: 6 credits of
philosophy or sophomore standing
PHL 456. PHILOSOPHY OF MIND (4). Past and present theories about consciousness, the relationship of mind and body, and the roots and implications of those theories. Includes historical "isms" (e.g., dualism, monism), contemporary views, and connections of these theories to further issues in philosophy and contemporary culture, e.g., desires, mental illness, personhood and otherness, animal minds, explanation, the mind in non-Western traditions and in religions. PREREQS: Recommended: PHL 251
PHL 461. ART AND MORALITY (4). The arts in the context of their connections to, and conflicts with, varied conceptions of the common good. Topics include free expression and community standards, museums and obligations toward cultural treasures, art in public places, public funding of art, the politics of taste. CROSSLISTED as REL 461/REL 561. PREREQS: Sophomore standing.

PHL 470. PHILOSOPHY OF SCIENCE (3). Examination of philosophical questions, classic and contemporary, about science and scientific knowledge. Scientific explanations, the structure of theories, the concept of a natural law, revolutions in science, influences of the sciences and philosophy on one another, science and values. Not offered every year. (H) PREREQS: 6 credits of philosophy (upper-division philosophy recommended), sophomore standing.
PHL 474. ${ }^{\wedge}$ PHILOSOPHY OF BIOLOGY (4). An introduction to some of the conceptual challenges engendered by contemporary evolutionary biology, including the nature of fitness, natural selection, adaptations, and species; identifying organisms, traits, and the units of selection; the evidence required to support particular adaptive or historical hypotheses; and others. (Writing Intensive Course) PREREQS: Previous university-level course work in either philosophy or the biological sciences is strongly recommended.
PHL 499. TOPICS IN PHILOSOPHY (1-4). Examination of the work of a philosopher or of a specific problem; e.g., Wittgenstein, determinism, perception. May be repeated for credit when topic varies. Not offered every year. This course is repeatable for a maximum of 16 credits. PREREQS: 6 credits of upper-division philosophy, sophomore standing.

PHL 499H. TOPICS IN PHILOSOPHY (1-4). Examination of the work of a philosopher or of a specific problem; e.g., Wittgenstein, determinism, perception. May be repeated for credit when topic varies. Not offered every year. This course is repeatable for a maximum of 4 credits. PREREQS: 6 credits of upper-division philosophy, sophomore standing; Honors College approval required.

PHL 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

PHL 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits PREREQS: Sophomore standing.
PHL 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits PREREQS: Departmental approval required.

PHL 505. READING AND CONFERENCE (116). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PHL 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Two upper-division philosophy courses or the equivalent and sophomore standing.

PHL 510. INTERNSHIP (1-12). This course is repeatable for a maximum of 16 credits. PREREQS: Sophomore standing.

PHL 511. GREAT FIGURES IN PHILOSOPHY (4). Study of the works of a major philosopher
such as Plato, Aristotle, Descartes, Hume, Kant, or Marx. Each course normally devoted to the work of a single figure. Need not be taken in sequence. Not offered every year. CROSSLISTED as REL 411/REL 511. This course is repeatable for a maximum of 16 credits. PREREQS: 6 credits of philosophy and sophomore standing.

PHL 517. FEMINIST PHILOSOPHIES (3). Diverse forms of feminist philosophy, including a variety of critiques, especially those based on race and class, with in-depth consideration of selected social issues such as rape and pornography. CROSSLISTED as WGSS 417/WGSS 517. PREREQS: 6 credits of philosophy or upperdivision standing.

## PHL 525. PHILOSOPHICAL METHODS (3)

Examines diverse ways of approaching philosophical issues. Contains readings from different philosophical traditions. Develops understanding of the skills and conventions of philosophical argumentation.

## PHL 530. HISTORY OF BUDDHIST

PHILOSOPHY (4). Examination of the major philosophical schools, texts, and thinkers in Buddhist history, emphasizing its Indian origins, but looking beyond to the various Buddhist traditions throughout Asia. CROSSLISTED as REL 430/REL 530.

## PHL 531. BUDDHISM, NON-VIOLENCE,

AND SOCIAL JUSTICE (4). Investigates the philosophical grounding of Buddhist ideas about non-violence, justice and social responsibility. Looks at broad-based Buddhist social activism movements and leaders; their methods of training, issues and types of actions taken by "Socially Engaged Buddhists" living Buddhist traditions. CROSSLISTED as REL 431.
PHL 532. YOGA AND TANTRIC TRADITIONS (4). An examination of the theory and practice of yoga and tantra in the traditions of Hinduism, Buddhism, and Jainism, and in their contemporary popular manifestations. Emphasis on the representation of yoga and tantra in Indian literature and history, including contemplative practices, bodily disciplines, and ritual. CROSSLISTED as REL 432/REL 532.

## PHL 533. THEORY AND PRACTICE OF

MODERN YOGA (4). An examination of the phenomenon of modern yoga in theory and in practice. Emphasis on the roots of contemporary forms of yoga in the intersection between traditional Hindu and Buddhist formulations of yoga, Indian wrestling and martial arts, European gymnastics, and cosmopolitan conceptions of "bodily culture" of both European and Indian origins. CROSSLISTED as REL 433, REL 533.

## PHL 534. SPIRITUALITY AND ECOLOGY:

GREEN YOGA (4). An exploration of the relationship between spirituality and ecological engagement in traditional contexts and in contemporary spirituality, with a global focus on contemplative practices rooted in Indian tradition, such as yoga. CROSSLISTED as REL 434, REL 534.

PHL 536. PHILOSOPHY AND RELIGION (3). Examination of significant philosophical issues or movements and their relationship to theology and religion. CROSSLISTED as REL 436/REL 536. PREREQS: 6 credits of philosophy and sophomore standing

PHL 539. PHILOSOPHY OF NATURE (3). ntensive one-week field course taught in the Cascade Range. What is nature? What is the relation of humans to the rest of the natural world? How are our concepts of nature and decisions about land use shaped by the words and metaphors we use? What is the value of wild places? What can we learn from a close study of the natural world about right ways of acting in communities, both civic and biotic? The course will draw on many ways of knowing--philosophical analysis, close observation, and especially writing Camping required. PREREQS: Admission by
application, departmental approval required.
PHL 540. ENVIRONMENTAL ETHICS (3).
Philosophical ideas about our ethical relationships with parts of the non-human world and future generations, with applications to current environmental issues. Includes a study of different conceptions of environmental ethics, philosophical problems in environmental ethics (such as the moral status of animals, plants, species, and ecosystems), the uses of environmental ethics by environmental groups, and selected contemporary global environmental issues such as global warming and loss of biodiversity. PREREQS: PHL 205 and PHL 342 and PHL 365 or 6 credits of philosophy and sophomore standing.
PHL 541. CLASSIC MORAL THEORIES (3). Philosophical issues in ethics analyzed through the examination of such classical works in moral philosophy as Aristotle's Nichomachean ethics. Not offered every year. PREREQS: Either PHL 205 or PHL 342 or PHL 440 or one course in the history of philosophy.
PHL 542. CONTEMPORARY MORAL THEORIES
(3). Examines contemporary ethical theories through study of moral philosophy in the 20th century, including recent developments in such areas as environmental ethics and feminist/ feminine ethics. PREREQS: At least two philosophy courses including at least one of PHL 205 or PHL 342 or PHL 541.

## PHL 543. WORLD VIEWS AND

ENVIRONMENTAL VALUES (3). A comparative
study of world-views (secular and religious, Western and Eastern, modern and ancient) and how they affect concepts of nature, environmental values, and selected environmental issues. CROSSLISTED as REL 443, REL 543. PREREQS: One introductory-level science course and sophomore standing.

PHL 544. BIOMEDICAL ETHICS (4). Application of ethical principles and decision-making processes to selected problems in medicine, health care, and biotechnology. Special attention given to end-of-life choices, reproductive rights and technologies, organ transplantation, research ethics, genetic engineering, and allocating scarce resources. An interdisciplinary focus that draws on social, legal, economic, and scientific issues in ethical decisions in medicine. CROSSLISTED as REL 444/REL 544. PREREQS: Graduate standing
PHL 547. RESEARCH ETHICS (3). An examination of the interrelationship between ethical values and scientific practice. Topics include professionalism in science; scientific integrity, misconduct, and whistleblowing; the ethics of authorship; conflicts of interest between academic science and commercial science, and social responsibilities in science.

## PHL 548. NATIVE AMERICAN PHILOSOPHIES

 (4). Native American perspectives on ways of knowing, sources of meaning and ethics, the nature of reality, self, community, and cosmos. Includes lectures, scholarship, story-telling, poetry, theater, and music as forums for this exploration. Introduces ideas of leading Native American thinkers about the human relation to the natural world, sources of strength and wisdom, the nature of time and place and spirit, right ways of acting in communities, both civic and biotic, and the place of beauty in a well-lived life. CROSSLISTED as ES 448/ES 548, REL 448/REL 548.PHL 550. TOPICS (1-16). Uses the IDEAS MATTER lectures as the focus for an exploration of ideas that make a difference in the world. Students read background materials, attend lectures, meet with the speakers, and write essays on the ideas they learn. This course is repeatable for a maximum of 16 credits. PREREQS:
Sophomore standing.
PHL 551. KNOWLEDGE AND REALITY (3). Examination of significant theories of knowledge, theories concerning the nature of reality, and their connections. Includes an analysis of important
concepts and problems, such as perception, induction, belief, empiricism, rationalism, and skepticism. Not offered every year. PREREQS: 6 credits of philosophy, sophomore standing.

## PHL 555. DEATH AND DYING (3). A

 multidisciplinary study of cultural, philosophical, and religious perspectives on death, dying, and grieving. Not offered every year. CROSSLISTED as REL 455, REL 555. PREREQS: 6 credits of philosophy or sophomore standing.PHL 556. PHILOSOPHY OF MIND (4). Past and present theories about consciousness, the relationship of mind and body, and the roots and implications of those theories. Includes historical "isms" (e.g., dualism, monism), contemporary views, and connections of these theories to further issues in philosophy and contemporary culture, e.g., desires, mental illness, personhood and otherness, animal minds, explanation, the mind in non-Western traditions and in religions. PREREQS: Recommended: PHL 251

PHL 561. ART AND MORALITY (4). The arts in the context of their connections to, and conflicts with, varied conceptions of the common good. Topics include free expression and community standards, museums and obligations toward cultural treasures, art in public places, public funding of art, the politics of taste. CROSSLISTED as REL 461/REL 561. PREREQS: Sophomore standing.
PHL 570. PHILOSOPHY OF SCIENCE (3).
Examination of philosophical questions, classic and contemporary, about science and scientific knowledge. Scientific explanations, the structure of theories, the concept of a natural law, revolutions in science, influences of the sciences and philosophy on one another, science and values. Not offered every year. PREREQS: 6 credits of philosophy (upper-division philosophy recommended), sophomore standing.
PHL 574. PHILOSOPHY OF BIOLOGY (4). An introduction to some of the conceptual challenges engendered by contemporary evolutionary biology, including the nature of fitness, natural selection, adaptations, and species; identifying organisms, traits, and the units of selection; the evidence required to support particular adaptive or historical hypotheses; and others. PREREQS: Previous university-level course work in either philosophy or the biological sciences is strongly recommended.
PHL 599. TOPICS IN PHILOSOPHY (1-4). Examination of the work of a philosopher or of a specific problem; e.g., Wittgenstein, determinism, perception. May be repeated for credit when topic varies. Not offered every year. This course is repeatable for a maximum of 16 credits. PREREQS: 6 credits of upper-division philosophy, sophomore standing.

## ■ RELIGIOUS STUDIES COURSES

REL 160. *QUESTS FOR MEANING: WORLD RELIGIONS (4). A survey and analysis of the search for meaning and life fulfillment represented in major religious traditions of the world, such as Hinduism, Buddhism, Taoism, Zen, Confucianism, Judaism, Christianity, and Islam. Lec/rec. (H) (Bacc Core Course) CROSSLISTED as PHL 160.
REL 160H. *QUESTS FOR MEANING: WORLD RELIGIONS (0-4). A survey and analysis of the search for meaning and life fulfillment represented in major religious traditions of the world, such as Hinduism, Buddhism, Taoism, Zen, Confucianism, Judaism, Christianity, and Islam. Lec/rec. (H) (Bacc Core Course) CROSSLISTED as PHL 160H. PREREQS: Honors College approval required.
REL 170. *THE IDEA OF GOD (4). Concepts and images of God and their connections to worldviews, experience, science, gender, society, selfunderstanding, and religions. (Bacc Core Course) CROSSLISTED as PHL 170.

REL 199. SPECIAL TOPICS (1-4). This course is repeatable for a maximum of 12 credits.
REL 201. STUDY OF PEACE AND THE CAUSES OF CONFLICT (3). Examination of the causes of personal, social, and institutional conflict and peaceful, constructive means of dealing with conflict. The history and current status of peace movements within and outside governments; prospects for world peace. Case studies in peace and conflict (H) CROSSLISTED as PAX 201.

## REL 202. INTRODUCTION TO RELIGIOUS

 STUDIES (4). An introduction to the academic study of religion. It examines the concepts of religion and the sacred, approaches to the study of religion, ubiquitous features of religious experience, including symbol, myth, ritual, and community, understandings of the human condition in diverse religious traditions, and ways religious communities address challenges of pluralism and secularization. CROSSLISTED as PHL 202.REL 206. *RELIGIOUS ETHICS AND MORAL
PROBLEMS (4). An examination of the practical ethics of the monotheistic religious traditions of the West--Judaism, Christianity, Islam--and their different approaches to concrete moral problems. Topics include sexuality and marriage, euthanasia, capital punishment, pacifism and just war, and environmentalism. (Bacc Core Course) CROSSLISTED as PHL 206.

## REL 208. INTRODUCTION TO BUDDHIST

 TRADITIONS (4). Survey of the historical development of Buddhism in India and its spread throughout Asia and beyond by investigating the literature, rituals, history and social structure of the Buddhist traditions of Sri Lanka and Southeast Asia, Tibet and the Himalayan region, China, Taiwan, Korea, Japan, and finally its growth in the West. (NC) CROSSLISTED as PHL 208.REL 210. *RELIGION IN THE UNITED STATES (4). A thematic overview of the historical study of religion in the United States, with an eye toward ways that social and cultural contexts have shaped the religious experience of Americans in different places and times. Surveys a wide array of religious movements, groups, and individuals from the colonial period to present. (Bacc Core Course) CROSSLISTED as HST 210, PHL 210.
REL 210H. *RELIGION IN THE UNITED STATES (4). A thematics overview of the historical study of religion in the United States, with an eye toward ways that social and cultural contexts have shaped the religious experience of Americans in different places and times. Surveys a wide array of religious movements, groups, and individuals from the colonial period to present. (Bacc Core Course) CROSSLISTED as HST 210H, PHL 210H. PREREQS: Honors College approval required.
REL 213. *INTRODUCTION TO HINDU
TRADITIONS (4). Survey of the historical development of Hinduism in India and the "Hindu Diaspora." Topics will include the Indus Valley civilization, the Vedic tradition, yoga, and Hindu renunciation, "Classical" Hindu theism and devotion, Hindu philosophy and ritual, and modern and contemporary Hinduism. (Bacc Core Course) CROSSLISTED as PHL 213.
REL 214. *INTRODUCTION TO ISLAMIC
TRADITIONS (4). Development of Islamic traditions in the Arab world and in the global context. Origins of Islam, the narrative of the Prophet Mohammad, the development of the Qur'an, and the central tenets of Islamic faith and practice. Transformation of Islam from a regional to a global tradition. (Bacc Core Course) CROSSLISTED as PHL 214.

REL 215. *INTRODUCTION TO JEWISH TRADITIONS (4). An introduction to Judaism's traditions, histories, and practices. Covers historical origins and developments from the biblical period through the Middle Ages, and considers Judaism in the modern world. Topics include the Jewish calendar (including holidays
and their traditions), Jewish life cycle events Jewish prayer, and traditional texts such as the Mishnah and Talmud. CROSSLISTED as HST 215. (Bacc Core Course)

REL 220. *WORLD-VIEWS AND VALUES IN THE BIBLE (4). A study of central portions of the Bible (in the Old Testament: Torah, prophets, psalms, and wisdom; in the New Testament: Jesus, gospels, and letters) from the perspective of the academic discipline of biblical scholarship, exploring the philosophical questions of the relationships between story, myth, thought, values, and understandings of life. (H) (Bacc Core Course) CROSSLISTED as PHL 220.

REL 299. SPECIAL TOPICS (1-4). This course is repeatable for a maximum of 12 credits.

REL 310. *CRITICS OF RELIGION (4). An introduction to critiques of religion by Nietzsche, Freud, Marx, and other influential thinkers.
Examines the nature, scope, and effects of criticisms that challenge the psychological, moral, political, and epistemological foundations of religious belief, practice, and institutions. (Bacc Core Course) CROSSLISTED as PHL 310.

REL 312. *ASIAN THOUGHT (4). Familiarizes students with key figures in the history of Asian religious ideas and philosophy. While the emphasis will be on the philosophical traditions of Asia, it will quickly become apparent that philosophy and religion are not so easily distinguishable in many Asian traditions. Areas of thought studied will include Hindu, Buddhist, Confucian, and Taoist. (NC) (Bacc Core Course) CROSSLISTED as PHL 312.

## REL 315. *GANDHI AND NONVIOLENCE (4)

 An examination of the life and work of Mohandas K. Gandhi, the 20th century activist and author, and the theory and practice of nonviolence in his life and work. Emphasis will be placed upon Gandhi's biographical narrative, the development of satyagraha, Gandhi's nonviolent approach to social transformation, and post-Gandhian nonviolent movements. (Bacc Core Course) CROSSLISTED as PHL 315.
## REL 316. INTELLECTUAL ISSUES OF

MEXICO AND MEXICAN AMERICANS (4). The philosophical, social, cultural, and political reality of Mexican Americans and their historical roots in Mexico since the Spanish Conquest. Analysis of internal colonialism, racism, machismo, fatalism, alienation, cultural identity, as well as more contemporary including NAFTA, immigration, and the U.S.-Mexican relations. (NC) CROSSLISTED as PHL 316

REL 324. *ANCIENT JEWISH HISTORY (4). History of Judaism from the Second Temple through the early Rabbinic period (539 BCE--200 CE). Covers historical origins and developments of Judaism including the canonization of the Bible, Jewish life in the Persian and GrecoRoman worlds, and the beginnings of Diasporic and Rabbinic Judaism. (Bacc Core Course) CROSSLISTED as HST 324.

REL 325. *EARLY CHRISTIANITY: ORIGINS TO 600 (4). Traces early Christianity from its origins to the beginning of the Middle Ages. It deals with the origins and Jewish background of Christianity in Palestine, the ministry and teachings of Jesus, the spread of Christianity throughout the Roman Empire by his disciples and early missionaries, the formation of the New Testament canon, the development of Christian doctrine, controversies over heresy, and the origin of monasticism and the Papacy. (Bacc Core Course) CROSSLISTED as HST 325.

REL 327. HISTORY OF MEDIEVAL EUROPE (4). Cultural, political, and economic history of the European Middle Ages from the fall of the Roman Empire in the West to the Renaissance. Covers 284 A.D. to 1000. Not offered every year. (H). CROSSLISTED as HST 327. PREREQS: HST/ REL 327 and HST/REL 328 need not be taken in sequence.

REL 328. HISTORY OF MEDIEVAL EUROPE (4). Cultural, political, and economic history of the European Middle Ages from the fall of the Roman Empire in the West to the Renaissance. Covers 1000 to 1400 . Not offered every year. (H) CROSSLISTED as HST 328. PREREQS: HST/ REL 327 and HST/REL 328 need not be taken in sequence.

REL 330. HISTORY OF EARLY MODERN
EUROPE (4). Political, social, intellectual, and cultural history of Europe from 1400-1789. Focuses on the Reformation. Not offered every year. (H) CROSSLISTED as HST 330. PREREQS HST/REL 329, HST/REL 330, and HST/REL 331 need not be taken in sequence.

## REL 333. MEDIEVAL AND EARLY MODERN

SPANISH HISTORY (4). From Islamic conquest to conquest of America, the social, religious, political and economic history of Spain from 1000 to 1700. Offered fall term in odd years. (H) CROSSLISTED as HST 333.

## REL 344. *PACIFISM, JUST WAR, AND

TERRORISM (4). An examination of the philosophical and theological issues pertaining to pacifism, justified war, and forms of terrorism in Islamic and Western traditions. Special attention is given to concepts of jihad, justifications of war, and restraints on conduct in war. (Bacc Core Course) CROSSLISTED as PHL 344.

## REL 345. *FIRST FREEDOM: RELIGIOUS

LIBERTY AND INTOLERANCE (4). An examination of the religious, philosophical, political, and historical issues regarding religious freedom, conscience, and disestablishment as enshrined in the First Amendment and as illustrated by historical and contemporary examples of religious intolerance in the United States. (Bacc Core Course) CROSSLISTED as PHL 345.

REL 350. *MODERN LATIN AMERICA (4). History of Latin America leading up to and after Spanish and Portuguese conquest. Focus on indigenous American, European and African cultures and religions in contact under colonial government and economic systems. Covers the period from 1400 to 1810. (H) (NC) (Bacc Core Course) CROSSLISTED as HST 350. PREREQS: HST 350 and HST 351 need not be taken in sequence.
REL 352. *AFRICANS IN LATIN AMERICAN
HISTORY (4). A survey of the role of Africans and their descendants in Latin American history, linking the history of the Americas, Europe and Africa. (Bacc Core Course) CROSSLISTED as HST 352. PREREQS: HST 350 and HST 351 suggested.
REL 364. *UNITED STATES RELIGION AND SOCIAL REFORM (4). Provides an awareness of how various religious groups have thought about and engaged with social change pertaining to slavery, feminism, civil rights, same-sex marriage, and immigration. Focus on reading primary sources related to each of these issues. (Bacc Core Course) CROSSLISTED as HST 364.

REL 371. *PHILOSOPHIES OF CHINA (4). A study of the traditional philosophies of China, including Confucianism, Taoism, Mohism, Legalism, and Buddhism. Not offered every year. (NC) (Bacc Core Course) CROSSLISTED as PHL 371. PREREQS: 3 credits of philosophy or upperdivision standing.

REL 387. *ISLAMIC CIVILIZATION (4). Political, social, and religious developments from 600 to 1400. Early history and the formation of Islamic society to the Mongol invasion. (H) (NC) (Bacc Core Course) CROSSLISTED as HST 387. PREREQS: HST/REL 387 and HST/REL 388 need not be taken in sequence

REL 388. *ISLAMIC CIVILIZATION (4). Political, social, and religious developments from 1400 to the present. The expansion of Islam, Turkic, and Asian dynasties, impact of Western imperialism and modern Islamic world. (H) (NC) (Bacc Core

Course) CROSSLISTED as HST 388. PREREQS: HST/REL 387 and HST/REL 388 need not be taken in sequence.

REL 399. SPECIAL TOPICS (1-4). This course is repeatable for a maximum of 12 credits.

REL 402. INDEPENDENT STUDY (1-12). This course is repeatable for a maximum of 16 credits.
REL 405. READING AND CONFERENCE (1-4). This course is repeatable for a maximum of 12 credits.
REL 411. GREAT FIGURES IN PHILOSOPHY
(4). Study of the works of a major philosopher such as Plato, Aristotle, Descartes, Hume, Kant, or Marx. Each course normally devoted to the work of a single figure. Need not be taken in sequence. Not offered every year. (H) CROSSLISTED as PHL 411/PHL 511. This course is repeatable for a maximum of 16 credits. PREREQS: 6 credits of philosophy and sophomore standing.
REL 415. SELECTED TOPICS (1-4). This course is repeatable for a maximum of 12 credits.

REL 425. *THE HOLOCAUST IN ITS HISTORY (4). An inquiry into the causes, course, and impact of the Holocaust. The general theme of anti-Semitism in European history is explored for background. Topics discussed for comparative purposes include anti-Semitism in American history; other episodes of mass murder in the 20th century. Not offered every year. (H) (Bacc Core Course) CROSSLISTED as HST 425, HST 525.

## REL 430. HISTORY OF BUDDHIST

PHILOSOPHY (4). Examination of the major philosophical schools, texts, and thinkers in Buddhist history, emphasizing its Indian origins, but looking beyond to the various Buddhist traditions throughout Asia. (NC) CROSSLISTED as PHL 430/PHL 530.
REL 431. BUDDHISM, NON-VIOLENCE,
AND SOCIAL JUSTICE (4). Investigates the philosophical grounding of Buddhist ideas about non-violence, justice and social responsibility. Looks at broad-based Buddhist social activism movements and leaders; their methods of training, issues and types of actions taken by "Socially Engaged Buddhists" living Buddhist traditions. CROSSLISTED as PHL 431.

## REL 432. *YOGA AND TANTRIC TRADITIONS

(4). An examination of the theory and practice of yoga and tantra in the traditions of Hinduism, Buddhism, and Jainism, and in their contemporary popular manifestations. Emphasis on the representation of yoga and tantra in Indian literature and history, including contemplative practices, bodily disciplines, and ritual. (Bacc Core Course) CROSSLISTED as PHL 432/PHL 532.
REL 433. *THEORY AND PRACTICE OF MODERN YOGA (4). An examination of the phenomenon of modern yoga in theory and in practice. Emphasis on the roots of contemporary forms of yoga in the intersection between traditional Hindu and Buddhist formulations of yoga, Indian wrestling and martial arts, European gymnastics, and cosmopolitan conceptions of "bodily culture" of both European and Indian origins. CROSSLISTED as PHL 433, PHL 533. (Bacc Core Course)
REL 434. *SPIRITUALITY AND ECOLOGY: GREEN YOGA (4). An exploration of the relationship between spirituality and ecological engagement in traditional contexts and in contemporary spirituality, with a global focus on contemplative practices rooted in Indian tradition, such as yoga. CROSSLISTED as PHL 434, PHL 534.

REL 434H. *SPIRITUALITY AND ECOLOGY: GREEN YOGA (4). An exploration of the relationship between spirituality and ecological engagement in traditional contexts and in contemporary spirituality, with a global focus on contemplative practices rooted in Indian tradition, such as yoga. CROSSLISTED as REL 434H,

REL 534H. PREREQS: Honors College approval required.
REL 436. PHILOSOPHY AND RELIGION (3). Examination of significant philosophical issues or movements and their relationship to theology and religion. CROSSLISTED as PHL 436/PHL 536. PREREQS: 6 credits of philosophy and sophomore standing.
REL 443. *WORLD VIEWS AND
ENVIRONMENTAL VALUES (3). A comparative study of world-views (secular and religious, Western and Eastern, modern and ancient) and how they affect concepts of nature, environmental values, and selected environmental issues. (NC) (Bacc Core Course) CROSSLISTED as PHL 443, PHL 543. PREREQS: One introductory-level science course and sophomore standing.

## REL 443H. *WORLD VIEWS AND

ENVIRONMENTAL VALUES (3). A comparative study of world-views (secular and religious, Western and Eastern, modern and ancient) and how they affect concepts of nature, environmental values, and selected environmental issues. (NC) (Bacc Core Course) CROSSLISTED as PHL 443H. PREREQS: One introductory-level science course and sophomore standing. Honors College approval required.
REL 444. *BIOMEDICAL ETHICS (4). Application of ethical principles and decision-making processes to selected problems in medicine, health care, and biotechnology. Special attention given to end-of-life choices, reproductive rights and technologies, organ transplantation, research ethics, genetic engineering, and allocating scarce resources. An interdisciplinary focus that draws on social, legal, economic, and scientific issues in ethical decisions in medicine. (H) (Bacc Core Course) CROSSLISTED as PHL 444/PHL 544. PREREQS: Sophomore standing
REL 444H. *BIOMEDICAL ETHICS (4). Application of ethical principles and decisionmaking processes to selected problems in medicine, health care, and biotechnology. Special attention given to end-of-life choices, reproductive rights and technologies, organ transplantation, research ethics, genetic engineering, and allocating scarce resources. An interdisciplinary focus that draws on social, legal, economic, and scientific issues in ethical decisions in medicine. (H) (Bacc Core Course) PREREQS: Sophomore standing and Honors College approval required.

## REL 448. NATIVE AMERICAN PHILOSOPHIES

(4). Native American perspectives on ways of knowing, sources of meaning and ethics, the nature of reality, self, community, and cosmos. Includes lectures, scholarship, story-telling, poetry, theater, and music as forums for this exploration. Introduces ideas of leading Native American thinkers about the human relation to the natural world, sources of strength and wisdom, the nature of time and place and spirit, right ways of acting in communities, both civic and biotic, and the place of beauty in a well-lived life. (NC) CROSSLISTED as ES 448/ES 548, PHL 448/PHL 548.
REL 455. DEATH AND DYING (3). A
multidisciplinary study of cultural, philosophical, and religious perspectives on death, dying, and grieving. Not offered every year. CROSSLISTED as PHL 455, PHL 555. PREREQS: 6 credits of philosophy or sophomore standing.
REL 461. ART AND MORALITY (4). The arts in context of their connections to, and conflicts with, varied conceptions of the common good. Topics include free expression and community standards, museums and obligations toward cultural treasures, art in public places, public funding of art, the politics of taste. CROSSLISTED as PHL 461/PHL 561. PREREQS: Sophomore standing.
REL 466. RELIGION AND U.S. FOREIGN RELATIONS (4). An examination of the intersection of religion and U.S. foreign relations from the late nineteenth century to the present. Surveys major events in U.S. diplomacy, including
war and peace and explores the role of religion and religious ideas in shaping national identity, core values, and civil religion. CROSSLISTED as HST 466/HST 566. PREREQS: HST 202 and HST 203 or upper-division standing.
REL 470. RELIGION IN THE AMERICAN WEST (4). The history of religion in the American West. Examines four themes in the religious history of the American West: locations (the designation of particular places as special), migrations (movement in and out of the region), adaptations changes over time, in response to changing conditions), and discrimination (recognition of difference, as well as prejudicial treatment based on difference). Engages with various primary and secondary sources, including texts, films, and photographs. CROSSLISTED as HST 470.
REL 485. *POLITICS AND RELIGION IN
THE MODERN MIDDLE EAST (4). The role
of religious and secular ideologies in the politics of the 20th century Middle East. Topics include the impact of liberal and nationalist thought, the Iranian revolution, radical Islamist movements, and Zionism. (H) (NC) (Bacc Core Course) CROSSLISTED as HST 485/HST 585. PREREQS: Upper-division standing or instructor approval required.

## REL 511. GREAT FIGURES IN PHILOSOPHY

(4). Study of the works of a major philosopher such as Plato, Aristotle, Descartes, Hume, Kant, or Marx. Each course normally devoted to the work of a single figure. Need not be taken in sequence. Not offered every year. CROSSLISTED as PHL 411/PHL 511. This course is repeatable for a maximum of 16 credits. PREREQS: 6 credits of philosophy and sophomore standing.
REL 525. THE HOLOCAUST IN ITS HISTORY
(4). An inquiry into the causes, course, and impact of the Holocaust. The general theme of anti-Semitism in European history is explored for background. Topics discussed for comparative purposes include anti-Semitism in American history; other episodes of mass murder in the 20th century. Not offered every year. CROSSLISTED as HST 425, HST 525.

## REL 530. HISTORY OF BUDDHIST

PHILOSOPHY (4). Examination of the major philosophical schools, texts, and thinkers in Buddhist history, emphasizing its Indian origins, but looking beyond to the various Buddhist traditions throughout Asia. CROSSLISTED as PHL 430/PHL 530.
REL 531. BUDDHISM, NON-VIOLENCE,
AND SOCIAL JUSTICE (4). Investigates the philosophical grounding of Buddhist ideas about non-violence, justice and social responsibility. Looks at broad-based Buddhist social activism movements and leaders; their methods of training, issues and types of actions taken by "Socially Engaged Buddhists" living Buddhist traditions. CROSSLISTED as PHL 531.

## REL 532. YOGA AND TANTRIC TRADITIONS (4).

 An examination of the theory and practice of yoga and tantra in the traditions of Hinduism, Buddhism, and Jainism, and in their contemporary popular manifestations. Emphasis on the representation of yoga and tantra in Indian literature and history, including contemplative practices, bodily disciplines, and ritual. CROSSLISTED as PHL 432/PHL 532.REL 533. THEORY AND PRACTICE OF MODERN YOGA (4). An examination of the phenomenon of modern yoga in theory and in practice. Emphasis on the roots of contemporary forms of yoga in the intersection between traditional Hindu and Buddhist formulations of yoga, Indian wrestling and martial arts, European gymnastics, and cosmopolitan conceptions of "bodily culture" of both European and Indian origins. CROSSLISTED as PHL 433, PHL 533.
REL 534. SPIRITUALITY AND ECOLOGY:
GREEN YOGA (4). An exploration of the relationship between spirituality and ecological
engagement in traditional contexts and in contemporary spirituality, with a global focus on contemplative practices rooted in Indian tradition, such as yoga. CROSSLISTED as PHL 434, PHL 534.

REL 536. PHILOSOPHY AND RELIGION (3).
Examination of significant philosophical issues or movements and their relationship to theology and religion. CROSSLISTED as PHL 436/PHL 536. PREREQS: 6 credits of philosophy and sophomore standing.

## REL 543. WORLD VIEWS AND

ENVIRONMENTAL VALUES (3). A comparative study of world-views (secular and religious, Western and Eastern, modern and ancient) and how they affect concepts of nature, environmental values, and selected environmental issues. CROSSLISTED as PHL 443, PHL 543. PREREQS: One introductory-level science course and sophomore standing.
REL 544. BIOMEDICAL ETHICS (4). Application of ethical principles and decision-making processes to selected problems in medicine, health care, and biotechnology. Special attention given to end-of-life choices, reproductive rights and technologies, organ transplantation, research ethics, genetic engineering, and allocating scarce resources. An interdisciplinary focus that draws on social, legal, economic, and scientific issues in ethical decisions in medicine. CROSSLISTED as PHL 444/PHL 544. PREREQS: Graduate standing
REL 548. NATIVE AMERICAN PHILOSOPHIES
(4). Native American perspectives on ways of knowing, sources of meaning and ethics, the nature of reality, self, community, and cosmos. Includes lectures, scholarship, story-telling, poetry, theater, and music as forums for this exploration. Introduces ideas of leading Native American thinkers about the human relation to the natural world, sources of strength and wisdom, the nature of time and place and spirit, right ways of acting in communities, both civic and biotic, and the place of beauty in a well-lived life. CROSSLISTED as ES 448/ES 584, PHL 448/PHL 548.

REL 555. DEATH AND DYING (3). A
multidisciplinary study of cultural, philosophical, and religious perspectives on death, dying, and grieving. Not offered every year. CROSSLISTED as PHL 455, PHL 555. PREREQS: 6 credits of philosophy or sophomore standing.
REL 561. ART AND MORALITY (4). The arts in context of their connections to, and conflicts with, varied conceptions of the common good. Topics include free expression and community standards museums and obligations toward cultural treasures, art in public places, public funding of art, the politics of taste. CROSSLISTED as PHL 461/PHL 561. PREREQS: Sophomore standing.

## REL 566. RELIGION AND U.S. FOREIGN

RELATIONS (4). An examination of the intersection of religion and U.S. foreign relations from the late nineteenth century to the present. Surveys major events in U.S. diplomacy, including war and peace and explores the role of religion and religious ideas in shaping national identity, core values, and civil religion. CROSSLISTED as HST 466/HST 566. PREREQS: HST 202 and HST 203 or upper-division standing.
REL 570. RELIGION IN THE AMERICAN WEST (4). The history of religion in the American West. Examines four themes in the religious history of the American West: locations (the designation of particular places as special), migrations (movement in and out of the region), adaptations (changes over time, in response to changing conditions), and discrimination (recognition of difference, as well as prejudicial treatment based on difference). Engages with various primary and secondary sources, including texts, films, and photographs. CROSSLISTED as HST 570.
REL 585. POLITICS AND RELIGION IN THE
MODERN MIDDLE EAST (4). The role of religious and secular ideologies in the politics
of the 20th century Middle East. Topics include the impact of liberal and nationalist thought, the Iranian revolution, radical Islamist movements, and Zionism. CROSSLISTED as HST 485/HST 585. PREREQS: Graduate standing or instructor approval required.

## ■ TWENTIETH CENTURY STUDIES COURSES

TCS 407. SEMINAR (1-12). Advanced study of selected topics related to issues and problems in the twentieth century introduced in TCS core course offerings. Section I seminars will be graded pass/no pass and carry 1 credit; other sections will be graded A-F and will carry variable credit. This course is repeatable for a maximum of 16 credits.

TCS 507. SEMINAR (1-12). Advanced study of selected topics related to issues and problems in the Twentieth Century introduced in TCS core course offerings. Section I seminars will be graded $\mathrm{P} / \mathrm{N}$ and carry 1 credit; other sections will be graded A-F and will carry variable credit. This course is repeatable for a maximum of 16 credits.

Contemporary Women's Issues
Leadership and Community Engagement Race, Class and Gender
Sexuality Studies
Transnational Perspectives

## Graduate MAIS

Anthropology
Applied Anthropology
Ethnic Studies
Foreign Languages and Literatures
French
German
Spanish
Women, Gender, and Sexuality Studies
Primary or Secondary Area

## ANTHROPOLOGY

Anthropology offers courses to meet the needs of students interested in a comprehensive understanding of human societies and cultures past and present. Prehistoric, historic, ethnographic, and linguistic study provides the basis for understanding how a variety of societies solve common problems. The anthropology curriculum provides a cross-cultural perspective, a sound basis for later professional or graduate education.

An anthropology degree enables students to pursue a broad range of jobs requiring a liberal arts background; for example, education, human and governmental services, law, business, media, and medicine. It prepares them especially well for work situations that emphasize cross-cultural awareness, international contacts, and management of cultural resources.
Anthropology bridges sciences and the humanities and develops critical thinking, communication skills, facility with group processes, and the ability to work independently. It can help students succeed in an increasingly interconnected and complex world.

## ETHNIC STUDIES

Ethnic studies is an established academic discipline traditionally defined by a concentration on the experiences and concerns of the four major ethnic minority groups historically under-represented in United States political and institutional life and in university curricula. Ethnic studies faculty bring a variety of methodological approaches to bear on the exploration of issues affecting African American, Asian American, Chicano/aLatino/a, and American Indian and Alaskan Native communities. A degree in ethnic studies provides a sound basis for future work in graduate or professional programs and is of value to students interested in careers in a broad range of jobs requiring a liberal arts background and an understanding of race, ethnicity, and cultural competency.

## WORLD LANGUAGES

World languages and cultures (WLC) offers major programs leading to a BA degree in French, German, or Spanish, as well as minor programs in Asian Languages and Cultures, French, Ger-
man, and Spanish for undergraduate students with majors in other disciplines. The major and minor programs provide students with the opportunity to develop language skills and to raise their understanding of and appreciation for foreign literatures and cultures.
Proficiency in a foreign language and knowledge of a foreign culture can enhance career possibilities in fields that range from business, library work, and government service to park service, oceanography, agriculture, and forestry. Students often find it possible to combine languages with another major such as business administration, psychology, political science, sociology, and professional training to prepare for an exciting, internationally oriented career.
Study of a language other than English can help students improve communication skills in English, become more linguistically aware, develop analytical skills, and communicate on an equal basis with non-English-speaking people. Through language courses, students can gain a global perspective, more fully understand different cultures and value systems, and enhance their general knowledge of world development.
An undergraduate academic major (French, German, or Spanish) is required as a prerequisite to the Fifth-Year Teacher Education Program designed to prepare students for licensure and/or other graduate programs in education.

WLC cooperates with institutions of the Oregon University System and with other Northwest institutions of higher education in administering overseas study centers at Beijing and Fujian, China; Quito, Ecuador; Angers, Lyon, and Poitiers, France; Baden-Wurttemberg and Cologne, Germany; Tokyo, Japan; Seoul, Korea; Puebla, Mexico; Santander, Oviedo, and Segovia, Spain. Students may also study at different institutions in Russia and in the former Soviet republics. See the International Programs section of this catalog.

## LIBERAL STUDIES

The BA degree in Liberal Studies offers area studies that allow students to use language and culture courses taken in the School of Language, Culture, and Society to fulfill core course requirements. Students majoring in liberal studies can elect to complete their undergraduate degree using prestructured programs in the following areas: Asian studies, Chinese studies, European studies, Japanese studies, and Russian studies [suspended].
A minimum of 45 credits of course work in the concentration area is required to complete the Liberal Studies major.

## WOMEN, GENDER, AND SEXUALITY STUDIES

The Women, Gender, and Sexuality Studies Program at OSU relies on multidisciplinary approaches to the study of gender and sexuality, particularly as they intersect with race, ethnicity, class, culture, religion, nation, and ability. Our program emphasizes academic excellence, the use of feminist and anti-racist pedagogies, and scholarship that contributes to social change and justice. We are committed to challenging all forms of oppression, and we center queer, transnational, and women of color feminisms in our curriculum. We encourage creative, innovative, and collaborative frameworks of study, and we work to meet the needs of a wide range of students, developing curriculum that is meaningful for students who wish to pursue careers in academia, as well as those who may be interested in community organizing, feminist nonprofit work, and/or other professional areas. The Women, Gender, and Sexuality Studies Program offers an undergraduate major, minor, and certificate, as well as the MA in Women, Gender, and Sexuality Studies and the opportunity to declare Women, Gender, and Sexuality Studies as a primary and/or secondary area in the MAIS. We also offer undergraduate and graduate minors in Queer Studies.

## CERTIFICATE PROGRAMS

The School of Language, Culture, and Society participates in the Languages in Culture, Latin American Affairs and Russian Studies certificate programs. These interdisciplinary programs are designed for students who wish to combine their school major with a broad knowledge of Latin American or Russian affairs, past and present, or who wish to explore how languages and cultures interact. Core courses are typically taken in language, in the humanities and social sciences.

## GRADUATE PROGRAMS

The School of Language, Culture, and Society offers master's of arts and doctor of philosophy degrees in Applied Anthropology, College Student Services Administration; Contemporary Hispanic Studies; and Women, Gender, and Sexuality Studies. Graduate minors are offered in Anthropology; Applied Anthropology; Contemporary Hispanic Studies; Ethnic Studies; Food in Culture and Social Justice; Foreign Languages and Literatures; and Women, Gender, and Sexuality Studies.
Students may earn the Master of Arts in Interdisciplinary Studies (MAIS) degree in the areas of anthropology, applied anthropology, ethnic studies, foreign languages and literatures, French, German, Spanish, and women studies. Typically, candidates who select French,

German or Spanish as one of their primary areas complete graduate course work in language, linguistics, literature and culture studies. To be admitted to a foreign language component of the MAIS degree, students must meet the Graduate School's general entrance requirements and obtain the consent of a graduate faculty member of the School of Language, Culture, and Society who agrees to serve as the field advisor. A maximum of 6 graduate credits completed at an overseas study center may be used to satisfy requirements for any one of three fields of the MAIS degree.

## UNDERGRADUATE MAJORS WITH OPTIONS

## ANTHROPOLOGY (BA, BS, CRED,

 HBA, HBS)
## Also available via Ecampus.

Anthropology seeks to promote awareness of the complexity and diversity of humanity and the human experi-ence-past and present-in its cultural, biological, and ecological contexts. An Anthropology degree emphasizes cultural sensitivity and enables students to pursue a broad range of jobs requiring a liberal arts background; for example, education, human and governmental services, law, business, media and medicine. It prepares them especially well for work situations that emphasize cross-cultural awareness, international contacts and management of cultural resources. Anthropology curriculum provides a sound basis for later professional or graduate education. Four options are available: archaeology, biocultural, cultural/linguistic, and general anthropology. Completion of an option is required to earn a degree in Anthropology.

## Anthropology Core ( 24 Credits)

ANTH 110. *Introduction to Cultural Anthropology (3)
ANTH 230. Time Travelers (3)
ANTH 240. Introduction to Biological Anthropology (3)
ANTH 345. *Biological and Cultural Constructions of Race (3)
ANTH 350. *Language, Culture, and Society (4)

ANTH 370. ^Anthropological Theories (4)
ANTH 475. Anthropology in Practice (4) Majors must additionally fulfill requirements for one of the options, plus upper-division electives in Anthropology to complete a total of 60 credits for the major. The following restrictions apply:

- No more than 6 credits internship ANTH 410
- No more than 6 credits from ANTH 311-ANTH 319, *Peoples of the World classes $(3,3)$
- At least 12 credits at the 400 -level excluding blanket-numbered (ANTH 401-ANTH 409) and internship (ANTH 410) credits
- A grade of C - or better is required for all courses used to complete major requirements. Such courses cannot be taken $\mathrm{S} / \mathrm{U}$.
Major Code: $\mathbf{8 6 0}$

## OPTIONS

## ARCHAEOLOGY OPTION

Also available via Ecampus.
The Archaeology option focuses on the material remains of past cultures and their environments. This option provides students with the essential field and laboratory skills necessary to collect, analyze, and curate archaeological materials, as well as meet the ethical issues and legal responsibilities concerning cultural resource management.

## Anthropology Core (24 Credits)

ANTH 110. *Introduction to Cultural Anthropology (3)
ANTH 230. Time Travelers (3)
ANTH 240. Introduction to Biological Anthropology (3)
ANTH 345. *Biological and Cultural
Constructions of Race (3)
ANTH 350. *Language, Culture, and Society (4)

ANTH 370. ^Anthropological Theories (4)
ANTH 475. Anthropology in Practice (4)

## Archaeology Option (33 credits)

Foundations (20 credits):
ANTH 332. Archaeological Inference (4)
ANTH 435. Cultural Resources: Policy and Procedures (4)
ANTH 438. Archaeology Field School (12)

## Survey Courses

Select 2 classes for a minimum of 7 credits:
ANTH 331. Mesoamerican Prehistory (3)
ANTH 432. *Domestication, Urbanization, and the Rise of Civilization (4)
ANTH 433. First Americans, Last Frontiers (4)

ANTH 434. North America After the Ice Age (4)
ANTH 436. Northwest Prehistory (4)
ANTH 439. Archaeology of Foragers (4)
Methods Courses
Select 2 classes for a minimum of 6 credits:
ANTH 421. Analysis of Lithic Technologies (4)

ANTH 422. Historic Materials Analysis (4)
[Pending approval 96641]
ANTH 423. Methods and Theory in
Historical Archaeology (4)
ANTH 424. Settlement Archaeology (4)
ANTH 425. Ceramic Analysis in
Archaeology (4)
ANTH 430. Topics in Archaeology (1-4)
ANTH 437. Geoarchaeology (4)
ANTH 492. Archaeology Laboratory
Methods (1-3)
ANTH 497. Archeological Field Methods (1-3)

## Take remaining Anthropology

 credits to equal $\mathbf{6 0}$ credits with the following restrictions:- No more than 6 credits blanket numbers ANTH 401-ANTH 409
- No more than 6 credits internship ANTH 410
- No more than 6 credits from ANTH *311-ANTH 319, *Peoples of the World classes $(3,3)$
- At least 12 credits at the 400 level excluding blanket-numbered (ANTH 401-ANTH 409) and internship (ANTH 410) credits

## Total=60

Footnotes:

* Baccalaureate Core Course (BCC)
${ }^{\wedge}$ Writing Intensive Course (WIC)

## Option Code: 854

## BIOCULTURAL OPTION

Also available via Ecampus.
The Biocultural option focuses on the ways evolutionary biology, politicaleconomy, ecology, and culture interact to influence human health and behavior, over time and in cross-cultural perspective. This option prepares students to engage in ethical fieldwork, laboratory work, and data analyses, to ultimately understand the intersections of biomarkers and other indicators of human health status, demographic processes, social relationships, cultural norms, and political and economic inequalities.

## Anthropology Core ( $\mathbf{2 4}$ Credits)

ANTH 110. *Introduction to Cultural Anthropology (3)
ANTH 230. Time Travelers (3)
ANTH 240. Introduction to Biological
Anthropology (3)
ANTH 345. *Biological and Cultural
Constructions of Race (3)
ANTH 350. Language, Culture, and Society (4)

ANTH 370. ^Anthropological Theories (4)
ANTH 475. Anthropology in Practice (4)
Biocultural Option (30 additional credits)
Foundations (10 credits):
ANTH 371. Research Methods in Cultural Anthropology (4)
ANTH 374. *Anthropology and Global Health (3)
ANTH 383. *Introduction to Medical Anthropology (3)
Survey Courses ( $\mathbf{3}$ classes for a minimum of 12 credits):
ANTH 441. Human Evolution (4)
ANTH 446. *Forensic Anthropology (4)
ANTH 449. Biocultural Perspectives on
Human Reproduction (4)
ANTH 461. Neuroanthropology (4)
ANTH 477. Ecological Anthropology (4)
ANTH/FCSJ 486. Anthropology of Food (4)
Advanced Theory and Methods (2 classes
for a minimum of 8 credits):
ANTH 442. Human Adaptability (4)
ANTH 443. Human Osteology Lab (4)
ANTH 444. Nutritional Anthropology (4)

Take remaining Anthropology credits to equal 60 credits with the following restrictions:

- No more than 6 credits blanket numbers ANTH 401-ANTH 409
- No more than 6 credits internship ANTH 410
- No more than 6 credits from ANTH 311-ANTH 319, *Peoples of the World classes (3,3,)
- At least 12 credits at the 400 level excluding blanket-numbered (ANTH 401-ANTH 409) and internship (ANTH 410) credits.

## ETHNIC STUDIES (BA, BS, CRED,

 HBA, HBS)Ethnic Studies is an interdisciplinary field critically engaging the historical and ongoing impact of race and ethnicity primarily in the US but within a global context. A major in Ethnic Studies provides students with a strong background and set of analytical skills to address issues of difference and inequity in a wide range of areas, from state policy and institutions to pop culture, media, and literature.

## Ethnic Studies Major Core-

Required of all majors ( 14 credits):
ES 101. *Introduction to Ethnic Studies (3)
ES 201. *Inventing Ethnic America (3)
Either ES 350. ${ }^{\wedge}$ Public Discourse and
Writings on Race (4)
or ES 354. ^Literature of Ethnic
Minorities in the United States (4)
ES 451. Theories of Race and Ethnicity (4)
Ethnic Studies 200-level Courses
Choose 3 courses from among the following (12 credits):
ES 211. *Introduction to Latino/a Studies (4) (Pending Approval 97876)

ES 213. *Contemporary Issues in Latino/a
Studies (4) (Pending Approval 97877)
ES 221. *Survey of African American Studies I (4)
ES 223. *Survey of African American Studies II (4)
ES 231. *Introduction to Asian American Studies (4)
ES 233. *Asian Pacific American Activism and Empowerment (4)
ES 241. *Introduction to Native American Studies (4)
ES 243. *Native American Assimilation and Activism (4)

## Ethnic Studies Upper-Division

Elective Courses ${ }^{1}$
Choose 6 courses from among the following (22-24 credits, at least 3 courses must be 400 level):
ES 311. Narratives of Latino Migrations (3)
ES 314. Chicano/a Literature (3)
ES 321. African American Political and Social Thought: 20th Century (4)
ES 323. Contemporary African American Social Discourse (4)
ES 332. Asian Pacific Americans and the Media (4)
ES 334. *Asian Pacific American Literature (4)
ES 345. Native Americans in Oregon (4)
ES 351. *Ethnic Minorities in Oregon (4)
ES 353. *Environmental Racism (4)
ES 355. *Race, Space, and Difference (4)
ES 357 *Farmworker Justice Movements (4)
ES/QS/WGSS 375. *Arts and Social Justice (4)
ES 399. Special Topics (3-4)
ES 411. Chicano/as in/on Film (3)
ES/QS/WGSS 431. *Queer of Color Critiques (4)

ES 437. *(En)gendering Asian Pacific America (4)
ES 444. Native American Law: Tribes,
Treaties, and the United States (4)
ES 445. *Native American Science and Technology (4)
ES/PHL/REL 448. Native American
Philosophies (4)
ES 452. *Ethnicity in Film (4)
ES 453. *Ethnohistory Methodology (4)
ES 457. *Literature by Women of Color in the United States (4)
ES 458. Racial Patterns of Urbanization (4)
ES/ANTH/WLC 459. Language, Race and Racism in the U.S.: Advanced Study (4)
ES 460. Ethnicity and Social Justice (4)
ES 461. Racism and the Prison Industrial Complex (4)
ES/FCSJ 464. Food and Ethnic Identity:
Decolonizing Our Food and Body (3)
ES/QS/WGSS 472. *Indigenous Two-Spirit
and Queer Studies (3)
ES/QS/WGSS 477. *Queer/Trans People of
Color Arts and Activism (4)
ES 499. Special Topics (3-4)
A grade-point average of 2.0 is required and majors must earn a grade of C - or above in all major courses.

## Total=48-50 credits (30-32 upper <br> division)

## Footnotes:

* Baccalaureate Core Course (BCC)
$\wedge$ Writing Intensive Course (WIC)
${ }^{1}$ With prior written ES faculty approval, students may elect to include $4-8$ credits of ES 403 Thesis, ES 406 Projects, or ES 410 Internship, in lieu of one or two 300-level upper division elective courses.

## Major Code: 894

FRENCH (BA, CRED, HBA)

## Also available via Ecampus.

The minimum upper-division course requirements are listed below. Additional requirements are available from departmental advisors and the departmental office. Required courses may not be taken S/U.

## French (45)

FR 311, FR 312, FR 313. Third-Year French $(3,3,3)^{\mathbf{8}}$
FR 333. *French Culture and Society Since the Revolution (3) ${ }^{7,8}$

## WOMEN, GENDER, AND SEXUALITY STUDIES (BA, BS, CRED, HBA, HBS)

## Also available via Ecampus.

The Women, Gender, and Sexuality Studies major represents an interdisciplinary curriculum composed of course work in the social sciences and humanities with gender as the focal point of analysis. The curriculum examines women's experiences, past and present, through feminist theory and research to better understand differences in power and privilege based on gender as well as race and ethnicity, religion, socioeconomic status, sexual identity, age, physical appearance, and mental or physical ability. Many classes incorporate a social activism component, and students are required to complete an internship to put their course work into action as well as a senior research project to understand and contribute to the scholarship in this field.

A total of 51 credits is required for the major, 43 credits of required Women, Gender, and Sexuality Studies core courses and 8 credits of elective courses chosen from Women, Gender, and Sexuality Studies or Women, Gender, and Sexuality Studies Program courses. An approved program course is one that has a focus on gender and/or women's issues, is taught in a unit other than the Women, Gender, and Sexuality Studies Program, and has been approved as fulfilling the requirements of a Women, Gender, and Sexuality Studies course.
No more than 9 credits of Women, Gender, and Sexuality Studies Program courses may be used toward the major. All required course work must be taken
on campus and no more than 6 credits of online elective course work can be used toward the on-campus major.

## Baccalaureate Core (48 credits excluding WIC)

## Liberal Arts Core ( $\mathbf{1 5}$ credits)

Fine Arts (3)

## GLOBAL DEVELOPMENT <br> STUDIES MINOR

"Development" refers to the expansion of economic activity, integration into global flows of information and commerce, and improvement of the quality of life. The undergraduate minor program in Global Development Studies at OSU is designed to help students understand the challenges faced by developing communities and countries, including economic inequality, poverty, health and wellness, and the sustainable use of natural resources. Emphasis is placed on interdisciplinary and practical solutions to international development problems.

Courses address both thematic and regional dimensions of international development. Some required and elective courses may also count toward fulfillment of baccalaureate core requirements in categories such as "Contemporary Global Issues," "Cultural Diversity," "Science, Technology and Society," and "Social Processes and Institutions." Courses will be offered on campus, with the potential for some instruction via Ecampus. Students will be encouraged to participate in research projects, international experiences, and applied work (e.g., internships, service learning, etc.).

Students putting together a program of study in Global Development Studies should consult their academic advisor. Students are required to take a minimum of 27 credits, as follows.

## Core

Choose 2 of the following (minimum 6 credits):
ANTH 482. *Anthropology of International
Development (4)
ECON 455. *Economic Development (4)
GEOG 330. *^Geography of International
Development and Globalization (3)
PS 345. *Politics of Developing Nations (4)

## Regional Focus

Choose 2 courses that focus on a single region of the developing world (minimum 6 credits): (e.g., HST 350. History of Latin America, and ANTH 313. Peoples of the WorldLatin America)
ANTH 311. *Peoples of the World-North America (3)
ANTH 312. *Peoples of the World-Europe (3)
ANTH 313. *Peoples of the World-Latin
America (3)
ANTH 314. *Peoples of the World-Middle East (3)
ANTH 315. *Peoples of the World-Africa (3)
ANTH 316. *Peoples of the World-South
and Southeast Asia (3)
ANTH 317. *Peoples of the World-Pacific (3)
ANTH 318. *Peoples of the World-China (3)
ANTH 319. *Peoples of the World-Japan and
Korea (3)
GEOG 311. *Geography of Africa (3)
GEOG 313. *Geography of Asia (3)
GEOG 314. *Geography of Latin America (3)
HST 320. *Ancient Near East (4)
HST/REL 350. *Modern Latin America (4)
or HST 351. *Modern Latin America (4)
HST 381, HST 382. *History of Africa $(4,4)$
HST 392. *Modern China and Japan (4)
PS 344. *Latin American Politics (4)
PS 346. *Middle East Politics (4)
PS 348. *Chinese Politics (4)
PS 350. *Japanese Politics (4)

## Thematic/Topical Focus

Choose 4 or 5 courses from the following (minimum 15 credits):
ANTH 374. *Anthropology and Global Health (3)
ANTH 466. *Rural Anthropology (4)
ANTH 481. *Natural Resources and
Community Values (3)
COMM 326. Intercultural Communication (3)

COMM 440. Theories of Conflict and Conflict Management (3)
CROP 330. *World Food Crops (3)
GEOG 240. *Climate Change, Water, and Society (3)
GEOG 300. *Sustainability for the Common Good (3)
GEOG 330. *^Geography of International
Development and Globalization (3)
GEOG 331. Population, Consumption, and Environment (3)
GEOG 431. Global Resources and
Development (3)
GEOG 432. *Geography of Food and
Agriculture (3)
H 333. *Global Public Health (3)
HDFS 447. *Families and Poverty (3)
HEST 310. *Introduction to Community
Engagement and Community-Based
Design (3)
HEST 411. Engineering Design for
Emergency and Low-Resource
Environments (3)
HEST 412. Multidisciplinary Case Studies in
Humanitarian Engineering, Science and
Technology (3)
PHL/REL 443. *World Views and
Environmental Values (3)
PS 205. *Introduction to International Relations (4)
PS 458. *International Political Economy (4)
SOC 381. Social Dimensions of
Sustainability (4)
SOC 460. The Sociology of Globalization (4)
SOC 481. *Society and Natural Resources (4)
SUS 102. *Introduction to Environmental Science and Sustainability (4)
WGSS 280. *Women Worldwide (3)
WGSS/ES/ANTH/WLC 373. Approaches to Social Justice (3)
WGSS 480. *International Women (3)

## Experiential, International or ServiceLearning (0-3)

Highly encouraged, but not required. Students may fulfill this by taking credits in any discipline listed above involving experiential learning, international exchange, or service learning (e.g., ANTH 409. Practicum, ANTH 410. Internship). The OSU Center for Civic Engagement can also help connect students with opportunities.

## QUEER STUDIES MINOR

## Also available via Ecampus.

The undergraduate minor in Queer Studies prepares students to examine how gender and sexuality are constructed and policed and, further, imagines liberatory futures for people of all genders and sexualities. Centering itself on the activism and scholarship of women of color, transnational feminisms, Two-Spirit Indigenous people, and Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) people of color, this minor examines homophobia and transphobia's relationship with racism, colonialism, sexism, ableism, classism and other forms of power. A total of 33 credits is required for the
minor, with at least 12 of these credits at the upper-division level.

## Core Requirements (25 Credits)

QS/WGSS 262. *Introduction to Queer
Studies (3)
QS/WGSS 364. *Transgender Politics (3)
QS 409. Practicum: Projects in Queer
Studies (3)
QS/WGSS/ES 431. *Queer of Color Critiques (4)

QS/WGSS 462. *Queer Theories (4)
QS/WGSS/ES 472. ^Indigenous Two-Spirit and Queer Studies (3)
QS/WGSS 476. *Transnational Sexualities (4)

## Electives (8 Credits)

The remaining 8 credits may be taken from the Queer Studies electives (any course with the QS prefix) and from approved program courses offered by other departments.
ART/QS/WGSS 432.* Gender, Sexuality, and the Photographic Image (3)
HST 368. *Lesbian and Gay Movements in Modern America (4)
QS 299. Special Topics (3)
QS/WGSS 362: *Serving the LGBTQ+
Communities (3) (Pending approval)
QS/WGSS/ES 375. *Arts and Social Justice (4)

QS 399. Special Topics in Queer Studies (3)
QS 409. Practicum: Projects in Queer Studies (3)
QS/WGSS 473. Transgender Lives (3)
QS/WGSS/ES 477. *Queer/Trans People of
Color Arts and Activism (4)
QS 499. Special Topics in Queer Studies (4)
WGSS 360. *Men and Masculinities in a
Global Context (3)
WGSS 430. Women of Color Feminisms (4)
WGSS 460. ^Women and Sexuality (3)
WGSS/PSY 466. *Fat Studies (4)
WGSS 480. *International Women (3)

## SOCIAL JUSTICE MINOR

The Social Justice minor provides interdisciplinary academic classes in which students think critically about social justice and experiential learning activities in which students engage in the work of social justice. The program addresses local, national and international issues of social justice. A core of theory, case studies, and practice is combined with elective courses from across the College of Liberal Arts that address the following areas: histories, cultures and geographies of dominance; experiences of oppression; theories of justice; policies, institutions, and structures that promote or hinder equity; and collective action or processes of change leading to social justice.

The Social Justice minor is a collaboration of the School of Language, Culture, and Society, the School of History, Philosophy, and Religion, and the School of Public Policy.

## Required courses (9 credits)

ANTH/ES/WGSS/WLC 373. Approaches to Social Justice (3)
ANTH/ES/WGSS/WLC 410. Internship (4) (3 of active internship, 1 of critical discussion about internship.)
ANTH/ES/WGSS/WLC 485. Capstone in Social Justice (2)

## Electives:

18 credits taken in at least three different designators with at least one globallyoriented course (indicated by ${ }^{\mathbf{1}}$ ). Categorization of courses is to facilitate advising and choice by students.

## Theories and Perspectives

ANTH 345. *Biological and Cultural
Constructions of Race (3)
ES 451. Theories of Race and Ethnicity (4)
ES 460. Ethnicity and Social Justice (4)
PHL 160. *Quests for Meaning: World Religions (4) ${ }^{1}$
PHL 205. *Ethics (4)
PHL 207. *Political Philosophy (4)
PHL 220. *World-Views and Values in the Bible (4) ${ }^{\mathbf{1}}$
PHL 315. *Gandhi and Nonviolence (4) ${ }^{\mathbf{1}}$
PHL 344. *Pacifism, Just War, and Terrorism (4) ${ }^{1}$

PHL 365. *Law in Philosophical Perspective (4)

PHL 431. Buddhism, Non-Violence, and Social Justice (4) ${ }^{\mathbf{1}}$
PHL 444. *Biomedical Ethics (4)
PAX 201. Study of Peace and the Causes of Conflict (3)
PS 206. *Introduction to Political Thought (4)

PS 322. *Constitutional Law: Civil Rights and Liberties (4)
PS 361. Classical Political Thought (4)
PS 362. Modern Political Thought (4)
PS 363. *Gender and Race in American Political Thought (4)

WOMEN, GENDER, AND SEXUALITY STUDIES MINOR

## Also available via Ecampus.

The Women, Gender, and Sexuality Studies minor provides an exploration of gender and a focus on the lives of women both in the U.S. and worldwide. It studies the interaction of gender within a complex matrix of class, race, age, ethnicity, nationality, sexual identity, appearance, and ability.

Students are expected to take the bulk of their course work toward the minor from the core and elective courses offered by the Women, Gender, and Sexuality Studies Program. A total of 27 credits is required for the minor, with at least 12 credits at the upper-division level.
All required course work must be taken on campus and no more than 3 credits of online elective course work can be used toward the on-campus minor.

## Core Requirements (24)

WGSS 223. *Women: Self and Society (3)
WGSS 224. *Women: Personal and Social
Change (3)
WGSS 262. *Introduction to Queer Studies (3)

WGSS 410. Internship (3)
WGSS 414. *Systems of Oppression in
Women's Lives (4)
WGSS 416. Theories of Feminism (4)
WGSS 480. *Women in a Cross-Cultural Context (4) [Pending approval]
The remaining 3 credits may be taken from Women, Gender, and Sexuality Studies electives and from approved program courses offered in other departments. An approved program course is one that has a focus on gender and/or women's issues, is taught in a unit other than the Women, Gender, and Sexuality Studies Program, and has been approved as fulfilling the requirements of a Women, Gender, and Sexuality Studies Program course. See the electives for the

Women, Gender, and Sexuality Studies major. In addition, WGSS 270: Violence Against Women (3), WGSS 340: *Gender and Science (3), WGSS 430: Women of Color Feminisms (4), and WGSS 460: ${ }^{\wedge}$ Women and Sexuality (4) may be taken as electives for the minor. No more than 3 credits of WGSS 402 Independent Study and WGSS 410 Internship may count toward the minor.

## Total=27

Footnotes:

* Baccalaureate Core Course (BCC)
$\wedge$ Writing Intensive Course (WIC)

## Minor Code: 908

## GRADUATE MAJORS

## APPLIED ANTHROPOLOGY (MA,

## MS, PhD, MAIS)

The MA, MS, and PhD degrees in Applied Anthropology provide advanced education in anthropology that will prepare students to practice their skills in occupations in both public and private sectors at the local, national, and international levels. These courses of study integrate anthropological theory and practice within a specific concentration chosen by the student.
MA, MS Program Requirements (64 credits)

1) Core Requirements (12 credits)

ANTH 575. Theory of Culture (4)
ANTH 593. Statistical Applications in Anthropology (4)*
ANTH 595. Anthropological Research
Design (4)
*Or equivalent course, e.g., H 524.
Introduction to Biostatistics (4) or FES
523. Quantitative Analysis in Social Science (4)
2) Major Specialization (12 credits)

Take courses in one of the following options:
a) Archaeology:

ANTH 531. Archaeological Theory (4)
ANTH 535. Cultural Resources: Policy and
Procedures (4)
ANTH 543. Human Osteology (4)
b) Biocultural Anthropology:

ANTH 583. Advanced Medical
Anthropology (4)
ANTH 585. Uses of Anthropology (4)
ANTH 591. Ethnographic Methods (4)
c) Cultural/Linguistic

## Anthropology:

ANTH 576. Advanced Anthropological
Theory Seminar (4)
ANTH 585. Uses of Anthropology (4)
ANTH 591. Ethnographic Methods (4)

## 3) Supporting Courses in

Anthropology (12 credits)
Any combination of 500-level courses as approved your advisor/committee
4) Outside Skills/Minor (15 credits)

Any combination of 500-level courses in another discipline that facilitate student's mastery of knowledge and skills needed
to carry out original research as approved by advisor/committee

## 5) Internship (6-12 credits)

## 6) Thesis (6-12 credits)

7) Seminar, "Tan Sack" (1 credit)

ANTH 507. Seminar (1)

## 8) Degree Type Proficiencies

For the Master of Arts degree, the student must show second proficiency (including American Sign Language) equivalent to that attained at the end of a second-year university course in that language with a grade of "C" (2.00) or better. Students who have successfully completed at least two years of high school in a language other than English will have fulfilled this requirement.

The Master of Science degree is an option for students specializing in archaeology and biocultural anthropology, where appropriate, pending approval of the major professor. The student must show technical proficiency in areas that emphasize scientific methodological skills (e.g., GIS, statistics, and epidemiology). The MS student is encouraged to undertake the 15 credits of proficiency as part of their outside skills/minor requirements. This will be in lieu of the language proficiency required for MA. The courses for the MS degree must be completed and approved by the student's Committee before the student takes the final oral examination for the degree. Students specializing in cultural/linguistic anthropology are not eligible for the MS.

## MAIS Degree

The school also participates in the Master of Arts in Interdisciplinary Studies (MAIS) degree program. In other advanced degree programs, anthropology may be used as a minor. See the Graduate School for details.

## PhD Requirements (110 credits)

1) Students must have MA or MS in Anthropology or related discipline (34 credits)
Students must bring in graduate credits to cover the equivalent of the courses central to the MA/MS in Applied Anthropology at Oregon State University (20 credits, see below) plus 14 credits of graduate level Anthropology courses or graduate courses in relevant disciplines as agreed upon by the major professor. If these requirements are not met upon entrance to the program, they must be earned after admittance. Students will work with their major professors in consultation with the Director of Graduate Studies to assess what can be accepted from past work and what must be made up at OSU.
Central Courses of the MA/MS in Applied

## Anthropology

Two courses in Anthropological Theory (8 credits)

Statistics (4 credits)
Methods (such as Ethnographic Methods or Osteology or Archaeological Methods, etc.) (4 credits)
Course in Applied Anthropology or Uses of Anthropology (4 credits)

## 2) Specialization Courses (25 credits)

Specialization courses are those that enable students to develop their knowledge in order to do effective comprehensive exams and dissertation work in their particular field of expertise. Students work with their major professor and their Committee to determine what courses will be most helpful for them.

Specializations courses must include ANTH 695. Anthropological Research Design (4) for developing their dissertation research project, two courses in Anthropology, and 2 credits of "Tan Sack" (ANTH 607. Seminar). All other specialization courses may be within or outside of Anthropology.

## 3) Second Language Proficiency

Evidenced by passing two years of uni-versity-level second language study or by passing the proficiency exam. Must be completed before Comprehensive Exams are taken. A substitution of skill sets is possible for archaeology students in consultation with the major professor and the Director of Graduate Studies.
4) Graduate Minor is optional
5) Residency ( 6 credits)

ANTH 610. Internship
6) Comprehensive Exams (9 credits)

ANTH 699. Special Topics: Comprehensive Review

## 7) Dissertation ( $\mathbf{3 6}$ credits) <br> ANTH 603. Thesis

## Major Code: 8640

## COLLEGE STUDENT SERVICES ADMINISTRATION (EDM, MS)

Graduate Areas of Concentration College and university characteristics and environments; history, development, and current issues in higher education; leadership and management of administrative departments; program oversight in specialized administrative areas such as financial aid, student activities, career services, multicultural affairs, recreational sports, and student housing; student development theory and application

## Also available via Ecampus.

The College Student Services Administration program offers preparation in the organization, leadership and administration of programs, services, and facilities in postsecondary education, including college union/centers, recreational sports, student government and activities, residence life programs, student housing, financial aid, career services, and general student advising and academic support.

## CSSA students have two degree tracks from which to select:

This first degree track, the Master of Education (EdM), is earned through successful completion of all required program course work and successful completion and defense of a capstone portfolio. The capstone portfolio is a cumulative, comprehensive, and reflective form of student assessment. Completing a portfolio requires that the student address each program competency in a comprehensive, meaningful, and creative way. The portfolio "product" can be shared in any number of formats, including, but not limited to, writings, pictures, audio or video clips, and electronic media (websites, PowerPoint documents, etc.). Final portfolios are distributed to and evaluated in writing by a committee just prior to the last term of course work. A public, formal committee meeting with oral presentation and defense serves as the second method of evaluation.

The second degree track, the Master of Science (MS), is earned through successful completion of all required program course work and successful completion and defense of thesis. In addition to required course work and the thesis, students pursuing the MS degree must also demonstrate adequate evidence of competence and learning in each of the five CSSA competency areas. Demonstration of this evidence may take the form of an extended/detailed competency plan with select work samples or other methods approved by the major professor. This demonstration need not be a portfolio, but it should clearly show evidence of competency mastery. Thesis research should be reflected in the demonstration.

For thesis work, CSSA and university policies require students to convene (a) a proposal meeting to present their research plan (generally spring of the first year for full-time students or fall/winter of the second year for part-time students) and (b) a final defense for presentation and evaluation of the research and competency demonstration (final term of course work). Students who wish to pursue the MS should decide this early in their graduate program, ideally during the first term, since such research requires careful and lengthy planning. Major professors should be made aware of this decision.

## Graduation from the program requires the following:

- Successful completion of at least 54 credits of graduate-level course work, the majority of which are required in the major field of study (CSSA). Additionally, a minor or area of specialization is chosen and completed by the individual student; and
- Successful completion and
presentation of a capstone project (EdM degree) or a thesis capstone (MS degree) during the final year.
Additional information available at http://liberalarts.oregonstate.edu/ school-language-culture-and-society/cssa/ cssa-admission-prospective-students.

## Major Code: 2200

## CONTEMPORARY HISPANIC STUDIES (MA)

Graduate Areas of Concentration Contemporary Hispanic studies
The MA degree in Contemporary Hispanic Studies provides an alternative to traditional pre-doctoral programs focused on literary theory or linguistics.

Based on the multidimensional approach to language education promoted in the National Standards for Foreign Language Education, this program brings together theoretical knowledge and practical skills in a single program designed to prepare students for further graduate study or for careers in education, migrant programs, nongovernmental organizations, and other sectors affected by rapidly changing demographics. The integrated minor provides an additional exploration of themes related to intercultural communication from a broad, interdisciplinary perspective.

The Master of Arts in Contemporary Hispanic Studies requires completion of 48 credits of graduate-level course work. A 15-credit integrated minor emphasizing intercultural studies must also be completed.

## Core Requirements (33 credits)

## Spanish Language (6)

SPAN 561. Fifth-Year Spanish (3)
SPAN 562. Fifth-Year Spanish (3)

## Hispanic Cultural Studies (9)

SPAN 538. Selected Topics in Luso-Hispanic Culture (3)
Two other SPAN courses (6)
Hispanic Literature (6)
SPAN 544. Selected Topics in the Literature of Spain (3)
SPAN 545. Selected Topics in the Literature of Latin America (3)
SPAN 546. Recent Latin American Literature (3)

SOC 566. International Development: Gender Issues (4)
COMM 516. Ethnography of
Communication (3)
COMM 526. Intercultural Communication:
Theories and Issues (3)
COMM 527. Cultural Codes in
Communication (3)
Major Code: $\mathbf{8 5 0 0}$

## WOMEN, GENDER, AND

SEXUALITY STUDIES (MA, PhD, MAIS)

Graduate Areas of Concentration
Feminist leadership; gender, rhetoric, and representation; health and gender
justice; social justice theory and practice
MA students in Women, Gender, and Sexuality Studies will take 41-43 credits of required course work, including at least one course from each of three cluster areas:

1. Women of Color Feminisms/Queer of Color Feminisms,
2. Global/Transnational Feminisms, and
3. Feminist Praxis, as well as 6 elective credits.
MA students must also demonstrate second-year proficiency in a second language.

PhD students in Women, Gender, and Sexuality Studies will take 27-28 credits of core requirements, as well as 36 dissertation credits, and 12 credits of electives in a concentration specific to their area of focus, for a total of 75-76 required credits. No more than two "slash" courses will be accepted toward the degree.

## MA in Women, Gender, and

Sexuality Studies
Core (41-43)
WGSS 503. Thesis (6)
WGSS 511/512/513. Orientation and
Professionalization I, II, III $(1,1,1)$
WGSS 514. Systems of Oppression in

Women's Lives (4)
WGSS 516. Theories of Feminism (4)
WGSS 518. Feminist Research (4)
WGSS 616. Multiracial, Transnational, and Queer Feminisms I (4)
All MA students must take at least one course from each of the following three clusters, and 6 additional credits of electives:

## Cluster \#1: Women of Color <br> Feminisms/Queer of Color

## Feminisms

WGSS 530. Women of Color Feminisms (4)
WGSS/ES/QS 531. Queer of Color Critiques (3)

WGSS/ES 575. Critical Race Feminisms and Outsider Jurisprudence (4)
WGSS/ES/QS 577. Queer/Trans People of Color Arts and Activism (3)
WGSS 583. Race, Gender, and Health Justice (4)

## Cluster \#2: Global/Transnational

## Feminisms

All MA students must take at least one of the following courses:
WGSS/ES/QS 572. Indigenous Two-Spirit and Queer Studies (3)
WGSS/QS 576. Transnational Sexualities (4)
WGSS 582. Global Perspectives on Women's Health (4)
WGSS 585. Transnational Feminisms (4)
WGSS 595. Global Feminist Theologies (4)

## Cluster \#3: Feminist Praxis

WGSS 510. Internship (3)
WGSS 521. Feminist Leadership (4)
WGSS 535. Feminist Teaching and Learning (4)

WGSS/GRAD 542. The Inclusive Classroom: Difference, Power, and Discrimination (3)
WGSS 586/587/588: Global Experience I, II, III (1,1,1)

## Second-year proficiency in a

 second language as demonstrated by:1. Two years of a college language sequence on the transcript.
2. Scoring at second-year proficiency on a language placement test.
3. Completing the 213 course of a language sequence while enrolled in the MA program.

## Electives (6)

Students may elect to take any WGSS/QS electives.

## Total Minimum Required Credits =

 41-43PhD in Women, Gender, and
Sexuality Studies
Core Requirements (27-28)
WGSS 518. Feminist Research (4)
or WGSS 619. Decolonizing Methods (4)
or WGSS 555. Feminist Textual and
Discourse Analysis (4)
(Students who have already taken WGSS 518 and WGSS 555 at OSU may take WGSS 619 or another approved methods course.)
WGSS 521. Feminist Leadership (4)
(Students who have already taken WGSS
521 at OSU will take WGSS 610 Internship
and Shadowing.)
WGSS 535. Feminist Teaching and Learning (4)
or WGSS/GRAD 542. The Inclusive Classroom: Difference, Power, and Discrimination (3)
WGSS 611. Colloquium (1) (Students must take 4 terms of colloquium and must present dissertation research once.)
WGSS 616. Multiracial, Transnational, and Queer Feminisms I (4)
WGSS 617. Multiracial, Transnational, and Queer Feminisms II (4)
WGSS 620. Social Justice Theory and Practice (4)
Thesis (36)
WGSS 603. Thesis (36)

## Electives (12)

Students may select a concentration in one of the four areas below or may work in consultation with their advisor to develop a 12 -credit concentration specific to their needs and interests. Students may also elect to take 12 elective credits from any WGGS graduate courses or other approved courses in any of the graduate concentrations.

## Graduate Concentrations

Minimum 12 credits of course work; no more than two of these courses may be "slash" courses.

## Feminist Leadership

## Core Courses:

WGSS 518. Feminist Research (4)
WGSS 610. Internship (Shadowing) (4)

## Gender, Rhetoric, and <br> Representation

## Core Courses:

ENG 598. Women and Literature (4)
WGSS 555. Feminist Textual and Discourse Analysis (4)

## Health and Gender Justice

## Core Courses:

WGSS 518. Feminist Research (4)
WGSS 582. Global Perspectives on Women's Health (4)
WGSS 583. Race, Gender, and Health Justice (4)

## Social Justice Theory and Practice

## Core Courses:

WGSS 514. Systems of Oppression in Women's Lives (4)
WGSS 518. Feminist Research (4)

## Major Code: 8008

## GRADUATE MINORS

ANTHROPOLOGY GRADUATE

## MINOR

The School of Language, Culture, and Society offers graduate work leading to a Master of Arts in Applied Anthropology. The school also offers graduate work leading to a master of arts in interdisciplinary studies and participates as a minor field in other advanced degree programs. A variety of individualized programs is available within the MAIS framework.

## Minor Code: 8600

## APPLIED ANTHROPOLOGY

## GRADUATE MINOR

The School of Language, Culture, and Society offers graduate work leading to a Master of Arts in Applied Anthropology. The school also offers graduate work leading to a master of arts in interdisciplinary studies and participates as a minor field in other advanced degree programs. A variety of individualized programs is available within the MAIS framework.
Minor Code: 8640

## CONTEMPORARY HISPANIC STUDIES GRADUATE MINOR

See an advisor for more information.
Minor Code: $\mathbf{8 5 0 0}$

## ETHNIC STUDIES GRADUATE MINOR

## Graduate Areas of Concentration

 Ethnic studiesGraduate work in the School of Language, Culture, and Society may serve as a field of study for the Master of Arts in Interdisciplinary Studies degree or as a minor in other advanced degree programs. The program offers an interdisciplinary exploration of the critical areas of race, class, ethnicity, and gender in American life, as well as focused study of the four major ethnic minority groups in the United States (African Americans, Asian Americans, Chicano/Latinos and Native Americans).
Students applying for graduate work in ethnic studies must meet the following requirements:

1. a minimum GPA of 3.00 in the last 90 credits of graded undergraduate work on the first baccalaureate degree plus all work completed thereafter;
2. appropriate undergraduate or postgraduate work in ethnic studies. Applicants are urged to speak with an advisor prior to submitting their materials.

## Minor Code: 8940

## FOOD IN CULTURE AND SOCIAL

 JUSTICE GRADUATE MINORThis interdisciplinary graduate minor in Food in Culture and Social Justice prepares students to examine food from a variety of perspectives. When and how we eat, what is considered acceptable to eat, how we prepare it, and how we learn about producing and eating food are all fascinating questions to explore by humanists and social scientists. Histories of particular food commodities and changes in the way people think about sustaining healthy bodies richly contextualize our present practices. Cultural analyses of food and food production lead us to
question the level of social justice within the local and global food systems.
Students complete at least 1 credit of experiential/service learning which will be spent volunteering with food-related organizations.

## Required Service Learning Course

FCSJ 506. Food Projects (1)
Choose 15 credits (master's) or 18 credits (PhD) from the following courses:
AGRI 511. Introduction to Food Systems: Local to Global (3)
FCSJ/ANTH 544. Nutritional Anthropology (4)

FCSJ/ANTH 547. Methods in Food in
Culture and Social Justice Studies (4)
FCSJ/ES 564. Food and Ethnic Identity:
Decolonizing Food and Our Body (3)
FCSJ/ANTH 567. Agri-Food Movements (4)
FCSJ/ANTH 586. Anthropology of Food (4)
HDFS 547. Families in Poverty (3)
HST 516. Food in World History (4)
Substitutions subject to approval of minor professor.

## Minor Code: 4260

## FOREIGN LANGUAGES AND LITERATURES GRADUATE MINOR

## Graduate Areas of Concentration

Modern languages, French, German, Spanish
See an advisor for more information.

## Minor Code: 8950

## QUEER STUDIES GRADUATE

 MINORThe graduate minor in Queer Studies prepares students to examine how gender and sexuality are constructed and policed and, further, imagines liberatory futures for people of all genders and sexualities. Centering itself on the activism and scholarship of women of color, transnational feminisms, Two-Spirit Indigenous people, and Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) people of color, this graduate option examines homophobia and transphobia's relationship with racism, colonialism, sexism, ableism, classism and other forms of power.

Master's students must complete a total of 20 credits, and doctoral students must complete a total of 24 credits. Students whose primary area is WGSS may use required course work for their program towards an MA or PhD minor in Queer Studies.

## Required of All Students:

QS/WGSS 562. Queer Theories (4)
In each of the following two sections, both master's and doctoral students will complete 8 credits. Doctoral students will complete an additional 4 credits in either area.

Sexuality, Gender, Race, and Nation (8 credits)
QS/WGSS/ES 531. Queer of Color Critiques (4)

QS/ES/WGSS 572. Indigenous Two-Spirit and Queer Studies (4)
QS/WGSS 576. Transnational Sexualities (4)
QS/ES/WGSS 577. Queer/Trans People of Color Arts and Activism (4)
QS 599. Special Topics in Queer Studies (4)
WGSS/SPAN/QS/ES 569. Topics in Joteria Studies (3)

## Gender Politics (8 credits)

QS/WGSS 524. Trans/Gender Politics (4)
QS/WGSS 573. Transgender Lives (3)
QS 599. Special Topics in Queer Studies (4)
WGSS 514. Systems of Oppression in
Women's Lives (4)
WGSS 560. Women and Sexuality (3)
WGSS 585. Transnational Feminisms (4)
WGSS 616: Multiracial, Transnational, and Queer Feminisms I (4)

## Total=20 credits for Master's students <br> Total=24 credits for Doctoral students <br> Minor Code: 8777

## WOMEN, GENDER, AND SEXUALITY STUDIES GRADUATE MINOR

Graduate Areas of Concentration
Contemporary women's issues; leadership
and community engagement; race, class and gender; sexuality studies; transnational perspectives
Women, Gender, and Sexuality Studies is the multidisciplinary study of gender and women's lives and experiences. Course work explores women's realities in such areas as the political and social sciences, health, psychology, history, literature, and the arts. Women, Gender, and Sexuality Studies programs grew out of the women's movement, involving understandings of discrimination in society and a need to celebrate different women's strengths, contributions, and forms of resistance.

Women, Gender, and Sexuality Studies can be elected as a primary and/or secondary field for the Master of Arts in Interdisciplinary Studies degree (MAIS) and as a graduate minor. Areas of specialization include contemporary women's issues; gender, race and class; and global women's issues. The master's program requires a thesis or research report (nonthesis option) and the completion of a core curriculum. This curriculum includes an understanding of how issues of gender, race, class, and other differences among women affect their status in Western and global perspectives. It also emphasizes the relationship between theory and strategies for social change. An internship or field placement in an agency that is concerned with gender issues or women's role and status in society is
required and is designed to help students integrate classroom knowledge with practical experience. The graduate program is beneficial for any work experience in which gender is negotiated or women are affected. Women, Gender, and Sexuality Studies graduates are employed in human service agencies and programs, advocacy organizations such as battered women's shelters and women's resource centers and community organizing, teaching, business, administration, and cultural work. Many students have used their degree as a preparatory base for doctoral work.

Women, Gender, and Sexuality Studies faculty are drawn from colleges across the university. Many teach Women, Gender, and Sexuality Studies program courses in their home departments and are involved in research projects that give them different perspectives on the challenges in Women, Gender, and Sexuality Studies. These courses and faculty are not listed in this entry. For more information, contact Patti Duncan, Director, Women, Gender, and Sexuality Studies, 252 Waldo Hall, OSU, Corvallis, OR 97331.
Master of Arts in Interdisciplinary Studies (MAIS)-Primary Area in
Women, Gender, and Sexuality Studies
WGSS 510. Internship (3)
WGSS 511, 512, 513. Orientation and Professionalization I, II, III ( $1,1,1$ )
WGSS 514. Systems of Oppression in Women's Lives (4)
WGSS 516. Theories of Feminism (4)
WGSS 518. Feminist Research (4)[Thesis option only]
WGSS 585. Transnational Feminisms (4)
Consult advisor for additional requirements.

## Minor Code: 9008

## CERTIFICATES

FOOD IN CULTURE AND SOCIAL JUSTICE CERTIFICATE
Food is more than simple nourishment. It is part of a system of communication firmly rooted in individual and group identities within cultures around the world. When and how we eat, what is considered acceptable to eat, how we prepare it, and how we learn about producing and eating food are all fascinating questions to explore by humanists and social scientists. Histories of particular food commodities and changes in the way people think about sustaining healthy bodies richly contextualize our present practices. Cultural analyses of food and food production lead us to question the level of social justice within the local and global food systems. Community food security is a condition in which all community residents obtain a safe, culturally acceptable, nutritionally
adequate diet through a sustainable food system that maximizes community selfreliance and social justice. Students who complete this certificate will not only have a clear idea of the cultural bases of food and food production but will obtain some experience working towards community food security.

Complete 16 credits of core classes and then choose 6 credits of electives within the College of Liberal Arts and 6 credits of electives from outside the College of Liberal Arts.

## Core (16)

AGRI 411. *Introduction to Food Systems:
Local to Global (3)

## LATIN AMERICAN AFFAIRS

## CERTIFICATE

Juan A. Trujillo, Director

## 36 Kidder Hall

Oregon State University
Corvallis, OR 97331-4603
541-737-3956
Email: jtrujillo@oregonstate.edu
Students earning a Latin American Af-
fairs certificate will have gained a broad knowledge and understanding of the history and current situation in Latin America. The program allows students with majors in any discipline to complement their professional studies; certificates are awarded concurrently with the undergraduate or graduate degree.

Course work is drawn from several departments and schools, primarily in the College of Liberal Arts. Interested students should contact the program director early in their academic careers in order to plan their schedules.

## Certificate Curriculum

The course of study consists of a minimum of 30 credits: 9 credits of required core courses, and 21 credits of appropriate electives. In addition, the student must have proficiency in Spanish or Portuguese equivalent to that attained by the end of the third-year language sequence, as certified by the School of Language, Culture, and Society, or by placement scores.

## The minimum of $\mathbf{3 0}$ credits of approved courses must include: <br> Core Requirement (9)

HST 350, HST 351. *Modern Latin America $(4,4)$
SPAN 336. *Latin American Culture (3)

## Electives (21)

A minimum of 21 credits of approved Latin American courses outside the major from at least two departments/schools.
ANTH 313. *Peoples of the World-Latin America (3)
ES 311. Narratives of Latino Migrations (3)
ES 314. Chicano/a Literature (3)
ES 411. Chicano/as in/on Film (3)
GEO 328/GEOG 314. *Geography of Latin America (3)
HST 452. Modern Mexico (4)
HST 456. Problems in Latin American History (4)
PHL 316. Intellectual Issues of Mexico and Mexican Americans (4)
PS 344. *Latin American Politics (4)
SPAN 311. Advanced Spanish Grammar (3)
SPAN 312. Intermediate Writing Skills (3)
SPAN 313. Spanish Language Through Culture (3)
or SPAN 314, SPAN 315, SPAN 316.
Spanish for Native Speakers $(3,3,3)$
SPAN 337. *Latin American Culture (3)
SPAN 338. *Latin American Culture (3)
SPAN 438. ^Selected Topics in Luso-
Hispanic Culture (3)
SPAN 445. Selected Topics in the Literature of Latin America (3)
Appropriate open-ended courses (402,
405,407 ) through participating departments/schools, as well as transfer credits, may also be used to satisfy requirements when approved in advance by the program director.

## Major Code: C810

## WOMEN, GENDER, AND SEXUALITY STUDIES CERTIFICATE

## Also available via Ecampus.

The Women, Gender, and Sexuality Studies undergraduate certificate is designed to facilitate the broad interdisciplinary study of gender and women's issues. It emphasizes the diversity of women's experience through a focus on disciplinarybased knowledge about women's lives and relationships in the many schools/ departments where courses on gender are taught.

While core course work taught by the Women, Gender, and Sexuality Studies Program is required, students are expected to take the bulk of their elective course work from approved Women, Gender, and Sexuality Studies Program classes offered throughout the different academic units on campus. A total of 27 credits is required for the certificate, with at least 12 of these credits at the upperdivision level.

All required course work must be taken on campus and no more than 3 credits of online elective course work can be used toward the on-campus certificate. The undergraduate certificate in Women, Gender, and Sexuality Studies is also available through Ecampus.

## Core Requirements (10)

WGSS 223. *Women: Self and Society (3)
WGSS 410. Internship (3)
WGSS 414. *Systems of Oppression in
Women's Lives (4)
The remaining 17 credits can be taken from elective courses offered by the Women, Gender, and Sexuality Studies Program and from approved program courses offered in any school/department at OSU. However, at least 12 of these 17 credits must consist of approved program courses. An approved program course is one that has a focus on gender and/or women's issues, is taught in a unit other than the Women, Gender, and Sexuality Studies Program, and has been approved as fulfilling the requirements of a Women, Gender, and Sexuality Studies Program course. See the electives for the Women, Gender, and Sexuality Studies major.

No more than 3 credits of WGSS 402 Independent Study and WGSS 410 Internship may count toward the Women, Gender, and Sexuality Studies undergraduate certificate.

* Baccalaureate Core Course (BCC)

## Major Code: C808

■ ANTHROPOLOGY COURSES
ANTH 101. *INTRODUCTION TO
ANTHROPOLOGY (3). Located at the intersection of the humanities and the sciences, anthropology strives for a holistic understanding of the human condition. This course introduces students to the basic concepts, theories and methods of anthropology, including its four main sub-fields: archaeology, biological anthropology, cultural anthropology, and linguistic anthropology. The course is driven by fundamental questions, including: What is culture? How do anthropologists study human populations, both past and present? How can this field help us better understand contemporary human problems? (Bacc Core Course)
ANTH 110. *INTRODUCTION TO CULTURAL ANTHROPOLOGY (3). Investigates cultural adaptation and change in different environmental and historical contexts. Compares the means by which cultures solve common human problems. Shows similarities and differences throughout the world in systems of values, family, religion, economics, and politics. Students are asked to consider future cultural conditions. Uses a video format. (SS) (Bacc Core Course)
ANTH 159. *LANGUAGE, RACE AND RACISM IN THE US: AN INTRODUCTION (4). Students in this course will unpack language, race and racism--as well as the intersections between those ideas-- as cornerstones to understanding identity and society as inherently socially constructed notions. (Bacc Core Course) CROSSLISTED as ES 159 and WLC 159.

ANTH 199. SPECIAL STUDIES (1-3). This course is repeatable for a maximum of 3 credits.

ANTH 208. *WESTERN CULTURE STUDY ABROAD (3). Overseas study of the history and contemporary form of important features of Western culture. Based on at least 10 weeks of studying abroad. CROSSLISTED as LING 208. (Bacc Core Course) PREREQS: Must be arranged with instructor prior to registration. Enrolled in Study Abroad program.

## ANTH 209. *CULTURAL DIVERSITY STUDY

ABROAD (3). Overseas study of non-Western cultures. Based on at least 10 weeks of studying abroad. CROSSLISTED as LING 209. (Bacc Core Course) PREREQS: Must be arranged with instructor prior to registration. Enrolled in Study Abroad program.
ANTH 210. *COMPARATIVE CULTURES (3).
Compares the cultures originating in Asia,
Africa, and precolonial Australia, Oceania, and North and South America. Introduces method and theory for comparative cultural analysis from historical, ethnographic, and indigenous viewpoints. Considers the contribution and influences of minority and ethnic groups on the mainstream culture in nation states. Summarizes the characteristics of cultures in the major world culture areas. (Bacc Core Course)
ANTH 230. TIME TRAVELERS (3). Introduction to the historical developments of modern archaeology. The often romanticized public image of archaeology will be contrasted with scientific reality. The nature of archaeological data, modern field methods, analytical techniques, and theoretical background will be reviewed in order to illustrate how the unwritten record of human cultural behavior is deciphered. (SS)
ANTH 240. INTRODUCTION TO BIOLOGICAL ANTHROPOLOGY (3). An investigation of the origin of modern people (Homo sapiens) in a historical context; review of key discoveries and current research on the relationships between humans and other primates; exploration of contrasting views of humanity. (SS)
ANTH 251. *LANGUAGE IN THE USA (3). Examines the linguistic aspects of ethnic, class, and gender differences in the United States of America, with a focus on language attitudes. Uses ooth oral and written materials and quantitative and qualitative approaches. (Bacc Core Course) PREREQS: Freshman and sophomore standing.
ANTH 251H. *LANGUAGE IN THE USA (3).
Examines the linguistic aspects of ethnic, class, and gender differences in the United States of America, with a focus on language attitudes. Uses both oral and written materials and quantitative and qualitative approaches. (Bacc Core Course) PREREQS: Freshman and sophomore standing. Honors College approval required.

ANTH 261. *FOOD IN AMERICAN CULTURE (3). Fosters understanding of the meanings of foods and foodways in American culture. Uses food as a lens to explore general topic areas such as work, family, ecology, and identity. Critically examines core issues that shape and have shaped American culture. (Bacc Core Course) (SS) CROSSLISTED as FCSJ 261.

## ANTH 284. *PRIMATE ADAPTATION AND

EVOLUTION (4). Introduces students to our closest living relatives, the primates. Uses theories and concepts from evolutionary biology to explore the diverse anatomical and behavioral adaptations of different primate species. Also explores the relationships between anatomy, behavior, and ecology on the individual and community level. Provides an evolutionary and ecological framework with which to view primates (including humans) and all living organisms. (Bacc Core Course)
ANTH 311. *PEOPLES OF THE WORLD-NORTH
AMERICA (3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues
pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) PREREQS: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

## ANTH 311H. *PEOPLES WORLD-NORTH

AMERICA (3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) PREREQS: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement. Honors College approval required.

ANTH 312. *PEOPLES WORLD-EUROPE (3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (Bacc Core Course) PREREQS: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

## ANTH 312H. *PEOPLES WORLD-EUROPE

 (3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (Bacc Core Course) PREREQS: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement. Honors College approval required.ANTH 313. *PEOPLES OF THE WORLD-LATIN AMERICA (3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) PREREQS: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.
ANTH 313H. *PEOPLES OF THE WORLD-LATIN AMERICA (3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) PREREQS: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement. Honors College approval required.
ANTH 314. *PEOPLES OF THE WORLD-MIDDLE EAST (3). Survey of peoples around the world Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) PREREQS: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.
ANTH 314H. *PEOPLES OF THE WORLD-
MIDDLE EAST (3). Survey of peoples around the world. Early settlement, cultural history, ecological
adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) PREREQS: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement. Honors College approval required.
ANTH 315. *PEOPLES OF THE WORLD-AFRICA
(3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) PREREQS: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.
ANTH 315H. *PEOPLES OF THE WORLD-
AFRICA (3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) PREREQS: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement. Honors College approval required.

ANTH 316. *PEOPLES OF THE WORLD-SOUTH AND SOUTHEAST ASIA (3). Survey of peoples around the world. Early settlement, cultural history ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) PREREQS: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 317. *PEOPLES OF THE WORLD-PACIFIC
(3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) PREREQS: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.
ANTH 318. *PEOPLES OF THE WORLD-CHINA (3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) PREREQS: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.
ANTH 318H. *PEOPLES OF THE WORLD-
CHINA (3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) PREREQS: ANTH 110 [D-] or ANTH 210 [D-] and /or completion of social processes and institutions requirement. Honors College approval required.

ANTH 319. *PEOPLES OF THE WORLD-JAPAN AND KOREA (3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) PREREQS: ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 330. *EVOLUTION OF PEOPLE, TECHNOLOGY, AND SOCIETY (3). Overview of the evolution and prehistory of the human species, including the development and interaction of human biology, technology, and society. (SS) (Bacc Core Course) PREREQS: Sophomore standing.

ANTH 331. MESOAMERICAN PREHISTORY
(3). Explores the archaeology and prehistory of Mesoamerica from Paleo-Indian times through the Olmec, Maya, Zapotec, and Aztec cultures to the Spanish Conquest. Themes include the transition to settled agriculture, emergence of social inequality and political authority, the role of the natural environment, and the rich cultural heritage of Mesoamerican civilizations. PREREQS: Students need to understand the fundamentals of archaeology.
ANTH 332. ARCHAEOLOGICAL INFERENCE
(4). In this course on archaeological inference, or the thought process of forming our understanding about the past, we will take a guided tour of the main stages of archaeological research design and try our hand at making archaeological inferences. We begin by learning about the basic conceptual problems in the study of the past, then, we engage with the theories and models used to address them, and finally we apply this knowledge in hands-on analytical activities during the laboratory sessions with archaeological artifacts. Lec/lab. PREREQS: ANTH 230 [D-]

## ANTH 345. *BIOLOGICAL AND CULTURAL

 CONSTRUCTIONS OF RACE (3). The social, cultural, and historical context of human biological diversity in the United States. Students become acquainted with primary resources relating to biological diversity within the modern human species and will offer a critical perspective on racial/ethnic categorization of that diversity. (Bacc Core Course) PREREQS: Sophomore standing and completion of one anthropology course.ANTH 350. LANGUAGE, CULTURE AND
SOCIETY (4). An examination of the communicative functions of language and the role of language in the construction of social relations. Covers the origins, structure, and diversity of language. Explores the relationships between language and thought and the use of linguistic models in the study of culture. (SS) PREREQS: 3 credits of social science.
ANTH 352. *ANTHROPOLOGY, HEALTH,
AND ENVIRONMENT (3). Major threats to human health are increasingly linked to global environmental changes. This course engages medical and environmental anthropology research to critically explore the values, meanings and ideologies associated with ecological and public health issues in given localities throughout the world. (Bacc Core Course)
ANTH 361. *FOOD JUSTICE (4). Contemporary food systems are examined from a cultural and social justice perspective. The human right to food as recognized by the United Nations serves as the justice grounding point. Impediments to realizing the right to food will be examined in national and international contexts. (Bacc Core Course) (SS) CROSSLISTED as FCSJ 361.

ANTH 370. ^ANTHROPOLOGICAL THEORIES (4). Foundational theories, approaches, and concepts are explored and used as a means to understanding how anthropologists past and present use theory. Students compare and
contrast prominent theories, analyze curren events and situations, and write a major research paper using anthropological sources. PREREQS: ANTH 110 [D-] and /or completion of social processes and institutions requirement.
ANTH 371. RESEARCH METHODS IN
CULTURAL ANTHROPOLOGY (4). Designed for anthropology majors, this course involves students in learning about and practicing anthropological research methods. Students practice ethnographic fieldwork by conducting participant observation and interviews, writing fieldnotes, analyzing real-life material for cultural values and power differences, and writing up a research paper. PREREQS: ANTH 110 [D-]
ANTH 372. *SOCIAL NETWORKS AND SOCIETY (3). Introduces the foundational theory and concepts of social network analysis (SNA) and explores practical applications of SNA in environmental science, public health, business, politics, education, and public life. Also explores how the Internet, social media, and other information and communication technologies are affecting social networks and culture in the 21st century. (Bacc Core Course)

ANTH 373. APPROACHES TO SOCIAL JUSTICE
(3). Students study various ways of thinking about social justice and evaluate these in case studies and current events. As a basis for the Social Justice minor, students write a research paper on the theoretical and practical aspects of a social justice issue. CROSSLISTED as ES 373, WGSS 373, WLC 373.

ANTH 374. *ANTHROPOLOGY AND GLOBAL HEALTH (3). An overview of historical and contemporary issues in gender health with emphasis on politics, globalization, and the complex outcomes of interventions in diverse cultural settings. Students will articulate a critica and evidence-based perspective on complex global health issues. (Bacc Core Course)
ANTH 374H. *ANTHROPOLOGY AND GLOBAL HEALTH (3). An overview of historical and contemporary issues in gender health with emphasis on politics, globalization, and the complex outcomes of interventions in diverse cultural settings. Students will articulate a critical and evidence-based perspective on complex global health issues. (Bacc Core Course) PREREQS: Honors College approval required.

ANTH 380. *CULTURES IN CONFLICT (3). Communication and commerce draw East and West, industrial and pre-industrial, state and stateless societies together. Beliefs and values clash and complement one another. Explores the processes of intercultural contact, crosscultural interaction, and the consequences of global penetration of European-American culture. Evaluates theoretical explanations for cultural persistence and change. (SS) (Bacc Core Course) PREREQS: ANTH 110 or completion of nonWestern cultures requirement.

ANTH 380H. *CULTURES IN CONFLICT (3).
Communication and commerce draw East and West, industrial and pre-industrial, state and stateless societies together. Beliefs and values clash and complement one another. Explores the processes of intercultural contact, crosscultural interaction, and the consequences of global penetration of European-American culture. Evaluates theoretical explanations for cultural persistence and change. (SS) (Bacc Core Course) PREREQS: ANTH 110 [D-] and /or completion of non-Western cultures requirement. Honors College approval required.
ANTH 383. *INTRODUCTION TO MEDICAL ANTHROPOLOGY (3). Examines human health and healing systems from evolutionary and cross-cultural perspectives. Using a case study approach, this class explores individual- and population-level experiences of illness and healing, while providing students with the tools to evaluate global disease patterns and international health promotion and education programs. (Bacc

Core Course)
ANTH 383H. *INTRODUCTION TO MEDICAL
ANTHROPOLOGY (3). Examines human health and healing systems from evolutionary and cross-cultural perspectives. Using a case study approach, this class explores individual- and population-level experiences of illness and healing, while providing students with the tools to evaluate global disease patterns and international health promotion and education programs. (Bacc Core Course) PREREQS: Honors College approval required.
ANTH 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
ANTH 399H. SPECIAL TOPICS (1-16). This
course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required

ANTH 401. RESEARCH (1-6). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ANTH 402. INDEPENDENT STUDY (1-6). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ANTH 403. THESIS (1-6). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required
ANTH 405. READING AND CONFERENCE
(1-6). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ANTH 405H. READING AND CONFERENCE
(1-6). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
ANTH 406. PROJECTS (1-6). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ANTH 407. SEMINAR (1-3). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ANTH 407H. SEMINAR (1-3). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required
ANTH 409. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.
ANTH 410. INTERNSHIP (1-16). Opportunities for students at junior and first-term senior class levels to take advantage of off-campus work experiences during regular term sessions for academic credit. Allows students to broaden and deepen their understanding and appreciation of the value of their academic activity. Internship is supervised and evaluated by individual faculty members. This course is repeatable for a maximum of 16 credits. PREREQS: 6 credits of anthropology.

ANTH 420. WORLD CULTURES--TOPICS (4). in-depth study of world cultures. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, politica and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. Includes three hours of lecture and one hour of seminar. Cannot be taken if student is taking or has completed the 300-level course in the same geographical area. Graded P/N. PREREQS: 9 credits of social science including 3 credits of anthropology or graduate standing.

## ANTH 421. ANALYSIS OF LITHIC

TECHNOLOGIES (4). Covers the principles, procedures, and purpose of archaeological lithic analysis and the anthropological interpretation of lithic technologies used by prehistoric huntergatherers. PREREQS: ANTH 230 [D-] and /or equivalent
ANTH 422. HISTORIC MATERIALS ANALYSIS
(3). Introduction to the analytical and descriptive
methods and techniques used by historical archeologists to study late 18th through 20th century machine and handmade objects.
PREREQS: ANTH 230 [D-]
ANTH 423. METHOD AND THEORY IN HISTORICAL ARCHAEOLOGY (4). Examines the origins and growth of historical archaeology in the Americas. Students will critically learn about the linkages with history and anthropology and explore the theoretical underpinnings of historical archaeology.
ANTH 424. SETTLEMENT ARCHAEOLOGY
(4). Explores the evolution of the theoretical underpinnings and field methods of settlement archaeology as well as the refinement of the meaning of

## ANTH 425. CERAMIC ANALYSIS IN

ARCHAEOLOGY (4). Provides fundamental practical skills and theoretical perspectives for the analysis and interpretation of archaeological ceramics. On the practical side, students will learn both basic and advanced techniques for describing and analyzing pottery assemblages encountered by field archaeologists. On the theoretical side, the course will explore the diversity of research questions in which pottery can play a critical role, as well as the various ways in which ceramic data can be interpreted. Lec/lab. PREREQS: ANTH 230 [D-]
ANTH 430. TOPICS IN ARCHAEOLOGY (1-4). Recent advances in archaeology and their application to special fields of study. Topics vary from term to term. This course is repeatable for a maximum of 99 credits. PREREQS: (ANTH 230 [D-] or ANTH 330 [D-] ) and /or equivalent.
ANTH 432. *DOMESTICATION, URBANIZATION, AND THE RISE OF CIVILIZATION (4). Reviews the development of culture in the Old and New Worlds with special emphasis placed on the when, where, and how of early domestication of plants and animals. Examines the process of urbanization. (Bacc Core Course) PREREQS: 6 credits of anthropology.
ANTH 432H. *DOMESTICATION,
URBANIZATION, AND THE RISE OF
CIVILIZATION (4). Reviews the development of culture in the Old and New Worlds with special emphasis placed on the when, where, and how of early domestication of plants and animals Examines the process of urbanization. (Bacc Core Course) PREREQS: 6 credits of anthropology. Honors College approval required.

ANTH 433. FIRST AMERICANS, LAST
FRONTIERS (4). The initial human occupation of the Western Hemisphere is explored with particular emphasis on northeast Siberian cultural progenitors, routes and timing of entry into the Americas, population dispersal theory, the paleoenvironmental record, and human cultural responses to the conditions of the last frontier prior to 8,000 years ago. PREREQS: 6 credits of anthropology.
ANTH 434. NORTH AMERICA AFTER THE ICE AGE (4). The development of regional hunting and gathering adaptive strategies in North America from 8000 B.C. to the historic period are examined against a backdrop of changing climate, natural disasters, population growth, and human invention. PREREQS: ANTH 433 or 6 credits of anthropology.
ANTH 435. CULTURAL RESOURCES: POLICY AND PROCEDURES (4). Description and analysis of requirements and demands of cultural resource management. Historical development of cultural resource laws and appropriate field techniques and strategies to implement legislation PREREQS: ANTH 230 [D-] and /or instructor approval required

ANTH 436. NORTHWEST PREHISTORY (4).
Materials and theories relating to prehistoric aboriginal cultures of the Northwest. Evaluation of different theories on the origins and adaptations of prehistoric populations to ecological zones
within the Northwest; comparisons of the cultura development through prehistoric times of the Columbia Plateau, intermontane and coastal zones of Oregon, Washington, and British Columbia. Special emphasis on the theories of origin, subsequent development of prehistoric cultures in the Northwest, and the present circumstances of archaeology in the Northwest. PREREQS: 6 credits of anthropology.
ANTH 437. GEOARCHAEOLOGY (4). Provides an introduction to geoarchaeological concepts and methods. Emphasis will be placed on the use of geoscientific perspectives and datasets to solve archaeological problems. PREREQS: ANTH 230 [D-]

## ANTH 438. ARCHAEOLOGY FIELD SCHOOL

(10-12). Practical skills, archaeological methods and techniques including use of equipment, site surveying and mapping techniques, site excavation strategies, record keeping, field cataloging, report writing, and field camp management. PREREQS: 6 credits of anthropology and instructor approval required.
ANTH 439. ARCHAEOLOGY OF FORAGERS
(4). Provides an in-depth review of the concepts and approaches employed to study cultural aspects of past foraging peoples using archaeological research methods and theoretical perspectives.

## ANTH 440. TOPICS IN PHYSICAL

ANTHROPOLOGY (1-4). Recent advances in physical anthropology and their applications to special fields of study. Topics vary from term to erm. This course is repeatable for a maximum of 16 credits. PREREQS: (ANTH 240 [D-] or ANTH 330 [D-] ) and /or general biology or equivalent.
ANTH 441. HUMAN EVOLUTION (4). The evolutionary history of the primate order as it is represented by fossils of the Paleocene through the Holocene. Special attention given to development of the Hominoids in the Miocene, the Australopithecines in the Pliocene, and members of the genus Homo in the Pleistocene. Lec/lab. PREREQS: ((ANTH 110 [D-] or ANTH 210 [D-] ) and ANTH 240 [D-] ) and /or general biology or equivalent.

ANTH 442. HUMAN ADAPTABILITY (4).
Overview of human biology and its various subfields, applications of human biology in areas of nutrition, health, growth, adaptation, and demography. Understanding adaptive variations among populations and individuals in responses to environment, disease, and nutritional stress. PREREQS: ANTH 240 [D-] and /or ANTH 340 or general biology or equivalent.
ANTH 443. HUMAN OSTEOLOGY LAB (4).
Identification and analysis of human skeletal materials in an archaeological context. PREREQS: ANTH 240 [D-]

ANTH 444. NUTRITIONAL ANTHROPOLOGY
(4). Examines human nutrition and food systems from comparative, biocultural and evolutionary perspectives. Long-term evolutionary processes are examined within an ecological framework as significant factors affecting human biology and susceptibility to diet-related disease. An emphasis on anthropological methods in nutritional assessment including anthropometry, paleodietary assessment and nutritional participant-observation will provide students with the tools to evaluate human diet from skeletal and fossil collections through contemporary cross-cultural populations. CROSSLISTED as FCSJ 444. PREREQS: ANTH 240 [C] or ANTH 330 [C]
ANTH 446. FORENSIC ANTHROPOLOGY (4).
Concepts and practices in the use of anthropology in legal matters and police cases, especially involving identification of human remains. PREREQS: ANTH 443 [D-] and /or equivalent.

ANTH 447. *ARCTIC PERSPECTIVES ON GLOBAL PROBLEMS (4). The Arctic is on the frontline of today's most pressing global problems. This course uses Arctic perspectives
to explore issues affecting us all: climate change, environmental conservation, traditional ecological knowledge, development, energy extraction, indigenous rights, and indigenous media. Using insights from Arctic perspectives, we will plot pathways toward potential solutions. (Bacc Core Course)

ANTH 447H. *ARCTIC PERSPECTIVES ON GLOBAL PROBLEMS (4). The Arctic is on the frontline of today's most pressing problems. This course uses Arctic perspectives to explore issues affecting us all: climate change, environmental conservation, traditional ecological knowledge, development, energy extraction, indigenous rights, and indigenous media. Using insights from Arctic perspectives, we will plot pathways toward potential solutions. (Bacc Core Course) PREREQS: Honors College approval required.

ANTH 448. EVOLUTIONARY MEDICINE (4).
Evolutionary medicine is founded on the idea that many challenges to human health can be accounted for by discordances between contemporary environments and those under which humans evolved. This course examines ways anthropologists may help to reframe questions about diseases within long-term, evolutionary contexts. PREREQS: (ANTH 110 [D-] or ANTH 210 [D-] ) and (ANTH 240 [D-] or ANTH 330 [D-] )

ANTH 449. BIOCULTURAL PERSPECTIVES ON HUMAN REPRODUCTION (4). Examines human reproduction and sexuality from the perspective of the New Biocultural Synthesis, a theoretical approach in anthropology that examines the interface of evolved biological, sociocultural and political-economic factors that interact to produce complex human behaviors and biologies. Topics are presented from a life-history perspective where questions related to human reproduction and evolutionary history are examined across the lifespan from mating and conception through elderhood and menopause. Lec/lab.

## ANTH 450. TOPICS IN LINGUISTIC

ANTHROPOLOGY (1-4). Recent advances in the study of culture and communication and their application to special fields of knowledge. Topics vary from term to term. This course is repeatable for a maximum of 16 credits. PREREQS: 3 credits of linguistic anthropology.
ANTH 452. FOLKLORE AND EXPRESSIVE CULTURE (4). The study of folklore/popular culture in its social and historical context. Examines content, structure, communicative potential, and performative aspects of various forms of oral and written expression. Includes familiarization with the analysis of myths, legends, tall tales, proverbs, riddles, and play languages.
(FA) PREREQS: 3 credits of social science.
ANTH 453. COMMUNITY HEALTH FIELD
SCHOOL (3-12). Meets the growing need for international experiences for students in medical anthropology; international public health; and women, gender and sexuality studies. The field school is offered over a three- to seven-week period during the summer term. In-country time is flexible and can be adjusted depending on program requirements and financial constraints. Provides an intensive cross-cultural field experience in San Juan, Puerto Rico, that is premised on a model of community-engaged, service learning and applied, emancipatory research. This course is repeatable for a maximum of 12 credits. PREREQS: Graduate standing or junior or senior standing and completion of the Anthropology Undergraduate Program's or other discipline's core courses is required for participation in this community field school. Students who meet these requirements will apply, and students will be selected based on fit of expertise and interest with the goals set by community partners for that year.
ANTH 455. REPRODUCTIVE JUSTICE: A SERVICE LEARNING COURSE (4). Reproductive Justice is a service-learning course that aims to
bridge theory and practice in reproductive health and social justice by developing connections between the university campus and members of the local community.
ANTH 459. LANGUAGE, RACE AND RACISM IN THE U.S.: ADVANCED STUDY (4). Students in this course will unpack language, race and racismas well as the intersections between those ideas-as cornerstones to understanding identity and society as inherently socially constructed ideas. The goal of this course is to better understand how racism is produced and reproduced in talk and text (this will include symbols and signs), especially in the context of the denial of racism. Our course will specifically focus on the language of racism, and, more specifically, types of discourse that construct Whiteness as dominant over Color. CROSSLISTED as ES 459/ES 559, WLC 459/WLC 559.

ANTH 460. ETHNOGRAPHIC FIELD SCHOOL (6). Involves an intensive field experience, learning and developing practical skills for operating socially and culturally in another culture. Students engage in anthropological and mixed research topics, methods, and analysis, such as research ethics, research design, participant observation, ethnographic interviewing, community mapping, qualitative and quantitative data analysis. PREREQS: Sophomore standing and application.
ANTH 461. NEUROANTHROPOLOGY
(4). The emerging interdisciplinary field of neuroanthropology combines anthropological understandings of human biological and cultural variation with recent findings in neuroscience. Key topics include socialization and enculturation, addiction, ritual, depression, and psychiatric disorders. PREREQS: ANTH 240 [C-] or ANTH 345 [C-] or ANTH 383 [C-]

ANTH 463. ANTHROPOLOGICAL RESEARCH: PROFESSIONAL AND ETHICAL CONDUCT (4). Examines the history and scope of professional and ethical guidelines in anthropology; critically evaluate major issues involving ethics, confidentiality, and anonymity that academic and professional anthropologists face during their careers. PREREQS: At least 6 credits of anthropology courses or graduate standing.
ANTH 465. POPULAR CULTURE: AN ANTHROPOLOGICAL PERSPECTIVE (4).
Introduces some of the debates and issues swirling around analyses of late twentieth-, early twenty-first century popular/mass/public/ mediated/commercial culture. Learning about its pervasive forms, its origins and effects, how we are situated in it, and how it situates us is vital to understanding the changes that characterize our postmodern world.

ANTH 466. *RURAL ANTHROPOLOGY (4). Concentrates on study of the socio-cultural dynamics in rural communities as they develop in national and global contexts of political and economic change. Includes anthropological readings on rural issues in domestic and international contexts and a research paper on a contemporary rural issue. (Bacc Core Course) PREREQS: 3 credits of social science.
ANTH 468. ANTHROPOLOGY OF CHILDHOOD
(4). Ethnographies of the organization of children's lives in different cultural contexts are combined with readings on the conceptual and methodological genealogies that have constructed children as research subjects in anthropology. PREREQS: 3 credits of social science

ANTH 469. ENERGY IN CULTURAL
PERSPECTIVE (4). Examines historical and current trends in energy around the globe. Course themes include the role of energy in economic development, cultural innovation in energy production, social problems that arise from energy shortages or the uneven distribution of energy resources and social and cultural changes required as societies attempt to reduce their dependence on fossil fuels. PREREQS: ANTH 110 [D-] or ANTH 210 [D-]

ANTH 470. TOPICS IN CULTURAL
ANTHROPOLOGY (1-16). Covers recent advances in cultural anthropology and their applications to the field. Topics vary from term to term. This course is repeatable for a maximum of 16 credits. PREREQS: 3 credits of social science.
ANTH 471. CASH, CLASS AND CULTURE: HUNTER-GATHERERS TO CAPITALISM (4). Students explore the cultural and social effects of capitalism in the contemporary world within the larger question of how economics and society intersect and change over time. Special emphases are put on food and work, but students explore the linkages of global forces and local life in a variety of ways. PREREQS: 3 credits of social science.
ANTH 472. CONTEMPORARY INDIAN ISSUES (4). Examines the background of Indian treaties and reservations with discussions of present issues such as health care, education, the Indian Child Welfare Act, fishing rights, and religious freedom. Issues are discussed in class with considerable class participation and some role playing. PREREQS: 3 credits of social science
ANTH 473. *GENDER, ETHNICITY, AND CULTURE (4). Study of the practices and ideologies of gender as they intersect with those of ethnicity, race, class, and culture. (Bacc Core Course) PREREQS: 3 credits of social science.

ANTH 474. CROSS-CULTURAL HEALTH AND HEALING (4). A comprehensive overview of current issues in global health with particular emphasis on social, cultural, and behavioral interventions. Explores issues of health and development in the international context, focusing on such issues as inequality, structural adjustment, economic development, and community-based approaches to health care, specific cultural beliefs and practices, and the influence of people's perceptions of health, illness and healing.
ANTH 475. ANTHROPOLOGY IN PRACTICE
(4). Capstone course for Anthropology majors. Discusses the use of anthropological skills and methods to solve real-world problems. Addresses professional opportunities for anthropologists; provides career development opportunities; and assesses learning outcomes for Anthropology majors. PREREQS: Junior or senior standing and completion of the Anthropology Undergraduate Program's common core courses are required for participation in this capstone class.

## ANTH 477. ECOLOGICAL ANTHROPOLOGY

(4). Examines past and present interactions between humans and their environments. Emphasizes the concept of system and process of human adaptation. PREREQS: Upper-division standing and 3 credits of social science.

ANTH 478. *ANTHROPOLOGY OF TOURISM (4). Tourism is among the world's largest industries. The anthropology of tourism seeks to understand the relationships between the industry and the other cultural productions. Students explore the cultural practices and impacts of tourism in relation to both host and guest communities, and travel as cultural practice. Course is taught online and on Corvallis campus. (Bacc Core Course) PREREQS: 3 credits of social science. Junior or senior standing.
ANTH 479. ANTHROPOLOGY OF MIGRATION
(4). Focuses on the multiple aspects of population movements around the globe. Investigates the history of recent human migration; current theories, trends and policies; as well as issues of immigrant incorporation and anti-immigrant politics. PREREQS: 3 credits of social science.

## ANTH 480. TOPICS IN APPLIED

ANTHROPOLOGY (1-4). Recent advances in applied anthropology and their application to special fields of study. Topics vary from term to term. This course is repeatable for a maximum of 16 credits. PREREQS: 3 credits of social science.

ANTH 481. *NATURAL RESOURCES AND COMMUNITY VALUES (3). Investigates relations between human communities and the values of community members. Resource issues integrate concepts from social science, economics, and ecology. (Bacc Core Course) PREREQS: 3 credits of social science.

## ANTH 482. *ANTHROPOLOGY OF

INTERNATIONAL DEVELOPMENT (4). Examines the ideological and theoretical bases of world assistance programs and their effects on different sectors and classes, including women. Causes of world hunger in terms of agronomic, mainstream economic and radical economic paradigms are developed and contrasted. (Bacc Core Course) PREREQS: Senior standing
ANTH 483. ADVANCED MEDICAL
ANTHROPOLOGY (4). An overview of anthropological studies of the health of human communities from a biological and behavioral perspective. Topics include prehistory of disease, cultural perspectives on causation of disease and approaches to healing; anthropological approach to international health issues; and case studies. PREREQS: (ANTH 110 [D-] or ANTH 210 [D-] ) and (ANTH 240 [D-] or ANTH 330 [D-] )

ANTH 484. *WEALTH AND POVERTY (3). Summarizes the distribution of wealth observed cross-culturally and through time. Determines the relation between wealth distribution and economic productivity. Shows the impact of industrialization and economic wealth distribution in Western civilization and cross-culturally. Evaluates how cultural practices affect wealth distribution in Western and non-Western societies. (Bacc Core Course) PREREQS: 3 credits of social science.
ANTH 485. CAPSTONE IN SOCIAL JUSTICE (2).
Working with an advisor from the Social Justice minor, students conduct research to synthesize and extend analysis of a particular social justice issue, building on three previous papers or projects. Results are presented in a 10-15 page paper and a public poster, presentation or website CROSSLISTED as ES 485, WGSS 485, WLC 485. This course is repeatable for a maximum of 4 credits. PREREQS: (ANTH 373 [D-] or ES 373 [D-] or WGSS 373 [D-] or WLC 373 [D-]) and (ANTH 410 [D-] or ES 410 [D-] or WGSS 410 [D-] or WLC 410 [D-] )

ANTH 486. ANTHROPOLOGY OF FOOD (4).
The role of food in human cultures, both past and present. Includes discussion of different food procurement styles, social movements and the political economy of food. Looks at the symbolic aspects of food as well as its relationship with the environment. CROSSLISTED as FCSJ 486. PREREQS: 3 credits of social science.
ANTH 487. LANGUAGE IN GLOBAL CONTEXT (4). Deals with practical uses of linguistics in the global political arena. Explores use of official vs. unofficial languages, language standardization, the preservation of dying languages; problems in learning first and second languages, and the relevance of linguistic knowledge to education and cross-cultural communication. PREREQS: (ANTH 251 [D-] or ANTH 350 [D-] ) and /or some knowledge of linguistic structure or graduate standing.
ANTH 488. *BUSINESS AND ASIAN CULTURE (3). Examines the mutual influence of business organization and culture in Asia. Starts with the premise that a business organization contains a set of values. These values are analyzed as to their effect on society in general and some Asian societies in particular, including Japan, China, Korea, India, and Indonesia. A second area of investigation is the influence of Asian societies on the organization and practice of Western businesses both in Asia and the West. (Bacc Core Course) PREREQS: 3 credits of social science.
ANTH 489. ANTHROPOLOGY OF BUSINESS (3). Students are exposed to the methods and perspectives used by anthropologists working in business. How does anthropology contribute in
such areas as product development, workplace organization and communication, marketing and interfacing with technology? Students do a lengthy project in one of these areas and present it as if in a corporate setting.
ANTH 490. TOPICS IN METHODOLOGY
(1-4). Recent advances in anthropological methodologies and their application to special fields of study. Topics vary from term to term. This course is repeatable for a maximum of 16 credits. PREREQS: 6 credits of anthropology or graduate standing.
ANTH 492. ARCHAEOLOGICAL LABORATORY
METHODS (1-3). Provides information on the basics of archaeological laboratory work. Students learn the day-to-day operations of a lab, how to classify and catalog artifacts, and how to do artifact analysis, research hypothesis. PREREQS: 6 credits of anthropology or graduate standing
ANTH 494. LINGUISTIC ANTHROPOLOGY
LAB (1-3). A training and practicum in the elicitation, transcription and analysis of language. PREREQS: ANTH 350 [D-] and /or graduate standing.
ANTH 497. ARCHAEOLOGICAL FIELD METHODS (1-3). Archaeological field strategies emphasizing reconnaissance and survey. Application of field equipment and project management.

ANTH 498. ORAL TRADITIONS (1-3). Method of examining unwritten culture preserved in speech, including local history, folklore, and songs passed from one generation to another. May include the use of life history, genealogy, and other means of collecting information. Attention is given to ethics, legal issues, and the process of transcription. PREREQS: ANTH 350 [D-] and ANTH 452* [D-] and /or graduate standing
ANTH 499. SPECIAL TOPICS IN
ANTHROPOLOGY (1-16). This course is
repeatable for a maximum of 16 credits.
ANTH 499H. SPECIAL TOPICS IN ANTHROPOLOGY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
ANTH 501. RESEARCH (1-6). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ANTH 502. INDEPENDENT STUDY (1-6). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ANTH 503. THESIS (1-12). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.

ANTH 505. READING AND CONFERENCE
(1-6). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ANTH 506. PROJECTS (1-6). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ANTH 507. SEMINAR (1-3). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ANTH 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

ANTH 510. GRADUATE INTERNSHIP (1-16). Opportunities for students at junior and first-term senior class levels to take advantage of offcampus work experiences during regular term sessions for academic credit. Allows students to broaden and deepen their understanding and appreciation of the value of their academic activity. Internship is supervised and evaluated by individual faculty members. This course is repeatable for a maximum of 16 credits. PREREQS: 6 credits of anthropology.
ANTH 515. ADVANCED RESEARCH LITERATURE REVIEW (3). Provides graduate
students with knowledge and experience in the advanced literature review process including construction of the literature review as product. One of the primary skills graduate students must master is advanced review of a body of literature for the research project. Mastery of the literature review process influences quality and sophistication of claims developed to justify research, with the written review clearly delineating the unique contribution of the student's research and the knowledge gap that it fills. The literature review as a product is a strong written argument that builds a case from credible evidence based on previous research. CROSSLISTED as CSSA 515, ES 515, WGSS 515. PREREQS: Graduate standing

ANTH 519. BIOLOGIES OF POVERTY (4).
A readings-based, discussion seminar on the applications of biological and biocultural anthropological theory to questions of embodiment and poverty. In it we will explore the ways key theoretical and methodological developments over the past two decades enable biocultural anthropologists to measure and explain the ways poverty and inequality become embedded beneath our skin--that is, the ways culture, belief, difference, power and discrimination are written on our bodies, and thus contribute to inequities in health outcomes across populations. PREREQS: In order to participate in this class, graduate standing, or if an undergraduate, a minimum of 6 credits of anthropology course work and instructor approval, is required.

## ANTH 521. ANALYSIS OF LITHIC

TECHNOLOGIES (4). Covers the principles procedures, and purpose of archaeological lithic analysis and the anthropological interpretation of lithic technologies used by prehistoric huntergatherers. PREREQS: ANTH 230 or equivalent
ANTH 522. HISTORIC MATERIALS ANALYSIS
(3). Introduction to the analytical and descriptive methods and techniques used by historical archeologists to study late 18th through 20th century machine and handmade objects.
PREREQS: ANTH 230
ANTH 523. METHOD AND THEORY IN HISTORICAL ARCHAEOLOGY (4). Examines the origins and growth of historical archaeology in the Americas. Students will critically learn about the linkages with history and anthropology and explore the theoretical underpinnings of historical archaeology.
ANTH 524. SETTLEMENT ARCHAEOLOGY
(4). Explores the evolution of the theoretical underpinnings and field methods of settlement archaeology as well as the refinement of the meaning of

## ANTH 525. CERAMIC ANALYSIS IN

ARCHAEOLOGY (4). Provides fundamenta practical skills and theoretical perspectives for the analysis and interpretation of archaeological ceramics. On the practical side, students will learn both basic and advanced techniques for describing and analyzing pottery assemblages encountered by field archaeologists. On the theoretical side, the course will explore the diversity of research questions in which pottery can play a critical role, as well as the various ways in which ceramic data can be interpreted. Lec/lab. PREREQS: ANTH 230
ANTH 530. TOPICS IN ARCHAEOLOGY (1-4).
Recent advances in archaeology and their application to special fields of study. Topics vary from term to term. This course is repeatable for a maximum of 16 credits. PREREQS: ANTH 230 or ANTH 330 or equivalent.
ANTH 531. ARCHAEOLOGICAL THEORY (4). Historical development of archaeological field techniques and theoretical concepts with an emphasis on modern method and theory in North American archaeology. PREREQS: Anthropology graduate student status with ANTH 230 or equivalent.

ANTH 533. FIRST AMERICANS, LAST
FRONTIERS (4). The initial human occupation of the Western Hemisphere is explored with particular emphasis on northeast Siberian cultural progenitors, routes and timing of entry into the Americas, population dispersal theory, the paleoenvironmental record, and human cultural responses to the conditions of the last frontier prior to 8,000 years ago. PREREQS: 6 credits of anthropology.

ANTH 534. NORTH AMERICA AFTER THE ICE
AGE (4). The development of regional hunting and gathering adaptive strategies in North America from 8000 B.C. to the historic period are examined against a backdrop of changing climate, natural disasters, population growth, and human invention. PREREQS: ANTH 433 or 6 credits of anthropology.

ANTH 535. CULTURAL RESOURCES: POLICY AND PROCEDURES (4). Description and analysis of requirements and demands of cultural resource management. Historical development of cultural resource laws and appropriate field techniques and strategies to implement legislation PREREQS: ANTH 431 or instructor approval required

ANTH 536. NORTHWEST PREHISTORY (4).
Materials and theories relating to prehistoric aboriginal cultures of the Northwest. Evaluation of different theories on the origins and adaptations of prehistoric populations to ecological zones within the Northwest; comparisons of the cultural development through prehistoric times of the Columbia Plateau, intermontane and coasta zones of Oregon, Washington, and British Columbia. Special emphasis on the theories of origin, subsequent development of prehistoric cultures in the Northwest, and the present circumstances of archaeology in the Northwest. PREREQS: 6 credits of anthropology.
ANTH 537. GEOARCHAEOLOGY (4). Provides an introduction to geoarchaeological concepts and methods. Emphasis will be placed on the use of geoscientific perspectives and datasets to solve archaeological problems. PREREQS: ANTH 230

## ANTH 538. ARCHAEOLOGY FIELD SCHOOL

 (1-10). Practical skills, archaeological methods and techniques including use of equipment, site surveying and mapping techniques, site excavation strategies, record keeping, field cataloging, report writing, and field camp management. PREREQS: 6 credits of anthropology and instructor approval required.ANTH 539. ARCHAEOLOGY OF FORAGERS
(4). Provides an in-depth review of the concepts and approaches employed to study cultural aspects of past foraging peoples using archaeological research methods and theoretical perspectives.

## ANTH 540.TOPICS IN PHYSICAL

ANTHROPOLOGY (1-4). Recent advances in physical anthropology and their applications to special fields of study. Topics vary from term to term. This course is repeatable for a maximum of 16 credits. PREREQS: ANTH 240 or ANTH 330 or general biology or equivalent
ANTH 541. HUMAN EVOLUTION (4). The evolutionary history of the primate order as it is represented by fossils of the Paleocene through the Holocene. Special attention given to development of the Hominoids in the Miocene, the Australopithecines in the Pliocene, and members of the genus Homo in the Pleistocene. Lec/lab. PREREQS: (ANTH 110 or ANTH 210) and ANTH 240
ANTH 542. HUMAN ADAPTABILITY (4).
Overview of human biology and its various sub fields, applications of human biology in areas of nutrition, health, growth, adaptation, and demography. Understanding adaptive variations among populations and individuals in responses to environment, disease, and nutritional stress. PREREQS: ANTH 240 or ANTH 340 or general
biology or equivalent.
ANTH 543. HUMAN OSTEOLOGY LAB (4).
Identification and analysis of human skeletal materials in an archaeological context. PREREQS: ANTH 240

ANTH 544. NUTRITIONAL ANTHROPOLOGY
(4). Examines human nutrition and food systems from comparative, biocultural and evolutionary perspectives. Long-term evolutionary processes are examined within an ecological framework as significant factors affecting human biology and susceptibility to diet-related disease. An emphasis on anthropological methods in nutritional assessment including anthropometry, paleodietary assessment and nutritional participant-observation will provide students with the tools to evaluate human diet from skeletal and fossil collections through contemporary cross-cultural populations. CROSSLISTED as FCSJ 544. PREREQS: ANTH 240 or ANTH 330

ANTH 546. FORENSIC ANTHROPOLOGY (4).
Concepts and practices in the use of anthropology in legal matters and police cases, especially involving identification of human remains. PREREQS: ANTH 443 or equivalent
ANTH 547. METHODS IN FOOD IN CULTURE AND SOCIAL JUSTICE STUDIES (4). Exposes graduate students to the methodological approaches and methods used in guiding empirical research on the socio-cultural aspects of food, focusing on vulnerable populations, food security, procurement, foodways, disasters, and climate change. Methodological approaches and methods as evidenced in peer-reviewed publications is the grounding for the course. CROSSLISTED as FCSJ 547. PREREQS: Graduate standing.
ANTH 548. EVOLUTIONARY MEDICINE (4). Evolutionary medicine is founded on the idea that many challenges to human health can be accounted for by discordances between contemporary environments and those under which humans evolved. This course examines ways anthropologists may help to reframe questions about diseases within long-term, evolutionary contexts. PREREQS: (ANTH 110 or ANTH 210) and (ANTH 240 or ANTH 330)
ANTH 549. BIOCULTURAL PERSPECTIVES ON HUMAN REPRODUCTION (4). Examines human reproduction and sexuality from the perspective of the New Biocultural Synthesis, a theoretical approach in anthropology that examines the interface of evolved biological, sociocultural and political-economic factors that interact to produce complex human behaviors and biologies. Topics are presented from a life-history perspective where questions related to human reproduction and evolutionary history are examined across the lifespan from mating and conception through elderhood and menopause. Lec/lab.

## ANTH 550. TOPICS IN LINGUISTIC

ANTHROPOLOGY (1-4). Recent advances in the study of culture and communication and their application to special fields of knowledge. Topics vary from term to term. This course is repeatable for a maximum of 16 credits. PREREQS: 3 credits of linguistic anthropology.
ANTH 551. LINGUISTIC ANTHROPOLOGY
(4). The study of language in social context including the relationships between language and age, gender, personality, religion, ethnicity and social class. Examines pidgins, creoles, dialects, genres and the processes of language change. PREREQS: ANTH 251 or ANTH 350 or graduate standing.
ANTH 552. FOLKLORE AND EXPRESSIVE
CULTURE (4). The study of folklore/popular culture in its social and historical context. Examines content, structure, communicative potential, and performative aspects of various forms of oral and written expression. Includes familiarization with the analysis of myths, legends, tall tales, proverbs, riddles, and play languages.

PREREQS: ANTH 251 or ANTH 350 or graduate standing.

ANTH 553. COMMUNITY HEALTH FIELD
SCHOOL (3-12). Meets the growing need for international experiences for students in medical anthropology; international public health; and women, gender and sexuality studies. The field school is offered over a three- to seven-week period during the summer term. In-country time is flexible and can be adjusted depending on program requirements and financial constraints. Provides an intensive cross-cultural field experience in San Juan, Puerto Rico, that is premised on a model of community-engaged, service learning and applied, emancipatory research. This course is repeatable for a maximum of 12 credits. PREREQS: Graduate standing or junior or senior standing and completion of he Anthropology Undergraduate Program's or other discipline's core courses is required for participation in this community field school. Students who meet these requirements will apply, and students will be selected based on fit of expertise and interest with the goals set by community partners for that year.
ANTH 555. REPRODUCTIVE JUSTICE: A SERVICE LEARNING COURSE (4). Reproductive Justice is a service-learning course that aims to bridge theory and practice in reproductive health and social justice by developing connections between the university campus and members of the local community.
ANTH 556. SOCIAL NETWORK ANALYSIS:
METHODS AND THEORY (4). An introduction to social network analysis (SNA), focusing on the methods of research design, data collection, and analysis. Students will learn key concepts and theories of SNA, apply these concepts to research projects in their chosen field, develop methods for collecting network data, and perform qualitative and quantitative analysis of these networks. Readings draw on studies of social networks from a variety of disciplines, including anthropology, sociology, environmental studies, public health and political science.
ANTH 559. LANGUAGE, RACE AND RACISM IN THE U.S.: ADVANCED STUDY (4). Students in this course will unpack language, race and racism--as well as the intersections between those ideas-as cornerstones to understanding identity and society as inherently socially constructed ideas. The goal of this course is to better understand how racism is produced and reproduced in talk and text (this will include symbols and signs), especially in the context of the denial of racism. Our course will specifically focus on the language of racism, and, more specifically, types of discourse that construct Whiteness as dominant over Color. CROSSLISTED as ES 459/ES 559, WLC 459/WLC 559.

ANTH 560. ETHNOGRAPHIC FIELD SCHOOL
(6). Involves an intensive field experience, learning and developing practical skills for operating socially and culturally in another culture. Students engage in anthropological and mixed research topics, methods, and analysis, such as research ethics, research design, participant observation, ethnographic interviewing, community mapping, qualitative and quantitative data analysis. PREREQS: Sophomore standing and application.

ANTH 561. NEUROANTHROPOLOGY
(4). The emerging interdisciplinary field of neuroanthropology combines anthropological understandings of human biological and cultural variation with recent findings in neuroscience. Key topics include socialization and enculturation, addiction, ritual, depression, and psychiatric disorders. PREREQS: ANTH 240 or ANTH 345 or ANTH 383

ANTH 563. ANTHROPOLOGICAL RESEARCH: PROFESSIONAL AND ETHICAL CONDUCT (4). Examines the history and scope of professional and ethical guidelines in anthropology; critically evaluate major issues involving ethics,
confidentiality, and anonymity that academic and professional anthropologists face during their careers. PREREQS: At least 6 credits of anthropology courses or graduate standing.

## ANTH 565. POPULAR CULTURE: AN

ANTHROPOLOGICAL PERSPECTIVE (4).
Introduces some of the debates and issues swirling around analyses of late twentiethearly twenty-first century popular/mass/public/ mediated/commercial culture. Learning about its pervasive forms, its origins and effects, how we are situated in it, and how it situates us is vital to understanding the changes that characterize our postmodern world.

ANTH 566. RURAL ANTHROPOLOGY (4). Concentrates on study of socio-cultural dynamics in rural communities as they develop in national and global contexts of political and economic change. Includes anthropological readings on rural issues in domestic and international contexts and a research paper on a contemporary rural issue. PREREQS: 3 credits of social science.
ANTH 567. AGRI-FOOD MOVEMENTS (4). Investigates the origins and contemporary status of producer and consumer food movements including, but not limited to, organics, agricultural labor movements, animal welfare, vegetarian and vegan movements, farmers' markets, and permaculture. CROSSLISTED as FCSJ 567.
ANTH 568. ANTHROPOLOGY OF CHILDHOOD
(4). Ethnographies of the organization of
children's lives in different cultural contexts are combined with readings on the conceptual and methodological genealogies that have constructed children as research subjects in anthropology. PREREQS: 3 credits of social science
ANTH 569. ENERGY IN CULTURAL
PERSPECTIVE (4). Examines historical and current trends in energy around the globe. Course themes include the role of energy in economic development, cultural innovation in energy production, social problems that arise from energy shortages or the uneven distribution of energy resources and social and cultural changes required as societies attempt to reduce their dependence on fossil fuels. PREREQS: ANTH 110 or ANTH 210

## ANTH 570. TOPICS IN CULTURAL

ANTHROPOLOGY (1-16). Covers recent advances in cultural anthropology and their applications to the field. Topics vary from term to term. This course is repeatable for a maximum of 16 credits. PREREQS: 3 credits of social science.

## ANTH 571. CASH, CLASS AND CULTURE:

HUNTER-GATHERERS TO CAPITALISM (4).
Students explore the cultural and social effects of capitalism in the contemporary world within the larger question of how economics and society intersect and change over time. Special emphases are put on food and work, but students explore the linkages of global forces and local life in a variety of ways. PREREQS: 3 credits of social science.

## ANTH 572. CONTEMPORARY INDIAN ISSUES

(4). Examines the background of Indian treaties and reservations with discussions of present issues such as health care, education, the Indian Child Welfare Act, fishing rights, and religious freedom. Issues are discussed in class with considerable class participation and some role playing. PREREQS: 3 credits of social science.
ANTH 573. GENDER, ETHNICITY, AND
CULTURE (4). Study of the practices and ideologies of gender as they intersect with those of ethnicity, race, class, and culture. PREREQS: 3 credits of social science.
ANTH 574. CROSS-CULTURAL HEALTH AND
HEALING (4). A comprehensive overview of current issues in global health with particular emphasis on social, cultural, and behavioral interventions. Explores issues of health and development in the international context, focusing on such issues as inequality, structural adjustment, economic development, and
community-based approaches to health care, specific cultural beliefs and practices, and the influences of people's perceptions of health, illness, and healing.
ANTH 575. THEORY OF CULTURE (4).
Core ideas in the discipline of anthropology. Examination of the contributions to anthropologica method and theory of the major schools of though in the history of anthropology. PREREQS: 9 credits of upper-division social science, including at least one 400-level anthropology course.

## ANTH 576. ADVANCED ANTHROPOLOGICAL

THEORY SEMINAR (4). Investigates theories used by current anthropologists to explicate issues of concern in a world of movement, fragmentation, global-local interactions, individuation via state and media unequal power relations, and neoliberal agendas. Students will participate in discussions, essays and a paper that links these theories to their research topics for theses or dissertations PREREQS: Must be a PhD student or have taken ANTH 575.
ANTH 577. ECOLOGICAL ANTHROPOLOGY
(4). Examines past and present interactions between humans and their environments. Emphasizes the concept of system and process of human adaptation. PREREQS: Upper-division standing and 3 credits of social science.

## ANTH 578. ANTHROPOLOGY OF TOURISM

4). Examines the cultural practices and impacts of tourism in relation to both host and guest communities, and travel itself as a part of culture We will explore theories of tourism and what role anthropology can play in influencing the industry and tourist and host relationships. PREREQS: 3 credits of social science
ANTH 579. ANTHROPOLOGY OF MIGRATION
(4). Focuses on the multiple aspects of population movements around the globe. Investigates
the history of recent human migration; current theories, trends and policies; as well as issues of immigrant incorporation and anti-immigrant politics. PREREQS: 3 credits of social science

## ANTH 580. TOPICS IN APPLIED

ANTHROPOLOGY (1-4). Recent advances in applied anthropology and their application to special fields of study. Topics vary from term to term. This course is repeatable for a maximum of 16 credits. PREREQS: 3 credits of social science
ANTH 581. NATURAL RESOURCES AND
COMMUNITY VALUES (4). Investigates relations between human communities and the values of community members. Resource issues integrate concepts from social science, economics, and ecology. PREREQS: 3 credits of social science.

## ANTH 582. ANTHROPOLOGY OF

INTERNATIONAL DEVELOPMENT (4). Examines the ideological and theoretical bases of world assistance programs and their effects on different sectors and classes, including women. Causes of world hunger in terms of agronomic, mainstream economic and radical economic paradigms are developed and contrasted. PREREQS: Graduate standing.
ANTH 583. ADVANCED MEDICAL
ANTHROPOLOGY (4). An overview of anthropological studies of the health of human communities from a biological and behavioral perspective. Topics include prehistory of disease, cultural perspectives on causation of disease and approaches to healing; anthropological approach to international health issues; and case studies PREREQS: (ANTH 110 or ANTH 210) and (ANTH 240 or ANTH 330)
ANTH 584. WEALTH AND POVERTY (3).
Summarizes the distribution of wealth observed cross-culturally and through time. Determines the relation between wealth distribution and economic productivity. Shows the impact of industrialization and economic wealth distribution in Western civilization and cross-culturally. Evaluates how cultural practices affect wealth distribution in Western and non-Western societies. PREREQS: 3
credits of social science.
ANTH 585. USES OF ANTHROPOLOGY
(4). Examines the practical applications of anthropological knowledge in historical and contemporary contexts. Focuses on planned social change and roles of anthropologists in interdisciplinary research and nonacademic settings such as international business, industrial relations, economic and technological development, education, legal institutions, environmental change, minority relations, health care, and cultural preservation. Emphasizes relevance to public policy and ethical issues associated with applications of anthropological knowledge. PREREQS: 3 credits of social science

ANTH 586. ANTHROPOLOGY OF FOOD (4).
The role of food in human cultures, both past and present. Includes discussion of different food procurement styles, social movements and the political economy of food. Looks at the symbolic aspects of food as well as its relationship with the environment. CROSSLISTED as FCSJ 586. PREREQS: 3 credits of social science.
ANTH 587. LANGUAGE IN GLOBAL CONTEXT (4). Deals with practical uses of linguistics in the global political arena. Explores use of official vs. unofficial languages, language standardization, the preservation of dying languages; problems in learning first and second languages, and the relevance of linguistic knowledge to education and cross-cultural communication. PREREQS: ANTH 251 or ANTH 350 or some knowledge of linguistic structure or graduate standing.
ANTH 588. BUSINESS AND ASIAN CULTURE (3). Examines the mutual influence of business organization and culture in Asia. Starts with the premise that a business organization contains a set of values. These values are analyzed as to their effect on society in general and some Asian societies in particular, including Japan, China, Korea, India, and Indonesia. A second area of investigation is the influence of Asian societies on the organization and practice of Western businesses both in Asia and the West. PREREQS: 3 credits of social science.

## ANTH 589. ANTHROPOLOGY OF BUSINESS

(3). Students are exposed to the methods and perspectives used by anthropologists working in business. How does anthropology contribute in such areas as product development, workplace organization and communication, marketing and interfacing with technology? Students do a lengthy project in one of these areas and present it as if in a corporate setting.

## ANTH 590. TOPICS IN METHODOLOGY

(1-4). Recent advances in anthropological methodologies and their application to special fields of study. Topics vary from term to term. This course is repeatable for a maximum of 16 credits. PREREQS: 6 credits anthropology or graduate standing.

ANTH 591. ETHNOGRAPHIC METHODS (4).
Cultural descriptions are produced through systematic observation, elicitation, and analysis o achieve proximity to the insider's point of view. Covers techniques of interviewing, validating, and interpreting cultural data. Allows students to practice what they have learned. PREREQS: 6 credits of anthropology or graduate standing.

ANTH 592. ARCHAEOLOGICAL LABORATORY METHODS (1-3). Provides information on the basics of archaeological laboratory work. Students learn the day-to-day operations of a lab, how to classify and catalog artifacts, and how to do artifact analysis. PREREQS: 6 credits of anthropology or graduate standing.
ANTH 593. STATISTICAL APPLICATIONS IN ANTHROPOLOGY (4). Develops the skills necessary to use statistical software to analyze and interpret numerical data. Covers descriptive statistics, correlation, and multivariate statistical procedures. Evaluate the adequacy of data for parametric and nonparametric statistical tests.

PREREQS: Graduate standing or a minimum of 6 credits of anthropology with instructor approval if an undergraduate.
ANTH 594. LINGUISTIC ANTHROPOLOGY LAB (1-3). A training and practicum in the elicitation, transcription and analysis of language. PREREQS: ANTH 350 or graduate standing.
ANTH 595. ANTHROPOLOGICAL RESEARCH
DESIGN (4). Critical examination of research design and methodology in anthropology; analysis of methods and procedures of research in the subfields of anthropology. PREREQS: 9 credits of upper-division social science, including at least one 400-level anthropology course.
ANTH 597. ARCHAEOLOGICAL FIELD
METHODS (1-3). Archaeological field strategies emphasizing reconnaissance and survey. Application of field equipment and project management.
ANTH 598. ORAL TRADITIONS (1-3). Method of examining unwritten culture preserved in speech, including local history, folklore, and songs passed from one generation to another. May include the use of life history, genealogy, and other means of collecting information. Attention is given to ethics, legal issues, and the process of transcription.
PREREQS: ANTH 350 and ANTH 452* or graduate standing
ANTH 599. SPECIAL TOPICS IN
ANTHROPOLOGY (1-16). This course is repeatable for a maximum of 16 credits.

ANTH 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ANTH 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required
ANTH 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ANTH 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ANTH 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ANTH 610. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ANTH 695. ANTHROPOLOGICAL RESEARCH
DESIGN (4). Doctoral student seminar focused on the research process, from the selection of a research topic, to the choice of appropriate methods for data collection and analysis, to the submission of a research proposal. Class assignments will result in completion of a research proposal. Seminal discussion will focus on problem formulation, statement of objectives, theoretical background, methodological approach, analytical techniques, ethical responsibilities, justification for the research, data analysis and interpretation, and budgetary concerns. PREREQS: Doctoral standing.
ANTH 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
ANTH 808. WORKSHOPS (1-16). This course is repeatable for a maximum of 16 credits.

## - ARABIC LANGUAGE COURSE

ARAB 111. FIRST-YEAR ARABIC (4).
Pronunciation, intonation, grammar, reading, writing, listening comprehension and conversation Initiation to Arabic culture and attitudes. Designed for students with no prior training in Arabic. Native and/or bilingual speakers of Arabic will not receive credit for ARAB 111, ARAB 112, ARAB 113. PREREQS: ARAB 111, ARAB 112, ARAB 113 must be taken in order.

ARAB 112. FIRST-YEAR ARABIC (4)
Pronunciation, intonation, grammar, reading, writing, listening comprehension and conversation Initiation to Arabic culture and attitudes. Designed for students with no prior training in Arabic. Native and/or bilingual speakers of Arabic will not receive credit for ARAB 111, ARAB 112, ARAB 113.
PREREQS: ARAB 111 [D-] or ARAB 111H [D-]
ARAB 113. FIRST-YEAR ARABIC (4).
Pronunciation, intonation, grammar, reading, writing, listening comprehension and conversation Initiation to Arabic culture and attitudes. Designed for students with no prior training in Arabic. Native and/or bilingual speakers of Arabic will not receive credit for ARAB 111, ARAB 112, ARAB 113.
PREREQS: ARAB 112 [D-] or ARAB 112H [D-]
ARAB 199. SPECIAL TOPICS (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

## ARAB 211. SECOND-YEAR ARABIC (4),

Further development of listening comprehension, speaking, reading, and writing skills. Completion of ARAB 213 with a grade of C- or better satisfies the $B A$ requirement in foreign languages. PREREQS: ARAB 113 [D-] and /or instructor approval. Native and/or bilingual speakers of Arabic will not receive credit for ARAB 211.
ARAB 212. SECOND-YEAR ARABIC (4).
Further development of listening comprehension, speaking, reading, and writing skills. Completion of ARAB 213 with a grade of C- or better satisfies the BA requirement in foreign languages. PREREQS: ARAB 211 [D-] and /or instructor approval. Native and/or bilingual speakers of Arabic will not receive credit for ARAB 212.
ARAB 213. SECOND-YEAR ARABIC (4).
Further development of listening comprehension, speaking, reading, and writing skills. Completion of ARAB 213 with a grade of C- or better satisfies the BA requirement in foreign languages. PREREQS: ARAB 212 [D-] and /or instructor approval. Native and/or bilingual speakers of Arabic will not receive credit for ARAB 213.
ARAB 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ARAB 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Instructor permission and school approval are required to register for this course.
ARAB 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## ■ AMERICAN SIGN LANGUAGE COURSE

ASL 111. FIRST-YEAR AMERICAN SIGN LANGUAGE (4). A beginning course to learn the basics of American Sign Language. The course focuses on the ASL language and its uses of syntax, grammar, vocabulary, facial expressions and deaf culture.
ASL 112. FIRST-YEAR AMERICAN SIGN LANGUAGE (4). A continuation of ASL 111 with the development of structures, receptive/ expressive skills and vocabulary. Native and/or bilingual speakers of ASL will not receive credit for ASL 111, ASL 112, ASL 113. PREREQS: ASL 111 [D-] and /or placement test or instructor permission. Students need to have a basic foundation of the language in order to continue with the first-year series.

ASL 113. FIRST-YEAR AMERICAN SIGN LANGUAGE (4). A continuation of ASL 111 and ASL 112 with the further development of structures, receptive/expressive skills and vocabulary. Native and/or bilingual speakers of ASL will not receive credit for ASL 111, ASL 112, ASL 113. PREREQS: ASL 112 [D-]
ASL 211. SECOND-YEAR AMERICAN SIGN LANGUAGE (4). A continuation of the first-
year ASL courses with the further development of structures, receptive/expressive skills and vocabulary. Native and/or bilingual speakers of ASL will not receive credit for ASL 211, ASL 212, ASL 213. PREREQS: ASL 113 [D-]
ASL 212. SECOND-YEAR AMERICAN SIGN LANGUAGE (4). A continuation of the secondyear ASL series with the further development of structures, receptive/expressive skills and vocabulary. Native and/or bilingual speakers of ASL will not receive credit for ASL 211, ASL 212, ASL 213. PREREQS: ASL 211 [D-]
ASL 213. SECOND-YEAR AMERICAN SIGN LANGUAGE (4). A continuation of the secondyear ASL series with the further development of structures, receptive/expressive skills and vocabulary. Native and/or bilingual speakers of ASL will not receive credit for ASL 211, ASL 212, ASL 213. PREREQS: ASL 212 [D-]

## - ASIAN LANGUAGES AND CULTURES COURSE

ASN 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## - Chinese Language COURSES

CHN 111. FIRST-YEAR CHINESE (4). Essentials of colloquial Mandarin with emphasis on conversation, reading, and writing. Designed for students with no prior training in Chinese. Native and/or bilingual speakers of Chinese will not receive credit for CHN 111, CHN 112, CHN 113. Lec/rec. PREREQS: CHN 111, CHN 112, CHN 113 must be taken in order.
CHN 112. FIRST-YEAR CHINESE (4). Essentials of colloquial Mandarin with emphasis on conversation, reading, and writing. Designed for students with no prior training in Chinese. Native and/or bilingual speakers of Chinese will not receive credit for CHN 111, CHN 112, CHN 113. Lec/Rec. PREREQS: CHN 111 [D-] and CHN 111, CHN 112, CHN 113 must be taken in order.
CHN 113. FIRST-YEAR CHINESE (4). Essentials of colloquial Mandarin with emphasis on conversation, reading, and writing. Designed for students with no prior training in Chinese. Native and/or bilingual speakers of Chinese will not receive credit for CHN 111, CHN 112, CHN 113. Lec/Rec. PREREQS: CHN 112 [D-] and CHN 111, CHN 112, CHN 113 must be taken in order.
CHN 199. SPECIAL STUDIES (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

CHN 211. SECOND-YEAR CHINESE (4). Further development of listening comprehension, speaking, reading, and writing skills. Emphasis on conversational fluency and increased vocabulary. Native and/or bilingual speakers of Chinese will not receive credit for CHN 211, CHN 212 , CHN 213. Completion of CHN 213 with grade of C- or better satisfies BA requirement in foreign languages. Lec/Rec. PREREQS: CHN 113 [C-] and /or placement. CHN 211, CHN 212, CHN 213 must be taken in order.

## CHN 212. SECOND-YEAR CHINESE (4).

Further development of listening comprehension, speaking, reading, and writing skills. Emphasis on conversational fluency and increased vocabulary. Native and/or bilingual speakers of Chinese will not receive credit for CHN 211, CHN 212, CHN 213. Completion of CHN 213 with grade of C- or better satisfies BA requirement in foreign languages. Lec/discussion/activity. PREREQS: CHN 211 [D-]
CHN 213. SECOND-YEAR CHINESE (4). Further development of listening comprehension, speaking, reading, and writing skills. Emphasis on conversational fluency and increased vocabulary. Native and/or bilingual speakers of Chinese will not receive credit for CHN 211, CHN 212,

CHN 213. Completion of CHN 213 with grade of C- or better satisfies BA requirement in foreign languages. Lec/discussion. PREREQS: CHN 212 [C-]
CHN 299. SPECIAL STUDIES (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

CHN 311.THIRD-YEAR CHINESE LANGUAGE (3). Further development of listening, speaking, reading, and writing skills to a more advanced level with emphasis on the practical application of the Chinese language. PREREQS: CHN 213 [C-] and /or instructor approval.

CHN 312. THIRD-YEAR CHINESE LANGUAGE (3). Further development of listening, speaking, reading, and writing skills to a more advanced level with emphasis on the practical application of the Chinese language. Lec/rec. PREREQS: CHN 311 [C-] and /or instructor approval.
CHN 313. THIRD-YEAR CHINESE LANGUAGE
(3). Further development of listening, speaking, reading, and writing skills to a more advanced level with emphasis on the practical application of the Chinese language. PREREQS: CHN 312 [C-] and /or instructor approval.
CHN 331. *CHINESE CULTURE (3). Introduction to basic features of Chinese culture from ancient times to the 9th century. Topics include philosophy and religion, the Chinese language, literature and the arts, science and technology, government, family and gender, social and economic conditions, contacts with the outside world. Taught in English. Open to all students. (NC) (Bacc Core Course) PREREQS: Sophomore standing. CHN 331, CHN 332, CHN 333 need not be taken in order.
CHN 332. *CHINESE CULTURE (3). Introduction to basic features of Chinese culture from the 10th through the 19th centuries. Topics include philosophy and religion, literature and the arts, science and technology, government, family and gender, social and economic conditions, daily life, and contacts with the outside world. Taught in English. Open to all students. (NC) (Bacc Core Course) PREREQS: Sophomore standing. CHN 331, CHN 332, CHN 333 need not be taken in order.
CHN 333. *MODERN CHINESE CULTURE (3).
Survey of important developments of Chinese society and culture from the early 20th century to the present. Topics include wars and revolutions, economic, political, and social conditions, the new culture movement, changing family structure and women's status, relationships within greater China (Mainland China, Taiwan, and Hong Kong). Taught in English. Open to all students. (NC) (Bacc Core Course) PREREQS: Sophomore standing. CHN 331, CHN 332, CHN 333 need not be taken in order.
CHN 345. MULTIMODAL LITERACIES: CHINESE
(2). Introduction to the analysis and production of multimodal literacies. Study of semiotic resources such as language and images across modalities such as film, manga, and social media. Required of all majors in World Languages and Cultures. Taught in Chinese. Has to be taken in conjunction with the lecture in English. PREREQS: CHN 213 with a grade of at least C-, or equivalent, or placement test. Sophomore standing required. COREQS: WLC 345

CHN 379. PROCTOR EXPERIENCE (1-2).
Supervised practicum for advanced students, with assignments as proctor or tutor in lower-division Chinese courses. May be repeated for credit. No credit may be used to satisfy requirements for a minor in Chinese. Graded P/N. This course is repeatable for a maximum of 6 credits. PREREQS: Completion of third-year Chinese with a minimum 3.0 GPA in that sequence and prior authorization from supervisor.

CHN 399. SPECIAL TOPICS (1-16). This course
is repeatable for a maximum of 16 credits.
CHN 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits PREREQS: Departmental approval required

CHN 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
CHN 405. READING AND CONFERENCE (1-
16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
CHN 410. INTERNSHIP (1-15). This course is repeatable for a maximum of 15 credits.
CHN 411. FOURTH-YEAR CHINESE (NEWSPAPER CHINESE) (3). Development of reading, writing, and speaking skills at a more advanced level; reading of newspaper articles from China, Taiwan, and other sources; oral eports and compositions in Chinese. Not offered every year. PREREQS: CHN 313 or placement and departmental approval required. CHN 411, CHN 412, CHN 413 must be taken in order.

CHN 412. FOURTH-YEAR CHINESE
(NEWSPAPER CHINESE) (3). Development of reading, writing, and speaking skills at a more advanced level; reading of newspaper articles from China, Taiwan, and other sources; oral reports and compositions in Chinese. Not offered every year. PREREQS: CHN 411 or placement and departmental approval required.
CHN 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
CHN 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.

## COLLEGE STUDENT SERVICES ADMINISTRATION COURSES

CSSA 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
CSSA 502. INDEPENDENT STUDY (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

CSSA 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

CSSA 505. READING AND CONFERENCE (116). Graded $P / N$. This course is repeatable for a maximum of 16 credits.

CSSA 506. PROJECTS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

CSSA 507. SEMINAR (1-5). Graded P/N. This course is repeatable for a maximum of 16 credits.
CSSA 508. WORKSHOP (1-3). Graded P/N. This course is repeatable for a maximum of 16 credits.

CSSA 510. INTERNSHIP (1-18). Graded P/N. This course is repeatable for a maximum of 18 credits. PREREQS: By special permission and arrangement.
CSSA 513. RESEARCH IN HIGHER
EDUCATION (3). Basic understanding of research and assessment ideas, uses, and practices in higher education and student affairs.

## CSSA 515. ADVANCED RESEARCH

LITERATURE REVIEW (3). Provides graduate students with knowledge and experience in the advanced literature review process including construction of the literature review as product. One of the primary skills graduate students must master is advanced review of a body of literature for the research project. Mastery of the literature review process influences quality and sophistication of claims developed to ustify research, with the written review clearly delineating the unique contribution of the student's research and the knowledge gap that
it fills. The literature review as a product is a strong written argument that builds a case from credible evidence based on previous research CROSSLISTED as ANTH 515, ES 515, WGSS 515. PREREQS: Graduate standing

CSSA 520. MULTICULTURAL ISSUES IN HIGHER EDUCATION (3). Developing understanding, knowledge, and skills of multiculturalism affecting the student affairs profession and careers in student affairs administration.
CSSA 548. AMERICAN HIGHER EDUCATION
(3). The origins and development of higher education in the United States from the colonial colleges to the present.

CSSA 551. PROGRAMS AND FUNCTIONS IN COLLEGE STUDENT SERVICES (3). Historical, philosophical, and organizational foundations; operational components and functional areas; overview and analysis of college student services in postsecondary educational institutions; leadership development.

CSSA 552. STUDENT DEVELOPMENT IN UNIVERSITIES AND COLLEGES (3). Theoretical and philosophical foundations of student development; analysis of college student characteristics and the student culture; nontraditional student subgroups; student attitudes, values, and beliefs; concepts and models that promote student learning; and assessment of student growth. This course is repeatable for a maximum of 6 credits.
CSSA 554. LEGAL ISSUES IN HIGHER EDUCATION (3). A comprehensive presentation and discussion of the law governing administration within public colleges and universities with a special emphasis on tort liability and freedom of expression.
CSSA 557. PROFESSIONAL DEVELOPMENT IN COLLEGE STUDENT SERVICES (1). Selfassessment, goal setting, professional growth, and professional ethics as a practitioner in college student services administration. Graded P/N.

CSSA 558. ORGANIZATION AND
ADMINISTRATION OF COLLEGE STUDENT
SERVICES (3). Legal foundations, governance models, planning, and goal setting, resource acquisition and allocation, personnel and financial management and administrative leadership

CSSA 574. BUDGET AND FINANCE (2).
Introduction to budget and finance in student services. Overview of topics with which student affairs practitioners should be familiar, able to use, and to assess.
CSSA 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## ■ ETHNIC STUDIES COURSES

ES 101. *INTRODUCTION TO ETHNIC STUDIES (3). This interdisciplinary course focuses on the ethnic group experience in the United States with emphasis on African Americans, Native Americans, Chicanos/as, Latinos/as, and Asian Americans. (Bacc Core Course)
ES 159. *LANGUAGE, RACE AND RACISM IN THE US: AN INTRODUCTION (4). Students in this course will unpack language, race and racism--as well as the intersections between those ideas-as cornerstones to understanding identity and society as inherently socially constructed notions. (Bacc Core Course) CROSSLISTED as ANTH 159 and WLC 159.
ES 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
ES 201. *INVENTING ETHNIC AMERICA (3). An examination of past and present constructions of race and ethnicity in U.S. culture and society and their impact on individuals, institutions, policies, and practices, with particular emphasis on contemporary America. (Bacc Core Course) (H) (SS)

ES 212. *SURVEY OF CHICANO/A-LATINO/A STUDIES (3). An interdisciplinary survey of the Chicano/a-Latino/a experience, 1848-present. Topics include conquest and colonization, cultural resistance, social stratification, immigration, grassroots movements, and expressive culture. (Bacc Core Course)

ES 213. *CONTEMPORARY LATINO/A
CULTURE AND ISSUES (3). A comparative interdisciplinary treatment of contemporary Latino/a cultures and current issues affecting their status in the United States. (Bacc Core Course)
ES 221. *SURVEY OF AFRICAN AMERICAN STUDIES I (4). An interdisciplinary survey of the African American experience beginning with precolonial Africa to the early 1900s. (H) (NC) (Bacc Core Course)
ES 221H. *SURVEY OF AFRICAN AMERICAN STUDIES I (3). An interdisciplinary survey of the African American experience beginning with pre-colonial Africa and ending with World War I. (H) (NC) (Bacc Core Course) PREREQS: Honors College approval required.
ES 223. *SURVEY OF AFRICAN AMERICAN STUDIES II (4). An interdisciplinary survey of the African American experience from World War I to the present. (Bacc Core Course)
ES 231. *INTRODUCTION TO ASIAN AMERICAN
STUDIES (4). An examination of the histories and experiences of Asian Americans from the mid-1800s to the present through historical texts, oral histories, personal essays, video, audio, and creative writings. (H) (Bacc Core Course)
ES 233. *ASIAN PACIFIC AMERICAN ACTIVISM AND EMPOWERMENT (4). A look at Asian Pacific American activism and issues, from early labor organizing to contemporary community efforts, with particular emphasis on the 1960s to the present. (H) (Bacc Core Course)

## ES 241. *INTRODUCTION TO NATIVE

AMERICAN STUDIES (4). A survey of Native American cultures and history, both prior to and following contact with Europeans. Introduces the key contemporary issues and questions in the field of Native American studies. (H) (NC) (Bacc Core Course)

## ES 241H. *INTRODUCTION TO NATIVE

AMERICAN STUDIES (4). A survey of Native American cultures and history, both prior to and following contact with Europeans. Introduces the key contemporary issues and questions in the field of Native American studies. (H) (NC) (Bacc Core Course) PREREQS: Honors College approval required.
ES 243. *NATIVE AMERICAN ASSIMILATION
AND ACTIVISM (4). Comprehensive course dealing with Native American experiences in the United States. Focuses on tribal and individual Native American activism and responses to government policies and cultural practices of assimilation since 1900. (Bacc Core Course) (H) (NC)
ES 260. *INTRODUCTION TO PACIFIC ISLANDS STUDIES (4). Introduction to the geography, societies, histories, cultures, and contemporary issues of Oceania (Pacific islands). Especially concerned with the experience of indigenous communities and the representations generated inside and outside Oceania. (Bacc Core Course)

ES 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ES 311. NARRATIVES OF LATINO MIGRATIONS
(3). A study of the scholarship and creative literature dealing with migrations from Mexico and other Latin American countries to the United States.
ES 314. CHICANO/A LITERATURE (3). A survey of select works in various genres. Attention to questions of cultural production, reception, critical approaches and how factors such as race, gender, and class impact Chicano/a discursive practices.

ES 321. AFRICAN AMERICAN POLITICAL AND SOCIAL THOUGHT: 20TH CENTURY (4). This interdisciplinary course examines the dialogues, conflicts and self-representations produced by African Americans beginning with the closing years of the 19 century (1895) and ending with the opening days of World War II. (SS)
ES 323. CONTEMPORARY AFRICAN AMERICAN SOCIAL DISCOURSE (4). Interdisciplinary course examines key African American political discourse(s) that emerged in response to major social and cultural transformations occurring in the United States after World War II to the present. (SS)

## ES 332. ASIAN PACIFIC AMERICANS AND

THE MEDIA (4). A broad study of representations of Asians, Pacific Islanders, and Asian Pacific Americans in various US media, including media produced by Asian Pacific Americans themselves.

## ES 334. *ASIAN PACIFIC AMERICAN

LITERATURE (4). An examination of various
works by Asian Pacific American writers and some of the critical debates surrounding them. (Bacc Core Course)

ES 345. NATIVE AMERICANS IN OREGON (4). Analysis and understanding of the complex experiences of Native Americans in the present state of Oregon, from early contact with those of other ethnicities to contemporary demographic contexts. (H) (NC)
ES 350. ^PUBLIC DISCOURSE AND
WRITINGS ON RACE (4). Explores historical and contemporary cases of private, political, and public discourse on race and difference. Students will study diverse examples to explore strategies and methods of dominant and resistant discourse, as well as their social and material impacts. (Writing Intensive Course)
ES 351. *ETHNIC MINORITIES IN OREGON (4). Exploration of the cultures and contributions of major ethnic groups in the state of Oregon. With timelines, oral histories, and audiovisual aids, the course will allow students to learn the ethnic and regional diversity in Oregon history. (Bacc Core Course) (H)
ES 353. *ENVIRONMENTAL RACISM (4).
Introduces environmental racism; the unequal impact of environmental harm on communities of color and indigenous peoples. Presents empirical evidence and theoretical frames, and explores efforts by government, residents, and activists to combat it. Considers questions of environmental justice via social structure, public access, open space, indigeneity, food, and media. (Bacc Core Course)
ES 353H. *ENVIRONMENTAL RACISM (4). Introduces environmental racism; the unequal impact of environmental harm on communities of color and indigenous peoples. Presents empirical evidence and theoretical frames, and explores efforts by government, residents, and activists to combat it. Considers questions of environmental justice via social structure, public access, open space, indigeneity, food, and media. (Bacc Core Course) PREREQS: Honors College approval required.

ES 354. ^LITERATURE OF ETHNIC MINORITIES IN THE UNITED STATES (4). An examination of various literary works by ethnic minorities addressing issues of race and ethnicity in U.S. culture and society. (Writing Intensive Course)
ES 355. *RACE, SPACE, AND DIFFERENCE (4). A hands-on approach to exploring how we make space, and why geography is always infused with markers of social identity and exercises of power. Will practice "reading" space and landscapes, and learn how notions of race and other forms of "difference" shape space (and vice versa) to produce experiences of inclusion, exclusion, cooperation, and conflict. (Bacc Core Course)

ES 355H. *RACE, SPACE, AND DIFFERENCE
(4). A hands-on approach to exploring how
we make space, and why geography is always infused with markers of social identity and exercises of power. Will practice "reading" space and landscapes, and learn how notions of race and other forms of "difference" shape space and (vice versa) to produce experiences of inclusion, exclusion, cooperation, and conflict. (Bacc Core Course) PREREQS: Honors College approval required.

## ES 357. *FARMWORKER JUSTICE

MOVEMENTS (4). Justice movements for farmworkers have a long and storied past in the annals of US history. This course begins with the 1960s Chicano civil rights era struggles for social justice. Focus on the varied strategies of four farmworker justice movements: United Farm Workers, Farm Labor Organizing Committee, Pineros y Campesinos Unidos Noroeste, and the Coalition of Immokalee Workers. The course is structured around the question of the movement and its various articulations. Course covers centra themes and strategies that comprise the core of farmworker movements but is designed to allow students to explore other articulations they find relevant. (Bacc Core Course)
ES 373. APPROACHES TO SOCIAL JUSTICE
(3). Students study various ways of thinking about social justice and evaluate these in case studies and current events. As a basis for the Social Justice minor, students write a research paper on the theoretical and practical aspects of a social justice issue. CROSSLISTED as ANTH 373, WGSS 373, WLC 373.
ES 375. *ARTS AND SOCIAL JUSTICE (4). Explores concepts of structural inequality, difference, power, and discrimination through a critical survey of arts activism. Students will think critically about artwork and artists which address a number of social issues in the United States, including race, ethnicity, class, gender, sexuality, immigration, and indigeneity. CROSSLISTED as QS 375, WGSS 375.

ES 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ES 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
ES 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ES 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ES 403. THESIS (1-16). This course is repeatable or a maximum of 16 credits. PREREQS: Departmental approval required.

ES 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ES 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ES 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ES 408. WORKSHOP (1-16). This course is repeatable for a maximum of 99 credits.

ES 409. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ES 410. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ES 411. CHICANO/AS IN/ON FILM (3).
Exploration of how Mexicans and Mexican
Americans have been portrayed in Hollywood film and how contemporary filmmakers from this group are challenging traditional representations.

ES 416. MIGRANT HEALTH (4). An overview of major health and health care issues related to immigrant communities in the United States From an ecological perspective, students gain an understanding of the theories and realities about migration and the migration-health relationship. In particular, the situation of migrant and seasonal farmworkers in the Pacific Northwest is analyzed. Specific topics include assimilation and acculturation, access to care, protective practices (the so-called Latino paradox), migrant health centers and community health workers, environmental and occupational issues, immigrant families

ES 431. *QUEER OF COLOR CRITIQUES (4). "Queer of color critiques" refers to political theories and activism that emerge from LGBTQ people of color to examine the intersections between race, sexuality and gender. This course addresses these intersections through theory, history, and activism. (Bacc Core Course) CROSSLISTED as QS 431 and WGSS 431. PREREQS: Junior standing.
ES 437. *(EN)GENDERING ASIAN PACIFIC
AMERICA (4). An examination of intersecting articulations of race, class, gender, sexuality, and ethnicity as they relate to and are addressed by Asian Pacific Americans. (H) (Bacc Core Course)
ES 444. NATIVE AMERICAN LAW: TRIBES TREATIES, AND THE UNITED STATES
4). Examination of the parameters of native treaty relationships with the federal and state governments, and considers the future of these agreements
ES 445. *NATIVE AMERICAN SCIENCE AND TECHNOLOGY (4). Examination of scientific and technological discovery, continuity, and change among indigenous peoples, with particular emphasis on selected communities of pre- and post-European contact North America. (Bacc Core Course) (H) (NC)
ES 448. NATIVE AMERICAN PHILOSOPHIES
(4). Native American perspectives on ways of knowing, sources of meaning and ethics, the nature of reality, self, community, and cosmos. Includes lectures, scholarship, story-telling, poetry, theater, and music as forums for this exploration. Introduces ideas of leading Native American thinkers about the human relation to the natural world, sources of strength and wisdom, the nature of time and place and spirit, right ways of acting in communities, both civic and biotic, and the place of beauty in a well-lived life. (NC) CROSSLISTED as PHL 448/PHL 548, REL 448/REL 548.
ES 451. THEORIES OF RACE AND ETHNICITY
(4). A seminar examining various theories of race and ethnicity, their historical contexts, and applications.

ES 452. *ETHNICITY IN FILM (4). Using ethnicity and gender as primary frames of reference, this upper-division/graduate level seminar seeks to introduce students to critical film theory and examine ethnicity and gender as a force both in front of and behind the camera. (Bacc Core Course)

ES 453. *ETHNOHISTORY METHODOLOGY (4). A seminar developing techniques for collecting, analyzing, and incorporating ethnic community histories in research papers and theses. (Bacc Core Course)
ES 455. INTERNSHIP SEMINAR (1). Prepares students for the internship and provides an opportunity to explore career options and/or graduate study. PREREQS: ES 101 and ES 201

ES 457. *LITERATURE BY WOMEN OF COLOR IN THE UNITED STATES (4). An examination of works by various women writers of color and their treatment of issues such as race, ethnicity, class, sexuality, and gender. (Bacc Core Course)
ES 458. RACIAL PATTERNS OF URBANIZATION
(4). This interdisciplinary course will examine the linkages between race and patterns of urbanization. It will examine how ideologies about
race, gender, and class have set the themes of debate and discussion about urbanization in both theoretical and popular discourses.

ES 459. LANGUAGE, RACE AND RACISM IN
THE U.S.: ADVANCED STUDY (4). Students in this course will unpack language, race and racism--as well as the intersections between those ideasas cornerstones to understanding identity and society as inherently socially constructed ideas The goal of this course is to better understand how racism is produced and reproduced in talk and text (this will include symbols and signs), especially in the context of the denial of racism. Our course will specifically focus on the language of racism, and, more specifically, types of discourse that construct Whiteness as dominant over Color. CROSSLISTED as ANTH 459/ANTH 559, WLC 459/WLC 559

ES 460. ETHNICITY AND SOCIAL JUSTICE (4). Seminar examines inequities and social justice issues in contemporary U.S. society, particularly dimensions of race and ethnicity in our public policies and practices impacting communities in areas such as housing, poverty, employment, public health, education, law enforcement, and the environment.

## ES 461. RACISM AND THE PRISON

INDUSTRIAL COMPLEX (4). The prison industrial/punishment complex in the late 20th and early 21st centuries has become a growth industry with the privatization of prisons, and mass incarceration of mostly people-of-color. This course examines the history and growth of this industry and the implications that it has on this democracy.

## ES 464. FOOD AND ETHNIC IDENTITY:

## DECOLONIZING OUR FOOD AND BODY

(3). This interdisciplinary and comparative course will examine the relationship between food and identity. Food, from its production to consumption, is a powerful symbol of social and cultural meaning. As an expression of identity and subjectivity, food also marks borders between humans and non-humans, plants and animals, nature and culture, tradition and modernity, etc. CROSSLISTED as FCSJ 464. (H)
ES 472. ^INDIGENOUS TWO-SPIRIT AND QUEER STUDIES (3). "Two-spirit" refers to North American indigenous genders outside of European male/female binaries. Two-spirit communities argue for decolonization as a central political struggle, calling all people to unlearn settler colonial gender/sexuality on Native land This course addresses indigenous two-spirit/ GLBTQ issues through theory, literature, activism, and art. CROSSLISTED as QS 472, WGSS 472. PREREQS: QS 262 or ES 242 or WGSS 414 or instructor permission
ES 477. QUEER/TRANS PEOPLE OF COLOR ARTS AND ACTIVISM (4). LGBTQ people of color often engage struggles for social justice through artistic movements. This course will focus on arts by LGBTQ people of color and the way these artistic movements contribute to activism that interrupts interlocking systems of oppression. CROSSLISTED as QS 477/QS 577, WGSS 477/ WGSS 577. PREREQS: QS 262 and QS 462

ES 485. CAPSTONE IN SOCIAL JUSTICE (2). Working with an advisor from the Social Justice minor, students conduct research to synthesize and extend analysis of a particular social justice issue, building on three previous papers or projects. Results are presented in a 10-15 page paper and a public poster, presentation or website CROSSLISTED as ANTH 485, WGSS 485, WLC 485. This course is repeatable for a maximum of 4 credits. PREREQS: (ANTH 373 [D-] or ES 373 [D-] or WGSS 373 [D-] or WLC 373 [D-] ) and (ANTH 410 [D-] or ES 410 [D-] or WGSS 410 [D-] or WLC 410 [D-])
ES 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
ES 501. RESEARCH (1-16). This course
is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ES 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits PREREQS: Departmental approval required.
ES 503. THESIS (1-16). This course is repeatable or a maximum of 999 credits. PREREQS: Departmental approval required.
ES 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ES 506. SPECIAL PROJECTS (1-16). This course is repeatable for a maximum of 16 credits PREREQS: Departmental approval required.

ES 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ES 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.
ES 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required

ES 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required. ES 515. ADVANCED RESEARCH LITERATURE REVIEW (3). Provides graduate students with knowledge and experience in the advanced literature review process including construction of the literature review as product. One of the primary skills graduate students must master is advanced review of a body of literature for the research project. Mastery of the literature review process influences quality and sophistication of claims developed to justify research, with the written review clearly delineating the unique contribution of the student's research and the knowledge gap that it fills. The literature review as a product is a strong written argument that builds a case from credible evidence based on previous research. CROSSLISTED as ANTH 515, CSSA 515, WGSS 515. PREREQS: Graduate standing

ES 516. MIGRANT HEALTH (4). An overview of major health and health care issues related to immigrant communities in the United States. From an ecological perspective, students gain an understanding of the theories and realities about migration and the migration-health relationship. In particular, the situation of migrant and seasonal farmworkers in the Pacific Northwest is analyzed. Specific topics include assimilation and acculturation, access to care, protective practices (the so-called Latino paradox), migrant health centers and community health workers, environmental and occupational issues, immigrant families.
ES 531. QUEER OF COLOR CRITIQUES (4). "Queer of color critiques" refers to political theories and activism that emerge from LGBTQ people of color to examine the intersections between race, sexuality and gender. This course addresses these intersections through theory, history, and activism. CROSSLISTED as QS 531 and WGSS 531. PREREQS: Junior standing.
ES 537. (EN)GENDERING ASIAN PACIFIC
AMERICA (4). An examination of intersecting articulations of race, class, gender, sexuality, and ethnicity as they relate to and are addressed by Asian Pacific Americans.
ES 544. NATIVE AMERICAN LAW: TRIBES TREATIES, AND THE U.S. (4). Examination of the parameters of native treaty relationships with the federal and state governments, and considers the future of these agreements.

ES 548. NATIVE AMERICAN PHILOSOPHIES
(4). Native American perspectives on ways of knowing, sources of meaning and ethics, the nature of reality, self, community, and cosmos. Includes lectures, scholarship, story-telling, poetry,
theater, and music as forums for this exploration. Introduces ideas of leading Native American thinkers about the human relation to the natural world, sources of strength and wisdom, the nature of time and place and spirit, right ways of acting in communities, both civic and biotic, and the place of beauty in a well-lived life. CROSSLISTED as PHL 448/PHL 548, REL 448/REL 548

ES 551. THEORIES OF RACE AND ETHNICITY (4). A seminar examining various theories of race and ethnicity, their historical contexts, and applications.
ES 552. ETHNICITY IN FILM (4). Using ethnicity and gender as primary frames of reference, this upper-division/graduate level seminar seeks to introduce students to critical film theory and examine ethnicity and gender as a force both in front of and behind the camera.
ES 553. ETHNOHISTORY METHODOLOGY (4). A seminar developing techniques for collecting, analyzing, and incorporating ethnic community histories in research papers and theses.

ES 557. LITERATURE BY WOMEN OF COLOR IN THE UNITED STATES (4). An examination of works by various women writers of color and their treatment of issues such as race, ethnicity, class, sexuality, and gender.
ES 558. RACIAL PATTERNS OF URBANIZATION
(4). This interdisciplinary course will examine the linkages between race and patterns of urbanization. It will examine how ideologies about race, gender, and class have set the themes of debate and discussion and about urbanization in both theoretical and popular discourses.
ES 559. LANGUAGE, RACE AND RACISM IN
THE U.S.: ADVANCED STUDY (4). Students in this course will unpack language, race and racism--as well as the intersections between those ideas-as cornerstones to understanding identity and society as inherently socially constructed ideas. The goal of this course is to better understand how racism is produced and reproduced in talk and text (this will include symbols and signs), especially in the context of the denial of racism. Our course will specifically focus on the language of racism, and, more specifically, types of discourse that construct Whiteness as dominant over Color. CROSSLISTED as ANTH 459/ANTH 559, WLC 459/WLC 559.
ES 560. ETHNICITY AND SOCIAL JUSTICE (4). Seminar examines inequities and social justice issues in contemporary U.S. society, particularly dimensions of race and ethnicity in our public policies and practices impacting communities in areas such as housing, poverty, employment, public health, education, law enforcement, and the environment.

## ES 561. RACISM AND THE PRISON

INDUSTRIAL COMPLEX (4). The prison
industrial/punishment complex in the late 20th and early 21st centuries has become a growth industry with the privatization of prisons, and mass incarceration of mostly people-of-color. This course examines the history and growth of this industry and the implications that it has on this democracy.

ES 564. FOOD AND ETHNIC IDENTITY: DECOLONIZING OUR FOOD AND BODY
(3). This interdisciplinary and comparative course will examine the relationship between food and identity. Food, from its production to consumption, is a powerful symbol of social and cultural meaning. As an expression of identity and subjectivity, food also marks borders between humans and non-humans, plants and animals, nature and culture, tradition and modernity, etc. CROSSLISTED as FCSJ 564.
ES 569. TOPICS IN JOTERIA STUDIES (3). A space for engaging with arts, activism and scholarship emerging from queer Latin@/ Chican@ experiences and consciousness is provided. Offered winter term in odd years. CROSSLISTED as QS 569, SPAN 569, WGSS
569. This course is repeatable for a maximum of 6 credits. PREREQS: Instructor approval.

## ES 572. INDIGENOUS TWO-SPIRIT AND

 QUEER STUDIES (3). "Two-spirit" refers to North American indigenous genders outside of European male/female binaries. Two-spirit communities argue for decolonization as a central political struggle, calling all people to unlearn settler colonial gender/sexuality on Native land This course addresses indigenous two-spirit/ GLBTQ issues through theory, literature, activism, and art. CROSSLISTED as QS 572, WGSS 572. PREREQS: QS 262 or ES 242 or WGSS 414 or WGSS 514 or instructor permissionES 575. CRITICAL RACE FEMINISM AND OUTSIDER JURISPRUDENCE (4). Critical exploration of critical legal justice movements and their relationship to social identities. Seminar emphasizes specific legal cases, federal and state laws, and constitutional issues that impact groups deemed outsiders in legal discourse as well as their social implications. The critical justice movement and anti-subordination struggles will be explored via case analyses that shape race, class, gender, sexuality, and disability relations. Theoretical contributions of law and society, critical race theory, LatCrit, and critical race feminism, critical white studies, critical mixed race studies, OutCrit, ClassCrit, and critical disability studies applied to historical precedent and current attempts at marginalizing/empowering communities. CROSSLISTED as WGSS 575.

ES 577. QUEER/TRANS PEOPLE OF COLOR ARTS AND ACTIVISM (4). LGBTQ people of color often engage struggles for social justice through artistic movements. This course will focus on arts by LGBTQ people of color and the way these artistic movements contribute to activism that interrupts interlocking systems of oppression. CROSSLISTED as QS 477/QS 577, WGSS 477/ WGSS 577. PREREQS: QS 262 and QS 464

ES 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
ES 808. WORKSHOP (1-16). This course is repeatable for a maximum of 99 credits.

## I FOOD IN CULTURE AND SOCIAL JUSTICE COURSES

FCSJ 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

FCSJ 261. *FOOD IN AMERICAN CULTURE (3).
Fosters understanding of the meanings of foods and foodways in American culture. Uses food as a lens to explore general topic areas such as work, family, ecology, and identity. Critically examines core issues that shape and have shaped American culture. (Bacc Core Course) (SS) CROSSLISTED as ANTH 261.
FCSJ 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
FCSJ 361. *FOOD JUSTICE (4). Contemporary food systems are examined from a cultural and social justice perspective. The human right to food as recognized by the United Nations serves as the justice grounding point. Impediments to realizing the right to food will be examined in national and international contexts. CROSSLISTED as ANTH 361. (Bacc Core Course) (SS)

FCSJ 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
FCSJ 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
FCSJ 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
FCSJ 403. THESIS (1-6). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required
FCSJ 405. READING AND CONFERENCE (1-6).

This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
FCSJ 406. FOOD PROJECTS (1-6). Graded
$\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 6 credits.
FCSJ 407. SEMINAR (1-3). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
FCSJ 410. INTERNSHIP (1-16). Opportunities for students to take advantage of off-campus work experiences during regular term sessions for academic credit. Allows students to broaden and deepen their understanding and appreciation of the value of their academic activity. Internship is supervised and evaluated by individual faculty members. This course is repeatable for a maximum of 16 credits. PREREQS: 6 credits of FCSJ or related course work.
FCSJ 422. INTERCULTURAL LEARNING COMMUNITY (3-6). Taught as a learning community combining students, professors and community members to explore contemporary food-related questions in two different countries. Syllabus content will change depending on 1) The countries chosen, 2) The questions that are most of interest to the members of the community. Depending on the year, up to $25 \%$ of the time might be spent on the Corvallis campus. This course is repeatable for a maximum of 6 credits. PREREQS: FCSJ 454 [C-]
FCSJ 444. NUTRITIONAL ANTHROPOLOGY (4). Examines human nutrition and food systems from comparative, biocultural and evolutionary perspectives. Long-term evolutionary processes are examined within an ecological framework as significant factors affecting human biology and susceptibility to diet-related disease. An emphasis on anthropological methods in nutritional assessment including anthropometry, paleodietary assessment and nutritional participant-observation will provide students with the tools to evaluate human diet from skeletal and fossil collections through contemporary cross-cultural populations. CROSSLISTED as ANTH 444. PREREQS: ANTH 240 [C] or ANTH 330 [C]
FCSJ 454. *INTERNATIONAL PERSPECTIVES ON FOOD SYSTEMS (4). Macro and microcomparative overview of food systems in at least two different international settings, highlighting the influences of culture, social structure, geography, and economy on food systems. Non-traditional and emerging theoretical critiques of such influences on food systems are highlighted. (Bacc Core Course) (H) (SS) (NC)
FCSJ 464. FOOD AND ETHNIC IDENTITY:
DECOLONIZING FOOD AND OUR BODY
(3). This interdisciplinary and comparative course will examine the relationship between food and identity. Food, from its production to consumption, is a powerful symbol of social and cultural meaning. As an expression of identity and subjectivity, food also marks borders between humans and non-humans, plants and animals, nature and culture, tradition and modernity, etc. CROSSLISTED as ES 464. (H)
FCSJ 467. CAPSTONE: FOOD IN CULTURE AND SOCIAL JUSTICE (1). Working under the supervision of a Food in Culture and Social Justice faculty person, students further engage with a topic previously explored in FCSJ course work and produce a 5-page paper and public poster, presentation or website that demonstrates critical thinking and writing competencies about food, culture and social justice. Graded P/N. PREREQS: Students should have completed or be taking concurrently the last of their course work for the Food in Culture and Social Justice undergraduate certificate.
FCSJ 486. ANTHROPOLOGY OF FOOD (4).
The role of food in human cultures, both past and present. Includes discussion of different food procurement styles, social movements and the
political economy of food. Looks at the symbolic aspects of food as well as its relationship with the environment. CROSSLISTED as ANTH 486. PREREQS: 3 credits of social science.
FCSJ 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
FCSJ 501. RESEARCH (1-6). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
FCSJ 502. INDEPENDENT STUDY (1-6). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

FCSJ 503. THESIS (1-12). This course is repeatable for a maximum of 999 credits PREREQS: Departmental approval required.
FCSJ 505. READING AND CONFERENCE (1-6). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
FCSJ 506. FOOD PROJECTS (1-6). Graded $\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 6 credits.
FCSJ 507. SEMINAR (1-3). This course
is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

FCSJ 510. GRADUATE INTERNSHIP (1-16). Opportunities for students to take advantage of off-campus work experiences during regular term sessions for academic credit. Allows students to broaden and deepen their understanding and appreciation of the value of their academic activity. Internship is supervised and evaluated by individual faculty members. This course is repeatable for a maximum of 16 credits. PREREQS: 6 credits of FCSJ or related course work.

FCSJ 522. INTERCULTURAL LEARNING
COMMUNITY (3-6). Taught as a learning community combining students, professors and community members to explore contemporary food-related questions in two different countries. Syllabus content will change depending on 1) The countries chosen, 2) The questions that are most of interest to the members of the community. Depending on the year, up to $25 \%$ of the time might be spent on the Corvallis campus. This course is repeatable for a maximum of 6 credits. PREREQS: FCSJ 554 [C]
FCSJ 544. NUTRITIONAL ANTHROPOLOGY (4)
Examines human nutrition and food systems from comparative, biocultural and evolutionary perspectives. Long-term evolutionary processes are examined within an ecological framework as significant factors affecting human biology and susceptibility to diet-related disease. An emphasis on anthropological methods in nutritional assessment including anthropometry, paleodietary assessment and nutritional participant-observation will provide students with the tools to evaluate human diet from skeletal and fossil collections through contemporary cross-cultural populations. CROSSLISTED as ANTH 544. PREREQS: ANTH 240 or ANTH 330
FCSJ 547. METHODS IN FOOD IN CULTURE AND SOCIAL JUSTICE (4). Exposes graduate students to the methodological approaches and methods used in guiding empirical research on the socio-cultural aspects of food, focusing on vulnerable populations, food security, procurement, foodways, disasters, and climate change. Methodological approaches and methods as evidenced in peer-reviewed publications is the grounding for the course. CROSSLISTED as ANTH 547. PREREQS: Graduate standing
FCSJ 554. INTERNATIONAL PERSPECTIVES ON FOOD SYSTEMS (4). Macro and microcomparative overview of food systems in at least two different international settings, highlighting the influences of culture, social structure, geography, and economy on food systems. Non-traditional and emerging theoretical critiques of such influences on food systems are highlighted.

FCSJ 564. FOOD AND ETHNIC IDENTITY: DECOLONIZING FOOD AND OUR BODY (3). This interdisciplinary and comparative course will examine the relationship between food and identity. Food, from its production to consumption, is a powerful symbol of social and cultural meaning. As an expression of identity and subjectivity, food also marks borders between humans and non-humans, plants and animals, nature and culture, tradition and modernity, etc. CROSSLISTED as ES 564.
FCSJ 567. AGRI-FOOD MOVEMENTS (4).
Investigates the origins and contemporary status of producer and consumer food movements including but not limited to organics, agricultural labor movements, animal welfare, vegetarian and vegan movements, farmer's markets, and permaculture. CROSSLISTED as ANTH 567.

FCSJ 586. ANTHROPOLOGY OF FOOD (4).
The role of food in human cultures, both past and present. Includes discussion of different food procurement styles, social movements and the political economy of food. Looks at the symbolic aspects of food as well as its relationship with the environment. CROSSLISTED as ANTH 586. PREREQS: 3 credits of social science.

FCSJ 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## ■ FRENCH COURSES

FR 111. FIRST-YEAR FRENCH (4).
Pronunciation, grammar, reading, writing, listening comprehension, speaking, conversation. Designed specifically for students with no prior training in French. Native and/or bilingual speakers of French will not receive credit for FR 111, FR 112, FR 113. Lec/rec. PREREQS: Simultaneous enrollment in FR 199 strongly recommended. FR 111, FR 112, FR 113 must be taken in order.
FR 112. FIRST-YEAR FRENCH (4).
Pronunciation, grammar, reading, writing, listening comprehension, speaking, conversation. Designed specifically for students with no prior training in French. Native and/or bilingual speakers of French will not receive credit for FR 111, FR 112, FR 113. Lec/rec. PREREQS: FR 111 [D-] or Placement Test X112(1) and simultaneous enrollment in FR 199 strongly recommended.

## FR 113. FIRST-YEAR FRENCH (4).

Pronunciation, grammar, reading, writing, listening comprehension, speaking, conversation. Designed specifically for students with no prior training in French. Native and/or bilingual speakers of French will not receive credit for FR 111, FR 112, FR 113. Lec/rec. PREREQS: FR 112 [D-] or Placement Test X113(1) and simultaneous enrollment in FR 199 strongly recommended.
FR 121. SURVIVAL FRENCH FOR STUDENTS
AND TRAVELERS (3). Provides practical linguistic tools for short stays in France. Basic conversation skills, pronunciation, introduction to French non-verbal language, as well as cultural tools, introduction to French etiquette, visual dictionary, and tips for avoiding cross-cultural misunderstandings common between Americans and the French.
FR 188. FRENCH STUDIES, FRENCH STUDY CENTERS (1-12). May be repeated for credit when topic varies. Section 1: Topics, French language. Section 2: Practical work (exercises). Section 3: Topics, French arts and letters. Section 4: Topics, France and French society. This course is repeatable for a maximum of 12 credits.
FR 199. SPECIAL STUDIES (1-16). Conversation pronunciation, vocabulary-building, etc. Supplements basic sequence FR 111, FR 112, FR 113. May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits.
FR 211. SECOND-YEAR FRENCH (4).
Continued development of basic language skills, pronunciation, and vocabulary acquisition;
introduction to extensive reading. Native and/or bilingual speakers of French will not receive credit for FR 211, FR 212, FR 213. Lec/rec. PREREQS: FR 113 [D-] or Placement Test X211(1) and simultaneous enrollment in FR 299 strongly recommended. FR 211, FR 212, FR 213 must be taken in order.

FR 212. SECOND-YEAR FRENCH (4).
Continued development of basic language skills, pronunciation, and vocabulary acquisition; introduction to extensive reading. Native and/or bilingual speakers of French will not receive credit for FR 211, FR 212, FR 213. Lec/rec. PREREQS: FR 211 [D-] or Placement Test X212(1) and simultaneous enrollment in FR 299 strongly recommended.
FR 213. SECOND-YEAR FRENCH (4).
Continued development of basic language
skills, pronunciation, and vocabulary acquisition; introduction to extensive reading. Completion of FR 213 with a grade of C- or better satisfies BA requirement in foreign languages. Native and/or bilingual speakers of French will not receive credit for FR 211, FR 212, FR 213. Lec/rec. PREREQS: FR 212 [D-] or Placement Test X213(1) and simultaneous enrollment in FR 299 strongly recommended.
FR 270. *FRANCE TODAY: CULTURES WITHIN
AND BEYOND ITS BORDERS (3). An exploratory study of French culture and society since 1945. Topics include: decolonization, immigration, Francophone intellectual currents, France's European vocation, and social conflict today. Conducted in English. (Bacc Core Course)
FR 270H. *FRANCE TODAY: CULTURES
WITHIN AND BEYOND ITS BORDERS (3). An exploratory study of French culture and society since 1945. Topics include: decolonization, immigration, Francophone intellectual currents, France's European vocation, and social conflict today. Conducted in English. (Bacc Core Course) PREREQS: Honors College approval required.
FR 288. FRENCH STUDIES, FRENCH STUDY CENTERS (1-12). May be repeated for credit when topic varies. Section 1: Topics, French language. Section 2: Practical work (exercises). Section 3: Topics, French arts and letters. Section 4: Topics, France and French society. This course is repeatable for a maximum of 12 credits.
FR 299. SPECIAL STUDIES (1-16). Conversation, pronunciation, vocabulary-building, etc. Supplements basic sequence FR 211, FR 212, FR 213. May not be offered every year. May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. This course is repeatable for a maximum of 16 credits.

FR 311. THIRD-YEAR FRENCH (3). A languageuse course; primary emphasis on developing oral and written proficiency; extensive practice in speaking and writing. Grammar review; vocabulary study; written assignments including original compositions. Conducted in French. PREREQS: FR 213 and departmental approval. FR 311, FR 312, FR 313 must be taken in order.

FR 312. THIRD-YEAR FRENCH (3). A languageuse course; primary emphasis on developing oral and written proficiency; extensive practice in speaking and writing. Grammar review; vocabulary study; written assignments including original compositions. Conducted in French. PREREQS: FR 311 and departmental approval.
FR 313. THIRD-YEAR FRENCH (3). A languageuse course; primary emphasis on developing oral and written proficiency; extensive practice in speaking and writing. Grammar review; vocabulary study; written assignments including original compositions. Conducted in French. PREREQS: FR 312 and departmental approval.
FR 315. FRENCH FOR BUSINESS (3). An introduction to the French business world and business language. Development of business vocabulary; discussion; practice in writing
resumes, business letters and business reports. Conducted in French. May not be offered every year. PREREQS: FR 213 or placement.

## FR 319. SELECTED TOPICS IN FRENCH

LANGUAGE (3). Skill-orientation variable. Conducted in French. May be repeated for credit when topic varies. See Schedule of Classes for current topics and prerequisites. This course is repeatable for a maximum of 9 credits.

## FR 321. FRENCH CONVERSATION FOR

 ADVANCED SPEAKERS I (1). Designed for students who would like to continue developing basic listening and speaking skills in French through independent work with a variety of media. Graded P/N. PREREQS: FR 213 [D-]FR 322. FRENCH CONVERSATION FOR ADVANCED SPEAKERS II (1). Designed for students who would like to continue developing basic listening and speaking skills in French through independent work with a variety of media. PREREQS: FR 213 [D-]
FR 323. FRENCH CONVERSATION FOR
ADVANCED SPEAKERS III (1). Designed for students who would like to continue developing basic listening and speaking skills in French through independent work with a variety of media. PREREQS: FR 213 [D-]
FR 329. *FRANCOPHONE CULTURES IN FILM (3-9). An exploration of the different cultures of France and the Francophone world through film. Students will delve into the heart of these societies and discover their socio-historical, political, economic and cultural context. Students' analytical and critical skills will be thoroughly solicited through various research and writing activities. Taught in English. (Bacc Core Course) This course is repeatable for a maximum of 9 credits.
FR 329H. *FRANCOPHONE CULTURES IN FILM (3-9). An exploration of the different cultures of France and the Francophone world through film. Students will delve into the heart of these societies and discover their socio-historical, political, economic and cultural context. Students' analytical and critical skills will be thoroughly solicited through various research and writing activities. Taught in English. (Bacc Core Course) This course is repeatable for a maximum of 9 credits. PREREQS: Honors College approval required.
FR 332. *FRENCH CULTURE AND SOCIETY SINCE THE REVOLUTION (3). Cultural life of the French people from 1789 to the present. Conducted in French. Need not be taken in order. (H) (Bacc Core Course) PREREQS: Completion of 3 credits of 300-level French or placement for FR 331 and FR 332.
FR 333. *FRENCH CULTURE AND SOCIETY SINCE THE REVOLUTION (3). Cultural life of the French people from 1789 to the present. Conducted in French. Need not be taken in order. (H) (Bacc Core Course) PREREQS: Completion of 6 credits of 300-level French or placement for FR 333.
FR 334. GENDER AND SEXUAL IDENTITIES IN THE FRANCOPHONE WORLD (3). Students will engage with a wide variety of materials (literary texts, newspaper articles, films, documentaries, etc.) in order to explore the construction of gender roles and sexual identities in France and the French-speaking world, as well as examine contemporary issues related to gender and sexuality in the French-speaking world at large. Taught in French. PREREQS: FR 312 [D-]
FR 336. QUEBEC: TEXTS AND CONTEXTS (3). Intended for intermediate and advanced students in French. Offers an introductory knowledge of Quebec. Discussions and readings cover a variety of topics, including geography, history, cinema, literature, popular culture, the language issue, American and French influences, ethnic diversity and immigration, among other topics of interest. PREREQS: FR 211 [D-]

FR 338. FRENCH FASHION AND GLAMOUR
(3). This course, taught in English, allows students who have not studied French to enter the glamorous world of French fashion, exploring its origins and history, what's new and exciting in French fashion today and French attitudes about fashion and beauty that have given them the inside track on chic for centuries. PREREQS: Sophomore standing.
FR 339. FRENCH: FRANCOPHONE STUDIES
(3). May be repeated for credit when topic varies. Not offered every year. This course is repeatable for a maximum of 9 credits.

FR 340. INTRODUCTION TO FRENCH
LITERARY STUDIES (3). Concepts and vocabulary fundamental to the study of French literature; general view of the main currents of French literary history; introduction to French versification; techniques of literary analysis; practice in literary analysis and in writing about iterature; explication de texte. Conducted in French. (H) PREREQS: FR 213 or placement.
FR 343. THE SHORT STORY: WOMEN IN THE FRANCOPHONE WORLD (3). A selection of short stories written by francophone women representing various regions of the Frenchspeaking world. These stories revolve around contemporary issues affecting and of interest particularly to women in these francophone societies. Among major themes will be immigration, conditions of women, quest for identity, tradition versus modernity, and other related topics. PREREQS: FR 311 [C]
FR 345. MULTIMODAL LITERACIES: FRENCH (2). Introduction to the analysis and production of multimodal literacies. Study of semiotic resources such as language and images across modalities such as film, manga, and social media. Required of all majors in World Languages and Cultures. Taught in French. Has to be taken in conjunction with the lecture session in English. PREREQS: FR 213 with a grade of at least C-, or equivalent, or placement test. Sophomore standing required. COREQS: WLC 345

FR 349. SELECTED TOPICS IN FRANCOPHONE LITERATURE (3). Literary works, themes, movements, or authors from French-speaking areas of the world. Conducted in French. May be repeated for credit when topic varies. See Schedule of Classes for current topics and prerequisites. Not offered every year. This course is repeatable for a maximum of 9 credits.

FR 365. MIGRANT NARRATIVES: FRENCH (2).
An examination of migration and forced displacement through the study of personal narrative in French. Includes discussion of the causes of displacement including persecution, ecological degradation, economic pressure and conflict. This is a required course for the French option in the WLC major in the Identities and Intersections thematic area. PREREQS: Thirdyear proficiency in French. COREQS: WLC 365

FR 366. LANGUAGE AND IDENTITY: FRENCH (2). Examines specific ideologies, patterns of variation, and language contact situations involving French using authentic oral and written texts. Learners carry out their own exploration in language communities. This is a required course in the French option of the WLC major in the Identities and Intersections thematic area. PREREQS: Third-year proficiency in French COREQS: WLC 366
FR 375. LITERATURES OF POWER AND RESISTANCE: FRENCH (2). An examination of the relationships between individuals or groups and institutional power (government, ecclesiastical, etc.) across different historical periods and geographies. This French-language section covers specific works dealing with such topics as colonization, forced disappearance, and social resistance. This is a required course in the French option of the WLC major in the Social Architecture and Power thematic area. PREREQS: Third-year proficiency in French. COREQS: WLC

375
FR 376. EMPIRES AND GLOBALIZATION:
FRENCH (2). An examination of the history of Western imperialism and the rise of contemporary neocolonialism. Students explore the impact of colonization and the effects of neoliberalism and globalization in this French discussion sections through the use of historical source materials and current news articles focused on specific regions of the developing world. This is a required course in the French option of the WLC major in the Social Architecture and Power thematic area. PREREQS: Third-year proficiency in French COREQS: WLC 376

FR 379. PROCTOR EXPERIENCE (1-2). Supervised practicum for advanced students. Assignments as proctors or tutors in lower-division French courses. No more than 2 credits may be used to satisfy degree requirements for a major in French; may not be used to satisfy requirements for a minor in French. Graded $P / N$. This course is repeatable for a maximum of 6 credits. PREREQS: Completion of 12 upper-division credits in French, including FR 311, FR 312, FR 313 and FR 351, with a minimum 3.0 GPA and prior authorization from supervisor

FR 388. FRENCH STUDIES, FRENCH STUDY CENTERS (1-12). May be repeated when topic varies. Section 1: Topics, French language. Section 2: Practical work (exercises). Section 3: Topics, French arts and letters. Section 4: Topics, France and French society. This course is repeatable for a maximum of 12 credits.

FR 399. SPECIAL TOPICS (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course s repeatable for a maximum of 16 credits.

FR 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

FR 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

FR 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
FR 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

FR 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.
PREREQS: Departmental approval required.
FR 410. INTERNSHIP (1-15). This course is repeatable for a maximum of 15 credits.
