## historical contexts. Taught in English.

IT 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
IT 410. INTERNSHIP (1-15). This course is repeatable for a maximum of 15 credits.
IT 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

## JAPANESE COURSES

JPN 111. FIRST-YEAR JAPANESE (4). Designed to help students develop an understanding of basic language structures and to acquire the ability to use them appropriately in a variety of practical, everyday social contexts. Primary focus is on verbal and non-verbal communication skills. Native and/or bilingual speakers of Japanese will not receive credit for JPN 111, JPN 112, JPN 113. Lec/lab/rec. PREREQS: JPN 111, JPN 112, JPN 113 must be taken in order.

JPN 112. FIRST-YEAR JAPANESE (4). Designed to help students develop an understanding of basic language structures and to acquire the ability to use them appropriately in a variety of practical, everyday social contexts. Primary focus is on verbal and non-verbal communication skills. Native and/or bilingual speakers of Japanese will not receive credit for JPN 111, JPN 112, JPN 113. Lec/lab/rec. PREREQS: JPN 111 [D-]
JPN 113. FIRST-YEAR JAPANESE (4). Designed to help students develop an understanding of basic language structures and to acquire the ability to use them appropriately in a variety of practical, everyday social contexts. Primary focus is on verbal and non-verbal communication skills. Native and/or bilingual speakers of Japanese will not receive credit for JPN 111, JPN 112, JPN 113. Lec/lab/rec. PREREQS: JPN 112 [D-]

JPN 199. SPECIAL STUDIES: INTENSIVE JAPANESE (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.
JPN 211. SECOND-YEAR JAPANESE
(4). Continued development of basic oral communication skills as required in a variety of social contexts. Initial development of reading skills. Native and/or bilingual speakers of Japanese will not receive credit for JPN 211, JPN 212, JPN 213. Lec/lab/rec. PREREQS: JPN 113 [D-] and /or placement.

JPN 212. SECOND-YEAR JAPANESE
(4). Continued development of basic oral communication skills as required in a variety of social contexts. Initial development of reading skills. Native and/or bilingual speakers of Japanese will not receive credit for JPN 211, JPN 212, JPN 213. Lec/lab/rec. PREREQS: JPN 211 [D-] and /or placement.
JPN 213. SECOND-YEAR JAPANESE
(4). Continued development of basic oral communication skills as required in a variety of social contexts. Initial development of reading skills. Native and/or bilingual speakers of Japanese will not receive credit for JPN 211, JPN 212, JPN 213. Completion of JPN 213 with a grade of C - or better satisfies BA requirement in foreign languages. Lec/rec. PREREQS: JPN 212 [D-] and /or placement.

JPN 299. SPECIAL STUDIES (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.
JPN 311. THIRD-YEAR JAPANESE (3).
Continued development of oral communication skills as required in a variety of social contexts.

Further development of reading skills. Lec/lab/ rec. PREREQS: JPN 213 or placement and departmental approval.
JPN 312. THIRD-YEAR JAPANESE (3). Continued development or oral communication skills as required in a variety of social contexts Further development of reading skills. Lec/lab/ rec. PREREQS: JPN 311 or placement and departmental approval.

## JPN 313. THIRD-YEAR JAPANESE (3)

Continued development or oral communication skills as required in a variety of social contexts. Further development of reading skills. Lec/ rec. PREREQS: JPN 312 or placement and departmental approval.
JPN 329. SPECIAL TOPICS IN LANGUAGE, CULTURE, OR LITERATURE (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.
JPN 331. *JAPANESE CULTURE (3). An introductory survey of Japanese history, arts, literature, society, and traditions from the ancient to the mid-19th century. Taught in English. JPN 331, JPN 332, JPN 333 need not be taken in order. May not be offered every year. (NC) (Bacc Core Course) PREREQS: Sophomore standing.
JPN 332. *JAPANESE CULTURE (3). An introductory survey of Japanese history, arts, literature society, and traditions from the ancient to the mid-19th century. Taught in English. JPN 331, JPN 332, JPN 333 need not be taken in order. May not be offered every year. (NC) (Bacc Core Course) PREREQS: Sophomore standing.

JPN 333. *JAPANESE CULTURE (3). A survey of Japan from the mid-19th century to the present in areas including arts, literature, business, education, society, politics, and foreign relations. Taught in English. JPN 331, JPN 332, JPN 333 need not be taken in order. May not be offered every year. (NC) (Bacc Core Course) PREREQS: Sophomore standing.

JPN 345. MULTIMODAL LITERACIES:
JAPANESE (2). Introduction to the analysis and production of multimodal literacies. Study of semiotic resources such as language and images across modalities such as film, manga, and social media. Required of all majors in World Languages and Cultures. Taught in Japanese. Has to be taken in conjunction with the lecture session in English.
PREREQS: JPN 213 COREQS: WLC 345
JPN 379. PROCTOR EXPERIENCE (1-2). Supervised practicum for advanced students, with assignment as proctor or tutor in lower-division Japanese courses. No credit may be used to satisfy requirements for a minor in Japanese Graded P/N. This course is repeatable for a maximum of 6 credits. PREREQS: Completion of third-year Japanese with a minimum 3.00 GPA in that sequence and prior authorization from supervisor.
JPN 388. JAPANESE STUDIES, JAPANESE STUDY CENTER (1-12). May be repeated for credit when topic varies. This course is repeatable for a maximum of 12 credits.
JPN 399. SPECIAL TOPICS (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.
JPN 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
JPN 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

JPN 410. INTERNSHIP (1-15). This course is repeatable for a maximum of 15 credits.

JPN 411. ^FOURTH-YEAR JAPANESE (3). Designed to help students apply grammatical points and expressions that they have learned from the first through the third year. It also stresses further development of reading and writing skills. (Writing Intensive Course) PREREQS: JPN 313 [C] and or equivalent and departmental approval.
JPN 412. FOURTH-YEAR JAPANESE (3).
Further development of conversational, reading, and writing skills. Readings include excerpts from contemporary essays, short stories, novels, plays, and newspaper articles. Not offered every year. PREREQS: JPN 411 or placement and departmental approval.

JPN 413. FOURTH-YEAR JAPANESE (3). Further development of conversational, reading, and writing skills. Readings include excerpts from contemporary essays, short stories, novels, plays, and newspaper articles. Not offered every year. PREREQS: JPN 412 or placement and departmental approval.

JPN 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
JPN 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

## - KOREAN COURSES

KOR 111. FIRST-YEAR KOREAN (4). For students with no prior training in Korean. Basic language skills along with cultural understanding by introducing the history of Hangul, traditional holidays, games, songs, foods and drama. Provides the Korean alphabet (Hangul), basic vocabulary, grammar, listening, speaking, reading, and writing skills. Three areas of focus: (1) reading and writing the Korean alphabet; (2) basic colloquial expressions; and (3) cultural understanding.
KOR 112. FIRST-YEAR KOREAN (4). Basic language skills along with cultural understanding by introducing the history of Hangul, traditional holidays, games, songs, foods and drama. Provides the Korean alphabet (Hangul), basic vocabulary, grammar, listening, speaking, reading, and writing skills. Three areas of concentration: (1) reading and writing the Korean alphabet, (2) basic colloquial expressions, and (3) cultural understanding. PREREQS: KOR 111 [D-]
KOR 113. FIRST-YEAR KOREAN (4). Designed to increase fluency in listening, speaking, reading and writing skills through various topics that are relevant to students' life; sports, health, experiences, housing. Enlarge vocabulary and knowledge of grammar and sentence structure with honorifics, adjectives, connectives, and comparatives. Discuss Korean culture and literature using folk tales. PREREQS: KOR 112 [D-]
KOR 211. SECOND-YEAR KOREAN (4).
Designed to increase fluency in listening, speaking, reading, and writing skills through pragmatic topics necessary for survival in the target language culture. Topic-based lessons consist of model dialogues, narration, vocabulary, grammar and culture corresponding to the level of intermediate low (ACTFL). PREREQS: KOR 113 [D] or Placement Test K113(1) and /or equivalent language proficiency. Students must contact the instructor for placement test (test code K113 with score 70).
KOR 212. SECOND-YEAR KOREAN (4).
Designed to increase fluency in listening, speaking, reading, and writing skills through pragmatic topics necessary for survival in the target language culture. Topic-based lessons consist of model dialogues, narration, vocabulary, grammar, and culture corresponding to the level of Intermediate Mid (ACTFL). Students learn to describe favorite activities, feelings, foods, restaurants, fashions, colors, and physical
appearances. Students also learn to engage in a conversation as well as to write compositions related to daily life, making recommendations, asking for and giving directions, making a telephone call, and writing a recipe. PREREQS: KOR 211 [D] and /or equivalent language proficiency. Students must contact instructor for placement test.
KOR 213. SECOND-YEAR KOREAN (4).
Designed to increase fluency in integrated language skills through pragmatic topics necessary for survival in target language culture. Topic-based lesson consists of model dialogues, narration, vocabulary, grammar and culture corresponding to the intermediate high level. Students will learn to speak in paragraph length conversations; write compositions related to their daily lives, and such social needs as giving suggestions, making appointments and plans, giving descriptions and excuses, asking for and giving advice for a job interview. Visual media makes learning more fun and authentic. Students are required to participate in face-to-face meetings on a regular basis with a weekly partner and the instructor. PREREQS: KOR 212 [D] and /or contact instructor for approval.

## LATIN COURSES

LAT 111. FIRST-YEAR LATIN (4). Basics of the Latin language, including grammar, syntax, and vocabulary for the purpose of reading and understanding Latin texts.
LAT 112. FIRST-YEAR LATIN (4). Continues to introduce students to the basics of the Latin language, including grammar, syntax, and vocabulary for the purpose of reading and understanding Latin texts. PREREQS: LAT 111 [C-]
LAT 113. FIRST-YEAR LATIN (4). Continues to introduce students to the basics of the Latin language, including grammar, syntax, and vocabulary for the purpose of reading and understanding Latin texts. PREREQS: LAT 112 [C-]

## - LINGUISTICS COURSES

LING 111. CLASSROOM STUDY OF A LESS COMMONLY TAUGHT LANGUAGE (4). Beginning classroom-based instruction of a language otherwise not taught at OSU. Skill areas addressed include reading, writing, speaking, listening and culture. Not for students who have previous proficiency in the target language. May be repeated for credit for different languages. For a master-apprentice approach, enroll instead in the LING 114, LING 115, LING 116 sequence. This course is repeatable for a maximum of 12 credits. PREREQS: LING 111, LING 112, LING 113 must be taken in sequence.
LING 112. CLASSROOM STUDY OF A LESS COMMONLY TAUGHT LANGUAGE (4).
Beginning classroom-based instruction of a language otherwise not taught at OSU. Skill areas addressed include reading, writing, speaking, listening and culture. Not for students who have previous proficiency in the target language. May be repeated for credit for different languages. For a master-apprentice approach, enroll instead in the LING 114, LING 115, LING 116 sequence. This course is repeatable for a maximum of 12 credits. PREREQS: LING 111, LING 112, LING 113 must be taken in sequence.
LING 113. CLASSROOM STUDY OF A LESS COMMONLY TAUGHT LANGUAGE (4).
Beginning classroom-based instruction of a language otherwise not taught at OSU. Skill areas addressed include reading, writing, speaking, listening and culture. Not for students who have previous proficiency in the target language. May be repeated for credit for different languages. For a master-apprentice approach, enroll instead in the LING 114, LING 115, LING 116 sequence. This course is repeatable for a maximum of 12 credits. PREREQS: LING 111, LING 112, LING

## 113 must be taken in sequence.

LING 114. MASTER/APPRENTICE STUDY OF A LESS COMMONLY TAUGHT LANGUAGE (1-4), LING 114, LING 115, and LING 116 provides context-rich beginning language instruction, in close collaboration with a native speaker, of a language otherwise not taught at OSU. Learners work toward a level of communicative proficiency approaching the intermediate low level in each of the primary skill areas. Four credits of one language are required before moving on to the next course in the sequence. May be repeated for credit for up to three languages. Not for students who have previous proficiency in the target language. This course is repeatable for a maximum of 12 credits.
LING 115. MASTER/APPRENTICE STUDY OF A LESS COMMONLY TAUGHT LANGUAGE (1-4). LING 114, LING 115, and LING 116 provides context-rich beginning language instruction, in close collaboration with a native speaker, of a language otherwise not taught at OSU. Learners work toward a level of communicative proficiency approaching the intermediate low level in each of the primary skill areas. Four credits of one language are required before moving on to the next course in the sequence. May be repeated for credit for up to three languages. Not for students who have previous proficiency in the target language. This course is repeatable for a maximum of 12 credits.

LING 116. MASTER/APPRENTICE STUDY OF A LESS COMMONLY TAUGHT LANGUAGE (1-4). LING 114, LING 115, and LING 116 provides context-rich beginning language instruction, in close collaboration with a native speaker, of a language otherwise not taught at OSU. Learners work toward a level of communicative proficiency approaching the intermediate low level in each of the primary skill areas. Four credits of one language are required before moving on to the next course in the sequence. May be repeated for credit for up to three languages. Not for students who have previous proficiency in the target language. This course is repeatable for a maximum of 12 credits.
LING 199. SPECIAL TOPICS (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

## LING 208. *WESTERN CULTURE STUDY

 ABROAD (3). Overseas study of the history and contemporary form of important features of Western culture. Based on at least 10 weeks of studying abroad. CROSSLISTED as ANTH 208. (Bacc Core Course) PREREQS: Must be arranged with instructor prior to registration. Simultaneous enrollment in Study Abroad program.LING 209. *CULTURAL DIVERSITY STUDY ABROAD (3). Overseas study of non-Western cultures. Based on at least 10 weeks of studying abroad. CROSSLISTED as ANTH 209. (Bacc Core Course) PREREQS: Must be arranged with instructor prior to registration. Must also be enrolled in the Study Abroad program.
LING 251. *LANGUAGES OF OREGON (3). Basic lessons in languages spoken in Oregon's minority language communities presented by native informants; discussion, language analysis, and assessment facilitated by linguistics faculty. Languages presented will vary. (Bacc Core Course)
LING 299. SPECIAL TOPICS (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.
LING 359. SELECTED TOPICS IN LINGUISTICS (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year This course is repeatable for a maximum of 16
credits.
LING 399. SPECIAL TOPICS (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.
LING 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
LING 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

LING 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required
LING 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
LING 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

LING 410. INTERNSHIP (1-15). This course is repeatable for a maximum of 16 credits.
LING 451. GENERAL LINGUISTICS (3). Language systems; comparative philology; historical, descriptive, and structural linguistics; semantics; phonetics and phonemics. Not offered every year. PREREQS: 9 credits upper-division foreign language training or equivalent.
LING 499. SPECIAL TOPICS (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.
LING 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
LING 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

LING 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.
LING 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
LING 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

LING 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

LING 510. INTERNSHIP (1-15). This course is repeatable for a maximum of 15 credits. PREREQS: Departmental approval required.
LING 545. METHODS AND MATERIALS FOR SECOND LANGUAGE ACQUISITION (4).
Historical and contemporary approaches to teaching and assessment in the second language classroom; emphasis on evaluating second language teaching methods and materials. PREREQS: Departmental approval required.
LING 551. GENERAL LINGUISTICS (3). Language systems; comparative philology; historical, descriptive, and structural linguistics; semantics; phonetics and phonemics. Not offered every year. PREREQS: 9 credits upper-division foreign language training or equivalent.
LING 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## ■ PORTUGUESE COURSES

PORT 111. FIRST-YEAR PORTUGUESE (4).
Introduction to fundamental communication skills: listening, speaking, reading, and writing. Introduction to the cultures of Portuguese
speaking countries. Exploration of history, current events, film, literature, and music. Intended for students without prior training.
PORT 112. FIRST-YEAR PORTUGUESE (4).
Further development of fundamental
communication skills: listening, speaking,
reading, and writing. Introduction to the cultures of Portuguese speaking countries. Exploration of history, current events, film, literature, and music. PREREQS: PORT 111 [C-] and or placement test or equivalent.
PORT 113. FIRST-YEAR PORTUGUESE (4).
Further continuation of fundamental
communication skills: listening, speaking,
reading, and writing. Introduction to the cultures of Portuguese speaking countries. Exploration of history, current events, film, literature, and music. PREREQS: PORT 112 [C-] and or placement test or equivalent.

## ■ QUEER STUDIES COURSES

QS 262. *INTRODUCTION TO QUEER
STUDIES (3). Centering itself on activism and scholarship, this course examines homophobia's and transphobia's relationship with racism, colonialism, sexism, ableism, classism and other forms of oppression. Introduces key concepts, histories, and political frameworks within Lesbian, Gay, Bisexual, Transgender, and Queer political movements. (Bacc Core Course) CROSSLISTED as WGSS 262.

## QS 262H. *INTRODUCTION TO QUEER

STUDIES (3). Centering itself on activism and scholarship, this course examines homophobia's and transphobia's relationship with racism, colonialism, sexism, ableism, classism and other forms of oppression. Introduces key concepts, histories, and political frameworks within Lesbian, Gay, Bisexual, Transgender, and Queer political movements. (Bacc Core Course) CROSSLISTED as WGSS 262H. PREREQS: Honors College approval required.

QS 299. SPECIAL TOPICS (3). This course is repeatable for a maximum of 9 credits.

QS 321. *QUEER POP CULTURE (3). Examines the concept of Queer popular culture through film, music, TV, image, and other mediums. Seeks to disrupt dominant discourses around gender and sexuality by centralizing women of color feminisms and queer of color critiques to analyze popular representations of gender, sexuality, race, class, disability, and other social locations. CROSSLISTED as WGSS 321. (Bacc Core Course)
QS 364. *TRANSGENDER POLITICS (3). Addresses transgender politics--including transsexual, genderqueer, and gender nonconforming issues--through feminist and intersectional approaches by analyzing transgender theories, arts, and activism. (Bacc Core Course) CROSSLISTED as WGSS 364. PREREQS: Sophomore standing.

QS 364H. *TRANSGENDER POLITICS (3).
Addresses transgender politics--including transsexual, genderqueer, and gender nonconforming issues--through feminist and intersectional approaches by analyzing transgender theories, arts, and activism. (Bacc Core Course) CROSSLISTED as WGSS 364H. PREREQS: Sophomore standing. Honors College approval required.

QS 375. *ARTS AND SOCIAL JUSTICE (4). Explores concepts of structural inequality, difference, power, and discrimination through a critical survey of arts activism. Students will think critically about artwork and artists which address a number of social issues in the United States, including race, ethnicity, class, gender, sexuality, immigration, and indigeneity. CROSSLISTED as ES 375, WGSS 375.
QS 399. SPECIAL TOPICS IN QUEER STUDIES
(3). This course is repeatable for a maximum of

12 credits.
QS 409. PRACTICUM: PROJECTS IN QUEER STUDIES (1-12). Capstone projects bring theory into practice through research, design, and implementation of a project that synthesizes and demonstrates learning in the Queer Studies program. This course is repeatable for a maximum of 12 credits. PREREQS: Junior or senior standing.

QS 431. *QUEER OF COLOR CRITIQUES (4). "Queer of color critiques" refers to political theories and activism that emerge from LGBTQ people of color to examine the intersections between race, sexuality and gender. This course addresses these intersections through theory, history, and activism. (Bacc Core Course) CROSSLISTED as ES 431 and WGSS 431. PREREQS: Junior standing.
QS 432. *GENDER, SEXUALITY, AND THE PHOTOGRAPHIC IMAGE (3). A creative and discussion-based course focusing on ways in which photography can and has addressed issues of gender and sexuality. An introduction to key concepts and intersections in Women's, Gender and Sexuality Studies; Queer Studies and photography theory. Students will create written and photographic responses to artworks, texts, personal experience and pop-culture. (Bacc Core Course) PREREQS: Junior or senior standing.
QS 462. *QUEER THEORIES (4). Engages key themes and critical frameworks in queer theories. Topics include histories of sexuality; forms of oppression, including heterosexism, homophobia, and transphobia; resistance to oppression; violence against LGBTQ people; queer activism; diverse experiences of sexuality; and representations in literature, art, and popular media. (Bacc Core Course) CROSSLISTED as WGSS 462/WGSS 562.

QS 472. ${ }^{\wedge}$ INDIGENOUS TWO-SPIRIT AND QUEER STUDIES (3). "Two-spirit" refers to North American indigenous genders outside of European male/female binaries. Two-spirit communities argue for decolonization as a central political struggle, calling all people to unlearn settler colonial gender/sexuality on Native land. This course addresses indigenous two-spirit/ GLBTQ issues through theory, literature, activism, and art. CROSSLISTED as ES 472, WGSS 472 (Writing Intensive Course) PREREQS: QS 262 or ES 242 or WGSS 414 or instructor permission

QS 473. TRANSGENDER LIVES (3). Many people in our Western cultures perceive gender as bimodal and fixed from birth. Individuals whose identity of self does not match the individual's biological sex face significant social pressures to conform to gender norms. Students will be introduced to the biological, social and cultural contexts for transgendered individuals CROSSLISTED as WGSS 473/WGSS 573. PREREQS: 200-level WGSS or QS course or equivalent, or consent of instructor.

QS 476. *TRANSNATIONAL SEXUALITIES (4). Explores contemporary experiences of sexualities within transnational contexts. Analyzes themes including queer and LGBTQI organizing, samesex desires, queer transnational immigration and labor flows, sex industries and discourses of trafficking, sex tourism, and reproductive justice, using feminist, queer, and postcolonial theoretical frameworks. (Bacc Core Course) CROSSLISTED as WGSS 476/WGSS 576. PREREQS: QS 262 [D-]
QS 477. QUEER/TRANS PEOPLE OF COLOR ARTS AND ACTIVISM (4). LGBTQ people of color often engage struggles for social justice through artistic movements. This course will focus on arts by LGBTQ people of color and the way these artistic movements contribute to activism that interrupts interlocking systems of oppression. CROSSLISTED as ES 477/ES 577, WGSS 477/ WGSS 577. PREREQS: QS 262 and QS 462

QS 499. SPECIAL TOPICS IN QUEER STUDIES (4). Topics in gay, lesbian, bisexual, transgender,
and queer issues and scholarship. May be repeated for credit when topic varies. This course is repeatable for a maximum of 12 credits.

QS 524. TRANS/GENDER POLITICS (4). Addresses transgender politics--including transsexual, genderqueer, and gender nonconforming issues--through feminist and intersectional approaches by analyzing transgender theories, arts, and activism CROSSLISTED as WGSS 524. PREREQS: Graduate student standing.
QS 531. QUEER OF COLOR CRITIQUES (4) "Queer of color critiques" refers to political theories and activism that emerge from LGBTQ people of color to examine the intersections between race, sexuality and gender. This course addresses these intersections through theory, history, and activism. CROSSLISTED as ES 531 and WGSS 531. PREREQS: Junior standing
QS 532. GENDER, SEXUALITY, AND THE PHOTOGRAPHIC IMAGE (3). A creative and discussion-based course focusing on ways in which photography can and has addressed issues of gender and sexuality. An introduction to key concepts and intersections in Women's, Gender and Sexuality Studies; Queer Studies and photography theory. Students will create written and photographic responses to artworks, texts, personal experience and pop-culture. CROSSLISTED as ART 532, WGSS 532. PREREQS: Junior or senior standing.

QS 562. QUEER THEORIES (4). Engages key themes and critical frameworks in queer theories. Topics include histories of sexuality; forms of oppression, including heterosexism, homophobia, and transphobia; resistance to oppression; violence against LGBTQ people; queer activism; diverse experiences of sexuality; and representations in literature, art, and popular media. CROSSLISTED as WGSS 462/WGSS 562 PREREQS: Junior standing.
QS 569. TOPICS IN JOTERIA STUDIES (3). A space for engaging with arts, activism and scholarship emerging from queer Latin@/ Chican@ experiences and consciousness is provided. Offered winter term in odd years. CROSSLISTED as ES 569, SPAN 569, WGSS 569. This course is repeatable for a maximum of 6 credits. PREREQS: Instructor approval.

## QS 572. INDIGENOUS TWO-SPIRIT AND

 QUEER STUDIES (3). "Two-spirit" refers to North American indigenous genders outside of European male/female binaries. Two-spirit communities argue for decolonization as a central political struggle, calling all people to unlearn settler colonial gender/sexuality on Native land This course addresses indigenous two-spirit/ GLBTQ issues through theory, literature, activism, and art. CROSSLISTED as ES 572, WGSS 572 PREREQS: QS 262 or ES 242 or WGSS 414 or WGSS 514 or instructor permissionQS 573. TRANSGENDER LIVES (3). Many
people in our Western cultures perceive gender as bimodal and fixed from birth. Individuals whose identity of self does not match the individual's biological sex face significant social pressures to conform to gender norms. Students will be introduced to the biological, social and cultural contexts for transgendered individuals CROSSLISTED as WGSS 473/WGSS 573. PREREQS: 200-level WGSS or QS course or equivalent, or consent of instructor.
QS 576. TRANSNATIONAL SEXUALITIES (4). Explores contemporary experiences of sexualities within transnational contexts. Analyzes themes including queer and LGBTQI organizing, samesex desires, queer transnational immigration and labor flows, sex industries and disclosures of trafficking, sex tourism, and reproductive justice, using feminist, queer, and postcolonial theoretical frameworks. CROSSLISTED as WGSS 476/ WGSS 576. PREREQS: QS 262

QS 577. QUEER/TRANS PEOPLE OF COLOR

ARTS AND ACTIVISM (4). LGBTQ people of color often engage struggles for social justice through artistic movements. This course will focus on arts by LGBTQ people of color and the way these artistic movements contribute to activism that interrupts interlocking systems of oppression. CROSSLISTED as ES 477/ES 577, WGSS 477/ WGSS 577. PREREQS: QS 262 and QS 462

QS 599. SPECIAL TOPICS IN QUEER STUDIES (4). Topics in gay, lesbian, bisexual, transgender, and queer issues and scholarship. May be repeated for credit when topic varies. This course is repeatable for a maximum of 12 credits.

RUS 111. FIRST-YEAR RUSSIAN (4).
Pronunciation, intonation, grammar, reading, writing, listening comprehension and conversation. Designed for students with no prior training in Russian. Native and/or bilingual speakers of Russian will not receive credit for RUS 111, RUS 112, RUS 113. PREREQS: RUS 111, RUS 112, RUS 113 must be taken in order.

## ■ RUSSIAN COURSES

RUS 112. FIRST-YEAR RUSSIAN (4),
Pronunciation, intonation, grammar, reading, writing, listening comprehension and conversation. Designed for students with no prior training in Russian. Native and/or bilingual speakers of Russian will not receive credit for RUS 111, RUS 112, RUS 113. PREREQS: RUS 111 [D-]

## RUS 113. FIRST-YEAR RUSSIAN (4).

Pronunciation, intonation, grammar, reading, writing, listening comprehension and conversation. Designed for students with no prior training in Russian. Native and/or bilingual speakers of Russian will not receive credit for RUS 111, RUS 112, RUS 113. PREREQS: RUS 112 [D-]

RUS 199. SPECIAL STUDIES (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.
RUS 211. SECOND-YEAR RUSSIAN (4).
Further development of listening comprehension, speaking, reading, and writing skills. Native and/or bilingual speakers of Russian will not receive credit for RUS 211, RUS 212, RUS 213. PREREQS: RUS 113 [D-] and /or placement. RUS 211, RUS 212, RUS 213 must be taken in order.
RUS 212. SECOND-YEAR RUSSIAN (4).
Further development of listening comprehension, speaking, reading, and writing skills. Native and/or bilingual speakers of Russian will not receive credit for RUS 211, RUS 212, RUS 213. PREREQS: RUS 211 [D-] and /or placement.
RUS 213. SECOND-YEAR RUSSIAN (4).
Further development of listening comprehension, speaking, reading, and writing skills. Native and/or bilingual speakers of Russian will not receive credit for RUS 211, RUS 212, RUS 213. Completion of RUS 213 with a grade of C- or better satisfies BA requirement in foreign languages. PREREQS: RUS 212 [D-] and /or placement.

RUS 231. *RUSSIAN CULTURE (3). Introduction to basic features of Russian culture originating in the past and continuing into the present. Aspects of history, politics, economics, geography, art, music, literature, and everyday life. Compares Russian culture with Western European and American culture. SPANISH (2). An examination of the history of Western imperialism and the rise of contemporary neocolonialism. Students explore the impact of colonization and the effects of neoliberalism and globalization in this Spanish discussion section through the use of historical source materials and current news articles focused on specific regions of the developing world. This is a required course in the Spanish option of the WLC major in the Social Architecture and Power thematic area. PREREQS: Third-year proficiency in Spanish. COREQS: WLC 376
SPAN 379. PROCTOR EXPERIENCE (1).
Supervised practicum for advanced students, with assignments as proctors or tutors in lower-division Spanish language courses. No more than 2 credits may be used to satisfy degree requirements for a major in Spanish; no credit may be used to satisfy requirements for a minor in Spanish. Graded P/N. This course is repeatable for a maximum of 3 credits. PREREQS: Completion of 21 upperdivision credits in Spanish with a minimum 3.00 GPA.
SPAN 388. HISPANIC STUDIES, HISPANIC STUDY CENTERS (1-12). Section 1:Topics, Hispanic language. Section 2: Practical work (exercises). Section 3: Topics, Hispanic arts and letters. Section 4: Topics, Hispanic society. This course is repeatable for a maximum of 12 credits.
SPAN 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
SPAN 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required
SPAN 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
SPAN 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required
SPAN 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
SPAN 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
SPAN 410. INTERNSHIP (1-15). This course is repeatable for a maximum of 15 credits.
SPAN 411. SPECIALIZED GRAMMAR OR LINGUISTICS TOPICS (3). Students develop an in-depth knowledge of various linguistic aspects of Spanish, particularly in regard to problematic grammatical structures and the development of writing proficiency. The main focus is on integrating a thorough understanding of grammatical structures into writing using selected literary works as models. Students analyze their own linguistic progress and apply this metaknowledge to their writing. PREREQS: 18 credits of upper-division Spanish.

SPAN 412. ADVANCED COMPOSITION (3)
Emphasis on creative writing. Students will read and discuss a series of stories with the same theme, then write their own. The subjunctive and other advanced grammar topics will be reviewed and incorporated into the writing activities. Taught in Spanish. PREREQS: 18 credits of upperdivision Spanish or instructor approval.

## SPAN 413. ADVANCED COMMUNICATION

 SKILLS (3). Contextualized exploration of skills outlined in the National Standards Project's PREREQS: 18 credits of upper-division Spanish or instructor approval.
## SPAN 435. SPECIAL TOPICS IN LATIN

AMERICAN CULTURE (3). Historical and contemporary aspects of the cultures of Latin America. May include material relevant to Spain and U.S. Latinos. See Schedule of Classes for current term offering. May be repeated for credit when topic varies. This course is repeatable for a maximum of 9 credits. PREREQS: 18 credits of upper-division Spanish or instructor approval.
SPAN 438. ^SELECTED TOPICS IN LUSO-
HISPANIC CULTURE (3). Contemporary aspects of the cultures of Spain, Portugal, or Latin America with a cross-cultural perspective. Topics and language of instruction vary. See Schedule of Classes for current term offering. May be repeated for credit when topic varies. (Writing Intensive Course) This course is repeatable for a maximum of 9 credits. PREREQS: Completion of 6 credits from SPAN 331, SPAN 332, SPAN 333, SPAN 336, SPAN 337, SPAN 338.

## SPAN 439. ^TOPICS IN MEXICAN CULTURE

 AS EVIDENCED THROUGH MEXICAN FILM (3). Critical analysis and evaluation of films as cultural texts that open up a window into Mexican society. Movies with strong sexual content, explicit violence, language, and/or drug use will be viewed in the class. Taught in Spanish with some readings in English. May be repeated for credit when topic varies. Not offered every year. (Writing Intensive Course) This course is repeatable for a maximum of 9 credits. PREREQS: Course is designed for Spanish heritage learners and advanced students of Spanish as a second language who have completed 12 credits from SPAN 316, SPAN 317, SPAN 318, SPAN 331, SPAN 332, SPAN 333, SPAN 336, SPAN 337, SPAN 338, SPAN 339, SPAN 411, SPAN 412, SPAN 413 with a grade of $B$ - or better.SPAN 441. CONTEMPORARY SHORT STORY (3). An exploration and comparison of the short story in its various manifestations across the Spanish-speaking world in the 20th and 21st centuries. Themes such as identity, discrimination, class conflict, language, power, resistance, and marginalization will be analyzed within the sociohistorical contexts in which the literary works were created. PREREQS: At least 12 credits of upperdivision Spanish

## SPAN 445. SELECTED TOPICS IN THE

LITERATURE OF LATIN AMERICA (3).
Representative prose, poetry, and drama of Spanish America and/or Brazil, with an emphasis on the mid-19th century to the present. Topics and language of instruction may vary. See Schedule of Classes for current term offering. May be repeated for credit when topic varies. Not offered every year. This course is repeatable for a maximum of 18 credits. PREREQS: Completion of 21 upperdivision credits in Spanish.
SPAN 446. RECENT LATIN AMERICAN
LITERATURE (3). Recent fiction that goes beyond

Magical Realism. Discussion includes literary techniques, as well as Latin American history, politics and cultural values. Taught in Spanish. PREREQS: Completion of 21 upper-division credits of Spanish.
SPAN 447. MEXICAN WOMEN WRITERS
(3). Fiction by contemporary Mexican women, emphasizing how the writing reflects the authors lives, as well as Mexican history, politics and cultural values. Taught in Spanish. PREREQS: Completion of 21 upper-division credits of Spanish.
SPAN 448. LATIN AMERICAN GREAT WORKS
(3). Major works by Latin American writers, concentrating on literary style and technique, as well as Latin American history, politics and culture. Taught in Spanish. PREREQS: Completion of 21 upper-division credits of Spanish.
SPAN 453. SPANISH SOCIOLINGUISTICS (3). Provides a foundation of sociolinguistic theory from which various topics can be analyzed, discussed and applied to language situations that are specific to Spanish. These include language contact, Spanish varieties, language policy, and anguage attitudes. All topics are presented within the context of speech communities and the external and internal variables that affect these communities. PREREQS: SPAN 350 [C-]

## SPAN 455. INTRODUCTION TO SPANISH

 TRANSLATION (3). Combines beginning translation theory with hands-on practice using a variety of activities from several areas of professional specialization. Includes a brief introduction to simultaneous interpretation as it is done in professional conference or broadcast media settings. Participants must be highly proficient in both English and Spanish. PREREQS: 12 credits of upper-division Spanish.
## SPAN 456. SPANISH IN THE UNITED STATES

(3). Provides a foundation for the study of Spanish in the United States. Focuses on the diverse identities of Latino/as and Spanish speakers as they define what it means to be bilingual locally, regionally, and nationally. Spanish and SpanishEnglish bilingualism will be studied from critical sociolinguistic, historical and political perspectives PREREQS: SPAN 350 [C-]
SPAN 461. FIFTH-YEAR SPANISH (3). Continued development of listening comprehension, speaking, and writing skills. Introduction to debate and platform speaking in Spanish, and to specialized interests of students, e.g., methods and philosophies of interpretation and translation, business Spanish, creative writing. PREREQS: SPAN 413 or placement, and departmental approval required. SPAN 461, SPAN 462, SPAN 463 must be taken in order.

SPAN 462. FIFTH-YEAR SPANISH (3). Continued development of listening comprehension, speaking, and writing skills. Introduction to debate and platform speaking in Spanish, and to specialized interests of students, e.g., methods and philosophies of interpretation and translation, business Spanish, creative writing. PREREQS: SPAN 461 or placement, and departmental approval required.
SPAN 463. FIFTH-YEAR SPANISH (3). Continued development of listening comprehension, speaking, and writing skills. Introduction to debate and platform speaking in Spanish, and to specialized interests of students, e.g., methods and philosophies of interpretation and translation, business Spanish, creative writing. PREREQS: SPAN 462 or placement, and departmental approval required.

## SPAN 470. *ADVANCED SPANISH

COORDINATED STUDIES (1-30). Interdisciplinary examination of a topic related to points of contact between Spanish- and English-speaking populations in Oregon and beyond. Includes the study of literature, culture, language skills, and a service-learning component. Constitutes a fulltime course load. Taught in Spanish. (Bacc Core

Course) This course is repeatable for a maximum of 30 credits.

SPAN 488. HISPANIC STUDIES, HISPANIC STUDY CENTERS (1-12). Section 1: Topics, Hispanic language. Section 2: Practical work (exercises). Section 3: Topics, Hispanic arts and letters. Section 4: Topics, Hispanic society. This course is repeatable for a maximum of 12 credits.

SPAN 499. SPECIAL TOPICS (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course s repeatable for a maximum of 99 credits.
SPAN 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
SPAN 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits PREREQS: Departmental approval required.

SPAN 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.
SPAN 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
SPAN 506. SPECIAL PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

SPAN 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
SPAN 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.
SPAN 510. INTERNSHIP (1-15). This course is repeatable for a maximum of 15 credits.
SPAN 511. SPECIALIZED GRAMMAR OR LINGUISTICS TOPICS (3). Students develop an in-depth knowledge of various linguistic aspects of Spanish, particularly in regard to problematic grammatical structures and the development of writing proficiency. The main focus is on integrating a thorough understanding of grammatical structures into writing using selected literary works as models. Students analyze their own linguistic progress and apply this metaknowledge to their writing. PREREQS: 18 credits of upper-division Spanish.
SPAN 512. ADVANCED COMPOSITION (3).
Emphasis on creative writing. Students will read and discuss a series of stories with the same theme, then write their own. The subjunctive and other advanced grammar topics will be reviewed and incorporated into the writing activities. Taught in Spanish. PREREQS: 18 credits of upperdivision Spanish or instructor approval.
SPAN 513. ADVANCED COMMUNICATION
SKILLS (3). Contextualized exploration of skills outlined in the National Standards Project's PREREQS: 18 credits of upper-division Spanish or instructor approval.

## SPAN 535. SPECIAL TOPICS IN LATIN

AMERICAN CULTURE (3). Historical and
contemporary aspects of the cultures of Latin America. May include material relevant to Spain and U.S. Latinos. See Schedule of Classes for current term offering. May be repeated for credit when topic varies. This course is repeatable for a maximum of 9 credits. PREREQS: 18 credits of upper-division Spanish or instructor approval.

## SPAN 538. SELECTED TOPICS IN LUSO-

HISPANIC CULTURE (3). Contemporary aspects of the cultures of Spain, Portugal, or Latin America with a cross-cultural perspective. Topics and language of instruction vary. Not offered every year. See Schedule of Classes for current term offering. May be repeated for credit when topic varies. This course is repeatable for a maximum of 9 credits. PREREQS: Completion of 6 credits from SPAN 331, SPAN 332, SPAN 333 , SPAN 336 ,

SPAN 337, SPAN 338
SPAN 544. SELECTED TOPICS IN THE LITERATURE OF SPAIN (3). Representative Spanish prose, poetry, and drama, with an emphasis on the 19th and 20th centuries. Taught in Spanish. Not offered every year. See Schedule of Classes for current term offering. May be repeated for credit when topic varies. This course is repeatable for a maximum of 12 credits. PREREQS: Completion of 21 upper-division credits in Spanish.

## SPAN 545. SELECTED TOPICS IN THE

LITERATURE OF LATIN AMERICA (3).
Representative prose, poetry, and drama of Spanish America and/or Brazil, with an emphasis on the mid-19th century to the present. Topics and language of instruction may vary. Not offered every year. See Schedule of Classes for current term offering. May be repeated for credit when topic varies. This course is repeatable for a maximum of 18 credits. PREREQS: Completion of 21 upperdivision credits in Spanish.

## SPAN 546. RECENT LATIN AMERICAN

LITERATURE (3). Recent fiction that goes beyond Magical Realism. Discussion includes literary techniques, as well as Latin American history, politics and cultural values. Taught in Spanish. PREREQS: Completion of 21 upper-division credits in Spanish.

## SPAN 547. MEXICAN WOMEN WRITERS

(3). Fiction by contemporary Mexican women, emphasizing how the writing reflects the authors lives, as well as Mexican history, politics and cultural values. Taught in Spanish. PREREQS: 21 upper-division credits of Spanish.

## SPAN 548. LATIN AMERICAN GREAT WORKS

(3). Major works by Latin American writers, concentrating on literary style and technique, as well as Latin American history, politics and culture. Taught in Spanish. PREREQS: 21 upper-division credits of Spanish

## SPAN 552. INTRODUCTION TO SPANISH

SOCIOLINGUISTICS (3). Provides a foundation of sociolinguistic theory in order to analyze, discuss and apply the theory to Spanish language situations, such as language contact, Spanish varieties, language politics, and language attitudes; all within the context of a speech community and the external and internal variables that affect it.
SPAN 553. SPANISH SOCIOLINGUISTICS (3).
Provides a foundation of sociolinguistic theory from which various topics can be analyzed, discussed and applied to language situations that are specific to Spanish. These include language contact, Spanish varieties, language policy, and language attitudes. All topics are presented within the context of speech communities and the external and internal variables that affect these communities. PREREQS: SPAN 350

## SPAN 555. INTRODUCTION TO SPANISH

TRANSLATION (3). Combines beginning translation theory with hands-on practice using a variety of activities from several areas of professional specialization. Includes a brief introduction to simultaneous interpretation as it is done in professional conference or broadcast media settings. Participants must be highly proficient in both English and Spanish. PREREQS: 12 credits of upper-division Spanish.

## SPAN 556. SPANISH IN THE UNITED STATES

(3). Provides a foundation for the study of Spanish in the United States. Focuses on the diverse identities of Latino/as and Spanish speakers as they define what it means to be bilingual locally, regionally, and nationally. Spanish and SpanishEnglish bilingualism will be studied from critical sociolinguistic, historical and political perspectives PREREQS: SPAN 350
SPAN 561. FIFTH-YEAR SPANISH (3). Continued development of listening comprehension,
speaking, and writing skills. Introduction to debate and platform speaking in Spanish, and to
specialized interests of students, e.g., methods and philosophies of interpretation and translation, business Spanish, creative writing. PREREQS: SPAN 413 or placement, and departmental authorization. SPAN 561, SPAN 562, SPAN 563 must be taken in order.
SPAN 562. FIFTH-YEAR SPANISH (3). Continued development of listening comprehension, speaking, and writing skills. Introduction to debate and platform speaking in Spanish, and to specialized interests of students, e.g., methods and philosophies of interpretation and translation, business Spanish, creative writing. PREREQS: SPAN 561 or placement, and departmental authorization.

SPAN 563. FIFTH-YEAR SPANISH (3). Continued development of listening comprehension, speaking, and writing skills. Introduction to debate and platform speaking in Spanish, and to specialized interests of students, e.g., methods and philosophies of interpretation and translation, business Spanish, creative writing. PREREQS: SPAN 562 or placement, and departmental authorization.
SPAN 569. TOPICS IN JOTERIA STUDIES
(3). A space for engaging with arts, activism and scholarship emerging from queer Latin @/ Chican@ experiences and consciousness is provided. Offered winter term in odd years. CROSSLISTED as ES 569, QS 569, WGSS 569. This course is repeatable for a maximum of 6 credits. PREREQS: Instructor approval.

SPAN 570. GRADUATE SPANISH COORDINATED STUDIES (1-15). An intensive, team-taught course in which learners engage in advanced exploration of issues of importance to Spanish-speaking communities in Oregon and facilitate the learning of undergraduate native speaker and second language students. Topics change regularly. The course addresses all communicative areas (reading, writing, speaking and listening) and includes content in the areas of literature, linguistics, culture, civic engagement, and service-learning. Successful completion of the full 15 credits with a grade of $B$ or higher meets requirements for the graduate minor in Contemporary Hispanic Studies. This course is repeatable for a maximum of 30 credits. PREREQS: Completion of SPAN 599, Special Topics: "Developing a Learning Community".
SPAN 588. HISPANIC STUDIES, HISPANIC STUDY CENTERS (1-12). Section 1: Topics, Hispanic language. Section 2: Practical work (exercises). Section 3: Topics, Hispanic arts and letters. Section 4: Topics, Hispanic society.

SPAN 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 99 credits.

SPAN 808. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

## WOMEN, GENDER, AND SEXUALITY STUDIES COURSES

WGSS 199. SPECIAL STUDIES (1-3). Special topics of contemporary relevance to research of women and gender role issues. For students who seek an elementary introduction to a specific realm of women, gender, and sexuality studies. May be repeated for credit when topic varies. This course is repeatable for a maximum of 9 credits.
WGSS 223. *WOMEN: SELF AND SOCIETY (3). Multidisciplinary introduction to women, gender, and sexuality studies. Focuses on the lives and status of women in society and explores ways institutions such as family, work, media, law and religion affect different groups of women. Explores issues of gender, race, class, age, sexual orientation, size and ability. (SS) (Bacc Core Course)
WGSS 223H. *WOMEN: SELF AND SOCIETY (3). Multidisciplinary introduction to women, gender, and sexuality studies. Focuses on the lives and status of women in society and explores
ways institutions such as family, work, media, law and religion affect different groups of women. Explores issues of gender, race, class, age, sexual orientation, size and ability. (SS) (Bacc Core Course) PREREQS: Honors College approval required.
WGSS 224. *WOMEN: PERSONAL AND
SOCIAL CHANGE (3). Examines the way the questioning of traditional gender roles and their accompanying power structures can lead to change in women's personal and public lives. Explores women's heritage and contributions and focuses on issues of self-growth and social movements for change. (SS) (Bacc Core Course)

WGSS 230. *WOMEN IN THE MOVIES (3). Examines ways women are depicted in the movies and how those depictions are created by and create larger social constructions of women. Special attention is given to the intersections of race, class, sexual identity, and age with gender. (Bacc Core Course)

WGSS 230H. *WOMEN IN THE MOVIES (3). Examines ways women are depicted in the movies and how those depictions are created by and create larger social constructions of women. Special attention is given to the intersections of race, class, sexual identity, and age with gender (Bacc Core Course) PREREQS: Honors College approval required.
WGSS 235. *WOMEN IN WORLD CINEMA (3). Explores constructions and practices of gender in a transnational, multi-religious, and global framework by examining a wide variety of films about women around the world. (Bacc Core Course)
WGSS 235H. *WOMEN IN WORLD CINEMA
(3). Explores constructions and practices of gender in a transnational, multi-religious, and global framework by examining a wide variety of films about women around the world. (Bacc Core Course) PREREQS: Honors College approval required.
WGSS 240. *GENDER AND SPORT (3). Focuses on sport as a gendered institution. Drawing from cultural, psychosocial, and political perspectives, the course examines intersections of gender with age, sexual orientation, social class, gender identity, race and ethnicity and politics. (Bacc Core Course)
WGSS 262. *INTRODUCTION TO QUEER
STUDIES (3). Centering itself on activism and scholarship, this course examines homophobia's and transphobia's relationship with racism, colonialism, sexism, ableism, classism and other forms of oppression. Introduces key concepts, histories, and political frameworks within Lesbian, Gay, Bisexual, Transgender, and Queer political movements. (Bacc Core Course) CROSSLISTED as QS 262.

WGSS 262H. *INTRODUCTION TO QUEER
STUDIES (3). Centering itself on activism and scholarship, this course examines homophobia's and transphobia's relationship with racism, colonialism, sexism, ableism, classism and other orms of oppression. Introduces key concepts, histories, and political frameworks within Lesbian, Gay, Bisexual, Transgender, and Queer political movements. (Bacc Core Course) CROSSLISTED as QS 262H. PREREQS: Honors College approval required.

WGSS 270. VIOLENCE AGAINST WOMEN (3).
Addresses issues of domestic violence, rape, dating violence, as well as contemporary social debates about pornography and the media's impact on increasing violence against women. (SS)
WGSS 280. *WOMEN WORLDWIDE (3). Focuses on women's experiences throughout the world and examines women's issues and status crossculturally. (Bacc Core Course)
WGSS 280H. *WOMEN WORLDWIDE (3).
Focuses on women's experiences throughout the
world and examines women's issues and status cross-culturally. (Bacc Core Course) PREREQS: Honors College approval required.
WGSS 295. *FEMINISM AND THE BIBLE (3). Examines feminist interpretations of the Bible and pays special attention to intersections of race, social class, sexual identity, and nation in biblical interpretation. (Bacc Core Course) CROSSLISTED as ENG 295, PHL 295.

WGSS 295H. *FEMINISM AND THE BIBLE (3). Examines feminist interpretations of the Bible and pays special attention to intersections of race, social class, sexual identity, and nation in biblical interpretation. (Bacc Core Course) CROSSLISTED as ENG 295, ENG 295H, PHL 295, PHL 295H.

## WGSS 299. TOPICS IN WOMEN, GENDER,

 AND SEXUALITY STUDIES (1-6). Current topics related to women, gender and sexuality. Description and analysis of different realms of knowledge about gender issues. This course is repeatable for a maximum of 12 credits.WGSS 320. *GENDER AND TECHNOLOGY (3). Explores women's contributions and focuses in technology fields. Analyzes gendered nature of technology. Theory and practice of technologies. (Bacc Core Course)
WGSS 321. *QUEER POP CULTURE (3). Examines the concept of Queer popular culture through film, music, TV, image, and other mediums. Seeks to disrupt dominant discourses around gender and sexuality by centralizing women of color feminisms and queer of color critiques to analyze popular representations of gender, sexuality, race, class, disability, and other social locations. CROSSLISTED as QS 321. (Bacc Core Course)
WGSS 325. *DISNEY: GENDER, RACE, EMPIRE (3). Explores constructions of gender, race, class, sexuality, and nation in the animated films of Walt Disney; introduces concepts in film theory and criticism, and develops analyses of the politics of representation. (Bacc Core Course)

## WGSS 325H. *DISNEY: GENDER, RACE

EMPIRE (3). Explores constructions of gender, race, class, sexuality, and nation in the animated films of Walt Disney; introduces concepts in film theory and criticism, and develops analyses of the politics of representation. (Bacc Core Course) PREREQS: Honors College approval required.

WGSS 340. *GENDER AND SCIENCE (3). Analyzes the relationship between society and science by explaining technology and science as gendered practices and bodies of knowledge. Focuses on the ways the making of women and men affect the making of science and explores the roles of women in scientific pursuits. (SS) (Bacc Core Course)
WGSS 340H. *GENDER AND SCIENCE (3). Analyzes the relationship between society and science by explaining technology and science as gendered practices and bodies of knowledge. Focuses on the ways the making of women and men affect the making of science and explores the roles of women in scientific pursuits. (SS) (Bacc Core Course)
WGSS 350. *POLITICS OF MOTHERHOOD IN A GLOBAL CONTEXT (3). Introduces students to the politics of motherhood in global contexts, focusing on politics of transnational adoption; motherhood, surrogacy, and biotechnologies; effects of globalization on mothering across borders; mothering in the global welfare state; movements for reproductive justice; and transnational representations of motherhood. (Bacc Core Course)
WGSS 360. *MEN AND MASCULINITIES IN A GLOBAL CONTEXT (3). Students will become familiar with central topics in global masculinity studies, analyze texts in diverse media, develop original arguments, and engage with issues of masculinity and representation through written
and creative work. (Bacc Core Course)
WGSS 360 H . *MEN AND MASCULINITIES (3).
Students will become familiar with central topics in global masculinity studies, analyze texts in diverse media, develop original arguments, and engage with issues of masculinity and representation through written and creative work. (Bacc Core Course) PREREQS: Honors College approval required.

WGSS 364. *TRANSGENDER POLITICS
(3). Addresses transgender politics--including transsexual, genderqueer, and gender nonconforming issues--through feminist and intersectional approaches by analyzing transgender theories, arts, and activism. (Bacc Core Course) CROSSLISTED as QS 364 PREREQS: Sophomore standing.
WGSS 364H. *TRANSGENDER POLITICS
(3). Addresses transgender politics--including transsexual, genderqueer, and gender nonconforming issues--through feminist and intersectional approaches by analyzing transgender theories, arts, and activism. (Bacc Core Course) CROSSLISTED as QS 364 H . PREREQS: Sophomore standing. Honors College approval required.
WGSS 373. APPROACHES TO SOCIAL
JUSTICE (3). Students study various ways of thinking about social justice and evaluate these in case studies and current events. As a basis for the Social Justice minor, students write a research paper on the theoretical and practical aspects of a social justice issue. CROSSLISTED as ANTH 373 ES 373, WLC 373.

WGSS 375. *ARTS AND SOCIAL JUSTICE (4). Explores concepts of structural inequality, difference, power, and discrimination through a critical survey of arts activism. Students will think critically about artwork and artists which address a number of social issues in the United States, including race, ethnicity, class, gender, sexuality, immigration, and indigeneity. CROSSLISTED as ES 375, QS 375
WGSS 380. *MUSLIM WOMEN (3). Examines the lives and experiences of Muslim women in Islamic communities around the world from a variety of perspectives in order to highlight issues significant for contemporary Muslim women: family, education, work, politics, health, marriage, divorce, war, and violence. (Bacc Core Course)
WGSS 399. TOPICS IN WOMEN, GENDER, AND SEXUALITY STUDIES (1-6). Current topics in women, gender, and sexuality. May be repeated for credit when topic varies. This course is repeatable for a maximum of 12 credits.

WGSS 399H. TOPICS IN WOMEN, GENDER, AND SEXUALITY STUDIES (1-6). Current topics in women, gender, and sexuality. May be repeated for credit when topic varies. This course is repeatable for a maximum of 12 credits. PREREQS: Honors College approval required.

WGSS 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
WGSS 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
WGSS 407. SEMINAR (3). This course is repeatable for a maximum of 99 credits.
WGSS 409. PRACTICUM (1-12). This course is repeatable for a maximum of 12 credits. PREREQS: Junior or senior standing.
WGSS 410. INTERNSHIP (1-16). The internship experience provides the opportunity to gain experience within an off-campus private, public, or community agency or organization which has as one of its goals the improvement of the status of women in society. Students work with an on-site mentor who guides their field experience in collaboration with the internship coordinator in the WGSS program. Only 6 credits will count
toward the Women, Gender, and Sexuality Studies major. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
WGSS 414. *SYSTEMS OF OPPRESSION IN
WOMEN'S LIVES (4). Explores the ways different systems of oppression and discrimination impact women's lives. Examines sexism, classism, racism, and anti-Jewish oppression, as well as discrimination against queer women, older women, and those who differ in ability and appearance. (SS) (Bacc Core Course) PREREQS: WGSS 223 [D-] or WGSS 223H [D-] and /or instructor approval required.

WGSS 416. THEORIES OF FEMINISM (4).
Explores feminist conceptions about the nature of the world, women's reality and visions for change. Analyzes major issues raised by the women's movement and the development of feminist ideas, as well as provides a critical examination of feminist thought and different theories which comprise it. PREREQS: WS 223 [D-] or WS 223H [D-] or WS 224 [D-] or WGSS 223 [D-] or WGSS 223H [D-] or WGSS 224 [D-] and /or instructor approval required.

WGSS 417. FEMINIST PHILOSOPHIES (3).
Diverse forms of feminist philosophy, including a variety of critiques, especially those based on race and class, with in-depth consideration of selected social issues, such as rape and pornography. CROSSLISTED as PHL 417/PHL 517. PREREQS: 6 credits of philosophy or upper-division standing.

## WGSS 418. FEMINIST RESEARCH METHODS

(4). Introduces feminist research methods associated with research design, analysis, and interpretation. It utilizes feminist social justice frameworks and focuses on in-depth interviewing and focus groups, oral histories, ethnography, and visual and textual analysis, as well as survey design and community-based participatory research. PREREQS: WGSS 414 [C-] and junior standing
WGSS 430. WOMEN OF COLOR FEMINISMS
(4). Explores the contemporary experiences of women of color, as well as the theoretical and practical frameworks of women of color feminisms Analyses key themes in women of color feminisms, including politics of representation, multiple forms of state and interpersonal violence, intersecting forms of oppression, economic justice, reproductive justice, and strategies of resistance. PREREQS: WS 223 [D-] or WS 223H [D-] or WGSS 223 [D-] or WGSS 223 H [D-] and WGSS 223 or WGSS 223H or WS 223 or WS 223H
WGSS 431. *QUEER OF COLOR CRITIQUES
(4). "Queer of color critiques" refers to political theories and activism that emerge from LGBTQ people of color to examine the intersections between race, sexuality and gender. This course addresses these intersections through theory, history, and activism. (Bacc Core Course) CROSSLISTED as ES 431 and QS 431. PREREQS: Junior standing.
WGSS 432. *GENDER, SEXUALITY, AND THE PHOTOGRAPHIC IMAGE (3). A creative and discussion-based course focusing on ways in which photography can and has addressed issues of gender and sexuality. An introduction to key concepts and intersections in Women's, Gender and Sexuality Studies; Queer Studies and photography theory. Students will create written and photographic responses to artworks, texts, personal experience and pop-culture. (Bacc Core Course) CROSSLISTED as ART 432, QS 432 PREREQS: Junior or senior standing.
WGSS 440. *WOMEN AND NATURAL
RESOURCES (3). Explores the relationship between women and natural resources. In particular, the course examines the roles of policy, technology, culture, and management in women's use and control of natural resources. (Bacc Core Course)

WGSS 450. ECOFEMINISM (3). Focuses on the ecological and feminist principles that mediate humanity's relationship with nature. (See Schedule Comment regarding Bacc Core status.) PREREQS: Upper-division standing.
WGSS 460. ${ }^{\wedge}$ WOMEN AND SEXUALITY (3). Explores the historical, theoretical, and political dimensions of female sexuality. The course also examines the basic assumptions about the meaning of female sexuality, how it has been shaped and controlled, and why women's sexuality has been/is a source of both women's liberation and subjugation. (SS) (Writing Intensive Course) PREREQS: WS 223 [D-] or WS 223H [D-] or WS 224 [D-] or WGSS 223 [D-] or WGSS 223H [D-] or WGSS 224 [D-] and /or instructor approval required.
WGSS 462. *QUEER THEORIES (4). Engages key themes and critical frameworks in queer theories. Topics include histories of sexuality forms of oppression including heterosexism, homophobia, and transphobia; resistance to oppression; violence against LGBTQ people; queer activism; diverse experiences of sexuality; and representations in literature, art, and popular media. (Bacc Core Course) CROSSLISTED as QS 462/QS 562. PREREQS: Junior standing.

## WGSS 463. *GLOBAL SEX WORK AND

TRAFFICKING (3). Examination of sex work and trafficking, cross culturally drawing upon case studies from Africa, Asia, the Americas, and Europe. It explores legal and regulatory debates diversity of sex work-related experiences, and sex work-related social activism to uncover the gendered intersections of power and privilege from a global perspective. (Bacc Core Course) PREREQS: WGSS 223 [D-] or WS 223 [D-] or WGSS 224 [D-] or WS 224 [D-]
WGSS 465. WOMEN, WEIGHT, AND BODY IMAGE (4). Focuses on women's increasing struggles with weight, eating disorders, and broader body image issues in contemporary society. Explores how social institutions such as media, medicine, and government contribute to weight bias and unhealthy standards for appearance. Examines weightism as a system of oppression that intersects with other systems oppression including sexism, racism, classism, heterosexism, ableism, and ageism. CROSSLISTED as PSY 465/PSY 565.

WGSS 466. *FAT STUDIES (4). Examines body weight, shape, and size as an area of human difference subject to privilege and discrimination that intersects with other systems of oppression based on gender, race, class, age, sexual orientation, and ability. Employs a multi-disciplinary approach spanning the behavioral sciences and humanities. Frames weight-based oppression as a social justice issue, exploring forms of activism used to counter weightism perpetuated throughout various societal institutions. CROSSLISTED as PSY 466/PSY 566 (Bacc Core Course) PREREQS: WS 223 [D-] or WS 223H [D-] or WS 224 [D-] or WGSS 240 [D-] or WGSS 262 [D-] or WGSS 262H [D-] or WGSS 270 [D-] or WGSS 280 [D-] or WGSS 280H [D-] or WGSS 321 [D-] or WGSS 325 [D-] or WGSS 325H [D-] or WGSS 340 [D-] or WGSS 340 H [D-] or WGSS 350 [D-] or WGSS 360 [D-] or WGSS 360H [D-] or WGSS 364 [D-] or WGSS 364H [D-] or WGSS 373 [D-] or WGSS 375 [D-] or WGSS 380 [D-] or WGSS 380H [D-]
WGSS 472. ^INDIGENOUS TWO-SPIRIT AND QUEER STUDIES (3). "Two-spirit" refers to North American indigenous genders outside of European male/female binaries. Two-spirit communities argue for decolonization as a central political struggle, calling all people to unlearn settler colonial gender/sexuality on Native land.
This course addresses indigenous two-spirit/ GLBTQ issues through theory, literature, activism, and art. CROSSLISTED as ES 472, QS 472. PREREQS: QS 262 or ES 242 or WGSS 414 or instructor permission

WGSS 473. TRANSGENDER LIVES (3). Many people in our Western cultures perceive gender as bimodal and fixed from birth. Individuals whose identity of self does not match the individual's biological sex face significant social pressures to conform to gender norms. Students will be introduced to the biological, social and cultural contexts for transgendered individuals. CROSSLISTED as QS 473/QS 573. PREREQS: 200-level WGSS or QS course or equivalent, or consent of instructor.
WGSS 476. *TRANSNATIONAL SEXUALITIES (4). Explores contemporary experiences of sexualities within transnational contexts. Analyzes themes including queer and LGBTQI organizing, same-sex desires, queer transnational immigration and labor flows, sex industries and discourses of trafficking, sex tourism, and reproductive justice, using feminist, queer, and postcolonial theoretical frameworks. (Bacc Core Course) CROSSLISTED as QS 476/QS 576. PREREQS: QS 262 [D-]
WGSS 477. QUEER/TRANS PEOPLE OF COLOR ARTS AND ACTIVISM (4). LGBTQ people of color often engage struggles for social justice through artistic movements. This course will focus on arts by LGBTQ people of color and the way these artistic movements contribute to activism that interrupts interlocking systems of oppression. CROSSLISTED as ES 477/ES 577, QS 477/QSS 577. PREREQS: QS 262 and QS 464

WGSS 480. *INTERNATIONAL WOMEN (3). Examines the lives and experiences of women in different parts of the world, looking at work, education, the family, the arts and social movements. Explores the comparative realities of various women's struggles for social justice and studies key definitions and theoretical assumptions relevant to the subject of global feminism. (NC) (Bacc Core Course) PREREQS: WS 223 [D-] or WS 223H [D-] or WS 224 [D-] or WGSS 223 [D-] or WGSS 223H [D-] or WGSS 224 [D-] and /or instructor approval.

## WGSS 480H. *INTERNATIONAL WOMEN

(3). Examines the lives and experiences of women in different parts of the world, looking at work, education, the family, the arts and social movements. Explores the comparative realities of various women's struggles for social justice and studies key definitions and theoretical assumptions relevant to the subject of global feminism. (NC) (Bacc Core Course) PREREQS: WS 223 [D-] or WS 223H [D-] or WS 224 [D-] or WGSS 223 [D-] or WGSS 223H [D-] or WGSS 224 [D-] and /or instructor approval. Honors College approval required.
WGSS 482. GLOBAL PERSPECTIVES ON WOMEN'S HEALTH (4). Women's health issues are examined from a global perspective in the context of a woman's life and through a feminist political lens. Central to our discussions will be an analysis of the interplay among race, class, and gender in shaping particular health care outcomes. The course stresses the potential for women's agency and autonomy with respect to improving their health and environments.

WGSS 483. RACE, GENDER, AND HEALTH
JUSTICE (4). Based on a social justice framework, this course explores the intersections of race, gender, ethnicity, disability and sexuality to provide a deeper understanding of how these factors shape health inequities in diverse communities nationally and globally.

WGSS 485. CAPSTONE IN SOCIAL JUSTICE (2). Working with an advisor from the Social Justice minor, students conduct research to synthesize and extend analysis of a particular social justice issue, building on three previous papers or projects. Results are presented in a 1015 page paper and a public poster, presentation or website. CROSSLISTED as ANTH 485, ES 485, WLC 485. This course is repeatable for a maximum of 4 credits. PREREQS: (ANTH 373 [D-] or ES 373 [D-] or WGSS 373 [D-] or WLC 373 [D-]
) and (ANTH 410 [D-] or ES 410 [D-] or WGSS 410 [D-] or WLC 410 [D-] )
WGSS 486. GLOBAL EXPERIENCE I (1).
Prepares students to participate in a shortterm study abroad experience that emphasizes volunteer experiences in women's organizations and analysis from transnational feminist perspectives.

WGSS 487. GLOBAL EXPERIENCE II (1).
Engages students in a short-term study abroad experience that emphasizes volunteer experiences in women's organizations and analysis from transnational feminist perspectives. PREREQS: WS 486 [D-] or WS 586 [D-] or WGSS 486 [D-] or WGSS 586 [D-]

WGSS 488. GLOBAL EXPERIENCE III (1).
Students reflect on their short-term study abroad experience by engaging in in-depth transnational feminist analysis of particular aspects of the study abroad experience. PREREQS: WS 486 [D-] or WS 487 [D-] or WGSS 486 [D-] or WGSS 487 [D-]
WGSS 490. SELF-ESTEEM AND PERSONAL
POWER (3). Explores ways to improve selfesteem and develop personal power. Focuses on issues of self and identity, contextualizing these in the ways gender is constructed in society. (SS) PREREQS: Upper-division standing.
WGSS 495. *GLOBAL FEMINIST THEOLOGIES
(4). Explores the connections between women's religious experiences around the world and the global problems addressed by feminist theology and spirituality. (Bacc Core Course) PREREQS: WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224 and junior standing.

## WGSS 495H. *GLOBAL FEMINIST

THEOLOGIES (3). Explores the connections between women's religious experiences around the world and the global problems addressed by feminist theology and spirituality. (Bacc Core Course) PREREQS: WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224 and junior standing. Honors College approval required.

WGSS 496. *FEMINIST THEOLOGIES IN THE
UNITED STATES (4). Explores U.S.-based feminist critiques of traditional theologies and examines feminist constructions of theologies rooted in diverse human experiences. (Bacc Core Course) PREREQS: WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224 and junior standing.
WGSS 496H. *FEMINIST THEOLOGIES IN THE UNITED STATES (4). Explores U.S.-based feminist critiques of traditional theologies and examines feminist constructions of theologies rooted in diverse human experiences. (Bacc Core Course) PREREQS: (WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224) and junior standing and Honors College approval required.

WGSS 498. SENIOR SEMINAR (4). For graduating seniors in women, gender, and sexuality studies. Building on knowledge and experiences acquired in required and elective women, gender, and sexuality studies courses, it focuses on central questions for feminist research. In particular, the course helps students identify their approaches to women's studies scholarship and develop deeper understandings of the process of generating feminist knowledge, especially in relation to gender, race, class, sexuality, and national belonging. PREREQS: (WS 414 [D-] and WS 416 [D-] ) or (WGSS 414 [D-] and WGSS 416 [D-] )
WGSS 499. TOPICS (1-6). Topics on contemporary research in women, gender, and sexuality studies. May be repeated for credit when topic varies. This course is repeatable for a maximum of 12 credits. PREREQS: Upper-division standing.
WGSS 501. RESEARCH AND SCHOLARSHIP
(1-16). This course is repeatable for a maximum
of 16 credits.
WGSS 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required

WGSS 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

WGSS 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required
WGSS 510. INTERNSHIP (1-16). The internship experience provides the opportunity to gain experience within on off-campus private, public, or community agency or organization which has as one of its goals the improvement of the status of women in society. Students work with an on-site mentor who guides their field experience in collaboration with the internship coordinator in the Women, Gender, and Sexuality Studies program. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

## WGSS 511. ORIENTATION AND

PROFESSIONALIZATION I (1). The WGSS
511, 512,513 sequence prepares Women,
Gender, and Sexuality Studies graduate students to succeed in their courses of study and in their chosen profession. WGSS 511 provides knowledge about Women, Gender, and Sexuality Studies as a discipline and as a course of study that helps students manage the transition to graduate school. Graded P/N.

## WGSS 512. ORIENTATION AND

PROFESSIONALIZATION II (1). The WGSS 511, 512, 513 sequence prepares Women, Gender, and Sexuality Studies graduate students to succeed in their courses of study and in their chosen profession. WGSS 512 guides students in the development of an intellectual life with a focus on thriving and surviving as a scholar in Women, Gender, and Sexuality Studies. Graded P/N.

## WGSS 513. ORIENTATION AND

PROFESSIONALIZATION III (1). The WGSS 511, 512,513 sequence prepares Women, Gender, and Sexuality Studies graduate students to succeed in their courses of study and in their chosen profession. WGSS 513 focuses on helping students shape a future that utilizes the graduate degree in Women, Gender, and Sexuality Studies. It helps students manage the transition to life after the Women, Gender, and Sexuality Studies Master's program at OSU. Graded P/N.
WGSS 514. SYSTEMS OF OPPRESSION IN WOMEN'S LIVES (4). Explores the ways different systems of oppression and discrimination impact women's lives. Examines sexism, classism, racism, and anti-Jewish oppression, as well as discrimination against queer women, older women, and those who differ in ability and appearance. PREREQS: WS 223 or WS 224 or WGSS 223 or WGSS 224 or instructor approval required.

## WGSS 515. ADVANCED RESEARCH

LITERATURE REVIEW (3). Provides graduate students with knowledge and experience in the advanced literature review process including construction of the literature review as product. One of the primary skills graduate students must master is advanced review of a body of literature for the research project. Mastery of the literature review process influences quality and sophistication of claims developed to justify research, with the written review clearly delineating the unique contribution of the student's research and the knowledge gap that it fills. The literature review as a product is a strong written argument that builds a case from credible evidence based on previous research CROSSLISTED as ANTH 515, CSSA 515, ES 515. PREREQS: Graduate standing

WGSS 516. THEORIES OF FEMINISM (4).
Explores feminist conceptions about the nature of the world, women's reality and visions for change. Analyzes major issues raised by the women's
movement and the development of feminist ideas, as well as provides a critical examination of feminist thought and different theories which comprise it. PREREQS: WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224 or instructor approval required.

## WGSS 517. FEMINIST PHILOSOPHIES (3).

Diverse forms of feminist philosophy, including a variety of critiques, especially those based on race and class, with in-depth consideration of selected social issues, such as rape and pornography. CROSSLISTED as PHL 417/PHL 517. PREREQS: 6 credits of philosophy or upper-division standing.
WGSS 518. FEMINIST RESEARCH (4). Explores
the socio-political and historical context out of which traditional research methodologies emerge and the relationship of gender to scientific pursuits. Teaches what it means to do emancipatory antisexist and participatory research.
WGSS 521. FEMINIST LEADERSHIP (4).
Examines theories of feminist leadership and applications in non-profit, governmental, and higher education institutions.

## WGSS 522. GRANT AND FUND DEVELOPMENT

 FOR FEMINIST ORGANIZATIONS (4). Provides students with the skills needed to be successful in grant-writing and fundraising for feminist organizations. Students will address the politics of grant writing and fund raising in relation to the feminist movement's aims and goals. They will also work directly with agencies to understand the trade-offs and value/need of securing funding for social change organizations.WGSS 523. COMMUNITY ORGANIZING AND COLLECTIVE ACTION (2). Addresses relationships between theory and action in feminist context. Explores both social change activism in terms of individual and collective action strategies and social movement theory in historical and contemporary perspectives.

## WGSS 524.TRANS/GENDER POLITICS

(4). Addresses transgender politics--including transsexual, genderqueer, and gender nonconforming issues--through feminist and intersectional approaches by analyzing transgender theories, arts, and activism. CROSSLISTED as QS 524. PREREQS: Graduate student standing.
WGSS 525. GENDER AND TECHNOLOGY (3).
Explores women's contributions and focuses in technology fields. Analyzes gendered nature of technology. Theory and practice of technologies for change and activism.
WGSS 530. WOMEN OF COLOR FEMINISMS
(4). Explores the contemporary experiences of women of color, as well as the theoretical and practical frameworks of women of color feminisms. Analyses key themes in women of color feminisms, including politics of representation, multiple forms of state and interpersonal violence, intersecting forms of oppression, economic justice, reproductive justice, and strategies of resistance. PREREQS: WGSS 223 or WGSS 223H or WS 223 or WS 223H
WGSS 531. QUEER OF COLOR CRITIQUES (4).
"Queer of color critiques" refers to political theories and activism that emerge from LGBTQ people of color to examine the intersections between race, sexuality and gender. This course addresses these intersections through theory, history, and activism. CROSSLISTED as ES 531 and QS 531. PREREQS: Junior standing.
WGSS 532. GENDER, SEXUALITY, AND THE PHOTOGRAPHIC IMAGE (3). A creative and discussion-based course focusing on ways in which photography can and has addressed issues of gender and sexuality. An introduction to key concepts and intersections in Women's, Gender and Sexuality Studies; Queer Studies and photography theory. Students will create written and photographic responses to artworks, texts, personal experience and pop-culture. CROSSLISTED as ART 532, QS 532. PREREQS:

Junior or senior standing.
WGSS 535. FEMINIST TEACHING AND
LEARNING (4). Focuses on the experiences and practices of the feminist classroom. Key components of the class include issues associated with the identity and development of the teacher, as well as the development of skills to help facilitate understanding, empowerment, and the personal and social agency of students.

WGSS 536. FEMINIST MEDIA STUDIES (4). Examination of print, radio, television, and new media from feminist perspectives.
WGSS 540. WOMEN AND NATURAL
RESOURCES (3). Explores the relationship between women and natural resources. In particular, the course examines the roles of policy, technology, culture, and management in women's use and control of natural resources.

## WGSS 542. THE INCLUSIVE CLASSROOM:

## DIFFERENCE, POWER AND DISCRIMINATION

(3). An examination of multidisciplinary scholarship on difference, power, and discrimination; critical pedagogies; and curriculum transformation. Discussions of theory and research are coupled with practical hands-on opportunities for students to develop and hone their teaching and course development skills. CROSSLISTED as GRAD 542. PREREQS: Graduate level standing.
WGSS 550. ECOFEMINISM (3). Focuses on the ecological and feminist principles that mediate humanity's relationship with nature. PREREQS: Upper-division standing.

## WGSS 555. FEMINIST TEXTUAL AND

DISCOURSE ANALYSIS (4). Graduate students are introduced to current methods and modes of feminist literary, visual culture, performance, new media, and film studies with a focus on application. In doing so, the course focuses on feminist approaches to key topics within textual studies (such as form, authors, and readers) as well as distinct methodological approaches to various genres and mediums (including poems, performances, photographs, and films). PREREQS: Graduate standing
WGSS 560. WOMEN AND SEXUALITY (3). Explores the historical, theoretical, and political dimensions of female sexuality. The course also examines the basic assumptions about the meaning of female sexuality, how it has been shaped and controlled, and why women's sexuality has been/is a source of both women's liberation and subjugation. PREREQS: WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224 or instructor approval required.

WGSS 562. QUEER THEORIES (4). Engages key themes and critical frameworks in queer theories. Topics include histories of sexuality; forms of oppression including heterosexism, homophobia, and transphobia; resistance to oppression; violence against LGBTQ people; queer activism; diverse experiences of sexuality; and representations in literature, art, and popular media. CROSSLISTED as QS 462/QS 562. PREREQS: Junior standing.

WGSS 566. FAT STUDIES (4). Examines body weight, shape, and size as an area of human difference subject to privilege and discrimination that intersects with other systems of oppression based on gender, race, class, age, sexual orientation, and ability. Employs a multi-disciplinary approach spanning the behavioral sciences and humanities. Frames weight-based oppression as a social justice issue, exploring forms of activism used to counter weightism perpetuated throughout various societal institutions. CROSSLISTED as PSY 466/ PSY 566. PREREQS: WS 223 or WS 223H or WS 224 or WGSS 240 or WGSS 262 or WGSS 262H or WGSS 270 or WGSS 280 or WGSS 280H or WGSS 321 or WGSS 325 or WGSS 325H or WGSS 340 or WGSS 340H or WGSS 350 or WGSS 360 or WGSS 360H or WGSS 364 or WGSS 364H or WGSS 373 or WGSS 375 or

WGSS 380 or WGSS 380H
WGSS 569. TOPICS IN JOTERIA STUDIES
(3). A space for engaging with arts, activism and scholarship emerging from queer Latin@/ Chican@ experiences and consciousness is provided. Offered winter term in odd years. CROSSLISTED as ES 569, QS 569, SPAN 569. This course is repeatable for a maximum of 6 credits. PREREQS: Instructor approval.
WGSS 572. INDIGENOUS TWO-SPIRIT AND QUEER STUDIES (3). "Two-spirit" refers to North American indigenous genders outside of European male/female binaries. Two-spirit communities argue for decolonization as a central political struggle, calling all people to unlearn settler colonial gender/sexuality on Native land. This course addresses indigenous two-spirit/ GLBTQ issues through theory, literature, activism, and art. CROSSLISTED as ES 572, QS 572. PREREQS: QS 262 or ES 242 or WGSS 414 or WGSS 514 or instructor permission

WGSS 573. TRANSGENDER LIVES (3). Many people in our Western cultures perceive gender as bimodal and fixed from birth. Individuals whose identity of self does not match the individual's biological sex face significant social pressures to conform to gender norms. Students will be introduced to the biological, social and cultural contexts for transgendered individuals. CROSSLISTED as QS 473/QS 573. PREREQS: 200-level WGSS or QS course or equivalent, or consent of instructor.

WGSS 575. CRITICAL RACE FEMINISM AND OUTSIDER JURISPRUDENCE (4). Critical exploration of critical legal justice movements and their relationship to social identities. Seminar emphasizes specific legal cases, federal and state laws, and constitutional issues that impact groups deemed outsiders in legal discourse as well as their social implications. The critical justice movement and anti-subordination struggles will be explored via case analyses that shape race, class, gender, sexuality, and disability relations. Theoretical contributions of law and society, critical race theory, LatCrit, and critical race feminism, critical white studies, critical mixed race studies, OutCrit, ClassCrit, and critical disability studies applied to historical precedent and current attempts at marginalizing/ empowering communities. CROSSLISTED as ES 575.
WGSS 576. TRANSNATIONAL SEXUALITIES (4). Explores contemporary experiences of sexualities within transnational contexts. Analyzes themes including queer and LGBTQI organizing, same-sex desires, queer transnational immigration and labor flows, sex industries and discourses of trafficking, sex tourism, and reproductive justice, using feminist, queer, and postcolonial theoretical frameworks. CROSSLISTED as QS 476/QS 576. PREREQS: QS 262

WGSS 577. QUEER/TRANS PEOPLE OF COLOR ARTS AND ACTIVISM (4). LGBTQ people of color often engage struggles for social justice through artistic movements. This course will focus on arts by LGBTQ people of color and the way these artistic movements contribute to activism that interrupts interlocking systems of oppression. CROSSLISTED as ES 477/ES 577 QS 477/QS 577. PREREQS: QS 262 and QS 464
WGSS 582. GLOBAL PERSPECTIVES ON WOMEN'S HEALTH (4). Women's health issues are examined from a global perspective in the context of a woman's life and through a feminist political lens. Central to our discussions will be an analysis of the interplay among race, class, and gender in shaping particular health care outcomes. The course stresses the potential for women's agency and autonomy with respect to improving their health and environments.

WGSS 583. RACE, GENDER, AND HEALTH JUSTICE (4). Based on a social justice framework, this course explores the intersections of race, gender, ethnicity, disability and sexuality to provide a deeper understanding of how
these factors shape health inequities in diverse communities nationally and globally.

WGSS 585. TRANSNATIONAL FEMINISMS (4). Introduces students to themes and theoretical principles of transnational feminisms, with special emphasis placed on feminist movements of the global South. We will explore colonialism, globalization, nation-building, representation, global economies, militarism, human rights, and politics of gender, race, class, sexuality, and nation.
WGSS 586. GLOBAL EXPERIENCE I (1). Prepares students to participate in a short term study abroad experience that emphasizes volunteer experiences in women's organizations and analysis from transnational feminist perspectives.
WGSS 587. GLOBAL EXPERIENCE II (1).
Engages students in a short-term study abroad experience that emphasizes volunteer experiences in women's organizations and analysis from transnational feminist perspectives PREREQS: WS 486 or WS 586 or WGSS 486 or WGSS 586
WGSS 588. GLOBAL EXPERIENCE III (1).
Students reflect on their short-term study abroad experience by engaging in in-depth transnational feminist analysis of particular aspects of the study abroad experience. PREREQS: (WS 586 and WS 587) or (WGSS 586 and WGSS 587)

## WGSS 595. GLOBAL FEMINIST THEOLOGIES

(4). Explores the connections between women's religious experiences around the world and the global problems addressed by feminist theology and spirituality PREREQS: WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224 and junior standing.
WGSS 596. FEMINIST THEOLOGIES IN THE UNITED STATES (4). Explores U.S.-based feminist critiques of traditional theologies and examines feminist constructions of theologies rooted in diverse human experiences. PREREQS: WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224
WGSS 599. TOPICS (1-6). Topics on contemporary research in women, gender, and sexuality. May be repeated for credit when topic varies. This course is repeatable for a maximum of 12 credits. PREREQS: Upper-division standing.

WGSS 603. THESIS (1-12). Graded P/N. This course is repeatable for a maximum of 999 credits.
WGSS 610. INTERNSHIP (1-6). The internship experience provides opportunities to gain experience in a private, public, or community agency or organization, which has social justice advocacy as one of its goals. Students work with an on-site mentor who guides their field experience in collaboration with the internship coordinator in the WGSS program. One feature of graduate internships is the opportunity to shadow key personnel in order to meet internship goals. Graded P/N. This course is repeatable for a maximum of 6 credits. PREREQS: Post-master's level standing.
WGSS 611. COLLOQUIUM (1). Provides presentations of feminist research by OSU faculty and graduate students and faculty members from other institutions. Graded P/N. This course is repeatable for a maximum of 4 credits

WGSS 616. MULTIRACIAL, TRANSNATIONAL, AND QUEER FEMINISMS I (4). Introduces doctoral students to foundational and emerging themes and texts in women, gender, and sexuality studies, with particular emphases on women of color feminisms, transnational feminisms, and queer feminist critiques. The first seminar in a twopart sequence (WGSS 616 and 617).
WGSS 617. MULTIRACIAL, TRANSNATIONAL, AND QUEER FEMINISMS II (4). Introduces doctoral students to foundational and emerging themes and texts in women, gender, and sexuality studies, with particular emphases on women of
color feminisms, transnational feminisms, and queer feminist critiques. The second seminar in a two-part sequence (WGSS 616 and 617). PREREQS: WGSS 616 [B]

WGSS 618. FEMINIST PARTICIPATORY ACTION RESEARCH (4). An examination of theories, principles and strategies of PAR, and appreciation of advantages and limitations of this approach and skills necessary for participating effectively in PAR projects. PREREQS: Any upper-division graduate level course in research methods.
WGSS 619. DECOLONIZING METHODS (4).
Navigates from feminist philosophy of science interventions to postcolonial, Chicana/Latina, and critical race criticisms of methodological stances in "normal" science. Standpoint methodologies, racialized and gendered origins of modern statistical methods, longstanding affinity between colonial inequalities and Eurocentric scientific inquiry, and successor sciences/sciences from below constitute the main themes of the course.

WGSS 620. SOCIAL JUSTICE THEORY AND PRACTICE (4). An examination of social justice theories and practices. Specifically engages with issues of power and privilege, systems of oppression, intersectionality, and social activism. Explores the practices of social justice movements. PREREQS: Graduate student standing.

## ■ WORLD LANGUAGES AND CULTURES COURSES

WLC 159. *LANGUAGE, RACE AND RACISM IN THE US: AN INTRODUCTION (4). Students in this course will unpack language, race and racism--as well as the intersections between those ideas-- as cornerstones to understanding identity and society as inherently socially constructed notions. (Bacc Core Course) CROSSLISTED as ANTH 159 and ES 159.

WLC 221. *MASTERPIECES OF GERMAN
CINEMA (3). An introduction to the serious study of German cinema, 1920 to present. Class lectures discussing key works of German cinema will offer a variety of historical, critical and theoretical approaches. Weekly screenings of important films accompany the lectures. Taught in English. Film fee will be required. (Bacc Core Course)
WLC 221H. *MASTERPIECES OF GERMAN
CINEMA (3). An introduction to the serious
study of German cinema, 1920 to present. Class lectures discussing key works of German cinema will offer a variety of historical, critical and theoretical approaches. Weekly screenings of important films accompany the lectures. Taught in English. Film fee will be required. (Bacc Core Course) PREREQS: Honors College approval required.

WLC 222. *WOMEN IN ITALIAN CINEMA (3). An exploration of filmic portrayals of women as participants in social, economic and political life in Italy. Examines Italian cinema as a reflection of Italian culture. Focuses on women as protagonists, symbolic figures and filmmakers. Analysis will be presented through a variety of historical, critical and theoretical approaches. Taught in English. (Bacc Core Course)

## WLC 230. *FRANCE TODAY: CULTURES

WITHIN AND BEYOND ITS BORDERS (3). An exploratory study of French culture and society since 1945. Topics include: decolonization, immigration, Francophone intellectual currents, France,s European vocation, and social conflict today. Conducted in English. (Bacc Core Course)
WLC 230H. *FRANCE TODAY: CULTURES WITHIN AND BEYOND ITS BORDERS (3). An exploratory study of French culture and society since 1945. Topics include: decolonization, immigration, Francophone intellectual currents, France,s European vocation, and social conflict today. Conducted in English. (Bacc Core Course) PREREQS: Honors College approval required.

WLC 231. *GERMAN DICTATORSHIPS: NAZIS AND COMMUNISTS (3). Introduction to the two best-known dictatorships in German society, National Socialism of the Third Reich from 1933 1945 and Socialism in the German Democratic Republic from 1949-1989 via the study of visual media (feature films, documentaries, newsreels, etc.) and other primary and secondary sources. (Bacc Core Course) PREREQS: Sophomore standing
WLC 231H. *GERMAN DICTATORSHIPS: NAZIS AND COMMUNISTS (3). Introduction to the two best-known dictatorships in German society, National Socialism of the Third Reich from 1933 1945 and Socialism in the German Democratic Republic from 1949-1989 via the study of visual media (feature films, documentaries, newsreels, etc.) and other primary and secondary sources. (Bacc Core Course) PREREQS: Sophomore standing and Honors College approval required.

## WLC 232. *INTRODUCTION TO JEWISH

 CULTURE (3). An overview of Jewish culture from its origins to the present day. Students will compare and contrast the lifestyles, ideologies, religious and cultural practices of Jews living in Israel and the United States; two divergent cultures that developed from similar roots. Taught in English. Taught via Ecampus only. (Bacc Core Course)WLC 233. *RUSSIAN CULTURE I (3). Introduction to basic features of Russian culture originating in the past and continuing into the present. Aspects of history, politics, economics, geography, art, music, literature, and everyday life. Compares Russian culture with Western European and American culture. WLC 233: Old Russia; WLC 234: 19th Century; WLC 235: 20th Century. Taught in English. (H) (Bacc Core Course) PREREQS: WLC 233, WLC 234, WLC 235 need not be taken in order.
WLC 234. *RUSSIAN CULTURE II (3). Introduction to basic features of Russian culture originating in the past and continuing into the present. Aspects of history, politics, economics, geography, art, music, literature, and everyday life. Compares Russian culture with Western European and American culture. WLC 233: Old Russia; WLC 234: 19th Century; WLC 235: 20th Century. Taught in English. (H) (Bacc Core Course) PREREQS: WLC 233, WLC 234, WLC 235 need not be taken in order.
WLC 235. *RUSSIAN CULTURE III (3).
Introduction to basic features of Russian culture originating in the past and continuing into the present. Aspects of history, politics, economics, geography, art, music, literature, and everyday life. Compares Russian culture with Western European and American culture. WLC 233: Old Russia; WLC 234: 19th Century; WLC 235: 20th Century. Taught in English. (H) (Bacc Core Course) PREREQS WLC 233, WLC 234, WLC 235 need not be taken in order
WLC 241. *GRIMMS' FAIRY TALES (4). We will read a selection of the most popular Grimms' fairy tales and consider why they have remained so popular. What is it about fairy tales that has made them such a lasting source of creative inspiration into our time? Students will learn to understand and critique fairy tales and their role in Western cultures through analysis of the tales and creative adaptation of a tale for a modern audience. (Bacc Core Course)

WLC 261. *MASTERPIECES GERMAN CINEMA (3). An introduction to the serious study of German cinema, 1920 to present. Class lectures discussing key works of German cinema will offer a variety of historical, critical and theoretical approaches. Weekly screenings of important films accompany the lectures. Taught in English. Film fee will be required. (Bacc Core Course)

WLC 261H. *MASTERPIECES GERMAN
CINEMA (3). An introduction to the serious
study of German cinema, 1920 to present.
Class lectures discussing key works of German
cinema will offer a variety of historical, critical and theoretical approaches. Weekly screenings of important films accompany the lectures. Taught in English. Film fee will be required. (Bacc Core Course) PREREQS: Honors College approval required.
WLC 301. *INTRODUCTION TO WORLD LANGUAGE AND CULTURE STUDIES (4). Addresses the structure, histories, and cultures associated with world languages and presents skills for learning languages more effectively Includes related topics such as globalization, colonialism, and language justice; language policy, linguistic diversity, and language death; immigration and migration; race and racism. This is a required course in the WLC major in the Literacies thematic area. (Bacc Core Course)
WLC 320. *FRANCOPHONE CULTURES IN FILM (3-9). An exploration of the different cultures of France and the Francophone world through film. Students will delve into the heart of these societies and discover their socio-historical, political, economic and cultural context. Students, analytical and critical skills will be thoroughly solicited through various research and writing activities. Taught in English. (Bacc Core Course) This course is repeatable for a maximum of 9 credits.
WLC 320H. *FRANCOPHONE CULTURES IN FILM (3-9). An exploration of the different cultures of France and the Francophone world through film. Students will delve into the heart of these societies and discover their socio-historical, political, economic and cultural context. Students, analytical and critical skills will be thoroughly solicited through various research and writing activities. Taught in English. (Bacc Core Course) This course is repeatable for a maximum of 9 credits. PREREQS: Honors College approval required.
WLC 321. *MODERN SPAIN THROUGH SPANISH CINEMA (3). Examines the history of modern Spain and its cinematography via the study of key Spanish films and cineastes in the twentieth and twenty-first centuries. (Bacc Core Course)
WLC 331. *CHINESE CULTURE I (3). Introduction to basic features of Chinese culture from ancient times to the 9th century. Topics include philosophy and religion, the Chinese language, literature and the arts, science and technology, government, family and gender, social and economic conditions, contacts with the outside world. Taught in English. Open to all students. (NC) (Bacc Core Course) PREREQS: WLC 331, WLC 332, WLC 333 need not be taken in order.

WLC 332. *CHINESE CULTURE II (3). Introduction to basic features of Chinese culture from the 10th through the 19th centuries. Topics include philosophy and religion, literature and the arts, science and technology, government, family and gender, social and economic conditions, daily life, and contacts with the outside world. Taught in English. Open to all students. (NC) (Bacc Core Course) PREREQS: WLC 331, WLC 332, WLC 333 need not be taken in order.
WLC 333. *CHINESE CULTURE III (3). Survey of important developments of Chinese society and culture from the early 20th century to the present. Topics include wars and revolutions, economic, political, and social conditions, the new culture movement, changing family structure and women's status, relationships within greater China (Mainland China, Taiwan, and Hong Kong). Taught in English. Open to all students. (NC) (Bacc Core Course) PREREQS: WLC 331, WLC 332, WLC 333 need not be taken in order.

## NLC 334. FRENCH FASHION AND GLAMOUR

 (3). This course, taught in English, allows students who have not studied French to enter the glamorous world of French fashion, exploring its origins and history, what/s new and exciting in French fashion today and French attitudes about fashion and beauty that have given them
## the inside track on chic for centuries. PREREQS

 Sophomore standing.WLC 335. *JAPANESE CULTURE I (3). An introductory survey of Japanese history, arts, literature, society, and traditions from the ancient to the mid-19th century. Taught in English. May not be offered every year. (NC) (Bacc Core Course) PREREQS: Sophomore standing. WLC 335, WLC 336, WLC 337 need not be taken in order.

WLC 336. *JAPANESE CULTURE II (3). An introductory survey of Japanese history, arts, literature society, and traditions from the ancient to the mid-19th century. May not be offered every year. (NC) (Bacc Core Course) PREREQS: Sophomore standing. WLC 335, WLC 336, WLC 337 need not be taken in order

WLC 337. *JAPANESE CULTURE III (3). A survey of Japan from the mid-19th century to the present in areas including arts, literature, business, education, society, politics, and foreign relations. Taught in English. May not be offered every year. (NC) (Bacc Core Course) PREREQS: Sophomore standing. WLC 335, WLC 336, WLC 337 need not be taken in order.

## WLC 345. MULTIMODAL LITERACIES IN

 WORLD LANGUAGES AND CULTURES (2). Introduction to the analysis and production of multimodal literacies. Study of semiotic resources such as language and images across modalities such as film, manga, and social media. Required of all majors in World Languages and Cultures. Taught in English. PREREQS: CHN 213 [D-] or FR 213 [D-] or GER 213 [D-] or JPN 213 [D-] or SPAN 213 [D-] or SPAN 216 [D-] or SPAN 217 [D-] and COREQS: CHN 345 or FR 345 or GER 345 or JPN 345 or SPAN 345.WLC 360. INTERNATIONAL FILM FESTIVAL (3). Critical study of a selection of films screened at the Oregon State University's International Film Festival. Topics include acting, sound, special effects, cinematography. CROSSLISTED as FILM 360. This course is repeatable for a maximum of 9 credits. PREREQS: Sophomore standing or higher.

## WLC 361. (RE)FRAMING RACE THROUGH

FILM PRODUCTION (4). A critical engagement of ways race and ethnicity are treated in nonfiction short film as students produce their own short film as a means of challenging dominant racial representations and narratives. Requires a basic understanding of ways that notions about race and ethnicity combine with ideologies about gender, sexuality, ability, class, etc. to perpetuate unjust systems and institutions. Prior filmmaking experience is welcome but not required. CROSSLISTED as ES 361, QS 361, WGSS 361.
WLC 365. MIGRANT NARRATIVES (2). An examination of migration and forced displacement through the study of personal narrative. Includes discussion of the causes of displacement including persecution, ecological degradation, economic pressure and conflict. This is a required course in the WLC major in the Identities and Intersections thematic area. PREREQS: FR 365* [D-] or GER 365* [D-] or SPAN 365* [D-] and Third-year proficiency in French, German, or Spanish.
WLC 366. LANGUAGE AND IDENTITY (2). An examination of the connections between ideology and linguistic behavior as well as the undamentals of structural linguistics needed to discuss variation and contact phenomena. This is a required course in the WLC major in the Identities and Intersections thematic area. PREREQS: FR 366* [D-] or GER 366* [D-] or SPAN 366* [D-] and third-year proficiency in French, German, or Spanish

WLC 373. APPROACHES TO SOCIAL JUSTICE (3). Students study various ways of thinking about social justice and evaluate these in case studies and current events. As a basis for the Social Justice minor, students write a research paper on the theoretical and practical aspects of a social justice issue. CROSSLISTED as ANTH 373, ES

373, WGSS 373.
WLC 375. LITERATURES OF POWER AND RESISTANCE (2). An examination of the relationships between individuals or groups and institutional power (government, ecclesiastical, etc.) across different historical periods and geographies Language-specific discussion sections cover specific works dealing with such topics as colonization, forced disappearance, and social resistance. This is a required course in the WLC major in the Social Architecture and Power thematic area. PREREQS: FR 375* or GER 375* or SPAN 375* and third-year proficiency in French, German, or Spanish.
WLC 376. EMPIRES AND GLOBALIZATION (2). An examination of the history of Western imperialism and the rise of contemporary neocolonialism. Students explore the impact of colonization and the effects of neoliberalism and globalization through the use of historical source materials and current news articles focused on specific regions of the developing world. This is a required course in the WLC major in the Social Architecture and Power thematic area. PREREQS: FR 376 [C-] or GER 376 [C-] or SPAN 376 [C-] and third-year proficiency in French, German, or Spanish.
WLC 399. SPECIAL TOPICS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

## WLC 410. WORLD LANGUAGE INTERNSHIP

(1-12). Opportunities for juniors and seniors to apply skills in world language and knowledge of world culture at selected government, industry, or business placement sites. Allows students to prepare for transition from academic to work world. Interns are supervised and evaluated by employer and faculty coordinator. See also Oregon International Internships in the catalog section on International Programs. Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Completion of 90 credits with 2.75 GPA or higher; completion of the third-year language course in one foreign language with 3.00 GPA or better, with at least three terms of study in the OSU School of Language, Culture, and Society.
WLC 429. *FRENCH SOCIETY THROUGH ITS CINEMA (3). An examination of French society through its own cinema. Via the screening and study of films from the various periods of French history, students will delve into the heart of French society and will discover the socio-historical, political, economic and cultural context. (Bacc Core Course) PREREQS: Sophomore standing.

## WLC 429H. *FRENCH SOCIETY THROUGH ITS

CINEMA (3). An examination of French society through its own cinema. Via the screening and study of films from the various periods of French history, students will delve into the heart of French society and will discover the socio-historical, political, economic and cultural context. (Bacc Core Course) PREREQS: Sophomore standing and Honors College approval required.

WLC 459. LANGUAGE, RACE AND RACISM IN THE U.S.: ADVANCED STUDY (4). Students in this course will unpack language, race and racism--as well as the intersections between those ideas-as cornerstones to understanding identity and society as inherently socially constructed ideas. The goal of this course is to better understand how racism is produced and reproduced in talk and text (this will include symbols and signs), especially in the context of the denial of racism. Our course will specifically focus on the language of racism, and, more specifically, types of discourse that construct Whiteness as dominant over Color. CROSSLISTED as ANTH 459/ANTH 559, ES 459/ES 559.
WLC 473. COMMUNITY-BASED LEARNING (3). A service-learning course that allows students to apply the theory and skills acquired in advanced linguistics, culture, and literature courses to specific needs of populations that speak a language taught in the department. It combines 80 hours of community-supervised fieldwork with an online academic component consisting of assigned readings, independent research, and ongoing reflective writing. Each student is expected to make significant contributions toward the completion of a deliverable product that benefits a native speaker community. Preadvanced oral proficiency required. This course is repeatable for a maximum of 6 credits.

## WLC 483. CUBAN CULTURE, POLITICS

AND ARTS (4). One of two courses that comprise the Cuba Study Abroad Program. It introduces students to Cuban culture, politics (and particularly Cuba-U.S. relations during and after the Revolution) and arts via a combination of lectures/lessons led by invited specialists in their fields, readings, films and student activities. Students will learn about a variety of topics including migration, agriculture, health care, education, economics, religion/spirituality, gender, race, and the arts (literature, music and other performance). Given the interdisciplinary approach to this course, students will also be able to focus on other topics of interest to them/their program of study. CROSSLISTED as ENG 483, PS 483. PREREQS: Sophomore standing and acceptance into the OSU Cuba Study Abroad Program.
WLC 485. CAPSTONE IN SOCIAL JUSTICE (2). Working with an advisor from the Social Justice minor, students conduct research to synthesize and extend analysis of a particular social justice issue, building on three previous papers or projects. Results are presented in a 10-15 page paper and a public poster, presentation or website. CROSSLISTED as ANTH 485, ES 485, WGSS 485. This course is repeatable for a maximum of 4 credits. PREREQS: (ANTH 373 [D-] or ES 373 [D-] or WGSS 373 [D-] or WLC 373 [D-] ) and (ANTH 410 [D-] or ES 410 [D-] or WGSS 410 [D-] or WLC 410 [D-] )
WLC 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

WLC 499H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
WLC 510. WORLD LANGUAGE INTERNSHIP (1-12). Opportunities for juniors and seniors to apply skills in world language and knowledge of world culture at selected government, industry, or business placement sites. Allows students to prepare for transition from the academic world to the work world. Interns are supervised and evaluated by the employer and a faculty coordinator. See also Oregon International Internships in the catalog section on International Programs. Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Completion of 90 credits with 2.75 GPA or higher; completion of the third-year language course in one foreign language with 3.00 GPA or better, with at least three terms of study in the OSU School of Language, Culture, and Society.
WLC 559. LANGUAGE, RACE AND RACISM IN THE U.S.: ADVANCED STUDY (4). Students in this course will unpack language, race and racism--as well as the intersections between those ideas-as cornerstones to understanding identity and society as inherently socially constructed ideas. The goal of this course is to better understand how racism is produced and reproduced in talk and text (this will include symbols and signs), especially in the context of the denial of racism. Our course will specifically focus on the language of racism, and, more specifically, types of discourse that construct Whiteness as dominant over Color. CROSSLISTED as ANTH 459/ANTH 559, ES 459/ES 559.
WLC 583. CUBAN CULTURE, POLITICS
AND ARTS (4). One of two courses that comprise the Cuba Study Abroad Program. It introduces students to Cuban culture, politics (and particularly Cuba-U.S. relations during and after the Revolution) and arts via a combination of lectures/lessons led by invited specialists in their fields, readings, films and student activities. Students will learn about a variety of topics including migration, agriculture, health care, education, economics, religion/spirituality, gender, race, and the arts (literature, music and other performance). Given the interdisciplinary approach to this course, students will also be able to focus on other topics of interest to them/their program of study. CROSSLISTED as ENG 583, PS 583. PREREQS: Sophomore standing and acceptance into the OSU Cuba Study Abroad Program.
WLC 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## SCHOOL OF PSYCHOLOCICAL SCIENCES

Psychology

## Graduate Major

Psychology (MS, PhD)
Graduate Area of Concentration
Applied Cognition
Engineering Psychology
Health Psychology

## Graduate Minor-MAIS

 Psychology
## Graduate Area of Concentration

General Psychology

The psychology curriculum explores scientific approaches to a wide range of psychological phenomena. Courses meet the needs of students desiring a knowledge of psychology as part of their general education or professional background, planning to secure entry-level jobs in human services occupations, or preparing for graduate study in psychology or related fields. The department offers a major program leading to a BA or BS degree in Psychology, a minor program for undergraduate students with majors in other disciplines, and participates in the Master of Arts in Interdisciplinary Studies (MAIS) degree program offered by the Graduate School.

Graduates with bachelor degrees in psychology often find entry-level career positions in human services, law enforcement, business, education, management, sales, and also may go on to graduate study in such fields as psychology, counseling, social work, public and business administration, and law.

## MASTER OF ARTS IN

INTERDISCIPLINARY STUDIES
Students design their own MAIS program around three fields or areas of study, and may use specific areas of psychology for up to two of their fields. At least three courses must be in each field. Students wishing to include psychology as a specialty area in a MAIS program should submit the following to the Graduate School:

1. Graduate Record Exam (GRE) scores for the verbal, quantitative, and analytic segments of the examination
2. Overall GPA
3. A list of psychology courses taken and the grades achieved in each
4. Transcripts of all previous university work
5. Names of two references who can be contacted by the department
6. A one- or two-page statement of the purpose for including psychology in their graduate program.
To be admitted to a psychology component of the MAIS program students must obtain written consent of a faculty member in this department who agrees to serve as the field or area advisor, as well as meeting general Graduate School entrance requirements.

## PSYCHOLOGY (BA, BS, CRED, HBA, HBS)

Also available at OSU-Cascades and via Ecampus.
Major Requirements (65)
Core (29)
BI 102, BI 103. *General Biology (4,4) or BI 212, BI 213. *Principles of Biology $(4,4)$
PHL 121. *Reasoning and Writing (3)
or WR 327. *Technical Writing (3)
PSY 201, PSY 202. *General Psychology $(3,3)$
PSY 301. Research Methods in Psychology (4)
ST 351. Introduction to Statistical Methods (4)

ST 352. Introduction to Statistical Methods (4)

## Survey (16)

Select four courses from below:

## Minor Code: 965

## PSYCHOLOGY (MS, PhD, MAIS)

## Graduate Areas of Concentration

Applied cognition, engineering psychology, health psychology
The MS and PhD program is a doctoral program with a master's degree component that is obtained en route to the PhD. The MS portion of the program assures that students have experience designing and conducting research prior to the dissertation stage. The program has a strong research component, ensuring that graduates have the tools to tackle a variety of applied problems. This entails both classwork in research methods and statistics and a continuing emphasis on student research.
The program's general focus is on the application of psychological research methods, theories, and principles to solving practical problems. The program has three areas of concentration: applied cognition, engineering psychology, and health psychology.

Applied cognition is the application of research on thinking, learning, decision-making, perception, social judgment, and other cognitive processes to applied issues. Examples of relevant application areas include the psychology of teaching and learning, the effects of contemplative practice, and risk perception.
Engineering psychology refers to research at the intersection of psychology and technology. Relevant topics include such things as the improvement of technology, human-machine interfaces, transportation, information systems, and work and living environments (as in the Mission of Division 21 of the American Psychological Association).

Health psychology concerns the relations between psychological factors (e.g., cognition, motivation, individual and interpersonal behavior, emotion) and human wellness broadly defined (as in the mission of the APA Division 38).
Graduates of the Psychology MS, PhD program will be qualified to define, assess, analyze and evaluate problems in both the private and public sector that are behavior based. Graduates will be trained to apply the scientific method and use evidence-based information to design educational programs, work environments, management teams, information delivery systems, technology-based tools. Additionally, all graduates will be equipped to train the next generation of teachers, researchers, and practitioners in
the concentration areas.

## Admission Requirements

Bachelor's or Master's degree from an accredited institution; minimum undergraduate GPA of 3.2/4.0 or graduate GPA of 3.5/4.0; GREs; TOEFL score of at least 600 (paper exam) 250 (computer exam), or 100 (internet exam); three letter of recommendation; personal statement.

## Requirements

The Psychology PhD program requires a minimum of 111 credits, including at least 36 credits of dissertation. The program is organized into core requirements for all students, along with additional work in a concentration area composed of electives, the nature of which is defined primarily by the student's research focus.

The core requirements are in research methods, professional issues, and basic content in psychology. The required core curriculum provides a critical foundation in quantitative and research methods, core theory in psychological science, ethics, and professional issues.
No more than 15 credits of blanketnumbered classes, excluding dissertation, thesis, or internship credit, may be used towards the 111 credit minimum.

## Methods Core (20)

## ■ PSYCHOLOGY COURSES

PSY 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
PSY 201. *GENERAL PSYCHOLOGY (3).
Scientific study of behavior and experience.
Biological bases of behavior; sensation and perception; conditioning, learning and memory; thinking, problem solving, language, and consciousness; cognitive, personal and social development. (SS) (Bacc Core Course)
PSY 202. *GENERAL PSYCHOLOGY (3).
Motivation and emotion; personality;
measurement of human differences; adjustment, psychopathology and psychotherapy; attitudes and social behavior. (SS) (Bacc Core Course)
PSY 301. RESEARCH METHODS IN
PSYCHOLOGY (4). Study of scientific methodology in psychology, including experimental and observational techniques. Topics include problem identification and hypothesis formation, research design, application of statistics, collection and interpretation of data, computer usage, and research report writing. Lec/ lab. PREREQS: PSY 201 [D-] and PSY 202 [D-] and (ST 351 [D-] or ST 351H [D-] )
PSY 330. BRAIN AND BEHAVIOR (4).
Introduction to the relationships of the structure and functioning of the human brain to behavior. Information from neuroanatomy, neurochemistry, neurosurgery and neurology is combined with
psychological research on both normal and abnormal human behavior. (SS) PREREQS: PSY 201 [D-] and PSY 202 [D-]
PSY 340. COGNITION (4). Theories, research and applications concerning cognition. Topics include perception, attention, memory, learning, thinking and language. (SS) PREREQS: PSY 201 [D-] and PSY 202 [D-]
PSY 350. HUMAN LIFESPAN DEVELOPMENT
(4). An introduction to physical, social, cognitive and linguistic development with an emphasis on theory and methodology. (SS) PREREQS: PSY 201 [D-] and PSY 202 [D-]
PSY 360. SOCIAL PSYCHOLOGY (4). The study of behavior and experience in a social context. Topics include person perception, attribution, attraction and love, attitudes and attitude change, aggression, social influence and group dynamics. Applications of social psychological principles to other fields, e.g., law, health care, etc. (SS) PREREQS: PSY 201 [D-] and PSY 202 [D-]
PSY 360H. SOCIAL PSYCHOLOGY (4). The study of behavior and experience in a social context. Topics include person perception, attribution, attraction and love, attitudes and attitude change, aggression and social influence and group dynamics. Applications of social psychological principles to other fields, e.g., law, health care, etc. (SS) PREREQS: PSY 201 [D-] and PSY 202 [D-] and Honors College approval required.
PSY 370. PERSONALITY (4). An overview of major theories of personality is followed by an introduction to personality testing and research. (SS) PREREQS: PSY 201 [D-] and PSY 202 [D-]
PSY 381. ABNORMAL PSYCHOLOGY (4).
Survey of various forms of psychological disorders; theories regarding etiology and treatment. Special emphasis on research approaches to such disorders. PREREQS: PSY 201 [D-] and PSY 202 [D-]
PSY 399. SPECIAL TOPICS (1-6). This course is repeatable for a maximum of 6 credits.
PSY 399H. SPECIAL TOPICS (1-6). This course is repeatable for a maximum of 6 credits. PREREQS: Honors College approval required.

PSY 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required
PSY 402. INDEPENDENT STUDY (1-16). Graded $\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PSY 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

PSY 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PSY 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PSY 407. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits PREREQS: Departmental approval required.

PSY 408. WORKSHOP (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

PSY 410. FIELD EXPERIENCE IN HUMAN
SERVICES (1-16). Practicum/internship
placement in community human service agencies.
Includes regular on-site supervision, relevant readings, projects, and faculty site visits. Graded $\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PSY 426. *PSYCHOLOGY OF GENDER (4).
Survey of theories, life cycles and contemporary
problems of women and men in a social context. Scientific examination of gender related to psychological functioning and behavior. Topics can include psychological research on human similarities and differences in gender attitudes, relationships, sexuality, violence, employment, and mental health. (Bacc Core Course) PREREQS: PSY 202 [D-]
PSY 432. PHYSIOLOGICAL PSYCHOLOGY (4). Basic vertebrate neurophysiology and neuroanatomy in relation to behavior. Neural and hormonal correlates of sensation, learning, memory and motivation. PREREQS: PSY 330 [D-] and /or equivalent biological science background.
PSY 433. PSYCHOPHARMACOLOGY (4). Drug-brain-behavior interactions. Psychoactive drugs and their relationships to normal and abnormal behavior in humans. PREREQS: Upper-division standing. Biological science background helpful.
PSY 434. ^BRAIN AND BEHAVIOR METHODS
(4). Methodology primarily in the area of neuropsychological research. Topics include the finding and interpretation of background literature, critical evaluation of research, hypothesis formulation, experimental design, data interpretation, reporting of results and methods, and weaving a conclusion and review article. (Writing Intensive Course) PREREQS: PSY 301 [D-] and PSY 330 [D-]
PSY 437. MOTIVATION (4). Biological, learning, and cognitive approaches to human and animal motivation. Topics include evolution, homeostasis, drive, arousal, incentive motivation, achievement motivation, and social motivation. PREREQS: (PSY 330 [D-] or PSY 340 [D-] ) and PSY 301 [D-] PSY 440. ^COGNITION RESEARCH (4). Advanced scientific methodology primarily in the areas of attention, learning, memory, and thinking. Students will design their own research projects, collect and analyze data, and write a professional report. (Writing Intensive Course) PREREQS: PSY 301 [D-] and PSY 340 [D-]
PSY 442. PERCEPTION (4). Fundamental concepts of animal and human sensation and perception, with emphasis on audition and vision. Applications of psychophysical methods to research in all sensory modalities. Includes review workshops on basic mathematical, physical and physiological concepts necessary to interpret research in this field. PREREQS: PSY 301 [D-] and (PSY 330 [D-] or PSY 340 [D-])
PSY 444. LEARNING AND MEMORY (4).
Experimental and theoretical work on learning, conditioning, and memory in animals and humans. PREREQS: PSY 301 [D-] and PSY 340 [D-]
PSY 448. CONSCIOUSNESS (4). Psychological, phenomenological, and physiological approaches to the content and processes of subjective awareness. Topics include philosophical issues, cortical and reticular neurophysiology, sleeping and dreaming, selective attention, imagery, and self-awareness. PREREQS: PSY 301 [D-] and PSY 340 [D-]
PSY 454. COGNITIVE DEVELOPMENT (4).
Discusses intellectual development from infancy to adulthood. Topics include the origin of thinking, the development of perception, attention, memory, problem solving, language, academic skills, and social cognition. Piaget, Vygotsky, and information processing approaches will be discussed.
PREREQS: PSY 350 [D-]
PSY 456. SOCIAL DEVELOPMENT (4). Covers theories and research concerning human social development. Topics include theories of socialization; the development of social relationships; the self-concept; emotion; sex roles; social cognition; pro-social behavior; morality; selfcontrol; and aggression. PREREQS: PSY 350 [D-]
PSY 458. LANGUAGE ACQUISITION (4).
Psychological processes involved in the acquisition and use of language throughout childhood. Biological, cognitive, and social
influences on language will be discussed, as well as personal uses of language, such as language in thought and reading. PREREQS: PSY 350 [D-]

## PSY 460. ^ADVANCED SOCIAL RESEARCH

METHODS (4). Advanced experimental
research methods in the social sciences. Issues in psychological construct operationalization, experimental design, data collection, analysis, and report writing will be emphasized. (Writing Intensive Course) PREREQS: PSY 301 [D-] and PSY 360 [D-]
PSY 464. SOCIAL COGNITION (4). Research and theory concerning cognitive structures and processes underlying social judgment and social behavior. Topics include attribution theory, social inference, person memory, schema-based information processing. PREREQS: PSY 360 [D-]
PSY 465. WOMEN, WEIGHT, AND BODY IMAGE
(4). Focuses on women's increasing struggles with weight, eating disorders, and broader body image issues in contemporary society. Explores how social institutions such as media, medicine, government contribute to weight bias and unhealthy standards for appearance. Examines weightism as a system of oppression that intersects with other systems of oppression including sexism, racism, classism, heterosexism, ableism, and ageism. CROSSLISTED as WGSS 465.

PSY 466. *FAT STUDIES (4). Examines body weight, shape, and size as an area of human difference subject to privilege and discrimination hat intersects with other systems of oppression based on gender, race, class, age, sexual orientation, and ability. Employs a multidisciplinary approach spanning the behavioral sciences and humanities. Frames weight-based oppression as a social justice issue, exploring forms of activism used to counter weightism perpetuated throughout various societal institutions. CROSSLISTED as WGSS 466/WGSS 566. (Bacc Core Course) PREREQS: WGSS 223 [D-] or WGSS 223H [D-] or WGSS 224 [D-] or WGSS 240 [D-] or WGSS 262 [D-] or WGSS 262H [D-] or WGSS 270 [D-] or WGSS 280 [D-] or WGSS 280H [D-] or WGSS 321 [D-] or WGSS 325 [D-] or WGSS 325H [D-] or WGSS 340 [D-] or WGSS 340H [D-] or WGSS 350 [D-] or WGSS 360 [D-] or WGSS 360H [D-] or WGSS 364 [D-] or WGSS 364H [D-] or WGSS 373 [D-] or WGSS 375 [D-] or WGSS 380 [D-] or WGSS 380H [D-]
PSY 468. THE PSYCHOLOGY OF CLOSE
RELATIONSHIPS (4). Explores the research and theory on the development, maintenance, and dissolution of human relationships. The course will examine various directions to the study of interpersonal relationships, including attachment, evolutionary-biological, cognition, and interdependence. Topics will also include physical attraction, love, friendship, communication, trust, jealousy, and several issues that are specific to troubled dyadic relations. PREREQS: PSY 360 [D-]
PSY 470. ^PSYCHOMETRICS AND
PSYCHOLOGICAL TESTING (4). An introduction
to psychological measurement is provided with emphasis on the notions of reliability and validity; advanced correlation techniques are introduced. These methods are applied to contemporary tests of personality, aptitude, and achievement. (Writing Intensive Course) PREREQS: PSY 301 [D-] and (PSY 340 [D-] or PSY 370 [D-] or PSY 380 [D-] or PSY 381 [D-] or PSY 481 [D-] )
PSY 480. ^CLINICAL RESEARCH METHODS
(4). Advanced research methods used in clinical psychology research. Design of studies, assessment, data collection, and interpretation will be discussed. The clinical content area focused on will vary. (Writing Intensive Course) PREREQS: (PSY 301 [D-] and (PSY 380 [D-] or PSY 381 [D-] or PSY 481 [D-] ))
PSY 482. PSYCHOTHERAPY (4). Survey of the theory, techniques and research on the major contemporary systems of psychotherapy.

PREREQS: PSY 370 [D-] or PSY 380 [D-] or PSY 381 [D-] or PSY 481 [D-]

## PSY 483. DEVELOPMENTAL

PSYCHOPATHOLOGY (4). Developmental perspective on child and adolescent psychological disorders including causal factors, associated features, and research-supported interventions. PREREQS: PSY 350 [D-] or PSY 381 [D-] or PSY 481 [D-] and /or equivalent.

## PSY 485. BEHAVIOR MODIFICATION (4),

Review of basics of operant and classical conditioning. Research on behavior modification and behavior therapy with both normal and abnormal animals, human adults, and children. Application areas include behavior problems, handicaps, eating disorders, time management, self-control stress management, contingency contracts, and cognitive therapies. PREREQS: PSY 350 [D-] or PSY 380 [D-] or PSY 381 [D-] or PSY 481 [D-] and /or equivalent work in family life or education.

PSY 492. CONSERVATION PSYCHOLOGY (4). Explores connections between the study of human behavior and the achievement of conservation goals. Understanding how people think about and interact with nature is crucial for promoting environmental sustainability and human wellbeing. Students will examine theory and research on human cognitive, emotional, and behavioral responses to nature. PREREQS: PSY 201 [D-] and PSY 202 [D-]
PSY 493. POSITIVE PSYCHOLOGY (4).
Psychological theory, research, and interventions directed at how humans can flourish and identify and enhance positive strengths. Topics include positive emotional and cognitive states and processes, prosocial behavior, positive school and work environments, and discovering meaning in life. PREREQS: PSY 360 [D-] or PSY 370 [D-]
PSY 494. ENGINEERING PSYCHOLOGY (4). Survey human capabilities and limitations in human-machine interaction, including vision, memory, attention, motor control, and human error. Emphasis on theory and implications for system designs. PREREQS: (PSY 301 [D-] and PSY 340 [D-])
PSY 496. INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY (4). Survey of psychological research and theory relevant to organizations, industry, and other work settings. Topics include training, employee selection, performance evaluation, work attitudes, and motivation. PREREQS: PSY 360 [D-] or PSY 370 [D-]
PSY 498. HEALTH PSYCHOLOGY (4).
Psychological factors in the maintenance of good health and in the prevention of, treatment of, and recovery from illness: Behavioral contributions to illness, life-style risk factors, stress and the immune system, psychological response to symptoms and care-givers, health habits and self-care, management of pain and chronic illness, disability and terminal illness. PREREQS: PSY 330 [D-] or PSY 340 [D-] or PSY 350 [D-] or PSY 360 [D-] or PSY 370 [D-] or PSY 381 [D-] or PSY 481 [D-]
PSY 499. SPECIAL TOPICS (1-16). Newly emerging or specialized topics that can only be offered occasionally or for particular purposes. Each offering will be structured with a syllabus. This course is repeatable for a maximum of 30 credits. PREREQS: To be determined for each offering.
PSY 499H. SPECIAL TOPICS (1-16). Newly emerging or specialized topics that can only be offered occasionally or for particular purposes. Each offering will be structured with a syllabus. PREREQS: To be determined for each offering and Honors College approval.

PSY 501. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PSY 502. INDEPENDENT STUDY (1-16). Graded
$\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PSY 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits PREREQS: Departmental approval required.
PSY 505. READING AND CONFERENCE (116). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PSY 506. PROJECTS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PSY 507. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PSY 508. WORKSHOP (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PSY 510. FIELD EXPERIENCE IN HUMAN SERVICES (3-15). Practicum/internship placement in community human service agencies. Includes regular on-site supervision, relevant readings, projects, and faculty site visits. Graded $\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

PSY 514. RESEARCH METHODS I (4). An
introduction to the tools and methods that psychologists use to examine the processes that underlie human behavior. Emphasis is on the skills necessary for completing a research study: hypothesis formulation, design criteria, data collection, analysis, interpretation, write-up, and presentation of results. Utilizes a combination of readings, discussions, and class exercises. Course culminates in an independent research project proposal. PREREQS: ST 511 [B-] and graduate standing

PSY 521. ISSUES IN PROFESSIONAL PSYCHOLOGY (1). Professional development seminar focused on professional issues specific to the field of research-based psychology. Includes writing for publication, professional speaking, professional development and leadership, and current professional and research controversies. Each iteration of the course over the academic year will have a different focus. Graded P/N. This course is repeatable for a maximum of 3 credits. PREREQS: Enrollment limited to PSY doctoral students.

PSY 523. ETHICS IN PSYCHOLOGICAL RESEARCH (1). Covers research ethics in psychology. Topics include the history of research-oriented ethical guidelines, ethical principles, working with an IRB, questionable research practices, and fraud. Meets OSU's Learning Outcome regarding the ethical conduct of research. PREREQS: An undergraduatelevel psychological research methods course. Registration is restricted to graduate students.
PSY 526. PSYCHOLOGY OF GENDER (4).
Survey of theories, life cycles and contemporary problems of women and men in a social context. Scientific examination of gender related to psychological functioning and behavior. Topics can include psychological research on human similarities and differences in gender attitudes, relationships, sexuality, violence, employment, and mental health. PREREQS: PSY 202

## PSY 531. GRADUATE BEHAVIORAL

NEUROSCIENCE (4). Neurobiological underpinnings of behavior examining animal and human research on neural structure and function in relation to typical and atypical behavior, including psychiatric disorders. PREREQS: Graduate standing.
PSY 532. PHYSIOLOGICAL PSYCHOLOGY
(4). Basic vertebrate neurophysiology and neuroanatomy in relation to behavior. Neural and hormonal correlates of sensation, learning, memory and motivation. PREREQS: PSY 330 or
equivalent biological science background.
PSY 533. PSYCHOPHARMACOLOGY (4). Drug-
brain-behavior interactions. Psychoactive drugs and their relationships to normal and abnormal behavior in humans. PREREQS: Graduate standing. Biological science background helpful.
PSY 534. BRAIN AND BEHAVIOR METHODS
(4). Methodology primarily in the area of neuropsychological research. Topics include the finding and interpretation of background literature, critical evaluation of research, hypothesis formulation, experimental design, data interpretation, reporting of results and methods, and weaving a conclusion and review article. PREREQS: PSY 301 and PSY 330

PSY 537. MOTIVATION (4). Biological, learning, and cognitive approaches to human and animal motivation. Topics include evolution, homeostasis, drive, arousal, incentive motivation, achievement motivation, and social motivation. PREREQS: PSY 301 and (PSY 330 or PSY 340)
PSY 540. COGNITION RESEARCH (4).
Advanced scientific methodology primarily in the areas of attention, learning, memory, and thinking Students will design their own research projects, collect and analyze data, and write a professional report. PREREQS: PSY 301 and PSY 340
PSY 541. GRADUATE SEMINAR IN COGNITION
(4). Cognitive psychology studies the processes by which human beings notice, encode, remember, and use information. A graduate-level survey that covers the history, methods, important findings, and major theories of the field, with an emphasis on reading and critically analyzing articles from the primary research literature. Topics of interest will include perception and object recognition, attention, working memory, long-term memory, concepts and categorization, and judgment and decision making. PREREQS: Graduate standing.
PSY 542. PERCEPTION (4). Fundamental concepts of animal and human sensation and perception, with emphasis on audition and vision. Applications of psychophysical methods to research in all sensory modalities. Includes review workshops on basic mathematical, physical and physiological concepts necessary to interpret research in this field. PREREQS: PSY 301 and (PSY 330 or PSY 340)
PSY 544. LEARNING AND MEMORY (4).
Experimental and theoretical work on learning, conditioning, and memory in animals and humans. PREREQS: PSY 301 and PSY 340
PSY 548. CONSCIOUSNESS (4). Psychological, phenomenological, and physiological approaches to the content and processes of subjective awareness. Topics include philosophical issues, cortical and reticular neurophysiology, sleeping and dreaming, selective attention, imagery, and self-awareness. PREREQS: PSY 301 and PSY 340

PSY 554. COGNITIVE DEVELOPMENT (4). Discusses intellectual development from infancy to adulthood. Topics include the origin of thinking, the development of perception, attention, memory, problem solving, language, academic skills, and social cognition. Piaget, Vygotsky, and information processing approaches will be discussed. PREREQS: PSY 350 and graduate standing.
PSY 556. SOCIAL DEVELOPMENT (4). Covers theories and research concerning human social development. Topics include theories of socialization; the development of social relationships; the self-concept; emotion; sex roles; social cognition; pro-social behavior; morality; selfcontrol; and aggression. PREREQS: PSY 350 and graduate standing.
PSY 558. LANGUAGE ACQUISITION (4).
Psychological processes involved in the acquisition and use of language throughout childhood. Biological, cognitive, and social influences on language will be discussed, as well
as personal uses of language, such as language in thought and reading. PREREQS: PSY 350
PSY 560. ADVANCED SOCIAL RESEARCH
METHODS (4). Advanced experimental research methods in the social sciences. Issues in psychological construct operationalization, experimental design, data collection, analysis, and report writing will be emphasized. PREREQS: PSY 301 and PSY 360

PSY 561. GRADUATE SOCIAL PSYCHOLOGY (4). A graduate level survey course of the theories, methods, and empirical findings that constitute the field of social psychology. Topics will include, but not be limited to, person perception, social cognition, attitudes, attitude change, persuasion, interpersonal attraction, relationships, small-group processes, altruism, and aggression. PREREQS: Graduate standing
PSY 564. SOCIAL COGNITION (4). Research and theory concerning cognitive structures and processes underlying social judgment and social behavior. Topics include attribution theory, social inference, person memory, schema-based information processing. PREREQS: PSY 360 and graduate standing.
PSY 565. WOMEN, WEIGHT, AND BODY IMAGE
(4). Focuses on women's increasing struggles with weight, eating disorders, and broader body image issues in contemporary society. Explores how social institutions such as media, medicine, government contribute to weight bias and unhealthy standards for appearance. Examines weightism as a system of oppression that intersects with other systems of oppression including sexism, racism, classism, heterosexism, ableism, and ageism.
PSY 566. FAT STUDIES (4). Examines body weight, shape, and size as an area of human difference subject to privilege and discrimination that intersects with other systems of oppression based on gender, race, class, age, sexual orientation, and ability. Employs a multidisciplinary approach spanning the behavioral sciences and humanities. Frames weight-based oppression as a social justice issue, exploring forms of activism used to counter weightism perpetuated throughout various societal institutions. CROSSLISTED as WGSS 466/WGSS 566 PREREQS: WGSS 223 or WGSS 223H or WGSS 224 or WGSS 240 or WGSS 262 or WGSS 262H or WGSS 270 or WGSS 280 or WGSS 280 H or WGSS 321 or WGSS 325 or WGSS 325 H or WGSS 340 or WGSS 340 H or WGSS 350 or WGSS 360 or WGSS 360H or WGSS 364 or WGSS 364H or WGSS 373 or WGSS 375 or WGSS 380 or WGSS 380H

## PSY 570. PSYCHOMETRICS AND

PSYCHOLOGICAL TESTING (4). An introduction to psychological measurement is provided, with emphasis on the notions of reliability and validity; advanced correlational techniques are introduced. These methods are applied to contemporary tests of personality, aptitude, and achievement.
PREREQS: PSY 301 and (PSY 340 or PSY 370)
PSY 571. GRADUATE PSYCHOMETRICS (4). A graduate level introduction to psychological testing theory and practice, and to ethical, sociopolitical, psychological, and psychometric issues in the use of psychological tests. Particularly emphasizes basic psychometric principles that are important in scale construction, test evaluation, and practical assessment. PREREQS: ST 511 [B-] and ST 512 [B-]
PSY 580. CLINICAL RESEARCH METHODS (4).
Advanced research methods used in clinical psychology research. Design of studies, assessment, data collection, and interpretation will be discussed. The clinical content area focused on will vary. PREREQS: PSY 301 and (PSY 380 or PSY 381 or PSY 481)

PSY 581. GRADUATE SEMINAR IN CLINICAL
RESEARCH AND THEORY (4). Focuses on major concepts, theory, and empirical findings on the
causes and treatment of psychological disorders
The seminar emphasizes culture, context, bias, and stigma, as well as application of principles of clinical science to students' graduate program research agendas. PREREQS: Graduate standing
PSY 582. PSYCHOTHERAPY (4). Survey of the theory, techniques and research on the major contemporary systems of psychotherapy. PREREQS: PSY 370 or PSY 381

PSY 583. DEVELOPMENTAL
PSYCHOPATHOLOGY (4). Developmental perspective on child and adolescent psychological disorders including causal factors, associated features, and research-supported interventions. PREREQS: PSY 350 or PSY 381 or PSY 481
PSY 585. BEHAVIOR MODIFICATION (4).
Review of basics of operant and classical conditioning. Research on behavior modification and behavior therapy with both normal and abnormal animals, human adults, and children. Application areas include: behavior problems, handicaps, eating disorders, time management, self-control, stress management, contingency contracts, and cognitive therapies. PREREQS: PSY 350 or equivalent work in family life or education.
PSY 591. GRADUATE SEMINAR IN HEALTH PSYCHOLOGY (4). Covers the theories, methods and empirical findings that constitute the field of health psychology. Topics include, but are not limited to, the interaction of multiple factors involved in etiology, prevention, treatment, and course of illness and disability; health behavior, health promotion, and health risks; stress and coping in health; long-term care and adaptation to chronic illness or disability; practice of institutional healthcare. PREREQS: Graduate standing.
PSY 592. CONSERVATION PSYCHOLOGY (4).
Explores connections between the study of human behavior and the achievement of conservation goals. Understanding how people think about and interact with nature is crucial for promoting environmental sustainability and human wellbeing. Students will examine theory and research on human cognitive, emotional, and behavioral responses to nature. PREREQS: PSY 201 and PSY 202

PSY 593. POSITIVE PSYCHOLOGY (4).
Psychological theory, research, and interventions directed at how humans can flourish and identify and enhance positive strengths. Topics include positive emotional and cognitive states and processes, prosocial behavior, positive school and work environments, and discovering meaning in life. PREREQS: PSY 360 or PSY 370
PSY 594. ENGINEERING PSYCHOLOGY (4). Survey human capabilities and limitations in human-machine interaction, including vision, memory, attention, motor control, and human error. Emphasis on theory and implications for system designs. PREREQS: (PSY 301 and PSY 340)

PSY 596. INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY (4). Survey of psychological research and theory relevant to organizations, industry, and other work settings. Topics include training, employee selection, performance evaluation, work attitudes, and motivation. PREREQS: PSY 360 and PSY 370
PSY 598. HEALTH PSYCHOLOGY (4).
Psychological factors in the maintenance of good health and in the prevention of, treatment of, and recovery from illness: Behavioral contributions to illness, life-style risk factors, stress and the immune system, psychological response to symptoms and care-givers, health habits and self-care, management of pain and chronic illness, disability and terminal illness. PREREQS: 300 -level course in psychology.
PSY 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 99 credits. PREREQS: To be determined for each offering.

Policy is about the way we make decisions in both private and public contexts. Faculty and students in the School of Public Policy are interested in a wide variety of decision contexts and are particularly interested in advancing the social and policy-related dimensions of OSU's three areas of distinction: sustainable ecosystems, health and wellness, and economic growth and progress. The

School of Public Policy offers undergraduate majors and minors in economics, political science, and sociology, as well as the Master of Public Policy (MPP) degree, PhD in Public Policy, and graduate minors in political science and sociology. School faculty members also participate in the Master of Arts in Interdisciplinary Studies (MAIS) program.

## FACULTY

Professors Conway, M. Edwards, Emerson, Färe, Gallagher, Lach, Plaza, Ray, Steel, C. Tremblay, V. Tremblay, Warner, Weber
Associate Professors Akins, Below, Cramer, Hammer, Henderson, Inderbitzen, Li, Loges, Meng, Ortiz, Schroeder, Solberg, Valls
Assistant Professors Baker, Bernell, Boudet, Burkhardt, Eisenhuth, Hurst, Johnston, Jones, Kretschmer, Lin, Pugatch, Spalding, Stout, Thompson, Vue Instructors Andersen, Chesbro, Clark, C. Soltau Nelson, M. Nelson, Stanley, Wolters
Professor Emeriti Clinton, Cordray, Foster, Grosskopf, Lunch, Sahr

## Undergraduate Majors

Economics (BA, BS, HBA, HBS)
Options
Law, Economics and Policy
Managerial Economics
Mathematical Economics
Political Science (BA, BS, HBA, HBS)
Options
Environmental and Energy Politics
International Affairs
Law and Politics
Sociology (BA, BS, HBA, HBS)
Options
Crime and Justice
Environmental and Natural Resource Sociology
Social Science (BA, BS) (OSU-Cascades only)
Option
Community Development and Leadership

## Minors

Asian Studies

## Economics

Political Science
Sociology

## Graduate Major

Public Policy (MPP, PhD)

```
Graduate Areas of Concentration
Energy Policy
Environmental Policy
International Policy
    Law, Crime, and Policy
    Rural Policy
    Science and Technology Policy
    Social Policy
```

## Graduate Minors

Political Science
Sociology

## Master of Arts in Interdisciplinary

## Studies

(See http://liberalarts.oregonstate. edu/spp/sociology/programs/ master-arts-interdisciplinary-studies-mais)

## UNDERGRADUATE PROGRAMS

The School of Public Policy offers undergraduate major and minor programs in economics, political science, and sociology.

## Economics Program

The economics program is an excellent choice for students interested in:

- Law school or graduate programs in business, economics, public administration or other social sciences.
- Careers in business or public management.
- Becoming wiser consumers and better-informed citizens.
The study of economics provides a framework for logical thought that can be used to address a wide variety of practical problems and situations. It can provide uncommon insights into society itself. Indeed, people holding degrees in economics are increasingly sought for positions of responsibility and authority in government, business, and industry. The economics major is useful preparation for various careers and for graduate study in many fields, primarily because it does not lead simply to the accumulation of facts but rather develops analytical skills that can be used in many ways.

## Political Science Program

Graduates of the political science program pursue:

- Careers in all levels of government, foreign service, national and international nongovernmental organizations, journalism, business or public management.
- Law school or graduate programs in political science, public administration, public policy, business, or other social sciences.
- Elected office.

Students can focus their interests in different subfields, including American politics, public law, political theory, international relations, and comparative politics (for example, Asia, Latin America, Western Europe, Russia). Political science majors are encouraged to incorporate a minor in other social science fields such as economics, psychology, or sociology, or in a field of interest related
to their specialization in political science.
For example, students with an interest in international relations or comparative politics may choose to minor in a language or in history, emphasizing a specific part of the world. Political science majors also are encouraged to consider the International Degree and $\mathrm{IE}_{3}$ Global Internships.

## Sociology Program

Graduates of the sociology program pursue:

- Careers in community development, criminal justice, business, public administration, social services, recreation, and research and teaching.
- Graduate programs in sociology, criminology, public policy, social services, human resources, law, social work and other social sciences.
Sociology is the study of human social behavior and sociologists examine interactions within and between groups and resulting social institutions. The undergraduate program in sociology provides a general analysis and broad understanding of human societies and culture for persons in all fields. Selecting courses around a topic or theme of interest adds meaning to one's education and strengthens the base of understanding from which one can pursue a career or further education. Two options are currently available for those interested - Crime and Justice, and Environmental and Natural Resource Sociology - although students can shape a custom theme such as international development or social policy.

## GRADUATE PROGRAMS

The School of Public Policy offers a Master of Public Policy (MPP) degree, PhD in Public Policy, and graduate minors in Political Science and Sociology, and courses applicable toward the graduate degree in Applied Economics. Faculty members also participate in the Master of Arts in Interdisciplinary Studies (MAIS) program.

## Master of Public Policy (MPP)

Graduates of the MPP program:

- Are employed at all levels of government as policy analysts, project managers, and managers.
- Work in national and international nongovernmental organizations like the United Nations.
- Pursue further graduate training in law, public administration, public affairs, public policy, and other social science disciplines.
Policy students at OSU focus their studies around environmental and natural resource policy, international policy, social policy, and rural policy, working with strong researchers around campus. Internships with agencies and organizations give policy students real world ex-
perience and networks to enhance their classroom education.

## PhD in Public Policy

The PhD in Public Policy prepares students for academic or nonacademic research careers in the public, private, and nongovernmental sectors. The Public Policy Graduate Program accepts students with backgrounds in related academic disciplines. Like the MPP, the PhD program offers concentrations in energy policy; international policy; law, crime, and policy; rural policy; science and technology policy; and/or social policy.

## Master of Arts in Interdisciplinary

 Studies (MAIS)The MAIS program is designed to meet the particular needs and interests of individual students and features collaborative work in any two or three pertinent departments or schools. Political science and sociology faculty members may serve as one or two of the minor fields of concentration.

## GRADUATE MINORS

## Political Science

Master's or PhD students interested in adding a Political Science minor should follow the guidelines within their major program in declaring a minor. All students declaring political science as a graduate minor must contact the program coordinator prior to doing so. See the Political Science website http://gradschool.oregonstate.edu/programs/9600 for a listing of requirements for the minor concentration.

## Sociology

Master's or PhD students interested in adding a Sociology minor should follow the guidelines within their major program in declaring a minor. The minimum number of credits for sociology is 15 or higher if required by the major. All students declaring sociology as a graduate minor must contact the program coordinator prior to doing so. See the Sociology website http://liberalarts. oregonstate.edu/spp/sociology/programs/ graduate-programs/graduate-minor for a listing of requirements for the minor concentration.

## UNDERGRADUATE MAJORS WITH OPTIONS

ECONOMICS (BA, BS, CRED, HBA, HBS)

## Also available via Ecampus.

Businesses want employees who can think, communicate orally, write, and solve problems and who are comfortable with quantitative analysis. The traditional economics major perfectly prepares students to meet these demands.
Economics Core Curriculum (32)
ECON 201. *Introduction to

Microeconomics (4)
ECON 202. *Introduction to
Macroeconomics (4)
ECON 411. Advanced Microeconomic
Theory (4)
or ECON 311. Intermediate
Microeconomic Theory (4)

## MATHEMATICAL ECONOMICS OPTION

As the economics profession becomes increasingly mathematical, economics majors who plan to go to graduate school need a strong math background. The Mathematical Economics option provides the necessary mathematical preparation for graduate school bound economics majors. It also serves students who desire a more quantitative program or who come into the major with significant math preparation to apply math toward their degrees in economics.

## Economics Core Curriculum (32)

Option Code: 888

## POLITICAL SCIENCE (BA, BS, CRED, HBA, HBS)

## Also available via Ecampus.

Political Science is the systematic study of politics wherever it takes place-in governmental institutions, the international arena, and civil society. Political science majors at Oregon State may choose the general political science major, or one of the three options that focus on law and politics, international affairs, or environmental and energy politics. All political science majors learn to think critically, write clearly and speak persuasively. They learn the ideas of great political thinkers, learn the political fundamentals behind the headlines, and have engaging discussions from all points of view with other students and professors.

Students selecting the Political Science major must complete 52 credits of political science course work, of which at least 36 credits must be upper-division courses. As part of these overall credit totals, Political Science majors must complete:

## I. Foundation Courses Three of the four introductory courses:

The school encourages students to take the foundation courses in their first or second year.
PS 201. *Introduction to United States Government and Politics (4)
PS 204. *Introduction to Comparative Politics (4)
PS 205. *Introduction to International Relations (4)
PS 206. *Introduction to Political Thought (4)

Students who choose to specialize in one of the options for the major are required to take two of the introductory courses as specified for the option and choose the third introductory course.

Few upper-division political science courses have enforced prerequisites, but taking the corresponding intro course is often good preparation (for example, PS 201 Introduction to United States Government would assist with PS 321 Con-
stitutional Law: Government Powers and Constraints).

## II. Methods/WIC

The research methods and WIC course. The school encourages students to take the Methods/WIC course late in their second or early in their third year. PS 300. ^Research Methods (4)

## III. Upper-Division Subfield Courses

A. For the general major, students must take:
One course each from at least three of the four following subfields:

1. American national government and politics, to include the judiciary, state and local government, public policy, public administration: PS 311, 312, 313, 314, 315, 316, 317, 321, 322, 323, 326, 328, 331, 371, 374, 375, $425,455,473,475,476,477,478$.
2. Comparative politics: PS 340,341 , $343,344,345,348,350,441,446$, 449.
3. International relations: PS 351, 356, $454,455,457,458,470,477$.
4. Political philosophy: PS 361, 362, 363, 365, 461, 462.
5. B. For the options, students choose from a list of courses approved for the option.

## IV. Potential for Specialization

Students may choose a general political science major or may choose from one of three transcript-visible options:

1. Environmental Politics and Policy 2. International Affairs
2. Law, Politics, and Society

## V. Potential for Learning Outside the Classroom.

Political science majors are strongly encouraged to pursue experiential learning and other educational opportunities outside of the classroom, and these experiences can be used to fulfill some political science graduation requirements. Such experiences can include research, thesis writing, projects, or internship. Credits will be placed in the appropriate PS 401-PS 410 designator. A maximum of 8 credits from any combination of PS 401-PS 410 may be applied to the major, although additional credits from courses in this range may be applied to general graduation requirements. Additional experiential learning opportunities include "field schools" and study abroad. Students should discuss all of these opportunities with the political science undergraduate advisor.

## VI. Additional Requirements for the Major

- Majors are required to maintain a minimum cumulative 2.00 gradepoint average for all political science course work.
- Majors must earn a C- grade or better in PS 300.
- Students must complete the BA or BS requirements specified by the College of Liberal Arts.
Footnotes:
* Baccalaureate Core Course (BCC)
${ }^{\wedge}$ Writing Intensive Course (WIC)

## Major Code: 960

## OPTIONS

## ENVIRONMENTAL AND ENERGY POLITICS OPTION

The Environmental and Energy Politics option under the Political Science major provides students with the opportunity to focus their undergraduate studies on topics involving:

- Historical and contemporary environmental problems
- Governmental and nongovernmental efforts to address problems at the local, state, federal and international levels
- Interactions between key actors and institutions involved in environmental policymaking in the United States and internationally

## Foundation Courses (12 credits)

PS 201. *Introduction to United States Government and Politics (4)
PS 205. *Introduction to International Relations (4)
PS 204. *Introduction to Comparative Politics (4)
or PS 206. *Introduction to Political Thought (4)

## Methods/WIC (4 credits)

PS 300. ${ }^{\wedge}$ Research Methods (4)

## Upper-Division Option Courses (24 credits)

16 to 24 credits from the political science courses listed below. Up to 8 upperdivision credits can come from classes listed below in economics and sociology. Credits from all courses below must add up to at least 24 . Other courses applied to this total must be approved by the department.
PS 314. Interest Group Politics (4)
PS 331. *State and Local Politics (4)
PS 371. Public Policy Problems (4)
PS 372. Public Administration (4)
PS 374. *Sustainable Living: Practices and Policies (4)
PS 449. ^Topics in Comparative Politics (4)
PS 455. *The Politics of Climate Change (4)
PS 461. Environmental Political Theory (4)
PS 470. Global Food Politics and Policy (4)
PS 473. US Energy Policy (4)
PS 475. Environmental Politics and Policy (4)
PS 476. *Science and Politics (4)
PS 477. International Environmental Politics and Policy (4)
PS 478. Renewable Energy Policy (4)
Up to 8 credits from the list below:
ECON/AEC 352. *Environmental
Economics and Policy (3)
ECON 466. ${ }^{\wedge}$ Economics of Traditional and
Renewable Energy (4)
SOC 381. Social Dimensions of

Sustainability (4)
SOC 456. *Science and Technology in Social Context (4)
SOC 475. Rural Sociology (4)
SOC 480. *Environmental Sociology (4)
SOC 481. *Society and Natural Resources (4)
SOC/ANS/FES/FW 485. *Consensus and Natural Resources (3)
Political Science Electives (12 credits)
Any other political science courses may be taken to reach the minimum of 52 total credits in the major with at least 36 of these at the upper-division level.
Potential for Learning Outside the

## Classroom

Political science majors are strongly encouraged to pursue experiential learning and other educational opportunities outside of the classroom, and these experiences can be used to fulfill some political science graduation requirements. Such experiences can include research, thesis writing, projects, or internship. Credits will be placed in the appropriate PS 401-PS 410 designator. A maximum of 8 credits from any combination of PS 401-PS 410 may be applied to the major, although additional credits from courses in this range may be applied to general graduation requirements. Additional experiential learning opportunities include "field schools" and study abroad. Students should discuss all of these opportunities with the political science undergraduate advisor.

SOCIOLOGY (BA, BS, CRED, HBA, HBS)

## Also available via Ecampus.

Sociology is the study of human social behavior and sociologists examine interactions within and between groups and resulting social institutions. The undergraduate program in sociology provides a general analysis and broad understanding of human societies and culture for persons in all fields. Selecting courses around a topic or theme of interest adds meaning to one's education and strengthens the base of understanding from which one can pursue a career or further education. Two options are currently available for those interested - Crime and Justice, and Environmental and Natural Resource Sociology - although students can shape a custom theme such as international development or social policy.

## Core

SOC 204. *Introduction to Sociology (3)
[Prereq. to all upper-division sociology courses] Also offered via Ecampus.
SOC 315. ${ }^{\wedge}$ Methods I: Research Design (4) Also offered via Ecampus.
SOC 316. Methods II: Quantitative Analysis
(4) Also offered via Ecampus.

SOC 413. Sociological Theory (4) Also offered via Ecampus.

## Sociology electives (33)

Maximum of 12 at lower division

Maximum of 8 credits in courses numbered SOC 401 to 410.

## Total=48

Transfer students may apply a maximum of 12 credits of lower-division sociology credits toward a degree in sociology.

A minimum grade-point average of 2.50 must be earned in sociology course work. A grade of C - or above is required in SOC 315, SOC 316, and SOC 413.

## OPTIONS

CRIME AND JUSTICE OPTION
The Crime and Justice option provides students with the ability to apply social science concepts and approaches to better understand and analyze relationships between crime, justice, and public policy from a sociological perspective. The option has particular relevance for sociology students aspiring to careers in criminal justice, law, or social services, as well as those preparing for advanced/ graduate programs in criminology, criminal justice, or public policy. Academic internships are available in local criminal justice and social service agencies, offering a unique combination of scholarly analysis and practical experience for students seeking careers in fields such as law, policing, corrections, and social work.

## Crime and Justice

23 credits are required from any of the below:
SOC 241. Introduction to Crime and Justice (3)

SOC 340. Deviant Behavior and Social Control (4)
SOC 410. Internship (1-4)**
SOC 440. Juvenile Delinquency (4)
SOC 441. Criminology and Penology (4)
SOC 442. Sociology of Drug Use and Abuse (4)

SOC 444. Inside Out: Prisons, Communities and Prevention (4)
SOC 448. Law and Society (4)
SOC 449. Law, Crime, and Policy (4)
**Internship placement must be in crime, law or related field to count for option. Major paper required for $2+$ credits.

## Total=23 credits

Option Code: 995

## ENVIRONMENTAL AND

NATURAL RESOURCE SOCIOLOGY OPTION
Also available via Ecampus.
The option is designed to provide students with the ability to apply social science concepts and approaches to better understand relationships between societies and their bio-physical environment from a sociological perspective. This
option has great relevance for sociology students aspiring to careers in natural resource and environmental policy, planning, management, and education, as well as preparation for advanced/graduate programs related to environmental law and environment/natural resource sociology or policy.

## Required Courses

SOC 480. *Environmental Sociology (4)+ SOC 481. *Society and Natural Resources (4)+

## Elective Courses

ANS/FES/FW/SOC 485. *Consensus and
Natural Resources (3)+
SOC 360. *Population Trends and Policy (4)+
SOC 454. *Leisure and Culture (4) (SS)+
SOC 456. *Science and Technology in a Social Context (4)+
SOC 475. Rural Sociology (4)+
SOC 499. Special Topics (related to community and demography) (1-16)
SOC 410. Internship Experience (1-4)
No more than two of the following elective courses can count toward the option:
ANTH 481. *Natural Resources and Community Values (3)+
GEO 420/GEOG 430. Resilience-Based
Natural Resource Management (3)
GEO 423/GEOG 450. Land Use in the
American West (3)
PHL 440. *Environmental Ethics (3) (HC)+
PHL 443. *World Views and Environmental
Values (3) (NC)+
PS 475. Environmental Politics and Policy (4)+

NR 455. Natural Resource Decision Making
(3)+ (on-campus section needs instructor approval)

## Total=21

HC = CLA (Humanities core)
NC = CLA (Non-Western core)
Option Code: 642

## UNDERGRADUATE MINORS

## ASIAN STUDIES MINOR

The minor program will provide an opportunity for students majoring in fields such as business, engineering, or sciences who will be working in Asia or with Asians. They will gain a significant degree of cultural literacy that will be critical for their professional success. In addition, the program will be an outstanding supplement to a traditional liberal arts major for students with particular interests in Asia, who want to study abroad, or who plan to go on to do graduate work in areas with concentrations in aspects of Asia.

## Required 27-28 credits

Select 19-20 credits from the
following (two disciplines):
ANTH 316. *Peoples of the World-South and Southeast Asia (3)
ANTH 318. *Peoples of the World-China
(3)

ANTH 319. *Peoples of the World-Japan and Korea (3)
ART 208. *Introduction to Asian Art (3)
ART 310. *Early Chinese Art and
Archaeology (3)
ART 311. *Late Chinese Art and Culture (3)
ART 313. *Art of Japan (3)
BA 347. International Business (4)
CHN 331, 332, 333. *Chinese Culture
$(3,3,3)$ [Terminated summer 2017]
ES 231. *Introduction to Asian American Studies (4)
ES 233. *Asian Pacific American Activism and Empowerment (4)
ES 332. Asian Pacific Americans and the Media (4)
GEOG 313. *Geography of Asia (3)
GEOG 330. *^Geography of International
Development and Globalization (3)
HST 391. *Traditional China and Japan (4)
HST 392. *Modern China and Japan (4)
HST 396. *Gender, Family and Politics in Traditional China (4)
HST 397. *Gender, Family and Politics in Modern China (4)
JPN 331, 332, 333. *Japanese Culture (3,3,3)
[Terminated summer 2017]
PHL 208. Introduction to Buddhist Traditions (4)
PHL 312. *Asian Thought (4)
PHL 315. *Gandhi and Nonviolence (4)
PHL 371. *Philosophies of China (4)
PS 348. *Chinese Politics (4)
PS 350. *Japanese Politics (4)
PS 356. International Politics Asia Pacific (4)
Select 8-9 credits from the following:
ANTH 488. *Business and Asian Culture (3)
HST 494. Modern Japan: A Cultural History (4)

HST 495. China in the Twentieth Century (4)

PHL 430. History of Buddhist Philosophy (4)

PHL 432. *Yoga and Tantric Traditions (4)
PS 446. East Asian Political Economy (4)
PS 457. US-China Relations (4)

## Footnotes:

* Baccalaureate Core Course (BCC)
${ }^{\wedge}$ Writing Intensive Course (WIC)

## Minor Code: 938

## ECONOMICS MINOR

Also available via Ecampus.
Students minoring in economics must complete a minimum of 27 credits with a GPA of at least 2.0 in their program of study. A maximum of two classes (8 credits) may be taken on an $\mathrm{S} / \mathrm{U}$ basis. Course requirements for the Economics minor:
ECON 201. *Introduction to
Microeconomics (4)
ECON 202. *Introduction to
Macroeconomics (4)
ECON 311. Intermediate Microeconomic
Theory I (4)
or ECON 411. Advanced Microeconomic Theory (4)
Plus upper-division courses in economics (15)
Notes:

- ST 351, Introduction to Statistical

Methods, serves as a substitute for 4 credits of economics upper-division course work when ECON 424, Introduction to Econometrics, is part of the student's program.

- Students cannot receive credit toward the minor for both ECON 311 and ECON 411.
- Students are advised to consult with the Economics advisor before completing their course work.

POLITICAL SCIENCE MINOR

## Also available via Ecampus.

The Political Science Program offers students the ability to augment their primary major by adding a minor in political science. Because politics and policy are relevant to all disciplines, understanding how your discipline interacts with political systems and policymaking can enhance any program of study and strengthen students' graduate school applications and resumes for future employment.

The structure of the Political Science minor mirrors that of the major. In both, there is a "general" program of study that provides a wide array of choices among courses, as well as three "tracks" that afford students the opportunity for specialization. All students in the minor must complete at least seven courses ( 28 credits), of which at least 3 courses ( 12 credits) must be taken at Oregon State University. Students must maintain a 2.0 GPA in their OSU courses. In addition, no more than four (4) credits from PS 401-PS 410 may count toward the minor.

## General Minor

To complete the general Political Science minor, students must take two introductory level courses (chosen from PS 201, PS 204, PS 205, and PS 206); and five upper-division (300- or 400-level) courses in political science.

## Minor Tracks

Students can select one of three concentrations in the minor: Law and Politics;International Affairs; or Environmental and Energy Politics. These tracks correspond to the options within the Political Science major.

To complete any of these tracks within the minor, students must take the two introductory courses for the track, and at least four courses from the list of upper-division courses in the track. One of these may be a non-political science course on the list. The fifth upper-division course may be a political science course on the list, or may be an upperdivision PS course not on the list.

## Law and Politics Track

Introductory Courses:
PS 201. *Introduction to United States Government and Politics (4)
PS 206. *Introduction to Political Thought (4)

## Upper-Division Courses:

PS 311. Congressional Politics (4)
PS 312. Presidential Politics (4)
PS 321. Constitutional Law: Government Powers and Constraints (4)
PS 322. *Constitutional Law: Civil Rights and Liberties (4)
PS 323. Constitutional Law: Rights of the Accused (4)
PS 325. *Gender and Law (4)
PS 326. Judicial Process and Politics (4)
PS 331. *State and Local Politics (4)
PS 361. Classical Political Thought (4)
PS 362. Modern Political Thought (4)
PS 363. *Gender and Race in American Political Thought (4)
PS 365. American Political Thought (4)
PS 370. *Science, Religion, and Politics (4)
PS 371. Public Policy Problems (4)
PS 372. Public Administration (4)
PS 375. *The Civil Rights Movement and Policies (4)
PS 454. International Law and Organizations (4)
PS 462. Theories of Law (4)
ECON 461. Law, Economics, and Regulation (4)

SOC 340. Deviant Behavior and Social Control (4)
SOC 438. US Immigration Issues in the 21st Century (4)
SOC 440. Juvenile Delinquency (4)
SOC 441. Criminology and Penology (4)
SOC 442. Sociology of Drug Use and Abuse (4)

SOC 448. Law and Society (4)

## Total $=\mathbf{2 8}$ credits

## International Affairs Track

## Introductory Courses:

PS 204. *Introduction to Comparative Politics (4)
PS 205. *Introduction to International Relations (4)

## Upper-Division Courses:

PS 340. Eastern and Central European Politics (4)
PS 341. *European and EU Politics (4)
PS 343. *Russian Politics (4)
PS 344. *Latin American Politics (4)
PS 345. *Politics of Developing Nations (4)
PS 348. *Chinese Politics (4)
PS 350. *Japanese Politics (4)
PS 351. American Foreign Policy (4)
PS 356. International Politics of Asia Pacific (4)
PS 441. Democratization (4)
PS 446. East Asian Political Economy (4)
PS 454. International Law and Organizations (4)
PS 455. *The Politics of Climate Change (4)
PS 457. US-China Relations (4)
PS 458. *International Political Economy (4)
PS 470. Global Food Politics and Policy (4)
PS 477. International Environmental
Politics and Policy (4)
ECON 340. International Economics (4)
ECON 440. Economics of Globalization (4)

ECON 441. International Finance Theory and Policy (4)
ECON 455. Economic Development (4)
SOC 360. *Population Trends and Policy (4)
SOC 460. The Sociology of Globalization (4)
SOC 466. International Development: Gender Issues (4)

## SOCIOLOGY MINOR

## Also available via Ecampus.

Undergraduate students may elect a Sociology minor to complement course work in their major discipline. The Sociology minor also is available through Extended Campus (Ecampus).
Transfer students may apply a maximum of 12 credits of lower-division sociology credits toward the Sociology minor.
A minimum GPA of 2.00 must be earned in sociology course work.

## Core (7)

SOC 204. *Introduction to Sociology (3)
(Prerequisite to all upper-division courses)
Select one theory or methods course

## from the following:

SOC 340. Deviant Behavior and Social Control (4)
SOC 418. Qualitative Research Methods (4)
SOC 424. Social Psychology (4)

SOC 426. *Social Inequality (4)+
SOC 450. Sociology of Education (4)+
SOC 452. Sociology of Religion (4)
SOC 456. *Science and Technology in Social Context (4)+
A maximum of 12 credits of lower-division courses.
A maximum of 3 credits from SOC 401 to SOC 410.
Additional sociology courses as necessary to total 27 credits.

## Total=27

## PUBLIC POLICY (MPP, PhD)

Graduate Areas of Concentration
Energy policy; environmental policy; international policy; law, crime, and policy; rural policy; science and technology policy; social policy

## Also available via Ecampus at the

 master's level only.Oregon State University offers graduate programs in public policy to students interested in energy policy; environmental policy; international policy; law, crime, and policy; rural policy; science and technology policy; and/or social policy. The degrees are granted by the College of Liberal Arts and provide graduate education for students wishing to develop their interests and careers in the public and nonprofit sectors. The Master of Public Policy (MPP) specifically prepares students for careers in domestic and international organizations or preparation for PhD studies. The PhD in Public Policy prepares students for academic or nonacademic research careers in the public, private, and nongovernmental sectors. The Public Policy Graduate Program accepts students with backgrounds in related academic disciplines. The degrees are designed to provide individuals with analytic skills, an understanding of public policy processes, and substantive knowledge in a specific policy area.

## GRADUATE MINORS

## POLITICAL SCIENCE GRADUATE MINOR

## Graduate Areas of Concentration

American politics, judicial politics, public administration, political theory, state and local government, international relations, comparative politics, gender politics, environmental policy
Graduate work in Political Science may serve as a field of study for a Master of Arts in Interdisciplinary Studies (MAIS) degree or as a minor in other advanced degree programs. The political science program aims to provide a systematic understanding of political processes, institutions, theories, and behavior. Students are encouraged to acquire competence in statistics as aids to analyzing political phenomena.
Students may choose the "generic" graduate minor, which simply requires 16 credits of graduate course work in political science for Master's students and 20 credits for doctoral students. Or, students may choose one of two tracks within the minor: Environmental and Energy Politics; and International Politics. Students pursuing a track may choose any of the political science courses listed for that track. Students may also count one of the non-political science courses listed under the track toward the political science graduate minor.
For the generic graduate minor in political science, no specific courses are required. Master's students must take 16 credits of graduate course work in political science, and PhD students must take 20 credits. Any combination of graduate political science courses will satisfy this requirement, but a maximum of 4 credits from PS 501-510 may be counted toward the minor.
For one of the two tracks, Master's students must choose four (4) courses from the list of courses for the track, at least three (3) being from political science; and PhD students much choose five (5) courses, at least four (4) being from political science. Students may take one non-political science course on the list, and may also count up to 4 credits from PS 501-510 toward the option.

## Environmental and Energy Politics Track

## Political Science Courses

PS 549. Topics in Comparative Politics (4)
PS 555. The Politics of Climate Change (4)
PS 570. Global Food Politics and Policy (4)
PS 573. US Energy Policy (4)
PS 575. Environmental Politics and Policy (4)
PS 576. Science and Politics (4)
PS 577. International Environmental
Politics and Policy (4)
PS 578. Renewable Energy Policy (4)

## Non-Political Science Courses

ECON 566. Economics of Traditional and Renewable Energy (4)
PPOL 545. International Marine Policy (4)
PPOL 546. The Policy and Law of United States Coastal Governance (4)
PPOL 547. Integrated Policy: Food, Energy,
Water, Climate (4)

## SOCIOLOGY GRADUATE MINOR

Graduate Areas of Concentration
Environmental and natural resources, international sociology, social policy
Sociology in the School of Public Policy serves as a minor field in the Master of Arts in Interdisciplinary Studies degree program and participates as a minor field in other advanced degree programs. The MAIS program is designed to meet the particular needs and interests of the individual student and features collaborative work in any two other pertinent departments. Further information can be obtained by writing the School of Public Policy, 307 Fairbanks Hall, OSU, Corvallis, OR 97331-3703.

## Minor Code: 9800

## ■ ECONOMICS COURSES

ECON 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
ECON 201. *INTRODUCTION TO
MICROECONOMICS (4). An introduction to microeconomic principles including the study of price theory, economic scarcity, consumer behavior, production costs, the theory of the firm, market structure, and income distribution. Other selected topics may include market failure international economics, and public finance. (SS) (Bacc Core Course) PREREQS: MTH 111 or equivalent is recommended.

## ECON 202. *INTRODUCTION TO

MACROECONOMICS (4). An introduction to macroeconomic principles including study of the theories of output determination, consumption, investment, inflation, unemployment, and fiscal and monetary policy. Other selected topics may include the study of the international balance of payments, growth and development, and urban and regional problems. (SS) (Bacc Core Course) PREREQS: MTH 111 or equivalent is recommended.

ECON 311. INTERMEDIATE MICROECONOMIC
THEORY (4). An examination of demand theory, production and cost theory, game theory, behavioral economics, competitive and imperfectly competitive markets, and general equilibrium and welfare economics. ECON 311 and ECON 411 cannot both be taken for credit toward the economics major. PREREQS: ECON 201 [D-] or ECON 201H [D-]
ECON 312. INTERMEDIATE MICROECONOMIC
THEORY II (4). An examination of the theories of imperfect competition, input markets, general equilibrium, and welfare economics. PREREQS: ECON 311 [D-]

ECON 315. INTERMEDIATE MACROECONOMIC
THEORY (4). An examination of macroeconomic aggregates, income determination, aggregate demand and supply. The basic macroeconomic models will be discussed such as Keynesian, Classical, Monetarist, and Neo-Classical. ECON 315 and ECON 415 cannot both be taken for credit toward the Economics major. PREREQS: (ECON 201 [D-] or ECON 201H [D-] ) and (ECON 202 [D-] or ECON 202H [D-] )
ECON 316. INTERMEDIATE MACROECONOMIC
THEORY II (4). An examination of individual sectors of the macro economy, including theories of consumption, investment, money demand and money supply; an introduction to economic growth, open economy macroeconomics, and monetary and fiscal policy issues. PREREQS: ECON 315

## ECON 329. INTRODUCTION TO

MATHEMATICAL ECONOMICS (4). Mathematical methods of economic analysis. Theory of economic structure and optimization developed through calculus and linear algebra, dynamic systems analyzed through integral calculus and difference and differential equations. The mathematical tools are developed in conjunction with their application to economic problems. Some acquaintance with calculus recommended. PREREQS: (ECON 201 [D-] or ECON 201H [D-] ) and (ECON 202 [D-] or ECON 202H [D-] ) and (MTH 241 [D-] or MTH 251 [D-] or MTH 251H [D-] )

ECON 330. MONEY AND BANKING (4). Nature and functions of money; functions and operations of depository institutions; the money market; central banking and monetary policy. (SS) PREREQS: (ECON 201 [D-] or ECON 201H [D-] ) and (ECON 202 [D-] or ECON 202H [D-] )
ECON 340. INTERNATIONAL ECONOMICS (4). An overview of international economics with an emphasis on current events and applications, including classical and modern trade theory and the study of trade and exchange-rate policies. (SS) (See Schedule Comment regarding Bacc Core status.) PREREQS: (ECON 201 [D-] or ECON 201H [D-] ) and (ECON 202 [D-] or ECON 202H [D-] )
ECON 350. FINANCIAL ECONOMICS (4).
Discusses how various securities meet the needs of different economic agents and the efficiency of financial markets in meeting those needs. Topics include interest rates, valuation, investment risk, trading and market structure, arbitrage, market efficiency, debt markets, equity markets, and financial derivatives. PREREQS: ECON 201 [D-] and ECON 202 [D-]
ECON 352. *ENVIRONMENTAL ECONOMICS AND POLICY (3). Provides an overview of the interrelationships between economic activity, the
environment, and public policy. Through case studies, discussion groups, readings, and group activities, students learn how economists define and analyze environmental problems and the types of policies they advocate for managing environmental quality. CROSSLISTED as AEC 352. (Bacc Core Course) PREREQS: AEC 250 [D-] or AREC 250 [D-] or ECON 201 [D-] or ECON 201H [D-]

## ECON 383. *THE ECONOMICS OF

DISCRIMINATION (4). An economic analysis of discrimination, focusing on labor market inequities for women and minorities. Historical and current trends in pay, education, and employment disparities, economic explanations for such disparities, and econometric evidence for wage and employment discrimination. (SS) (Bacc Core Course) PREREQS: ECON 201 [C-] or ECON 201H [C-]

ECON 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ECON 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits PREREQS: Honors College approval required.
ECON 401. RESEARCH AND SCHOLARSHIP
(1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ECON 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ECON 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ECON 405. READING AND CONFERENCE
(1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ECON 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ECON 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

ECON 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ECON 410. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ECON 411. ADVANCED MICROECONOMIC THEORY (4). Rigorous treatment of optimizing behavior of economic agents and markets. Examines utility maximization and demand; cost minimization, profit maximization and supply; perfect competition and monopoly; imperfect competition and game theory; and general equilibrium, social welfare and market failure using sophisticated mathematical tools. Students cannot receive credit toward the major for both ECON 311 and ECON 411. PREREQS: (ECON 201 [D-] or ECON 201H [D-] ) and (MTH 241 [D-] or MTH 251 [D-] or MTH 251H [D-] )
ECON 414. BEHAVIORAL ECONOMICS (4).
Economic analysis of the effects of social, cognitive, and emotional factors on individual decision making and their implications for market outcomes and policy making. Topics include time inconsistency, decision making under risk, cognitive dissonance, heuristics, social preferences, and experimental economics. PREREQS: (ECON 311 [D-] or ECON 411 [D-] )

## ECON 415. ADVANCED MACROECONOMIC

 THEORY (4). Macroeconomics as an application of general equilibrium theory. Macroeconomic models are developed taking preferences and technology as primitives. The models' short and long run predictions are analyzed and compared to the data. The welfare implications of fiscal and monetary policy are discussed. ECON 315 and ECON 415 cannot both be taken for credit towardthe major. PREREQS: (ECON 201 [D-] or ECON 201H [D-] ) and (ECON 202 [D-] or ECON 202H [D-] ) and (MTH 241 [D-] or MTH 251 [D-] or MTH 251H [D-] )
ECON 420. GAME THEORY (4). Systematically studies strategic interactions among multiple decision makers with applications in economics, politics, sociology, law, computer science, sports, and biology. Topics taught include static, sequential, and repeated games of perfect and imperfect information. PREREQS: ECON 311 [D-] or ECON 411 [D-]
ECON 423. ECONOMETRICS I (4). Introduction to probability and statistics with an emphasis on estimation and hypothesis testing. Applications to economic models. PREREQS: MTH 241 [D-] or MTH 251 [D-] or MTH 251H [D-]

## ECON 424. INTRODUCTION TO

ECONOMETRICS (4). Application of statistical techniques, including sampling theory, hypothesis testing, and multiple regression analysis, to economic models. Economic modeling, analysis of economic data, and policy analysis are emphasized. ECON 424 and ECON 427 cannot both be taken for credit toward the major. Lec/lab. PREREQS: (ECON 311 [C] or ECON 411 [C]) and (ST 351 [C] or ST 351H [C] or ECON 423 [C] )
ECON 427. ECONOMETRICS II (4). Addresses both the theory and practice of econometrics, including properties of estimators, modeling economic processes, estimation, hypothesis testing, prediction and interpretation of results. Students cannot receive credit toward the major for both ECON 424 and ECON 427. Lec/lab. PREREQS: (ECON 311 [C] or ECON 411 [C] ) and ECON 423 [C]
ECON 428. ^INTRODUCTION TO ECONOMIC
RESEARCH (4). Basic methods of economic research: concepts and models; data sources, collection, and presentation; hypothesis formulation and testing; policy analysis. Written assignments apply methods. (Writing Intensive Course) PREREQS: ECON 311 [C-] or ECON 315 [C-]
ECON 435. PUBLIC ECONOMICS (4).
Composition and growth of government spending; theory of public expenditure; analysis of public expenditure programs; benefit-cost analysis; theory and practice of taxation; analysis of local, state, and federal taxes; government borrowing and fees; current issues in tax and expenditure policy. PREREQS: ECON 311 [C-] or ECON 411 [C-]
ECON 439. ^PUBLIC POLICY ANALYSIS (4).
Theory of public problems and decision making.
Evaluation of public policy strategies, selected
public programs and individual public projects considering the full range of efficiency and equity effects. Direct and indirect impacts of policy, strength of implicit incentives, administrative feasibility, and problems of policy implementation. (Writing Intensive Course) PREREQS: ECON 311 [D-] or ECON 411 [D-]
ECON 440. ECONOMICS OF GLOBALIZATION
(4). Examination of the phenomenon of globalization using economic analysis to explore controversial themes of the globalization debate-offshoring, sweatshops, child labor, environmental standards, intellectual property protection, cultural diversity, economic development, immigration, and governance. PREREQS: ECON 311 [D-]

## ECON 441. INTERNATIONAL FINANCE

THEORY AND POLICY (4). Theories and policies of exchange rate regimes; fixed, floating and managed floats; internal and external trade and capital balances; international capital flows and institutions. PREREQS: ECON 315
ECON 455. ECONOMIC DEVELOPMENT (4).
History, theories and policies for economic development in the Third World of underdeveloped countries. (SS) PREREQS: (ECON 201 or ECON 201) and (ECON 202 or ECON 202H)

ECON 460. INDUSTRIAL ORGANIZATION
THEORY AND POLICY (4). The study of the causes and effects of firm and market structures, conduct, and performance; United States antitrust and other laws regulating business behavior. PREREQS: ECON 311 [D-]
ECON 461. LAW, ECONOMICS, AND
REGULATION (4). The analysis of the effectiveness of laws and government regulations in fostering economic efficiency and fairness. Topics include the design of laws and policies to promote social welfare and the study of the effectiveness of criminal law, antitrust law, and the government regulation of business in promoting social goals. PREREQS: ECON 201 [D-] or ECON 201H [D-]
ECON 462. MANAGERIAL ECONOMICS (4).
The application of microeconomic theory and quantitative methods to management decisions. Case-oriented course emphasizing actual business decisions. PREREQS: ECON 311 [D-] or ECON 411 [D-]
ECON 463. EFFICIENCY AND PRODUCTIVITY
ANALYSIS (4). Workshop on the theory and measurement of performance, especially efficiency and productivity. Emphasis on application including introduction to user-friendly software. PREREQS: ECON 311 [C] or ECON 411 [C]
ECON 465. TRANSPORTATION ECONOMICS
(4). Demand, supply, and pricing for transport facilities, (airports, ports) right of way (highways, waterways), including optimal user fees, congestion tolls, and second-best pricing schemes. Theories of economic regulation and evaluation of experience in the transport sector PREREQS: ECON 311
ECON 466. ^ECONOMICS OF TRADITIONAL AND RENEWABLE ENERGY (4). Reviews and analyzes the economics and structure of world markets for various traditional energy (e.g., oil, coal, natural gas), as well as renewable energy (wind, geothermal and solar) with the latter focusing on the Pacific Northwest electrical industry structure and regulatory framework. (Writing Intensive Course) PREREQS: (ECON 201 [D-] or ECON 201H [D-] )
ECON 480. LABOR ECONOMICS AND SOCIAL POLICY (4). Interaction of workers and firms in labor markets, social policy and its effects on labor markets, human capital theory and education policy, discrimination and other sources of wage differentials, immigration, unemployment, inequality. PREREQS: ECON 311 [D-] or ECON 411 [D-] and /or equivalent such as ECON 517 Microeconomics for MPP students

ECON 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits PREREQS: ECON 311 or ECON 411

ECON 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ECON 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits PREREQS: Departmental approval required.
ECON 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.
ECON 505. READING AND CONFERENCE
(1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ECON 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ECON 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.
ECON 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

ECON 512. MICROECONOMIC THEORY I (4)
Economic theories of consumer behavior and demand, production, cost, the firm, supply, and competitive and monopoly market structures. PREREQS: ECON 312
ECON 513. MICROECONOMIC THEORY II (4). Economic theories of imperfect competition, input markets, general equilibrium and welfare economics. PREREQS: ECON 512

ECON 514. BEHAVIORAL ECONOMICS (4). Economic analysis of the effects of social, cognitive, and emotional factors on individual decision making and their implications for market outcomes and policy making. Topics include time inconsistency, decision making under risk, cognitive dissonance, heuristics, social preferences, and experimental economics. PREREQS: ECON 311 or ECON 411
ECON 515. MACROECONOMIC THEORY I (4). Determination of income, employment, and prices in classical, Keynesian, monetarist, and new classical macroeconomic models. Theories of consumption, investment, money demand, and money supply. Monetary and fiscal policies, the role of expectations. PREREQS: ECON 315 or equivalent
ECON 517. MICROECONOMIC THEORY FOR MPP (4). Familiarizes MPP students who do not have a strong background in microeconomics with the material they will need for their future economics course work. PREREQS: Working knowledge of algebra and geometry.
ECON 520. GAME THEORY (4). Systematically studies strategic interactions among multiple decision makers with applications in economics, politics, sociology, law, computer science, sports, and biology. Topics taught include static, sequential, and repeated games of perfect and imperfect information. PREREQS: ECON 311 or ECON 411
ECON 523. STATISTICS FOR ECONOMETRICS
4). Examines mathematical and statistical topics essential for graduate-level econometric analysis, including matrix algebra, probability and distribution theory (emphasizing joint and conditional distributions), statistical inference, and econometric optimization algorithms. PREREQS: MTH 253 and (ST 351 or ST 351H) and (ST 352 or ECON 424 or ECON 524)

## ECON 524. INTRODUCTION TO

ECONOMETRICS (4). Application of statistical techniques, including sampling theory, hypothesis testing, and multiple regression analysis, to economic models. Economic modeling, analysis of economic data, and policy analysis are emphasized. PREREQS: (ECON 311 or ECON 411 or ECON 517) and (ST 351 or ST 351 H or ECON 423)
ECON 525. ECONOMETRIC METHODS (4).
The use of multiple regression under generalized assumptions, specification problems, an introduction to simultaneous equation estimation, the classical linear model using matrices. Emphasis on the analysis of data and communication of findings. PREREQS: ECON 523 [C] and (ECON 424 or ECON 524) and ECON 512

ECON 526. APPLIED ECONOMETRICS (4).
Model building, hypothesis testing, and appropriate estimation procedures including generalized least squares, seemingly unrelated regressions, simultaneous equations, maximum likelihood, and limited dependent variables. Emphasis on applications and interpretation of results. PREREQS: ECON 525

ECON 535. PUBLIC ECONOMICS (4).
Composition and growth of government spending; theory of public expenditure; analysis of public expenditure programs; benefit-cost analysis; theory and practice of taxation; analysis of local, state, and federal taxes; government borrowing and fees; current issues in tax and expenditure policy. PREREQS: ECON 311 or ECON 411

ECON 539. PUBLIC POLICY ANALYSIS (4).
Theory of public problems and decision making Evaluation of public policy strategies, selected public programs and individual public projects considering the full range of efficiency and equity effects. Direct and indirect impacts of policy, strength of implicit incentives, administrative feasibility, and problems of policy implementation. PREREQS: ECON 311 and ECON 435 or equivalent
ECON 540. ECONOMICS OF GLOBALIZATION
4). Examination of the phenomenon of globalization using economic analysis to explore controversial themes of the globalization debate-offshoring, sweatshops, child labor, environmental standards, intellectual property protection, cultural diversity, economic development, immigration, and governance. PREREQS: ECON 311

ECON 541. INTERNATIONAL FINANCE
THEORY AND POLICY (4). Theories and policies of exchange rate regimes; fixed, floating and managed floats; internal and external trade and capital balances; international capital flows and institutions. PREREQS: ECON 315
ECON 555. ECONOMIC DEVELOPMENT
(4). History, theories and policies for economic development in the Third World of underdeveloped countries. PREREQS: (ECON 201 or ECON 201 H ) and (ECON 202 or ECON 202H) ECON 560. INDUSTRIAL ORGANIZATION THEORY AND POLICY (4). The study of the causes and effects of firm and market structures, conduct, and performance; United States antitrust and other laws regulating business behavior.
PREREQS: ECON 311
ECON 561. LAW, ECONOMICS, AND
REGULATION (4). The analysis of the effectiveness of laws and government regulations in fostering economic efficiency and fairness. Topics include the design of laws and policies to promote social welfare and the study of the effectiveness of criminal law, antitrust law, and the government regulation of business in promoting social goals. PREREQS: ECON 201 or ECON 201H

ECON 562. MANAGERIAL ECONOMICS (4).
The application of microeconomic theory and quantitative methods to management decisions. Case-oriented course emphasizing actual business decisions. PREREQS: ECON 311 or ECON 411
ECON 563. EFFICIENCY AND PRODUCTIVITY
ANALYSIS (4). Workshop on the theory and measurement of performance, especially efficiency and productivity. Emphasis on application including introduction to user-friendly software. PREREQS: ECON 311 or ECON 411

## ECON 565. TRANSPORTATION ECONOMICS

(4). Demand, supply, and pricing for transport facilities, (airports, ports) right of way (highways, waterways), including optimal user fees, congestion tolls, and second-best pricing schemes. Theories of economic regulation and evaluation of experience in the transport sector PREREQS: ECON 311
ECON 566. ECONOMICS OF TRADITIONAL AND RENEWABLE ENERGY (4). Reviews and analyzes the economics and structure of world markets for various traditional energy (e.g., oil, coal, natural gas), as well as renewable energy (wind, geothermal and solar) with the latter focusing on the Pacific Northwest electrical industry structure and regulatory framework. PREREQS: ECON 201 or ECON 201H

ECON 570. MACROECONOMIC THEORY I (4). Introduction to dynamic macroeconomic theory, including a review of Keynesian models, continuous and discrete time programming, Solow Ramsey, and endogenous growth models, and real business cycle theory. PREREQS: ECON 315 or equivalent.

ECON 580. LABOR ECONOMICS AND SOCIAL POLICY (4). Interaction of workers and firms in labor markets, social policy and its effects on labor markets, human capital theory and education policy, discrimination and other sources of wage differentials; immigration, unemployment, inequality. PREREQS: ECON 311 or ECON 411 or equivalent such as ECON 517 Microeconomics for MPP students
ECON 601. RESEARCH AND SCHOLARSHIP
(1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ECON 602. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ECON 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.
ECON 605. READING AND CONFERENCE
(1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ECON 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ECON 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ECON 610. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.
ECON 640. INTERNATIONAL TRADE AND
ECONOMIC GROWTH (4). Issues of international trade in the contemporary world, including protection with perfect and imperfect competition, political economy of protection and multilateral trade negotiations, international factor movements, economic integration, and international debt. Analysis of the effects of endogenous innovation and growth on world trade. PREREQS: ECON 513 and ECON 526 and ECON 540

## ■ MASTER OF PUBLIC POLICY COURSES

MPP 507. SEMINAR (1-16). Selected issues concerning government, public policy, public affairs or non-profit organizations. This course is repeatable for a maximum of 16 credits. PREREQS: MPP Director approval required.
MPP 510. INTERNSHIP (1-16). Supervised work experience in government, public policy, public affairs or non-profit organizations. Reports and appraisals required. Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: MPP Director approval required.
MPP 808. WORKSHOP (1-16). This course is repeatable for a maximum of 32 credits.

## ■ PUBLIC POLICY COURSES

PPOL 441. *ENERGY AND SOCIETY (4). Explores the complex interrelationships between humans and energy, emphasizing the role of energy in critical social issues, including but not limited to: domestic and international conflict, poverty, social change, inter-generational equity, energy transitions and environmental justice. (Bacc Core Course)
PPOL 446. THE POLICY AND LAW OF U.S. COASTAL GOVERNANCE (4). Examines federal and state policy, legislative and judicial protections of public beach access; ownership and use of tide and submerged lands, including the public trust doctrine; wetland conservation; and the Federal Coastal Zone Management Act. This course is intended to equip future environmental and natural resource professionals with a foundation in US coastal management, especially areas where new professionals will be very involved (coastal development, offshore/alternative energy, and sea level rise/storm hazards). The format includes
reading, discussion, and student presentations. Readings will be drawn from the textbook; additional readings will be posted on Canvas.
PPOL 447. INTEGRATED POLICY: FOOD,
ENERGY, WATER, CLIMATE (4). Environmental decisions include trade-offs. Policy choices for sustainably providing Earth's eight billion people with food, energy, and water are urgently needed. Policy sectors (such as food) risk outcomes that are not beneficial, and impose long-term costs and potential catastrophic climate burdens. This transdisciplinary course examines emerging integrated policies concerning provision of food, energy, and water and their relationship to climate

PPOL 448. MARINE POLICY IN THE UNITED STATES (4). Introduces students to the history, rationale, achievements, and gaps in American ocean policy. Students will acquire foundationa tools of policy analysis and problem solving, and will synthesize and apply their knowledge creatively in order to propose integrated policy solutions to specific contemporary marine issues.
PPOL 501. RESEARCH AND SCHOLARSHIP (1-12). Graded $P / N$. This course is repeatable for a maximum of 99 credits. PREREQS: Faculty permission.
PPOL 505. READING AND CONFERENCE (1-4).
This course is repeatable for a maximum of 16 credits. PREREQS: Faculty permission.

PPOL 507. SEMINAR (1-4). This course is repeatable for a maximum of 16 credits. PREREQS: Faculty permission.
PPOL 510. INTERNSHIP (1-12). Supervised work experience in government, public policy, public affairs or non-profit organizations. Reports and appraisals required. Graded P/N. This course is repeatable for a maximum of 12 credits. PREREQS: Public Policy Graduate Director approval required.
PPOL 511. PUBLIC ORGANIZATIONS AND LEADERSHIP (4). Provides an historical overview of developments in, and theories associated with, the organization and control of public organizations. Students will critically examine various influential models of bureaucracy, while also learning about the strengths and weaknesses of emergent forms of bureaucratic organization, including networks, public-private partnerships, collaboration, and governance. The course also explores different theories of leadership, assisting students in the development of their own authentic leadership style, and thinking through the application of such theories and styles to the real world of public organization leadership, especially in the fragmented, decentralized, complex, and uncertain contemporary environment of networks, partnerships, and governance.
PPOL 521. UNDERSTANDING SOCIAL RESEARCH (4). Study of basic concepts and principles of qualitative and quantitative social research, including selection of general strategies and specific designs, conceptual and operational measurement, sample selection, data collection, data processing and analysis techniques, interpretation and reporting. Utilizes reports of social research in scholarly journals, popular media, and agency documents. Emphasis on critical evaluation and interpretation.
PPOL 522. CONDUCTING SOCIAL RESEARCH (4). Reviews concepts and principles covered in SOC 415 with emphasis on actual experiences in using techniques of social research and gaining greater depth of knowledge and skill. Assignments involve practicing techniques used in various phases of the research process, including both qualitative field observation and computerized processing and analysis of quantitative information. Individual or group research projects will be required. PREREQS: PPOL 521 [C] and PPOL 521
PPOL 523. QUALITATIVE RESEARCH
METHODS (4). An introduction to the theory and methods of qualitative research. Students will be
exposed to various qualitative research methods through practical field exercises. These include ethnographic field observation, content analysis, interviewing, focus groups and unobtrusive measures. Other commonly used methods of collecting qualitative data are also examined. PREREQS: SOC 204 or SOC 204H

PPOL 524. APPLIED RESEARCH METHODS
(4). Application of sociological theory, concepts, and methods. Topics vary but may include program evaluation, social impact assessment, policy analysis, focus group research, survey research, among others. PREREQS: SOC 204 or SOC 204 H and at least one upper-division course in sociology.
PPOL 541. ENERGY AND SOCIETY (4).
Explores the complex interrelationships between humans and energy, emphasizing the role of energy in critical social issues, including but not limited to: domestic and international conflict, poverty, social change, inter-generational equity, energy transitions and environmental justice.
PPOL 544. COLLABORATIVE GOVERNANCE (4). Explores and develops the norms, rules, institutional design, decision-making dynamic, and politics of collaborative governance arrangements for complex natural resource problem settings. Designed to bring together traditional adversaries, government agencies, and citizens to resolve and improve management of collective public problems, collaborative governance for natural resources is now an important problem-solving tool that is employed in thousands of communities, watersheds, and landscapes around the world.
PPOL 545. INTERNATIONAL MARINE POLICY (4). Explores the institutional, political and legal factors that impact international marine policy with an emphasis on the United Nations Law of the Sea Convention. Additional topics include marine resource exploitation, climate change, and national security issues as they pertain to the world's oceans, coasts, and national policies. This course is repeatable for a maximum of 16 credits.
PPOL 546. THE POLICY AND LAW OF UNITED STATES COASTAL GOVERNANCE (4). Examines federal and state policy, legislative and judicial protections of public beach access; ownership and use of tide and submerged lands, including the public trust doctrine; wetland conservation; and the Federal Coastal Zone Management Act. This course is intended to equip future environmental and natural resource professionals with a foundation in US coastal management, especially areas where new professionals will be very involved (coastal development, offshore/alternative energy, and sea level rise/storm hazards). The format includes reading, discussion, and student presentations. Readings will be drawn from the textbook; additional readings will be posted on Canvas.

PPOL 547. INTEGRATED POLICY: FOOD, ENERGY, WATER, CLIMATE (4). Environmental decisions include trade-offs. Policy choices for sustainably providing Earth's eight billion people with food, energy, and water are urgently needed. Policy sectors (such as food) risk outcomes that are not beneficial, and impose long-term costs and potential catastrophic climate burdens. This transdisciplinary course examines emerging integrated policies concerning provision of food, energy, and water and their relationship to climate.

## PPOL 548. MARINE POLICY IN THE UNITED

 STATES (4). Introduces students to the history, rationale, achievements, and gaps in American ocean and coastal policy. Students will acquire foundational tools of policy problem solving, critique, and analysis, and will synthesize and apply their knowledge creatively to propose integrated policy solutions to specific contemporary marine issues.PPOL 551. HIGHER EDUCATION POLICY (4). An introduction to policy issues in the area of higher education and exploration of possible tensions within the policy goals of quality,
equity, access and outcomes. Students will gain knowledge of the key pieces of legislation and constitutional law governing higher education policy at both federal and state levels, as well as an overview of the relevant research in this area. Begins with a short historical introduction to the U.S. higher education system and concludes with a discussion of its competing demands and functions.
PPOL 552. INTERNATIONAL COMPARATIVE RURAL POLICY (4). Examines and compares the role of rural policy in different cultural, political and administrative contexts at the international, national, state, regional and local levels. The course also provides the opportunity to study the nature and implications of new forms of governance in rural contexts in North America and Europe.
PPOL 599. SPECIAL TOPICS (1-4). This course is repeatable for a maximum of 16 credits. PREREQS: Faculty permission.

PPOL 602. INDEPENDENT STUDY (1-4). This course is repeatable for a maximum of 16 credits. PREREQS: Faculty permission.
PPOL 603. THESIS (1-12). This course is repeatable for a maximum of 999 credits.
PREREQS: Faculty permission.
PPOL 607. SEMINAR (1-4). This course is repeatable for a maximum of 16 credits.
PPOL 609. PRACTICUM (1-12). This course is repeatable for a maximum of 24 credits. PREREQS: Faculty permission.

PPOL 613. ADVANCED POLICY THEORY I (4). First of two-class series introducing a comprehensive review of public policy theory focused on examining theoretical approaches to understanding the complex and contentious assumptions and premises that pose challenges to the way we conduct public policy. PREREQS: PhD standing.
PPOL 614. ADVANCED POLICY THEORY II (4). Second course in a two-course series providing a comprehensive review of public policy theory. The course examines theoretical approaches to understanding the complex and contentious assumptions and premises that pose challenges to the way we conduct public policy.
PPOL 621. ADVANCED QUANTITATIVE
METHODS (4). Methods used in research in the social sciences, focused on causal inference in public policy contexts. Covers methods used at the frontier of research to estimate the causal effect of policies on outcomes, including instrumental variables, regression discontinuity, and difference-in-differences estimation. PREREQS: ECON 524 or equivalent
PPOL 622. ADVANCED POLICY ANALYSIS (4). Introduction to advanced quantitative modeling used in policy analysis, with an emphasis on the application of modeling techniques to research papers. Focus is predominantly on counts and zero-truncated modeling, time series, and panel regression. PREREQS: ((SOC 516 [B+] and ECON 524 [B+] ) or PPOL 621 [C+] or (AEC 523 [C+] and AEC 525 [C+] ))
PPOL 628. ADVANCED QUALITATIVE METHODS (4). Focus on epistemological approaches, research design, data analysis techniques and critiques of qualitative research, with emphasis on participant observation and interviewing. Culminates in the written and oral presentation of a qualitative research proposal, including preliminary results from fieldwork conducted during the course. PREREQS: ANTH 591 [C] or HDFS 538 [C] or SOC 518 [C] and PhD standing or permission of instructor.

PPOL 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

- POLITICAL SCIENCE COURSES

PS 110. *GOVERNING AFTER THE ZOMBIE
APOCALYPSE (3). Constitution-writing in a postapocalyptic world. Students write a constitution that addresses issues of difference, power, and discrimination. (Bacc Core Course)

## PS 126. INTRODUCTION TO LAW AND

POLITICS (3). Introductory course to the Summer Pre-Law Series. Topics include role of courts and lawyers in society, basic judicial process, and pre-law advising. Conducted via Ecampus Canvas portal. Graded P/N.
PS 201. *INTRODUCTION TO UNITED STATES GOVERNMENT AND POLITICS (4). Description and analysis of American politics and government including such topics as interest groups, parties, elections, media, the presidency, Congress, the Constitution, and the courts. (SS) (Bacc Core Course)
PS 204. *INTRODUCTION TO COMPARATIVE POLITICS (4). Major concepts of comparative politics applied to various political settings; the United States, Western Europe, Communist regimes, and developing countries. (SS) (Bacc Core Course)
PS 205. *INTRODUCTION TO INTERNATIONAL
RELATIONS (4). Analysis of the international system and factors affecting world politics. (SS) (Bacc Core Course)

PS 206. *INTRODUCTION TO POLITICAL
THOUGHT (4). Introduction to political philosophy. Major ideas and issues of selected political thinkers. (H) (Bacc Core Course)
PS 299. SPECIAL STUDIES (1-4). This course is repeatable for a maximum of 4 credits.
PS 300. ^RESEARCH METHODS (4). Qualitative and quantitative approaches to the study of political phenomena. The role of values, theory, hypothesis, data collection, and analysis in evaluating and conducting political science research. (Writing Intensive Course)
PS 311. CONGRESSIONAL POLITICS (4). Congressional politics, both on Capitol Hill and in the district, including campaigns, constituent relations, lobbying, legislating, and the legislature in democratic theory.
PS 312. PRESIDENTIAL POLITICS (4).
Office, powers, and politics of the American presidency, with reference to other executive offices in American government; emphasis on the importance and effect of the presidency in American politics.
PS 313. CAMPAIGNS AND ELECTIONS (4).
Political parties and elections, the conduct of electoral campaigns, the electorate and voting behavior, electoral system, exercise of the suffrage, extent and consequences of voter participation.
PS 314. INTEREST GROUP POLITICS (4). Interest group formation, resources, strategies, and internal struggles, as well as group influence on elections and politics, in government and policy making, and in relation to democratic theory.

## PS 315. *THE POLITICS OF MEDIA (4)

Examination of the methods of operation, content and effects of the media in relation to politics and government. Includes analysis of newspaper radio and television, political advertising, and other forms of political communication. (Bacc Core Course)
PS 316. PUBLIC OPINION AND POLITICS (4).
Examination of methods of study, formation, and content of public opinion and of its effect on elections and politics, government operations, and public policy, primarily in the United States. (SS)

PS 317. GENDER AND POLITICS (4). Analyzes the role that gender plays in shaping politics and other aspects of society. The course will cover theories of gender difference, gender-based movements, gender and political office, and

## gender and public policy. (SS)

PS 321. CONSTITUTIONAL LAW:
GOVERNMENT POWERS AND CONSTRAINTS
(4). The role of the U.S. Supreme Court in shaping the powers and limitations of the U.S. government. The powers of the three main branches of our government, and cases where the powers of these branches clash with one another or with the powers of the states or rights of the individual.

PS 322. *CONSTITUTIONAL LAW: CIVIL RIGHTS AND LIBERTIES (4). Doctrines pertaining to the First, Second and Fourteenth Amendments, such as freedom of speech, of expression, of the press and of the exercise, the right to bear arms and the prohibition against governmental establishment of religion. Issues of discrimination and the reach of the 14th amendment's equal protection clause, and the right to privacy. (Bacc Core Course)
PS 323. CONSTITUTIONAL LAW: RIGHTS OF THE ACCUSED (4). The role of the U.S. Supreme Court in shaping the powers and limitations of the U.S. government. The powers of the three main branches of our government, and cases where the powers of these branches clash with one another or with the powers of states or rights of the individual.

PS 325. *GENDER AND THE LAW (4). Legal status of American women, with emphasis on constitutional law, the 1964 Civil Rights Act and its amendments, and various state laws as they relate to the legal rights of women. (Bacc Core Course)
PS 326. JUDICIAL PROCESS AND POLITICS (4). Study of the operation, processes, behavior and influence of the state and federal judiciaries, as well as current research in the judiciary as it relates to politics.
PS 328. SPORTS AND POLITICS (4). Topics include: Sport's interactions with formal political institutions, sports law, sports in the international community, sports at the university, sports and gender, sports and labor politics, and sports and race.
PS 331. *STATE AND LOCAL POLITICS (4). Role, organization, and functions of government at the state and local level. Satisfies teaching certification requirement for course work in state and local government. (Bacc Core Course)

PS 340. EASTERN AND CENTRAL EUROPEAN POLITICS (4). Analyzes domestic and international politics in Central and Eastern Europe, focusing on the period since WW II. Particular attention will be paid to the establishment and dissolution of the Soviet bloc; the interplay of Soviet foreign policy and domestic politics in the various states; and comparisons of domestic political structures, especially since 1989.

PS 341. *EUROPEAN AND EU POLITICS (4). Describes and analyzes the political situation in Europe and the European Union. Special focus is given to issues concerning European security and the European Union, its institutions, politics, and the challenges it faces since the opening of Europe to the East. (Bacc Core Course)
PS 342. THE POLITICS OF CORRUPTION (4). Surveys corruption and how it manifests itself in democracies and centralized states. Topics include theoretical accounts for why corruption occurs, what factors are conducive toward producing corruption, the consequences of corruption, and anti-corruption efforts that have succeeded and failed to rectify corruption.

PS 343. *RUSSIAN POLITICS (4). Brief survey of Russian politics in Tsarist and Soviet periods followed by extensive analysis of Russian politics in the late Soviet period under Gorbachev (1985-91), the collapse of the USSR in 1991, and post-Soviet Russian politics (1992-present). (Bacc Core Course)

PS 344. *LATIN AMERICAN POLITICS (4). The key political, social and economic issues in Latin America. Surveys topics of interest in the region such as economic development, democratization, revolution and political leadership from both an historical and contemporary perspective. (Bacc Core Course)

PS 345. *POLITICS OF DEVELOPING NATIONS
(4). Analyzes the concepts of development and modernization. Also focuses on the economic, political, and cultural problems faced by developing nations. (NC) (Bacc Core Course)
PS 346. *MIDDLE EAST POLITICS (4). The comparative study of the Middle East and North Africa focusing on the internal political dynamics of countries in the region and the international relations among them. Examines issues of political and economic development in their post-colonial context and analyzes impact of nationalism, political Islam, ethnicity, and globalization. (Bacc Core Course)

PS 348. *CHINESE POLITICS (4). Examines China's post-1949 political and economic development. Special attention is given to the reform era from the late 1970s to the present. The course also addresses the impact of the reforms on society and on the country's relationship with the world. (NC) (Bacc Core Course)

PS 349. *BRITISH POLITICS (4). The structure and operation of the British political system, the nature of the political parties and how the governing institutions of the British state have changed over time. The course will also consider how British politics impact upon the culture, politics and institutions of the United States. (Bacc Core Course)
PS 350. *JAPANESE POLITICS (4). Examination of the Japanese political system during the postwar period. Topics include prewar historical influences, political parties, bureaucracy, interest groups, policy processes and issues, political economy, foreign policy, and United States-Japan relations. Attention will also be given to recent dramatic changes in Japan's political system. (Bacc Core Course)

## PS 351. AMERICAN FOREIGN POLICY (4).

Overview of the role of the United States in the world since World War II and of the factors influencing the formation of American foreign policy.
PS 354. *INTERNATIONAL ORGANIZATIONS
AND GLOBAL POLITICS (4). The role of international law and organizations in global politics. How sovereign states interact, and what motivates them to commit to supranational laws and intergovernmental organizations. How international law has evolved since the early 1900s. Intergovernmental organizations and treaties, with emphasis on the United Nations, the International Monetary Fund and the World Bank, the World Trade Organization, the European Union, and the North Atlantic Treaty Organization. (Bacc Core Course)
PS 356. INTERNATIONAL POLITICS OF ASIA
PACIFIC (4). Examines the most pressing issues facing the region: security and regional economic integration. The major players, their interests, and their differing perspectives on regional issues will be analyzed.
PS 361. CLASSICAL POLITICAL THOUGHT (4). Major political theorists from the pre-Socratics through the Scholastics. (H)
PS 362. MODERN POLITICAL THOUGHT (4). Major political theorists from the Renaissance to the mid-nineteenth century. (H)
PS 363. *GENDER AND RACE IN AMERICAN POLITICAL THOUGHT (4). Traditional canon of American political thought scrutinized from vantage point of feminist and critical race theory scholarship. (Bacc Core Course)
PS 364. CONTEMPORARY POLITICAL THEORY
(4). Major issues in contemporary political theory.

The specific emphasis of the course may vary from term to term, focusing on questions related to theories of justice, theories of democracy, global political theory, or the work of a single important thinker.
PS 365. AMERICAN POLITICAL THOUGHT
(4). Political values and theoretical systems in the American tradition, from the Puritans to the present.

PS 366. *FROM ATLANTIS TO UTOPIA: THE POLITICS OF THE IDEAL STATE (4). The search for the ideal state has occupied political philosophy since antiquity. From Plato's Atlantis story through More's utopia and beyond, philosophers, writers and filmmakers have pondered how to create a perfect state with perfect citizens which will stand the test of time. Each week will combine theoretical reflections from antiquity through post-modernity with a selection of examples from more or less contemporary fiction that will ideally already be known to the audience. (Bacc Core Course)
PS 370. *SCIENCE, RELIGION, AND POLITICS
(4). Addresses historical interplay between religion and science in Western culture, then focuses on the perceived conflicts between science and religion within American socio-political context; illustrates role of politics as the "playing field" on which social differences contend; requires students to grapple with viewpoints that differ from their own. Team taught. (Bacc Core Course)
PS 371. PUBLIC POLICY PROBLEMS (4).
The content and the politics of adoption and application of such policy areas as defense, poverty and welfare, macroeconomics, and regulation.
PS 372. PUBLIC ADMINISTRATION (4). The workings of the modern administrative state, processes and procedures through which government acts, and the balance between powerful government, democratic and accountable government, and efficient government.

## PS 374. *SUSTAINABLE LIVING: PRACTICES

AND POLICIES (4). Exploration of the role individuals in sustainability practices and policies. Special focus is given to an examination of how individuals can make sustainable lifestyle choices in light of policy regulations, technologies, socioeconomic conditions, and cultural values. (Bacc Core Course)
PS 375. *THE CIVIL RIGHTS MOVEMENT AND POLICIES (4). Political and social evolution of the civil rights movement, emphasizing events 19541965, and major contemporary civil rights politics and policies in the South and the nation. (Bacc Core Course)
PS 375H. *THE CIVIL RIGHTS MOVEMENT
AND POLICIES (4). Political and social evolution of the civil rights movement, emphasizing events 1954-1965, and major contemporary civil rights politics and policies in the South and the nation. (Bacc Core Course) PREREQS: Honors College approval required.
PS 380. CELEBRITY POLITICS (4). Exploration of the role of celebrities and celebrity politicians in the political process. Special focus is given to celebrities working in humanitarian, environmental, and other high visibility causes. Also examines the domestic and international policy implications of celebrity activism.
PS 399. CURRENT PROBLEMS IN POLITICS
(1-4). Selected issues of recent American and international concern such as Vietnam, Central America, or similar topical issues. May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits.
PS 399H. CURRENT PROBLEMS IN POLITICS
(1-4). Selected issues of recent American and international concern such as Vietnam, Central America, or similar topical issues. May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits.

PREREQS: Honors College approval required.
PS 401. RESEARCH AND SCHOLARSHIP
(1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PS 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PS 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PS 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

PS 405H. READING AND CONFERENCE (1-
16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required. Honors College approval required.
PS 406. PROJECTS (1-16). Section 1-5: Reading. Associated with the internship for which credit is given in PS 410. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PS 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PS 407H. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required. Honors College approval required.

PS 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PS 409. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required
PS 410. POLITICAL SCIENCE INTERNSHIP (112). Supervised work experience in governmentor law-related programs or other public affairs organizations. Reports and appraisals required. Only 4 credits may be applied to the major. This course is repeatable for a maximum of 12 credits. PREREQS: Departmental approval required.
PS 425. *GENDER AND THE LAW (4). Legal status of American women, with emphasis on constitutional law, the 1964 Civil Rights Act and its amendments, and various state laws as they relate to the legal rights of women. (Bacc Core Course) PREREQS: PS 201 or PS 326
PS 441. DEMOCRATIZATION (4).
Democratization and the factors that encourage and/or erode democratic stability. Political developments in a wide array of countries, with a particular focus on the unfolding events in the Middle East. Theories of what causes authoritarian regimes to collapse and what helps initially fragile democracies endure or collapse.
PS 446. EAST ASIAN POLITICAL ECONOMY (4). Surveys and analyzes the economic and political development of China, Japan, South Korea, Taiwan, Hong Kong, and Singapore. Japan is examined as a developmental model for the East Asian Newly Industrializing Countries (NICs) and as a major player in the regional economy. China is examined as a contrasting model in terms of its changing pattern of economic development and its importance for the region.
PS 449. ${ }^{\wedge}$ TOPICS IN COMPARATIVE POLITICS
(4). Topics in comparative politics not covered in other courses. May be repeated for credit when topic varies. (Writing Intensive Course) This course is repeatable for a maximum of 16 credits.

PS 454. INTERNATIONAL LAW AND
ORGANIZATIONS (4). Theories and historical development of international law and organizations; the United Nations system. PREREQS: PS 204 or PS 205

PS 455. *THE POLITICS OF CLIMATE CHANGE
(4). Covers domestic and international political aspects of global climate change. Topics include local, state, and national activity as well as roles played by presidents, Congress, the Supreme Court, corporations and media. International focus on conventions and treaties, tensions between developed and developing nations and possible national security impacts. (Bacc Core Course)
PS 457. US-CHINA RELATIONS (4). Historical evolution of US-China relationship. Emphasis on economic ties, tensions, and conflicts surrounding trade, investment, security, human rights, political reform, Tibet, and Taiwan.

## PS 458. *INTERNATIONAL POLITICAL

ECONOMY (4). Examines topics in which politics and economics meet in the international arena, such as trade, debt, finance, development, multinational corporations, and globalization. Does not require a background in economics. (Bacc Core Course)

PS 461. ENVIRONMENTAL POLITICAL THEORY
(4). Examines the ways in which political theory enhances our understanding of environmental issues. Focuses on the political and philosophical premises of various environmental perspectives, and how different theories of justice and democracy address issues such as environmental racism, ecological justice, and global climate change.
PS 462. THEORIES OF LAW (4). Covers some of the main theories and approaches to the nature of law. What is law? What is its relation, if any, to morality? What is it that judges do? Questions such as these are explored through reading some of the classic works on the topic.
PS 470. GLOBAL FOOD POLITICS AND POLICY (4). Examines the politics and policy of global food systems as they relate to food distribution, production, and consumption. The cultivation and consumption of food is highly political, and at times, contentious. Specific focus is given to issues like social justice, GMOs, human health, environment and agribusiness.
PS 471. NUCLEAR POLITICS AND POLICY
(4). Covers the political and policy implications of nuclear technology, including both nuclear weapons and civilian applications such as nuclear energy.
PS 473. US ENERGY POLICY (4). Addresses US energy policy with respect to how the U.S. governs the production and use of different energy sources, along with the management of its energy infrastructure. Examines policies currently in place, as well as proposals for alternatives, while examining the economic, environmental, national security and energy security implications of different policy approaches.
PS 475. ENVIRONMENTAL POLITICS AND
POLICY (4). Environmental and natural resource issues and policies in national and regional context, emphasizing public attitudes, elections, Congress, public policy, and relevant national and state agencies.
PS 476. *SCIENCE AND POLITICS (4).
Relationship between science and the political system in political ideas and history, in bureaucratic politics of science policy, and in contemporary scientific disputes. (Bacc Core Course)
PS 477. INTERNATIONAL ENVIRONMENTAL POLITICS AND POLICY (4). Analysis of international environmental theory and politics the development of international environmenta regimes, agreements and treaties, and the process of globalization and the quality of the environment.
PS 478. RENEWABLE ENERGY POLICY (4).
Renewable energy policy with respect to how the U.S. governs the market development, production and use of different renewable energy sources are addressed.

PS 483. CUBAN CULTURE, POLITICS AND ARTS (4). One of two courses that comprise the Cuba Study Abroad Program. It introduces students to Cuban culture, politics (and particularly Cuba-U.S. relations during and after the Revolution) and arts via a combination of lectures/lessons led by invited specialists in their fields, readings, films and student activities. Students will learn about a variety of topics including migration, agriculture, health care, education, economics, religion/spirituality, gender, race, and the arts (literature, music and other performance). Given the interdisciplinary approach to this course, students will also be able to focus on other topics of interest to them/their program of study. CROSSLISTED as ENG 483, WLC 483. PREREQS: Sophomore standing and acceptance into the OSU Cuba Study Abroad Program.
PS 499. SPECIAL TOPICS (1-16). Selected topics in political science of special or current interest not covered in other courses. May be repeated for credit when topic varies. This course is repeatable for a maximum of 99 credits.

PS 501. RESEARCH AND SCHOLARSHIP (1-16). Independent research project under supervision of graduate faculty. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PS 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PS 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.

PS 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PS 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PS 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

PS 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PS 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PS 510. POLITICAL SCIENCE INTERNSHIP (112). Supervised work experience in governmentor law-related programs or other public affairs organizations. Reports and appraisals required. This course is repeatable for a maximum of 12 credits. PREREQS: Departmental approval required.
PS 523. AMERICAN CONSTITUTIONAL LAW
(4). Examines constitutional law with a heavy emphasis on the practices and procedures of the criminal justice system. Pays particular attention to the rights of the criminally accused; how these rights have changed over time; and the role of politics in the decisions of the Supreme Court.
PS 541. DEMOCRATIZATION (4).
Democratization and the factors that encourage and/or erode democratic stability. Political developments in a wide array of countries, with a particular focus on the unfolding events in the Middle East. Theories of what causes authoritarian regimes to collapse and what helps initially fragile democracies endure or collapse.
PS 546. EAST ASIAN POLITICAL ECONOMY
(4). Surveys and analyzes the economic and political development of China, Japan, South Korea, Taiwan, Hong Kong, and Singapore. Japan is examined as a developmental model for the East Asian Newly Industrializing Countries (NICs) and as a major player in the regional economy. China is examined as a contrasting model in terms of its changing pattern of economic development
and its importance for the region.
PS 549. TOPICS IN COMPARATIVE POLITICS
(4). Topics in comparative politics not covered in other courses. May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits. PREREQS: At least one upper-division course in comparative politics.
PS 554. INTERNATIONAL LAW AND
ORGANIZATIONS (4). Theories and
historical development of international law and organizations; the United Nations system. PREREQS: PS 204 or PS 205
PS 555. THE POLITICS OF CLIMATE CHANGE
(4). Covers domestic and international political aspects of global climate change. Topics include local, state, and national activity as well as roles played by presidents, Congress, the Supreme Court, corporations and media. International focus on conventions and treaties, tensions between developed and developing nations and possible national security impacts.
PS 557. US-CHINA RELATIONS (4). Historical evolution of US-China relationship. Emphasis on economic ties, tensions, and conflicts surrounding trade, investment, security, human rights, political reform, Tibet, and Taiwan.

## PS 558. INTERNATIONAL POLITICAL

ECONOMY (4). Examines topics in which politics and economics meet in the international arena, such as trade, debt, finance, development, multinational corporations, and globalization. Does not require a background in economics.
PS 561. ENVIRONMENTAL POLITICAL THEORY
(4). Examines the ways in which political theory enhances our understanding of environmental issues. Focuses on the political and philosophical premises of various environmental perspectives, and how different theories of justice and democracy address issues such as environmental racism, ecological justice, and global climate change.
PS 562. THEORIES OF LAW (4). Covers some of the main theories and approaches to the nature of law. What is law? What is its relation, if any, to morality? What is it that judges do? Questions such as these are explored through reading some of the classic works on the topic.
PS 570. GLOBAL FOOD POLITICS AND
POLICY (4). Examines the politics and policy of global food systems as they relate to food distribution, production, and consumption. The cultivation and consumption of food is highly political, and at times, contentious. Specific focus is given to issues like social justice, GMOs, human health, environment and agribusiness.
PS 571. PUBLIC POLICY THEORY (4).
Theoretical approaches to the study of the policy process, policy elements, policy tools, (e.g., regulation), and policy typologies. PREREQS: Departmental approval required.
PS 572. PUBLIC ADMINISTRATION (4). Principles of public administration, administrative organization and procedures, public relations.
PS 573. US ENERGY POLICY (4). Addresses
US energy policy with respect to how the U.S. governs the production and use of different energy sources, along with the management of its energy infrastructure. Examines policies currently in place, as well as proposals for alternatives, while examining the economic, environmental, national security and energy security implications of different policy approaches.
PS 575. ENVIRONMENTAL POLITICS AND POLICY (4). Environmental and natural resource issues and policies in national and regional context, emphasizing public attitudes, elections, Congress, public policy, and relevant national and state agencies.

PS 576. SCIENCE AND POLITICS (4).
Relationship between science and the political system in political ideas and history, in
bureaucratic politics of science policy, and in contemporary scientific disputes

PS 577. INTERNATIONAL ENVIRONMENTAL POLITICS AND POLICY (4). Analysis of international environmental theory and politics, the development of international environmenta regimes, agreements and treaties, and the process of globalization and the quality of the environment.

PS 578. RENEWABLE ENERGY POLICY (4). Renewable energy policy with respect to how the U.S. governs the market development, production and use of different renewable energy sources are addressed.
PS 583. CUBAN CULTURE, POLITICS AND
ARTS (4). One of two courses that comprise the Cuba Study Abroad Program. It introduces students to Cuban culture, politics (and particularly Cuba-U.S. relations during and after the Revolution) and arts via a combination of lectures/lessons led by invited specialists in their fields, readings, films and student activities. Students will learn about a variety of topics including migration, agriculture, health care, education, economics, religion/spirituality, gender, race, and the arts (literature, music and other performance). Given the interdisciplinary approach to this course, students will also be able to focus on other topics of interest to them/their program of study. CROSSLISTED as ENG 583, WLC 583. PREREQS: Sophomore standing and acceptance into the OSU Cuba Study Abroad Program.

PS 599. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits.

PS 808. WORKSHOP (4). Principles of public administration, administrative organization and procedures, public relations. It will include collaborative governance, leadership, and other issues.

## ■ SOCIOLOGY COURSES

SOC 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
SOC 204. *INTRODUCTION TO SOCIOLOGY (3). Development and application of sociological concepts and perspectives concerning human groups; includes attention to socialization, culture, organization, stratification, and societies. Consideration of fundamental concepts and research methodology. (SS) (Bacc Core Course)

## SOC 205. *INSTITUTIONS AND SOCIAL

CHANGE (3). Sociological study of the dynamic organizational nature of society through analysis of social change and major social institutions such as family, education, religion, the economy, and political systems. (SS) (Bacc Core Course)
SOC 206. *SOCIAL PROBLEMS AND ISSUES
(3). Examination of social problems with particular focus upon U.S. society. Sociological perspectives on definition, description, and analysis of contemporary and recurrent problems in industrialized societies. Investigation of causes and consequences of social problems considered in societal context. (SS) (Bacc Core Course)

## SOC 241. INTRODUCTION TO CRIME

AND JUSTICE (3). Provides a sociological understanding of criminal justice system institutions and processes. Emphasis is placed on understanding the criminal law; police and policing; courts and the prosecution process; and prisons, jails and corrections.
SOC 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
SOC 312. *SOCIOLOGY OF THE FAMILY (4). Survey of the family as a social institution. Addresses historical and cultural perspectives with emphasis on family diversity, variations in family form and life style, interdependence between family and other institutions, analysis of major family issues, forces for change in the family. (Bacc Core Course) PREREQS: (SOC 204 [D-] or

SOC 204H [D-] )
SOC 312H. *SOCIOLOGY OF THE FAMILY
(4). Survey of the family as a social institution. Addresses historical and cultural perspectives with emphasis on family diversity, variations in family form and life style, interdependence between family and other institutions, analysis of major amily issues, forces for change in the family (Bacc Core Course) PREREQS: (SOC 204 [D-] or SOC 204H [D-] ) and Honors College approval required.
SOC 313. SOCIOLOGY OF INTIMATE
RELATIONSHIPS (4). Examines the
microsociological dynamics of intimate relationships. Perceptions and expectations of intimate relationships are explored. Specific attention will be given to issues, processes, and factors that are involved in the construction and management of intimate relationships in contemporary society. PREREQS: SOC 204 [D-] or SOC 204H [D-]

SOC 315. ^METHODS I: RESEARCH DESIGN
(4). First in a two-course sequence required of all sociology majors. Students learn to formulate researchable questions, devise measures, select data collection techniques, and examine ethical and practical dilemmas in constructing sociological research. (Writing Intensive Course) PREREQS: (SOC 204 [D-] or SOC 204H [D-] ) and junior standing. Sociology majors only.

## SOC 316. METHODS II: QUANTITATIVE

ANALYSIS (4). Second in a two-course sequence required of all sociology majors. The primary objective is to provide students with the statistical skills necessary to analyze sociological data. Covers the construction and interpretation of contingency tables, basic ideas of probability and statistical inference, and an introduction to correlation and regression. PREREQS: ((SOC 204 [D-] or SOC 204H [D-] ) and SOC 315 [C-] ) and junior standing. Sociology majors only.
SOC 340. DEVIANT BEHAVIOR AND SOCIAL
CONTROL (4). Current perspectives, research and theories of deviant behavior. Review and analysis of various approaches and programs designed to prevent and deal with deviant behavior. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 345. *CRIMES AND VIOLENCE IN INTIMATE RELATIONSHIPS (4). Analyzes the historical, social, political, legal, cultural, and psychological aspects of domestic violence, sexual assault, and stalking. Addresses definitions of the problem, demographics, survivors, perpetrators, witnesses, bystanders, strategies and tactics of abusers and survivors, along with strategies for prevention, intervention, treatment, and social change. (Bacc Core Course)
SOC 350. HEALTH, ILLNESS AND SOCIETY (4). Social and cultural factors in the identification, course, and treatment of illness; analysis of selected health settings and professions. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 355. DEATH AND DYING (4). An overview of cross-cultural and historical attitudes and practices around end of life, death and dying. Assessment of contemporary legal, professional, cultural and technological issues surrounding end of life/death and dying. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 360. *POPULATION TRENDS AND POLICY
(4). Basic socio-demographic factors affecting population size, distribution, composition and change; examination of local, national, and international trends, and demographic policy. (Bacc Core Course) PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 381. SOCIAL DIMENSIONS OF
SUSTAINABILITY (4). Exploration of the social forces driving current views of sustainability. Specific attention will be given to values and belief systems, as well as social institutions in shaping sustainability issues related to ecologically sound,
socially just, and economically viable outcomes. PREREQS: SOC 204 [D-] or SOC 204H [D-]
SOC 399. SPECIAL TOPICS (1-16). Selected topics of special or current interest not covered in other courses. This course is repeatable for a maximum of 16 credits. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 399H. SPECIAL TOPICS (1-16). Selected topics of special or current interest not covered in other courses. This course is repeatable for a maximum of 16 credits. PREREQS: (SOC 204 [D-] or SOC 204 H [D-] ) and Honors College approval required.
SOC 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
SOC 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Department approval required.

SOC 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
SOC 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
SOC 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )

SOC 410. INTERNSHIP (1-16). Graded P/N. This course is repeatable for a maximum of 30 credits. PREREQS: Departmental approval required.

SOC 412. SOCIOLOGY OF WORK AND FAMILY
(4). Survey of the intersections between families and work; variations in family structure, policies and paid and unpaid work in the United States; interdependence between paid and unpaid family labor and broader social change.

SOC 413. SOCIOLOGICAL THEORY (4). Historical and philosophical foundations of sociological theory; major schools of thought and their major contributors. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 418. QUALITATIVE RESEARCH METHODS
(4). An introduction to the theory and methods of qualitative research. Students will be exposed to various qualitative research methods through practical field exercises. These include ethnographic field observation, content analysis, interviewing, focus groups and unobtrusive measures. Other commonly used methods of collecting qualitative data are also examined. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 422. SOCIOLOGY OF ORGANIZATIONS (4). Introduces sociological thinking about organizations in contemporary society with an emphasis on exploring the range of frameworks used to think about and explain modern organizations; applies knowledge to specific contemporary organizations. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 424. SOCIAL PSYCHOLOGY (4). Examines individuals in social context; explores dynamics of interpersonal relationships; evaluates link between self and society, including concepts of role/status/ identity. Contemporary research design, problems, and findings pertinent to social psychology. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 426. *SOCIAL INEQUALITY (4). Evolution of social inequality in society. Emphasis upon the causes and consequences of inequality in power, privilege, and prestige in human societies, with special attention to the United States. (Bacc Core Course) PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 430. GENDER AND SOCIETY (4).
Examination of nature and consequences of social differentiation and stratification on the basis of sex and gender. Analysis of social position of women and men in society, focusing on their positions in
institutional areas such as the family, politics, work and education. Evaluation of theories of biological psychological, and sociological bases for the behavior and characteristics of women and men. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 432. SOCIOLOGY OF AGING (3).
Examination of the social significance of age, position and problems of the elderly in society; discusses the societal and individual consequences of an aging population; explores social theories of aging. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 437. RACE AND ETHNIC RELATIONS (4) Comparative/international perspective on the social construction of race and ethnicity. Social, economic and political experiences of selected groups in the U.S. and other countries are examined. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 438. US IMMIGRATION ISSUES IN THE 21ST CENTURY (4). Provides a critical overview of immigration to the United States from a sociohistoric perspective. Examines how successive waves of immigrants have influenced American society from the earliest groups of Europeans in the 19th century to the most recently arriving immigrants from Asia, Latin America and the Caribbean. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )

SOC 439. WELFARE AND SOCIAL SERVICES
(4). Analysis of social, political, and economic forces affecting welfare and social service systems, with overview of current programs, policy issues, public opinions, occupational aspects and societal impacts. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 440. JUVENILE DELINQUENCY (4). Contemporary research and theories of juvenile delinquency. Review and evaluation of various strategies and programs designed to prevent delinquency or for treatment of delinquents.
PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 441. CRIMINOLOGY AND PENOLOGY (4). Review of sociological perspectives on crime and criminal justice, with emphasis upon North America. Review of crime statistics, types of crime, theories of criminality, corrections programs and prisons, and programs to reduce crime. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )

## SOC 442. SOCIOLOGY OF DRUG USE

AND ABUSE (4). Emphasizes a sociological understanding of drug use, drug problems and drug policy. In order to understand drug use and abuse it is necessary to understand the chemical properties of the substances at issue, the attributes of the people who use and abuse drugs, and the norms and characteristics of the society in which the substance use occurs. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )

## SOC 444. INSIDE-OUT: PRISONS,

COMMUNITIES, AND PREVENTION (4). Course takes place in a state correctional facility, with OSU students learning alongside "inside" students from the facility for a full quarter. Course content examines prisons, communities, crime, and prevention from a sociological perspective. All students participate in service-learning projects. PREREQS: SOC 204 [C] and junior standing.
SOC 444H. INSIDE-OUT: PRISONS,
COMMUNITIES, AND PREVENTION (4). Course takes place in a state correctional facility, with OSU students learning alongside "inside" students from the facility for a full quarter. Course content examines prisons, communities, crime, and prevention from a sociological perspective. All students participate in service-learning projects. PREREQS: SOC 204 [C] and junior standing. Honors College approval required.

SOC 448. LAW AND SOCIETY (4). An introduction to social scientific approaches to law, covering major topics in the area. Topics may include disputing, legal consciousness, social movements and law, punishment, legal actors, and
egal institutions. PREREQS: (SOC 204 or SOC 204 H ) with minimum grade of D-

SOC 449. LAW, CRIME, AND POLICY (4).
Surveys criminal justice policies aimed at enforcing laws, reducing crime, punishing violators, and rehabilitating ex-offenders. Interrogates the behavioral assumptions used in creating and evaluating policies. Examines specific crimes and the policies used to address them. PREREQS: SOC 204 [D-] or SOC 204H [D-]
SOC 450. SOCIOLOGY OF EDUCATION (4). Contemporary perspectives and research on schools, students, teachers and social forces affecting the educational system. Review of comparative and evaluation research on alternative educational strategies and programs. Overview of the literature of educational critics. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 452. SOCIOLOGY OF RELIGION (4). Social patterns within U.S. religious groups, relation of religious groups to society, and the methodologica problems in studying such groups. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )

SOC 453. SOCIOLOGY OF SPORT (4). Critical analysis of sport. Examines sport socialization; deviance; violence; gender; race/ethnicity; professional sport careers; intercollegiate athletics; marriage/family; and the media. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )

SOC 454. *LEISURE AND CULTURE (4). Examination of the social, cultural, and global significance of leisure activity (in particular, tourism and recreation) from a historical perspective relative to attitudes, values, behaviors, and use of natural resources. (SS) (Bacc Core Course) PREREQS: (SOC 204 [D-] or SOC 204H [D-])
SOC 456. *SCIENCE AND TECHNOLOGY
IN SOCIAL CONTEXT (4). Study of social aspects of science and technology (values, practices, organization, impacts) by analysis of issues revealing their relationship to other social and cultural processes. (Bacc Core Course) PREREQS: (SOC 204 [D-] or SOC 204H [D-] )

## SOC 460. THE SOCIOLOGY OF

GLOBALIZATION (4). Examines the sociological effect of globalization on Western and nonWestern societies. The course focuses on changes in the global economy and how this has influenced the social structure, patterns of change, and mutual influences among societies. (NC) PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 466. INTERNATIONAL DEVELOPMENT: GENDER ISSUES (4). Examines roles and statuses of women and men throughout the world and differential impact of development on men and women. Evaluates traditional development policies and programs and discusses theories of gender stratification and of modernization. (NC) PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 470. COLLECTIVE BEHAVIOR (4).
Examines current theories; focuses on behavior in crowds and diverse social settings including fads/fashions, ecstatic crowds/miracles, natural/ technological disasters, urban legends, collective delusions/mass hysteria, protest/demonstrations, riots/mobs. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 471. SOCIAL MOVEMENTS (4). Introduces core theoretical and methodological issues related to social movements in the US and abroad. Emphasizes social forces giving rise to movements, tactics employed by movements, and impacts of them on society. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 472. GIVING AND VOLUNTARISM (4). Examines concepts of donor motivation, giving, charity, voluntarism, philanthropy, and the nonprofit sector through the analysis of gender roles, ethnicity, power, status, and social institutions. PREREQS: SOC 204 [D-] or SOC 204H [D-] and /or instructor approval.

SOC 475. RURAL SOCIOLOGY (4). Helps students understand the rich diversity in rural society, with an emphasis on the interdependencies between urban and rural contexts. Current issues and social problems experienced by rural populations and how sociology is used to understand and address issues affecting rural communities are explored. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 480. *ENVIRONMENTAL SOCIOLOGY (4). Explores the evolution of environmental thought, paradigm shifts, and institutional structures associated with environmental concerns, social movements, and social impacts. (Bacc Core Course) PREREQS: (SOC 204 [D-] or SOC 204H D-] )
SOC 481. *SOCIETY AND NATURAL
RESOURCES (4). Explores the complex interrelationships between humans and natural resources, emphasizing how management decisions and organizations are enmeshed in social and cultural contexts. (Bacc Core Course) PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 485. *CONSENSUS AND NATURAL RESOURCES (3). Students will use a working group approach. They will select a natural resource topic, study the team process and interaction as a method of learning, explore the issue using systems practice, and strive for consensus on solutions to their issue. CROSSLISTED as ANS 485, FES 485/FES 585, FW 485/FW 585. (Bacc Core Course)

SOC 499. SPECIAL TOPICS (1-16). Selected topics of special or current interest not covered in other courses. For advanced undergraduate and graduate students. This course is repeatable for a maximum of 16 credits. PREREQS: (SOC 204 [D-] or SOC 204H [D-] )
SOC 499H. SPECIAL TOPICS (1-16). Selected topics of special or current interest not covered in other courses. For advanced undergraduate and graduate students. This course is repeatable for a maximum of 16 credits. PREREQS: (SOC 204 [D-] or SOC 204H [D-] ) and Honors College approval required.

SOC 501. RESEARCH AND SCHOLARSHIP
1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
SOC 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits.
SOC 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.
SOC 505. READING AND CONFERENCE (116). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

SOC 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
SOC 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

SOC 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.
SOC 510. INTERNSHIP (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
SOC 512. SOCIOLOGY OF WORK AND FAMILY (4). Survey of the intersections between families and work; variations in family structure, policies and paid and unpaid work in the United States; interdependence between paid and unpaid family labor and broader social change. PREREQS: SOC 204 or SOC 204H
SOC 513. SOCIOLOGICAL THEORY (4).
Historical and philosophical foundations of sociological theory; major school of thought and their major contributors. PREREQS: SOC 204 or SOC 204 H

SOC 515. UNDERSTANDING SOCIAL RESEARCH (4). Study of basic concepts and principles of qualitative and quantitative social research, including selection of general strategies and specific designs, conceptual and operational measurement, sample selection, data collection, data processing and analysis techniques, interpretation and reporting. Utilizes reports of social research in scholarly journals, popular media, and agency documents. Emphasis on critical evaluation and interpretation. PREREQS: Reserved for MPP students only.

SOC 518. QUALITATIVE RESEARCH METHODS
(4). An introduction to the theory and methods of qualitative research. Students will be exposed to various qualitative research methods through practical field exercises. These include ethnographic field observation, content analysis, interviewing, focus groups and unobtrusive measures. Other commonly used methods of collecting qualitative data are also examined. PREREQS: SOC 204 or SOC 204H
SOC 522. SOCIOLOGY OF ORGANIZATIONS
(4). Introduces sociological thinking about organizations in contemporary society with an emphasis on exploring the range of frameworks used to think about and explain modern organizations; applies knowledge to specific contemporary organizations. PREREQS: SOC 204 or SOC 204H

SOC 524. SOCIAL PSYCHOLOGY (4). Examines individuals in social context; explores dynamics of interpersonal relationships; evaluates link between self and society, including concepts of role/status/ identity. Contemporary research design, problems, and findings pertinent to social psychology. PREREQS: SOC 204 or SOC 204H

SOC 526. SOCIAL INEQUALITY (4). Evolution of social inequality in society. Emphasis upon the causes and consequences of inequality in power, privilege, and prestige in human societies, with special attention to the United States. PREREQS: SOC 204 or SOC 204H

## SOC 530. GENDER AND SOCIETY (4).

Examination of nature and consequences of social differentiation and stratification on the basis of sex and gender. Analysis of social position of women and men in society, focusing on their positions in institutional areas such as the family, politics, work and education. Evaluation of theories of biological, psychological, and sociological bases for the behavior and characteristics of women and men. PREREQS: SOC 204 or SOC 204H
SOC 532. SOCIOLOGY OF AGING (3). Examination of the social significance of age, position and problems of the elderly in society; discusses the societal and individual consequences of an aging population; explores social theories of aging. PREREQS: SOC 204 or SOC 204H
SOC 537. RACE AND ETHNIC RELATIONS
(4). Comparative/international perspective on the social construction of race and ethnicity. Social, economic and political experiences of selected groups in the U.S. and other countries are examined. PREREQS: SOC 204 or SOC 204H

## SOC 538. US IMMIGRATION ISSUES IN THE

 21ST CENTURY (4). Provides a critical overview of immigration to the United States from a sociohistoric perspective. Examines how successive waves of immigrants have influenced American society from the earliest groups of Europeans in the 19th century to the most recently arriving immigrants from Asia, Latin America and the Caribbean.SOC 539. WELFARE AND SOCIAL SERVICES
(4). Analysis of social, political, and economic forces affecting welfare and social service systems, with overview of current programs, policy issues, public opinions, occupational aspects and societal impacts. PREREQS: SOC 204 or SOC 204H

SOC 540. JUVENILE DELINQUENCY (4). Contemporary research and theories of juvenile delinquency. Review and evaluation of various strategies and programs designed to prevent delinquency or for treatment of delinquents. PREREQS: SOC 204 or SOC 204H
SOC 541. CRIMINOLOGY AND PENOLOGY
(4). Review of sociological perspectives on crime and criminal justice, with emphasis upon North America. Review of crime statistics, types of crime, theories of criminality, corrections programs and prisons, and programs to reduce crime. PREREQS: SOC 204 or SOC 204H
SOC 542. SOCIOLOGY OF DRUG USE
AND ABUSE (4). Emphasizes a sociological understanding of drug use, drug problems and drug policy. In order to understand drug use and abuse it is necessary to understand the chemical properties of the substances at issue, the attributes of the people who use and abuse drugs, and the norms and characteristics of the society in which the substance use occurs.

## SOC 544. INSIDE-OUT: PRISONS,

COMMUNITIES, AND PREVENTION (4). Course takes place in a state correctional facility, with OSU students learning alongside "inside" students from the facility for a full quarter. Course content examines prisons, communities, crime, and prevention from a sociological perspective. All students participate in service-learning projects. PREREQS: SOC 204 and junior standing.
SOC 548. LAW AND SOCIETY (4). An
introduction to social scientific approaches to law, covering major topics in the area. Topics may include disputing, legal consciousness, social movements and law, punishment, legal actors, and legal institutions. PREREQS: (SOC 204 or SOC 204 H ) with minimum grade of D-
SOC 549. LAW, CRIME, AND POLICY (4).
Surveys criminal justice policies aimed at enforcing laws, reducing crime, punishing violators, and rehabilitating ex-offenders. Interrogates the behavioral assumptions used in creating and evaluating policies. Examines specific crimes and the policies used to address them. PREREQS: SOC 204 or SOC 204H

SOC 550. SOCIOLOGY OF EDUCATION (4). Contemporary perspectives and research on schools, students, teachers and social forces affecting the educational system. Review of comparative and evaluation research on alternative educational strategies and programs. Overview of the literature of educational critics.
PREREQS: SOC 204 or SOC 204H
SOC 552. SOCIOLOGY OF RELIGION (4). Social patterns within U.S. religious groups, relation of religious groups to society, and the methodological problems in studying such groups. PREREQS: SOC 204 or SOC 204H

SOC 553. SOCIOLOGY OF SPORT (4). Critical analysis of sport. Examines sport socialization; deviance; violence; gender; race/ethnicity; professional sport careers; intercollegiate athletics; marriage/family; and the media. PREREQS: SOC 204 or SOC 204H
SOC 554. LEISURE AND CULTURE (4).
Examination of the social, cultural, and global significance of leisure activity (in particular, tourism and recreation) from a historical perspective relative to attitudes, values, behaviors, and use of natural resources. PREREQS: SOC 204 or SOC 204H
SOC 556. SCIENCE AND TECHNOLOGY IN SOCIAL CONTEXT (4). Study of social aspects of science and technology (values, practices, organization, impacts) by analysis of issues revealing their relationship to other social and cultural processes. PREREQS: SOC 204 or SOC 204H

SOC 560. THE SOCIOLOGY OF
GLOBALIZATION (4). Examines the sociological effect of globalization on Western and non-

Western societies. The course focuses on changes in the global economy and how this has influenced the social structure, patterns of change, and mutual influences among societies. PREREQS: SOC 204 or SOC 204H
SOC 566. INTERNATIONAL DEVELOPMENT:
GENDER ISSUES (4). Examines roles and statuses of women and men throughout the world and differential impact of development on men and women. Evaluates traditional development policies and programs and discusses theories of gender stratification and of modernization. PREREQS: SOC 204 or SOC 204H

SOC 570. COLLECTIVE BEHAVIOR (4).
Examines current theories; focuses on behavior in crowds and diverse social settings including fads/fashions, ecstatic crowds/miracles, natural/ technological disasters, urban legends, collective delusions/mass hysteria, protest/demonstrations, riots/mobs. PREREQS: SOC 204 or SOC 204H

SOC 571. SOCIAL MOVEMENTS (4). Introduces core theoretical and methodological issues related to social movements in the US and abroad. Emphasizes social forces giving rise to movements, tactics employed by movements, and impacts of them on society. PREREQS: SOC 204 or SOC 204H

SOC 572. GIVING AND VOLUNTARISM
(4). Examines concepts of donor motivation, giving, charity, voluntarism, philanthropy, and the nonprofit sector through the analysis of gender roles, ethnicity, power, status, and social institutions. PREREQS: SOC 204 or SOC 204H or instructor approval.

SOC 575. RURAL SOCIOLOGY (4). Helps students understand the rich diversity in rural society, with an emphasis on the interdependencies between urban and rural contexts. Current issues and social problems experienced by rural populations and how sociology is used to understand and address issues affecting rural communities are explored. PREREQS: SOC 204 or SOC 204H
SOC 580. ENVIRONMENTAL SOCIOLOGY (4) Explores the evolution of environmental thought, paradigm shifts, and institutional structures associated with environmental concerns, social movements, and social impacts. PREREQS: SOC 204 or SOC 204H
SOC 581. SOCIETY AND NATURAL
RESOURCES (4). Explores the complex interrelationships between humans and natural resources, emphasizing how management decisions and organizations are enmeshed in social and cultural contexts. PREREQS: SOC 204 or SOC 204H
SOC 585. CONSENSUS AND NATURAL RESOURCES (3). Students will use a working group approach. They will select a natural resource topic, study the team process and interaction as a method of learning, explore the issue using systems practice, and strive for consensus on solutions to their issue. CROSSLISTED as ANS 485, FES 485/FES 585, FW 485/FW 585.
SOC 599. SPECIAL TOPICS (1-16). Selected topics of special or current interest not covered in other courses. For advanced undergraduate and graduate students. This course is repeatable for a maximum of 16 credits. PREREQS: SOC 204 or SOC 204H
SOC 808. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

## Graduate Minors

Creative Writing

## English

The School of Writing, Literature, and Film offers instruction in literary studies, writing (creative, critical, professional/ technical), and critical film studies to students in all disciplines who seek the cultural and intellectual values of the humanities and arts, as well as the broadening influence of humanistic studies, creative expression, cultural studies, and writing for the professions. In addition, the school provides courses for those interested in the major or minor in English, especially for those who plan to teach in the elementary, secondary, or college professions, or who plan to pursue graduate work in English, writing, or film. The Writing minor, which is also offered via Ecampus, serves students interested in creative writing and/or writing for the scientific and/or technical and professional fields.

## MINOR PROGRAMS

The minor in English allows students to concentrate in the area of the liberal arts and develop the reading and writing skills often demanded by employers. Students taking a minor in English choose from among three areas: general English studies, English literature, and American literature.

The minor in Writing requires a total of 27 credits to be taken as a minimum of 11 credits ( 3 courses, with at least one at the 300 level) from the following: WR 199, WR 214, WR 222, WR 224, WR 241, WR 323, WR 324, WR 327, WR 341, WR 362, and WR 383 and 12 credits (3 courses) from the following: WR 406, WR 407, WR 408, WR 411, WR 414, WR 416, WR 420, WR 424, WR 441, WR 448, WR 493, WR 495; and one upper-division literature or writing elective.

## GRADUATE PROGRAMS

The School of Writing, Literature, and Film offers graduate work leading to a Master of Arts degree in English. The major area of concentration may be in literature and culture, or rhetoric, writing, and culture. The school also offers the Master of Fine Arts degree in Creative Writing. Graduate work in the school may also be applied to the Master of Arts in Interdisciplinary Studies (MAIS) degree or to minors in other advanced degree programs.

## ENGLISH (BA, CRED, HBA)

Undergraduate English majors must attain proficiency in a foreign language, as certified by the School of Language, Culture, and Society, equivalent to that assumed at the end of a second-year language sequence ( $211 / 212 / 213$ ).

A grade of C - or better is required for all courses used to complete major requirements.

## Lower Division

From one of the following sequences, 8 credits:
ENG 204. *Survey of British Literature:
Beginnings to 1660 (4)
ENG 205. *Survey of British Literature: Restoration to Romantic Era (4)
ENG 206. *Survey of British Literature:
Victorian Era to 20th Century (4)
ENG 210. *Literatures of the World: Asia (4)
ENG 211. *Literatures of the World: Africa (4)

## Footnotes:

* Baccalaureate Core Course (BCC)
${ }^{\wedge}$ Writing Intensive Course (WIC)
Minor Code: 268

## WRITING MINOR

## Also available via Ecampus.

The Writing minor benefits students who wish to learn about, practice and hone their writing skills, primarily to prepare them for their careers and to increase their qualifications for professional positions in a world where communication skills are ever more needed and revered by employers. Some students with aspirations for graduate, law or medical school studies pursue the Writing minor to better enable themselves to write more proficiently at higher academic levels, where work is more rigorous and written output is expected to be of a very high level. Others engage in the Writing minor for the pure joy of expressing themselves, working with ideas and words, and many publish works in student publications on campus and in external publications. Writing minors may also participate in on-campus and off-campus internships for credit.

The Writing minor requires a minimum of 27 credits, as follows: a minimum of 11 credits from 100- to 300-level writing courses, plus a minimum of 12 credits from 400-level upper-division writing courses, plus one elective upperdivision (300/400) 4-credit course in writing or literature.

## Part A. A minimum of 11 credits

 from 100- to 300-level writing courses. Choose from this list, at least one course must be at the 300 level:WR 199. Special Studies (3)
WR 201. *Writing for Media (3)
WR 214. *Writing in Business (3)
WR 222. *English Composition (3)

## GRADUATE MAJORS

## CREATIVE WRITING (MFA)

Graduate Areas of Concentration
Fiction, poetry, nonfiction writing
The School of Writing, Literature, and Film offers the Master of Fine Arts degree in Creative Writing (fiction, poetry, nonfiction writing) at the Corvallis campus and a Low-Residency MFA partner program on the OSU-Cascades campus in Bend, Oregon.

The MFA Program in Creative Writing on the OSU Corvallis campus is a two-year, high residency, studio/research program that interweaves literary artistic practice and literary scholarship. Tracks in fiction, nonfiction, and poetry are supported by writing workshops led by nationally known writers, as well as by courses in form, craft, and theory. Inten-
sive mentoring during the thesis year, training in creative writing pedagogy, professional internships, and opportunities for outreach and community engagement produce graduates who are both accomplished creative writers and advocates for the role of literary arts in American culture and society.

OSU-Cascades's Low-Residency MFA is a two-year program combining writing workshop with studies in craft, literature, and vocation. The program offers intensive 10-day residency sessions in June and October and individualized mentorships by nationally known writers throughout the year. The program's intensive low-residency format is designed to balance the modern writer's need for both solitude and community, for both freedom and responsibility-to give our students the freedom as well as the discipline to write. Our curriculum builds sustainable writing habits, develops skills needed to support a creative livelihood after graduation, and creates an environment for taking imaginative risks.

ASIA (4). Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of Asia. (H) (NC) (Bacc Core Course)

ENG 211. *LITERATURES OF THE WORLD:
AFRICA (4). Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of Africa. (H) (NC) (Bacc Core Course)
ENG 212. *LITERATURES OF THE WORLD: MESO/SOUTH AMERICA, CARIBBEAN (4).
Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of Meso- and South America and the Caribbean. (H) (NC) (Bacc Core Course)

ENG 213. *LITERATURES OF THE WORLD
MIDDLE EAST (4). Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of the Middle East. (H) (NC) (Bacc Core Course)
ENG 213H. *LITERATURES OF THE WORLD:
MIDDLE EAST (4). Representative works of
poetry, prose, and drama from nonwestern cultural traditions. Covers literature of the Middle East. (H) (NC) (Bacc Core Course) PREREQS: Honors College approval required.
ENG 214. *LITERATURE OF THE WORLD:
EUROPE (4). Representative works of poetry, prose, and drama written by European authors (Bacc Core Course)

ENG 215. *CLASSICAL MYTHOLOGY (4). Greek
and Roman mythology, its allusions, continuing influences. Not offered every year. (H) (Bacc Core Course)
ENG 220. *TOPICS IN DIFFERENCE, POWER,
AND DISCRIMINATION (4). A comparative treatment of literary topics in the context of institutional and systematic discrimination. Not offered every year. CROSSLISTED as FILM 220 (H) (Bacc Core Course)

ENG 221. *AFRICAN-AMERICAN LITERATURE
(4). Reading and critical analysis of African-

American literature in historical, political, and/or thematic perspective. Content changes from term to term; see Schedule of Classes. Not offered every year. (H) (Bacc Core Course) This course is repeatable for a maximum of 8 credits.

## NG 221H. *AFRICAN-AMERICAN

LITERATURE (4). Reading and critical analysis of African-American literature in historical, political, and/or thematic perspective. Content changes from term to term; see Schedule of Classes. Not offered every year. (H) (Bacc Core Course) This course is repeatable for a maximum of 8 credits. PREREQS: Honors College approval required.
ENG 225. THE ART, SCIENCE, AND LITERATURE OF FLY FISHING (1). Designed to rapidly introduce students to some of the major themes and formal devices of literature written about fly fishing. In four days, we will gain a sense of how four different genres--the short story, the novel, poetry, and creative nonfiction--represent and understand this activity. COREQS: FW 112, PAC 331

ENG 253. *SURVEY OF AMERICAN
LITERATURE: COLONIAL TO 1900 (4).
Readings from American literature presented in chronological sequence, important eras and movements with emphasis on major writers. (H) (Bacc Core Course)
ENG 254. *SURVEY OF AMERICAN
LITERATURE: 1900 TO PRESENT (4).
Readings from American literature presented in chronological sequence, important eras and movements with emphasis on major writers. (H) (Bacc Core Course)
ENG 254H. *SURVEY OF AMERICAN LITERATURE: 1900 TO PRESENT (4).
Readings from American literature presented in chronological sequence, important eras and movements with emphasis on major writers. (H) (Bacc Core Course) PREREQS: Honors College approval required.
ENG 260. *LITERATURE OF AMERICAN MINORITIES (4). Study of the literature of American minorities: North American Indian, black, Chicano/Chicana, Asian, Middle Eastern, gay and lesbian. Not offered every year. (H) (Bacc Core Course) PREREQS: Sophomore standing.
ENG 260H. *LITERATURE OF AMERICAN MINORITIES (4). Study of the literature of American minorities: North American Indian, black, Chicano/Chicana, Asian, Middle Eastern, gay and lesbian. Not offered every year. (H) (Bacc Core Course) PREREQS: Sophomore standing and Honors College approval required.

ENG 275. *THE BIBLE AS LITERATURE (4). Biblical structure, literary types, ideas, influences. Not offered every year. (H) (Bacc Core Course)
ENG 275H. *THE BIBLE AS LITERATURE (4). Biblical structure, literary types, ideas, influences. Not offered every year. (H) (Bacc Core Course) PREREQS: Honors College approval required.
ENG 295. *FEMINISM AND THE BIBLE (3). Examines feminist interpretations of the Bible and pays special attention to intersections of race, social class, sexual identity, and nation in biblical interpretation. (Bacc Core Course) CROSSLISTED as PHL 295, WGSS 295.
ENG 295H. *FEMINISM AND THE BIBLE (3). Examines feminist interpretations of the Bible and pays special attention to intersections of race, social class, sexual identity, and nation in biblical interpretation. (Bacc Core Course) CROSSLISTED as PHL 295, PHL 295H, WGSS 295, WGSS 295H.
ENG 311. ^STUDIES IN BRITISH PROSE (4). An introduction to the prose genre in British literature with intensive practice in reading and writing practices for literary study. (Writing Intensive Course)
ENG 312. ^STUDIES IN BRITISH DRAMA (4). An introduction to the dramatic arts genre in British literature with a special emphasis in reading and writing for literary study. (Writing Intensive Course)
ENG 313. ^${ }^{\wedge}$ STUDIES IN BRITISH POETRY (4). An introduction to the poetry genre in British literature with intensive practice in reading and writing for literary study. (Writing Intensive Course)

## ENG 317. *THE AMERICAN NOVEL:

BEGINNINGS TO CHOPIN (4). Chronological survey of the novel in America. Covers from the beginnings to Chopin. (H) (Bacc Core Course)
ENG 318. *THE AMERICAN NOVEL:
MODERNIST PERIOD (4). Chronological survey of the novel in America. Covers Modernist Period from Dreiser to Faulkner. (H) (Bacc Core Course)

ENG 319. *THE AMERICAN NOVEL: POST-
WORLD WAR II (4). Chronological survey of the novel in America. Covers Post-World War II: Mailer to the present. (H) (Bacc Core Course)
ENG 320. *STUDIES IN PAGE, STAGE, AND SCREEN (4). Study of a particular theme, genre, movement, or author through the relations of text and performance. Topics change from term to term and may include content from film, drama, digital sources, and other visual media. (H) (Bacc Core Course) This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing or above.

ENG 321. *STUDIES IN WORD, OBJECT, AND IMAGE (4). Study of a particular theme, genre, movement, or author through the relations of texts to material artifacts and/or static visual objects (e.g., paintings, engravings, printed matter, or photographs). Topics change from term to term. (Bacc Core Course) This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing or above.
ENG 322. *STUDIES IN GLOBALISM, TEXT,
AND EVENT (4). Study of a particular theme, genre, movement, or author as informed by patterns of globalization, issues in international relations, and/or landmark moments of cultura exchange. Topics change from term to term. (Bacc Core Course) This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing.
ENG 330. *THE HOLOCAUST IN LITERATURE
AND FILM (4). Study of fiction, memoir, and film representing Nazi Holocaust of European Jewry. Reviews history of racial Anti-Semitism and rise of Nazism as context for textual analysis of Holocaust literature. Examines literary and filmic form as productive to social awareness of the roots, events, and aftermath of the Holocaust. (Bacc Core

Course) PREREQS: Sophomore standing or above
ENG 345. INTRODUCTION TO LITERARY
CRITICISM AND THEORY (4). Study and analysis of critical frameworks and methodologies for the interpretation of literature and culture. Required for English majors. (H) PREREQS: ENG 200 [C-]
ENG 360. *NATIVE AMERICAN LITERATURE
(4). An introduction to the prose and poetry written by Native Americans of the North American continent. Not offered every year. (H) (NC) (Bacc Core Course)

ENG 362. *AMERICAN WOMEN WRITERS (4).
Study of important literary works of any genre by American women from historical, thematic, or formalist perspectives. (H) (Bacc Core Course)
ENG 374. *MODERN SHORT STORY (4). Survey of the short story from the 19th century to the present. Not offered every year. (H) (Bacc Core Course)

ENG 374H. *MODERN SHORT STORY (4).
Survey of the short story from the 19th century to present. Not offered every year. (H) (Bacc Core Course) PREREQS: Honors College approval required.
ENG 375. CHILDREN'S LITERATURE (4).
Surveys a variety of genres, including fairy tales, folktales, and fables, nonsense poetry, picture books, historical and fantasy novels, examining how these texts represent childhood and connect with historical, cultural, and psychological contexts.

The first course in an interdisciplinary sequence of courses that examines the development and interrelationships of American art and literature from contact to the present. ENG 386 covers Conquest to Civil War. CROSSLISTED as ART 386. PREREQS: Sophomore standing.

## ENG 387. A CULTURAL HISTORY OF

AMERICAN ART AND LITERATURE: PART II
(4). The second course in an interdisciplinary sequence that examines the development and interrelationships of American art and literature from contact to the present. ENG 387 covers Civil War to Harlem Renaissance. CROSSLISTED as ART 387. PREREQS: Sophomore standing.

## ENG 388. A CULTURAL HISTORY OF

 AMERICAN ART AND LITERATURE: PART III (4). The third course in an interdisciplinary sequence that examines the development and interrelationships of American art and literature from contact to the present. ENG 388 covers Great Depression to Postmodernity. CROSSLISTED as ART 388. PREREQS: Sophomore standing.ENG 399. SELECTED TOPICS (1-16). (H) This course is repeatable for a maximum of 16 credits
ENG 399H. SELECTED TOPICS (1-16). (H) This course is repeatable for a maximum of 16 credits PREREQS: Honors College approval required.
ENG 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ENG 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits PREREQS: Departmental approval required.

ENG 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ENG 405. READING AND CONFERENCE (1-
16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ENG 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ENG 406H. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.

ENG 407. ^SEMINAR (1-16). May be repeated as topics vary. CROSSLISTED as AMS 407. (Writing Intensive Core) This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ENG 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
ENG 410. INTERNSHIP IN ENGLISH (1-
16). Provides upper-division English majors with supervised, on-the-job work experience, accompanying academic readings. Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Junior standing in English; 16 credits of literature; 6 credits of writing beyond WR 121. Departmental approval required.

ENG 412. STUDIES IN BRITISH THEATER AND SOCIETY (4). Study of major dramatists and the audiences they addressed, of socio-economic conditions and their interrelations with theatrical institutions. Readings may include dramatic and non-dramatic literature. Historical period and content may vary. (H) This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.
ENG 416. *POWER AND REPRESENTATION (4). Critical analysis of works by colonized peoples, women, and ethnic minorities, with a focus on the issue of representation. Not offered every year. (H) (Bacc Core Course) PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.
ENG 417. THE ENGLISH NOVEL: DEFOE THROUGH SCOTT (4). Selected English novels from Defoe through Scott. Not offered every year (H) PREREQS: Sophomore standing; 8 credits of ENG 200-level or above

ENG 418. THE ENGLISH NOVEL: VICTORIAN
PERIOD (4). Selected English novels focusing on those from the Victorian period. (H) PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.
ENG 419. THE ENGLISH NOVEL: 20TH CENTURY (4). Selected English novels of the 20th century. (H) PREREQS: Sophomore standing; 8 credits in English at 200-level or above.

ENG 420. *STUDIES IN DIFFERENCE, POWER, AND DISCRIMINATION (4). Comparative studies in literature documenting or illuminating institutional and systematic discrimination. Not offered every year. (H) (Bacc Core Course) PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 425. STUDIES IN MEDIEVAL LITERATURE (4). Particular genres, themes, and writers in medieval literature. Topics change from term to term. (H) This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 426. STUDIES IN CHAUCER (4). The works of Geoffrey Chaucer in their historical, cultural, and poetic contexts. Topics change from term to term. (H) This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.
ENG 430. STUDIES IN EARLY MODERN
LITERATURE (4). Literature and culture of the Tudor, early Stuart, and Interregnum periods, 1485-1660. Content and genres will vary and may include non-English writers who influenced the English Renaissance. (H) This course is
epeatable for a maximum of 8 credits. PREREQS Sophomore standing; 8 credits of ENG 200-level or above.

## ENG 433. STUDIES IN THE LONG EIGHTEENTH

CENTURY (4). Literature of the period 1660-
1800, with emphasis on one or more of the following poets: Dryden, Pope, Swift, Johnson, Gray, Cowper. May also include prose writers (e.g., Behn, Fielding, Richardson, Addison and Steele) and dramatists (e.g., Congrieve, Wycherly, Gay). Not offered every term. (H) This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing; 8 credits of ENG 200 -level or above.

ENG 434. STUDIES IN ROMANTICISM (4).
Romantic-period writing and culture, with emphasis on one or more of the following authors: Blake, Wordsworth, Coleridge, Keats, Byron and Shelley. May also include Romantic novelists and prose writers (e.g., Austen, Wollstonecraft, Burke). Not offered every term. (H) This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.
ENG 435. STUDIES IN SHAKESPEARE (4).
Shakespeare's works from a variety of critical and scholarly perspectives. Not offered every term (H) This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing; 8 credits of ENG 200-level or above
ENG 436. STUDIES IN VICTORIAN LITERATURE
(4). Fiction, poetry, and nonfiction prose of the Victorian era. Topics change from term to term see Schedule of Classes. (H) This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.
ENG 438. STUDIES IN MODERNISM (4). Studies in the literature and contexts of the Modernist period in Anglo-American letters (1890s to 1940s). Authors may include Wilde, Crane, Conrad, Eliot, Stevens, James, Woolf, Joyce, Lawrence, Shaw, Forster. Topics change from term to term. (H) This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.

## ENG 440. STUDIES IN MODERN IRISH

LITERATURE (4). Studies in the literature and contexts of the period of Irish writing often referred to as the Irish Renaissance. Authors may include Yeats, Joyce, Shaw, O'Casey, Gregory, Synge, Bowen, Moore, Behan, O'Brien, Kavanaugh, Cronin. Sometimes offered as a study of Joyce's works alone. Topics change from term to term. (H) This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 445. ^STUDIES IN NONFICTION (4). Particular essayists and journalists, movements, problems, conventions, and types of nonfiction writing in English. Topics change from term to term: see Schedule of Classes. Not offered every year. (H) (Writing Intensive Course) This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.
ENG 450. STUDIES IN SHORT FICTION (4). Particular writers, movements, and types of short fiction. Topics change from term to term: see Schedule of Classes. Not offered every year. (H) This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.
ENG 454. MAJOR AUTHORS (4). Advanced study of major and influential authors from various cultures and backgrounds. Subjects change from term to term; see Schedule of Classes. Not offered every year. $(H)$ This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.
ENG 460. STUDIES IN DRAMA (4). Particular dramatists, movements, conventions, and types of world drama. Topics change from term to term;
see Schedule of Classes. Not offered every term (H) This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.
ENG 465. STUDIES IN THE NOVEL (4). Particula novelists, movements, conventions, and types of the novel throughout its history. Topics change from term to term; see Schedule of Classes. Not offered every term. (H) This course is repeatable for a maximum of 8 credits. PREREQS:
Sophomore standing; 8 credits of ENG 200-level or above.
ENG 470. ^STUDIES IN POETRY (4). Particular poets, movements, problems, conventions, and types of poetry in English or English translation. Topics change from term to term; see Schedule of Classes. Not offered every term. (H) (Writing Intensive Course) This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 475. STUDIES IN CRITICISM (4). Particular critics, critical movements, issues, and histories of criticism. Topics change from term to term; see Schedule of Classes. Not offered every year. (H) This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 480. STUDIES IN LITERATURE, CULTURE
AND SOCIETY (4). Study of literature in its relationship to society and culture; study of literary culture. Topics change from term to term; see Schedule of Classes. Not offered every term. (H)
This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.

## ENG 482. STUDIES IN AMERICAN

## ITERATURE, CULTURE, AND THE

ENVIRONMENT (4). Creative nonfiction, fiction, poetry, and film from the mid-19th century to the present, examining relationships between rural and urban, and investigating the development of important patterns in how the physical environment is perceived, represented, interpreted, and used in the United States. (H) This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.
ENG 483. CUBAN CULTURE, POLITICS
AND ARTS (4). One of two courses that comprise the Cuba Study Abroad Program. It introduces students to Cuban culture, politics (and particularly Cuba-U.S. relations during and after the Revolution) and arts via a combination of lectures/lessons led by invited specialists in their fields, readings, films and student activities. Students will learn about a variety of topics including migration, agriculture, health care, education, economics, religion/spirituality, gender, race, and the arts (literature, music and other performance). Given the interdisciplinary approach to this course, students will also be able to focus on other topics of interest to them/their program of study. CROSSLISTED as PS 483, WLC 483. PREREQS: Sophomore standing and acceptance into the OSU Cuba Study Abroad Program.
ENG 485. ^STUDIES IN AMERICAN
LITERATURE (4). Special topics in American literary history. Organized around movements, regions, themes, or major authors. Topics change from term to term; see Schedule of Classes. Not offered every term. (H) (Writing Intensive Course) This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 486. STUDIES IN BRITISH LITERATURE
(4). Particular British writers, movements, conventions, genres, and problems. Topics change from term to term; see Schedule of Classes. Not offered every year. (H) This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.
ENG 488. LITERATURE AND PEDAGOGY (4).

Practices, approaches, histories, and theories of teaching literature appropriate for secondary through college settings. Considers text selection, assignments, and evaluation. (H) PREREQS: Upper-division standing.
ENG 489. WRITING, LITERATURE AND MEDICINE (4). Considers medical themes in literature, social meanings of illness, and writing strategies appropriate to the healing arts. PREREQS: Sophomore and above.
ENG 490. HISTORY OF THE ENGLISH
LANGUAGE (4). A study of the origins, changes, and reasons for changes in the grammar, sounds, and vocabulary of English from its earliest stages through its modern forms. (H) PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.

## ENG 497. *INTERNATIONAL WOMEN'S

VOICES (4). A study of women and literature in an international context, focusing on the cultural differences among women and the effects of gender on language and literature. (H) (Bacc Core Course) PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.
ENG 498. WOMEN AND LITERATURE (4). Study of the relations between women and literature, including such issues as images of women in literature, women writers, and the effects of gender on language. This course is repeatable for a maximum of 8 credits. PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.
ENG 499. SELECTED TOPICS (1-16). (H) This course is repeatable for a maximum of 16 credits. PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.
ENG 501. RESEARCH AND SCHOLARSHIP
(1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval and graduate standing required.
ENG 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval and graduate standing required.
ENG 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval and graduate standing required.
ENG 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval and graduate standing required.
ENG 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval and graduate standing required.

ENG 507. SEMINAR (1-16). May be repeated for credit as topics vary. CROSSLISTED as AMS 507 This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval and graduate standing required.

## ENG 510. GRADUATE INTERNSHIP IN

ENGLISH (1-2). Provides graduate students with supervised, on-the-job work experience and professional development. Graded P/N. This course is repeatable for a maximum of 12 credits. PREREQS: Graduate standing in English, departmental approval.
ENG 512. STUDIES IN BRITISH THEATER AND SOCIETY (4). Study of major dramatists and the audiences they addressed, of socio-economic conditions and their interrelations with theatrical institutions. Readings may include dramatic and non-dramatic literature. Historical period and content may vary. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.

## ENG 514. INTRODUCTION TO GRADUATE

STUDIES (4). Introduction to the MA program; theories and methods of English studies. Offered fall term only. Required for first-year MA students.

ENG 516. POWER AND REPRESENTATION (4).
Critical analysis of works by colonized peoples, women, and ethnic minorities, with a focus on the issue of representation. Not offered every year. PREREQS: Graduate standing.
ENG 517. THE ENGLISH NOVEL: DEFOE THROUGH SCOTT (4). Selected English novels from Defoe through Scott. Not offered every year. PREREQS: Graduate standing.

ENG 518. THE ENGLISH NOVEL: VICTORIAN
PERIOD (4). Selected English novels focusing on those from the Victorian period. PREREQS: Graduate standing.
ENG 519. THE ENGLISH NOVEL: 20TH
CENTURY (4). Selected English novels of the 20th century. PREREQS: Graduate standing.
ENG 520. STUDIES IN DIFFERENCE, POWER, AND DISCRIMINATION (4). Comparative studies in literature documenting or illuminating institutional and systematic discrimination. Not offered every year. PREREQS: Graduate standing
ENG 525. STUDIES IN MEDIEVAL LITERATURE (4). Particular genres, themes, and writers in medieval literature. Topics change from term to term. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.
ENG 526. STUDIES IN CHAUCER (4). The works of Geoffrey Chaucer in their historical, cultural, and poetic contexts. Topics change from term to term. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.
ENG 530. STUDIES IN EARLY MODERN
LITERATURE (4). Literature and culture of the Tudor, early Stuart, and Interregnum periods, 1485-1660. Content and genres will vary and may include non-English writers who influenced the English Renaissance. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.

ENG 533. STUDIES IN THE LONG EIGHTEENTH
CENTURY (4). Literature of the period 1660-1800, with emphasis on one or more of the following poets: Dryden, Pope, Swift, Johnson, Gray,
Cowper. May also include prose writers (e.g.,
Behn, Fielding, Richardson, Addison and Steele) and dramatists (e.g., Congreve, Wycherly, Gay). Not offered every term. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.
ENG 534. STUDIES IN ROMANTICISM (4).
Romantic-period writing and culture, with emphasis on one or more of the following authors: Blake, Wordsworth, Coleridge, Keats, Byron and Shelley. May also include Romantic novelists and prose writers (e.g., Austen, Wollstonecraft, Burke). Not offered every term. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.
ENG 535. STUDIES IN SHAKESPEARE (4). Shakespeare's works from a variety of critical and scholarly perspectives. Not offered every term. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing and at least one quarter of Shakespeare.

ENG 536. STUDIES IN VICTORIAN LITERATURE
(4). Fiction, poetry, and nonfiction prose of the Victorian era. Topics change from term to term; see Schedule of Classes. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.
ENG 538. STUDIES IN MODERNISM (4). Studies in the literature and contexts of the Modernist period in Anglo-American letters (1890's to 1940's). Authors may include Wilde, Crane, Conrad, Eliot, Stevens, James, Woolf, Joyce, Lawrence, Shaw, Forster. Topics change from term to term. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.

## ENG 540. STUDIES IN MODERN IRISH

LITERATURE (4). Studies in the literature and context of the period of Irish writing often referred to as the Irish Renaissance. Authors may include

Yeats, Joyce, Shaw, O'Casey, Gregory, Synge Bowen, Moore, Behan, O'Brien, Kavanaugh, Cronin. Sometimes offered as a study of Joyce's works alone. Topics change from term to term. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.
ENG 545. STUDIES IN NONFICTION (4).
Particular essayists and journalists, movements, problems, conventions, and types of nonfiction writing in English. Topics change from term to term: see Schedule of Classes. Not offered every year. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.

ENG 550. STUDIES IN SHORT FICTION (4).
Particular writers, movements, and types of short fiction. Topics change from term to term: see Schedule of Classes. Not offered every year. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.
ENG 554. MAJOR AUTHORS (4). Advanced study of major and influential authors from various cultures and backgrounds. Subjects change from term to term; see Schedule of Classes. Not offered every year. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.
ENG 560. STUDIES IN DRAMA (4). Particular dramatists, movements, conventions, and types of world drama. Topics change from term to term; see Schedule of Classes. Not offered every term. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.
ENG 565. STUDIES IN THE NOVEL (4). Particular novelists, movements, conventions, and types of the novel throughout its history. Topics change from term to term; see Schedule of Classes. Not offered every term. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.
ENG 570. STUDIES IN POETRY (4). Particular poets, movements, problems, conventions, and types of poetry in English or English translation. Topics change from term to term; see Schedule of Classes. Not offered every term. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.
ENG 575. STUDIES IN CRITICISM (4). Particular critics, critical movements, issues, and histories of criticism. Topics change from term to term; see Schedule of Classes. Not offered every year. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.
ENG 580. STUDIES IN LITERATURE, CULTURE AND SOCIETY (4). Study of literature in its relationship to society and culture; study of literary culture. Topics change from term to term; see Schedule of Classes. Not offered every term. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.
ENG 582. STUDIES IN AMERICAN
LITERATURE, CULTURE, AND THE
ENVIRONMENT (4). Creative nonfiction,
fiction, poetry, and film from the mid-19th century to the present, examining relationships between rural and urban, and investigating the development of important patterns in how the physical environment is perceived, represented, interpreted, and used in the United States. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.
ENG 583. CUBAN CULTURE, POLITICS
AND ARTS (4). One of two courses that comprise the Cuba Study Abroad Program. It introduces students to Cuban culture, politics (and particularly Cuba-U.S. relations during and after the Revolution) and arts via a combination of lectures/lessons led by invited specialists in their fields, readings, films and student activities. Students will learn about a variety of topics including migration, agriculture, health care, education, economics, religion/spirituality, gender, race, and the arts (literature, music and other performance). Given the interdisciplinary approach
to this course, students will also be able to focus on other topics of interest to them/their program of study. CROSSLISTED as PS 583, WLC 583. PREREQS: Sophomore standing and acceptance into the OSU Cuba Study Abroad Program.
ENG 585. STUDIES IN AMERICAN LITERATURE
(4). Special topics in American literary history. Organized around movements, regions, themes, or major authors. Topics change from term to term; see Schedule of Classes. Not offered every term. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.
ENG 586. STUDIES IN BRITISH LITERATURE
(4). Particular British writers, movements, conventions, genres, and problems. Topics change from term to term; see Schedule of Classes. Not offered every year. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.
ENG 588. LITERATURE AND PEDAGOGY (4).
Practices, approaches, histories, and theories of teaching literature appropriate for secondary through college settings. Considers text selection, assignments, and evaluation. PREREQS: Graduate standing.
ENG 589. WRITING, LITERATURE AND MEDICINE (4). Considers medical themes in literature, social meanings of illness, and writing strategies appropriate to the healing arts. PREREQS: Sophomore and above.

ENG 590. HISTORY OF THE ENGLISH LANGUAGE (4). A study of the origins, changes, and reasons for changes in the grammar, sounds, and vocabulary of English from its earliest stages through its modern forms. PREREQS: Graduate standing.

ENG 595. LANGUAGE, TECHNOLOGY, AND CULTURE (4). Explores relationship between literacy, technology, and thought. PREREQS: Graduate standing.
ENG 597. INTERNATIONAL WOMEN'S VOICES
(4). A study of women and literature in an international context, focusing on the cultural differences among women and the effects of gender on language and literature. PREREQS: Graduate standing.
ENG 598. WOMEN AND LITERATURE (4). Study of the relations between women and literature, including such issues as images of women in literature, women writers, and the effects of gender on language. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.

## FILM STUDIES COURSES

FILM 110. *INTRODUCTION TO FILM STUDIES:
1895-1945 (3). An introduction to the serious study of world cinema, 1895-1945. Class lectures will offer a variety of historical, critical and theoretical approaches. Weekly screenings of important films from the U.S., Europe, and Asia accompany the lectures. Film fee required. (H) (Bacc Core Course)

WR 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
WR 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
WR 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
WR 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
WR 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
WR 404. WRITING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
WR 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
WR 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
WR 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
WR 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
WR 411. ^THE TEACHING OF WRITING (4).
Pedagogy and theory in composition; prepares teachers (secondary through college) in writing process, assignment design, evaluation, and grammar. Also focuses on students' own writing. (Writing Intensive Course) PREREQS: Upperdivision standing.
WR 414. ADVERTISING AND PUBLIC
RELATIONS WRITING (4). Writing news releases, annual reports, brochures, newsletters, and other PR materials. Writing advertising copy. PREREQS:

WR 121 [B] or WR 121H [B] and upper-division standing.

## WR 416. ADVANCED COMPOSITION (4).

The development of style and voice in both the personal and the academic essay. This course is repeatable for a maximum of 8 credits. PREREQS: Upper-division standing.
WR 420. STUDIES IN WRITING (4). Selected
topics in rhetoric and composition. This course is repeatable for a maximum of 8 credits. PREREQS: Upper-division standing.
WR 424. ADVANCED FICTION WRITING (4).
Workshop. (FA) This course is repeatable for a maximum of 8 credits. PREREQS: WR 324 [D-] and /or instructor approval required.
WR 435. SCIENTIFIC, TECHNICAL, \& PROFESSIONAL COMMUNICATION CAPSTONE (1). Students complete a portfolio comprised of material generated throughout previous courses in the Certificate in Scientific, Technical, and Professional Communication. CROSSLISTED as COMM 435. PREREQS: Completion of 18 credits towards the Certificate in Scientific, Technical, and Professional Communication.
WR 441. ADVANCED POETRY WRITING (4). Advanced poetry workshop. (FA) This course is repeatable for a maximum of 8 credits. PREREQS: WR 341 [D-] and /or instructor approval required.
WR 448. MAGAZINE ARTICLE WRITING (4). Writing the magazine article. Analyzing markets and writing query and cover letters, marketing manuscripts to magazines. Interviewing and researching. PREREQS: Upper-division standing.
WR 449. CRITICAL REVIEWING (4). Writing critical reviews of books, television programs, movies, plays, and restaurants for newspapers and magazines. The role of criticism in popular culture. PREREQS: Upper-division standing.
WR 462. ^ENVIRONMENTAL WRITING (4). Writing about environmental topics from multiple perspectives. Includes science journalism, research and writing on current scientific issues and controversies, and theories of rhetoric and environmentalism. (Writing Intensive Course) This course is repeatable for a maximum of 12 credits. PREREQS: WR 121 [C-] or WR 121H [C-]
WR 466. PROFESSIONAL WRITING (4). Introduces the texts, contexts, and concepts important to the practice of professional communication in organizational contexts, addressing practical writing skills, rhetoric, ethics, and information design. Course readings concern what professional writers do and what theories govern their actions, bridging the gap between real-world problems and academic research. PREREQS: WR 121 [D-] or WR 121H [D-] and upper-division standing for undergraduates.
WR 475. RHETORICS OF RACE (4). By exploring the interrelated concepts of race, racialization, and racism, Rhetorics of Race problematizes race as a taken-for-granted phenomenon. Through reading, writing, and discussion, class participants study racial formations as historically specific and analyze contemporary forms of racism in the US. Readings and discussion pay close attention to how rhetoric and discourse have the power to reproduce and challenge white supremacy and race-based oppressions. Emphasizing the intersectionality of oppression-that racism necessarily takes place at intersections with other forms of subordination including sexism, homophobia, ablelism, etc.-Rhetorics of Race draws from Queer Black Feminism, Chican@ Feminism, and Critical Race Theory.

## WR 485. CONTEMPORARY RHETORIC

THEORY (4). Familiarizes students with a range of theories that have significantly contributed to or influenced the field of modern and contemporary rhetorical research. The course examines scholars, concepts, and methodologies that are central to contemporary rhetorical theory, while
ouching on key critical theorists who, although may be considered outside the field of rhetoric studies, impact the ways in which language, persuasion, and communication are currently understood. From this work, students develop their own perspectives and generate evidencebased arguments concerning those same issues. PREREQS: WR 121 [C-] or WR 121H [C-]
WR 493. ${ }^{\wedge}$ THE RHETORICAL TRADITION AND THE TEACHING OF WRITING (4). Major past and contemporary theories of written communication, their historical context, and their impact on writing and the teaching of writing. (Writing Intensive Course) PREREQS: Upper-division standing.

## WR 495. ^INTRODUCTION TO LITERACY

STUDIES (4). Literacy studies in multidisciplinary contexts. Examines historical, theoretical, and practical relationships among reading, writing, language, culture, and schooling. (Writing Intensive Course) PREREQS: Upper-division standing.

WR 497. DIGITAL LITERACY AND CULTURE
(4). From pencils to pixels, telegraphs to texts, and semaphores to social networking, Digital Literacy and Culture focuses on the relationships between human expression and the technologies that provide context, meaning, and shape to those expressions. PREREQS: WR 121 [C-] or WR 121H [C-] and upper-division standing for undergraduates.
WR 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
WR 500. MFA RESIDENCY (12). Low-Residency Masters of Fine Arts Residency. Required course for graduate students in the Low-Residency Masters of Fine Arts in Creative Writing. This course is repeatable for a maximum of 48 credits.
WR 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval and graduate standing required.
WR 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval and graduate standing required

WR 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS:
Departmental approval and graduate standing required.
WR 504. WRITING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

WR 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval and graduate standing required.
WR 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval and graduate standing required.
WR 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval and graduate standing required
WR 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval and graduate standing required.
WR 509. PRACTICUM (1-16). Required practicum for graduate students teaching introduction to poetry writing. This course is repeatable for a maximum of 16 credits.

WR 511. THE TEACHING OF WRITING (4). Pedagogy and theory in composition; prepares teachers (secondary through college) in writing process, assignment design, evaluation, and grammar. Also focuses on student's own writing. PREREQS: Graduate standing.

WR 512. CURRENT COMPOSITION THEORY
(4). Current rhetoric and composition theory and its applications for teachers and writers. PREREQS: Graduate standing.
WR 513. LOW-RESIDENCY MFA MENTORSHIP
(5-12). Low-Residency Masters of Fine Arts
Mentorship. Required course for graduate students in the Low-Residency Masters of Fine Arts in Creative Writing. This course is repeatable for a maximum of 36 credits.
WR 514. ADVERTISING AND PUBLIC
RELATIONS WRITING (4). Writing news releases, annual reports, brochures, newsletters, and other PR materials. Writing advertising copy. PREREQS: Graduate standing.

## WR 516. ADVANCED COMPOSITION (4).

The development of style and voice in both the personal and the academic essay. This course is repeatable for a maximum of 16 credits. PREREQS: Graduate standing.
WR 517. TEACHING PRACTICUM: ENGLISH COMPOSITION (2). Required practicum for graduate students teaching English Composition.
WR 518. TEACHING PRACTICUM: WRITING IN BUSINESS (1). Pedagogy practicum for graduate students in the teaching of professional writing and communication. This course is required for GTA's who will teach WR 214, Writing in Business. This course is repeatable for a maximum of 3 credits.

WR 519. TEACHING PRACTICUM: TECHNICAL
WRITING (1). Required practicum for graduate students teaching technical writing.
WR 520. STUDIES IN WRITING (4). Selected topics in rhetoric and composition. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.
WR 521. TEACHING PRACTICUM: FICTION WRITING (1). Required practicum for graduate students teaching introduction to fiction writing. This course is repeatable for a maximum of 3 credits.
WR 522. TEACHING PRACTICUM: POETRY
WRITING (1). Required practicum for graduate students teaching introduction to poetry writing. This course is repeatable for a maximum of 3 credits.
WR 524. ADVANCED FICTION WRITING (4).
Advanced fiction workshop with an emphasis on developing longer pieces. This course is repeatable for a maximum of 24 credits. PREREQS: Instructor approval and graduate standing required.

## WR 525. ADVANCED SCIENTIFIC AND

TECHNICAL WRITING (4). Combines scientific and technical writing with science journalism. Students will draw on a data set (preferably their own) to draft a scientific journal article, short grant proposal, magazine article, and letter of inquiry. They will also critically evaluate and edit documents by reviewing classmates' drafts

WR 540. ADVANCED NONFICTION WRITING
(4). Advanced creative nonfiction workshop with an emphasis on developing longer pieces. This course is repeatable for a maximum of 24 credits. PREREQS: Instructor approval.
WR 541. ADVANCED POETRY WRITING (4). Advanced poetry workshop. This course is repeatable for a maximum of 24 credits. PREREQS: Instructor approval and graduate standing required.
WR 548. MAGAZINE ARTICLE WRITING (4). Writing the magazine article. Analyzing markets and writing query and cover letters, marketing manuscripts to magazines. Interviewing and researching. This course is repeatable for a maximum of 8 credits. PREREQS: Graduate standing.

WR 549. CRITICAL REVIEWING (4). Writing critical reviews of books, television programs, movies, plays, and restaurants for newspapers and magazines. The role of criticism in popular culture. PREREQS: Graduate standing.
WR 562. ENVIRONMENTAL WRITING (4). Writing about environmental topics from multiple perspectives. Includes science journalism, research and writing on current scientific issues and controversies, and theories of rhetoric and environmentalism. This course is repeatable for a maximum of 8 credits. PREREQS: WR 121 and/or graduate standing.
WR 566. PROFESSIONAL WRITING (4).
Introduces the texts, contexts, and concepts important to the practice of professional communication in organizational contexts, addressing practical writing skills, rhetoric, ethics, and information design. Course readings concern what professional writers do and what theories govern their actions, bridging the gap between real-world problems and academic research.
WR 575. RHETORICS OF RACE (4). By exploring the interrelated concepts of race, racialization, and racism, Rhetorics of Race problematizes race as a taken-for-granted phenomenon. Through reading, writing, and discussion, class participants study racial formations as historically specific and analyze contemporary forms of racism in the US. Readings and discussion pay close attention to how rhetoric and discourse have the power to reproduce and challenge white supremacy and race-based oppressions. Emphasizing the intersectionality of oppression-that racism necessarily takes place at intersections with other forms of subordination including sexism, homophobia, ablelism, etc.-Rhetorics of Race draws from Queer Black Feminism, Chican@ Feminism, and Critical Race Theory

## WR 585. CONTEMPORARY RHETORIC

THEORY (4). Familiarizes students with a range of theories that have significantly contributed to or influenced the field of modern and contemporary rhetorical research. The course examines scholars, concepts, and methodologies that are central to contemporary rhetorical theory, while touching on key critical theorists who, although may be considered outside the field of rhetoric studies, impact the ways in which language, persuasion, and communication are currently understood. From this work, students develop their own perspectives and generate evidencebased arguments concerning those same issues. PREREQS: WR 121

WR 593. THE RHETORICAL TRADITION AND THE TEACHING OF WRITING (4). Major past and contemporary theories of written communication, their historical context, and their impact on writing and the teaching of writing. PREREQS: Graduate standing.

## WR 595. INTRODUCTION TO LITERACY

STUDIES (4). Literacy studies in multidisciplinary contexts. Examines historical, theoretical, and practical relationships among reading, writing, language, culture, and schooling. PREREQS: Graduate standing.
WR 597. DIGITAL LITERACY AND CULTURE (4). From pencils to pixels, telegraphs to texts, and semaphores to social networking, Digital Literacy and Culture focuses on the relationships between human expression and the technologies that provide context, meaning, and shape to those expressions. PREREQS: WR 121 and upperdivision standing for undergraduates.

WR 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## OTHER DECREES $\mathcal{E}_{2}$ <br> PROCRAMS WITHIN THE COLLECE OF LIBERAL ARTS

## UNDERGRADUATE MAJORS WITH OPTIONS

## INTERNATIONAL STUDIES (BA)

See International Programs for information on the International Studies degree.

The International Studies degree also is available on the OSU-Cascades campus.

## Major Code: 910

## SOCIAL SCIENCE (BA, BS, CRED)

Available only on OSU-Cascades Campus.
The Social Science major is only offered at the OSU-Cascades Campus through the Division of Arts and Sciences, College of Liberal Arts at OSU. Students will also be able to take advantage of distance courses offered by OSU Ecampus and streamed via TV from Corvallis.

Completion of the Community Development and Leadership option is required to earn a degree in Social Science.

## Baccalaureate Core (48)

College of Liberal Arts

## Requirements

Courses taken to fulfill College of Liberal Arts Requirements cannot be used to fulfill Bacc Core, major cores or option requirements.

## Core (5 courses)

[These requirements can be fulfilled at Oregon Community Colleges.]

- Humanities
- Fine Arts
- Non-Western Culture
- Social Science
- Additional course requirement

## Lower-Division Requirements

Choose either BS or BA: [These requirements can be fulfilled at Oregon community colleges.]

## For a Bachelor of Science (20

## credits):

1. Select 8 credits from the following MTH courses: MTH 111, 112, 113, 211, 241, 243, 244, 251. Note that MTH 113, 243, and 244 are non-OSU courses that meet this requirement. These courses can be taken at Oregon community colleges.
2. One additional 3-credit course from the science departments except Math and ST (no lab required, 3 credits)
3. One computer science course (4 credits)

For a Bachelor of Arts (18 credits):
Two years of a foreign language with a grade of C- or better
Social Science Major (29-35 credits) Note: Courses taken to fulfill major requirements cannot be used to fulfill
the baccalaureate core, College of Liberal Arts, or option requirements. Not all courses are offered every year. Students should consult the annual schedule of classes for a listing of available courses for the academic year.

## Social Science Core

Required Courses (11 credits)
ANTH 352. *Anthropology, Health, and Environment (3)
or SUS 420. Social Dimension of Sustainability (3)
COMM 321. Introduction to
Communication Theory (3)
SSCI 201. Career Development in the Social Sciences (1)
SSCI 301. ^Qualitative Research Methods for the Social Sciences (4)
Social Science Core Class Selection (18-24 credits)
Select six 300-400 level courses in ANTH, COMM, PSY, PS, or SOC. Must include one course from at least four disciplines.

## Total=180

Footnotes:

* Baccalaureate Core Course
$\wedge$ Writing Intensive Course (WIC)
E Ecampus Course

## SAMPLE FOUR-YEAR PLAN: SOCIAL SCIENCE

Fall Year 1
ALS 199. Special Topics: First-Year Experience (2)
HHS 231. *Lifetime Fitness for Health (2)
MTH 105. *Introduction to Contemporary Math (4)
PAC. Physical Education Course (1)
SPAN 111. *First-Year Spanish (4) or CS 101. Computers: Applications and Information (4)
WR 121. *English Composition (3)

## Winter Year 1

ANTH 210. *Comparative Cultures (3)
COMM 111. *Public Speaking (3)
or COMM 218. Interpersonal
Communication (3)
SPAN 112. First-Year Spanish (4)
or MTH 111. *College Algebra (4)
WR 222. *English Composition (3)

## Spring Year 1

ANTH 251. *Language in the US (3)
ECON 201. *Introduction to
Microeconomics (4)
GEO 201. *Physical Geology (4)
SPAN 113. First-Year Spanish (4)
or MTH 245. *Mathematics for Management, Life and Social Sciences (4)

## Fall Year 2

HST 106. World History III--Modern and Contemporary World (4)
PS 201. *Introduction to United States Government and Politics (4)
SPAN 211. Second-Year Spanish (4) or SOIL 205. Soil Science (3)

## Winter Year 2

BI 102. General Biology (4)
ENG 253. *Survey of American Literature: Colonial to 1900 (4)
PAC. Physical Education Course (1)
SPAN 212. Second Year Spanish (4)
or Elective (4)
SSCI 201. Career Development in the Social Sciences (1)

## Spring Year 2

ENG 254. *Survey of American Literature: 1900 to Present. (4)
ENG 360. Native American Literature (4)
SPAN 213. Second-Year Spanish (4)
or Elective (4)
College of Liberal Arts Core course. (4)
Fall Year 3
ART 101. *Introduction to the Visual Arts (4)
BI 101. *General Biology (4)
or SOIL 205. *Soil Science (3) and SOIL
206. *Soil Science Laboratory for Soil 205 (1)

COMM 321. Introduction to
Communication Theory (3)
PAC. Physical Education Course (1)
PSY 381. Abnormal Psychology (4)

## Winter Year 3

COMM 325. Communicating Leadership (4)
PS 331. State and Local Government and Politics (4)
PSY 360. Social Psychology (4)
SSCI 301. ^Qualitative Research Methods for the Social Sciences (4)

## Spring Year 3

ANTH 311. Peoples of the World--North America (3)
BA 352. Managing Individual and Team Performance (4)
COMM 326. Intercultural Communication (3)

PAC. Physical Education Course (1)
SOC 439. Welfare and Social Service (4)
Fall Year 4
HDFS 447. Families and Poverty (4)
SOC 430. Gender and Society (4)
Elective (4)
Elective (4)
Winter Year 4
COMM 323. Community Dialogue (4)
COMM 440. Theories of Conflict and
Conflict Management (3)
GEO 306. Minerals, Energy, Water and the Environment (3)
SUS 420. Social Aspects of Sustainability (3)

## Spring Year 4

PS 475. Environmental Politics and Policy (4)

Elective (4)
Elective (4)
Elective (4)
Major Code: 286

## OPTIONS

## COMMUNITY DEVELOPMENT AND LEADERSHIP OPTION Available only on OSU-Cascades Campus.

Not all courses are offered every year. Students should consult the annual schedule of classes for a listing of available courses for the academic year. All courses are offered at OSU-Cascades with the exception of COMM 114 and PS 201, which are offered at Oregon community colleges.

## Required

COMM 323. Community Dialogue (4)
or COMM 325. Communicating
Leadership (4)
Choose five courses different from the one taken above:
BA 352. Managing Individual and Team Performance (4)
COMM 114. Argument and Critical Discourse (3)
COMM 323. Community Dialogue (4)
or COMM 325. Communicating Leadership (4)
COMM 425. Communication and Youth Outreach (4)
COMM 440. Theories of Conflict and Conflict Management (3)
LS 499. Special Topics: Funding and Resource Development (4)
PS 201. *Introduction to US Government and Politics (4)
PS 331. *State and Local Politics (4)
PS 461. Environmental Political Theory (4)
PS 475. Environmental Politics and Policy (4)

Total=22-24
Option Code: 279

## SUSTAINABILITY (BS, HBS)

Also available via Ecampus.
OSU Main Campus Contact: Ann
Scheerer, 3017B Agricultural and Life Sciences Building, Oregon State University, Corvallis, OR 97331; 541-737-5687; Ann. Scheerer@oregonstate.edu or the Sustainability Double Degree academic advisor, Sus.Advising@oregonstate.edu.

OSU-Cascades Campus Contact:
Matt Shinderman, Forest Ecosystems and Society, Oregon State University Cascades; 541-322-3159; matt.shinderman@ osucascades.edu.

## Sustainability Core (17-20)

All Sustainability Majors and Minors must take the five courses that make up the Sustainability Core: SUS 304, SUS
350, an ecological sustainability course
(SUS 102 recommended), a social sustainability course (choose one below), and an economic sustainability course (choose one below):
SUS 304. *Sustainability Assessment (4)
SUS 350. *Sustainable Communities (4)

## Ecological Dimensions of

 Sustainability (3-4)
## Select 3 to 4 credits from the

## following:

BI 301. *Human Impacts on Ecosystems (3)
SUS 102. *Introduction to Environmental
Science and Sustainability (4)

## Social Dimensions of Sustainability

## (3-4)

Select 3 to 4 credits from the following:
SOC 381. Social Dimensions of Sustainability (4)(Ecampus only)
SOC 480. *Environmental Sociology (4)
SOC 481. *Society and Natural Resources (4)
SOC/FES/ANS/FW 485. *Consensus and
Natural Resources (3)

SUS 420. Social Dimensions of Sustainability (3)(Ecampus, Cascades Campus )

## Economic Dimensions of

Sustainability (3-4)

## Select 3 to 4 credits from the

 following:AEC 250. *Introduction to Environmental Economics and Policy (3)
AEC 351. *Natural Resources Economics and Policy (3)
AEC/ECON 352. *Environmental Economics and Policy (3)
AEC 434. ${ }^{\wedge}$ Measuring Resource and Environmental Impacts (4)

## Practicum (3-12)

Sustainability majors are required to complete a minimum of 3 Practicum credits. Before registering for a practicum, students must get practicum approved by Sustainability Double Degree advisor. Email: Sus.advising@oregonstate.edu.
SUS 401. Research (3-12)
SUS 410. Internship (3-12)
SUS 499. Special Topics (3-12)
Note: SUS 410 credits may be achieved by participation in an IE3 Global Internship with advisor approval.

## Remaining Elective Credits (4-16)

In addition to the required credits specified above, students must work with the sustainability program advisor to select courses relevant to their discipline and career path interests.

## Credits total=36

Classes that can be used to fulfill remaining requirements are listed below. Students are NOT limited to taking courses within their primary major of study. The Sustainability advisor(s) will approve courses not listed here if they have an obvious link to sustainability and fulfill the intent of the double degree. See the OSU Sustainability Office list of sustain-ability-related courses.

## Business

AEC 250. *Introduction to Environmental Economics and Policy (3)
AEC 253. *Environmental Law, Policy and Economics (4)
AEC 351. *Natural Resource Economics and Policy (3)
AEC/ECON 352. *Environmental
Economics and Policy (3)
AEC 434. ${ }^{\wedge}$ Measuring Resource and
Environmental Impacts (4)
BA 302. Business Process Management (4)
BA 351. Managing Organizations (4)
BA 352. Managing Individual and Team Performance (4)
BA 362. Social Entrepreneurship and Social Initiatives (4)
BA 432. Environmental Law, Sustainability and Business (4)
BA 465. *Systems Thinking and Practice (4)
BA 466. Integrative Strategic Experience (4)
ECON 202. *Introduction to
Macroeconomics (4)
ECON 311. Intermediate Microeconomic Theory (4)

ECON 315. Intermediate Macroeconomic
Theory (4)
MGMT 452. Leadership (4)

## Engineering

BEE 221. Fundamentals of Ecological Engineering (3)
BEE 320. Biosystems Analysis and Modeling (4)

BEE 322. Ecological Engineering
Thermodynamics and Transfer Process (4)
CCE 422. Green Building Materials (3)
CHE 450. Conventional and Alternative Energy Systems (3)
CHE 451. Solar Energy Technologies (3)
ECE 438. Electric and Hybrid Vehicles (4)
ENGR 350. *Sustainable Engineering (3)
ENVE 321. Environmental Engineering
Fundamentals (4)
ENVE 322. Fundamentals of Environmental
Engineering (4)
HEST 310. *Introduction to Community
Engagement and Community-Based Design (3)

## Natural Sciences

ANS/FES/FW/SOC 485. *Consensus and
Natural Resources (3)
ATS 320. *The Changing Climate (3)
BI 301. *Human Impacts on Ecosystems (3)
BI 306. *^Environmental Ecology (3)
BI 348. *Human Ecology (3)
BI 370. Ecology (3)
BRR 325. *Energy Technology and Social Change (3)
BRR 350. Introduction to Regional Bioenergy (2)
CH 374. *Technology, Energy, and Risk (3)
CH 390. Environmental Chemistry (3)
DHE/WSE 415. *Renewable Materials in the Modern Age (3)
FES 341. Forest Ecology (3)
FES 354. Communities, Natural Areas, and Sustainable Tourism (3)
FES 355. Management for Multiple Resource Values (3)
FES 360. Collaboration and Conflict
Management (3)
FES 365. *Issues in Natural Resources Conservation (3) Ecampus or Cascades campus only
FES/TOX 435. *Genes and Chemicals in
Agriculture: Value and Risk (3)
FES/FW 445. Ecological Restoration (4)
FES/HORT 455. Urban Forest Planning,
Policy and Management (4) Ecampus only
FES/NR/RNG 477. *Agroforestry (3)
FES/SOC/ANS/FW 485. *Consensus and Natural Resources (3)
FOR 462. Natural Resource Policy and Law (3)

FW 251. Principles of Fish and Wildlife Conservation (3)
FW 303. Survey of Geographic Information
Systems in Natural Resource (3)
FW 321. Applied Community and
Ecosystem Ecology (3)
FW 325. *Global Crises in Resource Ecology (3)

FW 326. Integrated Watershed Management (3)

FW 340. *Multicultural Perspectives in Natural Resources (3)
FW 350. *Endangered Species, Society, and Sustainability (3)

FW 435. ^Wildlife in Agricultural Ecosystems (3)
FW 489. Effective Communications in Fisheries and Wildlife Science (3)
GEO 306. *Minerals, Energy, Water, and the Environment (3)
GEO 309. *Environmental Justice (3)
GEOG 300. *Sustainability for the Common Good (3)
GEOG 324. Geography of Life: Species
Distributions and Conservation (4)
GEOG 330. *^Geography of International Development and Globalization (3)
GEOG 331. *Population, Consumption, and Environment (3)
GEOG 360. GIScience I: Geographic Information Systems and Theory (4)
GEOG 430. Resilience-Based Natural
Resource Management (3)
GEOG 431. Global Resources and Development (3)
GEOG 441. International Water Resources Management (3)
GEOG 450. Land Use in the American West (3)

GEOG 451. Planning Principles and
Practices for Resilient Communities (4)
GEOG 452. Sustainable Site Planning (3)
PH 313. *Energy Alternatives (3)
SOIL 475. Soil Resource Potentials (4)
SOIL 499. Special Topics (1-16)
SUS 103. *Introduction to Climate Change (4)

WSE 111. Renewable Materials for a Green Planet (2)
WSE 210. *Renewable Materials Technology and Utilization (4)
WSE 266. *Industrial Hemp (3)
WSE 321. Chemistry of Renewable Materials (3)

WSE 392. *Bamboolooza: The Fascinating World of Bamboo (3)
WSE 453. ^Global Trade in Renewable Materials (3)
WSE 455. Marketing and Innovation in Renewable Materials (4)
WSE 473. Bioenergy and Environmental Impact (3)
WSE 475. Environmental Assessment of Building Materials (4)

## Social Sciences/Humanities

AEC 250. *Introduction to Environmental Economics and Policy (3)
AEC 253. *Environmental Law, Policy, and Economics (4)

## SUSTAINABILITY MINOR

## Available on the Corvallis and

 OSU-Cascades campuses, and via Ecampus.OSU Main Campus Contact: Ann
Scheerer, 3017B Agricultural and Life Sciences Building, Oregon State University, Corvallis, OR 97331; 541-737-5687; Ann. Scheerer@oregonstate.edu or the Sustainability Double Degree academic advisor, Sus.Advising@oregonstate.edu.

OSU-Cascades Campus Contact: Matt Shinderman, Forest Ecosystems and Society, Oregon State University Cascades; 541-322-3159; matt.shinderman@ osucascades.edu.

The Sustainability minor includes core sustainability courses (5) and tailored elective courses to expand students' knowledge and experience of their primary major in the context of sustainability principles and frameworks. Courses from a student's major course of study will not count towards minor requirements. Completion of the Sustainability minor requires 27 credits beyond the 180-credit minimum for graduation.

## Sustainability Core (17-20)

All Sustainability students must take (8):
SUS 304. *Sustainability Assessment (4)
SUS 350. *Sustainable Communities (4)

## Social Dimensions of

Sustainability:

## Select 3 to 4 credits from the

 following:SOC 381. Social Dimensions of Sustainability (4)
SOC 480. *Environmental Sociology (4)
SOC 481. *Society and Natural Resources (4)

SOC 485/ANS 485/FES 485/FW 485.
*Consensus and Natural Resources (3)
SUS 420. Social Dimensions of Sustainability (3)
Ecological Dimensions of Sustainability:
Select 3 to 4 credits from the following:
BI 306. *^Environmental Ecology (3)
SUS 102. *Introduction to Environmental
Science and Sustainability (4)

## Economic Dimensions of

## Sustainability:

Select 3 to 4 credits from the following:
AEC 250. *Introduction to Environmental Economics and Policy (3)
AEC/ECON 352. *Environmental Economics and Policy (3)
AEC 434. ${ }^{\wedge}$ Measuring Resource and Environmental Impacts (4)

## Sustainability Individualized Study/

Elective Credits (7-10)
Students will work with their primary academic advisor and the Sustainability academic advisor to select electives in the theme relevant to their interests for a total of 7-10 credits. Students should discuss with Sustainability advisor to apply elective courses that may not be listed below.

## Total Credits=27

## Elective Courses:

## Business

AEC 250. *Introduction to Environmental Economics and Policy (3)
AEC 253. *Environmental Law, Policy and Economics (4)
AEC 351. *Natural Resource Economics and Policy (3)
AEC/ECON 352. *Environmental
Economics and Policy (3)
AEC 434. ${ }^{\wedge}$ Measuring Resource and
Environmental Impacts (4)
BA 302. Business Process Management (4)
BA 351. Managing Organizations (4)
BA 352. Managing Individual and Team Performance (4)
BA 362. Social Entrepreneurship and Social Initiatives (4)
BA 432. Environmental Law, Sustainability and Business (4)
BA 466. Integrative Strategic Experience (4)
ECON 202. Introduction to
Macroeconomics (4)
ECON 315. Intermediate Macroeconomic Theory (4)

## Engineering

BEE 221. Fundamentals of Ecological
Engineering (3)
BEE 320. Biosystems Analysis and Modeling (4)

BEE 322. Ecological Engineering
Thermodynamics and Transfer Process (4)
CCE 422. Green Building Materials (3)
CHE 450. Conventional and Alternative
Energy Systems (3)
CHE 451. Solar Energy Technologies (3)
ECE 438. Electric and Hybrid Electric Vehicles (4)
ENGR 350. *Sustainable Engineering (3)

ENVE 321. Environmental Engineering
Fundamentals (4)
ME 312. Thermodynamics (4)

## Natural Sciences

ATS 320. *The Changing Climate (3)
[Terminated fall 2017]
BI 301. *Human Impacts on Ecosystems (3)
BI 306. *^Environmental Ecology (3)
BI 370. Ecology (3)
CH 374. *Technology, Energy, and Risk (3)
CH 390. Environmental Chemistry (3)
FES/TOX 435. *Genes and Chemicals in Agriculture: Value and Risk (3)
FOR 462. Natural Resource Policy and Law (3)

FW 251. Principles of Fish and Wildlife Conservation (3)
FW 303. Survey of Geographic Information Systems in Natural Resource (3)
FW 321. Applied Community and
Ecosystem Ecology (3)
FW 325. *Global Crises in Resource Ecology (3)

FW 326. Integrated Watershed Management (3)

FW 340. *Multicultural Perspectives in
Natural Resources (3)
FW 350. *Endangered Species, Society and Sustainability (3)
FW 435. ${ }^{\wedge}$ Wildlife in Agricultural Ecosystems (3)
FW/ANS/FES/SOC 485. *Consensus and Natural Resources (3)
FW 488. Problem Solving in Fisheries and Wildlife Science (3)
FW 489. Effective Communications in
Fisheries and Wildlife Science (3)
GEO 306. *Minerals, Energy, Water and the Environment (3)
GEO 309. *Environmental Justice (3)
GEO 453. Resource Evaluation Methods/ EIS (3)
GEOG 300. *Sustainability for the Common Good (3)
GEOG 324. Geography of Life: Species
Distributions and Conservation (4)
GEOG 330. *^Geography of International
Development and Globalization (3)
GEOG 331. *Population, Consumption, and Environment (3)
GEOG 340. *Introduction to Water Science and Policy (3)
GEOG 360. GIScience I: Geographic
Information Systems and Theory (4)
GEOG 430. Resilience-Based Natural
Resource Management (3)
GEOG 431. Global Resources and Development (3)
GEOG 441. International Water Resources Management (3)
GEOG 450. Land Use in the American West (3)

GEOG 451. Planning Principles and
Practices for Resilient Communities (4)
GEOG 452. Sustainable Site Planning (3)
PH 313. *Energy Alternatives (3)
WSE 210. *Renewable Materials Technology and Utilization (4)
WSE 266. *Industrial Hemp (3)
WSE 321. Chemistry of Renewable Materials (3)

WSE 322. Physical and Mechanical Properties of Renewable Materials (4)
SOIL 499. Special Topics [Organic Farming]
(1-16)
Z 349. *Biodiversity: Causes, Consequences and Conservation (3)

## Social Sciences/Humanities

AEC 250. *Introduction to Environmental Economics and Policy (3)
AEC 253. *Environmental Law, Policy and Economics (4)
AEC 351. *Natural Resource Economics and Policy (3)
AEC/ECON 352. *Environmental
Economics and Policy (3)
AEC 434. ${ }^{\wedge}$ Measuring Resource and
Environmental Impacts (4)
ANTH 481. *Natural Resources and
Community Values (3)
COMM 408. Workshop (3)
COMM 440. Theories of Conflict and Conflict Management (3)
COMM 442. Bargaining and Negotiation Processes (3)

ENVIRONMENTAL ARTS AND
HUMANITIES (MA)
HUMANITIES (MA)
Graduate Areas of Concentration
Environmental imagination, environmental action, environmental thinking

## Environmental Arts and

Humanities Foundation (12 credits)
EAH XXX. Environmental Arts and Humanities Field Course. (3) [Pending submission \& approval]
EAH 411/EAH 511. Perspectives in
Environmental Arts and Humanities (4)
EAH XXX. Environmental Science Methods and Practice (3)
EAH XXX. Professional Development. (1)
[Pending submission \& approval]
EAH XXX. Thesis or Project Proposal
Writing for Environmental Arts and
Humanities. (2) [Pending submission \& approval]
EAH 412/EAH 512. Environmental Science in Context (4)

Note: Students must enroll in at least 29 stand-alone courses (52\% of their course work).
Environmental Arts and
Humanities Core ( 9 credits)
Choose three from below; no more than one from any department:
ART XXX. Art and Nature [Pending approval]
COMM 412/COMM 512. Topics in Speech Communication: Environmental Communication (3)
COMM XXX. The Rhetoric of Land Use (3)
[Pending submission \& approval]
EAH XXX. Classics of American Environmental Thought [Pending
submission \& approval]
ENG 482/ENG 582. Studies in American Literature, Culture, and the Environment (4)

ES XXX. Environmental Racism [Pending submission \& approval]
FES 523. Quantitative Analysis in Social Science (4)
FS 599. Conservation Ethics (2-3)
[Terminated fall 2013]
HST 481/HST 581. Environmental History of the United States (4)
HST XXX. Global Environmental History
[Pending submission \& approval]
PHL 440/PHL 540. Environmental Ethics (3)
PHL 443/PHL 543. Worldviews and
Environmental Values (3)

## Graduate Areas of Concentration

(12 credits)
Select one graduate area of con-
centration and complete a mini-
mum of 12 credits in that area.

## Environmental Imagination

ART XXX. Art and Nature [Pending submission \& approval]
ART 546. Documentary Photography (3)
ART 562. Directions and Issues in Contemporary Art (3)
ART 569. Methods and Theory of Art History (3)
COMM 550. Communication and the Practice of Science (3)
COMM XXX. Environmental Rhetoric
[Pending submission \& approval]
ENG 545. Studies in Nonfiction (4)
ENG 575. Studies in Criticism (4)
ENG 582. Studies in American Literature, Culture, and the Environment (4)
FES 493/FES 593. Environmental
Interpretation (4)
PHL 539. Philosophy of Nature (3)
PHL 562X. Aesthetics of the Natural World
(3)[Terminated summer 2015]

WR 448/WR 548. Magazine Article Writing (4)

WR 462/WR 562. Environmental Writing (4)

WR 525. Advanced Scientific and Technical Writing (4)

## Environmental Action

AEC 532. Environmental Law (4)
ANTH 577. Ecological Anthropology (4)
COMM 426/COMM 526. Intercultural Communication: Theories and Issues (3) COMM 442/COMM 542. Bargaining and Negotiation Processes (3)

COMM 599. Special Topics: Environmental Conflict Resolution (3)
ES 560. Ethnicity and Social Justice (3)
FW 549. History of Fisheries Science (3)
HST 481/HST 581. Environmental History of the United States (4)
HST XXX. Global Environmental History [Pending approval]
HSTS 421/HSTS 521. Technology and Change (4)
HSTS 422/HSTS 522. Historical Studies of Science and Politics (4)
HSTS 570/FW 570. Ecology and History: Landscapes of the Columbia Basin (3)
PHL XXX. Environmental Justice
[Pending submission \& approval]
PSY 492/PSY 592. Conservation Psychology (4)

SOC 485/SOC 585. Consensus and Natural Resources (3)
WGSS 523. Community Organizing and Collective Action (2)
WGSS 540. Women and Natural Resources (3)

WGSS 550. Ecofeminism (3)

## Environmental Thinking

ANTH 481/ANTH 581. Natural Resources and Community Values (4)
ECON 439/ECON 539. Public Policy Analysis (4)
ENSC 520. Environmental Analysis (3)
ES 448/ES 548. Native American Philosophies (4)
FES XXX. Conservation Ethics (3-4)
[Pending submission \& approval]
FES XXX. Critical Thinking About Environmental Issues (3-4) [Pending submission \& approval]
FW 537. Structured Decision Making in
Natural Resource Management (2)
HSTS 515. Theory of Evolution and
Foundation of Modern Biology (4)
PHL 539. Philosophy of Nature (3)
PHL 540. Environmental Ethics (3)
PHL 541. Classical Moral Theories (3)
PHL 542. Contemporary Moral Theories (3)
PHL 543. Worldviews and Environmental Values (3)
PHL XXX. Philosophy of Adaptive Ecosystem Management (3) [Pending submission \& approval]
PHL 434/PHL 534. Spirituality and the Environment: Green Yoga
PS 461/PS 561. Environmental Political Theory (4)

## Electives (9 credits)

Select electives that inform graduate areas of concentration and meet learning, research, and career goals. Students are encouraged to use elective credits to pursue an OSU graduate certificate such as the Graduate Certificate in Fisheries Management, the Graduate Certificate in Management for Science Professionals, the Graduate Certificate in Marine Resource Management, the Graduate Certificate in Sustainable Natural Resources, and the Graduate Certificate in Water Conflict Management and Transformation. Students may also fulfill their elective credits by participating in the Natural Resources Leadership Academy.

## Engagement (14 credits)

Students are required to develop a plan for their Engagement credits with their committee by the end of year one. Engagement credits include fieldwork and thesis/project credits.
EAH XXX. Fieldwork (up to 8 credits) EAH XXX. Thesis/Project (up to 8 credits) All students will be required to make a final thesis or project presentation and defend the work to the student's committee. Students must submit a draft of their thesis or project to their committee for review six weeks prior to their presentation and oral examination.

Thesis Options: Students can develop a written thesis of appropriate length and format as agreed upon by their committee. Theses can include, but are not limited to 1 ) a sustained argument broken into closely related chapters or sections, or 2 ) a number of articles (e.g., magazine articles, scholarly articles) that develop arguments on distinct but related topics with a framing introduction that addresses their relationship.

Project Option: Student's projects can take any form with the approval of the student's committee. Examples include developing a community program, making a documentary film, and creating multi-media or art exhibits.

## Major Code: $\mathbf{8 2 0 0}$

## ENVIRONMENTAL ARTS AND

 HUMANITIES GRADUATE MINORFor details, see proposal: https://secure. oregonstate.edu/ap/cps/proposals/ view/85127

Select a minimum of 12 credits from the following categories:

## Environmental Arts and

Humanities Foundation (4 credits)
EAH XXX. Environmental Arts and
Humanities Methods and Practice (3)
[Pending submission \& approval]
or EAH 511. Perspectives in Environmental Arts and Humanities (4)
EAH 508. Professional Development Workshop (1)

## Environmental Arts and

Humanities Core (8 credits)
Minor Code: 8201

## CERTIFICATES

## 20TH CENTURY STUDIES <br> CERTIFICATE

This program has been suspended, January 2005.

Students are not being admitted to the 20th Century Studies Undergraduate Certificate program.

To complete the certificate program, students are required to take a minimum of 27 credits, consisting of 9 credits of core courses, 9 credits of thematic interdisciplinary courses, and 9 credits of approved elective courses.

## Core Courses (9)

TCS 200. *Twentieth Century Realities: The U.S. (3) [Terminated fall 2008]

TCS 201. *Twentieth Century Dreams: The U.S. (3) [Terminated fall 2009]

TCS 300. *World Community in the
Twentieth Century: Development (3)
[Terminated fall 2008]
TCS 301. *World Community in the Twentieth Century: Underdevelopment (3) [Terminated summer 2016]

## Thematic Interdisciplinary Courses

 (9)
## Elective Courses (9)

Elective courses may be chosen from among the many regular departmental offerings in the College of Liberal Arts. Elective credits must be outside the student's major.

## Major Code: C825

## RUSSIAN STUDIES CERTIFICATE

This program has been suspended, 2010. Pending termination via \#100119, https://secure.oregonstate.edu/ap/cps/ proposals/view/100119

## Option I

The course of study consists of a minimum of 30 credits: 21 credits of required core courses and 9 credits of appropriate electives. In the distribution of electives, students must complete at least one course in two of the following areas: economics, history, political science.
Requirements (21)
RUS 211, RUS 212, RUS 213. Second-Year Russian (4,4,4)
RUS 231, RUS 232, RUS 233. *Russian Culture ( $3,3,3$ ) [Terminated summer 2017]

## Elective Courses (9)

HST 340, HST 341. History of Russia (4,4)
HST 344. Special Topics in Russian History $(4,4)$
HSTS 418/HSTS 518. *Science and Society (4)

HST 345. Society in Modern Russia (4)
PS 343. *Russian Politics (4)
PS 399. Current Problems in Politics (3)
PS 402. Independent Study (1-16)
RUS 341. *20th Century Russian Literature in Translation (3) [Terminated fall 2009]

## Option II

The course of study consists of a minimum of 30 credits: 12 credits of required core courses and 18 credits of appropriate electives. In the distribution of electives, students must complete at least one course in three of the following areas: foreign languages; economics; history; political science.

## Requirements (12)

RUS 111, RUS 112, RUS 113. First-Year Russian (4,4,4)

## Elective Courses (18)

HST 341. History of Russia (4)
HST 344. Special Topics in Russian History $(4,4)$

HST 345. Society in Modern Russia (4)
HSTS 418/HSTS 518. *Science and Society (4)
PS 343. *Russian Politics (4)
PS 399. Current Problems in Politics (3)
PS 402. Independent Study (1-16)
RUS 233. *Russian Culture [20th century] (3)
RUS 341. *20th Century Russian Literature in Translation (3)
Courses offered on a one-time basis that are directly related to Russian Studies may be used if the student receives prior approval from the Russian Studies coordinator. For example, HST 415/HST
515. Selected Topics: Stalin and Stalinism (3).

Footnote:

* Baccalaureate Core Course

## Major Code: C820

■ LIBERAL ARTS COURSES
LA 199. SPECIAL TOPICS (2). Various topics introducing students to the liberal arts. This course is repeatable for a maximum of 6 credits.
LA 399. SPECIAL TOPICS (1-12). This course is repeatable for a maximum of 12 credits.
SSCI 211. CAREER DEVELOPMENT IN THE SOCIAL SCIENCES (1). An introduction to career options available to students pursuing a social science degree. Students will explore career options and engage in exercises to help them reflect on their own interests, career goals, and aspirations. Hybrid class.
SSCI 301. ^QUALITATIVE RESEARCH
METHODS FOR THE SOCIAL SCIENCES
(4). Introduces a variety of qualitative research methods including ethnography, interviewing, recording oral histories, and conducting focus groups. Students will develop their own research questions, collect data to answer that research question, code and analyze data, and write and disseminate results. The course will culminate in a final paper and in-class presentation of original research results. (Writing Intensive Course)
PREREQS: Six credits of upper division courses in the social sciences, including sociology, political science, anthropology, or communication.

The Oregon State University College of Pharmacy's Doctor of Pharmacy (PharmD) Program is accredited by the Accreditation
Council for
Pharmacy
Education (http:// www.acpeaccredit.org/), 135 S. LaSalle Street, Suite
4100, Chicago, IL 60603-4810, 312-664-3575,
800-533-3606;
Fax, 312-6644652. The PharmD degree is jointly conferred by Oregon State University and Oregon Health \& Science University. The Oregon State University College of Pharmacy is a member of the American Association of Colleges of Pharmacy. The College of Pharmacy is dedicated to advancing societal health through leadership in pharmacy education, research, community engagement, and improved patient care.

Apetition from the pharmacists of Oregon led to the establishment of the Department of Pharmacy at Oregon State College in 1898. The department grew steadily and in 1917 became the School of Pharmacy. In 1983, it became the College of Pharmacy.

There are many career options available to individuals having a pharmacy degree. Some graduates are employed in privately owned or chain pharmacies and practice in a community setting while others practice in hospitals or nursing homes. The pharmaceutical industry offers careers in many areas including sales, marketing, public and government relations, manufacturing, and basic research. Pharmacy graduates are also employed in various local, state and federal health agencies, including the U.S. Public Health Service and the Department of Veterans Affairs. Individuals who decide to acquire advanced professional or graduate training may follow a career in research and academics.

College of Pharmacy graduates are eligible for licensure as pharmacists throughout the United States.

Professional Program
Doctor of Pharmacy (PharmD)
Graduate Major
Pharmaceutical Sciences (MS, PhD)
Graduate Areas of Concentration
Biopharmaceutics
Medicinal Chemistry
Natural Products Chemistry
Pharmaceutics
Pharmacoeconomics

RESEARCH FACULTY
Professor, Sr. Research Simonson Assistant Professors, Sr. Research
G. Indra, Taratula, Yin, Zielke

## COURTESY FACULTY

## AND PRECEPTORS

The College of Pharmacy utilizes practicing pharmacists, physicians, and pharmaceutical scientists as lecturers in the professional pharmacy program and in the college's graduate education program. This group includes over 400 pharmacy preceptors. These individuals make a very important and significant contribution to the educational programs of the college.

## PHARMACY INFORMATION

Professional pharmacy education has advanced both in Oregon and throughout the United States in order to meet the expectations of an evolving health care system. To be eligible for admission to the PharmD program, students must complete the PharmD prerequisites, which will require three to four years of college study. Completion of the pharmacy professional program requires an additional four years.

After completion of the four-year professional pharmacy program, the graduate is eligible to take a licensing exam administered by state boards of pharmacy. After passing the licensing exam and completing required internship training, the graduate is licensed to practice as a registered pharmacist. While time requirements may vary from state to state, most graduates become licensed as pharmacists approximately three months after graduation from Oregon State University.

## PHARMD PREREQUISITES

Required PharmD prerequisites may be taken at Oregon State University or any other accredited college or university. The PharmD prerequisites must be completed prior to beginning the professional program.

Required courses must be taken for a letter grade; however, an exception may be made if a course is only offered pass/ no pass. The student should make a specific request for waiver of grade requirement directly to the College of Pharmacy Admissions Committee prior to taking the course.

Students from community colleges, other colleges and universities, may transfer to OSU at any time to complete the PharmD prerequisites.

For more information on the prerequisites, please visit our website, http://pharmacy.oregonstate.edu/ pharm-d-prerequisites.

## EARLY ASSURANCE PROGRAM

The Early Admission Program is intended to guarantee highly qualified students

admitted to Oregon State University the opportunity to enter the College of Pharmacy Doctor of Pharmacy (PharmD) program after the successful completion of the program prerequisites and the maintenance of certain academic criteria.

Further information on eligibility and the admissions process is available at http://pharmacy.oregonstate.edu.

## THE PROFESSIONAL PHARMACY PROGRAM

Enrollment in the four-year professional program is limited. Students must apply for admission to the professional pharmacy program. Application information and forms are available at http://www. pharmcas.org/. Contact the OSU College of Pharmacy for other information or visit the college website at http:// pharmacy.oregonstate.edu/. Students are admitted to the professional program beginning fall term only.

Once admitted to the professional program, each student is assigned a faculty advisor. Students may register only for those courses for which they have completed the stated prerequisite courses. Exceptions are allowed only after approval by the College of Pharmacy's Academic and Professional Standards Committee. Students will complete the first two years of their course work on the Oregon State University campus. The third professional year will be at the College of Pharmacy Satellite Campus at Oregon Health and Science University in Portland, Oregon. Most students choose to live in the Portland area during the third year. The fourth year will be off-campus at various pharmacy practice sites throughout the state of Oregon and the Northwest, including Hawaii. Contact the college directly for additional information about the PharmD curriculum.

Immunization and vaccination requirements for PharmD students are stricter than for other university students. PharmD students must satisfy all college immunization and vaccination requirements before starting classes and each year in the program. Failure to meet these requirements may delay enrollment.

The four-year professional pharmacy program provides a broad, scientifically based, clinically focused education. Through appropriate selection of professional elective courses in the fourth year, a student may concentrate in such areas as community, institutional, geriatric, or managed care pharmacy; or prepare for graduate study.

The pharmacy profession is experiencing profound changes. These changes include an increased focus toward patient care, in addition to the study of pharmaceutical products. All students will be required to give immunizations (shots), take medical histories from patients, and
perform physical examinations. These experiences will involve asking sensitive questions and physically touching other people. Throughout the curriculum, students are assigned to off-campus practice sites where they are supervised by licensed pharmacists who are affiliate faculty members of the college. Practice sites are located primarily throughout Oregon. Completion of practicum courses at these off-campus practice sites in the fourth professional year generally requires up to 40 hours per week at the practice site. Practicum experience may include nights, evenings, and weekends. Practice sites are varied but include community pharmacies, hospitals, long-term care facilities, and outpatient clinics. PharmD students are required to provide their own transportation to sites.

The College of Pharmacy requires all pharmacy students to complete criminal background checks and recommends that all pharmacy students submit to drug screening. Criminal background checks and drug screenings have become standard requirements for employment in a pharmacy and placement in experiential rotations. Criminal background checks and drug screening may also be required for licensure. Students who cannot participate in experiential rotations due to criminal or other activities of concern that are revealed in criminal background checks or drug screenings may be unable to fulfill the requirements of the professional PharmD program. Therefore, it is in everyone's interest to resolve any issues prior to commitment of resources by the college and by students.

PharmD students must immediately disclose any criminal activity that occurs prior to or while enrolled in the PharmD program. PharmD students must immediately reveal any action taken by a Board of Pharmacy, including but not limited to warning, probation and revocation of licensure. Failure to do so could result in dismissal from the PharmD program.

To become licensed by the state of Oregon to practice pharmacy, an individual must meet at least three criteria:

1. Possess a baccalaureate or PharmD degree in pharmacy from an accredited U.S. college of pharmacy,
2. Pass the North American Pharmacist Licensing Exam (NAPLEX), the Multistate Pharmacy Jurisprudence Examination (MPJE), and
3. Complete the Oregon Board of Pharmacy internship requirements.

## ADMISSION STANDARDS

Equal Opportunity and Disability Accommodation The College of Pharmacy, as a part of Oregon State University, is committed to the principle of equal opportunity.

The college does not discriminate on the basis of race, color, creed, religion, national origin, gender, sexual orientation, age, marital status, disability, and disabled veteran or Vietnam-era veteran status. When requested, the college will provide reasonable accommodation to otherwise qualified students with disabilities. Disabled students must work with and be approved by the Disability Access Services office.

## Essential Characteristics

## of Student Pharmacists

The essential characteristics of student pharmacists identified below are drawn from a number of different resources that govern the professional expectations of pharmacists and student pharmacists, including but not limited to the national Pharmacy Code of Ethics, the Oath of a Pharmacist, and the Pledge of Professionalism. Please see Appendices to view these resources. The essential characteristics are intended to ensure that student pharmacists and pharmacists educated at the College of Pharmacy (the "college") have the capacity to meet federal and state regulations and policies that pertain to pharmacy, and to meet or exceed expectations that the public has for professional competence and behavior among pharmacy professionals.

Academic and professional environments present different challenges, but the essential characteristics required to succeed in pharmacy are common to both settings. Students in the college must observe and fulfill the essential characteristics, which have been divided into the following relevant categories: intellectual ability, empathetic and collegial communication skills, psychomotor skills, respect for diversity, high ethical standards, and behavioral and social expectations. Under each category are examples that describe and clarify these essential characteristics.

## Intellectual Ability

- Comprehend, interpret and analyze new information
- Reason and carry out evidence-based decision making
- Use critical thinking skills and problem solving to evaluate information from multiple sources and synthesize a plan of action
- Thrive in a rigorous foundational and clinical science-based curriculum
- Participate in self- and programmaticassessment intended to sustain a continual improvement process
- Be curious and pursue lifelong learning
Empathetic and Collegial

## Communication Skills

- Formulate concise, accurate synopses of essential information
- Contribute in a meaningful and collaborative manner in group
discussions
- Interact constructively with other members of a health care team
- Communicate difficult concepts orally and in writing at an appropriate level for specific patients or audiences
- Listen empathetically and develop rapport
- Appropriately display and interpret nonverbal communication signals
- Communicate fluently in English
- Effectively utilize resources to communicate in non-English languages

## Psychomotor Skills ${ }^{1}$

- Participate effectively in preparation and distribution of sterile and nonsterile drug products
- Utilize and analyze information from varied sensory inputs
- Participate in drug administration, including injections
- Carry out tasks required for objective and subjective assessment of patient health
- Discern critical elements of a problem through observation

## Respect for Diversity

- Communicate in a manner that respects all individuals
- Proactively seek ways to provide an inclusive environment that addresses unique patient needs
- Provide care without judgment of a patients' personal choices or situation
- Individualize care with consideration of cultural norms for the patient
- Individualize care with consideration of unique therapeutic needs or challenges

## High Ethical Standards

- Maintain confidentiality
- Act with compassion, empathy and altruism
- Accept responsibility and provide leadership
- Abstain from illicit drug use
- Act with integrity and expect the same of professional colleagues

## Behavioral and Social Expectations

- Demonstrate a history of appropriate behavior in personal actions
- Perform effectively and display sound judgment while under stress
- Perform appropriately in academic or professional settings
- Address disagreements with tact and avoid public altercations
- Exhibit the capacity to adapt to change readily and adjust responses in dynamic, unpredictable situations
- Accept constructive criticism and adapt behavior

## Footnote:

${ }^{1}$ Students may be able to be admitted and progress to graduation while not possessing selected psychomotor skills. In the instance of
a documented disability, the college will work to provide reasonable accommodation. The absence of some skills, however, may limit the variety of settings in which a pharmacist can work.

## REQUIREMENTS FOR

## PROGRESSION

Doctor of Pharmacy (PharmD) students must meet university requirements and standards and adhere to the university Student Conduct Regulations (http:// studentlife.oregonstate.edu/studentconduct//). The College of Pharmacy faculty has adopted additional requirements to assure that all pharmacy graduates have the best possible educational background and preparation for their pharmacy practice careers. College of Pharmacy standards may vary from the university standards in order to ensure compliance with policies, regulations and expectations specific to the pharmacy profession.

Students are expected to meet specific academic and professional requirements to matriculate in the College of Pharmacy and to progress to each successive year of the professional program. Each student's standing in the College of Pharmacy is reviewed at the end of every term, or at any time in the interim 'for cause'. The review includes core pharmacy term GPA, cumulative GPA, and other characteristics identified as being essential to student pharmacists and pharmacists.

The professional PharmD degree program at Oregon State University is designed to be completed within four years. The program combines didactic courses, structured clinical practice opportunities, and, optimally, significant work experience to educate pharmacists that have both in-depth and up-to-date knowledge to be change agents in their chosen profession. In order to assure this current and in-depth knowledge base for each graduate, the professional program must be completed within a five-year period.

## To begin the first professional year, students:

1. Must receive, and respond in a timely manner, to an offer of admission.
2. Must complete all pre-pharmacy courses with a grade of C - or better.
3. Must hold a current CPR and first aid certification from an approved provider.
4. Must successfully complete a background check following guidelines established by the college.
5. Must submit to the recommended drug screening or provide written acknowledgment of the potential consequences of declining the drug screening.
6. Must attend the first-year professional orientation program, and verify an understanding and acceptance of College of Pharmacy policies and procedures.
7. Must obtain an Oregon Pharmacy Intern License.
8. Must fulfill the essential characteristics of student pharmacists identified by the college.

## To advance into the second

## professional year, students:

1. Must successfully complete all courses that are included in the curriculum of the first professional year, including electives with a cumulative pharmacy GPA of 2.00 and a P (Pass) in all P/N (Pass/No Pass) courses.
2. Must have no more than one D grade in pharmacy courses.
3. Must maintain a current Oregon Pharmacy Intern License.
4. Must have a current CPR certification from an approved provider.
5. Must fulfill the essential characteristics of student pharmacists identified by the college.
To advance into the third
professional year, students:
6. Must successfully complete all courses that are included in the curriculum of the first two professional years, including electives with a cumulative pharmacy GPA of 2.00 and a P (Pass) in all P/N (Pass/ No Pass) courses.
7. Must have no more than one D grade in pharmacy courses.
8. Must have completed two approved elective courses with a grade of C - or better in graded courses, or with a P in Pass/No Pass (P/N) courses.
9. Must successfully complete a background check during the summer preceding the third professional year
10. Must maintain a current Oregon Pharmacy Intern License.
11. Must have a current CPR certification from an approved provider.
12. Must have earned a bachelor's degree.
13. Must fulfill the essential characteristics of student pharmacists identified by the college.

## To advance into the fourth

professional year, students:

1. Must successfully complete all courses that are included in the curriculum of the first three professional years, including electives with a cumulative GPA of 2.00 and a P (Pass) in all P/N (Pass/No Pass) courses.
2. Must have no more than one D grade in pharmacy courses.
3. Must have completed three approved elective courses, one of which must be completed after the second professional year, with a grade of Cor better in graded courses, or with a P in Pass/No Pass ( $\mathrm{P} / \mathrm{N}$ ) courses.
4. Must maintain a current Oregon Pharmacy Intern License. (Licensure
in additional states may be required for students completing clerkships outside of Oregon.)
5. Must have a current CPR certification from an approved provider.
6. Must be willing to meet site specific requirements for all assigned clerkship rotations.
7. Must verify an understanding and acceptance of College of Pharmacy policies and procedures as they pertain to advanced experiential learning.
8. Must fulfill the essential characteristics of student pharmacists identified by the college.
To graduate with the PharmD degree, students:
9. Must have met all requirements defined for progression through each professional year.
10. Must successfully complete all required and elective advanced clerkships with a passing grade.
11. Must fulfill the essential
characteristics of student pharmacists identified by the college.

## STUDENT STANDING IN THE <br> COLLEGE OF PHARMACY

The Academic and Professional Standards Committee ("APSC") may, at any time, review a student's standing in the college. APSC is charged with ensuring that students are aware of academic performance or behavior which is not consistent with essential characteristics of student pharmacists and that, therefore, places their completion of the PharmD program at risk. Academic performance and behavioral concerns are often evaluated independently but have equal significance in determining whether a student is meeting the essential characteristics of student pharmacists. Severe, continuing or repeated academic or behavioral problems can result in dismissal from the PharmD program.

APSC, when necessary, provides student standing information to communicate performance deficits, insufficient student progress, and lack of progress in a student addressing academic or behavioral problems. APSC and the college's director of student services/head advisor provide students guidance regarding what the college expects from a student to increase their opportunities for success in the college. Student performance and progress are evaluated on a case-by-case basis, utilizing the experience of APSC members. APSC uses good faith, informed judgment to determine appropriate recommendations for each student's situation.

The following student standing notifications may be received by students who are demonstrating performance deficits or insufficient progress in the PharmD program:

## Warning

Warning status is cautionary and identifies student performance which may place a student's completion of the PharmD program at risk.

Students are placed on warning status if they have a term core pharmacy GPA of less than 2.5 or receive 2 or more C grades in core or elective professional courses in a term. Students may also be placed on Warning status if they engage in behavior that does not meet the Essential Characteristics of Student Pharmacists.

- The first time students are placed on Warning status, they must meet with the Director of Student Services/Head Advisor to discuss their situation.
- The second time students are placed on Warning status, they must meet with the Director of Student Services/ Head Advisor and develop a holistic action plan for overcoming academic and non-academic barriers to success. They must subsequently execute this action plan.
- The third time students are placed on Warning status, they are automatically placed on Probation.

## Probation

Probation status identifies an academic or behavioral concern that places the student's completion of the PharmD program at serious risk. Probation may be accompanied by a delay in progression at the determination of the APSC.

Students are placed on Probation status if they have a term core pharmacy GPA of less than a 2.0 or if they receive a C- or lower grade in any core or elective professional course. A third warning automatically results in Probation.
Student behavior that is a significant departure from the Essential Characteristics of Student Pharmacists will also result in Probation status. Such behavior includes, but is not limited to, violations of Academic Integrity policies, criminal violations, repeated or intentional violation of college policies, or significant breaches of the University Student Conduct Code (see http://studentlife.oregonstate.edu/studentconduct/).

Students on Probation status must follow recommendations of the APSC and the Director of Student Services/Head Advisor. Students on Probation status must meet with the Director of Student Services/Head Advisor following each term to review their progress and standing in the college. Students that successfully fulfill the recommendations prescribed will be removed from Probation status.
Students that fail to follow or are unsuccessful in fulfilling the recommendations will be suspended and evaluated for dismissal from the college. Students who are placed on Probation status for the second time will also be evaluated for

## dismissal from the college.

## Suspension

Students that have failed to make adequate progress, or who have displayed severe or repeated departures from the Essential Characteristics of Student Pharmacists, may be placed on Suspension status. The college will place an indefinite hold on the progression of a student placed on Suspension status until APSC can adequately evaluate whether the student will be allowed to continue in the PharmD program. Students engaged in an appeal of their dismissal from the college will also be placed on Suspension status.
Students placed on Suspension status will not be allowed to progress in the PharmD program. APSC will review the status of a student on Suspension no later than the beginning of the next academic term. After review, ASPC may recommend immediate Dismissal from the college, recommend that the student be continued on Suspension status pending receipt of additional information, or prescribe a plan to address specific concerns that resulted in the student's Suspension status. If a plan for progression is developed by APSC, the student will be changed to Probation status. If at any time it becomes evident that the student will not be able to address concerns and graduate within the required five-year window, the student will be dismissed immediately.

## Dismissal

Students will be dismissed from the professional program if they are not making adequate academic progress, or if they fail to constructively address professional or behavioral concerns.

## PROFESSIONAL ASSOCIATIONS

Students are encouraged to join various professional organizations. At OSU, they may choose the following:

## NCPA-National Community

Pharmacists Association-Open to all students in pharmacy; affiliated with the national parent organization.
Academy of Students of
Pharmacy-Open to all students in pharmacy; includes affiliation with the American Pharmaceutical Association and the Oregon State Pharmacists Association.
American Society of Health-System Pharmacists-Open to all students in pharmacy; includes membership in the Oregon Society of Health-System Pharmacists.
Rho Chi-Membership in Beta chapter of Rho Chi, national pharmaceutical honor society, is selective and based on high scholastic achievement.
Phi Delta Chi-Membership in the Beta Iota chapter of this 100 -year-old national pharmacy fraternity is limited.

Individuals must meet the pledge requirements.
Phi Lamda Sigma-Membership in the Beta Zeta chapter of the national fraternity is limited to qualified individuals who meet requirements for professional development and leadership.
$\boldsymbol{A A C P}$-American Association of Colleges of Pharmacy.
OSSP—Oregon State Student
Pharmacists is an umbrella professional development organization for pharmacy students that includes membership in several national and state professional organizations.

## SCHOLARSHIPS AND LOANS

Information about scholarships and loans is available from the College of Pharmacy website and the Office of Financial Aid and Scholarships, 541-737-2241.

## WICHE PROGRAM

The College of Pharmacy accepts students supported through the Western Interstate Commission for Higher Education (WICHE) Professional Student Exchange Program. This interstate program provides the opportunity for students from the 12 cooperating states to obtain professional training not available in their home states. Residents from the states of Alaska and Nevada are eligible to apply for support in pharmacy.

To apply, the applicant must become "certified" by his or her home state. Applicants must apply to their home offices before October 15 prior to the academic year in which they plan to enroll. State certifying office contact information is available at http://wiche.edu/psep/ cert-off.

## GRADUATE MAJORS

## PHARMACEUTICAL SCIENCES

 (MS, PhD)
## Graduate Areas of Concentration

Biopharmaceutics, medicinal chemistry, natural products chemistry, pharmaceutics, pharmacoeconomics, pharmacokinetics, pharmacology, toxicology
The emphasis of most graduate programs is on foundational research investigating drug discovery, chemistry, mechanisms of drug action, molecular biology, genomics, drug metabolism, and dosage form design.

Faculty in the department are involved in identification of new drugs from the ocean and other biological sources, biochemical toxicology, and drug metabolism studies; the design and development of new drug delivery and dosage forms; and studies on the clinical efficacy and distribution of drugs through the body as a function of dosing regimen or
dosage form. They are using biochemical and molecular biological techniques to investigate signal transduction pathways mediated by phospholipids and retinoids; electrophysiological approaches to studying ion channel function; and the molecular biology of nuclear receptors and factors regulating gene expression.

## ■ PHARMACY COURSES

PHAR 201. PHARMACY ORIENTATION (1).
Career opportunities in pharmacy including community and institutional practice, government, and industry. Discussion of available educational pathways. Open to non-pharmacy students.
Graded P/N.
PHAR 210. TERMINOLOGY OF THE HEALTH
SCIENCES (2). Provides the student in any of
the health science disciplines or pre-professional studies with a working knowledge of the terminology used in the health sciences. Open to non-pharmacy students.
PHAR 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
PREREQS: Departmental approval required.
PHAR 403. THESIS ( $1-16$ ). This course is repeatable for a maximum of 16 credits.
PREREQS: Departmental approval required.
PHAR 405. READING \& CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PHAR 407. SEMINAR (1-16). One-credit section. Graded P/N. This course is repeatable for a maximum of 16 credits.
PHAR 501. RESEARCH (1-16). This course
is repeatable for a maximum of 16 credits.
PREREQS: Departmental approval required.
PHAR 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.
PREREQS: Departmental approval required.
PHAR 505. READING \& CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

PHAR 507. SEMINAR (1-16). One-credit section. Graded P/N. This course is repeatable for a maximum of 16 credits.

PHAR 525. FOUNDATIONS OF DRUG ACTION I (3). Introductory course presenting actions of chemicals on physiological systems. Concepts encompass drug absorption and distribution, drug design and characterization of drug interactions with specialized cellular components, and drug biotransformation or excretion.

## PHAR 526. FOUNDATIONS OF DRUG

ACTION III (3). Drug actions in the autonomic nervous system (ANS) provide a template for understanding drug actions throughout the body. This course provides a complete consideration of pharmacologic and medicinal chemistry principles as they relate to drug interactions with the ANS.
Treatment options for selected diseases that respond to drugs acting on the ANS are also addressed.

## PHAR 527. FOUNDATIONS OF DRUG

ACTION II (3). Introductory course presenting actions of chemicals on physiological systems. Concepts encompass drug activation of biological response via biochemical or molecular transduction mechanisms, pharmacogenetics and pharmacogenomics, and drug-induced toxicities.
PHAR 537. BIOORGANIC CHEMISTRY (3).
A contemporary treatment of the chemistry, enzymology and molecular genetics techniques used in studying major natural products biosynthesis pathways in nature. Offered alternate years. PREREQS: CH 530 and CH 531 and CH 535. BB 590, BB 591, BB 592 are recommended.

## PHAR 563. CANCER AND

CHEMOPREVENTION (2). A summary of mechanisms of cancer progression, how cancer is detected, and introduction to chemoprevention using targeted therapy and alternative medicine. PREREQS: (BB 451 or BB 551) and BI 314 and (BI 460 or BI 560 ) or equivalent courses or second year standing in the PharmD program.
PHAR 571. EXPERIMENTAL APPROACH TO BIOPHARMACEUTICS (3). Experimental protocol, rationale, and procedures in clinical pharmacokinetic, pharmacokinetic, and biopharmaceutical experiments. PREREQS: PHAR 750

PHAR 572. APPLIED BIOPHARMACEUTICS AND PHARMACOKINETICS (3).
Pharmacokinetics and bioavailability of drugs in clinical care, including changing disease states. PREREQS: Graduate standing.
PHAR 573. CURRENT TOPICS IN PHARMACEUTICAL SCIENCES (1-3). Critical evaluation of contemporary pharmaceutics and pharmacokinetics research articles. This course is repeatable for a maximum of 9 credits.
PHAR 574. NANOMEDICINE (3). Introduction to the interdisciplinary field of nanomedicine, the use of nanoscale (1-100 nm) phenomena and materials in biomedical applications. Reviews the basic principles of nanotechnology relevant to areas such as diagnostic/molecular imaging, drug delivery, and other novel therapeutics. Topics will be described through both survey of historical developments and the latest scientific developments in the field of nanomedicine. PREREQS: Graduate student standing in Pharmaceutical Sciences program.
PHAR 580. PHARMACODYNAMIC AND PHARMACOKINETIC MODELING (3). Evaluation of strengths and weaknesses of mathematical models relative to pharmacodynamic and pharmacokinetic data. PREREQS: PHAR 750

PHAR 591. PHARMACOLOGY I (5). Principles of pharmacology; molecular, cellular, and physiologic mechanisms of drug action; pharmacological rationale for therapeutic and toxicologic treatment outcomes. PREREQS: Graduate standing and instructor permission.

PHAR 592. PHARMACOLOGY II (5). Principles of pharmacology; molecular, cellular, and physiologic mechanisms of drug action; pharmacologic rationale for therapeutic and toxicologic treatment outcomes. PREREQS: Graduate standing and instructor permission.
PHAR 593. PHARMACOLOGY III (5).
Principles of pharmacology; molecular, cellular, and physiologic mechanisms of drug action; pharmacologic rationale for therapeutic and toxicologic treatment outcomes. PREREQS: Graduate standing and instructor permission.
PHAR 601. RESEARCH (1-16). This course is repeatable for a maximum of 99 credits. PREREQS: Departmental approval required.
PHAR 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.
PHAR 605. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PHAR 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PHAR 669. INTRODUCTION TO GRANT PROPOSAL WRITING (1). To introduce students to the fundamentals of writing grant proposals to the National Institute of Health (NIH), different funding mechanisms, as well as the grant reviewing process. CROSSLISTED as VMB 669. PREREQS: Status as a student in a graduate or professional program.

## PHAR 699. SPECIAL TOPICS IN

PHARMACEUTICAL SCIENCES (3). This course is repeatable for a maximum of 99 credits.
PHAR 701. RESEARCH AND SCHOLARSHIP (1-8). Research conducted by professional pharmacy students under faculty supervision. This course is repeatable for a maximum of 12 credits.
PHAR 703. THESIS (1-8). Independent study and analysis that culminates in a thesis. This course is repeatable for a maximum of 999 credits.

PHAR 705. READING AND CONFERENCE (1-8). This course is repeatable for a maximum of 12 credits.

## PHAR 706. INTRODUCTION TO HEALTH

DISPARITIES (2). An examination of the multifaceted issue of health disparities in the U.S. healthcare system. Marginalized groups with disparities based upon racial/ethnic, gender, sexual preference and identity, disability, physical and mental health, geography and socioeconomics will be examined at the individual, systematic, and institutional levels. PREREQS: PHAR 707
PHAR 707. CAREER PERSPECTIVES AND PROFESSIONAL DEVELOPMENT (2). Students will explore the necessary knowledge, skills, and abilities in order to support professional role formation and ongoing professional development. Students will practice skills related to identifying personal strengths and weaknesses, building self-awareness, creating and maintaining a robust professional development plan, communicating professionally in written and oral formats, participating as a team leader and team member, as well as fine-tuning relationship building skills. PREREQS: First-year standing in the PharmD program.
PHAR 708. INTRODUCTORY PHARMACY PRACTICE EXPERIENCES: COMMUNITY CARE I (2). Students engage in on-site experience in community pharmacy. Learning is focused on understanding the scope of practice and roles of pharmacy personnel, while demonstrating skills related to safe and legal drug procurement and distribution in the community setting. Students observe patient counseling, develop foundational expertise in OTC and prescription drug products, and conduct medication reviews to identify drug-related problems. In-class patient case discussions are coordinated with patient care
topics in other first-year courses and explore legal, ethical and culturally sensitive decision-making Graded P/N. PREREQS: Oregon pharmacy intern license, PHAR 707. COREQS: PHAR 721 and PHAR 728

## PHAR 709. INTRODUCTORY PHARM

## PRACTICE EXPERIENCES: COMMUNITY CARE

II (2). Students engage in on-site experience in community pharmacy. Learning is focused on understanding the scope of practice and roles of pharmacy personnel, while demonstrating skills related to safe and legal drug procurement and distribution in the community setting. Students observe patient counseling, develop foundational expertise in OTC and prescription drug products, and conduct medication reviews to identify drug-related problems. In-class patient case discussions are coordinated with patient care topics in other first-year courses and explore legal, ethical and culturally sensitive decision-making. Graded P/N. PREREQS: Oregon Pharmacy Intern Licence and PHAR 708. COREQS: PHAR 712 and 714 and 722 .
PHAR 712. FOUNDATIONS OF PATIENT SAFETY AND INTERPROFESSIONAL PRACTICE (1). Techniques, best practices and opportunities for improving patient safety through interprofessional teamwork. Graded P/N. PREREQS: Admission to PharmD program.
PHAR 713. SPANISH FOR PHARMACY PROFESSIONALS (2). For the pharmacy professional with little or no Spanish language background (those with some Spanish language skills would find it beneficial). The course is presented in a video format with in-class facilitator for discussion. Provides basic Spanish grammar instruction but the focus will be on vocabulary and communication in a community pharmacy environment.
PHAR 714. COMPLEMENTARY MEDICINE (3).
Covers vitamins and microminerals and their role in biochemical processes, maintaining health and preventing disease. The course also covers the etiology of obesity and treatment modalities. The course builds upon the general background of students in biochemistry and physiology to provide a common baseline of knowledge and allow for integration of concepts required to understand preventive medicine. PREREQS: PHAR 729 and PHAR 735

PHAR 715. PRESCRIPTION DRUG ABUSE (2). Examines the issue of prescription drug abuse among the general population. Graded P/N. PREREQS: Current standing in PharmD program
PHAR 716. HEALTHCARE CHALLENGES FOR PERSONS WITH DISABILITIES (1). Students develop an understanding of healthcare challenges faced by persons with physical and mental disabilities. Graded P/N. This course is repeatable for a maximum of 2 credits.
PHAR 717. SENIOR CARE PHARMACY (2). Provides an overview of senior care pharmacy practice including an introduction to the senior patient, the senior care healthcare environment, medication-related problems in the elderly, the role of the pharmacist as a member of the interdisciplinary senior healthcare team, and employment opportunities in senior care pharmacy. Graded P/N. PREREQS: First-year professional standing in the College of Pharmacy and PHAR 723 and PHAR 735 and PHAR 739

## PHAR 718. NATURAL PRODUCT DRUG

 DEVELOPMENT (2). Overview of the process of drug development, with an emphasis on natural product sources of lead components. Top-selling and mainstay drugs will be researched in literature assignments and discussed to illustrate historical and current drug development paradigms. In addition, future approaches to drug discovery and paradigm shifts to incorporate concepts such as network pharmacology will be explored. PREREQS: Second-year standing in the PharmD program.PHAR 719. POISONS AND TOXINS (2). Covers many different types of substances, including common household poisons, poisonous plants and mushrooms, toxic gases/metals, shellfish toxins, and other natural toxins. Aspects of the chemistry and pharmacology of the poisons, antidotes/treatments, and occasional case studies will be covered. Historical examples and current events will also be incorporated into the course materials. PREREQS: PHAR 735

## PHAR 720. PHARMACY PRACTICE

I-PRINCIPLES OF INTEGRATED PATIENT
CARE (4). Pathophysiology of common conditions, self-care therapeutics, clinical data collection and documentation, prescription drug information and education, patient counseling skills, basic pharmacy calculations. PREREQS: First-year standing in the PharmD program.

PHAR 721. PHARMACY PRACTICE II (3) Interviewing skills; patient drug, education; nonprescription drugs. PREREQS: PHAR 720 COREQS: PHAR 724 and PHAR 730.
PHAR 722. PHARMACY PRACTICE III: PRINCIPLES OF INTEGRATED PATIENT CARE (4). Pharmacy Practice III continues the progression of topics introduced in Pharmacy Practice I and II. Patient interview and assessment techniques, communication skills, nonprescription products, and compounding techniques are emphasized in the lab. Lec/lab. PREREQS: PharmD student status
PHAR 726. PRINCIPLES OF EVIDENCE-BASED MEDICINE II: DRUG LIT EVAL (3). Students will learn to critique and evaluate health-related scientific journal articles using valid established techniques. PREREQS: Second-year standing in the PharmD program.
PHAR 728. PHARMACY LAW (2). Introduces the student to the federal and state agencies and regulations that govern pharmacy practice and provides students with foundational knowledge and skills to comply with state and federal regulations. Emphasis will be on regulations from the Food and Drug Administration, Drug Enforcement Administration, and Oregon Board of Pharmacy.
PHAR 729. PRINCIPLES OF EVIDENCE-

## BASED MEDICINE I: INFORMATION SCIENCE

(3). Students will learn to identify appropriate
information resources and will systematically collect, arrange, and analyze pertinent information related to a particular patient or drug product problem. PREREQS: First-year standing in the PharmD program.
PHAR 733. PHARMACEUTICS I (3). Students develop an in-depth understanding of drug dosage formulation concepts to optimize drug therapy. Approved for use on a graduate program of study. PREREQS: BB 490 and PHAR 735 and first-year standing in PharmD program.
PHAR 734. PHARMACEUTICS II (3).
Preformulation and formulation factors affecting the development, production and use of pharmaceutical dosage forms, including ingredients in, and physical, chemical, and biological properties affecting storage, stability, and handling of dosage forms. Lec/lab. Approved for use on a graduate program of study.
PREREQS: (PHAR 733 and PHAR 735)
PHAR 735. FOUNDATIONS OF DRUG ACTION I
(3). Introductory course into actions of chemicals on physiological systems. Concepts encompass drug absorption and distribution, drug design and characterization of drug interactions with specialized cellular components, drug activation of biological response via biochemical or molecular transduction mechanisms, drug-induced toxicities and drug biotransformation or excretion. Approved for use on a graduate program of study. PREREQS: First-year standing in the PharmD program.

PHAR 736. FOUNDATIONS II: AUTONOMIC DRUG ACTIONS (3). Drug actions in the autonomic nervous system (ANS) provide a template for understanding drug actions throughout biological systems. Provides a complete consideration of pharmacologic and medicinal chemistry principles as they relate to drug interactions with the ANS. Treatment options for selected diseases that respond to drugs acting on the ANS are also addressed. PREREQS: PHAR 729 and PHAR 735. COREQS: BB 491.

## PHAR 737. FOUNDATIONS OF DRUG

ACTION II (3). Introductory course presenting actions of chemicals on physiological systems. Concepts encompass drug activation of biological response via biochemical or molecular transduction mechanisms, pharmacogenetics and pharmacogenomics, and drug-induced toxicities. Approved for graduate credit. PREREQS: PHAR 735 and PharmD program admission
PHAR 738. HEALTHCARE SYSTEMS I (3). Examination of the U.S. healthcare industry and how it relates to pharmacy. Emphasis is given to changing relationships between healthcare systems, patients, providers of care, hospitals, insurers, employers and the government. PREREQS: PHAR 707 and PHAR 729.

PHAR 739. HEALTHCARE SYSTEMS II (2). Examination of the U.S. healthcare industry and the public healthcare system, as they relate to pharmacy. Emphasis is given to changing relationships between healthcare systems, patients, providers of care, hospitals, insurers, employers and the government. PREREQS: PHAR 728 and PHAR 738
PHAR 740. PHARMACY PRACTICE IV (3). Basic physical assessment skills and identification of therapeutic endpoints and monitoring parameters for drugs presented in the medicinal chemistry/ pharmacology sequence. Students will gain experience in basic physical assessment skills, interviewing skills, history taking, organizing pharmacy notes, and documenting information Lec/lab. PREREQS: PHAR 722 and PHAR 725 and PHAR 729 and PHAR 734 and PHAR 735. COREQS: PHAR 743 and PHAR 752
PHAR 741. PHARMACY PRACTICE V (3). Basic physical assessment skills and identification of therapeutic endpoints and monitoring parameters for drugs presented in the medicinal chemistry/ pharmacology sequence. Students will gain experience in basic physical assessment skills, interviewing skills, history taking, organizing pharmacy notes, and documenting information Lec/lab. PREREQS: PHAR 740. COREQS: PHAR 744 and PHAR 753

PHAR 742. PHARMACY PRACTICE VI (3). Basic physical assessment skills and identification of therapeutic endpoints and monitoring parameters for drugs presented in the medicinal chemistry/ pharmacology sequence. Students will gain experience in basic physical assessment skills, interviewing skills, history taking, organizing pharmacy notes, and documenting information. Lec/lab. PREREQS: PHAR 741. COREQS: PHAR 745 and PHAR 754

## PHAR 743. INTRODUCTORY PRACTICE

 EXPERIENCES: COMMUNITY CARE II (2). Students are assigned to community, institutional and ambulatory care pharmacy settings, and experiences emphasize topics and communication methods covered in the corresponding pharmacy practice course. Graded P/N. PREREQS: Oregon pharmacy intern license required. COREQS: PHAR 740, PHAR 752
## PHAR 744. INTRODUCTORY PRACTICE

EXPERIENCES: AMBULATORY CARE I (2).
Students are assigned to institutional or ambulatory care pharmacy settings, and experiences emphasize topics and communication methods covered in the corresponding pharmacy practice course. Graded P/N. PREREQS: Oregon pharmacy intern license required. COREQS: PHAR 741 and PHAR 753

PHAR 745. INTRODUCTORY PRACTICE EXPERIENCES: AMBULATORY CARE II (2).
Students are assigned to institutional or ambulatory care pharmacy settings, and experiences emphasize topics and communication methods covered in the corresponding pharmacy practice course. Graded P/N. PREREQS: Oregon pharmacy intern license required. COREQS: PHAR 742 and PHAR 754.
PHAR 746. PHARMACY MANAGEMENT (3). Concepts, principles and fundamentals of pharmacy financial and personnel management. Approved for use on a graduate program of study.

PHAR 747. INFECTIOUS DISEASES AND
THEIR TREATMENTS (3). Introduction to infectious disease processes and antimicrobial agents, including general clinical microbiology, and structure and mechanism of action of anti-bacterials, anti-virals, anti-fungals, and anti-parasitic agents. PREREQS: Upper-level biochemistry and PharmD program admission

## PHAR 748. DRUG ACTIONS IN IMMUNOLOGY

 AND INFLAMMATION (3). Review of foundational concepts in immunology, inflammation and tissue repair; and modification of these processes therapeutically through an understanding and application of anti-inflammatory agents and immune system modulators. PREREQS: PharmD program admission
## PHAR 750. PHARMACOKINETICS

BIOPHARMACEUTICS (4). Pharmacokinetics and bioavailability of drugs in clinical care, including changing disease states. Approved for use on a graduate program of study. PREREQS: PHAR 734 and PHAR 735 and/or graduate standing in Pharmaceutical Sciences. COREQS: PHAR 752
PHAR 751. BIOPHARMACEUTICS (3).
Preformulation and formulation factors affecting physiological outcomes in terms of bioavailability and drug product selection. Approved for use on a graduate program of study. PREREQS: PHAR 734. COREQS: PHAR 753

PHAR 752. INTEGRATED DRUG STRUCTURE, ACTION, AND THERAPEUTICS I (7). Drug therapy of central nervous system disorders; molecular, cellular and physiologic basis of drug action; chemical and physical properties affecting drug metabolism, action and toxicities; treatment options; patient and disease-specific therapeutic considerations. Approved for use on a graduate program of study. PREREQS: Second-year standing in the PharmD program.

PHAR 753. INTEGRATED DRUG STRUCTURE, ACTION AND THERAPEUTICS II (7). Pulmonary, renal, gastrointestinal, and cardiovascular disorders. Drug therapy of pulmonary and cardiovascular disorders; molecular, cellular and physiologic basis of drug action; chemical and physical properties affecting drug metabolism, action and toxicities; treatment options; patient and disease-specific therapeutic considerations. Approved for use on a graduate program of study. PREREQS: Second-year standing in the PharmD program. PHAR 752

PHAR 754. INTEGRATED DRUG STRUCTURE, ACTION AND THERAPEUTICS III (6). Drug therapy of endocrine disorders, and men's and women's health issues; molecular, cellular and physiologic basis of drug action; chemical and physical properties affecting drug metabolism, action and toxicities; treatment options; patient and disease-specific therapeutic considerations. Approved for use on a graduate program of study. PREREQS: PHAR 753 and second-year standing in the PharmD program.
PHAR 759. INTRODUCTION TO
PATHOPHYSIOLOGY AND THERAPEUTICS (3). Introduction to the pathophysiologic basis of disease and drug therapy management. PREREQS: Second year standing in the PharmD program. COREQS: PHAR 754.

PHAR 760. TRANSITIONAL CLERKSHIP (2). Supervised introductory professional education in a variety of health care settings. Emphasis will be on gaining familiarity with the provision of clinical pharmacy services and the patients, health care providers, and administrative procedures of the clinical site. Graded P/N. This course is repeatable for a maximum of 6 credits. PREREQS: Oregon pharmacy intern license required. COREQS: PHAR 764 and PHAR 765 and PHAR 766
PHAR 761. ADVANCED INTEGRATED DRUG THERAPY I (8). Pathophysiologic basis of disease and drug therapy management. PREREQS: Thirdyear standing in the PharmD program. COREQS: PHAR 764 and PHAR 770

## PHAR 762. ADVANCED INTEGRATED DRUG

THERAPY II (8). Pathophysiologic basis
of disease and drug therapy management
PREREQS: Third-year standing in the PharmD program. COREQS: PHAR 764 and PHAR 770

PHAR 763. PATHOPHYSIOLOGY AND
THERAPEUTICS III (7). Pathophysiologic basis of disease and drug therapy management. PREREQS: PHAR 762. COREQS: PHAR 766 and PHAR 774
PHAR 764. PHARMACY PRACTICE VII (3).
Development of skills for advanced drug therapy problem identification, assessment, and plan resolution for patients with diseases discussed in PHAR 761, PHAR 762, PHAR 763. Students will integrate interviewing, physical assessment, and problem-solving to identify, assess, and resolve drug therapy problems, and communicate findings in SOAP notes, care plans, and case presentations. PREREQS: PHAR 740 and PHAR 741 and PHAR 742 and third-year standing in the PharmD program. COREQS: PHAR 760 and PHAR 761 and PHAR 770
PHAR 765. PHARMACY PRACTICE VIII (3). Development of skills for advanced drug therapy problem identification, assessment, and plan resolution for patients with diseases discussed in PHAR 761, PHAR 762, PHAR 763. Students will integrate interviewing, physical assessment, and problem-solving to identify, assess, and resolve drug therapy problems, and communicate findings in SOAP notes, care plans, and case presentations. PREREQS: PHAR 761 and PHAR 764. COREQS: PHAR 760 and PHAR 762 and PHAR 771
PHAR 766. PHARMACY PRACTICE IX (3).
Development of skills for advanced drug therapy problem identification, assessment, and plan resolution for patients with diseases discussed in PHAR 761, PHAR 762, PHAR 763. Students will integrate interviewing, physical assessment, and problem-solving to identify, assess, and resolve drug therapy problems, and communicate findings in SOAP notes, care plans, and case presentations. Lec/lab/rec. PREREQS: PHAR 762 and PHAR 765. COREQS: PHAR 760 and PHAR 763 and PHAR 772
PHAR 767. PRE-APPE READINESS AND COMPLEX CASE ANALYSIS (3). Confidence and competence needed for advanced practice settings are enhanced utilizing a mixture of benchmark assessment tools and small case discussions of complex patient cases. The focus is to assure readiness to integrate into inter-professional collaborative health care settings and serve diverse patient populations Knowledge, skills, attitudes, and professional values are assessed and developed. Formative and summative feedback delivered through faculty, peer and self-evaluation help guide student preparation for advanced experiences and life-long learning. Graded P/N. PREREQS: PHAR 760 and PHAR 762 and PHAR 765 and PHAR 773
PHAR 768. APPLIED LAW AND ETHICS (1).
Student understanding of pharmacy law is assessed, and discussed in the context of pharmacists' ability to properly respond when legal concepts may not align with ethical decision making in a health profession. Students will apply a framework for ethical decision-making and
dentify personal strategies to maintain currency in pharmacy law and applied ethical decision making. PREREQS: PHAR 760 and PHAR 762 and PHAR 765 and PHAR 773

## PHAR 770. ADVANCED PHARMACOKINETICS

(4). A physiologic approach to understanding advanced pharmacokinetic principles. Approved for use on a graduate program of study. PREREQS: PHAR 750 and PHAR 751 and thirdyear standing in the PharmD program

## PHAR 773. EBM III: EVIDENCE SYNTHESIS

 AND DECISION ANALYSIS (3). Covers the principles required for evidence-based medicine, including interpreting and applying results from clinical, humanistic, and economic research to medical decision-making. Approved for use on a graduate program of study. PREREQS: PHAR 726 and PHAR 729 and third-year standing in the PharmD curriculum.
## PHAR 774. PRINCIPLES OF EVIDENCE-

 BASED MEDICINE IV: DRUG POLICY (3). This three-credit course will cover a variety of topics related to drug policy and drug use management. Population-based strategies to improve drug use will be emphasized along with developing an evidence-based process for evaluating new drugs. A major course project, evaluating a new drug, will focus on application of principles taught in this and previous courses. PREREQS: PHAR 773PHAR 775. PROFESSIONAL TRANSITIONS (1). Professional pharmacy students are directed in preparations for transition to postgraduate educational opportunities or entry-level pharmacist positions. Graded P/N. PREREQS: Fourth-year standing in the PharmD program.
PHAR 776. PHARMA-CSI (2). Application of PK, PD, and P'genomic concepts, principles, and equations in computer workshops to solve drug therapy misadventures. Approved for use on a graduate program of study. PREREQS: PHAR 770 ; third-year standing in the PharmD program or permission of instructor.
PHAR 777. ACUTE MEDICAL EMERGENCIES (2). Drug therapy management in the critically ill patient. Graded P/N. PREREQS: PHAR 762
PHAR 778. ADVANCED ADULT MEDICINE (2).
Adult medicine elective utilizes actual patient cases to enhance knowledge of pharmacy and the pharmacologic basis of therapeutics in the setting of adult medicine, emphasizing application or current guidelines and major clinical trials for commonly encountered disease states. Graded P/N. PREREQS: Third-year standing in PharmD program and PHAR 761 and PHAR 762 and PHAR 764 and PHAR 765

## PHAR 780. COMMUNITY PHARMACY

CLERKSHIP (8). Supervised advanced professional education in ambulatory care pharmacy practice environment. Emphasis is placed on the application of direct and indirect pharmaceutical patient care and direct interactions with other health care professionals. Students will evaluate, assess and monitor pharmacotherapy of acute and chronic diseases in addition to providing drug information. Graded $P / N$. This course is repeatable for a maximum of 32 credits. PREREQS: PHAR 760 and PHAR 763 and PHAR 766 and PHAR 772 and PHAR 774 and Oregon pharmacy intern license and current CPR certification and College of Pharmacy immunization documentation.

## PHAR 785. AMBULATORY PRIMARY CARE

 CLERKSHIP (8). Supervised advanced professional education in ambulatory care pharmacy practice environment. Emphasis is placed on the application of direct and indirect pharmaceutical patient care and direct interactions with other health care professionals. Students will evaluate, assess and monitor pharmacotherapy of acute and chronic diseases in addition to providing drug information to patients and health care professionals. Graded P/N. This course is repeatable for a maximum of 32 credits.PREREQS: PHAR 760 and PHAR 763 and PHAR 766 and PHAR 772 and PHAR 774 and Oregon pharmacy intern license and current CPR certification and College of Pharmacy immunization documentation.
PHAR 790. GENERAL INTERNAL MEDICINE CLERKSHIP (8). Supervised advanced professional education located in internal medicine inpatient pharmacy practice environment. Emphasis is placed on the application of biomedical and pharmaceutical sciences to direct and indirect pharmaceutical patient care and direct interactions with other health care professionals. Students will evaluate, assess, and monitor pharmacotherapy involved in a wide variety of acute and chronic diseases. In addition, students will provide drug information to other health care professionals and patients. Graded $\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 32 credits. PREREQS: PHAR 760 and PHAR 763 and PHAR 766 and PHAR 772 and PHAR 774 and Oregon pharmacy intern license and current CPR certification and College of Pharmacy immunization documentation.

## PHAR 792. HOSPITAL/HEALTH SYSTEMS

 PATIENT CARE CLERKSHIP (8). Supervised advanced professional education located in various hospital or health care systems patient care-oriented settings. Emphasis is placed on application of pharmaceutical sciences and pharmacotherapy to patient care. Graded P/N This course is repeatable for a maximum of 24 credits. PREREQS: Oregon Pharmacy Intern License and current CPR certification and fourth year standing in the pharmacy professional program and College of Pharmacy immunization documentation.
## PHAR 795. PATIENT CARE ELECTIVE

CLERKSHIP (8). Supervised advanced professional education located in various patient care-oriented settings. Emphasis is placed on the application of pharmaceutical sciences and pharmacotherapy to direct and indirect pharmaceutical care. Specialties include but are not limited to geriatrics, pediatrics, infectious disease, oncology, general patient care, nutrition support, nuclear pharmacy, home infusion, critical care, anticoagulation, pain management, etc. Graded $P / N$. This course is repeatable for a maximum of 24 credits. PREREQS: PHAR 760 and PHAR 763 and PHAR 766 and PHAR 772 and PHAR 774 and Oregon pharmacy intern license and current CPR certification and College of Pharmacy immunization documentation.
PHAR 797. ELECTIVE CLERKSHIP (8).
Supervised advanced professional education located in various pharmacy-oriented settings. Emphasis is placed on the application of pharmaceutical sciences and pharmacotherapy to a variety of environments involving pharmacy. Specialties include but are not limited to managed care, drug information, administration, pharmaceutical research, pharmaceutical industry professional pharmacy organizations, etc. Graded $\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 24 credits. PREREQS: PHAR 760 and PHAR 763 and PHAR 766 and PHAR 772 and PHAR 774 and Oregon pharmacy intern license and current CPR certification and College of Pharmacy immunization documentation.

## PHAR 798. PHARMACY HEALTH

ADMINISTRATION (8). Provides students the opportunity to integrate and apply leadership and business principles necessary to operate and manage a pharmacy business or department in a diverse organizational environment. This course is repeatable for a maximum of 16 credits. PREREQS: PHAR 760 and PHAR 763 and PHAR 766 and PHAR 772 and PHAR 774 and Oregon Pharmacy Intern License, current CPR certification, College of Pharmacy immunization documentation, reading and understanding the Advanced Experiential Manual.
PHAR 799. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

Lifelong health and well-being for every person, every family, every community.
nspired by our mission as a leading land grant university, we create synergy in teaching, research, and outreach to develop the next generation of globally minded public health and human sciences professionals. Through interdisciplinary research and innovative curricula, we advance knowledge, policies, and practices that improve population health in communities across Oregon and beyond.

The College of Public Health and Human Sciences offers a comprehensive array of undergraduate and graduate education programs under the public health umbrella.

Our graduates are employed in a wide variety of research, education, service, management, and leadership positions in business, government, industry, education, and agencies related to health, nutrition, education, community development, and family relationships.

The college's scholarly and creative work improves the lives of individuals, families, and communities. Reflecting the strength and diversity of our faculty and disciplines, this work includes laboratory-based investigations of nutrition and physiology.

Our outreach and engagement initiatives and programs serve individuals, families, professionals, and communities across the campus, Oregon, the nation, and the world. This outreach includes OSU Extension's Family and Community Health program, active continuing education initiatives ranging from credit and noncredit courses to full degrees, and service programs that serve OSU students, faculty, staff, as well as individuals and families.

## DEGREE PROGRAMS

Advanced degrees include the master of arts (MA), master of public health (MPH), the master of science (MS), and doctor of philosophy (PhD). The MS and PhD degrees are offered in units of the college. Most units also participate in the master of arts interdisciplinary studies (MAIS) graduate degree program.

## ADVISING

The Office of Academic Advising is a primary source of information for all College of Public Health and Human Sciences undergraduate students. Students receive accurate, thorough, and timely information regarding their degree requirements, academic progress, job opportunities, and campus activities. Professional advisors oversee the undergraduate students within the college. Faculty members also serve a vital role to undergraduates by providing professional and career advice. Faculty members often involve students in research and professional activities that create opportunities for leadership, personal growth, and discovery.

## INTERNSHIPS AND PRACTICUMS

To help prepare students in the College of Public Health and Human Sciences for careers, many of the degree programs include internships and/or practicum experiences as part of their academic programs. These opportunities provide students with invaluable work experience in their field of study and may lead to postgraduate employment. Faculty members help place students and assist in the structure of these experiences. Additional information is available at http://health. oregonstate.edu/internships.

## DOUBLE DEGREES

Undergraduates with majors in the College of Public Health and Human Sciences can earn a second degree in education, innovation management, international studies, or sustainability. See the College of Education, College of Business, International Programs or Department of Forest Ecosystems and Society sections of this catalog for more information.

## SCHOLARSHIPS

The College of Public Health and Human Sciences offers a variety of scholarships to deserving students. Many are reserved for students in designated majors or for first-year students. A list of scholarships and application forms are available from the college's website at http:// health.oregonstate.edu/students/current/ undergraduate/scholarships.

Additional scholarship information is also available at the OSU Office of Financial Aid and Scholarships.

## COLLEGE REQUIREMENTS

A grade of C - or higher is required for all courses in a student's undergraduate program of study.

- This includes all courses and associated prerequisite courses in a student's undergraduate program of study for a major, minor or certificate as listed in the online course catalog.
- Some programs have additional grade and/or GPA criteria, which must be met in addition to this grade policy.
- Baccalaureate core courses are not subject to this policy unless they serve as courses required in or prerequisites for a student's major, minor, or certificate.
Effective calendar year 2017-2018

## (June 2017-May 2018)

The College of Public Health and Human Sciences does not accept third-course attempts either at the university or transferred in from other institutions to meet individual course requirements within any major effective Fall term 2014.

- Third or subsequent attempts taken prior to Fall term 2014 may be considered to meet major program of study requirements. ${ }^{2}$
Footnote:
${ }^{2}$ The Exercise and Sport Science and Athletic Training majors stopped allowing third or subsequent course attempts effective Fall term 2013.

## FACULTY

Professors Brandt, Bray, Cardinal, Chi, Ho, Jump, Khanna, Traber, Turner, Yun Associate Professors Branscum, V. Bovbjerg, Carozza, Case, Cluskey, Crowell, Ebbeck, Gunter, M. Hoffman, Hannigan-Downs, Hord, Houseman, Iwaniec, John, Kile, Molitor, Pavol, Pollard (OSU-Cascades), Smiley, Smit, Veltri, S. Wong
Assistant Professors Bae, Bethel, M. Bovbjerg, Dallas, Garcia, Grutzmacher, Horner, Hystad, Johnson, Kim, Kincl, Logan, MacDonald, Newsom, Norcross, Odden, Robinson, Schuna, Takata, Tomayko, Wegis, Woekel, Wegis

Senior Instructors Dark, Hoisington,
Penry, Polizzi, Rudolph, Skoog, Su Instructors Ahern, Beamer, Carr, Chavez, Dodge-Vera, Fitch, Halverson, Hatfield, Hyde, Johnson, Kirk, Lyford, Maille, Marchant, Ostby, Roberson, Russell, Schrumpf, Silberstein, Steele, Streit, Todd, Witzke (OSU-Cascades)
Associate Professor (Senior
Research) Harper
Research Associates Kaiser, C. Wong
Faculty Research Assistant Olson
Professional Faculty Armington,
Bump, Gayler, Ibarra, Mills, Quinn, Renfro, Swanger, Tobey

Undergraduate Majors
Kinesiology (BS, CRED, HBS)

## Option

Pre-therapy and Allied Health
Nutrition (BS, CRED, HBS)

## Options

Pre-Dietetics
Dietetics
Nutrition and Health Sciences
Nutrition and Foodservice Systems

## Undergraduate Minors

Environmental and Occupational Health

## Exercise Physiology

Nutrition
(Please check with the Office of Academic Advising and Student Support in 106 Women's Building for minor requirements.)

Graduate Majors
Kinesiology (MAIS, MS, PhD)
Graduate Option
Adapted Physical Activity
Graduate Areas of Concentration
Biophysical Kinesiology
Psychosocial Kinesiology
Nutrition (MAIS, MS, PhD)
Graduate Area of Concentration Nutrition
Public Health (MPH, PhD)

## Graduate Options

Biostatistics
Environmental and Occupational Health
Epidemiology
Global Health
Health Management and Policy
Health Promotion and Health Behavior
Graduate Areas of Concentration Biostatistics (MPH only)
Environmental and Occupational Health (MPH, PhD)
Epidemiology (MPH, PhD)
Health Management and Policy (MPH only)
Health Policy (PhD only)
Health Promotion and Health Behavior (MPH, PhD)
International Health (MPH only)

## Graduate Minors

Kinesiology
Nutrition
Public Health

## Graduate Certificate

Public Health

The School of Biological and Population Health Sciences comprises the fields of kinesiology, nutrition, and the public health disciplines of biostatistics, epidemiology, global health, and environmental and occupational health. These disciplinary approaches link individual biology and behavior to population and environmental health to better understand how environmental and behavioral factors, including food and nutrition, physical activity, water, pollution, carcinogens, biohazards, etc., influence the development and progression of a biological disease. Applying the quantitative methods of epidemiology and biostatistics allows a better understanding of the causes of population-level disease as well as methods of intervention and prevention.

The School of Biological and Population Health Sciences houses the undergraduate degrees of Athletic Training, Kinesiology, and Nutrition. Nationally recognized programs prepare students for careers as athletic trainers, dietitians, medical and allied health science professionals, teachers in physical education, nutritionists, researchers, personal trainers, and fitness and nutrition professionals. The majors and their options are described below.

The Bachelor of Science degree in Public Health is offered through the School of Social and Behavioral Health Sciences, which can be found at http://health. oregonstate.edu/sbhs.

The School of Biological and Population Health Sciences houses the Masters in Public Health (MPH) options of biostatistics, epidemiology, global health, and environmental and occupational health. For more information about the MPH program and its options, see http:// health.oregonstate.edu/degrees/graduate/ public-health/mph. Environment, Safety and Health is also an area of concentration within the Public Health doctoral program (see http://health.oregonstate. edu/degrees/graduate/public-health/ phd-program).

Master's and doctoral degrees are available in Nutrition (see http://health. oregonstate.edu/degrees/graduate/ nutrition) and Kinesiology (see http:// health.oregonstate.edu/degrees/graduate/ kinesiology).

## UNDERGRADUATE MAJORS

Kinesiology Major and Option
The Kinesiology major prepares students
for careers in physical activity and fitness/wellness such as organizing, directing or managing physical fitness programs; personal trainer; fitness instructor; exercise physiologist; strength and fitness coach; and fitness entrepreneur. The degree can also serve as preparation for applications to a master's level physical education teacher education program, medical school, a professional program in the allied health professions (e.g. physical or occupational therapy, nursing, physician assistant) or other graduate education. Students interested in entry into professional schools of physical or occupational therapy, nursing, medical school, or physicians' assistant should take the Pre-Therapy and Allied Health option of the Kinesiology major, which has entry standards that must be met after completion of 90 credits.

## Pre-Therapy and Allied Health Option

Students who choose this option prepare for admission into medical school or a professional training program in the allied health professions. Graduates become physical therapists, occupational therapists, physicians, physician assistants, or nurses.

## Nutrition Major and Options

 Dietetics OptionDietitians provide guidance to the public regarding nutrition, diet and their relationship to disease. The Dietetics option at OSU is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics and prepares students to become Registered Dietitians (RD). This option provides the course work and preparation to enter a supervised dietetic internship, pass the Registered Dietitian Exam and become a leader in the profession. Graduates from OSU's program consistently exceed the national average for placement into accredited dietetic internships and for passing the RD Exam the first time.
Nutrition and Foodservice Systems Option This option prepares graduates for professional careers directing foodservice operations that focus on serving healthy menu options and using local ingredients. Foodservice opportunities exist in both non-commercial operations including schools, universities, and healthcare, as well as others in the retail environment; all are striving to meet the consumer demand for healthier food options. This program integrates course work taken at OSU and the Culinary Arts program at Linn-Benton Community College.
Nutrition and Health Sciences Option This option is designed for students who want to focus on the scientific basis of nutrition for careers in medicine and the health sciences or in nutrition science
research. Tracks within the option allow students to specifically focus and prepare for careers in medicine and the allied health sciences or for academia and/ or health-related research. Professionals trained in nutrition science have many career options due to the growth and aging of our population, the focus on prevention of obesity and other chronic diseases, and a growing emphasis on health, nutrition, and wellness.

## UNDERGRADUATE STUDIES

## Preparation

Entering first-year and undergraduate transfer students should prepare to enter the College of Public Health and Human Sciences with a strong foundation in the sciences, balanced with good writing and critical thinking skills. Students transferring from other institutions are best prepared for the college curriculum if they have taken chemistry or biology or both.

## Admission

Any student who has met the admission requirements of Oregon State University may be admitted to a nutrition or exercise and sport science program of study. To transfer from another OSU college or school, the student must have the approval of the head advisor of the College of Public Health and Human Sciences.

## PHYSICAL ACTIVITY COURSES

The Physical Activity Course (PAC) Program is an elective, academic-credit program designed to provide OSU students with the opportunity to learn and engage in a wide variety of physical activities with the goal of promoting health and lifelong participation in physical activity. Students may take any number of PAC credits, but only 11 credits may be counted toward graduation. Successful completion of any PAC section will satisfy the one-credit laboratory requirement of the fitness category of the baccalaureate core. Courses may be repeated for credit and a grade. There is a PAC fee for each class, and some courses have additional fees. All fees are listed in the online Schedule of Classes. Student accounts are billed upon registration. Refunds of the PAC fee are automatic upon dropping or withdrawing from the course and follow university policies as listed in the OSU General Catalog. Some additional fees are refunded through the PAC Office (Langton 123). Social dance classes are listed with a men's and a women's section in order help balance the number of students in the traditional lead-and-follow roles within the same class.

## Retention

Students are expected to make satisfactory progress toward a degree. Satisfactory progress includes, but is not limited to: 1. Maintaining a minimum Nutrition
and Exercise Sciences option program GPA of 2.25 .
2. Maintaining a minimum GPA of 2.50 in all NUTR-prefixed courses.

## UNDERGRADUATE MAJORS WITH OPTIONS

## KINESIOLOGY (BS, CRED, HBS)

Available on Corvallis and OSUCascades campuses.
The Kinesiology major prepares students for careers in physical activity and fitness/wellness such as organizing, directing or managing physical fitness programs; personal trainer; fitness instructor; exercise physiologist; strength and fitness coach; and fitness entrepreneur. The degree can also serve as preparation for applications to a master's level physical education teacher education program, medical school, a professional program in the allied health professions (e.g., physical or occupational therapy, nursing, physician assistant) or other graduate education. Students interested in entry into professional schools of physical or occupational therapy, nursing, medical school, or physicians assistant should take the Pre-Therapy and Allied Health option of the Kinesiology major, which has entry standards that must be met after completion of 90 credits.

## Baccalaureate Core Requirements

 (48)Major Requirements (90)
Kinesiology Core (25)
KIN 131. Introduction to Kinesiology (1)
KIN 311. Motor Behavior (4)
KIN 312. *Sociocultural Dimensions of
Physical Activity (3)
KIN 314. Introduction to Adapted Physical Activity (3)
KIN 321. Biomechanics of Human Movement (4)
KIN 324. Exercise Physiology (4)
KIN 370. Psychology of Sport and Physical Activity (3)
KIN 481. ^Analysis of Critical Issues in Kinesiology (3)
Required Supporting Courses (41)
BI 231, BI 232, BI 233. Introduction to
Human Anatomy and Physiology $(3,3,3)$ and BI 241, BI 242, BI 243. Introduction to Human Anatomy and Physiology Laboratory ( $2,2,2$ )
OR BI 331, BI 332, BI 333. Advanced Human Anatomy and Physiology $(3,3,3)$ and BI 341, BI 342, BI 343. Advanced Human Anatomy and Physiology Laboratory ( $2,2,2$ )
CH 121. General Chemistry (5) or CH 231. *General Chemistry (4) and CH 261. *Laboratory for Chemistry 231 (1)

## KIN Courses Beyond the Core (minimum 24 credits)

These KIN courses are chosen to meet individual students' educational goals in preparation for their chosen careers. Must take at least 24 total credits of 300and 400-level KIN courses not included in the Kinesiology Core, and among these credits:

1. Must take at least 3 KIN Lab courses (KIN course with a lab component; credits per course may vary), and
2. Must take at least 3 credits of Experiential Learning from the following courses: KIN 301, KIN 306, KIN 401, KIN 406, KIN 410, and KIN practicum courses; or credits earned in research, study abroad, or servicelearning experiences. No more than 9 Experiential Learning credits will count toward the 24 total credits required.

## Total Credits Required=180

## Minimum Grade Policy:

A grade of C - or better is required in all courses fulfilling Kinesiology major requirements (Kinesiology Core, Required Supporting Courses, and KIN Courses Beyond the Core).

## Repeated Courses Policy:

The university's repeated courses policy will be followed (AR 20). Kinesiology students are allowed at most two attempts to meet individual course degree requirements. Students who do not receive the minimum grade required for a course after two attempts (including courses transferred from other institutions) will not be allowed to have grades earned in subsequent attempts count toward meeting Kinesiology degree requirements. As a result, such students may not be able to complete a degree and/or an option in Kinesiology.

Pre-Therapy and Allied Health is an option with admission standards that may be added to the major:

Students may apply for admission to the PTAH option after completion of 90 credits. Requirements for admission can be found under the catalog listing for the PTAH option.

## OPTIONS

## PRE-THERAPY AND ALLIED HEALTH OPTION

This program is designed for students interested in pursuing admission to medical school or a professional program in the allied health professions, such as
athletic training, nursing, occupational therapy, physical therapy, or physician assistant.

The Pre-Therapy and Allied Health option requires the completion of one of six professional tracks:

1. Pre-Athletic Training
2. Pre-Medicine
3. Pre-Nursing
4. Pre-Occupational Therapy
5. Pre-Physical Therapy
6. Pre-Physician Assistant

Pre-Therapy and Allied Health is an undergraduate option that may be added to the Kinesiology major once the following admission standards have been met: Students may apply for admission to the PTAH option after completion of 90 credits. Requirements for admission include:

1. Cumulative GPA of 3.0 and,
2. A grade of "C" or better and average GPA of 2.7 or higher in the anatomy and physiology series (BI 231-BI 233 and BI 241-BI 243; or BI 331-BI 333 and BI 341-BI 343; Z 331-Z 333 and Z 341-Z 343) The "Z" courses have terminated but will still be accepted if they were taken.
Pre-Therapy and Allied Health
Option Required Courses (28-33)
KIN 132. Introduction to the Allied Health Professions (1)
or BI 109. Health Professions: Medical (1) [for Pre-Med]
KIN 325. Fitness Assessment and Exercise Prescription (2)
KIN 343. Pre-Therapy/Allied Health Seminar (1)

PHAR 210. Terminology of the Health Sciences (2)
PSY 201, PSY 202. *General Psychology $(3,3)$
SOC 204. *Introduction to Sociology (3)
ST 351. Introduction to Statistical Methods (4)
or ST 201. Principles of Statistics (4)
Choose four of the following KIN supporting courses:
KIN 394. Professional Activities: Resistance
Training Program Design (2)
KIN 395. Professional Activities: Group Fitness (2)
KIN 396. Professional Activities: Aquatics (2)
KIN 423. Qualitative Movement Analysis (3)
KIN 425. Anatomical Kinesiology (4)
(Required for Pre-Athletic Training)
KIN 434. Applied Muscle Physiology (3)
KIN 437. Physical Activity, Aging, and Chronic Disease (4)
KIN 444. Advance Adapted Physical Activity (3)

KIN 483. Tissue Injury and Repair (3)
(Required for Pre-Athletic Training)
Note: 300- and 400-level KIN courses can count toward fulfilling the KIN
Courses Beyond the Core requirements in the Kinesiology major.

Additional required science and social science courses for the following pre-professional tracks are listed below: 1. Pre-Athletic Training
2. Pre-Medicine
3. Pre-Nursing
4. Pre-Occupational Therapy
5. Pre-Physical Therapy
6. Pre-Physician Assistant.

## 1. Pre-Athletic Training Track

## Courses (37 credits)

BI 103. *General Biology (4)
COMM 326. Intercultural Communication (3)

H225. Social and Individual Determinants (3)

KIN 160. Introduction to Injury
Management for the Physically Active (3)

## NUTRITION AND FOODSERVICE SYSTEMS OPTION

The Nutrition and Foodservice Systems option prepares graduates for professional careers directing foodservice operations that focus on serving healthy menu options and using local ingredients. Foodservice opportunities exist in both non-commercial operations including schools, universities, and healthcare as well as others in the retail environment; all are striving to meet the consumer demand for healthier food options. This program integrates course work taken at OSU and the Culinary Arts program at Linn-Benton Community College.

Please contact Dr. Mary M. Cluskey, 541-737-0960, cluskeym@oregonstate. edu for more information about the Nutrition and Foodservice Systems option.

## NUTRITION AND HEALTH

## SCIENCES OPTION

The Nutrition and Health Sciences option is designed for students who want to focus on the scientific basis of nutrition
for careers in medicine and the health sciences or in nutrition science research. Tracks within the option allow students to specifically focus and prepare for careers in medicine and the allied health sciences or for academia and/or healthrelated research. Professionals trained in nutrition science have many career options due to the growth and aging of our population, the focus on prevention of obesity and other chronic diseases, and a growing emphasis on health, nutrition, and wellness.

## UNDERGRADUATE MINORS

## ENVIRONMENTAL AND

OCCUPATIONAL HEALTH MINOR
Provides undergraduate students with academic and professional experience that will enable them to understand the impact of environmental and occupational hazards on human health and society, as well as developing effective interventions that will control and prevent exposure to hazards. This knowledge will enable them to apply scientific principles and management strategies in the fields of environmental protection, occupational health and safety, and public health.

## GRADUATE MAJORS

## ATHLETIC TRAINING (MATRN)

The Athletic Training graduate major is a two-year program leading to the Master of Athletic Training degree, MATRN.

Upon graduation, students are eligible to sit for the Board of Certification examination. Successful completion of this examination is the prerequisite to obtaining registration as an Athletic Trainer in the state of Oregon.

The clinical education of students in the athletic training program primarily takes place during rotations with various OSU intercollegiate athletic teams, some of the most culturally diverse groups on the OSU campus. This experience helps students develop sensitivity to varying cultures, strategies for overcoming potential cultural barriers to communication, and interpersonal skills that serve them well outside the campus community.

## Athletic Training Program

## Admission Criteria

- Baccalaureate degree program from
an accredited university prior to beginning the program.
- Cumulative GPA of 3.0 from the undergraduate degree.
- Three letters of recommendation, with at least one from a certified athletic trainer (ATC).
- Personal statement.
- Meet program technical standards with or without accommodations as required by Commission on Accreditation of Athletic Training Education (CAATE) accreditation standards 64 and 65.
- Minimum of 50 hours of work, volunteering and/or observation under an ATC within two years prior to program application. Documentation of clinical hours must be verifiable on the official program application. Note: Hours obtained under the supervision of a physical therapist do not count unless the individual is dual credentialed as an ATC/PT.
- Graduate Record Exam (GRE) taken within the last five years.
- Satisfactory completion (C- or better with a cumulative GPA of 3.0) in the following prerequisite course work (course syllabi must be submitted to the program director with the application):

## Prerequisite Course Work

## Biology, 12 credits

- Human Anatomy-Human anatomy with the study of skeletons and models.
- Human Physiology-Human physiology with emphasis on homeostatic mechanisms.

## Exercise Science, 12 credits

- Exercise Physiology-Understanding of factors affecting the physiological function of the body related to exercise and physical performance.
- Biomechanics/Anatomical Kinesiology—Anatomical and mechanical bases of physical activity with emphasis on the analysis of sport and exercise skills.
- Nutrition-Basic principles of human nutrition with emphasis on the nutrients and factors that affect their utilization in the human body.

## Chemistry, 12 credits

- General Chemistry-Completion of introductory general chemistry series.

## Athletic Training Graduate Courses

## (98 credits)

KIN 509. Practicum (19)
KIN 510. Professional Internship: Physical
Education (26)
KIN 511. Introduction to Athletic Training (4)

KIN 520. Orthopedic Assessment of Upper Extremity Injuries (4)
KIN 521. Orthopedic Assessment of Lower Extremity Injuries (4)
KIN 522. Orthopedic Assessment of the

Spine (4)
KIN 561. Psychosocial Factors in Physical Activity (3)
KIN 565. Emergency Management of Sports Trauma (3)
KIN 566. General Medical Assessment (3)
KIN 567. Pharmacology in Athletic Training (3)

KIN 568. Athletic Training Program Management (3)
KIN 569. Evidence-based Practice (3)
KIN 584. Therapeutic Modalities (4)
KIN 585. Upper Extremity Therapeutic Exercise (4)
KIN 586. Lower Extremity Therapeutic Exercise (4)
H 523. Foundations of Public Health (4)
NUTR 535. Nutrition and Exercise:
Macronutrients and Energy Metabolism (3)

## Major Code: $\mathbf{2 4 4 0}$

## KINESIOLOGY (MS, PhD, MAIS)

Graduate Areas of Concentration
Biophysical kinesiology, psychosocial kinesiology
The graduate program in kinesiology offers courses and learning experiences in the theoretical and practical study of physical activity (including exercise and sport) for the promotion of optimal health and disease prevention.

Graduate fields in kinesiology include biophysical kinesiology and psychosocial kinesiology.

The MS degree can be completed via a thesis or project. The PhD degree requires the completion of a dissertation. For further information about the graduate program in Kinesiology, visit the school's website at http://health.oregonstate.edu/ bphs.
Major Code: $\mathbf{7 7 0 0}$

## OPTIONS

## ADAPTED PHYSICAL ACTIVITY OPTION

This graduate option is focused on the development of leadership personnel in the area of disability and will build competencies to serve individuals with disabilities as effective teachers, scholars, and advocates.

## Prerequisite Course

KIN 544. Advanced Adapted Physical
Activity (3) or equivalent courses
A minimum of 9 credits from the following classes:
KIN 547. Inclusion in Physical Activity (3)
KIN 548. Assessment and Programming for
Special Populations (3)
KIN 549. Physical Activity for Persons with Severe Disabilities (3)
KIN 550. Health Promotion for People with Disabilities (3)
KIN 647. Current Topics and Research in Adapted Physical Activity (3)
KIN 610. Professional Internship: Adapted
Physical Activity (1,1,1)
Note: This requires graduate students to
be in residence for 1 year.
The major faculty advisor(s) and a faculty member from the Adapted Physical Activity program must approve the option in Adapted Physical Activity.

## Option Code: 7720

## NUTRITION (MS, PhD, MAIS)

## Graduate Areas of Concentration Nutrition

The School of Biological and Population Health Sciences offers graduate programs leading to the Master of Science (MS) and Doctor of Philosophy (PhD) degrees in nutrition. The program of study integrates multiple disciplines relevant to nutrition, including molecular, biochemical, physiological and clinical nutrition. The overall goal of the program is for the student to gain a "cutting-edge" understanding of contemporary issues in nutrition and apply these concepts to human health.

Research in nutrition is focused on human nutrition and nutrient effects on physiological systems impacting human health. Our research programs seek the discovery of new knowledge, information, techniques and/or interventions that can promote the optimal health of individuals and families in Oregon, nationally, and worldwide. A thesis based on original research is required for the MS and PhD degree programs.

Since nutrition builds upon the natural sciences, entering graduate students should have a strong background in chemistry, physiology, nutrition, statistics, and biochemistry.
Depending upon their concentration, graduates are prepared for positions in academic research and teaching or research and development in industry or government.

Information on the nutrition graduate program graduate fellowships and assistantships is available at the website: http://health.oregonstate.edu/degrees/ graduate/nutrition, click on the "Application and Admission Requirements" link.

For additional information about the college and school, visit the website at http://health.oregonstate.edu/.

## Minor Code: 7710

## NUTRITION GRADUATE MINOR

For more details, see the school advisor.

## Minor Code: 4660

■ PUBLIC HEALTH COURSES
H 100. INTRODUCTION TO PUBLIC HEALTH (4).
A basic overview of public health. Uses a mix of lectures, guest speakers, classroom activities and
homework to help students understand the role of public health in eliminating health disparities, understanding epidemics, and setting policy.
H 100H. INTRODUCTION TO PUBLIC HEALTH (4). A basic overview of public health. Uses a mix of lectures, guest speakers, classroom activities and homework to help students understand the role of public health in eliminating health disparities, understanding epidemics, and setting policy. PREREQS: Honors College approval required.
H 199. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 16 credits.
H 210. *INTRODUCTION TO THE HEALTH CARE
SYSTEM (3). Provides tools to understand and critically assess the health care delivery system, its components, and the challenges created by its structure. The health care system will be considered from the perspective of several main players [e.g., patients, hospitals, doctors, health plans]. (Bacc Core Course)
H 220. INTRODUCTION TO HEALTH DATA
ANALYSIS (3). Introduction to the application of biostatistics and probability to the health sciences. Topics include quantitative analysis and inference, statistical methods in the biosciences, and quantitative study to evaluate and control health problems. PREREQS: MTH 105 or MTH 111 or higher mathematics.
H 225. *SOCIAL AND INDIVIDUAL HEALTH DETERMINANTS (4). Overview of the macro (social/system/environmental) and micro (individual) contributors to premature disease, disability and population health. Selected behavioral theories supporting health risks and strategies for the prevention of premature disease/ disability and the promotion of health. (Bacc Core Course)
H 250. INTRODUCTION TO HEALTH CARE MANAGEMENT (3). Participants will learn key principles, practices and personalities of health care management. The content is broadly applicable to health care enterprises of every kind: public health organizations, physician practices and clinics, hospitals and health systems, agencies and service organizations, for-profit firms, not-for-profit enterprises, etc. PREREQS: H 210* [C-]
H 309. PRACTICUM IN HEALTH CARE
SERVICES (3-6). Supervised work experience in a health care service setting or health-related agency or program. Weekly progress reports and post-experience summary report and evaluation will be expected. Preplanned with instructor approval. Open to health care administration majors. Graded P/N. This course is repeatable for a maximum of 12 credits. PREREQS: Junior standing. Instructor consent required.
H 310. HEALTH FIELD EXPERIENCES (3-6). Introductory field experience in a health or health-related worksite. Graded P/N. This course is repeatable for a maximum of 12 credits. PREREQS: H 210 [C-] and junior standing.

## H 312. *HIV/AIDS AND STIS IN MODERN

SOCIETY (3). Fundamental principles relating to etiology, nature, prevention, and control of AIDS and other sexually transmitted diseases in contemporary society; emphasis on social, psychological, legal, economic, and ethical issues surrounding these diseases. (Bacc Core Course)
H 319. INTRODUCTION TO HEALTH POLICY (3). Describe the policy development process, including problem conceptualization, agenda setting, role of interest groups and public opinion, analysis of alternatives and selection of policy alternative. PREREQS: H 210 [C-]
H 320. INTRODUCTION TO HUMAN DISEASE
(3). Fundamental principles relating to etiology, nature, prevention, and control of communicable and noncommunicable diseases in human populations. Special emphasis on disease prevention and health promotion in the high risk

## diseases of modern, industrialized society.

H 333. *GLOBAL PUBLIC HEALTH (3).
Introduction to the field of global health, its history, methods, and key principle; understanding global health inequities through case studies; overview of major global health prevention programs. (Bacc Core Course)
H 344. FOUNDATIONS OF ENVIRONMENTAL
HEALTH (3). Introductory course examining environmentally-linked disease, and health effects associated with toxic substances, food quality, pesticides, air, water, and noise pollution, and solid/hazardous wastes.
H 349. PEER HELPER SKILLS DEVELOPMENT
(3). Prepares the student for an active role as a peer helper in alcohol and drug abuse prevention and health education. Course work will include: drug, alcohol, addiction and other related health issues, basic listening and communication skills, conflict resolution, crisis recognition and referral. A major component will be affective learning situations designed to promote self-awareness and personal growth.

## H 364. DRUGS, SOCIETY AND HUMAN

BEHAVIOR (3). Drug use and abuse; theories of addiction; basic principles of drug action regarding the use of sedative and stimulative compounds; alcohol; opiates; hallucinogens; designer drugs; cocaine; and over-the-counter products. Particular emphasis on the role of the individual,s value orientation, decision-making, and selfresponsibility in treatment and educational approaches to prevention. PREREQS: (PSY 201 [C-] or PSY 202 [C-])
H 364H. DRUGS, SOCIETY AND HUMAN
BEHAVIOR (3). Drug use and abuse; theories of addiction; basic principles of drug action regarding the use of sedative and stimulative compounds; alcohol; opiates; hallucinogens; designer drugs; cocaine; and over-the-counter products. Particular emphasis on the role of the individual's value orientation. PREREQS: (PSY 201 [C-] or PSY 202 [C-] ) and Honors College approval required.
H 385. SAFETY AND HEALTH STANDARDS
AND LAWS (3). Emphasis on the Occupational Safety and Health Act; study includes the scope and duties under the act, enforcement, and adjudication procedures and OSHA litigation; components of Oregon-OSHA.
H 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
H 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
H 401. RESEARCH AND SCHOLARSHIP (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Instructor's consent required.

## H 402. INDEPENDENT STUDY (1-16). This

 course is repeatable for a maximum of 16 credits.H 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Instructor's consent required.
H 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Instructor's consent required.
H 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
PREREQS: Instructor's consent required.
H 407. SEMINAR (2). Seminar to prepare students for their internship in public health. This course is repeatable for a maximum of 6 credits. PREREQS: HMP (Health Management Promotion) option students are required to take $H$ 436 in preparation and hold junior standing. HPHB (Health Promotion and Health Behavior) option students are required to take H 225 and H 320 and hold junior standing.
H 407H. SEMINAR (2). Seminar to prepare students for their internship in public health. This course is repeatable for a maximum of 6
credits. PREREQS: HMP (Health Management Promotion) option students are required to take H 436 in preparation and hold junior standing. HPHB (Health Promotion and Health Behavior) option students are required to take H 225 and H 320 and hold junior standing. Honors College approval required.
H 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Instructor consent required.
H 409. PRACTICUM (1-6). Supervised work experience in a public health or health care administration setting. Open to majors in public health. Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Senior standing and departmental approval.
H 410. INTERNSHIP (1-12). Directed field experience with participation in a community, worksite, or health agency program. Experience is individually arranged to meet student needs. Graded P/N. This course is repeatable for a maximum of 24 credits. PREREQS: H 436 and H 407 (HMP only); H 225 and H 320 and H 476 and H 407 (HPHB only)
H 418. PUBLIC HEALTH ETHICS AND ISSUES
(3). Current ethical issues in public health, including gender and ethnicity in employment, pharmaceutical controls, product liability, advertising, and export of high technology. PREREQS: Senior standing.
H 421. MENTAL HEALTH (3). Examination of social, governmental, legal and individual mental health issues. Brief overview of some major mental disorders. PREREQS: (H 225 [C-] and H 320 [C-] ) and junior standing.
H 422. HEALTH, AGING AND CONTROL OF CHRONIC DISEASES (4). Epidemiology of the major chronic diseases, risk factors, potential methods of prevention/intervention, ethical issues, and efficacy of current methods of prevention and control. Emphasis on adult populations and public health services, policies, and programs at the local, state, and federal levels designed to promote healthy aging. PREREQS: 9 credits of health course work.
H 425. FOUNDATIONS OF EPIDEMIOLOGY
(3). Measures of disease frequency; measures of effect; association and causation; sources of inaccuracy; experimental and observational study designs. Lec/rec. PREREQS: (H 220 [D-] or ST 201 [D-] ) and junior standing.
H 431. HEALTH CARE MARKETING (3).
Principles, elements and methods of marketing health care services. Role of the consumer, governing body, administration and medical staff as well as impact of professional ethics.
H 432. ECONOMIC ISSUES IN HEALTH AND MEDICAL CARE (3). Application of economic principles to the health care field: the demand for medical care and insurance, health care suppliers, health care markets. PREREQS: ( (ECON 201 [C-] or ECON 201H [C-] ) and H 210 [C-]) and junior standing.

## H 434. ^HEALTH CARE LAW AND

REGULATION (3). Legal aspects of health care delivery; tort law and its applications; professional liability and liability insurance; laws relative to health care institutions, cost controls, antitrust and access. (Writing Intensive Course) PREREQS: H 210 [C] and H 250 [C-] and admission to HMP program and junior standing.

## H 436. ADVANCED TOPICS IN HEALTH

CARE MANAGEMENT (3). Covers how health services are governed and organized; how health care organizations assess and adapt to change; constraints/opportunities in shaping organizational performance; leadership; strategic decision-making and the use of evidence-based management in health care. PREREQS: (H 210 [C-] and H 250 [C-] ) and junior standing.
H 445. *OCCUPATIONAL HEALTH (3). Current and historical topics in the area of occupational
health, with particular emphasis on the types of materials that produce human health effects; clinical and epidemiologic data used to assess the public health importance of occupational pollutants and to evaluate control strategies. (Bacc Core Course)
H 448. PUBLIC HEALTH TOXICOLOGY (3). Introduction to the concepts and principles of toxicology as they apply to environmental and occupational health PREREQS: H 344 [C-] and One year basic college chemistry and biology and two terms organic chemistry.
H 449. MASS MEDIA AND HEALTH (3). Designed to examine the effects of mass media on population health, from the negative impact of advertising of cigarettes, alcohol and junk food, to the (hopefully) positive impact of public-health campaigns. PREREQS: (H225 [C-] and H 320 [C-] ) and junior standing.
H 457. FINANCIAL MANAGEMENT OF HEALTH CARE ORGANIZATIONS (3). Utilization of standard financial tools needed to manage the capital resources of health care organizations. Includes funding capital projects, product costing, budgeting methods, capital formation and investment strategies. PREREQS: H 210 [C-] and H 250 [C-] and BA 215 [C-]

## H 458. REIMBURSEMENT MECHANISMS (3).

Introduces and analyzes the different types of healthcare reimbursement methodologies used in the U.S. health care system. PREREQS: H 210 [C-] and junior standing.
H 461. SEXUALITY: A HEALTH SCIENCE PERSPECTIVE (3). Exploration of the meaning of sexuality from a variety of contemporary health science perspectives; aspects of sex and sexuality fundamental to total health; issues central to the health educator role examined. PREREQS: Senior standing.
H 465. *PUBLIC HEALTH AND WOMEN: SOCIAL AND POLICY ISSUES (3). Public health approach to the identification of women's health needs in the United States and in other countries as it relates to the intersection of race, ethnicity, social class, sexual orientation, age, and ability. (Bacc Core Course) PREREQS: 6 credits in public health.

H 467. LONG-TERM CARE ALTERNATIVES (3). Overview of the long-term care alternatives. Comparisons of nursing homes with community based facilities; adult day care centers, respite to hospice facilities, social HMOs and other services; cost, quality of life and practicality are addressed.
H 468. FINANCING AND ADMINISTRATION OF LONG-TERM CARE (3). Examines the financing and administration of long term care. Emphasis is on a system-wide overview and specific application to nursing facility management. PREREQS: Admission to HMP program.
H 474. PUBLIC HEALTH AND VIOLENCE IN SOCIETY (3). Examination of violence as a major public health issue. Historical, social, environmental, economic, behavioral and psychological aspects of assaultive violence, spousal abuse, rape and sexual assault, child abuse, child sexual abuse, suicide, the effects of the media on violence, drug abuse and violence, and related public health problems in contemporary American society. Emphasis on health and the efficacy of current efforts aimed at ameliorating these problems and potential for alternative public health models for prevention and intervention.

H 476. ^PLANNING AND EVALUATING HEALTH PROMOTION PROGRAMS (4). A systematic approach to planning, implementing and evaluating health promotion programs in a variety of health related settings. Students will be writing a series of drafts to effectively develop a health promotion program plan. (Writing Intensive Course) PREREQS: (H 225 [C-] and H 320 [C-] ) and at least junior standing.

H 477. DIETARY INTERVENTIONS FOR PUBLIC HEALTH (3). A public health perspective on the practice of population-based dietary intervention. Examination of relevant theories, research, and practice that pertain to health promoters/ educators. PREREQS: NUTR 225 [C-]
H 480. UNDERGRADUATE EOH SEMINAR (1).
Explores current topics in environmental health and safety. EOH faculty will discuss their current research interests; EOH graduate student speakers will share their environmental health and safety internship experiences. Documentaries will be viewed to introduce topics of discussion. Features will be discussions relating directly to ongoing, current environmental/occupational health crises, both in the United States and around the world. Graded P/N. This course is repeatable for a maximum of 2 credits. PREREQS: Junior or senior standing.

H 489. EMERGENCY AND DISASTER MANAGEMENT (3). Study of preparedness, response, recovery and business resumption strategies, activities and applications needed to effectively deal with emergency and disaster incidents.

H 491. SELECTED TOPICS (1-3). Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year. This course is repeatable for a maximum of 6 credits. PREREQS: Senior standing.

H 491H. SPECIAL TOPICS (1-3). Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year. This course is repeatable for a maximum of 6 credits. PREREQS: Senior standing and Honors College approval required.

H 494. APPLIED ERGONOMICS (3). Principles of occupational ergonomics for managing optimal worker performance and well-being.
H 495. DESIGN FOR ENVIRONMENT, SAFETY, AND HEALTH (3). Systematic consideration of environmental, safety, and health concerns at the earliest possible stage in the lifecycle design engineering of products, technologies, and manufacturing processes. PREREQS: Junior or senior standing.
H 501. RESEARCH AND SCHOLARSHIP (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
H 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Instructor approval required.

H 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
H 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
H 507. SEMINAR (1-16). Section 1. Internship (1). Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
H 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
H 509. PRACTICUM (1-16). Supervised work experience in a public health or health care administration setting. Open to majors in public health. Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Senior standing and departmental approval.
H 510. INTERNSHIP (1-16). Directed field experience with participation in a community, worksite, or health agency program. Experience is individually arranged to meet student needs.

Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Graduate standing in Public Health Department, instructor approval required, departmental approval required.
H 511. COMMUNITY, CULTURE, AND GLOBAL HEALTH (3). Overview of health issues across cultures, ethnic groups, and regional/national boundaries from a critical and interdisciplinary perspective. Special emphasis on understanding social and behavioral factors that influence health in underserved communities/groups, especially ethnic/racial minorities, women, children, and migrants.
H 512. INTRODUCTION TO ENVIRONMENTAL AND OCCUPATIONAL HEALTH SCIENCES (3). Introduction to environmental and occupational health. Hazards affecting human health are examined in the context of current social, political and regulatory pressures.
H 513. INTEGRATED APPROACH TO PUBLIC
HEALTH (12). An integrated approach to introduce students to the core knowledge and methods used in public health, including evidence-based approaches to public health, public health and health care systems, planning and management to promote health, and policy in public health.
H 514. ENVIRONMENT, SAFETY AND HEALTH SEMINAR (1). One-credit graduate seminar on current topics of interest and importance to the environmental health and occupational safety field. Critical reading of research publications, discussion of controversial issues facing ESH professionals, and/or presentation of current ESH research. This course is repeatable for a maximum of 3 credits.

H 515. RESEARCH METHODS IN SOCIAL AND BEHAVIORAL HEALTH SCIENCES (3). Provides an introduction to quantitative research methods and design. Topics include definition of research problems and questions, hypothesis generation, research design, sampling, variable definition and measurement, data collection, and ethical considerations. Also provides a brief introduction to qualitative and mixed methods.
H 516. RESEARCH METHODS IN GLOBAL
HEALTH (3). Overview of research methods used to understand health, illness, health care, and health-seeking behavior in international settings. Special emphasis on the use of qualitative and mixed methods in international health research.
H 518. PUBLIC HEALTH ETHICS AND ISSUES
(3). Current ethical issues in public health, including gender and ethnicity in employment, pharmaceutical controls, product liability, advertising, and export of high technology. PREREQS: Graduate standing.

## H 519. DISPLACEMENT, MIGRATION, AND

 GLOBAL HEALTH (3). Critical examination of health of displaced/migrant populations with an emphasis on health disparities and social determinants. Understanding intersections of humanitarianism, migration, vulnerability, and displacement from a global health perspective.H 520. HEALTH DISPARITIES (3). Health disparities based on race/ethnicity, culture, social class, and rural/urban residence, among others; strategies to reduce disparities, promote health, and prevent disease in diverse populations.

H 521. MENTAL HEALTH (3). Focus upon mental health policy development, in relation to federal and state government services and regulations, implementation of services.
H 522. HEALTH, AGING AND CONTROL OF CHRONIC DISEASES (4). Epidemiology of the major chronic diseases, risk factors, potential methods of prevention/intervention, ethical issues, and efficacy of current methods of prevention and control. Emphasis on adult populations and public health services, policies, and programs at the local, state, and federal levels designed to promote healthy aging. PREREQS: 9 credits of public health course work.

H 523. FOUNDATIONS OF PUBLIC HEALTH (4). Fundamental principles, concepts and tools used in public health to promote the health of populations. Using a combination of case study method, lecture and discussion, students will develop a broad understanding of public health and recognition of how discipline-specializations address the social, behavioral and environmental determinants of public health. PREREQS: Graduate standing.
H 524. INTRODUCTION TO BIOSTATISTICS (4). Quantitative analysis and interpretation of health data including probability distributions, estimation of effects, and hypothesis-tests such as Chi-square, one-way ANOVA, and simple linear regression.
H 525. PRINCIPLES OF EPIDEMIOLOGY (4). Introduction to the concepts and methods of epidemiology. Topics include measures of population health, screening, study design, measures of association, and interpretation of epidemiological data.
H 526. EPIDEMIOLOGIC METHODS (3). Principles and methods of epidemiologic analysis; standardization; stratified analysis; confounding and its control; planning and conducting epidemiologic research; role of multivariate analysis in epidemiologic research. PREREQS: H 525 [C]

## H 527. CRITICAL ASSESSMENT OF

INTERNATIONAL HEALTH PROGRAMS (3).
Introduces the critical evaluation framework of assessing international health development programs, based on self-determination and community ownership principles. The framework of assessment method includes three levels: upstream evaluation, midstream evaluation, and downstream evaluation. PREREQS: H528 and H 529 and graduate standing.

H 528. GLOBAL HEALTH ISSUES (3). Examines major issues in health developments of global significance, their causes and impacts on international health, and methods and strategies to address them.
H 529. INTERNATIONAL HEALTH (3). Overview of the epidemiological, economic, political, sociological, and cultural factors that impact on international health. Special emphasis on the methods of prevention/intervention utilized in coping with health problems on an international level.
H 530. HEALTH POLICY ANALYSIS (3). Analysis of public policies affecting health care programs, services and organizations and the impact of those programs on citizens; processes by which health policy proposals are generated, promoted, defeated, modified and implemented.
H 531. HEALTH CARE MARKETING (3).
Principles, elements and methods of marketing health care services. Role of the consumer, governing body, administration and medical staff as well as impact of professional ethics.
H 532. ECONOMIC ISSUES IN HEALTH AND
MEDICAL CARE (3). Application of economics principles to the health care field: the demand for medical care and insurance, health care suppliers, health care markets. PREREQS: ECON 201

H 533. HEALTH SYSTEMS ORGANIZATION (3). Examines the nature of health and health care services and reviews the role of government and the free market on health services. Alternative ways of organizing, financing, and delivery of health care services are explored.
H 534. HEALTH CARE LAW AND REGULATION
(3). Legal aspects of health care delivery; tort law and its applications; professional liability and liability insurance; laws relative to health care institutions, cost controls, antitrust and access.
H 535. INTERPRETING EPIDEMIOLOGIC
EVIDENCE (3). Intended for students in the
human sciences and allied health fields.
Introduces basic epidemiology concepts. Topics
will include measures of disease frequency, assessing population health, causal logic, quantifying associations between exposures and health outcomes, epidemiologic study design, and threats to study validity (random error, bias, confounding). Examples focus on application of epidemiological methods to a variety of healthrelated fields.

H 536. HEALTHCARE ORGANIZATION THEORY
AND BEHAVIOR (3). Administrative practice in health care settings with emphasis on longterm care and acute care services. Provides a framework for health care systems and managerial process and roles. Focus on operations, planning, marketing, human resources, finance, productivity and control as well as emerging trends in health services.

## H 538. PUBLIC AND PRIVATE HEALTH

INSURANCE (3). Introduction to the principles and practices of public or social and commercial health insurance, and their financial reimbursement mechanisms.

## H 540. WATER AND HUMAN HEALTH (3).

Critically examine the complex relationship between water quality, human activities, and population health.
H 541. AIR QUALITY AND HUMAN HEALTH (3). Examination of the major sources of air pollution, its impact on ecosystems and climate change, and population health. Will also discuss technologies and introduce regulations that are used to control air pollutants.
H 542. ENVIRONMENTAL AND OCCUPATIONAL HEALTH RISK ASSESSMENT (3). Understand concepts, principles and practices in modern environmental and occupational risk analysis and how they are utilized to make evidence-based decisions by regulatory agencies.
H 543. EXPOSURE SCIENCE I (3). Overview of the concepts, principles and practices in modern environmental and occupational exposure assessment. Exposure Science I provides a broad introduction to environmental and occupational exposure assessment methods, while Exposure Science II focuses on sampling and measurement methods.
H 544. ENVIRONMENTAL AND OCCUPATIONAL EPIDEMIOLOGY (3). Examines exposure assessment methodology and epidemiological study designs that are commonly used in environmental and occupational health science in order to characterize the impact of environmental and occupational exposures on population health. PREREQS: H 525 [C] and a graduate level statistics course.

H 545. OCCUPATIONAL HEALTH (3). A broad overview of occupational health including recognizing and preventing risks from toxic chemical, radiation and physical hazards in the workplace.
H 546. EXPOSURE SCIENCE II: SAMPLING AND MEASUREMENT (3). Concepts, principles and practices in modern environmental and occupational exposure assessment are reviewed. Exposure Science I provides a broad introduction to environmental and occupational exposure assessment methods, while Exposure Science II focuses on sampling and measurement methods. Lec/lab. PREREQS: H 543 [C]

H 547. GIS AND PUBLIC HEALTH (3).
Applications of geographic information systems (GIS) to public health are reviewed, including mapping, spatial analysis methods, estimating access, and exposure assessment. This course is geared toward individuals involved in public health who have no (or introductory level) knowledge of GIS.
H 548. PUBLIC HEALTH TOXICOLOGY (3). Introduction to the concepts and principles of toxicology as they apply to environmental and occupational health. PREREQS: H 344 and one year basic college chemistry and biology and two
terms organic chemistry.
H 549. MASS MEDIA AND HEALTH (3).
Examines the effects of mass media on population health, from the negative impact of advertising of cigarettes, alcohol and junk food, to the (hopefully) positive impact of public health campaigns.
PREREQS: H 571 [C]
H 550. SOCIAL EPIDEMIOLOGY (3). Explores the social determinants of health at the population level. Primary focus is on introduction to methods specific to social epidemiology, but will also provide an overview of current understanding of the empirical associations between social factors and health. PREREQS: H 525 [B] and /or equivalent introductory course in epidemiology, or permission of the instructor.

H 551. APPLIED EPIDEMIOLOGICAL ANALYSIS OF SECONDARY DATA (3). Practical experience performing a hypothesis-driven epidemiological analysis utilizing secondary surveillance or other appropriate data set, writing an analytical plan, appropriate programming for the analysis (using STATA or SAS), understanding the analysis output, preparing tables, and interpreting results. PREREQS: H 526 [B-] and H 560 [B-] and H 580 [B-] and /or instructor consent.

H 552. DISASTER EPIDEMIOLOGY (3). Describe the impact of natural and manmade disasters on human health, understand epidemiologic methods specific to disasters, and apply fundamental epidemiologic methods to identify and characterize disaster-related adverse health outcomes. PREREQS: H 525 [C]

H 553. APPLIED EPIDEMIOLOGIC METHODS
(3). Builds upon the previous two terms in the three-term epidemiology core methods sequence, through the practical application of epidemiologic methods to the conduct of a student-directed investigation. Core goals are practical skills in hypothesis generation, study design, data management, data analysis, interpretation of results, and communication of findings. PREREQS: H 525 [B] and H 526 [B] and /or instructor permission
H 554. EPIDEMIOLOGY OF AGING (3). An overview of the core principles of the epidemiology of aging is provided. There will be an emphasis on health and disease processes in older adults. Students will learn essential study design and analytic issues that may arise in studies of aging. PREREQS: H 525 [C]
H 555. CANCER EPIDEMIOLOGY (3). Introduction to basic concepts and methodology in cancer epidemiology. PREREQS: H 525 [C]

H 556. STRATEGIC MANAGEMENT OF HEALTH SERVICE ORGANIZATIONS (3). Theories and methodologies of long-range planning and strategic management in health care organizations.
H 557. FINANCIAL MANAGEMENT OF HEALTH
CARE ORGANIZATIONS (3). Utilization of
standard financial tools needed to manage the capital resources of health care organizations. Includes funding capital projects, product costing, budgeting methods, capital formation and investment strategies. PREREQS: H 210 and H 250

H 558. REIMBURSEMENT MECHANISMS (3).
Techniques used in cost-effectiveness analysis Examples are drawn from the public health and health economics literature. PREREQS: Graduate standing.
H 559. CONTRACTS AND NEGOTIATION (3). Different negotiation styles and strategies used in healthcare contracting are explored--distributive, integrative, and mixed motive negotiation styles. Students examine various contracts and the role the healthcare administrator plays in a variety of health care settings.
H 560. PUBLIC HEALTH SURVEILLANCE (3). An introduction to public health surveillance systems (national and international) for chronic and
infectious diseases. Utility of existing surveillance systems for secondary epidemiological data analysis. PREREQS: H 524 [B-] and H 525 [B-] and /or instructor's consent.

## H 561. SEXUALITY: A HEALTH SCIENCE

PERSPECTIVE (3). Exploration of the meaning of sexuality from a variety of contemporary health science perspectives; aspects of sex and sexuality fundamental to total health; issues central to the health educator role examined. PREREQS: Graduate standing.
H 562. INFECTIOUS DISEASE EPIDEMIOLOGY (3). Understand epidemiologic methods specific to infectious diseases, apply fundamental epidemiologic methods to infectious disease questions, and describe the broad trends in global infectious disease burden. The application methods and principles will be explored through ectures, discussions, assignments and writing projects. PREREQS: H 525 [C]

H 563. PHYSICAL ACTIVITY EPIDEMIOLOGY
(3). Physical activity epidemiology will focus on current research, controversial issues, and methodological problems in the epidemiology of physical activity, exercise, and health. PREREQS: H 525 [B-] and H 524 or equivalent

H 564. COMPUTING TOOLS AND HEALTH DATA ANALYSIS (3). Modern computational biostatistics or analyzing health data, emphasizing important technologies and methods for data processing and understanding of how they work. Topics will evolve over time as new procedures are developed. PREREQS: (H 524 [C] or HDFS 530 [C] )

H 565. PUBLIC HEALTH AND WOMEN: SOCIAL AND POLICY ISSUES (3). Public health approach to the identification of women's health needs in the United States and in other countries as it relates to the intersection of race, ethnicity, social class, sexual orientation, age, and ability. PREREQS: 6 credits in public health.

H 566. DATA MINING IN PUBLIC HEALTH (3). An introduction to high-dimensional data analysis and data mining techniques used as an information technology tool to extract previously unknown and potentially useful information from large databases in biology, medicine, and public health. PREREQS: H 581 or permission of instructor; H 564 recommended.

## H 567. LONG-TERM CARE ALTERNATIVES

(3). Overview of the long-term care alternatives. Comparisons of nursing homes with community based facilities; adult day care centers, respite to hospice facilities, social HMOs and other services; cost, quality of life and practicality are addressed.

H 568. FINANCING AND ADMINISTRATION OF LONG-TERM CARE (3). Examines the financing and administration of long term care. Emphasis is on a system-wide overview and specific application to nursing facility management.
H 569. MATERNAL AND CHILD HEALTH
(3). Women's reproductive health and health of children stressing causation, management, and prevention of public health problems. Epidemiological analysis of morbidity and mortality in children and women of childbearing age; impact of social, political and economic influences on the health of women and children; comparison of issues and problems of industrialized versus developing nations. Consideration of health issues of interest to the many diverse racial and ethnic groups of women and children in the U.S. as well as the global village.

H 570. WORKFLOW OF DATA ANALYSIS (3). Covers the management of workflow for studies involving data management and coordination including planning the work, documenting activities, creating, validating, and verifying variables, statistical analyses, replicating findings, and archiving work. Emphasizes tight control of data management: making changes to data in a documented and replicable manner. Lec/rec PREREQS: HDFS 532 [C] and /or equivalent or permission of instructor.

H 571. PRINCIPLES OF HEALTH BEHAVIOR
(3). Theoretical approaches to behavior change in health promotion/education research and practice; factors influencing health behaviors, ethical behavior change issues, behavioral interventions for special populations.

## H 572. COMMUNITY ORGANIZATION FOR

 HEALTH PROMOTION AND EDUCATION (3). History, theory, and practice of community organizing for health advocacy; focus on group processes, use of media, leadership, coalitions, grass roots methods and social change.H 573. INTRODUCTION TO MULTILEVEL/ HIERARCHICAL MODELS (3). Introduction to the theory and application of hierarchical models to problems in epidemiology and public health. Hierarchical models will be dealt with using both frequentist and Bayesian frameworks. PREREQS: H 581 or permission of instructor.

## H 574. PUBLIC HEALTH AND VIOLENCE

IN SOCIETY (3). Examination of violence as a major public health issue. Historical, social environmental, economic, behavioral and psychological aspects of assaultive violence, spousal abuse, rape and sexual assault, child abuse, child sexual abuse, suicide, the effects of the media on violence, drug abuse and violence, and related public health problems in contemporary American society. Emphasis on health and the efficacy of current efforts aimed at ameliorating these problems and potential for alternative public health models for prevention and intervention.

## H 575. EVALUATION OF HEALTH PROMOTION

AND EDUCATION PROGRAMS (3). Provides theoretical and practical bases for program evaluation. Develops basic skills in a variety of approaches to evaluation, including techniques that are particularly suitable for evaluating health promotion, community health improvement, and related health and social services programs. Course learning is synthesized through designing an evaluation framework and methodology for a relevant program. PREREQS: H 515 [C] and /or instructor consent.

## H 576. PROGRAM PLANNING/PROPOSAL

WRITING IN HEALTH/HUMAN SERVICES (4).
Planning and preparing of proposals for program initiation, financing, delivery and evaluation in health-related settings; emphasis on funding sources, community, individual, and organizational support. PREREQS: 9 credits of graduate course work in public health.
H 577. DIETARY INTERVENTIONS FOR PUBLIC HEALTH (3). A public health perspective on the practice of population-based dietary intervention. Examination of relevant theories, research, and practice that pertain to health promoters/ educators. PREREQS: NUTR 225

## H 578. INTRODUCTION TO MOLECULAR

EPIDEMIOLOGY I (3). A survey of and introduction to the methods and issues arising in genetics and molecular epidemiology, including key biostatistical methods, study designs, and technologies used in the conduct of these studies. Students will gain experience conducting critical reviews of research papers with respect to study design and biostatistical analysis. PREREQS: (H 524 [C] and H 526 [C] ) and knowledge of and familiarity with basic concepts of molecular biology (DNA replication, transcription, and translation).
H 579. MOLECULAR EPIDEMIOLOGY II (3). An introduction to the data analysis methods arising in genetics and molecular epidemiology. Students will obtain hands-on experience with the analysis of high-throughput data obtained from populationbased molecular studies. Lec/lab. PREREQS: (H 578 [C] and H 581 [C] ) and H 564
H 580. LINEAR REGRESSION AND ANALYSIS OF TIME TO EVENT DATA (4). Multiple linear regression analysis for measurement data and survival analysis methods for time to event health data, including modes of inference, diagnostics,
model selection, and reporting conclusions. Lec/ lab. PREREQS: (H 524 [C] or HDFS 530 [C] )
H 581. GENERALIZED LINEAR MODELS AND CATEGORICAL DATA ANALYSIS (4).
Biostatistical methods focusing on binary
and count data will provide a foundation for understanding and implementing generalized linear regression and categorical data models that are commonly used to analyze epidemiological and public health data from cohort, casecontrol, and clinical trial study designs. Lec/lab. PREREQS: H 580
H 582. ANALYSIS OF CORRELATED HEALTH DATA (3). Biostatistical methods for clustered, repeated measures, and longitudinal correlated health data, with an introduction to applications of linear and generalized linear mixed models and generalized estimating equations. PREREQS: H 581 [C]
H 583. ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY MANAGEMENT (3).
The management principles and practices in the environment, safety and health profession are examined.

## H 584. ANALYSIS OF INTERVENTION STUDIES

 AND CLINICAL TRIALS (3). Principles of data analysis from intervention studies and clinical trials, including professional graphical and tabular presentation, reproducibility and reliability of measurements, and controlling the Type I error rate when analyzing multiple endpoints. Basic principles of designing experiments are also covered including blocking, stratification, interaction, and control of variability. PREREQS: (H 524 [C] or HDFS 530 [C] )H 585. ENVIRONMENT, SAFETY AND HEALTH POLICY AND LAW (3). Survey of the environment, safety and health policy and law in the United States. Furnishes the basic knowledge and general understanding about policy and law-related issues important to all environmental health and safety professionals. PREREQS: H 385 or graduate standing.
H 586. BAYESIAN BIOSTATISTICS IN PUBLIC HEALTH (3). An examination of methods for designing and implementing Bayesian analysis to address scientific questions through handson experience with health data. This survey course also covers proper interpretation and communication of results from practical Bayesian methods for biostatistics data analysis, with illustrations of the utility of Bayesian ideas in public health. PREREQS: H 581 [C]

H 587. TIME TO EVENT ANALYSIS OF HEALTH DATA (3). Biostatistical models and methods for survival analysis of time to event data that are routinely encountered in biomedical and health research. PREREQS: (H 524 [C] or HDFS 530 [C])
H 588. APPLIED OCCUPATIONAL SAFETY AND HEALTH (3). The management and technical aspects of a workplace safety and health program are identified and assessed. Students completing the course receive a 30-hour OSHA General Industry card.
H 589. EMERGENCY AND DISASTER
MANAGEMENT (3). Study of preparedness, response, recovery and business resumption strategies, activities and applications needed to effectively deal with emergency and disaster incidents.
H 591. SELECTED TOPICS (1-3). Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year. This course is repeatable for a maximum of 9 credits. PREREQS: Graduate standing.
H 592. SPATIAL EPIDEMIOLOGY (3). An introduction to methods in spatial epidemiology is provided, including spatial exploration of health data, quantifying spatial patterns and clusters, spatial exposure assessment, and explaining
patterns and associations. PREREQS: H 547 [C] and H 581 [C] and or equivalent.

H 593. REPRODUCTIVE EPIDEMIOLOGY (3). Focuses on current research, controversial issues, and methodological problems in the epidemiology of reproductive health. PREREQS: H 525 [B-] and H 524 (recommended)
H 594. APPLIED ERGONOMICS (3). Principles of occupational ergonomics for managing optimal worker performance and well-being.
H 595. DESIGN FOR ENVIRONMENT, SAFETY, AND HEALTH (3). Systematic consideration of environmental, safety, and health concerns at the earliest possible stage in the lifecycle design engineering of products, technologies, and manufacturing processes. PREREQS: Graduate standing.

H 596. HEALTHCARE EPIDEMIOLOGY (3). Focus on current research, controversial issues, and methodological problems in the epidemiology of healthcare. Topics include institutional infection control, medical errors, screening and diagnostic testing, cost-effectiveness, and others related to the delivery and assessment of healthcare, with a focus on the US healthcare system specifically. PREREQS: H 525 [B-] and H 524 is recommended
H 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 24 credits.
H 601. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

H 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.
H 605. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
H 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

H 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

H 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
H 610. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

## H 612. DOCTORAL SEMINAR IN PUBLIC

 HEALTH: RESEARCH AND PRACTICE (1). Contemporary research and professional issues specific to the discipline of public health. Includes responsible conduct of research, writing for publication, professional development and leadership, and faculty research in public health. This course is repeatable for a maximum of 9 credits. PREREQS: Restricted to public health doctoral students.
## H 613. INDEPENDENT RESEARCH PROJECT

(1-9). Independent research project for PhD students, including research design, execution or research, and the formal presentation of findings in written form. Student will develop an original research topic based on knowledge and review of the literature in a public health-relevant area of inquiry. Graded $P / N$. This course is repeatable for a maximum of 9 credits.
H 614. RESEARCH MANUSCRIPT (4). PhD
students write a manuscript to submit to a peer-reviewed journal as part of the course requirements. Graded P/N.

## H 615. ADVANCED EVALUATION AND

RESEARCH DESIGN (3). Provides an in-depth examination of advanced research designs and methods for establishing causal statements about the efficacy, effectiveness and generalizability
of public health and social service interventions designed to alter public health and social risk or protective factors. PREREQS: H 515 and H 575 or instructor permission.
H 620. ADVANCED TOPICS IN GLOBAL
HEALTH INTERVENTION AND PRACTICE (3).
Examines the processes and tools involved in planning and evaluating culturally competent health and human service prevention and intervention programs in the global context. Special considerations in program decisionmaking in the global context (community engagement, cultural competence, sustainability, feasibility, political/ethical issues) will be explored Provides a key forum for doctoral students to share ongoing developments in their research and practice drawing from fieldwork as well as attended conferences and meetings.
H 622. GLOBAL HEALTH SYSTEMS, POLICY AND POLITICS (3). Focuses on learning to identify key stakeholders in the politics of global health, and to be able to describe political and policy processes involved in negotiating global health decisions. Employment of theories and evidence from both the global North and South to explain political processes affecting public health practice and programs.

## H 626. GLOBAL HEALTH SYSTEM FINANCE

AND STRENGTHENING (3). Introduces an analytical framework of health system finance strengthening for global health, from local community to national level and international level. Develops the analytical skill and knowledge for examining the source and mechanism of financing health systems and identify, mobilize, organize, and manage domestic and global health resources. Provides training to examine equity and efficiency of financial burden in a health system, and the strategies to strengthen it.
H 630. QUANTITATIVE HEALTH POLICY RESEARCH METHODS I (4). Contemporary doctoral-level quantitative health policy/services research methods emphasizing linear regression models, data sources for health policy research, and health policy research literature. PREREQS: H 524 [B-] and /or equivalent.
H 632. APPLIED HEALTH ECONOMICS (4). Advanced doctoral-level quantitative health policy/ services research methods emphasizing causal inference when potential endogeneity is present. PREREQS: H 630 [B-] and /or permission of instructor.
H 635. COST EFFECTIVENESS ANALYSIS IN HEALTH AND MEDICAL CARE (3). The primary objective of this course is to introduce students to cost-effectiveness studies in health and medical care. Covers the core concepts of CEA, quality adjusted life years, cost calculations, and decision rules.

## H 638. PUBLIC AND PRIVATE HEALTH

INSURANCE (3). Introduction to the principles and practices of public or social and commercial health insurance, their finance mechanisms, and theoretical foundation behind the selection of certain system of health insurance and finance method. PREREQS: H 533 [C]
H 639. COMMUNITY-BASED PARTICIPATORY RESEARCH (4). Focuses on initiating and conducting research in partnership with communities. Includes in-depth examination of community-based participatory research (CBPR) elements, principles, theories, and approaches; how researchers can successfully partner with communities; and research with minority and/or underprivileged communities; with examples from environmental health, gerontology, and health promotion. PREREQS: 9 credits of public health (H) or human development and family sciences (HDFS) graduate course work.
H 642. ENVIRONMENTAL AND REGULATORY RISK ASSESSMENT (3). Understand concepts, principles and practices in modern risk analysis and how they are utilized to make evidence-
based decisions in public health. Focus will be on real world examples of risk assessment by environmental and occupational regulatory agencies.

## H 650. REPORTING RESULTS: WRITING FOR

EPIDEMIOLOGY (3). Applied experience writing a scientific paper to disseminate results, including deciding on authorship, preparing a lay summary, revising and responding to peer review, and serving as a reviewer. PREREQS: H 526 [B-] and H 551 [B-] and H 580 [B-] and /or instructor consent.
H 651. ADVANCED EPIDEMIOLOGICAL
METHODS (4). Covers advanced topics in epidemiology. Course expands on many of the same topics as H 526 , and explores them in greater breadth and depth. Topics include causal theory, measures of disease and association, confounding, selection bias, predictive models, directed acyclic graphs, effect modification, mediation, indirect and direct effects, study design, and other contemporary topics. PREREQS: H 526 [B-] and H 581 [B-]
H 652. CAUSAL INFERENCE IN
EPIDEMIOLOGY (3). Discussion of the
theoretical framework of causal statistics and the development of modern methods including propensity scores and marginal structural models. Focus is on the inverse probability of treatment weighting; discussion of other estimation methods will be included. Additional topics may include longitudinal causal models, causal mediation, instrumental variables, and other contemporary topics. Applied examples will be used for illustration. PREREQS: H 651 [B-] and /or permission of instructor.

## H 659. QUANTITATIVE HEALTH POLICY

RESEARCH METHODS II (4). Advanced doctorallevel quantitative health policy/services research methods emphasizing health care utilization expenditures, and outcomes data. PREREQS: H 630 [B-] and /or permission of instructor
H 662. ADVANCED METHODS IN INFECTIOUS DISEASE EPIDEMIOLOGY (3). Covers advanced methods and principles for infectious disease research, including framing infectious disease issues into testable hypotheses, designing epidemiologic studies using appropriate sampling strategies, and identifying strengths and weaknesses of various epidemiologic research methods. PREREQS: H 526 [B-] and H 562 [B-] and /or instructor's consent.
H 671. ADVANCED THEORIES OF HEALTH
BEHAVIOR (3). Provides an in-depth examination of major theories of health behavior (both health compromising and health enhancing). PREREQS: H 571 or permission of instructor.

H 672. ADVANCED QUALITATIVE METHODS IN HEALTH BEHAVIOR (3). Provides an in-depth examination of the use of qualitative methods in health behavior research and practice. PREREQS: H 515 and SOC 518 and HDFS 538; or permission of instructor.
H 673. MEASUREMENT OF HEALTH BEHAVIOR
CONCEPTS (4). Provides in-depth study and field work for graduate students in public health and related fields of the methods used in the conceptualization, development, and evaluation of quantitative measures of health behavior and related concepts. PREREQS: H 524, H 515, and 3 credits in other quantitative research methods or social behavioral methods (e.g., in sociology or psychology or health promotion or education programs) or equivalents, or permission of instructor.

H 675. DEVELOPMENT OF HEALTH BEHAVIOR
INTERVENTIONS (3). Examines the application of social/behavioral theories in health promotion interventions and in conducting intervention research in diverse populations. The course will focus on program development, on implementation strategies, and on translation into practice. PREREQS: (H571 and H 575 and H 576 ) or
equivalents or consent of instructor.
H 676. ADVANCED TOPICS IN HEALTH PROMOTION AND HEALTH BEHAVIOR (3). Examines topics of relevance to health promotion and health behavior. Specific topics include current issues and emerging research findings with a focus on social and behavior science perspectives, analysis of public health problems, and application of principles and practices of health promotion and health behavior. This course is repeatable for a maximum of 6 credits. PREREQS: H 515 and H 571 or permission of instructor.

## H 681. ADVANCED TOPICS IN

ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY (3). Advanced topics in the environment, safety and health discipline. Content varies with each offering.
H 682. ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY: MOVING FROM RESEARCH TO PRACTICE (3). An examination of research transfer models that can be adapted and implemented to environmental and occupational settings. Case studies and content will vary with each course offering
H 683. ADVANCED RESEARCH METHODS IN ENVIRONMENTAL AND OCCUPATIONAL HEALTH (3). Covers advanced methods for environmental and occupational health research, including framing environmental and occupational health issues into testable hypotheses, designing appropriate studies, and identifying strengths and weaknesses of different research methods.
H 685. RACE, CLASS, CULTURE AND AGING (4). Examines the diversity among the older population in health status, health beliefs/ behaviors, and health care, and explores the interaction of culture and structure as determinants of their life chances. The empirical literature used in the course is drawn from the experiences of aging of African-American, Latino, and Asian-Pacific Islander elderly. Taught spring term even years. CROSSLISTED as HDFS 685. PREREQS: 9 credits of public health or HDFS graduate course work, or permission of instructor.

H 699. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 16 credits.

## - HEALTH AND HUMAN SCIENCES COURSES

HHS 220. COMMUNITY EDUCATION PROGRAMS AND PRACTICES: EXTENSION SYSTEM (2). Theory and practice of community education programs; evolution of land-grant university outreach programs; emphasis on addressing current issues and engaging diverse audiences through responsive instructional practices; some site visits.
HHS 231. *LIFETIME FITNESS FOR HEALTH (2). Provides up-to-date and relevant health and wellness information; practical strategies to implement positive behavior change in physical activity, nutrition, and stress management throughout college and the lifespan. (Bacc Core Course)
HHS 231H. *LIFETIME FITNESS FOR HEALTH
(2). Provides up-to-date and relevant health and wellness information; practical strategies to implement positive behavior change in physical activity, nutrition, and stress management throughout college and the lifespan. (Bacc Core Course) PREREQS: Honors College approval required.
HHS 241. *LIFETIME FITNESS (1). Assessment, evaluation and practice of physical fitness and health behaviors leading to the development of a personal fitness program. (Bacc Core Course)

## - KINESIOLOGY COURSES

KIN 131. INTRODUCTION TO KINESIOLOGY (1). Overview of the field; career opportunities in
exercise and sport science and other professions dealing with the discipline of human movement; orientation to support services. Graded P/N.

## KIN 132. INTRODUCTION TO THE ALLIED

 HEALTH PROFESSIONS (1). Overview of allied health professions including physical and occupational therapy, physician assistant, nursing, athletic training and others. Discuss job responsibilities, employment opportunities and educational requirements.
## KIN 160. INTRODUCTION TO INJURY

MANAGEMENT FOR THE PHYSICALLY ACTIVE
(3). Introduction to management of physical activity-related injury for the non-healthcare provider (e.g., coaches, physical educators and fitness professionals).

KIN 194. PROFESSIONAL ACTIVITIES (1-2).
Basic movement skills, basic rhythms, track and field.

KIN 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## KIN 230. INTRODUCTION TO ADVENTURE

PROGRAMS (3). Foundation course for leadership opportunities in the Adventure Leadership Institute (ALI). Provides overview of history, theoretical foundations, and utilization of adventure programs in education, recreation, and therapy.
KIN 231. HUMAN GROUP DYNAMICS (3). Provides students with the fundamental concepts and theories essential for understanding dynamics that occur in groups in recreation, leisure, and everyday settings

KIN 232. BACKCOUNTRY LEADERSHIP (3).
Prepares students to be leaders in outdoor settings by building the practical and logistical skills needed in the effective delivery of courses and/or trips. Covers the teaching skills and essentials for trip leaders in the wilderness, including trip planning, logistics, risk management, and group interaction in the backcountry. PREREQS: (EXSS 230 [C] or KIN 230 [C] ) and PAC 301 [C] and PAC 325 [C] and PAC 326 [C]

## KIN 233. TEACHING TECHNIQUES FOR

 OUTDOOR ACTIVITIES (3). Gateway course for students pursuing the Level Three Adventure Leadership Certificate. Emphasizes teaching outdoor activities at a professional level. Students work individually with the course instructor to develop, plan and implement an activity course (land or water based) for the Adventure Leadership Institute. PREREQS: EXSS 232 [C] or KIN 232 [C]KIN 299. SPECIAL TOPICS (1-3). This course is repeatable for a maximum of 24 credits.
KIN 301. RESEARCH AND SCHOLARSHIP
(1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approva required.
KIN 305. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

KIN 306. PROJECTS (1-16). This course is repeatable for a maximum of 36 credits. PREREQS: Departmental approval required.
KIN 307. SEMINAR (1-3). Section 2: Seminar PreInternship (1 credit). This course is repeatable for a maximum of 36 credits.
KIN 311. MOTOR BEHAVIOR (4). Underlying mechanisms and factors affecting movement function, skill acquisition, and changes in movement behavior across the lifespan. PREREQS: BI 232 [C-]
KIN 312. *SOCIOCULTURAL DIMENSIONS OF PHYSICAL ACTIVITY (3). Physical activity in contemporary society. Relationships with the social processes; interrelationships between physical activity and cultural institutions. (Bacc Core Course) PREREQS: Social processes course.

KIN 314. INTRODUCTION TO ADAPTED
PHYSICAL ACTIVITY (3). Overview of cognitive neuromuscular, sensory and orthopedic disabilities; understanding accessible physical activity programs for individuals with disabilities. PREREQS: Sophomore standing.

## KIN 321. BIOMECHANICS OF HUMAN

MOVEMENT (4). Integration of the physical laws and anatomical structures governing human movement; qualitative analytical processes emphasized. PREREQS: ( (BI 231 [C-] and BI 241 [C-] ) or (BI 331 [C-] and BI 341 [C-] ) ) and (MTH 112 [C-] or MTH 251 [C-] )

KIN 324. EXERCISE PHYSIOLOGY (4).
Physiological effects of acute and chronic exercise; factors affecting human performance; exercise training principles. PREREQS: (BI 233 [C-] or BI 333 [C-]) and (BI 231 [C-] or BI 331 [C-] ) and CH 121 [C-] and CH 122 [C-] and (CH 123 [C-] or CH 130 [C-]) and /or equivalent
KIN 325. FITNESS ASSESSMENT AND
EXERCISE PRESCRIPTION (2). Introduction to lab- and field-based physical fitness assessments and the skills needed to design safe and effective exercise programs for apparently healthy adults. Lec/lab. PREREQS: KIN 324 [C-] or EXSS 324 [C-]
KIN 333. KINESIOLOGY PRACTICUM (2). Field experience in kinesiology under professional supervision. PREREQS: Departmental approval required.
KIN 334. KINESIOLOGY PRACTICUM (2). Field experience in kinesiology under professional supervision. PREREQS: KIN 333 [C-] and Instructor approval.
KIN 335. KINESIOLOGY PRACTICUM (2). Field experience in kinesiology under professional supervision. PREREQS: Instructor approval.

KIN 341. NUTRITION FOR EXERCISE (3).
Review of the interrelationship between
nutrition and exercise, including macronutrient, micronutrient and fluid needs for active individuals. CROSSLISTED as NUTR 341. PREREQS: (KIN 324 [C-] or EXSS 324 [C-] ) and NUTR 240 [C-]
KIN 343. PRE-THERAPY/ALLIED HEALTH
SEMINAR (1). Provides knowledge in professiona school preparation and current issues related to the allied health professions. PREREQS: (KIN 132 [C] or BI 109 [C] ) and BI 231 [C] and BI 232 [C] and BI 233 [C] and BI 241 [C] and BI 242 [C] and BI 243 [C] and overall GPA of 3.0; grade of C or better in KIN 132 or BI 109 [for Pre-Med]; Grade of C or better and average of 2.7 in $\mathrm{BI} 231, \mathrm{BI}$ 232, BI 233, BI 241, BI 242, BI 243 or equivalent. Instructor/school approval.

## KIN 344. PRE-THERAPY/ALLIED HEALTH

PRACTICUM (2). Clinical field experiences under the supervision of a licensed professional in the allied health or related setting enhanced with classroom discussion. PREREQS: (EXSS 132 [C] or KIN 132 [C] ) and Z 331 [C] and Z 332 [C] and Z 333 [C] and Z 341 [C] and Z 342 [C] and Z 343 [C] and overall GPA of 3.0; grade of "C" or better in KIN 132; grade of " C " or better and average GPA of 2.7 in BI 231, $\mathrm{BI} 232, \mathrm{BI} 233, \mathrm{BI} 241, \mathrm{BI}$ 242, BI 243. Instructor/school approval. COREQS: KIN 343
KIN 345. ALLIED HEALTH PRACTICUM (1-2).
Field experience under professional supervision in an allied health or related setting. Includes arranged consultations with the instructor to discuss current issues related to the allied health professions. This course is repeatable for a maximum of 2 credits. PREREQS: Overall GPA 2.75. Departmental approval required.

KIN 353. PHYSICAL EDUCATION TEACHER EDUCATION PRACTICUM (2). Supervised K-12 physical education field experience with seminars. May include one instructor-approved coaching experience in school setting. PREREQS: OSU GPA 2.00, KIN GPA 2.50, and KIN 422 or KIN 423 (can be concurrent) and departmental approval required.

KIN 354. PHYSICAL EDUCATION TEACHER EDUCATION PRACTICUM (2). Supervised K-12 physical education field experience with seminars. May include one instructor-approved coaching experience in school setting. PREREQS: OSU GPA 2.00, KIN GPA 2.50, and departmental approval required. Should also concurrently enroll in either KIN 422 or KIN 423.

## KIN 355. PHYSICAL EDUCATION TEACHER

EDUCATION PRACTICUM (2). Supervised K-12 physical education field experience with seminars. May include one instructor-approved coaching experience in school setting. PREREQS: OSU GPA 2.00, KIN GPA 2.50, and departmental approval required. Should also concurrently enroll in either KIN 422 or KIN 423.
KIN 370. PSYCHOLOGY OF SPORT AND
PHYSICAL ACTIVITY (3). Interaction between psychological variables and human motor performance.
KIN 380. THERAPEUTIC MODALITIES (4).
Indications, contraindication, techniques, and effects of various physical agents used in the care and treatment of musculoskeletal injuries and diseases. PREREQS: Admission to the Athletic Training major or enrollment in the Pre-Therapy and Allied Health option in the Kinesiology major or College of Science.
KIN 385. THERAPEUTIC EXERCISE (4).
Principles and techniques of therapeutic
exercise; rehabilitative activities and programs for musculoskeletal injuries, conditions, and diseases. Lec/lab. PREREQS: KIN 321 [D-] or EXSS 321 [D-]

## KIN 394. PROFESSIONAL ACTIVITIES

## RESISTANCE TRAINING PROGRAM DESIGN

(2). Presents the conceptual basis for optimizing resistance training program designs, exercise routines for all ages and fitness levels, correct exercise technique. Lec/lab. PREREQS: KIN 324 [D-] or EXSS 324 [D-]
KIN 395. PROFESSIONAL ACTIVITIES: GROUP FITNESS (2). Application of biomechanical, physiological, psychological and safety principles for the development of group exercise classes in a variety of modes and settings. Lec/lab. PREREQS: (KIN 324 [C-] or EXSS 324 [C-]) and (KIN 325*
[C-] or EXSS 325* [C-] )
KIN 396. PROFESSIONAL ACTIVITIES:
AQUATICS (2). Aquatic overview; emphasis on underlying hydrodynamic principles; includes safety, survival, stroke mechanics, aquatic exercise, training, games; certification opportunity in ARC Basic Water Rescue. Lec/lab/activity. PREREQS: PAC 250 or comparable skills.

KIN 399. SPECIAL TOPICS (1-3). This course is repeatable for a maximum of 18 credits.

KIN 399H. SPECIAL TOPICS (1-3). This course is repeatable for a maximum of 18 credits. PREREQS: Honors College approval required.
KIN 401. RESEARCH AND SCHOLARSHIP
(1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approva required.
KIN 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits.
KIN 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approva required.
KIN 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required
KIN 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.
KIN 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.
KIN 409. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.
KIN 410. INTERNSHIP (1-15). Planned
experiences at selected cooperating agencies companies or institutions; supervised by university and - program personnel; supplementary conference, reports and appraisal required. This course is repeatable for a maximum of 20 credits. PREREQS: Completion of required courses cumulative Kinesiology program GPA of 2.25 and KIN overall GPA of 2.50 , completion of 165 credits or departmental approval.

KIN 422. FACILITATING PHYSICAL ACTIVITY
FOR CHILDREN AND YOUTH (3). Students learn skills for facilitating physical activity programs for children and youth in a variety of settings, including information on the benefits of physical activity, program design, implementation and management techniques. PREREQS: KIN 311 [C-] or EXSS 311 [C-]
KIN 423. QUALITATIVE MOVEMENT ANALYSIS
(3). Develop observational skills to perform systematic qualitative analyses of selected physical activity performances and other human movements. PREREQS: (KIN 311 [C-] or EXSS 311 [C-] ) and (KIN 321 [C-] or EXSS 321 [C-] )
KIN 425. ANATOMICAL KINESIOLOGY (4). Anatomical aspects of human movement; actions of bones and muscles in motor activities. Application of physical principles to factors governing anatomical function in health and injury. PREREQS: EXSS 321 [C-] or KIN 321 [C-]
KIN 432. PHYSICAL ACTIVITY ASSESSMENT (3). Assessment of physical activity using subjective and objective measurement methods with focus on applications for individuals, communities, and special populations. PREREQS: Senior standing

## KIN 434. APPLIED MUSCLE PHYSIOLOGY (3)

Skeletal muscle structure, function, and metabolism; applications to muscle fatigue exercise training, inactivity, and aging. PREREQS: KIN 324 [C-] or EXSS 324 [C-]

KIN 435. PHYSICAL ACTIVITY PROMOTION (3). Application of behavioral science and public health research to the promotion of physical activity in individuals, groups and communities. PREREQS: KIN 370 [C-]
KIN 437. PHYSICAL ACTIVITY, AGING,
AND CHRONIC DISEASE (4). Addresses the consequences of primary and secondary aging from an individual and public health perspective. Physiological changes associated with aging and chronic disease, functional assessment of older adults, and exercise prescription for older adults with and without chronic exercise will be emphasized. PREREQS: (KIN 324 [C-] or EXSS 324 [C-] ) and (KIN 325 [C-] or EXSS 325 [C-] )

## KIN 444. ADVANCED ADAPTED PHYSICAL

ACTIVITY (3). Discuss various disability models and perspectives; reinforce determinants of physical activity; design and implement different physical activity programs and curricula for ndividuals with disabilities. Lec/lab. PREREQS: (KIN 314 [C-] or EXSS 314 [C-] ) and /or equivalent course.
KIN 455. ^PHARMACOLOGY IN ATHLETIC TRAINING (3). Pharmacology in sports medicine, topics including, but not limited to, the mechanisms and actions of drugs commonly administered and prescribed in sports medicine environments. (Writing Intensive Course) PREREQS: (KIN 359 [C-] or EXSS 359 [C-] ) and admission to the Athletic Training Practicum.

## KIN 474. EXERCISE PHYSIOLOGY LAB

METHODS (2). Practical experience and projects in exercise physiology lab methods, including measurement of submaximal and maximal oxygen consumption body composition, anaerobic power, and electrocardiography. PREREQS: (KIN 324 [C-] or EXSS 324 [C-] ) and (KIN 325 [C-] or EXSS 325 [C-] )

KIN 475. *POWER AND PRIVILEGE IN
SPORT (3). Issues of power and privilege in sport including race, gender, sexual orientation,
disability and aggression and the consequences of long held society norms and stereotypes. (Bacc Core Course) PREREQS: (KIN 312 [C-] or EXSS 312 [C-] ) and /or 6 credits of social science.
KIN 481. ^ANALYSIS OF CRITICAL ISSUES IN KINESIOLOGY (3). Reading and interpreting current research, and using writing as a tool for learning on a critical issue in kinesiology. (Writing Intensive Course) PREREQS: Senior standing

KIN 483. TISSUE INJURY AND REPAIR (3). Mechanics of tissue injury and the bodyss response and repair following injury of bone, muscle, tendon, ligament, cartilage and nervous system tissue. PREREQS: (BI 231 [C-] or BI 331 [C-] ) and (BI 241 [C-] or Bl 341 [C-] ) and (BI 232 [C-] or BI 332 [C-] ) and (BI 242 [C-] or BI 342 [C-] ) and (BI 233 [C-] or BI 333 [C-] ) and (BI 243 [C-] or BI 343 [C-] ) or ( (Z 331 [C-] and Z 332 [C-] and Z 333 [C-] and Z 341 [C-] and Z 342 [C-] and Z 343 [C-] ) )

## KIN 490. SCIENTIFIC INQUIRY IN

KINESIOLOGY (4). Principles and techniques of organization, administration, interpretation and evaluation of exercise science-related data. Includes human subjects training and certification, research design, and statistical analysis using SPSS and Excel including central tendency, correlation and regression, probability, and inferential statistics (t-tests and ANOVA). Lec/lab. PREREQS: KIN 325 [C-] and MTH 112 [C-]

KIN 499. SELECTED TOPICS (1-5). Impact of human movement development on people, their movement behavior, and environment. Topics vary from term to term and year to year. May be repeated for credit when topics differ. This course is repeatable for a maximum of 24 credits PREREQS: Senior standing.
KIN 501. RESEARCH AND SCHOLARSHIP
(1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

KIN 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: nstructor's approval required.
KIN 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
KIN 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

KIN 507. SEMINAR (1-16). Section 1: Seminar (1). Graduate research seminar that emphasizes student oral presentations of current research topics in exercise and sport science. One credit required for all graduate students. Section 2: Current Developments (1). Discussion of contemporary issues in the exercise and sport science literature. Topics vary by term. Two credits required of all doctoral students. Section 9: International Aspects (1). Discussion of international aspects of study in exercise and sport science. Required of all doctoral students. Graded $P / N$. This course is repeatable for a maximum of 16 credits.
KIN 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.
KIN 509. PRACTICUM (1-16). This course is repeatable for a maximum of 35 credits.
KIN 510. INTERNSHIP (1-16). Planned experiences at selected cooperating agencies, companies or institutions; supervised by university and program personnel; supplementary conference, reports and appraisal required. This course is repeatable for a maximum of 26 credits

## KIN 511. INTRODUCTION TO ATHLETIC

TRAINING (4). Practice domains include injury and illness prevention and wellness protection, clinical evaluation and diagnosis, immediate and emergency care, treatment and rehabilitation, and organizational and professional health and
well-being. Lec/lab. PREREQS: Admission to the Athletic Training major (MATRN)

KIN 512. APPLIED MOTOR LEARNING (3). Application of research and theory to the teaching of motor skills with emphasis on development of instructional strategies related to modeling, knowledge of results, practice, and motivational aspects of learning. PREREQS: KIN 311

KIN 515. MOTOR CONTROL AND MOVEMENT DYSFUNCTION (3). Contemporary motor contro theories and their application to the development of instructional and training programs for individuals with movement disorders caused by neurological disease and/or trauma. PREREQS: KIN 311 and (KIN 314 or KIN 444)

KIN 520. ORTHOPEDIC ASSESSMENT OF UPPER EXTREMITY INJURIES (4). Prevention, assessment and management of upper extremity injuries and conditions commonly encountered by the athletic trainer. Lec/lab. PREREQS: KIN 511 [C] and Admission to the Athletic Training major (MATRN)

KIN 521. ORTHOPEDIC ASSESSMENT OF LOWER EXTREMITY INJURIES (4). Prevention, assessment and management of lower extremity injuries and conditions commonly encountered by the athletic trainer. Lec/lab. PREREQS: KIN 511 C] and admission to the Athletic Training major (MATRN)

KIN 522. ORTHOPEDIC ASSESSMENT
OF SPINE (4). Prevention, assessment and management of spinal injuries and conditions commonly encountered by the athletic trainer. Lec/ lab. PREREQS: KIN 520 [C] and KIN 521 [C] and admission to the Athletic Training major (MATRN)

KIN 523. BIOMECHANICS OF MOTOR
ACTIVITIES (3). Kinematic and kinetic analysis of volitional human movement with emphasis on analytical techniques and quantitative problem solving. PREREQS: KIN 323 or PH 201

## KIN 525. BIOMECHANICS OF

MUSCULOSKELETAL INJURY (3). Mechanical causes and effects of forces applied to the musculoskeletal system, material properties of human tissues, pathomechanics of injury, and degenerative changes across the lifespan. Not offered every year.
KIN 531. PHYSIOLOGY OF PHYSICAL
ACTIVITY AND INACTIVITY (3). Physiologic responses to acute and chronic physical activity and inactivity with emphasis on underlying mechanisms and health outcomes.

KIN 532. PHYSICAL ACTIVITY ASSESSMENT
(3). Assessment of physical activity using subjective and objective measurement methods with focus on applications for individuals, communities, and special populations. PREREQS: Senior or graduate standing

## KIN 533. ENERGETICS AND BIOCHEMISTRY

OF EXERCISE (3). Metabolic and energetic responses to acute and chronic physical activity; emphasis on recent research. PREREQS: Undergraduate course in biochemistry or exercise physiology.

KIN 535. PHYSICAL ACTIVITY PROMOTION (3). Application of behavioral science and public health research to the promotion of physical activity in ndividuals, groups and communities. PREREQS: KIN 370
KIN 544. ADVANCED ADAPTED PHYSICAL
ACTIVITY (3). Discuss various disability models and perspectives; reinforce determinants of physical activity; design and implement different physical activity programs and curricula for individuals with disabilities. Lec/lab. PREREQS: KIN 314 or equivalent course.
KIN 547. INCLUSION IN PHYSICAL ACTIVITY (3). Effectiveness of physical activity programs provided in inclusive settings. This will include a lifespan/non-categorical approach to program development. PREREQS: KIN 314 or KIN 444 or
equivalent.
KIN 548. ASSESSMENT AND PROGRAMMING FOR SPECIAL POPULATIONS (3). Use of appropriate assessment procedures for developing effective psychomotor programs for the disabled. PREREQS: KIN 314 or KIN 444 or equivalent.
KIN 549. PHYSICAL ACTIVITY FOR PERSONS WITH SEVERE DISABILITIES (3). Plan, develop and implement appropriate physical activity programs, functional program design, assistive technology, instructional strategies, behavior management practices, and data analysis systems that address the needs for psychomotor performance of persons with low incidence disabilities. PREREQS: KIN 314 or KIN 444 or equivalent.
KIN 550. HEALTH PROMOTION FOR PEOPLE WITH DISABILITIES (3). Discussion will focus on disability and health, theory driving health promotion program development, guidelines for developing a program for individuals with disabilities, and program evaluation.

## KIN 551. CURRENT TRENDS AND ISSUES IN

 PHYSICAL EDUCATION (4). Current trends and issues in physical education, including curriculum development, professional ethics, instructional practices, and physical activity for the school community. PREREQS: Admission to the MSPETE Program.
## KIN 553. INSTRUCTIONAL ANALYSIS

TECHNIQUES I (3). Introduction to techniques of instructional analysis. Provides in-depth information and training in systematic observation techniques, raw data conversion and inter/ intraobserver reliability. PREREQS: Admission to the MS-PETE Program.
KIN 554. INSTRUCTIONAL ANALYSIS
TECHNIQUES II (3). Laboratory/seminar experience to accompany student teaching winter and spring terms. Provides continued application of systematic observation techniques throughout the elementary student teaching experience.
PREREQS: Admission to the MS-PETE Program.
KIN 555. SKILL ANALYSIS AND ASSESSMENT IN K-12 (3). Develop proficiency in assessing movement skills, execution of sport techniques, and game play performance. Assessment trends and practices utilized in physical education programs are included. PREREQS: Admission to the MS-PETE Program.
KIN 556. INSTRUCTIONAL SKILLS I (3). Skills of planning, implementing, and evaluating programs of instruction in physical education, grades K-12. PREREQS: Admission to the MS-PETE Program.
KIN 557. INSTRUCTIONAL SKILLS II (2).
Applying and refining skills of planning, implementing, and evaluating programs of instruction in physical education, grades K-12. PREREQS: Admission to the MS-PETE Program.
KIN 558. PHYSICAL EDUCATION CURRICULUM DESIGN AND ORGANIZATION (3). Curricular programs and variations from kindergarten through grade 12, administrative policies and practices. PREREQS: Admission to the MS-PETE Program.
KIN 559. THE PHYSICAL EDUCATOR AS A PROFESSIONAL (1). Transitioning to teaching, developing a portfolio, certification, obtaining a position, teacher burnout, professionalism, problems of first-year teachers, developing patterns of behavior that lead to a successful career. PREREQS: Admission to the MS-PETE Program.
KIN 560. MOTIVATION IN PHYSICAL ACTIVITY
(3). A social psychological approach to understanding the role of self-perceptions and cognitions in explaining motivated behavior in sport and exercise settings. PREREQS: KIN 370
KIN 561. PSYCHOSOCIAL FACTORS IN
PHYSICAL ACTIVITY (3). A social psychological
approach to understanding the role of social interactions and contextual factors in explaining human behavior in sport and exercise settings. PREREQS: KIN 560
KIN 562. LIFESPAN SPORT AND EXERCISE
PSYCHOLOGY (3). Social-psychological issues across the lifespan in the context of sport and exercise. PREREQS: KIN 561
KIN 564. PROGRAM CAPSTONE AND
SYNTHESIS (3). Capstone course in which teacher candidates will review and update their teaching philosophy; showcase their Physical Education master's portfolio; and develop a plan for professional development. PREREQS: KIN 510 [C-]
KIN 565. EMERGENCY MANAGEMENT OF
SPORTS TRAUMA (3). Knowledge and skills related to the specialized care required for serious and/or life-threatening acute athletic related injuries and illnesses. Lec/lab. PREREQS: KIN 511 [C] and admission to the Athletic Training major (MATRN)

KIN 566. GENERAL MEDICAL ASSESSMENT
(3). Prevention, assessment and management of general medical conditions commonly encountered by the athletic trainer. Lec/lab. PREREQS: KIN 565 [C] and admission to the Athletic Training major (MATRN)

## KIN 567. PHARMACOLOGY IN ATHLETIC

TRAINING (3). Pharmacology in sports medicine, topics including, but not limited to, the mechanisms and actions of drugs commonly administered and prescribed in sports medicine environments. PREREQS: KIN 566 [C] and admission to the Athletic Training major (MATRN)

KIN 568. ATHLETIC TRAINING PROGRAM MANAGEMENT (3). Administrative aspects of athletic training program management. Including principles of risk management, strategic and operational planning, medical-legal aspects of athletic healthcare, confidentiality and documentation of patient health information, insurance and third-party reimbursement, personnel issues, and current professional issues. PREREQS: KIN 522 [C] and admission to the Athletic Training major (MATRN)
KIN 569. EVIDENCE-BASED PRACTICE (3).
Principles and skills underlying the utilization of evidence to enhance clinical practice decisionmaking. Includes the development of clinical questions, review and appraisal of relevant literature, and utilization of patient-centered outcome measures. PREREQS: KIN 521 [C] and admission to the Athletic Training major (MATRN)

## KIN 573. MEASUREMENT IN HUMAN

MOVEMENT (3). Measurement theory applied to the study of human movement. Principles and methods for assessing validity and reliability of norm-referenced and criterion-referenced tests in the motor domain. PREREQS: ST 511 or equivalent.

KIN 575. RESEARCH IN HUMAN MOVEMENT
(3). Investigation and evaluation of research methods applicable to human movement study and professional physical education PREREQS: ST 511 or equivalent.
KIN 584. THERAPEUTIC MODALITIES (4). Indications, contraindications, techniques, and effects of various physical agents used in the care and treatment of musculoskeletal injuries and conditions commonly encountered by the athletic trainer. Lec/lab. PREREQS: KIN 521 [C] and admission to the Athletic Training major (MATRN)
KIN 585. UPPER EXTREMITY THERAPEUTIC
EXERCISE (4). Principles and techniques of therapeutic exercise and manual therapy for the upper extremity, cervical spine, and thoracic spine Lec/lab. PREREQS: KIN 586 [C] and admission to the Athletic Training major (MATRN)
KIN 586. LOWER EXTREMITY THERAPEUTIC
EXERCISE (4). Principles and techniques of therapeutic exercise and manual therapy with a
focus on the lower extremity, lumbar spine and ribs. PREREQS: KIN 584 [C] and admission to the athletic training major (MATRN)
KIN 599. SPECIAL TOPICS (1-3). Impact of human movement development on people, their movement behavior, and environment. Topics vary from term to term and year to year. May be repeated when topics differ. This course s repeatable for a maximum of 99 credits. PREREQS: Graduate standing.
KIN 601. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approva required.
KIN 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Instructor's approval required.

KIN 605. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
KIN 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
KIN 607. SEMINAR (1-16). Section 1: Graduate Research (1). Seminar emphasizes student oral presentations of current research topics in exercise and sport science. One credit required of all graduate students. Section 3: Current Developments (1). Discussion of contemporary issues in the exercise and sport science literature. Topics vary by term. Two credits required of all doctoral students. Section 9: International Aspects (1). Discussion of international aspects of study in exercise and sport science. Required of all doctoral students. Graded P/N. This course is repeatable for a maximum of 16 credits.

KIN 610. PROFESSIONAL INTERNSHIP: PHYSICAL EDUCATION (1-15). Field experience in which the term will integrate academic study with classroom teaching experience to learn specific competencies relating to functioning well in the context of the classroom and the school, and demonstrate this competency through the assessment of work by supervisors and by evidence collected and presented in work samples. This course is repeatable for a maximum of 25 credits.
KIN 647. CURRENT TOPICS AND RESEARCH IN ADAPTED PHYSICAL ACTIVITY (3). Current trends and critical research issues in adapted physical activity; focus on international and national trends. Topic will be variable.
KIN 699. SPECIAL TOPICS (1-16). Current issues, trends, and topics in KIN research. May be repeated for credit with different topics. This course is repeatable for a maximum of 25 credits.

## ■ NUTRITION COURSES

NUTR 104. ORIENTATION TO THE NUTRITION
MAJOR (1). Discuss and explore the academic and professional requirements for successful entry into professional careers in dietetics, foodservice systems management, and human nutrition sciences majors. Identify professional resources, career opportunities, markets and trends in these OSU Nutrition major options. Graded P/N.
NUTR 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## NUTR 216. *FOOD IN NON-WESTERN

CULTURE (3). Cultural determinants influencing food habits of humans. Interrelation of eating patterns and socio-cultural, ecological, psychological and economic factors in crosscultural settings. Roles of men and women in food provision. Lec/rec. (Bacc Core Course)
NUTR 225. GENERAL HUMAN NUTRITION (3). The relationship of food, its nutrients and other components to the promotion of health and fitness with emphasis on the young adult. Current health concerns on a national and international level. This
course is for non-majors; NES majors and those in the health sciences should take NUTR 240.

## NUTR 235. SCIENCE OF FOODS (5).

Composition, functional properties, and structure of foods, including modified ingredients. Principles underlying preparation of food products of
standard quality. Lec/lab. PREREQS: (CH 123 [C-] or CH 223 [C-] or ( (CH 263 [C-] or CH 263 H [C-] or CH 273 [C-] ) and (CH 233 [C-] or CH 233H [C-]) ))
NUTR 240. HUMAN NUTRITION (3). An
introductory nutrition course for exercise science, nutrition, dietetics, food science, and health science majors who have taken general chemistry. Concepts of nutrient metabolism and utilization, nutrient deficiencies and toxicities and their relationship to disease prevention and treatment. PREREQS: (CH 121 [D-] or CH 224H [D-] or (CH 221 [D-] or CH 231 [D-] or CH 231H [D-] ) ) and may be taken concurrently with NUTR 241.

## NUTR 241. APPLICATIONS IN HUMAN

NUTRITION (1). Application of nutrition theory from NUTR 240 using a dietary project and hands-on recitation activities. A key focus of the course will be on applying nutrition theory. Rec. PREREQS: NUTR 240* [C-]
NUTR 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
NUTR 306. PROJECTS (1-16). This course
is repeatable for a maximum of 36 credits. PREREQS: Departmental approval required.
NUTR 307. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

## NUTR 311. FOODSERVICE PRODUCTION AND

 PURCHASING (4). Food production, purchasing, facility and materials management in foodservice operations. Quantity production styles, safety and sanitation, service methods and equipment. Lec/ lab/rec. PREREQS: NUTR 235 [C-]NUTR 312. *ISSUES IN NUTRITION AND
HEALTH (3). Impact of nutrition as one component of complex environmental, behavioral, social, and genetic factors significant to health promotion. Apply scientific knowledge to current health issues of changing dietary patterns, technological development in food products and nutrition controversies. Recognize economic and public policy implications. Lec/rec. (Bacc Core Course) PREREQS: (NUTR 225 [D-] or NUTR 240 [D-] ) and completion of science requirement in baccalaureate core.

## NUTR 319. PROMOTING FOOD AND

NUTRITION (3). Strategies in promoting products, services or ideas; negotiating, advertising, public policy, consumer service, social marketing, market research, trends and strategies. Lec/lab. PREREQS: (NUTR 240 [C-] and NUTR 241 [C-] )
NUTR 325. NUTRITION THROUGH THE LIFE
CYCLE (3). Nutritional needs and concerns in pregnancy and lactation, infancy, childhood, adolescence, adult and later years. PREREQS: ( (NUTR 240 [C-] or NUTR 225 [C-] ) and NUTR 241 [C-] ) and /or equivalent, junior standing recommended.

## NUTR 341. NUTRITION FOR EXERCISE

(3). Review the interrelationship between nutrition and exercise, including macronutrient, micronutrient and fluid needs for active individuals. CROSSLISTED as EXSS 341, KIN 341. PREREQS: (KIN 324 [C-] or EXSS 324 [C-] ) and NUTR 240 [C-]
NUTR 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

NUTR 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

NUTR 403. THESIS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
NUTR 405. READING AND CONFERENCE (116). Graded $P / N$. This course is repeatable for a
maximum of 16 credits.
NUTR 406. SPECIAL PROBLEMS; PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
NUTR 407. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

NUTR 408. WORKSHOP (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

NUTR 409. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

NUTR 410. FIELD EXPERIENCE (3-15).
Supervised work experience with professionallevel responsibilities in community agency or business firm. Supplementary conferences, readings, reports. Supervised by agency/firm and instructor. For advanced students. Applications made and approved term preceding enrollment. Graded P/N. This course is repeatable for a maximum of 50 credits.
NUTR 416. ${ }^{\wedge}$ CULTURAL ASPECTS OF FOODS (3). Regional, ethnic, and religious influences on food patterns; worldwide trends in food practices. Laboratory experience with foods from several cultures. Lec/lab. (Writing Intensive Course) PREREQS: NUTR 235 [C-]
NUTR 417. HUMAN NUTRITION SCIENCE (4). Application of biochemistry and physiology to nutrition of the individual. PREREQS: BB 350 [C-] and /or equivalent courses and one physiology course.

NUTR 418. HUMAN NUTRITION SCIENCE (4). Application of biochemistry and physiology to nutrition of the individual. PREREQS: NUTR 417 [C-] and biochemistry, physiology.
NUTR 423. COMMUNITY NUTRITION (4).
Meeting nutritional needs in community settings; nutritional status of individuals and groups; programs of public and private agencies and industry; intervention techniques. Roles of community nutritionist. PREREQS: NUTR 325 [C-]

## NUTR 430. MEDICAL NUTRITION THERAPY

 I (4). Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions are addressed during the three-course sequence using lecture, case studies and assessment recitation sessions. Lec/lab/rec. PREREQS: (BB 350 [C-] or (BB 450 [C-] and BB 451 [C-] ) ) and ( (BI 233 [C-] and BI 243 [C-] ) or (Z 333 [C-] and Z 343 [C-] ) ) and NUTR 417* [C-] and NUTR 439 [C-]NUTR 431. MEDICAL NUTRITION THERAPY 2 (4). Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions are addressed during the three-course sequence using lecture, case studies and assessment recitation sessions. PREREQS: NUTR 430 [C-]
NUTR 432. MEDICAL NUTRITION THERAPY 3 (3). Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions are addressed during the three-course sequence using lecture, case studies and assessment recitation sessions. PREREQS: NUTR 431 [C-]
NUTR 439. ^COMMUNICATIONS IN DIETETICS (3). Theory and practice in food and nutrition communications in dietetics. Experience in nutritional counseling and interviewing, employee training and nutritional education materials development, public speaking, and media presentation strategies. (Writing Intensive Course) PREREQS: NUTR 325 [C-]
NUTR 446. MANAGING FOOD AND NUTRITION SERVICES (4). Overview of organizational structure, functions of managers in food and nutrition service organizations: human and financial resources, regulatory influences, health care organizations, current issues in operations. Lec/rec. PREREQS: NUTR 311 [C-]

NUTR 447. MANAGEMENT OF FOOD SYSTEMS
LABORATORY (3). Application of theory in managing a university food service as part of a student team: planning, production, projecting resource needs, evaluation of outcomes and financial goals. PREREQS: NUTR 446 or NUTR 546

NUTR 499. SPECIAL TOPICS IN DIETETICS
(2-6). Current issues, trends, and topics in nutrition and dietetics. May be repeated for credit when topic varies. This course is repeatable for a maximum of 12 credits.
NUTR 501. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.
NUTR 502. INDEPENDENT STUDY (1-16).
Graded $\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 16 credits.

NUTR 503. THESIS (1-16). Graded P/N. This course is repeatable for a maximum of 999 credits.

NUTR 505. READING AND CONFERENCE (116). Graded $P / N$. This course is repeatable for a maximum of 16 credits.
NUTR 506. SPECIAL PROBLEMS; PROJECTS (1-16). Graded $P / N$. This course is repeatable for a maximum of 16 credits.
NUTR 507. SEMINAR (1-16). 1 credit graded P/N. This course is repeatable for a maximum of 16 credits.
NUTR 508. WORKSHOP (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.
NUTR 509. PRACTICUM (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

NUTR 510. FIELD EXPERIENCE: INTERNSHIP
(1-16). Supervised work experience with professional-level responsibilities in community agency or business firm. Supplementary conferences, readings, reports. Supervised by agency/firm and instructor. Limited to students admitted to degree program. Application made and approved in the term preceding enrollment. No more than 6 credits may be applied to a master's degree program. This course is repeatable for a maximum of 6 credits.
NUTR 514. HEALTH BENEFITS OF FUNCT FOODS, NUTRACEUT, DIETARY SUPPLEMEN (3). Functional foods, nutraceuticals and dietary supplements represent a rapidly expanding segment of domestic and international markets. This course will overview the principles and procedures necessary to evaluate and market these products. The chemistry and mechanisms of major nutraceutical ingredient categories and current scientific information supporting their biochemical and physiological efficacy will be addressed. Special dietary products, such as medical, weight control, sport, and herbal supplements, will be addressed. Regulatory aspects of labeling and structure-function claims will be covered. CROSSLISTED as FST 514. PREREQS: BB 350 and CH 332
NUTR 516. CULTURAL ASPECTS OF FOODS
(3). Regional, ethnic, and religious influences on food patterns; worldwide trends in food practices. Laboratory experience with foods from several cultures. Lec/lab. PREREQS: NUTR 235
NUTR 517. HUMAN NUTRITION SCIENCE (4). Application of biochemistry and physiology to nutrition of the individual. PREREQS: BB 350 or equivalent courses and one physiology course.
NUTR 518. HUMAN NUTRITION SCIENCE (4).
Application of biochemistry and physiology to nutrition of the individual. PREREQS: NUTR 517 [C] and biochemistry, physiology.
NUTR 523. COMMUNITY NUTRITION (4). Meeting nutritional needs in community settings; nutritional status of individuals and groups; programs of public and private agencies and industry; intervention techniques. Roles of community nutritionist. PREREQS: NUTR 325

NUTR 530. MEDICAL NUTRITION THERAPY
I (4). Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions are addressed during the three-course sequence using lecture, case studies and assessment recitation sessions. Lec/lab/rec. PREREQS: BB 350 and BI 233 and BI 243 and NUTR 417* and NUTR 439
NUTR 531. MEDICAL NUTRITION THERAPY 2 (4). Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions are addressed during the three-course sequence using lecture, case studies and assessment recitation sessions. PREREQS: NUTR 430
NUTR 532. MEDICAL NUTRITION THERAPY 3 (3). Principles and practices related to implementation and documentation of the nutrition care process in dietetics. Diet-related conditions addressed during the three-course sequence using lecture, case studies and assessment recitation sessions. PREREQS: NUTR 431
NUTR 535. NUTRITION AND EXERCISE: MACRONUTRIENTS AND ENERGY
METABOLISM (3). Current research examining the interrelationship of macronutrients and exercise and energy balance will be reviewed, including their roles in health, disease prevention and exercise performance. PREREQS: NUTR 517 or KIN 533 or equivalent.

NUTR 539. COMMUNICATIONS IN DIETETICS
(3). Theory and practice of food and nutrition communications in dietetics. Experience in nutritional counseling and interviewing, employee training and nutritional education materials development, public speaking, and media presentation strategies. PREREQS: NUTR 325

## NUTR 546. FOODSERVICE ORGANIZATIONS

(3). Overview of organizational structure, functions of managers in foodservice organizations: human resources, regulatory influences, health care organizations, current issues in operations. Led/ rec. PREREQS: NUTR 311 and NUTR 445
NUTR 550. NUTRITIONAL STATUS (4). Research studies with emphasis on estimation of nutrient intake and assessment of nutritional status, including biochemical, clinical, epidemiologica and anthropometric measures. Interpretation of status indicators. PREREQS: NUTR 418 or NUTR 518
NUTR 599. SPECIAL TOPICS IN NUTRITION
(3-6). Current issues, trends, and topics in nutrition and health. May be repeated for credit when topic varies. This course is repeatable for a maximum of 18 credits.
NUTR 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
NUTR 602. INDEPENDENT STUDY (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.
NUTR 603. THESIS (1-16). Graded P/N. This course is repeatable for a maximum of 999 credits.
NUTR 605. READING AND CONFERENCE (116). Graded $P / N$. This course is repeatable for a maximum of 16 credits.

NUTR 607. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

NUTR 609. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

NUTR 610. INTERNSHIP (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

## NUTR 617. ADVANCED MACRONUTRIENT

METABOLISM (3). Focuses on human macronutrient metabolism. Macronutrient topics include water, carbohydrate, lipid, amino acid/ protein, lipid and carbohydrate and energy metabolism. Emphasis is placed on the integration of metabolism at the molecular, biochemical and physiological level. Moreover, the class examines
contemporary issues relevant to macronutrient metabolism and human disease. Offered even years in spring term. PREREQS: NUTR 418 or NUTR 518

## NUTR 618. ADVANCED MICRONUTRIENT

METABOLISM (3). Focus is on human micronutrient metabolism. Topics include micronutrients (vitamins and minerals), phytochemicals and mammalian metabolism. Emphasis will be placed on the integration of micronutrient/phytochemical metabolism at the molecular, biochemical and physiological level. Moreover, the class examines contemporary issues relevant to micronutrient/phytochemical metabolism and human disease. PREREQS: NUTR 418 or NUTR 518. Each student is expected to have a basic knowledge of the biochemistry and physiology. As such, graduate level courses in biochemistry and physiology are highly recommended.
NUTR 699. SPECIAL TOPICS IN NUTRITION RESEARCH (3-16). Current issues, trends, and topics in nutrition research. May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits.

## ■ PHYSICAL ACTIVITY COURSES

PAC 100. ADAPTED PHYSICAL ACTIVITY (1). Individual workout for students with permanent or temporary physical disabilities and for students enrolled in another PAC who sustain an injury. This course is repeatable for a maximum of 11 credits.

PAC 102. AQUA AEROBICS (1). Fitness class using a variety of movements in shallow and deep water, mostly in a vertical position. Do not need swimming skills. This course is repeatable for a maximum of 11 credits.

PAC 103. DEEP WATER AEROBICS (1). Fitness class using a variety of movements in a deep water pool, mostly in a vertical position. Should be comfortable in deep water. This course is repeatable for a maximum of 11 credits.
PAC 104. INTRODUCTION TO ACTIVITY (1). Students will be introduced to a variety of different activities, providing exposure to skills, knowledge, and gameplay of individual sports and activities. Activities may include court sports, aquatics, mind/ body practices, outdoor team sports, individual sports, and fitness activities. This course is repeatable for a maximum of 11 credits.
PAC 105. CPR/FIRST AID (1). Introduces cardiac and first aid emergency response procedures. Emphasis placed on safe response, chain of survival, quality CPR (adults, children, infants and team responses), use of an AED, medical emergencies, injury emergencies and environmental emergencies. Students successfully completing the American Heart Association certification requirements will be issued a Heartsaver First Aid and BLS (Basic Life Support) for the Healthcare Provider certification at the end of the course. This course is repeatable for a maximum of 11 credits.

PAC 107. DANCE AEROBICS (1). Fitness class set to music using a variety of movement; high/low intensity cardiovascular workout supplemented with strength and flexibility exercises. This course is repeatable for a maximum of 11 credits.
PAC 108. STEP AEROBICS (1). Low-impact, high intensity workout adjustable to all fitness levels utilizing adjustable height benches. Strengthening and flexibility exercises included. This course is repeatable for a maximum of 11 credits.
PAC 109. POWER STEP AEROBICS (1).
Advanced high intensity step workout that includes plyometric jumps and movements through a wide range of motion. This course is repeatable for a maximum of 11 credits. PREREQS: PAC 108, Step Aerobics or equivalent.

PAC 110. INTRODUCTION TO WHITE WATER KAYAKING (2). Students will learn fundamentals of white water kayaking in sheltered water based
on the internationally recognized British Canoe (BC) teaching and skills certification system. Emphasis is on activity and basic skills. See class schedule for the location, website, and class schedule specific to the course. This course runs for six class sessions of 3 hours (Fridays), and one mandatory Saturday (5-hour) session. The entire class lasts for six weeks. This course is repeatable for a maximum of 11 credits.
PAC 111. INTRODUCTION TO CANOEING (2). Students will learn fundamentals of canoeing in sheltered water based on the internationally recognized British Canoe (BC) teaching and skills certification system. Emphasis is on activity and basic skills. See class schedule for the location, website, and class schedule specific to the course This course runs for six class sessions of 3 hours (Fridays), and one mandatory Saturday (5-hour) session. The entire class lasts for six weeks. This course is repeatable for a maximum of 11 credits.

PAC 113. BADMINTON I (1). Singles and doubles skills, practice, rules, strategies and play. This course is repeatable for a maximum of 11 credits.
PAC 114. BADMINTON II (1). Intermediate skill development in badminton. This course is repeatable for a maximum of 11 credits. PREREQS: Fundamental skills, rules and strategy of singles and doubles play.
PAC 116. BASKETBALL I (MEN/WOMEN) (1). Fundamental basketball skills, drills, rules, strategies, and practice. Game play appropriate for the skill level. This course is repeatable for a maximum of 11 credits.

PAC 117. BASKETBALL COMPETITIVE (1).
Team play, individual and team skills developed and refined, competitive round robin tournaments. This course is repeatable for a maximum of 11 credits. PREREQS: Prior competitive experience
PAC 120. MOUNTAIN BIKING (1). Touring trails in Corvallis area; riding techniques, safety, maintenance, environmental concerns. Required equipment: mountain bike, tire repair kit, helmet. This course is repeatable for a maximum of 11 credits.
PAC 121. BILLIARDS (1). Skills, technique, strategy, game knowledge as introduction to billiards (pool), a «cue, sport; rules and gaming for variations of pocket billiards; practice and class tournament play. This course is repeatable for a maximum of 11 credits.

PAC 122. BODY SCULPTING (1). Fitness workout set to music using lighter resistance training aids such as dumbbells, resistance tubing, bands, and aerobic steps. This course is repeatable for a maximum of 11 credits.

PAC 123. BOWLING I (1). Fundamentals of the game including etiquette, spot bowling, natural hook and straight ball delivery, scoring, handicap computation, spare pickup, and error correction. Additional fee; equipment supplied. This course is repeatable for a maximum of 11 credits.
PAC 124. BOWLING II (1). Review and refinement of basic fundamentals of bowling. Emphasis on spot bowling, adjusting for lane conditions, choices in equipment, league play, and mental training This course is repeatable for a maximum of 11 credits. PREREQS: Bowling I or equivalent.
PAC 126. CARDIO KICKBOXING I (1). High intensity group workout set to motivational music and combining skills and techniques from boxing, kickboxing, and other martial arts. This course is repeatable for a maximum of 11 credits.

PAC 127. CARDIO KICKBOXING II (1).
Applies what students have learned in basic cardio kickboxing and increases the difficulty of combinations in a way that intensifies the workout in complexity and cardio training; sometimes referred to as turbo kickboxing. This course is repeatable for a maximum of 11 credits.
PAC 129. CARDIO COMBO (1). Combination of aerobic training classes that use music such
as Cardio Kickboxing, Body Sculpture, Sports Conditioning, and/or Step Aerobics. Actual curriculum may vary with instructors. This course is repeatable for a maximum of 11 credits.
PAC 130. CONDITIONING (1). Total body approach to fitness, cardiorespiratory conditioning muscular strength and endurance; flexibility emphasized. May follow a specific training format, e.g., ROTC section follows Army conditioning format. This course is repeatable for a maximum of 11 credits.
PAC 131. SNOWBOARD-SKI CONDITIONING (1). Strength, muscular endurance, flexibility, balance, and cardiovascular exercises specific to downhill skiing and snowboarding; designed to help prepare students for participation in these sports. This course is repeatable for a maximum of 11 credits.
PAC 133. DANCE: TAP I (1). Individual and group dance with specialized shoes; basic step technique and vocabulary; warm up exercises progressing into rhythmic combinations performed to music; culminates in full routine to music. This course is repeatable for a maximum of 11 credits.
PAC 135. BALLETSPORT: BALLET SKILLS FOR ATHLETES (1). Fundamental ballet technique to enhance balance, agility, alignment, strength and rhythmic movement in sports. Stretching techniques and Pilates mat-work included. No prior dance experience needed. All students welcome. Additional fee for accompanist. This course is repeatable for a maximum of 11 credits.

PAC 136. DANCE: BALLET I (1). Introduction to basic ballet technique and aesthetics, terminology, alignment, stretch and strength exercises. No previous dance experience needed. Additional fee for accompanist. This course is repeatable for a maximum of 11 credits.
PAC 137. DANCE: BALLET II (1). Review and practice of beginning ballet technique, introduction of more advanced stretches, steps, and combinations. Additional fee for accompanist. This course is repeatable for a maximum of 11 credits. PREREQS: Ballet I or previous ballet experience.
PAC 138. DANCE: BALLET III (1). Intermediate and advanced ballet technique, comprehensive exploration of the discipline. Additional fee for accompanist. This course is repeatable for a maximum of 11 credits. PREREQS: Ballet II, previous comparable experience or instructor approval required.
PAC 140. DANCE: JAZZ I (1). Introduction to jazz dance, technique, isolations, and combinations. Different jazz styles are explored. No previous dance experience is necessary. This course is repeatable for a maximum of 11 credits.

PAC 141. DANCE: JAZZ II (1). Intermediate jazz technique, isolations and combinations. This course is repeatable for a maximum of 11 credits. PREREQS: Jazz I or comparable experience.
PAC 142. DANCE: JAZZ III (1). Advanced approach to jazz technique; challenging warm ups, combinations, and dances. Performance opportunity. This course is repeatable for a maximum of 11 credits. PREREQS: Jazz II, comparable experience, departmental approval required.
PAC 145. DANCE: MODERN I (1). Introduction to modern dance movement fundamentals. Technique, stretch, strength, and alignment are included, as well as an appreciation for movement expression. No previous dance experience needed. Additional fee for accompanist. This course is repeatable for a maximum of 11 credits.
PAC 146. DANCE: MODERN II (1). An intermediate level of modern dance technique and movement expression. Additional fee for accompanist. This course is repeatable for a maximum of 11 credits. PREREQS: Modern Dance I or comparable experience.

PAC 147. DANCE: MODERN III, OREGON DANCE PERFORMANCE (1). Modern dance advanced technical skills, compositions, and combinations. Additional fee for accompanist. This course is repeatable for a maximum of 11 credits. PREREQS: Previous intermediate modern dance experience or instructor approval.

PAC 148. DANCE: CUBAN SALSA I (MEN/
WOMEN) (1). Foundations of Cuban Salsa (Casino) as well as Rueda de Casino with focus on musical development and fundamentals of leading and following in partner dance. This course is repeatable for a maximum of 11 credits.

PAC 150. CULTURAL WORLD DANCE (MEN/
WOMEN) (1). Introduction to traditional dance forms from Europe, Israel, North America and Asia, focusing on movement, cultural heritage, history, and diversity. This course is repeatable for a maximum of 11 credits.
PAC 151. COUNTRY LINE DANCE (1). Nonpartner dance routines in country western style; musical interpretation, footwork, and sequencing of 20 different routines. This course is repeatable for a maximum of 11 credits.
PAC 152. DANCE: SALSA I (1). Steps and rhythmic accent of Salsa and Merengue style; fundamentals of leading and following; basic moves and combinations. No prior experience needed. This course is repeatable for a maximum of 11 credits.

PAC 153. DANCE: SALSA II (1). Intermediate moves, rhythmic accents and step combinations of Salsa; development of leading and following. This course is repeatable for a maximum of 11 credits. PREREQS: PAC 152 [C-] and /or instructor approval.

PAC 154. DANCE: COUNTRY WESTERN (MEN/WOMEN) (1). Focus on traditional Country Western Swing patterns. Emphasizes fundamentals of leading and following. Also including introduction to waltz, two-step, cowboy cha-cha and 10-step polka. This course is repeatable for a maximum of 11 credits.

PAC 155. DANCE: COUNTRY WESTERN II
(MEN/WOMEN) (1). Build on CW I with advanced waltz, two-step, and cha-cha patterns; introduces schottishe and East Coast swing. This course is repeatable for a maximum of 11 credits. PREREQS: Country Western I or instructor approval.

PAC 156. DANCE: COUNTRY WESTERN III
(MEN/WOMEN) (1). Advanced two-step patterns and styling with a focus on musical interpretation; development of leading and following. This course is repeatable for a maximum of 11 credits. PREREQS: PAC 155 [C-]

PAC 158. DANCE: BEGINNING SWING (MEN/
WOMEN) (1). Introduction to single time, double time, and triple time (jitterbug) swing; variations for each style, covering most swing music rhythms. Emphasizes fundamentals of leading and following. Men/women. This course is repeatable for a maximum of 11 credits.

PAC 159. DANCE: BALLROOM I (MEN/WOMEN)
(1). Posture and alignment, fundamentals of leading and following, basic steps and variations for waltz, foxtrot, swing, tango, and cha-cha. This course is repeatable for a maximum of 11 credits.
PAC 160. DANCE: BALLROOM II (MEN/
WOMEN) (1). Additional steps and patterns of popular ballroom dances. This course is repeatable for a maximum of 11 credits. PREREQS: PAC 159 [C-]
PAC 161. DANCE: BALLROOM III (MEN/
WOMEN) (1). Styling; additional dances: rhumba, silver fox trot, and Viennese waltz; advanced dance figures for tango and cha-cha. This course is repeatable for a maximum of 11 credits.
PREREQS: PAC 160 [C-]
PAC 162. DANCE: SWING II (MEN/WOMEN) (1). Social dance focusing on Twenties-style

Charleston, pure Balboa and Balboa-Swing, and Blues Dance. This course is repeatable for a maximum of 11 credits.

PAC 163. DANCE: LATIN I (1). Latin dances including cha-cha, mambo, salsa, rhumba, merengue, bolero, salsa, and paso doble. Emphasis on proper styling and technical execution of each dance; effective leading and following techniques. This course is repeatable for a maximum of 11 credits. PREREQS: PAC 159 [C-]
PAC 164. DANCE: LATIN II (1). Continuation of Latin Dance I; more advanced dance patterns in cha-cha, salsa, merengue, rhumba and samba. Introduction to mambo and bolero; emphasis on technical and stylistic details of each dance. This course is repeatable for a maximum of 11 credits. PREREQS: Latin I.
PAC 165. DANCE: WEST COAST SWING (MEN/ WOMEN) (1). Focus on style, technique and many different step patterns of the west coast swing dance. This course is repeatable for a maximum of 11 credits. PREREQS: (PAC 154 [C-] or PAC 159 [C-])
PAC 166. BALLROOM 2 STEP, HUSTLE (MEN/ WOMEN) (1). Smooth, romantic social dance that is neither ballroom, Latin, nor swing but a rhythm dance identified as club-style, danced to contemporary ballad-like music. Hustle is fast-paced, swing-related dance to disco beat. Class encompasses intermediate step patterns, technique and styling, stationary, traveling patterns. This course is repeatable for a maximum of 11 credits. PREREQS: PAC 160 [C-]

PAC 167. DANCE: LINDY HOP (1). Ballroom dance style based on original eight-count swing dance evolved in Harlem ballrooms during the late 1920s; styling emphasized. This course is repeatable for a maximum of 11 credits. PREREQS: (PAC 158 [C-] or PAC 159 [C-] )
PAC 168. DANCE: LINDY HOP II (MEN/WOMEN) (1). Intermediate patterns, syncopations, play techniques, and styling with a focus on musical interpretation in the Lindy Hop style; development of leading and following. This course is repeatable or a maximum of 11 credits. PREREQS: PAC 167 [C-]
PAC 169. COOL SHOES, BALLROOM PERFORMANCE (MEN/WOMEN) (1). Focus on advanced steps and styling. A dance suite is choreographed each term. Two to three performances each term. This course is repeatable for a maximum of 11 credits. PREREQS: Departmental approval by audition required.

PAC 170. DANCE: WEST COAST SWING II (MEN/WOMEN) (1). Intermediate patterns, syncopations, play techniques, and styling with a focus on musical interpretation; development of leading and following. This course is repeatable for a maximum of 11 credits. PREREQS: PAC 165 [C-]
PAC 174. FLAG FOOTBALL (1). Skill instruction and practice; drills; strategies, game play of America football; emphasis on teamwork and sportsmanship in a competitive but nonthreatening or stressful environment. This course is repeatable for a maximum of 11 credits.

PAC 178. FLY FISHING I (1). Casting and fishing techniques, lure making, equipment selection, terminology, and regulation for fishing in Oregon's marine environment. This course is repeatable for a maximum of 11 credits.
PAC 179. FLY FISHING II (1). Advanced fly casting and fly fishing techniques for trout, flytying, equipment selection, basic aquatic organism identification, terminology, and regulations for fishing in Oregon's freshwater environment. This course is repeatable for a maximum of 11 credits.
PAC 180. STEELHEAD FISHING (1). Casting and fishing techniques, lure making, equipment selection, terminology, and regulations for fishing
in Oregon's marine environment for steelhead. This course is repeatable for a maximum of 11 credits.

PAC 181. ADVANCED FLY TYING (1). Tying of artificial flies useful for trout, steelhead, and bass fishing; dubbing techniques, spinning hair parachute hackling, and precise winging methods included. This course is repeatable for a maximum of 11 credits. PREREQS: Fly Fishing I or previous fly tying experience.

PAC 182. DISC GOLF I (1). Techniques for throwing discs; equipment, knowledge, etiquette, and rules associated with playing a disc golf course; experience playing practice and official disc golf courses. This course is repeatable for a maximum of 11 credits.

PAC 184. GOLF I (1). Basic fundamental principles in all phases of golf; rules, terminology, etiquette, safety and scoring. Equipment provided This course is repeatable for a maximum of 11 credits.

PAC 185. GOLF II (1). Individual practice and course play; skill refinement as continuation of Golf I. Equipment available. Course play expected, additional fee. This course is repeatable for a maximum of 11 credits. PREREQS: Golf I or equivalent.

PAC 186. GOLF III (1). Advanced skills, knowledge involved in competitive play. Course play expected, additional fee. This course is repeatable for a maximum of 11 credits. PREREQS: Handicap below 15 or Golf II; competitive play.
PAC 187. GOLF ON TOUR (1). Area golf courses are played in a variety of competitive formats to improve on-course competitive performance; includes rules understanding and handicap procedures. This course is repeatable for a maximum of 11 credits. PREREQS: GOLF II/ III (PAC 184/PAC 185) or instruction from an experienced coach or instructor; the ability to consistently score under 95, and the ability to keep a 4-hour pace for 18 holes. Previous competitive golf experience is preferred.

PAC 188. GYMNASTICS (1). Fundamental techniques on vault, bars, beam, and floor. This course is repeatable for a maximum of 11 credits.

PAC 189. GYMNASTICS II (1). Build upon previous gymnastics experiences or classes; floor exercise, uneven parallel bars, vault, minitrampoline and beam apparatus are available. This course is repeatable for a maximum of 11 credits. PREREQS: Gymnastics I or competitive experience.
PAC 190. KARATE (1). Instruction in traditiona Japanese karate basic striking and blocking techniques, kata (forms), philosophy, conditioning, and etiquette. Self-defense applications are also emphasized. This course is repeatable for a maximum of 11 credits.
PAC 192. JUDO I (1). Skill instruction in landing, throwing and grappling for this style of martial arts; etiquette for practice and competition; basic knowledge of vocabulary, rules and scoring. This course is repeatable for a maximum of 11 credits.

PAC 193. JUDO II (1). Intermediate skill instruction in landing, throwing, pins, chokes in Kodokan Judo style; principles of Seiryoku-Zenyou and Jita-Kyouei designed to help individuals become better members of society through training body and mind; instruction for competition knowledge and skills. Judo etiquette for practice and competition expected. This course is repeatable for a maximum of 11 credits. PREREQS: PAC 192 or instructor approval.

PAC 194. PILATES (1). Non-impact, invigorating approach to physical conditioning and mind/body awareness; helps develop core body strength, improve posture and balance, and increase muscle endurance, tone, flexibility. This course is repeatable for a maximum of 11 credits.

PAC 195. PILATES II (1). Progression of Joseph Pilates mat exercises; emphasis on intermediate and advanced levels; application of Pilates' principles to new exercises; use of props; application of principles to daily living. This course is repeatable for a maximum of 11 credits PREREQS: PAC 194, Pilates.

PAC 197. PICKLEBALL (1). Fast-paced, selfofficiated net game with similarities to tennis, badminton, table tennis, and racquetball. Course covers rules, strategies, technique, preparation for play, and includes extensive active practice and play; played with two, three, or four people. This course is repeatable for a maximum of 11 credits.

PAC 199. SPECIAL TOPICS (1-3). Experimental or new classes. This course is repeatable for a maximum of 11 credits.

PAC 201. RELAXATION (1). Introduction to relaxation techniques; posture awareness, gentle stretching, source of your energy, and creative imagery to relieve stress. This course is repeatable for a maximum of 11 credits.

PAC 205. ROWING, CREW I (MEN/WOMEN) (1). Introduction to the sport of rowing; designed for the novice (beginner). Includes basic technique and terminology, related water safety, and development of strength, endurance, and flexibility. This course is repeatable for a maximum of 11 credits. PREREQS: Swim Test (1)

PAC 209. ROCK CLIMBING, CONDITIONING
(1). Physical conditioning for, and instruction in, the skills and techniques of rock climbing; environmental impact issues; held at on-campus indoor climbing center. This course is repeatable for a maximum of 11 credits.

PAC 210. ROCK CLIMBING, CONDITIONING II (1). Advanced technical skills, training techniques, rescue rigging, anchor and belay systems, basic aid climbing, hauling, and other big wall techniques; three-stage training; practice. Held at on-campus climbing center. Additional fee may be required for off-campus practice. This course is repeatable for a maximum of 11 credits. PREREQS: Rock Climbing and Conditioning I or instructor approval.
PAC 212. RUNNING, JOGGING (1).
Cardiorespiratory fitness with scenic running routes; training, nutrition, and physiology. Beginning and intermediate level. This course is repeatable for a maximum of 11 credits.

PAC 213. RUNNING: 10K TRAINING (1). Intermediate to advanced conditioning and training program for road racing. This course is repeatable for a maximum of 11 credits. PREREQS: Prior training in running.

PAC 214. HALF MARATHON TRAINING (2).
Progressive training combining walking, running core strengthening, interval techniques in preparation for a 13.1 mile (1/2 marathon) event Open to all levels; may choose to walk, walk/run, or run. This course is repeatable for a maximum of 11 credits.

PAC 215. RUGBY, TOUCH (1). Basic skills of open field rugby; emphasis on ball handling and attacking strategy; rules and history; game play. This course is repeatable for a maximum of 11 credits.
PAC 217. SELF DEFENSE (1). Nonviolent self-defense. Develop self-confidence and skills for assault situations. Conditioning and practical skills. Men and women, all levels. This course is repeatable for a maximum of 11 credits.

PAC 224. TELEMARK SKIING (1). Winter sport that is a cross between cross country and downhill skiing. Requires telemark equipment where the heel is unattached. Class accommodates all levels and practices on the downhill slopes. Additiona fee covers bus transportation, lessons, and lift ticket. Rental of equipment is not included. This course is repeatable for a maximum of 11 credits.

PAC 225. DOWNHILL SKIING (1). Travel to area facilities, 1-1/2 hour lesson followed by open practice, students grouped according to skill level: beginner, intermediate, advanced, racer. Special fee covers bus transportation, lessons, and lifts. Additional fee for rentals. This course is repeatable for a maximum of 11 credits.

PAC 227. SNOWBOARDING (1). Travel to area facilities, 1 1/2 hour lesson followed by open practice, students grouped according to skill level: beginner, intermediate, advanced. Special fee covers bus transportation, lessons, and lifts. Additional fee for rentals. This course is repeatable for a maximum of 11 credits.

PAC 229. SOCCER I (1). Basic skills of controlling the ball; conditioning; lead-up games; team play. This course is repeatable for a maximum of 11 credits.
PAC 230. SOCCER II (1). Review of basic skills of offense and defense in controlled game play; concepts of team position and play, pressure and attack. This course is repeatable for a maximum of 11 credits. PREREQS: Previous soccer experience.

PAC 231. SOCCER III (1). High level soccer skills; team play and transition concepts; set plays and alignments for both offense and defense. This course is repeatable for a maximum of 11 credits. PREREQS: Soccer II or competitive playing experience.

PAC 233. SOCCER: INDOOR (1). Skill instruction and development; strategies and rules for indoor play; game play in indoor gymnasium. This course is repeatable for a maximum of 11 credits. PREREQS: Previous soccer experience.

PAC 236. SOFTBALL, WHIFFLEBALL (1). Skills, rules, strategies, practice, and game play of the popular outdoor slow pitch game. Modified softbal with whiffleball when play is indoors. This course is repeatable for a maximum of 11 credits.
PAC 242. SCUBA: OPEN WATER (2). Lecture includes physiology, water environment, equipment, and techniques for fundamental SCUBA diving. Laboratory includes practice in techniques, skills, and equipment usage; sessions held in pool and open water. Successful completion leads to PADI certification. Additional fee covers most equipment, texts, certification, and open water dive trip. This course is repeatable for a maximum of 11 credits. PREREQS: Mandatory 200-yard swim, 10-minute survival skills and good health.
PAC 243. SCUBA: ADVANCED OPEN WATER
(1). Classroom lecture and laboratory in hypothermics, natural navigation, dive physiology, compass navigation, night and limited visibility procedures, boat diving, search and salvage techniques, deep diving procedures, health for diving, and an introduction to dive rescue. Successful completion of this course can lead to PADI certification. Additional fee. This course s repeatable for a maximum of 11 credits. PREREQS: PAC 242
PAC 244. SCUBA: RESCUE DIVER (1).
Techniques, skills, knowledge, and practice in self-rescue and rescue of others in underwater emergencies; may lead to PADI certification lecture and pool laboratory; open water dive required. Additional fee. This course is repeatable for a maximum of 11 credits. PREREQS: PAC 243 or equivalent.
PAC 245. SCUBA SPECIAL TOPICS (1).
Specialized courses requiring previous certification in SCUBA. Check the current schedule of classes for more information and prerequisites. Possible classes: altitude diver, night diver, search and recovery, deep diver, underwater navigation, equipment specialist. Additional fee. This course is repeatable for a maximum of 11 credits. PREREQS: PAC 242

PAC 246. DIVEMASTER TRAINING (2). Entry level PADI certification course for preparation
to instruct SCUBA; lecture, lab, open water experience; must take two consecutive terms. Additional fee: $\$ 160$ per term. This course is repeatable for a maximum of 11 credits. PREREQS: PAC 244. PADI Advanced, Advanced Plus, and Rescue Diver certifications or equivalent; 20 logged dives.

PAC 247. SURFING (1). Knowledge and fundamental skills of this aquatic sport including history, terminology, safety precautions, the ocean environment, and equipment. Additional fee. This course is repeatable for a maximum of 11 credits. PREREQS: Equivalent to Swim I (PAC 250). Students must pass a swim test in the pool before going into the ocean.
PAC 248. SWIM: NON-SWIMMER (1). Skills for self-rescue; fundamental skills in swimming and safety. Designed for people with a fear of water. Recommended S/U grading. This course is repeatable for a maximum of 11 credits.

PAC 249. LIFEGUARD TRAINING (1). Trains participants in the skills required to become a lifeguard. Emphasis on professional behavior, water rescues, safe response, quality CPR (adults, children, infants, and team responses), use of an AED and first aid. Students successfully completing the American Red Cross certification requirements will be issued a lifeguarding certification at the end of the course. This course is repeatable for a maximum of 11 credits. PREREQS: Basic swimming skills
PAC 250. SWIM I (1). Swimming concepts, survival and breathing techniques, front crawl and elementary backstroke as minimum instruction. This course is repeatable for a maximum of 11 credits. PREREQS: Minimal swimming skill.
PAC 251. LAP SWIM, STROKE ASSISTANCE (1). Noncompetitive swim, exercise program with individual stroke skill assistance. This course is repeatable for a maximum of 11 credits.

PAC 252. SWIM II (1). Fitness swimming, swimming strokes and skills. This course is repeatable for a maximum of 11 credits. PREREQS: 75 yd. front crawl. Swim I skills.
PAC 253. SWIM TRAINING WORKOUT (1). Competitive skills and strokes; emphasis on training. This course is repeatable for a maximum of 11 credits. PREREQS: Ability to do interval training.
PAC 254. COMPETITIVE SWIMMING (1).
Prepares students for competitive swimming and emphasizes lifetime aquatic fitness; interval swim workouts designed for speed and endurance; instruction on legal techniques of strokes and turns; culminates in intra-class swim meet; 2,0003,000 yards/day. This course is repeatable for a maximum of 11 credits. PREREQS: 300 yd . front crawl; 50 yd. backstroke and breast stroke; ability to do interval training.
PAC 256. TAIJI, TAI CHI I (1). Introduction to ancient Chinese 'internal martial art' based upon concepts of Yin and Yang; detailed slow and relaxed form movements provide benefits to body, mind, and spirit. This course is repeatable for a maximum of 11 credits.
PAC 257. TAIJI, TAI CHI II (1). Continuation of study of the Yang-style Taiji form; more in-depth exploration of underlying principles and pushhands exercises. This course is repeatable for a maximum of 11 credits.

PAC 258. TAP DANCE I (1). Basic vocabulary and steps; will emphasize proper technique and include a progression to more rhythmic combinations using a variety of music and creative styles. This course is repeatable for a maximum of 11 credits.

PAC 259. TAP DANCE II (1). An expansion of the skills and vocabulary of Tap Dance I; progression to more advanced and longer combinations; may be opportunities to perform in a concert. This course is repeatable for a maximum of 11 credits. PREREQS: Tap Dance I or instructor approval.

PAC 260. TENNIS I (1). Introduction to fundamental strokes, singles and doubles play, scoring, and basic concepts in tennis. This course is repeatable for a maximum of 11 credits.
PAC 261. TENNIS II (1). Review and refinement of fundamental strokes; volley, lob, return of serve; introduction to singles and doubles strategy. This course is repeatable for a maximum of 11 credits. PREREQS: Tennis I or instructor approval.

PAC 262. TENNIS III (1). Focus on ground stroke, serve consistency; approach shots and overheads; tactics for net and baseline play. This course is repeatable for a maximum of 11 credits. PREREQS: Tennis II or instructor approval.
PAC 264. TEAM HANDBALL/(MEN/WOMEN) (1).
Fast-paced indoor court game that combines skills and strategies similar to water polo, basketball, soccer and hockey; rules, regulations, strategies, and skills introduced and practiced; requires teamwork, cooperation, and court strategy. This course is repeatable for a maximum of 11 credits.
PAC 265. TUMBLING I (1). Technical instruction, progressions, and practice in basic, intermediate, and advanced tumbling skills; emphasis on safety and fitness concepts; floor and mini-trampoline skills; no apparatus instruction. This course is repeatable for a maximum of 11 credits.
PAC 266. TUMBLING II (1). Technical instruction, progressions, safety, and practice building upon skills taught in PAC 265, Tumbling I. This course is repeatable for a maximum of 11 credits. PREREQS: Tumbling I or prior experience.
PAC 268. TRIATHLON TRAINING (2). Training in swimming, running, and bicycling to prepare for triathlon participation. Strategies, transitioning technique, and weight training information; training plan formation; event planning; culminates in class or community event. This course is repeatable for a maximum of 11 credits. PREREQS: Experience in at least one of the three activities.
PAC 271. ULTIMATE FRISBEE (1). Fundamentals for the beginning and intermediate player; individual skill development, rules, game play, and strategy. This course is repeatable for a maximum of 11 credits.

PAC 273. VOLLEYBALL I (1). Fundamental volleyball skills, drills, rules, strategies, and practice. Game play appropriate for skill level. This course is repeatable for a maximum of 11 credits.
PAC 274. VOLLEYBALL II (1). Fundamental skills and knowledge refined; intermediate skills developed, competitive play. This course is repeatable for a maximum of 11 credits. PREREQS: Volleyball I and good fundamental skills.
PAC 275. VOLLEYBALL III (1). Skill refinement and development; intense, highly competitive drills and game situations, doubles through sixes play This course is repeatable for a maximum of 11 credits. PREREQS: Volleyball II and instructor's approval or varsity-level experience.
PAC 278. FITNESS WALKING (1). Establishment of personal fitness programs through walking with emphasis on technique and aerobic components. This course is repeatable for a maximum of 11 credits.

PAC 282. WATER POLO (1). Team game, played in deep water; instruction in skills, drills, strategies techniques; game play; knowledge of rules and terminology. This course is repeatable for a maximum of 11 credits. PREREQS: Swim I skills.
PAC 286. WEIGHT TRAINING: CIRCUITS (1).
Fast-paced fitness class using stations of resistance training exercises. Designed to improve cardiovascular fitness and muscular endurance more than strength. This course is repeatable for a maximum of 11 credits.
PAC 287. WEIGHT TRAINING I (1). Exercise techniques in both free and fixed resistance training equipment; safety procedures,
terminology, and principles of exercise. This course is repeatable for a maximum of 11 credits.
PAC 288. WEIGHT TRAINING II (1). Intermediate level of weight training in free and fixed weights. This course is repeatable for a maximum of 11 credits. PREREQS: Weight Training I.
PAC 292. WRESTLING (1). Collegiate wrestling fall and winter terms; freestyle and Greco wrestling spring term. All levels. This course is repeatable for a maximum of 11 credits.
PAC 293. INTERDISCIPLINARY YOGA (1). Basic yoga poses (asanas) using specific techniques and sequences to promote flexibility, strength, relaxation, and a sense of well-being will be used. Integrative concepts between yoga and our daily life will be examined as well as yoga in relationship to other forms of physical movement. This course is repeatable for a maximum of 11 credits.

PAC 293H. INTERDISCIPLINARY YOGA (1). Basic yoga poses (asanas) using specific techniques and sequences to promote flexibility, strength, relaxation, and a sense of well-being will be used. Integrative concepts between yoga and our daily life will be examined as well as yoga in relationship to other forms of physical movement. This course is repeatable for a maximum of 11 credits. PREREQS: Honors College approval required.
PAC 294. YOGA I (1). Principles and practice of basic yoga postures, techniques of posture alignment, yogi breathing styles and their impact on the body and mind. This course is repeatable for a maximum of 11 credits.
PAC 295. YOGA II (1). Intermediate level course to improve yoga practice and to develop overall deeper understanding of yoga methodology in more advanced posture. This course is repeatable for a maximum of 11 credits. PREREQS: Yoga I or previous yoga experience.
PAC 296. FITNESS YOGA (1). Dynamic sequence of movements and sustained yoga positions; regulated breathing; encourages systematic discipline and approach to life. Open to beginners. This course is repeatable for a maximum of 11 credits.

PAC 297. YOGATHON (1). Expands on knowledge and skills learned in Yoga I or Fitness Yoga through three to five class sessions, each 3-6 hours; longer sessions provide students with an intensive mental and physical experience centering on the concepts of yoga; includes introductory relaxation and meditation skills. This course is repeatable for a maximum of 11 credits. PREREQS: Yoga I or Fitness Yoga highly recommended. PAC 294 and PAC 295 and PAC 296

PAC 299. SPECIAL TOPICS (1-3). Advanced information, skills, practice, and application; experimental and new classes. May have additional fee. This course is repeatable for a maximum of 11 credits. PREREQS: Intermediate to advanced skills in an activity area or instructor approval required
PAC 300. ALI: HIKING LOCAL TRAILS (1). Covers the fundamentals of hiking as a recreational activity and an outdoor travel skill. Content will cover local trails, place history, hiking techniques, clothing and equipment selection, elemental first aid and safety concerns, leave-no-trace principles, and map basics. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits.
PAC 301. ALI: CHALLENGE COURSE
EXPERIENCE (1). Emphasis on gaining practical experience and understanding of various components that occur in challenge course activities/programs; group dynamic mental and physical challenges; cooperative games and initiatives that promote communication, problem solving skills and leadership; Low and High challenge course activities that promote self-
confidence and agility. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits.

## PAC 302. ALI: CHALLENGE COURSE

PRACTICES AND FACILITATION (1). Covers the set up and facilitation of various challenge course low and high course elements as they pertain to ALl's Challenge Course programming. Students will learn facilitation skills, risk management concepts, operational procedures, and technical rescue skills. A passing grade in this course will result in a certificate of completion from the OSU ALI Challenge Course. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits. PREREQS: PAC 301 [C-] and climbing wall instructor, efficient climbers toolbox, self-rescue, or instructor approval.

PAC 303. ALI: CAMP CRAFT (1). Provides basic front-country camping skills such as packing, trip planning, how to dress for different climates/ weather, storm-proofing, knife and axe techniques and safety, stove and kitchen operations, and fire building. This course is repeatable for a maximum of 11 credits.

PAC 304. ALI: BACKPACKING (1). Hiking and camping while carrying all gear; tent set-up, camp site selection, operation of single-burner stoves, loading a backpack, water infiltration, navigation, proper hiking technique, energy conservation; leave-no-trace principles in every aspect of the trip and class; includes classroom instruction and required overnight trip. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits.
PAC 307. ALI: RAFTING (1). An introduction to white water rafting. Students will learn the fundamentals of safe rafting, trip planning and become familiar with the gear associated with rafting. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits.

PAC 308. ALI: CANOEING (1). Designed as an introduction to canoeing. Students learn the fundamentals of safe canoeing, trip planning and become familiar with the gear associated with rafting. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits.

## PAC 311. ALI: STAND UP PADDLEBOARD (1).

 Covers the curriculum for level 1 and 2 American Canoe Association standup paddle board skill courses. Skills include equipment, environmental factors, techniques, preparation and planning, emergency management, and environmental ethics. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits.PAC 313. ALI: CANYONEERING (1). Students will learn the fundamentals of canyoneering, including efficient hiking techniques, safe anchoring belaying and rappelling techniques, and environmental mitigation skills. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits.
PAC 314. ALI: BOULDERING (1). Introduction to the sport of bouldering, a subset of rock climbing using an indoor climbing facility; emphasis on safety, spotting, climbing movement, training techniques and improvement; provides activities that promote muscular strength and endurance, flexibility, and cardiovascular endurance. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits.

PAC 315. ALI: ROCK CLIMBING I (1). Physical conditioning for, and instruction in, the skills and techniques of rock climbing; environmental impact issues; held at on-campus indoor climbing center. PAC courses may not be used to fulfill upperdivision requirements. This course is repeatable for a maximum of 11 credits.

PAC 316. ALI: ROCK CLIMBING II (1). Advanced technical skills, training techniques, rescue rigging, anchor and belay systems, basic aid climbing, hauling, and other big wall techniques; three-stage training; practice. Held at on-campus climbing center. Additional fee may be required for off-campus practice. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits. PREREQS: PAC 315 [C-]
PAC 317. ALI: ROCK CLIMBING III (1). Provides focus on artificial anchor set-up and gym sport lead climbing. We will look at the application of basic and intermediate gear-oriented skills and determine adequate gear practices. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits. PREREQS: (PAC 315 and PAC 316) or intermediate to advanced skills in an activity area or instructor approval required.
PAC 319. ALI: TECHNICAL RAPPELLING (1). Students will learn, practice and hone their skills in the art of technical rappelling. Introduces many different styles, techniques and equipment used for rappelling in a variety of situations. Throughout the course, students will be provided with simple to advanced challenges to overcome. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits.

PAC 320. ALI: MOUNTAINEERING I (1). Snow climbing techniques, anchoring, belaying and rappelling techniques, snow camping/living skills, and wilderness ethics; classroom instruction and required overnight alpine trip. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits.

PAC 321. ALI: MOUNTAINEERING II (1). Building on skills learned in Mountaineering I; rope team/glacier travel experience, fundamentals of crevasse rescue, advanced snow climbing techniques, safe anchoring, belaying and rappelling techniques, snow camping/living skills, and wilderness ethics. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits. PREREQS: PAC 320 [C-]
PAC 322. ALI: ICE CLIMBING (1). Students will learn the fundamentals of ice climbing, including efficient ice climbing techniques, safe anchoring, belaying and rappelling techniques and wilderness ethics. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits.

PAC 324. ALI: WHITE WATER RESCUE (1). Provides an introduction to white water rescue; students learn the fundamentals of white water rescue, scene management, and the necessary gear to perform rescues. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits.

PAC 325. ALI: WILDERNESS FIRST AID (1). Fundamentals of emergency care in a non-urban environment including anatomy, physiology, injury assessment, short-term care, small-group rescues; backcountry emphasis with longterm care and evacuation complications. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits.

## PAC 326. ALI: WILDERNESS LIVING

TECHNIQUES (1). Basic wilderness living techniques, knowledge and skills needed for a student to be ethical and efficient, and have the ability to survive in the outdoors. Special emphasis is placed on building shelters, water purification, navigation, awareness, fire, self-sufficiency and caring for groups in the wilderness. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits.

PAC 327. ALI: ROCK GUIDE SCHOOL (1). Serves as an opportunity to learn the skills for being a rock guide for the ALI. With five days of training and practice in the field at two climbing sites in Oregon, it serves to help students understand the unique challenges of instructing climbing in the outdoor environment. This course may end with Sport Climbing Instructor certification through the Professional Climbing Instructors of America. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits. PREREQS: Efficient climbers toolbox, self-rescue, climbing wall instructor--lead certification, or instructor approval.
PAC 328. ALI: RAFT GUIDE SCHOOL (1). Provides students the skills and guided practice time needed to become competent paddle raft guides. It is a nine-day course that focuses on the development of water reading, raft maneuvering, risk management, and whitewater rescue skills needed by raft guides. Successful completion of the course will result in a certificate of completion from the American Canoe Association (ACA). PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits.

## PAC 329. ALI: WILDERNESS FIRST

RESPONDER (2). Fundamentals of emergency care in a non-urban environment, including physiology, injury assessment, short-term care, anatomy, and small-group rescues. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits. PREREQS: CPR certification.

PAC 330. ALI: SNOW TRAVEL AND CAMPING (1). An introduction to traveling in the backcountry in adverse weather conditions that often accompany winter. Topics covered include cross country touring, snow shoeing, winter camping techniques, and winter safety considerations including introducing avalanche safety. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits.

PAC 331. THE ART OF FLY FISHING (1).
Students will be introduced to fly fishing skills such as casting, knot tying, safety considerations, fly selection, and ways to approach water. There will be a general overview of common places and species to fish in Oregon and other locations. This course combines approximately 30 hours of instruction, online activities, and assignments for 1 credit. PAC courses may not be used to fulfill upper-division requirements. This course is repeatable for a maximum of 11 credits. COREQS: ENG 225, FW 112

## SCHOOL OF SOCIAL AND BEMAVIORAL HEALTH SCIENCES

Karen Hooker, School Head

Health Management and Policy
Public Health

The School of Social and Behavioral Health Sciences comprises the fields of health management and policy, health promotion and health behavior, and human development and family sciences. These disciplinary approaches use social and behavioral sciences to improve understanding of the factors that influence the health and well-being of individuals, families, and communities. In addition, these fields develop sound policy, programs, and interventions to improve health and well-being at multiple levels. Finally, through our curricula, we develop the next generation of globally minded public health and human sciences professionals.

The School of Social and Behavioral Health Sciences houses the undergraduate degrees of Human Development and Family Sciences and Public Health. The majors and their options are described below.

The school also houses the MS and PhD in Human Development and Family Studies (see http://health.oregonstate. edu/degrees/graduate/hdfs.)

The school houses the following options of the Master of Public Health (MPH): health management and policy, and health promotion and health behavior. For more information about the MPH program and its areas of concentration, see http://health.oregonstate.edu/ degrees/graduate/public-health/mph.

The school also houses the following concentrations of the Public Health doctoral program: health policy, and health promotion and health behavior, see http://health.oregonstate.edu/degrees/ graduate/public-health/phd-program.

## UNDERGRADUATE PROGRAMS

Human Development and Family

## Sciences Major

The field of human development and family sciences (HDFS) applies an interdisciplinary perspective to understand the development of individuals across the life course and their diverse family, school, and community environments. Students who major in HDFS have diverse and exciting career options in schools and in the helping professions or can pursue advanced academic study in HDFS or related areas.

The School of Social and Behavioral Health Sciences offers a BS in Human Development and Family Sciences with three options:

- Child Development
- Human Development and Family Sciences, General
- Human Services

All three options provide students with the prerequisites for graduate programs in human development and family sciences.

## Family and Consumer Sciences Teacher Training

Students desiring a license to teach family and consumer sciences (grades 5 through 12) should contact the college's Office of Student Success in the Women's Building 105, http://health.oregonstate. edu/success.

## Public Health Major

Public health is an exciting and diverse field for those interested in the health and well-being of populations and their environments. Careers in the public and private sectors offer opportunities to work locally, regionally, nationally, and internationally to promote health and prevent disease. Recognizing that multiple and complex factors affect the public's health, our faculty and students examine environmental issues, access to health care services, health policies, and social and contextual factors as determinants of health.
Students in this major will choose one of the following major options:

- Health Management and Policy
- Health Promotion and Health Behavior
Both options provide students with the prerequisites for graduate programs in public health.

## Health Management and Policy Option

This option provides training and skills in the management of public health, health care programs and agencies, and in the analysis of public health policies. The program is appropriate for those who want to manage health programs in a wide range of institutions, both public and private, and is particularly well-suited for students interested in the business aspects associated with the delivery and financing of health services. Students can also receive a certificate of Gerontology.

## Health Promotion and Health

## Behavior Option

This option prepares students for many career opportunities in the areas of public health promotion, health behavior, and disease prevention. Students learn a variety of skills and strategies that will provide them with the necessary proficiencies to improve population health in diverse settings. The program focuses on the social and behavioral determinants of health and disease across the lifespan, with a particular emphasis on health disparities. Graduates are qualified to assist with the planning, implementing, and evaluation of programs that address health disparities and that are intended to improve the health of diverse populations.

## UNDERGRADUATE MAJORS WITH OPTIONS

## HUMAN DEVELOPMENT AND FAMILY SCIENCES (BS, CRED, HBS)

## Also available via Ecampus.

HDFS majors study interdisciplinary research and theory on human development across the lifespan within the contexts of families, school, work, and communities to prepare for careers in schools and helping professions and to pursue advanced academic degrees. The BS in Human Development and Family Sciences can be pursued through one of three required options listed below:

1. Child Development option
2. Human Development and Family Sciences, General
3. Human Services option

See each option in the HDFS overview for detailed information.
Note: It is possible to choose more than one option. Students should meet with an advisor in the college's Office of Student Success in the Women's Building 105 for additional information.

## Credits Needed to Graduate:

180 credits, 60 of which must be upper division. Credits are to include baccalaureate core courses, HDFS core courses, classes required for each option, and electives.

## Baccalaureate Core (48)

48 credits required of all students; courses may include BCC courses in the HDFS core and options as indicated by an asterisk.
HDFS Core Courses (40-46)
Required of all HDFS students:
COMM 218. *Interpersonal
Communication (3)
H 100. Introduction to Public Health (4)
HDFS 240. *Human Sexuality (3)
HDFS 314. Adult Development and Aging (4)

HDFS 341. Family Studies (4)
HDFS 360. Critical Thinking in Human
Development and Family Sciences (4)
HDFS 361. Applied Research Methods (4)
NUTR 225. General Human Nutrition (3)
PSY 201. *General Psychology (3)
PSY 202. *General Psychology (3)
SOC 204. *Introduction to Sociology (3)
WR 327. *Technical Writing (3)
Choose one of three statistics options below:

1. H 220 . Introduction to Health Data Analysis (3)
2. ST 201, ST 202. Principles of Statistics $(4,4)$
3. ST 351. Introduction to Statistical Methods (4)

## Footnote:

* Baccalaureate Core Course (BCC)

Pre-Professional Human
Development and Family Sciences
Major Code: 457
Major Code: 447

## OPTIONS

## CHILD DEVELOPMENT OPTION

The Child Development option prepares students to work directly with children of all ages and their families. This option is a strong foundation for work in a preschool and Head Start classrooms, early intervention, adolescent intervention, parent education and support, or for graduate work in HDFS, psychology, sociology, or education. With additional course work, students can pursue teacher licensure through the OSU College of Education or through other institutions.

## HDFS Core

HDFS 240. *Human Sexuality (3)
HDFS 314. Adult Development and Aging (4)
HDFS 341. Family Studies (4)
HDFS 360. Critical Thinking in Human
Development and Family Sciences (4)
HDFS 361. Applied Research Methods (4)

## Non-HDFS Courses

COMM 218. *Interpersonal
Communication (3)
NUTR 225. General Human Nutrition (3)
PSY 201. *General Psychology (3)
PSY 202. *General Psychology (3)
SOC 204. *Introduction to Sociology (3)
WR 327. *Technical Writing (3)
Choose one of three statistics options below:

1. H 220 . Introduction to Health Data Analysis (3)
2. ST 201, ST 202. Principles of Statistics $(4,4)$
3. ST 351. Introduction to Statistical Methods (4)

## Child Development Curriculum

(36-39)
HDFS 311 Infant and Child Development (4)
HDFS 313 Adolescent Development (4)
HDFS 330. Fostering Learning in Early
Childhood Development (4)
HDFS 430. ${ }^{\wedge}$ Student Teaching in Early
Childhood Development and Education (12)
HDFS 431. Family, School, and Community
Collaboration (3)
Choose any three (9-12):
ED 140. Introduction to Early Childhood
Education (4) Central Oregon
Community College Only
HDFS 201. *Contemporary Families in the U.S. (3)

HDFS 312. Parenting Research and Application (4)
HDFS 331. Directed Experience in Early
Childhood (3) Cascades Only
HDFS 432. Children and Youth With Special Needs (3)
HDFS 444. Family Violence and Neglect (4)
HDFS 447. *Families and Poverty (4)
HDFS 465. Topics in Human Development and Family Sciences (3)

## Footnotes:

* Baccalaureate Core Course (BCC)
${ }^{\wedge}$ Writing Intensive Course (WIC)
Option Code: $\mathbf{2 2 8}$

## HUMAN DEVELOPMENT AND FAMILY SCIENCE, GENERAL OPTION

Available on the Corvallis and OSU-Cascades campuses and via Ecampus.
Students majoring in Human Development and Family Sciences learn how people change across the life course within the contexts of families, school, work, and communities. Information from many disciplines is applied to the study of individuals and families, preparing students to fully understand people and to develop skills in critical thinking and in research. Students learn about infants and toddlers, teens and adults of all ages, and families.

On completing the HDFS General option, students are prepared to be involved and effective community members and to improve people's lives. The HDFS General option is ideal for students interested in the helping professions and also pairs well with a minor or a second major in liberal studies; pre-medicine or pre-nursing; psychology; public health; sociology; Spanish; or women studies, gender, and sexuality studies. It provides exceptional preparation for graduate work in counseling, education, public policy, social work, or human development and family sciences, each of which can lead to a productive, satisfying career.

## HDFS Core (19)

HDFS 240. *Human Sexuality (3)
HDFS 314. Adult Development and Aging (4)
HDFS 341. Family Studies (4)
HDFS 360. Critical Thinking in Human
Development and Family Sciences (4)
HDFS 361. Applied Research Methods (4)

## Non-HDFS Courses (21-26)

COMM 218. *Interpersonal
Communication (3) (COCC: SP 218)
NUTR 225. General Human Nutrition (3) (COCC: FN 225)

## HUMAN SERVICES OPTION

The Human Services option prepares students for entry-level positions in a variety of human services settings including the juvenile justice system, health care settings and hospices, criminal justice agencies, community advocacy groups, the child welfare system, elderly services, children and youth services, substance abuse programs, and many others. Students gain an understanding of the social and human service delivery systems and acquire basic skills to communicate effectively with clients, develop intervention strategies, and solve interpersonal and social problems. At least two internship experiences in human services programs are required for degree completion. Students are prepared to pursue a graduate degree in several areas including counseling, social work, psychology, marriage and family therapy, human development and family sciences, nonprofit administration, public policy, and others.

## HEALTH PROMOTION AND

## HEALTH BEHAVIOR OPTION

This option prepares students for many career opportunities in the areas of public health promotion, health behavior, and disease prevention. Students learn a variety of skills and strategies that will provide them with the necessary proficiencies to improve population health in diverse settings. The program focuses on the social and behavioral determinants of health and disease across the lifespan, with a particular emphasis on health disparities. Graduates are qualified to assist with the planning, implementing, and evaluation of programs that address health disparities and that are intended to improve the health of diverse populations.

## Health Promotion and Behavior

Required Option Core (21)
H 310. Health Field Experiences: Peer Helper (3)
or H 349. Peer Helper Skills Development (3)

H 407. Seminar (Sect. 1, Pre-Internship) (2)

## GRADUATE MAJORS

## HUMAN DEVELOPMENT AND FAMILY STUDIES (MS, PhD, MAIS)

## Graduate Areas of Concentration

 Human development and family studiesThe School of Social and Behavioral Health Sciences offers course work and programs of study in the area of human development and family studies. The Gerontology Program is also administered by the College of Public Health and Human Sciences through the school. Areas of study and degrees granted are described below.

Human Development and Family Studies offers graduate work leading to master of science and doctor of philosophy degrees. Graduate programs take a multidisciplinary approach, preparing students for college and university teaching and research, as well as development, administration, and evaluation of programs serving individuals and families
across the lifespan.
Our research is interdisciplinary with signature themes in (a) transitions across the life course, (b) risk and resilience across the life span, and (c) developmental and family research methods. Our faculty recognizes the critical importance of culture and gender, diversity, and contemporary global perspectives in the discovery of knowledge. We have research emphases in child development, adolescence, adult development and aging, families, rural communities, and cross-national comparison.

Research is an important focus of the Graduate Program in Human Development and Family Studies. The HDFS faculty includes nationally recognized scholars who are widely published in areas such as families and aging; family communication and conflict; child, adolescent, and adult development; intergenerational family relationships; family structure; and gender. We emphasize both quantitative and qualitative methodology.

For more information, contact the Graduate Program in Human Development and Family Studies, College of Public Health and Human Sciences, 437 Waldo Hall, OSU, Corvallis, OR 97331-5102.

Major Code: 4470

## GRADUATE MINORS

## AGING SCIENCES GRADUATE

 MINORThis graduate minor provides interdisciplinary graduate education in the aging sciences through formal course work, research requirements and experiential learning that is aligned with the student's career goals in aging.

The Aging Sciences minor requires that master's students select 15 credits from the following courses. Doctoral students must select 18 credits

## Required Courses:

BB 650. Selected Topics in Biochemistry and Biophysics: Molecular Mechanisms of Aging (3)
CS 607. Seminar: Research and Professional Topics in Aging (1) Taken 4 terms
or KIN 607. Seminar: Research and
Professional Topics in Aging (1) Taken 4 terms
or HDFS 607. Seminar: Research and Professional Topics in Aging (1) Taken 4 terms
GRAD 520. Responsible Conduct of Research (1)
HDFS 565. Topics in Human Development and Family Sciences: Behavioral and Social Sciences of Aging (3)

## Select 4 or more credits (1-2

courses) from the following:

## Computer Science

CS 519. Topics in Computer Science: Data Visualization (4)

CS 519. Topics in Computer Science: Human-Computer Interaction (4)

## Kinesiology

KIN 515. Motor Control and Movement Dysfunction (3)
KIN 525. Biomechanics of Musculoskeletal Injury (3)
KIN 550. Health Promotion for People with Disabilities (3)
KIN 562. Lifespan Sport and Exercise Psychology (3)
KIN 599. Special Topics: Bone Physiology (3) or NUTR 599. Special Topics: Bone Physiology (3)

## Human Development and Family

## Sciences

HDFS 518. Adult Development and Aging (4) HDFS 587. Social Gerontology (3)
HDFS 617. Advanced Topics in Adult Development and Aging (3)

## Nutrition

H 577. Dietary Interventions for Public Health (3) [Terminated fall 2017]
NUTR 514. Health Benefits of Functional Foods, Nutraceuticals, and Dietary Supplements (3)
NUTR 517. Human Nutrition Science (4)
NUTR 518. Human Nutrition Science (4)
NUTR 523. Community Nutrition (4)
NUTR 599. Special Topics in Nutrition Research: Bone Physiology (3) or NUTR 699 Special Topics in Nutrition Research: Bone Physiology (3)
NUTR 599. Special Topics in Nutrition Research: Advances in Cancer Research (3) or NUTR 699. Special Topics in Nutrition Research: Advances in Cancer Research (3)
NUTR 599. Special Topics in Nutrition Research: Advances in Metabolic Disease (3) or NUTR 699. Special Topics in Nutrition Research: Advances in Metabolic Disease (3)

## Philosophy

PHL 544. Biomedical Ethics (4)
PHL 555. Death and Dying (3)

## Psychology

PSY 540. Cognition Research (4)
PSY 598. Health Psychology (4)

## GERONTOLOGY GRADUATE

 MINOR
## Graduate Areas of Concentration Gerontology

Gerontology refers to the study of aging, and also includes adult development. The existence of large numbers of individuals over the age of 65 is unprecedented in the history of humankind. In the next ten years, the number of older adults is expected to double in developed countries and quadruple in the developing world. This growth will pose major challenges for societies in addressing the health, economic, and social needs of this population.

To address these challenges, students, researchers, and practitioners in the field of aging will need to take a multidisciplinary approach to solving these challenges, which will require an understanding of biological, psychological, sociocultural, and design and engineering factors. Accordingly, we have designed a multidisciplinary minor, drawing upon faculty across campus, which is tailored to individual student needs.

Students are required to have a 3.0 GPA and to have one of the gerontology faculty on their committee. Students must take 18 credits but can decide the classes in conjunction with their committee. Sample classes include:
H 536. Healthcare Organization Theory and Behavior (3)
H 554. Epidemiology of Aging (3)
H 558. Reimbursement Mechanisms (3)
H 576. Program Planning/Proposal Writing in Health/Human Services (4)
H 568. Financing and Administration of Long-Term Care (3)
HDFS 518. Adult Development and Aging (4)

HDFS 519. The Life Course (4)
HDFS 565. Topics in Human Development and Family Sciences (3):
"Psychosocial Factors in Aging"
"Stress and Coping Across the Lifespan"
HDFS 587. Social Gerontology (3)
HDFS 617. Advanced Topics in Adult
Development and Aging (3)
PHL 544. Biomedical Ethics (4)
PHL 555. Death and Dying (3)
SOC 532. Sociology of Aging (3)

Undergraduate Certificate Program Gerontology

## Graduate Minor <br> Gerontology

Area of Concentration
Gerontology

The Program on Gerontology offers an interdisciplinary approach to the study of aging. Because aging involves physiological, sociological, and psychological processes, gerontology education and research is relevant to many disciplines. Career opportunities in gerontology are extremely diverse and include positions in community services, health sciences, nutrition and dietetics, housing, health and physical education, pharmacy, counseling, health care administration, business, public policy, and many other areas.

Recognizing the diversity of relevant disciplines and career opportunities, the OSU Program on Gerontology offers course work in gerontology through 10 schools/departments. The program is administered through the School of Social and Behavioral Health Sciences.

To be considered a gerontology course, at least 50 percent of the course content must address gerontology-related issues.

In addition to gerontology courses, seminars, field study (310/410/510/610), research (401/501/601), and projects (406/506/606) in gerontology are offered through the Gerontology Program. Field study, research, and projects in gerontology may also be available through other schools/departments. Students register for field study, research, or projects credit in the school or department that best meets their needs for supervision given the nature of the experience.

## Graduate Study in Gerontology

OSU offers over 20 graduate-level gerontology courses plus field study and research opportunities. There are three ways to pursue significant graduate work in gerontology at OSU:

1. Gerontology may be selected as an area of concentration for both master's and doctoral degrees in Human Development and Family

Studies. Students choosing this concentration will select adult development and aging course work and research in their major and may choose an integrated minor in gerontology.
2. Gerontology is an integrated graduate minor (i.e., courses chosen from a variety of schools/ departments) available to graduate students in any major field. The minor requires 18-36 credits, including HDFS 587, Social Gerontology. The balance of the course work is selected from graduate gerontology courses, field study, and/ or research.
3. Gerontology is an area of study in the Master's of Interdisciplinary Studies (MAIS) program. MAIS students are required to take a minimum of 15 credits in gerontology, including HDFS 587, Social Gerontology. The balance of courses is selected from graduate gerontology courses, field study, and/or research.

## Certificate Requirements, Program

 on GerontologyGerontology Core Courses (10 credits)
HDFS 314 Adult Development and Aging (4)
Any two of the following selected
from two different departments:
H 422. Health, Aging and Control of Chronic Disease (4)
NUTR 325. Nutrition Through the Life Cycle (3)
PSY 350. Human Lifespan Development (4)
SOC 355. Death and Dying (4)
Gerontology courses include:
H 422/H 522. Health, Aging and Control of Chronic Diseases (4)
H 432/H 532. Economic Issues in Health and Medical Care (3)
H 436. Advanced Topics in Health Care Management (3)
H 458/H 558. Reimbursement Mechanisms (3)

H 465/H 565. *Public Health and Women: Social and Policy Issues (3)
H 467/H 567. Long-Term Care Alternatives (3)

H 468/H 568. Financing and Administration of Long-Term Care (3)
H 476. ${ }^{\wedge}$ Planning and Evaluating Health Promotion Programs (4)
H 536. Healthcare Organization Theory and Behavior (3)
H 576. Program Planning/Proposal Writing in Health/Human Services (4)
HDFS 314. Adult Development and Aging (4)

HDFS 465/HDFS 565. Topics in Human
Development and Family Sciences (3)
HDFS 518. Adult Development and Aging (4)

HDFS 519. The Life Course (4)
HDFS 587. Social Gerontology (3)
HDFS 617. Advanced Topics in Adult
Development and Aging (3)

PHL 444/PHL 544. *Biomedical Ethics (4)
PHL 455/PHL 555. Death and Dying (3)
PSY 350. Human Lifespan Development (4)
SOC 432/SOC 532. Sociology of Aging (3)
Note: Other courses are approved annually by the Gerontology Program.

## Field study or field projects in Gerontology - Any Department (1-16 credits)

In addition to gerontology courses, seminars, field study (310/410/510/610), research (401/501/601), and projects (406/506/606) in gerontology are offered through the Gerontology Program.

Field study is a vital component of the Gerontology Certificate program. Three to six credits of an approved field experience or an approved research or field project are required. No more than six credits of field study will count toward certificate completion. Field Experience or Internships involve professional level work experience in an agency or organization that serves older adults. To be considered a gerontology field placement, at least half of the student's time must be spent working with or for older individuals.
Ordinarily, nine credits of gerontology course work must be completed prior to beginning field study. Specific requirements for field study are cooperatively developed by the faculty supervisor, student, and a community agency. The type of field study selected should reflect the student's career interests, as well as the student's competencies and the community agency's needs.
Field study in gerontology must be approved by the Program on Gerontology if it is to be used to meet Certificate requirements. Approval forms are available from the Program on Gerontology.
Electives from list of approved Gerontology Classes (12-15 credits) Twelve to 15 credits of gerontology electives are required beyond the gerontology core to complete the minimum of 27 credits of gerontology study. A list of courses approved for electives appears below.

H 320. Introduction to Human Disease (3)
H 422/H 522. Health, Aging and Control of Chronic Diseases (4)
H 432/H 532. Economic Issues in Health and Medical Care (3)
H 436. Advanced Topics in Health Care Management (3)
H 458/H 558. Reimbursement Mechanisms (3)

H 465/H 565. *Public Health and Women: Social and Policy Issues (3)
H 467/H 567. Long-Term Care Alternatives (3)

H 468/H 568. Financing and Administration of Long-Term Care (3)
H 476. ^Planning and Evaluating Health Promotion Programs (4)
H 536. Healthcare Organization Theory and Behavior (3)

H 576. Program Planning/Proposal Writing in Health/Human Services (4)
HDFS 461. ${ }^{\wedge}$ Program Development and Proposal Writing (3)
HDFS 462. Skills for Human Services Professionals (4)
HDFS 465/HDFS 565. Topics in Human
Development and Family Sciences (3)
HDFS 518. Adult Development and Aging (4)
HDFS 519. The Life Course (4)
HDFS 587. Social Gerontology (3)
HDFS 617. Advanced Topics in Adult
Development and Aging (3)
KIN 434. Applied Muscle Physiology (3)
KIN 437. Physical Activity, Aging, and Chronic Disease (4)
NUTR 312. *Issues in Nutrition and Health (3)

NUTR 325. Nutrition Through the Life Cycle (3)
NUTR 423/NUTR 523. Community Nutrition (4)
PHL 444/PHL 544. *Biomedical Ethics (4)
PHL 455/PHL 555. Death and Dying (3)
PSY 350. Human Lifespan Development (4)
SOC 355. Death and Dying (4)

## Additional Requirements

1. A grade of " C " or better in all gerontology courses. Overall GPA of 2.5.
2. Formal application to the program; forms available from the program office in 437 Waldo Hall.
3. Certificate requirements fulfilled within five years following graduation. Students who have not completed certificate requirements upon receipt of the degree may continue as special, postbaccalaureate, or graduate students.

## Major Code: C437

## HEALTH MANAGEMENT AND POLICY GRADUATE CERTIFICATE

For more details about this graduate certificate, see the school advisor.

## Required (12 credits)

H 532. Economic Issues in Health and Medical Care (3)
H 534. Health Care Law and Regulation (3)
H 536. Health Services Administration and Management (3)
H 556. Strategic Management of Health Service Organizations (3)

## Electives ( 6 credits)

H 530. Health Policy Analysis (3)
H 531. Health Care Marketing (3)
[Terminated fall 2017]
H 538. Public and Private Health Insurance (3)

H 539. Health Care Information Systems (3)
H 557. Financial Management of Health
Care Organizations (3)
H 558. Reimbursement Mechanisms (3)
H 567. Long-Term Care Alternatives (3)
H 568. Financing and Administration of
Long-Term Care (3)
H 599. Selected Topics (1-3)
Other electives may be chosen with the
consent of the student's advisor.

## Major Code: CG05 <br> P PUBLIC HEALTH COURSES

H 100. INTRODUCTION TO PUBLIC HEALTH (4), A basic overview of public health. Uses a mix of lectures, guest speakers, classroom activities and homework to help students understand the role of public health in eliminating health disparities, understanding epidemics, and setting policy.
H 100H. INTRODUCTION TO PUBLIC HEALTH (4). A basic overview of public health. Uses a mix of lectures, guest speakers, classroom activities and homework to help students understand the role of public health in eliminating health disparities, understanding epidemics, and setting policy. PREREQS: Honors College approval required.

H 199. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 16 credits.
H 210. *INTRODUCTION TO THE HEALTH CARE SYSTEM (3). Provides tools to understand and critically assess the health care delivery system, its components, and the challenges created by its structure. The health care system will be considered from the perspective of several main players [e.g., patients, hospitals, doctors, health plans]. (Bacc Core Course)
H 220. INTRODUCTION TO HEALTH DATA
ANALYSIS (3). Introduction to the application of biostatistics and probability to the health sciences. Topics include quantitative analysis and inference, statistical methods in the biosciences, and quantitative study to evaluate and control health problems. PREREQS: MTH 105 or MTH 111 or higher mathematics
H 225. *SOCIAL AND INDIVIDUAL HEALTH DETERMINANTS (4). Overview of the macro (social/system/environmental) and micro (individual) contributors to premature disease, disability and population health. Selected behavioral theories supporting health risks and strategies for the prevention of premature disease/ disability and the promotion of health. (Bacc Core Course)

## H 250. INTRODUCTION TO HEALTH CARE

MANAGEMENT (3). Participants will learn key principles, practices and personalities of health care management. The content is broadly applicable to health care enterprises of every kind: public health organizations, physician practices and clinics, hospitals and health systems, agencies and service organizations, for-profit firms, not-for-profit enterprises, etc. PREREQS: H 210* [C-]

## H 309. PRACTICUM IN HEALTH CARE

SERVICES (3-6). Supervised work experience in a health care service setting or health-related agency or program. Weekly progress reports and post-experience summary report and evaluation will be expected. Preplanned with instructor approval. Open to health care administration majors. Graded P/N. This course is repeatable for a maximum of 12 credits. PREREQS: Junior standing. Instructor consent required.
H 310. HEALTH FIELD EXPERIENCES (3-6). Introductory field experience in a health or health-related worksite. Graded P/N. This course is repeatable for a maximum of 12 credits.
PREREQS: H 210 [C-] and junior standing.

## 312. *HIV/AIDS AND STIS IN MODERN

SOCIETY (3). Fundamental principles relating to etiology, nature, prevention, and control of AIDS and other sexually transmitted diseases in contemporary society; emphasis on social, psychological, legal, economic, and ethical issues surrounding these diseases. (Bacc Core Course)
H 319. INTRODUCTION TO HEALTH POLICY (3). Describe the policy development process, including problem conceptualization, agenda setting, role of interest groups and public opinion, analysis of alternatives and selection of policy alternative. PREREQS: H 210 [C-]

H 320. INTRODUCTION TO HUMAN DISEASE
(3). Fundamental principles relating to etiology, nature, prevention, and control of communicable and noncommunicable diseases in human populations. Special emphasis on disease prevention and health promotion in the high risk diseases of modern, industrialized society.
H 333. *GLOBAL PUBLIC HEALTH (3). Introduction to the field of global health, its history, methods, and key principle; understanding global health inequities through case studies; overview of major global health prevention programs. (Bacc Core Course)
H 344. FOUNDATIONS OF ENVIRONMENTAL
HEALTH (3). Introductory course examining environmentally-linked disease, and health effects associated with toxic substances, food quality, pesticides, air, water, and noise pollution, and solid/hazardous wastes.
H 349. PEER HELPER SKILLS DEVELOPMENT
(3). Prepares the student for an active role as a peer helper in alcohol and drug abuse prevention and health education. Course work will include: drug, alcohol, addiction and other related health issues, basic listening and communication skills, conflict resolution, crisis recognition and referral. A major component will be affective learning situations designed to promote self-awareness and personal growth.
H 364. DRUGS, SOCIETY AND HUMAN
BEHAVIOR (3). Drug use and abuse; theories of addiction; basic principles of drug action regarding the use of sedative and stimulative compounds; alcohol; opiates; hallucinogens; designer drugs; cocaine; and over-the-counter products Particular emphasis on the role of the individuals value orientation, decision-making, and selfresponsibility in treatment and educational approaches to prevention. PREREQS: (PSY 201 [C-] or PSY 202 [C-] )
H 364H. DRUGS, SOCIETY AND HUMAN
BEHAVIOR (3). Drug use and abuse; theories of addiction; basic principles of drug action regarding the use of sedative and stimulative compounds; alcohol; opiates; hallucinogens; designer drugs; cocaine; and over-the-counter products. Particular emphasis on the role of the individual's value orientation. PREREQS: (PSY 201 [C-] or PSY 202 [C-] ) and Honors College approval required.
H 385. SAFETY AND HEALTH STANDARDS
AND LAWS (3). Emphasis on the Occupational Safety and Health Act; study includes the scope and duties under the act, enforcement, and adjudication procedures and OSHA litigation; components of Oregon-OSHA.
H 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
H 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
H 401. RESEARCH AND SCHOLARSHIP (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Instructor's consent required.
H 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits.
H 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Instructor's consent required.
H 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16
credits. PREREQS: Instructor's consent required.
H 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Instructor's consent required.
H 407. SEMINAR (2). Seminar to prepare students for their internship in public health. This course is repeatable for a maximum of 6 credits. PREREQS: HMP (Health Management Promotion) option students are required to take H

436 in preparation and hold junior standing. HPHB Health Promotion and Health Behavior) option students are required to take H 225 and H 320 and hold junior standing.
H 407H. SEMINAR (2). Seminar to prepare students for their internship in public health. This course is repeatable for a maximum of 6 credits. PREREQS: HMP (Health Management Promotion) option students are required to take H 436 in preparation and hold junior standing. HPHB (Health Promotion and Health Behavior) option students are required to take H 225 and H 320 and hold junior standing. Honors College approval required.

H 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits PREREQS: Instructor consent required.
H 409. PRACTICUM (1-6). Supervised work experience in a public health or health care administration setting. Open to majors in public health. Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Senior standing and departmental approval

H 410. INTERNSHIP (1-12). Directed field experience with participation in a community, worksite, or health agency program. Experience is individually arranged to meet student needs. Graded P/N. This course is repeatable for a maximum of 24 credits. PREREQS: H 436 and H 407 (HMP only); H 225 and H 320 and H 476 and H 407 (HPHB only)
H 418. PUBLIC HEALTH ETHICS AND ISSUES
(3). Current ethical issues in public health, including gender and ethnicity in employment, pharmaceutical controls, product liability, advertising, and export of high technology PREREQS: Senior standing.

H 421. MENTAL HEALTH (3). Examination of social, governmental, legal and individual mental health issues. Brief overview of some major mental disorders. PREREQS: (H 225 [C-] and H 320 [C-] ) and junior standing.

H 422. HEALTH, AGING AND CONTROL OF CHRONIC DISEASES (4). Epidemiology of the major chronic diseases, risk factors, potential methods of prevention/intervention, ethical issues, and efficacy of current methods of prevention and control. Emphasis on adult populations and public health services, policies, and programs at the local, state, and federal levels designed to promote healthy aging. PREREQS: 9 credits of health course work.
H 425. FOUNDATIONS OF EPIDEMIOLOGY
(3). Measures of disease frequency; measures of effect; association and causation; sources of inaccuracy; experimental and observational study designs. Lec/rec. PREREQS: (H 220 [D-] or ST 201 [D-] ) and junior standing.
H 431. HEALTH CARE MARKETING (3).
Principles, elements and methods of marketing health care services. Role of the consumer, governing body, administration and medical staff as well as impact of professional ethics.

## H 432. ECONOMIC ISSUES IN HEALTH AND

MEDICAL CARE (3). Application of economic principles to the health care field: the demand for medical care and insurance, health care suppliers, health care markets. PREREQS: ( (ECON 201 [C-] or ECON 201H [C-] ) and H 210 [C-] ) and junior standing.

## H 434. ^HEALTH CARE LAW AND

REGULATION (3). Legal aspects of health care delivery; tort law and its applications; professional liability and liability insurance; laws relative to health care institutions, cost controls, antitrust and access. (Writing Intensive Course) PREREQS: H 210 [C] and H 250 [C-] and admission to HMP program and junior standing.
H 436. ADVANCED TOPICS IN HEALTH CARE MANAGEMENT (3). Covers how health services are governed and organized; how health care organizations assess and adapt to
change; constraints/opportunities in shaping organizational performance; leadership; strategic decision-making and the use of evidence-based management in health care. PREREQS: (H 210 [C-] and H 250 [C-] ) and junior standing.
H 445. *OCCUPATIONAL HEALTH (3). Current and historical topics in the area of occupational health, with particular emphasis on the types of materials that produce human health effects; clinical and epidemiologic data used to assess the public health importance of occupational pollutants and to evaluate control strategies. (Bacc Core Course)

H 448. PUBLIC HEALTH TOXICOLOGY (3). Introduction to the concepts and principles of toxicology as they apply to environmental and occupational health PREREQS: H 344 [C-] and One year basic college chemistry and biology and two terms organic chemistry.
H 449. MASS MEDIA AND HEALTH (3).
Designed to examine the effects of mass media on population health, from the negative impact of advertising of cigarettes, alcohol and junk food, to the (hopefully) positive impact of public-health campaigns. PREREQS: (H 225 [C-] and H 320 [C-] ) and junior standing.
H 457. FINANCIAL MANAGEMENT OF HEALTH CARE ORGANIZATIONS (3). Utilization of standard financial tools needed to manage the capital resources of health care organizations. Includes funding capital projects, product costing, budgeting methods, capital formation and investment strategies. PREREQS: H 210 [C-] and H 250 [C-] and BA 215 [C-]

H 458. REIMBURSEMENT MECHANISMS (3). Introduces and analyzes the different types of healthcare reimbursement methodologies used in the U.S. health care system. PREREQS: H 210 [C-] and junior standing.

## H 461. SEXUALITY: A HEALTH SCIENCE

PERSPECTIVE (3). Exploration of the meaning of sexuality from a variety of contemporary health science perspectives; aspects of sex and sexuality fundamental to total health; issues central to the health educator role examined. PREREQS: Senio standing.
H 465. *PUBLIC HEALTH AND WOMEN:
SOCIAL AND POLICY ISSUES (3). Public health approach to the identification of women's health needs in the United States and in other countries as it relates to the intersection of race, ethnicity, social class, sexual orientation, age, and ability. (Bacc Core Course) PREREQS: 6 credits in public health.

H 467. LONG-TERM CARE ALTERNATIVES (3). Overview of the long-term care alternatives. Comparisons of nursing homes with community based facilities; adult day care centers, respite to hospice facilities, social HMOs and other services; cost, quality of life and practicality are addressed.

H 468. FINANCING AND ADMINISTRATION OF LONG-TERM CARE (3). Examines the financing and administration of long term care. Emphasis is on a system-wide overview and specific application to nursing facility management PREREQS: Admission to HMP program.

## H 474. PUBLIC HEALTH AND VIOLENCE

 IN SOCIETY (3). Examination of violence as a major public health issue. Historical, social, environmental, economic, behavioral and psychological aspects of assaultive violence, spousal abuse, rape and sexual assault, child abuse, child sexual abuse, suicide, the effects of the media on violence, drug abuse and violence, and related public health problems in contemporary American society. Emphasis on health and the efficacy of current efforts aimed at ameliorating these problems and potential for alternative public health models for prevention and intervention.H 476. ^PLANNING AND EVALUATING
HEALTH PROMOTION PROGRAMS (4). A
systematic approach to planning, implementing and evaluating health promotion programs in a variety of health related settings. Students will be writing a series of drafts to effectively develop a health promotion program plan. (Writing Intensive Course) PREREQS: (H 225 [C-] and H 320 [C-] ) and at least junior standing.

H 477. DIETARY INTERVENTIONS FOR PUBLIC
HEALTH (3). A public health perspective on the practice of population-based dietary intervention. Examination of relevant theories, research, and practice that pertain to health promoters/ educators. PREREQS: NUTR 225 [C-]

H 480. UNDERGRADUATE EOH SEMINAR (1). Explores current topics in environmental health and safety. EOH faculty will discuss their current research interests; EOH graduate student speakers will share their environmental health and safety internship experiences. Documentaries will be viewed to introduce topics of discussion Features will be discussions relating directly to ongoing, current environmental/occupational health crises, both in the United States and around the world. Graded P/N. This course is repeatable for a maximum of 2 credits. PREREQS: Junior or senior standing.

## 4 489. EMERGENCY AND DISASTER

MANAGEMENT (3). Study of preparedness, response, recovery and business resumption strategies, activities and applications needed to effectively deal with emergency and disaster incidents.

H 491. SELECTED TOPICS (1-3). Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year. This course is repeatable for a maximum of 6 credits. PREREQS: Senior standing.

H 491H. SPECIAL TOPICS (1-3). Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year. This course is repeatable for a maximum of 6 credits. PREREQS: Senior standing and Honors College approval required.

H 494. APPLIED ERGONOMICS (3). Principles of occupational ergonomics for managing optimal worker performance and well-being.
H 495. DESIGN FOR ENVIRONMENT, SAFETY, AND HEALTH (3). Systematic consideration of environmental, safety, and health concerns at the earliest possible stage in the lifecycle design engineering of products, technologies, and manufacturing processes. PREREQS: Junior or senior standing.
H 501. RESEARCH AND SCHOLARSHIP (1-
16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

H 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Instructor approval required.

H 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
H 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
H 507. SEMINAR (1-16). Section 1. Internship (1). Graded $P / N$. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required

H 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
H 509. PRACTICUM (1-16). Supervised work experience in a public health or health care administration setting. Open to majors in public
health. Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Senior standing and departmental approval.
H 510. INTERNSHIP (1-16). Directed field experience with participation in a community, worksite, or health agency program. Experience is individually arranged to meet student needs. Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Graduate standing in Public Health Department, instructor approval required, departmental approval required
H 511. COMMUNITY, CULTURE, AND GLOBAL HEALTH (3). Overview of health issues across cultures, ethnic groups, and regional/national boundaries from a critical and interdisciplinary perspective. Special emphasis on understanding social and behavioral factors that influence health in underserved communities/groups, especially ethnic/racial minorities, women, children, and migrants.
H 512. INTRODUCTION TO ENVIRONMENTAL AND OCCUPATIONAL HEALTH SCIENCES (3). Introduction to environmental and occupational health. Hazards affecting human health are examined in the context of current social, political and regulatory pressures.
H 513. INTEGRATED APPROACH TO PUBLIC
HEALTH (12). An integrated approach to introduce students to the core knowledge and methods used in public health, including evidence-based approaches to public health, public health and health care systems, planning and management to promote health, and policy in public health.
H 514. ENVIRONMENT, SAFETY AND HEALTH SEMINAR (1). One-credit graduate seminar on current topics of interest and importance to the environmental health and occupational safety field. Critical reading of research publications, discussion of controversial issues facing ESH professionals, and/or presentation of current ESH research. This course is repeatable for a maximum of 3 credits.
H 515. RESEARCH METHODS IN SOCIAL AND BEHAVIORAL HEALTH SCIENCES (3). Provides an introduction to quantitative research methods and design. Topics include definition of research problems and questions, hypothesis generation, research design, sampling, variable definition and measurement, data collection, and ethical considerations. Also provides a brief introduction to qualitative and mixed methods.
H 516. RESEARCH METHODS IN GLOBAL
HEALTH (3). Overview of research methods used to understand health, illness, health care, and health-seeking behavior in international settings. Special emphasis on the use of qualitative and mixed methods in international health research.
H 518. PUBLIC HEALTH ETHICS AND ISSUES (3). Current ethical issues in public health, including gender and ethnicity in employment, pharmaceutical controls, product liability, advertising, and export of high technology. PREREQS: Graduate standing.
H 519. DISPLACEMENT, MIGRATION, AND GLOBAL HEALTH (3). Critical examination of health of displaced/migrant populations with an emphasis on health disparities and social determinants. Understanding intersections of humanitarianism, migration, vulnerability, and displacement from a global health perspective
H 520. HEALTH DISPARITIES (3). Health disparities based on race/ethnicity, culture, social class, and rural/urban residence, among others; strategies to reduce disparities, promote health, and prevent disease in diverse populations.

H 521. MENTAL HEALTH (3). Focus upon mental health policy development, in relation to federal and state government services and regulations, implementation of services.
H 522. HEALTH, AGING AND CONTROL OF CHRONIC DISEASES (4). Epidemiology of the major chronic diseases, risk factors, potential
methods of prevention/intervention, ethical issues, and efficacy of current methods of prevention and control. Emphasis on adult populations and public health services, policies, and programs at the local, state, and federal levels designed to promote healthy aging. PREREQS: 9 credits of public health course work.

## H 523. FOUNDATIONS OF PUBLIC HEALTH

 (4). Fundamental principles, concepts and tools used in public health to promote the health of populations. Using a combination of case study method, lecture and discussion, students will develop a broad understanding of public health and recognition of how discipline-specializations address the social, behavioral and environmental determinants of public health. PREREQS: Graduate standing.H 524. INTRODUCTION TO BIOSTATISTICS (4). Quantitative analysis and interpretation of health data including probability distributions, estimation of effects, and hypothesis-tests such as Chi-square, one-way ANOVA, and simple linear regression.
H 525. PRINCIPLES OF EPIDEMIOLOGY
(4). Introduction to the concepts and methods of epidemiology. Topics include measures of population health, screening, study design, measures of association, and interpretation of epidemiological data.
H 526. EPIDEMIOLOGIC METHODS (3). Principles and methods of epidemiologic analysis; standardization; stratified analysis; confounding and its control; planning and conducting epidemiologic research; role of multivariate analysis in epidemiologic research. PREREQS: H 525 [C]

## H 527. CRITICAL ASSESSMENT OF

 INTERNATIONAL HEALTH PROGRAMS (3). Introduces the critical evaluation framework of assessing international health development programs, based on self-determination and community ownership principles. The framework of assessment method includes three levels: upstream evaluation, midstream evaluation, and downstream evaluation. PREREQS: H 528 and H 529 and graduate standing.H 528. GLOBAL HEALTH ISSUES (3). Examines major issues in health developments of global significance, their causes and impacts on international health, and methods and strategies to address them.
H 529. INTERNATIONAL HEALTH (3). Overview of the epidemiological, economic, political, sociological, and cultural factors that impact on international health. Special emphasis on the methods of prevention/intervention utilized in coping with health problems on an international level.
H 530. HEALTH POLICY ANALYSIS (3). Analysis of public policies affecting health care programs, services and organizations and the impact of those programs on citizens; processes by which health policy proposals are generated, promoted, defeated, modified and implemented.
H 531. HEALTH CARE MARKETING (3). Principles, elements and methods of marketing health care services. Role of the consumer, governing body, administration and medical staff as well as impact of professional ethics.
H 532. ECONOMIC ISSUES IN HEALTH AND MEDICAL CARE (3). Application of economics principles to the health care field: the demand for medical care and insurance, health care suppliers, health care markets. PREREQS: ECON 201

H 533. HEALTH SYSTEMS ORGANIZATION (3). Examines the nature of health and health care services and reviews the role of government and the free market on health services. Alternative ways of organizing, financing, and delivery of health care services are explored.
H 534. HEALTH CARE LAW AND REGULATION (3). Legal aspects of health care delivery; tort
law and its applications; professional liability and liability insurance; laws relative to health care institutions, cost controls, antitrust and access.

## H 535. INTERPRETING EPIDEMIOLOGIC

EVIDENCE (3). Intended for students in the human sciences and allied health fields. Introduces basic epidemiology concepts. Topics will include measures of disease frequency, assessing population health, causal logic, quantifying associations between exposures and health outcomes, epidemiologic study design, and threats to study validity (random error, bias, confounding). Examples focus on application of epidemiological methods to a variety of healthrelated fields.

## 536. HEALTHCARE ORGANIZATION THEORY

AND BEHAVIOR (3). Administrative practice in health care settings with emphasis on longterm care and acute care services. Provides a framework for health care systems and managerial process and roles. Focus on operations, planning, marketing, human resources, finance, productivity and control as well as emerging trends in health services.
H 538. PUBLIC AND PRIVATE HEALTH
INSURANCE (3). Introduction to the principles and practices of public or social and commercial health insurance, and their financial reimbursement mechanisms.
H 540. WATER AND HUMAN HEALTH (3). Critically examine the complex relationship between water quality, human activities, and population health.
H 541. AIR QUALITY AND HUMAN HEALTH (3). Examination of the major sources of air pollution, its impact on ecosystems and climate change, and population health. Will also discuss technologies and introduce regulations that are used to control air pollutants.
H 542. ENVIRONMENTAL AND OCCUPATIONAL HEALTH RISK ASSESSMENT (3). Understand concepts, principles and practices in modern environmental and occupational risk analysis and how they are utilized to make evidence-based decisions by regulatory agencies.
H 543. EXPOSURE SCIENCE I (3). Overview of the concepts, principles and practices in modern environmental and occupational exposure assessment. Exposure Science I provides a broad introduction to environmental and occupational exposure assessment methods, while Exposure Science II focuses on sampling and measurement methods.

H 544. ENVIRONMENTAL AND OCCUPATIONAL EPIDEMIOLOGY (3). Examines exposure assessment methodology and epidemiological study designs that are commonly used in environmental and occupational health science in order to characterize the impact of environmental and occupational exposures on population health. PREREQS: H 525 [C] and a graduate level statistics course.

H 545. OCCUPATIONAL HEALTH (3). A broad overview of occupational health including recognizing and preventing risks from toxic chemical, radiation and physical hazards in the workplace.
H 546. EXPOSURE SCIENCE II: SAMPLING AND MEASUREMENT (3). Concepts, principles and practices in modern environmental and occupational exposure assessment are reviewed. Exposure Science I provides a broad introduction to environmental and occupational exposure assessment methods, while Exposure Science II focuses on sampling and measurement methods. Lec/lab. PREREQS: H 543 [C]
H 547. GIS AND PUBLIC HEALTH (3). Applications of geographic information systems (GIS) to public health are reviewed, including mapping, spatial analysis methods, estimating access, and exposure assessment. This course is geared toward individuals involved in public health
who have no (or introductory level) knowledge of GIS.

H 548. PUBLIC HEALTH TOXICOLOGY (3). Introduction to the concepts and principles of toxicology as they apply to environmental and occupational health. PREREQS: H 344 and one year basic college chemistry and biology and two terms organic chemistry.

H 549. MASS MEDIA AND HEALTH (3). Examines the effects of mass media on population health, from the negative impact of advertising of cigarettes, alcohol and junk food, to the (hopefully) positive impact of public health campaigns.
PREREQS: H 571 [C]
H 550. SOCIAL EPIDEMIOLOGY (3). Explores the social determinants of health at the population level. Primary focus is on introduction to methods specific to social epidemiology, but will also provide an overview of current understanding of the empirical associations between social factors and health. PREREQS: H 525 [B] and /or equivalent introductory course in epidemiology, or permission of the instructor.

H 551. APPLIED EPIDEMIOLOGICAL ANALYSIS OF SECONDARY DATA (3). Practical experience performing a hypothesis-driven epidemiological analysis utilizing secondary surveillance or other appropriate data set, writing an analytical plan, appropriate programming for the analysis (using STATA or SAS), understanding the analysis output, preparing tables, and interpreting results. PREREQS: H 526 [B-] and H 560 [B-] and H 580 [B-] and /or instructor consent.

H 552. DISASTER EPIDEMIOLOGY (3). Describe
the impact of natural and manmade disasters on human health, understand epidemiologic methods specific to disasters, and apply fundamental epidemiologic methods to identify and characterize disaster-related adverse health outcomes. PREREQS: H 525 [C]

H 553. APPLIED EPIDEMIOLOGIC METHODS
(3). Builds upon the previous two terms in the three-term epidemiology core methods sequence, through the practical application of epidemiologic methods to the conduct of a student-directed investigation. Core goals are practical skills in hypothesis generation, study design, data management, data analysis, interpretation of results, and communication of findings. PREREQS: H 525 [B] and H 526 [B] and /or instructor permission
H 554. EPIDEMIOLOGY OF AGING (3). An overview of the core principles of the epidemiology of aging is provided. There will be an emphasis on health and disease processes in older adults. Students will learn essential study design and analytic issues that may arise in studies of aging PREREQS: H 525 [C]
H 555. CANCER EPIDEMIOLOGY (3).
Introduction to basic concepts and methodology in cancer epidemiology. PREREQS: H 525 [C]

## H 556. STRATEGIC MANAGEMENT OF

 HEALTH SERVICE ORGANIZATIONS (3).Theories and methodologies of long-range planning and strategic management in health care organizations.
H 557. FINANCIAL MANAGEMENT OF HEALTH CARE ORGANIZATIONS (3). Utilization of standard financial tools needed to manage the capital resources of health care organizations. Includes funding capital projects, product costing, budgeting methods, capital formation and investment strategies. PREREQS: H 210 and H 250
H 558. REIMBURSEMENT MECHANISMS (3).
Techniques used in cost-effectiveness analysis. Examples are drawn from the public health and health economics literature. PREREQS: Graduate standing.
H 559. CONTRACTS AND NEGOTIATION (3).
Different negotiation styles and strategies used in healthcare contracting are explored--distributive,
integrative, and mixed motive negotiation styles. Students examine various contracts and the role the healthcare administrator plays in a variety of health care settings.
H 560. PUBLIC HEALTH SURVEILLANCE (3). An introduction to public health surveillance systems (national and international) for chronic and infectious diseases. Utility of existing surveillance systems for secondary epidemiological data analysis. PREREQS: H 524 [B-] and H 525 [B-] and /or instructor's consent.
H 561. SEXUALITY: A HEALTH SCIENCE PERSPECTIVE (3). Exploration of the meaning of sexuality from a variety of contemporary health science perspectives; aspects of sex and sexuality fundamental to total health; issues central to the health educator role examined. PREREQS: Graduate standing.
H 562. INFECTIOUS DISEASE EPIDEMIOLOGY (3). Understand epidemiologic methods specific to infectious diseases, apply fundamental epidemiologic methods to infectious disease questions, and describe the broad trends in global infectious disease burden. The application methods and principles will be explored through lectures, discussions, assignments and writing projects. PREREQS: H 525 [C]

H 563. PHYSICAL ACTIVITY EPIDEMIOLOGY (3). Physical activity epidemiology will focus on current research, controversial issues, and methodological problems in the epidemiology of physical activity, exercise, and health. PREREQS: H 525 [B-] and H 524 or equivalent
H 564. COMPUTING TOOLS AND HEALTH DATA ANALYSIS (3). Modern computational biostatistics for analyzing health data, emphasizing important technologies and methods for data processing and understanding of how they work. Topics will evolve over time as new procedures are developed. PREREQS: (H 524 [C] or HDFS 530 [C] )
H 565. PUBLIC HEALTH AND WOMEN: SOCIAL AND POLICY ISSUES (3). Public health approach to the identification of women's health needs in the United States and in other countries as it relates to the intersection of race, ethnicity, social class, sexual orientation, age, and ability. PREREQS: 6 credits in public health.

H 566. DATA MINING IN PUBLIC HEALTH (3). An introduction to high-dimensional data analysis and data mining techniques used as an information technology tool to extract previously unknown and potentially useful information from large databases in biology, medicine, and public health. PREREQS: H 581 or permission of instructor; H 564 recommended.

## H 567. LONG-TERM CARE ALTERNATIVES

(3). Overview of the long-term care alternatives. Comparisons of nursing homes with community based facilities; adult day care centers, respite to hospice facilities, social HMOs and other services cost, quality of life and practicality are addressed.

H 568. FINANCING AND ADMINISTRATION OF LONG-TERM CARE (3). Examines the financing and administration of long term care. Emphasis is on a system-wide overview and specific application to nursing facility management.
H 569. MATERNAL AND CHILD HEALTH
(3). Women's reproductive health and health of children stressing causation, management, and prevention of public health problems. Epidemiological analysis of morbidity and mortality in children and women of childbearing age; impact of social, political and economic influences on the health of women and children; comparison of issues and problems of industrialized versus developing nations. Consideration of health issues of interest to the many diverse racial and ethnic groups of women and children in the U.S. as well as the global village.

H 570. WORKFLOW OF DATA ANALYSIS (3). Covers the management of workflow for studies involving data management and coordination
including planning the work, documenting activities, creating, validating, and verifying variables, statistical analyses, replicating findings, and archiving work. Emphasizes tight control of data management: making changes to data in a documented and replicable manner. Lec/rec. PREREQS: HDFS 532 [C] and /or equivalent or permission of instructor.
H 571. PRINCIPLES OF HEALTH BEHAVIOR
(3). Theoretical approaches to behavior change in health promotion/education research and practice; factors influencing health behaviors, ethical behavior change issues, behavioral interventions for special populations.

## H 572. COMMUNITY ORGANIZATION FOR

 HEALTH PROMOTION AND EDUCATION(3). History, theory, and practice of community organizing for health advocacy; focus on group processes, use of media, leadership, coalitions, grass roots methods and social change.
H 573. INTRODUCTION TO MULTILEVEL/ HIERARCHICAL MODELS (3). Introduction to the theory and application of hierarchical models to problems in epidemiology and public health. Hierarchical models will be dealt with using both frequentist and Bayesian frameworks. PREREQS: H 581 or permission of instructor.

H 574. PUBLIC HEALTH AND VIOLENCE IN SOCIETY (3). Examination of violence as a major public health issue. Historical, social, environmental, economic, behavioral and psychological aspects of assaultive violence, spousal abuse, rape and sexual assault, child abuse, child sexual abuse, suicide, the effects of the media on violence, drug abuse and violence, and related public health problems in contemporary American society. Emphasis on health and the efficacy of current efforts aimed at ameliorating these problems and potential for alternative public health models for prevention and intervention.

## H 575. EVALUATION OF HEALTH PROMOTION

AND EDUCATION PROGRAMS (3). Provides theoretical and practical bases for program evaluation. Develops basic skills in a variety of approaches to evaluation, including techniques that are particularly suitable for evaluating health promotion, community health improvement, and related health and social services programs. Course learning is synthesized through designing an evaluation framework and methodology for a relevant program. PREREQS: H 515 [C] and /or instructor consent.
H 576. PROGRAM PLANNING/PROPOSAL WRITING IN HEALTH/HUMAN SERVICES (4). Planning and preparing of proposals for program initiation, financing, delivery and evaluation in health-related settings; emphasis on funding sources, community, individual, and organizational support. PREREQS: 9 credits of graduate course work in public health.
H 577. DIETARY INTERVENTIONS FOR PUBLIC HEALTH (3). A public health perspective on the practice of population-based dietary intervention. Examination of relevant theories, research, and practice that pertain to health promoters/ educators. PREREQS: NUTR 225
H 578. INTRODUCTION TO MOLECULAR EPIDEMIOLOGY I (3). A survey of and introduction to the methods and issues arising in genetics and molecular epidemiology, including key biostatistical methods, study designs, and technologies used in the conduct of these studies. Students will gain experience conducting critical reviews of research papers with respect to study design and biostatistical analysis. PREREQS: (H 524 [C] and H 526 [C] ) and knowledge of and familiarity with basic concepts of molecular biology (DNA replication, transcription, and translation).
H 579. MOLECULAR EPIDEMIOLOGY II (3). An introduction to the data analysis methods arising in genetics and molecular epidemiology. Students will obtain hands-on experience with the analysis
of high-throughput data obtained from populationbased molecular studies. Lec/lab. PREREQS: (H 578 [C] and H 581 [C] ) and H 564

H 580. LINEAR REGRESSION AND ANALYSIS OF TIME TO EVENT DATA (4). Multiple linear regression analysis for measurement data and survival analysis methods for time to event health data, including modes of inference, diagnostics, model selection, and reporting conclusions. Lec/ lab. PREREQS: (H 524 [C] or HDFS 530 [C] )

## H 581. GENERALIZED LINEAR MODELS

 AND CATEGORICAL DATA ANALYSIS (4). Biostatistical methods focusing on binary and count data will provide a foundation for understanding and implementing generalized linear regression and categorical data models that are commonly used to analyze epidemiological and public health data from cohort, casecontrol, and clinical trial study designs. Lec/lab. PREREQS: H 580H 582. ANALYSIS OF CORRELATED HEALTH
DATA (3). Biostatistical methods for clustered, repeated measures, and longitudinal correlated health data, with an introduction to applications of linear and generalized linear mixed models and generalized estimating equations. PREREQS: H 581 [C]

H 583. ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY MANAGEMENT (3). The management principles and practices in the environment, safety and health profession are examined.
H 584. ANALYSIS OF INTERVENTION STUDIES
AND CLINICAL TRIALS (3). Principles of data
analysis from intervention studies and clinical trials, including professional graphical and tabular presentation, reproducibility and reliability of measurements, and controlling the Type I error rate when analyzing multiple endpoints. Basic principles of designing experiments are also covered including blocking, stratification, interaction, and control of variability. PREREQS: (H 524 [C] or HDFS 530 [C] )
H 585. ENVIRONMENT, SAFETY AND
HEALTH POLICY AND LAW (3). Survey of the environment, safety and health policy and law in the United States. Furnishes the basic knowledge and general understanding about policy and law-related issues important to all environmental health and safety professionals. PREREQS: H 385 or graduate standing.
H 586. BAYESIAN BIOSTATISTICS IN PUBLIC
HEALTH (3). An examination of methods for designing and implementing Bayesian analysis to address scientific questions through handson experience with health data. This survey course also covers proper interpretation and communication of results from practical Bayesian methods for biostatistics data analysis, with illustrations of the utility of Bayesian ideas in public health. PREREQS: H 581 [C]
H 587. TIME TO EVENT ANALYSIS OF HEALTH DATA (3). Biostatistical models and methods for survival analysis of time to event data that are routinely encountered in biomedical and health research. PREREQS: (H 524 [C] or HDFS 530 [C] )
H 588. APPLIED OCCUPATIONAL SAFETY AND
HEALTH (3). The management and technical aspects of a workplace safety and health program are identified and assessed. Students completing the course receive a 30-hour OSHA General Industry card.

H 589. EMERGENCY AND DISASTER
MANAGEMENT (3). Study of preparedness, response, recovery and business resumption strategies, activities and applications needed to effectively deal with emergency and disaster incidents.

H 591. SELECTED TOPICS (1-3). Recent changes and advances in public health and health care administration and their application
to special fields of study. Topics vary from term to term and year to year. This course is repeatable for a maximum of 9 credits. PREREQS: Graduate standing.
H 592. SPATIAL EPIDEMIOLOGY (3). An introduction to methods in spatial epidemiology is provided, including spatial exploration of health data, quantifying spatial patterns and clusters, spatial exposure assessment, and explaining patterns and associations. PREREQS: H 547 [C] and H 581 [C] and or equivalent.
H 593. REPRODUCTIVE EPIDEMIOLOGY (3). Focuses on current research, controversial issues, and methodological problems in the epidemiology of reproductive health. PREREQS: H 525 [B-] and H 524 (recommended)

H 594. APPLIED ERGONOMICS (3). Principles of occupational ergonomics for managing optimal worker performance and well-being.

H 595. DESIGN FOR ENVIRONMENT, SAFETY, AND HEALTH (3). Systematic consideration of environmental, safety, and health concerns at the earliest possible stage in the lifecycle design engineering of products, technologies, and manufacturing processes. PREREQS: Graduate standing.
H 596. HEALTHCARE EPIDEMIOLOGY (3). Focus on current research, controversial issues, and methodological problems in the epidemiology of healthcare. Topics include institutional infection control, medical errors, screening and diagnostic esting, cost-effectiveness, and others related to the delivery and assessment of healthcare, with a focus on the US healthcare system specifically. PREREQS: H 525 [B-] and H 524 is recommended

H 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 24 credits.

H 601. RESEARCH AND SCHOLARSHIP (1-16).
This course is repeatable for a maximum of 16 credits.

H 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.
H 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

H 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

H 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
H 608. WORKSHOP (1-16). This course s repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

H 610. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

H 612. DOCTORAL SEMINAR IN PUBLIC HEALTH: RESEARCH AND PRACTICE (1). Contemporary research and professional issues specific to the discipline of public health. ncludes responsible conduct of research, writing for publication, professional development and leadership, and faculty research in public health. This course is repeatable for a maximum of 9 credits. PREREQS: Restricted to public health doctoral students.

H 613. INDEPENDENT RESEARCH PROJECT
(1-9). Independent research project for PhD students, including research design, execution or research, and the formal presentation of findings in written form. Student will develop an original research topic based on knowledge and review of the literature in a public health-relevant area of inquiry. Graded $P / N$. This course is repeatable for a maximum of 9 credits.

H 614. RESEARCH MANUSCRIPT (4). PhD
students write a manuscript to submit to a peer-reviewed journal as part of the course requirements. Graded P/N.

## H 615. ADVANCED EVALUATION AND

RESEARCH DESIGN (3). Provides an in-depth examination of advanced research designs and methods for establishing causal statements about the efficacy, effectiveness and generalizability of public health and social service interventions designed to alter public health and social risk or protective factors. PREREQS: H 515 and H 575 or instructor permission.

H 620. ADVANCED TOPICS IN GLOBAL HEALTH INTERVENTION AND PRACTICE (3). Examines the processes and tools involved in planning and evaluating culturally competent health and human service prevention and intervention programs in the global context. Special considerations in program decisionmaking in the global context (community engagement, cultural competence, sustainability, feasibility, political/ethical issues) will be explored Provides a key forum for doctoral students to share ongoing developments in their research and practice drawing from fieldwork as well as attended conferences and meetings.

## H 622. GLOBAL HEALTH SYSTEMS, POLICY

AND POLITICS (3). Focuses on learning to identify key stakeholders in the politics of global health, and to be able to describe political and policy processes involved in negotiating global health decisions. Employment of theories and evidence from both the global North and South to explain political processes affecting public health practice and programs.
H 626. GLOBAL HEALTH SYSTEM FINANCE
AND STRENGTHENING (3). Introduces an analytical framework of health system finance strengthening for global health, from local community to national level and international level. Develops the analytical skill and knowledge for examining the source and mechanism of financing health systems and identify, mobilize, organize, and manage domestic and global health resources. Provides training to examine equity and efficiency of financial burden in a health system, and the strategies to strengthen it.

H 630. QUANTITATIVE HEALTH POLICY
RESEARCH METHODS I (4). Contemporary doctoral-level quantitative health policy/services research methods emphasizing linear regression models, data sources for health policy research, and health policy research literature. PREREQS H 524 [B-] and /or equivalent.

H 632. APPLIED HEALTH ECONOMICS (4). Advanced doctoral-level quantitative health policy/ services research methods emphasizing causal inference when potential endogeneity is present. PREREQS: H 630 [B-] and /or permission of instructor.
H 635. COST EFFECTIVENESS ANALYSIS IN HEALTH AND MEDICAL CARE (3). The primary objective of this course is to introduce students to cost-effectiveness studies in health and medical care. Covers the core concepts of CEA, quality adjusted life years, cost calculations, and decision rules.

## H 638. PUBLIC AND PRIVATE HEALTH

INSURANCE (3). Introduction to the principles and practices of public or social and commercial health insurance, their finance mechanisms, and theoretical foundation behind the selection of certain system of health insurance and finance method. PREREQS: H 533 [C]

H 639. COMMUNITY-BASED PARTICIPATORY
RESEARCH (4). Focuses on initiating and conducting research in partnership with communities. Includes in-depth examination of community-based participatory research (CBPR) elements, principles, theories, and approaches; how researchers can successfully partner with communities; and research with minority and/or underprivileged communities; with examples from
environmental health, gerontology, and health promotion. PREREQS: 9 credits of public health (H) or human development and family sciences (HDFS) graduate course work.
H 642. ENVIRONMENTAL AND REGULATORY RISK ASSESSMENT (3). Understand concepts, principles and practices in modern risk analysis and how they are utilized to make evidencebased decisions in public health. Focus will be on real world examples of risk assessment by environmental and occupational regulatory agencies.
H 650. REPORTING RESULTS: WRITING FOR EPIDEMIOLOGY (3). Applied experience writing a scientific paper to disseminate results, including deciding on authorship, preparing a lay summary, revising and responding to peer review, and serving as a reviewer. PREREQS: H 526 [B-] and H 551 [B-] and H 580 [B-] and /or instructor consent.

## H 651. ADVANCED EPIDEMIOLOGICAL

METHODS (4). Covers advanced topics in epidemiology. Course expands on many of the same topics as H526, and explores them in greater breadth and depth. Topics include causal theory, measures of disease and association, confounding, selection bias, predictive models directed acyclic graphs, effect modification, mediation, indirect and direct effects, study design, and other contemporary topics. PREREQS: H 526 [B-] and H 581 [B-]

## H 652. CAUSAL INFERENCE IN

EPIDEMIOLOGY (3). Discussion of the theoretical framework of causal statistics and the development of modern methods including propensity scores and marginal structural models. Focus is on the inverse probability of treatment weighting; discussion of other estimation methods will be included. Additional topics may include longitudinal causal models, causal mediation, instrumental variables, and other contemporary topics. Applied examples will be used for illustration. PREREQS: H 651 [B-] and /or permission of instructor.

H 659. QUANTITATIVE HEALTH POLICY
RESEARCH METHODS II (4). Advanced doctorallevel quantitative health policy/services research methods emphasizing health care utilization, expenditures, and outcomes data. PREREQS: H 630 [B-] and /or permission of instructor

H 662. ADVANCED METHODS IN INFECTIOUS DISEASE EPIDEMIOLOGY (3). Covers advanced methods and principles for infectious disease research, including framing infectious disease issues into testable hypotheses, designing epidemiologic studies using appropriate sampling strategies, and identifying strengths and weaknesses of various epidemiologic research methods. PREREQS: H 526 [B-] and H 562 [B-] and /or instructor's consent.

## H 671. ADVANCED THEORIES OF HEALTH

 BEHAVIOR (3). Provides an in-depth examination of major theories of health behavior (both health compromising and health enhancing). PREREQS: H 571 or permission of instructor.
## H 672. ADVANCED QUALITATIVE METHODS

IN HEALTH BEHAVIOR (3). Provides an in-depth examination of the use of qualitative methods in health behavior research and practice.
PREREQS: H 515 and SOC 518 and HDFS 538; or permission of instructor.

H 673. MEASUREMENT OF HEALTH BEHAVIOR CONCEPTS (4). Provides in-depth study and field work for graduate students in public health and related fields of the methods used in the conceptualization, development, and evaluation of quantitative measures of health behavior and related concepts. PREREQS: H 524, H 515, and 3 credits in other quantitative research methods or social behavioral methods (e.g., in sociology or psychology or health promotion or education programs) or equivalents, or permission of instructor.

H 675. DEVELOPMENT OF HEALTH BEHAVIOR
INTERVENTIONS (3). Examines the application of social/behavioral theories in health promotion interventions and in conducting intervention research in diverse populations. The course will focus on program development, on implementation strategies, and on translation into practice. PREREQS: (H 571 and H 575 and H 576 ) or equivalents or consent of instructor.

## H 676. ADVANCED TOPICS IN HEALTH

PROMOTION AND HEALTH BEHAVIOR (3).
Examines topics of relevance to health promotion and health behavior. Specific topics include current issues and emerging research findings, with a focus on social and behavior science perspectives, analysis of public health problems, and application of principles and practices of health promotion and health behavior. This course is repeatable for a maximum of 6 credits. PREREQS: H 515 and H 571 or permission of instructor.

## H 681. ADVANCED TOPICS IN

ENVIRONMENTAL AND OCCUPATIONAL
HEALTH AND SAFETY (3). Advanced topics in the environment, safety and health discipline. Content varies with each offering.

H 682. ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY: MOVING FROM
RESEARCH TO PRACTICE (3). An examination of research transfer models that can be adapted and implemented to environmental and occupational settings. Case studies and content will vary with each course offering

## 683. ADVANCED RESEARCH METHODS

 IN ENVIRONMENTAL AND OCCUPATIONAL HEALTH (3). Covers advanced methods for environmental and occupational health research, including framing environmental and occupational health issues into testable hypotheses, designing appropriate studies, and identifying strengths and weaknesses of different research methods.H 685. RACE, CLASS, CULTURE AND AGING
(4). Examines the diversity among the older population in health status, health beliefs/ behaviors, and health care, and explores the interaction of culture and structure as determinants of their life chances. The empirical literature used in the course is drawn from the experiences of aging of African-American, Latino, and Asian-Pacific Islander elderly. Taught spring term even years. CROSSLISTED as HDFS 685. PREREQS: 9 credits of public health or HDFS graduate course work, or permission of instructor.
H 699. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 16 credits.

## ■ HUMAN DEVELOPMENT AND FAMILY SCIENCES COURSES

HDFS 107. INTRODUCTION TO HUMAN
SERVICES (3). An exploration of the human services profession. Emphasis on prevention and early intervention concepts and programs Development of internship search skills, including an introduction to a wide range of human services organizations. PREREQS: Restricted to students in HDFS or OSU Gerontology Programs.

HDFS 199. SPECIAL PROJECTS (1-16). Special projects designed with instructor Graded $\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 16 credits.

HDFS 201. *CONTEMPORARY FAMILIES IN THE U.S. (3). An introduction to families with application to personal life. Focuses on diversity in family structure, social class, race, gender, work and other social institutions. (Bacc Core Course)

HDFS 209. HUMAN SERVICES PRACTICUM (4). Field experience to learn, primarily through observation, how to apply human service strategies and skills to helping individuals and families served by professional agencies. Supervision by agency and instructor. Requires 90 hours of work on-site. Seminar introduces basic theories and skills through readings, discussion
and reflective exercises. This course is repeatable for a maximum of 8 credits. PREREQS: HDFS 107 [C-] and restricted to students in HDFS, Human Services option. Application required.
HDFS 240. *HUMAN SEXUALITY (3).
Physiological, psychological, social, and
historical influences on sexuality; emphasis on developmental and relationship aspects. (Bacc Core Course)

HDFS 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

HDFS 311. INFANT AND CHILD DEVELOPMENT
(4). Research and theory on development from infancy through middle childhood. Discussion of biological, familial, and sociocultural influences. Development of skills in observing children>s behavior.

HDFS 312. PARENTING RESEARCH AND
APPLICATION (4). Research and theory regarding parenting and parent education, including parenting styles and practices, discipline, parent-child interactions, attachment, and the family context with an emphasis on professional implications for promoting child health and wellbeing.
HDFS 313. ADOLESCENT DEVELOPMENT
(4). Advanced theories and research on physical, social and psychological development during adolescence; emphasizes influences of family, peers, schools and community. PREREQS: Sophomore standing.

## HDFS 314. ADULT DEVELOPMENT AND

AGING (4). Advanced theories and research related to developmental changes and stability in early, middle, and late adulthood. Gender issues, personality, cognition, and adaptation. PREREQS: Upper-division standing.

HDFS 330. FOSTERING LEARNING IN EARLY CHILDHOOD DEVELOPMENT (4). Development of skills in applying theoretical approaches to observing, recording, and interpreting the behavior of young children in order to design interactions that support learning in group settings. PREREQS: (HDFS 211 [C-] or HDFS 311 [C-] ) HDFS 331. DIRECTED EXPERIENCE IN EARLY CHILDHOOD (3). Placement in early childhood program to focus on guidance techniques, classroom management, and implementation of curricula, based on developmental observation, research, and theory. Supplementary weekly seminar, readings, and reports. Lab/rec. Taught on the OSU-Cascades campus only. PREREQS: ( (HDFS 311 [C-] or HDFS 211 [C-] ) and HDFS 330 [C-] ) and application required.
HDFS 341. FAMILY STUDIES (4). Study of family forms, family formation, and family change over the human life course is sociohistorical, economic, political, and cultural context.

## HDFS 360. CRITICAL THINKING IN HUMAN

 DEVELOPMENT AND FAMILY SCIENCES (4).Explores foundations of critical thinking, especially methods for sustaining open-minded inquiry and evaluating evidence and arguments. Current controversies in human development and family policy are targets of debate. PREREQS: HDFS majors only.
HDFS 361. APPLIED RESEARCH METHODS
(4). Basic research methods as they are applied in human development and family studies.
HDFS 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
HDFS 401. RESEARCH (1-6). This course is repeatable for a maximum of 16 credits.
HDFS 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits
HDFS 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
HDFS 405. READING AND CONFERENCE (1-6).

This course is repeatable for a maximum of 16 credits.

HDFS 406. PROJECTS (1-6). This course is repeatable for a maximum of 16 credits.

HDFS 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

HDFS 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

HDFS 410. HUMAN SERVICES INTERNSHIP (6-12). Field experience to apply theory and evidence-based practices to individual, family, and community problems in professional settings. Supervision by agency and instructor. Requires 300 hours of work on-site. Seminar includes reflection and constructive criticism processes Can be taken across 2 consecutive terms (150 hours each) within the same agency. Graded P/N. This course is repeatable for a maximum of 12 credits. PREREQS: (HDFS 107 [C-] and HDFS 209 [P] and HDFS 462 [C-] ) and junior or senior standing. Restricted to students in HDFS and OSU Gerontology Program. Application required.
HDFS 430. ^STUDENT TEACHING IN
EARLY CHILDHOOD DEVELOPMENT AND
EDUCATION (12). Participation in a researchbased model early childhood program focused on student teaching, program development and evaluation, parent education and administration. Placement to be reserved one year in advance. Lec/lab. (Writing Intensive Course) PREREQS: HDFS 330 [C-]

## HDFS 431. FAMILY, SCHOOL, AND

COMMUNITY COLLABORATION (3). Focus on family, school, community environments and interactions for children from infancy to adolescence. Resources and skills for enhancing child development across these settings are emphasized. PREREQS: (HDFS 311 [C-] or HDFS 313 [C-] ) and HDFS 211 or HDFS 313
HDFS 432. CHILDREN AND YOUTH WITH SPECIAL NEEDS (3). Developmental, educational, and family issues related to children and youth with disabilities and giftedness.
PREREQS: 6 credits of HDFS, SOC or PSY.
HDFS 444. FAMILY VIOLENCE AND NEGLECT (4). Examination of the causes and consequences of family abuse and neglect, including child abuse, domestic violence and elder abuse. PREREQS: 6 credits of HDFS, SOC or PSY.
HDFS 447. *FAMILIES AND POVERTY (4).
Examines families in poverty focusing on causes and consequences of family poverty, including global economic factors, migration patterns, discrimination, and policies and programs for families. Community service required. (Bacc Core Course)
HDFS 447H. *FAMILIES AND POVERTY (4). Examines families in poverty focusing on causes and consequences of family poverty, including global economic factors, migration patterns, discrimination, and policies and programs for families. Community service required. (Bacc Core Course) PREREQS: Honors College approval required.

HDFS 461. ^PROGRAM DEVELOPMENT AND PROPOSAL WRITING (4). Principles of program development and evaluation applied to the development of a proposal for a human services program; analysis of needs and resources, identification of empirically-based strategies, and assessment. (Writing Intensive Course) PREREQS: HDFS 360 [D-]
HDFS 462. SKILLS FOR HUMAN SERVICES PROFESSIONALS (4). Exploration of collaborative, strengths-based methods to resolve individual, family, and community problems. Application of ethical standards to case study, with emphasis on the values of human dignity and social justice. Development of basic helping skills within an empowerment framework. PREREQS: HDFS 107 [C-] and HDFS 209 [P] and junior or senior standing, Human Services option
specialization.
HDFS 465. TOPICS IN HUMAN DEVELOPMENT AND FAMILY SCIENCES (3). Topics and issues in human development and family sciences. Examples: children and the law; gender and families; parenting; aging; relationship development across the lifespan. This course is repeatable for a maximum of 18 credits. PREREQS: 6 credits of HDFS, SOC or PSY

## HDFS 465H. TOPICS IN HUMAN

DEVELOPMENT AND FAMILY SCIENCES (3).
Topics and issues in human development and family sciences. Examples: children and the law; gender and families; parenting; aging; relationship development across the lifespan. This course is repeatable for a maximum of 18 credits. PREREQS: 6 credits of HDFS, SOC or PSY and Honors College approval required.
HDFS 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
HDFS 499H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
HDFS 501. RESEARCH (1-6). This course is repeatable for a maximum of 16 credits.
HDFS 502. INDEPENDENT STUDY (1-6). This course is repeatable for a maximum of 16 credits.

HDFS 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

HDFS 505. READING AND CONFERENCE (1-6).
This course is repeatable for a maximum of 16 credits.

HDFS 506. SPECIAL PROBLEMS/SPECIAL
PROJECTS (1-6). This course is repeatable for a maximum of 16 credits.
HDFS 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.
HDFS 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.
HDFS 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.
HDFS 510. INTERNSHIP (3-15). This course is repeatable for a maximum of 16 credits.
HDFS 511. THEORIES OF HUMAN
DEVELOPMENT (4). Critical examination of significant theories of human development. Emphasizes evolution of theories and impact on current human development research.
HDFS 516. CHILD DEVELOPMENT (4). Study of theories, concepts, and issues related to physical, cognitive, social, and emotional development in infants and children. Covers family contexts, risk and resilience, nature/nurture issues, critical/ sensitive periods, the importance of early experience, and the relationship between basic and applied research. PREREQS: 15 quarter credits of social and behavioral sciences.
HDFS 517. ADOLESCENT DEVELOPMENT (4).
Study of theories, concepts, and issues related to biological, cognitive, social, and emotional development in adolescents. Covers identity formation, family contexts, adolescent sexuality, societal contexts for adolescent development, and risk and resilience processes. PREREQS: 15 quarter credits of behavioral and social sciences.

HDFS 518. ADULT DEVELOPMENT AND AGING (4). Study of theories, concepts, and issues related to biological, cognitive, social, and emotional development throughout adulthood. Covers life transitions, stress-related growth, optimal aging, wisdom, and developmental methods. PREREQS: 15 quarter credits of behavioral and social sciences.
HDFS 519. THE LIFE COURSE (4). Introduces students to key concepts, principles, and controversies in life-course studies. Emphasizes how the nature and rhythm of the life course is structured by time and place. Examines how the
lives of individuals and groups are shaped by history, demography, social institutions, states and policies, and culture.

## HDFS 530. RESEARCH IN HUMAN

DEVELOPMENT AND FAMILY SCIENCES I (4).
An overview of research design, measurement, sampling and evaluation research. Introduces computer applications for data collection and analysis. Lec/lab. PREREQS: Undergraduate statistics and 12 credits of social science courses.

## HDFS 531. RESEARCH IN HUMAN

DEVELOPMENT AND FAMILY SCIENCES II (4). Philosophy and methods of behavioral research including experimental design and advanced evaluation research techniques. Lec/lab/rec. PREREQS: H 524 or HDFS 530

HDFS 532. APPLIED QUANTITATIVE METHODS II: LINEAR REGRESSION (4). Principles and application of general linear models for continuous predictors (e.g., multiple regression). PREREQS: HDFS 531 [B-]
HDFS 533. SOCIAL POLICY AND HUMAN DEVELOPMENT (4). Probes how policies and governments affect human development over the life course. Examines experiences in family, education, work, and health. Families are a central lens for examining effects. Offered alternate years.
HDFS 534. SOCIAL PROGRAM AND POLICY
EVALUATION (4). Models of evaluation and application of applied research methods to social programs and policies. PREREQS: HDFS 531 [C]

## HDFS 538. QUALITATIVE RESEARCH

METHODS I (4). Critical survey of qualitative approaches in social science research. Examines historical roots, epistemological perspectives, and ethical issues. Includes ethnographic and observational methods, interview, grounded theory, case study, and participatory approaches. PREREQS: 15 quarter credits of behavioral and social sciences.
HDFS 539. QUALITATIVE METHODS II (4). Critical survey of qualitative approaches in social science research. Examines historical roots, epistemological perspectives, and ethical issues Includes ethnographic and observational methods, interview, grounded theory, case study, and participatory approaches. Application of qualitative methods through completion of a qualitative research project. PREREQS: HDFS 538 [C]

HDFS 541. FAMILY STUDIES (4). Critical survey of current research in family studies with a focus on diverse family structures and processes. PREREQS: 15 quarter credits of behavioral and social sciences.
HDFS 546. THEORIES OF FAMILY STUDIES (4). An overview of the major theoretical perspectives used in the study of families. Issues of theory construction and evaluation are also covered. Course goal is to enable the student to apply conceptual frameworks to a particular area of interest.
HDFS 547. FAMILIES AND POVERTY (3). Examines families in poverty focusing on causes and consequences of family poverty, including global economic factors, migration patterns, discrimination, and policies and programs for families.
HDFS 565. TOPICS IN HUMAN DEVELOPMENT AND FAMILY SCIENCES (3). Topics and issues in human development and family sciences. Examples: children and the law; gender and families; parenting; aging; relationship development across the lifespan. This course is repeatable for a maximum of 18 credits. PREREQS: 6 credits of HDFS, SOC or PSY
HDFS 587. SOCIAL GERONTOLOGY (3). An introduction to aging research targeted toward understanding demographics of aging societies, lifespan theories, methods of aging research, psychosocial aging processes, family and caregiving issues, housing and long-term care, and current social policies.

HDFS 601. RESEARCH (1-6). This course is repeatable for a maximum of 16 credits.

HDFS 602. INDEPENDENT STUDY (1-6). This course is repeatable for a maximum of 16 credits.

HDFS 603. DISSERTATION (1-16). This course is repeatable for a maximum of 999 credits.

HDFS 605. READING AND CONFERENCE (1-6).
This course is repeatable for a maximum of 16 credits.
HDFS 606. SPECIAL PROJECTS (1-6). This course is repeatable for a maximum of 16 credits.
HDFS 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.
HDFS 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.
HDFS 610. PRACTICUM/INTERNSHIP (3-15). This course is repeatable for a maximum of 16 credits.
HDFS 616. ADVANCED TOPICS IN CHILDADOLESCENT DEVELOPMENT (3). Advanced critical study of theory and research related to specific topics of social, emotional, and cognitive development during infancy, childhood and/ or adolescence. This course is repeatable for a maximum of 6 credits.

HDFS 617. ADVANCED TOPICS IN ADULT DEVELOPMENT AND AGING (3). Advanced critical study of theory and research related to specific topics of social and emotional development and stability in adulthood, including later life. This course is repeatable for a maximum of 9 credits.
HDFS 630. QUANTITATIVE METHODS IN
FAMILY AND INDIVIDUAL DEVELOPMENT (3).
Advanced quantitative techniques in human development and family studies. Includes longitudinal designs, structural equation modes. Content varies with each offering. This course is repeatable for a maximum of 9 credits.
PREREQS: HDFS 532 [C]
HDFS 639. COMMMUNITY-BASED
PARTICIPATORY RESEARCH (4). Focuses on initiating and conducting research in partnership with communities. Includes in-depth examination of community-based participatory research (CBPR) elements, principles, theories, and approaches; how researchers can successfully partner with communities; and research with minority and/or underprivileged communities; with examples from environmental health, gerontology, and health promotions. PREREQS: 9 credits of public health or human development and family sciences graduate course work.

## HDFS 665. TEACHING IN HUMAN

DEVELOPMENT AND FAMILY SCIENCES (1). Principles and practices of pedagogy in human development and family sciences related to both on-campus and Ecampus instruction. Graded $\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 6 credits.
HDFS 685. RACE, CLASS, CULTURE AND
AGING (4). Examines the diversity among the older population in health status, health beliefs/ behaviors, and health care, and explores the interaction of culture and structure as determinants of their life chances. The empirical literature used in the course is drawn from the experiences of aging of African-American, Latino, and Asian-Pacific Islander elderly. Taught spring term even years. CROSSLISTED as H 685. PREREQS: 9 credits of public health or HDFS graduate course work, or permission of instructor.
HDFS 699. SPECIAL TOPICS (1-4). This course is repeatable for a maximum of 8 credits.
HDFS 808. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Application to Early Childhood Leadership Directions.

## 4-H YOUTH DEVELOPMENT EDUCATION COURSES

YDE 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits.
YDE 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.
YDE 406. PROJECTS (1-3). This course is repeatable for a maximum of 3 credits. PREREQS Departmental approval required.

YDE 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
YDE 410. INTERNSHIP/WORK EXPERIENCE (1-16). This course is repeatable for a maximum of 16 credits.
YDE 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## OTHER DECREES \& <br> PROCRAMS WHTHIN THE <br> COLLECE OF PUBLIC HEALTH <br> AND HUMAN SCIENCES <br> UNDERGRADUATE MAJORS WITH OPTIONS

## INTERNATIONAL STUDIES (BA, HBA)

See International Programs for information on the International Studies Degree.

## Major Code: 910

## SUSTAINABILITY (BS, HBS)

## Also available via Ecampus.

OSU Main Campus Contact: Ann Scheerer, 3017B Agricultural and Life Sciences Building, Oregon State University, Corvallis, OR 97331; 541-737-5687; Ann. Scheerer@oregonstate.edu or the Sustainability Double Degree academic advisor, Sus.Advising@oregonstate.edu.

OSU-Cascades Campus Contact: Matt Shinderman, Forest Ecosystems and Society, Oregon State University Cascades; 541-322-3159; matt.shinderman@osucascades.edu.

## Sustainability Core (17-20)

All Sustainability Majors and Minors must take the five courses that make up the Sustainability Core: SUS 304, SUS 350, an ecological sustainability course (SUS 102 recommended), a social sustainability course (choose one below), and an economic sustainability course (choose one below):

SUS 304. *Sustainability Assessment (4)
SUS 350. *Sustainable Communities (4)
Ecological Dimensions of Sustainability (3-4)
Select 3 to 4 credits from the following:
BI 301. *Human Impacts on Ecosystems (3)
SUS 102. *Introduction to Environmental Science and Sustainability (4)
Social Dimensions of Sustainability (3-4)
Select 3 to 4 credits from the following:

SOC 381. Social Dimensions of
Sustainability (4)(Ecampus only)
SOC 480. *Environmental Sociology (4)
SOC 481. *Society and Natural Resources (4)
SOC/FES/ANS/FW 485. *Consensus and
Natural Resources (3)
SUS 420. Social Dimensions of Sustainability (3)(Ecampus, Cascades Campus )

## Economic Dimensions of

Sustainability (3-4)
Select 3 to 4 credits from the following:
AEC 250. *Introduction to Environmental Economics and Policy (3)
AEC 351. *Natural Resources Economics and Policy (3)
AEC/ECON 352. *Environmental Economics and Policy (3)
AEC 434. ${ }^{\wedge}$ Measuring Resource and
Environmental Impacts (4)

## Practicum (3-12)

Sustainability majors are required to complete a minimum of 3 Practicum credits. Before registering for a practicum, students must get practicum approved by Sustainability Double Degree advisor. Email: Sus.advising@oregonstate.edu.
SUS 401. Research (3-12)
SUS 410. Internship (3-12)
SUS 499. Special Topics (3-12)
Note: SUS 410 credits may be achieved by participation in an $\mathrm{IE}_{3}$ Global Internship with advisor approval.

## Remaining Elective Credits (4-16)

In addition to the required credits specified above, students must work with the sustainability program advisor to select courses relevant to their discipline and career path interests.

## Credits total=36

Classes that can be used to fulfill remaining requirements are listed below. Students are NOT limited to taking courses within their primary major of study. The Sustainability advisor(s) will approve courses not listed here if they have an obvious link to sustainability and fulfill the intent of the double degree. See the OSU Sustainability Office list of sustain-ability-related courses.

## Business

AEC 250. *Introduction to Environmental Economics and Policy (3)
AEC 253. *Environmental Law, Policy and Economics (4)
AEC 351. *Natural Resource Economics and Policy (3)
AEC/ECON 352. *Environmental
Economics and Policy (3)
AEC 434. ${ }^{\wedge}$ Measuring Resource and
Environmental Impacts (4)
BA 302. Business Process Management (4)
BA 351. Managing Organizations (4)
BA 352. Managing Individual and Team Performance (4)
BA 362. Social Entrepreneurship and Social Initiatives (4)
BA 432. Environmental Law, Sustainability and Business (4)

BA 465. *Systems Thinking and Practice (4)
BA 466. Integrative Strategic Experience (4)
ECON 202. *Introduction to
Macroeconomics (4)
ECON 311. Intermediate Microeconomic
Theory (4)
ECON 315. Intermediate Macroeconomic
Theory (4)
MGMT 452. Leadership (4)

## Engineering

BEE 221. Fundamentals of Ecological Engineering (3)
BEE 320. Biosystems Analysis and Modeling (4)

BEE 322. Ecological Engineering
Thermodynamics and Transfer Process (4)
CCE 422. Green Building Materials (3)
CHE 450. Conventional and Alternative
Energy Systems (3)
CHE 451. Solar Energy Technologies (3)
ECE 438. Electric and Hybrid Vehicles (4)
ENGR 350. *Sustainable Engineering (3)
ENVE 321. Environmental Engineering Fundamentals (4)
ENVE 322. Fundamentals of Environmental Engineering (4)
HEST 310. *Introduction to Community Engagement and Community-Based Design (3)

## Natural Sciences

ANS/FES/FW/SOC 485. *Consensus and Natural Resources (3)
ATS 320. *The Changing Climate (3)
BI 301. *Human Impacts on Ecosystems (3)
BI 306. *^Environmental Ecology (3)
BI 348. *Human Ecology (3)
BI 370. Ecology (3)
BRR 325. *Energy Technology and Social Change (3)
BRR 350. Introduction to Regional Bioenergy (2)
CH 374. *Technology, Energy, and Risk (3)
CH 390. Environmental Chemistry (3)
DHE/WSE 415. *Renewable Materials in the Modern Age (3)
FES 341. Forest Ecology (3)
FES 354. Communities, Natural Areas, and Sustainable Tourism (3)
FES 355. Management for Multiple Resource Values (3)
FES 360. Collaboration and Conflict Management (3)
FES 365. *Issues in Natural Resources Conservation (3) Ecampus or Cascades campus only
FES/TOX 435. *Genes and Chemicals in Agriculture: Value and Risk (3
FES/FW 445. Ecological Restoration (4)
FES/HORT 455. Urban Forest Planning, Policy and Management (4) Ecampus only
FES/NR/RNG 477. *Agroforestry (3)
FES/SOC/ANS/FW 485. *Consensus and Natural Resources (3)
FOR 462. Natural Resource Policy and Law (3)

FW 251. Principles of Fish and Wildlife Conservation (3)
FW 303. Survey of Geographic Information Systems in Natural Resource (3)
FW 321. Applied Community and Ecosystem Ecology (3)
FW 325. *Global Crises in Resource Ecology (3)

FW 326. Integrated Watershed Management (3)

FW 340. *Multicultural Perspectives in Natural Resources (3)
FW 350. *Endangered Species, Society, and Sustainability (3)
FW 435. ${ }^{\wedge}$ Wildlife in Agricultural
Ecosystems (3)
FW 489. Effective Communications in Fisheries and Wildlife Science (3)
GEO 306. *Minerals, Energy, Water, and the Environment (3)
GEO 309. *Environmental Justice (3)
GEOG 300. *Sustainability for the Common Good (3)
GEOG 324. Geography of Life: Species
Distributions and Conservation (4)
GEOG 330. *^Geography of International
Development and Globalization (3)
GEOG 331. *Population, Consumption, and Environment (3)
GEOG 360. GIScience I: Geographic Information Systems and Theory (4)
GEOG 430. Resilience-Based Natural
Resource Management (3)
GEOG 431. Global Resources and
Development (3)
GEOG 441. International Water Resources Management (3)
GEOG 450. Land Use in the American West (3)

GEOG 451. Planning Principles and
Practices for Resilient Communities (4)
GEOG 452. Sustainable Site Planning (3)
PH 313. *Energy Alternatives (3)
SOIL 475. Soil Resource Potentials (4)
SOIL 499. Special Topics (1-16)
SUS 103. *Introduction to Climate Change (4)

WSE 111. Renewable Materials for a Green Planet (2)
WSE 210. *Renewable Materials Technology and Utilization (4)
WSE 266. *Industrial Hemp (3)
WSE 321. Chemistry of Renewable Materials (3)

WSE 392. *Bamboolooza: The Fascinating World of Bamboo (3)
WSE 453. ^Global Trade in Renewable Materials (3)
WSE 455. Marketing and Innovation in Renewable Materials (4)
WSE 473. Bioenergy and Environmental Impact (3)
WSE 475. Environmental Assessment of Building Materials (4)

## Social Sciences/Humanities

AEC 250. *Introduction to Environmental Economics and Policy (3)
AEC 253. *Environmental Law, Policy, and Economics (4)
AEC 351. *Natural Resource Economics and Policy (3)
AEC/ECON 352. *Environmental Economics and Policy (3)
AEC 434. ${ }^{\wedge}$ Measuring Resource and Environmental Impacts (4)
ANS/FES/FW/SOC 485. *Consensus and Natural Resources (3)
ANTH 481. *Natural Resources and
Community Values (3)
COMM 408. Workshop (3)
COMM 440. Theories of Conflict and Conflict Management (3)

COMM 442. Bargaining and Negotiation Processes (3)
ENG 482. Studies in American Literature, Culture and the Environment (4)
FES/SOC/ANS/FW 485. *Consensus and
Natural Resources (3)
HEST 310. *Introduction to Community
Engagement and Community-Based
Design (3)
PHL 325. *Scientific Reasoning (4)
PHL 390. Moral Theories (3)
PHL 439. Philosophy of Nature (3)
PHL 440. Environmental Ethics (3)
PHL/REL 443. *World Views and
Environmental Values (3)
PS 331. *State and Local Politics (4)
PS 370. *Science, Religion, and Politics (4)
PS 374. *Sustainable Living: Practices and Policies (4)
PS 449. ${ }^{\wedge}$ Topics in Comparative Politics (4)
PS 461. Environmental Political Theory (4)
PS 475. Environmental Politics and Policy (4)

PS 477. International Environmental
Politics and Policy (4)
SOC 360. *Population Trends and Policy (4)

## UNDERGRADUATE MINORS

## SUSTAINABILITY MINOR

Available on the Corvallis and OSU-Cascades campuses, and via Ecampus.
OSU Main Campus Contact: Ann
Scheerer, 3017B Agricultural and Life Sciences Building, Oregon State University, Corvallis, OR 97331; 541-737-5687; Ann. Scheerer@oregonstate.edu or the Sustainability Double Degree academic advisor, Sus.Advising@oregonstate.edu.

OSU-Cascades Campus Contact: Matt Shinderman, Forest Ecosystems and Society, Oregon State University Cascades; 541-322-3159; matt.shinderman@ osucascades.edu.

The Sustainability minor includes core sustainability courses (5) and tailored elective courses to expand students' knowledge and experience of their primary major in the context of sustainability principles and frameworks. Courses from a student's major course of study will not count towards minor requirements. Completion of the Sustainability minor requires 27 credits beyond the 180-credit minimum for graduation.

## Sustainability Core (17-20)

All Sustainability students must take (8):
SUS 304. *Sustainability Assessment (4)
SUS 350. *Sustainable Communities (4)

## Social Dimensions of

Sustainability:
Select 3 to 4 credits from the following:
SOC 381. Social Dimensions of Sustainability (4)
SOC 480. *Environmental Sociology (4)
SOC 481. *Society and Natural Resources (4)
SOC 485/ANS 485/FES 485/FW 485.
*Consensus and Natural Resources (3)
SUS 420. Social Dimensions of Sustainability (3)
Ecological Dimensions of

## Sustainability:

Select 3 to 4 credits from the following:
BI 306. *^Environmental Ecology (3)
SUS 102. *Introduction to Environmental
Science and Sustainability (4)

## Economic Dimensions of

## Sustainability:

Select 3 to 4 credits from the following:
AEC 250. *Introduction to Environmental
Economics and Policy (3)
AEC/ECON 352. *Environmental
Economics and Policy (3)
AEC 434. ${ }^{\wedge}$ Measuring Resource and Environmental Impacts (4)

## Sustainability Individualized Study/

## Elective Credits (7-10)

Students will work with their primary academic advisor and the Sustainability academic advisor to select electives in the theme relevant to their interests for a total of 7-10 credits. Students should discuss with Sustainability advisor to apply elective courses that may not be listed below.

## Total Credits=27

## Elective Courses:

## Business

AEC 250. *Introduction to Environmental Economics and Policy (3)
AEC 253. *Environmental Law, Policy and Economics (4)
AEC 351. *Natural Resource Economics and Policy (3)
AEC/ECON 352. *Environmental
Economics and Policy (3)
AEC 434. ${ }^{\wedge}$ Measuring Resource and
Environmental Impacts (4)
BA 302. Business Process Management (4)
BA 351. Managing Organizations (4)
BA 352. Managing Individual and Team Performance (4)
BA 362. Social Entrepreneurship and Social Initiatives (4)
BA 432. Environmental Law, Sustainability and Business (4)
BA 466. Integrative Strategic Experience (4)
ECON 202. Introduction to
Macroeconomics (4)
ECON 315. Intermediate Macroeconomic Theory (4)

## Engineering

BEE 221. Fundamentals of Ecological Engineering (3)
BEE 320. Biosystems Analysis and Modeling (4)

BEE 322. Ecological Engineering
Thermodynamics and Transfer Process (4)
CCE 422. Green Building Materials (3)
CHE 450. Conventional and Alternative

Energy Systems (3)
CHE 451. Solar Energy Technologies (3)
ECE 438. Electric and Hybrid Electric Vehicles (4)
ENGR 350. *Sustainable Engineering (3)
ENVE 321. Environmental Engineering Fundamentals (4)
ME 312. Thermodynamics (4)

## Natural Sciences

ATS 320. *The Changing Climate (3)
[Terminated fall 2017]
BI 301. *Human Impacts on Ecosystems (3)

PUBLIC HEALTH (MPH, PhD)
Graduate Areas of Concentration Biostatistics (MPH only); environmental and occupational health (MPH, PhD); epidemiology (MPH, PhD); health management and policy (MPH only); health policy (PhD only); health promotion and health behavior (MPH,
PhD); international health (MPH only)'
The PhD and MPH in public health degree programs are summarized below.

For further information about public health graduate programs, contact 541-737-3825 or visit the Public Health major website at http://health.oregonstate.edu/ degrees/graduate/public-health.

The College of Public Health and
Human Sciences is accredited by the

Council on Education for Public Health (CEPD).

## Doctor of Philosophy (PhD) in Public Health

The PhD in Public Health is for individuals who wish to prepare themselves for careers in university teaching, research, consulting, policy development, or other high-level public health positions. There are currently five areas of concentration offered for the PhD degree:

1. Environmental and occupational health;
2. Epidemiology;
3. Global health;
4. Health policy;
5. Health promotion and health behavior.
A master's degree in a relevant field is required before admission into the PhD program.

The PhD program consists of a minimum of 109 credits, including at least 36 graduate credits devoted to preparation of the thesis. Doctoral students take courses in research and quantitative methods, theory, ethics, and their area of emphasis. Each student and his or her doctoral committee jointly determine the student's specific program of doctoral study. This process allows students to design a course of study uniquely suited to their particular needs and career goals. Further information about these requirements is available in the PhD in Public Health website and PhD handbook at http://health.oregonstate.edu/degrees/ graduate/public-health/phd-program.

## Master of Public Health (MPH)

The College of Public Health and Human Sciences offers six options within the MPH degree:

1. Biostatistics
2. Environmental and Occupational Health
3. Epidemiology
4. Global Health
5. Health Management and Policy
6. Health Promotion and Health Behavior
MPH students take a common MPH core of five courses in the following areas:

- Biostatistics
- Environmental health
- Epidemiology
- Health behavior
- Health systems organization

Degree requirements vary by option. See handbooks for option-specific degree requirements: http://health.oregonstate. edu/degrees/graduate/public-health/ graduate-handbooks.

All MPH students must do a 6-credit internship upon completion of their core and option classes. Upon completion of all required course work and the internship, all MPH students must schedule a final oral examination. Students must
receive approval to take the exam from their academic advisors.

## Major Code: $\mathbf{7 5 8 0}$

## OPTIONS

## BIOSTATISTICS OPTION

The Biostatistics graduate option of the MPH program will train students in statistics applied to public health and healthcare settings. Graduates will be able to work in health departments, medical schools, nongovernmental agencies, and CDC and WHO field programs.

## Required

H 526. Epidemiologic Methods (3)
H 580. Linear Regression and Analysis of Time to Event Data (4)
H 581. Generalized Linear Models and Categorical Data Analysis (4)
H 582. Analysis of Correlated Health Data (3)

H 584. Analysis of Intervention Studies and Clinical Trials (3)
ST 521. Introduction to Mathematical Statistics (4)
ST 522. Introduction to Mathematical Statistics (4)
Electives (13 credits)
Option Code: 7581

## ENVIRONMENTAL AND

OCCUPATIONAL HEALTH OPTION
The Environmental and Occupational Health graduate option of the MPH program focuses on understanding the impact of environmental and occupational hazards on human health and society, as well as, developing effective interventions that will control and prevent exposure to hazards.

## Required

GRAD 520. Responsible Conduct of Research (1)
H 542. Environmental and Occupational Health Risk Assessment (3)
H 543. Exposure Science I (3)
H 544. Environmental and Occupational Epidemiology (3)
H 546. Exposure Science II: Sampling and Measurement (3)
H 548. Public Health Toxicology (3)
H 583. Environmental and Occupational Health and Safety Management (3)
Electives (18 credits)

## Option Code: 7582

## EPIDEMIOLOGY OPTION

The Epidemiology graduate option of the MPH program is designed primarily for those interested in using their epidemiologic skills in applied settings - international health, health departments, non-governmental agencies, or CDC and WHO field programs, but can also be the basis for doctoral training in epidemiology or a complement to other doctoral or professional training.

## Required

H 526. Epidemiologic Methods (3)
H 553. Applied Epidemiologic Methods (3)
H 580. Linear Regression and Analysis of
Time to Event Data (4)
H 581. Generalized Linear Models and Categorical Data Analysis (4)
Electives (15 credits)
At least three of the following:
H 550. Social Epidemiology (3)
H 552. Disaster Epidemiology (3)
H 554. Epidemiology of Aging (3)
H 555. Cancer Epidemiology (3)
H 560. Public Health Surveillance (3)
H 562. Infectious Disease Epidemiology (3) H 599. Special Topics (Reproductive Epidemiology) (3)
Option Code: 7583

## GLOBAL HEALTH OPTION

The Global Health graduate option of the MPH program prepares students for public health leadership roles in international health, with an emphasis on health development for those in middle- and low-income nations. Courses focus on understanding complex issues, problem solving and developing analytical skills to critically view global health issues in order to promote progressive, comprehensive, sustainable and equitable community ownership of health development. As part of this interdisciplinary program, students acquire wide-ranging knowledge of international health while also developing an individually designed specialization.

## Required

H 511. Community, Culture and Global Health (3)
H 516. Research Methods for Global Health (3)

H 519. Displacement, Migration, and Global Health (3)
H 527. Critical Assessment of International Health Programs (3)
H 528. Global Health Issues (3)
H 529. International Health (3)

## Electives (18 credits)

Option Code: 7587

## HEALTH MANAGEMENT AND POLICY OPTION

In the Health Management and Policy graduate option of the MPH program, students will develop the ability to think about public health problems in practical ways using sound conceptual frameworks. Public health problems will be viewed from the perspective of those who receive, provide, finance and regulate care.

## Required

H 518. Public Health Ethics and Issues (3) or PHL 544. Biomedical Ethics (4)
H 530. Health Policy Analysis (3)
H 532. Economic Issues in Health and Medical Care (3)
H 536. Healthcare Organization Theory and Behavior (3)
H 556. Strategic Management of Health

## Option Electives

## Four of the following:

H 515. Research Methods in Social and Behavioral Health Sciences (3)
H 531. Health Care Marketing (3)
[Terminated fall 2017]
H 534. Health Care Law and Regulation (3)
H 557. Financial Management of Health Care Organizations (3)
H 558. Reimbursement Mechanisms (3)
H 559. Contracts and Negotiation (3) [Terminated fall 2017]
Other Electives (12 credits)
Option Code: 7584

## HEALTH PROMOTION AND

 HEALTH BEHAVIOR OPTIONIn the Health Promotion and Health Behavior graduate option of the MPH program, students will gain an understanding of the role of behavioral and social influences in public health and learn to apply the principles and practices of health promotion and behavior to address current and emerging public health problems.

## Required

H 515. Research Methods in Social and Behavioral Health Sciences (3)
H 549. Mass Media and Health (3)
H 572. Community Organization for Health Promotion and Education (3)
H 575. Evaluation of Health Promotion and Education Programs (3)
H 576. Program Planning/Proposal Writing in Health/Human Services (4)
Electives (20 credits)
Option Code: 7585

## PUBLIC HEALTH GRADUATE

 MINORFor more details, see a public health program coordinator.

## Minor Code: $\mathbf{7 5 8 0}$

## PUBLIC HEALTH GRADUATE

## CERTIFICATE

Also available via Ecampus.
MPH Core Courses (17 credits)
H 512. Introduction to Environmental and
Occupational Health Sciences (3)
H 524. Introduction to Biostatistics (4)
H 525. Principles of Epidemiology (4)
H 533. Health Systems Organization (3)
H 571. Principles of Health Behavior (3)

## Electives (3 credits)

H 530. Health Policy Analysis (3)
H 536. Healthcare Organizational Theory and Behavior (3)
Total=20 credits
Major Code: CG10

For more than a century, military training has been offered at Oregon State University. Fulfilling a provision of the Morrill Act of 1862, which gave Corvallis College its first public support, an Army Cadet Corps was organized in 1873.

ROTC at Oregon State is made up of the departments of Military Science, Naval Science, and Aerospace Studies. In 1917, the Department of Military Science became responsible for all military training under the National Defense Act of 1916. This act expanded and standardized the training of Army officers by colleges and universities and established the Reserve Officer Training Corps (ROTC). During World War II, OSU became known as the "West Point of the West" for commissioning more officers than any other nonmilitary academy in the nation. At the end of World War II, the secretary of the Navy commissioned the Department of Naval Science (NROTC) on this campus to provide the training of both Navy and Marine Corps officers. On July 1, 1949, the U.S. Air Force activated an AFROTC unit that today is called the Department of Aerospace Studies. OSU is now one of 48 colleges and universities that offer education for all three military departments.

Originally, two years of military science and tactics were required of all able-bodied male students, but since 1962, ROTC has been voluntary. Since 1965, two-year programs have been available for students who have finished two years of college but have not taken ROTC previously.

As opportunities for women to serve as officers in the armed forces grow, opportunities for women to participate in ROTC programs expand. Women have long been eligible to take ROTC course work for credit. Since 1970, they have been enrolled as cadets in Air Force ROTC and, since 1973, have also been enrolled as cadets and midshipmen in the Army and Navy ROTC programs.

## MISSION AND OBJECTIVES

The ROTC selects and prepares young men and women, through a program of instruction coordinated with the student's normal academic curriculum, for commissioning and service as officers in the regular and reserve components of the Army, Navy, Air Force, and Marine Corps.

## UNIFORMS AND ALLOWANCES

Students in each of the units receive uniforms to be worn at drill periods and on special occasions. Travel to and from any summer camps or cruises is paid. While at camp or on a cruise, the members receive food and quarters at government expense in addition to basic pay. (See the individual sections for further information on the various camps and cruises.) Those selected for the scholarship programs receive tuition, books, and fees plus $\$ 300$ to $\$ 500$ a month subsistence pay for up to 40 months.

## FLIGHT TRAINING

Eligible Army, Navy, Marine Corps, and Air Force ROTC students may be selected for flight training upon their successful completion of the program and commissioning.

## HOW TO ENROLL

See the Army, Navy, or Air Force sections of this catalog for enrollment details for the various ROTC programs. All three departments have staff available throughout the year during normal school hours to answer any inquiries regarding the ROTC programs.

McMullen, Capt Michael Vanderlaan

## Minor

Aerospace Studies
The Air Force Reserve Officers Training Corps (AFROTC) program, offered by the Department of Aerospace Studies, provides college-level education to prepare interested men and women for commissioning as second lieutenants in the United States Air Force while simultaneously completing any university undergraduate or graduate degree. The program emphasizes leadership, managerial skills, and the development of each student's sense of personal integrity, honor, and individual responsibility.

Aerospace Studies courses are open to all university students and are taught by Air Force officers. Detachment 685 (Aerospace Studies) offers a Minor in Aerospace Leadership for graduating students/cadets. If students desire a career as an Air Force officer, they must complete all AFROTC requirements. University students who attend academic classes only as a special student (there is no stipend for special students) can receive elective credit for the course(s). Except for cadets on AFROTC scholarship, students incur no active-duty service commitment by taking general military courses (GMC) and may drop the courses at any time within the limits of university course-drop policies.
The U.S. Air Force's mission is to "Fly, Fight and Win in Air, Space and Cyber-
space." Whether a student's interest lies in flying advanced aircraft, operating sophisticated outer space systems, defending America's cyberspace infrastructure, researching and developing state-of-theart technology, or working as a language interpreter, defense intelligence officer, medical or legal professional, the Aerospace Studies Department can guide students to exciting and challenging opportunities.

## AFROTC SCHOLARSHIPS

If students qualify, scholarship opportunities are available. A variety of full and partial scholarships are available, and certain scholarships have specific requirements. High school students must apply online by December 1, the year before they begin college in order to compete for a scholarship while still in high school. Students will find application procedures and forms at http://www. afrotc.com/.

Air Force ROTC scholarships cover up to $100 \%$ of tuition, laboratory fees, and incidental expenses. ROTC scholarship students will also receive $\$ 600$ annually for textbooks and a monthly tax-free stipend of up to $\$ 500$. Students must apply and be accepted into the AFROTC program and agree to accept an Air Force officer commission and service commitment upon graduation.

For details on Air Force scholarships, contact the AFROTC Detachment, McAlexander Fieldhouse, Room 303, (541)7373291, (800)633-7352 or email: afrotc@ oregonstate.edu. Website: http://flyingbeavs.com/ or http://www.afrotc.com/.

## ALLOWANCES, UNIFORMS, TEXTBOOKS

Students on an Air Force ROTC scholarship or enrolled in the ROTC Professional Officer Course are paid a monthly stipend of up to $\$ 500$. Uniforms and textbooks for all Aerospace Studies courses are provided by the Air Force.

## Four- or Three-Year Program

The four-or three-year program consists of the General Military Course: six quarters of lower-division Air Force Studies classes, including a laboratory each term, and the Professional Officer Course: six quarters of upper-division Air Force Studies classes, including a laboratory each term. Four- or three-year cadets attend four weeks of expeditionary summer field training (AS 304) prior to their junior year of college.

If you're already in college, it's not too late to experience the benefits of joining Air Force ROTC. There are numerous options for you even if you start after your freshman year. Previous military experience-ROTC, academy, or military service-may allow the Professor of Aerospace Studies to waive all or part of the General Military Course (first-year and
sophomore years) for students enrolled in the four-year AFROTC program. This program provides an opportunity for students who did not enter ROTC previously. Entry is on a competitive basis and the accelerated three-year program is available to students who join their sophomore year. Selectees attend mandatory six-week summer field training session (AS 304) two summers before commissioning with a bachelor's, master's or doctorate degree. Applicants must have one year remaining in college after the five-week field training. The curriculum includes AS 304 (five-week field training); six quarters of upper-division Air Force Studies classes, including a laboratory each term.
Students may enter the first-year class during the fall, winter, or spring term. Sophomore students may take the first-year and sophomore level courses concurrently. Prior to enrolling in the last two years of the program, the Professional Officer Course, the student must meet AFROTC qualification standards and requirements.

## Accelerated (Two-Year) Program

 Specially qualified students are eligible for two-year ROTC scholarships. These scholarships provide up to full college tuition, required fees, textbook allowance, and pay the recipient $\$ 250-400$ per academic month. The two-year program is available for eligible candidates who can complete all AFROTC requirements and their degree in two years from their entrance into the AFROTC program. Cadets will complete the entire Professional Officer Course in two years. A condensed General Military Course curriculum must be completed within the first year as well. Cadets will attend a standard summer Field Training session prior to the start of their senior year. Potential applicants are considered on a case by case basis. Veterans, active duty personnel, and graduate students are encouraged to inquire about special accelerated programs designed for them. One and two-year programs are also open for Law Students and graduate Law Programs. Students already attending law school wishing to serve as Air Force Judge Advocate Generals (JAGs) may apply for the program through the Air Force JAG website. Officer training will be provided by the AFROTC detachment at an accelerated pace to meet Air Force recruiting goals.A highly selective one-year program is available for specially selected eligible candidates who can complete all AFROTC requirements and their degree in one year from their entrance into the AFROTC program. Cadets will complete the entire Professional Officer Course (POC) in one year. A condensed General Military Course (GMC) curriculum
must be completed within the first 1.5 terms. Cadets will attend a standard Field Training session prior to the start of their senior year. Potential applicants are considered on a case by case basis pending departmental approval. To allow for appropriate vetting, applicants must contact the department prior to the end of their junior year. Please contact the Air Force ROTC department for more information.

## GENERAL MILITARY COURSE (GMC)

The 100- and 200-level courses for AFROTC cadets consist of one classroom hour, two hours of leadership laboratory, and two hours of physical fitness per week during the freshman and sophomore years. Uniforms and textbooks are provided. Students may enter the freshman class at the start of autumn or winter quarters. Sophomore students may enter at the start of autumn quarter. A four-week field training-course, normally taken during the summer between the sophomore and junior years, is required for entry into the professional officer courses. Students may receive pay and travel costs for field training.

## PROFESSIONAL OFFICER COURSE (POC)

Cadets selected for enrollment in professional officer courses are enlisted in the Air Force Reserve and receive tax-free monthly subsistence stipends. They are furnished text books and uniforms. Junior- and senior-level classes consist of three hours of academic classes, two hours of leadership laboratory and two hours of physical fitness per week.

## COMMITMENTS

Students in the four-year program incur no obligation during their first two years in AFROTC unless on scholarship. The student agrees to accept a commission, if offered, only after enrolling in AS 311. High school scholarship students incur a commitment at the beginning of their sophomore year. Upon accepting their commissions, students incur a four-year commitment; pilots incur a 10-year obligation after completion of pilot training; combat systems officers and air battle managers incur a six-year obligation after initial training. Graduates pursuing medical school incur a four-year commitment after medical school.

## STANDARDS

Cadets must be U.S. citizens of sound physical condition, maintain academic standards and high moral character. Air Force physical fitness standards must be met prior to attending field training and commissioning.

Cadets must be commissioned as Air Force officers prior to age 30.

## FURTHER EDUCATIONAL OPPORTUNITIES

After completion of AFROTC requirements, advanced degrees may be sought by delaying active duty commitments. Some commissioned officers continue advanced studies through fully-funded Air Force Institute of Technology or other DoD-sponsored programs.

## FIELD TRAINING

Under the Air Force ROTC program, one summer field training session is required, normally after the AS 200 year. Successful completion of field training is required for all cadets prior to membership in the Professional Officer Course. Students are paid varying amounts during field training.

## AEROSPACE STUDIES MINOR

The Department of Air Force Studies offers a minor open to any OSU student. Students gain a broad exposure to the concepts of aerospace power, leadership and management, and general military studies. A student cannot use a course for this minor that is being used for their major.

■ AEROSPACE STUDIES COURSES
AS 111. FOUNDATIONS OF THE AIR FORCE PART I (1). The introduction to the Air Force mission and organization. Featured topics include Air Force dress and appearance stand standards; military customs and courtesies, Air Force heritage, overview of the Department of the Air Force, and Air Force core values. Basic oral and written communication will be assessed. PREREQS: Taken concurrently with AS 120 for fully eligible General Military Course students.
AS 112. FOUNDATIONS OF THE AIR FORCE PART II (1). Second part of the introduction to the Air Force mission and organization. Featured topics include Air Force career opportunities, Air Force benefits, military communication skills, Air Force installations, and look at the basic characteristics of war. Basic oral and written communication will be assessed. PREREQS: Taken concurrently with AS 120 for fully eligible General Military Course students.

AS 113. FOUNDATIONS OF THE AIR FORCE PART III (1). Third part of the introduction of what the Air Force is about and what the Air Force has to offer. Featured topics include basic leadership, team building, interpersonal skills, diversity in the Air Force, and the oath of office and commissioning. Basic oral and written communication will be assessed. PREREQS: Taken concurrently with AS 120 for fully eligible General Military Course students.
AS 120. LEADERSHIP LABORATORY (1). Cadets learn officership, leadership, drill and ceremony, and customs and courtesies. Lab. Graded $P / N$. This course is repeatable for a maximum of 3 credits. PREREQS: Departmental approval. Taken concurrently with AS 111, AS 112 and AS 113. Only offered to students enrolled in the AFROTC officer commissioning program.

AS 211.THE EVOLUTION OF AIR AND SPACE POWER 1860-1945 (1). Study of the development of air power, concepts, and doctrine from its beginnings to the end of World War II. Historical examples examined include balloons, dirigibles, Wright Brotherss first flight, and the role of air power in World War I and II. Oral and written communication skills will be assessed. PREREQS: If enrolled in the AFROTC officer commissioning program, must be taken concurrently with AS 220.
AS 212. THE EVOLUTION OF AIR AND SPACE
POWER 1945-1990 (1). Study of the development of air power, concepts, and doctrine during the Cold War. Historical examples examined include the Berlin Airlift, nuclear deterrence, and the role of air power employment in the Korean and Vietnam conflicts. Oral and written communication skills will be assessed. PREREQS: Taken concurrently with AS 220 if fully eligible General Military Course student.

## AS 213. THE EVOLUTION OF AIR AND SPACE

POWER 1991-2025 (1). Study of the factors contributing to the development of air power, concepts, and doctrine from the Persian Gulf War in 1990 to the present and beyond. Historical examples examined include the air campaigns used in the Gulf War, Kosovo crisis, Operations

Enduring Freedom, Iraqi Freedom, and the Global War on Terrorism. Oral and written communication skills will be assessed. PREREQS: Taken concurrently with AS 220 if fully eligible General Military Course student.
AS 220. LEADERSHIP LABORATORY (1). Cadets are placed in element leadership positions in order to know and comprehend the Air Force concepts of command, discipline, tradition, and courtesies. Lab. Graded P/N. This course is repeatable for a maximum of 10 credits. PREREQS: Departmental approval. AS 220 is taken concurrently with AS 211, AS 212, and AS 213. Only offered to students enrolled in the AFROTC officer commissioning program.

AS 299. SPECIAL TOPICS IN AIR FORCE
STUDIES (1-16). Supervised individual work. This course is repeatable for a maximum of 99 credits. PREREQS: Departmental approval required.
AS 304. FIELD TRAINING (6). Four-week field training supplements campus courses in developing leadership and discipline. Mission, organization, and functions of an Air Force base; marksmanship, survival, and physical training; aircrew and aircraft indoctrination; orientation on specific opportunities in career fields. Conducted at an Air Force base. Graded P/N. PREREQS: Department head approval required.
AS 311. LEADERSHIP FUNDAMENTALS, TEAM BUILDING AND PROBLEM SOLVING (3).
Emphasis on leadership and management fundamentals, team building and problem solving. Case studies are used to examine leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. Unique exercises will be utilized to emphasize team building and problem solving. Oral and written communication skills will be assessed. PREREQS: Must take concurrently with AS 320 if fully eligible Professional Officer Course student.

## AS 312. EFFECTIVE SUPERVISION AND

## GROUP CONFLICT MANAGEMENT (3).

Emphasis on situational leadership, group conflict management, effective supervision, professional knowledge, and communicative skills required of an Air Force officer. Unique case studies on leadership and management situations, and group conflict management will be utilized. Oral and written communication skills will be assessed. PREREQS: Taken concurrently with AS 320 if fully eligible Professional Officer Course student.

AS 313. LEADERSHIP, ETHICS, AIR FORCE
CORE VALUES AND ACCOUNTABILITY (3).
Emphasis on leadership ethics, leadership core values, leadership accountability, and professional knowledge. Unique case studies on leadership ethics and accountability will be utilized. Oral and written communication skills will be assessed. PREREQS: Taken concurrently with AS 320 if fully eligible Professional Officer Course Student.
AS 320. LEADERSHIP LABORATORY (1). Cadets are placed in line and staff leadership positions as a preparation for Air Force active duty. Cadet responsibilities include planning, organizing, directing, and controlling the activities of the cadet corps. Lab. Graded $\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 3 credits. PREREQS: Departmental approval. AS 304. AS 320 is taken concurrently with AS 311, AS 312 and AS 313. Only offered to students enrolled in the AFROTC officer commissioning program.
AS 405. READING AND CONFERENCE (116). Supervised individual work. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

AS 411. NATIONAL SECURITY AFFAIRS (3). Emphasis on the needs for national security, evolution of American defense strategy, policy, and organization. Examination of methods for managing conflict, alliances and regional security to preserve American interests. Arms control, terrorism, and current military issues
will also be addressed. Refinement of oral and written communication skills will be assessed. PREREQS: Taken concurrently with AS 420 if fully eligible Professional Officer Course student.

## AS 412. WORLD REGIONAL CULTURAL

STUDIES (3). Study key transnational issues and religious or ethnic factors that shape the environment Air Force professionals must operate in. Emphasis will be on national security perspective of Africa, South Asia, East Asia, Latin America, Europe, Middle East and former Soviet
Republics in transition. Refinement of oral and written communication skills will be assessed. PREREQS: Taken concurrently with AS 420 if fully eligible Professional Officer Course student.
AS 413. PREPARATION FOR ACTIVE DUTY (3).
Emphasis on current military issues, evaluation systems, military commission, and risk management. Final preparation for the Air Force professional before commissioning. Refinement of oral and written communication skills will be emphasized. PREREQS: Taken concurrently with AS 420 if fully eligible Professional Officer Course student.
AS 420. LEADERSHIP LABORATORY (1). The
senior-level Leadership Laboratory program places cadets in command, line, and staff positions as a preparation for commissioned Air Force service. Cadet responsibilities include planning, organizing, directing, coordinating, and controlling leadership laboratory and the activities of the cadet corps. Lab. Graded P/N. This course is repeatable for a maximum of 6 credits. PREREQS: Departmental approval. AS 304. AS 420 is taken concurrently with AS 411, AS 412 and AS 413. Only offered to students enrolled in the AFROTC officer commissioning program.

## MINOR

Military Science
The Military Science program is intended for students with the characteristics and attributes of a "scholar-athlete-leader." The program is specifically designed to give college students on-campus instruction and experience in the art of organizing, motivating, and leading others. It includes instruction in leadership to develop self-discipline, physical stamina, and professional bearing.
All courses offered by the Department of Military Science are fully accredited and applicable toward fulfilling academic requirements for graduation. The univer-
sity offers each eligible student the opportunity to compete for a commission as an officer in the United States Army while earning a college degree. There are both basic and advanced programs with multiple entry points which can be tailored to a student's needs. Merit scholarship opportunities exist for students in any approved academic discipline, particularly in computer science, engineering, math, and science. Uniforms and books are provided free of charge. There are multiple opportunities for cadets to attend funded internships, training with Army units, multi-week trips to foreign countries across the world, Airborne, and Air Assault Training.

## BASIC PROGRAM

The basic program is voluntary and is open to all students, comprising the 1 and 2 -credit, lower-division courses listed below, and is normally completed during the freshman and sophomore years. Students may also satisfy the advanced program prerequisites or accelerate their progress through previous military experience or by completing MS 214, Military Science: Leader's Training Course (LTC) ( 6 credits) held at Fort Knox, Kentucky during the summer. No military obligation is incurred for participation in basic program classes, and students can decide whether they want to apply for the advanced program. Additionally, students who only want to attend the lecture portion of the lower-division classes may do so and are not expected to wear uniforms.

## ADVANCED PROGRAM

Students who desire to enroll in the two-year advanced program, comprising the 3 -credit, upper-division courses listed below, must apply and be accepted. Only those students who have satisfied the basic program requirements described above are eligible. Enrollment in the Advanced Program requires a contract incurring a Service Commitment in the Army, Army Reserve, or Army National Guard.

Students in the advanced program receive $\$ 450$ to $\$ 500$ per month subsistence allowance during the school year. During the four-week summer Leadership Development Assessment Course (LDAC), they receive room and board, travel expenses to and from the program location, and approximately $\$ 900$ for the period involved. Veteran students enrolled in the ROTC program receive these amounts in addition to any other educational benefits.
The LDAC summer program is normally attended between the cadet's junior and senior years. The university awards 6 credits for successful completion.

## CAMPUS-BASED SCHOLARSHIP PROGRAM

Each year, the Army ROTC program has dedicated four-, three-, and two-year scholarships awarded to local students attending or planning to attend OSU. Applications are accepted any time during the year. Applicants must meet physical requirements, have a minimum cumulative college GPA of 2.50, SAT score of $920+$ or ACT of 19+, no criminal record, and be of good moral character. The scholarship pays full tuition, \$1,200 per year for books, and a stipend of $\$ 300$ to $\$ 500$ per month while the student is in school. For an application, contact the Department of Military Science at 541-737-3511.

## SIMULTANEOUS MEMBERSHIP PROGRAM (SMP)

The Simultaneous Membership Program (SMP) is a voluntary program that allows ROTC students to join the Army National Guard and Army Reserve. Upon graduation from basic training and advanced training, students are eligible for the G.I. Bill, which, combined with tuition assistance, is worth over $\$ 18,000$ per year as a full-time student. Upon degree completion, students earn a commission in the active Army, National Guard or Army Reserve.

## SERVICE OBLIGATION AND ACADEMIC DELAY

Current laws and regulations require each advanced program graduate to accept a commission upon graduation and to fulfill an eight-year military commitment. This may be satisfied by eight years of reserve forces duty in the USAR or ARNG or by a combination of active duty and reserve forces duty, usually four years active duty and four years reserve forces duty.
Delays in reporting to active duty may also be granted for up to four years to selected students who are enrolled in a full-time program of instruction leading to an acceptable advanced degree.

## MILITARY SCIENCE MINOR

Also available at OSU-Cascades.
The Department of Military Science offers a minor which is open to any OSU student.

At least 18 of the 27 credits required in the minor must be military science courses.
Military Science (18)
MS 111. Military Science I: Introduction to Army Leadership and ROTC (1)
MS 112. Military Science I: Introduction to Basic Military Skills (1)

■ MILITARY SCIENCE COURSES
MS 111. MILITARY SCIENCE I: INTRODUCTION TO ARMY LEADERSHIP AND ROTC (1).
Introduction to ROTC, and its relationship to the U.S. Army. Role of the army officer, including leadership and management fundamentals. Introduction to land navigation. Lec/lab.
MS 112. MILITARY SCIENCE I: INTRODUCTION TO BASIC MILITARY SKILLS (1). Basic small unit tactics; land navigation; how to read a topographic
map and use a magnetic compass; includes practical exercises. Graded A-F only.
MS 113. MILITARY SCIENCE I: INTRODUCTION TO TACTICAL LEADERSHIP (1). Customs and traditions of the U.S. Army; unit organization and missions. Types of careers available to army officers. Practical exercises. Lec/lab.
MS 130. *MILITARY PHYSICAL CONDITIONING
(1). Prepares military science cadets and university students to excel in the Army Physical Fitness Test (AFPT). (Bacc Core Course) This course is repeatable for a maximum of 11 credits.
MS 211. MILITARY SCIENCE II: FOUNDATIONS OF LEADERSHIP I (2). An examination of effective leadership. Development of interpersonal skills using practical exercises and case studies. Graded A-F only. Lec/lab.
MS 212. MILITARY SCIENCE II:
FUNDAMENTALS OF LEADERSHIP II (2). History of the American soldier from 1775 to 1919; weaponry and tactics of the American Army. Use of battle analysis and war gaming included.
MS 213. MILITARY SCIENCE II:
FUNDAMENTALS OF MILITARY OPERATIONS
(2). Basic U.S. Army tactics at the individual, team, and squad levels. Integration of military skills in offensive and defensive operations. Graded A-F only. Lec/lab.
MS 214. MILITARY SCIENCE: LEADER'S
TRAINING COURSE (LTC) (6). Four weeks of classroom and field training at Fort Knox, Kentucky. Can substitute for the first two years of the ROTC program. PREREQS: Meet minimum enrollment standards for the advanced ROTC program.
MS 311. MILITARY SCIENCE III: LEADERSHIP AND MANAGEMENT OF MILITARY
ORGANIZATION (3). Study of military leadership, management, theory and dynamics of the military team. Applies principles to advanced military operations. Includes leadership, management, and organizational theory; group dynamics; functions of staff organizations; development of the commander,s estimate; combat orders and plans; troop leading procedures; application of leadership concepts in offensive and defensive operations at the squad, platoon, and company level; and fundamentals of small-unit tactics/patrolling. Graded A-F only. Lec/lab.
MS 312. MILITARY SCIENCE III: LEADERSHIP AND MANAGEMENT OF MILITARY
ORGANIZATIONS (3). Study of military leadership, management, theory and dynamics of the military team. Applies principles to advanced military operations. Includes leadership, management, and organizational theory; group dynamics; functions of staff organizations; development of the commanderss estimate; combat orders and plans; troop leading procedures; application of leadership concepts in offensive and defensive operations at the squad, platoon, and company level; and fundamentals of small-unit tactics/patrolling. Graded A-F only. Lec/lab.

## MS 313. MILITARY SCIENCE III: LEADERSHIP

 AND MANAGEMENT OF MILITARYORGANIZATIONS (3). Study of military
leadership, management, theory and dynamics of the military team. Applies principles to advanced military operations. Includes leadership, management, and organizational theory; group dynamics; functions of staff organizations; development of the commander's estimate; combat orders and plans; troop leading procedures; application of leadership concepts in offensive and defensive operations at the squad, platoon, and company level; and fundamentals of small-unit tactics/patrolling. Graded A-F only. Lec/lab.
MS 314. MILITARY SCIENCE: LEADER
DEVELOPMENT AND ASSESSMENT COURSE
(6). Practical and theoretical instruction and training in soldier skills for four weeks. Practical leadership application and experience in a military environment. PREREQS: (MS 311 [D-] and MS

312 [D-] and MS 313 [D-] )
MS 405. READING AND CONFERENCE (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Instructor approval required.
MS 411. MILITARY SCIENCE IV: ADAPTIVE LEADERSHIP (3). Train, mentor and evaluate underclass cadets. Learn duties and responsibilities of Army staff office and apply processes. Execute and assess battalion training events. Understand and employ risk management process and use soldier fitness program to reduce and manage stress. Graded A-F only. Lec/lab.
MS 412. MILITARY SCIENCE IV: PREPARATION FOR OFFICERSHIP (3). Recent military history, national defense policy and its application in current world events. Includes military law; law of land warfare; small-unit administration; and ethics and professionalism with emphasis on applied leadership, management techniques, and ethical decision making. Designed to assist the future army officer with the transition from student to junior officer leader. Graded A-F only. Lec/lab.
MS 413. MILITARY SCIENCE IV: PREPARATION
FOR OFFICERSHIP (3). Recent military history, national defense policy and its application in current world events. Includes military law; law of land warfare; small-unit administration; and ethics and professionalism with emphasis on applied leadership, management techniques, and ethical decision making. Designed to assist the future army officer with the transition from student to junior officer leader. Graded A-F only. Lec/lab.

104 Naval Science
Oregon State University
Corvallis, OR 97331-5401
541-737-6289
Website: http://nrotc.oregonstate.edu/

## FACULTY

Professor Commander Reidy (USN, Commanding Officer)
Assistant Professors 1st Lieutenant Davis (USMC), Lieutenant DeBoe (USN), Lieutenant Hoffman (USN), Lieutenant Lopez (USN)

## Minors

Naval Science-U.S. Marine Corps
Naval Science-U.S. Navy
The NROTC program was established to educate and train qualified young men and women for service as commissioned officers in the unrestricted line Naval or Marine Corps Service. As the largest single source of Navy and Marine Corps officers, the NROTC program fills a vital need in preparing mature young men and women for leadership and management positions in an increasingly technical Navy and Marine Corps. NROTC midshipmen compete for selection into various warfare areas: pilot, naval flight officer, submarine officer, surface warfare officer, and special warfare officer. Upon successful completion of the program
and graduation from Oregon State University, NROTC midshipmen receive a commission from the president of the United States as an ensign in the U.S. Navy or second lieutenant in the U.S. Marine Corps. The minimum active service requirement upon commissioning is service dependent; it is five years for Navy and four years for the Marines.

## NROTC SCHOLARSHIPS

The Navy offers four-year scholarships to qualified students seeking baccalaureate degrees. Students are selected through national competition, and are appointed midshipmen in the United States Naval Reserve by the secretary of the Navy. The Navy provides uniforms and pays tuition, a $\$ 250$ per term book stipend, and subsistence allowance of $\$ 250$ to $\$ 400$ per month depending on the student's undergraduate status. Scholarship students will be required to attend summer training after their freshman, sophomore, and junior years designed to familiarize them with the warfare areas of the Navy and Marine Corps.

To qualify for a national NROTC scholarship you must be a U.S. citizen not less than 17 years old by September 1 of your first year of college and no more than 23 years old that same year. Additionally you must be physically qualified by Naval or Marine Corps standards and have a minimum SAT score of 530 verbal, 520 math or a minimum ACT score of 22 verbal and 22 math. Sophomores not enrolled in the NROTC program can compete nationally for a two-year scholarship by March of their sophomore year. Competitive applicants should have completed three terms of calculus with a grade of C or better and earned a 3.0 cumulative grade-point average or better.

For more information about Naval ROTC scholarship opportunities, visit http://www.nrotc.navy.mil/ or contact your local Navy-Marine Corps recruiting office. For specific information about OSU NROTC or questions regarding the two-year NROTC scholarships, visit http://nrotc.oregonstate.edu/ or call the unit at 541-737-5620 or 541-737-6289.

## COLLEGE PROGRAM

Students who are not awarded a national scholarship and are accepted to OSU can still participate in Naval ROTC through the college program by applying through the OSU Department of Naval Science. College program midshipmen participate in all aspects of the NROTC program and may be eligible for a scholarship provided they have been active in the program for a minimum of one academic term. To be competitive, a student should not have less than a B (3.0) grade-point average, meet aptitude and physical fitness standards, and receive a favorable recommendation from the professor of naval
science. If selected, students receive the same benefits as national scholarship recipients.

College program midshipmen who are not awarded a scholarship must be selected for "advanced standing" status before beginning their junior year to remain in the NROTC program. If selected for "advanced standing" students receive a monthly subsistence allowance of $\$ 350$ their junior year and $\$ 400$ their senior year. College program midshipmen receive a commission upon graduation and have the same professional opportunities as scholarship midshipmen to select careers in all warfare areas of the Navy and Marine Corps. For specific information about the college program, visit http:// nrotc.oregonstate.edu/ or call the unit at 541-737-5620 or 541-737-6289.

Any university student may take naval science courses for credit. However, such students are classified as naval science students and are not enrolled in the NROTC program.

## NAVAL SCIENCE MINOR <br> REQUIREMENTS

NROTC candidates applying for any of the NROTC programs must:

1. be a citizen of the United States or become a citizen before entering the advanced course;
2. be accepted for admission or enrolled in the university;
3. be at least 17 years of age upon enrollment and under 25 years (27 for the college program) on June 30 of the calendar year in which eligible for commissioning;
4. be physically qualified in accordance with the standards established by the Department of the Navy;
5. possess a satisfactory record of moral integrity and have potential officer characteristics;
6. have no moral obligations or personal convictions preventing them from conscientiously bearing arms and supporting and defending the Constitution of the United States against all enemies foreign and domestic.

## STATUS AND CURRICULUM

Students enrolled in the NROTC program are not on active duty. They wear the uniform only for drills, on special occasions, and during the summer training periods.

The program of study fits into curricula leading to baccalaureate degrees. Additionally, Naval Science-U.S. Navy minor scholarship students must complete three terms of calculus by the end of their sophomore year and three terms of calculus-based physics by the end of their junior year.

## NAVAL SCIENCE-U.S. MARINE CORPS MINOR

The Department of Naval Science offers two minors. Naval Science-U.S. Navy and the Naval Science-U.S. Marine Corps which are open to ROTC students and may include students not pursuing a commission through the ROTC program.
Naval Science-U.S. Marine Corps
Minor Requirements (30 credits)
NS 111. Introduction to Naval Science (3)
NS 112. U.S. Naval History I (3)
NS 113. U.S. Naval History II (3)
NS 211. Leadership and Management (5)
NS 321. Evolution of Warfare I (3)
NS 322. Evolution of Warfare II (3)
NS 413. Leadership and Ethics (4)
NS 421. Amphibious Warfare I (3)
NS 422. Amphibious Warfare II (3)

## Total credits=30

Minor Code: 811

## NAVAL SCIENCE-U.S. NAVY MINOR

The Department of Naval Science offers two minors. Naval Science-U.S. Navy and the Naval Science-U.S. Marine Corps which are open to ROTC students and may include students not pursuing a commission through the ROTC program.

## Naval Science-U.S. Navy Minor

## Requirements ( 36 credits)

NS 111. Introduction to Naval Science (3)
NS 112. U.S. Naval History I (3)
NS 113. U.S. Naval History II (3)
NS 211. Leadership and Management (5)
NS 212. Naval Engineering I (5)
NS 311. Navigation (5)
NS 313. Naval Operations and Seamanship (3)

NS 411. Naval Weapons Systems (5)
NS 413. Leadership and Ethics (4)

## Total credits=36

## Minor Code: 812

- NAVAL SCIENCE COURSES

NS 111. INTRO TO NAVAL SCIENCE (3). Naval organization and administration; organization of the Navy or Marine Corps, the Navy and Marine Corps as a career, responsibilities and commitments as an officer in the Navy or Marine Corps.
NS 112. U.S. NAVAL HISTORY I (3). A study of U.S. seapower and maritime affairs from the American Revolution through 1900. Lec/lab. PREREQS: NS 112, NS 113 must be taken in order.
NS 113. U.S. NAVAL HISTORY II (3). A study of U.S. seapower and maritime affairs from 1900 through present day. Lec/lab. PREREQS: NS 112 [D-]
NS 211. LEADERSHIP AND MANAGEMENT
(5). Overview of the principles, philosophies, and methodologies of effective Naval leadership with emphasis on moral, ethical actions with respect to the principles of authority, responsibility, and accountability as they apply to military organizations.
NS 212. NAVAL ENGINEERING (5). Propulsion, basic engineering systems theory, and concepts application in modern ship and jet propulsion. Course will include auxiliary systems, theory and
design of shipboard auxiliaries, ship design, and damage control/safety procedures. Offered every other winter term. PREREQS: NS 111 [D-]
NS 311. NAVIGATION (5). Introduction to
navigation including piloting, dead reckoning, and
voyage planning. Course includes nautical rules of the road, maneuvering board, relative motion, and shipboard external communications.

## NS 313. NAVAL OPERATIONS AND

SEAMANSHIP (3). Theory of shiphandling,
communications, shipboard evolutions, heavy weather, case study discussions. PREREQS: NS 311 [D-]
NS 321. EVOLUTION OF WARFARE I (3). The art and concepts of warfare from the beginning of recorded history to present [the Age of Napoleon]. PREREQS: NS 321, NS 322 must be taken in order.

NS 322. EVOLUTION OF WARFARE II (3). The art and concepts of warfare post-WWI (from the beginning of the Industrial Revolution) to present, the current world political situation and U.S. foreign policy and their effects on the Naval services, and forecast for the future. PREREQS: NS 321 [D-]
NS 323. NAVAL SCIENCE III: MARINE CORPS OPTION (3). Preparation for officer candidates' school and practical field exercises. For U.S.
Marine Corps candidates option. PREREQS: NS 322 [D-] and /or prior approval required.

NS 405. READING AND CONFERENCE (1-16).
To prepare midshipmen returning from a leave of absence from the Naval ROTC program for commissioning and entrance into the fleet. This course is repeatable for a maximum of 16 credits. PREREQS: Instructor approval required.
NS 411. NAVAL WEAPONS SYSTEMS (5).
Introduction to the theory and development of
U.S. Naval weapons systems, current weapons systems types, platforms, and employment.
Course will include naval weapons systems types, launch platforms, characteristics and employment. PREREQS: NS 111 [D-]
NS 413. LEADERSHIP AND ETHICS (4).
Junior Officer administrative responsibilities with emphasis on moral and ethical decision making of Naval leaders. PREREQS: NS 211 [C-] and approval of Professor of Naval Science required if student has not completed NS 211 with C- or better.
NS 421. FUNDAMENTAL MANEUVER
WARFARE I (3). Amphibious warfare from the beginning of recorded history to WW II.

NS 422. AMPHIBIOUS WARFARE II (3).
Amphibious warfare post-WW II to present, current world political situation and U.S. foreign policy and their effects on the future of expeditionary warfare.

The College of Science faculty and students pursue both curiositydriven, fundamental research to better understand the broader world and use-inspired research to tackle some of the grand challenges of science, engineering, business and education

We offer internationally recognized undergraduate and graduate programs across the life, physical, mathematical and computational sciences. Specifically, we offer courses of study in biology, biochemistry and biophysics, biohealth sciences, microbiology, zoology, chemistry, physics, mathematics and statistics. We also offer 12 pre-professional programs to prepare students for careers in healthcare or medical professions.

The College of Science is an inclusive, welcoming and intellectually stimulating environment to a diverse community. Working together as one, the College of Science is a nucleus of learning, societal engagement, achievement, and discovery.

Research and instruction in the College of Science are enhanced within a university of outstanding professional schools in engineering, oceanography, agriculture, forestry, and pharmacy. Science students can enrich their degrees with courses from these areas. Students also have opportunities to make original discoveries while working on research with world-class scientists.

## MAJORS

The majors of the College of Science are informally divided into the following groups:

## Life Sciences:

Biochemistry and Biophysics, Biochemistry and Molecular Biology, BioHealth Sciences, Biology, Microbiology, Molecular and Cellular Biology (graduate only), Zoology.

## Physical Sciences:

Chemistry and Physics

## Pre-professional Programs:

BioHealth Sciences

## Computational, and Mathematical Sciences:

Mathematics and Statistics (graduate only)

## DOUBLE DEGREES

Undergraduates with majors in the College of Science can earn a second degree in education, innovation management, international studies, or sustainability. See the College of Education, College of Business, International Programs or Department of Forest Ecosystems and Society sections of this catalog for more information.

## PRE-PROFESSIONAL PROGRAMS

The College of Science offers special programs in health-related fields to help students meet entrance requirements for professional schools in clinical laboratory science, dentistry, medicine, optometry, pharmacy, physical therapy, physician assistant, podiatry, and veterinary medicine.

CURRICULA IN SCIENCE
Curricula in science lead to the following degrees: bachelor of arts (BA), bachelor of science (BS), master of arts (MA), master of science (MS), professional science master's (PSM), and doctor of philosophy (PhD). (See the Graduate School for advanced degree requirements.) The college also participates in the Master of Arts in Interdisciplinary Studies (MAIS) program.

## TEACHER CERTIFICATION

All professional teacher education occurs in the College of Education. The following majors in the College of Science are suitable for teaching middle school and high school and have an education option available: biology (pre-education), chemistry (chemistry education), mathematics (secondary teaching emphasis), and physics (physics education).

Certain mathematics courses (MTH 211, MTH 212, MTH 390) are highly recommended for students who plan to teach elementary or secondary mathematics. See the College of Education section of this catalog for admission to the teacher licensure programs.

## SUMMER COURSES FOR SECONDARY SCHOOL SCIENCE AND MATHEMATICS TEACHERS

During the summer session, the College of Science offers a number of courses designed especially for high school teachers of science and/or mathematics. For offerings and full descriptions see the Summer Session website.

## SCHOLARSHIPS

The College of Science offers a variety of scholarships to currently enrolled College of Science students who have taken at least 28 credits at OSU. For more information and application forms contact the College of -Science or see http://www. science.oregonstate.edu/node/108.

## DEGREE REQUIREMENTS

To graduate with a BS degree in the College of Science, undergraduate students must fulfill the following requirements:
University Baccalaureate Core (48)
College of Science Requirements
(These credits can also fulfill part of the baccalaureate core requirements.)

- Mathematical sciences (12)
- Physical, earth, and/or biological sciences (15) to include a two-term sequence (At least one term in biological science and one term in physical or earth science. Must include a two-term sequence in one of these sciences.)
- Department requirements (see each department)
Some departments also grant a BA degree that requires a full year of a collegelevel (200-level or above) foreign language

128 Kidder Hall Oregon State University Corvallis, OR 97331-4608 541-737-4811 Email: science@ oregonstate.edu Website: http:// www.science. oregonstate.edu and http://impact. oregonstate.edu/

## Administration

Sastry Pantula,
Dean, 541-737-2544,
sastry.pantula@ oregonstate.edu

Matt Andrews,
Associate Dean of Strategic Initiatives and Administration, 541-737-8062, matt.andrews@ oregonstate.edu

Staci Simonich,
Associate Dean of Academic and Student Affairs, 541-737-9194, staci.simonich@ oregonstate.edu

## Douglas Keszler,

Associate Dean of Research and Graduate Programs, 541-737-6736, doug. keszler@oregonstate. edu

Heather J. Arbuckle, Head Advisor, 541-737-4786, heather.arbuckle@ oregonstate.edu

Debbie Farris,
Assistant Director of Communications and Marketing, 541-7374862, debbie.farris@ oregonstate.edu

## Chris Larson,

Director of Partnerships and Industrial Programs, 541-737-6574, chris. larson@oregonstate. edu
and at least 9 credits of College of Liberal Arts electives in addition to credits required for the baccalaureate core. See the department listings for specific requirements.
A minimum 2.00 GPA is required in College of Science majors and minors; ( $\mathrm{S} / \mathrm{U}$ grading is not allowed in science majors or minors).

The curricula are shown for each major; some substitutions can be made with department and college approval. Unless otherwise indicated, the conditions and credits for research, thesis, reading and conference, and seminar are to be arranged with the instructor involved.

## CHEMISTRY

Graduate Areas of Concentration
Analytical Chemistry
Chemistry
Inorganic Chemistry
Materials Chemistry
Nuclear Chemistry
Organic Chemistry
Physical Chemistry

## Graduate Minor

Chemistry
The Department of Chemistry offers BS, BA, MS, MA, MAIS, and PhD degrees in Chemistry. The facilities, faculty, and curricular offerings in this department are approved by the American Chemical Society.
Chemistry provides a gateway to many professions. An undergraduate chemistry degree may serve as preparation for professional work in chemistry and related sciences; as a foundation to pursue applied fields including pharmaceutical chemistry, forensics, biotechnology, medicine, chemical processing, electronics, agricultural and food science, oceanography, marketing of scientific equipment or supplies, environmental sciences, and atmospheric science. It may also serve as a core for pre-professional students pursuing graduate work in pure or applied chemistry, and for those seeking positions as research chemists and technical experts in commercial laboratories and chemical industries, positions in local, state, and federal government facilities, and for postgraduate work leading to teaching positions in universities, colleges, community colleges, and high schools.

There are several degree programs available to undergraduate chemistry majors. All curricula involve general, organic, analytical, physical, and inorganic chemistry course work, plus two to three years of laboratory work in chemistry.

All chemistry majors take part or all of Experimental Chemistry, a six-term laboratory course sequence consisting of 22 project-style experiments. This program replaces the traditional separate divisional laboratory courses in chemistry taught at many universities. Students in this Integrated Laboratory Program work on two to five projects per term, each of which includes components of synthesis, analysis, theory and report writing spanning all areas of modern chemistry. One goal of the program is to provide students intensive hands-on experience in modern chemical instrumentation and computers as a foundation for both graduate studies and employment in science after graduation.
Most chemistry majors take advantage of the opportunity to become involved in research projects in the department. Working with a research group is an
exciting way to apply ideas and skills acquired in formal course work. Students work closely with a faculty member and research group to set up their projects. Undergraduates also have the opportunity to present their research as a poster at the annual departmental poster session entitled "Chemistry in Action." Scheduling research time is flexible but three hours of work per week are required per credit. Areas of research available are highly varied and include synthesis of new compounds and materials, development and applications of chemical instrumentation, laser spectroscopy, surface science, reaction mechanisms, design and synthesis of polymers and optical materials, environmental chemistry, bioanalytical methods, and nuclear chemistry. Research experience is helpful when considering graduate work in chemistry and provides valuable experience for entering the job market. Students may also obtain valuable experience and credits for internships.

## GRADUATE STUDIES

The Department of Chemistry offers graduate work leading toward Master of Arts, Master of Science, and Doctor of Philosophy degrees in analytical chemistry, inorganic chemistry, nuclear and radiation chemistry, organic chemistry, physical chemistry, and solid state chemistry. The major emphasis of the PhD program is on research. A nonthesis master's degree is available. Most graduate students working on a thesis in chemistry are supported either as graduate teaching assistants or as graduate research assistants.

## CHEMISTRY <br> (BA, BS, CRED, HBA, HBS)

## BS Degree in Chemistry

The BS degree in Chemistry features two tracks, each with a chemistry core and a selection of accompanying options. Students in either track or any option with good academic records and letters of recommendation will be well prepared and competitive for continued graduate education in chemistry or related areas.

- Track One is well suited for students intending to pursue a graduate degree in chemistry or a closely related area. It provides the most rigorous and complete chemistry background and the most extensive laboratory experience. The curriculum is approved by the American Chemical Society (ACS) and has two options: advanced biochemistry and advanced chemistry. Both options include 6-12 credits of career-supportive electives (CSE) in advanced chemistry or related disciplines. These CSE courses are approved by the advisor
and are intended to strengthen the student's background in areas related to career goals. Students choosing the advanced chemistry option must take at least 3 credits in advanced laboratory courses or research. TrackOne graduates are eligible for ACS certification by the department chair and can become full members of the ACS without the requirement of work experience.
- Track Two is suited for chemistry majors who want to gain extensive experience in a secondary area, target a particular career direction or continue with graduate education in chemistry or related areas.
Track Two options include biochemistry, business, chemistry education, chemical engineering, environmental chemistry, forensic science, materials science, and premedicine. The multidisciplinary approach of Track Two enhances preparation and opportunities for employment in electronics, polymers, or biotechnology (the biochemistry, chemical engineering, or materials science options), for careers in environmental science (environmental chemistry option), work in crime labs (forensic science option), or teaching in high schools (chemistry education option). The Track Two curriculum is not approved by the American Chemical Society. It consists of a core of chemistry courses (79-81 credits) and a combination of 8 to 11 courses (30-37 credits) that defines each option.

## BA Degree in Chemistry

The BA degree in Chemistry is appropriate for chemistry students interested in obtaining a broader academic background through a second-language requirement and additional liberal arts courses ( 9 credits). It also includes 6-12 credits of approved career-supportive electives to allow students to choose courses in advanced chemistry or related disciplines to support their career goals. At least 3 credits are to be in advanced laboratory courses or research. This degree may lead to international opportunities, especially if coupled with the International Degree Program at OSU.

## All Undergraduate Chemistry <br> Degrees

Completion of an option is required to earn a degree in Chemistry.

The baccalaureate core requirements are met by:
Fitness: HHS 231, plus HHS 241 (1) or any PAC course (1-2)
Speech (3)
Writing courses (6)
Perspectives courses (12)

One Biology course (4)
One Difference, Power, and Discrimination course (DPD)(3)
Synthesis courses (6)
The quarters in which these are taken are flexible, except that synthesis courses must be taken at the junior and senior level. Chemistry majors or minors may not use $\mathrm{S} / \mathrm{U}$ grading in courses that meet Department of Chemistry or College of Science requirements.

The timing of courses for all degrees and options can be critical, especially because of prerequisites. More detailed information and suggestions about when to take courses are found on the Chemistry Department website at http://chemistry.oregonstate.edu/. Students should meet with their advisor every term. For many options in Track Two, students will also be directed to an additional advisor in another department for courses in that option.

For any option involving biochemistry courses, it is strongly recommended that students select:
BB 314. Cell and Molecular Biology (4), is also recommended. Prereqs for BB 314 are BI 211, BI 212, BI 213, CH 331 or CH 334.
BI 212. *Principles of Biology (4), as the biology course to fulfill the baccalaureate core requirement.
For options in which CH 462, ^Experimental Chemistry II (3), is the recommended WIC course, it is strongly recommended that CH 422, Analytical Chemistry (3), be taken as a corequisite.

Chemistry offers the following courses through the Honors College (HC). Chemistry students in the HC may substitute these courses for courses in the regular sequences:
CH 231H, CH 232H, CH 233H. *General Chemistry ( $4,4,4$ )
and CH $261 \mathrm{H}, \mathrm{CH} 262 \mathrm{H}, \mathrm{CH} 263 \mathrm{H}$.
*Laboratory for CH $231 \mathrm{H}, 232 \mathrm{H}, 233 \mathrm{H}$ (1,1,1)
CH 361H, CH 362 H . Experimental
Chemistry I $(3,3)$
and CH 461 H . Experimental Chemistry II (3)
and CH $462 \mathrm{H}, \mathrm{CH} 463 \mathrm{H}, \mathrm{CH} 464 \mathrm{H}$.
${ }^{\wedge}$ Experimental Chemistry II $(3,3,3)$
Track-One BS Degree in Chemistry
(See the Advanced Biochemistry option and Advanced Chemistry option)

## Chemistry Core (76)

CH 231, CH 232, CH 233. *General Chemistry ( $4,4,4$ )
and CH 271, CH 272, CH 273.
*Laboratory for CH 231, 232, 233 for
Chemistry Majors $(1,1,1)$
CH 334, CH 335, CH 336. Organic Chemistry (3,3,3)
CH 361, CH 362. Experimental Chemistry I (3,3)
CH 421, CH 422. Analytical Chemistry $(3,3)$
CH 440, CH 441, CH 442. Physical
Chemistry ( $3,3,3$ )
MTH 251. *Differential Calculus (4)

MTH 252. Integral Calculus (4)
MTH 253. Infinite Series and Sequences (4) or MTH 306. Matrix and Power Series Methods (4)
MTH 254. Vector Calculus I (4)
PH 211, PH 212, PH 213. *General Physics with Calculus ( $4,4,4$ )
PH 221, PH 222, PH 223. Recitation for Physics $(1,1,1)$

## SAMPLE CURRICULUM (TRACK- <br> ONE BS DEGREE IN CHEMISTRY)

## Freshman Year

CH 231, CH 232, CH 233. *General Chemistry ( $4,4,4$ )
and CH $271, \mathrm{CH} 272, \mathrm{CH} 273$.
*Laboratory for CH 231, 232, 233 for Chemistry Majors $(1,1,1)$
HHS 231. *Lifetime Fitness for Health (2)
HHS 241. *Lifetime Fitness (1) or any PAC course (1-2)

MTH 252. Integral Calculus (4)
MTH 254. Vector Calculus I (4)
PH 211, PH 221. *General Physics with Calculus $(4,1)$
Perspectives courses (6)
Speech (3)
Writing I (3)

## Sophomore Year

CH 334, CH 335, CH 336. Organic
Chemistry $(3,3,3)$
CH 361, CH 362. Experimental Chemistry I $(3,3)$
MTH 253. Infinite Series and Sequences (4) or MTH 306. Matrix and Power Series Methods (4)
Option courses (6 or 7)
PH 212, PH 213. *General Physics $(4,4)$
and PH 222, PH 223. Recitation for
Physics $(1,1)$
Perspectives courses (6)
Writing II (3)

## Junior Year

BI 212. *Principles of Biology (4)
or BI 102. *General Biology (4)
CH 421, CH 422. Analytical Chemistry $(3,3)$
CH 440, CH 441, CH 442. Physical
Chemistry ( $3,3,3$ )
Perspectives and Synthesis courses (6)
Elective and Option courses (18)

## Senior Year

Elective and Option courses (42-43)
Synthesis course (3)

## Track-Two BS Degree in Chemistry

(See options for Biochemistry, Busi-
ness, Chemistry Education, Chemical
Engineering, Environmental Chemistry, Forensic Science, Materials Science, Pre-Medicine)
Chemistry Core* (79-81)
CH 231, CH 232, CH 233. *General Chemistry ( $4,4,4$ )
and CH 271, CH 272, CH 273.
*Laboratory for CH 231, 232, 233 for Chemistry Majors ( $1,1,1$ )
CH 324. Quantitative Analysis (4)
(For a stronger background in analytical chemistry, instead of CH 324, plus CH 411 and CH 412, substitute CH 421, CH 422, CH 461, CH 411 or CH 412, which adds

2 credits.)
CH 334, CH 335, CH 336. Organic
Chemistry $(3,3,3)$
CH 361, CH 362. Experimental Chemistry I $(3,3)$
CH 411, CH 412. Inorganic Chemistry $(3,3)$
CH 440, CH 441, CH 442. Physical Chemistry $(3,3,3)$
CH 462. ${ }^{\wedge}$ Experimental Chemistry II (3)
or CH 463. ${ }^{\wedge}$ Experimental Chemistry II (3)
or CH 464. ${ }^{\wedge}$ Experimental Chemistry II (3) MTH 251, MTH 252, MTH 254. Differential, Integral and Vector Calculus $(4,4,4)$
PH 211, PH 212, PH 213. *General Physics with Calculus $(4,4,4)$
and PH 221, PH 222, PH 223. Recitation
for Physics 211, 212, 213 (1,1,1)
or PH 201, PH 202, PH 203. *General Physics $(5,5,5)$
*Note: For the Chemical Engineering, Environmental Chemistry, Forensic Science, and Materials Science options, the core requirements are slightly modified.

## SAMPLE CURRICULUM (TRACK-

 TWO BS DEGREE IN CHEMISTRY)
## Freshman Year

BI 212. *Principles of Biology (4)
or BI 102. *General Biology (4)
CH 231, CH 232, CH 233. *General
Chemistry $(4,4,4)$
and CH $271, \mathrm{CH} 272, \mathrm{CH} 273$.

## OPTIONS

## ADVANCED BIOCHEMISTRY

## OPTION

This track-one option leads to a degree approved by the American Chemical Society. It is designed for students continuing their chemistry education in graduate school or seeking careers directly in the chemistry workforce. It provides a rigorous chemistry foundation with extensive laboratory experience. The mix of advanced courses in the option is modified to emphasize biochemistry principles and laboratory techniques.
BB 490. Biochemistry 1: Structure and Function (3)
BB 491. Biochemistry 2: Metabolism (3)
BB 492. Biochemistry 3: Genetic
Biochemistry (3)
BB 493. Biochemistry Laboratory Molecular Techniques 1 (3)
BB 494. Biochemistry Laboratory Molecular Techniques 2 (3)
CH 411. Inorganic Chemistry (3)
or CH 412. Inorganic Chemistry (3)
Select two courses from the following (6):

CH 461. Experimental Chemistry II (3)
CH 462. ^Experimental Chemistry II (3)
CH 463. ${ }^{\wedge}$ Experimental Chemistry II (3)
CH 464. ${ }^{\wedge}$ Experimental Chemistry II (3)
Select 6 credits (courses approved by the advisor by the end of the winter quarter of the junior year):

## Career-supportive electives (CSE) (6)

Total=33

ADVANCED CHEMISTRY OPTION
This track-one option leads to a degree approved by the American Chemical Society. Designed for students continuing their chemistry education in graduate school or seeking careers directly in the chemistry workforce. This provides the most rigorous and complete chemistry foundation with the most extensive laboratory experience. Undergraduate research is strongly encouraged. Knowledge and skills are developed in organic, analytical, physical and inorganic chemistry. Six advanced laboratory courses are required. Students have a choice of electives that support their career goals.
BB 450. General Biochemistry (4)
or BB 490. Biochemistry 1: Structure and
Function (3) and BB 491. Biochemistry 2: Metabolism (3)
CH 411, CH 412. Inorganic Chemistry $(3,3)$
CH 461. Experimental Chemistry II (3)
CH 462, CH 463, CH 464. ${ }^{\wedge}$ Experimental Chemistry II $(3,3,3)$
MTH 256. Applied Differential Equations (4)
or MTH 341. Linear Algebra (3)
Select 12 credits (courses approved by the advisor by the end of the winter quarter of the junior year; must include 3
credits of an upper-division lab, with CH 401 or CH 403 strongly recommended). Career-supportive electives (CSE) (12)
Note: BB 491, Biochemistry 2: Metabolism (3), fulfills 2 credits of Career Supported Electives if taken with BB 490, Biochemistry 1: Structure and Function (3).

## Total=36-38

Option Code: 521

## BIOCHEMISTRY OPTION

The Biochemistry option is for students interested in working in biotechnology areas. Students can earn a BS degree in Chemistry in four years while targeting a career direction in biotechnology or preparing for graduate studies in chemistry. This option includes nine courses in biology, biochemistry including lab, and genetics and molecular biology.

The Biochemistry option is designed for the Track-Two BS degree in Chemistry.
BB 490. Biochemistry 1: Structure and Function (3)
BB 491. Biochemistry 2: Metabolism (3)
BB 492. Biochemistry 3: Genetic
Biochemistry (3)
Select two courses from the
following:
BB 493. Biochemistry Laboratory Molecular
Techniques 1 (3)
BB 494. Biochemistry Laboratory Molecular Techniques 2 (3)

## Plus:

BB 314. Cell and Molecular Biology (4)
BI 212, BI 213. *Principles of Biology $(4,4)$
BI 311. Genetics (4)
Total=31
Footnote:

* Baccalaureate Core Course

Option Code: 518
BUSINESS OPTION
The Business option is designed for chemists interested in, for example, opening a small business, working in sales and marketing, or as preparation for entering the MBA program at OSU ${ }^{1}$. Students earn a BS degree in Chemistry in four years and can also fulfill course work required as part of the minor in Business and Entrepreneurship ${ }^{2}$. This option is also a good stepping stone for law school or graduate studies in chemistry. The option includes six courses in accounting, law, finance, organizational systems. The Business option is designed for the Track-Two BS degree in Chemistry.

## Required (27-28 credits)

BA 215. Fundamentals of Accounting (4)
BA 260. Introduction to Entrepreneurship (4)
BA 351. Managing Organizations (4)
BA 360. Introduction to Financial
Management (4)
BA 390. Marketing (4)
ECON 201. *Introduction to
Microeconomics (4)

ST 314. Introduction to Statistics for Engineers (3)
or ST 351. Introduction to Statistical
Methods (4)
Required Electives (4 credits)
Select one course from among the three following suggested sets:
Suggested for emphasis in small business:
BA 362. Social Entrepreneurship and Social Initiatives (4)
BA 363. Technology and Innovation Management (4)
BA 460. Venture Management (4)
OR
Suggested for emphasis in sales and marketing:
BA 491. Personal Selling (4)
OR
Suggested for MBA preparation:
BA 357. Operations Management (4) ${ }^{3}$

## Total=31-32

Footnotes:

* Baccalaureate Core Course (BCC)
${ }^{1}$ Students who complete these business courses and some additional courses may apply upon graduation to the OSU College of Business to be accepted into a 45-credit, three-term MBA program. All students serious about pursuing an OSU MBA should make an appointment with the College of Business MBA advisor, 541-7373716, http://business.oregonstate.edu/mba/. Students should also take BA 211, Financial Accounting (4) and BA 213, Managerial Accounting (4) at the undergraduate level.
${ }^{2}$ There are additional requirements for the minor in Business and Entrepreneurship. For example, the minor also requires an orientation course, GPA requirements, and academic residency requirements. You are advised to meet with an advisor in the College of Business.
${ }^{3}$ BA 357 requires a special override from an advisor in the COB because chemistry majors substitute ST 351 or ST 314 for BA 276.
Option Code: 523

## CHEMICAL ENGINEERING

## OPTION

The Chemical Engineering option offers selected chemical engineering concepts that may enhance career opportunities in areas such as electronics, polymers, and biotechnology, or prepare students for graduate studies in chemistry or related fields. Students can earn a BS degree in Chemistry in four years while targeting a career direction. This option includes nine courses in basic engineering and chemical engineering including mass and fluid transport, reaction engineering, and separations processes.
The Chemical Engineering option is designed for the Track-Two BS degree in Chemistry.

The track-two core requirements are slightly modified for the Chemical Engineering option:

## Required/Recommended for Core:

PH 211, PH 212, PH 213. *General Physics with Calculus $(4,4,4)$ Required
CH 462. ^Experimental Chemistry II (3) Recommended

## Chemical Engineering Option

Requirements
CHE 211. Material Balances and Stoichiometry (4) [Terminated 201101]
CHE 212. Energy Balances (4)
[Terminated 201101]
CHE 411. Mass Transfer Operations (4)
CHE 412. Mass Transfer Operations (3)
[Terminated 200901]
CHE 443. Chemical Reaction Engineering (4)
ME 331. Introductory Fluid Mechanics (4)
ME 332. Heat Transfer (4)
MTH 256. Applied Differential Equations (4)
Select one course from below for 3-4 credits:
CH 401. Research (3)
or CHE 401. Research (3)
CHE 213. Process Analysis (4)

CHEMISTRY EDUCATION OPTION
The Chemistry Education option is directed at students planning to teach high school chemistry or continuing on with graduate education and teaching careers at community colleges. Students can earn a BS degree in Chemistry in four years and obtain experience that can be useful when applying for the Master of Science in Science Education from OSU. This option includes 11 courses covering teaching methods, a secondary area, and undergraduate teaching internship and seminar in chemistry.

The Chemistry Education option is designed for the Track-Two BS degree in Chemistry.
CH 407. Seminar [Chemistry Teaching] (1)
CH 410. Internship [Undergraduate Teaching] (3)
ED 309. Field Practicum (3)
or ED 409. Practicum/Clinical Experience (3)

PSY 202. *General Psychology (3)
SED 412. Technology Foundations for Teaching Math and Science (3)
SED 413. Inquiry in Science and Science Education (3)
Second Endorsement electives (15)
Select one elective course from list below for 3 credits:
ED 216. Purpose, Structure, \& Function of Education in a Democracy (3)

ED 253. Learning Across the Lifespan (3)
PSY 350. Human Lifespan Development (4)
SED 414. Inquiry in Mathematics and Mathematics Education (3)
Note: Courses in the second endorsement area are to be from a list approved by the College of Education and must be different from those required in the chemistry core. The courses in this option are designed to interface with the Professional Teacher Master of Science Education program for prospective high school teachers through the College of Education at OSU.
Total=34-36

## Footnote:

* Baccalaureate Core Course (BCC)

Option Code: 516

## ENVIRONMENTAL

## CHEMISTRY OPTION

The Environmental Chemistry option is structured to provide a quality foundation for working in government, industrial or university labs studying the behavior of chemicals in the environment. It also is suited to graduate education in chemistry or environmental chemistry. Students can earn a BS degree in Chemistry in four years while targeting their career. This option includes 11 courses in biology, microbiology, toxicology, environmental chemistry and health, soil science, and hydrology.

The Environmental Chemistry option is designed for the Track-Two BS degree in Chemistry.
The track-two core requirements are slightly modified for the Environmental Chemistry option:

## Required for Core:

## Replace CH 324 with:

CH 421, CH 422. Analytical Chemistry $(3,3)$ CH 461. Experimental Chemistry II (3)
Only one term of inorganic chemistry:
CH 411. Inorganic Chemistry (3)
or CH 412. Inorganic Chemistry (3)

## Requirements

BB 314. Cell and Molecular Biology (4)
BI 212, BI 213. *Principles of Biology $(4,4)$
MB 302, MB 303. General Microbiology and Lab $(3,2)$
ST 201. Principles of Statistics (4)
or ST 314. Introduction to Statistics for Engineers (3)
TOX 430. Chemical Behavior in the Environment (3)
TOX 455. Ecotoxicology: Aquatic Ecosystems (3)
Select three courses from below for 9-10 credits:
BI 211. *Principles of Biology (4)
BI 370. Ecology (3)
CE/GEO 514. Groundwater Hydraulics (3)
CH 401. Research (3)
CH 692. Environmental Transformation of Organic Compounds (3)

Option Code: 504

## FORENSIC SCIENCE OPTION

The Forensic Science option is appropriate for students interested in working in a crime lab or pursuing a graduate degree in forensic science or chemistry. Students can earn a BS degree in Chemistry in four years and also take a combination of courses that enhance a chemistry major's background in biology, biochemistry, and related areas that can be important in forensic science.

The Forensic Science option is designed for the Track-Two BS degree in Chemistry.

The track-two core requirements are slightly modified for the Forensic Science option as follows:

## Required for Core:

Replace CH 324 with:
CH 421, CH 422. Analytical Chemistry $(3,3)$
CH 461. Experimental Chemistry II (3)
Only one term of inorganic chemistry:
CH 411. Inorganic Chemistry (3)
or CH 412. Inorganic Chemistry (3)

## Requirements

BB 314. Cell and Molecular Biology (4)
BI 212, BI 213. *Principles of Biology $(4,4)$
BB 450, BB 451. General Biochemistry $(4,3)$ or BB 490. Biochemistry 1: Structure and Function (3) and BB 491. Biochemistry 2: Metabolism (3)
BB 494. Biochemistry Laboratory Molecular Techniques 2 (3)
TOX 411/TOX 511. Fundamentals of Toxicology (3)
Select three courses from below for 7-12 credits
BB 492. Biochemistry 3: Genetic
Biochemistry (3)
BI 311. Genetics (4)
CH 401. Research (3)
CH 410. Internship (2-3)
CH 424. Bioanalytical Chemistry (3)
CH 661. Separations: Chromatography and Related Methods (3)
CH 692. Environmental Transformation of Organic Compounds (3)
CH 697. Mass Spectroscopy of Organic Compounds (3)
MB 302. General Microbiology (3)

MB 303. General Microbiology Lab (2)
ST 201. Principles of Statistics (4)
or ST 351. Introduction to Statistical Methods (4)

## MATERIALS SCIENCE OPTION

The Materials Science option is customized to include applied courses in a variety of materials areas to enhance career opportunities in, for example, electronics, polymers and biotechnology. Students can earn a BS degree in Chemistry in four years while targeting a career in this field or preparing for graduate school in chemistry or related areas.

The Materials Science option is designed for the Track-Two BS degree in Chemistry.

The track-two core requirements are slightly modified for the Materials Science option:
Required/Recommended for Core:
PH 211, PH 212, PH 213. *General Physics with Calculus $(4,4,4)$ Required

## Requirements

CH 445. Physical Chemistry of Materials (3) or ENGR 321. Material Science (3)
CHE 444. Thin-Film Materials Processing (3)
CHE 445. Polymer Engineering and Science (4)

ENGR 322. Mechanical Properties of Materials (4)
MTH 256. Applied Differential Equations (4)
Select four courses from below for 12-14 credits:
CH 401. Research (3)
CH 413. Solid State Chemistry (3-4)
CHE 401. Research (3)
ECE 416. Electronic Materials and Devices (4)
ENGR 211. Statics (3)
ENGR 212. Dynamics (3)
ENGR 213. Strength of Materials (3)
ENGR 221. The Science, Engineering, and
Social Impact of Nanotechnology (3)
ME 316. Mechanics of Materials (3)
Total=27-29
Footnote:

## PRE-MEDICINE OPTION

The Pre-Medicine option is directed at students planning to apply to medical or dental school who also wish to target chemistry as a career pathway. A degree in chemistry provides a strong foundation for many professions and postgraduate degrees in chemistry or related areas. Students can earn a BS degree in Chemistry in four years while also taking Pre-Medicine option courses in biology, biochemistry, and related areas that are important components for application to
medical school.
The Pre-Medicine option is designed for the Track-Two BS degree in Chemistry.

## Required

BB 314. Cell and Molecular Biology (4)
BB 450, BB 451. General Biochemistry $(4,3)$ or BB 490. Biochemistry 1: Structure and Function (3) and BB 491. Biochemistry 2: Metabolism (3)
BI 211, BI 212, BI 213. *Principles of Biology $(4,4,4)$
BI 311. Genetics (4)
PHL 444. Biomedical Ethics (4)

## CHEMISTRY MINOR

## Also available via Ecampus.

The requirements for a minor in Chemistry include a minimum of 27 credits of chemistry ( CH ) courses.

Choose one of the following com-

## plete general chemistry sequences:

1. CH 121, *CH 122, *CH 123. General Chemistry $(5,5,5)$
2. CH 231, CH 232, CH 233. *General Chemistry $(4,4,4)$ and CH $271, \mathrm{CH}$ 272, CH 273. *Laboratory for CH 231, 232, 233 for Chemistry Majors $(1,1,1)$
3. CH 201, CH 202. Chemistry for Engineering Majors $(3,3)$ and CH 205. Laboratory for Chemistry 202
(1) and CH 123. *General Chemistry (5)

In addition, a minimum of four upperdivision courses of 3 or more credits in at least two areas of chemistry (organic, physical, analytical, inorganic, or nuclear) and including one laboratory course are required. All courses must be taken for a grade (not $\mathrm{S} / \mathrm{U}$ ) and the overall GPA for all chemistry courses must be 2.0 or higher.

## Courses that cannot be used for the minor:

Biochemistry Courses
CH 130. General Chemistry of Living Systems (4)
CH 374. *Technology, Energy, and Risk (3)
CH 401/501/601. Research (1-16)
CH 403/503/603. Thesis (1-16)
CH 407/507/607. Seminar (1-16)
CH 410/510. Internship (1-16)
CH 696. Computer Interfacing (4)
See http://chemistry.oregonstate.edu/ node/1727 for more details about the Chemistry minor.

* Baccalaureate Core Course (BCC)

Minor Code: 520

## CHEMISTRY (MA, MS, PhD)

## Graduate Areas of Concentration

Analytical chemistry, inorganic chemistry, materials chemistry, nuclear chemistry, organic chemistry, physical chemistry
The Department of Chemistry offers graduate work leading toward Master of Arts, Master of Science, and Doctor of Philosophy degrees in Chemistry with concentrations in analytical chemistry, inorganic chemistry, nuclear chemistry, organic chemistry, physical chemistry and solid state chemistry.
All students are required, early in their graduate study, to take a series of graduate courses in their major area. For the PhD , the required written preliminary examinations take the form of a number of "cumulative examinations." Exceptions to this include the concentration in nuclear chemistry, which requires only a single written examination, and concentrations in inorganic chemistry, solid state chemistry or physical chemistry, which require only an oral exam. For each field, there is a list of courses representing subject matter in which competence is required of those electing that field for PhD work, but the major emphasis of the PhD program is on research rather than formal courses. All degrees require a research thesis except for the Master of Science nonthesis degree. There is no departmental requirement of a foreign language. Most graduate students in chemistry are supported either as graduate teaching assistants or as graduate research assistants.

## Major Code: 5200

## CHEMISTRY GRADUATE MINOR

For more details, see the departmental advisor.

## Minor Code: 5200

## $\square$ CHEMISTRY COURSES

CH 101. CHEMISTRY IN YOUR WORLD (3). For students who need some additional preparation before enrolling in a general chemistry course. Explores the impact of chemistry on our everyday lives while acquiring the skills it takes to be successful in general chemistry. PREREQS: Placement Test MPAL(046) or MTH 095* [C-] or MTH 103* [C-] or MTH 111 [C-] or MTH 241 [C-] or MTH 251 [C-] or MTH 251H [C-] or MTH 252 [C-] or MTH 252H [C-]
CH 121. GENERAL CHEMISTRY (5). A general chemistry sequence for students who have had no previous training in chemistry and for those whose college aptitude test scores indicate the need for a more elementary introduction to chemistry. Entering students are expected to have a working knowledge of high school algebra, logarithms, and scientific notation. Lec/lab/rec. (CH 122, CH 123 are Bacc Core Courses) PREREQS: CH 121, CH 122, CH 123 must be taken in order.

CH 122. *GENERAL CHEMISTRY (5). A general chemistry sequence intended for majors in fields other than the physical sciences. Lec/lab/rec. (CH 122 and CH 123 are Bacc Core courses.) PREREQS: CH 121 [C-] or (CH 201 [C-] or (CH 231 [C-] or CH 231H [C-] )) and CH 121, CH 122, CH 123 must be taken in order.

CH 123. *GENERAL CHEMISTRY (5). A general chemistry sequence intended for majors in fields other than the physical sciences. ( CH 122 and CH 123 are Bacc Core courses.) Lec/rec/lab. PREREQS: CH 122 [C-] or ( $((\mathrm{CH} 232$ [C-] or CH 232 H [C-] ) and (CH 262 [C-] or CH 262 H [C-] or CH 272 [C-] )) or (CH 202 [C-] and CH 205 [C-] )) and $\mathrm{CH} 121, \mathrm{CH} 122, \mathrm{CH} 123$ must be taken n order.
CH 124. GENERAL CHEMISTRY (3). A bridge course, allowing students who have taken one term of General Chemistry (CH 121) to complete the equivalent of one full semester of general chemistry. Entering students are expected to have a working knowledge of high school algebra, ogarithms, and scientific notation. Lec/lab.
PREREQS: CH 121 [D-]
CH 125. GENERAL CHEMISTRY (2). A bridge course, allowing students who also take one term of General Chemistry (CH 123) to complete the equivalent of one full semester of General Chemistry. Entering students are expected to have a working knowledge of high school algebra, logarithms, and scientific notation. Lec/lab. Offered via Ecampus only. PREREQS: CH 121 [D-] and CH 124 [D-] and /or one semester of general chemistry at another institution.
CH 130. GENERAL CHEMISTRY OF LIVING SYSTEMS (4). Introduction to organic chemistry and the chemistry of biological systems. Organic nomenclature and fundamental reactions, emphasizing topics such as amino acids, proteins, biochemical energy, and nucleic acids (DNA and RNA). Intended as a terminal course in chemistry, not to serve as a prerequisite to higher numbered chemistry courses. Lec/lab. Does not count toward a chemistry minor.

CH 140. GENERAL, ORGANIC, AND BIOLOGICAL CHEMISTRY (6). An introduction to general, organic, and biological chemistry. Intended as a terminal course in chemistry, not to serve as a prerequisite to higher numbered chemistry courses. Offered via Ecampus only. PREREQS: Entering students are expected to have a working knowledge of high school algebra, logarithms, and scientific notation.
CH 199. SPECIAL TOPICS (1-3). This course is repeatable for a maximum of 3 credits. PREREQS: Departmental approval required.
CH 201. CHEMISTRY FOR ENGINEERING
MAJORS (3). A sequence of selected chemistry topics for pre-engineering students. Lec. PREREQS: MTH 111* [D-] or MTH 112* [D-] or MTH 251* [D-] or MTH 251H* [D-] or MTH 252* [D-] or MTH 252H* [D-] or MTH 254* [D-] or MTH $254 \mathrm{H}^{*}$ [D-] or Placement Test MPAL(060) and CH 201 and CH 202 must be taken in order.

CH 202. CHEMISTRY FOR ENGINEERING MAJORS (3). A sequence of selected chemistry topics for pre-engineering students. Lec. PREREQS: ( CH 121 [C-] or CH 201 [C-] or CH 231 [C-] or CH 231 H [C-] ) and CH 201 and CH 202 must be taken in order.

CH 205. LABORATORY FOR CH 202 (1).
Three-hour weekly session for the development of laboratory skills in general chemistry for engineers. Lec/lab. PREREQS: CH 202* [D-]
CH 211. RECITATION FOR CHEMISTRY 201 (1).
80-minute weekly session for the development of problem-solving skills in general chemistry for engineers. Rec. COREQS: CH 201
CH 212. RECITATION FOR CHEMISTRY 202
(1). One-hour weekly session for the development of problem-solving skills in general chemistry for engineers. Rec. COREQS: CH 202

CH 220. CAREERS IN CHEMISTRY (1). Course for chemistry majors that discusses strategies for success in the study of chemistry and the varied career opportunities available. Topics range from surviving freshman chemistry to choices of advanced classes, study abroad opportunities, internships, getting into and succeeding in
graduate school, choices of chemical careers in academia, industry, government, nongovernmental organizations, and using chemistry as a foundation for careers in other areas such as law and business. Graded P/N.
CH 231. GENERAL CHEMISTRY (4). A general chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 231 is a lecture course; CH 261 is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 261) PREREQS: MTH 111* [C-] or MTH 112* [C-] or MTH 251* [C-] or MTH $251 \mathrm{H}^{*}$ [C-] or MTH 252* [C-] or MTH $252 \mathrm{H}^{*}$ [C-] or MTH $254^{*}$ [C-] or MTH $254 \mathrm{H}^{*}$ [C-] or Placement Test MPAL(060) and CH 231, CH 232, CH 233 must be taken in order.
CH 231H. GENERAL CHEMISTRY (4). A general chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 231 H is a lecture course; CH 261 H is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 261H) PREREQS: MTH $111^{*}$ [C-] or MTH 112* [C-] or MTH 251* [C-] or MTH $251 \mathrm{H}^{*}$ [C-] or MTH 252* [C-] or MTH $252 \mathrm{H}^{*}$ [C-] or MTH 254* [C-] or MTH 254H* [C-] or Placement Test MPAL(060) and CH $231 \mathrm{H}, \mathrm{CH}$ $232 \mathrm{H}, \mathrm{CH} 233 \mathrm{H}$ must be taken in order.
CH 232. GENERAL CHEMISTRY (4). A general chemistry sequence for students majoring in most sciences, pre-pharmacy, and chemical engineering. CH 232 is a lecture course; CH 262 is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 262) PREREQS: (CH 231 [C-] or CH 231 H [C-] ) or CH 221 [C-] and CH 231, CH 232, CH 233 must be taken in order. CH 262, the laboratory class, is taken concurrently.
CH 232H. GENERAL CHEMISTRY (4). A general chemistry sequence for students majoring in most sciences, pre-pharmacy, and chemical engineering. CH 232 H is a lecture course; CH 262 H is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 262H) PREREQS: (CH 231 [C-] or CH 231 H [C-] ) or CH 221 [C-] and CH 231, CH 232, CH 233 must be taken in order. CH 262, the laboratory class, is taken concurrently. Honors College approval required.
CH 233. GENERAL CHEMISTRY (4). A general chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 233 is a lecture course; CH 263 is the laboratory component. (Bacc Core Course if taken with CH 263) Lec/rec. PREREQS: (CH 232 [C-] or CH 232 H [C-] ) or CH 222 [C-] and $\mathrm{CH} 231, \mathrm{CH}$ 232, CH 233 must be taken in order. CH 263, the laboratory class, is taken concurrently.
CH 233H. GENERAL CHEMISTRY (4). A general chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 233H is a lecture course; CH 263 H is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 263H) PREREQS: (CH 232 [C-] or CH 232 H [C-] ) or CH 222 [C-] and CH 231, CH 232, CH 233 must be taken in order. CH 263, the laboratory class, is taken concurrently. Honors College approval required.
CH 261. *LABORATORY FOR CHEMISTRY 231 (1). A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 231) COREQS: CH 231

CH 261H. *LABORATORY FOR CHEMISTRY 231H (1). A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 231H) PREREQS: Honors College approval required. COREQS: CH 231H

## CH 262. *LABORATORY FOR CHEMISTRY 232

(1). A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 232) PREREQS: CH 261 [D-] or CH 261H [D-] or CH 271 [D-] or CH 221 [D-] or CH

224H [D-] COREQS: CH 232
CH 262H. *LABORATORY FOR CHEMISTRY
232H (1). A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 232 H ) PREREQS: CH 261 [D-] or CH 261H [D-] or CH 271 [D-] or CH 221 [D-] or CH 224H [D-] and Honors College approval required. COREQS: CH 232H

CH 263. *LABORATORY FOR CHEMISTRY 233 (1). A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 233) PREREQS: CH 262 [D-] or CH 262 H [D-] or CH 272 [D-] or CH 222 [D-] or CH 225H [D-] COREQS: CH 233

CH 263H. *LABORATORY FOR CHEMISTRY 233H (1). A general chemistry laboratory sequence for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 233 H ) PREREQS: CH 262 [D-] or CH 262 H [D-] or CH 272 [D-] or CH 222 [D-] or CH 225H [D-] and Honors College approval required. COREQS: CH 233 H
CH 271. *LABORATORY FOR CH 231 FOR CHEMISTRY MAJORS (1). A general chemistry laboratory sequence for students majoring in chemistry. (Bacc Core Course if taken with CH 231) COREQS: CH 231

CH 272. *LABORATORY FOR CH 232 FOR CHEMISTRY MAJORS (1). A general chemistry laboratory sequence for students majoring in chemistry. (Bacc Core Course if taken with CH 232) PREREQS: CH 271 [D-] or CH 221 [D-] or CH 224H [D-] COREQS: CH 232

CH 273. *LABORATORY FOR CH 233 FOR CHEMISTRY MAJORS (1). A general chemistry laboratory sequence for students majoring in chemistry. (Bacc Core Course if taken with CH 233) PREREQS: CH 272 [D-] or CH 222 [D-] or CH 225H [D-] COREQS: CH 233
CH 324. QUANTITATIVE ANALYSIS (4). A
basic course in modern chemical analysis. Selfpaced laboratory. CH 130 does not meet the prerequisites for this course. PREREQS: (CH 123 [D-] or CH 223 [D-] or CH 226H [D-] or ((CH 233 [D-] or CH 233H [D-] ) and (CH 263 [D-] or CH 263 H [D-] or CH 273 [D-] ))) and /or one year of general chemistry or instructor approval.

CH 331. ORGANIC CHEMISTRY (4). Service course covering aliphatic and aromatic chemistry. Introduction to nomenclature, mechanism and synthesis. Lec/rec. CH 130 does not meet the prerequisites for this course. PREREQS: ( CH 123 [C-] or CH 223 [C-] or CH 226H [C-] or ((CH 233 [C-] or CH 233H [C-] ) and (CH 263 [C-] or CH 263H [C-] or CH 273 [C-] ))) and one year of general chemistry or instructor approval. CH 331 and CH 332 must be taken in order.
CH 332. ORGANIC CHEMISTRY (4). Service course covering aliphatic and aromatic chemistry. Introduction to nomenclature, mechanism and synthesis. Lec/rec. PREREQS: CH 331 [C-] and one year of general chemistry.
CH 334. ORGANIC CHEMISTRY (3). Professional course for majors in chemistry, biochemistry, chemical engineering and other students who need a year of organic chemistry. In-depth treatment of major classes of organic compounds. Interrelation of mechanistic and synthetic approaches. PREREQS: (CH 123 [D-] or CH 223 [D-] or CH 226H [D-] or ((CH 233 [D-] or CH 233H [D-]) and (CH 263 [D-] or CH 263H [D-] or CH 273 [D-] ))) and one year general chemistry or instructor approval. CH 130 does not meet the prerequisites for this course.
CH 335. ORGANIC CHEMISTRY (3). Professional course for majors in chemistry, biochemistry, chemical engineering and other students who need a year of organic chemistry. In-depth treatment of major classes of organic compounds. Interrelation of mechanistic and synthetic
approaches. PREREQS: CH 334 [D-] and one year general chemistry.

CH 336. ORGANIC CHEMISTRY (3). Professional course for majors in chemistry, biochemistry, chemical engineering and other students who need a year of organic chemistry. In-depth treatment of major classes of organic compounds. Interrelation of mechanistic and synthetic approaches. PREREQS: CH 335 [D-] and one year of general chemistry.
CH 337. ORGANIC CHEMISTRY LABORATORY
(4). Laboratory course in organic chemistry for nonmajors, designed to supplement CH 331 , CH 332 and CH 334, CH 335, CH 336. Lec/lab. PREREQS: (CH 331 [D-] and CH 332 [D-] ) or (CH 334 [D-] and CH 335 [D-] and CH 336 [D-] )
CH 361. EXPERIMENTAL CHEMISTRY I (3). First term of integrated laboratory program for chemistry majors highlighting techniques in organic, physical, and analytical chemistry. First-hand experience is gained using specialized glassware, scientific equipment and instrumentation plus computers. Essential technical laboratory standards and technical writing are emphasized. Lec/lab. PREREQS: ((CH 221 [D-] and CH 222 [D-] and CH 223 [D-] ) or (CH 224H [D-] and CH 225 H [D-] and CH 226H [D-] ) or ((CH 231 [D-] or CH 231H [D-]) and (CH 261 [D-] or CH 261 H [D-] or CH 271 [D-]) and (CH 232 [D-] or CH 232H [D-] ) and (CH 262 [D-] or CH 262 H [D-] or CH 272 [D-] ) and (CH 233 [D-] or CH 233 H [D-] ) and (CH 263 [D-] or CH 263H [D-] or CH 273 [D-] )) and (MTH 251* [D-] or MTH $251 \mathrm{H}^{*}$ [D-]) and (PH 201* [D-] or PH 211* [D-]) and CH $334^{*}$ [D-] ) and departmental approval required. Restricted to chemistry and biochemistry/ biophysics majors.

CH 361H. EXPERIMENTAL CHEMISTRY I
(3). First term of integrated laboratory program for chemistry majors highlighting techniques in organic, physical, and analytical chemistry. First-hand experience is gained using specialized glassware, scientific equipment and instrumentation plus computers. Essential technical laboratory standards and technical writing are emphasized. Lec/lab. PREREQS: ((CH 221 [D-] and CH 222 [D-] and CH 223 [D-] ) or (CH 224 H [D-] and CH 225 H [D-] and CH 226 H [D-] ) or ((CH 231 [D-] or CH 231H [D-] ) and (CH 261 [D-] or CH 261H [D-] or CH 271 [D-] ) and (CH 232 [D-] or CH 232H [D-] ) and (CH 262 [D-] or CH 262 H [D-] or CH 272 [D-]) and (CH 233 [D-] or CH 233 H [D-] ) and (CH 263 [D-] or CH 263H [D-] or CH 273 [D-] )) and (MTH 251* [D-] or MTH 251H* [D-] ) and (PH 201* [D-] or PH 211* [D-]) and CH $334^{*}$ [D-] ) and Restricted to chemistry and biochemistry/biophysics majors. Honors College approval required.
CH 362. EXPERIMENTAL CHEMISTRY I (3).
First-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. PREREQS: ((CH 361 [D-] or CH 361 H [D-]) and CH 335* [D-] )

## CH 362H. EXPERIMENTAL CHEMISTRY I

(3). First-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/ lab. PREREQS: ((CH 361 [D-] or CH 361H [D-] ) and $\mathrm{CH} 335^{*}$ [D-] ) and Honors College approval required.

CH 374. *TECHNOLOGY, ENERGY, AND RISK (3). Decision-making in a technical, democratic society. Discussion of current issues such as acid rain, toxic organic chemicals in the environment, energy resources, etc. Does not meet the prereq for any other chemistry course. Does not meet requirements for chemistry minor. (Bacc Core Course) PREREQS: Completion of baccalaureate core in physical science.
CH 390. ENVIRONMENTAL CHEMISTRY (3).
Sources, reactions, transport, effects, and fates
of chemical species in water, soil, air, and living environments and the effects of technology thereon. PREREQS: CH 331 [D-] or CH 334 [D-]
CH 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
CH 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS:
Departmental approval required.
CH 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

CH 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
CH 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
CH 407H. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required. Honors College approval required.

CH 410. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
CH 411. INORGANIC CHEMISTRY (3).
Fundamental principles of inorganic chemistry including atomic structure, bonding models for molecules and solids, symmetry, acid/base chemistry, oxidation-reduction, and metal-ligand complexes. PREREQS: One year of general chemistry. College-level physics is recommended.
CH 412. INORGANIC CHEMISTRY (3).
Descriptive chemistry of the elements, focusing on main-group compounds, transition metal complexes, and solid-state chemistry. PREREQS: CH 411 [D-] and /or instructor approval.

CH 413. SOLID STATE CHEMISTRY (3-4). Basic principles of chemistry are applied to descriptions of structure-property relationships in inorganic solids. Topics include crystal structure, materials synthesis, chemical bonding, electronic properties, optical properties, and magnetism. Students who register for 4 credits will perform independent study of an advanced topic based on research literature. This course is repeatable for a maximum of 4 credits. PREREQS: CH 442 [D-] or CH 542 [D-]
CH 418. NUCLEAR CHEMISTRY (3). Radioactive decay, nuclear properties, nuclear structure, alpha, beta, and gamma decay, nuclear reactions, fission, interaction of radiation with matter, chemical techniques, radiation safety, and nuclear instrumentation. PREREQS: Should enroll concurrently in (CH 440 or CH 540) or PH 314.

CH 419. RADIOACTIVE TRACER METHODS
4). Radionuclides, radioactivity, and radiotracer methods as research tools in physical and biological science. Lec/lab. PREREQS: Two years of college chemistry.
CH 421. ANALYTICAL CHEMISTRY (3). A professional sequence for majors in chemistry and related disciplines. Chemical equilibrium, analytical electrochemistry, separations, spectroscopy, instrumentation, and treatment of data. PREREQS: One year of general chemistry and one year of college physics. Should enroll concurrently in CH 440 or CH 540.

CH 422. ANALYTICAL CHEMISTRY (3). A professional sequence for majors in chemistry and related disciplines. Chemical equilibrium, analytical electrochemistry, separations, spectroscopy, basic electronics and instrumentation, and treatment of data. PREREQS: One year of general chemistry and one year of college physics. Should enroll concurrently in CH 441 or CH 541.

CH 424. BIOANALYTICAL CHEMISTRY (3). Analytical methods employed in the study of biologically important molecules. Separations
(chromatography, electrophoresis), spectroscopy, mass spectrometry, biosensors, and immunoassays. Lec/lab. Not offered every year. PREREQS: One year of organic chemistry and one term of organic chemistry laboratory.
CH 435. STRUCTURE DETERMINATION BY SPECTROSCOPIC METHODS (3). Use of
ultraviolet, infrared, nuclear magnetic resonance, and mass spectra for determination of structures and stereochemistry of complex organic molecules. PREREQS: (CH 336 [D-] and (CH 442 [D-] or CH 542 [D-] ))
CH 440. PHYSICAL CHEMISTRY (3).
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy. PREREQS: (MTH 254 [D-] or MTH 254H [D-] ) and one year of general chemistry and one year of college physics CH 440, CH 441, CH 442 must be taken in order.

CH 441. PHYSICAL CHEMISTRY (3).
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy. PREREQS: (MTH 254 [D-] or MTH 254H [D-] ) and one year of general chemistry and one year of college physics CH 440, CH 441, CH 442 must be taken in order.

CH 442. PHYSICAL CHEMISTRY (3).
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy. PREREQS: (MTH 254 [D-] or MTH 254H [D-] ) and CH 441 [D-] and one year of general chemistry and one year of college physics. CH 440, CH 441, CH 442 must be taken in order.
CH 445. PHYSICAL CHEMISTRY OF
MATERIALS (3). Structure of solid materials.
Relationship between structure and mechanical, thermal, and electrical properties of materials used in high technology. Offered alternate years. PREREQS: (CH 442 [D-] or CH 542 [D-] )
CH 450. INTRODUCTORY QUANTUM
CHEMISTRY (3). Elementary wave mechanics and matrix mechanics of atoms and molecules. Quantum basis of chemical structure. Not offered every year. PREREQS: (CH 442 [D-] or CH 542 [D-] ) and one year college physics.
CH 453. CHEMICAL THERMODYNAMICS (3).
The laws of chemical thermodynamics applied to analyze properties of gases, gas mixtures, liquid solutions, fluctuations, critical phenomena, and magnetic systems. Not offered every year. PREREQS: (CH 442 [D-] or CH 542 [D-] )
CH 461. EXPERIMENTAL CHEMISTRY II (3). Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. PREREQS: ((CH 362 [D-] or CH 362H [D-] ) and $\mathrm{CH} 421^{*}$ [D-] and CH 440* [D-] )
CH 461H. EXPERIMENTAL CHEMISTRY II
(3). Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic and physical chemistry. Lec/Lab. PREREQS: ((CH 362 [D-] or CH 362H [D-] ) and CH 421* [D-] and CH 440* [D-] ) and Honors College approval required
CH 462. ^EXPERIMENTAL CHEMISTRY II (3). Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course) PREREQS: ((CH 362 [D-] or CH 362 H [D-] ) and $\mathrm{CH} 441^{*}$ [D-] and (CH 324 [D-] or CH 461 [D-] or CH 461H [D-] )) and CH 422 is recommended.

CH 462H. ^EXPERIMENTAL CHEMISTRY II
(3). Second-level integrated laboratory course for majors in chemistry and related disciplines,
covering experimental techniques of analytical inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course) PREREQS: ((CH 362 [D-] or CH 362H [D-] ) and CH 441* [D-] and (CH 324 [D-] or CH 461 [D-] or CH 461H [D-] )) and CH 422 is recommended. Honors College approval required.

CH 463. ^EXPERIMENTAL CHEMISTRY II
(3). Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course) PREREQS: ((CH 362 [D-] or CH 362H [D-] ) and (CH 324 [D-] or CH 461 [D-] or CH 461 H [D-] ) and CH 442* [D-] )
CH 463H. ^ EXPERIMENTAL CHEMISTRY II
(3). Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/ lab. (Writing Intensive Course) PREREQS: ((CH 362 [D-] or CH 362H [D-] ) and (CH 324 [D-] or CH 461 [D-] or CH 461H [D-] ) and CH $442^{*}$ (D-] ) and Honors College approval required.
CH 464. ^EXPERIMENTAL CHEMISTRY II
(3). Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course) PREREQS: ((CH 362 [D-] or CH 362H [D-] ) and CH 442* [D-] ) and (CH 461 or CH 461 H or CH 324 is recommended).

CH 464H. ^EXPERIMENTAL CHEMISTRY II (3). Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/ lab. (Writing Intensive Course) PREREQS: ((CH 362 [D-] or CH 362H [D-] ) and CH 442* [D-] ) and (CH 461 or CH 461 H or CH 324 is recommended) Honors College approval required.
CH 471. ADVANCED ORGANIC CHEMISTRY (3). Principles of synthetic organic chemistry. Particular emphasis will be directed at understanding stereochemical outcomes in carbon-carbon bond-forming reactions (DielsAlder, aldol, and pericyclic reactions). Other topics will include oxidation/reduction reactions, organometallic chemistry, and enantioselective methodologies. PREREQS: (CH 336 [D-] or CH 337 [D-] )

CH 490. COMPUTER PROGRAMMING FOR
SCIENTISTS (3). Programming, numerical and graphical analysis, problem solving, simulations and use of databases for information handling and retrieval. Applications to problems in chemistry. PREREQS: MTH 252 [D-] or MTH 252H [D-]

CH 501. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

CH 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

CH 505. READING AND CONFERENCE (1-16),
This course is repeatable for a maximum of 16 credits.
CH 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
CH 507. SEMINAR (1-16). Student should enroll in the seminar section that meets the specific divisional requirements for credits and grading scheme or that is designated for teaching or mentoring programs. Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

CH 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.
CH 511. INORGANIC CHEMISTRY (4).
Fundamental principles of inorganic chemistry including atomic structure, bonding models for molecules and solids, symmetry, acid/base chemistry, oxidation-reduction, metal-ligand complexes, sol-gel chemistry and nanochemistry.

PREREQS: CH 442 or CH 542 is recommended

## CH 512. INORGANIC CHEMISTRY (4).

Descriptive chemistry of the elements, focusing on main-group compounds, transition metal complexes, and solid-state chemistry. PREREQS: CH 511 [C] and /or instructor approval.
CH 513. SOLID STATE CHEMISTRY (3-4). Basic principles of chemistry are applied to descriptions of structure-property relationships in inorganic solids. Topics include crystal structure, materials synthesis, chemical bonding, electronic properties, optical properties, and magnetism. Students who register for 4 credits will perform independent study of an advanced topic based on research literature. This course is repeatable for a maximum of 4 credits. PREREQS: CH 442 or CH 542

## CH 516. RADIOCHEMISTRY (4). Selected

 methods in radiochemical analysis. Actinide chemistry, activation analysis, radionuclide solvent extraction, and microbial reactions with radionuclides. Designed for majors in chemistry, chemical engineering, nuclear engineering, and radiation health physics. Lec/lab. CROSSLISTED as NSE 516. This course is repeatable for a maximum of 12 credits. PREREQS: ((NE 531 [C] or RHP 531 [C] ) and RHP 536 [C] ) and /or instructor approval required.CH 518. NUCLEAR CHEMISTRY (3). Radioactive decay, nuclear properties, nuclear structure, alpha, beta, and gamma decay, nuclear reactions, fission, interaction of radiation with matter, chemical techniques, radiation safety, and nuclear instrumentation. PREREQS: Should concurrently enroll in (CH 440 or CH 540 ) or PH 314.

CH 519. RADIOACTIVE TRACER METHODS
4). Radionuclides, radioactivity, and radiotracer methods as research tools in physical and biological science. Lec/lab. PREREQS: Two years of college chemistry.
CH 521. ANALYTICAL CHEMISTRY (3). A professional sequence for majors in chemistry and related disciplines. Chemical equilibrium, analytical electrochemistry, separations, spectroscopy, instrumentation, and treatment of data. PREREQS: One year of college chemistry, one year of college physics. Should concurrently enroll in CH 540.

CH 522. ANALYTICAL CHEMISTRY (3). A professional sequence for majors in chemistry and related disciplines. Chemical equilibrium, analytical electrochemistry, separations, spectroscopy, basic electronics and instrumentation, and treatment of data. PREREQS: One year of college chemistry, one year of college physics. Should concurrently enroll in CH 541.

CH 524. BIOANALYTICAL CHEMISTRY (3).
Analytical methods employed in the study of biologically important molecules. Separations (chromatography, electrophoresis), spectroscopy, mass spectrometry, biosensors, and immunoassays. Lec/lab. Not offered every year CROSSLISTED as VMB 524. PREREQS: One year of organic chemistry and one term of organic chemistry laboratory.
CH 535. STRUCTURE DETERMINATION BY SPECTROSCOPIC METHODS (3). Use of ultraviolet, infrared, nuclear magnetic resonance, and mass spectra for determination of structures and stereochemistry of complex organic molecules. PREREQS: CH 336 and $(\mathrm{CH} 442$ or CH 542)
CH 540. PHYSICAL CHEMISTRY (3).
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy. PREREQS: MTH 254 and one year of college chemistry and one year of college physics. $\mathrm{CH} 540, \mathrm{CH} 541, \mathrm{CH}$ 542 must be taken in order.

CH 541. PHYSICAL CHEMISTRY (3)
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics,
quantum theory and statistical mechanics, molecular structure and spectroscopy. PREREQS: CH 540

CH 542. PHYSICAL CHEMISTRY (3).
Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy. PREREQS: CH 541

CH 545. PHYSICAL CHEMISTRY OF
MATERIALS (3). Structure of solid materials. Relationship between structure and mechanical, thermal, and electrical properties of materials used in high technology. Offered alternate years. PREREQS: CH 442 or CH 542

CH 550. INTRODUCTORY QUANTUM
CHEMISTRY (3). Elementary wave mechanics and matrix mechanics of atoms and molecules. Quantum basis of chemical structure. Not offered every year. PREREQS: CH 542 [C] and one year college physics.

CH 553. CHEMICAL THERMODYNAMICS (3).
The laws of chemical thermodynamics applied to analyze properties of gases, gas mixtures, liquid solutions, fluctuations, critical phenomena and magnetic systems. Not offered every year. PREREQS: CH 542
CH 571. ADVANCED ORGANIC CHEMISTRY 3). Principles of synthetic organic chemistry. Particular emphasis will be directed at understanding stereochemical outcomes in carbon-carbon bond-forming reactions (DielsAlder, aldol, and pericyclic reactions). Other topics will include oxidation/reduction reactions, organometallic chemistry, and enantioselective methodologies. PREREQS: CH 336 or CH 337

## CH 582. CHEMISTRY AND MATERIALS OF

 BATTERIES AND SUPER CAPACITORS (3).Examines the chemistry and materials currently in use and proposed for future primary and secondary batteries and supercapacitors. After a brief historical review, we will examine in detail the state-of-the-art technologies including lithium-ion, lithium, and sodium-sulfur batteries and electrochemical double-layer capacitors, and future technologies such as metal-air and lithiumsulfur. Class discussions will focus on structure/ performance relationships and other issues such as environmental impact, safety and cost. Offered via Ecampus only. PREREQS: Full year of general chemistry. College-level physics is recommended. Additional chemistry or materials science background is recommended.

## CH 584. INSTRUMENTS AND ONLINE

INTERACTIONS IN THE SCIENCES (3). Examine methods and technologies for and incorporating virtual instruments and online interactions into laboratory courses to support learners in becoming critical thinkers and creative producers of their knowledge and understanding in science. PREREQS: Basic computer literacy and one year of general chemistry, physics or biology
CH 590. COMPUTER PROGRAMMING FOR SCIENTISTS (3). Programming, numerical and graphical analysis, problem solving, simulations and use of databases for information handling and retrieval. Applications to problems in chemistry. PREREQS: MTH 252
CH 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
CH 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.
CH 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

CH 607. SEMINAR (1-16). Student should enroll in the seminar section that meets the specific divisional requirements for credits and grading scheme or that is designated for teaching or mentoring programs. This course is repeatable for a maximum of 16 credits.

CH 614. SELECTED TOPICS IN INORGANIC CHEMISTRY (4). Nonsequence courses designed to acquaint the advanced graduate student with recent advances in fields such as solid state chemistry, theoretical inorganic chemistry, spectroscopy and magnetism, chemistry of coordination compounds, kinetics and mechanisms of inorganic reactions, acid-base theory and reactions in nonaqueous solvents, organometallic chemistry, and chemistry of the less familiar elements. Not offered every year. This course is repeatable for a maximum of 8 credits. PREREQS: CH 413 or CH 513

## 615. SELECTED TOPICS INORGANIC

CHEMISTRY (4). Focus is on cutting edge
research topics in inorganic materials chemistry, which will evolve from year-to-year to stay up-todate. Current journal articles, software programs, and lab demonstrations will be utilized. Students will learn both content of a research area, as well as tools used in the practice.
CH 616. SELECTED TOPICS IN INORGANIC
CHEMISTRY (4). Nonsequence courses designed to acquaint the advanced graduate student with the principles of X-ray diffraction as applied to the structural characterization of both single crystals and powders. Not offered every year. PREREQS: CH 413 or CH 513
CH 630. ADVANCED ORGANIC CHEMISTRY (3) Molecular orbital bonding theory, orbital symmetry, reaction mechanisms, stereoisomerism, conformational analysis, and advanced methods of synthesis. Not offered every year. PREREQS: CH 336 and (CH 442 or CH 542 )

CH 631. ADVANCED ORGANIC CHEMISTRY (4) Carbon-carbon bond forming reactions, reaction mechanisms, stereoisomerism, conformational analysis, and advanced methods of synthesis. Not offered every year. PREREQS: CH 630

CH 632. ADVANCED ORGANIC CHEMISTRY (3) Molecular orbital bonding theory, orbital symmetry, reaction mechanisms, stereoisomerism, conformational analysis, and advanced methods of synthesis. Not offered every year. PREREQS: CH 336 and (CH 442 or CH 542)
CH 633. HYPOTHESIS, EVIDENCE, AND ARGUMENT IN ORGANIC CHEMISTRY (2). Immerses the student in the tools of scientific method as applied to current research topics in the chemical literature. The student will perform an extensive review of a modern topic in organic chemistry, prepare a written summary and analysis of this literature review and make a public oral presentation and discussion. This course is repeatable for a maximum of 4 credits. PREREQS: CH 632 [C] and /or instructor permission.

## CH 636. SELECTED TOPICS IN ORGANIC

CHEMISTRY (3). Nonsequence courses designed to acquaint students with recent advances in organic chemistry and their application to special fields of study. Topics covered vary from term to term and year to year. Topics include: theoretical organic chemistry, recent advances in reaction mechanisms, advanced synthesis, free radical reactions, organic sulfur chemistry, and biosynthesis of natural products. CH 636 , CH 637, CH 638 need not be taken in order. Not offered every year. This course is repeatable for a maximum of 12 credits.

## CH 637. SELECTED TOPICS IN ORGANIC

CHEMISTRY (3). Nonsequence courses designed to acquaint students with advances in organic chemistry, specifically focusing on biosynthesis of natural products and enzyme reaction mechanisms. CH 636, CH 637, CH 638 need not be taken in order. This course is repeatable for a maximum of 12 credits.

## CH 638. SELECTED TOPICS IN ORGANIC

CHEMISTRY (3). Nonsequence courses designed to acquaint students with recent advances in organic chemistry and their application to special fields of study. Topics covered vary from term to term and year to year. Topics include:
theoretical organic chemistry, recent advances in reaction mechanisms, advanced synthesis, free radical reactions, organic sulfur chemistry, and biosynthesis of natural products. CH 636 , CH 637, CH 638 need not be taken in order. Not offered every year. This course is repeatable for a maximum of 12 credits.

CH 651. QUANTUM MECHANICS OF ATOMS AND MOLECULES (3). Not offered every year. PREREQS: CH 450 or CH 550

CH 652. QUANTUM MECHANICS OF MOLECULAR SPECTROSCOPY (3). Not offered every year. PREREQS: CH 651
CH 660. SPECTROCHEMICAL ANALYSIS (3).
Theoretical concepts and methodology of optical spectrochemical methods of analysis, components of spectrometers, flame and electrothermal atomic spectrophotometry, ICP atomic emission spectrometry, molecular absorption and fluorescence spectrometry. PREREQS: CH 442 or CH 542
CH 661. SEPARATIONS: CHROMATOGRAPHY AND RELATED METHODS (4). Theory, instrumentation, and practice of modern separation techniques (gas chromatography, liquid chromatography, electrokinetic separations) and sample preparation methods; handling and interpretation of chromatographic and electrophoretic data. PREREQS: CH 440 or CH 540 (Thermodynamics) recommended or instructor's permission.
CH 662. ANALYTICAL ELECTROCHEMISTRY
(4). Study of current, voltage and time relationships in electrochemical cells. Offered alternate years. PREREQS: CH 442 recommended or instructor permission.

CH 680. SELECTED TOPICS IN PHYSICAL
CHEMISTRY (3). Nonsequence courses designed to acquaint students with recent advances in physical chemistry. Topics include molecular structure dynamics determination (UV-visible, near-IR light sources, $x$-ray, electron and neutron diffraction), spectroscopy (ultrafast, nonlinear, multidimensional, multiphoton, magnetic resonance, photoelectron), physical chemistry of condensed phase systems (biomolecules, aqueous solution, novel materials, ionic, molecula and liquid crystals, critical phenomena, mass transport), theoretical chemistry (chemical bonding, scattering theory, group theory, dynamics), electronic structure theory of molecules, structural dynamics of complex systems. Need not be taken in order. Not offered every year. This course is repeatable for a maximum of 12 credits. PREREQS: CH 550 [B-] and graduate standing.
CH 681. SELECTED TOPICS IN PHYSICAL
CHEMISTRY (2). Nonsequence courses designed to acquaint students with recent advances in physical chemistry. Topics include molecular structure determination (x-ray, electron and neutron diffraction), spectroscopy (nonlinear and multiphoton, magnetic resonance, photoelectron, Moessbauer effect), physical chemistry of condensed phases (ionic, molecular and liquid crystals, critical phenomena, mass transport), theoretical chemistry (chemical bonding, scattering theory, group theory, dynamics), electronic structure theory of molecules. Need not be taken in order. Not offered every year. This course is repeatable for a maximum of 12 credits. PREREQS: Graduate standing.
CH 682. SELECTED TOPICS IN PHYSICAL CHEMISTRY (2). Nonsequence courses designed to acquaint students with recent advances in physical chemistry. Topics include molecular structure determination (x-ray, electron and neutron diffraction), spectroscopy (nonlinear and multiphoton, magnetic resonance, photoelectron,

Moessbauer effect), physical chemistry of condensed phases (ionic, molecular and liquid crystals, critical phenomena, mass transport), heoretical chemistry (chemical bonding, scattering theory, group theory, dynamics), electronic structure theory of molecules. Need not be taken in order. Not offered every year. This course is repeatable for a maximum of 12 credits. PREREQS: Graduate standing.
CH 683. SELECTED TOPICS IN ANALYTICAL CHEMISTRY (2). Nonsequence courses designed to acquaint the advanced graduate student with recent advances in analytical chemistry. Not offered every year. This course is repeatable for a maximum of 12 credits. PREREQS: Graduate standing or instructor approval required.
CH 684. SELECTED TOPICS IN ANALYTICAL CHEMISTRY (2). Nonsequence courses designed to acquaint the advanced graduate student with recent advances in analytical chemistry. Not offered every year. This course is repeatable for a maximum of 12 credits. PREREQS: Graduate standing or instructor approval required.
CH 685. SELECTED TOPICS IN ANALYTICAL CHEMISTRY (2). Nonsequence courses designed to acquaint the advanced graduate student with recent advances in analytical chemistry. Not offered every year. This course is repeatable for a maximum of 12 credits. PREREQS: Graduate standing or instructor approval required.
CH 686. SELECTED TOPICS IN NUCLEAR AND RADIATION CHEMISTRY (2). Nonsequence courses designed to acquaint the advanced graduate student with recent advances in nuclear and radiation chemistry. Not offered every year. This course is repeatable for a maximum of 12 credits. PREREQS: Graduate standing or instructor approval required.
CH 687. SELECTED TOPICS IN NUCLEAR AND RADIATION CHEMISTRY (2). Nonsequence courses designed to acquaint the advanced graduate student with recent advances in nuclear and radiation chemistry. Not offered every year. This course is repeatable for a maximum of 12 credits. PREREQS: Graduate standing or instructor approval required.

CH 688. SELECTED TOPICS IN NUCLEAR AND RADIATION CHEMISTRY (2). Nonsequence courses designed to acquaint the advanced graduate student with recent advances in nuclear and radiation chemistry. Not offered every year. This course is repeatable for a maximum of 12 credits. PREREQS: Graduate standing or instructor approval required.
CH 692. ENVIRONMENTAL TRANSFORMATION
OF ORGANIC COMPOUNDS (3). Chemical, photochemical, and biological transformation reactions of organic compounds in the environment. Test methods and predictive models for determining the persistence of organic compounds in the environment. Offered alternate years. PREREQS: CH 336 and CH 440 or instructor approval required.
CH 696. COMPUTER INTERFACING (4). Introduction to the use of microcomputers for data acquisition and data manipulation in the laboratory. The emphasis will be on the use of software and hardware for the IBM-compatible personal computer. Programming in Visual Basic and Windows languages will be covered, as well as use of commercial software and hardware. Familiarity with analog signal conditioning and simple digital circuitry will be assumed.
CH 697. MASS SPECTROMETRY OF ORGANIC COMPOUNDS (4). Physical principles of mass spectrometric instrumentation and interpretation of the mass spectra of organic compounds and biomolecules. Not offered every year.

Financial Mathematics
Geometry
Mathematics Education
Number Theory
Numerical Analysis
Topology
Probability

## Graduate Minor

Mathematics

The department offers programs leading to the BS, MA, MS, and PhD degrees in Mathematics. Undergraduate minors are offered in Mathematics and Actuarial Science.

Students interested in teaching mathematics at the secondary level should contact a departmental advisor and discuss
the Secondary Teaching Emphasis option available under the Mathematics major. Likewise, students interested in careers in the area of financial mathematics or as actuaries should meet with a member of the departmental Actuarial Sciences Committee.
Additional information pamphlets about both the undergraduate and graduate programs are available on the Department of Mathematics website.

## DEPARTMENTAL REQUIREMENTS

The Mathematics major requirements at the upper division comprise about 45 credits of course work. This leaves about 45 credits of free electives that can be used to design a degree program in mathematics that is tailored to each major's particular interests.

## MATHEMATICS (BS, CRED, HBS)

The BS degree in Mathematics requires a common core of courses at the lowerdivision level and junior-level followed by senior-level depth and breadth requirements. The upper-division requirements in the major total 45-50 credits. Thus, a mathematics major has ample opportunity to take further mathematics courses focused toward specific interests and career goals. Programs supporting interdisciplinary interests are strongly encouraged.
The following requirements are specific to the BS degree in Mathematics. Students must also satisfy OSU degree and baccalaureate core requirements.
A grade of at least C- and a GPA of 2.25 are required in all mathematics courses used to fulfill degree requirements. No course used to fulfill requirements for the mathematics major or any of its options may be taken $\mathrm{S} / \mathrm{U}$.

## Lower-Division Requirements (28)

MTH 251. *Differential Calculus (4)
MTH 252. Integral Calculus (4)
MTH 253. Infinite Series and Sequences (4)
MTH 254. Vector Calculus I (4)
MTH 255. Vector Calculus II (4)
MTH 256. Applied Differential Equations (4) PH 211. *General Physics with Calculus (4)

## Upper-Division Requirements:

(45-50)
Part A. Required Mathematics Core Classes (24)
MTH 311, MTH 312. Advanced Calculus (4,4) MTH 341. Linear Algebra I (3)
MTH 342. Linear Algebra II (4)
MTH 343. Introduction to Modern Algebra (3)

MTH 355. Discrete Mathematics (3)
One of the following writing
intensive courses (WIC) (3):
MTH 323. ${ }^{\wedge}$ Mathematical Modeling (3)
MTH 333. $\wedge$ Fundamental Concepts of Topology (3)
MTH 338. ${ }^{\wedge}$ Non-Euclidean Geometry (3)

Part B: Computational Requirement
(3)

One of the following courses is required. This course can be used to satisfy one requirement in either Part C or Part D.
MTH 321. Introductory Applications of Mathematical Software (3)
MTH 351. Introduction to Numerical Analysis (3)
MTH 440. Computational Number Theory (3)

MTH 441. Applied and Computational Algebra (3)
MTH 451. Numerical Linear Algebra (3)
MTH 452. Numerical Solution of Ordinary Differential Equations (3)
Part C: Area Course Work (15)
Mathematics courses at the 400 level are offered in the 6 areas listed below. Five 400-level classes satisfying (a) and (b) are required.
(a) Depth requirement: A pair of classes from one of the 6 areas is required. Some exceptions are noted.
(b) Breadth requirement: One course each from 3 of the 5 remaining areas.

## Algebra and Number Theory:

(MTH 443 cannot be used in a pair to satisfy (a).)
MTH 440. Computational Number Theory (3)
MTH 441. Applied and Computational Algebra (3)
MTH 442. Applied and Computational Algebra (3)
MTH 443. Abstract Linear Algebra (3)

## Analysis:

(MTH 483 cannot be used in a pair to satisfy (a).)
MTH 411. Real Analysis (3)
MTH 412. Real Analysis (3)
MTH 413. Real Analysis (3)
MTH 483. Complex Variables (3)
Applied Mathematics:
(MTH 480 and MTH 481 cannot both be used to satisfy program requirements.)
MTH 420. Models and Methods of Applied Mathematics (3)
MTH 427. Introduction to Mathematical Biology (3)
MTH 480. Systems of Ordinary Differential Equations (3)
MTH 481. Applied Ordinary Differential Equations (3)
MTH 482. Applied Partial Differential Equations (3)
Geometry and Topology:
MTH 430. Metric Spaces and Topology (3)
MTH 434. Introduction to Differential Geometry (3)
MTH 435. Differential Geometry (3)
MTH 437. General Relativity (3)

## Numerical Analysis:

MTH 451. Numerical Linear Algebra (3)
MTH 452. Numerical Solution of Ordinary Differential Equations (3)
MTH 453. Numerical Solution of Partial Differential Equations (3)

## Probability:

MTH 463. Probability I (3)
MTH 464. Probability II (3)
MTH 465. Probability III (3)

## MTH 467. Actuarial Mathematics (3)

Part D: Electives (6)
Two additional upper-division elective courses of a mathematical nature are required.
This includes non-blanket numbered (not X99- or X0X-numbered) upperdivision MTH courses, upper-division ST courses, or other courses of a mathematical nature approved by the departmental head advisor. MTH 390 is not allowed.

## Total=180

Footnotes:

* Baccalaureate Core Course (BCC)
${ }^{\wedge}$ Writing Intensive Course (WIC)
Major Code: 560

## OPTIONS

## APPLIED AND COMPUTATIONAL

 MATHEMATICS OPTIONThe Applied and Computational option offers Mathematics majors an opportunity to concentrate much of their upper-division course work in the area of applied and computational mathematics. This degree option is designed to allow students to focus on applied mathematics, modeling, and computation after completing core junior and lower-division mathematics requirements.

A grade of at least C- and a GPA of 2.25 are required in all mathematics courses used to fulfill degree requirements. No course used to fulfill requirements for the mathematics major or any of its options may be taken $\mathrm{S} / \mathrm{U}$.
The lower-division requirements for the Applied and Computational Mathematics option are the same as those for the Mathematics BS degree. The upperdivision requirements are as follows.

## Upper-Division Requirements:

(51-52)

## Part A. Required Applied and

 Computational Mathematics Core Classes (27)All of the following courses are required.
MTH 311, MTH 312. Advanced Calculus $(4,4)$
MTH 323. ^Mathematical Modeling (3)
MTH 341. Linear Algebra I (3)
MTH 342. Linear Algebra II (4)
MTH 343. Introduction to Modern Algebra (3)
MTH 355. Discrete Mathematics (3)
MTH 483. Complex Variables (3)
Part B. Area Course Work (15)
Five courses from the following 9 classes are required. Either MTH 453 or MTH 482 must be included. (Note: Only one of MTH 480 and MTH 481 can be used to satisfy requirements for a degree in Mathematics.):
MTH 420. Models and Methods of Applied Mathematics (3)
MTH 440. Computational Number Theory (3)
MTH 441. Applied and Computational
Algebra (3)

MTH 451. Numerical Linear Algebra (3)
MTH 452. Numerical Solution of Ordinary Differential Equations (3)
MTH 453. Numerical Solution of Partial Differential Equations (3)
MTH 480. Systems of Ordinary Differential Equations (3)
MTH 481. Applied Ordinary Differential Equations (3)
MTH 482. Applied Partial Differential Equations (3)

## Part C. Probability or Statistics

## (3-4)

One of the following 4 classes is required.
MTH 361. Introduction to Probability (3)
MTH 463. Probability I (3)
ST 351. Introduction to Statistical Methods (4)

ST 421. Introduction to Mathematical Statistics (4)

## Part D. Electives (6)

Two additional upper-division elective courses of a mathematical nature are required.

This includes non-blanket numbered (not X99- or X0X-numbered) upperdivision MTH courses, upper-division ST courses, other courses of a mathematical nature approved by the departmental head advisor, or a two-term thesis project with a graduate faculty member. MTH 390 is not allowed.

## Footnotes:

* Baccalaureate Core Course (BCC)
$\wedge$ Writing Intensive Course (WIC)

## Option Code: 692

## MATHEMATICAL

BIOLOGY OPTION
In addition to the usual required lowerdivision mathematics courses and the junior core courses, mathematics majors in the Mathematical Biology option have an opportunity to concentrate much of their further course work on applied mathematics, mathematical biology, modeling and computation.

A grade of at least C- and a GPA of 2.25 are required in all mathematics courses used to fulfill degree requirements. No course used to fulfill requirements for the mathematics major or any of its options may be taken $\mathrm{S} / \mathrm{U}$.
Lower-Division Requirements (41)
BI 211. *Principles of Biology (4)
BI 212. *Principles of Biology (4)
BI 213. *Principles of Biology (4)
MTH 251. *Differential Calculus (4)
MTH 252. Integral Calculus (4)
MTH 253. Infinite Series and Sequences (4)
MTH 254. Vector Calculus I (4)
MTH 255. Vector Calculus II (4)
MTH 256. Applied Differential Equations (4)
CH 231. *General Chemistry (4) and CH
261. *Laboratory for Chemistry 231 (1)

## Upper-Division Requirements <br> (52-53)

## Part A: Required Mathematics Core

Courses (24)
MTH 311. Advanced Calculus (4)
MTH 312. Advanced Calculus (4)
MTH 341. Linear Algebra I (3)
MTH 342. Linear Algebra II (4)
MTH 343. Introduction to Modern Algebra (3)

MTH 355. Discrete Mathematics (3)
And one of the following writing
intensive courses (WIC) is required:
MTH 323. ${ }^{\wedge}$ Mathematical Modeling (3) (preferred)
MTH 333. ${ }^{\wedge}$ Fundamental Concepts of Topology (3)
MTH 338. ^Non-Euclidean Geometry (3)
Part B: Required Area Course Work
in Mathematics and Statistics (16)
MTH 427. Introduction to Mathematical Biology (3)
MTH 428. Stochastic Elements in
Mathematical Biology (3)
MTH 463. Probability I (3)
MTH 480. Systems of Ordinary Differential Equations (3)
One of the following courses is required:
ST 351. Introduction to Statistical Methods (4)

ST 411. Methods of Data Analysis (4)
Part C: Directed Electives (12-13)
One of the following courses is required:
MTH 483. Complex Variables (3)
MTH 430. Metric Spaces and Topology (3)
One of the following courses is required:
MTH 420. Models and Methods of Applied Mathematics (3)
MTH 440. Computational Number Theory (3)

MTH 441. Applied and Computational Algebra (3)
MTH 464. Probability II (3)
MTH 482. Applied Partial Differential Equations (3)
One of the following courses is required:
MTH 351. Introduction to Numerical Analysis (3)
MTH 451. Numerical Linear Algebra (3)
MTH 452. Numerical Solution of Ordinary Differential Equations (3)
One of the following courses, or
another upper-division life science course approved by a mathematics
advisor, is required:
BI 311. Genetics (4)
BI 351. Marine Ecology (3)
BI 370. Ecology (3)
BI 445. Evolution (3)
BOT 341. Plant Ecology (4)
BOT 442. Plant Population Ecology (3)
BOT 476. Introduction to Computing in the
Life Sciences (3)
CS 446. Biological Networks (3)
FW 320. Introductory Population Dynamics (4)

## Footnotes:

Option Code: 737

## SECONDARY TEACHING <br> EMPHASIS OPTION

Students preparing for careers teaching mathematics at the secondary level may major in mathematics with the following transcript-visible option. This option helps prepare students to pursue a teaching licensure program in their fifth year. Option requirements and a suggested timeline follow.

A grade of at least C- and a GPA of 2.25 are required in all mathematics courses used to fulfill degree requirements. No course used to fulfill requirements for the mathematics major or any of its options may be taken $\mathrm{S} / \mathrm{U}$.

## Freshman Year (45)

MTH 251. *Differential Calculus (4)
MTH 252. Integral Calculus (4)
MTH 253. Infinite Series and Sequences (4) PH 211. *General Physics with Calculus (4) Baccalaureate core courses (29)

## Sophomore Year (45)

MTH 254. Vector Calculus I (4)
MTH 255. Vector Calculus II (4)
MTH 256. Applied Differential Equations (4)
MTH 341. Linear Algebra (3)
Baccalaureate core courses (13)
Other electives (17)

## Junior Year (45)

A grade of at least C- and a GPA of 2.25 are required in all upper-division mathematics courses used to fulfill degree requirements.
ED 309. Field Practicum (3)
MTH 311, MTH 312. Advanced Calculus $(4,4)$
MTH 338. ^Non-Euclidean Geometry (3)
MTH 342. Linear Algebra II (4)
MTH 343. Introduction to Modern Algebra (3)

MTH 355. Discrete Mathematics (3)
MTH 361. Introduction to Probability (3)
Baccalaureate core courses (6)
Other electives (12)

## Senior Year (45)

MTH 491, MTH 492, MTH 493. Algebra and Geometric Transformations $(3,3,3)$
SED 414. Inquiry in Mathematics and Mathematics Education (3)
ST 351. Introduction to Statistical Methods (4)

Electives (29)

- Students wanting a stronger background in statistics may substitute ST 421 for ST 351.
- Students wanting a stronger background in probability may substitute MTH 463, Probability I, (usually taken in the senior year) for MTH 361.
- Students wanting a stronger background in mathematics should choose some electives from the $400-$ level courses listed in the Mathematics major.

## Footnotes:

* Baccalaureate Core Course (BCC)
$\wedge$ Writing Intensive Course (WIC)
Option Code: 234

## STATISTICS OPTION

The Statistics option offers Mathematics majors an opportunity to concentrate their senior level course work in the area of statistics and probability after completing core junior and lower-division mathematics requirements. This degree option is designed to allow a focus on the study of the mathematical theory underlying statistics while simultaneously developing expertise in statistical applications.
A grade of at least C- and a GPA of 2.25 are required in all mathematics courses used to fulfill degree requirements. No course used to fulfill requirements for the mathematics major or any of its options may be taken $\mathrm{S} / \mathrm{U}$.
The lower-division requirements for the Statistics option are the same as those for the Mathematics BS degree. The upper-division requirements are as follows.

## Upper-Division Requirements (55-56):

## Part A. Required Mathematics Core

## Classes (24)

MTH 311, MTH 312. Advanced Calculus (4,4)
MTH 341. Linear Algebra I (3)
MTH 342. Linear Algebra II (4)
MTH 343. Introduction to Modern Algebra (3)

MTH 355. Discrete Mathematics (3)
One of the following writing intensive courses (WIC) (3):
MTH 323. ${ }^{\wedge}$ Mathematical Modeling (3)
MTH 333. $\wedge$ Fundamental Concepts of Topology (3)
MTH 338. ^Non-Euclidean Geometry (3)
Part B: Statistics and Probability
Core Classes (22)
MTH 463. Probability I (3)
MTH 464. Probability II (3)
ST 411. Methods of Data Analysis (4)
ST 412. Methods of Data Analysis (4)
ST 421. Introduction to Mathematical Statistics (4)
ST 422. Introduction to Mathematical Statistics (4)

## Part C: Depth in Statistics or

Probability (3-4)
One course from the following list is required.
MTH 465. Probability III (3)
MTH 467. Actuarial Mathematics (3)
ST 413. Methods of Data Analysis (4)
ST 415. Design and Analysis of Planned Experiments (3)
ST 431. Sampling Methods (3)
ST 439. Survey Methods (3)
ST 441. Probability, Computing, and Simulation in Statistics (4)
ST 443. Applied Stochastic Models (3)
Part D: Breadth in Mathematics (6)
One course from each of 2 of the following 5 areas is required.
Note: MTH 321. Introductory Applications of Mathematical Software (3), can be substituted for one of the two area classes.

Algebra and Number Theory:
MTH 440. Computational Number Theory (3)

MTH 441. Applied and Computational Algebra (3)

## Analysis:

MTH 411. Real Analysis (3)
MTH 483. Complex Variables (3)
Applied Mathematics:
MTH 420. Models and Methods of Applied Mathematics (3)
MTH 427. Introduction to Mathematical Biology (3)
MTH 480. Systems of Ordinary Differential Equations (3)
MTH 481. Applied Ordinary Differential Equations (3)
Geometry and Topology:
MTH 430. Metric Spaces and Topology (3)
MTH 434. Introduction to Differential Geometry (3)
Numerical Analysis:
MTH 351. Introduction to Numerical Analysis (3)
MTH 451. Numerical Linear Algebra (3)
MTH 452. Numerical Solution of Ordinary Differential Equations (3)

## Footnotes:

* Baccalaureate Core Course (BCC)
${ }^{\wedge}$ Writing Intensive Course (WIC)
Option Code: 658

## UNDERGRADUATE MINORS

## ACTUARIAL SCIENCE MINOR

A minimum GPA of 2.0 is required in this minor. No course used to fulfill requirements for this minor may be taken $\mathrm{S} / \mathrm{U}$.

## Required (22)

MTH 251. *Differential Calculus (4)
MTH 252. Integral Calculus (4)
MTH 253. Infinite Series and Sequences (4) or MTH 306. Matrix and Power Series Methods (4)
MTH 254. Vector Calculus I (4)
MTH 341. Linear Algebra I (3)
MTH 361. Introduction to Probability (3)
Select at least 2 courses from the following upper-division courses (6-8):
MTH 351. Introduction to Numerical Analysis (3)
MTH 463. Probability I (3)
MTH 464. Probability II (3)
MTH 465. Probability III (3)
MTH 467. Actuarial Mathematics (3)
ST 411. Methods of Data Analysis (4)
ST 412. Methods of Data Analysis (4)
ST 413. Methods of Data Analysis (4)
ST 421. Introduction to Mathematical Statistics (4)
ST 422. Introduction to Mathematical Statistics (4)
ST 441. Probability, Computing, and Simulation in Statistics (4)
ST 443. Applied Stochastic Models (3) Restriction: The Actuarial Science minor must include 28 credits, at least 12 of which must be upper-division credits.

- Except for MTH 306 and MTH 341, upper-division courses used to satisfy a student's major requirements
may not also be used to satisfy requirements for the Actuarial Science minor.
- Except for MTH 306 and MTH 341, upper-division courses used to satisfy a student's additional minor program may not also be used to satisfy requirements for the Actuarial Science minor.

## Total=28-30

Footnote:

* Baccalaureate Core Course (BCC)

Minor Code: 563

## MATHEMATICS MINOR

A minimum GPA of 2.0 is required in this minor. No course used to fulfill requirements for this minor may be taken $\mathrm{S} / \mathrm{U}$.

## Required

MTH courses numbered 231 or higher (30 credits)
MTH courses numbered 311 or higher (15 credits)
MTH 311. Advanced Calculus (4)
or MTH 341. Linear Algebra I (3)

## Strongly Recommended:

MTH 251. *Differential Calculus (4)
MTH 252. Integral Calculus (4)
MTH 254. Vector Calculus I (4)
Note: MTH 390, Foundations of Elementary Mathematics (4), may not be used for credit in the Mathematics minor.

## Footnote:

* Baccalaureate Core Course (BCC)

Minor Code: 560
MATHEMATICS
(MA, MS, PhD, MAIS)
Graduate Areas of Concentration
Actuarial science, algebra, analysis, applied mathematics, computational mathematics, differential equations,
financial mathematics, geometry, mathematics education, number theory, numerical analysis, topology, probability
The Department of Mathematics offers graduate work leading to the Master of Science, Master of Arts, and Doctor of Philosophy degrees. Graduate areas of concentration are actuarial science, algebra, analysis, applied mathematics, computational mathematics, differential equations, financial mathematics, geometry, mathematics education, number theory, numerical analysis, topology, probability.
For the MS and MA, a thesis, an expository paper, or successful completion of the PhD qualifying examination is required.
Major Code: 5600
MATHEMATICS GRADUATE MINOR
For more details, see the departmental advisor.
Minor Code: 5600

## ■ MATHEMATICS COURSES

MTH 065. ELEMENTARY ALGEBRA (3).
Arithmetic of signed numbers, order of operations, simplifying algebraic expressions, solutions of linear equations, and inequalities. Rules of exponents, addition, subtraction, and multiplication of polynomials, factoring, solution of quadratic equations by factoring, reducing rational expressions. Word problems involving linear equations, graphing of linear equations, inequalities. All courses used to satisfy MTH prerequisites must be completed with C - or better. PREREQS: Placement Test MPT(05) or Placement Test MPAL(015) and (MPT=Math Placement Test score of 05 ; MPAL=Math Placement Test-ALEKS score of 15\%)
MTH 095. INTERMEDIATE ALGEBRA (3). Addition, subtraction, multiplication, and division of rational expressions, long division of polynomials, solutions of fractional equations, applications involving linear equations. Fractional equations, inequalities, literal equations, and variations. Negative and fractional exponents, radicals, solutions of quadratic equations, and complex numbers. Cartesian coordinates, graphs of linear equations and inequalities, distance formula, slope, equations of lines, solutions of systems of linear equations in two unknowns and inequalities. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 065 [C-] or Placement Test MPT(11) or Placement Test MPAL(030) and (MPT=Math Placement Test score of 11; MPAL=Math Placement Test-ALEKS score of 30\%)

MTH 102. ALGEBRAIC FOUNDATIONS (3). This course is designed primarily for EOP students. They will use various computing technologies to explore realistic and interesting situations in which algebra is used. As they work through explorations, they will work with many of the fundamental ideas of algebra, ideas they will find important in their daily lives.

MTH 103. ALGEBRAIC REASONING (4). Graphing data, functions, rate of change, linear equations, systems of linear equations, linear inequalities, linear functions, absolute value functions, quadratic functions, exponential functions. All courses used to satisfy MTH prerequisites must be completed with C - or better. PREREQS: MTH 065 [C-] or Placement Test MPT(11) or Placement Test MPAL(030) and (MPT=Math Placement Test score of 11; MPAL=Math Placement Test-ALEKS score of 30\%)

## MTH 105. *INTRODUCTION TO

CONTEMPORARY MATHEMATICS (3).
Elementary linear programming, combinatorics, descriptive statistics, elementary probability, exponential growth and decay, examples of major mathematical ideas and models. Lec/rec. (Bacc Core Course) PREREQS: MTH 095 or MTH 103 or (MPT=Math Placement Test score of 17; MPAL=Math Placement Test-ALEKS score of 46\%) recommended.

MTH 111. *COLLEGE ALGEBRA (4). Polynomial equations and inequalities, polynomial functions and graphs, inverse functions, exponential and logarithmic functions, elementary mathematical modeling and applications. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with a C- or better. (Bacc Core Course) PREREQS: MTH 095 [C-] or MTH 103 [C-] or Placement Test MPT(17) or Placement Test MPAL(046) and (MPT=Math Placement Test score of 17; MPAL=Math Placement Test-ALEKS score of 46\%)
MTH 112. *ELEMENTARY FUNCTIONS (4).
Triangle trigonometry, circular functions and graphs, trigonometric equations and identities, inverse trigonometric functions, polar coordinates, vectors and applications. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Bacc Core Course) PREREQS: MTH 111 [C-] or Placement Test MPT(24) or

Placement Test MPAL(060) and (MPT=Math Placement Test score of 24 ; MPAL=Math Placement Test-ALEKS score of 60\%)
MTH 150X. PRECALCULUS (4). Trigonometry. Exponential, logarithmic and trigonometric functions. Lec/rec. PREREQS: MTH 111 [C-] or Placement Test MPT(24) or Placement Test MPAL(060)
MTH 199. SPECIAL TOPICS (1-16). Maximum 3 credits per term, 9 credits total. Does not meet university group requirement in physical science. This course is repeatable for a maximum of 9 credits.
MTH 211. *FOUNDATIONS OF ELEMENTARY
MATHEMATICS (4). Introduction to problem solving, sets, whole numbers, number theory, fractions, decimals, percent, ratio and proportion integers. Intended primarily for prospective elementary teachers. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Bacc Core Course) PREREQS: MTH 095 [C-] or MTH 103 [C-] or MTH 111 [C-] or MTH 112 C-] or Placement Test MPT(17) or Placement Test MPAL(046) and (MPT=Math Placement Test score of 17; MPAL=Math Placement Test-ALEKS score of $46 \%$ )
MTH 212. FOUNDATIONS OF ELEMENTARY MATHEMATICS (4). Rational and real numbers, probability, statistics, and informal geometry. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 211 [C-]
MTH 228. CALCULUS AND PROBABILTITY FOR THE LIFE SCIENCES II (4). Continuation of MTH 227 with more general population growth models. Antidifferentiation; The Fundamental Theorem of Calculus applied to solving continuous growth models. Continuous random variables. Basic linear algebra of small systems sufficient to calculate eigenvalues and eigenvectors and appreciate their use in life science applications. Lec/rec. PREREQS: MTH 227 [C-] or MTH 251 [C-] or MTH 251H [C-]
MTH 231. ELEMENTS OF DISCRETE
MATHEMATICS (4). Elementary logic and set theory, functions, direct proof techniques, contradiction and contraposition, mathematical induction and recursion, elementary combinatorics, basic graph theory, minimal spanning trees. All courses used to satisfy MTH prerequisites must be completed with C - or better. PREREQS: MTH 112 [C-] or Placement Test MPT(33) or Placement Test MPAL(075) and (MPT=Math Placement Test score of 33; MPAL=Math Placement Test-ALEKS score of 75\%)
MTH 232. ELEMENTS OF DISCRETE
MATHEMATICS (4). Combinatorics, algorithms and complexity, graphs and trees. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 231
MTH 241. *CALCULUS FOR MANAGEMENT AND SOCIAL SCIENCE (4). Elementary differential and integral calculus of polynomial, logarithmic, and exponential functions and their applications to business, management and social sciences. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C - or better. (Bacc Core Course) PREREQS: MTH 111 [C-] or Placement Test MPT(24) or Placement Test MPAL(060) and (MPT=Math Placement Test score of 24; MPAL=Math Placement Test-ALEKS score of $60 \%$ )
MTH 245. *MATHEMATICS FOR MANAGEMENT, LIFE, AND SOCIAL SCIENCES (4). Techniques of counting, probability and elements of statistics including binomial and normal distributions. Introductory matrix algebra. Elements of linear programming. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C - or better. (Bacc Core Course) PREREQS: MTH 111 [C-] or Placement Test MPT(24) or Placement Test

MPAL(060) and (MPT=Math Placement Test score of 24; MPAL=Math Placement Test-ALEKS score of 60\%)

MTH 251. *DIFFERENTIAL CALCULUS (4).
Differential calculus for engineers and scientists.
Rates of change: the derivative, velocity, and acceleration. The algebraic rules of differential calculus and derivatives of polynomial, rational, and trigonometric functions. Maximum-minimum problems, curve sketching, and other applications. Antiderivatives and simple motion problems. Lec/ rec. All courses used to satisfy MTH prerequisites must be completed with a C- or better. (Bacc Core Course) PREREQS: MTH 112 [C-] or Placement Test MPT(33) or Placement Test MPAL(075) and (MPT=Math Placement Test score of 33; MPAL=Math Placement Test-ALEKS score of 75\%)

MTH 251H. *DIFFERENTIAL CALCULUS (4).
Differential calculus for engineers and scientists. Rates of change: the derivative, velocity, and acceleration. The algebraic rules of differential calculus and derivatives of polynomial, rational, and trigonometric functions. Maximum-minimum problems, curve sketching, and other applications. Antiderivatives and simple motion problems. Lec/ rec. All courses used to satisfy MTH prerequisites must be completed with C - or better. (Bacc Core Course) PREREQS: MTH 112 [C-] or Placement Test MPT(33) or Placement Test MPAL(075) and (MPT=Math Placement Test score of 33; MPAL=Math Placement Test-ALEKS score of $75 \%)$. Honors College approval required.

MTH 252. INTEGRAL CALCULUS (4). Definite integrals, elementary applications to area, force, and work. Integral tables and basic techniques of integration, calculus of logarithmic and exponential functions, polar coordinates, applications to areas, volumes, force, work, and growth and decay problems. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C - or better. PREREQS: MTH 251 [C-] or MTH 251H [C-]

MTH 252H. INTEGRAL CALCULUS (4). Definite integrals, elementary applications to area, force, and work. Integral tables and basic techniques of integration, calculus of logarithmic and exponential functions, polar coordinates, applications to areas, volumes, force, work, and growth and decay problems. All courses used to satisfy MTH prerequisites must be completed with C - or better. PREREQS: MTH 251 [C-] or MTH 251H [C-] and Honors College approval required
MTH 253. INFINITE SERIES AND SEQUENCES
(4). Indeterminate forms. Improper integrals. Sequences and series, especially Taylor's formula and power series. Applications to numerical estimation with error analysis. Series with complex terms and the Euler identities. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 252 [C-] or MTH 252H [C-]

MTH 254. VECTOR CALCULUS I (4). Vectors, vector functions, and curves in two and three dimensions. Surfaces, partial derivatives, gradients, and directional derivatives. Multiple integrals in rectangular, polar, cylindrical, and spherical coordinates. Physical and geometric applications. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C - or better. PREREQS: MTH 252 [C-] or MTH 252H [C-]
MTH 254H. VECTOR CALCULUS I (4). Vectors, vector functions, and curves in two and three dimensions. Surfaces, partial derivatives, gradients, and directional derivatives. Multiple integrals in rectangular, polar, cylindrical, and spherical coordinates. Physical and geometric applications. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C - or better. PREREQS: MTH 252 [C-] or MTH 252H [C-] and Honors College approval required.
MTH 255. VECTOR CALCULUS II (4). Brief review of vector functions, space curves,
gradients, and directional derivatives. Introduction to vector analysis: vector fields, divergence, curl, line integrals, surface integrals, conservative fields, and the theorems of Gauss and Stokes with applications to force, work, mass, and charge. Lec/ rec. All courses used to satisfy MTH prerequisites must be completed with C - or better. PREREQS: MTH 254 [C-] or MTH 254H [C-]

MTH 255H. VECTOR CALCULUS II (4). Brief review of vector functions, space curves, gradients, and directional derivatives. Introduction to vector analysis: vector fields, divergence, curl, line integrals, surface integrals, conservative fields, and the theorems of Gauss and Stokes with applications to force, work, mass, and charge. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 254 [C-] or MTH 254H [C-] and Honors College approval required

## MTH 256. APPLIED DIFFERENTIAL

EQUATIONS (4). First order linear and nonlinear equations, and second order linear equations. Applications to electric circuits and mechanical oscillators. Introduction to the Laplace transform and higher order equations. Solution methods and applications appropriate for science and engineering. (Familiarity with complex numbers and Euler's identities is highly desirable.) Lec/ rec. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 254 [C-] or MTH 254H [C-] and /or instructor approval required.

## MTH 256H. APPLIED DIFFERENTIAL

EQUATIONS (4). First order linear and nonlinear equations, and second order linear equations. Applications to electric circuits and mechanical oscillators. Introduction to the Laplace transform and higher order equations. Solution methods and applications appropriate for science and engineering. (Familiarity with complex numbers and Euler's identities is highly desirable.) All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 254 [C-] or MTH 254H [C-] and /or instructor approval required. Honors College approval required.
MTH 268. MATHEMATICAL IDEAS IN BIOLOGY
(4). Mathematical models of biological systems, with emphasis on population dynamics and ecology. Integral calculus with applications to biology. All courses used to satisfy MTH prerequisites must be completed with C - or better. PREREQS: MTH 251 [D-] or MTH 251H [D-]

MTH 299. SPECIAL TOPICS (0-16). Maximum 3 credits per term, 9 credits total. This course is repeatable for a maximum of 9 credits

## MTH 306. MATRIX AND POWER SERIES

METHODS (4). Introduction to matrix algebra, determinants, systematic solution to linear systems, and eigenvalue problems. Convergence and divergence of series with emphasis on power series, Taylor series expansions, convergence tests for power series, and error estimates for truncated series used in practical approximations. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C - or better. PREREQS: MTH 252 [C-] or MTH 252H [C-]

MTH 306H. MATRIX AND POWER SERIES METHODS (4). Introduction to matrix algebra, determinants, systematic solution to linear systems, and eigenvalue problems. Convergence and divergence of series with emphasis on power series, Taylor series expansions, convergence tests for power series, and error estimates for truncated series used in practical approximations. Lec/rec. All courses used to satisfy MTH prerequisites must be completed with C - or better. PREREQS: MTH 252 [C-] or MTH 252H [C-] and Honors College approval required

MTH 311. ADVANCED CALCULUS (4). Rigorous development of calculus, axiomatic properties of R, topology of the real line, convergence of sequences and series of real numbers, functions, limits of functions, basic properties of continuity
and derivatives. Brief treatment of Riemann integration, improper integrals, sequences of functions, pointwise and uniform convergence, introductory aspects of multivariable calculus. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: (MTH 255 [C-] or MTH 255H [C-] ) and MTH 355 [C-]

MTH 312. ADVANCED CALCULUS (4). Rigorous development of calculus, axiomatic properties of R, topology of the real line, convergence of sequences and series of real numbers, functions, limits of functions, basic properties of continuity and derivatives. Brief treatment of Riemann integration, improper integrals, sequences of functions, pointwise and uniform convergence, introductory aspects of multivariable calculus. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 311 [C-] and MTH 342* [C-]

MTH 321. INTRODUCTORY APPLICATIONS OF MATHEMATICAL SOFTWARE (3). An introduction to select mathematical software packages to support problem solving and applications. Topics include using computational resources to solve basic numerical and symbolic problems in mathematics, visualization and presentation of data, creation of simple programming scripts, and applications of basic programming techniques to promote mathematical understanding. The scientific typesetting language LaTeX will also be covered. All courses used to satisfy MTH prerequisites must be completed with a C- or better. PREREQS: (MTH 252 [C-] or MTH 252 H [C-] ) and (MTH 341 [C-] or MTH 306 [C-] or MTH 306H [C-] )

MTH 323. ^MATHEMATICAL MODELING (3). A variety of mathematical modeling techniques will be introduced. Students will formulate models in response to practical problems drawn from the literature of ecology, environmental sciences, engineering or other fields. Informal writing assignments in class and formal written presentation of the models will be required. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Writing Intensive Course) PREREQS: (MTH 256 [C-] or MTH 256 H [C-] ) and MTH 341 [C-] and /or instructor approval.

MTH 333. ^FUNDAMENTAL CONCEPTS OF TOPOLOGY (3). Open and closed sets, continuity compactness, connectedness, winding number, fixed point theorems in the plane. All courses used to satisfy MTH prerequisites must be completed with C- or better. (Writing Intensive Course) PREREQS: MTH 341 [C-] or MTH 355 [C-]

## MTH 338. ^NON-EUCLIDEAN GEOMETRY

(3). Introduction to non-Euclidean geometries. Selected topics such as hyperbolic and elliptic geometry, spherical geometry, projective geometry, geometries arising from alternative metrics. All courses used to satisfy MTH prerequisites must be completed with C - or better. (Writing Intensive Course) PREREQS: MTH 252 [C-] or MTH 252H [C-]
MTH 341. LINEAR ALGEBRA I (3). Matrix
algebra, determinants, systems of linear equations, subspaces, an introductory study of eigenvalues and eigenvectors.All courses used to satisfy MTH prerequisites must be completed with C- or better PREREQS: MTH 254 [C-] or MTH 254H [C-]
MTH 342. LINEAR ALGEBRA II (4). Abstract (real or complex) vector spaces, linear transformations, inner product spaces, orthogonality, eigenspaces and diagonalization, spectral theorems, singular value decomposition. All courses used to satisfy MTH prerequisites must be completed with C - or better. PREREQS: MTH 341 [C-]

## MTH 343. INTRODUCTION TO MODERN

ALGEBRA (3). Introduction to rings and fields with an emphasis on the integers and polynomial rings; selected applications. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 341 [C-] and MTH

355 [C-]
MTH 351. INTRODUCTION TO NUMERICAL
ANALYSIS (3). Introduction to the computation of approximate solutions to mathematical problems that cannot be solved by hand: analysis of errors; rootfinding for nonlinear equations in one variable; interpolation of functions; numerical integration. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: (MTH 253 [C-] or MTH 306 [C-] or MTH 306H [C-] ) and programming experience.
MTH 355. DISCRETE MATHEMATICS (3).
Proof analysis and development in the context of discrete mathematics for math majors transitioning to upper-division course work. Topics include elementary logic and set theory, quantifiers, basic counting principles, elementary combinatorics, equivalence relations, the binomial theorem, and mathematical induction. Additional topics may include recurrence relations, generating functions, and introductory graph theory. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 253 [C-] and MTH 341 recommended.
MTH 361. INTRODUCTION TO PROBABILITY
(3). Probability problem solving using concepts developed in calculus. Topics include probability models, discrete and continuous random variables, expectation and variance, the law of large numbers, and the central limit theorem. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 253 [C-] or MTH 306 [C-] or MTH 306H [C-]

## MTH 390. FOUNDATIONS OF ELEMENTARY

 MATHEMATICS (4). Measurement, congruence, similarity, coordinate and transformational geometry. All courses used to satisfy MTH prerequisites must be completed with C - or better. PREREQS: MTH 212 [C-]MTH 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
MTH 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
MTH 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

MTH 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

MTH 405. READING AND CONFERENCE (116). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
MTH 406. PROJECTS (1-3). Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

MTH 407. SEMINAR (3). This course is repeatable for a maximum of 99 credits. PREREQS: Departmental approval required

MTH 410. OCCUPATIONAL INTERNSHIP
(3-12). Planned and supervised training experience at selected government, industrial, or business placement sites. Must be followed by a one-hour post-internship seminar. Consult departmental head advisor. Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Junior standing in mathematics, cumulative 3.00 GPA in mathematics, head advisor/departmental approval required.
MTH 411. REAL ANALYSIS (3). Topological concepts in metric, normed, and inner-product spaces. Properties of continuous functions, including the Stone-Weierstrass theorem. Introduction to function spaces, contraction mappings, fixed points, and applications. Lebesgue measure and integration in one and several variables, basic convergence theorems, Lebesgue spaces, Fubini's theorem, and applications to Fourier transforms and probability.

All courses used to satisfy MTH 411 prerequisites must be completed with $\mathrm{B}+$ or better. PREREQS: MTH 312 [B+] and MTH 341 [B+]
MTH 412. REAL ANALYSIS (3). Topological concepts in metric, normed, and inner-product spaces. Properties of continuous functions, including the Stone-Weierstrass theorem. Introduction to function spaces, contraction mappings, fixed points, and applications Lebesgue measure and integration in one and several variables, basic convergence theorems, Lebesgue spaces, Fubini's theorem, and applications to Fourier transforms and probability. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 411 [C-] or MTH 511 [C-]
MTH 413. REAL ANALYSIS (3). Topological concepts in metric, normed, and inner-product spaces. Properties of continuous functions, including the Stone-Weierstrass theorem. Introduction to function spaces, contraction mappings, fixed points, and applications. Lebesgue measure and integration in one and several variables, basic convergence theorems, Lebesgue spaces, Fubini's theorem, and applications to Fourier transforms and probability. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 412 [C-] or MTH 512 [C-]

## MTH 420. MODELS AND METHODS OF

 APPLIED MATHEMATICS (3). Discrete and continuous mathematical models and methods for analysis, including linear analysis, equilibrium and minimum principles, calculus of variations, principal component analysis and orthogonal expansions, asymptotic and Fourier analysis, least squares, constrained and unconstrained optimization, inverse problems, and Monte Carlo techniques. Particular models and methods covered may vary annually. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: (MTH 256 [C-] or MTH 256H [C-] ) and MTH 341 [C-] and junior standing or above.MTH 427. INTRODUCTION TO MATHEMATICAL BIOLOGY (3). Modeling and mathematical analysis of biological processes using first principles at scales ranging from the molecular to the population level. Deterministic models are studied in both discrete and continuous time and analyzed using linearization principles, linear and nonlinear stability techniques, phase plane methods, and methods from partial differential equations. Results obtained from mathematical analysis will be qualitatively interpreted and applied to the biological process under investigation. All courses used to satisfy MTH prerequisites must be completed with a C - or better. PREREQS: (MTH 256 [C-] or MTH 256H [C-] ) and MTH 341 [C-]

## MTH 428. STOCHASTIC ELEMENTS IN

 MATHEMATICAL BIOLOGY (3). An introduction to stochastic modeling of biological processes. The stochastic models covered may include Markov processes in both continuous and discrete time, urn models, branching processes, and coalescent processes. The biological applications may include genetic drift, population dynamics, genealogy, demography, and epidemiology. Mathematical results will be qualitatively interpreted and applied to the biological process under investigation. PREREQS: MTH 341 [C] and (MTH 361 [C] or MTH 463 [C] or MTH 563 [C] )MTH 430. METRIC SPACES AND TOPOLOGY (3). Fundamental notions of metric space topology. Examples of Euclidean, non-Euclidean and other fundamental metric spaces including the Hilbert Cube and two-dimensional surfaces Characterization and classification results for metric spaces. Selected applications of topology, possibly including the structure of molecules and/ or networks. All courses used to satisfy MTH prerequisites must be completed with C - or better. PREREQS: MTH 342 [C-] or MTH 355 [C-] and /or instructor approval. MTH 311 is recommended.

MTH 434. INTRODUCTION TO DIFFERENTIAL
GEOMETRY (3). Curves and surfaces in Euclidean space; geodesics; curvature; introduction to tensor algebra and differential forms; selected applications. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: (MTH 255 [C-] or MTH 255H [C-] ) and MTH 342 [C-] and (MTH 311 recommended)
MTH 435. DIFFERENTIAL GEOMETRY (3).
Differentiable 2-manifolds; curvature; geodesics; tensor algebra and the algebra of exterior differential forms with emphasis on Euclidean space; differentiation of tensors and forms; integration of forms; selected applications. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 434 [C-] or MTH 534 [C-] and /or instructor approval required.

MTH 437. GENERAL RELATIVITY (3). Geometry of special relativity. Tensor analysis, metrics, geodesics, curvature. Einstein field equations, cosmological models, black holes. Selected topics such as global structure, conserved quantities, spinors. All courses used to satisfy MTH prerequisites must be completed with C - or better. PREREQS: (MTH 434 [C-] or MTH 534 [C-] ) and MTH 311 is recommended.
MTH 440. COMPUTATIONAL NUMBER THEORY
(3). Development of the number theory used in some basic tests of primality and methods of factoring integers. Applications to cryptology. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 231 [C-] or MTH 343 [C-] or MTH 355 [C-]
MTH 441. APPLIED AND COMPUTATIONAL
ALGEBRA (3). Applications of fundamental
algebraic systems to topics such as factorization of polynomials, finding roots of polynomials, error correcting codes. All courses used to satisfy MTH prerequisites must be completed with C - or better. PREREQS: MTH 343 [C-] and (MTH 342 [C-] or MTH 440 [C-] or MTH 540 [C-] ) and /or instructor approval required.

MTH 442. APPLIED AND COMPUTATIONAL ALGEBRA (3). Applications of fundamental algebraic systems to topics such as factorization of polynomials, finding roots of polynomials, error correcting codes. All courses used to satisfy MTH prerequisites must be completed with C - or better. PREREQS: MTH 441 [C-] or MTH 541 [C-] and /or instructor approval required.
MTH 443. ABSTRACT LINEAR ALGEBRA (3).
Abstract vector spaces. Linear transformations, eigenvalues and eigenvectors, the Jordan canonical form, inner product spaces. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 342 [C-] or MTH 343 [C-]

## MTH 451. NUMERICAL LINEAR ALGEBRA

(3). Computation of solutions of linear systems using direct and iterative methods; least-squares solution of overdetermined systems; computation of eigenvalues and eigenvectors. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 341 [C-] and programming experience or instructor approval required. MTH 342 and MTH 351 are recommended.

MTH 452. NUMERICAL SOLUTION OF ORDINARY DIFFERENTIAL EQUATIONS (3).
Numerical solution of initial-value problems using Runge-Kutta methods and linear multistep methods; introduction to boundary-value problems Analysis of stability, accuracy, and implementation of methods. All courses used to satisfy MTH prerequisites must be completed with C - or better. PREREQS: (MTH 256 [C-] or MTH 256H [C-] ) and (MTH 306 [C-] or MTH 306H [C-] or MTH 341 [C-] ) and programming experience required and junior standing required. MTH 351 or MTH 451 or MTH 551 recommended.

MTH 453. NUMERICAL SOLUTION OF PARTIAL DIFFERENTIAL EQUATIONS (3). Numerical solution of boundary value problems and initialboundary value problems using finite difference and finite element methods. Analysis of stability, accuracy, and implementation of methods. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 452 [C-] or MTH 552 [C-] and /or instructor approval required.
MTH 463. PROBABILITY I (3). An introduction to probability theory; topics covered include: the axioms of probability, probability spaces and models, independence, random variables; densities, distributions, expectation, and variance; probability inequalities, the law of large numbers, and the binomial central limit theorem. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 312 [C-] and /or instructor approval required.
MTH 464. PROBABILITY II (3). Transformations of random variables; sums of independent random variables, generating functions, characteristic functions, the central limit theorem and other weak limit theorems. All courses used to satisfy MTH prerequisites must be completed with C - or better. PREREQS: (MTH 463 [C-] or MTH 563 [C-] ) and MTH 341 [C-] and /or instructor approval required.
MTH 465. PROBABILITY III (3). Random variables, central limit theorem; distributions of standard statistics; Markov chains, continuous and discontinuous stochastic processes. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 464 [C-] or MTH 564 [C-] and /or instructor approval required.
MTH 467. ACTUARIAL MATHEMATICS (3). Foundations of actuarial science from the point of view of mathematical models that arise in the design and management of insurance systems. Most models will be life insurance based. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 463 [C-] or MTH 563 [C-] or ST 421 [C-] and /or instructor approval required.
MTH 480. SYSTEMS OF ORDINARY
DIFFERENTIAL EQUATIONS (3). Systems of two first-order differential equations, phase portraits, linearization and the stability of equilibria, conservative systems, reversible systems, limit cycles and the Poincare-Bendixson Theorem. Additional topics selected from Hamiltonian systems, Hopf bifurcation or Lorenz equations and chaos. MTH 480 and MTH 481 cannot both be taken for credit. All courses used to satisfy MTH prerequisites must be completed with C - or better. PREREQS: (MTH 256 [C-] or MTH 256 H [C-] ) and MTH 341 [C-]
MTH 481. APPLIED ORDINARY DIFFERENTIAL EQUATIONS (3). Linear and nonlinear systems of ordinary differential equations, elementary stability theory, higher order equations, boundary value problems, series solution of ordinary differential equations. All courses used to satisfy MTH prerequisites must be completed with a C - or better. PREREQS: (MTH 256 [C-] or MTH 256H [C-] ) and (((MTH 253 [C-] or MTH 253H [C-]) and MTH 341 [C-] ) or (MTH 306 [C-] or MTH 306H [C-] ))

## MTH 482. APPLIED PARTIAL DIFFERENTIAL

EQUATIONS (3). Partial differential equations,
Bessel's and Legendre's equations, Fourier analysis, separation of variables, transform methods. All courses used to satisfy MTH prerequisites must be completed with a C - or better. PREREQS: MTH 480 [C-] or MTH 481 [C-] or MTH 581 [C-] and /or instructor approval required.
MTH 483. COMPLEX VARIABLES (3).
Introduction to the complex differential and integral calculus: Cauchy's theorem and formula, the residue calculus, power series and Laurent series, harmonic functions, conformal mapping, and applications. All courses used to satisfy MTH
prerequisites must be completed with a C- or better. PREREQS: (MTH 256 [C-] or MTH 256H [C-] ) and (MTH 253 [C-] or MTH 306 [C-] or MTH 306 H [C-] )

## MTH 490. INTENSIVE SUMMER RESEARCH IN

MATHEMATICS (12). Combination of seminar, lectures, and individual research projects designed to introduce students to research mathematics This course is repeatable for a maximum of 99 credits. PREREQS: Open to participants in the OSU Undergraduate Summer Research Program in Mathematics (REU program).

## MTH 491. ALGEBRA AND GEOMETRIC

TRANSFORMATIONS (3). Ordered fields, number systems (natural, integer, rational, real, and complex), fundamental theorems of arithmetic and algebra, algebraic and transcendental numbers, constructible points and numbers and the classical geometric constructions, Polya's problem solving heuristics and strategies. Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 341 [C-]
MTH 492. ALGEBRA AND GEOMETRIC
TRANSFORMATIONS (3). Major results of Euclidean geometry, axiom systems for Euclidean geometry, dependency tree of Euclidean theorems, groups of geometric transformations with applications to symmetries of plane and solid objects, Euler's formula, tilings and tesselations, isometries and similitudes of the plane (translations, rotations, reflections, glide reflections, dilations). Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C- or better. PREREQS: MTH 491 [C-] or MTH 591 [C-]

## MTH 493. ALGEBRA AND GEOMETRIC

TRANSFORMATIONS (3). Geometric
transformations as real, complex, and matrix functions, invariants and genealogy of geometric transformations, extensions to transformations of the sphere and of three-dimensional space, selected applications chosen from fractals, analysis of frieze and crystallographic patterns, problem solving, groups of symmetries, computer graphics, and the use of dynamic geometry software. Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C - or better. PREREQS: MTH 492 [C-] or MTH 592 [C-]
MTH 499. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

MTH 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

MTH 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.
MTH 505. READING AND CONFERENCE (1-
16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
MTH 506. PROJECTS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

MTH 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
MTH 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
MTH 510. OCCUPATIONAL INTERNSHIP (3-12). Planned and supervised training experience at selected government, industrial, or business placement sites. Must be followed by a one-hour post-internship seminar. Consult departmental head advisor. Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

MTH 511. REAL ANALYSIS (3). Topological concepts in metric, normed, and inner-product spaces. Properties of continuous functions, including the Stone-Weierstrass theorem. Introduction to function spaces, contraction mappings, fixed points, and applications Lebesgue measure and integration in one and several variables, basic convergence theorems, Lebesgue spaces, Fubini's theorem, and applications to Fourier transforms and probability. All courses used to satisfy MTH prerequisites must be completed with B+ or better. PREREQS: MTH 312 and MTH 341

MTH 512. REAL ANALYSIS (3). Topological concepts in metric, normed, and inner-product spaces. Properties of continuous functions, including the Stone-Weierstrass theorem. Introduction to function spaces, contraction mappings, fixed points, and applications. Lebesgue measure and integration in one and several variables, basic convergence theorems, Lebesgue spaces, Fubini's theorem, and applications to Fourier transforms and probability. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 411 or MTH 511
MTH 513. REAL ANALYSIS (3). Topological concepts in metric, normed, and inner-product spaces. Properties of continuous functions, including Stone-Weierstrass theorem. Introduction to function spaces, contraction mappings, fixed points, and applications. Lebesgue measure and integration in one and several variables, basic convergence theorems, Lebesgue spaces, Fubini's theorem, and applications to Fourier transforms and probability. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 412 or MTH 512
MTH 520. MODELS AND METHODS OF APPLIED MATHEMATICS (3). Discrete and continuous mathematical models and methods for analysis, including linear analysis, equilibrium and minimum principles, calculus of variations, principal component analysis and orthogonal expansions, asymptotic and Fourier analysis, least squares, constrained and unconstrained optimization, inverse problems, and Monte Carlo techniques. Particular models and methods covered may vary annually. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: (MTH 256 or MTH 256H) and MTH 341 and junior standing or above.
MTH 524. DYNAMICAL SYSTEMS THEORY AND APPLICATIONS (3). Theory, models, and problems for discrete and/or continuous dynamical systems. Depending on term, the emphasis may be toward deterministic or stochastic systems. Topics generally include stability theory, periodic behavior, and chaotic systems. Models selected from biology, economics, fluid dynamics, and electrical and mechanical systems. May be repeated once for credit with a different topic. All courses used to satisfy MTH prerequisites must be completed with C or better. This course is repeatable for a maximum of 6 credits. PREREQS: MTH 341-MTH 342, MTH 311-MTH 312, MTH 361 or consent of instructor.
MTH 525. DYNAMICAL SYSTEMS THEORY AND APPLICATIONS (3). Theory, models, and problems for discrete and/or continuous dynamical systems. Depending on term, the emphasis may be toward deterministic or stochastic systems. Topics generally include stability theory, periodic behavior, and chaotic systems. Models selected from biology, economics, fluid dynamics, and electrical and mechanical systems. May be repeated once for credit with a different topic. All courses used to satisfy MTH prerequisites must be completed with C or better. This course is repeatable for a maximum of 6 credits. PREREQS: MTH 341 and MTH 342 and MTH 311 and MTH 312 and MTH 361 or consent of instructor.
MTH 527. INTRODUCTION TO MATHEMATICAL BIOLOGY (3). Modeling and mathematical analysis of biological processes using first
principles at scales ranging from the molecular to the population level. Deterministic models are studied in both discrete and continuous time and analyzed using linearization principles, linear and nonlinear stability techniques, phase plane methods, and methods from partial differential equations. Results obtained from mathematical analysis will be qualitatively interpreted and applied to the biological process under investigation. All courses used to satisfy MTH prerequisites must be completed with a C or better. PREREQS: (MTH 256 or MTH 256H) and MTH 341

## MTH 528. STOCHASTIC ELEMENTS IN

MATHEMATICAL BIOLOGY (3). An introduction to stochastic modeling of biological processes. The stochastic models covered may include Markov processes in both continuous and discrete time, urn models, branching processes, and coalescent processes. The biological applications may include genetic drift, population dynamics, genealogy, demography, and epidemiology. Mathematical results will be qualitatively interpreted and applied to the biological process under investigation. All courses used to satisfy MTH prerequisites must be completed with a C or better. PREREQS: MTH 341 and (MTH 361 or MTH 463 or MTH 563)

## MTH 531. GENERAL TOPOLOGY AND

 FUNDAMENTAL GROUPS (3). Topological spaces and maps. Separation axioms, compactness, convergence, extension theorems, metrizability and compactification. Product spaces and simplicial complexes. Definition and basic properties of the fundamental group functor, with applications to the theory of covering spaces. Selected topics from dimension theory, manifold theory, and other areas of topology. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 531 and MTH 532 must be taken in order.MTH 532. GENERAL TOPOLOGY AND FUNDAMENTAL GROUPS (3). Topological spaces and maps. Separation axioms, compactness, convergence, extension theorems, metrizability and compactification. Product spaces and simplicial complexes. Definition and basic properties of the fundamental group functor, with applications to the theory of covering spaces Selected topics from dimension theory, manifold theory, and other areas of topology. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 531 and MTH 532 must be taken in order.

MTH 534. INTRODUCTION TO DIFFERENTIAL
GEOMETRY (3). Curves and surfaces in Euclidean space; geodesics; curvature; introduction to tensor algebra and differential forms; selected applications. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: (MTH 255 or MTH 255H) and MTH 342 and (MTH 311 recommended)
MTH 535. DIFFERENTIAL GEOMETRY (3). Differentiable 2-manifolds; curvature; geodesics; tensor algebra and the algebra of exterior differential forms with emphasis on Euclidean space; differentiation of tensors and forms; integration of forms; selected applications. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: (MTH 434 or MTH 534) or instructor approval required.

MTH 537. GENERAL RELATIVITY (3). Geometry of special relativity. Tensor analysis, metrics, geodesics, curvature. Einstein field equations, cosmological models, black holes. Selected topics such as global structure, conserved quantities, spinors. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 434 [C] or MTH 534 [C] and MTH 311 is recommended.
MTH 540. COMPUTATIONAL NUMBER THEORY (3). Development of the number theory used in some basic tests of primality and methods of factoring integers. Applications to cryptology. All courses used to satisfy MTH prerequisites must
be completed with C or better. PREREQS: MTH 231 or MTH 343 or MTH 355

## MTH 541. APPLIED AND COMPUTATIONAL

ALGEBRA (3). Applications of fundamental algebraic systems to topics such as factorization of polynomials, finding roots of polynomials, error correcting codes. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 343 and (MTH 342 or MTH 440 or MTH 540) or instructor approval required.
MTH 542. APPLIED AND COMPUTATIONAL
ALGEBRA (3). Applications of fundamental algebraic systems to topics such as factorization of polynomials, finding roots of polynomials, error correcting codes. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: (MTH 441 or MTH 541) or instructor approval required.
MTH 543. ABSTRACT LINEAR ALGEBRA (3). Abstract vector spaces. Linear transformations, eigenvalues and eigenvectors, the Jordan canonical form, inner product spaces. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 342 and MTH 343
MTH 551. NUMERICAL LINEAR ALGEBRA
(3). Computation of solutions of linear systems using direct and iterative methods; least-squares solution of overdetermined systems; computation of eigenvalues and eigenvectors. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 341 and programming experience or instructor approval required. MTH 342 and MTH 351 are recommended.

## MTH 552. NUMERICAL SOLUTION OF

ORDINARY DIFFERENTIAL EQUATIONS (3).
Numerical solution of initial-value problems using Runge-Kutta methods and linear multistep methods; introduction to boundary-value problems Analysis of stability, accuracy, and implementation of methods. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: (MTH 256 or MTH 256H) and (MTH 306 or MTH 306H or MTH 341) and programming experience required and junior standing required. MTH 351 or MTH 451 or MTH 551 recommended.
MTH 553. NUMERICAL SOLUTION OF PARTIAL DIFFERENTIAL EQUATIONS (3). Numerical solution of boundary value problems and initialboundary value problems using finite difference and finite element methods. Analysis of stability, accuracy, and implementation of methods. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: (MTH 452 or MTH 552) or instructor approval required.
MTH 563. PROBABILITY I (3). An introduction to probability theory; topics covered include: the axioms of probability, probability spaces and models, independence, random variables; densities, distributions, expectation, and variance; probability inequalities, the law of large numbers, and the binomial central limit theorem. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 312 or instructor approval required.
MTH 564. PROBABILITY II (3). Transformations of random variables; sums of independent random variables, generating functions, characteristic functions, the central limit theorem and other weak limit theorems. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: (MTH 463 or MTH 563) and MTH 341 or instructor approval required.
MTH 565. PROBABILITY III (3). Random variables, central limit theorem; distributions of standard statistics; Markov chains, continuous and discontinuous stochastic processes. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: (MTH 464 or MTH 564) or instructor approval required.
MTH 567. ACTUARIAL MATHEMATICS (3).
Foundations of actuarial science from the point
of view of mathematical models that arise in the design and management of insurance systems. Most models will be life insurance based. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: (MTH 463 or MTH 563) or ST 421.

## MTH 574. NUMBER SYSTEMS AND

OPERATIONS IN K-8 MATHEMATICS (3).
Key ideas and topics in number systems, operations, place value, and algorithms critical for the mathematics content knowledge of elementary teachers in grades K-8. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 390 or instructor approval required.
MTH 575. COMPARING GEOMETRIES IN
K-8 MATHEMATICS (3). Key ideas and topics in Euclidean and non-Euclidean geometries critical for the mathematics content knowledge of elementary teachers in grades K-8. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 390 or instructor approval required.
MTH 576. ALGEBRA AND FUNCTION IN
K-8 MATHEMATICS (3). Key ideas and topics in algebra and function concepts critical for the mathematics content knowledge of elementary teachers in grades K-8. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 390 or instructor approval required.
MTH 578. PROBABILITY AND DATA ANALYSIS IN K-8 MATHEMATICS (3). Key ideas and topics in probability, data analysis, and statistics critical for the mathematics content knowledge of elementary teachers in grades K-8. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 390 or instructor approval required.
MTH 581. APPLIED ORDINARY DIFFERENTIAL EQUATIONS (3). Linear and nonlinear systems of ordinary differential equations, elementary stability theory, higher order equations, boundary value problems, series solution of ordinary differential equations. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: (MTH 256 or MTH 256H) and (((MTH 253 or MTH 253H) and MTH 341) or (MTH 306 or MTH 306H))
MTH 582. APPLIED PARTIAL DIFFERENTIAL
EQUATIONS (3). Partial differential equations, Bessel's and Legendre's equations, Fourier analysis, separation of variables, transform methods. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 480 or MTH 481 or MTH 581 or instructor approval required.
MTH 583. COMPLEX VARIABLES (3).
Introduction to the complex differential and integral calculus: Cuachy's theorem and formula, the residue calculus, power series and Laurent series, harmonic functions, conformal mapping, and applications. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: (MTH 256 or MTH 256H) and (MTH 253 or MTH 306 or MTH 306H)

## MTH 590. TOPICS IN SECONDARY

MATHEMATICS (3). Key ideas and topics in discrete mathematics critical for the mathematics content knowledge of middle and high school teachers in grades 6-12. Based on the recommendations of The Mathematical Education
of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 390 or instructor approval required.

## MTH 591. ALGEBRA AND GEOMETRIC

TRANSFORMATIONS (3). Ordered fields, number systems (natural, integer, rational, real, and complex), fundamental theorems of arithmetic and algebra, algebraic and transcendental numbers, constructible points and numbers and the classical geometric constructions, Polya's problem solving heuristics and strategies. Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 341

## MTH 592. ALGEBRA AND GEOMETRIC

TRANSFORMATIONS (3). Major results of Euclidean geometry, axiom systems for Euclidean geometry, dependency tree of Euclidean theorems, groups of geometric transformations with applications to symmetries of plane and solid objects, Euler's formula, tilings and tesselations, isometries and similitudes of the plane (translations, rotations, reflections, glide reflections, dilations). Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 491 or MTH 591
MTH 593. ALGEBRA AND GEOMETRIC TRANSFORMATIONS (3). Geometric transformations as real, complex, and matrix functions, invariants and genealogy of geometric transformations, extensions to transformations of the sphere and of three-dimensional space, selected applications chosen from fractals, analysis of frieze and crystallographic patterns, problem solving, groups of symmetries, computer graphics, and the use of dynamic geometry software. Intended primarily for prospective mathematics teachers. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 492 or MTH 592

## MTH 594. NUMBER SYSTEMS AND

OPERATIONS IN SECONDARY MATHEMATICS
(3). Key ideas and topics in number systems, operations, place value, and algorithms critical for the mathematics content knowledge of middle and high school teachers in grades 6-12. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 390 or instructor approval required.
MTH 595. COMPARING GEOMETRIES IN SECONDARY MATHEMATICS (3). Key ideas and topics in Euclidean and non-Euclidean geometries critical for the mathematics content knowledge of middle and high school teachers in grades 6-12. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 390 or instructor approval required.
MTH 596. ALGEBRA AND FUNCTION IN SECONDARY MATHEMATICS (3). Key ideas and topics in algebra and function concepts critical for the mathematics content knowledge of middle and high school teachers in grades 6-12. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 390 or instructor approval required.
MTH 598. PROBABILITY AND DATA ANALYSIS IN SECONDARY MATHEMATICS (3). Key ideas and topics in probability, data analysis, and statistics critical for the mathematics content knowledge of middle and high school teachers in grades 6-12. Based on the recommendations of

The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 390 or instructor approval required.
MTH 599. SPECIAL TOPICS (0-16). Topics may vary. This course is repeatable for a maximum of 18 credits. PREREQS: Instructor approval required.

MTH 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
MTH 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.
MTH 605. READING AND CONFERENCE (116). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

MTH 606. SPECIAL PROJECTS (1-16). Graded $\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
MTH 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
MTH 611. COMPLEX ANALYSIS (3). Basic theory of analytic functions of a complex variable, including Cauchy's theorem, residue theorem, analytic continuation, conformal mappings, entire, and meromorphic functions. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: (MTH 411 or MTH 511). MTH 611 and MTH 612 must be taken in order.

MTH 612. COMPLEX ANALYSIS (3). Basic
theory of analytic functions of a complex variable, including Cauchy's theorem, residue theorem, analytic continuation, conformal mappings, entire, and meromorphic functions. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 611

## MTH 614. FUNCTIONAL ANALYSIS (3).

Topological vector spaces, generalized functions, operator theory. Normally offered alternate years. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 513

MTH 619. TOPICS IN ANALYSIS (1-12). This course is repeatable for a maximum of 12 credits.

## MTH 621. PARTIAL DIFFERENTIAL

EQUATIONS (3). Partial differential equations of physics, including those of potential theory, wave propagation, and heat flow, treated by classical means, generalized functions and variational principles. Square summable function methods and integral equations. This course is the first in a year-long sequence of MTH 621, MTH 622, MTH 623. All courses used to satisfy MTH prerequisites must be completed with C or better. This course is repeatable for a maximum of 6 credits. PREREQS: 6 credits of senior-level analysis or instructor consent. MTH 621, MTH 622, MTH 623 must be taken in order.

## MTH 622. PARTIAL DIFFERENTIAL

EQUATIONS (3). Partial differential equations of physics, including those of potential theory, wave propagation, and heat flow, treated by classical means, generalized functions and variational principles. Square summable function methods and integral equations. This course is the first in a year-long sequence of MTH 621, MTH 622, MTH 623. All courses used to satisfy MTH prerequisites must be completed with C or better. This course is repeatable for a maximum of 6 credits. PREREQS: MTH 621 [C] and /or instructor consent.

## MTH 623. PARTIAL DIFFERENTIAL

EQUATIONS (3). Partial differential equations of physics, including those of potential theory, wave propagation, and heat flow, treated by classical means, generalized functions and variational principles. Square summable function methods
and integral equations. This course is the third one in year-long sequence. All courses used to satisfy MTH prerequisites must be completed with C or better. This course is repeatable for a maximum of 6 credits. PREREQS: MTH 621 [C] and MTH 622 [C] and /or instructor consent.
MTH 627. ADVANCED PARTIAL DIFFERENTIAL
EQUATIONS (3). Advanced theory including existence proofs and distributional approach Normally offered fall term in odd years. All courses used to satisfy MTH prerequisites must be completed with C or better. This course is repeatable for a maximum of 6 credits. PREREQS: MTH 413 or MTH 513 or instructor consent.

MTH 628. ADVANCED PARTIAL DIFFERENTIAL EQUATIONS (3). Advanced theory including existence proofs and distributional approach. Normally offered winter term in even years. All courses used to satisfy MTH prerequisites must be completed with C or better. This course is repeatable for a maximum of 6 credits. PREREQS: MTH 627 or consent of instructor.

MTH 634. ALGEBRAIC TOPOLOGY (3).
Simplicial and singular homology, products, and cohomology; applications to fixed-point and separation theorems. Topics selected from homotopy, manifold and obstruction theory. Normally offered alternate years. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 532. MTH 634, MTH 635, MTH 636 must be taken in order.
MTH 635. ALGEBRAIC TOPOLOGY (3).
Simplicial and singular homology, products, and cohomology; applications to fixed-point and separation theorems. Topics selected from homotopy, manifold and obstruction theory. Normally offered alternate years. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 532 and MTH 634
MTH 636. ALGEBRAIC TOPOLOGY (3).
Simplicial and singular homology, products, and cohomology; applications to fixed-point and separation theorems. Topics selected from homotopy, manifold and obstruction theory. Normally offered alternate years. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 532 and MTH 635
MTH 644. ABSTRACT ALGEBRA I (3). Group theory, rings and fields, Galois theory. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: Graduate standing in mathematics or a related field, or instructor approval required. MTH 443 or MTH 543 is recommended.
MTH 645. ABSTRACT ALGEBRA II (3).
Group theory, rings and fields, Galois theory. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: Graduate standing in mathematics or a related field, or instructor approval required. MTH 644 is recommended.
MTH 649. TOPICS IN ALGEBRA AND NUMBER
THEORY (3). This course is repeatable for a maximum of 27 credits.

MTH 654. NUMERICAL ANALYSIS (3). Advanced topics in numerical analysis, such as finite volume methods and finite element methods for partial differential equations, numerical methods for inverse problems, and image processing. All courses used to satisfy MTH prerequisites must be completed with C or better. This course is repeatable for a maximum of 12 credits. PREREQS: Familiarity with numerical methods and graduate standing, or instructor's consent. Course-specific prerequisites may be announced.

MTH 655. NUMERICAL ANALYSIS (3). Advanced topics in numerical analysis, such as finite volume methods and finite element methods for partial differential equations, numerical methods for inverse problems, and image processing. All courses used to satisfy MTH prerequisites
must be completed with C or better. This course is repeatable for a maximum of 12 credits. PREREQS: Familiarity with numerical methods and graduate standing, or instructor's consent. Course-specific prerequisites may be announced.
MTH 656. NUMERICAL ANALYSIS (3). Advanced topics in numerical analysis, such as finite volume methods and finite element methods for partial differential equations, numerical methods for inverse problems, and image processing. All courses used to satisfy MTH prerequisites must be completed with C or better. This course is repeatable for a maximum of 12 credits. PREREQS: Familiarity with numerical methods and graduate standing, or instructor's consent. Course-specific prerequisites may be announced.
MTH 657. TOPICS IN APPLIED MATHEMATICS
(1-12). Previous topics have included turbulence, financial mathematics and probability methods in partial differential equations. This course is repeatable for a maximum of 12 credits.

## MTH 658. TOPICS IN MATHEMATICAL

MODELING (1-12). Mathematical treatment of topics of current interest in the physical and biological sciences and technology. May be repeated for credit when topic varies. This course is repeatable for a maximum of 12 credits. PREREQS: Instructor approval required.

MTH 659. TOPICS IN NUMERICAL ANALYSIS (1-12). This course is repeatable for a maximum of 12 credits.
MTH 664. PROBABILITY THEORY (3).
General theory of probability measures and random variables, including weak convergence, characteristic functions, central limit theory, conditional expectations, martingales. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 411 or MTH 511 or equivalent.
MTH 665. PROBABILITY THEORY (3).
General theory of probability measures and random variables, including weak convergence, characteristic functions, the central limit theorem and the Brownian motion process. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 664
MTH 669. TOPICS IN STOCHASTIC
PROCESSES (1-12). Previous topics have included Markov processes, martingales, branching processes, and stochastic differential equations. This course is repeatable for a maximum of 12 credits.
MTH 674. DIFFERENTIAL GEOMETRY OF MANIFOLDS (3). Differentiable manifolds, tangent bundles, vector fields and flows, submanifolds, Riemannian metrics, differential forms, integration on manifolds. Selected topics such as foliations, Lie groups, and de Rham cohomology. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 341 and (MTH 411 or MTH 511). MTH 674 or MTH 675 must be taken in order.

## MTH 675. DIFFERENTIAL GEOMETRY OF

 MANIFOLDS (3). Differentiable manifolds, connections in linear bundles, Riemannian manifolds and submanifolds. Selected topics such as variational theory of geodesics, harmonic forms, and characteristic classes. Normally offered alternate years. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 674MTH 676. TOPICS IN TOPOLOGY (3). This course is repeatable for a maximum of 27 credits.
MTH 679. TOPICS IN GEOMETRY (1-12). This course is repeatable for a maximum of 12 credits.

## MTH 680. MODERN APPROACHES TO

CALCULUS (3). Alternative approaches to calculus instruction based on the availability of computers and calculators. Applications of symbolic-graphical calculators, spreadsheets, symbolic algebra systems, and graphics packages to the teaching of calculus. All courses used to
satisfy MTH prerequisites must be completed with C or better. PREREQS: MTH 253 and instructor approval required.

## MTH 682. TEACHING AND LEARNING

PROBABILITY AND STATISTICS (3).
Experimental, activity-based approaches to introductory probability and statistics are explored. Topics include computer simulations, exploratory data analysis, misuses of statistics, and misconceptions of probability. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: Instructor approval required.

MTH 684. COMPUTERS AND MATHEMATICS
(3). A variety of mathematical problems are investigated with a laboratory approach using microcomputers and a wide variety of software. Problems may be taken from number theory, calculus, geometry, probability, and elementary numerical analysis. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: Ability to program in either BASIC or PASCAL and instructor approval required.
MTH 685. ADVANCED PROBLEM SOLVING (3).
Mathematical problem solving using the heuristic approach of George Polya. Problems may be taken from a variety of areas, including number theory, calculus, geometry, probability, abstract and linear algebra. All courses used to satisfy MTH prerequisites must be completed with C or better. PREREQS: Instructor approval required.

MTH 689. TOPICS IN MATHEMATICS EDUCATION (1-12). Topics may vary. This course is repeatable for a maximum of 12 credits.
MTH 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## PHYSICS

Heidi Schellman, Head

## FACULTY

Professors Jansen, Lee, Manogue, McIntyre, Schellman, Tate
Associate Professors Giebultowicz, Lazzati, Minot, Ostroverkhova, Roundy, Schneider
Assistant Professors Gire, Graham, Qiu, Sun
Instructor Bannon, Coffin, Hadley, Ketter, Milstein, Walsh

## ADJUNCT FACULTY

Herman, Keszler, Kornilovich

## Undergraduate Major

Physics (BA, BS, CRED, HBA, HBS)

## Options

Applied Physics
Biological Physics
Chemical Physics
Computational Physics
Geophysics
Mathematical Physics
Optical Physics
Physics Teaching/Physics

## Minor

Physics

## Graduate Majors

Applied Physics (MS, PSM) [To be terminated pending approval.]
Physics (MA, MAIS, MS, PhD)
Graduate Areas of Concentration
Atomic Physics
Computational Physics
Nuclear Physics
Optical Physics
Particle Physics
Physics Education
Solid State Physics
Relativity

## Graduate Minor

Physics
Physics is the study of the fundamental structure of matter and the interactions of its constituents. Physicists are concerned with the development of concepts needed for a precise description of nature and with experiments to test such concepts.

For students of science and engineering, the study of physics provides the basic foundation needed to understand the
complex workings of the material world, from the forces that build atoms to those that build bridges. For students of the liberal arts, the study of physics provides an introduction to modern ideas about the most fundamental and elemental aspects of nature and how those ideas developed in their cultural and historical context. Physics is a basic and indispensable tool in all technical fields, and its development figures prominently in any discussion of the intellectual history of our civilization.

## UNDERGRADUATE DEGREE PROGRAMS

The department offers several programs leading to degrees in physics. A basic physics curriculum in the College of Science stresses the detailed and advanced preparation needed for graduate work or employment in physics.
Options are available within the physics degree program that prepare students for graduate work or employment in an allied field, such as applied physics, biophysics, chemical physics, geophysics, mathematical physics, optical physics, and physics teaching.

Other programs are offered that train students for careers in physics teaching. A Physics minor is available for students majoring in other areas of science and engineering.

The Department of Physics offers the upper-division curriculum, Paradigms in Physics. Many of the junior-year courses are taught in 2 -credit intensive modules, meeting seven hours a week for about three weeks.

## GRADUATE DEGREES

Graduate programs leading to the MA, MS, and PhD are offered, emphasizing theoretical or experimental studies in the areas of atomic physics, computational physics, nuclear physics, optical physics, particle physics, and solid state physics. The MS degree has both thesis and nonthesis options. Comprehensive written and oral examinations must be passed before the student can become a candidate for an advanced degree.

## CAREERS

A multitude of opportunities exists for students who complete undergraduate degrees in physics. They include employment in technological industries, including electronics, computers, optics, materials science, and aerospace; graduate study leading to an advanced degree in physics or a related area such as mathematics, Earth sciences, computer science, engineering, or astronomy; and degree programs leading to professions such as law or medicine, with specialties in areas in which a physics background is essential.

## PREPARATION

Recommended high school preparation for students who plan to major in physics includes one year each of chemistry and physics and four years of mathematics through analytic geometry. Mathematics preparation is especially important; students who are not ready to start calculus (MTH 251, *Differential Calculus) upon entering may be delayed in their progress toward a degree. Students anticipating transfer to OSU from another institution are encouraged to contact the Department of Physics as early as possible to discuss their placement in the course curricula.

## ADVISING

Each undergraduate student is assigned an advisor who helps select the most appropriate degree program and assists in planning the curriculum. Minor variations in the requirements for degrees are possible, but must be discussed with the advisor and approved at an early stage in curriculum planning. Near the end of the degree program, the advisor can help the student to apply for employment or admission to graduate programs.

## OPTIONS

Students desiring to combine the study of physics with that of another related subject should consider the options below, or should consult with a Department of Physics advisor about substituting upper-division work in a related field for certain of the upper-division physics requirements. All such substitutions must constitute a coherent program in related areas and must be approved in advance by the Department of Physics. In each case, the program must include at least 3 credits of PH 403, ^Thesis, to satisfy the university's writing intensive course (WIC) requirements.

## ASTRONOMY

The Department of Physics offers an introductory course, PH 104, *Descriptive Astronomy. Three online courses (PH 205, PH 206, PH 207) and several on-campus special topics courses also are offered. Students who desire careers in astronomy can design a curriculum under the Geophysics option, which includes related course work in geology and in atmospheric sciences. This curriculum would qualify the student for graduate work in astronomy.

## GRADUATION REQUIREMENTS

All undergraduate students must satisfy the university requirements for graduation (see the description of the OSU Baccalaureate Core in this catalog) and the college requirements (see the description in the College of Science section).

Grades of C- or better must be attained in all courses required for the Physics
major. Courses in which a lower grade is received must be repeated until a satisfactory grade is received.

## PHYSICS

(BA, BS, CRED, HBA, HBS)

## Required Courses

All physics majors must complete the following courses:
CH 231, CH 232, CH 233. *General Chemistry ( $4,4,4$ )
and CH 261, CH 262, CH 263.
*Laboratory for Chemistry 231, 232, 233 (1,1,1)
MTH 251. *Differential Calculus (4)
MTH 252. Integral Calculus (4)
MTH 253. Infinite Series and Sequences (4) or MTH 306. Matrix and Power Series Methods (4)
MTH 254. Vector Calculus I (4)
MTH 255. Vector Calculus II (4)
MTH 256. Applied Differential Equations (4)
MTH 341. Linear Algebra I (3)
PH 211, PH 212, PH 213. *General Physics with Calculus (4,4,4)
and PH 221, PH 222, PH 223. Recitations for PH 211, PH 212, PH 213 (1,1,1)
PH 315. Physics of Contemporary
Challenges (3)
PH 335. Techniques of Theoretical Mechanics (3)
PH 365, PH 356, PH 357. Computational Physics Lab $(1,1,1)$
PH 411. Electronics (3)
PH 422. Paradigms in Physics: Static Fields (3)

PH 423. Paradigms in Physics: Energy and Entropy (3)
PH 424. Paradigms in Physics: Oscillations and Waves (3)
PH 425. Paradigms in Physics: Quantum Fundamentals (3)
PH 426. Paradigms in Physics: Central Forces (3)
PH 427. Paradigms in Physics: Periodic Systems (3)
PH 401. Research (3)
PH 403. ^Thesis (3)

## Bachelor of Science in Physics

For graduation with a Bachelor of Science degree in Physics under the basic physics option, additional course requirements consist of:
PH 415. Computer Interfacing and Instrumentation (3)
or PH 464. Scientific Computing II (3)
PH 431. Capstones in Physics:
Electromagnetism (3)
PH 441. Capstones in Physics: Thermal and Statistical Physics (3)
PH 451. Capstones in Physics: Quantum Mechanics (3)
PH 481. Physical Optics (4)
And at least 6 additional credits chosen from among the non-blanket Physics courses at the 400 -level or beyond, or related courses in another department with the approval of the head undergraduate advisor.

## Bachelor of Arts in Physics

To graduate with a Bachelor of Arts degree
in Physics, additional course requirements consist of:

## Two courses chosen from:

PH 431. Capstones in Physics: Electromagnetism (3)
PH 441. Capstones in Physics: Thermal and Statistical Physics (3)
PH 451. Capstones in Physics: Quantum Mechanics (3)
In addition, the student must complete 9 credits of approved electives in the College of Liberal Arts and must complete or demonstrate proficiency in the second year of a foreign language.

Optical Physics Electives (15)
Plus 15 credits of approved upperdivision courses in physics or optics at the 400 level or beyond, including at least one laboratory course, which form a coherent set. At least 8 of these credits must be in optics.

## Footnotes:

* Baccalaureate Core Course (BCC)
${ }^{\wedge}$ Writing Intensive Course (WIC)
Option Code: 594

## PHYSICS TEACHING/PHYSICS

## OPTION

## Math (27)

MTH 251. *Differential Calculus (4)
MTH 252. Integral Calculus (4)
MTH 253. Infinite Series and Sequences (4) or MTH 306. Matrix and Power Series Methods (4)
MTH 254. Vector Calculus I (4)
MTH 255. Vector Calculus II (4)
MTH 256. Applied Differential Equations (4)
MTH 341. Linear Algebra I (3)

## Chemistry (15)

CH 231, CH 232, CH 233. *General
Chemistry ( $4,4,4$ )
and CH 261, CH 262, CH 263.
*Laboratory for Chemistry 231, 232, 233
(1,1,1)

## Physics Core (45)

PH 211, PH 212, PH 213. *General Physics with Calculus $(4,4,4)$
and PH 221, PH 222, PH 223. Recitation
for Physics 211, 212, 213 ( $1,1,1$ )
PH 315. Physics of Contemporary Challenges (3)
PH 335. Techniques of Theoretical Mechanics (3)
PH 365, PH 366, PH 367. Computational Physics Lab $(1,1,1)$
PH 411. Electronics (3)
PH 422. Paradigms in Physics: Static Fields (3)

PH 423. Paradigms in Physics: Energy and Entropy (3)
PH 424. Paradigms in Physics: Oscillations and Waves (3)
PH 425. Paradigms in Physics: Quantum Fundamentals (3)
PH 426. Paradigms in Physics: Central Forces (3)
PH 427. Paradigms in Physics: Periodic Systems (3)

## Senior-level Physics (15)

PH 401. Research (3)
PH 403. ${ }^{\wedge}$ Thesis (3)
Select two courses from below:
PH 431. Capstones in Physics:
Electromagnetism (3)
PH 441. Capstones in Physics: Thermal and Statistical Physics (3)
PH 451. Capstones in Physics: Quantum Mechanics (3)

## Physics Education Electives (15)

Plus 15 credits of approved upper-
division courses in physics or education at the 400 level or beyond, including at least one laboratory course, which form a coherent set. At least 8 of these credits must be in education.

## Total=117

## GRADUATE MAJORS

APPLIED PHYSICS (MS, PSM)
To be terminated pending approval of proposal 90296.
Janet Tate, Director
Department of Physics
301 Weniger Hall
Corvallis OR 97331
541-737-1700

Email: tate@physics.oregonstate.edu Website: http://psm.science.oregonstate. edu/

The worlds of science and business are increasingly interconnected, creating strong demand for individuals who can bridge these two disciplines. The Professional Science Master's (PSM) in Applied Physics at OSU is the first program of its kind in the Pacific Northwest and was created with the help of professional affiliates who are leaders in industries dependent on applications of physics either to produce or to exploit contemporary technologies. In Oregon, industries such as semiconductor manufacturing, optical and electronic instrumentation, and software have become the dominant employers, replacing lumbering, fishing and other traditional resource-based industries. Applied physicists study photovoltaic technology, optoelectronics, energy and communication systems, imaging of cells and nanostructures, and many other subjects. An internship providing job experience in a technology-rich environment as well as special training in business management, communications, and ethics to complement core science uniquely qualify PSM Physics graduates for these diverse careers.

The PSM program can usually be completed in two years, based on fulltime study and at least 54 credits. The technical curriculum is based on a core of graduate courses in the fundamental subjects of physics. Core physics courses (four courses selected from: PH 531, PH 535, PH 541, PH 551, PH 621, PH 631, PH 641, and PH 651) will cover topics such as electromagnetism, statistical and thermal physics and quantum mechanics. Elective courses develop skills in modeling, statistical analysis, and data management or in scientific fields closely related to physics (e.g., materials, energy etc.). Professional courses are required in communication, research ethics, and business management (PSM 513, PSM 565, PSM 566, PSM 567, COMM 550 and PHL 547). These courses are designed to be taken in sequence during the first academic year. Students are required to complete a 3 to 6 month internship (6-12 credits) in lieu of thesis research (PH 510).

For general information about PSM programs, contact the PSM Director, 2082 Cordley Hall, Corvallis OR 97331, 541-737-5259; email: kirstin.carroll@ oregonstate.edu.

## Degree Requirements (54 credits)

Core physics courses (12)
Electives (18)
Professional courses (18)
Internship (6)
Major Code: 5890

## PHYSICS (MA, MS, PhD, MAIS)

Graduate Areas of Concentration
Atomic physics, computational physics, nuclear physics, optical physics, particle physics, physics education, relativity, solid state physics
The Department of Physics offers courses and research experience leading to the Master of Arts, Master of Science, and Doctor of Philosophy degrees. Advanceddegree candidates may pursue thesis research in experimental, computational, or theoretical AMO (atomic, molecular, and optical) physics, nuclear and particle physics, or solid state physics. Special programs are available for students who are preparing for careers in undergraduate teaching. Thesis and nonthesis programs are offered that lead to the MS and MA degrees. A written comprehensive examination must be passed prior to the nonthesis master's final oral or the PhD preliminary oral examination. There are no foreign language requirements.

The department maintains a vigorous colloquium program in which wellknown physicists present lectures on current research. Students are invited to participate in topical seminars offered regularly in each of the major research areas for the discussion of research results and for studies of specialized subjects at an advanced level.
Fellowships and assistantships are offered to qualified graduate students. A descriptive brochure is available from the Department of Physics.

## Major Code: 5900

## PHYSICS GRADUATE MINOR

For more details, see the departmental advisor.

## Minor Code: 5900 <br> ■ PHYSICS COURSES

PH 104. *DESCRIPTIVE ASTRONOMY (4). Historical and cultural context of discoveries concerning planets and stars and their motions. Topics include the solar system, the constellations, birth and death of stars, pulsars and black holes. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. Lec/lab. (Bacc Core Course)
PH 104H. *DESCRIPTIVE ASTRONOMY (4).
Historical and cultural context of discoveries concerning planets and stars and their motions. Topics include the solar system, the constellations, birth and death of stars, pulsars and black holes. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. Lec/lab. (Bacc Core Course) PREREQS: Honors College approval required.

PH 106. *PERSPECTIVES IN PHYSICS (4), A descriptive and non-mathematical study of the development of physical concepts and their historical and philosophical context. The emphasis is on the origin, meaning, significance, and limitations of these concepts and their role in the evolution of current understanding of the universe. Concepts to be covered include Copernican astronomy, Newtonian mechanics, energy, electricity and magnetism, relativity, and quantum theory. Intended primarily for non-science

## students. Lec/lab. (Bacc Core Course)

## PH 111. *INQUIRING INTO PHYSICAL

PHENOMENA (4). Development of conceptual understandings through investigation of everyday phenomena. Emphasis is on questioning, predicting, exploring, observing, discussing, and writing in physical science contexts. Students document their initial thinking, record their evolving understandings, and write reflections upon how their thinking changed and what fostered their learning. Lec/lab. (Baccalaureate Core Course)
PH 199. SPECIAL STUDIES (1-16). One-credit sections are graded pass/no pass. This course is repeatable for a maximum of 99 credits. PREREQS: Departmental approval required.

PH 201. *GENERAL PHYSICS (5). Introductory survey course covering a broad spectrum of classical and modern physics with applications. Topics include dynamics, vibrations and waves, electricity and magnetism, optics, and modern physics. Laboratory and recitation sections accompany the lectures. Mathematical preparation should include college algebra and trigonometry. Lec/lab/rec. (Bacc Core Course) PREREQS: MTH 111 and MTH 112. PH 201, PH 202, PH 203 must be taken in order.
PH 202. *GENERAL PHYSICS (5). Introductory survey course covering broad spectrum of classical and modern physics with applications Topics include dynamics, vibrations and waves, electricity and magnetism, optics, and modern physics. Laboratory and recitation sections accompany the lectures. Mathematical preparation should include college algebra and trigonometry. Lec/lab/rec. (Bacc Core Course) PREREQS: MTH 111 and MTH 112 and PH 201
PH 203. *GENERAL PHYSICS (5). Introductory survey course covering broad spectrum of classical and modern physics with applications. Topics include dynamics, vibrations and waves, electricity and magnetism, optics, and modern physics. Laboratory and recitation sections accompany the lectures. Mathematical preparation should include college algebra and trigonometry. Lec/lab/rec. (Bacc Core Course) PREREQS: MTH 111 and MTH 112 and PH 202

PH 205. *SOLAR SYSTEM ASTRONOMY
(4). History, laws, and tools of astronomy. Composition, motion, and origin of the sun, planets, moons, asteroids, and comets. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. The courses in the astronomy sequence (PH 205, PH 206, PH 207) can be taken in any order. Lec/lab. (Bacc Core Course)
PH 206. *STARS AND STELLAR EVOLUTION (4). Properties of stars; star formation, evolution, and death; supernovae, pulsars, and black holes. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. The courses in the astronomy sequence (PH 205, PH 206, PH 207) can be taken in any order. Lec/lab. (Bacc Core Course)
PH 207. *GALAXIES, QUASARS, AND COSMOLOGY (4). Nature and content of galaxies, properties of quasars, and the cosmic background radiation. Emphasis on the BigBang model and its features. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. The courses in the astronomy sequence (PH 205, PH 206, PH 207) can be taken in any order. Lec/lab. (Bacc Core Course)
PH 211. *GENERAL PHYSICS WITH CALCULUS (4). A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab/rec. (Bacc Core Course) PREREQS: MTH 251. COREQ:

MTH 252. Concurrent enrollment in a PH 221 recitation section is strongly recommended.

PH 212. *GENERAL PHYSICS WITH CALCULUS
(4). A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab. (Bacc Core Course) PREREQS: PH 211 [D-] and MTH 252. COREQ: MTH 254. Concurrent enrollment in PH 222, Recitation for Physics 212, is strongly recommended.

PH 213. *GENERAL PHYSICS WITH CALCULUS (4). A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab/rec. (Bacc Core Course) PREREQS: MTH 254 and PH 212. Concurrent enrollment in a recitation section is strongly recommended.
PH 221. RECITATION FOR PHYSICS 211 (1). One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec/rec. Graded P/N. COREQS: PH 211

PH 221H. RECITATION FOR PHYSICS 211 (1). One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec/rec. PREREQS: Honors College approval required. Students must take COREQS: PH 211 or PH 211H.
PH 222. RECITATION FOR PHYSICS 212 (1).
One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Graded P/N. COREQS: PH 212
PH 222H. RECITATION FOR PHYSICS 212 (1). One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec/rec. PREREQS: Honors College approval required. Students must take COREQS: PH 212 or PH 212H.

PH 223. RECITATION FOR PHYSICS 213 (1). One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec/rec. Graded P/N. COREQS: PH 213
PH 223H. RECITATION FOR PHYSICS 213 (1). One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec/rec. PREREQS: Honors College approval required. Students must take COREQS: PH 213 or PH 213H.
PH 265. SCIENTIFIC COMPUTING (3). Basic computational tools and techniques for courses in science and engineering. Project approach to problem solving using symbolic and compiled languages with visualization. Basic computer literacy assumed. PREREQS: Concurrent enrollment in MTH 251.
PH 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
PH 313. *ENERGY ALTERNATIVES (3). Exploration of the challenges and opportunities posed by dwindling resources; physical and technological basis of our current energy alternatives; new or controversial technologies such as nuclear or solar power; overview of resource availability, patterns of energy consumption, and current governmental policies. (Bacc Core Course) PREREQS: Upper-division standing and 12 credits of introductory science.
PH 314. INTRODUCTORY MODERN PHYSICS (4). An elementary introduction to relativity and quantum theory, emphasizing the experiments that revealed the limitations of classical physics. Applications include the properties of atoms, nuclei, and solids. Laboratory work accompanies lectures. Lec/lab. PREREQS: PH 213. COREQ: MTH 256.

PH 315. PHYSICS OF CONTEMPORARY
CHALLENGES (3). An introduction to thermal and quantum physics in the context of contemporary challenges faced by our society, such as power generation, energy efficiency, and global warming. PREREQS: PH 211
PH 331. *SOUND, HEARING, AND MUSIC
(3). Basic course in the physics, technology, and societal implications of sound. Intended for students in nontechnical majors. Topics include wave motion, hearing and the perception of sound, noise pollution, music and musical instruments, architectural acoustics, and sound recording and reproduction. (Bacc Core Course) PREREQS: Upper-division standing and one year of university science, or instructor approval required.
PH 332. *LIGHT, VISION, AND COLOR (3). Basic physics of light, optical instruments (lenses, telescopes, microscopes), the eye and visual perception, colors, photography, environmental lighting, lasers and holography. For nontechnical majors. (Bacc Core Course) PREREQS: Upperdivision standing and one year of university science or instructor approval required.
PH 335. TECHNIQUES OF THEORETICAL
MECHANICS (3). Newtonian, Lagrangian, and Hamiltonian classical mechanics. Special relativity with relativistic mechanics. PREREQS: Recommended prerequisites are PH 212 and MTH 254.
PH 365. COMPUTATIONAL PHYSICS LAB
(1). A project-driven laboratory experience in computational physics. Includes the use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered will coordinate with the Paradigms in Physics course sequence. PREREQS: PH 213 [C-] and this course is expected to be taken alongside the Paradigms.
PH 366. COMPUTATIONAL PHYSICS LAB
(1). A project-driven laboratory experience in computational physics. Includes the use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered will coordinate with the Paradigms in Physics course sequence. PREREQS: PH 213 [C-] and this course is expected to be taken alongside the Paradigms.
PH 367. COMPUTATIONAL PHYSICS LAB
(1). A project-driven laboratory experience in computational physics. Includes the use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered will coordinate with the Paradigms in Physics course sequence. PREREQS: PH 213 [C-] and this course is expected to be taken alongside the Paradigms.
PH 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
PH 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.

PH 401. RESEARCH (1-16). A research project under the supervision of a faculty member, whose approval must be arranged by the student in advance of registration. This course is repeatable for a maximum of 16 credits. PREREQS:
Departmental approval required.
PH 403. ^THESIS (1-16). A research project leading to a thesis under the supervision of a faculty member, whose approval must be arranged by the student in advance of registration. (Writing Intensive Course) This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PH 405. READING AND CONFERENCE (1-
16). An independent study project under the supervision of a faculty member, whose approval must be arranged by the student in advance
of registration. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

PH 407. SEMINAR (1-16). Departmental seminars or colloquium. Graded $\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 16 credits.
PH 407H. SEMINAR (1-16). Departmental seminars or colloquium. This course is repeatable or a maximum of 16 credits. PREREQS: Honors College approval required.

PH 410. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

PH 411. ANALOG AND DIGITAL ELECTRONICS
(3). Circuit theory. Passive dc and ac circuits including filters, resonance, complex impedance and Fourier analysis. Operational amplifiers, gates and combinational logic. Semiconductor principles diodes, transistors, BJTs and FETs. Multiplexing, flip-flops and sequential logic, 555 timer, registers and memory, DAC, ADC. PREREQS: PH $314^{*}$. PH 411 and PH 412 must be taken in order.
PH 412. ANALOG AND DIGITAL ELECTRONICS (3). Circuit theory. Passive dc and ac circuits including filters, resonance, complex impedance and Fourier analysis. Operational amplifiers, gates and combinational logic. Semiconductor principles, diodes, transistors, BJTs and FETs. Multiplexing, flip-flops and sequential logic, 555 timer, registers and memory, DAC, ADC. PREREQS: PH 314* and PH 411

PH 415. COMPUTER INTERFACING AND INSTRUMENTATION (3). Applications of computers as scientific instruments, with emphasis on hardware and instrumentation, online data acquisition, and computer contro of experiments. PREREQS: Upper-division or graduate standing; PH 412/PH 512 or equivalent background in electronics; and instructor approval required. Departmental approval required.
PH 422. PARADIGMS IN PHYSICS: STATIC FIELDS (3). Theory of static electric, magnetic, and gravitational potentials and fields using the techniques of vector calculus in three dimensions. PREREQS: PH 213 and MTH 255
PH 423. PARADIGMS IN PHYSICS: ENERGY AND ENTROPY (3). Thermodynamics and canonical statistical mechanics. PREREQS: PH 213
PH 424. PARADIGMS IN PHYSICS:
OSCILLATIONS AND WAVES (3). Dynamics
of mechanical and electrical oscillation using Fourier series and integrals; time and frequency representations for driven damped oscillators, resonance; one-dimensional waves in classical mechanics and electromagnetism; normal modes. PREREQS: PH 213 and PH 411 and MTH 256
PH 425. PARADIGMS IN PHYSICS: QUANTUM FUNDAMENTALS (3). Introduction to quantum mechanics through Stern-Gerlach spin measurements. Probability, eigenvalues, operators, measurement, state reduction, Dirac notation, matrix mechanics, time evolution. Quantum behavior of a one-dimensional well. PREREQS: PH 213. COREQ: MTH 341

PH 426. PARADIGMS IN PHYSICS: CENTRAL FORCES (3). Gravitational and electrostatic forces; angular momentum and spherical harmonics, separation of variables in classical and quantum mechanics, hydrogen atom. PREREQS: PH 213 and PH 422 and PH 425. COREQ: PH 335

## PH 427. PARADIGMS IN PHYSICS: PERIODIC

 SYSTEMS (3). Quantum waves in position and momentum space; Bloch waves in onedimensional periodic systems, and the reciprocal lattice; coupled harmonic oscillators; phonons. PREREQS: PH 424 and PH 425. COREQ: PH 315PH 431. CAPSTONES IN PHYSICS:
ELECTROMAGNETISM (3). Static electric and magnetic fields in matter, electrodynamics,

Maxwell equations, electromagnetic waves, wave guides, dipole radiation. PREREQS: (PH 424 or 524) and (PH 426 or PH 526)

PH 435. CAPSTONES IN PHYSICS: CLASSICAL MECHANICS (3). Newtonian, Lagrangian and Hamiltonian formulations of classical mechanics: single-particle motion, collisions, variational methods, and normal coordinate description of coupled oscillators. PREREQS: (PH 424 or PH 524) and (PH 426 or PH 526)

PH 441. CAPSTONES IN PHYSICS: THERMAL AND STATISTICAL PHYSICS (3). Entropy and quantum mechanics; canonical Gibbs probability; ideal gas; thermal radiation; Einstein and Debye lattices; grand canonical Gibbs probability; ideal Fermi and Bose gases; chemical reactions and phase transformations. PREREQS: (PH 423 or PH 523) and (PH 451 or PH 551)

PH 451. CAPSTONES IN PHYSICS: QUANTUM MECHANICS (3). Wave mechanics, Schroedinger equation, operators, harmonic oscillator, identical particles, atomic fine structure, approximation methods and applications. PREREQS: (PH 424 or PH 524) and (PH 425 or PH 525) and (PH 426 or PH 526)
PH 455. ASTROPHYSICS (3). Physics of stars and the cosmos. PREREQS: PH 213; PH 315 or equivalent junior-level background in modern physics and thermodynamics.

PH 461. CAPSTONES IN PHYSICS:
MATHEMATICAL METHODS (3). Complex algebra, special functions, partial differential equations, series solutions, complex integration, calculus of residues. PREREQS: (PH 424 or PH 524) and (PH 426 or PH 526) and MTH 256

PH 464. SCIENTIFIC COMPUTING II (3).
Mathematical, numerical, and conceptual elements forming foundations of scientific computing: computer hardware, algorithms, precision, efficiency, verification, numerical analysis, algorithm scaling, profiling, and tuning. Lec/lab.

PH 465. COMPUTATIONAL PHYSICS (3).
The use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered include models and applications ranging from classical mechanics and electromagnetism to modern solid state and particle physics. PREREQS: PH 464 or PH 564
PH 481. PHYSICAL OPTICS (4). Wave propagation, polarization, interference, diffraction, and selected topics in modern optics. PREREQS: (PH 431 or PH 531) or equivalent.
PH 482. OPTICAL ELECTRONIC SYSTEMS (4). Photodetectors, laser theory, and laser systems. Lec/lab. CROSSLISTED as ECE 482/ECE 582. PREREQS: ECE 391 or (PH 481 or PH 581) or equivalent.
PH 483. GUIDED WAVE OPTICS (4). Optical fibers, fiber mode structure and polarization effects, fiber interferometry, fiber sensors, optical communication systems. Lec/lab. CROSSLISTED as ECE 483/ECE 583. PREREQS: (ECE 391* or PH 481*)

PH 495. INTRODUCTION TO PARTICLE AND NUCLEAR PHYSICS (3). Elementary particles and forces, nuclear structure and reactions. PREREQS: PH 451 or PH 551
PH 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
PH 501. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PH 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.
PH 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval
required.
PH 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.
PH 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

PH 511. ANALOG AND DIGITAL ELECTRONICS (3). Circuit theory. Passive dc and ac circuits including filters, resonance, complex impedance and Fourier analysis. Operational amplifiers, gates and combinational logic. Semiconductor principles, diodes, transistors, BJTs and FETs. Multiplexing flip-flops and sequential logic, 555 timer, registers and memory, DAC, ADC. PH 511 and PH 512 must be taken in order. PREREQS: PH 314*
PH 512. ANALOG AND DIGITAL ELECTRONICS
(3). Circuit theory. Passive dc and ac circuits including filters, resonance, complex impedance and Fourier analysis. Operational amplifiers, gates and combinational logic. Semiconductor principles, diodes, transistors, BJTs and FETs. Multiplexing, flip-flops and sequential logic, 555 timer, registers and memory, DAC, ADC. PREREQS: PH $314^{*}$ and PH 511
PH 515. COMPUTER INTERFACING AND INSTRUMENTATION (3). Applications of computers as scientific instruments, with emphasis on hardware and instrumentation, online data acquisition, and computer control of experiments. PREREQS: Upper-division or graduate standing; (PH 412 or PH 512) or equivalent background in electronics; and instructor approval required. Departmental approval required.
PH 531. CAPSTONES IN PHYSICS:
ELECTROMAGNETISM (3). Static electric and magnetic fields in matter, electrodynamics, Maxwell equations, electromagnetic waves, wave guides, dipole radiation. PREREQS: (PH 424 or PH 524) and (PH 426 or PH 526)

PH 541. CAPSTONES IN PHYSICS: THERMAL AND STATISTICAL PHYSICS (3). Entropy and quantum mechanics; canonical Gibbs probability; ideal gas; thermal radiation; Einstein and Debye lattices; grand canonical Gibbs probability; ideal Fermi and Bose gases; chemical reactions and phase transformations. PREREQS: (PH 423 or PH 523) and (PH 451 or PH 551)

PH 551. CAPSTONES IN PHYSICS: QUANTUM MECHANICS (3). Wave mechanics, Schroedinger equation, operators, harmonic oscillator, identical particles, atomic fine structure, approximation methods and applications. PREREQS: (PH 424 or PH 524) and (PH 425 or PH 525) and (PH 426 or PH 526)
PH 555. ASTROPHYSICS (3). Physics of stars and the cosmos. PREREQS: PH 213; PH 315 or equivalent junior-level background in modern physics and thermodynamics.

## PH 561. MATHEMATICAL PHYSICS (3).

Fundamental mathematical techniques needed for graduate students in physics. Topics include vector spaces and operators; fourier series, integrals, and transforms; partial differential equations; special functions, distributions, and delta functions, Green's functions; complex analysis.

PH 562. MATHEMATICAL PHYSICS (3). Fundamental mathematical techniques needed for graduate students in physics. Topics include vector spaces and operators; fourier series, integrals, and transforms; partial differential equations; special functions, distributions, and delta functions; Green's functions; complex analysis.

PH 564. SCIENTIFIC COMPUTING II (3). Mathematical, numerical, and conceptual elements forming foundations of scientific computing: computer hardware, algorithms, precision, efficiency, verification, numerical analysis, algorithm scaling, profiling, and tuning. Lec/lab.

PH 575. INTRODUCTION TO SOLID STATE PHYSICS (3). Introduction to condensed matter physics for majors in physics, chemistry, and
engineering. Topics include band structure, free electron behavior, optical properties, magnetism, and lattice excitations. PREREQS: (PH 451 or PH 551) or equivalent. COREQ: PH 427 or PH 527

PH 581. PHYSICAL OPTICS (4). Wave
propagation, polarization, interference, diffraction, and selected topics in modern optics. PREREQS: (PH 431 or PH 531 ) or equivalent
PH 582. OPTICAL ELECTRONIC SYSTEMS (4). Photodetectors, laser theory, and laser systems. Lec/lab. CROSSLISTED as ECE 482/ECE 582.
PREREQS: (PH 481 or PH 581) or equivalent
PH 583. GUIDED WAVE OPTICS (4). Optical fibers, fiber mode structure and polarization effects, fiber interferometry, fiber sensors, optical communication systems. Lec/lab. CROSSLISTED as ECE 483/ECE 583. PREREQS: (ECE 391* or PH 481* or PH 581*)
PH 585. ATOMIC, MOLECULAR, AND OPTICAL PHYSICS (3). Atomic and molecular structure, interaction with electromagnetic fields, atomic and molecular spectra, spectroscopic techniques, laser theory, nonlinear optics. PREREQS: (PH 431 or PH 531) or (PH 451 or PH 551)

PH 591. BIOLOGICAL PHYSICS (3). Basic physics principles applied to the kinetics and dynamics of molecular and cellular processes. Ion channels, two-state systems, dynamics of molecular motors, cell signalling, and multicellular phenomena. PREREQS: PH 320 and PH 421 and PH 422 and PH 423 or equivalent juniorlevel background in classical mechanics, electromagnetism, and thermodynamics
PH 595. INTRODUCTION TO PARTICLE AND NUCLEAR PHYSICS (3). Elementary particles and forces, nuclear structure and reactions. PREREQS: PH 451 or PH 551

PH 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

PH 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
PH 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.
PH 605. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

PH 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

PH 621. DYNAMICS OF SINGLE- AND MULTIPARTICLE SYSTEMS (3). Introduction to theory of non-linear systems. Chaos in Hamiltonian and dissipative systems. Lyapunov exponents, fractal geometries. PREREQS: PH 435 or PH 535 or equivalent.
PH 631. ELECTROMAGNETIC THEORY
(3). Electrostatics; multipole expansion; magnetostatics; radiation fields; dynamics of relativistic particles and electromagnetic fields. PREREQS: PH 431 or PH 531 or equivalent. PH $631, \mathrm{PH} 632, \mathrm{PH} 633$ must be taken in order.

PH 632. ELECTROMAGNETIC THEORY
(3). Electrostatics; multipole expansion; magnetostatics; radiation fields; dynamics of relativistic particles and electromagnetic fields. PREREQS: PH 631 and (PH 431 or PH 531 or equivalent)
PH 633. ELECTROMAGNETIC THEORY
(3). Electrostatics; multipole expansion; magnetostatics; radiation fields; dynamics of relativistic particles and electromagnetic fields. PREREQS: PH 632 and (PH 431 or PH 531 or equivalent)
PH 641. STATISTICAL THERMOPHYSICS (3).
Macroscopic thermodynamics and kinetic theory. Classical and quantal statistical ensembles; partition functions. Applications to atoms and molecules, clustering, solids, radiation. PREREQS: PH 435 or PH 535. PH 641, PH 642 must be taken in order.
PH 642. STATISTICAL THERMOPHYSICS (3).
Macroscopic thermodynamics and kinetic theory. Classical and quantal statistical ensembles; partition functions. Applications to atoms and molecules, clustering, solids, radiation. PREREQS: PH 641
PH 651. QUANTUM MECHANICS (3). Basic principles of nonrelativistic quantum theory and applications. Schroedinger theory, quantum theory of angular momentum, matrix mechanics, perturbation theory, identical particles, scattering PREREQS: (PH 435 or PH 535) and (PH 451 or PH 551) or equivalents. PH 651, PH 652, PH 653 must be taken in order.
PH 652. QUANTUM MECHANICS (3). Basic principles of nonrelativistic quantum theory and applications. Schroedinger theory, quantum theory of angular momentum, matrix mechanics, perturbation theory, identical particles, scattering. PREREQS: (PH 435 or PH 535) and (PH 451 or PH 551) or equivalents and PH 651
PH 653. QUANTUM MECHANICS (3). Basic principles of nonrelativistic quantum theory and applications. Schroedinger theory, quantum theory of angular momentum, matrix mechanics, perturbation theory, identical particles, scattering. PREREQS: (PH 435 or PH 535 ) and ( PH 451 or PH 551) or equivalents and PH 652
PH 654. ADVANCED QUANTUM THEORY (3).
Scattering theory, second quantization and many body theory, relativistic quantum mechanics, quantization of fields, quantum electrodynamics, and elementary particles. PREREQS: PH 653. PH 654, PH 655, PH 656 must be taken in order.
PH 671. SOLID STATE PHYSICS, ELECTRON
TRANSPORT (2). Fundamentals of solid state physics, Boltzmann transport, phonon and defect scattering, quantum transport, transport in magnetic field, localization, Mott-insulator transition, electron tunneling, superconductivity. Offered in alternate years. PREREQS: Basic knowledge of electromagnetism and quantum mechanics.

PH 672. SOLID STATE PHYSICS, THEORY
(2). The many-body problem, density functional theory, excited states properties, BCS theory of superconductivity. Offered in alternate years. PREREQS: PH 575 and PH 654 and basic knowledge of electromagnetism and quantum mechanics.
PH 673. SOLID STATE PHYSICS,
NANOSCIENCE AND NANOTECHNOLOGY (2). Introduction to nanoscience and nanotechnology; semiconductor quantum wells, wires, and dots; bulk metals vs nanoparticles; molecular ensembles vs single molecules; fabrication of nanoparticles and nanostructured materials; scanning probe microscopy; advanced optical imaging and manipulation. Offered in alternate years. PREREQS: Basic knowledge of electromagnetism and quantum mechanics.
PH 674. SOLID STATE PHYSICS, MAGNETISM
(2). Magnetism of atoms; interaction between magnetic atoms, magnetic ordering in crystalline solids; excitations in magnetic solids; temperature dependent phenomena in magnetic solids; magnetism of metals, alloys, insulators and semiconductors; topics of considerable interest in contemporary research. PREREQS: Basic knowledge of electromagnetism and quantum mechanics.
PH 681. ATOMIC, MOLECULAR AND OPTICAL PHYSICS, MODERN OPTICS (2). Maxwell's equations in matter; refraction, phase and group indices; material and geometry dispersion; effective-medium regime. Not offered every year. PREREQS: Basic knowledge of electromagnetism and quantum mechanics.
PH 682. ATOMIC, MOLECULAR, OPTICAL PHYSICS, SEMICONDUCTOR OPTICS (2).
Linear response theory; polarization effects; interband excitations and emissions; low dimensional systems; excitons; phonons; semiconductor lasers; photovoltaics. Offered alternate years. PREREQS: Basic knowledge of electromagnetism and quantum mechanics.
PH 683. ATOMIC, MOLECULAR AND OPTICAL
PHYSICS, NONLINEAR OPTICS (2). Coherent nonlinear electromagnetic phenomena; harmonic generation and parametric mixing; quantum mechanical description of multi-photon interactions; incoherent multi-photon interactions; coherent nonlinear optical phenomena and spectroscopies. Offered in alternate years. PREREQS: Basic knowledge of electromagnetism and quantum mechanics.
PH 684. ATOMIC, MOLECULAR AND
OPTICAL PHYSICS, ULTRAFAST OPTICS (2).
Introduction of ultrafast optical science; short pulse propagation in linear media; pulse stretching and compressing; Q-switching and mode-locking; characterization of femtosecond lasers; coherent optical effects. Offered in alternate years. PREREQS: Basic knowledge of electromagnetism and quantum mechanics.

PH 699. SPECIAL TOPICS: BIOLOGICAL
PHYSICS (3).

## SCHOOL OF LIFE SCIENCES

The School of Life Sciences has three departments:

1. Biochemistry and Biophysics
2. Integrative Biology
3. Microbiology

## DEPARTMENT OF <br> BIOCHEMISTRY AND BIOPHYSICS

The Department of Biochemistry and Biophysics is part of the School of Life Sciences.
P. Andrew Karplus, Head

2011 Ag and Life Sciences
Oregon State University
Corvallis, OR 97331-7305
541-737-2769
Email: karplusp@oregonstate.edu
Website: http://biochem.science.oregonstate.edu

## FACULTY

Professors Ahern, Andrews, Barbar, Beckman, Hagen, Karplus, Merrill
Associate Professors Frietag,
Gombart, Greenwood, Hsu, McFadden, Mehl
Assistant Professors Hendrix,
Johnson, Nyarko, Perez
Senior Instructors Rajagopal
Instructor Van Zee
Associate Professor, Senior
Research Cooley

## Undergraduate Majors

Biochemistry and Biophysics (BS, CRED, HBS)
Biochemistry and Molecular Biology (BS, CRED, HBS)

## Options

Advanced Molecular Biology Computational Molecular Biology Pre-Medicine/Biochemistry and Molecular Biology

## Graduate Major

Biochemistry and Biophysics (MA, MAIS, MS, PhD)

Graduate Areas of Concentration Biochemistry
Biophysics

## Graduate Minor

Biochemistry and Biophysics
The two majors, Biochemistry and Biophysics, and Biochemistry and Molecular Biology, provide a foundation in both the physical and biological sciences. They are designed to help students prepare for careers in the health sciences, for technical employment at the BS level, or for graduate study in the life sciences. Graduates of the department's
programs have found challenging careers in medicine, dentistry, clinical chemistry, biotechnology, genetics, cell biology, forensic science, pharmacology, physiology, toxicology, and nutrition, as well as in biochemistry or biophysics. Others have used the degree as a springboard to nontechnical careers that benefit from a broad scientific background, including business, intellectual property law, journalism, and health care administration.

## UNDERGRADUATE STUDIES

High school students interested in careers in biochemistry or biophysics should prepare for college by taking four years of mathematics and at least one year each of physics and chemistry. Additional course work in biology, computer science, written and spoken English, and foreign languages is highly desirable. Students transferring from a community college should have completed one year each of the following by the end of the sophomore year, if they plan to graduate in four years' total time: general chemistry, organic chemistry, calculus-based physics, general biology and three semesters or four quarters of calculus, including vector calculus.

Biochemists, biophysicists, and molecular biologists find employment in colleges and universities, in medical schools, in government and private research institutes, in hospitals, and in industry. Industrial employers include chemical companies, food-processing plants, drug manufacturers, the cosmetic industry, and manufacturers of agricultural chemicals (fertilizers, pesticides, etc.). Biochemistry is extensively intertwined with biotechnology, which is the use of modern techniques in biology to achieve practical objectives. This has greatly expanded the industrial market for biochemists and biophysicists. Some rewarding careers require completion of a doctoral degree-PhD or a professional degree. This is essential for anyone who wants to direct an independent research program.

Dr. Kevin Ahern is the lead undergraduate advisor and is the one most familiar with undergraduate program requirements and career opportunities. The alternate advisors are Drs. Karplus, Merrill, Nyarko, Perez, Rajagopal, and Van Zee. Also, students are encouraged to seek out any other member of the faculty for informal advice.

The department has defined curricular requirements (see below), which lead to a BS degree in Biochemistry and Biophysics or BS degree in Biochemistry and Molecular Biology. All upper-division students are encouraged to take additional elective courses in areas related to their major fields of interest (e.g., chemistry, microbiology, genetics, nutrition, physics, pharmacy, biology, or computer science). All
students are strongly encouraged to carry out a research project in the laboratory of a faculty member.

## UNDERGRADUATE MAJORS WITH OPTIONS

## BIOCHEMISTRY AND BIOPHYSICS

 (BS, HBS)Accredited by the American Society for Biochemistry and Molecular Biology.
Freshman Year (45)
BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)
CH 231, CH 232, CH 233. *General
Chemistry ( $4,4,4$ )
and CH 261, CH 262, CH 263.
*Laboratory for Chemistry 231, 232, 233
$(1,1,1)$
HHS 231. *Lifetime Fitness for Health (2)
HHS 241. *Lifetime Fitness (1) or any PAC course (1)
MTH 251. *Differential Calculus (4)
MTH 252. Integral Calculus (4)
MTH 254. Vector Calculus I (4)
WR 121. *English Composition (3)

## Sophomore Year (46)

BB/BI 317. ^Scientific Theory and Practice (3)
BI 311. Genetics (4)
CH 334, CH 335, CH 336. Organic Chemistry (3,3,3)
CH 361, CH 362. Experimental Chemistry I $(3,3)$
MTH 253. Infinite Series and Sequences (4) or MTH 256. Applied Differential Equations (4)
or MTH 306. Matrix and Power Series Methods (4)
PH 211, PH 212, PH 213. *General Physics with Calculus (4,4,4)
Electives (8)

## Junior Year (44) ${ }^{1}$

BB 314. Cell and Molecular Biology (4) [Not
required but strongly recommended.]
BB 490. Biochemistry 1: Structure and Function (3)
BB 491. Biochemistry 2: Metabolism (3)
BB 492. Biochemistry 3: Genetic
Biochemistry (3)
BB 493. Biochemistry Laboratory Molecular Techniques 1 (3)
and BB 497. Basic Nucleic Acid and Protein Sequence Analysis (1)
BB 494. Biochemistry Laboratory Molecular Techniques 2 (3)
and BB 496. Biochemistry Laboratory Molecular Modeling (1)
CH 440, CH 441, CH 442. Physical Chemistry $(3,3,3)$
Electives (18)

## Senior Year (45)

BB 481. Macromolecular Structure (3)
BB 482. Molecular Biophysics (3) [Pending approval 92028]
BB 483. Advanced Biochemistry and
Biophysics: Capstone (3)
BB 498. ASBMB Certification Exam (0)
Elective (credits to reach 180 total)
Total=180

## SAMPLE 4-YEAR PLAN:

 BIOCHEMISTRY AND BIOPHYSICS YEAR 1 (46 CR)

${ }^{\mathbf{1}} \mathrm{CH} 361$ and 362 can be taken in the junior year with BB 493, BB 494, BB 496, BB 497 being taken in the senior year
Major Code: 506

## BIOCHEMISTRY AND MOLECULAR BIOLOGY (BS, CRED, HBS)

The BS degree in Biochemistry and Molecular Biology provides a degree path centered on the molecular basis of living systems with training in molecular genetics, biochemistry, and cell biology, as well as in rapidly developing areas such as bioinformatics. Majors must select an option either in Advanced Molecular Biology, Computational Molecular Biology, or Pre-medicine/Biochemistry and Molecular Biology. The first two options are designed for students interested in careers in the biotechnology and pharmaceutical industries or graduate work in the molecular life sciences, with the second especially well-suited for students interested in computational aspects of molecular biology. The third option is ideal for students interested in careers in medicine and related health professions. Students majoring in Biochemistry and Molecular Biology cannot seek a double major in Biochemistry and Biophysics, Biology, Biohealth Sciences, Botany, Microbiology or Zoology.

Completion of an option is required to earn a degree in Biochemistry and Molecular Biology.
Students are required to achieve a C - or better in the following courses (or their honors counterparts) required for the Biochemistry and Molecular Biology major:

BI 211, BI 212, BI 213, CH 231/CH
261, CH 232/CH 262 and CH 233/CH
263, MTH 251, MTH 252.

## Core

BB 111. Introduction to Biochemistry and Biophysics Research (1)

BB 314. Cell and Molecular Biology (4)
BB 315. Molecular Biology Lab (3)
BB 317. ^Scientific Theory and Practice (3)

## OPTIONS

## ADVANCED MOLECULAR BIOLOGY OPTION

The Advanced Molecular Biology option is designed for students interested in pursuing graduate work in molecular life sciences or entering the workforce in the biotechnology and pharmaceutical industries. It provides advanced training in genomics, epigenetics and other areas of current research in molecular biology, in addition to the core courses in the major. Students are strongly encouraged to participate in undergraduate research, and up to six research credits can be
applied to the Upper-division Science Elective requirements. Faculty advisors work with students to help them identify electives, research opportunities, and professional internships that align with their interests.

## Core (2 credits)

BB 496. Biochemistry Laboratory Molecular Modeling (1)
BB 497. Basic Nucleic Acid and Protein Sequence Analysis (1)

## Electives

Select 19 or more credits from the following:
BB 401. Undergraduate Research (1-6 credits allowed)
BB 460. Advanced Cell Biology (3)
BB 484. Chromatin and Epigenetics (3)
BB 485. Applied Bioinformatics (3)
BI 311. Genetics (4)
BI 445. Evolution (3)
BOT 460. Functional Genomics (3)
BOT 475. Comparative Genomics (4)
BOT 476. Introduction to Computing in the Life Sciences (3)

MB 303. General Microbiology Laboratory (2)
MB 310. Bacterial Molecular Genetics (3)
or MB 456. Microbial Genetics and Biotechnology (3)
MB 416. Immunology (3)
MB 420. Microbial Genomes,
Biogeochemistry, and Diversity (3)
ST 352. Introduction to Statistical Methods (4)

Z 425. Embryology and Development (5)
Z 438. Behavioral Neurobiology (3)

## Total=21 credits

Option Code: 972

## COMPUTATIONAL MOLECULAR BIOLOGY OPTION

The Computational Molecular Biology option is designed for students interested in the interface of molecular biology, computer science, and statistics. It provides strong preparation for graduate school in computational biology as well as the biotechnology and pharmaceutical industry workforce. This option couples the comprehensive core training in biochemistry and molecular biology with advanced course work in mathematics, statistics, computer science, and bioinformatics. Students are strongly encouraged to participate in undergraduate research, and up to six research credits can be applied to the Upper-division Science Elective requirements. Faculty advisors work with students to identify elective courses, undergraduate research opportunities, and professional internships that support their individual interests.

## PRE-MEDICINE/BIOCHEMISTRY AND MOLECULAR BIOLOGY <br> OPTION

Biochemistry and Molecular Biology students interested in a career in medicine should choose this option. It may also be suitable for students interested in some other health professions and these students should first consult with their advisor. In addition to offering a rigorous foundation in biochemistry, molecular and cellular biology, chemistry, and genetics, the Pre-medicine option meets the requirements for most medical schools in the U.S. by providing students with training in psychology, ethics and social sciences. Students have a wide choice of medically relevant electives in areas such as physiology, microbiology, and immunology. Students are strongly encouraged to participate in undergraduate research. Faculty pre-med advisors guide students to integrate undergraduate research and other relevant professional opportunities into their undergraduate experience and to prepare themselves as strong candidates for admission to the professional schools of their interest.

## BIOCHEMISTRY AND BIOPHYSICS (MA, MS, PhD, MAIS)

Graduate Areas of Concentration Biochemistry, biophysics
The Department of Biochemistry and Biophysics offers graduate work leading to the Master of Science, Master of Arts, and Doctor of Philosophy degrees. Most graduate students are admitted for study toward the PhD.

The PhD program requires course work in biochemistry and biophysics, passing written and oral examinations, participating in the departmental seminar program, and research leading to a doctoral thesis. Although most students in the department receive financial support in the form of research assistantships, all students are expected to participate to a limited degree in the teaching program of the department, regardless of the source of support. In general, financial support is provided for PhD candidates only.

## Major Code: 5060

MCB 555. Genome Expression and Regulation (4)
MCB 556. Cell and Developmental Biology (4)

## Minor Code: 5060

## ■ BIOCHEMISTRY AND BIOPHYSICS COURSES

BB 100. THE MOLECULES OF LIFE (2).
A brief introduction to molecular biology for nonspecialists. Subjects vary, but have included biochemical basis of the origin of life, biochemical genetics, biochemical aspects of memory and behavior, mutagenesis, bioenergetics and nutrition, and environmental biochemistry.

## BB 111. INTRODUCTION TO BIOCHEMISTRY

 AND BIOPHYSICS RESEARCH (1). Designed to introduce biochemistry and biophysics students to departmental research opportunities and advisors.BB 314. CELL AND MOLECULAR BIOLOGY
(4). Fundamental concepts of prokaryotic and eukaryotic cell biology. Emphasizes cell structure and function at the molecular level. Lec/rec. PREREQS: ( Bl 211 [C-] or $\mathrm{BI} 211 \mathrm{H}[\mathrm{C}-]$ ) and (BI 212 [C-] or $\mathrm{BI} 212 \mathrm{H}[\mathrm{C}-]$ ] and ( BI 213 [C-] or BI 213 H [C-] )) and (CH 331* [C-] or CH 334* [C-] )
BB 314H. CELL AND MOLECULAR BIOLOGY
(4). Fundamental concepts of prokaryotic and eukaryotic cell biology. Emphasizes cell structure and function at the molecular level. Lec/rec. PREREQS: ( $(\mathrm{BI} 211$ [C-] or $\mathrm{BI} 211 \mathrm{H}[\mathrm{C}-]$ ) and (BI 212 [C-] or Bl 212 H [C-] ) and ( BI 213 [C-] or BI 213H [C-] )) and (CH 331* [C-] or $\mathrm{CH} 334^{*}$ [C-] )

## BB 315. ^MOLECULAR BIOLOGY

LABORATORY (3). Laboratory projects exploring
the transmission of genetic information from storage to function will introduce students to fundamental molecular biology concepts and techniques, including isolation of DNA, construction of recombinant plasmids, quantification of gene expression in model organisms, polymerase chain reaction, and analysis of protein expression and subcellalar localization. Lec/lab. (Writing Intensive Course) CROSSLISTED as BI 315. PREREQS: BI 314* [D-] or $\mathrm{BI} 314 \mathrm{H}^{*}$ [D-] or BB $314^{*}$ [D-] or BB $314 \mathrm{H}^{*}$

## [D-]

BB 317. ^SCIENTIFIC THEORY AND
PRACTICE (3). Teaches students the practice of biological science. Topics cover scientific theory, communications, and critical evaluation. CROSSLISTED as BI 317. (Writing Intensive Course) PREREQS: (BI 213 [D-] or BI 213H [D-] ) and /or equivalent.

BB 331. *INTRODUCTION TO MOLECULAR BIOLOGY (3). Course dealing with the molecular basis of cellular function, with emphasis upon modern developments, and the foundation for practical applications of this knowledge. The course will involve the conceptual background necessary to appreciate the applications of molecular biology. Throughout the course opportunities will be given to discuss public policy issues and questions: What are the moral and practical problems that flow from identification of an individual as being at risk for a late-appearing genetic disorder, such as Huntington's disease or certain cancers? Does the scientific or public value of knowing the entire DNA sequence of the human genome justify a situation in which individual or small-scale research cannot be supported? What issues arise when the fruits of biological research, mostly publicly funded, are commercialized? Should a novel organism be patented? How can biotechnology be applied to environmental problems? (Bacc Core Course) PREREQS: (CH 122 [D-] or CH 202 [D-] or CH 222 [D-] or CH 225 H [D-] or ( CH 232 [D-] or CH 232H [D-] ) or (CH 262 [D-] or CH 262H [D-] or CH 272 [D-] )))
BB 332. *MOLECULAR MEDICINE (3). Provides students an understanding of medical advances from a rapidly evolving molecular point of view. Advances in knowledge of the human genome arising from DNA sequencing efforts and major leaps in understanding of the regulating cellular growth and division are presented in an easy-tounderstand fashion appropriate for students in all majors. Course discussions and assignments will cover implications of advances in molecular medicine from ethical, economic, technical and societal standpoints. The aim of the course is to present technical material in a way that non-scientists will understand and conversely to summarize ethical, economic, and philosophical considerations in a way that the scientists understand the implications of these technologies. (Bacc Core Course) PREREQS: Any biology course.
BB 350. ELEMENTARY BIOCHEMISTRY (4).
Service course for students desiring a short
introduction to biochemistry. Four lectures weekly. PREREQS: (CH 331 [D-] and CH 332* [D-] ) and / or equivalent.
BB 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
BB 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
BB 401. UNDERGRADUATE RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
BB 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
BB 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

BB 405H. READING AND CONFERENCE (1-16) This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
BB 407. BIOCHEMISTRY/BIOPHYSICS SEMINAR (1-16). Informal seminars presenting information about research problems and careers and research programs on campus in biochemistry or biophysics. This course is repeatable for a maximum of 99 credits.

## BB 407H. BIOCHEMISTRY/BIOPHYSICS

SEMINAR (1-16). Informal seminars presenting information about research problems and careers and research programs on campus in biochemistry or biophysics. This course is repeatable for a maximum of 99 credits. PREREQS: Honors College approval required.

BB 410. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

BB 450. GENERAL BIOCHEMISTRY (4). Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551, three lectures. PREREQS: (CH 332 [D-] or CH 336 [D-] ) and BB 450 and BB 451 must be taken in order.

BB 451. GENERAL BIOCHEMISTRY (3).
Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551, three lectures. PREREQS: (BB 450 [D-] or BB 450H [D-] ) and BB 450 and BB 451 must be taken in order.

BB 460. ADVANCED CELL BIOLOGY (3). History and theory of cell biology; microscopy and ther techniques to study cells and organelles; membranes; organelles; protein import; cell signaling; cytoskeleton; polarity; cell cycle; stem cells; pattern formation; cancer biology PREREQS: BB 314 [C-] or BI 314 [C-] or BI 314H [C-] or BB 451 [C-] or BB 492 [C-]
BB 481. MACROMOLECULAR STRUCTURE (3). An introduction to structural biology, the discipline focused on understanding the structural properties of biological macromolecules--especially proteins and nucleic acids--and relating them to their function. Introduces students to the vocabulary and tools of this discipline, covering both the fundamental physico-chemical principles governing the structure and function of biological macromolecules and a selected set of widely used experimental and theoretical approaches to their characterization. This is done through lectures, and textbook and literature readings. Graduate students receive additional experience in scientific reading, writing and presentation through a literature-based term project. PREREQS: BB 450 [D-] or BB 490 [D-]
BB 482. BIOPHYSICS (3). Sequence professiona course covering quantitative properties of biological systems and biological phenomena using concepts derived from mathematics and physics. PREREQS: (BB 481 [D-] and CH 442 [D-] )

## BB 483. ADVANCED BIOCHEMISTRY

AND BIOPHYSICS: CAPSTONE (3).
Covers applications of advanced biophysical techniques, and how these fit within the larger context of biochemistry, biology and society. Explores techniques and their applications to macromolecules as well as the scientific process. Techniques discussed include in vitro, in vivo, and in silico methods, with an emphasis on biomolecular interactions. PREREQS: BB 482 [D-] or BB 582 [D-]
BB 484. CHROMATIN AND EPIGENETICS (3).
An in-depth look at "chromatin" (the complex generated by DNA, RNA and complex protein) and how it behaves during gene activation and silencing. Specific examples of long-lasting gene regulation (across cell cycles) will be used to describe the concept of "epigenetic" gene regulation by modification of DNA or proteins. The class will combine more traditional lectures with discussion periods where primary research papers will be analyzed. The target audience is third- and fourth-year students as well as graduate students. PREREQS: ((BI 314 [C-] or BI 314H [C-] or BB 314 [C-] or BB 314H [C-]) and (BI 315 [C-] or BB 315 [C-] or BB 493 [C-] or BB 493 H [C-] )) and prerequisites can be waived with instructor permission.
BB 485. APPLIED BIOINFORMATICS (3). The fundamentals of bioinformatics are presented, which will enable an understanding of the software and methods used in answering questions in bioinformatics. The student will gain a working knowledge of the bioinformatics analysis of contemporary techniques such as databases, gene and genome annotations, functional annotations, sequence alignment, motif finding,
secondary structure prediction, phylogenetic tree construction, high-throughput sequence data, ChIP-Seq peak identification, transcriptome profiling by RNA-Seq, microRNA discovery and target prediction. PREREQS: BI 314 [C-] or BI 314 H [C-] and /or equivalent or by instructor approval.

BB 486. ADVANCED MOLECULAR GENETICS
(3). Combines analyses of state-of-the-art primary literature with lectures that give a historical perspective on some of the most important "model" organisms used in biology, i.e. organisms that have been widely used to decipher the general "rules for life" on the planet. These include examples among the bacteria, plants, fungi, worms, flies and mammals. PREREQS: (BI 314 [C-] or BI 314 H [C-] or BB 314 [C-] ) and (BI 315 [C-] or BB 315 [C-] ) and BB 492 [D-] and prerequisites can be waived with instructor permission.
BB 490. BIOCHEMISTRY 1: STRUCTURE AND FUNCTION (3). Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The first course in the series, BB 490/BB 590, covers how the structure and function of biological macromolecules arises from the organic chemistry of their fundamental building blocks. The organic chemistry of biochemistry will be a focus, including the mechanisms by which enzymes catalyze biological reactions. PREREQS: (CH 332 [C-] or CH 336 [C-] ) and BB 490, BB 491, BB 492 must be taken in order.
BB 491. BIOCHEMISTRY 2: METABOLISM (3). Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The second course in a series, BB 491/BB 591 covers the mechanisms and regulation of the pathways by which cells break down fuel molecules, conserve some of the released energy in the form of reactive nucleotides, and use this energy to create biological building blocks from simpler metabolites PREREQS: (BB 490 [D-] or BB 590 [D-] )

## BB 492. BIOCHEMISTRY 3: GENETIC

 BIOCHEMISTRY (3). Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The third course in the series, BB 492/BB 592 focuses on genetic biochemistry, including the synthesis of nucleotides, DNA synthesis and repair, RNA synthesis and processing, and protein synthesis and modification. PREREQS: (BB 490 [D-] or BB 590 [D-]) and (BB 491 [D-] or BB 591 [D-]) and BB 490/BB 590, BB 491/BB 591, and BB 492/BB 592 must be taken in order.
## BB 493. BIOCHEMISTRY LABORATORY

MOLECULAR TECHNIQUES 1 (3). Laboratory course to accompany BB 450, BB 451 or BB 490, BB 491, BB 492. Lec/lab. PREREQS: (BB 451 [D-] or BB 451H [D-] ) or BB 492 [D-]

BB 494. BIOCHEMISTRY LABORATORY MOLECULAR TECHNIQUES 2 (3). Laboratory to accompany BB 450, BB 451 or BB 490, BB 491, BB 492. Lec/lab. PREREQS: BB 493 [D-] or BB 593 [D-] or BB 315 [D-] or BI 315 [D-]

## BB 496. BIOCHEMISTRY LABORATORY

MOLECULAR MODELING (1). Introduces students from biochemistry and related fields to the fundamentals of computer-based analyses of protein structure and to hands-on manipulation of three-dimensional images. COREQS: BB 494
BB 497. BASIC NUCLEIC ACID AND PROTEIN SEQUENCE ANALYSIS (1). Course teaching students how to carry out computer-based analyses of nucleic acid and protein sequences. COREQS: BB 493

BB 498. ASBMB CERTIFICATION EXAM (0). A comprehensive, standardized test administered by the American Society of Biochemistry and Molecular Biology and used as a direct assessment of the discipline specific knowledge of seniors in the majors administered by the Biochemistry and Biophysics department. A pass
will be given to all students who complete the exam. Contact the Biochemistry and Biophysics Program for more information. PREREQS: Biochemistry and Biophysics major with senior standing.
BB 499. SPECIAL TOPICS (3).
BB 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
BB 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.
BB 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.
BB 507. SEMINAR (1-2). Section 1: Descriptions of campus research programs in biochemistry and biophysics, 1 credit fall. Graded P/N. Student presentations of current research literature, 1 credit winter and spring. Should be taken by all entering departmental graduate students. Section 2: Presentation of departmental research seminar, 2 credits any term. PhD candidates in biochemistry and biophysics present a departmental research seminar in the third or fourth year. One registers in the term the seminar is presented. This course is repeatable for a maximum of 16 credits.

BB 550. GENERAL BIOCHEMISTRY (4).
Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551 and BB 452, three lectures. PREREQS: CH 332. BB 550, BB 551 must be taken in order.

BB 551. GENERAL BIOCHEMISTRY (3).
Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551 and BB 452, three lectures. PREREQS: BB 550
BB 560. ADVANCED CELL BIOLOGY (3). History and theory of cell biology; microscopy and other techniques to study cells and organelles; membranes; organelles; protein import; cell signaling; cytoskeleton; polarity; cell cycle; stem cells; pattern formation; cancer biology PREREQS: BB 314 or BI 314 or BI 314 H or BB 492 or BB 451

BB 581. MACROMOLECULAR STRUCTURE
(3). An introduction to structural biology, the discipline focused on understanding the structural properties of biological macromolecules-especially proteins and nucleic acids--and relating them to their function. Introduces students to the vocabulary and tools of this discipline, covering both the fundamental physico-chemical principles governing the structure and function of biological macromolecules and a selected set of widely used experimental and theoretical approaches to their characterization. This is done through lectures, and textbook and literature readings. Graduate students receive additional experience in scientific reading, writing and presentation through a literature-based term project. PREREQS: BB 450 or BB 490

BB 582. BIOPHYSICS (3). Sequence professional course covering quantitative properties of biological systems and biological phenomena using concepts derived from mathematics and physics. PREREQS: BB 581 [C] and CH 442

## BB 583. ADVANCED BIOCHEMISTRY

## AND BIOPHYSICS: CAPSTONE (3).

Covers applications of advanced biophysical techniques, and how these fit within the larger context of biochemistry, biology and society. Explores techniques and their applications to macromolecules as well as the scientific process. Techniques discussed include in vitro, in vivo, and in silico methods, with an emphasis on biomolecular interactions. PREREQS: BB 582 [C]

## BB 584. CHROMATIN AND EPIGENETICS (3).

An in-depth look at "chromatin" (the complex generated by DNA, RNA and complex protein) and how it behaves during gene activation and silencing. Specific examples of long-lasting
gene regulation (across cell cycles) will be used to describe the concept of "epigenetic" gene regulation by modification of DNA or proteins. The class will combine more traditional lectures with discussion periods where primary research papers will be analyzed. The target audience is third- and fourth-year students as well as graduate students. PREREQS: (BI 314 or BI 314 H ) and BI 315. Prerequisites can be waived with instructor permission.
BB 585. APPLIED BIOINFORMATICS (3). The fundamentals of bioinformatics are presented, which will enable an understanding of the software and methods used in answering questions in bioinformatics. The student will gain a working knowledge of the bioinformatics analysis of contemporary techniques such as databases, gene and genome annotations, functional annotations, sequence alignment, motif finding, secondary structure prediction, phylogenetic tree construction, high-throughput sequence data, ChIP-Seq peak identification, transcriptome profiling by RNA-Seq, microRNA discovery and target prediction. PREREQS: BI 314 or BI 314 H or equivalent or by instructor approval.

## BB 586. ADVANCED MOLECULAR GENETICS

(3). Combines analyses of state-of-the-art primary literature with lectures that give a historical perspective on some of the most important "model" organisms used in biology, i.e. organisms that have been widely used to decipher the general "rules for life" on the planet. These include examples among the bacteria, plants, fungi, worms, flies and mammals. PREREQS: (BI 314 or BI 314 H ) and BI 315 and BB 492. Prerequisites can be waived with instructor permission.
BB 590. BIOCHEMISTRY 1: STRUCTURE AND FUNCTION (3). Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The first course in the series, BB 490/BB 590, covers how the structure and function of biological macromolecules arises from the organic chemistry of their fundamental building blocks. The organic chemistry of biochemistry will be a focus, including the mechanisms by which enzymes catalyze biological reactions. PREREQS: (CH 332 or CH 336). BB 590, BB 591, BB 592 must be taken in order.

BB 591. BIOCHEMISTRY 2: METABOLISM
(3). Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The second course in a series, BB 491/BB 591 covers the mechanisms and regulation of the pathways by which cells break down fuel molecules, conserve some of the released energy in the form of reactive nucleotides, and use this energy to create biological building blocks from simpler metabolites. PREREQS: BB 590 [C] and /or BB 490
BB 592. BIOCHEMISTRY 3: GENETIC BIOCHEMISTRY (3). Sequence professional course to meet the requirements of majors in biochemistry and biophysics. The third course in the series, BB 492/BB 592 focuses on genetic biochemistry, including the synthesis of nucleotides, DNA synthesis and repair, RNA synthesis and processing, and protein synthesis and modification. PREREQS: BB 590 [C] and BB 591 [C] and BB 590, BB 591, and BB 592 must be taken in order.

## BB 593. BIOCHEMISTRY LABORATORY

MOLECULAR TECHNIQUES 1 (3). Laboratory course to accompany BB 450, BB 451 or BB 490, BB 491, BB 492. Lec/lab. PREREQS: (BB 451 or BB 451H) or BB 492

## BB 594. BIOCHEMISTRY LABORATORY

MOLECULAR TECHNIQUES 2 (3). Laboratory to accompany BB 450, BB 451 or BB 490, BB 491, BB 492. Lec/lab. PREREQS: BB 493 or BB 593 or BB 315 or BI 315

BB 596. BIOCHEMISTRY LABORATORY
MOLECULAR MODELING (1). A course to introduce students from biochemistry and related fields to the fundamentals of computer-based analyses of protein structure and to hands-on manipulation of three-dimensional images. COREQS: BB 594

BB 597. BASIC NUCLEIC ACID AND PROTEIN SEQUENCE ANALYSIS (1). Course teaching students how to carry out computer-based analyses of nucleic acid and protein sequences. COREQS: BB 593
BB 599. SPECIAL TOPICS (3).
BB 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
BB 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

BB 605. READING \& CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

BB 607. SEMINAR (1-2). Section 1: Descriptions of campus research programs in biochemistry and biophysics, 1 credit fall. Graded P/N. Student presentations of current research literature, 1 credit winter and spring. Should be taken by all entering departmental graduate students Section 2: Presentation of departmental research seminar, 2 credits any term. PhD candidates in biochemistry and biophysics present a departmental research seminar in the third or fourth year. One registers in the term the seminar is presented. This course is repeatable for a maximum of 16 credits.
BB 650. SELECTED TOPICS IN BIOCHEMISTRY AND BIOPHYSICS (3). Nonsequence courses designed to acquaint student with current research in biochemistry and biophysics. Courses include enzyme kinetics, cell cycle and cancer, neurochemistry, oxidative stress, cell adhesion and motility. Most courses offered alternate years. This course is repeatable for a maximum of 18 credits.
BB 651. SELECTED TOPICS IN BIOCHEMISTRY AND BIOPHYSICS (3). Nonsequence courses designed to acquaint student with current research in biochemistry and biophysics. Courses include cell surfaces, enzyme kinetics, metabolism, neurochemistry, trace element metabolism, biological oxidations, and bioenergetics. Most courses offered alternate years. This course is repeatable for a maximum of 18 credits.

BB 652. SELECTED TOPICS IN BIOCHEMISTRY AND BIOPHYSICS (3). Nonsequence courses designed to acquaint student with current research in biochemistry and biophysics. Courses include enzyme kinetics, metabolism, neurochemistry, trace element metabolism, biological oxidations, and bioenergetics. Most courses offered alternate years. This course is repeatable for a maximum of 18 credits.
BB 662. HORMONE ACTION (3). Mechanisms of action of peptide and steroid hormones and related compounds at the cellular level. CROSSLISTED as ANS 662, MCB 662. PREREQS: BB 551 [C] or BB 592 [C]

## SCHOOL OF LIFE SCIENCES <br> DEPARTMENT OF <br> INTECRATIVE BIOLOCY

## Virginia M. Weis, Head

Cell Biology
Chemical Ecology
Conservation Biology
Developmental Biology
Evolutionary Biology
Genetics
Genomics
Host-Microbe Interactions

Marine Ecology<br>Paleontology<br>Physiology<br>Population Biology

## Graduate Minor <br> Integrative Biology

The Department of Integrative Biology (IB) is part of the School of Life Sciences and receives support for its academic program from the College of Science. In addition to the faculty's activities in research and service, it has teaching responsibilities in the Biology and Zoology majors and Biology minor, as well as courses taken by nearly every undergraduate major at Oregon State University (OSU).

## UNDERGRADUATE DEGREES

IB offers undergraduate BS degrees in Biology and Zoology. The undergraduate Biology major was created for students who wish to obtain broad, interdisciplinary training in the biological sciences. Biology is a common destination for students interested in health professions and provides excellent training for graduate programs in the life sciences. It also offers undergraduate options in Ecology, Genetics, Marine Biology, PreDentistry, Pre-Education, Pre-Medicine, and Pre-Veterinary Medicine. The Zoology major prepares students for a wide range of careers from animal care to research. Both majors benefit from the wealth of departmental course offerings and faculty field and laboratory research. Because of the interdisciplinary nature of the program, students majoring in Biology or Zoology cannot seek a dual major or double degree in both majors or in the BioHealth Sciences and Fisheries and Wildlife majors.

## GRADUATE DEGREES

IB is a vertically integrated department with an internationally recognized graduate program. Faculty work at the level of the cell, organism, and community and have expertise in areas of behavioral ecology, marine biology and ecology, disease ecology, evolutionary biology, conservation biology, environmental physiology, population genetics, genomics, chemical ecology, cell and developmental biology, symbiosis and paleobiology. Detailed information on the graduate faculty and program is available from the Department of Integrative Biology website. IB offers MS and PhD degrees.

## DEPARTMENTAL REQUIREMENT

## Biology Major Field Test

Biology and Zoology majors are required to take a comprehensive, two-hour Biology Major Field Test in order to graduate.

For further information, go to http:// ib.oregonstate.edu/advising/MFT-info.

## UNDERGRADUATE MAJORS AND OPTIONS

## BIOLOGY (BS, HBS)

Also available at OSU-Cascades campus.
The undergraduate BS degree in Biology is designed for students seeking an interdisciplinary background in the life sciences. The major couples a comprehensive biological, physical and quantitative sciences core with a variety of electives that can be catered to meet specific professional goals. Biology majors receive excellent training for graduate and professional programs.
Corvallis Campus students may choose to complete one transcript-visible option in Ecology, Genetics, Marine Biology, PreDentistry/Biology, Pre-Education Biology, Pre-Medicine/Biology, or Pre-Veterinary Medicine. Options in the Biology major require fifteen or fewer additional credits (one term) beyond the basic Biology major and most students can complete the additional course work in four years.

Students in the Biology major must complete BI 211 or BI 211 H, BI 212 or BI 212 H , and BI 213 or BI 213 H with a Cor better to continue on to upper-division Biology (BI) and Zoology (Z) course work. Students must also complete CH $231 / 261$, CH $232 / 262$ or CH $233 / 263$ and CH 331 with a C- or better to continue on to upper-division Chemistry (CH) course work.
Students majoring in Biology cannot seek a dual or double major in Biochemistry and Biophysics, Biochemistry and Molecular Biology, Biohealth Sciences, Microbiology or Zoology.

The BI 197 or 198 seminar must be completed by all first-year students. The BI 298 Integrated Professional Development I: Life Sciences must be completed by all Corvallis campus students.

The major sections and courses within them are arranged in the order they are generally completed.
For further information, see MyDegrees or the Integrative Biology website at http://ib.oregonstate.edu.
Biology Core Courses (103-107 credits)

## Biology Seminars

BI 197. Biology Pre-Health First-Year Seminar (1)
or BI 198. Biology and Zoology First-Year Seminar (1)
BI 298. Integrated Professional
Development: Life Sciences I (1)

## Baccalaureate Core

Communications
Select one of the following:
COMM 111. *Public Speaking (3)

COMM 218. *Interpersonal communication
(3) (for pre-health students except veterinary medicine)
Baccalaureate Core Writing II
Select one of the following (HC 199,
WR 327 or WR 362 recommended):
HC 199. *Honors Writing (3)
WR 222. *English Composition (3)
WR 327. *Technical Writing (3)
WR 362. *Science Writing (3)
Mathematics and Statistics Core
MTH 251. *Differential Calculus (4) and MTH 252. Integral Calculus (4)
or MTH 227. *Mathematics for the Life Sciences: Calculus, Probability and Linear Algebra (4) and MTH 228. *Mathematics for the Life Sciences: Calculus, Probability and Linear Algebra (4)
ST 351. Introduction to Statistical Methods (4)

ST 352. Introduction to Statistical Methods (4)
or ST 411, ST 412. Methods of Data
Analysis $(4,4)$ (alternative series is ST 351 , 411 and 412)

## Chemistry and Physics Core

CH 231, CH 232, CH 233. *General Chemistry $(4,4,4)$
and CH 261, CH 262, CH 263.
*Laboratory for Chemistry 231, 232, 233 (1,1,1)
CH 331, CH 332 Organic Chemistry $(4,4)$ and CH 337. Organic Chemistry Laboratory (4)
PH 201, PH 202, PH 203. *General Physics $(5,5,5)$
BB 450, BB 451. General Biochemistry $(4,3)$

## Biological Sciences Core

Biology students must complete the BI 211, BI 212, BI 213 or BI 211 H, BI 212 H , BI 213 H with a C- or better to continue on to take upper-division Biology (BI) and Zoology (Z) course work. These courses are arranged in the order they are generally taken.
BI 211, BI 212, BI 213. *Principles of Biology $(4,4,4)$
BI 370. Ecology (3)
BI 311. Genetics (4)
BB 314. Cell and Molecular Biology (4)
BI 445. Evolution (3)
MB 302. General Microbiology (3)
MB 303. General Microbiology Laboratory (2)

## BI 498 Senior Biology Major Field Test (0 credits)

Biology majors are required to take a comprehensive, two-hour Biology Major Field Test their final OSU term (or spring term if they will graduate in summer) in order to graduate: BI 498. Senior Biology Major Field Test (0 credits). For further information, go to http://ib.oregonstate. edu/advising/MFT-info.

## Biology Electives (19-28 credits)

Declaring an option will alter the elective categories below, and all options automatically clear the Upper-division Science Electives requirement. See the individual options or MyDegrees for details. Biology and Society electives also
count as baccalaureate core courses.
Biology and Society
Select one course from the following or see option:
AEC 351. *Natural Resource Economics and Policy (3)
AEC/ECON 352. *Environmental
Economics and Policy (3)
BB 331. *Introduction to Molecular Biology (3)

BB 332. *Molecular Medicine (3)
BI 301. *Human Impacts on Ecosystems (3)
BI 345. *Introduction to Evolution (3)
BI 347. *Oceans in Peril (3)
BI 348. *Human Ecology (3)
BI 420. *Viruses in Modern Society (3)
BOT 324. *Fungi in Society (3)
FES/TOX 435. *Genes and Chemicals in Agriculture: Value and Risk (3)
FW 350. *Endangered Species, Society and Sustainability (3)
H 312. *HIV/AIDS and STIS in Modern Society (3)
HSTS 416. *History of Medicine Pre-1800 (4)
MB 330. *Disease and Society (3)
PHL/REL 443. *World Views and
Environmental Values (3)
Z 349. *Biodiversity: Causes, Consequences, and Conservation (3)

## Organismal Biology

Select one course from the following or see option:
BOT 313. Plant Structure (4)
BOT 321. Plant Systematics (4)
BOT 416. Aquatic Botany (4)
BOT 461. Mycology (5)
Z 361. Invertebrate Biology (3)
and Z 362. Invertebrate Biology
Laboratory (2)
Z 365. Biology of Insects (4)
Z 371. Vertebrate Biology (3)
and Z 372. Vertebrate Biology Laboratory (2)

Z 422. Comparative/Functional Vertebrate Anatomy (5)
Z 461. Marine and Estuarine Invertebrate Zoology (4) (Taught at Hatfield Marine Science Center)
Z 477. Aquatic Entomology (4)

## Physiology

Select one course from the following or see option:
BOT 331. Plant Physiology (4)
BOT 332. Laboratory Techniques in Plant Biology (3)
BOT 488. Environmental Physiology of Plants (3)
Z 423. Environmental Physiology (3)
Z 425. Embryology and Development (5)
Z 431. Vertebrate Physiology I (3)
Z 432. Vertebrate Physiology II (3)
Z 440. Insect Physiology (3)
Writing Intensive Course (WIC)
Select one course the following or see option:
BB/BI 317. ${ }^{\wedge}$ Scientific Theory and Practice (3)

BI 306. *^Environmental Ecology (3)
BI/Z 319. ${ }^{\wedge}$ Critical Thinking and
Communication in the Life Sciences (3)
BI 371. ${ }^{\wedge}$ Ecological Methods (3)
BI 373. ${ }^{\wedge}$ Field Methods in Marine Ecology (3)

BI/MB 385. ^Emerging Infectious Disease and Epidemics (3)
BI 388. ${ }^{\wedge}$ Special Topics in Biology (3)
BOT 323. ${ }^{\wedge}$ Flowering Plants of the World (3)
HSTS 415. *^Theory of Evolution and
Foundation of Modern Biology (4)
PHL 474. ${ }^{\wedge}$ Philosophy of Biology (4)

## Upper-division Science Electives (complete an option or two of the three tracks below):

Track I Integrative Biology Course (select one course):
BI 358. Symbiosis and the Environment (3)
BI 375. Field Methods in Ecological
Restoration (5) (OSU Cascades)
BI 427. Paleobiology (4)
BI 456. Phylogenetics (4)
BI 481. Biogeography (3)
BI 483. Population Biology (3)
BI 495. Disease Ecology (3)
MB 480. General Parasitology (3)
Z 350. Animal Behavior (3)
Z 361. Invertebrate Biology (3)
and Z 362. Invertebrate Biology
Laboratory (2) [If not used above.]
Z 371. Vertebrate Biology (3)
and Z 372. Vertebrate Biology Laboratory
(2) [If not used above.]

Z 425. Embryology and Development (5) [If not used above.]
Z 437. Vertebrate Endocrinology (4)
Z 438. Behavioral Neurobiology (3)
Z 461. Marine and Estuarine Invertebrate
Zoology (4) (Hatfield Marine Science
Center) (if not used above)
Z 475. Insect Biodiversity Survey (4)
Track II Experiential Credits (complete
any combination of three credits of the
following):
BI 309. Teaching Practicum (1-3 credits) by approval
BI 401. Research and Scholarship (1-3 credits) -by approval
BI 406. Projects: Curatorial Assistant (1-3 credits) -by approval
BI 409. Advanced Teaching Practicum (1-3 credits) -by approval
BI 410. Internship (1-3 credits) -by approval or international internships approved by the Biology Chief Advisor

## Track III Upper-division Science Elective

Course (select one course):
Select an additional 3+ credit, 300-400 level course from the College of Science
(BB, BHS, BI, BOT, CH, MB, MTH, PH, ST, Z) not used to complete other major requirements. Some courses are excluded (see below). Science courses outside of COS and courses and internships completed internationally may be used by Biology Chief Advisor approval. Courses from other majors, minors or Baccalaureate Core Synthesis requirements not used to meet other major requirements may also be used.

EXCLUDED COURSES: 401-410 credits (except as outlined above or by approval), BB 350 , BB $490-$ BB 492, BI 331-BI 333, BI 341-BI 343, CH 334, CH 335, CH 336, ST 314, Z 331-Z 333, Z 341, Z 343, Z 361/Z 362, Z 461 and any 399 or 499 courses not specifically approved by
the Biology Chief Advisor.

## Total=180

Major Code: 509

## OPTIONS

## ECOLOGY OPTION

The Biology major Ecology option is designed to provide students with a strong background in the theory and applications of ecology and environmental studies. It couples the core biological sciences background from the Biology major with required ecology, conservation, field methods, and environmental policy course work. A variety or upperdivision ecology and organismal biology electives can be chosen based on individual interests. Undergraduate research and internship experience are strongly recommended for option students, and three credits can be applied to the Electives. The Ecology option provides excellent preparation for graduate programs in ecology.

Options in the Biology major require

15 or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional Ecology option course work in four years. Courses used to satisfy the Ecology option requirements also satisfy the Biology and Society, Organismal Biology, Physiology, Writing Intensive Course and Upper-division Science Elective requirements for the Biology major.

It is recommended that Ecology option students take ST 411 and ST 412, Methods of Data Analysis, in place of ST 352, Introduction to Statistical Methods, for the major statistics requirement.

Several Ecology option courses may also be used to satisfy areas of the baccalaureate core, and it is recommended that students take COMM 111, *Public Speaking (3), to complete the Biology major baccalaureate core communications requirement.

For further information, see My-
Degrees or the Integrative Biology web-
site at http://ib.oregonstate.edu.

## Plant Organismal Biology

Select one course from the following:
BOT 321. Plant Systematics (4)
BOT 416. Aquatic Botany (4)
RNG 353. Wildland Plant Identification (4)

## Animal Organismal Biology

Select one course from the following:
Z 361. Invertebrate Biology (3)
and Z 362. Invertebrate Biology Laboratory (2)

Z 371. Vertebrate Biology (3)
and Z 372. Vertebrate Biology Laboratory (2)

Z 477. Aquatic Entomology (4)

## Ecological Methods/Writing

## Intensive Course (WIC)

BI 371. ${ }^{\wedge}$ Ecological Methods (3) or BI 373. ${ }^{\wedge}$ Field Methods in Marine Ecology (3)

## Behavior and Physiological Ecology

Z 350. Animal Behavior (3)
Z 423. Environmental Physiology (3) or BOT 488. Environmental Physiology of Plants (3)

## Population Ecology

Select one course from the following:
BI 483. Population Biology (3)
BOT 442. Plant Population Ecology (3)
FW 320. Introductory Population Dynamics (4)

Community and Ecosystem Ecology
Select one course from the following:
BI 306. *^Environmental Ecology (3)
BI 351. Marine Ecology (3)
BI 481. Biogeography (3)
FES 341. Forest Ecology (3)
FW 321. Applied Community and
Ecosystem Ecology (3)
FW 456. Limnology (5)
FW 479. Wetlands and Riparian Ecology (3)
GEO 484. Introduction to Biogeochemistry (3)

OC/FW 434. Estuarine Ecology (4)

## Conservation and Human Impacts

Select one course from the following:
BI 301. *Human Impacts on Ecosystems (3)
BI 348. *Human Ecology (3)
Z 349. *Biodiversity: Causes, Consequences and Conservation (3)

## Environmental Policy

Select one course from the following:
ANS/FES/FW/SOC 485. *Consensus and Natural Resources (3)
AEC 250. *Introduction to Environmental Economics and Policy (3)
AEC 253. *Environmental Law, Policy and Economics (4)
AEC 351. *Natural Resource Economics and Policy (3)
AEC/ECON 352. *Environmental
Economics and Policy (3)
FES/TOX 435. *Genes and Chemicals in Agriculture: Value and Risk (3)
FOR 462. Natural Resource Policy and Law (3)

FW 350. *Endangered Species, Society and Sustainability (3)
FW 415. Fisheries and Wildlife Law and Policy (3)
PS 475. Environmental Politics and Policy (4)
Upper-division Electives (Select
two courses or one course and
three experiential learning credits):
Track I. Ecology Elective Course(s)
Select one or two courses from below:
BI 358. Symbiosis and the Environment (3)
BI 375. Field Methods in Ecological
Restoration (5) (taught at Cascades)
BI/FW 421. Aquatic Biological Invasions (4)
BI 427. Paleobiology (4)
BI 481. Biogeography (3) (if not taken above)
BI 483. Population Biology (3) (if not taken above)
BI 495. Disease Ecology (3)
BOT 341. Plant Ecology (4)
CH 390. Environmental Chemistry (3)
ENT 420. Insect Ecology (3)
FES/FW 452. Biodiversity Conservation in Managed Forests (3)
or FW 458. Mammal Conservation and Management (4)
or HORT 318. ^Applied Ecology of Managed Ecosystems (3)
FES/FW 445. Ecological Restoration (3)
FW 462. Ecosystem Services (3)
MB 448. Microbial Ecology (3)
ST 435. Quantitative Ecology (3)
Z 475. Insect Biodiversity Survey (4)
Track II. Experiential Learning Credits
Complete any combination of three credits of the following if taking only one course above:
BI 401. Research and Scholarship (1-3 credits) -by approval
BI 406. Projects: Curatorial Assistant (1-3 credits) -by approval
BI 410. Internship (1-3 credits) -by approval or international internships approved by the Biology Chief Advisor

## Total=34-42 credits

Footnotes:

* Baccalaureate Core Course
${ }^{\wedge}$ Writing Intensive Course (WIC)
Option Code: 715

## GENETICS OPTION

The Biology major Genetics option is designed to provide a solid background in genetic theory and methods, as well as their application to evolutionary questions. Option students couple the core biological sciences background from the Biology major with genetics laboratoryintensive course work in addition to electives in the areas of evolutionary genetics and bioinformatics. Undergraduate research or internship experience is strongly recommended for option students, and three credits can be applied to the Upper-division Science Elective requirements. The Genetics option is an excellent way to prepare for graduate programs in genetics and evolutionary biology.

Options in the Biology major require fifteen or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional course work in the Genetics option in four years.
Courses used to satisfy the Genetics option requirements also satisfy the Physiology, Writing Intensive and Upperdivision Science Elective requirements for the Biology major.

The statistics courses in the Genetics option also complete half of the Biology major statistics requirement (ST 352).
It is recommended that Genetics option students take COMM 111, *Public Speaking (3), to complete the Biology major baccalaureate core communications requirement.

For further information, see MyDegrees or the Integrative Biology website at http://ib.oregonstate.edu.

## Core ( 22 credits)

BB/BI 315. Molecular Biology Laboratory (3)
or BB 493 Biochemistry Laboratory
Molecular Techniques 1 (3) (BB/BI 315 recommended)
BB 494. Biochemistry Laboratory Molecular
Techniques 2 (3)
BI 483. Population Biology (3)
ST 411, ST 412. Methods of Data Analysis
$(4,4)$ (following completion of ST 351)
Z 425. Embryology and Development (5)

## Writing Intensive Course

Select one course from the following:
BB/BI 317. ^Scientific Theory and Practice (3)
BI/Z 319. ${ }^{\wedge}$ Critical Thinking and
Communication in the Life Sciences (3)

## Evolutionary Genetics Elective

Select one course from the following:
BB 486. Advanced Molecular Genetics (3)
BI 456. Phylogenetics (4)
BOT 460. Functional Genomics (3)
BOT 475. Comparative Genomics (4)

## Bioinformatics

Select one course from the following:
BB 485. Applied Bioinformatics (3)
BOT 476. Introduction to Computing in the Life Sciences (3)

## Upper-Division Elective (complete one of the tracks below) <br> Track I Experiential Learning Credits <br> (complete any combination of three credits of the following): <br> BI 401. Research and Scholarship (1-3 <br> credits) -by approval <br> BI 410. Internship (1-3 credits) -by approval or international internships approved by the Biology Chief Advisor

Track II Science Course (select one course): One 3+ credit, 300-400 level course from the College of Science (BB, BHS, BI, BOT, CH, MB, MTH, PH, ST, and Z) may be used to meet this requirement with the exception of the courses listed below as excluded. Students who do not complete BI 315 Molecular Biology Laboratory as part of the Genetics option must take a qualifying WIC course which can be used to meet this requirement. Other science courses outside of College of Science and courses taken internationally may be used by biology chief advisor approval. Courses from other majors, minors or baccalaureate core requirements not used to meet requirements above may also be used.

EXCLUDED COURSES: 401-410 credits (except as outlined above or by approval), BB 350, BB 490-BB 492, BI 331-BI 333, BI 341-BI 343, CH 334, CH 335, CH 336, ST 314, Z 361/Z 362, Z 461 and any 399 or 499 courses not specifically approved.

## Total=28-29 credits

## Footnotes:

* Baccalaureate Core Course
$\wedge$ Writing Intensive Course (WIC)

## Option Code: 517

## MARINE BIOLOGY OPTION

The Marine Biology option is designed to give students a strong background in the biology of marine organisms and their habitats. The core biological sciences background of the Biology major is coupled with field and laboratory course work in marine biology, ecology, conservation, and oceanography. The option emphasizes research and includes experiential courses completed in residence at the OSU Hatfield Marine Science Center in Newport, Oregon. Additional research or internship experience is strongly recommended for option students, and three credits can be applied to the option electives. The Marine Biology option provides excellent preparation for graduate programs in marine biology. Students completing the Marine Biology option cannot seek the Marine Biology and Ecology minor.
Options in the Biology major require 15 or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional Marine Biology option course work in four years. At least one term in residence at Hatfield Marine Science

Center is required (spring). Courses used to satisfy the Marine Biology option also satisfy the Biology and Society, Organismal Biology, Physiology, Writing Intensive Course and the Upper-division Science Electives in the Biology major.
The Marine Biology option requires acceptance into the BI 450 Marine Biology and Ecology course, which is typically taken spring term of junior year at Hatfield Marine Science Center. The course covers marine invertebrates, algae and fishes, as well as sections on marine ecology, conservation and policy. Students apply to, and are accepted, the fall term before the spring they plan to attend. Applications are available in the Integrative Biology office in Cordley Hall 3029.
It is recommended that Marine Biology option students take COMM 111 *Public Speaking (3) to complete the Biology major baccalaureate core communications requirement.

For further information, see MyDegrees or the Integrative Biology website at http://ib.oregonstate.edu.

## Core

BI 150. Introduction to Marine Biology (3) or select an additional upper-division marine elective below
BI $4500^{\wedge}$ Marine Biology and Ecology (15) (Admission by application only) (Taught at Hatfield Marine Science Center)
OC 201. *Oceanography (4)
OC 440. Introduction to Biological
Oceanography (4) (recommended)
or OC/FW 434. Estuarine Ecology (4)
Z 423. Environmental Physiology (3)
Oceans and Society (select one course from the following):
AEC 353. Introduction to Coastal and
Marine Resource Economics (3)
BI 347. *Oceans in Peril (3)
OC 333. Oceans, Coasts and People (3)

## Upper-division Elective

Complete one of the tracks below. If you did not complete BI 150, Introduction to Marine Biology, above, select a Marine Elective Course to replace it.

## Track I Marine Elective Course

## Select one course:

BI/FW 302. Biology and Conservation of Marine Mammals (4) (Taught at Hatfield Marine Science Center) (FW 301 lab is optional but recommended)
BI 358. Symbioses and the Environment (3)
BI/FW 421. Aquatic Biological Invasions (4)
(Taught at Hatfield Marine Science Center)
FW 316. Systematics of Fishes (3)
or FW 472. Advanced Ichthyology (3)
FW 331. Ecology of Marine and Estuarine
Birds (4) (Taught at Hatfield Marine
Science Center)
FW/BI 464. Marine Conservation Biology (3)
FW 469. Methods in the Physiology and
Behavior of Marine Megafauna (3) (Taught
at Hatfield Marine Science Center)
FW 476. Fish Physiology (4)
MB 314. Aquatic Microbiology (3)

Track II Experiential Learning Credits Complete any combination of three credits of the following:
BI 401. Research and Scholarship (1-3 credits) (By approval)
BI 406. Projects: Curatorial Assistant (1-3 credits) (By approval)
BI 410. Internship (1-3 credits) - by approval

## Total 35-36 credits

Footnotes:

* Baccalaureate Core Course (BCC)
${ }^{\wedge}$ Writing Intensive Course (WIC)
Option Code: 572

## PHYSIOLOGY AND BEHAVIOR OPTION

The Biology major Physiology and Behavior option is designed to provide a rigorous foundation in the comparative physiology and behavior of animals. Core biological sciences from the Biology major are coupled with course work in behavior, physiology and organismal biology. Undergraduate research or internship experience is strongly recommended for option students, and three credits can be applied to the electives for the option. The Physiology and Behavior option provides excellent preparation for graduate programs in animal behavior, physiology and other areas of organismal biology.
Options in the Biology major require fifteen or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional course work in the Physiology and Behavior option in four years. Courses used to satisfy the Physiology and Behavior option requirements also satisfy the Organismal Biology, Physiology, Writing Intensive Course and Upperdivision Science Elective requirements for the Biology major.
Students may pursue either the Physiology and Behavior, Pre-Dental, Pre-Medical or Pre-Veterinary Medicine options with the Biology major-no dual combinations are permitted.

It is recommended that Physiology and Behavior option students take COMM 111, *Public Speaking (3), to complete the Biology major Baccalaureate Core communications requirement. Students should also consider taking PSY 202, General Psychology (3), which is optional but required for some of the Psychology elective courses.
For further information, see MyDegrees or the Integrative Biology website at http://ib.oregonstate.edu.

## Core (23-25 credits):

PSY 201. General Psychology (3)
BB/BI 315. Molecular Biology Laboratory (3)
or BB 493. Biochemistry Laboratory Molecular Techniques I (3)
or Z 425. Embryology and Development (5)
BI/Z 319. ${ }^{\wedge}$ Critical Thinking and
Communications in the Life Sciences (3) Z 350. Animal Behavior (3)

Z 431. Vertebrate Physiology I (3)
Z 432. Vertebrate Physiology II (3)
Z 441. Vertebrate Physiology Laboratory (2)
or Z 442. Vertebrate Physiology
Laboratory (2)
Z 438. Behavioral Neurobiology (3)

## Organismal Biology:

Select one course from below:
Z 361. Invertebrate Biology (3)
and Z 362. Invertebrate Biology
Laboratory (2)
Z 371. Vertebrate Biology (3)
and Z 372. Vertebrate Biology Lab (2)
Z 422. Comparative/Functional Vertebrate Anatomy (5)
Z 461. Marine and Estuarine Invertebrate Zoology (4) (Taught at Hatfield Marine Science Center)

## Physiology and Behavior:

Select one course from below:
ANS 441. Topics in Animal Learning (3)
BI 358. Symbiosis and the Environment (3)
PSY 340. Cognition (4)
or ANS 341. Animal Behavior and
Cognition (3)
PSY 432. Physiological Psychology (3)
Z 423. Environmental Physiology (3)
Z 425. Embryology and Development (5) (if not used above)
Z 437. Vertebrate Endocrinology (3)

## Additional Upper-Division Science

 ElectiveComplete one of the two tracks below:
Track I. Additional Physiology and
Behavior Course
Select from the list above.
Track II. Experiential Learning
Complete any combination of three credits of the following:
BI 401. Research and Scholarship (1-3 credits) -by approval
BI 410. Internship (1-3 credits) -by approval or international internships approved by the Biology Chief Advisor.

## Track III. Upper-division Science Elective

 CourseSelect an additional 3+ credit, 300-400 level course from the College of Science
(BB, BHS, BI, BOT, CH, MB, MTH, PH, ST, Z) not used to complete other major requirements. Some courses are excluded (see below). Science courses outside of COS and courses and internships completed internationally may be used by Biology Chief Advisor approval. Courses from other majors, minors or Baccalaureate Core Synthesis requirements not used to meet other major requirements may also be used.

EXCLUDED COURSES: 401-410 credits, BB 350, BB 490-BB 492, BI 331BI 333, BI 341-BI 343, CH 334, CH 335, CH 336, ST 314, and any 399 or 499 courses not specifically approved.

## Total=33-36 credits

## Footnotes:

* Baccalaureate Core Course (BCC)
${ }^{\wedge}$ Writing Intensive Course (WIC)
Option Code: 743

## PRE-DENTISTRY/BIOLOGY OPTION

The Pre-Dentistry/Biology option is designed to meet the requirements for most dental schools in the U.S., but students should consult the requirements for specific schools before they apply because requirements can change. The option couples the comprehensive biological sciences background of the Biology major with human physiology laboratory experiences and important social science requirements. Dedicated health profession advisors work with Pre-Dentistry/ Biology option students to integrate essential professional experiences during their time at OSU.

Options in the Biology major require fifteen or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional Pre-Dentistry/Biology option course work in four years. Students may not complete any combination of the Pre-Medical, Pre-Dental option or Physiology and Behavior options. Completion of the Pre-Dental option requires a 3.0 cummulative GPA in major and option course work. Courses used to satisfy the Pre-Dentistry/Biology option requirements also satisfy the Organismal Biology, Physiology, Writing Intensive Course and Upper-division Science Electives requirements in the Biology major. Several courses may also be used to satisfy areas of the baccalaureate core.

Students may pursue either the PreDentistry, Pre-Veterinary Medicine, Pre-Medicine or Physiology and Behavior options within the Biology major -no combinations of these options are permitted.

Students may pursue either the PreMedicine, Pre-Dental or Physiology and Behavior options within the Biology major - no dual combinations of these options are permitted.

Students interested in private practice should also consider taking BA 215, Fundamentals of Accounting (3), or BA 260, Introduction to Entrepreneurship (4).

It is recommended that Pre-Dentistry/ Biology option students take COMM 218, *Interpersonal Communication (3), to complete the Biology major baccalaureate core communications requirement.

The option sections and courses within them are arranged in the order they are generally completed.

For further information, see MyDegrees or the Integrative Biology website at http://ib.oregonstate.edu.

## Core ( $\mathbf{2 6}$ credits)

BHS 107. Health Professions: Dental (1) PHL 205. *Ethics (4)
or PHL/REL 444. *Biomedical Ethics (4) PSY 201, 202. *General Psychology $(3,3)$ BI 331, BI 332, BI 333. Advanced Human Anatomy and Physiology (3,3,3) BI 341, BI 342, BI 343. Advanced Human

Anatomy and Physiology Laboratory $(2,2,2)$

## Writing Intensive Course (WIC)

Select one course from the following:
BB/BI 317. ^Scientific Theory and Practice (3)

BI/Z 319. ${ }^{\wedge}$ Critical Thinking and
Communication in the Life Sciences (3)
HSTS 417. *^History of Medicine (4)

## Physiology Elective

Select one course from the following:
BI 451. Functional Anatomy of the Human Muscular System (4) (By application only - limited summer enrollment)

PSY 432. Physiological Psychology (4)
Z 425. Embryology and Development (5)
Z 438. Behavioral Neurobiology (3)
Upper-division Elective (complete

## one of the tracks below):

Track I Experiential Learning Credits
(complete any combination of three credits of the following):
BI 309. Teaching Practicum (1-3 credits) by approval
BI 401. Research and Scholarship (1-3 credits) -by approval
BI 409. Advanced Teaching Practicum (1-3 credits) -by approval
Track II Science Elective Course (select one course):
One 3+ credit, 300-400 level course from the College of Science (BB, BHS, BI, BOT, CH, MB, MTH, PH, ST, and Z) may be used to meet this requirement with the exception of the courses listed below as excluded. Other science courses outside of COS and courses or internships taken internationally may be used by Biology chief advisor approval. Courses from other majors, minors or baccalaureate core requirements not used to meet requirements above may also be used.

EXCLUDED COURSES: 401-410 credits (except as outlined above or by approval), BB 350, BB 490-BB 492, BI 331-BI 333, BI 341-BI 343, CH 334, CH 335, CH 336, ST 314, Z 361/362, Z 461 and any 399 or 499 courses not specifically approved.

## Total=35-40 credits

## PRE-EDUCATION BIOLOGY OPTION

The Biology major Pre-Education option is designed to complete the requirements for the OSU Science Education master's degree and other U.S. graduate licensure programs for secondary education, but students should consult the requirements for specific schools before they apply because requirements can change. The option couples the strong background of the Biology major with core science education and science electives, as well as a required practicum experience. Dedicated education advisors work with Pre-

Education option students to integrate teaching and other essential professional experiences during their time at OSU.
Options in the Biology major require 15 or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional Pre-Education option course work in four years. Courses used to satisfy the Pre-Education option requirements also satisfy the upper-division science electives requirements in the Biology major. The courses selected below must total 15 or more upper-division (300-400) credits.

It is recommended that Pre-Education option students take COMM 111 *Public Speaking (3) to complete the Biology major OSU Baccalaureate Core communications requirement.

For further information, see MyDegrees or the Integrative Biology website at http://ib.oregonstate.edu.
Science Education Core (10 credits)
HDFS 313. Adolescent Development (4)
SED 412/SED 512. Technology Foundations for Teaching Math and Science (3)
SED 413/SED 513. Inquiry in Science and Science Education (3)

## Practicum Experience (complete

three or more credits)
Select 3 or more credits involving middle and/or high school experience-this must total 60
hours or more of classroom experience:
ED 309. Field Practicum (3)
ED 409. Practicum/Clinical Experience
(September Experience) (1-3)

## Chemistry Course

Select one course from the following:
BB 493. Biochemistry Laboratory Molecular
Techniques 1 (3)
CH 324. Quantitative Analysis (4)
CH 390. Environmental Chemistry (3)

## Integrated Science Courses

Select two courses from the

## following:

ATS 210. Introduction to Atmospheric
Sciences (3) [Terminated fall 2017]
ATS 320. *The Changing Climate (3)
[Terminated fall 2017]
GEO 201. *Physical Geology (4)
GEO 202. *Earth Systems Science (4)
GEO 203. *Evolution of Planet Earth (4)
GEO 221. *Environmental Geology (4)
GEO 305. *Living With Active Cascade
Volcanoes (3)
GEO 306. *Minerals, Energy, Water and the Environment (3)
GEO 307. *National Park Geology and
Preservation (3)
GEOG 323. ^Climatology (4)
OC 201. *Oceanography (4)

## Total=22-25 credits

Option Code: 226

PRE-MEDICINE/BIOLOGY OPTION
The Pre-Medicine/Biology option is designed to meet the requirements for most medical schools (Track I) or physician assistant schools (Track II) in the U.S., but students should consult the requirements for specific schools before they apply because requirements can change. The option couples the comprehensive biological sciences background of the Biology major with intensive physiology laboratory experiences and important social science requirements. Dedicated health profession advisors work with Pre-Medicine/Biology option students to integrate essential professional experiences during their time at OSU

Options in the Biology major require fifteen or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional Pre-Medicine/Biology option course work in four years. Biology students may obtain a Pre-Medicine option by satisfying the Core and either Track I or Track II below with a 3.0 or higher cummulative GPA in major and option course work. Courses used to satisfy the Pre-Medicine option requirements also satisfy the Biology and Society, Organismal Biology, Physiology, Writing Intensive Course and Upper-Division Science Electives requirements in the Biology major. Several courses may also be used to satisfy areas of the baccalaureate core.

Students may pursue either the PreMedicine, Pre-Dentistry, Pre-Veterinary Medicine or Physiology and Behavior options within the Biology major-no dual combinations of these options are permitted.
Students interested in private practice should also consider taking BA 215, Fundamentals of Accounting (3), or BA 260, Introduction to Entrepreneurship (4).

It is recommended that Pre-Medicine/ Biology option students take COMM 218, *Interpersonal Communication (3), to complete the Biology major baccalaureate core communications requirement.
The option sections and courses within them are arranged in the order they are generally completed.
For further information, see MyDegrees or the Integrative Biology website at http://ib.oregonstate.edu.

## PRE-VETERINARY MEDICINE OPTION

The Biology major Pre-Veterinary Medicine option is designed to meet OSU College of Veterinary Medicine prerequisites and other U.S. veterinary schools, but students should consult the requirements for specific schools before they apply because requirements can change. The PreVeterinary Medicine option couples the
strong biological sciences background of the Biology major with core animal physiology laboratories and animal-focused science electives. Dedicated professional advisors work with Pre-Veterinary Medicine option students to integrate animal handling and other essential professional experiences during their time at OSU.

Options in the Biology major require fifteen or fewer additional credits (one term) beyond the basic Biology major, and most students can complete the additional Pre-Veterinary Medicine option course work in four years. Completion of the Pre-Veterinary Medicine option requires a 3.0 cummulative GPA in major and option course work. Courses used to satisfy the Pre-Veterinary Medicine option requirements also satisfy the Organismal Biology, Physiology, Writing Intensive Course and Upper-division Science Elective requirements in the Biology major. Several courses may also be used to satisfy areas of the baccalaureate core.
Students may pursue either the PreVeterinary Medicine, Pre-Dentistry, Pre-Medicine or Physiology and Behavior options within the Biology major-no dual combinations of these options are permitted.
Students interested in private practice should also consider taking BA 215, Fundamentals of Accounting (3), or BA 260 Introduction to Entrepreneurship (4).

It is recommended that Pre-Veterinary Medicine option students take COMM 111, *Public Speaking (3), to complete the Biology major baccalaureate core communications requirement.
The option sections and courses within them are arranged in the order they are generally completed.

For further information, see MyDegrees or the Integrative Biology website at http://ib.oregonstate.edu.

## Core ( $\mathbf{2 0}$ credits)

## ZOOLOGY (BS, HBS)

]The Zoology major offers scientific training in the diversity, organismal biology, ecology, and evolution of animals. The major core provides a solid foundation in the biological sciences while electives allow students to cater course work to meet specific interests in animal biology. Zoology majors enter such varied fields as animal care and husbandry, curatorial and museum management, laboratory animal research, field biology and conservation, and environmental management and policy. The Zoology major is not suitable for pre-veterinary medicine students as it does not include the required prerequisite course work (see the option in Pre-Veterinary Medicine in the Biology major).

Students in the Zoology major must complete BI 211 or BI 211 H , BI 212 or BI 212 H and BI 213 or BI 213 H with a C- or better to continue on to upper-division Biology (BI) and Zoology (Z) course work. Students must also complete their General Chemistry series and CH 331 Organic

Chemistry with a C- in each term to move on to other Chemistry ( CH ) course work.

Students majoring in Biology, BioHealth Sciences, Fisheries and Wildlife Sciences, or Zoology cannot seek a dual or double major in any combination of these four majors. Zoology majors cannot seek the Biology minor.
The BI 198 seminar must be completed by all first-year students. The BI 298 Integrated Professional Development I: Life Sciences must be completed by all students.
For further information, see MyDegrees or the Integrative Biology website at http://ib.oregonstate.edu.

## Upper-Division Science Electives

Two additional 3+ credit science courses not used above or one course and 3 credits of approved experiential learning (BI 309, 410, 406, 409, 410) outlined below:
Any 300-400 level courses from the College of Science may be used to meet this requirement with the exception of the courses listed below as excluded. Other science courses outside of COS and courses taken internationally can be used by chief advisor approval. Courses from other majors, minors or baccalaureate core synthesis requirements not used to meet the requirements above may also be used. Approved BI 309 Teaching Practicum, BI 401 Research, BI 406 Projects: Curatorial Assistant, BI 409 Advanced Teaching Practicum or BI 410 Internship or IE3 Global Internship credits can be used to meet 3 credits (one course) of this requirement.
EXCLUDED COURSES: 401-410 credits (except as outlined above or by approval), BI 331-BI 333, BI 341-BI 343, BI 351 and BI 450 (unless specically approved and not used above), CH 334, 335, 336, ST 314, Z 361/362, Z 461 and any 399 or 499 courses not specifically approved.
BI 498. Senior Biology Major Field Test (0 credits)

Zoology majors are required to take a comprehensive, two-hour Biology Major Field Test their final OSU term (or spring term if they will graduate in summer) in order to graduate: BI 498. Senior Biology Major Field Test (0 credits). For further information, go to http://ib.oregonstate. edu/advising/MFT-info.

## UNDERGRADUATE MINORS

## BIOLOGY MINOR

Administered by the Department of Integrative Biology under the School of Life Sciences.

Students majoring in Biochemistry and Biophysics, Biochemistry and Molecular Biology, Biohealth Sciences, Biology, Botany and Plant Pathology, Microbiology and Zoology cannot declare the Biology minor. The courses below may be shared with other majors outside of those listed above.

The Biology minor includes a required introductory biology sequence with a chemistry prerequisite or corequisite for the second term of each series. A term of organic chemistry, CH 331 or 334, is required to take BB 314 or BI 314, Cell and Molecular Biology, and some of the listed physiology courses. A C- or better in the BI 21x or 20x series is required to complete the minor.

## Required (16)

BI 211, BI 212, BI 213. *Principles of Biology ( $4,4,4$ )
or BI 204, BI 205, BI 206. *Introductory
Biology I,II,III (4,4,4)
BI 311. Genetics (4)
Electives: Choose one course in each of the following subject areas:
Cellular and Molecular Biology (3-4 credits):
BB 314. Cell and Molecular Biology (4)
BB 331. *Introduction to Molecular Biology (3)

## Ecology (3-4 credits):

BI 348. *Human Ecology (3)
BI 351. Marine Ecology (3)
BI 370. Ecology (3)
BOT 341. Plant Ecology (4)
MB 448. Microbial Ecology (3)

Z 349. *Biodiversity: Causes, Consequences, and Conservation (3)

## Evolution (3 credits):

BI 345. *Introduction to Evolution (3)
BI 445. Evolution (3)
Organismal and Physiology (3-4 credits):
BI 331. Advanced Human Anatomy and Physiology (3)
and BI 341 Advanced Human Anatomy
and Physiology Laboratory (2)
BOT 313. Plant Structure (4)
BOT 321. Plant Systematics (4)
BOT 331. Plant Physiology (4)
BOT 425. Flora of the Pacific Northwest (3)
BOT 488. Environmental Physiology of Plants (3)
MB 302. General Microbiology (3)
Z 315. Dinosaur Biology (3)
Z 350. Animal Behavior (3)
Z 361. Invertebrate Biology (3)
Z 365. Biology of Insects (4)
Z 371. Vertebrate Biology (3)
Z 423. Environmental Physiology (3)
Z 431. Vertebrate Physiology I (3)
Z 432. Vertebrate Physiology II (3)
Z 440. Insect Physiology (3)
Z 473. Herpetology (3)

## Total=28-32 credits

## Minor Code: 509

## MARINE BIOLOGY AND ECOLOGY MINOR

Administered by the Department of Integrative Biology under the School of Life Sciences.
Students must complete the core of the minor and either track outlined below. The minor requires one or more terms in residence at Hatfield Marine Science Center, typically during junior year spring or summer. The courses in the Marine Biology and Ecology minor may be shared with major requirements. Students cannot receive any combination of the Biology minor, Marine Biology and Ecology minor or the Marine Biology option. The minor requires the BI 211, 212 or 213 series and a term or more of chemistry for required course work. The BI 373 and BI 450 courses require ST 351 and have enrollment restrictions.

The BI 450 Marine Biology and Ecology course (see Track II) is taught each spring term at Hatfield Marine Science Center and is by application only. It covers marine invertebrates, algae and fishes, as well as sections on marine ecology, conservation and policy. Students apply to and are accepted the fall term before the spring they plan to attend. Applications are available fall term in the Integrative Biology office in Cordley 3029.

The BI 111, Introduction to Marine Life in the Sea (1), is an optional weekend experiential course at Hatfield Marine Science Center that compliments the minor, particularly for students with

## little or no previous marine experience.

## Complete Track I or II and Two <br> Electives

## Track I (24-25 credits)

BI 150. Introduction to Marine Biology (3)
BI 351. Marine Ecology (3)
BI 373. ^Field Methods in Marine Ecology (3)
or FW 493. Field Methods for Marine
Research (3)
BOT 416. Aquatic Botany (4)
FW 315. Ichthyology (3)
OC 201. *Oceanography (4)
Z 361. Invertebrate Biology (3) and Z 362. Invertebrate Biology Laboratory (2) or Z 461. Marine and Estuarine Invertebrate Zoology (4) (Taught at
Hatfield Marine Science Center)

## Track II (22 credits)

BI 150. Introduction to Marine Biology (3)
BI 450. ${ }^{\wedge}$ Marine Biology and Ecology (15) (admission by application only) (Taught at Hatfield Marine Science Center)
OC 201. *Oceanography (4)

## Electives (6-8 credits)

Select 2 courses from below (6-8 credits):
BI/FW 302. Biology and Conservation of Marine Mammals (4)
BI 347. *Oceans in Peril (3)
BI 358. Symbiosis and the Environment (3)
BI/FW 421. Aquatic Biological Invasions (4)
(Taught at Hatfield Marine Science Center)
BI/FW 464. Marine Conservation Biology (3)
FW 316. Systematics of Fishes (3)
FW 331. Ecology of Marine and Estuarine
Birds (4) (Taught at Hatfield Marine
Science Center)
FW/OC. 434 Estuarine Ecology (4)
MB 314. Aquatic Microbiology (3)
OC 332. Coastal Oceanography (3)
OC 333. Oceans, Coasts and People (3)
OC 440. Biological Oceanography (4)
Z 423. Environmental Physiology (3)

## Total=28-33

## Footnotes:

${ }^{\wedge}$ Writing Intensive Course (WIC)

## Minor Code: 695

## INTEGRATIVE BIOLOGY (MS, PhD)

## Graduate Areas of Concentration

 Behavioral ecology, behavioral endocrinology, cell biology, chemical ecology, conservation biology, developmental biology, evolutionary biology, genetics, genomics, hostmicrobe interactions, marine ecology, paleontology, physiology, population biologyThe Department of Integrative Biology offers graduate work leading toward the Master of Arts, Master of Science, and Doctor of Philosophy degrees in all areas of biology ranging from molecular to community levels.

At present there are active research programs involving graduate students in the study of comparative immunobiology and pathology; cellular interactions and tissue differentiation; neuronal development; cytogenetics; behavioral
biology at the neurophysiological, endocrinological, and ecological levels; environmental physiology; vertebrate functional morphology; reproductive biology; natural products chemistry; marine biology; physiologic and biochemical adaptation; genetics and evolution of populations; experimental marine, terrestrial, and freshwater population and community ecology; biodiversity and conservation biology.

Research is conducted in laboratories on campus, at the Malheur Field Station in southeastern Oregon, at the Hatfield Marine Science Center in Newport, the H.J. Andrews Experimental Forest, and in natural areas of the Cascade Mountains and Willamette Valley. Students also have entered into cooperative research programs in other departments, with the Oregon Health and Science University in Portland, and with the Primate Research Center in Beaverton.

As part of their training, all students participate in the departmental seminar program, and doctoral students spend at least one year as teaching assistants. Most students are supported by graduate teaching or research assistantships. Students are expected to have broad competency in biology. The master's program leads to a thesis or research report (nonthesis option) on a specific problem; the PhD program emphasizes independent thesis research on a major topic at the forefront of the chosen field.

## Major Code: 6300

## INTEGRATIVE BIOLOGY <br> GRADUATE MINOR

For more details, see the departmental advisor.

## Minor Code: 6310 <br> ■ BIOLOGY COURSES

BI 101. *GENERAL BIOLOGY (4). Diversity of life, ecology, population biology, and human environmental impacts. An introductory course in the principles and methods of biology, intended for majors in fields other than the biological sciences. Lec/lab/rec. (Bacc Core Course)
BI 102. *GENERAL BIOLOGY (4). Mendelian genetics, molecular genetics, human genetics, genetic engineering, evolution, and behavior. An introductory course in the principles and methods of biology, intended for majors in fields other than the biological sciences. Lec/lab. (Bacc Core Course)
BI 103. *GENERAL BIOLOGY (4). Human anatomy and physiology, and human diseases. An introductory course in the principles and methods of biology, intended for majors in fields other than the biological sciences. Lec/lab. (Bacc Core Course)
BI 107. HEALTH PROFESSIONS: DENTAL (1).
Discussion of matters relating to a dental career. Includes application procedures, the importance of various requirements, admissions, professional school curricula, financing education and related matters. Speakers are included. Graded P/N.
BI 109. HEALTH PROFESSIONS: MEDICAL (1).
Discussion of matters relating to a medical career. Includes application procedures, the importance of various requirements, admissions, professional
school curricula, financing education, and related matters. Speakers are included. Graded P/N.

BI 111. INTRODUCTION TO MARINE LIFE IN THE SEA: MARINE HABITATS (1). A fieldfocused learning experience exploring the varied marine life and habitats on the Oregon coast, including rocky shores, sandy beaches, mud flats, bays and estuaries. Students will also be introduced to the breadth of marine science course offerings and research at Oregon State University's Hatfield Marine Science Center located in Newport, Oregon. Graded P/N.
BI 150. INTRODUCTION TO MARINE BIOLOGY
(3). Survey of marine organisms, the environments they inhabit, and their evolutionary adaptations for thriving in those environments. The course will also highlight current conservation challenges that threaten marine life, such as climate change overfishing, and pollution.
BI 197. BIOLOGY PRE-HEALTH FIRST-YEAR SEMINAR (1). Integrative Biology faculty and other professionals introduce a variety of human health professions including dentistry, medicine, pharmacy, physician assistant and others (veterinary medicine students take BI 198 instead). Pre-health experiential learning opportunities and paths to academic and professional success in the Biology major are explored. Graded P/N. PREREQS: Open to first-year students and sophomores in biology, undeclared science, and UESP.

BI 198. BIOLOGY AND ZOOLOGY FIRST-
YEAR SEMINAR (1). Biology professionals and Integrative Biology faculty introduce a variety of life science careers in ecology, education, genetics, marine biology, veterinary medicine, zoology and other non-health profession fields (health profession students take BI 197). Experientia learning opportunities and paths to academic and professional success in the Biology and Zoology majors are explored. Graded P/N. PREREQS: Open to first-year students and sophomores in biology, undeclared science, and UESP.

BI 199. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

BI 199H. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.

BI 204. *INTRODUCTORY BIOLOGY I (4). Foundations of biological sciences including scientific inquiry, genetics, evolution, and ecology. Significant emphasis throughout on the application of core concepts to solve human and environmental problems. Laboratory emphasizes skills in critical thinking, scientific writing, and experimental design. Not intended for pre-health profession students. Lec/lab. (Bacc Core Course)
BI 205. *INTRODUCTORY BIOLOGY II (4). Fundamental concepts in molecular and cellular biology, beginning with biomolecules and the origin of life, and ending with genomics Significant emphasis throughout on applications of biotechnology to solve human problems Laboratory emphasizes skills in critical thinking, scientific writing, and experimental design. Not intended for pre-health profession students. Lec/ lab. (Bacc Core Course) PREREQS: CH 121* [D-] or CH 201* [D-] or ((CH 231* [D-] or CH 231H* D-] ) and (CH 261* [D-] or CH 261H* [D-] or CH 271* [D-] or CH 271H* [D-] ))

BI 206. *INTRODUCTORY BIOLOGY III (4). Basic plant and animal physiology from an evolutionary perspective. Significant emphasis on topics of mportance to human society, including human and plant disease. Laboratory emphasizes skills in critical thinking, scientific writing, and experimenta design. Not intended for pre-health professional students. Lec/lab. (Bacc Core Course) PREREQS: CH 121* [D-] or CH 201* [D-] or ((CH 231* [D-] or CH 231H* [D-] ) and (CH 261* [D-] or $\mathrm{CH} 261 \mathrm{H}^{*}$ [D-] or CH 271* [D-] or $\mathrm{CH} 271 \mathrm{H}^{*}$ [D-] ))
BI 211. *PRINCIPLES OF BIOLOGY (4). Origins of life, energy transformations, plant and animal
diversity. Lec/lab. (Bacc Core Course) PREREQS: For life science majors and pre-professional students.

BI 211H. *PRINCIPLES OF BIOLOGY (4).
Origins of life, energy transformations, plant and animal physiology. Lec/lab. (Bacc Core Course) PREREQS: For life science majors and preprofessional students. Honors College approval required.

BI 212. *PRINCIPLES OF BIOLOGY (4).
Cell biology, organ systems, plant and animal physiology. Lec/lab. (Bacc Core Course)
PREREQS: (CH 121* [D-] or CH 201* [D-] or CH 221* [D-] or CH 224H* [D-] or ((CH 231* [D-] or CH 231H* [D-] ) and (CH 261* [D-] or CH 261H* [D-] or $\mathrm{CH} 271^{*}$ [D-] ))) and for life science majors and pre-professional students.
BI 212H. *PRINCIPLES OF BIOLOGY (4). Cell biology, organ systems, plant and animal physiology. Lec/lab. (Bacc Core Course) PREREQS: (CH 121* [D-] or CH 201* [D-] or CH $221^{*}$ [D-] or CH 224H* [D-] or ((CH 231* [D-] or CH 231H* [D-] ) and (CH 261* [D-] or CH 261H* [D-] or CH $271^{*}$ [D-] ))) and for life science majors and pre-professional students. Honors College approval required.
BI 213. *PRINCIPLES OF BIOLOGY (4).
Genetics, evolution, natural selection, and ecology. Lec/lab. (Bacc Core Course) PREREQS: (CH 121 [D-] or CH 201 [D-] or CH 221 [D-] or CH 224H [D-] or ( $(\mathrm{CH} 231$ [D-] or CH 231 H [D-]) and (CH 261 [D-] or CH 261H [D-] or CH 271 [D-] ))) and for life science majors and pre-professional students.

BI 213H. *PRINCIPLES OF BIOLOGY (4)
Genetics, evolution, natural selection, and ecology. Lec/lab. (Bacc Core Course) PREREQS: (CH 121 [D-] or CH 201 [D-] or CH 221 [D-] or CH 224H [D-] or ( $(C H 231$ [D-] or CH 231 H [D-] ) and (CH 261 [D-] or CH 261H [D-] or CH 271 [D-] ))) and for life science majors and pre-professional students. Honors College approval required.

## Bl 231. INTRODUCTION TO HUMAN ANATOMY

AND PHYSIOLOGY (3). The first of a three-term introductory series. Using a strong gross anatomy focus, course topics address fundamental concepts of biology as they apply to human anatomy and physiology and then focus on understanding the structures, functions, and regulatory mechanisms involved in the human skeleton, muscular and integumentary systems. BI 231 is a required prerequisite to BI 232 and BI 233. The BI 241 Lab is optional but prerequisite for either of the subsequent BI 242 or BI 243 lab courses in the series. Lec.

BI 232. INTRODUCTION TO HUMAN ANATOMY
AND PHYSIOLOGY (3). The second of a
three-term introductory series. Using a strong gross anatomy focus, course topics address the structures, functions and regulatory mechanisms involved in the human nervous, endocrine and reproductive systems. Lec. PREREQS: BI 231* [D-] or (BI 103 [D-] or BI 103H [D-] ) or (BI 212 [D-] or BI 212H [D-] )

BI 233. INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY (3). The third of a three-term introductory series. Using a strong gross anatomy focus, course topics address the structures, functions, and regulatory mechanisms involved in the human cardiovascular, respiratory, urinary and digestive systems. Lec. PREREQS: BI 231* [D-] or (BI 103 [D-] or BI 103 H [D-] ) or (BI 212 [D-] or BI 212H [D-])
BI 241. INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY LABORATORY (2). The first of a three-term introductory series. Using the human cadaver (prosection), course topics address fundamental concepts of biology as they apply to human anatomy and physiology and then focus on understanding the structures, functions, and regulatory mechanisms involved in the human skeletal, muscular and integumentary systems. Physiology demonstrations illustrate functions of organ systems. Lab/rec. PREREQS: BI 231* [D-]

Bi 242. INTRODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY LABORATORY (2). The
second of a three-term introductory series. Using the human cadaver (prosection) and dissection of preserved specimens with a strong gross anatomy focus, course topics address the structures, functions and regulatory mechanisms involved in the nervous, endocrine and reproductive systems. Physiology demonstrations illustrate functions of organ systems. Lab/rec. PREREQS: BI 231* [Cand BI 232* [D-] and $\mathrm{BI} 241^{*}$ [D-]

BI 243. INTRODUCTION TO HUMAN ANATOMY
AND PHYSIOLOGY LABORATORY (2). The third of a three-term introductory series. Using the human cadaver (prosection) and dissection of preserved specimens with a strong gross anatomy focus, course topics address the structures, unctions, and regulatory mechanisms involved in the human cardiovascular, respiratory, urinary and digestive systems. Physiology demonstrations illustrate functions of organ systems. Lab/rec. PREREQS: BI 231* [D-] and BI 233* [D-] and BI 241* [D-]

BI 298. INTEGRATED PROFESSIONAL
DEVELOPMENT: LIFE SCIENCES I (1).
ntroduces the process of integrated professional development through relevant social and cognitive concepts and student activities. Emphasis is placed on students being able to analyze career opportunities to determine their best mix of echnical and professional skills to be competitive as a biological science professional. Graded P/N.
3I 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

BI 301. *HUMAN IMPACTS ON ECOSYSTEMS 3). Selected human impacts on ecosystems are examined in depth, including air quality, global climate change, management of agricultural and forest resources, and threats to biological diversity The causes, approaches to investigating, and potential solutions for each issue are discussed from a scientific and social perspective. Adverse effects on ecosystems that result from each environmental problem are examined. (Bacc Core Course) PREREQS: One year of college biology or chemistry and junior standing required.
BI 302. BIOLOGY AND CONSERVATION OF MARINE MAMMALS (4). An examination of the biology of whales, pinnipeds, and other marine mammals, include general adaptations to a marine existence; systematics and biogeography; reproduction; diving physiology; communication and echolocation; feeding and migratory behavior; and marine mammal/human interactions, including conservation issues. CROSSLISTED as FW 302. Taught at Hatfield Marine Science Center, OR online through Ecampus. PREREQS: One year of introductory biology is mandatory.
BI 306. *^ENVIRONMENTAL ECOLOGY (3). Biological, physical, and chemical nature of both natural and human-disturbed ecosystems. Topics include population and conservation ecology, toxins in the food chain and in the environment forest decline and acid rain, eutrophication of terrestrial and aquatic ecosystems, and ecosystem restoration. Offered alternate years (Bacc Core Course) (Writing Intensive Course) PREREQS: One year of college biology and chemistry
BI 306H. *^ENVIRONMENTAL ECOLOGY (3). Biological, physical, and chemical nature of both natural and human-disturbed ecosystems. Topics include population and conservation ecology, oxins in the food chain and in the environment, forest decline and acid rain, eutrophication of terrestrial and aquatic ecosystems, and ecosystem restoration. Offered alternate years. Bacc Core Course) (Writing Intensive Course) PREREQS: One year of college biology and chemistry. Honors College approval required

BI 309. TEACHING PRACTICUM (1-6).
Introductory experience for students assisting with instruction in Biology or Zoology courses. Admission is by application. See Cordley 3029 for
details. This course is repeatable for a maximum of 6 credits.

BI 311. GENETICS (4). Fundamentals of Mendelian, quantitative, population, molecular, and developmental genetics. Lec/rec. PREREQS: ((BI 211 [C-] or BI 211 H [C-] ) and (BI 212 [C-] or BI 212 H [C-] ) and (BI 213 [C-] or BI 213H [C-] )) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-] )

BI 311H. GENETICS (4). Fundamentals of Mendelian, quantitative, population, molecular and developmental genetics. Lec/rec. PREREQS: ((BI 211 [C-] or BI 211 H [C-] ) and (BI 212 [C-] or BI 212 H [C-] ) and (BI 213 [C-] or BI 213 H [C-] )) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-] )
BI 314. CELL AND MOLECULAR BIOLOGY
(4). Fundamental concepts of prokaryotic and eukaryotic cell biology. Emphasizes cell structure and function at the molecular level. Lec/rec. CROSSLISTED as BB 314. PREREQS: (BI 211 C-] or BI 211 H [C-] ) and (BI 212 [C-] or BI 212H [C-] ) and (BI 213 [C-] or BI 213 H [C-] ) and (CH 331* [D-] or CH 334* [D-] )

BI 314H. CELL AND MOLECULAR BIOLOGY
(4). Fundamental concepts of prokaryotic and eukaryotic cell biology. Emphasizes cell structure and function at the molecular level. Lec/rec.
CROSSLISTED as BB 314H. PREREQS: (BI 211 [C-] or $\mathrm{BI} 211 \mathrm{H}[\mathrm{C}-]$ ) and (BI 212 [C-] or Bl 212H [C-] ) and (BI 213 [C-] or BI 213 H [C-] ) and (CH 331* [D-] or CH 334* [D-] ) and Honors College approval required.
BI 315. ^MOLECULAR BIOLOGY LABORATORY (3). Laboratory projects exploring the transmission of genetic information from storage to function will introduce students to fundamental molecular biology concepts and techniques, including isolation of DNA, construction of recombinant plasmids, quantification of gene expression in model organisms, polymerase chain reaction, and analysis of protein expression and subcellular ocalization. Lec/lab. (Writing Intensive Course) CROSSLISTED as BB 315. PREREQS: BI 314* [D-] or BI 314H* [D-] or BB 314* [D-] or BB 314H* [D-]

## BI 317. ^SCIENTIFIC THEORY AND

PRACTICE (3). Teaches students the practice of biological science. Topics cover scientific theory, communications, and critical evaluation CROSSLISTED as BB 317. (Writing Intensive Course) PREREQS: One year of college biology.

## BI 319. ^ ^RITICAL THINKING AND

COMMUNICATION IN THE LIFE SCIENCES
(3). Teaches students the practice of biological science. Topics cover scientific theory, written and spoken communications, ethics and critical evaluation. (Writing Intensive Course) CROSSLISTED as Z 319. PREREQS: (BI 211 [Cor BI 211 H [C-] ) and (BI 212 [C-] or BI 212 H [C-] ) and (BI 213 [C-] or BI 213 H [C-] ) and (ST 351 [D-] or ST 351H [D-] ) and ST 352* [D-]
BI 331. ADVANCED HUMAN ANATOMY AND PHYSIOLOGY (3). The first of a three-term advanced series. With a strong focus on the physiological underpinnings of disease, course topics address the fundamental concepts of human anatomy and physiology and then focus on understanding the structures, functions, regulatory mechanisms and common pathologies involved in the skeletal, muscular and integumentary systems Lec. PREREQS: (BI 211 [C-] or $\mathrm{BI} 211 \mathrm{H}[\mathrm{C}-]$ ) and (BI 212 [C-] or BI 212H [C-] ) and (BI 213 [C-] or BI 213H [C-] ) and (CH 123 [D-] or ((CH 233 [D-] or CH 233 H [D-] ) and (CH 263 [D-] or CH 263H [D-] ))) and BI 341* [D-] and BI 331, BI 332, BI 333 must be taken in order.

BI 332. ADVANCED HUMAN ANATOMY AND PHYSIOLOGY (3). The second of a three-term advanced series. With a strong focus on the physiological underpinnings of disease, course topics address the structures, functions, and regulatory mechanisms involved in the nervous, endocrine and reproductive systems. Lec. PREREQS: BI 331 [D-] and $\mathrm{BI} 342^{*}$ [D-] and BI

331, $\mathrm{BI} 332, \mathrm{BI} 333$ must be taken in order.

## BI 333. ADVANCED HUMAN ANATOMY AND

 PHYSIOLOGY (3). The third part of a threeterm advanced series. With a strong focus on the physiological underpinnings of disease, course topics address the structures, functions, and regulatory mechanisms involved in the cardiovascular, respiratory, urinary and digestive systems. Lec. PREREQS: BI 332 [D-] and BI 343* [D-] and BI 331, BI 332, BI 333 must be taken in order.BI 341. ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY (2). The first of a three-term advanced series. Using the human cadaver (prosection) and physiological data acquisition equipment, course topics address the fundamental concepts of human anatomy and physiology and then focus on understanding the structures, functions, regulatory mechanisms and common pathologies involved in the human skeletal, muscular and integumentary systems. Lab. COREQS: BI 331

## Bl 342. ADVANCED HUMAN ANATOMY AND

 PHYSIOLOGY LABORATORY (2). The second of a three-term advanced series. Using the human cadaver (prosection), dissection of preserved specimens, and physiological data acquisition equipment, course topics address the structures, functions, regulatory mechanisms and common pathologies involved in the human nervous, endocrine and reproductive systems. Lab. COREQS: BI 332BI 343. ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY (2). The third of a three-term advanced series. Using the human cadaver (prosection), dissection of preserved specimens, and physiological data acquisition equipment, course topics address the structures, functions, regulatory mechanisms and common pathologies involved in the human cardiovascular, respiratory, urinary and digestive systems. Lab COREQS: BI 333

BI 345. *INTRODUCTION TO EVOLUTION (3). Elements of evolutionary theory; origin and history of life; evolutionary controversy; origins of species, sex, and humans. (Bacc Core Course)

BI 347. *OCEANS IN PERIL (3). The interactions of society and the marine environment, emphasizing the ecological, biogeochemical, economic, sociological, and political significance of the oceans. Topics of current critical importance will include marine pollution, protecting marine habitats, conserving marine biodiversity, fisheries and aquaculture, ocean energy, biogeochemical change, global warming, ocean acidification, and sea level rise. Lecture (Bacc Core Course). PREREQS: BI 101 [C-] or BI 101H [C-] or BI 102 [C-] or Bl 102H [C-] or Bl 211 [C-] or Bl 211H [C-] or BI 213 [C-] or BI 213H [C-] or BI 204 [C-] or BI 150 [C-]
BI 348. *HUMAN ECOLOGY (3). The impact of humans on the environment, emphasizing the political, sociological, and ecological consequences of human population growth. Topics of current critical importance will include global warming trends, destruction of the ozone layer, consequences of pollution, habitat destruction, the loss of biodiversity, and conservation biology. (Bacc Core Course)

BI 351. MARINE ECOLOGY (3). Ecological interactions and principles in different marine habitats. Topics include the organisms (plants, invertebrates, vertebrates) found in major habitats and interactions between organisms. Habitats discussed include coral reefs, rocky shores, kelp forests, near-shore waters, open-ocean waters, and the deep sea. Emphasis is placed on how organism-organism interactions produce varying patterns of distribution, abundance, body size, diversity, stability, and succession. PREREQS: ((BI 211 [C-] or BI 211H [C-] ) and (BI 212 [C-] or BI 212 H [C-] ) and (BI 213 [C-] or BI 213H [C-] )) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-] )

BI 352. MARINE ECOLOGY LABORATORY (2). Laboratory and field exposure to many of the organisms and processes discussed in BI 351. Research projects provide students with the opportunity to experience the process by which information about marine ecology is obtained. Field trip fee. Lab fee. Lec/lab. PREREQS: BI 351* or Z $351^{*}$

Bl 358. SYMBIOSES AND THE ENVIRONMENT
(3). Overview of the diversity of mutualistic
symbioses and their roles in the natural environment. Integrative approach, from ecosystem to molecule, to the examination of certain key mutualisms. Lec. Offered alternate years. PREREQS: (( BI 211 [C-] or BI 211 H [C-] ) and (BI 212 [C-] or $\mathrm{BI} 212 \mathrm{H}[\mathrm{C}-]$ ) and (BI 213 [C-] or BI 213 H [C-] )) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) ) and (CH 123 [D-] or (CH 233 [D-] or CH 233H [D-] ) and (CH 263 [D-] or CH 263H [D-] ))
BI 370. ECOLOGY (3). The study of interactions between organisms and their biotic and abiotic environments at the population, community, ecosystem, and biosphere levels of organization. PREREQS: ((Bl 211 [C-] or BI 211H [C-] ) and (BI 212 [C-] or BI 212 H [C-]) and (BI 213 [C-] or BI $213 \mathrm{H}[\mathrm{C}-\mathrm{]}$ ) ) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-] )
BI 371. ^ECOLOGICAL METHODS (3). Experimental design, data collection, analysis and synthesis in ecological studies; local ecosystems emphasized. May have field trip fee. Lec/lab. (Writing Intensive Course) PREREQS: (BI 370 [D-] or BI 370H [D-] )

## BI 373. ^FIELD METHODS IN MARINE

ECOLOGY (3). Exposure to research methods used in field studies of the marine rocky intertidal ecosystem. Research projects and writing exercises provide students with hands-on experience of collecting, analyzing, and presenting marine ecological data. Field trip fee. Lab fee. Lec/lab. (Writing Intensive Course) PREREQS: (BI 351* [D-] or BI 370 [D-] or BI 370H [D-] ) and (ST 351 [D-] or ST 351H [D-] ) and ST 352 recommended

## BI 375. FIELD METHODS IN ECOLOGICAL

RESTORATION (4). Observation and application of theory and practice in ecological restoration. Using site visits and hands-on research, explores the roles in restoration of fire, local adaptation, disturbance history, natural history, beaver, and soils, including visits to several active and completed restoration projects and overnights in the field. Lab. PREREQS: ((BI 211 [C-] or BI 211 H [C-]) and (BI 212 [C-] or BI $212 \mathrm{H}[\mathrm{C}-]$ ) and (BI 213 [C-] or BI 213H [C-] )) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-] )
BI 385. ^EMERGING INFECTIOUS DISEASES
AND EPIDEMICS (3). Emerging and reemerging infectious disease is a contemporary global issue of great concern. To understand and evaluate the issue, the course covers germ theory, disease history and ecology, microbial pathogenesis and the immune response, historic plagues, and the biological, environmental, population and social changes that contribute to disease emergence. (Writing Intensive Course) CROSSLISTED as MB 385 PREREQS: (BI 211 [D-] or BI 211H [D-] ) and (BI 212 [D-] or BI 212H [D-] ) and (BI 213 [D-] or BI 213H [D-] )
BI 388. ^SPECIAL TOPICS IN BIOLOGY (3-5). Studies of contemporary subjects of interest and importance in biology. (Writing Intensive Course) This course is repeatable for a maximum of 5 credits. PREREQS: One year of college biology or departmental approval required.
BI 399. SPECIAL TOPICS (0-16). This course is repeatable for a maximum of 16 credits. PREREQS: Requirements vary. Consult with department.

BI 401. RESEARCH AND SCHOLARSHIP (1-
16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval

## required.

## BI 401H. RESEARCH AND SCHOLARSHIP

(1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
BI 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
BI 405H. READING AND CONFERENCE (1-16)
This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.

BI 406. PROJECTS: CURATORIAL ASSISTANT
(1-6). Students assist with curatorial projects in OSU biological collections. Admission is by application. See Cordley 3029 for details. This course is repeatable for a maximum of 6 credits.

BI 407. SEMINAR (1). Departmental seminar. Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
BI 407H. SEMINAR (1). Departmental seminar. Graded $\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required. Honors College approval required.

BI 409. ADVANCED TEACHING PRACTICUM
(1-6). Advanced practicum experience for students assisting in Biology or Zoology courses. Includes advanced training in course content and development of instructional materials. Admission is by application. See Cordley 3029 for details. This course is repeatable for a maximum of 6 credits.

BI 410. INTERNSHIP (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
BI 414H. ^WRITING FOR THE BIOLOGICAL
SCIENCES (2). BI 414H/Z 414H and BI 415H/Z 415 H are writing intensive courses that use writing to learn the subject content. Students will develop their writing and critical thinking skills by writing and editing scientific and technical pieces as well as critically reviewing peer and published writing examples. CROSSLISTED as Z 414H. (Writing Intensive Course) PREREQS: HC 408 Thesis: Learn and HC 408 Thesis: Undertake (or independent completion of LEARN and UNDERTAKE steps). Honors College approval required.
BI 415H. ^BIOLOGICAL SCIENCES THESIS (1). BI $414 \mathrm{H} / \mathrm{Z} 414 \mathrm{H}$ and $\mathrm{BI} 415 \mathrm{H} / \mathrm{Z} 415 \mathrm{H}$ are writing intensive courses that use writing to learn the subject content. Students will hone critical thinking and technical writing skills necessary to create compelling and well-documented arguments in support of an original thesis. CROSSLISTED as Z 415H. (Writing Intensive Course) PREREQS: BI 414H [D-] or Z 414H [D-] and Honors College approval required.
BI 420. *VIRUSES IN MODERN SOCIETY (3). Impact of viruses on modern civilization. Molecular mechanisms of viral infectivity. Approaches to the prevention and cure of viral diseases. Role of viruses in agriculture and industry. Offered alternate years. (Bacc Core Course) PREREQS: (BI 311 [D-] or BI 314 [D-] or BI 314H [D-] )
BI 421. AQUATIC BIOLOGICAL INVASIONS (4). An overview of the background, theory, evolution, ecology, politics and conservation of invasions by introduced species in aquatic environments. Taught at Hatfield Marine Science Center. CROSSLISTED as FW 421. PREREQS: One year of university-level biology.
BI 427. PALEOBIOLOGY (4). Fossils provide a direct window into the evolution, extinction, and ecology of past life on Earth. A processbased study of the marine and terrestrial fossil record is taken to explore the topics of preservation, macroevolution, extinction of biotas,
biomechanics, paleoecology, and climate change. Required laboratory and weekend field trip. PREREQS: ((BI 211 [C-] or BI 211H [C-]) and (BI 212 [C-] or BI 212 H [C-] ] and (BI 213 [C-] or BI 213 H [C-] )) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-] ) or GEO 203 [D-]
BI 435. *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK (3). A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSLISTED as FES 435/FES 535, FES 435H, MCB 535, TOX 435/TOX 535, TOX 435H. (Bacc Core Course) PREREQS: One quarter each of biology and chemistry helpful but not essential.
BI 435H. *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK (3). A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSLISTED as FES 435H, TOX 435H. (Bacc Core Course) PREREQS One quarter each of biology and chemistry helpful but not essential. Honors College approval required.
BI 445. EVOLUTION (3). Formal analysis of genetic and ecological mechanisms producing evolutionary change; special topics include speciation, ecological constraints, adaptive radiations, paleontology, biogeography, the origin of life, molecular evolution, and human evolution PREREQS: BI 311 [D-] or BI 311H [D-]
BI 450. ^MARINE BIOLOGY AND ECOLOGY (15). A comprehensive lecture and laboratory introduction to the flora and fauna of the marine environment approached from the level of the organism to ecosystem. Ecological patterns and processes characteristic of marine communities will be emphasized. Lec/lab. Taught at Hatfield Marine Science Center, Newport, OR. (Writing Intensive Course) PREREQS: (BI 370 [D-] or BI 370 H [D-] ) and (ST 351 [D-] or ST 351H [D-] ) and ST 352 is recommended. Departmental approval required. Admission to BI 450 is by application in fall of the academic year students plan to attend.
BI 451. FUNCTIONAL ANATOMY OF THE HUMAN MUSCULAR SYSTEM (4). In-depth dissection of the orientation, innervation, and functional significance of muscles and muscle groups. Topics include muscle identification, joint anatomy and variation of human form. BI 551 student expectations include vascularization and detailed joint anatomy. The laboratory component will consist of the dissection of the muscular anatomy of a human cadaver. Lab fee. Lec/lab. PREREQS: ((BI 231 [D-] and BI 241 [D-] ) or (BI 331 [D-] and BI 341 [D-] )) and ((Bl 232 [D-] and BI 242 [D-] ) or (BI 332 [D-] and BI 342 [D-] )) and (BI 233 [D-] and BI 243 [D-]) or (BI 333 [D-] and BI 343 [D-] )) and departmental approval required. Admission to $\mathrm{BI} 451 / \mathrm{BI} 551$ is by application in spring of the academic year students plan to attend.

BI 456. PHYLOGENETICS (4). Explores the theory and practice of modern phylogenetic analysis. Emphasis placed on tree reconstruction algorithms, assessment of statistical support, and contemporary issues in phylogenetics. Lab will focus on the use of phylogenetic software and the analysis of molecular data sets. Lec/lab. PREREQS: (ST 351 [D-] or ST 351H [D-]) and (ST 352* [D-] or ST 411* [D-]) and (BI 311 [D-] or BI 311H [D-] or BI 445 [D-] )
BI 481. BIOGEOGRAPHY (3). Biogeography is the study of the distribution of biodiversity. We focus on abiotic (geological, climatological) and biotic (ecological, evolutionary) factors that govern diversity across space and through time, emphasizing assembly of communities, global change, and conservation in today's rapidly changing world. The course format includes
ecture, computer-based activities, and discussion Offered winter term in odd years. PREREQS: BI 370 [D-] or BI 370H [D-]

BI 483. POPULATION BIOLOGY (3). Theoretical and empirical views of the structure and function of populations from across the tree of life, emphasizing the integration of ecological and evolutionary approaches. Lec. PREREQS: (MTH 241 [D-] or MTH 251 [D-] or MTH 251H [D-] ) and (ST 351 [D-] or ST 351H [D-] ) and (ST 352* [D-] or ST $411^{*}$ [D-] ) and (BI 311 [D-] or BI 311H [D-] or BI 370 [D-] or BI 370H [D-] )
BI 495. DISEASE ECOLOGY (3). An introduction to disease ecology--the study of disease processes in natural populations and communities. The course focuses on (I) the role parasites play in the ecology and evolution of animal populations including humans; and (II) the relevance of ecological and evolutionary considerations in managing infectious diseases. PREREQS: BI 370 [C-]

BI 498. SENIOR BIOLOGY FIELD TEST (0). A comprehensive, two-hour exam to assess the biological knowledge of Biology and Zoology seniors. Students must complete the exam in their final undergraduate term or during spring term if graduating during summer when it is not offered. A pass will be given to all students who complete the exam. More details at http://ib.oregonstate. edu/advising/MFT-info. PREREQS: Biology and Zoology majors with senior standing. Summer graduates register their final spring term. All other students register their final OSU term.
BI 499. SPECIAL TOPICS (0-16). Topics and credits vary.
BI 499H. SPECIAL TOPICS (1-16). Topics and credits vary. This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
BI 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

BI 503. THESIS/DISSERTATION (1-16). This course is repeatable for a maximum of 999 credits
BI 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
BI 506. PROJECTS: OUTREACH (1-16). Graded $\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
BI 507. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

BI 527. PALEOBIOLOGY (4). Fossils provide a direct window into the evolution, extinction, and ecology of past life on Earth. A processbased study of the marine and terrestrial fossil record is taken to explore the topics of preservation, macroevolution, extinction of biotas, biomechanics, paleoecology, and climate change. Required laboratory and weekend field trip.
PREREQS: ((BI 211 or BI 211 H$)$ and ( BI 212 or B 212 H ) and ( BI 213 or BI 213 H ) ) or (BI 204 and BI 205 and BI 206) or GEO 203. All BI courses with C-; GEO 203 with D-

## BI 535. GENES AND CHEMICALS IN

 AGRICULTURE: VALUE AND RISK (3). A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. CROSSLISTED as FES 435/FES 535, FES 435H, MCB 535, TOX 435/TOX 535 , TOX 435H. PREREQS: One quarter each of biology and chemistry helpful but not essential.BI 545. EVOLUTION (3). Formal analysis of genetic and ecological mechanisms producing evolutionary change; special topics include speciation, ecological constraints, adaptive radiations, paleontology, biogeography, the origin
of life, molecular evolution, and human evolution. PREREQS: BI 311 or equivalent genetics course.

BI 551. FUNCTIONAL ANATOMY OF THE HUMAN MUSCULAR SYSTEM (4). In-depth dissection of the orientation, innervation, and functional significance of muscles and muscle groups. Topics include muscle identification, joint anatomy and variation of human form. BI 551 student expectations include vascularization and detailed joint anatomy. The laboratory component will consist of the dissection of the muscular anatomy of a human cadaver. Lab fee. Lec/lab. PREREQS: ((BI 231 and 241) or (BI 331 and 341)) and ((BI 232 and 242) or (BI 332 and 342)) and ((BI 233 and 243 ) or ( BI 333 and 343$)$ ) and departmental approval required. Admission to $\mathrm{BI} 451 / \mathrm{BI} 551$ is by application in spring of the academic year students plan to attend.

BI 556. PHYLOGENETICS (4). Explores the theory and practice of modern phylogenetic analysis. Emphasis placed on tree reconstruction algorithms, assessment of statistical support, and contemporary issues in phylogenetics. Lab will focus on the use of phylogenetic software and the analysis of molecular data sets. Lec/lab. CROSSLISTED as BOT 556. PREREQS: (ST 351 or ST 351H) and (ST 352* or ST $411^{*}$ ) and (BI 311 or BI 311 H or BI 445 )
BI 581. BIOGEOGRAPHY (3). Biogeography is the study of the distribution of biodiversity. We focus on abiotic (geological, climatological) and biotic (ecological, evolutionary) factors that govern diversity across space and through time, emphasizing assembly of communities, global change, and conservation in today's rapidly changing world. The course format includes lecture, computer-based activities, and discussion Offered winter term in odd years. PREREQS: BI 370 or BI 370 H
BI 583. POPULATION BIOLOGY (3). Theoretical and empirical views of the structure and function of populations from across the tree of life, emphasizing the integration of ecological and evolutionary approaches. Lec. PREREQS: (MTH 241 or MTH 251 or 251 H ) and (ST 351 or ST 351 H ) and (ST 352* or ST $411^{*}$ ) and (BI 311 or BI 311 H or BI 370 or BI 370H)
BI 592. THEORETICAL ECOLOGY (4). A treatment of the central concepts of theoretical ecology, with emphasis on the analysis and modeling of single populations and multispecies communities. Topics include discrete- and continuous-time models of population growth, stochastic and deterministic processes, and the response of populations and communities to pulse and press perturbations. PREREQS: Graduate standing.
BI 595. DISEASE ECOLOGY (3). An introduction to disease ecology--the study of disease processes in natural populations and communities. The course focuses on (I) the role parasites play in the ecology and evolution of animal populations, including humans; and (II) the relevance of ecological and evolutionary considerations in managing infectious diseases. PREREQS: BI 370
BI 599. SPECIAL TOPICS (1-16).
BI 601. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.
BI 603. THESIS/DISSERTATION (1-16). This course is repeatable for a maximum of 999 credits.
BI 808. WORKSHOP (1-16). This course is
repeatable for a maximum of 16 credits.

## - ZOOLOGY COURSES

Z 315. DINOSAUR BIOLOGY (3). In-depth examination of our current understanding of dinosaur systematics, physiology, and ecology. Possible factors associated with dinosaur extinction (i.e., natural catastrophes, global climate change, diseases, etc.) will also be covered. Lec. PREREQS: Sophomore standing.

Z 319. ^CRITICAL THINKING AND COMMUNICATIONS IN THE LIFE SCIENCES (3). Teaches students the practice of biological science. Topics cover scientific theory, written and spoken communications, ethics and critical evaluation. (Writing Intensive Course) CROSSLISTED as BI 319. PREREQS: ( BI 211 [C-] or BI 211 H [C-] ) and (BI 212 [C-] or BI 212 H [C-] ) and (BI 213 [C-] or BI 213H [C-] ) and (ST 351 [D-] or ST 351H [D-] ) and ST 352* [D-]

## Z 349. *BIODIVERSITY: CAUSES,

## CONSEQUENCES, AND CONSERVATION (3).

The earth's biodiversity is a precious inheritance that is threatened by an unprecedented extinction crisis. This course examines the evolutionary and ecological processes that have created this unique diversity of life, the importance of biodiversity in maintaining the earth's ecosystems, and methods used to conserve biodiversity for future generations. (Bacc Core Course)
Z 350. ANIMAL BEHAVIOR (3). Concepts of behavior; sensory receptors, internal mechanisms governing responses; learning and habituation; social organization and communication. PREREQS: ((BI 211 [C-] or BI 211H [C-] ) and (BI 212 [C-] or Bl 212 H [C-]) and (BI 213 [C-] or BI $213 \mathrm{H}[\mathrm{C}-\mathrm{]})$ ) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Z 361. INVERTEBRATE BIOLOGY (3).
Exploration of the diversity and evolutionary relationships among major invertebrate phyla with an emphasis on morphological features, functional aspects, and life history for each phylum.
PREREQS: ( BI 211 [C-] or BI 211 H [C-] ) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213 H [C-] ) ) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

## Z 362. INVERTEBRATE BIOLOGY

LABORATORY (2). Morphology and anatomy of representative invertebrates introduced in Z 361; diversity within phyla. Study is by dissections and both microscopic and macroscopic examination; field trip fee. Lab fee. Lec/lab. PREREQS: ((BI 211 D-] or BI 211H [D-] ) and (BI 212 [D-] or BI 212H [D-] ) and (BI 213 [D-] or BI 213H [D-] ) and Z 361* [D-] )
Z 365. BIOLOGY OF INSECTS (4). Introduction to the study of insects, focusing on the biological attributes responsible for the success and dominance of insects. Emphasis on taxonomy, morphology, behavior, ecology, and coevolutionary interrelationships. Required field trips. Lec/lab. PREREQS: ( BI 211 [C-] or BI 211 H [C-] ) and (BI 212 [C-] or Bl 212 H [C-]) and (BI 213 [C-] or BI 213 H [C-] ) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])

Z 371. VERTEBRATE BIOLOGY (3). Overview of vertebrate origins and phylogeny integrating several disciplines (anatomy, ecology, genetics, developmental biology, physiology, behavior, and evolution) to explore the structural and functional adaptations and evolutionary history of vertebrates. Lec. PREREQS: ((BI 211 [C-] or BI $211 \mathrm{H}[\mathrm{C}-]$ ) and (BI 212 [C-] or BI 212 H [C-] ) and (BI 213 [C-] or BI 213H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-]) and may be taken alone or concurrently with Z 372.
Z 372. VERTEBRATE BIOLOGY LABORATORY
(2). Classification, identification, and natural history of vertebrates. Includes laboratory examination of specimens and frequent field trips (fee charged) emphasizing Oregon fauna. Lab fee PREREQS: ((BI 211 [C-] or BI 211H [C-]) and (BI 212 [C-] or BI 212 H [C-] ) and (BI 213 [C-] or BI 213 H [C-] )) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-] ) and Z 371* [D-]
Z 414H. ^WRITING FOR THE BIOLOGICAL
SCIENCES (2). BI 414H/Z 414H and BI 415H/Z 415 H are writing intensive courses that use writing to learn the subject content. Students will develop their writing and critical thinking skills by writing and editing scientific and technical pieces as well as critically reviewing peer and published writing samples. CROSSLISTED as BI 414 H . (Writing Intensive Course) PREREQS: HC 408

Thesis: Learn and HC 408 Thesis: Undertake (or independent completion of LEARN and UNDERTAKE steps). Honors College approval required.
Z 415H. ^BIOLOGICAL SCIENCES THESIS (1). BI 414H/Z 414H and BI 415H/Z 415H are writing intensive courses that use writing to learn the subject content. Students will hone critical thinking and technical writing skills necessary to create compelling and well-documented arguments in support of an original thesis. CROSSLISTED as BI 415H. (Writing Intensive Course) PREREQS: BI 414H [D-] or Z 414H [D-] and Honors College approval required.

## Z 422. COMPARATIVE/FUNCTIONAL

 VERTEBRATE ANATOMY (5). Phylogeneticallybased study of the form and function of vertebrate organ systems, including integumentary, musculoskeletal, cardiopulmonary, digestive, and sensory. Lab emphasizes comparative form through dissection, and function through noninvasive experimentation. Lec/lab. PREREQS: (BI 211 [C-] or BI 211 H [C-] ) and (BI 212 [C-] or BI 212 H [C-] ) and (BI 213 [C-] or BI 213H [C-] ) and (CH 332* [D-] or CH 335* [D-] )
## Z 423. ENVIRONMENTAL PHYSIOLOGY (3).

Comparative environmental physiology of animals with emphasis on adaptations to such aspects of the physical environment as temperature, water, ions, and gases. Consideration given to interactions between physiology and environment that influence the local and geographic distribution of animals. PREREQS: ((BI 211 [C-] or BI 211H [C-] ) and (BI 212 [C-] or BI 212H [C-] ) and (BI 213 [C-] or BI 213H [C-] )) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-] )) and (CH 123 [D-] or (CH 233 [C-] or CH 233H [D-] ) and (CH 263 [D-] or CH 263H [D-] ))
Z 425. EMBRYOLOGY AND DEVELOPMENT (5). An integrated molecular, cellular and whole organism approach. Comparative embryonic development from gametogenesis, body axis specification, pattern formation and organogenesis. Experimental approaches uncovering cellular interactions, regulation of gene expression, and cellular differentiation Lab emphasizes experimental comparative developmental biology and embryology. Lab fee. Lec/lab. PREREQS: BI 311 [D-] and (BI 314 [D-] or BI 314H [D-] or BB 314 [D-] or BB 314H [D-] ) and junior standing.
Z 431. VERTEBRATE PHYSIOLOGY I (3). Systems/concepts covered include motor reflexes, autonomic nervous system, digestion/ metabolism, renal and osmoregulatory, endocrine and reproductive systems. First in Z43X series, although courses may be taken in any order. PREREQS: (BI 211 [C-] or $\mathrm{BI} 211 \mathrm{H}[\mathrm{C}-]$ ) and (BI 212 [C-] or BI 212 H [C-] ) and (BI 213 [C-] or BI 213H [C-] ) and (CH 332* [D-] or CH 335* [D-] )
Z 432. VERTEBRATE PHYSIOLOGY II (3). Systems/concepts covered include blood, immune lymphatic, cardiovascular, and pulmonary. Second in the Z43X series, although courses may be taken in any order. PREREQS: (BI 211 [C-] or BI $211 \mathrm{H}[\mathrm{C}-]$ ) and (BI 212 [C-] or BI 212 H [C-] ) and (BI 213 [C-] or BI 213H [C-]) and (CH 332* [D-] or CH 335* [D-] )

Z 437. VERTEBRATE ENDOCRINOLOGY (4). An exploration of vertebrate endocrinology that examines principles of hormone action, interand intracellular signaling mechanisms within endocrine axes, and comparative endocrine physiology, emphasizing concepts of homeostasis and methodologies for evaluating normal and physiological function. Students are provided multiple forums for class participation, in the form of scientific presentations and "mini-reports." PREREQS: BI 314 [D-] or BI 314H [D-] or BB 314 [D-] or BB 314H [D-]
Z 438. BEHAVIORAL NEUROBIOLOGY (3). An introduction to the neurobiological basis of animal behavior. Examines behavior in the context of sensory physiology, motor control, neural circuity,
and cellular processes. Lec. PREREQS: ((BI 211 [C-] or $\mathrm{BI} 211 \mathrm{H}[\mathrm{C}-]$ ) and (BI 212 [C-] or BI 212 H [C-] ) and (BI 213 [C-] or BI 213H [C-]) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-] )) and (CH 123 [C-] or (CH 233 [C-] or CH 233 H [C-]) and (CH 263 [C-] or CH 263 H [C-] ))
Z 440. INSECT PHYSIOLOGY (3). Fundamentals
of insect physiology from the behavioral to the molecular level. Cellular physiology and hormonal control of molting, metamorphosis and reproduction. Overview of body functions: respiration, circulation, digestion, metabolism, and osmoregulation. Physiological basis of behavior: muscles and flight, structure and functions of the nervous system, sensory physiology and chemical communication. The contributions of insect physiology to general physiological principles and biorational methods of insect pest control are discussed. PREREQS: (( BI 211 [C-] or BI 211H [C-] ) and (BI 212 [C-] or BI 212H [C-]) and (BI 213 [C-] or BI 213 H [C-] )) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-] )) and CH 123 [D-] or ((CH 233 [D-] or CH 233H [D-] ) and (CH 263 [D-] or CH 263H [D-] ))

## Z 441.VERTEBRATE PHYSIOLOGY

LABORATORY (2). Experiments and exercises in vertebrate physiology. Systems studied: neuromuscular control, autonomic nervous system, digestive, endocrine, renal, and reproductive. Available to pre-vet and pre-med biology majors. Lab fee. Lab. PREREQS: Z 431* [D-]

## Z 442. VERTEBRATE PHYSIOLOGY

LABORATORY (2). Experiments and exercises in vertebrate physiology. Systems studied: blood, lymphatic, immune, cardiovascular, pulmonary Available to pre-vet and pre-med biology majors. Lab fee. Lab. PREREQS: Z 432* [D-]

## Z 461. MARINE AND ESTUARINE

INVERTEBRATE ZOOLOGY (4). Comparative survey of eight major invertebrate phyla and many lesser-known phyla. Areas of emphasis will be 1) invertebrate identification, 2) natural history (diversity, habitat, feeding, behavior), and 3) comparative anatomy (adaptive significance of morphological structures). Laboratories and field trips will strongly supplement lecture material. Lec/ lab. Taught at Hatfield Marine Science Center. PREREQS: ((BI 211 [C-] or BI 211H [C-] ) and (BI 212 [C-] or BI 212 H [C-] ) and (BI 213 [C-] or BI 213 H [C-] )) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Z 473. HERPETOLOGY (3). World families and distribution of amphibians and non-avian sauropods; evolution, population biology, life histories, current literature. PREREQS: ((BI 211 [C-] or BI 211 H [C-]) and (BI 212 [C-] or BI 212 H [C-] ) and (BI 213 [C-] or BI 213H [C-] )) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-])
Z 474. SYSTEMATIC HERPETOLOGY (2). A survey of the phylogenetic diversity of amphibians and reptiles of the United States. Identification through the use of keys will be stressed. Field trip fee. Lab fee. Lec/lab. PREREQS: One year of introductory biology and/or vertebrate biology.

## Z 475. INSECT BIODIVERSITY SURVEY (4).

Through lectures, laboratories and an intensive field survey, students learn about insect diversity, natural history and evolution as well as the important role of biological collections in modern biodiversity research. The survey takes place in the two weeks prior to fall term at a remote Pacific Northwest field station. Lec/lab. PREREQS: (BI 211 [C-] or Bl 211 H [C-] ) and (BI 212 [C-] or BI 212 H [C-] ) and (BI 213 [C-] or BI 213 H [C-] )) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-] ) and departmental approval required. Admission to Z475/575 is by application (application preceding Spring term).

Z 477. AQUATIC ENTOMOLOGY (4). Biology, ecology, collection, and identification of aquatic insects. Two required Saturday field trips. Lec/lab. PREREQS: ( $(\mathrm{BI} 211$ [C-] or $\mathrm{BI} 211 \mathrm{H}[\mathrm{C}-\mathrm{]})$ and (BI 212 [C-] or BI 212 H [C-] ) and (BI 213 [C-] or BI

213 H [C-])) or (BI 204 [C-] and BI 205 [C-] and BI 206 [C-] )

Z 499. SPECIAL TOPICS (0-16). Topics and credits vary. This course is repeatable for a maximum of 16 credits.
Z 499H. SPECIAL TOPICS (1-16). Topics and credits vary. This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
Z 501. RESEARCH (1-16). Graduate-level research completed under faculty supervision. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
Z 503. THESIS (1-16). Master's thesis, completed under faculty supervision. This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.

## Z 505. READING AND CONFERENCE (1-16).

For graduate students working toward a master's degree. After arrangements with individual faculty, readings and discussions on topics of mutual interest. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

Z 507. SEMINAR (1). Graded P/N. This course is repeatable for a maximum of 16 credits.

Z 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required

## 522. COMPARATIVE/FUNCTIONAL

VERTEBRATE ANATOMY (5). Phylogeneticallybased study of the form and function of vertebrate organ systems, including integumentary, musculoskeletal, cardiopulmonary, digestive, and sensory. Lab emphasizes comparative form through dissection, and function through noninvasive experimentation. Lec/lab. PREREQS: (BI 211 or BI 211 H ) and ( Bl 212 or BI 212 H ) and ( BI 213 or BI 213 H ) and (CH 332* or CH 335*)
Z 523. ENVIRONMENTAL PHYSIOLOGY (3).
Comparative environmental physiology of animals with emphasis on adaptations to such aspects of the physical environment as temperature, water, ions, and gases. Consideration given to interactions between physiology and environment that influence the local and geographic distribution of animals. PREREQS: (( BI 211 or Bl 211 H$)$ and (BI 212 or BI 212 H ) and ( BI 213 or BI 213 H )) OR (BI 204 and BI 205 and BI 206 )) and (CH 123 or ( CH 233 or CH 233 H ) and ( CH 263 or CH 263 H ))

## Z 525. EMBRYOLOGY AND DEVELOPMENT

(5). An integrated molecular, cellular and whole organism approach. Comparative embryonic development from gametogenesis, body axis specification, pattern formation and organogenesis. Experimental approaches uncovering cellular interactions, regulation of gene expression, and cellular differentiation. Lab emphasizes experimental comparative developmental biology and embryology. Lab fee. Lec/lab. PREREQS: BI 311 and (BI 314 or BI 314 H ) and graduate or postbac standing.

## Z 531. VERTEBRATE PHYSIOLOGY I (3)

Systems/concepts covered include motor reflexes, autonomic nervous system, digestion/ metabolism, renal and osmoregulatory, endocrine and reproductive systems. First in Z43X series, although courses may be taken in any order. Lec. PREREQS: ( Bl 211 or Bl 211 H ) and ( Bl 212 or BI 212 H ) and (BI 213 or BI 213 H ) and (CH 332* or CH 335*)
Z 532. VERTEBRATE PHYSIOLOGY II (3).
Systems/concepts covered include blood, immune lymphatic, cardiovascular, and pulmonary. Second in the Z43X series, although courses may be taken in any order. PREREQS: (BI 211 or BI 211 H ) and ( BI 212 or BI 212 H ) and (BI 213 or Bl 213 H ) and (CH 332* or CH 335*)
Z 537. VERTEBRATE ENDOCRINOLOGY (4). An exploration of vertebrate endocrinology that
examines principles of hormone action, inter and intracellular signaling mechanisms within endocrine axes, and comparative endocrine physiology, emphasizing concepts of homeostasis and methodologies for evaluating normal and pathophysiological function. Students are provided multiple forums for class participation, in the form of scientific presentations and PREREQS: (BI 314 or BI 314 H ) and graduate status or instructor approval required.

Z 538. BEHAVIORAL NEUROBIOLOGY (3). An introduction to the neurobiological basis of animal behavior. Examines behavior in the context of sensory physiology, motor control, neural circuity, and cellular processes. Lec. PREREQS: (((BI 211 [C-] or BI 211 H [C-] ) and (BI 212 [C-] or BI 212 H C-] ) and (BI 213 [C-] or BI 213H [C-] )) or BI 204 [C-] and BI 205 [C-] and BI 206 [C-] )) and CH 123 [C-] or ((CH 233 [C-] or CH 233H [C-] ) and (CH 263 [C-] or CH 263H [C-] ))
Z 540. INSECT PHYSIOLOGY (3). Fundamentals of insect physiology from the behavioral to the molecular level. Cellular physiology and hormonal control of molting, metamorphosis and reproduction. Overview of body functions: respiration, circulation, digestion, metabolism, and osmoregulation. Physiological basis of behavior: muscles and flight, structure and functions of the nervous system, sensory physiology and chemical communication. The contributions of insect physiology to general physiological principles and biorational methods of insect pest control are discussed. PREREQS: (((BI 211 or BI 211 H$)$ and ( BI 212 or BI 212 H ) and ( BI 213 or BI 213 )) or ( BI 204 and BI 205 and BI 206$)$ ) and CH 123 or ((CH 233 or CH 233 H ) and ( CH 263 or CH 263 H ))

## 2 561. MARINE AND ESTUARINE

INVERTEBRATE ZOOLOGY (4). Comparative survey of eight major invertebrate phyla and many lesser-known phyla. Areas of emphasis will be 1) invertebrate identification, 2) natural history (diversity, habitat, feeding, behavior), and 3) comparative anatomy (adaptive significance of morphological structures). Laboratories and field trips will strongly supplement lecture material. Lec/ lab. Taught at Hatfield Marine Science Center. PREREQS: ((BI 211 or BI 211 H$)$ and (BI 212 or B $212 \mathrm{H})$ and (BI 213 or BI 213 H$)$ ) or (BI 204 and BI 205 and BI 206) and students should have: (1) at east one year of undergraduate-level biology, and (2) basic familiarity with major invertebrate phyla. Graduate standing.

Z 565. MARINE CONSERVATION SCIENCE AND POLICY (3). Introduces the science-policy interface of ocean resource management. Through discussions, lectures, and independent projects, students will learn how policy is formulated at the state and federal levels, and the role of science in that process. Emphasizes current topics, such as ecosystem-based management. Graded P/N. Taught at Hatfield Marine Science Center. PREREQS: Graduate standing.
Z 573. HERPETOLOGY (3). World families and distribution of amphibians and non-avian sauropods; evolution, population biology, life histories, current literature. PREREQS: ((BI 211 or $\mathrm{Bl} 211 \mathrm{H})$ and $(\mathrm{BI} 212$ or BI 212 H$)$ and ( BI 213 or $\mathrm{BI} 213 \mathrm{H})$ ) or (BI 204 and BI 205 and BI 206 ) and graduate or postbac standing.
Z 574. SYSTEMATIC HERPETOLOGY (2). A
survey of the phylogenetic diversity of amphibians and reptiles of the United States. Identification through the use of keys will be stressed. Field trip fee. Lab fee. Lec/lab. PREREQS: Graduate or postbac standing.
Z 575. INSECT BIODIVERSITY SURVEY (4).
Through lectures, laboratories and an intensive field survey, students learn about insect diversity, natural history and evolution as well as the important role of biological collections in modern biodiversity research. The survey takes place in the two weeks prior to fall term at a remote Pacific Northwest field station. Lec/lab. PREREQS: ((BI 211 or BI 211 H$)$ and (BI 212 or BI 212 H$)$ and (BI

213 or BI 213 H$)$ ) or (BI 204 and 205 and 206) Departmental approval required. Admission to Z $475 / Z 575$ is by application (application preceding Spring term).
Z 577. AQUATIC ENTOMOLOGY (4). Biology, ecology, collection, and identification of aquatic insects. Two required Saturday field trips. Lec/lab. PREREQS: ((BI 211 or BI 211 H$)$ and (BI 212 or BI 212 H ) and (BI 213 or BI 213 H )) or (BI 204 and BI 205 and BI 206)
Z 585. GRANT WRITING AND ETHICS (3). Participants will write and submit a grant proposal by the end of the term. We discuss the main components of a typical grant proposal. Participants read and critique proposal drafts written by participants in the workshop. Ethical issues are discussed as they are encountered. Graded $P / N$. This course is repeatable for a maximum of 6 credits.
Z 587. SCIENTIFIC WRITING \& ETHICS (3).
Participants will write a scientific paper based on their own research and submit it for publication. Topics to be covered include writing skills (e.g., making a good argument, choice of a journal, reviewing the literature) and ethical issues (e.g., citation, plagiarism, disclosure, data archiving, and acknowledgment). This course is repeatable for a maximum of 6 credits. PREREQS: Graduate standing.
Z 593. BEHAVIORAL ECOLOGY (5). Behavioral ecology with emphasis on both theoretical and empirical approaches. Offered alternate years. PREREQS: Graduate or postbac standing.
Z 594. COMMUNITY ECOLOGY (5). Theory and analysis of multispecies associations. Emphasis on extent to which existing ecological theory is supported by natural phenomena. Course considers how biotic and abiotic mechanisms interact to regulate community organization and stability in marine, freshwater, and terrestria habitats. Offered alternate years. PREREQS: Graduate or postbac standing.
Z 599. SPECIAL TOPICS (1-16). Topics and credits vary. Grading mode TBA. Taught at Hatfield Marine Science Center and Corvallis campus. This course is repeatable for a maximum of 16 credits.
Z 601. RESEARCH (1-16). Doctoral-level research under faculty supervision. Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval.

Z 603. THESIS (1-16). Doctoral thesis completed under faculty supervision. This course is repeatable for a maximum of 999 credits.
PREREQS: Departmental approval.
Z 605. READING AND CONFERENCE (1-16).
For graduate students working toward doctoral degree. After arrangements with individual faculty, readings and discussions on topics of mutual interest. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval.

## SCHOOL OF LIFE SCIENCES

DEPARTMENT OF
MICROBIOLOCY
Jerri Lee Bartholomew, Head 220 Nash Hall
Oregon State University
Corvallis, OR 97331-3804
541-737-1856
Email: bartholj@science.oregonstate.edu Website: http://microbiology.science. oregonstate.edu/

## FACULTY

Professors Bartholomew, Bermudez, Bottomley, Dreher, Field, Geller, Giovannoni, Kent, Ream, Sarker, Trempy
Associate Professors Schuster,
Thurber-Vega
Assistant Professors Halsey, Lowry, Mueller, Sharpton
Senior Instructor/Advisor Bruslind
Instructor/Advisor Anderson
Undergraduate Major
BioHealth Sciences (BS, CRED, HBS)
Pre-professional Options in Health Sciences
Pre-Clinical Laboratory Science
Pre-Dentistry
Pre-Medicine
Pre-Optometry
Pre-Pharmacy
Pre-Physical Therapy
Pre-Physician Assistant
Pre-Podiatry
Microbiology (BS, HBS)
Option
Aquatic Microbiology
Pre-Medicine/Microbiology
Minor
Microbiology

## Graduate Major

Microbiology (MA, MS, PhD)
Graduate Areas of Concentration
Environmental Microbiology
Food Microbiology
Genomics
Immunology
Microbial Ecology
Microbial Evolution
Parasitology
Pathogenic Microbiology
Virology

## Graduate Minor

Microbiology

Microbiology is concerned with the forms and activities of bacteria, archaea, fungi, protozoa, and viruses. It plays varied roles in the practical applications of technology and medicine, as well
as in the most theoretical problems of biology. Microbiologists are involved in activities as different as the study of gene structure, the control of disease, and the industrial processes based on the ability of microorganisms to decompose and synthesize complex organic molecules. Microbiology is one of the most rewarding of professions because it provides the opportunity to be in contact with all the other natural sciences and thus to contribute in many different ways to the betterment of life.

## UNDERGRADUATE STUDIES IN MICROBIOLOGY

Many fields of microbiology are available to students and research workers. These include fundamental areas such as the physiology, ecology, and genetics of microorganisms; and the applications of microbiology concerned with soil and water quality, food safety, immunology, and human, animal and plant diseases. Undergraduate studies prepare students for admission to professional schools, graduate programs in microbiology, and for positions in education and as health officers, sanitarians and biotechnicians in private industry, state and federal government.

High school students or community college transferees considering a career in microbiology will find it helpful to have a strong background in mathematics and chemistry. An excellent advising program is available to undergraduates, and prospective students are encouraged to consult with a departmental advisor or with faculty members working in an area of interest to them. Upper-division students are also encouraged to carry out a research project in the laboratory of a faculty member and/or to serve as an undergraduate teaching assistant. Several partial scholarships are available for microbiology majors. For more information, contact a microbiology advisor.

## UNDERGRADUATE STUDIES IN BIOHEALTH SCIENCES

Specialized programs are offered to students who wish to pursue careers in health-related fields. Such programs provide excellent academic preparation for students who plan to enter medical, pharmacy, or dental school, and for those choosing careers in physician assistant, physical therapy, optometry, clinical laboratory science, and podiatry. The curricula of the BioHealth Sciences major and accompanying options generally fulfills requirements at the respective professional schools. Because specific requirements vary from school to school, it is the student's responsibility to check requirements for any school to which the student plans to apply.

## GRADUATE STUDIES

The Department of Microbiology offers graduate programs leading to the Master of Science and Doctor of Philosophy degrees. Major fields of study in the program include molecular biology, microbial physiology, genetics, virology, soil and aquatic microbiology, immunology, pathogenic microbiology, and microbial genomes. The department also participates in the Master of Arts in Interdisciplinary Studies program. Students in both the master's and PhD programs are required to complete a research project leading to a thesis. Students pursuing the PhD degree must complete both written and oral qualifying examinations. Teaching and research assistantships are available.

For additional information, contact the department head or other faculty members conducting research in areas that are of interest.

## BIOHEALTH SCIENCES

## (BS, CRED, HBS)

## BioHealth Sciences Advisors:

## Beck, Kessel, Wolf

To earn a bachelor's degree in BioHealth Sciences, students must complete all University Baccalaureate Core requirements and choose one of the options listed below:

- Pre-Clinical Laboratory Science
- Pre-Dentistry
- Pre-Medicine
- Pre-Optometry
- Pre-Pharmacy
- Pre-Physical Therapy
- Pre-Physician Assistant
- Pre-Podiatry

The following is a BioHealth Sciences course plan. Specific degree requirements may be found under the option requirements.

All BioHealth Sciences majors must receive a $\mathbf{C}$ - or better in the following courses: (BI 211 or BI 211H), (BI 212 or BI 212H), (BI 213 or BI 213H), (CH 231 or CH 231 H ) and (CH 261 or CH 261 H )), ((CH 232 or CH 232 H ) and (CH 262 or CH 262H)).

## First Year

CH 231, CH 232, CH 233. *General
Chemistry ( $4,4,4$ )
and CH 261, CH 262, CH 263.
*Laboratory for Chemistry 231, 232, 233 (1,1,1)
Approved mathematical science (12)
(See the mathematics requirements listed
for each option. Some may require more
than 12 credits of mathematics, computer science and statistics courses.)
Baccalaureate core courses and/or electives (9)

Fitness (3)
Speech (3)
WR 121. *English Composition (3)

## Sophomore Year

BI 211, 212, 213. *Principles of Biology
$(4,4,4)$
General physics or physical science (12-15)
Baccalaureate core courses and/or electives
(15-18)
Writing II (3)

## Junior and Senior Years

Select one WIC course from below (3-4):
MB 385. ^Emerging Infectious Diseases and Epidemics (3)
BHS 323. ^Microbial Influences on Human Health (3)
HSTS 417. ${ }^{\wedge *}$ History of Medicine (4)
Select two Cultural Competency
courses from below (6-8): (one
course may also count for a bacc
core requirement)
ANTH 240. Introduction to Biological Anthropology (3)
ANTH 345. *Biological and Cultural Constructions of Race (3)
ECON 383. *The Economics of Discrimination (4)
ES 351. *Ethnic Minorities in Oregon (4)

ES 353. *Environmental Racism (4)
FCSJ/ANTH 361. *Food Justice (4)
HDFS 201. *Contemporary Families in the U.S. (3)
MB 330. *Disease and Society (3)
PHL 280. *Ethics of Diversity (4)
PSY 426. *Psychology of Gender (4)

## OPTIONS

## PRE-CLINICAL LABORATORY SCIENCE OPTION

Clinical laboratory scientists (also known as medical laboratory scientists or medical technologists) perform routine and highly specialized diagnostic procedures in clinical laboratories. They must be certified by the American Society of Clinical Pathologists (ASCP) or the National Certification Agency (NCA). Certification requires 12 to 15 months of training at an accredited professional school of clinical laboratory science. Oregon currently has one such school jointly administered by the Oregon Health and Science University (OHSU) and Oregon Institute of Technology (OIT); Washington and

California have several. Most clinical laboratory science schools require a bachelor of science degree for admission to their educational program; however, some schools (notably OHSU/OIT) accept students who have had three years of appropriate college work.
The curriculum in the OSU PreClinical Laboratory science program was developed in cooperation with nearby clinical laboratory science schools, and OSU students have shown a high success rate in these schools. Most pre-clinical laboratory science students complete the BS degree in BioHealth Sciences and then attend clinical laboratory science school (4+1 program).

## PRE-MEDICINE OPTION

Physicians diagnose illness and injury, prescribe and administer treatment and advise patients about how to prevent and manage wellbeing.

There are two paths to becoming a doctor: allopathic medicine, which leads to an MD, or osteopathic medicine, which leads to a DO. Both provide the education and training necessary to practice medicine.

The BioHealth Sciences major offers all of the entrance requirements to medical school to include a year each of biology, general chemistry, organic chemistry, physics, genetics, biochemistry, and more. The BioHealth Sciences major is also suited for postbaccalaureate students who already have a bachelor's degree in another subject and need science course work to apply to medical school. The book, Medical School Admission Requirements, published by the Association of American Medical Colleges (https:// www.aamc.org/), lists specific entrance requirements for each MD school. The American Association of Colleges of Osteopathic Medicine (http://www. aacom.org/error/?aspxerrorpath=/about/ Pages/default.aspx) lists requirements for osteopathic (DO) schools.

Admission to medical schools is very competitive. Students are chosen according to grades, MCAT scores, medical experience, and apparent motivation for medicine. A member of the premedical committee is assigned to each student as an advisor.

^ Writing Intensive Course (WIC)
Option Code: 600

## PRE-OPTOMETRY OPTION

To prepare for a career as an optometrist, students need three or four years of undergraduate work in science, followed by four years at an accredited college of optometry. Completion of the professional program leads to the degree of Doctor of Optometry. The curriculum described below satisfies the entrance requirements to most optometry schools in the United States. Applicants to optometry schools are accepted on a competitive basis. Students are encouraged to carefully check the prerequisites at the optometry schools of their interest and to work closely with admissions officers to ensure that all requirements have been fulfilled.

## PRE-PHARMACY OPTION

The BioHealth Sciences major offers a preparatory program designed to meet most requirements for admission to pharmacy schools across the U.S., including OSU's Doctor of Pharmacy (PharmD) professional program. Students who complete the four-year pre-pharmacy program earn a BS degree in BioHealth Sciences with a Pre-Pharmacy option. Satisfactory completion of the prepharmacy course work facilitates, but does not guarantee, admission to phar-
macy school; applicants are selected on a competitive basis. Students are urged to carefully check admission requirements at their schools of interest and work closely with admission representatives in order to make sure they are meeting all requirements.

## First Year (40-45)

## Fourth Year (45)

PH 201, PH 202, PH 203. *General Physics (5,5,5)
Science, Technology, and Society (3)
Upper-division electives (23-24) Recommend
BB 450, 451. General Biochemistry $(4,3)$
Writing Intensive Course (3-4)
Select one WIC course from the following (3-4):
BHS 323. ^Microbial Influences on Human Health (3)
BI/MB 385. ^Emerging Infectious Diseases and Epidemics (3) [BI 385 terminated fall 2017]
HSTS 417. ${ }^{\wedge *}$ History of Medicine (4)
The College of Science requires the completion of a minimum of 12 credits in CS, MTH, ST.
Additional courses from upper-division
science courses to total 36 credits of upper-division science. A total of 180
credits with 60 upper-division credits (courses numbered 300 and above) are required to graduate.

## Total=180

Additional courses required for entry into OSU's PharmD program:
BB 450, BB 451. General Biochemistry $(4,3)$
ECON 201. *Introduction to
Microeconomics (4)
or ECON 202. *Introduction to
Macroeconomics (4)
or AEC 250 . *Introduction to
Environmental Economics and Policy (3)
One course in the social or behavioral sciences (3) Only required for students who will not complete a BS degree before entry into PharmD.

## Additional courses for other <br> PharmD programs:

Each of the 130+ pharmacy schools in the U.S. has its own list of prerequisites. Many schools also require applicants to take the Pharmacy College Admission Test (PCAT). Students must check with any school to which they wish to apply for up-to-date information.

## Option Code: 583

## PRE-PHYSICAL THERAPY

## OPTION

Students who complete the four-year pre-physical therapy program earn a BS degree in BioHealth Sciences with a Pre-Physical Therapy option. This program is designed to meet most general requirements for admission to physical therapy schools. Satisfactory completion of the OSU course work facilitates, but does not guarantee, admission to a school of physical therapy; applicants are selected on a competitive basis. Students are urged to carefully check admission requirements at their schools of interest and work closely with admission representatives in order to ensure that they are meeting all requirements.

## PRE-PODIATRY OPTION

Podiatry is a growing and challenging health profession that focuses on the care of the human foot and leg. Podiatrists prevent, diagnose, and treat diseases and
disorders of the foot through both medical and surgical methods.

Students wishing to become podiatrists attend a four-year postbaccalaureate training program leading to a Doctor of Podiatric Medicine (DPM) at one of nine schools of podiatric medicine in the United States. These schools are located in Arizona, California, Florida, Illinois, Iowa, New York, Ohio, and Pennsylvania. To practice in Oregon, a DPM must also take the qualifying examination administered by the State Board of Podiatric Examiners.

Before entering a school of podiatric medicine, students must first complete four years of undergraduate study and fulfill entrance requirements to the school of their choice (note that most podiatry schools require 3 quarters of English/writing). Students who enroll in the Pre-Podiatry option will receive a BS degree in BioHealth Sciences upon completion of the curriculum shown below. The preparatory program at OSU will satisfy requirements for entrance to most podiatry schools.

## First Year

CH 231, CH 232, CH 233. *General
Chemistry $(4,4,4)$
and CH 261, CH 262, CH 263.

## MICROBIOLOGY (BS, HBS)

To receive the BS degree in Microbiology, a student must complete all university baccalaureate core requirements plus departmental requirements included in the list below.

- Majors must have 36 credits in microbiology with a minimum GPA of 2.00.
- Majors must receive a $\mathbf{C}$ - or better in the following courses: (BI 211 or BI 211 H ), (BI 212 or BI 212 H ), (BI 213 or BI 213 H$)$, ((CH 231 or CH 231 H$)$ and $(\mathrm{CH} 261$ or CH 261 H$))$, ((CH 232 or CH 232 H ) and ( CH 262 or CH $262 \mathrm{H}))$, ((CH 233 or CH 233 H$)$ and (CH 263 or CH 263 H$)$ ), (CH 331 or CH 331H), and MTH 251.
- Research (MB 401), Thesis (MB 403), and Reading and Conference (MB 405) cannot account for more than 3 of the required 36 microbiology credits.
- Special Projects (MB 406) can account for an additional 3 microbiology credits.
- Additional credits in these subjects will count toward elective credits.
- All required science courses must be taken for a grade.
- CH 324 may be taken with S/U grading; however, if taken $S / U$, the student will not receive a chemistry minor.
- 22 credits must come from the approved 400-level microbiology courses; to include MB 490 (2 credits) and 2 credits from 400-level laboratory courses.

## Freshman Year (45)

BI 211, 212, 213. *Principles of Biology $(4,4,4)$
CH 231, CH 232, CH 233. *General
Chemistry $(4,4,4)$
and CH 261, CH 262, CH 263.
*Laboratory for Chemistry 231, 232, 233 $(1,1,1)$
MB 110. Orientation to Microbiology (1)
MTH 251. *Differential Calculus (4)
MTH 252. Integral Calculus (4)
or MTH 268. Mathematical Ideas in
Biology (4)
Fitness (3)
Speech (3)
Writing I (3)

## Sophomore Year (46)

BI/BB 314. Cellular and Molecular Biology (4)

CH 331, CH 332. Organic Chemistry $(4,4)$
CH 337. Organic Chemistry Laboratory (4)
MB 302. General Microbiology (3)
MB 303. General Microbiology Laboratory (2)
PH 201, PH 202, PH 203. *General Physics
$(5,5,5)$

ST 351. Introduction to Statistical Methods (4)

Electives (3)
Writing II (3)

## Junior Year (44)

BB 450. General Biochemistry (4)
BB 451. General Biochemistry (3)
CH 324. Quantitative Analysis (4)
MB 310. Bacterial Molecular Genetics (3)
MB 311. ^Molecular Microbiology Lab: A
Writing Intensive Course (3)
MB 312. Bacterial Physiology and
Metabolism (3)
Perspectives (15)
Synthesis (6)
Electives (3)

## Senior Year (45)

MB 490. Microbiology Capstone Experience (2)

Select 20 credits from the approved 400-level microbiology courses below ( 2 credits of which must come from 400-level laboratory courses):
MB 401. Research (1-16)
MB 405. Reading and Conference (3)
MB 406. Special Projects (2-3)
MB 407. Seminar (1)
MB 410. Occupational Internship (3)
MB 416. Immunology (3)
MB 417. Immunology Laboratory (2)
MB 420. Microbial Genomes,
Biogeochemistry, and Diversity (3)
MB 430. Bacterial Pathogenesis (3)
MB 434. Virology (3)
MB 435. Pathogenic Microbes Laboratory (2)
MB 436. The Human Microbiome (3)
MB 440. Food Microbiology (3)
MB 441. Food Microbiology Laboratory (2)
MB 448. Microbial Ecology (3)
MB 456. Microbial Genetics and
Biotechnology (3)
MB/FST 479. Fermentation Microbiology (3)
MB 480. General Parasitology (3)
MB/FW 491. Fish Diseases in Conservation
Biology and Aquaculture (4)
MB 496. Fish Diseases in Conservation
Biology and Aquaculture Lab (2)

## MB 499. Special Topics (2)

## Total $=180$

Note: Microbiology majors planning advanced professional training in medicine, should consult a pre-medical, clinical lab science or other appropriate advisor.

^ Writing Intensive Course (WIC)
Major Code: 570

## OPTIONS

## AQUATIC MICROBIOLOGY <br> OPTION

The Aquatic Microbiology option encompasses a core of oceanography and microbiology courses heavy in coverage of aquatic systems, combined with a selection of elective courses offered by various departments. The option is designed to provide a microbiology major with a
detailed understanding of the role that microbes play in aquatic systems and for aquatic organisms, as well as an understanding of aquatic systems in general. The option complements the Marine Studies Initiative, which should stimulate interest in aquatic systems by students across campus.

Courses used to satisfy the Aquatic Microbiology option requirements may also satisfy the Upper-Division Microbiology Electives and Upper-Division Microbiology laboratory requirements in the Microbiology major.

## Required courses (13)

MB 314. Aquatic Microbiology (3)
MB 420. Microbial Genomes,
Biogeochemistry, and Diversity (3)
MB 448. Microbial Ecology (3)
OC 201. *Oceanography (4)
Must take at least 8 credits from the following:
BI 351. Marine Ecology (3)
BI 373. ^Field Methods in Marine Ecology (3)
BI 450. ${ }^{\wedge}$ Marine Biology and Ecology (15)
BI/FW 464. Marine Conservation Biology (3)
BI 495. Disease Ecology (3)
BOT 416. Aquatic Botany (4)
BOT 476. Introduction to Computing in the Life Sciences (3)
BOT 480. Photosynthesis and Photobiology (3)

FW/OC 434. Estuarine Ecology (4)
FW 456. Limnology (5)
MB/FW 491. Fish Diseases in Conservation Biology and Aquaculture (3)
MB/FW 496. Fish Diseases in Conservation Biology and Aquaculture Lab (2)

## Total=21 minimum credits

## Footnotes:

* Baccalaureate Core Course
$\wedge$ Writing Intensive Course

## Option Code: 736

## PRE-MEDICINE/MICROBIOLOGY OPTION

The Pre-Medicine/Microbiology option for the Microbiology major is designed to meet the current requirements for application to most medical schools in the U.S. (although students are advised to consult the requirements for specific schools before they apply, in the case of changes). Students pursuing a Microbiology degree receive a broad education in microbiological topics. The option focuses some of that education at the 400-level to ensure that students pursuing medicine take microbiology courses of interest to the medical field. In addition, the option adds important social science requirements and medical humanities electives that are not part of the general microbiology degree, but that are important for students pursuing a degree in medicine.

Courses used to satisfy the Pre-Medicine option requirements may also satisfy the Upper-Division Microbiology Electives and Upper-Division Microbiology
laboratory requirements in the Microbiology major. Courses may also be used to satisfy areas of the baccalaureate core.

## Required Courses (10 credits)

BI 109. Health Professions: Medical (1)
PSY 201. *General Psychology (3)
PSY 202. *General Psychology (3)
SOC 204. *Introduction to Sociology (3)

## Microbiology Courses

Select at least two 3-credit courses
below in addition to courses taken above:
MB 416. Immunology (3)
MB 430. Bacterial Pathogenesis (3)
MB 434. Virology (3)
MB 480. General Parasitology (3)
Microbiology Lab Course
Select at least one 2 -credit lab course below in addition to courses taken above:
MB 417. Immunology Laboratory (2)
MB 435. Pathogenic Microbes Laboratory (2)

## Other Electives

Select at least 7 credits from the courses listed below, in addition to courses taken above:
ANTH 383. *Introduction to Medical Anthropology (3)
BI 420. *Viruses in Modern Society (3)
H 312. *HIV/AIDS and STIS in Modern Society (3)
H 320. Introduction to Human Disease (3)
H 425. Foundations of Epidemiology (3)
HST 415. Selected Topics [Illness in
America: 1492-1850] (4)
HSTS 417. *^History of Medicine (4)
PHL 444. *Biomedical Ethics (4)
SOC 350. Health, Illness and Society (4)
ST 352. Introduction to Statistical Methods (4)

Z 431. Vertebrate Physiology I (3)
Z 432. Vertebrate Physiology II (3)
Total=25
Footnotes:

* Baccalaureate Core Course
${ }^{\wedge}$ Writing Intensive Course (WIC)
Option Code: 607

## MICROBIOLOGY MINOR

The Microbiology minor is designed for students from other majors who have an additional interest in microbiology.

## Required Core

MB 302. General Microbiology (3)
MB 303. General Microbiology Lab (3)
MB 310. Bacterial Molecular Genetics (3)
MB 311. ^Molecular Microbiology Lab: A
Writing Intensive Course (3)
MB 312. Bacterial Physiology and Metabolism (3)
Plus 13 additional credits of upper-division microbiology courses selected after consultation with the head advisor in the Department of Microbiology.

Two of the 13 credits must come from $400-$ level laboratory courses. Not more than 3 of the 13 upper-division credits can consist of MB 401, Research. Other blanket courses cannot be used to satisfy the minor requirement. All of these
courses must be graded, not $\mathrm{S} / \mathrm{U}$.
Total=27

Minor Code: 570

## MICROBIOLOGY (MA, MS, PhD)

Graduate Areas of Concentration Environmental microbiology, food microbiology, genomics, immunology, microbial ecology, microbial evolution, parasitology, pathogenic microbiology, virology
The Department of Microbiology offers graduate programs leading to the Master of Science, Master of Arts, and Doctor of Philosophy degrees. Major fields of study are diverse and include basic and applied aspects of virology and bacteriology; immunology and pathogenic microbiology; environmental and applied microbiology, and microbial evolution. Students may minor in a variety of related disciplines in the life sciences, such as molecular and cellular biology and biochemistry. Integrated minors are often selected in order to allow students to develop a program that best serves their needs.

The principal objectives of the graduate major in Microbiology are the completion of a comprehensive research project and preparation of a thesis. Student programs and research projects are developed with the major professor and are subject to approval by a committee of graduate faculty members. Microbiology research facilities are excellent and well-equipped.

For more information, write to Jerri Bartholomew, Professor, Department of Microbiology, 220 Nash Hall, OSU, Corvallis OR 97331-3804 or email: jerri. bartholomew@oregonstate.edu.

Students in the Microbiology Graduate Program are required to take the following core sequence of courses during their first year of enrollment in the program:
GRAD 520. Responsible Conduct of Research (1)
MB 511. Scientific Skills (1)
MB 512. Highlights of Microbiology (1)
MB 513. Microbial Systems (3)

## Major Code: 5700

## MICROBIOLOGY GRADUATE MINOR

For more details, see the departmental advisor.

## Minor Code: 5700 <br> ■ BIOHEALTH SCIENCES COURSES

BHS 107. HEALTH PROFESSIONS: DENTAL (1). Discussion of matters relating to a dental career. Includes application procedures, the importance of various requirements, admissions, professional school curricula, financing education and related matters. Speakers are included. Graded P/N.
BHS 199. SPECIAL TOPICS (1-16). Graded P/N. This course is repeatable for a maximum of 16
credits.
BHS 316. PRINCIPLES OF IMMUNOLOGY (3).
Interactions of the innate and adaptive immune responses in the context of infectious diseases, autoimmune diseases, immunodeficiencies and immunotherapies. This course is designed for nonmicrobiology majors. PREREQS: MB 230 [C-] or ((BI 212 [C-] or BI 212H [C-] ) and (BI 213 [C-] or BI 213H [C-] )) or (BI 204 [C-] and BI 205 [C-] )

## BHS 323. ^MICROBIAL INFLUENCES ON

 HUMAN HEALTH (3). How microorganisms contribute in beneficial and detrimental ways to human health. Emphasis on microbial contributions to cancer, gut health, chronic infection and autoimmune diseases. This course is part of the Writing Intensive Curriculum for the BioHealth Sciences major. (Writing Intensive Course) PREREQS: MB 302 [D-] or BI 314 [D-] or BB 450 [D-]BHS 329. MECHANISMS OF DISEASE:
INTRODUCTION TO GENERAL PATHOLOGY
(3). An introduction to basic principles of disease, focused on structural and functional changes of cells, tissues and organs, and their relationships to clinical disease. The emphasis of the course is at the cellular to organ level, but will cover some on molecular mechanisms as pertinent. PREREQS: (BI 211 [D-] or BI 211H [D-] ) and (BI 212 [D-] or BI 212 H [D-] )
BHS 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
BHS 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits.
BHS 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.
BHS 406. PROJECTS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.
BHS 407. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.
BHS 410. SCIENCE INTERNSHIP (1-12).
Supervised scientific work experience at selected cooperating institutions, agencies, laboratories, or companies. Graded P/N. This course is repeatable for a maximum of 12 credits.
BHS 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## - GENERAL SCIENCE COURSES

GS 199. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 16 credits.

GS 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
GS 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
GS 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.
GS 407. SEMINAR (1-16). One-credit sections. Graded $\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 16 credits.

GS 410. SCIENCE INTERNSHIP (1-12).
Supervised scientific work experience at selected cooperating institutions, agencies, laboratories, or companies. Graded P/N. This course is repeatable for a maximum of 12 credits. PREREQS: Upperdivision standing in appropriate major.

## ■ MOLECULAR BIOLOGY COURSES

MB 110. ORIENTATION TO MICROBIOLOGY (1). Introduction of incoming microbiology students to college life with an emphasis on faculties, facilities, services, and curricula in microbiology. Exposure to career opportunities in microbiology. Graded P/N.

MB 201. LABORATORY SKILLS (1-16). These credits are designed for students who are doing experiential learning in a research laboratory on campus, performing basic laboratory tasks that are not elevated to the level of an independent research project. Graded P/N. This course is repeatable for a maximum of 16 credits.

MB 230. *INTRODUCTORY MICROBIOLOGY (4) Microbiology as it affects our everyday lives. The impact of microorganisms on health, food/water sanitation, environment, industry, and genetic engineering. Lec/lab. (Bacc Core Course)
MB 230H. *INTRODUCTORY MICROBIOLOGY
(4). Microbiology as it affects our everyday lives. The impact of microorganisms on health, food/ water sanitation, environment, industry, and genetic engineering. Lec/lab. (Bacc Core Course) PREREQS: Honors College approval required.
MB 299. SPECIAL TOPICS (1-16). May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits.
MB 299H. SPECIAL TOPICS (1-16). May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.

## MB 302. GENERAL MICROBIOLOGY (3).

 Emphasis on cytology, physiology, virology, growth and control of growth with coverage of the role of microorganisms in nature, in disease, and as useful tools. PREREQS: (CH 332 [D-] or CH 335 [D-] ) and (BI 212 [D-] or BI 212H [D-] ) and (BI 213 [D-] or BI 213H [D-] )
## MB 303. GENERAL MICROBIOLOGY

LABORATORY (2). Development of laboratory techniques; exercises designed to reinforce concepts covered in MB 302. MB 302 is a prereq that may be taken prior to or concurrently with MB 303. Lec/lab. PREREQS: MB 302* [D-] and two terms organic chemistry.
MB 310. BACTERIAL MOLECULAR GENETICS
(3). Introductory concepts of bacterial molecular genetics. Topics include DNA replication, mutation, DNA repair, DNA recombination, transposons, bacteriophages, genetic manipulation, and gene regulation. PREREQS: MB 302 [D-] and (BI 314 [D-] or BI 314H [D-] or BB 314 [D-] ) and (BB 450 [D-] or BB 490 [D-]) and (BB 451* [D-] or BB 491* [D-] )
MB 311. ^MOLECULAR MICROBIOLOGY LAB: A WRITING INTENSIVE COURSE (3). Scientific writing, laboratory notebook composition, experimental design, and laboratory experiments in bacterial molecular biology. (Writing Intensive Course) PREREQS: ((MB 303 [D-] or MB 303H [D-] ) and MB 310* [D-] )

## MB 312. BACTERIAL PHYSIOLOGY AND

METABOLISM (3). Molecular structure and function, macromolecular assembly, energy production and use, and cellular growth. PREREQS: (MB 310 [D-] and BB 451 [D-] ) and BB 450
MB 314. AQUATIC MICROBIOLOGY (3). A survey of the diversity, ecology, and physiology of microbes in aquatic systems, with emphasis on their roles in food webs, chemical cycling, and human health. Provides the background knowledge and quantitative/analytical skills necessary to interpret and critique current and historical research in the fields of general aquatic microbiology. PREREQS: (CH 231 [D-] or CH 231 H [D-] or CH 121 [D-]) and (CH 232 [D-] or CH 232 H [D-] or CH 122 [D-]) and (CH 233 [D-] or CH 233 H [D-] or CH 123 [D-] )
MB 330. *DISEASE AND SOCIETY (3). Infectious disease has many effects on the development of society, and likewise, human interactions affect the development of disease. The course examines these interactions with a focus on the role of race, class, and economic status in the development of epidemics. (Bacc Core Course)

MB 385. ^EMERGING INFECTIOUS DISEASES AND EPIDEMICS (3). Emerging and reemerging infectious disease is a contemporary global issue of great concern. To understand and evaluate the issue, the course covers germ theory, disease history and ecology, microbial pathogenesis and the immune response, historic plagues, and the biological, environmental, population and social changes that contribute to disease emergence. (Writing Intensive Course) CROSSLISTED as BI 385 PREREQS: (BI 211 [D-] or BI 211H [D-]) and (BI 212 [D-] or BI 212 H [D-] ) and BI 213 [D-] or (BI 213H [D-])
MB 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
MB 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
MB 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

MB 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

MB 405. READING AND CONFERENCE (1-16). Conference: Instruction in microbiology. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
MB 406. SPECIAL PROJECTS (1-16). Reading and Conference/Instructor in Microbiology. This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

MB 407. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

MB 410. OCCUPATIONAL INTERNSHIP (110). Supervised work experience at selected cooperating institutions, agencies, laboratories, clinics or companies. Maximum of 10 credits allowed but no more than 3 credits may be used to satisfy microbiology major requirement of 36 credits. Graded P/N. This course is repeatable for a maximum of 10 credits. PREREQS: Departmental approval required.
MB 416. IMMUNOLOGY (3). Basic theory and applications of immunochemistry, immunogenetics, and cellular immunology. Examination of immunologically related diseases. PREREQS: (BB 450 [D-] or BB 490 [D-] )

## MB 417. IMMUNOLOGY LABORATORY

(2). Laboratory on the applications of current immunological techniques. PREREQS: ((MB 303 [D-] or MB 303H [D-] ) and MB 416* [D-] )

## MB 420. MICROBIAL GENOMES,

BIOGEOCHEMISTRY, AND DIVERSITY (3).
A survey of microbial diversity from the earliest lifeforms to the modern role of bacteria and archaea in global biogeochemical cycles. Topics covered include molecular evolution, microbial genomics, biochemical diversity, and metabolic pathways that adapt cells to extreme environments. Particular emphasis is placed on marine systems, from photosynthesis in surface waters to life in the ocean crust. PREREQS: BB 451 [D-]
MB 430. BACTERIAL PATHOGENESIS (3). Bacteria pathogenic for humans, emphasizing the structural, physiological and genetic mechanisms of pathogenesis. Role of the immune system in pathogenesis and protection. PREREQS: MB 302 [D-] and MB 310 [D-] and (BB 451 [D-] or BB 491 [D-] )
MB 434. VIROLOGY (3). Properties of viruses, their biology and pathogenesis. Emphasis on viruses causing human disease. PREREQS: (BB 451 [D-] and MB 310* [D-] )

## MB 435. PATHOGENIC MICROBES

LABORATORY (2). Laboratory experiments to illustrate concepts presented in MB 430 and/or MB 434, focusing on pathogenic microorganisms. PREREQS: (MB 303 [D-] or MB 303H [D-] ) and MB 302 [D-] and (MB 430* [D-] or MB 434* [D-] )

MB 436. THE HUMAN MICROBIOME (3). Examines the biodiversity, function, and medical importance of the communities of microorganisms that inhabit the human body. A diverse array of topics will be discussed, including how the human microbiome is studied, case studies of specific aspects of the human microbiome, and emerging theories of how the microbiome influences human health. PREREQS: BI 314 [D-] or BI 314H [D-] or MB 302 [D-]
MB 440. FOOD MICROBIOLOGY (3). Role of microorganisms in food spoilage, infection, and intoxication; also basic principles in contamination control and germicidal treatment during processing, preparing, and distributing food for consumption. PREREQS: MB 302 [D-] and /or equivalent.
MB 441. FOOD MICROBIOLOGY LABORATORY
(2). Laboratory techniques to accompany MB 440/ MB 540. PREREQS: ((MB 303 [D-] or MB 303H D-] ) and MB 440* [D-] ) and MB 302

MB 448. MICROBIAL ECOLOGY (3). A comparison of soil sediments and freshwater as microbial habitats. Discussion of the role of microorganisms in nutrient cycles, effects of microbial activity on plant and animal life. PREREQS: MB 302 [D-]

MB 456. MICROBIAL GENETICS AND BIOTECHNOLOGY (3). General biology of natural, genetically engineered, and composite plasmids. Major topics include extrachromosomal DNA replication, plasmid transmission, insertion elements, transposons, gene expression, and recombinant DNA vectors. Biotechnological applications and molecular genetic tools are emphasized. PREREQS: MB 302 [D-] and (BB 450 [D-] or BB 490 [D-] ) and (BB 451 [D-] or BB 491 [D-] ) and (MB 310 [D-] or BB 492 [D-] )
MB 479. FERMENTATION MICROBIOLOGY (3). An introduction to industrial microbiology with a focus on the physiology of fermentation and use of microorganisms for the production of food ingredients, fermented foods, and beverages. FST students need to take BB 350 and MB students need to take BB 450 for their respective majors. CROSSLISTED as FST 479/FST 579. PREREQS (BI 212 [C-] or BI 212 H [C-]) and CH 331 [C-] and CH 332 [C-] and (BB 350 [D-] or BB 450 [D-]) and MB 302 [D-]
MB 480. GENERAL PARASITOLOGY (3).
Introduction to parasitology. The course emphasizes medical parasitology, but will cover a broad overview of parasitology, covering important groups and host/parasite relationships among all taxa from invertebrates to vertebrates, including mammals. PREREQS: BI 314 or BB 450 or equivalent or Z 361 or MB 302 or equivalent.

MB 490. MICROBIOLOGY CAPSTONE EXPERIENCE (2). Capstone experience for microbiology students to practice professional skills necessary to sustain a career in science. Students will work in teams to analyze research data and communicate this analysis, in addition to explore career opportunities and learn how to successfully compete for jobs. Graded P/N. PREREQS: MB 302 [D-] and junior or senior status.
MB 491. FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE (3). Introduction to diseases of fish including pathogens important to aquaculture and ornamental industries as well as to wild fish populations and conservation programs. CROSSLISTED as FW 491/FW 591. PREREQS: 9 credits of upper-division fisheries or biology.
MB 496. FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE LAB (2). This laboratory complements lectures in FW/MB 491/591, with students learning basic necropsy techniques; identification of bacterial, viral and metazoan pathogens; and molecular identification methods. CROSSLISTED as FW 496/FW 596. PREREQS: MB 303 or other upper-division laboratory course.

MB 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

MB 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

MB 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS:
Departmental approval required.
MB 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
MB 507. SEMINAR (1). Graded P/N. This course is repeatable for a maximum of 99 credits.
MB 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

MB 511. SCIENTIFIC SKILLS (1). Foundational skills for success in graduate school. Students will also become familiar with ongoing research programs in three active programs in the Microbiology Program.
MB 512. HIGHLIGHTS OF MICROBIOLOGY (1).
Designed for students to gain familiarity with the history of microbiology through reading, reviewing and writing about great papers in the field. Students also meet the Microbiology Program faculty and students, and learn about some of the research in the Microbiology Program through attending colloquium.

MB 513. MICROBIAL SYSTEMS (3). Presentation of a modern view of microbiology through the lens of microbes' influences on our planet's habitats and inhabitants. Discusses current research and the use of advanced techniques to illustrate how microbiology is contributing to many crossdisciplinary problems that can involve engineering, public health, sociology, ecology, geology, etc.
MB 516. IMMUNOLOGY (3). Basic theory and applications of immunochemistry, immunogenetics, and cellular immunology Examination of immunologically related diseases. PREREQS: BB 450 or BB 490

## MB 517. IMMUNOLOGY LABORATORY

(2). Laboratory on the applications of current immunological techniques. PREREQS: (MB 303 or MB 303H) and MB 516*

## MB 520. MICROBIAL GENOMES,

BIOGEOCHEMISTRY, AND DIVERSITY (3).
A survey of microbial diversity from the earliest lifeforms to the modern role of bacteria and archaea in global biogeochemical cycles. Topics covered include molecular evolution, microbial genomics, biochemical diversity, and metabolic pathways that adapt cells to extreme environments. Particular emphasis is placed on marine systems, from photosynthesis in surface waters to life in the ocean crust. PREREQS: BB 451 or BB 551

## MB 530. BACTERIAL PATHOGENESIS (3).

Bacteria pathogenic for humans, emphasizing the structural, physiological and genetic mechanisms of pathogenesis. Role of the immune system in pathogenesis and protection. PREREQS: MB 302 and MB 310 and (BB 451 or BB 491)
MB 534. VIROLOGY (3). Properties of viruses, their biology and pathogenesis. Emphasis on viruses causing human disease. PREREQS: MB 310 and BB 451
MB 540. FOOD MICROBIOLOGY (3). Role of microorganisms in food spoilage, infection, and intoxication; also basic principles in contamination control and germicidal treatment during processing, preparing, and distributing food for consumption. PREREQS: MB 302 or equivalent.
MB 541. FOOD MICROBIOLOGY LABORATORY (2). Laboratory techniques to accompany MB 440/ MB 540. PREREQS: MB 540* [C] and MB 302 and MB 303

MB 548. MICROBIAL ECOLOGY (3). A comparison of soil sediments and freshwater as microbial habitats. Discussion of the role of microorganisms in nutrient cycles, effects of microbial activity on plant and animal life. PREREQS: MB 302
MB 555. BIOLOGY OF THE PROKARYOTES
(3). An integrative graduate course examining bacterial and archaeal life at different levels of biological organization, emphasizing current research and analysis of primary literature. The various life styles of prokaryotes are the common theme of the course. Topics include biofilms, cooperation and communication, development, stress responses, metabolic interactions involved in global nutrient cycling. Offered every even year in winter term. PREREQS: BB 450 and MB 310 and MB 312 or equivalent
MB 556. MICROBIAL GENETICS AND
BIOTECHNOLOGY (3). General biology of natural, genetically engineered, and composite plasmids. Major topics include extrachromosomal DNA replication, plasmid transmission, insertion elements, transposons, gene expression, and recombinant DNA vectors. Biotechnological applications and molecular genetic tools are emphasized. PREREQS: MB 302 and (BB 450 or BB 490) and (BB 451 or BB 491) and (MB 310 or BB 492)
MB 579. FERMENTATION MICROBIOLOGY (3).
An introduction to industrial microbiology with a focus on the physiology of fermentation and use of microorganisms for the production of food ingredients, fermented foods, and beverages. CROSSLISTED as FST 479/FST 579. PREREQS: (BI 212 or BI 212 H ) and CH 331 and CH 332 and (BB 350 or BB 450) and MB 302

MB 580. GENERAL PARASITOLOGY (3). Introduction to parasitology. The course emphasizes medical parasitology, but will cover a broad overview of parasitology, covering important groups and host/parasite relationships among all taxa from invertebrates to vertebrates, including mammals. PREREQS: BI 314 or BB 450 or equivalent or Z 361 or MB 302 or equivalent.

## MB 591. FISH DISEASES IN CONSERVATION

 BIOLOGY AND AQUACULTURE (3). Introduction to diseases of fish including pathogens important to aquaculture and ornamental industries as well as to wild fish populations and conservation programs. CROSSLISTED as FW 491/FW 591. PREREQS: 9 credits of upper-division fisheries or biology.MB 596. FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE LAB (2). This laboratory complements lectures in FW/MB 491/591, with students learning basic necropsy techniques; identification of bacterial, viral and metazoan pathogens; and molecular identification methods. CROSSLISTED as MB 496/MB 596. PREREQS: MB 303 or other upper-division laboratory course.

MB 599. SELECTED TOPICS (0-6). This course is repeatable for a maximum of 24 credits.

MB 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
MB 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.
MB 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

MB 607. SEMINAR (1). Graded P/N. This course is repeatable for a maximum of 99 credits.

MB 610. INTERNSHIP (1-9). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required
MB 668. MICROBIAL BIOINFORMATICS AND GENOME EVOLUTION (4). Theoretical and
practical issues in microbial genome sequencing and annotation, with an emphasis on evolutionary theory and comparative analysis of microbial genome sequences. Metabolic prediction from genomes, with a population genetics perspective on comparative microbial genomics. Exploration of applications of genomics and allied tools to microbial populations, including metagenomics, metaproteomics, and metatranscriptomics.
MB 699. SPECIAL TOPICS (0-16). Lec/lab. This course is repeatable for a maximum of 16 credits.
MB 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.
MB 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
MB 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.
MB 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
MB 507. SEMINAR (1). Graded P/N. This course is repeatable for a maximum of 99 credits.
MB 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
MB 511. SCIENTIFIC SKILLS (1). Foundational skills for success in graduate school. Students will also become familiar with ongoing research programs in three active programs in the Microbiology Program.
MB 512. HIGHLIGHTS OF MICROBIOLOGY (1).
Designed for students to gain familiarity with the history of microbiology through reading, reviewing and writing about great papers in the field. Students also meet the Microbiology Program faculty and students, and learn about some of the research in the Microbiology Program through attending colloquium.
MB 513. MICROBIAL SYSTEMS (3). Presentation of a modern view of microbiology through the lens of microbes' influences on our planet's habitats and inhabitants. Discusses current research and the use of advanced techniques to illustrate how microbiology is contributing to many crossdisciplinary problems that can involve engineering, public health, sociology, ecology, geology, etc.
MB 516. IMMUNOLOGY (3). Basic theory and applications of immunochemistry, immunogenetics, and cellular immunology. Examination of immunologically related diseases. PREREQS: BB 450 or BB 490
MB 517. IMMUNOLOGY LABORATORY
(2). Laboratory on the applications of current immunological techniques. PREREQS: (MB 303 or MB 303H) and MB 516*

## MB 520. MICROBIAL GENOMES,

BIOGEOCHEMISTRY, AND DIVERSITY (3).
A survey of microbial diversity from the earlies lifeforms to the modern role of bacteria and archaea in global biogeochemical cycles. Topics covered include molecular evolution, microbial genomics, biochemical diversity, and metabolic pathways that adapt cells to extreme environments. Particular emphasis is placed on marine systems, from photosynthesis in surface waters to life in the ocean crust. PREREQS: BB 451 or BB 551
MB 530. BACTERIAL PATHOGENESIS (3).
Bacteria pathogenic for humans, emphasizing the structural, physiological and genetic mechanisms of pathogenesis. Role of the immune system in pathogenesis and protection. PREREQS: MB 302 and MB 310 and (BB 451 or BB 491)
MB 534. VIROLOGY (3). Properties of viruses, their biology and pathogenesis. Emphasis on viruses causing human disease. PREREQS: MB 310 and BB 451

MB 540. FOOD MICROBIOLOGY (3). Role of microorganisms in food spoilage, infection, and intoxication; also basic principles in contamination control and germicidal treatment during processing, preparing, and distributing food for consumption. PREREQS: MB 302 or equivalent.
MB 541. FOOD MICROBIOLOGY LABORATORY
(2). Laboratory techniques to accompany MB 440/ MB 540. PREREQS: MB 540* [C] and MB 302 and MB 303

MB 548. MICROBIAL ECOLOGY (3). A
comparison of soil sediments and freshwater as microbial habitats. Discussion of the role of microorganisms in nutrient cycles, effects of microbial activity on plant and animal life. PREREQS: MB 302

MB 555. BIOLOGY OF THE PROKARYOTES (3).
An integrative graduate course examining bacterial and archaeal life at different levels of biological organization, emphasizing current research and analysis of primary literature. The various life styles of prokaryotes are the common theme of the course. Topics include biofilms, cooperation and communication, development, stress responses, metabolic interactions involved in global nutrient cycling. Offered every even year in winter term. PREREQS: BB 450 and MB 310 and MB 312 or equivalent

## MB 556. MICROBIAL GENETICS AND

BIOTECHNOLOGY (3). General biology of natural, genetically engineered, and composite plasmids. Major topics include extrachromosomal DNA replication, plasmid transmission, insertion elements, transposons, gene expression, and recombinant DNA vectors. Biotechnological applications and molecular genetic tools are emphasized. PREREQS: MB 302 and (BB 450 or BB 490) and (BB 451 or BB 491) and (MB 310 or BB 492)

MB 579. FERMENTATION MICROBIOLOGY (3). An introduction to industrial microbiology with a focus on the physiology of fermentation and use of microorganisms for the production of food ingredients, fermented foods, and beverages. CROSSLISTED as FST 479/FST 579. PREREQS: (BI 212 or BI 212 H ) and CH 331 and CH 332 and (BB 350 or BB 450) and MB 302
MB 580. GENERAL PARASITOLOGY (3).
Introduction to parasitology. The course emphasizes medical parasitology, but will cover a broad overview of parasitology, covering important groups and host/parasite relationships among all taxa from invertebrates to vertebrates, including mammals. PREREQS: BI 314 or BB 450 or equivalent or $Z 361$ or MB 302 or equivalent.
MB 591. FISH DISEASES IN CONSERVATION
BIOLOGY AND AQUACULTURE (3). Introduction to diseases of fish including pathogens important to aquaculture and ornamental industries as well as to wild fish populations and conservation programs. CROSSLISTED as FW 491/FW 591.
PREREQS: 9 credits of upper-division fisheries or biology.
MB 596. FISH DISEASES IN CONSERVATION
BIOLOGY AND AQUACULTURE LAB (2). This
laboratory complements lectures in FW/MB 491/591, with students learning basic necropsy techniques; identification of bacterial, viral and metazoan pathogens; and molecular identification methods. CROSSLISTED as MB 496/MB 596. PREREQS: MB 303 or other upper-division laboratory course.
MB 599. SELECTED TOPICS (0-6). This course is repeatable for a maximum of 24 credits.
MB 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required
MB 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required.

MB 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of

16 credits. PREREQS: Departmental approval required.
MB 607. SEMINAR (1). Graded P/N. This course is repeatable for a maximum of 99 credits.

MB 610. INTERNSHIP (1-9). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.
MB 668. MICROBIAL BIOINFORMATICS AND GENOME EVOLUTION (4). Theoretical and practical issues in microbial genome sequencing and annotation, with an emphasis on evolutionary theory and comparative analysis of microbial genome sequences. Metabolic prediction from genomes, with a population genetics perspective on comparative microbial genomics. Exploration of applications of genomics and allied tools to microbial populations, including metagenomics, metaproteomics, and metatranscriptomics.

MB 699. SPECIAL TOPICS (0-16). Lec/lab. This course is repeatable for a maximum of 16 credits.

## STATISTICS

Virginia M. Lesser, Chair
239 Weniger Hall
Oregon State University
Corvallis, OR 97331-8574
541-737-3336
Email: stat-statoff@science.oregonstate.edu Website: http://www.stat.oregonstate.edu/

## FACULTY

Professors Gitelman, Lesser, Rojo Associate Professors Di, Emerson, Madsen, Xue
Assistant Professors Bhattacharyya, Fuentes, D. Jiang, Y. Jiang, McLaughlin, Mondal, Sharpton, Wickham
Senior Research Associate Newton
Research Associates Nawrocki, Sifneos
Senior Instructor II Kollath
Instructors Jager, Moore

## Undergraduate Minor

Statistics
Graduate Majors
Data Analytics (MS)
Statistics (MA, MAIS, MS, PhD)
Graduate Area of Concentration Statistics

## Graduate Minor

Statistics
Graduate Certificate
Data Analytics

The Department of Statistics offers undergraduate service courses and an undergraduate minor, as well as graduate courses and programs leading to the MA, MS, and PhD degrees or to a minor for an advanced degree in other fields. Students planning to major in statistics at the graduate level should have a minimum of mathematics through multivariable calculus, linear algebra, and an upperdivision sequence in mathematical statistics.

## SURVEY RESEARCH CENTER

Website: http://stat.oregonstate.edu/src/ survey-research-center

Established in 1973, the Oregon State University Survey Research Center (OSUSRC ) provides comprehensive survey services including proposal development, questionnaire design and layout, survey administration and data collection, survey analysis and professional report writing. Our staff offers customized options, working with our clients to determine the best approach to collect survey data based on the study objectives, population of interest, and budgetary concerns. Our past and current clients include federal, state, and local agencies, national nonprofit organizations, and OSU-affiliated entities. The OSU-SRC maintains several contracts with clients to provide our services on a recurrent basis, from monthly, annually, to ever few years.
Operating as a center for research in survey methodology, the OSU-SRC routinely conducts experiments using self-administered surveys with an aim to contribute to survey methodology research. The OSU-SRC subsequently publishes related material in scientific journals and presents experimental findings at professional meetings. The OSUSRC provides expertise using survey best practices to maximize response rates and reduce non-response bias. Various sampling plans are examined for each survey to minimize total survey error. The OSU-SRC also offers consulting for OSU community members on research-based survey design and analysis.

## STATISTICS MINOR

The undergraduate minor in Statistics requires a minimum of 27 credits in statistics, including:
ST 201. Principles of Statistics (4) ${ }^{1}$
or ST 314. Introduction to Statistics for Engineers (3)
or ST 351. Introduction to Statistical Methods (4)
ST 352. Introduction to Statistical Methods (4)

ST 407. Seminar: Sect. 1 Attendance at Consulting Practicum (1)
ST 421, ST 422. Introduction to Mathematical Statistics $(4,4)$ and at least 10 credits of additional approved courses.

## Approved courses include:

BOT 440. Field Methods in Plant Ecology (4)
ECE 461. Introduction to Analog and
Digital Communications (4)
ECON 424. Introduction to Econometrics (4)
FOR 321. Forest Mensuration (5)
H 425. Foundations of Epidemiology (3)
IE 355. Statistical Quality Control (4)
IE 356. Experimental Design for Industrial Processes (4)
MTH 464. Probability II (3)
MTH 465. Probability III (3)
MTH 467. Actuarial Mathematics (3)

PSY 301. Research Methods in Psychology (4)
SOC 315. ${ }^{\wedge}$ Methods I: Research Design (4)
ST 411, ST 412, ST 413. Methods of Data
Analysis $(4,4,4)$
ST 415. Design and Analysis of Planned Experiments (3)
ST 431. Sampling Methods (3)
ST 435. Quantitative Ecology (3)
ST 439. Survey Methods (3)
ST 441. Probability, Computing, and Simulation in Statistics (4)
ST 443. Applied Stochastic Models (3)
ST 473. Ecological Sampling (3)
ST 499. Special Topics (1-4)
Other statistics-related courses may be substituted, subject to departmental approval.

## Footnotes:

${ }^{1}$ ST 314 or ST 351 may be taken in place of ST 201.
$\wedge$ Writing Intensive Course (WIC)

## Minor Code: 615

## GRADUATE MAJORS

## DATA ANALYTICS (MS)

Offered via Ecampus only.
Prerequisites
ST 351. Introduction to Statistical Methods (4)

Mathematics to the level of calculus is recommended but not required.
Statistics Core ( 21 credits)
ST 516. Foundations of Data Analytics (4)
ST 517. Data Analytics I (4)
ST 518. Data Analytics II (4)
ST 558. Multivariate Analytics (3)
ST 566. Time Series Analytics (3) [Pending approval]
ST 595. Capstone Project (3) [Pending submission and approval of a proposal]

## Computer Science Core (12 credits)

CS 511. Programming Concepts for Nonmajors (4) [Pending submission and approval of a proposal]
CS 512. Big Data Management (4) [Pending submission and approval of a proposal]
CS 513. Applied Machine Learning (4) [Pending submission and approval of a proposal]

## Electives in Statistics (12 credits)

ST 515. Design and Analysis of Planned Experiments (3)
*ST 525. Applied Survival Analysis (3)
ST 537. Data Visualization (3)
ST 538. Modern Analytical Methods for Large and Complex Datasets (3)
ST 539. Survey Methods (3)
ST 588. Data Mining (3) [Pending submission and approval of a proposal]
ST 591. Introduction to Quantitative Genomics (3) [Pending submission and approval of a proposal]
ST 592. Statistical Methods for Genomic Research (3)
Total=45
Major Code: 6160

## STATISTICS (MA, MS, PhD, MAIS)

## Graduate Areas of Concentration Statistics

The Department of Statistics offers Master of Arts, Master of Science, and Doctor of Philosophy degrees in Statistics. Students can concentrate on theory or applications, and programs can be tailored to emphasize such areas of interest as ecology, engineering, forestry, finance, mathematics, or oceanography. The thesis is optional for MS and MA degrees. Statistical consulting is part of the program, enabling the student to gain a deeper appreciation of the need, power, and applicability of statistical tools through exposure to real problems.

## MS in Statistics

The MS program is designed to prepare a candidate for a career in industry or government or for further study at the PhD level. Recent MS graduates have found employment with the U.S. Environmental Protection Agency, U.S. Census Bureau, Abt Associates, state of Oregon, Fred Hutchinson Cancer Research Center, Kaiser Permanente, Mayo Clinic, Bureau of Labor Statistics, Department of Veteran's Affairs, NOAA, MRI Global, and Capital One.

## Prerequisites

- Single-variable and multivariable calculus (approximately 4 quarters).
- Linear algebra.
- An undergraduate sequence in mathematical statistics. Typical textbook: Mathematical Statistics with Applications by Mendenhall, et al.
- One or more applied statistics courses (recommended, but not required).
Students who meet all of the requirements except for one or two courses may be granted provisional admission so they can begin their graduate studies while completing the remaining required courses. When the remedial course work is completed the Graduate School will remove the provisional status.

## Required

ST 501. Research (3)
ST 506. Projects: (Sect 2) Teaching
Experience (1)
ST 507. Seminar: (Sect 1) Attendance at
Consulting Seminar (1)
ST 507. Seminar: (Sect 3) Attendance at Research Seminar $(1,1)$
ST 509. Consulting Practicum (2)
ST 541. Probability, Computing, and Simulation in Statistics (4)
ST 551, ST 552, ST 553. Statistical Methods $(4,4,4)$
ST 561, ST 562, ST 563. Theory of Statistics $(3,3,3)$
ST 623. Generalized Regression Models I (3)
Additional approved courses* (15)

## Total=52 credits

* Approved courses include all 500- and 600-level courses in the Statistics Department except:

ST 511, ST 512, ST 513. Methods of Data Analysis $(4,4,4)$
ST 515. Design and Analysis of Planned
Experiments (3)
ST 521, ST 522. Introduction to
Mathematical Statistics $(4,4)$
Courses with a zero middle digit and courses in other departments may be used only with the consent of the major professor (and minor professor if the course is listed in the minor).

A student intending to pursue the PhD in Statistics should review the mathematics prerequisites and requirements for that program and plan a course of study to satisfy them.

## Other Requirements

- Pass written comprehensive exams in statistical methods and in statistical theory. These exams are given each year in September.
- Pass a final oral exam.

## PhD in Statistics

The PhD program is designed to prepare a candidate for a career in teaching and research. Recent PhD graduates have found employment with US Geological Survey, Chase Bank, Bureau of Labor Statistics, USDA Forest Service, Weyerhauser, as well as with universities in the U.S. and abroad.

## Prerequisites

- Equivalent to the OSU Master's degree in Statistics.
- Pass the MS comprehensive exams in methods and theory.
- Apply for admission to PhD program. (Evaluation is by the entire faculty. The evaluation criteria for admission are: course work, grades, MS comprehensive exam results, and any information you provide in your application giving evidence of capability to do original research.)
- Course work equivalent to MTH 311, Advanced Calculus (4) and MTH 312, Advanced Calculus (4).

## Required Course Work

MTH 511. Real Analysis (3)
MTH 664. Probability Theory (3)
ST 509. Consulting (2 credits annually)
ST 541. Probability, Computing, and
Simulation in Statistics (4)
ST 551, ST 552, ST 553. Statistical Methods $(3,3,3)$
ST 561, ST 562, ST 563. Theory of Statistics $(3,3,3)$
ST 603. Thesis: PhD Research (36 credit minimum)
ST 623, ST 625. Generalized Regression Models I, II $(3,3)$
ST 651, ST 652. Linear Model Theory $(3,3)$
ST 661, ST 662, ST 663. Advanced Theory of Statistics $(3,3)$

## Total of about 120 credits of course

## work.

Credits completed for an MS degree as well as the 36 or more credits of ST 603 count toward this total. The specific
courses to be taken are decided at a meeting of the PhD committee.

## Other Requirements:

- Pass the preliminary exam over PhD course work.
- Write a thesis describing the results of original research.
- Pass the final examination over thesis and related material.

## Major Code: 6150

## STATISTICS GRADUATE MINOR

## MS Minor in Statistics

## Required

ST 521, ST 522. Introduction to
Mathematical Statistics $(4,4)$
ST 511, ST 512. Methods of Data Analysis $(4,4)$
The student and/or minor professor may wish to add one or two additional courses from below:

ST 513. Methods of Data Analysis (4)
ST 515. Design and Analysis of Planned
Experiments (3)
ST 531. Sampling Methods (3)
ST 535. Quantitative Ecology (3)
ST 557. Applied Multivariate Analysis (3)
ST 565. Time Series (3)
ST 573. Ecological Sampling (3)

## PhD Minor in Statistics

## A PhD minor program in statistics should

 include:ST 521, ST 522. Introduction to
Mathematical Statistics $(4,4)$
or ST 561, ST 562, ST 563. Theory of Statistics (3,3,3)
ST 551, ST 552, ST 553. Statistical Methods $(4,4,4)$
or ST 511, ST 512, ST 513. Methods of Data Analysis $(4,4,4)$
Additional statistics-related courses approved by the minor professor.

- If ST 551, ST 552, and ST 553 are taken, the additional courses should total at least 3 credits.
- If ST 511, ST 512, and ST 513 are taken, they should total at least 6 credits.
All programs must be approved by the student's minor professor.

## Minor Code: 6150

## DATA ANALYTICS GRADUATE CERTIFICATE

Offered via Ecampus only.
ST 516. Foundations of Data Analytics (4)
ST 517. Data Analytics I (4)
ST 518. Data Analytics II (4)
ST 558. Multivariate Analytics (3)
ST 566. Time Series Analytics (3) [Pending approval]

## Total=18 credits

Major Code: CG17
■ STATISTICS COURSES
ST 199. SPECIAL TOPICS (3). This course can only be taken once unless instructor permission is provided.

ST 201. PRINCIPLES OF STATISTICS (4). Study design, descriptive statistics, the use of probability in statistical arguments, sampling, hypothesis tests and confidence intervals for means and proportions. Lec/rec. PREREQS: High school algebra. ST 201 and ST 202 must be taken in order.

ST 202. PRINCIPLES OF STATISTICS (4). Comparisons of means and proportions between two populations (t-tests, chi-square tests, nonparametric tests), simple linear regression, correlation. Lec/rec. PREREQS: ST 201 [D-]
ST 314. INTRODUCTION TO STATISTICS FOR ENGINEERS (3). Probability, common probability distributions, sampling distributions, estimation, hypothesis testing, control charts, regression analysis, experimental design. PREREQS: (MTH 252 [D-] or MTH 252H [D-] )
ST 351. INTRODUCTION TO STATISTICAL METHODS (4). Study designs, descriptive statistics, collecting and recording data, probability distributions, sampling distributions for means and proportions, hypothesis testing and confidence intervals for means and proportions in one- and two-sample inference, and chi-square tests. Lec/lab. PREREQS: High school algebra with statistics. ST 351 and ST 352 must be taken in order.

ST 351H. INTRODUCTION TO STATISTICAL
METHODS (4). Study designs, descriptive statistics, collecting and recording data, probability distributions, sampling distributions for means and proportions, hypothesis testing and confidence intervals for means and proportions in one- and two-sample inference, and chi-square tests. Lec/lab. PREREQS: High school algebra with statistics. ST 351 and ST 352 must be taken in order. Honors College approval required
ST 352. INTRODUCTION TO STATISTICAL METHODS (4). Randomization tests and other nonparametric tests for one- and two-sample inference, simple and multiple linear regression, correlation, one- and two-way analysis of variance logistic regression. Lec/lab. PREREQS: (ST 351 D-] or ST 351H [D-] ) and ST 351 and ST 352 must be taken in order.

ST 406. PROJECTS (1-16). Section 1: Projects, graded P/N. Section 2: Teaching Experience, graded P/N. Section 3: Directed Work, graded $P / N$. This course is repeatable for a maximum of 16 credits.
ST 407. SEMINAR (1). Attendance at consulting practicum. Graded P/N.

ST 410. INTERNSHIP (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.
ST 411. METHODS OF DATA ANALYSIS (4).
Graphical, parametric and nonparametric methods for comparing two samples; one-way and two-way analysis of variance; simple linear regression. Lec/ lab. PREREQS: ST 351 or the equivalent. ST 411, ST 412 and ST 413 must be taken in order
ST 412. METHODS OF DATA ANALYSIS (4).
Multiple linear regression, including model checking, dummy variables, using regression to fit analysis of variance models, analysis of covariance, variable selection methods. Lec/ ab. PREREQS: ST 411 [D-] and ST 351 or the equivalent.
ST 413. METHODS OF DATA ANALYSIS (4).
Principles of experimental design; randomized block and factorial designs; repeated measures; categorical data analysis, including comparison of proportions, tests of homogeneity and independence in cross-classified frequency tables, Mantel-Haenszel test, logistic regression, log-linear regression. Introduction to multivariate statistics. Lec/lab. PREREQS: ST 412 [D-] and ST 351 or the equivalent.
ST 415. DESIGN AND ANALYSIS OF PLANNED EXPERIMENTS (3). Principles of experimental
design; uses, construction and analysis of completely randomized, randomized block
and Latin square designs; covariates; factorial treatments, split plotting; random effects and variance components. PREREQS: (ST 352 [D-] or ST 411 [D-] or ST 511 [D-] )
ST 421. INTRODUCTION TO MATHEMATICAL STATISTICS (4). Probability, random variables, expectation, discrete and continuous distributions, multivariate distributions. PREREQS: MTH 253. ST 421 and ST 422 must be taken in order.

ST 422. INTRODUCTION TO MATHEMATICAL STATISTICS (4). Sampling distributions, Central Limit Theorem, estimation, confidence intervals, properties of estimators, and hypothesis testing. PREREQS: ST 421 [D-] and MTH 253
ST 431. SAMPLING METHODS (3). Estimation of means, totals and proportions; sampling designs including simple random, stratified, cluster, systematic, multistage and double sampling; ratio and regression estimators; sources of errors in surveys; capture-recapture methods. PREREQS: ST 411 or ST 511
ST 435. QUANTITATIVE ECOLOGY (3). Overview of statistical methods that are useful for analyzing ecological data, including spatial pattern analysis, multivariate techniques, logistic regression,
Bayesian statistics and computer-intensive methods. Consideration of special topics such as population dynamics, food webs and ecological indicators. Not offered every year. PREREQS: (ST 412 [D-] or ST 512 [D-] )
ST 439. SURVEY METHODS (3). Survey design data collection and analysis, general methodology. PREREQS: ST 201 [D-] or ST 351 [D-]
ST 441. PROBABILITY, COMPUTING, AND SIMULATION IN STATISTICS (4). Review of probability, including univariate distributions and limit theorems. Random-number generation and simulation of statistical distributions. Bootstrap estimates of standard error. Variance reduction techniques. Emphasis on the use of computation in statistics using the MATLAB programming language. Lec/lab. PREREQS: (ST 422 [D-] or ST 522 [D-])

ST 443. APPLIED STOCHASTIC MODELS (3).
Development of stochastic models commonly arising in statistics and operations research, such as Poisson processes, birth-and-death processes, discrete-time and continuous-time Markov chains, renewal and Markov renewal processes. Analysis of stochastic models by simulation and other computational techniques. PREREQS: (ST 421 [D-] or ST 521 [D-] ) and experience with a high-level programming language or mathematical computation package.

ST 499. SPECIAL TOPICS (1-4). This course is repeatable for a maximum of 8 credits.

ST 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required
ST 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Departmental approval required
ST 505. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Departmental approval required.

ST 506. PROJECTS (1-16). Section 1: Projects. Section 2: Teaching Experience. Section 3: Directed Work. This course is repeatable for a maximum of 16 credits.
ST 507. SEMINAR (1). Section 1: Attendance at consulting practicum, 1 credit. Section 3: Research Seminar, 1 credit. Section 4: Computing Facilities, 1 credit. All sections graded $\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 99 credits.

ST 509. CONSULTING PRACTICUM (2). The student provides statistical advice, under faculty guidance, on university-related research projects. This course is repeatable for a maximum of 99 credits. PREREQS: ST 507, section 1 and ST 553, or instructor approval required.

ST 510. INTERNSHIP (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

## ST 511. METHODS OF DATA ANALYSIS (4).

Graphical, parametric and nonparametric methods for comparing two samples; one-way and two-way analysis of variance; simple linear regression. Lec/ lab. PREREQS: ST 351 or the equivalent. ST 511, ST 512, and ST 513 must be taken in order.

ST 512. METHODS OF DATA ANALYSIS (4).
Multiple linear regression, including model checking, dummy variables, using regression to fit analysis of variance models, analysis of covariance, variable selection methods. Lec/ lab. PREREQS: ST 511 [C] and ST 351 or the equivalent

ST 513. METHODS OF DATA ANALYSIS (4).
Principles of experimental design; randomized block and factorial designs; repeated measures; categorical data analysis, including comparison of proportions, tests of homogeneity and independence in cross-classified frequency tables, Mantel-Haenszel test, logistic regression, log-linear regression. Introduction to multivariate statistics. Lec/lab. PREREQS: ST 512 [C] and ST 351 or the equivalent.
ST 515. DESIGN AND ANALYSIS OF PLANNED EXPERIMENTS (3). Principles of experimental design; uses, construction and analysis of completely randomized, randomized block and Latin square designs; covariates; factorial treatments, split plotting; random effects and variance components. PREREQS: ST 352 or (ST 411 or ST 511)

ST 516. FOUNDATIONS OF DATA ANALYTICS
(4). Foundations of estimation and hypothesis testing; desirable properties of estimators; maximum likelihood; one- and two-sample problems; theoretical results are explored through simulations and analysis using R. Offered via Ecampus only. PREREQS: ST 351

ST 517. DATA ANALYTICS I (4). Methods for modeling quantitative data and statistical learning--simple and multiple linear regression; linear mixed effects models; data imputation; prediction and cross-validation; scaling up to large datasets. Simulations and data analysis using R. Offered via Ecampus only. PREREQS: ST 516 [C+]

ST 518. DATA ANALYTICS II (4). Statistical methods and data analysis techniques for count data. Topics include tests for tables of counts, logistic regression, log-linear regression, generalized linear mixed models, and issues for large datasets. Data analysis in R. PREREQS: ST 517 [C+]

ST 521. INTRODUCTION TO MATHEMATICAL STATISTICS (4). Probability, random variables, expectation, discrete and continuous distributions, multivariate distributions. PREREQS: MTH 253. ST 521 and ST 522 must be taken in order.
ST 522. INTRODUCTION TO MATHEMATICAL STATISTICS (4). Sampling distributions, Central Limit Theorem, estimation, confidence intervals, properties of estimators, and hypothesis testing. PREREQS: ST 521 [C] and MTH 253
ST 525. APPLIED SURVIVAL ANALYSIS (3). Statistical methods for analyzing survival data or time-to-event data, which may be censored and/ or truncated. Specific topics can vary term to term, and could include Kaplan-Meier estimator; K-sample hypothesis tests for survival data; Accelerated failure time model; Cox proportional hazard regression model. PREREQS: ST 516 [C] and ST 517 [C] and ST 518 [C] and /or equivalent.
ST 531. SAMPLING METHODS (3). Estimation of means, totals and proportions; sampling designs including simple random, stratified, cluster, systematic, multistage and double sampling; ratio and regression estimators; sources of errors in surveys; capture-recapture methods. PREREQS: ST 411 or ST 511

ST 535. QUANTITATIVE ECOLOGY (3). Overview of statistical methods that are useful for analyzing ecological data, including spatial pattern analysis, multivariate techniques, logistic regression,
Bayesian statistics and computer-intensive methods. Consideration of special topics such as population dynamics, food webs and ecological indicators. Not offered every year. PREREQS: ST 412 or ST 512
ST 537. DATA VISUALIZATION (3). Perceptual principles for displaying data; critique and improvement of data visualizations; use of color in visualization; principles of tidy data; strategies for data exploration; select special topics. PREREQS: ST 512 [C] or ST 517 [C] or ST 552 [C] and /or at discretion of instructor (students should be familiar with linear regression and using R)
ST 538. MODERN STATISTICAL METHODS
FOR LARGE AND COMPLEX DATA SETS (3).
Provides students with the tools and experience to analyze big and messy data and work effectively in a data science team. Covers the tools to handle big data and answer statistical questions based on the data. Includes three big data analysis projects that students work on in groups. Focuses on proper use of modern data analysis techniques related to regression, classification and clustering for data coming from a variety of application fields $R$ will be the lingua franca. PREREQS: ST 512 [C] or ST 517 [C] or ST 552 [C] or ST 412 [C]

ST 539. SURVEY METHODS (3). Survey design, data collection and analysis, general methodology PREREQS: ST 201 or ST 351

ST 541. PROBABILITY, COMPUTING, AND SIMULATION IN STATISTICS (4). Review of probability, including univariate distributions and limit theorems. Random-number generation and simulation of statistical distributions. Bootstrap estimates of standard error. Variance reduction techniques. Emphasis on the use of computation in statistics using the S-Plus or MATLAB programming language. Lec/lab. PREREQS: ST 422 or ST 522
ST 543. APPLIED STOCHASTIC MODELS (3).
Development of stochastic models commonly arising in statistics and operations research, such as Poisson processes, birth-and-death processes, discrete-time and continuous-time Markov chains, renewal and Markov renewal processes. Analysis of stochastic models by simulation and other computational techniques. PREREQS: (ST 421 or ST 521) and experience with a highlevel programming language or mathematical computation package.
ST 551. STATISTICAL METHODS (4). Properties of $t$, chi-square and $F$ tests; randomized experiments; sampling distributions and standard errors of estimators, delta method, comparison of several groups of measurements; two-way tables of measurements. PREREQS: ST 422 or ST 522. Should concurrently enroll in MTH 341. ST 551, ST 552 and ST 553 must be taken in order

ST 552. STATISTICAL METHODS (4). Simple and multiple linear regression including polynomial regression, indicator variables, weighted regression, and influence statistics, nonlineral regression and linear models for binary data. PREREQS: ST 551 [C] and ST 422 or ST 522.
ST 553. STATISTICAL METHODS (4). Principles and analysis of designed experiments, including factorial experiments, analysis of covariance, random and mixed effect models. Lec/lab. PREREQS: ST 552 [C]
ST 555. ADVANCED EXPERIMENTAL DESIGN (3). Designs leading to mixed models including split plots, repeated measures, crossovers and incomplete blocks. Introduction to experimental design in industry including confounding, fractional factorials and response surface methodology. Analysis of unbalanced data. PREREQS: ST 553 [C]

ST 557. APPLIED MULTIVARIATE ANALYSIS
(3). Multivariate data structures, linear
combinations; principal components, factor and latent structure analysis, canonical correlations, discriminant analysis; cluster analysis, multidimensional scaling. Not offered every year PREREQS: (ST 412 or ST 512) and (MTH 252 or MTH 245)
ST 558. MULTIVARIATE ANALYTICS (3). Basics of matrix algebra, principal components analysis, cluster analysis, factor analysis, multidimensiona scaling. PREREQS: ST 518 [C-] and courses equivalent to ST 518 may be substituted for ST 518 as a prerequisite with instructor consent.

ST 559. BAYESIAN STATISTICS (3). Bayesian statistics for data analysis. Characterizations of probability; comparative (Bayesian versus frequentist) inference; prior, posterior and predictive distributions; hierarchical modeling. Computational methods include Markov Chain Monte Carlo for posterior simulation. PREREQS: ST 562

ST 561. THEORY OF STATISTICS (3).
Distributions of functions of random variables, joint and conditional distributions, sampling distributions, convergence concepts, order statistics. PREREQS: (ST 422 or ST 522). ST 561 ST 562, and ST 563 must be taken in order.

ST 562. THEORY OF STATISTICS (3). Sufficiency, exponential families, location and scale families; point estimation: maximum likelihood, Bayes, and unbiased estimators; asymptotic distributions of maximum likelihood estimators; Taylor series approximations. PREREQS: ST 561 [C] and ST 422 or ST 522

ST 563. THEORY OF STATISTICS (3). Hypothesis testing: likelihood ratio, Bayesian, and uniformly most powerful tests; similar tests in exponential families; asymptotic distributions of likelihood ratio test statistics; confidence intervals. PREREQS: ST 562 [C] and ST 422 or ST 522

ST 565. TIME SERIES (3). Analysis of serially correlated data in both time and frequency domains. Autocorrelation and partial autocorrelation functions, autoregressive integrated moving average models, model building, forecasting; filtering, smoothing, spectral analysis, frequency response studies, Offered winter term in even years. PREREQS: (ST 412 or ST 512) and (ST 422 or ST 522)
ST 567. SPATIAL STATISTICS (3). The analysis of spatial data. Graphical tools for exploring spatia data, geostatistics, variogram estimation, kriging, areal models, hierarchical spatial models, and spatio-temporal modelling. Offered winter term in odd years. PREREQS: (ST 412 or ST 512) and (ST 422 or ST 522)
ST 573. ECOLOGICAL SAMPLING (3). Sampling of animal populations, frameless sampling, detectability, line transects, circular plots, mark-recapture, line intercept sampling; spatial sampling, quadrats, kriging; adaptive sampling designs. Not offered every year. PREREQS: (ST 412 or ST 512) and (ST 421 or ST 521)

## ST 592. STATISTICAL METHODS FOR

GENOMICS RESEARCH (3). Lectures include an overview of statistical methods commonly applied in genomics research. Specific methods can vary term to term, and could include cluster analysis, decision trees, dimension reduction tools, regression models, multiple testing adjustment, variable selection methods, etc. Journal clubs include team-based review and presentations of landmark papers in both statistical methodology and genomics research. Research experience includes whole-term collaboration between students from statistics and other disciplines on real projects. PREREQS: ST 411 or ST 511 or an equivalent/higher-level course such as ST 551. ST 411 or ST 511 is recommended.

ST 599. SPECIAL TOPICS (1-4). May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits.

ST 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Instructor approval required.
ST 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. PREREQS: Instructor approval required.
ST 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
ST 623. GENERALIZED REGRESSION MODELS
I (3). Maximum likelihood analysis for frequency data; regression-type models for binomial and Poisson data; iterative weighted least squares and maximum likelihood; analysis of deviance and residuals; overdispersion and quasi-likelihood models; log-linear models for multidimensional contingency tables. PREREQS: (ST 553 [C] and ST 563 [C] )
ST 625. GENERALIZED REGRESSION MODELS II (3). Parametric methods for the analysis of censored survival data, based mostly on large-sample likelihood theory. Specific topics include the Kaplan-Meier estimator, the log-rank test, partial likelihood, and regression models, including the Cox proportional-hazards model and its generalizations. PREREQS: (ST 553 [C] or ST 563 [C] )
ST 651. LINEAR MODEL THEORY (3). Least squares estimation, best linear unbiased estimation, parameterizations, multivariate normal distributions, distributions of quadratic forms, testing linear hypotheses, simultaneous confidence intervals. Offered alternate years. PREREQS: ST 553 and ST 563. ST 651 and ST 652 must be taken in order.

ST 652. LINEAR MODEL THEORY (3). Advanced topics including classification models, mixedeffects models and multivariate models. Offered alternate years. PREREQS: ST 651 [C] and ST 553 and ST 563
ST 661. ADVANCED THEORY OF STATISTICS
(3). Exponential families, sufficient statistics; unbiased, equivariant, Bayes, and admissible estimation. Offered alternate years. PREREQS: ST 563 and MTH 511. ST 661, ST 662, and ST 663 must be taken in order.
ST 662. ADVANCED THEORY OF STATISTICS
(3). Uniformly most powerful, unbiased, similar, and invariant tests. Offered alternate years. PREREQS: ST 661 [C] and ST 563 and MTH 511

ST 663. ADVANCED THEORY OF STATISTICS
(3). First-order and higher-order asymptotics; likelihood ratio, score, and Wald tests; Edgeworth and saddlepoint approximations. Offered alternate years. PREREQS: ST 662 [C] and ST 563 and MTH 511

## OTHER DECREES \& <br> PROGRAMS WHHIN THE COLLECE OF SCIENCE <br> UNDERGRADUATE MAJORS WITH OPTIONS

## INTERNATIONAL STUDIES (BA, HBA)

See International Programs for information on the International Studies Degree.
Major Code: 910

## SUSTAINABILITY (BS, HBS)

## Also available via Ecampus.

 OSU Main Campus Contact: Ann Scheerer, 3017B Agricultural and Life Sciences Building, Oregon State University, Corvallis, OR 97331; 541-737-5687; Ann. Scheerer@oregonstate.edu or the Sustainability Double Degree academic advisor, Sus.Advising@oregonstate.edu.
## OSU-Cascades Campus Contact:

Matt Shinderman, Forest Ecosystems and Society, Oregon State University Cascades; 541-322-3159; matt.shinderman@ osucascades.edu.

## Sustainability Core (17-20)

All Sustainability Majors and Minors must take the five courses that make up the Sustainability Core: SUS 304, SUS 350, an ecological sustainability course (SUS 102 recommended), a social sustainability course (choose one below), and an economic sustainability course (choose one below):

SUS 304. *Sustainability Assessment (4)
SUS 350. *Sustainable Communities (4)

## Ecological Dimensions of

 Sustainability (3-4)
## Select 3 to 4 credits from the

 following:BI 301. *Human Impacts on Ecosystems (3)
SUS 102. *Introduction to Environmental Science and Sustainability (4)
Social Dimensions of Sustainability (3-4)
Select 3 to 4 credits from the following:
SOC 381. Social Dimensions of Sustainability (4)(Ecampus only)
SOC 480. *Environmental Sociology (4)
SOC 481. *Society and Natural Resources (4)
SOC/FES/ANS/FW 485. *Consensus and Natural Resources (3)
SUS 420. Social Dimensions of Sustainability (3)(Ecampus, Cascades Campus)

## Economic Dimensions of

 Sustainability (3-4)Select 3 to 4 credits from the following:
AEC 250. *Introduction to Environmental Economics and Policy (3)
AEC 351. *Natural Resources Economics and Policy (3)
AEC/ECON 352. *Environmental
Economics and Policy (3)
AEC 434. ${ }^{\wedge}$ Measuring Resource and

Environmental Impacts (4)

## Practicum (3-12)

Sustainability majors are required to complete a minimum of 3 Practicum credits. Before registering for a practicum, students must get practicum approved by Sustainability Double Degree advisor. Email: Sus.advising@oregonstate.edu.
SUS 401. Research (3-12)
SUS 410. Internship (3-12)
SUS 499. Special Topics (3-12)
Note: SUS 410 credits may be achieved by participation in an $\mathrm{IE}_{3}$ Global Internship with advisor approval.

## Remaining Elective Credits (4-16)

In addition to the required credits specified above, students must work with the sustainability program advisor to select courses relevant to their discipline and career path interests.

## Credits total=36

Classes that can be used to fulfill remaining requirements are listed below. Students are NOT limited to taking courses within their primary major of study. The Sustainability advisor(s) will approve courses not listed here if they have an obvious link to sustainability and fulfill the intent of the double degree. See the OSU Sustainability Office list of sustain-ability-related courses.

## Business

AEC 250. *Introduction to Environmental Economics and Policy (3)
AEC 253. *Environmental Law, Policy and Economics (4)
AEC 351. *Natural Resource Economics and Policy (3)
AEC/ECON 352. *Environmental Economics and Policy (3)
AEC 434. ${ }^{\wedge}$ Measuring Resource and
Environmental Impacts (4)
BA 302. Business Process Management (4)
BA 351. Managing Organizations (4)
BA 352. Managing Individual and Team Performance (4)
BA 362. Social Entrepreneurship and Social Initiatives (4)
BA 432. Environmental Law, Sustainability and Business (4)
BA 465. *Systems Thinking and Practice (4)
BA 466. Integrative Strategic Experience (4)
ECON 202. *Introduction to
Macroeconomics (4)
ECON 311. Intermediate Microeconomic Theory (4)
ECON 315. Intermediate Macroeconomic Theory (4)
MGMT 452. Leadership (4)

## Engineering

BEE 221. Fundamentals of Ecological Engineering (3)
BEE 320. Biosystems Analysis and Modeling (4)

BEE 322. Ecological Engineering
Thermodynamics and Transfer Process (4)
CCE 422. Green Building Materials (3)
CHE 450. Conventional and Alternative
Energy Systems (3)
CHE 451. Solar Energy Technologies (3)

ECE 438. Electric and Hybrid Vehicles (4)
ENGR 350. *Sustainable Engineering (3)
ENVE 321. Environmental Engineering Fundamentals (4)
ENVE 322. Fundamentals of Environmental Engineering (4)
HEST 310. *Introduction to Community
Engagement and Community-Based Design (3)

## Natural Sciences

ANS/FES/FW/SOC 485. *Consensus and Natural Resources (3)
ATS 320. *The Changing Climate (3)
BI 301. *Human Impacts on Ecosystems (3)
BI 306. *^Environmental Ecology (3)
BI 348. *Human Ecology (3)
BI 370. Ecology (3)
BRR 325. *Energy Technology and Social Change (3)
BRR 350. Introduction to Regional Bioenergy (2)
CH 374. *Technology, Energy, and Risk (3)
CH 390. Environmental Chemistry (3)
DHE/WSE 415. *Renewable Materials in the Modern Age (3)
FES 341. Forest Ecology (3)
FES 354. Communities, Natural Areas, and Sustainable Tourism (3)
FES 355. Management for Multiple Resource Values (3)
FES 360. Collaboration and Conflict Management (3)
FES 365. *Issues in Natural Resources Conservation (3) Ecampus or Cascades campus only
FES/TOX 435. *Genes and Chemicals in Agriculture: Value and Risk (3)
FES/FW 445. Ecological Restoration (4)
FES/HORT 455. Urban Forest Planning,
Policy and Management (4) Ecampus only
FES/NR/RNG 477. *Agroforestry (3)
FES/SOC/ANS/FW 485. *Consensus and
Natural Resources (3)
FOR 462. Natural Resource Policy and Law (3)

FW 251. Principles of Fish and Wildlife Conservation (3)
FW 303. Survey of Geographic Information Systems in Natural Resource (3)
FW 321. Applied Community and Ecosystem Ecology (3)
FW 325. *Global Crises in Resource Ecology (3)

FW 326. Integrated Watershed Management (3)

FW 340. *Multicultural Perspectives in Natural Resources (3)
FW 350. *Endangered Species, Society, and Sustainability (3)
FW 435. ^Wildlife in Agricultural Ecosystems (3)
FW 489. Effective Communications in Fisheries and Wildlife Science (3)
GEO 306. *Minerals, Energy, Water, and the Environment (3)
GEO 309. *Environmental Justice (3)
GEOG 300. *Sustainability for the Common Good (3)

${ }^{\wedge}$ Writing Intensive Course (WIC)
Major Code: $\mathbf{8 7 0}$

## SUSTAINABILITY MINOR

Available on the Corvallis and OSU-Cascades campuses, and via Ecampus.
OSU Main Campus Contact: Ann Scheerer, 3017B Agricultural and Life Sciences Building, Oregon State University, Corvallis, OR 97331; 541-737-5687; Ann. Scheerer@oregonstate.edu or the Sustainability Double Degree academic advisor, Sus.Advising@oregonstate.edu.

OSU-Cascades Campus Contact: Matt Shinderman, Forest Ecosystems and Society, Oregon State University Cascades; 541-322-3159; matt.shinderman@ osucascades.edu.
The Sustainability minor includes core sustainability courses (5) and tailored elective courses to expand students' knowledge and experience of their primary major in the context of sustainability principles and frameworks. Courses from a student's major course of study will not count towards minor requirements. Completion of the Sustainability minor requires 27 credits beyond the 180-credit minimum for graduation.

## Sustainability Core (17-20)

All Sustainability students must take (8):
SUS 304. *Sustainability Assessment (4)
SUS 350. *Sustainable Communities (4)

## Social Dimensions of

Sustainability:
Select 3 to 4 credits from the following:
SOC 381. Social Dimensions of
Sustainability (4)
SOC 480. *Environmental Sociology (4)
SOC 481. *Society and Natural Resources (4)
SOC 485/ANS 485/FES 485/FW 485.
*Consensus and Natural Resources (3)
SUS 420. Social Dimensions of Sustainability (3)
Ecological Dimensions of Sustainability:
Select 3 to 4 credits from the following:
BI 306. *^Environmental Ecology (3)
SUS 102. *Introduction to Environmental
Science and Sustainability (4)
Economic Dimensions of
Sustainability:

## Select 3 to 4 credits from the

following:
AEC 250. *Introduction to Environmental

Economics and Policy (3)
AEC/ECON 352. *Environmental
Economics and Policy (3)
AEC 434. ${ }^{\wedge}$ Measuring Resource and Environmental Impacts (4)
Sustainability Individualized Study/

## Elective Credits (7-10)

Students will work with their primary academic advisor and the Sustainability academic advisor to select electives in the theme relevant to their interests for a total of 7-10 credits. Students should discuss with Sustainability advisor to apply elective courses that may not be
listed below.

## Total Credits=27

## Elective Courses:

## Business

AEC 250. *Introduction to Environmental Economics and Policy (3)
AEC 253. *Environmental Law, Policy and Economics (4)
AEC 351. *Natural Resource Economics and Policy (3)
AEC/ECON 352. *Environmental
Economics and Policy (3)
AEC 434. ${ }^{\wedge}$ Measuring Resource and
Environmental Impacts (4)
BA 302. Business Process Management (4)
BA 351. Managing Organizations (4)
BA 352. Managing Individual and Team Performance (4)
BA 362. Social Entrepreneurship and Social Initiatives (4)
BA 432. Environmental Law, Sustainability and Business (4)
BA 466. Integrative Strategic Experience (4)
ECON 202. Introduction to
Macroeconomics (4)
ECON 315. Intermediate Macroeconomic Theory (4)
Engineering
BEE 221. Fundamentals of Ecological
Engineering (3)
BEE 320. Biosystems Analysis and Modeling (4)

BEE 322. Ecological Engineering
Thermodynamics and Transfer Process (4)
CCE 422. Green Building Materials (3)
CHE 450. Conventional and Alternative
Energy Systems (3)
CHE 451. Solar Energy Technologies (3)
ECE 438. Electric and Hybrid Electric Vehicles (4)
ENGR 350. *Sustainable Engineering (3)
ENVE 321. Environmental Engineering
Fundamentals (4)
ME 312. Thermodynamics (4)

## Natural Sciences

ATS 320. *The Changing Climate (3)
[Terminated fall 2017]
BI 301. *Human Impacts on Ecosystems (3)
BI 306. *^Environmental Ecology (3)
BI 370. Ecology (3)

## MANAGEMENT FOR SCIENCE PROFESSIONALS GRADUATE CERTIFICATE

To be terminated upon approval of proposal \#90741.

## Also available via Ecampus.

## PSM Director

2082 Cordley Hall
Corvallis OR 97331
541-737-5259
Email: kirstin.carroll@oregonstate.edu Website: http://psm.science.oregonstate. edu/
The Management for Science Professionals graduate certificate is designed for individuals in science or science-related fields seeking professional development. Formal training in business management, communication, and ethics allows graduates of this program to broadly communicate with diverse groups of people and move more rapidly into leadership positions within their organizations. This graduate certificate program is ideal for students of professional science tracks like veterinary medicine or pharmacy, current industry or agency employees who want to advance in their careers, or continuing students envisioning careers with future managerial responsibilities.
A graduate certificate is awarded to individuals who complete the professional series of courses ( 6 courses for 18 credits) offered as part of the Professional Science Master's degree program. If you are not a Professional Science Master's student or enrolled in the graduate certificate program, you can currently only register for these classes through Ecampus. Non-de-
gree seeking students who may later wish to apply to a graduate degree program should be aware that a maximum of 6 credits earned as a non-degree seeking student may be transferred to a graduate certificate or degree program.

Please go to http://psm.science.oregon-state.edu/graduate-certificate for additional information and details on how to apply.

## Required (18 credits)

COMM 550. Communication and the
Practice of Science (3)
PHL 547. Research Ethics (3)
PSM 513. Professional Skills (3)
PSM 565. Accounting and Finance for Scientists (3)
PSM 566. Project Management and
Marketing Scientific Technologies (3)
PSM 567. Innovation Management (3)

## Major Code: CG09

## - PROFESSIONAL SCIENCE

## MASTERS COURSES

PSM 506. PROJECTS (1 or 16). This course is repeatable for a maximum of 99 credits.
PSM 507. SEMINAR (1-16). This course is repeatable for a maximum of 99 credits.
PSM 513. PROFESSIONAL SKILLS (3). Students will work in teams with off-campus mentors to address a contemporary problem in a scientific field within the context of an existing business. This collaborative project will provide students with opportunities to integrate and apply their collective knowledge of business management, communication, and science to create innovative solutions. Project management and leadership styles will also be covered, and a final report and presentation are usually required. PREREQS: ( (COMM 550 [C] or COMM 512 [C] ) and PHL 547 [C] and PSM 565 [C] and PSM 566 [C] and PSM $567^{*}$ [C] )
PSM 565. ACCOUNTING AND FINANCE FOR SCIENTISTS (3). Students develop business management skills by learning principles of managerial and financial accounting and understanding profit and loss statements, cost analysis, and investment risks. Individuals utilize basic financial tools needed to develop business proposals and successfully manage scientific projects in public and private work sectors.

## PSM 566. PROJECT MANAGEMENT AND

MARKETING SCIENTIFIC TECHNOLOGIES (3).
Students gain an understanding of marketing principles and global markets with a focus on scientific technologies. Project management skills needed to effectively manage diversity, conflict and change in corporate, government and nonprofit environments as well as entrepreneurial ventures will be emphasized. PREREQS: PSM 565 [C]
PSM 567. INNOVATION MANAGEMENT (3).
Students learn about different types of innovation, development and implementation of new technologies, and intellectual property. Student teams develop and present business plans as term projects. Structuring small business enterprises, project planning and management, and commercialization of new products and services prepare individuals for leadership roles in the innovation process. PREREQS: (PSM 565 [C] and PSM 566 [C] )
PSM 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 99 credits.

Students who complete the requirements of the Oregon State University Honors College receive OSU's most prestigious academic recognition for undergraduates: an honors
baccalaureate degree (HBA, HBFA or HBS) in their major, jointly awarded by the Honors College and the colleges of their major.

The Honors College is about enrichment: How high can you dream? The Honors College provides challenging curricula, personal attention, and enhanced learning experiences in general education and in the student's primary academic interest. The Honors College offers courses consisting of small groups taught by OSU's finest faculty, specifically selected for their undergraduate teaching abilities. Through seminars, colloquia, and their own thesis research, students enjoy the benefits of a small college within a large, diverse, and comprehensive university.

Both a four-year and a two-year track are available. The two-year track is designed for transfer students or for students already enrolled at OSU. Interested students should contact the Honors College for information.

The Honors College, in cooperation with University Housing and Dining Services, maintains an honors living-learning community in West and Sackett Residence Halls.

## Undergraduate Degrees

Honors Bachelor of Arts (HBA)
Honors Bachelor of Fine Arts (HBFA)
Honors Bachelor of Science (HBS)

## MAJORS AND DEGREES

Students enrolled in the Honors College can pursue any one of OSU's wide range of undergraduate majors. Students who complete the requirements of the Honors College receive OSU's most prestigious undergraduate academic recognition: an honors baccalaureate degree in their major, jointly awarded by the Honors College and the colleges in which their major is located.

## ADMISSION

Admission is competitive and selectiveonly a small percentage of all entering students join the Honors College and space is limited. HC students are exceptionally able, highly motivated, and intellectually curious. They have a highly developed social consciousness and a sense of responsibility. Admission decisions are based on grade-point averages, SAT or ACT scores, and responses to an essay question that reveal the student's ability to think deeply and creatively. High school applicants must have a minimum of 3.75 GPA or a score of 1820 SAT, 27 ACT to be considered for admission.

Entering first-year students interested in beginning the HC fall term should submit an application by either November 1 or February 1. HC applicants must also apply for admission to OSU by that time. Admission decisions are made approximately 45 days after the submission deadlines. A response to the current year HC essay question is required.

Transfer or advanced-standing applicants should submit an application by March 15th and will be notified no later than April 30th. On-campus visits are encouraged.

## DEGREE REQUIREMENTS

The honors degree is jointly awarded by the Honors College ( HC ) and by the colleges of the student's major. Therefore, additional credit requirements beyond the total required by the colleges of the student's major must be completed. HC students must satisfy all university and major requirements, as well as honors requirements. A student who completes a 30 -credit track of Honors College courses will be designated an Honors Scholar. A student who completes a 15 -credit track will be designated as an Honors Associate. In either instance successful completion leads to receipt of an honors baccalaureate degree. Transcripts will also reflect Honors College completion and will denote HC course work.
Many honors classes satisfy dual requirements; please check details with an Honors College advisor. For students in majors that require a senior thesis project, the honors thesis requirements may complement those majors.

## RETENTION CRITERIA

All HC students must maintain a 3.25 cumulative OSU GPA and make satisfactory progress toward fulfilling the requirements of the HC and their major. Progress in three key areas-GPA, course work, and thesis-will be reviewed every fall, winter, and spring term. Students below, or at risk of falling below, the specified 3.25 cumulative OSU GPA will be notified to come in for advising. Students who do not meet retention expectations may be removed from the college. If removed, a student has the right to petition for reinstatement.
All students must maintain contact with Honors College advisors through regularly scheduled appointments.

## HONORS COURSES

See the Schedule of Classes each term under Honors College (HC) and under departmental listings for courses with an H suffix. The HC publishes its own schedule, which is available each term in the HC office and on the HC website. Honors courses change annually; many are offered under departmental designators.
See the HC website for additional information, http://honors.oregonstate.edu.

## HONORS ASSOCIATE

## (HBA, HBFA, HBS)

The honors degree is jointly awarded by the Honors College and by the college of the student's major. Therefore additional credit requirements beyond the total required by the colleges of the student's major must be completed. HC

students must satisfy all university and major requirements, as well as honors requirements. A student who completes a 15 -credit track will be designated as an Honors Associate. Successful completion leads to receipt of an honors baccalaureate degree. Transcripts will also reflect Honors College completion and will denote HC course work. Interested students please contact the Honors College at 541-737-6400 or email honors.college@ oregonstate.edu.
The requirements for the Honors Associate track include:

- Honors colloquia (minimum 6 credits)
- Honors electives (minimum 6 credits)
- Thesis/Research/Projects (minimum 3 credits)
- At least 12 honors credits must be upper division.
- Bound thesis

Major Code: 012

## HONORS SCHOLAR

(HBA, HBFA, HBS)
The honors degree is jointly awarded by the Honors College and by the college of the student's major. Therefore additional credit requirements beyond the total required by the colleges of the student's major must be completed. HC students must satisfy all university and major requirements, as well as honors requirements. A student who completes a 30 -credit track of Honors College courses will be designated an Honors Scholar. Successful completion leads to receipt of an honors baccalaureate degree. Transcripts will also reflect Honors College completion and will denote HC course work. Interested students please contact the Honors College at 541-737-6400 or email honors.college@oregonstate.edu.
The requirements for the Honors Scholar track include:

- Honors baccalaureate core courses (minimum 6 credits)
- Honors colloquia (minimum 6 credits)
- Honors electives (minimum 12 credits)
- Thesis/Research/Projects (minimum 6 credits)
- At least 12 honors credits must be upper division.
- Bound thesis

Major Code: 011

## COURSES

HC 199. *HONORS WRITING (3). Through a range of assignments, texts, and guest speakers, Honors College students will develop critical thinking skills and a strategy for writing in their discipline. (Bacc Core Course) PREREQS: Honors College approval required.
HC 299. SELECTED TOPICS (1-16). Selected topics for Honors College students. This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
HC 399. SELECTED TOPICS (1-16). Upper-
division special topics for Honors College students. This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
HC 401. RESEARCH AND SCHOLARSHIP (1-
16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
HC 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
HC 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
HC 404. WRITING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
HC 405. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
HC 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
HC 407. SEMINAR (1-16). This course is repeatable for a maximum of 18 credits. PREREQS: Honors College approval required.
HC 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
HC 409. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.
HC 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. PREREQS: Honors College approval required.

The College of Veterinary Medicine at
Oregon State University was established in 1975 with three major areas of responsibilityteaching, research, and public service.
The college is fully accredited by the American Veterinary Medical Association's Council on Education.

Professional Program
Veterinary Medicine (DVM)
Graduate Majors
Comparative Health Sciences (MS, PhD) (Administered by the Graduate School)
Graduate Options
Biomedical Sciences
Clinical Sciences
Dual Degree (DVM and MPH)
Graduate Minor
Comparative Health Sciences
(Administered by the Graduate School)

## TEACHING

The college was established in 1975 and began its professional education program in 1979. Approximately 40 residents of Oregon and 16 nonresident students are selected to enter the OSU College of Veterinary Medicine. These students will complete all four years of their professional education in Corvallis. Completion of the professional program leads to the Doctor of Veterinary Medicine (DVM) degree.

There are two departments supporting the DVM doctoral program: Biomedical Sciences and Clinical Sciences.

Comprehensive research training is provided through graduate programs leading to the MS degree in Comparative Health Sciences.

Post-DVM residency training leading to board eligibility in several clinical disciplines and pathology is also available.

## RESEARCH

Biomedical research is conducted in the college, supported by federal agencies such as NIH, USDA, DOE, as well as by a number of foundations. Collaboration with the OSU Agricultural Experiment Station, colleges of Pharmacy, Public Health and Human Sciences, Engineering and many other colleges, is part of the program. The research is of economic and public health significance, aimed at improving the health of animals and people.

The college emphasizes research of infectious diseases, such as those caused by My cobacteria, Chlamydia, Clostridia, Vibrio, Mycoplasma, Cryptosporidium, herpesvirus, respiratory syncytial virus, influenza virus, and HIV-1 virus. Research is also conducted on immunity and nutrition, neuroscience, cancer, cardiovascular diseases, diabetes, reproductive diseases, and diseases of terrestrial and aquatic wildlife.

## PUBLIC SERVICE

The service programs focus on the diagnosis, prevention, treatment, and control and prevention of animal diseases. The college assists veterinary practitioners, animal owners, and the general public through the Veterinary Diagnostic Laboratory and the Veterinary Teaching Hospital.

The Veterinary Diagnostic Laboratory is a full-service facility providing a wide range of animal disease diagnostic testing services to veterinarians, animal owners, and public agencies. The laboratory offers testing and expertise in pathology, clinical pathology, bacteriology, and virology, and is accredited by the American Association of Veterinary Laboratory Diagnosticians.

The Veterinary Teaching Hospital is designed and equipped for diagnosis and medical and surgical treatment of canine, feline, equine, food animal, and camelid patients. Patients are admitted directly from animal owners and through referrals from practicing veterinarians in Oregon and the Pacific Northwest. Imaging (radiology, ultrasonography, fluoroscopy, CAT scan, MRI, and scintigraphy), anesthesiology, pharmacy, intensive care, and other services are available to support the hospital functions.

The Veterinary Diagnostic Laboratory and the Veterinary Teaching Hospital serve as learning centers where senior veterinary students and residents study animal disease, diagnosis, treatment, and prevention.

Providing continuing education for veterinarians is also considered a major responsibility of the college. One- to three-day intensive courses of instruction on specific topics are offered periodically.

## CAREER OPPORTUNITIES IN VETERINARY MEDICINE

Opportunities for employment in veterinary medicine are excellent. Nearly 70 percent of the professionally active veterinarians in the United States are engaged in private practice. Some practices are limited to types of animals, such as food animal, equine, or companion animal practices. Others involve specialties such as surgery, ophthalmology, cardiology, or radiology. In addition to private practice, there are numerous teaching and research opportunities in academic, government, and industrial settings. Expanding areas include laboratory animal medicine and public health.

## VETERINARY STUDENT EXPENSES

Oregon resident students registered in the College of Veterinary Medicine will pay tuition and fees of approximately $\$ 7,106$ per term. Students from the WICHE states will pay the same fees as Oregon resident students. Nonresident student fees currently are $\$ 13,733$ per term.

Veterinary students must provide required professional attire, as well as dissection, surgical, and diagnostic instruments, and notes and books.

Occasional field trips are scheduled in the veterinary curriculum. Transportation is provided by the university for required trips, but students must provide their

own food and lodging. For optional trips, the student is usually expected to provide transportation, lodging, and food. All other expenses, such as residence hall and living expenses, are the same as for students in other colleges of the university.
Students desiring additional information about veterinary medicine should write to the Office of the Dean, College of Veterinary Medicine, Oregon State University, 200 Magruder Hall, Corvallis, Oregon 97331-4801, or email cvmproginfo@oregonstate.edu or see our website at http://vetmed.oregonstate.edu/.

## POLICY ON LABORATORY AND DUTY HOURS

During the professional curriculum, several laboratory exercises in the preclinical years require the use of live animals. The exercises are designed to complement didactic lectures and demonstrations through hands-on experience with various species of animals. In all instances, the animals are humanely treated and anesthetized if the procedures are potentially painful.

During the clinical years, animals are used in laboratory exercises in the teaching of basic surgical skills and medical procedures. In most instances, the animals are anesthetized. Strict protocol is enforced regarding the animals' well-being in exercises requiring post-operative recovery. All use of animals in teaching is approved by the university's Institutional Animal Care and Use committee.

During the fourth year of the veterinary curriculum, students complete rotations in sections of the Veterinary Teaching Hospital and Veterinary Diagnostic Laboratory. Emergency services are offered to the public on a 24 -hour basis, seven days a week. Student assignments in the clinical blocks are demanding, and students are required to spend time at night, weekends, and holidays in the delivery of health care to patients. Hospital operations continue seven days per week, and students are responsible for their assigned tasks regardless of time and day of the week.

## DVM AND MPH DUAL DEGREE

Students enrolled in the Doctor of Veterinary Medicine (DVM) degree program wishing also to complete a Master's of Public Health Degree may do so if successfully admitted to the Graduate School and the College of Public Health and Human Sciences (CPHHS). Using pre-approved and cross-listed courses as electives, veterinary students may complete the MPH degree with an additional (5th) year of study.
The CPHHS offers an MPH degree in six tracks: Biostatistics; Epidemiology; Environment, Safety and Health; Health Management and Policy; Health Promo-
tion and Health Behavior; and International Health.

In order to maximize use of elective courses in the dual degree program, it is important that veterinary students enter the dual degree option as early in their studies as possible.

The five core MPH courses are offered through distance education. In consultation with the student's MPH adviser, internships, culminating activities and senior papers should be coordinated as well. The student's MPH adviser must approve all veterinary courses counted toward the graduate (MPH) degree.
For more information, see http:// health.oregonstate.edu/degrees/ graduate/public-health/mph/ dvm-mph-dual-degree.

## VETERINARY MEDICINE (DVM)

## Graduation Requirements

To be awarded the Doctor of Veterinary Medicine degree, candidates must have passed all required courses in the veterinary curriculum, have a minimum of a 2.00 grade-point average in the veterinary curriculum, satisfactorily complete a senior paper and a required veterinary procedures list.

## Preveterinary Curriculum

Typical preveterinary curriculum at Oregon State University follows. Oregon State University courses that will meet the preveterinary academic requirements:
ANS 314. Animal Physiology (4)
BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)
BB 450, BB 451. General Biochemistry $(4,3)$
BI 311. Genetics (4)
or ANS 378. Animal Genetics (4)
CH 121, CH 122, CH 123. General
Chemistry $(5,5,5)$
or CH 231, CH 232, CH 233 . *General Chemistry ( $4,4,4$ )
and CH 261 , CH 262, CH 263.
*Laboratory for Chemistry 231, 232, 233
(1,1,1)
CH 331, CH 332. Organic Chemistry $(4,4)$
MTH 111. *College Algebra (4)
and MTH 112. *Elementary Functions (4)
PH 201, PH 202. *General Physics $(5,5)$
ST 351. Introduction to Statistical Methods (4)

English Writing (6)
Humanities/Social Sciences (12)
Public Speaking (3)
Upper-Division Biological Sciences with Lab (6)

## STATE OF OREGON DVM LICENSING REGULATIONS <br> Oregon Veterinary Medical Examining Board <br> Requirements

1. Graduate of a veterinary medical school accredited by the AVMA, or if a foreign graduate, have a certificate from ECFVG, PAVE or other equivalency program approved by the board.
2. Passed the NBC/CCT or NAVLE and Juris Prudence exams.
3. If you have less than one year's U.S. experience, you must obtain an intern permit and practice under the supervision of an Oregon-licensed veterinarian for one year (or the balance of a year).
*If you meet the following conditions, you may include a letter requesting a waiver of the CCT. Your letter must cite compliance with each of these requirements:

- Graduate of an accredited veterinary school or earned ECFVG certificate prior to 1991;
- Engaged in five contiguous years of active veterinary clinic practice immediately preceding date of application;
- Have held license(s) in good standing in other US states or provinces since graduation; and
- Have continuing education of at least 10 hours per year during the five years immediately preceding the date of application.

## EXAMINATIONS

Scores must be reported directly to the board from VIVA. If you tested in Oregon, you do not need to request a score transfer.

North American Veterinary Licensing Examination (NAVLE): Administered via computer during two periods in spring and winter. Passing score as established by National Board Examination Committee.

NBE/CCT: Passing score before December 1992 is 75.00 based on 1.5 standard deviations. After December 1992, passing score is the criterion-referenced score of 425.

Jurisprudence Exam: An openbook 40-question test on veterinary laws and rules of Oregon. The exam and regulations will be sent to applicants upon receipt of the license application and $\$ 75$ fee. A passing score of 95 percent ( 38 correct answers) is required.

## LICENSING

Complete and submit the application and fee. The Jurisprudence Exam will be sent to you to complete and return. When you pass the JP exam, you will be sent an activation form. You may not practice in Oregon until you activate your license or intern permit. Complete and send in the activation form, along with the $\$ 100$ fee. Your permanent license or intern permit will be issued upon receipt of all necessary documentation.

Permanent Licenses: If you have at least one year's documented veterinary clinical experience, you may activate your permanent license.

Intern Permits: New graduates or veterinarians with less than one year's experience must obtain an intern permit. This permit expires one year after the date of issue or less if prior experience is documented. Renewal notices are sent approximately six weeks prior to expiration date, at which time interns may activate their permanent license or request another intern permit if one year's experience has not been acquired. Current veterinary school seniors may submit application materials prior to graduation; however an intern permit will not be issued until the board receives either a dean's letter confirming graduation or a diploma copy.
Continuing Education: Active licensees are required to report 30 credits of CE every odd year, i.e., '11, '13, '15, etc.

## FACULTY

Professors Bermudez, Bildfell, Craig, Hall, Häse, Heidel, Jin, Kent, Magnusson, Rockey, Sarker, Tornquist, Valentine
Associate Professors Jolles, Löhr, O'Reilly, Pastey
Assistant Professors Chappell, Danelishvili, Dolan, Gorman, D. Johns, J. Johns, Medlock, Miller-Morgan, Moulton, Nigussie, Ramsey, Russell, Shulzhenko
Instructors Alcantar, Mansouri, Sona Adjunct Fu
Emeriti Blythe, Engel, Hutton, Matsumoto, A. Smith, B. Smith, Snyder, Timm
Courtesy Allen, Burco, Cooper, Gillin, Harrenstien, Paredes-Sabja, Steinauer, Trevejo, Wolf

## ■ VETERINARY MEDICINE BIOMEDICAL COURSES

VMB 110. PREVETERINARY MEDICINE (1). Introduction to the profession's role in society. Graded P/N.
VMB 309. CAPTURE AND IMMOBILIZATION
TECHNIQUES (2). Manual and chemical restraint methods are covered with an emphasis on darting equipment, animal and human safety, drug pharmacology and species-specific recommendations. Lec/lab.
VMB 328. WILDLIFE CAPTURE AND
IMMOBILIZATION (2). Manual and chemical restraint methods are covered with an emphasis on darting equipment, animal and human safety, drug pharmacology and species specific recommendations. CROSSLISTED as FW 328. Lec/lab. This course is repeatable for a maximum of 4 credits.
VMB 501. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

VMB 503. THESIS (1-12). This course is repeatable for a maximum of 999 credits.
VMB 505. READING AND CONFERENCE (1-16). Graded $P / N$. This course is repeatable for a maximum of 16 credits.

VMB 507. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.
VMB 517. VETERINARY PHYSIOLOGY (5). Physiology of body fluids, muscles, membranes, intermediary metabolism, cardiovascular system, and metabolism. PREREQS: One year of inorganic chemistry, including a lab; one upperdivision course in biochemistry; one term physics; one-year sequence in general biological sciences or equivalent; instructor approval required.
VMB 518. VETERINARY PHYSIOLOGY (5). Physiology of gastrointestinal, endocrine and reproductive systems. PREREQS: VMB 517 [C] and instructor approval required.
VMB 519. VETERINARY PHYSIOLOGY (4). Physiology of respiratory and renal systems and acid-base balance. PREREQS: VMB 518 [C] and instructor approval required.
VMB 521. ANIMAL MODELS (3). Selection/ use criteria for models describing animal or human diseases or processes with emphasis on experimental design, validation, transgenic technology, population dynamics, husbandry, and ethics. PREREQS: Graduate standing or advanced undergraduate in science or engineering, with permission of the instructor.
VMB 523. ZOONOSES (3). Interactive examination of the molecular basis of diseases that are transmissible between animals and humans. Emphasis on bacterial, viral and parasitic pathogens of animals and humans. PREREQS: Graduate standing or advanced undergraduate in science or engineering, with permission of instructor.

## VMB 524. BIOANALYTICAL CHEMISTRY (3).

Analytical methods employed in the study of biologically important molecules. Separations (chromatography, electrophoresis), spectroscopy, mass spectrometry, biosensors, and immunoassays. Lec/lab. Not offered every year. CROSSLISTED as CH 524. PREREQS: One year of organic chemistry and one term of organic chemistry laboratory.
VMB 601. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.
VMB 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.
VMB 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.
VMB 606. PROJECTS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

VMB 607. SEMINAR (1-16). One-credit section; VMB 607 Sect. 1. Graded P/N. This course is repeatable for a maximum of 16 credits.

VMB 611. VETERINARY GROSS ANATOMY (4). Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken. PREREQS: One year of inorganic chemistry, including a lab; one upper-division course in biochemistry; one term of physics; one year sequence in general biological sciences or equivalent. Instructor approval required. VMB 611, VMB 612, VMB 613 must be taken in sequence.
VMB 612. VETERINARY GROSS ANATOMY (4). Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken. PREREQS: VMB 611; one year of inorganic chemistry, including a lab; one upper-division course in biochemistry; one term in physics; oneyear sequence in general biological sciences or equivalent; instructor approval required.
VMB 613. VETERINARY GROSS ANATOMY (4). Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken. PREREQS: VMB 612; one year of inorganic chemistry, including a lab; one upper-division course in biochemistry; one term of physics; oneyear sequence in general biological sciences or equivalent; instructor approval required.
VMB 614. VETERINARY MICROSCOPIC ANATOMY (4). Structure and development of cells, tissues, organs, and organ systems of animals. PREREQS: One year of inorganic chemistry, including a lab; one upper-division course in biochemistry; one term of physics; oneyear sequence in general biological sciences or equivalent; instructor approval required. VMB 614 and VMB 615 must be taken in sequence.
VMB 615. VETERINARY MICROSCOPIC ANATOMY (3). Structure and development of cells, tissues, organs, and organ systems of animals. PREREQS: VMB 614; one year of inorganic chemistry, including a lab; one upperdivision course in biochemistry; one term of physics; one-year sequence in general biological sciences or equivalent; instructor approval required.
VMB 620. VETERINARY IMMUNOLOGY (5). Clinical and diagnostic aspects of immunological mechanisms, serological reactions;
hypersensitivity, allergy, and disorders of the immune system. PREREQS: One upper-division course in biochemistry; one year of physics; oneyear sequence in general biological sciences or equivalent; instructor approval required.
VMB 621. GENERAL PATHOLOGY (4). General principles of pathology, cell injury and death, inflammation and tissue repair, abnormalities of cell growth, and structures and mechanisms of disease. PREREQS: One year of inorganic chemistry, including a lab; one upper-division course in biochemistry; one term of physics; oneyear sequence in general biological sciences or equivalent; must be taken in sequence. Instructor approval required.

VMB 622. PATHOLOGY LABORATORY (1). Laboratory instruction to complement VMB 621. PREREQS: VMB 611* [C] and one course in histology and instructor approval required.
VMB 627. ORNAMENTAL FISH MEDICINE (2). An introduction to the basic principles of ornamental fish medicine including basic husbandry, handling and clinical procedures. This is a 1 -week intensive course held at the Hatfield Marine Science Center in Newport, Oregon. Graded P/N. PREREQS: Graduate standing and instructor's permission.
VMB 630. MECHANISMS OF DISEASE (3). Cellular and molecular events that contribute to the pathogenesis of disease in animals, including humans. Host interactions with infectious agents and the environment. PREREQS: Graduate status in a biomedical discipline. Prior courses in biochemistry, immunology, microbiology, and
physiology are recommended. Instructor approval required.
VMB 631. MATHEMATICAL MODELING OF BIOLOGICAL SYSTEMS (3). The use of mathematical modeling in biological sciences is studied. A variety of modeling techniques are covered including implementing the methods computationally. PREREQS: Graduate standing or permission of instructor.

VMB 640. SEMINARS IN LABORATORY
ANIMAL MEDICINE (2). Prepares students for careers in laboratory animal medicine. Provides a review of medical conditions, diagnosis and treatment of research animals. PREREQS: DVM degree or equivalent or permission of instructor.
VMB 641. SEMINARS IN LABORATORY ANIMAL MEDICINE (2). Prepares students for careers in laboratory animal medicine. Provides a review of medical conditions, diagnosis and treatment for research animals. PREREQS: DVM or equivalent required or permission of instructor.
VMB 642. SEMINARS IN LABORATORY ANIMAL MEDICINE (2). Prepares students for careers in laboratory animal medicine. Provides a review of medical conditions, diagnosis and treatment for research animals. PREREQS: DVM or equivalent required or permission of instructor.
VMB 651. SELECTED TOPICS IN VETERINARY MEDICINE (3). Topics vary; check Schedule of Classes for particular topics. PREREQS: Graduate standing and instructor approval required.
VMB 653. VETERINARY VIROLOGY (4). Virology for the professional and graduate student. PREREQS: Graduate standing or advanced undergraduate in science or engineering, with permission of instructor.
VMB 659. VETERINARY BACTERIOLOGY AND MYCOLOGY (5). Veterinary bacteriology and mycology for the veterinary graduate student. PREREQS: Graduate standing or advanced undergraduate in science or engineering, with permission of instructor.
VMB 660. VETERINARY PARASITOLOGY (5).
A study of the parasitic diseases of domestic animals with an emphasis on diagnosis and treatment. Fundamentals in host-parasite interactions, taxonomy and life cycle strategies are covered. PREREQS: Graduate standing or advanced undergraduate in science or engineering, with permission of instructor.
VMB 663. VETERINARY DIAGNOSTIC
PATHOLOGY (6). Practical hands-on course training students in the diagnostic pathology utilizing case material received at the OSU Veterinary Diagnostic Lab. Graded P/N. PREREQS: DVM degree or equivalent required.
VMB 664. COMPARATIVE MICROSCOPIC
PATHOLOGY (1). Case-based discussion course to train participants in the recognition, description, and pathogenesis of a wide variety of disease processes with an emphasis on microscopic features. Graded P/N. This course is repeatable for a maximum of 4 credits. PREREQS: DVM degree or equivalent.

VMB 665. READINGS IN VETERINARY
PATHOLOGY (1). Group discussions of assigned readings central to understanding of veterinary pathology, including recent advances. Graded $P / N$. This course is repeatable for a maximum of 6 credits. PREREQS: DVM degree or equivalent.

## VMB 666. VETERINARY MEDICINE AND

PUBLIC HEALTH (3). Covers aspects of
veterinary medicine that affect human health. An understanding of the contribution of the veterinary profession to human (public) health will enable students to play an effective role in this area, regardless of career direction. PREREQS: Instructor permission or admission to MPH degree program.
VMB 667. VETERINARY EPIDEMIOLOGY (3). A course for veterinary students describing the
factors determining the frequency and distribution of diseases, in a defined population of animals for the purpose of establishing programs to prevent and control their development and spread in this population. PREREQS: Graduate standing and instructor approval required.
VMB 669. INTRODUCTION TO GRANT
PROPOSAL WRITING (1). To introduce students to the fundamentals of writing grant proposals to the National Institute of Health (NIH), different funding mechanisms, as well as the grant reviewing process. CROSSLISTED as PHAR 669. PREREQS: Status as a student in a graduate or professional program.
VMB 670. INTRODUCTION TO SYSTEMS BIOLOGY (2). Students will gain a high-level overview of systems biology and bioinformatics, with an emphasis on biomedical applications, integration of "-omics" approaches, and biological networks.

VMB 671. MOLECULAR TOOLS (3). Intended for personnel with some scientific background who are seeking basic- and advanced-level molecular biology knowledge and who wish to become involved with molecular biology-related and biotechnological research. CROSSLISTED as MCB 671. PREREQS: Graduate standing or advanced undergraduate in science or engineering, with permission of instructor.

## VMB 672. MOLECULAR APPROACH TO

CANCER (1). Overview of cancer pathogenesis and current molecular techniques to diagnose and treat various neoplasms is provided. Content will include both veterinary and human data and concepts. Discussion/Lab. Graded P/N.

VMB 673. COMPARATIVE IMMUNOLOGY (3). Examines immune system function in animals other than mice and men with a focus on adapting cutting-edge technologies. PREREQS: Baccalaureate degree or instructor permission

VMB 674. VACCINES AND NEW THERAPIES (3).
Provides students with a cohesive understanding of the basic research behind the discovery of new therapeutic targets and scientific advancements used in development of vaccines and new therapies. PREREQS: Baccalaureate degree or permission of instructor.

VMB 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 99 credits. PREREQS: Graduate standing.

VMB 701. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
VMB 705. READING AND CONFERENCE (1-16).
This course is repeatable for a maximum of 16 credits.
VMB 706. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
VMB 709. VETERINARY MEDICINE
ORIENTATION (1). An overview of veterinary medicine with emphasis on historical development, current veterinary medical issues, employment opportunities, and professionalism. Graded P/N. PREREQS: First-year standing in veterinary medicine.
VMB 711. VETERINARY GROSS ANATOMY (4). Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken. PREREQS: First-year standing in veterinary medicine. VMB 711, VMB 712, VMB 713 must be taken in sequence.
VMB 712. VETERINARY GROSS ANATOMY (4). Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken. PREREQS: VMB 711 and first-year standing in veterinary medicine. VMB 711, VMB 712, VMB 713 must be taken in sequence.
VMB 713. VETERINARY GROSS ANATOMY (4). Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken. Lec/lab. PREREQS: VMB 712 and first-year
standing in veterinary medicine. VMB 711, VMB 712, VMB 713 must be taken in sequence.
VMB 714. VETERINARY MICROSCOPIC ANATOMY (4). Structure and development of cells, tissues, organs, and organ systems of animals. PREREQS: First-year standing in veterinary medicine.
VMB 715. VETERINARY MICROSCOPIC
ANATOMY (3). Structure and development of cells, tissues, organs, and organ systems of animals. PREREQS: VMB 714 and first-year standing in veterinary medicine.
VMB 716. VETERINARY NEUROSCIENCES (4). Structural and functional relationships of the nervous system and organs of special sense with emphasis on general clinical application. PREREQS: First-year standing in veterinary medicine.

VMB 717. VETERINARY PHYSIOLOGY (5), Physiology of body fluids, excretion, respiration, acid-base balance, blood, muscle, bone, cardiovascular system, digestion, metabolism, endocrine system, reproduction, and lactation. PREREQS: First-year standing in veterinary medicine. VMB 717, VMB 718, VMB 719 must be taken in sequence.
VMB 718. VETERINARY PHYSIOLOGY (5). Physiology of body fluids, excretion, respiration, acid-base balance, blood, muscle, bone, cardiovascular system, digestion, metabolism, endocrine system, reproduction, and lactation. PREREQS: VMB 717 and first-year standing in veterinary medicine.
VMB 719. VETERINARY PHYSIOLOGY (4). Physiology of body fluids, excretion, respiration, acid-base balance, blood, muscle, bone, cardiovascular system, digestion, metabolism, endocrine system, reproduction, and lactation. Lec/lab. PREREQS: VMB 718 and first-year standing in veterinary medicine.
VMB 720. VETERINARY IMMUNOLOGY (5). Clinical and diagnostic aspects of immunological mechanisms, serological reactions,
hypersensitivity, allergy, and disorders of the immune system. Lec/lab. PREREQS: First-year standing in veterinary medicine.
VMB 721. VETERINARY PATHOLOGY (5). Basic mechanisms and concepts relating to reaction of cells and tissues to disease, with emphasis on cellular and tissue degeneration, inflammatory reaction, circulatory disturbance and neoplasia. Lec/lab. PREREQS: First-year standing in veterinary medicine.
VMB 726. PET BIRD AND SMALL MAMMAL MEDICINE AND SURGERY (2). Medicine and surgery of pet birds and small animals. Graded P/N. PREREQS: Third-year standing in veterinary medicine.

VMB 727. ORNAMENTAL FISH MEDICINE (2).
An introduction to the basic principles of ornamental fish medicine including basic husbandry, handling and clinical procedures. Graded P/N. PREREQS: Fourth-year standing in veterinary medicine.

VMB 728. SPECIAL ANIMAL MEDICINE (4).
Diagnosis, treatment, and management of special animals, including the common laboratory animals. This course is repeatable for a maximum of 8 credits. PREREQS: Third-year standing in veterinary medicine.
VMB 729. LAB ANIMAL/PRIMATE MEDICINE AND SURGERY (3-12). Designed to provide hands-on experience with a variety of laboratory animal species including primates, rodents, ungulates, fish, and reptiles. May be repeated up to 4 times for 3, 6, 9 or 12 credits per term. 12 credits maximum apply toward graduation. Graded $\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 12 credits. PREREQS: Completion of first year of veterinary medicine.

VMB 736. DIAGNOSTIC CLINICAL PATHOLOGY
(2). One week clinical experience in clinical pathology, cytology, urinalysis, clinical chemistry interpretation and hematology. Lec/lab.

## VMB 740. VETERINARY INTEGRATED

## PROBLEM SOLVING (1). The first of three

1 -credit courses in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. PREREQS: First-year professional standing.

## VMB 741. VETERINARY INTEGRATED

PROBLEM SOLVING (1). The second of three
1 -credit courses in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. PREREQS: First-year professional standing.

## VMB 742. VETERINARY INTEGRATED

PROBLEM SOLVING (1). The third of three
1 -credit courses in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. Graded P/N. PREREQS: First-year professional standing.

VMB 743. VETERINARY INTEGRATED
PROBLEM SOLVING (1). A course in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. Students learn through interaction with their peers and with independent study outside of class. Graded P/N. This course is repeatable for a maximum of 4 credits.

## VMB 744. VETERINARY INTEGRATED

PROBLEM SOLVING (1). A course in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. Students learn through interaction with their peers and with independent study outside of class. Graded P/N. PREREQS: Second-year professional standing.

## VMB 745. COMMUNICATIONS FOR

VETERINARIANS (1). Communications and problem solving for the third-year veterinary student. Graded P/N. PREREQS: Third-year standing in veterinary medicine.

VMB 749. WILDLIFE SAFARI (2). Clinical training in the care of exotic and zoo animal species. Graded P/N. PREREQS: Fourth-year standing in veterinary medicine.
VMB 750. SYSTEMIC PATHOLOGY I (4).
Examines the principles of system and organ responses to injury and the consequent effects of these changes on the host. PREREQS: Secondyear professional standing.

VMB 751. SYSTEMIC PATHOLOGY II (5). Examines the principles of system and organ responses to injury and the consequent effects of these changes on the host. PREREQS: Secondyear professional standing.
VMB 753. VETERINARY VIROLOGY (4). Virology for the professional DVM student. PREREQS: Second-year professional standing.

VMB 756. ADVANCED CLINICAL PATHOLOGY (1). One-week rotation in advanced clinical pathology: cytology, hematology and clinical chemistry interpretation. Graded P/N. PREREQS: VMB 736 [C] and Fourth-year standing in veterinary medicine.
VMB 759. VETERINARY BACTERIOLOGY AND MYCOLOGY (5). Bacteriology and mycology for the professional DVM student. PREREQS: Second-year professional standing.
VMB 760. VETERINARY PARASITOLOGY (5). A study of the parasitic diseases of domestic animals with an emphasis on diagnosis and treatment. Fundamentals in host-parasite interactions, taxonomy and life cycle strategies are covered. PREREQS: Second-year professional standing.
VMB 761. VETERINARY PHARMACOLOGY (2).
Fundamentals of pharmacology as related to veterinary medicine presented in a systemsoriented approach with drug therapy in domestic
animals. PREREQS: Second-year professiona standing.
VMB 762. VETERINARY PHARMACOLOGY II
(4). Fundamentals of pharmacology as related to veterinary medicine presented in a systemsoriented approach with drug therapy in domestic animals. PREREQS: Second-year professional standing.
VMB 763. VETERINARY CLINICAL PATHOLOGY
(4). Clinical pathology for the professional DVM student. PREREQS: Second-year professional standing.
VMB 765. VETERINARY TOXICOLOGY (4). A study of toxic agents, mechanisms of action, toxicosis and treatments, especially as related to domestic and wild animals, with principles of toxicity testing, clinical diagnosis, and identification of poisonous plants. Lec/lab. PREREQS: Secondyear professional standing.

## VMB 766. EPIDEMIOLOGY AND PUBLIC

 HEALTH (3). Examination of the application of epidemiology to the field of veterinary medicine and the study of important veterinary public health issues. PREREQS: Second-year professional standing.VMB 767. VETERINARY EPIDEMIOLOGY (3). Examines factors determining the frequency and distribution of diseases in a defined population of animals for the purpose of establishing programs to prevent and control their development and spread in this population.

## VMB 768. BASIC HISTOPATHOLOGY (1).

 A rotation in histopathology at the Veterinary Diagnostic Laboratory. Emphasis is placed on case evaluation, diagnosis and report writing of biopsies of all species. Graded P/N. PREREQS: VMB 751 [C] and third-year standing in veterinary medicine.VMB 769. ANIMAL GENOMICS (1). Discussion about the dog and cow genomes, susceptibility to diseases, and the possibilities and techniques for treatment of medical conditions by gene transfer and modification. PREREQS: Mandatory graduate standing in science or third- or fourth-year student in the College of Veterinary Medicine.
VMB 772. INTERNATIONAL VETERINARY MEDICINE (2). Veterinary students work with veterinarians and domestic animals in international settings. Graded P/N. This course is repeatable for a maximum of 4 credits.
VMB 774. LABORATORY ANIMAL MEDICINE
(6). Clinical experience related to diagnosis, treatment, and management of laboratory animals. Graded P/N. PREREQS: Fourth-year professional standing.
VMB 775. PRACTICE MANAGEMENT (2).
Examines the world of work and career development theories using career assessment, literature, media and computer resources. Graded P/N. PREREQS: Third-year professional standing.
VMB 786. ADVANCED HISTOPATHOLOGY (2). A rotation in histopathology at the Veterinary Diagnostic Laboratory. Emphasis is placed on case evaluation, diagnosis and report writing of biopsies of all species. PREREQS: Fourth-year standing in veterinary medicine, VMB 751 is mandatory.
VMB 795. DIAGNOSTIC SERVICES (2). Students will perform service duty in the necropsy area of the Veterinary Diagnostic Laboratory and will perform necropsies on delivered specimens. Other activities.

## - VETERINARY MEDICINE CLINICAL COURSES

VMC 501. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.
VMC 503. THESIS (1-12). This course is repeatable for a maximum of 999 credits.
VMC 505. READING AND CONFERENCE (1-16).
Graded P/N. This course is repeatable for a maximum of 16 credits.

VMC 507. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

VMC 601. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

VMC 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.
VMC 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.
VMC 606. PROJECTS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.
VMC 607. SEMINAR (1-16). One-credit section; VMC 607 Sect. 1. Graded P/N. This course is repeatable for a maximum of 16 credits.
VMC 632. POSTGRADUATE MEDICINE (3-7).
An interactive, practical course on the role of scholarship in clinical medicine, including techniques to develop and conduct research in a clinical setting. This course is repeatable for a maximum of 16 credits. PREREQS: Enrollment in a clinical residency and DVM degree or equivalent and graduate standing.

VMC 634. POSTGRADUATE SURGERY (3-7).
An interactive, practical course on the role of scholarship in clinical surgery, including techniques to develop and conduct research in a clinical setting. This course is repeatable for a maximum of 16 credits. PREREQS: Enrolled in CVM residency program and graduate standing.
VMC 637. POSTGRADUATE CARDIOLOGY (3-7). An interactive, practical course on the role of scholarship in clinical cardiology, including techniques to develop and conduct research in a clinical setting. This course is repeatable for a maximum of 16 credits. PREREQS: Enrollment in
a clinical residency and DVM degree or equivalent and graduate standing.
VMC 651. SELECTED TOPICS IN VETERINARY MEDICINE (3). Topics vary; check Schedule of Classes for particular topics. PREREQS: Graduate standing and instructor approval required.
VMC 680. VETERINARY MEDICAL
PRECEPTORSHIP (1-16). Clinical experience in veterinary medicine for students in the combined DVM-MPH program. Graded P/N. This course is repeatable for a maximum of 16 credits.

VMC 682. TOPICS IN INTERNAL MEDICINE
(2-4). In-depth investigation of important topics in physiology, pathophysiology, treatment, diagnosis, and other aspects of internal medicine through investigation of primary literature and recent reviews. This course is repeatable for a maximum of 16 credits. PREREQS: Enrollment in a clinical residency and DVM degree or equivalent.
VMC 684. TOPICS IN SURGERY (2-4). In-depth investigation of important topics in physiology, pathophysiology, treatment, diagnosis, and other aspects of surgery through investigation of primary literature and recent reviews. This course is repeatable for a maximum of 16 credits. PREREQS: Enrollment in a clinical residency and DVM degree or equivalent.
VMC 701. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.
VMC 705. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.
VMC 706. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

VMC 711. CLINICAL CARDIOLOGY (1-4). A oneweek clinical elective rotation in cardiology at the Veterinary Teaching Hospital. May be repeated up to 4 times, two weeks or more is encouraged. This course is repeatable for a maximum of 4 credits. PREREQS: Fourth-year standing in veterinary medicine required.

VMC 712. CLINICAL ONCOLOGY (1-4). A
one-week clinical elective rotation in clinical oncology at the Veterinary Teaching Hospital. May be repeated up to 4 times, two weeks or more is encouraged. This course is repeatable for a maximum of 4 credits. PREREQS: VMC 778 [C] and fourth-year standing in veterinary medicine.

## VMC 714. SMALL ANIMAL DENTISTRY (1).

 A clinical course designed to provide students with hands-on training in diagnosis, treatment and prophylaxis of dental diseases of dogs and cats. PREREQS: Fourth-year standing in the professional veterinary curriculum.VMC 715. CASE STUDIES IN SMALL ANIMAL MEDICINE I (1). A case-based course involving diseases and conditions of the endocrine, gastrointestinal and hepatobiliary systems as well as neoplastic and infectious diseases of small animals. PREREQS: Third-year professional standing in veterinary medicine.

VMC 716. CASE STUDIES IN SMALL ANIMAL MEDICINE II (1). A case-based course involving diseases and conditions of the cardiovascular, respiratory and urogenital systems as well as emergent diseases and conditions. PREREQS: Third-year professional standing in veterinary school.

VMC 717. CASE STUDIES IN SMALL ANIMAL MEDICINE III (1). A case-based course involving diseases and conditions of the dermatologic, neurologic, ophthalmalogic, and hemolymphatic systems. PREREQS: Third-year professional standing in veterinary school.
VMC 718. SMALL ANIMAL PREVENTIVE
MEDICINE (2). Introductory course to basic concepts in small animal preventive medicine including vaccine immunology, vaccine strategies, internal/external parasite control, nutrition in disease prevention, and wellness programs for
dogs and cats. PREREQS: Third-year standing in veterinary school.

VMC 720. VETERINARY CLINICAL NUTRITION
(2). To examine the nutritional needs of many species of veterinary importance. Emphasis is placed on designing feeding programs to optimize health and animal performance. PREREQS: First-year standing in the professional veterinary curriculum.

VMC 721. SMALL ANIMAL CLINICAL
NUTRITION (1). Introduction to the concepts of small animal clinical nutrition and is designed for the third-year veterinary student. PREREQS: Third-year standing in veterinary medicine recommended.

VMC 723. ADVANCED FELINE MEDICINE (2).
A one-week elective for senior students in the DVM curriculum. The course emphasizes aspects of internal medicine specific to the domestic cat. Graded P/N.
VMC 724. LARGE ANIMAL SURGERY (6).
Selected surgical techniques and procedures related to equine and food animal species. PREREQS: Third-year standing in veterinary medicine.

VMC 725. PRINCIPLES OF SURGERY (4). A basic course in the principles and techniques of surgery for the professional veterinary student. Lec/lab. PREREQS: Second-year standing in veterinary medicine.

VMC 726. SMALL ANIMAL THERIOGENOLOGY (1). Advanced clinical experience in small animal (canine) reproduction. Graded P/N. PREREQS: VMC 783 [C]
VMC 727. ADVANCED SMALL ANIMAL
SURGERY (2). One-week of additional lectures and laboratories to improve surgical skills and acquire more advanced knowledge of specific surgical conditions. Lec/lab. Graded P/N. PREREQS: Fourth-year standing in veterinary medicine is mandatory.
VMC 729. CLINICAL THERIOGENOLOGY (1). Practical and theoretical training in reproductive management and disorders in all species; routine diagnostic and treatment procedures; clinic rounds. This course is repeatable for a maximum of 3 credits. PREREQS: 4th year standing in veterinary medicine.
VMC 731. SMALL ANIMAL EMERGENCY
CARE-DOVE LEWIS (3). A two-week clinical rotation at the Dove Lewis Memorial Emergency Clinic in Portland, OR. PREREQS: Fourth-year standing in veterinary medicine.

## VMC 732. CLINICAL LARGE ANIMAL

MEDICINE I (3 or 6). Clinical medicine training in diseases of food animals and horses; clinic rounds and diagnostic procedures. This course is repeatable for a maximum of 24 credits. PREREQS: Fourth-year standing in veterinary medicine.

VMC 734. CLINICAL LARGE ANIMAL SURGERY I (3 or 6). Clinical surgery, treatment, and care of food animals and horses; clinical rounds; training in surgery, lameness, and diagnostic procedures. Lec/lab. This course is repeatable for a maximum of 24 credits. PREREQS: Fourth-year standing in veterinary medicine.
VMC 735. RURAL VETERINARY PRACTICE I (3 or 6). Rural practice training in diseases of food animals and horses. Lec/lab. This course is repeatable for a maximum of 6 credits. PREREQS: Fourth-year standing in veterinary medicine.
VMC 737. VETERINARY ANESTHESIOLOGY (4). A three-week rotation in veterinary anesthesiology utilizing patients presented to the veterinary teaching hospital. PREREQS: Fourth-year standing in veterinary medicine.
VMC 738. INTRODUCTION TO ANIMAL CARE
(3). Feeding, housing, breeding and marketing systems related to animal care. This course is
epeatable for a maximum of 6 credits. PREREQS: First-year standing in veterinary medicine.

VMC 739. VETERINARY MEDICAL ETHICS (1). Introduction of ethics in veterinary medicine, with specific attention to ethical theories, ethical decision making, moral status of animals, professional ethics, and practice issues.
VMC 740. SHEEP AND GOAT MEDICINE AND SURGERY (3). Discussions of economically important sheep and goat diseases, practical surgeries, and a review of nutrition and husbandry Graded P/N. PREREQS: Fourth-year standing in veterinary medicine.
VMC 741. LARGE ANIMAL GI SURGERY (2). A one-week course for 4th year veterinary students, with particular interest in gastrointestinal surgery. Graded P/N. PREREQS: Fourth-year standing in veterinary medicine.

VMC 742. CAMELID MEDICINE AND SURGERY
(4). Designed to give students an in-depth introduction to camelid health care via handson work, lectures, and discussion sections. Graded P/N. PREREQS: Fourth-year standing in veterinary medicine.

## VMC 743. ADVANCED EQUINE

REPRODUCTION (3). A two-week course
in advanced clinical experience in equine reproduction. Graded P/N. PREREQS: Third-year standing in veterinary medicine recommended.

## VMC 744. ADVANCED LAMENESS IN

 EQUINE (3). Application of anatomy, lameness examination, nerve and joint anesthesia diagnostic radiology, ultrasound and nuclear scintigraphy to diagnosis of lameness in horses. Graded P/N. PREREQS: Fourth-year standing in veterinary medicine.VMC 747. VETERINARY ANESTHESIOLOGY II (3). An additional two-week clinical rotation in veterinary anesthesiology utilizing patients presented to the Veterinary Teaching Hospital. Graded P/N. PREREQS: Fourth-year standing in veterinary medicine.
VMC 748. EQUINE DENTISTRY (2). Utilizing modern, motorized equipment, cadaver specimens, and live hospital and client horses, students will learn and perform modern methods of equine dental prophylaxis and treatment. Graded P/N. PREREQS: Third-year standing in veterinary medicine.
VMC 749. CLINICAL IMAGING II (3). Advanced clinical course for 4th-year veterinary students in which they will assume additional responsibility for performing common radiographic procedures. Graded P/N. PREREQS: VMC 796 [C] and fourthyear standing in veterinary medicine.
VMC 750. EQUINE CLINICAL NUTRITION (1). A one-week course for veterinary students focusing on equine nutrition that can be used in veterinary practice. Graded P/N. PREREQS: Third-year standing in veterinary medicine.

VMC 751. RUMINANT NUTRITION (2). An advanced course in clinical ruminant nutrition dealing with nutritional problems of ruminants that might be encountered by a practicing veterinarian. Graded P/N. PREREQS: Third-year standing in veterinary medicine and basic nutrition recommended.

## VMC 752. CLINICAL LARGE ANIMAL

MEDICINE II (3-6). Additional clinical medicine training. Graded P/N. This course is repeatable for a maximum of 6 credits. PREREQS: VMC 732 [C]

## VMC 754. CLINICAL LARGE ANIMAL

SURGERY II (3 or 6). Additional clinical surgery training. Graded P/N. This course is repeatable for a maximum of 6 credits. PREREQS: VMC 734 [C]

VMC 755. RURAL VETERINARY PRACTICE II
(3-6). One additional rural practice training. Graded P/N. This course is repeatable for a maximum of 6 credits. PREREQS: VMC 735 [C]

VMC 757. SMALL ANIMAL SURGERY (6). Small animal medicine and surgical techniques and procedures. Graded P/N. PREREQS: Fourth-year professional standing.

## VMC 758. CATTLE PRODUCTION MEDICINE

(3). Clinical application of production medicine practices to dairy and beef cattle practice. Graded P/N. PREREQS: VMC 735 [C] and fourth-year professional standing or instructor approval required.
VMC 759. LARGE ANIMAL PALPATION (1). A laboratory for additional experience in rectal palpation of large animals, for third-year veterinary students. Graded P/N. PREREQS: Third-year standing in veterinary medicine recommended.

VMC 763. ADVANCED CLINICAL CARDIOLOGY (1). An elective course for junior veterinary students detailing diagnosis and management of the common congenital and acquired cardiac diseases of domestic animals. PREREQS: Thirdyear standing in veterinary medicine.
VMC 764. DIAGNOSTIC IMAGING (4). A lecture and laboratory course in diagnostic imaging covering physics or radiography and ultrasonography, radiation safety and image interpretation for small and large animals, presented by body systems. PREREQS: Secondyear professional standing.
VMC 765. ADVANCED CLINICAL RADIOLOGY (1). An elective advanced radiology case-based course for Year 3 veterinary medicine students that focuses on radiographic findings of commonly encountered clinical disease. PREREQS: VMC 764 or equivalent course.
VMC 768. PRINCIPLES OF ANESTHESIA (4). A basic course in the principles and techniques of surgery and anesthesia for the professional veterinary student. Lec/lab. PREREQS: Secondyear professional standing.
VMC 769. GENERAL MEDICINE (2). An introduction to medicine with a discussion of the principles of medicine that would be applicable to all species. Physical examination, clinical diagnosis, pathophysiology of signs of disease in domestic animals, therapeutic principles and diagnostic procedures. PREREQS: Second-year professional standing.
VMC 770. LARGE ANIMAL MEDICINE I (4). The first of three courses in large animal medicine for third-year professional veterinary students covering diagnosis and treatment of domestic large animals.
VMC 771. LARGE ANIMAL MEDICINE II (4). Diagnosis, treatment and control of diseases of large domestic animals, specifically gastrointestinal, hepatobiliary diseases, weight loss, and introduction to production medicine, and some swine diseases. PREREQS: VMC 770

VMC 772. LARGE ANIMAL MEDICINE III (4). Diagnosis, treatment and control of diseases of large domestic animals, specifically central nervous system, mastitis, musculoskeletal, sudden death, skin, and some swine diseases. PREREQS: VMC 770 and VMC 771

VMC 773. MEDICINE LABORATORY I (1). Laboratory experience for third-year veterinary students concurrent with the large and small animal medicine courses. PREREQS: Third-year standing in veterinary medicine.
VMC 774. MEDICINE LABORATORY II (1). Laboratory experience for third-year veterinary students concurrent with the large and small animal medicine courses. PREREQS: Third-year standing in veterinary medicine.
VMC 775. CLINICAL SMALL SPORTS MEDICINE AND REHABILITATION (3). Clinical training in small animal rehabilitation in the Veterinary Teaching Hospital. PREREQS: VMC 725 and VMC 785 and 4th-year professional veterinary standing.

VMC 776. SMALL ANIMAL MEDICINE I (5). A course for veterinary students describing major topics of small animal internal medicine, using both a systems-based approach and a problembased approach.
VMC 777. SMALL ANIMAL MEDICINE II (5). A course for veterinary students describing major topics of small animal internal medicine, using both a systems-based approach and a problembased approach. PREREQS: VMC 776
VMC 778. SMALL ANIMAL MEDICINE III (5). A course for veterinary students describing major topics of small animal internal medicine, using both a systems-based approach and a problembased approach. PREREQS: VMC 776 and VMC 777

VMC 779. EQUINE SPORTS MEDICINE (1).
One-week elective encompassing basic exercise physiology, sports-related injuries, injury rehabilitation, training and nutrition of equine athletes. Graded P/N. PREREQS: Fourth-year standing in the DVM program.

## VMC 780. VETERINARY MEDICAL

PRECEPTORSHIP (1-16). Theory of practice of veterinary medicine in a non-university situation. Graded P/N. This course is repeatable for a maximum of 16 credits. PREREQS: Fourth-year professional standing.
VMC 781. SEMINAR IN VETERINARY MEDICINE
(1-16). Seminars and case discussions on selected topics by students, staff, and others. Graded $\mathrm{P} / \mathrm{N}$. This course is repeatable for a maximum of 16 credits.
VMC 782. EMERGENCY CARE (1). One-week rotation in the Veterinary Teaching Hospital during non-regular hours. Practice and instruction in caring for critically ill patients. PREREQS: Fourthyear professional standing.
VMC 783. THERIOGENOLOGY I (4). To present the clinical applications of reproductive physiology, anatomy, embryology, pathology and microbiology in domesticated animals.
VMC 785. SMALL ANIMAL SURGERY (7).
A lecture and laboratory course covering the diagnosis, operative methods, and aftercare of common small animal surgical conditions.

VMC 786. ANIMAL BEHAVIOR (1). Diagnosis and treatment of feline, canine and equine problem behaviors including aggression, anxiety, house-soiling and compulsive behaviors.

## VMC 787. 3RD YEAR CLINICS (1). An

 introductory clinical experience for third-year veterinary students.VMC 788. BUSINESS APPLICATIONS IN PRIVATE SMALL ANIMAL PRACTICE (1). A hands-on elective course exploring the business of small animal general practice in a casebased approach. This course is repeatable for a maximum of 2 credits. PREREQS: 4th year standing in veterinary school.
VMC 789. PET PRACTICE (3). Additional clinical training in primary care pet practice at a Banfield Pet Hospital. Graded P/N. This course is repeatable for a maximum of 6 credits. PREREQS: Fourth-year standing in veterinary medicine.

VMC 790. CLINICAL EXPERIENCE (1-16). One-
to four-week periods. Section 1: Large Animal
Clinical Experience/Topics (1-16). Section 2: Small Animal Clinical Experience/Topics (1-16). Section 3: Mixed Animal Clinical Experience/Topics (1-16).
Section 4: Small Animal Private Practice (1-16).
Section 5: Special Studies (1-16). Some sections graded P/N. Lec/lab. This course is repeatable for a maximum of 48 credits. PREREQS: Fourth-year professional standing.
VMC 791. CLINICAL SMALL ANIMAL MEDICINE
(3 or 6). A clinical rotation in small animal internal medicine at the Veterinary Teaching Hospital. Emphasis will be placed on patient evaluation, diagnosis and treatment of diseases of dogs and cats. This course is repeatable for a maximum of 6 credits. PREREQS: Fourth-year standing in veterinary medicine.
VMC 792. CLINICAL SMALL ANIMAL MEDICINE
II (3-6). A two-week, three-credit clinical elective rotation in small animal internal medicine at the Veterinary Teaching Hospital. Emphasis will be placed on patient evaluation, diagnosis and treatment of diseases of dogs and cats. This course is repeatable for a maximum of 6 credits. PREREQS: VMC 791 is recommended.

VMC 793. CLINICAL SMALL ANIMAL SURGERY (3 or 6). Clinical training in small animal surgery in the Veterinary Teaching Hospital. This course is repeatable for a maximum of 6 credits. PREREQS: VMC 725 [C] and VMC 785 [C] and fourth-year standing in veterinary medicine.

VMC 794. OHS SMALL ANIMAL PRIMARY
CARE (4). Three-week rotation at OHS to gain experience with an emphasis on surgery, medical case workup, exam room protocol and behavior basics. PREREQS: Fourth-year standing in veterinary medicine.
VMC 796. CLINICAL IMAGING (3). A clinical course for 4th-year veterinary students in which they will assume primary responsibility for performing common radiographic procedures. PREREQS: Fourth-year standing in veterinary medicine.
VMC 797. SMALL ANIMAL CRITICAL CARE
AND HOSPITAL SERVICE ROTATION (1). A one-week clinical rotation in small animal critical care managing small animal cases in the intensive care unit at the Veterinary Teaching Hospital. PREREQS: Fourth-year standing in veterinary medicine.
VMC 798. CLINICAL SMALL ANIMAL
SURGERY II (3-6). Clinical training in small animal surgery in the College of Veterinary Medicine, Lois B. Acheson Veterinary Teaching Hospital. This course is repeatable for a maximum of 6 credits. PREREQS: VMC 725 and VMC 785 and VMC 793 recommended.
VMC 799. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

## THE RESEARCH OFFICE

Oregon's State University is one of only two land, sea, space and sun grant institutions in the U.S., holds top tier research designation from the Carnegie Foundation, and is the state's largest public research university. Oregon State research exceeded \$308 million dollars in fiscal year 2015, with private sector funding totaling approximately $\$ 40$ million.

The OSU Research Agenda, integrated with the university's strategic plan, guides faculty inquiry in OSU's three signature areas of distinction: Advancing the Science of Sustainable Earth Ecosystems; Improving Human Health and Wellness; and Promoting Economic Growth and Social Progress.

Headed by the vice president for research, the Research Office serves faculty involved in research, innovation, scholarship, and creativity in all OSU colleges and in a variety of multidisciplinary centers, institutes and programs. The office provides support to secure funding, comply with regulations, partner with industry, establish collaborations across the university and raise the profile of OSU.

## INCENTIVE PROGRAMS

Website: http://research.oregonstate.edu/ incentive/

The Research Office provides funding for faculty success. The General Research Fund is for projects not otherwise supported by organized or directed programs. Faculty Release Time provides funding for developing external grant proposals or furthering scholarly activities. Research Equipment Reserve Funds help acquire, repair, renovate, or improve equipment. The Undergraduate Research, Innovation, Scholarship and Creativity Fund enable students to initiate scholarly relationships with faculty early in their academic careers.

## OSU ADVANTAGE

Website: http://advantage.oregonstate.edu/ home
The Oregon State University Advantage connects business with faculty expertise, student talent and world-class facilities to research solutions, bring ideas to market and launch companies. The OSU Advantage helps faculty take their research and projects into the marketplace where they can have real-world impacts, and provides opportunities to new sources of funding to carry on important and impactful work. Three aligned organizations offer this opportunity: Advantage Accelerator, Advantage Partnerships, and Advantage Impact.

OFFICE OF RESEARCH INTEGRITY
Website: http://research.oregonstate.edu/ ori/

The Office of Research Integrity (ORI) works with OSU faculty, staff, and students
to help assure proper conduct of research in areas pertaining to the use of human subjects, and non-human vertebrate animals. The office also works with faculty and Academic Affairs to identify and appropriately manage issues that could be perceived to present financial conflicts of interest. The university's Small Boat and Diving Safety programs are overseen by the office, as are issues related to technology export controls. The ORI's purpose is to facilitate the research efforts of OSU faculty, staff and students by helping them to remain compliant with the many federal and state research regulations that assure the integrity of research, the safety of all, and the ethical treatment of human and animal subjects.

## OFFICE OF SPONSORED RESEARCH AND AWARD ADMINISTRATION

Website: http://research.oregonstate.edu/ osraa
The Office of Sponsored Research and Award Administration (OSRAA) has central responsibility for proposal submission for sponsored research, scholarship, instructional and other activities at Oregon State and contractual compliance as it relates to sponsored activities. OSRAA balances service to OSU faculty and staff, university administration, and the numerous organizations that sponsor Oregon State University activities. Functions include proposal review, monitoring institutional compliance with terms and conditions, official institutional signatory, policy and procedure development, training, compliance activities related to research administration, and general funding opportunity assistance.

## OFFICE FOR <br> COMMERCIALIZATION AND CORPORATE DEVELOPMENT (OCCD)

Website: http://advantage.oregonstate. edu/advantage-impact
The OCCD leads OSU's industrysponsored research efforts and the commercialization of OSU innovations by evaluating markets, developing an intellectual property protection strategy and executing research, confidentiality, materials transfer, licensing and other industry agreements. The OCCD is the bridge to commercial entities-from Oregon-based startups to large international companies, the OCCD facilitates OSU research to impact the world.

## OFFICE FOR RESEARCH

 DEVELOPMENT (ORD)Website: http://research.oregonstate.edu/ ord
The ORD provides leadership in strategic planning, implementation, coordination, and review of large research proposals

across campus, and manages the University Limited Submission process. The primary responsibilities of the ORD are to identify and develop new external funding sources, increase funding support for the university, facilitate the development of research partnerships, research future grant opportunities, and provide education for faculty and administrators to encourage applications for grant funding.

## MULTIDISCIPLINARY <br> CENTERS AND INSTITUTES

Website: http://research.oregonstate.edu/ research-centers-and-institutes-osu Addressing many of the world's most pressing challenges requires collaborative efforts of scientists, engineers, social scientists, and humanists to attain longlasting, high impact results. OSU fosters these dynamic transdisciplinary collaborations through a variety of centers, institutes and programs. With particular strengths in material sciences, ocean and earth sciences, enterprise innovation and economic development, health sciences, and natural resources, OSU investigators, representing virtually every college on campus, team to conduct cutting-edge research, provide undergraduate and graduate education, and proactively engage communities throughout Oregon and the world in helping them address their greatest needs.

The following centers and institutes are administered by the OSU Research Office.

1. Center for Genome Research and Biocomputing
2. Center for Latin@ Studies and Engagement (CL@SE)
3. Center for Research on Lifelong STEM Learning
4. Center for the Humanities
5. Cooperative Institute for Marine Resources Studies (CIMRS)
6. Environmental Health Sciences Center
7. Hatfield Marine Science Center
8. Institute for Natural Resources (INR)
9. Institute for Water and Watersheds (IWW)
10. Laboratory Animal Resources Center (LARC)
11. Linus Pauling Institute
12. Native American Collaborative Institute (NACI)
13. Northwest National Marine Renewable Energy Center (NNMREC)
14. Oregon NASA Space Grant Consortium
15. Oregon Sea Grant
16. Radiation Center
17. Superfund Research Center

## OSU RESEARCH OFFICE CENTERS AND INSTITUTES

## CENTER FOR CENOME <br> RESEARCH AND <br> BIOCOMPUTING

## Brett Tyler, Director

Website: http://cgrb.oregonstate.edu/

## Mission Statement

The Center for Genome Research and Biocomputing facilitates the development, application and training in computationally intensive, genome-enabled research at OSU and across the state. Research in the CGRB and faculty affiliate laboratories seeks to improve health, better utilize natural and agricultural resources, understand our global environment, and develop new bio-based products and energy sources. The center offers leadership and services to faculty, staff and students through core laboratories, computational facilities, seminars and technology workshops, and conferences. It also provides a focal point for researchers to establish contacts, initiate collaborations, and apply new technologies in their own laboratories.

## Functions of the CGRB

Over 100 OSU faculty, all holding primary appointments in academic departments of the colleges of Agricultural Sciences; Engineering; Forestry; Pharmacy; Science; Veterinary Medicine; or Earth, Ocean, and Atmospheric Sciences; are affiliate members of the center. The center was established in 1983 as a university resource to develop cell and molecular biology research. Today, the CGRB facilitates development, application and training in computationally intensive, genome-enabled research at OSU and across the state. The CGRB functions and facilities include:

1. Staffed Core Laboratory facilities that provide a variety of services in genomics, functional genomics, imaging and genotyping;
2. Staffed biocomputing facilities with an extensive hardware infrastructure, which includes a managed cluster and shared resources;
3. Computational scientists and staff to facilitate implementation of a computationally intensive research program;
4. Seminar Series that features leading scientists in molecular and genomic biosciences, and frequent technology training workshops that feature cutting-edge technologies;
5. Annual Fall Conference that brings together faculty, staff and students from across OSU;
6. Coordination of the OSU Computational and Genome Biology Initiative.

## CGRB Core Laboratories

A key part of the center is the CGRB Core Laboratories that provide services, technical expertise, collaborative functions and share-use equipment for molecular bioscience research at OSU. The core labs are a fully staffed facility that serves as a focal point for acquisition and development of new instrumentation and technologies. A professional staff of five provides service in four areas:

- Genomics-DNA sequencing, high throughput sequencing (Illumina), genotyping and fragment analysis;
- Functional genomics-NimbleGen and Affymetrix GeneChip microarray services for analysis of global gene expression patterns in all types of organisms;
- Biocomputing and bioinformaticsadvanced computational resources for data mining, data analysis and database development;
- Imaging and image analysis-a confocal laser scanning microscope facility for high-resolution analysis of a wide variety of specimens. In addition, the center maintains a set of common-use instruments and computers for research and data presentation.
In addition, the CGRB provides shared instrumentation, including real-time PCR, scanners, robotics, and computational facilities for use by walk-in users.
- Seminars, conferences, training-Bi-weekly CGRB seminar, annual conference, Gene D. Knudson Lectures in Molecular Genetics, technology training (e.g., high-throughput sequencing, bioinformatics training, etc.). The center coordinates a seminar program in which faculty, staff and students can interact with outstanding scientists from other institutions and organizations. The center also sponsors a yearly conference for scientific exchange, building collaborations, strengthening ties across departmental and college boundaries, and social interaction.
- Consolidation and coordination of bioscience faculty-over 100 faculty members are affiliated with the CGRB. The CGRB provides a consolidating function to organize large equipment grant proposals and other activities that require participation by several faculty. In addition, the CGRB is perceived by the administration to represent the interests of these faculty, who are spread across eight colleges.
- Research-In the past, the CGRB has not had an in-house research program. This is changing as the focus of the center shifts away from simple service to more of a
collaborative, enabling technology entity. In particular, the CGRB has developed significant capacity for genomic and computational biology.
The CGRB director reports to the vice president for research. Scientific and administrative oversight and guidance are provided by a scientific advisory board, which has two external members, and an administrative advisory board.

## CENTER FOR LATINO/A <br> STUDIES AND ENGACEMENT (CL@Sヨ)

Ana Gómez-Diazgranados, Associate Director of Outreach and Engagement Ana.Gomez@oregonstate.edu
Daniel López-Cevallos, Associate Director of Research Daniel.Lopez-Cevallos@oregonstate.edu
Website: http://liberalarts.or-egonstate.edu/centers-and-initiatives/ center-latino-studies-and-engagement

## Mission Statement

The mission of the Center for Latino/a Studies and Engagement is to promote engaged research and outreach devoted to advancing knowledge and understanding of Latinx life chances and the issues shaping their lived experiences in our state, region and beyond.

## Overarching Goals

- To promote excellence in engaged research, teaching, and outreach in Latinx Studies.
- To establish an action-based agenda which will promote the economic, political, physical, and educational well-being and development of the Latinx community in rural and urban Oregon.
- To serve as a model for enhancing the university's capabilities in similarly targeted research and engagement efforts.
- To foster engaged research that is collaborative, trans-disciplinary, and community oriented; furthering both theoretical and applied knowledge to solve real-world problems.

## Established Areas of Expertise

- Youth and Community Empowerment
- Socio-Economic Well-Being
- Health and Wellness
- Education
- Cultural and Historical Awareness

## CENTER FOR RESEARCH ON LIFELONG STEM LEARNING

Martin Storksdieck, Director Storksdieck@oregonstate.edu
Julie Risien, Associate Director Julie.Risien@oregonstate.edu Website: http://stem.oregonstate.edu/
The Center for Research on Lifelong STEM Learning at Oregon State University works to improve understanding of how all people learn STEM throughout the lifespan and across formal and informal settings. The center works across campus to enhance OSU's capacity to conduct applied research on learning and education in STEM disciplines (Science, Technology, Engineering and Mathematics), and to provide OSU with the insights from past and current research on STEM learning. It serves a diverse and decentralized community of those who engage in STEM, or use learning research at OSU, by functioning as a central hub and institutional support structure. The center represents OSU STEM learning research at state, national and international levels.

## THE CENTER FOR THE HUMANTTIES

Christopher McKnight Nichols, Director

## Joy Jensen, Coordinator

Website: http://oregonstate.edu/dept/ humanities/
The Center for the Humanities, established in 1984 through a grant from the National Endowment for the Humanities, is primarily concerned with the advancement of interdisciplinary humanities research. The Humanities Center provides fellowships to visiting scholars and OSU faculty members engaged in research and writing projects in literature, history, philosophy, foreign languages, and related humanities fields. Its programs are supported by the OSU Office of Research and the Oregon State University Foundation. Fellowship applications are screened by an advisory board made up of former fellows and OSU faculty from the College of Liberal Arts. The Humanities Center also hosts or co-sponsors research conferences, seminars, films, lectures, and other public programs in the humanities. The Humanities Center's fundamental concern is the advancement of humanities research, teaching, and public presence at OSU. It is located in Autzen House, a gracious and historic building on the east edge of campus, 811 SW Jefferson Avenue. Contact: Center for the Humanities, 541-737-2450.

## COOPERATIVE INSTITUTE FOR MARINE RESOURCES STUDIES

Michael A. Banks, Director
Website: http://hmsc.oregonstate.edu/ cimrs/

The Cooperative Institute for Marine Resources Studies was established in 1982 to foster collaborative research between the National Oceanic and Atmospheric Administration (NOAA) and Oregon State University in fisheries, aquaculture, oceanography, and related fields. It also encourages education and training of scientists in disciplines related to marine resources.

Administered through the Vice President for Research, the institute is the academic home for a staff of 25 to 45 (total) research assistants, associate and full professors, research associates, and faculty research assistants and students. Headquartered at the Hatfield Marine Science Center in Newport, the institute hosts collaborative research with various NOAA investigators within OAR, NOS and NMFS, specifically, the Pacific Marine Environmental Laboratory, the Northwest Fisheries Science Center and the Alaska Fisheries Science Center, the West Coast Regional Office, as well as researchers from a broad range of colleges and departments within the entire OUS system.

Currently, the broad goal of the Cooperative Institute for Marine Resources Studies is to coordinate research focused on living and nonliving marine resources, under four primary themes:

1. Marine Ecosystems and Habitat
2. Protection and Restoration of Marine Resources
3. Seafloor Processes
4. Marine Bioacoustics

The institute works with projects that emphasize basic science and environmental impacts, including human dimensions. The geographic area of interest extends over the eastern Pacific Ocean from northern California to the Bering Sea. The institute promotes cooperative projects between government and the university. Its cooperative agreements with NOAA laboratories provide a mechanism for OSU faculty, staff and students to work with federal scientists on research that leads to improved understanding of global ocean processes and fisheries resource issues.

## ENVIRONMENTAL HEALTH SCIENCES CENTER

Joseph Beckman, Director
Website: http://ehsc.oregonstate.edu/
The Environmental Health Sciences Center was established in 1967 with funding by the National Institute of Environmental Health Sciences (NIEHS). As an organizational unit under the vice president for research, it provides resources for coordination and stimulation of interdisciplinary basic research and training related to the effects of environmental factors on human health.

Environmental quality problems and their resultant effects continue to challenge people's health and their ability to understand and manage the evolving impact of environmental agents. Solutions to environmental problems require the interdisciplinary scientific efforts of professionals in many fields, both to generate new knowledge and to develop a qualified cadre of scientists who can provide an improved basis for risk assessment.
The EHS Center currently brings together and uses a variety of professional capabilities of research and teaching faculty, staff, and students from numerous OSU departments, schools, and colleges within OSU. Academic areas include chemistry, biochemistry and biophysics, environmental and molecular toxicology, microbiology, molecular and cell biology, food science and technology, fisheries and wildlife, veterinary medicine, pharmacology, zoology, and statistics. The center's visiting scientists program complements research expertise in these areas.
The broad mission of the EHS Center encompasses coordinated ongoing research of its faculty and encourages research by the training and support of qualified graduate students, predoctoral candidates, and postdoctoral research associates. As one of 26 national research centers designated by NIEHS, the EHS Center at OSU enhances the collaborative scientific research of its investigators with specialized core facilities. The center serves as an interdisciplinary resource on human health as related to the environment; it periodically awards funding for pilot projects submitted by OSU faculty to encourage new approaches in environmental health research. Selected proposals receive funding for preliminary studies, many of which have led to agency funding as major projects. It sponsors conferences, symposia, seminars, and meetings for student training, faculty consultations, and public communication. The EHS Center, through the OSU Cooperative Extension Service and other existing mechanisms, has developed a Community Outreach and Education

Program to communicate and heighten public awareness about environmental issues and the related recognition of risk to human health.
Examples of specific research areas include toxicology of environmental chemicals, cellular and biochemical toxicology, immunotoxicology, naturally occurring toxins, carcinogenesis of environmental chemicals, genetic toxicology, mass spectrometric ionization processes and methodologies, heteronuclear NMR studies, the chemical basis for solid waste and chemical waste disposal, and statistical studies, e.g., temporal aspects of cancer risks.
Federal environmental health legislation, particularly the Toxic Substances Control Act, has created a greater need for qualified toxicologists. To help meet this need, many EHS Center investigators serve as faculty within the OSU MS/ PhD interdisciplinary graduate Toxicology Program, as well as being faculty for the ongoing predoctoral and postdoctoral training program supported by the NIEHS and administered by the center. The focus of the training and research in environmental toxicology emphasizes determination of the mode of action of environmental chemicals; the curricula encourage use of biochemical, pathological, and pharmacological approaches to acquire a mastery in aquatic, biochemical, comparative, environmental, food, as well as general toxicology.

The administrative office of the EHS Center is in the Agricultural and Life Sciences (ALS) building; the research and teaching facilities are in the cooperating departments on campus. The EHS Center office has information available upon request.

## HATFIELD MARINE SCIENCE CENTER

## Robert Cowen, Director

2030 SE Marine Science Drive, Newport, OR 97365
541-867-0212, Director's Office
Email: HMSCmainoffice@oregonstate.edu Website: http://hmsc.oregonstate.edu/
The Hatfield Marine Science Center has over 50 years of accomplishment in research, education, and outreach. Originally established as a marine laboratory for Oregon State University, it has grown to encompass a large group of partners on its 49 -acre site on Yaquina Bay in Newport, Oregon. Within OSU, HMSC includes researchers, students, and faculty from six colleges. It serves as home to several university programs, including the Coastal Oregon Marine Experiment Station, the Cooperative Institute for Marine Resources Studies, and the Marine Mammal Institute. It also includes important components of the Oregon

Sea Grant program and the Northwest National Marine Renewable Energy Center. Our onsite partners include six state and federal agencies involved in research and management of the marine environment, and our cooperation includes faculty appointments for agency staff, as well as opportunities for students to work with agency scientists. We work closely with local coastal communities, including the fishing industry. HMSC's Visitor Center, with 150,000 visitors and 40,000 $\mathrm{K}-12$ students each year, is a key asset for OSU in public education.
The dynamic nature of HMSC's programs is reflected in our mission statement:
The Hatfield Marine Science Center is Oregon State University's campus for research, education, and outreach in marine and coastal sciences. Through its partnerships, HMSC improves scientific understanding of marine systems, coastal processes and resources, and applies this knowledge to social, economic, and environmental issues.

HMSC is integral to OSU's Marine Studies Initiative, which brings OSU's diverse marine studies programs together for interdisciplinary collaboration in research and teaching. HMSC conducts diverse research and instruction in oceanic, coastal and estuarine habitats, and serves a unique laboratory facility serving resident scientists and students, and as a base for oceanographic research. With a combined budget in excess of $\$ 40 \mathrm{M}$, HMSC also plays an important economic role on the Oregon Coast.
Research facilities on the HMSC campus serve students and staff of OSU, partnering state and federal agencies, and visiting scientists from other institutions. Main buildings provide 200,000 square feet of office, library, classroom, wet and dry laboratory space and a Visitor Center. Ship support facilities and dock areas of the College of Earth, Ocean, and Atmospheric Sciences serve the $R / V$ Oceanus, R/V Elakha, R/V Pacific Storm and other research vessels. There are also housing and kitchen facilities for up to 82 students and visiting scientists on the HMSC campus.
The university encourages all marine science research, instruction, or extension activities to take advantage of the center's unique facilities.

## INSTITUTE FOR NATURAL RESOURCES

## Lisa Gaines, Interim Director

Main Office: 541-737-9918
Website: http://inr.oregonstate.edu/
Created by the Oregon Legislature with the Oregon Sustainability Act of 2001, the Institute for Natural Resources (INR) is a cooperative enterprise bringing the scientific knowledge and expertise of the Oregon University System and other Oregon higher education institutions to bear on natural resource management.
Designated as the lead university to administer INR, Oregon State University (OSU) established INR as a research institute within OSU to help decision-makers identify and use relevant science in making policy choices. At INR's foundation is the land grant mission - building bridges between theory and practice and effectively communicating knowledge to decision-makers. As such, INR seeks to:

- provide Oregonians with ready access to current, science-based information and methods for better understanding and making informed decisions about our natural resource management challenges;
- increase the utility of integrated, science-based information in the development and understanding of natural resource and environmental policy by bridging science and decision-making efforts;
- focus on interdisciplinary natural resource and environmental problems and develop new collaborative relationships to solve them;
- identify and investigate controversial natural resource issues that challenge resource management and/or governance; and,
- identify opportunities for applied policy-related research that benefits Oregon's natural resources and environment.
INR's success depends on a clear sense of our values and principles: ensuring integrity and objectivity, building partnerships, maintaining relevance, providing service, and creating excellence.

INR's focus areas, programs, and projects address Oregon natural resource issues in the local, regional, national, and international context.

## INSTHUTE FOR WATER AND WATERSHEDS

## Todd Jarvis, Director

Kathryn Motter, Laboratory Manager 541-737-9918
Email: iww@oregonstate.edu Website: http://water.oregonstate.edu/
Oregonians are beginning to witness the difficulties caused by water quantity and quality constraints and face critical choices about fresh water. Earlier melting of the Cascades snowpack is changing "free water storage," which has implications for snowmelt out of phase with existing water resource systems and ecosystems. Sustainable water supplies for development, ecosystem maintenance, and hydroelectric power generation may be adversely affected by increased population, climate change, and renegotiation of the Columbia River Treaty. Since water is "virtually" embedded in all Oregon products, whether natural or manufactured, the state's economic vitality is tied directly to water. Water quantity and quality issues in the Willamette and Klamath Basins are two of the state's top environmental priorities.
The aforementioned challenges are on an unprecedented scale and require solutions obtained by integrating several or more disciplines. The Institute for Water and Watersheds (IWW), Oregon's feder-ally-designated water resources research institute, has over 125 affiliated faculty and pursues solutions to Oregon's water problems by assembling research teams from a broad spectrum of disciplines. The institute utilizes educational and outreach models to communicate the latest water science and policy options to stakeholders so that they can make informed intelligent decisions. The IWW's Water Collaboratory, an open analytical chemistry laboratory, provides faculty, staff, and students with a variety of analytical capabilities.

## LABORATORY ANIMAL RESOURCES CENTER

Helen E. Diggs, MEd, DVM, DACLAM Director and Campus Attending Veterinarian
101 Laboratory Animal Resources Center Corvallis, Oregon 97331
541-737-6213
Email: larc@oregonstate.edu
Website: http://oregonstate.edu/dept/larc/
The Laboratory Animal Resources Center (LARC) supports and manages the care and veterinary oversight of vertebrate animals used in instruction, research, production, and testing on the Oregon State University campus and property throughout the state.

As the leading public research university in Oregon, the campus community is held to the highest standards of responsible animal care. The LARC is managed and operated in compliance with the U.S. Public Health Service (PHS) Policy on Humane Care and Use of Laboratory Animals and the United States Department of Agriculture (USDA) Animal Welfare Act Regulations. The university is fully accredited by the Association for Assessment and Accreditation of Laboratory Animal Care (AAALAC International). All LARC policies and procedures adhere to the recommendations of the Guide for the Care and Use of Laboratory Animals (NRC 2011) and the Guide for the Care and Use of Agricultural Animals in Research and Teaching (FASS 2010).

The LARC staff is composed of veterinarians, animal technicians, and veterinary technicians all with specialty training and certifications specific to laboratory animal medicine. LARC employees are committed to providing an exemplary animal oversight program. This includes assuring humane care and use of animals through quality veterinary oversight, husbandry, social housing and environmental enrichment. The LARC staff facilitates campus research and instructional collaborations, through consultation, training, and provision of professional technical and clinical services, and by maintaining compliance with applicable federal and state regulations. The LARC upholds the university's academic mission and commitment to public service.

## LINUS PAULING INSTITUTE

## Balz Frei, Director

307 Linus Pauling Science Center 541-737-5075
Email: lpi@oregonstate.edu Website: http://lpi.oregonstate.edu/
The Linus Pauling Institute was cofounded in 1973 by Linus Pauling, the only individual to win two unshared Nobel Prizes (Chemistry, 1954; Peace, 1962). The institute moved to the campus of Oregon State University (Dr. Pauling's undergraduate alma mater) in 1996 and now operates as one of the university's research centers and institutes. The program is principally supported by gifts from individuals, private corporations, and foundations; grants from federal and private agencies; and Oregon State University.

Researchers at the Linus Pauling Institute investigate the role that vitamins and essential minerals (micronutrients) and chemicals from plants (phytochemicals) play in human aging, immune function, and chronic diseases, especially heart disease, cancer, and neurodegenerative diseases. A major emphasis is to un-
derstand the role of oxidative stress and inflammation in disease etiology, and the preventive effects of dietary constituents with antioxidant or anti-inflammatory properties.

The goal of these studies is to understand the mechanisms by which diet, micronutrients, and dietary supplements affect disease initiation and progression and can be used in the prevention or treatment of human diseases, thereby enhancing lifespan and healthspan.
LPI's research is organized into three major areas: Cardiometabolic Disease Prevention, the Healthy Aging Program, and the Cancer Prevention and Intervention Program. Specific research projects address:

- Dietary antioxidants, vascular inflammation, and heart disease
- Vitamin E in human health
- Metabolism of dietary and endogenous fats
- Vitamin C, lipid peroxidation, and oxidative stress
- Role of lipoic acid in vascular inflammation and atherosclerosis
- Aging, stress response, and mitochondrial decay
- Lou Gehrig's disease (ALS), peroxynitrite, and superoxide dismutase
- Vitamin D and immune function
- Aging and memory
- Rapamycin, protein homeostasis, and aging
- Cancer chemoprotection for the fetus and infant
- Zinc and antioxidants in cancer chemoprevention
- Dietary interventions for cancer prevention
- Role of drug-metabolizing enzymes in health and disease
- Vitamin E metabolism and mechanisms for chemoprotection and chemotherapy
The goals of these studies are to understand the mechanisms by which nutrition affects disease initiation and progression and how nutritional factors can be used in the prevention and treatment of diseases. Such an understanding will allow an increase in the human healths-pan-the period in which people enjoy a healthy and productive life, full of vitality, with minimal suffering, and free of cancer and other debilitating diseases.
LPI maintains three core laboratories that provide analytical services to intramural and extramural researchers:

## Cancer Prevention and Intervention Program Core Laboratory

The Cancer Prevention and Intervention Program (CPI) Core Laboratory provides genetic toxicology testing services. Its mission is to help investigators identify dietary compounds with chemoprotective properties and to elucidate their
inhibitory mechanism(s). Several techniques, including the Salmonella mutagenicity assay (Ames test), single-cell gel electrophoresis assay (Comet assay), and micronucleus assay, enable investigators to assess the mutagenic, DNA-damaging, and clastogenic effects of chemicals. Using known mutagens or clastogens as positive controls, we study the potential beneficial activities of dietary compounds or other chemicals against those DNA-damaging agents. We also recently implemented a Histone Deacetylase (HDAC) assay to identify dietary HDAC inhibitors, which are of interest in cancer chemoprotection.

## Oxidative/Nitrative Stress Core Laboratory

Oxidative and nitrative stress can be produced by inflammation, disease, or environmental exposure, including tobacco smoke. The resulting reactive oxygen and nitrogen species can react with lipids, proteins, and nucleic acids in the body to form molecules measurable by sensitive chemical analytical methods. These molecules can serve as "biomarkers" to reveal an individualss state of health or the effectiveness of dietary or pharmaceutical interventions. For example, F2-isoprostanes and their metabolites are considered good biomarkers of free radical-induced lipid peroxidation. The Oxidative/Nitrative Stress Core Laboratory (ONSL) has several high-performance liquid chromatographs (HPLCs) coupled to UV, fluorescence, electrochemical, and single- and triple-quadrupole mass spectrometer detectors. ONSL also has several solid-phase extraction robots for sample preparation. These facilities provide LPI investigators with state-of-the-art chemical analysis of biomarkers, antioxidants, and drug metabolites.

## Food Composition Laboratory

The Food Composition Laboratory provides chemical analyses of food composition and nutritional factors. We provide analyses of food, feed, or dietary supplement samples for vitamins, phytochemicals, and other compositional factors.
In addition to our research, we publish a free, semiannual research newsletter; maintain a website; provide peerreviewed information about nutritional factors on our online Micronutrient Information Center, http://lpi.oregonstate. edu/mic; organize and sponsor scientific meetings, including the biennial Diet and Optimum Health Conference; and respond to inquiries from the public and the media as our means of building on Dr. Pauling's legacy. The Healthy Youth Program (http://lpi.oregonstate.edu/ healthyyouth) is designed to provide education and activities on diet and exercise to school children and their teachers and families to promote optimum health.

## NOBTHWEST MATIONAL MARINE BENEWABLE ENERGY CENTER

Belinda Batten, Director
541-737-9492, belinda.batten@
oregonstate.edu
Brian Polagye, Co-Director
206-543-7544, bpolagye@u.washington. edu

Brenda Langley, Operations Manager 541-737-6138, brenda.langley@ oregonstate.edu
Dan Hellin, Assistant Director for Test Operations
541-737-5452, dan.hellin@oregonstate. edu
Website: http://nnmrec.oregonstate.edu/
The Northwest National Marine Renewable Energy Center (NNMREC) is a U.S. Department of Energy-sponsored partnership between Oregon State University (OSU), the University of Washington (UW), and the University of Alaska Fairbanks (UAF). The three universities collaborate together with national laboratories on research, education, outreach, and engagement.

NNMREC's mission is to facilitate commercialization of marine energy technology, inform regulatory and policy decisions, and close key gaps in scientific understanding with a focus on student growth and development. We work closely with a variety of stakeholders, including device developers, community members, ocean users, federal and state regulators, and government officials, to conduct research about wave energy, provide test sites for prototype devices, and assist developers with planning and permitting activities.

## NNMREC's objectives are to:

- Develop facilities to serve as an integrated, standardized test center for U.S. and international developers of wave and tidal energy;
- Evaluate potential environmental, ecosystem, and human dimension impacts, focusing on the compatibility of marine energy technologies in areas with sensitive environments and existing users;
- Facilitate and conduct research to inform adaptive management of marine energy technologies;
- Study and consult on device and array optimization for effective deployment of wave and tidal energy technologies;
- Improve forecasting of the wave energy resource; and
- Increase reliability and survivability of marine energy systems.

## OREGON NASA SPACE <br> GRANT CONSORTIUM

Jack Higginbotham, Director
B092 Kerr Administration Building Corvallis, OR 97331-2103
541-737-2414
Website: http://spacegrant.oregonstate. edu/
The National Aeronautics and Space Administration (NASA) established Oregon Space Grant in 1991 as a part of the National Space Grant College and Fellowship Program. The objectives of the program are to establish a national network of universities with interest and capabilities in aeronautics, space, and related fields; encourage cooperative programs among universities, aerospace industry, and federal, state, and local governments; encourage interdisciplinary training, research, and public service programs related to aeronautics, space science, and technology; recruit and train professionals, especially women, underrepresented minorities, and persons with disabilities, for careers in aerospace-related science and engineering; and develop a strong science mathematics, and technology education base from elementary through university levels.

Oregon NASA Space Grant maintains a diverse array of programs to support space science and engineering education. Connecting educators with professional development opportunities, Oregon Space Grant aims to help develop a strong science, mathematics, and technology education base at all levels while fostering communication and continuity between the K-12 community and higher education. Through various research award programs available to students and faculty, Oregon Space Grant supports STEM education and development within the higher education community. Undergraduate scholarships are available for students at affiliate campuses statewide. Participation in a wide array of internship programs administered by the Oregon Space Grant offers undergraduate and graduate level students opportunities to develop research skills while conducting hands-on projects at NASA centers nationwide. Additionally, graduate fellowships attract excellent students to aerospace-related research programs at affiliate institutions across Oregon.

OREGON SEA GRANT
Shelby Walker, Director
Website: http://seagrant.oregonstate.edu/
Oregon Sea Grant's mission is to be a catalyst that promotes discovery, understanding and resilience for Oregon coastal communities and ecosystems.

Funding for Sea Grant comes from federal and state appropriations, as well as contributions from local governments and industry. The major support is a grant from the National Oceanic and Atmospheric Administration.

Program activities are conducted in four thematic areas; ecological, social and economic aspects of coastal development, adaptation to acute or chronic coastal hazards, human and natural dimensions of coastal and marine fisheries, and cultural beliefs, learning and valuation of coastal and marine issues.

Oregon Sea Grant's competitive research grants program addresses coastal and marine issues of high importance and of potential benefit to society. The program prioritizes socioeconomic and biophysical research that is predictive (rather than explanatory) and meaningful collaboration with industry, agencies, communities, and other stakeholders. In addition, Sea Grant partners with state natural resource agencies, not-for-profit organizations, field labs and others to support undergraduate and graduate students as Sea Grant Scholars and to provide scholars with hands-on experience with important marine and coastal problems.
The program is driven by an ethic of public service and uses various approaches to engage our constituents. Interactions with a wide range of coastal stakeholders are continuous. An advisory council of coastal community leaders provides external review and counsel to the program. The Sea Grant outreach and engagement program offers professional, technical, and public education to the general public, to professionals seeking training, and to school-age children through hands-on programs and print, digital and electronic media. Oregon Sea Grant manages the Visitor Center of the Hatfield Marine Science Center as a public science learning facility; our Free Choice learning program uses the Visitor Center as a laboratory for studying how people learn in such settings.

Multidisciplinary and interdisciplinary in operation, the program involves faculty and students in several Oregon institutions of higher education. Recent participants in the program include the University of Oregon, Oregon Health and Science University, Portland State University, Linfield College, and Western Oregon University. In addition, Oregon Sea Grant maintains close relationships
with several research facilities on the Oregon coast, including the Hatfield Marine Science Center in Newport and the Oregon Institute of Marine Biology in Charleston.

## RADIATION CENTER

## Steve Reese, Director

Website: http://radiationcenter.oregonstate.edu/
The Radiation Center is a campus-wide instructional and research facility specially designed to accommodate programs involving the use of radiation and radioactive materials. Located in the center are major items of specialized equipment and unique teaching and research facilities, including a TRIGA Mark II nuclear research reactor (licensed to operate at 1,100 kilowatts when running at a steady power level and at 2,500 megawatts in the pulsing mode); a cobalt-60 gamma irradiator; a number of gamma radiation spectrometers and associated germanium detectors; and a variety of instruments for radiation measurements and monitoring. Facilities for radiation work include teaching and research laboratories with up-to-date instrumentation and related equipment for performing neutron activation analysis and radiotracer studies; laboratories for plant experiments involving radioactivity; an instrument calibration facility for radiation protection instrumentation; and facilities for packaging radioactive materials for shipment to national and international destinations.
The Radiation Center staff is available to provide a wide variety of services including instruction and/or consultation associated with the feasibility, design, and execution of experiments using radiation and radioactive materials, and with safety evaluations relating to experiments or devices involving the use of radioisotopes or other radiation sources. In addition, the center provides direct support and assistance to teaching and research programs involving nuclear engineering, nuclear and radiation chemistry, radiation health physics, neutron activation analysis, neutron radiography, radiation effects on biological systems, radiation dosimetry, production of shortlived radioisotopes, radiation shielding, nuclear instrumentation, emergency response, transportation of radioactive materials, instrument calibration, and radioactive waste disposal.

The center's laboratories and instruments are available to all campus instructional and research programs requiring such support. The center also accommodates instructional and nuclear research and development programs requested by other universities, by federal and state agencies, and by industrial organizations.

In addition, a special neutron activation analysis service for forensic studies is available to law enforcement agencies.

## SUPERFUND RESEARCH CENTER

Robert Tanguay, Director
Email: robert.tanguay@oregonstate.edu 541-737-6514
Website: http://superfund.oregonstate.edu/
The Superfund Research Center oversees the NIEHS-funded Superfund Research Program grant at Oregon State University. This grant supports a multidisciplinary research effort to address the re-emerging health threat of polycyclic aromatic hydrocarbons (PAHs) in the environment. PAHs are considered a re-emerging threat to environmental health due to the increased burning of fossil fuels (e.g., coal and petroleum products) for energy production. The SRP grant supports five research projects and six support cores at Oregon State University and Pacific Northwest National Laboratory in Richland, WA, in a range of efforts involving human exposure to PAHs. In addition, research partners are located at San Diego State University, the Confederated Tribes of the Umatilla Indian Reservation and Pennsylvania State University. These research projects focus on determining the effect of PAHs on a variety of adverse human health outcomes employing animal models such as zebrafish to detect developmental toxicities. An additional collaboration with Lawrence Livermore National Laboratories allows for following the fate of PAHs in humans as well as animals. Research efforts are also aimed at developing passive sampling devices to identify, measure and track PAHs in the atmosphere and foods to assess exposure of Native American populations to PAHs through wood smoke used in food preservation. Following the Deep Water Horizon oil spill, we were one of the first research groups to determine the levels of PAHs in the Gulf of Mexico at multiple sites over time. We partner with the U.S. EPA through the Partners in Technical Assistance Program to assist communities in dealing with concerns of environmental pollutants at Brownfields, Superfund sites or Conservation and Recovery Act sites. Support cores provide expertise in analytical chemistry, and in biostatistics and bioinformatics. The SRP grant also has programs aimed at translating research results to stakeholders and outreach to the public and in training the next generation of environmental health scientists.

## SIGNATURE RESEARCH CENTERS

Nanoscience. Drug discovery. Sustainable "green" technologies. These are the focus of OSU's increasing collaboration with other Oregon research universities, the private sector, and state and federal agencies.

## OREGON NANOSCIENCE AND MICROTECHNOLOCIES INSTITUTE (ONAMI)

Skip Rung, President and Executive Director
541-713-1331
Email: skip@onami.us
Website: http://onami.us/
ONAMI is Oregon's first "signature research center" for the purpose of sustaining and growing Oregon's innovation economy. As is true of only three other states, technology is Oregon's largest employer, with an average wage twice the statewide average. Growth of these kinds of job opportunities is the single most effective thing we can do for state financial health, schools, public safety and human services.

Our strategy has been 10 years in the making, and the selection of "nanoscience and microtechnologies" was based on a careful analysis intended to discover the largest possible intersection among:

- nationally competitive research in our universities,
- future commercial opportunities/ growing sectors of the national economy,
- the existing skills of Oregon industry and its surrounding value chain ecosystem.
ONAMI is now a nationally recognized model for state innovation initiatives, and is frequently featured at events and in publications by the National Science Foundation, National Governors Association, and other organizations concerned with keeping the United States competitive in the global innovation economy.

The state of Oregon so far has invested $\$ 47$ million in ONAMI, including $\$ 5.2$ million from the Oregon Innovation Council (OECDD) for fiscal year 20122013. These funds are invested in OSU research and commercialization capacity in the form of matching funds for competitive extramural proposals, facility operations, and "gap" grants to assist in the formation of successful new products and startup companies.

## ONAMI Staff and Leadership

ONAMI's leadership (executive director, research co-directors, 501 c 3 board) combines senior-level executive experience in both industry and academia.
President and Executive Direc-
tor Robert D. "Skip" Rung worked for Hewlett-Packard for 25 years, most recently as director of Advanced Research and Development for HP's Corvallis, OR, facility, which is both the headquarters for HP's world-leading inkjet technology, as well as HP's most advanced and capable facility.
Working with Mr. Rung are Vice President of Operations Cindy L. Dahl (formerly area director for CH2M Hill), High-Tech Extension Director Janet M. Teshima (formerly Semiconductor Business VP for FEI Company), and Gap Fund Manager Jay M. Lindquist (formerly Corporate Development VP for FEI Company) and Office Manager/Webmaster Danielle Z. Clair (shared with the Microproducts Breakthrough Institute).

## ONAMI Leadership Team Core

## Members:

Prof. Brian Paul, OSU/PNNL Microproducts Breakthrough Institute codirector. Dr. Paul is a professor of mechanical, industrial and manufacturing engineering at OSU, and a specialist in microfabrication technologies for MECS (Microtechnology-based Energy and Chemical Systems).

Prof. Goran Jovanovic, OSU/ PNNL Microproducts Breakthrough Institute co-director. Dr. Jovanovic is a professor of chemical, biological and environmental engineering at OSU, and a specialist in chemical processes for fuel production, medical devices (e.g., hemodialysis filters) and many other applications.

Dr. Ward TeGrotenhuis, OSU/ PNNL Microproducts Breakthrough Institute co-director. Dr. TeGrotenhuis is a senior scientist and team leader for hydrocarbon processing at the Pacific Northwest National Laboratory.

Prof. Douglas Keszler, OSU Distinguished Professor of Chemistry and Principle Investigator for the NSF Center for Sustainable Materials Chemistry (CSMC), is a pioneer in the preparation and characterization of new solid-state inorganic materials. Current efforts are directed to the development and study of laser hosts, nonlinear optical materials, phosphors, transparent conductors, wide band-gap semiconductors, and low-temperature deposition and crystallization of thin films. Professor Keszler's pioneering work is the basis for Brilliant Technologies, Deep Photonics, Inpria and Amorphyx all local start-up companies.

Prof. David Johnson, University of Oregon professor of chemistry and CSMC co-PI, is a solid-state chemist who has pioneered new method of synthesizing valuable new materials which cannot occur naturally. He is equally a pioneer in developing graduate student programs geared to the real career needs of stu-
dents (most of whom will not become academics) and shared user facilities, which maximize the public value realized from investments in sophisticated equipment.

Dr. John Carruthers, Portland State University distinguished professor of physics, has worked at Bell Laboratories, NASA, Hewlett-Packard Laboratories, and most recently Intel Corporation, where he was director of components research and development at Intel's Hillsboro, OR, facility-the world's most advanced semiconductor facility, e.g., the first to achieve 32 nm production on 300 mm substrates, now poised to take the lead on sub-20nm technology in its recently announced D1X facility.
Prof. Jim Hutchison, University of Oregon professor of chemistry and UO Associate VP for Research, is a pioneer of green chemistry and leading innovator in nanofabrication and assembly processes that maximize material yields and minimize use and release of harmful reagents. Professor Hutchison is the leader of ONAMI's Safer Nanomaterials and Nanomanufacturing Initiative (SNNI), and also a founder of Dune Sciences, LLC.

ONAMI Inc. (501c3) board of directors members are senior executives from CH2MHill, Intel Corporation, HewlettPackard Company, FEI Company, Life Technologies Corporation, PNNL/Battelle, Sharp Laboratories, and all four of Oregon's major research universities. Ron Adams, former dean of the College of Engineering at OSU, was formerly director of research and development at Tektronix' color printing operation (now Xerox), which is the world leader in solid inkjet printing, and Xerox's most successful division.

## Four Major Research and Commercialization Thrusts

 Microtechnology-based energy and chemical systems. ONAMI researchers are developing and fabricating unique bulk fluidic microsystems that accelerate, miniaturize and distribute energy, chemical and biomedical processes. Applications include:- Compact, highest-performance heat exchangers
- Novel miniaturized HVAC cycles
- Medical devices, e.g., dialysis filters
- Fuel processing, e.g., hydrogen reforming
- Fuel atomization for small engines using greener fuels
- Continuous production and direct deposition of nanomaterials
- Water sterilization

This work is based on the principle that mass and heat transfer are best accomplished in microchannels which, when fabricated (typically via micro-lamination) into massively parallel structures, enable "bulk" throughputs without
pressure drop penalties. Revolutionary results-in terms of component size, weight and energy efficiency-can be applied to military energy, medical devices and other specialty chemical products.
A dedicated facility, the Microproducts Breakthrough Institute (http://mbionline.org/), supports project activity for research and development by both institutional researchers and numerous companies. A good overview of several applications and fabrication capabilities may be found at http://mbi-online.org/ our-research.
Professors Goran Jovanovic, Brian Paul, and Kendra Sharp of Oregon State University and Dr. Ward TeGrotenhuis of the Pacific Northwest National Laboratory, jointly lead this team.
Nanoelectronics, Nanobiotechnology, and Nanometrology. ONAMI and Oregon's strong industrial and academic experience in semiconductor electronics, microscopy and microanalysis, analytical tools, and test and measurement, remains engaged on key semiconductor industry challenges (new devices, more demanding measurement challenges). They are also being leveraged to enable large opportunities and confront serious measurement challenges in the emerging field of nanomedicine (the application of engineered nanomaterials and nanoscale electronic, magnetic, and optical devices for medical diagnostics and therapeutics). The long history of equipment and instrumentation advances in the engineering and physical sciences, enabling great breakthroughs in the medical and life sciences, suggest that this is a very opportune time for the physical, engineering and medical sciences to collaborate closely on developments in nanobiotechnology. Applications are emerging in single cell analysis at the point-of-use in real time for cancer and other disease diagnosis.
N3I research projects span the following areas:

## Nanoelectronics

1. Carbon-based nanoelectronics
2. Analog memory applications of nanoscale devices
3. Nanoscale energy conversion and storage

## Nanobiotechnology

1. Imaging/sensing/diagnostics at the nanoscale
2. Drug delivery/cell membrane behavior
3. Intracellular behavior and regenerative medicine

## Nanometrology

1. Nanoscale optical near-field nanoscopy and photo-electron emission
2. Spatio-temporal-compositional imaging at the nanometer and femtosecond scales
3. Nanoscale electron crystallography
4. Nanoparticle characterization

Dr. John Carruthers, Distinguished Professor of Physics at Portland State University and former director of Components Research at Intel Corporation, heads up this research collaboration.

Safer Nanomaterials and Nanomanufacturing Initiative. The goals of ONAMI's Safer Nanomaterials and Nanomanufacturing Initiative (SNNI) are to develop new nanomaterials and nanomanufacturing approaches that offer a high level of performance, yet pose minimal harm to human health or the environment. Research under the initiative merges the principles of green chemistry and nanomaterials design and synthesis strategies to produce safer nanomaterials and more efficient nanomanufacturing (including critical purification steps) processes in the context of producing nanoparticles and nanostructured materials for applications in fields such as photovoltaics, nanoelectronics, and sensors.
In addition to greening the production of nanomaterials, SNNI seeks to understand the biological and environmental impacts of nanoparticles. As part of an international research community, it is [i] working with organizations to develop reference materials and standard practices, [ii] creating well-characterized nanomaterial libraries and [iii] developing effective methods protocols for both physico-chemical characterization and biological effects assays for many different types of engineered nanomaterials. Distinctive features of our research portfolio are the critical importance of using only well-characterized nanomaterials and acquiring rich information sets from biological impacts studies. This approach establishes a foundation of fundamental knowledge and advances predictive strategies based upon structure-activity relationships. A long-term commitment to this strategy is required because it is simply not practical to test all significant permutations of nanoparticles (composition, size, shape, surface functionalization, etc.) in bioassays to assess safety.
Professor Jim Hutchison of the University of Oregon leads this initiative that is bringing together key scientists in the life sciences, materials sciences and engineering. Visit the Safer Nanomaterials and Nanomanufacturing website at http:// greennano.org/.
Since 2005, SNNI has spearheaded the highly regarded Greener Nano series of annual conferences, with "GN11" coming in the late spring of 2011: http:// greennano.org/GN11.

Center for Sustainable Materials Chemistry. ONAMI member researchers and collaborators in both academia and industry are leading a
growing collaboration in the study and design of environmentally benign chemistry platforms for the fabrication of high-performance inorganic electronic devices. Beginning from groundbreaking work on transparent electronics and atomic-precision synthesis using both low-temperature solution chemistry and gas-phase assembly techniques, the range of applications for these greener (i.e., benign and earth-abundant elements, lower cost fabrication methods) materials platforms includes many aspects of electronics manufacturing, optics, sensors, thermoelectrics, magnetics, coatings and metrology standards.
ONAMI researchers have recently demonstrated atomically dense and atomically smooth solution processed inorganic films, functionally graded materials from modulated elemental reactants, and a growing range of composite electronic materials.

This work has direct implications for:

- Nanoscale patterning for
semiconductors and other applications
- High-performance thin film electronic elements, e.g., MIM electronics
- Printed electronics on nontraditional substrates
- Large area and lower cost display backplanes
- High-performance thermoelectric cooling
- Low cost thin-film photovoltaics Learn more about the NSF Phase I Center for Sustainable Materials Chemistry at http://sustainablematerialschemistry. org/.
Professors Douglas Keszler at Oregon State University and David Johnson at the University of Oregon lead this collaborative research initiative.

## Facilities (NWNanoNet ${ }^{\text {™ }}$ )

Twenty million dollars of Oregon's initial investment in ONAMI and several million dollars in matching funds have been applied to three user facilities, which are open to all Oregon academic users on equal terms, and to industrial collaborators at commercially competitive rates. The open/shared facility model not only supports diverse research projects with advanced and well-maintained fabrication and characterization tools, it provides an essential resource to Oregon companies, the vast majority of which cannot afford to buy such capabilities for dedicated in-house usage.
Among the many users of the ONAMIaffiliated facilities are the ONAMI gap fund portfolio companies, which, led by Home Dialysis Plus, have raised over \$70 million in leveraged investment since late 2006.
The NWNanoNet ${ }^{\mathrm{TM}}$ facilities are:

- The Microproducts

Breakthrough Institute (http:// mbi-online.org) in Corvallis enables research and product development for microchannel devices and other microfluidics-related fields. Laser micromachining, nano-imprinting/ hot embossing, microlamination, diffusion bonding, nanoparticle injection micromolding, electroplating, atomic layer deposition, and high temperature sintering under precision loads are among the staple processes.

- The Center for Advanced Materials Characterization (http://camcor.uoregon.edu/) in Eugene is the most capable university-based materials analysis and microscopy facility in the Pacific Northwest, offering user access and/ or expert operator service for SEM (with e-beam lithography), HR-TEM, dual-beam FIB, Electron Microprobe, XRD, XPS, AFM, TOF-SIMS, UPS, FTIR, NMR, Mass Spec, and basic semiconductor device fabrication. CAMCOR serves clients all over the U.S.
- The Center for Electron Microscopy and Nanofabrication (http://www.pdx. edu/cemn/) in downtown Portland has been home to one of the most advanced TEMs (200Kev) dual-beam FIBs in the Pacific Northwest. CEMN regularly serves over 40 companies in the silicon forest high-tech region centered around Portland, and also holds regular user training workshops.
- The OSU Electron Microscopy Facility (http://emfacility.science. oregonstate.edu/) at Oregon State University. The Electron Microscopy Facility(EMF) provides service to the research community of both life sciences and materials science related studies. The facility was first established in the Department of Botany and Plant Pathology in 1967, and has been in continuous operation. In addition to supporting faculty and students, the facility welcomes external academic and government institutions and industry. The facility maintains and operates the following instruments:
- FEI Quanta 3D Field Emission

Dual Beam Scanning Electron Microscope (SEM/FIB)

- FEI Quanta 600F Field Emission Environmental SEM
- FEI Nova NanoSEM 230 High Resolution SEM
- FEI Titan 80-200/ChemiSTEM Transmission Electron Microscope (TEM)
- All microscopes are equipped with X-ray Energy Dispersive

Spectrometers (EDS) to conduct chemical analysis. The OSU EMF is located in the Linus Pauling Science Center, room 145, 2900 SW Campus Way, Oregon State University, Corvallis, OR 97331.

## Corporate Partners

ONAMI is uniquely situated in the midst of the world's most advanced collection of "small tech" research and development assets: Intel, Hewlett-Packard, FEI Company, CH2M Hill, ON Semiconductor Corp., Electro Scientific Industries, Xerox, Maxim, IDT, Sharp Labs, Microchip, Life Technologies/Invitrogen, Planar Systems, Wafertech, Flir, Mentor Graphics, Synopsys, Novellus, TriQuint, Siltronic, SEH America, Solarworld, Sanyo, Solaicx, Peak Sun Silicon and many exciting startup companies.
We have many opportunities to do joint research with nearby industries only a few minutes' drive away for research faculty and graduate students, and it is quite possible that highly capable corporate partners can be found to participate in new ONAMI federal projects.

## ORFGON TRANSLATIOTAL RESEARCH AND DEVELOPMENT INSTHUTE (OTRADI)

Jennifer E. Fox, Executive Director
503-227-1814
Email: jfox@otradi.org
Website: http://www.otradi.org

## About OTRADI

OTRADI is a nonprofit research and development organization, supported in part by the state of Oregon that strives to promote bioscience industry growth and job creation in Oregon. OTRADI achieves this goal via collaboration with private and public sector entities in the bioscience community to discover, develop, and commercialize therapeutics, vaccines, diagnostics and other life sciences products important for human health. OTRADI's specialized high-throughput drug discovery robotic equipment is unique in the Northwest, offering previously out-of-reach drug screening capabilities as well as the expertise necessary to analyze results and quickly identify the best products to commercialize. OTRADI uses its equipment and expertise to rapidly screen thousands of chemical compounds developed by Oregon research laboratories and companies to identify new potential drugs, speeding progress on global health concerns, and bringing more economic development and scientific talent to Oregon.

## A Unique Opportunity for Oregon

## Researchers

OTRADI brings the lab to the market via partnerships with Oregon universities,
private bioscience companies, the life science industry, and public and private funders. Collaborating with OTRADI offers many advantages:

## Collaboration

- OTRADI partners with university researchers and small biotech companies to help produce preliminary data in new areas and helps develop strategies and helps write grants.
- When grants are funded, OTRADI continues working with the investigator as a subcontractor on the grant.
- Investigators have access to opportunities for licensing and commercialization of novel chemicals and drug targets.

## Training

- Researchers, faculty, postdocs and students
- Internships and fellowships

## Expertise

- Experience and knowledge in assay development for cell biology, pharmacology, infectious diseases, cancer, inflammatory diseases, etc.

## Specialized Equipment and

## Resources

- State-of-the-art drug discovery robotic equipment for highthroughput screening and highcontent analysis
- Novel and commercially available chemical compound libraries comprised of more than 90,000 compounds for screening

## Grant Partnering

- Actively involved in grant writing and attracting follow-on and new federal and private funding to Oregon universities and small businesses
- Supplied with the new experimental data that OTRADI produces, university researchers can provide federal granting agencies and/or pharmaceutical companies with the crucial evidence and support necessary (e.g., preliminary data) to prove that their discoveries have increased value and worth as possible drugs, drug targets or diagnostic agents. OTRADI's activities have and will continue to increase federal grant funding success, spark small-business development in Oregon, foster student involvement in applicable research, accelerate connections between Oregon university researchers and biopharmaceutical companies and lead to the creation of high-paying jobs in Oregon.

## How OTRADI Works

Every day, Oregon researchers make progress in the fields of biology, medicine, agriculture, marine biology and chemistry that may lead to promising new therapeutics or drug targets. While university researchers are experts within their own fields of science, they often lack the specialized scientific equipment and/or expertise necessary to translate their discoveries into potential new therapeutics. OTRADI brings the lab to the market by providing its partners with access to scientific expertise and equipment. It works to accelerate a product's development and commercialization through strategic partnerships and access to its wealth of resources. OTRADI forms the integral connection or "glue" that links the scientific with the commercial, energizing and simplifying the connection to move medical advances forward, and helping to translate scientific research into tomorrow's discoveries.

## The OTRADI Bioscience Incubator

 Operated by Oregon Translational Research and Development Institute (OTRADI), the OTRADI Bioscience Incubator (OBI) is the state's first and only bioscience-specific incubator. Located in Portland, Oregon, the multi-client company bioscience complex provides startups and scientists with access to entrepreneurial mentoring and state-of-the-art bioscience facilities, meeting space and shared equipment.The OBI serves emerging companies and scientists who have outgrown existing space, but who want to dedicate resources to commercializing their research rather than investing in build-out and equipment. The OBI provides scientists with access to a state-of-the-art facility while their companies reach the next phase of expansion and growth.

## How to Partner with OTRADI

Oregon university researchers and small businesses are encouraged to join OTRADI as OTRADI-Affiliated Researchers and Companies. As such, Affiliated Researchers are pre-qualified to collaborate with OTRADI and utilize our resources. Partnering with OTRADI provides researchers and Oregon companies access to unique expertise and drug-discovery equipment as well as assistance with assay development, grant writing, business development, biomentoring and incubation. To learn more about OTRADI or the OTRADI Bioscience Incubator, see our website at http://www.otradi.org or contact OTRADI's Executive Director, Jennifer E. Fox, PhD, at jfox@otradi.org or 503-227-1814.

## ORECON BEST

David Kenney, President and Executive
Director
503-928-7902
Email: david.kenney@oregonbest.org Website: http://oregonbest.org/

## Global Impact, One Startup at a Time

Oregon BEST funds and supports innovative cleantech startups across Oregon. As an economic development catalyst, Oregon BEST connects startups with state and federal resources while preparing them for follow-on investment through a series of focused programs.
We invest strategically in public-private partnerships that rapidly transform university research into new clean technologies, companies, and jobs. The research, projects, and startups we support serve as a proving ground for leadingedge clean technologies while powering a vibrant innovation ecosystem.

Oregon BEST's work not only adds value and enhances competitiveness for Oregon businesses, it also grows the state's research revenue, expands research programs, enhances workforce development, and positions Oregon to recruit new cleantech companies.
Since its establishment as an independent, nonprofit organization by the Oregon Legislature in 2007, Oregon BEST's 270+ Member Researchers have attracted more than $\$ 135$ million in research revenue to Oregon from federal, industry, and foundation sources. Building on Oregon's international reputation as a sustainability innovator, Oregon BEST offers a range of programs, expertise, and research facilities described below.

## Oregon BEST Labs

Cutting-edge research requires cuttingedge equipment and the expertise to operate it. Oregon BEST supports a network of nine shared-user research facilities at Oregon State University, Portland State University, and the University of Oregon. These multi-million dollar labs offer our industry partners access to research tools, faculty expertise, and workforce development opportunities. The labs help Oregon businesses compete while helping universities grow research and educate graduates. By providing both financial and leadership support, Oregon BEST works to ensure that our community has access to advanced research facilities.

To date, Oregon BEST Labs includes the following facilities:

- Energy Studies in Buildings Laboratory at the University of Oregon in Eugene and in Portland
- Green Building Research Laboratory at Portland State University
- Green Building Materials

Laboratory at Oregon State
University

- High Performance

Environments (HiPE)
Laboratory at the University of Oregon

- infraStructure Testing \& Applied Research (iSTAR) Laboratory at Portland State University
- Multipurpose River Hydraulics Research Facility at Oregon State University
- Oregon Process Innovation Center (OPIC) for Sustainable Solar Cell Manufacturing at Oregon State University
- OSU-Benton County Green Stormwater Infrastructure Research Facility at Oregon State University
- SuNRISE Photovoltaics Lab at the University of Oregon

## Oregon BEST Member Researchers

A statewide network of 270+ Oregon BEST Member Researchers across four universities offer expertise to help Oregon companies - ranging from startups to existing firms - compete in the cleantech economy. The research expertise of Oregon BEST Member Researchers covers clean technologies of all kinds, as well as cleantech business expertise.

## Oregon BEST Commercialization Program

This program accelerates the commercialization of technologies developed by universities and small businesses in Oregon. The program focuses on creating commercialization partnerships between industry and Oregon universities, leveraging existing collaborations between Oregon companies and Oregon BEST's Member Researchers, and moving clean technologies from Oregon universities into the marketplace.
The commercialization collaborations that are catalyzed by Oregon BEST create much-needed jobs for Oregonians in the cleantech sector, which is expected to experience significant growth for decades to come. Simultaneously, the technologies commercialized help address the challenges of climate change, our nation's dependence on fossil fuels, the environmental impacts of energy generation and building materials production, and the quality of our indoor environments.
The Commercialization Program has three main elements:

- Oregon BEST University

Research Grants are designed to move clean technologies out of Oregon universities and into startups and Oregon businesses. The grants fund technology development projects with a high potential for
commercialization. Successful funded projects have the potential to receive additional Oregon BEST funding and assistance in startup creation.

- Oregon BEST Early-Stage Investments help bridge the gap between traditional R\&D funding sources and the availability of private investment - a gap commonly known as the "valley of death." By working with Oregon BEST Member Researchers at partner universities, university tech-transfer offices, and small businesses, we identify opportunities for small investments to make a big impact. These investments assist new companies in moving products and services to market, securing follow-on financing, and gaining initial customer traction.
- Commercialization acceleration support services connect experienced Entrepreneurs-inResidence on the Oregon BEST team with researchers and startups that need assistance in making the transition from "technology readiness" to "investment readiness" and "commercial viability." Oregon BEST provides consultation and mentorship to assist in the areas of business strategy, product strategy, acquisition of private capital, strategic business development, management team formation, and federal funding opportunities (see the Oregon BEST SBIR/STTR Support Center). Oregon BEST also leverages a wide range of entrepreneurial support services available from other entities and provides a focal point for the development of cleantech products and cleantech companies.

## Investment Opportunities: Oregon BEST Companies

Oregon BEST has awarded commercialization funding to more than 40 Oregon companies. Through a competitive process, Oregon BEST selects high-potential companies with strong technologies, viable business strategies, and passionate entrepreneurs. Many of these companies are strong investment candidates for angel investors, venture capitalists, and corporate strategic investors. To make them investor-ready, Oregon BEST companies typically have had the benefit of collaboration with a university researcher, a funded project to develop or demonstrate their technology, and mentoring from one of our Entrepreneurs-in-Residence or another ecosystem affiliate. By engaging with Oregon BEST, the companies we support offer greater potential and lower risk than typical cleantech startups.

## Visionary Leadership

As an independent nonprofit established by the Oregon Legislature, Oregon BEST builds on Oregon's reputation as an
international leader in cleantech innovation. We provide leadership to map opportunities for high-impact clean technology development and establish priorities that result in jobs, greater sustainability, and economic prosperity for the region. Oregon BEST brings together representatives from industry, universities, government, and other organizations to identify targeted clean technology commercialization and industry development opportunities across many areas. We focus on areas of opportunity where existing organizations are not already addressing needs or are not positioned to lead and develop strategies. Working with a wide range of partners, Oregon BEST takes a leadership role in coordinating clean technology initiatives across Oregon. This work includes identifying strategic research focus areas that align with market opportunities and national policy priorities and that have the potential to create future economic activity in Oregon. We also reach beyond Oregon's borders, collaborating with organizations in other states to increase regional impact and benefit Oregon.
Oregon BEST's leadership includes executives from Portland General Electric, National Energy Technology Lab, and The Baker Group. These executives join research leadership from Oregon BEST's founding partner universities (see below), venture capital and corporate investors, and members of the Oregon Legislature to make up a visionary Board of Directors, a Commercialization Advisory Board, and staff - all committed to advancing Oregon's cleantech economy.
History and Founding Universities Oregon BEST was established as an independent, nonprofit organization in 2007 as part of the Oregon Innovation Council's legislative recommendations. Initial funding came from the Oregon Legislature, with additional support from the Oregon University System and the Meyer Memorial Trust. Founding partner universities include the Oregon Institute of Technology, Oregon State University, Portland State University, and the University of Oregon.

## ADDITIONAL RESEARCH UNITS AND CONSORTIA AT OSU

These additional research units are organized under OSU's colleges.

## ACRICULTURAL <br> EXPERIMENT STATION

Daniel J. Arp, Director
William G. Boggess, Executive Associate Director
W. Daniel Edge, Associate Director

Joyce Loper, Associate Director
John R. Talbott, Assistant Director
Jack Breen, Agricultural Sciences and Marine Sciences Business Center Manager
Email: AESsupport@oregonstate.edu Website: http://agsci.oregonstate.edu/ research/research
The Oregon Agricultural Experiment Station is a statewide research network of Oregon State University scientists working on the Corvallis campus and at 11 branch stations in the major crop, climate, and marketing areas of Oregon. These diverse locations ensure that the station's research program is close to the people and the needs of Oregon's agricultural and natural resources. Founded July 1,1888 , in accordance with the federal Hatch Act of 1887, the mission of the Oregon Agricultural Experiment Station is to conduct research and demonstrations in the agricultural, biological, social, and environmental sciences that contribute to the economic, environmental, and social welfare of Oregon. We are committed to:

- Helping build a sustainable economy by fostering economic growth and sustainability;
- Addressing ecological concerns by generating knowledge and information to improve and protect Oregon's natural resources; and
- Expanding fundamental knowledge by advancing fundamental science relating to the environment, agriculture, and natural resources;
- Partnering with and enabling people and their communities to address a variety of issues including urbanrural economic dependencies, community food systems, land use, food security, poverty, and others Current research emphases in the station are in five signature program areas that sustain and build on the College of Agricultural Sciences' traditional strengths and link to stakeholder needs, but also look to key future opportunities. These signature areas also address contemporary and emerging forces or drivers facing Oregon's people and landscape. Overarching contemporary drivers comprise water, energy, climate change,
health, and demographics. The signature program areas are:
- Sustainable food and agricultural systems;
- Environmental and human wellbeing;
- Plant sciences and systems biology;
- Natural resources stewardship;
- Bioproducts, biomaterials, and bioenergy for a sustainable bioeconomy.
The station conducts research in 12 academic departments (Applied Economics (formerly Agricultural and Resource Economics), Animal and Rangeland Sciences, Biological and Ecological Engineering, Botany and Plant Pathology, Chemistry, Crop and Soil Science, Environmental and Molecular Toxicology, Fisheries and Wildlife, Food Science and Technology, Horticulture, Microbiology, and Statistics), and colleges of Forestry, Public Health and Human Sciences, Science, and Veterinary Medicine. Research is supported in other units such as the Center for Genome Research and Biocomputing, Linus Pauling Institute, the Environmental Health Sciences Center, Agricultural Education and Agricultural Sciences, and Extension and Experiment Station Communications.
Branch stations provide opportunities for basic and applied field research programs at the following locations:
- Central Oregon Agricultural Research Center (Madras and Powell Butte)
- Columbia Basin Agricultural Research Center (Pendleton and Moro)
- Eastern Oregon Agricultural Research Center (Burns and Union)
- Food Innovation Center Experiment Station (Portland)
- Hermiston Agricultural Research and Extension Center (Hermiston)
- Klamath Basin Research and Extension Center (Klamath Falls)
- Malheur Experiment Station (Ontario)
- Mid-Columbia Agricultural Research and Extension Center (Hood River)
- North Willamette Research and Extension Center (Aurora)
- Southern Oregon Research and Extension Center (Medford)
- Coastal Oregon Marine Experiment Station (Newport and the Seafood Laboratory at Astoria)
The station collaborates with the OSU Extension Service, instructional programs within Oregon State University, Oregon state agencies, federal departments of Agriculture, Commerce, Energy, Interior, and Transportation, and other federal and state agencies on research programs of interest to the state, the Pacific Northwest, the nation, and other countries.

## COLLEGE OF ENCINEEBING RESEARCH AND ECONOMIC DEVELOPMENT OFFICE

Irem Y. Tumer, Associate Dean for Research and Economic Development Websites: http://red.engr.oregonstate.edu/
The Office of Research and Economic Development (RED) at the College of Engineering was established to promote and support research programs and faculty. The overall mission of the RED office is to build new bridges between faculty, external stakeholders and collaborators, help faculty find and apply for funding opportunities, boost the college's reputation for research, and grow industry funding. We specifically aim to foster high-impact research initiatives among our faculty, and develop strong relationships with our academic, industry, and government partners. This includes not only connecting faculty teams with funding opportunities and matching industry needs with Oregon State expertise, but also assembling teams that can build new programs in emerging areas that are responsive to global challenges.
Research is conducted by faculty and students from the following schools and departments:

- School of Chemical, Biological and Environmental Engineering
- School of Civil and Construction Engineering
- School of Electrical Engineering and Computer Science
- School of Mechanical, Industrial and Manufacturing Engineering
- School of Nuclear Science and Engineering
- Department of Biological and Ecological Engineering
Graduate students can complete their degrees in one of 14 graduate programs are offered through the CoE schools:
- Biological and Ecological Engineering
- Chemical Engineering
- Civil Engineering
- Computer Science
- Electrical and Computer Engineering
- Engineering Management Graduate Option
- Environmental Engineering
- Industrial Engineering
- Materials Science
- Mechanical Engineering
- Medical Physics (in partnership with OHSU)
- Nuclear Engineering
- Radiation Health Physics
- Robotics

The schools under the OSU College of Engineering collaborate with signature research centers, institutes, and facilities that bring together industry, academia, the investment community, and other key partners. These platforms of coopera-
tion serve as a catalyst for new research and revenue streams that transform ideas into solutions.

- Center for Applied Systems and Software
- Center for Design of Analog-digital Integrated Circuits
- Center for e-Design
- Center for Sustainable Materials Chemistry
- Eco-Informatics Summer Institute
- End Users Shaping Effective Software
- Energy Efficiency Center
- Kiewit Center for Infrastructure \& Transportation
- MaSC: Materials Synthesis and Characterization Facility
- Microproducts Breakthrough Institute
- Northwest Alliance for Computational Science and Engineering
- Northwest National Marine Renewable Energy Center
- O.H. Hinsdale Wave Research Laboratory
- Radiation Center
- Wallace Energy Systems \& Renewables Facility

## FEED THE FUTURE <br> INNOVATION LAB FOR <br> COLLABORATIVE RESEARCH <br> ON AQUACULTURE \& <br> FISHERIES (AQUAFISH <br> INNOVATION LAB)

Hillary S. Egna, Director
Website: http://aquafishcrsp.oregonstate. edu/
The AquaFish Innovation Lab (formerly AquaFish CRSP) is one of six Feed the Future Innovation Labs for Collaborative Research funded by the U.S. Agency for International Development (USAID) and participating U.S. and host country institutions. The mission of the AquaFish Innovation Lab is to enrich livelihoods and promote health by cultivating international multidisciplinary partnerships that advance science, research, education, and outreach in aquaculture and fisheries. Oregon State University leads this flagship program designed to reduce poverty in developing countries by improving access by the poor to fish and water resources. AquaFish research and outreach work focuses on developing comprehensive, sustainable, and economically viable aquaculture and fisheries management systems in developing countries that contribute to food safety and food security. Challenges poorer countries face include pressures from global trade, environmental degradation, climate change, water use conflicts, and the distribution of benefits. The AquaFish Innovation Lab concentrates its efforts on reducing the
number of constraints its host countries face in order to promote local economies. OSU partners with U.S. and host country universities, government, private companies, and non-governmental organizations to support research, development, and outreach activities in over 20 countries. AquaFish participating countries have included Bangladesh, Brazil, Cambodia, China, Ghana, Guyana, Honduras, Indonesia, Kenya, Mali, Mexico, Nicaragua, Nepal, Philippines, South Africa, Thailand, Tanzania, Uganda, Vietnam, and the U.S.

## FOREST RESEARCH <br> LABORATORY-INSTITUTE FOR WORKING FOREST LANDSCAPES

Thomas Maness, Director
Anthony S. Davis, Associate Director
Roger D. Admiral, Associate Director Website: http://www.forestry.oregonstate. edu/research/forest-research-laboratory
Research in the College of Forestry (CoF) is conducted under the broad umbrella of the Forest Research Laboratory (FRL), which was established by the Oregon Legislature in 1941. The FRL is partially funded by the Legislature as one of three Statewide Public Service Units (see Oregon Revised Statute 526.225). Faculty, staff, and students from the College of Forestry's Departments of Forest Engineering, Resources, and Management; Forest Ecosystems and Society; and Wood Science and Engineering contribute to a diverse portfolio of fundamental and applied research and outreach activities.

In November 2013, the college launched the Institute for Working Forest Landscapes (IWFL) to focus FRL research programs on innovative approaches for managing landscapes that will enhance people's lives and improve the health of communities, businesses and vital ecosystems. The IWFL's program is organized under four broad thematic areas: Healthy People and Communities, Resilient Ecosystems, Intensively Managed Forests, and Competitive and Innovative Products. Initial efforts focus on the following opportunities:

- Improving the Health of Rural

Communities and Citizens

- Increasing the Competitiveness of Oregon's Private Landowners and Businesses
- Enhancing Ecosystem Health with a Landscape Approach
- Increasing Public Trust in Active Management of Public and Private Lands
In addressing these themes and opportunities, faculty are providing leadership in addressing many of society's challeng-
es at scales ranging from molecules to the globe, including topics such as:
- Determining the impacts of climate change on forests and how forests can lessen the severity of change
- Protecting the sustainability of forests and the ecosystem services they provide, including water, wildlife habitat, recreation, and wood
- Facilitating development and use of renewable "green" materials and energy
- Fostering operations and manufacturing processes that are environmentally and socially acceptable, and economically feasible
- Expanding the understanding and value of forests to society, especially in urban environments
Research provides information that supports scientifically informed decisions about the management, conservation, and use of Oregon's public and private forest resources, and that enhances the competitiveness of Oregon's forest-resource-based industries and businesses. Communication of results to science peers, land managers, policy makers, and the public is a high priority.
Activities benefit from collaboration with many other departments and colleges at Oregon State and elsewhere. The FRL, the Corvallis Forestry Sciences Laboratory of the U.S. Forest Service, the Corvallis-based Forest and Rangelands Ecosystem Science Center of the U.S. Geological Service, and related research conducted elsewhere on campus combine to form one of the largest concentrations of forest sciences research capacity in North America.

## INTEGRATED PLANT PBOTECTION CENTER

## Paul Jepson, Director

Website: http://www.ipmnet.org/
The Integrated Plant Protection Center (IPPC) was established in 1991, to expand upon the range of activities of the International Plant Protection Center, that was chartered by Oregon State University in 1969 (see http://www.ipmnet. org/). The IPPC is partially supported by the Agricultural Experiment Station, and the Cooperative Extension Service. The IPPC focuses upon research, education and outreach activities associated with the adoption of sustainable integrated pest management (IPM) practices in agriculture. It is the home for a number United States Department of Agriculture (USDA)-funded programs associated with pest control and pesticide management, including the state IPM program, the Regional Pest Management Center program, the Pesticide and Environmental Stewardship program, and the Farm Safety program.

The IPPC provides leadership, coordination and support for scientists at OSU, in the Pacific Northwest region, and internationally, in the field of IPM. Its activities encompass pest, disease and weed management, and the rational management and use of pesticides. It also provides news and facilitates communications between university, state, and federal agencies through a number of media, including an electronic news alert system, and a newsletter (see http:// oregonipm.ippc.orst.edu/).

IPPC activities include the provision of electronic tools that assist growers and their advisors in making pest management decisions within their crops. This includes online weather data and degree-day models, which forecast the developmental stages and epidemiology of a number of important crops pests and diseases (see http://pnwpest.org/wea/). In addition, the IPPC works collaboratively with scientists throughout the state, to manage online pest alerts to growers. These can be accessed via the IPPC home page (see http://www.ipmnet.org/).

The IPPC maintains a large and important collection of documents, monographs and books on IPM, much of which is searchable via the OSU Valley library online database. It also supports a unique service in international outreach, IPMnet, which includes, among a number of other resources, IPMnet NEWS, a monthly electronic newsletter that is distributed to scientists in 127 countries (see http://www.ipmnet.org/). IPMnet NEWS is supported by the Consortium for International Crop Protection (CICP) and a grant from the USDA.

The IPPC is expanding its activities in four areas at present, (1) biological con-trol/biologically-based pest management, (2) enhanced diagnostic and forecasting tools, (3) pesticide management, rational use, risk mitigation and (4) information delivery, decision support and outreach. For further details please contact the director.

## INTER-UNVERSTY CONSORTIUM FOR <br> POLITICAL AND SOCIAL BESEARCH (ICPSR)

Valery King, Official Representative (OSU Libraries)
Website: http://www.icpsr.umich.edu/ icpsrweb/
Through funding provided by OSU Libraries, Oregon State University is a member of ICPSR, the Inter-University Consortium for Political and Social Research. A unit within the Institute for Social Research at the University of Michigan, ICPSR was established in 1962 and maintains and provides access to
a vast archive of social science data for research and instruction. OSU students, faculty and staff may access these data at no charge and may also deposit their own data into the collection.

ICPSR offers members reduced fees to attend the Summer Training Program in Quantitative Methods of Social Research, a comprehensive curriculum of intensive courses in research design, statistics, data analysis, and social methodology. Additionally ICPSR leads several initiatives that encourage use of data in teaching, particularly for undergraduate instruction, and offers user support to assist researchers in identifying relevant data for analysis and in conducting their research projects.

## KIEWIT CENTER FOR INFRASTRUCTURE AND TRANSPORTATION

## Jason Weiss, Director

Email: kiewit.center@oregonstate.edu Website: http://cce.oregonstate.edu/ research/

## Background

The Kiewit Center for Infrastructure and Transportation was initially established in 1962 as the Transportation Research Institute. The Kiewit Center serves as the umbrella organization for all research within the School of Civil and Construction Engineering. The center is a key component in the College of Engineering's drive to become a top 25 engineering program, coordinating multi- and interdisciplinary research projects.

For the last 150 years, civil engineers have built the infrastructure upon which American prosperity rests. Roads, bridges, airfields, dams, schools, and safe drinking water form the foundation for our quality of life. Today that foundation is crumbling. Americans experience this deterioration every day. A recent report by the American Society of Civil Engineers confirms what most Americans already know-the ASCE report gave the U.S. infrastructure an overall grade of D+.

The center is an interdisciplinary unit that provides research, education and public service related to the built environment and the systems that operate in that environment.

## Facilities

## Geotechnical Testing Laboratory

- Testing in support of both practiceoriented investigations and state-of-the-art research
- Advanced geo-mechanical modeling of soil-structure interaction
- Full scale, well-instrumented testing of field geo-systems
Highway Materials Laboratory
- Investigation of innovative highway construction materials
- Service life modeling and long term durability assessment
- Evaluation of recycled materials for use in construction
O.H. Hinsdale Wave Research Laboratory
- Impact of tsunamis and storm waves on coastal infrastructure
- Nearshore processes related to coastal erosion
- Tsunami and coastal hazard mitigation
Large Scale Structural Strong-Floor Facility
- Structural evaluation of full-size beams and columns
- Development of earthquake-resistant structural systems
National Center for Accessible
Transportation
- Investigation of advanced technologies for accessible transportation systems

## MARINE MAMMAL

INSTITUTE
Bruce Mate, Director
Website: http://mmi.oregonstate.edu/
The OSU Marine Mammal Institute is a multi-disciplinary faculty incorporating the work of academics from engineering, genetics, fisheries and wildlife (agriculture), aquatics, ecology, veterinary medicine, biology, and communications.

## Whale Telemetry Group (WTG)

Using satellite-monitored radio tags to determine the distribution and critical habitats of endangered whales.

## Cetacean Conservation and

 Genomics Laboratory (CCGL)Exploring the genomes of whales and dolphins to understand the past, assess the present, and conserve the future.
Pinniped Ecology Applied Research Laboratory (PEARL)
Ecology, behavioral physiology, and conservation biology of pinnipeds.
Geospatial Ecology of Marine Megafauna (GEMM) Laboratory Spatial and behavioral studies of marine megafauna to generate an improved understanding of species ecology and distribution patterns.

## Bio-Telemetry and Behavioral

 Ecology LaboratoryUsing telemetry and bio-logging tools to study the behavioral ecology of marine mammals.
Oregon Marine Mammal Stranding Network (OMMSN)
Documenting occurrences and investigating the causes of marine mammal strandings in Oregon.

## MICROPRODUCTS <br> BREAKTHROUGH INSTITUTE

Goran Jovanovic, OSU Co-Director
541-713-1348 (office-MBI)
Email: goran.jovanovic@oregonstate.edu Website: http://mbi-online.org/
The MBI is a 45,000 square foot facility located on the Hewlett-Packard Corvallis campus containing offices, laboratories, fabrication facilities and laydown space for the research, development and commercialization of arrayed microfluidic systems and related nanomanufacturing technology. This facility is focused on accelerating the discovery, development and commercial deployment of new nano- and micro-scale phenomena and their technology embodiments.

The MBI is collaboration between the Pacific Northwest National Laboratory (PNNL) and Oregon State University (OSU). The MBI is one of three shareduser facilities within the Oregon Nanoscience and Microtechnologies Institute (ONAMI, http://onami.us/).

PNNL and OSU are leaders in the science, engineering, and technology development of nano- and micro-scale processes and systems. Collaboratively they conduct research and development projects ranging from fundamental science and technology investigations to assistance with commercial development and production. Areas of current research and development include photovoltaic manufacturing, hydrogen storage, nanomaterials synthesis, biofuel processing, miniature heat pumps and artificial kidneys among others.

Both PNNL and OSU are well established in arrayed microfluidic systems development. PNNL's thrust is Micro Chemical and Thermal Systems (MICROCATS) while OSU concentrates on Micro Energy and Chemical Systems (MECS). Together, OSU and PNNL seek to model, through the MBI, the way in which technology can be developed and commercialized through the collaboration of federal laboratories and universities.

The MBI is performing research and development in arrayed microfluidics and nanomanufacturing for:

- U.S. Department of Energy (DOE)
- National Institute of Health (NIH)
- Defense Advanced Research Projects Agency (DARPA)
- U.S. Army
- National Aeronautics and Space Administration (NASA)
- National Science Foundation (NSF)
- Private companies and corporations

## O.H. HINSDALE WAVE BESEARCH LABORATORY

## Pedro Lomonaco, Director

541-737-2875
Email: pedro.lomonaco@oregonstate.edu Website: http://wave.oregonstate.edu/
The O.H. Hinsdale Wave Research Laboratory provides outstanding research and testing at the largest nearshore experimental facility at an academic institution in the US. The 6,100 $\mathrm{ft}^{2}\left(570 \mathrm{~m}^{2}\right)$ building is situated on the main campus and houses the Large Wave Flume (LWF), Directional Wave Basin (DWB), and $3,000 \mathrm{ft}^{2}\left(300 \mathrm{~m}^{2}\right)$ of office space for staff, graduate students, visiting researchers, and clients.
The laboratory conducts research on coastal and nearshore processes involving:

- Wave-structure interaction
- Nearshore hydrodynamics and sediment transport
- Marine renewable energy
- Tsunami and coastal hazards
- Fixed and floating structures

Through our work we deliver research, testing, and education and outreach opportunities to improve the resilience and sustainability of coastal areas, and to develop innovative solutions to the design of coastal infrastructure.
From January 2016, the HWRL is partially supported by the Natural Hazards Engineering Research Infrastructure (NHERI) program of the National Science Foundation.

## ORECON CLMMATE CHANCE RESEARCH INSTHUTE (OCCRI)

Philip W. Mote, Director
Kathie Dello, Associate Director Websites: http://occri.weebly.com/
The Oregon State Legislature established the Oregon Climate Change Research Institute (OCCRI) within the Department of Higher Education in 2007. OCCRI is a network of over 150 researchers at Oregon State University (OSU), the University of Oregon, Portland State University, Southern Oregon University, and affiliated federal and state labs. OCCRI is administered by OSU and has a staff of about 15 .

## OCCRI is tasked with:

- facilitating research by faculty at Oregon's public universities on climate change and its effects on natural and human systems in Oregon
- serving as a clearinghouse for climate change information
- providing climate change information to the public in
integrated and accessible formats
- supporting the Oregon Global Warming Commission in developing strategies to prepare for and to mitigate the effects of climate change on natural and human systems, and
- providing technical assistance to local governments to assist them in developing climate change policies, practices, and programs.
At least every two years, the institute will also develop an assessment of climate change science as it relates to Oregon and the likely effects of climate change on the state. OCCRI helps Oregonians, government agencies, and the private sector understand the potential impacts of climate variability and change on the state. The institute also helps individuals, agencies, and companies develop new strategies to prepare for climate change.

In September of 2010, OCCRI was named as the anchor institution for two federally funded regional climate science centers. The Department of the Interior's (DOI) Pacific Northwest Climate Science Center (CSC) is one of eight CSC's. The CSC serves as a resource for DOI agencies and other partners in providing necessary science in advising policy decisions. The National Oceanic and Atmospheric Administration's (NOAA) Pacific Northwest Climate Impacts Research Consortium (CIRC) is one of 11 Regional Integrated Sciences and Assessments (RISA) projects. The CIRC is engaging a broad number of stakeholders, including municipalities, utilities, emergency management organizations, irrigators, agricultural and Sea Grant extension, and state and federal agencies. In support of these stakeholders, CIRC is working on developing regional downscaled climate scenarios using integrated climate, hydrological, and vegetation models; PNW region and basin scale climate impacts assessments; social science and network analysis; coastal climate hazard, risk and vulnerability assessments; decision scenario visualization and planning tools; climate extension; public health risk management guidance; and community level adaptation approaches.

Other major 5-year OCCRI projects include Regional Approaches to Climate Change for PNW Agriculture (https:// www.reacchpna.org/), Forest Mortality and Climate (http://terraweb.forestry. oregonstate.edu/FMEC.htm), and Willamette Water 2100 (http://water.oregonstate.edu/ww2100/).

## OBECON WOOD <br> INNOVATION CENTER

## Scott Leavengood, Director

541-737-4212
Chris Knowles, Assistant Director
541-737-1438
119 Richardson Hall
Corvallis, OR 97331-5751
Email: owic@oregonstate.edu
Website: http://owic.oregonstate.edu/
The Oregon Wood Innovation Center (OWIC) is a joint initiative of Oregon State University's College of Forestry and Extension Service. OWIC's mission is to improve the competitiveness of Oregon's wood products industry by fostering innovation in products, processes, and business systems. A key function of the center is to serve as the primary link between university research and needs and opportunities in the forest industry.

## Why an Innovation Center?

The forest products industry has undergone dramatic changes in recent years. The industry responded to reductions in raw material supply and the forces of globalization by consolidating, retooling production systems, and by focusing on improving efficiencies in manufacturing processes. However, it is clear that focusing solely on process innovation will be insufficient to maintain future competitive advantage. Firms must also focus on product and business systems innovation. OWIC helps foster such innovation by serving as a 'clearinghouse' to connect manufacturers to the research community, to other organizations that provide assistance to businesses, and to facilitate networking within the industry.

## Facilities and Services

OWIC is housed within OSU's Department of Wood Science and Engineering, a department with established capabilities in research, outreach, and technology transfer in a broad array of disciplines. Disciplines and accompanying laboratories and services include:

## - Anatomy and Quality of

## Renewable Materials-

laboratories for wood fiber characterization and wood identification; equipment including microscopes and an X-ray densitometer.

- Biodeterioration, Protection and Durability of Renewable Materials-pressure cylinder for impregnating materials with preservatives; equipment for assessing insect and decay resistance.
- Biomass and Biofuelsequipment for analyzing the physical characteristics and energy value (e.g., particle size distribution, ash content and composition, and calorimetric heating values) of biomass feed
stocks; a $1 / 2$-meter diameter dryer for biomass.
- Chemistry-adhesives development, testing, and troubleshooting; research and testing of plant materials for value-added chemical products.
- Nanotechnology-research in nanocomposites for advanced textiles, barrier films, membranes, coatings and sensors
- Composite Materialsdevelopment and testing of wood and wood/non-wood composites; equipment including presses (hot and cold), glue spreader, refiner, digester, blender, former, and woodplastic extruder.
- Wood Drying-a 100 BF kiln for measuring volatile organic compound (VOC) emissions and $2,000 \mathrm{BF}$ dry kiln for research in lumber drying.
- Timber Engineering and Structural Design-equipment for assessing strength properties of wood-based materials; scale varies from small specimens up to large members such as beams and full-scale wall systems.
- Green Building Materials Laboratory-a 5,000 sq. ft. shared resource laboratory of Oregon Built Environment and Sustainable Technologies Center (Oregon BEST). Equipment for characterizing, developing and testing high performance sustainable materials for a wide variety of applications including buildings and transportation infrastructure. A multi-chamber modular environment conditioning (MCMEC) system was added in 2014. The MCMEC is designed for durability testing of full-scale building assemblies. One test configuration allows exterior and interior conditions (temperature range - 30 degrees to 40 degrees C, humidity range $10 \%$ to $95 \%$ ) to be imposed simultaneously, including sunlight simulation and water spray.
- Forest Products Business and Marketing-research and outreach on innovation in the forest industry and assessment of market potential for new products.
- Environmental Impacts of Renewable Materials-research on the environmental impacts of renewable materials from 'cradle to grave' (life cycle inventory and analysis).
- Other facilities include environmental conditioning chambers (hot-dry, hot-wet, cold room, standards room), accelerated weathering chambers (Q-Lab QUV and an automatic boil test device for

ASTM D3434 test of exterior wet use adhesives), as well as state-of-the-art classrooms for onsite or distance education programs.

## SUN GBANT WESTEBN BEGIONAL CENTER

John R. Talbott, Director
541-737-2194
Email: john.talbott@oregonstate.edu
Email: sungrant@oregonstate.edu
Website: http://sungrant.oregonstate.edu/

## The mission of the Sun Grant

Initiative is to:

1. Enhance national energy security through development, distribution and implementation of biobased energy technologies;
2. Promote diversification in and the environmental sustainability of, agricultural production in the United States through biobased energy and products technologies;
3. Promote economic diversification in rural areas of the United States through biobased energy and product technologies; and
4. Enhance the efficiency of bioenergy and biomass research and development programs through improved coordination and collaboration among the Department of Agriculture, the Department of Energy, and the land grant colleges and universities.
A network of five land grant universities serve as regional Sun Grant Centers. These universities include Oregon State University (Western Region), South Dakota State University (North-Central), Oklahoma State University (South-Central), the University of Tennessee-Knoxville (Southeastern), and Pennsylvania State University (Northeastern). The centers facilitate federally funded research, extension, and education programs in their respective regions.

The Sun Grant Western Regional Center, located at Oregon State University in Corvallis, is the administrative unit for the region composed of the states of Alaska, Arizona, California, Hawaii, Idaho, Nevada, Oregon, Utah, and Washington, and the Pacific Territories and associated Pacific island nations, including American Samoa, Commonwealth of the Northern Marianas Islands, Guam, Federated States of Micronesia, the Republic of Palau, and the Republic of the Marshall Islands.

The current program area priorities for the Western region include biomass production, conversion and processing technologies, the development and enhancement of bio-based products, and evaluation of the bioproduct supply chain and life cycle analyses.

Important aims for the center include distributed energy production, diversity of feedstocks and processing approaches, crop suitability assessment, co-product and local human capital development, and system approaches.

## SURVEY RESEARCH CENTER

Virginia Lesser, Director
Website: http://stat.oregonstate.edu/src/ survey-research-center
Established in 1973, the Oregon State University Survey Research Center (OSUSRC) provides comprehensive survey services including proposal development, questionnaire design and layout, survey administration and data collection, survey analysis and professional report writing. Our staff offers customized options, working with our clients to determine the best approach to collect survey data based on the study objectives, population of interest, and budgetary concerns. Our past and current clients include federal, state, and local agencies, national nonprofit organizations, and OSU-affiliated entities. The OSU-SRC maintains several contracts with clients to provide our services on a recurrent basis, from monthly, annually, to ever few years.

Operating as a center for research in survey methodology, the OSU-SRC routinely conducts experiments using self-administered surveys with an aim to contribute to survey methodology research. The OSU-SRC subsequently publishes related material in scientific journals and presents experimental findings at professional meetings. The OSUSRC provides expertise using survey best practices to maximize response rates and reduce non-response bias. Various sampling plans are examined for each survey to minimize total survey error. The OSU-SRC also offers consulting for OSU community members on research-based survey design and analysis.

## UNIVERSTY CORPORATION FOR ATMOSPHERIC <br> RESEARCH (UCAR)

Jeffrey R. Barnes, OSU Member
Representatives
Website: https://www2.ucar.edu/
Through its membership in this national research consortium, Oregon State University has access to extensive facilities and services in support of its research in atmospheric, oceanic, and related sciences. Chief among these is the National Center for Atmospheric Research (NCAR) in Boulder, Colorado. Under the support of the National Science Foundation, this national laboratory conducts significant programs of atmospheric, oceanographic, and solar research in cooperation with member universities, and operates a state-of-the-art super computer facility, which is accessible to member institutions. UCAR also operates facilities for scientific ballooning, and through NCAR, maintains instrumented research aircraft and an extensive research and data library.

In addition to using these facilities, OSU faculty and graduate students participate in numerous seminars, workshops, and scientific meetings and conferences that are held at NCAR throughout the year. Through the corporation, Oregon State also cooperates in various national and international initiatives for research, service, and training in the atmospheric and related sciences.

EMERITUS FACULTY
Emeritus status is given to eligible tenured Oregon State University faculty members upon their retirement, in recognition for their years of effective service. As leaders in their fields, many emeritus faculty members continue to serve the university throughout their retirement. The year listed after each name is the year the faculty member began service at Oregon State.

Abrassart, Arthur E 1966 Emeritus Associate Professor College of Business.
Acock, Alan C 1990 Emeritus Professor Sch of Soc/Bhav Hlth Sci.
Adair, John 1953 Emeritus Senior Instructor I Animal \& Rnglnd Sciences
Adams, Darius M 1995 Emeritus Professor Forest Eng/Resourcs/Mgmt.
Adams, David G 1972 Emeritus Professor Horticulture Extension.
Adams, Frank W 1953 Emeritus Assistant Professor Enviro/Molecular Toxic.
Adams, Paul W 1980 Emeritus Professor Forest Eng/Resourcs/Mgmt.
Adams, Richard M 1983 Emeritus Professor Applied Economics.
Adams, Ronald L 1998 Dean Emeritus College of Engineering.
Adams, Ronald L 1998 Emeritus Professor Sch of Mech/Ind/Mfg Engr.
Adams, Wesley 1978 Emeritus Professor Forest Ecosyst \& Society.
Ahearn, Kerry D 1976 Emeritus Associate Professor Sch of Wrtg Lit \& Film.
Aldrich-Markham, Susan 1983 Emeritus Professor Crop and Soil Science.
Ali Niazee, Mohammed T 1972 Emeritus Professor Horticulture.
Allen Jr, John S 1973 Emeritus Professor Earth, Ocean \& Atmo Sci.
Allen Jr, Thomas C 1962 Emeritus Professor Ag Botany/Plant Path.
Amano, Matthew M 1967 Emeritus Professor College of Business.
Amort, Donald L 1958 Emeritus Associate Professor Sch Elect Engr/Comp Sci.
Andersen, Wilbert L 1969 Emeritus Professor Extension Service Prgram.
Anderson, Norman H 1962 Emeritus Professor Integrative Biology.
Anderson, Sonia R 1968 Emeritus Professor Biochem/Biophysics.
Anselone, Philip M 1964 Emeritus Professor Mathematics.
Appleby, Arnold P 1959 Emeritus Professor Crop and Soil Science.
Armstrong, Donald J 1974 Emeritus Professor Ag Botany/Plant Path.
Arnold, Roy G 1987 Provost Emeritus Provost/ Exec Vice Pres.
Arnold, Roy G 1987 Emeritus Professor Food Science and Techno.
Arscott, George H 1953 Emeritus Professor Animal \& Rnglnd Sciences.
Arthur, Jeffrey L 1977 Emeritus Professor Statistics (Science).
Arthur Jr, John R 1983 Emeritus Professor Sch Elect Engr/Comp Sci.

Atkinson, William A 1987 Emeritus Professor Forest Eng/Resourcs/Mgmt.
Ayres, James W 1970 Emeritus Professor Pharmacy.

## B

Baham, John E 1979 Emeritus Associate Professor Crop and Soil Science.
Bailes, Jack C 1972 Emeritus Professor College of Business.
Baisted, Derek J 1963 Emeritus Professor Biochem/Biophysics.
Ball, Daniel A 1991 Emeritus Professor Crop and Soil Science.
Barofsky, Douglas F 1984 Emeritus Professor Chemistry.
Barte, Georgene V 1961 Emeritus Associate Professor Sch of Bio/Pop Hlth Sci.
Bayne, Christopher J 1970 Emeritus Professor Integrative Biology.
Beatty, Joseph J 1974 Emeritus Senior Instructor I Integrative Biology.
Becker, Boris W 1970 Emeritus Professor College of Business.
Becker, Gerald L 1968 Emeritus Associate Professor College of Education.
Becker, Robert R 1962 Emeritus Professor Biochem/Biophysics.
Bell, Christopher A 1981 Emeritus Professor Sch of Civil/Constr Engr.
Bell, J R 1962 Emeritus Professor Sch of Civil/ Constr Engr.
Bell, John F 1959 Emeritus Professor Forest Eng/Resourcs/Mgmt.
Bella, David A 1967 Emeritus Professor Sch of Civil/Constr Engr.
Bengtson, George W 1979 Emeritus Professor College of Forestry Adm.
Bennett, Andrew F 1987 Emeritus Professor Earth, Ocean \& Atmo Sci.
Bennett Jr, Cleon V 1959 Emeritus Professor Speech Communication.
Beran, Kurt 1975 Emeritus Assistant Professor College of Business.
Bergeron, D J 1974 Emeritus Associate Professor Fisheries and Wildlife.
Berry, Ralph E 1968 Emeritus Professor Ag Botany/Plant Path.
Beschta, Robert L 1974 Emeritus Professor Forest Ecosyst \& Society.
Besse Jr, Ralph S 1963 Emeritus Professor College of Ag Admin.
Binney, Stephen E 1973 Emeritus Professor Nuclear Engineering.
Birkes, David 1972 Emeritus Associate Professor Statistics (Science).
Bishop, Norman I 1963 Emeritus Professor Ag Botany/Plant Path.
Black, Harold M 1949 Emeritus Professor Extension Service Prgram.
Bliss, John C 1998 Emeritus Professor Forest Ecosyst \& Society.
Block, John H 1966 Emeritus Professor Pharmacy.
Bloome, Peter D 1997 Emeritus Professor Biol \& Ecol Engineering.
Bluhm, Wilbur L 1957 Emeritus Professor Extension Service Prgram.
Blythe, Linda L 1978 Emeritus Professor Vet Biomedical Science.
Bodyfelt, Floyd W 1964 Emeritus Professor Food Sci/Tech Extension.

Boedtker, Olaf A 1961 Emeritus Associate Professor Physics.
Boehlert, George W 2002 Emeritus Professor Fisheries and Wildlife.
Boersma, Larry L 1960 Emeritus Professor Crop and Soil Science.
Bond, Barbara J 1992 Emeritus Professor Forest Ecosyst \& Society.
Bonham, Earl E 1955 Emeritus Associate Professor Extension Service Prgram.
Boots, Donald S 1977 Emeritus Professor Student Health Services.
Borello, Daniel J 2014 Courtesy Appointment Assistant Professor Sch of Civil/Constr Engr.
Borgir, Tharald 1967 Emeritus Professor Music.
Borman, Michael M 1992 Emeritus Professor Animal \& Rnglnd Sciences.
Bottomley, Peter J 1979 Emeritus Professor Microbiology (Science).
Boucot, Arthur J 1969 Emeritus Professor Integrative Biology.
Bowker, Judith K 1991 Emeritus Associate Professor Speech Communication.
Boyle, James R 1981 Emeritus Professor Forest Eng/Resourcs/Mgmt.
Braker, Marjorie J 1979 Emeritus Associate Professor EXT Fam/CommHlth OnCmps.
Branch, Harrison 1972 Emeritus Professor Art.
Brandt, Jeanette 1973 Emeritus Associate Professor College of Business.
Brandt, Patricia E 1962 Emeritus Professor Information Services.
Brandt, William H 1956 Emeritus Associate Professor Ag Botany/Plant Path.
Bray, Tammy M 2002 Dean Emeritus Public Hlth/HumanSci Adm.
Breen, Patrick J 1974 Emeritus Professor Horticulture.
Brennan, William J 1966 Emeritus Associate Professor Dean of Students.
Brewer, Donald H 1957 Emeritus Professor Crop and Soil Science.
Brewster, Bill D 1975 Emeritus Senior Instructor I Crop and Soil Science.
Britton, Gwyneth E 1965 Emeritus Professor College of Education.
Broderick, William P 1986 Emeritus Associate Professor College of Education.
Brodie, J Douglas 1975 Emeritus Professor Forest Eng/Resourcs/Mgmt.
Brookhyser, Evelyn 1966 Emeritus Professor EXT Fam/CommHlth OnCmps.
Brooks, Raymond M 1997 Emeritus Professor College of Business.
Brooks, Royal H 1967 Emeritus Professor Biol \& Ecol Engineering.
Brown, Carol E 1978 Emeritus Associate Professor College of Business.
Brown, Clinton A 1970 Emeritus Professor Art.
Brown, Daniel J 1974 Emeritus Associate Professor College of Business.
Brown, Dorothy F 1955 Emeritus Professor Extension Service Prgram.
Brown, Joy B 1962 Emeritus Professor Extension Service Prgram.
Brown, Kenneth N 1963 Emeritus Professor Extension Service Prgram.
Brown, Lyle R 1970 Emeritus Professor Microbiology (Science).
Brown, Terence D 1975 Emeritus Professor Wood Science/Engr.
Brown III, George W 1966 Emeritus Professor Forest Eng/Resourcs/Mgmt.

Brown III, George W 1966 Dean Emeritus Professor College of Forestry Adm.
Browne, William G 1970 Emeritus Professor College of Business.
Brownell, Philip 1979 Emeritus Professor Integrative Biology.
Brumley, Richard L 1993 Emeritus Associate Professor Library.
Brunner, Charles C 1984 Emeritus Associate Professor Wood Science/Engr.
Bryan, M E 1972 Emeritus Associate Professor Univ Housing and Dining.
Bryant, Nancy O 1974 Emeritus Professor College of Business.
Buccola, Steven T 1980 Emeritus Professor Applied Economics.
Buckhouse, John C 1975 Emeritus Professor Animal \& Rnglnd Sciences.
Bucy, David A 1956 Emeritus Professor Facilities O\&M Admin.

Dutson, Thayne R 1987 Emeritus Professor Food Science and Techno.
Dutson, Thayne R 1987 Dean Emeritus College of Ag Admin.
Duvall, Betty 1995 Emeritus Professor College of Education.

## E

Easterday, Harry T 1955 Emeritus Professor Physics.
Easton, Edison E 1951 Emeritus Professor College of Business.

Eddleman, Lee E 1981 Emeritus Professor Animal \& Rnglnd Sciences.
Ede, Lisa S 1980 Emeritus Professor Sch of Wrtg Lit \& Film.
Edwards, Barbara E 1997 Emeritus Associate Professor Mathematics.
Eiseman, David 1968 Emeritus Professor Music.
Elwood, Norman E 1979 Emeritus Associate Professor Forest Eng/Resourcs/Mgmt.
Emmingham, William H 1980 Emeritus Professor Forest Ecosyst \& Society.
Engel, Evelyn A 1975 Emeritus Professor Ext/ Exp S Communications.
Engel Jr, Harold N 1979 Emeritus Professor Veterinary Medicine.
English, Marshall J 1978 Emeritus Professor Biol \& Ecol Engineering.
Erickson, Dianne K 1987 Emeritus Associate Professor College of Education.
Erickson, Linda P 1979 Emeritus Professor Ext Clackamas Co Office.
Esbensen, Steven K 1977 Emeritus Professor Earth, Ocean \& Atmo Sci.
Evans, Glenn T 1977 Emeritus Professor Chemistry.
Evans, Gwil 1966 Emeritus Professor Ag Communications.
Evans, Thomas P 1968 Emeritus Professor College of Education.

## F

Fairchild, Clifford 1962 Emeritus Professor Physics.
Falk, John H 2003 Emeritus Professor College of Education.
Farber, Paul L 1970 Emeritus Professor History.
Farber, Vreneli R 1979 Emeritus Professor World Languag \& Cultures.
Farkas, Daniel F 1990 Emeritus Professor Food Science and Techno.
Farness, Donald H 1964 Emeritus Associate Professor Economics.
Faudskar, John D 1972 Emeritus Assistant Professor Fisheries and Wildlife.
Faulkenberry, G D 1991 Emeritus Professor Statistics (Science).
Fein, Burton I 1970 Emeritus Professor Mathematics.
Fendall, Roger K 1968 Emeritus Professor Crop and Soil Science.
Fielder, William R 1971 Emeritus Professor College of Education.
Fink, Gregory B 1964 Emeritus Professor Pharmacy.
Firth, James L 1973 Emeritus Associate Professor College of Education.
Fischer, C M 1947 Emeritus Professor Animal \& Rnglnd Sci Extn.
Fisher, Glenn C 1976 Emeritus Professor Crop and Soil Science.
Fisk, Martin R 1983 Emeritus Professor Earth, Ocean \& Atmo Sci.
Flaherty, Francis J 1967 Emeritus Professor Mathematics.
Fletcher, Richard A 1979 Emeritus Professor Forest Eng/Resourcs/Mgmt.
Fletcher, Roger L 1967 Emeritus Professor Extension Service Admin.
Folts, James A 1971 Emeritus Professor Art.
Fontana, Peter R 1967 Emeritus Professor Physics.

Foster, James C 1985 Emeritus Professor Political Science.
Frakes, Rodney V 1960 Emeritus Professor VP for Research.
France, Thomas T 1969 Emeritus Assistant Professor Library.
Francis, Sally K 1982 Dean Emeritus Professor Graduate School Admin.
Francis, Sally K 1982 Emeritus Professor Sch of Soc/Bhav Hlth Sci.
Frank, Robert J 1970 Emeritus Professor Liberal Arts Admin.
Fraundorf, Martha N 1975 Emeritus Associate Professor Economics.
Freeman, Peter K 1968 Emeritus Professor Chemistry.
Frei, Balz B 1997 Emeritus Professor Biochem/ Biophysics.
Frenkel, Robert E 1965 Emeritus Professor Earth, Ocean \& Atmo Sci.
Friedemann, Dale H 1966 Emeritus Professor Extension Service Prgram.
Frischknecht, W D 1956 Emeritus Professor Extension Service Prgram.
Frishkoff, Patricia A 1978 Emeritus Professor College of Business.
Fritzell, Erik K 1994 Emeritus Professor Fisheries and Wildlife.
Froman, David P 1984 Emeritus Animal \& Rnglnd Sciences.
Fuchigami, Leslie H 1970 Emeritus Professor Horticulture.

## G

Gamble, Wilbert 1962 Emeritus Professor Biochem/Biophysics.
Gamroth, Michael J 1974 Emeritus Professor Animal \& Rnglnd Sci Extn.
Garcia, Kay S 1988 Emeritus Professor World Languag \& Cultures.
Gardner Jr, John A 1973 Emeritus Professor Physics.
Garity, Dennis J 1981 Emeritus Professor Mathematics.
Garland, John J 1973 Emeritus Professor Forest Eng/Resourcs/Mgmt.
Gates, Dillard H 1980 Emeritus Professor Animal \& Rnglnd Sciences.
Gates, W L 1998 Emeritus Professor Earth, Ocean \& Atmo Sci.
Gelberg, Howard B 2001 Emeritus Professor Vet Biomedical Science.
Geller, Bruce L 1987 Emeritus Professor Microbiology (Science).
Gentle, Thomas H 1976 Emeritus Professor Ext/Exp S Communications.
George, Melvin R 1984 Emeritus Professor Information Services.
George, Richard A 1969 Emeritus Associate Professor Speech Communication.
Georgiou, Constance 1987 Emeritus Associate Professor Sch of Bio/Pop Hlth Sci.
Gibbs, Wallace E 1958 Emeritus Professor Office of the Registrar.
Gillis, John S 1976 Emeritus Professor Sch of Psychological Sci.
Gingrich, Gale A 1973 Emeritus Professor Crop and Soil Science.
Glass, William R 1956 Emeritus Professor College of Business.
Gleicher, Gerald J 1966 Emeritus Professor Chemistry.

Gobeli, David H 1982 Emeritus Professor College of Business.
Goering, Lois A 1988 Emeritus Assistant Professor EXT Fam/CommHlth OnCmps.
Gonor, Jefferson J 1964 Emeritus Professor Earth, Ocean \& Atmo Sci.
Gonzales-Berry, Erlinda V 1997 Emeritus Professor Ethnic Studies.
Good, James W 1980 Emeritus Professor Earth, Ocean \& Atmo Sci.
Gordon, Louis I 1966 Emeritus Associate Professor Earth, Ocean \& Atmo Sci.
Gravatt, Margaret 1973 Emeritus Professor Student Health Services.
Gray, Clifford F 1961 Emeritus Professor College of Business-Adm.
Greer, Arthur 1981 Emeritus Associate Professor Applied Economics.
Gregerson, Donna M 1974 Emeritus Professor EXT Fam/CommHlth OnCmps.
Gregory, Stanley V 1981 Emeritus Professor Fisheries and Wildlife.
Griggs, Lawrence F 1972 Emeritus Associate Professor Educ Opportunities Prgm.
Grigsby, Tom E 1973 Emeritus Associate Professor College of Education.
Grosskopf, Shawna P 1998 Emeritus Professor Economics.
Grunder, Anita L 1986 Emeritus Professor Earth, Ocean \& Atmo Sci.
Guenther, Ronald B 1967 Emeritus Professor Mathematics.
Gutbrod, Oscar A 1966 Emeritus Assistant Professor Crop and Soil Science.
H
Hackleman, Debra B 1978 Emeritus Associate Professor Library.
Hagelstein, Fred 1958 Emeritus Professor Extension Service Prgram.
Hall, James D 1963 Emeritus Professor Fisheries and Wildlife.
Hall, Roberta L 1975 Emeritus Professor Anthropology.
Halse, Richard R 1990 Emeritus Senior Instructor I Ag Botany/Plant Path.
Hamilton, Margaret E 1957 Emeritus Professor Extension Service Prgram.
Hamilton, Robert R 1968 Emeritus Professor Extension Service Prgram.
Hamm, Philip B 1975 Emeritus Professor Ag Botany/Plant Path.
Hancock, Astrid F 1963 Emeritus Assistant Professor Sch of Bio/Pop Hlth Sci.
Hanna, Susan S 1977 Emeritus Professor Applied Economics.
Hansen, Everett M 1972 Emeritus Professor Ag Botany/Plant Path.
Hansen, Herbert E 1974 Emeritus Associate Professor College of Ag Admin.
Hansen, N J 1998 Emeritus Professor College of Ag Extension.
Hardesty, David P 1970 Emeritus Professor Art.
Harding, Anna K 1987 Emeritus Professor Sch of Bio/Pop Hlth Sci.
Harmon, Mark E 1981 Emeritus Professor Forest Ecosyst \& Society.
Harper, James A 1942 Emeritus Professor Animal \& Rnglnd Sciences.
Harris, Irwin C 1947 Emeritus Professor Memorial Union.

Harrison, William L 1974 Emeritus Professor College of Business-Adm.
Hart, Dianne W 1981 Emeritus Senior Instructor I World Languag \& Cultures.
Hart, John M 1984 Emeritus Professor Crop and Soil Science.
Hart, Ralph D 1969 Emeritus Professor Crop/ Soil Sci Extension.
Harward, Moyle E 1956 Emeritus Professor Crop and Soil Science.
Hashimoto, Andrew G 1986 Emeritus Professor Biol \& Ecol Engineering.
Hathaway, Ronald L 1972 Emeritus Animal \& Rnglnd Sci Extn.
Haun, James F 1964 Emeritus Professor Office of the Registrar.
Haverson, Wayne W 1978 Emeritus Professor College of Education.
Hawkes, Stephen J 1968 Emeritus Professor Chemistry.
Hay, James W 1977 Emeritus Senior Instructor I Horticulture.
Hayes, Wilson C 1998 Emeritus Professor Sch of Bio/Pop Hlth Sci.
Headrick, Charlotte J 1982 Emeritus Professor Speech Communication.
Heath, Kathleen F 1967 Emeritus Associate Professor Sch of Bio/Pop Hlth Sci.
Hedberg, Kenneth W 1955 Emeritus Professor Chemistry.
Heidel, Jerry R 1988 Emeritus Professor Vet Biomedical Science.
Heikkila, Paul A 1969 Emeritus Associate Professor Fisheries and Wildlife.
Hellickson, Martin L 1975 Emeritus Associate Professor Biol \& Ecol Engineering.
Helmick, Sandra A 1991 Emeritus Professor Sch of Soc/Bhav Hlth Sci.
Hemphill, Delbert D 1976 Emeritus Professor Horticulture.
Hendricks, Jerry D 1975 Emeritus Professor Enviro/Molecular Toxic.
Hendricks, Jon A 1988 Emeritus Professor Sociology.
Hendricks, Jon A 1988 Emeritus Professor Univ Honors College.
Hermann, Richard K 1961 Emeritus Professor Forest Eng/Resourcs/Mgmt.
Herzog, James H 1967 Emeritus Associate Professor Sch Elect Engr/Comp Sci.
Hetherington, William M 1987 Emeritus Associate Professor Physics.
Hibbs, David E 1983 Emeritus Professor Forest Ecosyst \& Society.
Hicks, Russell G 1975 Emeritus Professor College of Engineering.
Higgins, Karen 1986 Emeritus Associate Professor College of Education.
Hildebrandt, Emery V 1954 Emeritus Professor Speech Communication.
Hilderbrand, Kenneth S 1969 Emeritus Associate Professor Food Science and Techno. Hisaw, Frederick L 1958 Emeritus Associate Professor Integrative Biology.
Hixon, Mark A 1984 Emeritus Professor Integrative Biology.
Hobbs, Beverly B 1989 Emeritus Professor EXT 4-H YouthDev OnCmps.
Hobbs, Stephen D 1978 Emeritus Professor Forest Eng/Resourcs/Mgmt.
Holdren, Rich 1987 Vice Provost Emeritus Professor VP for Research.

Holman, Robert A 1979 Emeritus Professor Earth, Ocean \& Atmo Sci.
Holmes, Zoe A 1974 Emeritus Professor Sch of Bio/Pop Hlth Sci.
Holtan, Donald W 1975 Emeritus Associate Professor Animal \& Rnglnd Sciences.
Holyoak, Arlene 1981 Emeritus Associate Professor Sch of Soc/Bhav Hlth Sci.
Horne, Frederick H 1986 Emeritus Professor Chemistry.
Horowitz, Irwin A 1994 Emeritus Professor Sch of Psychological Sci.
Horton, Howard F 1957 Emeritus Professor Fisheries and Wildlife.
Hosoi, Yasuharu T 1969 Emeritus Associate Professor Philosophy.
Houck, Lynne D 1997 Emeritus Professor Integrative Biology.
Houglum, Lyla E 1985 Emeritus Professor Liberal Arts Admin.
Hovland, Clarence W 1949 Emeritus Professor Liberal Arts Admin.
Howell, Michael E 1973 Emeritus Professor Animal \& Rnglnd Sciences.
Huber, Wayne C 1991 Emeritus Professor Sch of Civil/Constr Engr.
Huddleston, J H 1975 Emeritus Professor Crop and Soil Science.
Hudspeth, Robert T 1974 Emeritus Professor Sch of Civil/Constr Engr.
Hutton, Norman E 1977 Emeritus Professor Veterinary Medicine.
Huyer, Adriana 1972 Emeritus Professor Earth, Ocean \& Atmo Sci.

Ingle Jr, James D 1971 Emeritus Professor Chemistry.
Ingram, Patricia C 1970 Emeritus Assistant Professor Sch of Bio/Pop Hlth Sci.
Irvin, Richard F 1967 Emeritus Associate Professor Sch of Bio/Pop Hlth Sci.
Isley, Arleigh G 1969 Emeritus Associate Professor Extension Service Prgram.

## J

Jacks, Clinton C 1970 Emeritus Professor Animal \& Rnglnd Sciences.
Jackson, Philip L 1978 Emeritus Professor Earth, Ocean \& Atmo Sci.
Jackson, Royal G 1970 Emeritus Associate Professor Forest Ecosyst \& Society.
Jacobson, Robert W 1967 Emeritus Professor Extension Service Prgram.
Jarvis, Robert L 1971 Emeritus Professor Fisheries and Wildlife.
Jeffers, Ronald H 1974 Emeritus Associate Professor Music.
Jeffrey Jr, Hugh F 1950 Emeritus Professor Business Affairs.
Jensen, Edward C 1976 Emeritus Professor Forest Ecosyst \& Society.
Johnson, Arthur G 1966 Emeritus Professor Radiation Center.
Johnson, Arthur G 1966 Emeritus Professor Nuclear Engineering.
Johnson, Douglas E 1982 Emeritus Professor Animal \& Rnglnd Sciences.
Johnson, Duane P 1959 Emeritus Professor College of Education.

Johnson, K Norman 1985 Emeritus Professor Forest Ecosyst \& Society.
Johnson, Sharon D 2000 Emeritus Associate Professor Sch of Soc/Bhav Hlth Sci.
Johnson, Simon S 1971 Emeritus Associate Professor Sch of Wrtg Lit \& Film.
Johnson Jr, W C 1968 Emeritus Professor Biochem/Biophysics.
Johnston, Alberta B 1963 Emeritus Professor Extension Service Admin.
Johnston, LaRea D 1960 Emeritus Senior Instructor I Ag Botany/Plant Path.
Johnston, Richard S 1966 Emeritus Professor Applied Economics.
Jolliff, Gary D 1976 Emeritus Professor Crop and Soil Science.
Jones, Robert W 1962 Emeritus Assistant Professor Sch of Wrtg Lit \& Film.
Jordan, Cheryl L 1976 Emeritus Assistant Professor College of Business.

## K

Kanury, Anjaneya M 1985 Emeritus Professor Sch of Mech/Ind/Mfg Engr.
Karchesy, Joseph J 1979 Emeritus Associate Professor Wood Science/Engr.
Karow, Russell S 1983 Emeritus Professor Crop and Soil Science.
Keller, George H 1975 Emeritus Professor Earth, Ocean \& Atmo Sci.
Keller, George H 1975 Emeritus VP for Research.
Kellogg, Loren D 1978 Emeritus Professor Forest Eng/Resourcs/Mgmt.
Kelsey, Mary W 1958 Emeritus Associate Professor Sch of Bio/Pop Hlth Sci.
Kemp, Patrick S 1974 Emeritus Professor College of Business.
Kennedy, Timothy C 1976 Emeritus Professor Sch of Mech/Ind/Mfg Engr.
Kenneke, Larry J 1970 Emeritus Professor College of Education.
Kerkvliet, Joe R 1988 Emeritus Professor Economics.
Kerkvliet, Nancy I 1977 Emeritus Professor Enviro/Molecular Toxic.
Ketchum, Lynn G 1988 Emeritus Professor Ext/ Exp S Communications.
Kiekel, Robert D 1966 Emeritus Associate Professor World Languag \& Cultures.
Kiemnec, Gary L 1986 Emeritus Associate Professor Crop and Soil Science.
Kiigemagi, Ulo 1954 Emeritus Senior Instructor I Enviro/Molecular Toxic.
Kimerling, A J 1976 Emeritus Professor Earth, Ocean \& Atmo Sci.
Kimura, Shoichi 1989 Emeritus Professor Sch of Chem/Bio/Envr Eng.
Kinch, Michael P 1969 Emeritus Professor Information Services.
King, Charles E 1977 Emeritus Professor Integrative Biology.
King, David A 2009 Emeritus Professor College of Ag Admin.
King, David B 1963 Emeritus Professor History.
King, Jonathan B 1980 Emeritus Associate Professor College of Business.
King, Keith I 1969 Emeritus Senior Instructor I Integrative Biology.
King, Lynda J 1986 Emeritus Professor World Languag \& Cultures.

King, Nancy J 2000 Emeritus Professor College of Business.
Kingsley, Kenneth 1974 Emeritus Professor Ext/Exp S Communications.
Kirk, Dale E 1954 Emeritus Professor Biol \& Ecol Engineering.
Klein, Andrew C 1985 Emeritus Professor Nuclear Engineering.
Kleinsorge, Ilene K 1987 Dean Emeritus Associate Professor College of Business.
Klemke, Lloyd W 1970 Emeritus Professor Sociology.
Kling, Gerald F 1974 Emeritus Associate Professor Crop and Soil Science.
Klingeman, Peter C 1966 Emeritus Professor Sch of Civil/Constr Engr.
Klinkhammer, Gary P 1990 Emeritus Professor Earth, Ocean \& Atmo Sci.
Knothe, Carol A 1972 Emeritus Associate Professor Ext Malheur Co Office.
Knutson, Devon D 1994 Emeritus Associate Professor Animal \& Rnglnd Sciences.
Kocher, Carl A 1973 Emeritus Professor Physics.
Koepsell, Paul A 1969 Emeritus Professor Ag Botany/Plant Path.
Koester, Ardis W 1974 Emeritus Professor EXT Fam/CommHlth OnCmps.
Kogan, Marcos 1991 Emeritus Professor Horticulture.
Kolbe, Edward R 1974 Emeritus Professor Biol \& Ecol Engineering.
Kolding, Mathias F 1967 Emeritus Senior Instructor I Hermiston Exp Sta.
Komar, Paul D 1970 Emeritus Professor Earth, Ocean \& Atmo Sci.
Koong, Ling-Jung 1987 Emeritus Professor Animal \& Rnglnd Sciences.
Kozlik, Charles J 1961 Emeritus Associate Professor Wood Science/Engr.
Kradjan, Wayne A 1998 Dean Emeritus Professor College of Pharmacy-Adm.
Kradjan, Wayne A 1998 Emeritus Professor Pharmacy.
Krahmer, Robert L 1961 Emeritus Professor Wood Science/Engr.
Krane, Kenneth S 1974 Emeritus Professor Physics.
Krantz, Gerald W 1955 Emeritus Professor Integrative Biology.
Krueger, James H 1961 Emeritus Professor Chemistry.
Krueger, Judith C 1966 Emeritus Senior Instructor I Music.
Krueger, William C 1971 Emeritus Professor Animal \& Rnglnd Sciences.
Kulm, Laverne D 1964 Emeritus Professor Earth, Ocean \& Atmo Sci.

## L

Landau, Rubin H 1974 Emeritus Professor Physics.
Landforce, Andrew S 1998 Emeritus Associate Professor College of Ag Extension.
Langford, Charles C 1970 Emeritus Associate Professor Sociology.
Larsen, Knud S 1969 Emeritus Professor Sch of Psychological Sci.
Larson, Erik W 1980 Emeritus Professor College of Business.
Larson, Milton B 1969 Emeritus Professor Sch of Mech/Ind/Mfg Engr.

Larwood, Lillian L 1988 Emeritus Professor EXT 4-H YouthDev OnCmps.
Laursen, Harold I 1963 Emeritus Professor Sch of Civil/Constr Engr.
Lavender, Denis P 1961 Emeritus Professor Forest Ecosyst \& Society.
Laver, Murray L 1969 Emeritus Associate Professor Wood Science/Engr.
Law, Duncan K 1944 Emeritus Professor COMES - Newport Exp Sta.
Lawrence, Robert D 1970 Emeritus Associate Professor Earth, Ocean \& Atmo Sci.
Lawrence, Robert E 1974 Emeritus Associate Professor Information Services.
Lawson, David C 1969 Emeritus Associate Professor Sch of Bio/Pop Hlth Sci.
Lawton, Stephen J 1976 Emeritus Associate Professor College of Business.
Layton, Robert D 1972 Emeritus Professor Sch of Civil/Constr Engr.
Le Sueur, Billie 1965 Emeritus Professor Extension Service Prgram.
Lee, John W 1969 Emeritus Professor Mathematics.
Leeson, Theodore A 1984 Emeritus Senior Instructor I Sch of Wrtg Lit \& Film.
Leffel, John A 1962 Emeritus Professor Extension Service Prgram.
Leklem, James E 1975 Emeritus Professor Sch of Bio/Pop Hlth Sci.
Leman, Nancy F 1971 Emeritus Instructor Sch of Wrtg Lit \& Film.
Leno, Janice R 1988 Emeritus Associate Professor EXT Fam/CommHlth OnCmps.
Leong, Joann C 1975 Emeritus Professor Microbiology (Science).
Levenspiel, Octave 1969 Emeritus Professor Sch of Chem/Bio/Envr Eng.
Levi, Shaul 1977 Emeritus Professor Earth, Ocean \& Atmo Sci.
Levine, Shepard 1954 Emeritus Professor Art.
Lewis, Margaret J 1971 Emeritus Assistant
Professor EXT Fam/CommHlth OnCmps.
Libbey, Leonard M 1961 Emeritus Professor Food Science and Techno.
Lillie, Robert J 1984 Emeritus Professor Earth, Ocean \& Atmo Sci.
Liss, William J 1977 Emeritus Professor Fisheries and Wildlife.
List, Peter C 1967 Emeritus Professor Philosophy.
Locke, Kerry A 1985 Emeritus Professor Crop and Soil Science.
Loeb, Barbara E 1985 Emeritus Associate Professor Art.
Lombard, Porter B 1963 Emeritus Professor Horticulture.
Lomonte, Rosemarie 1959 Emeritus Associate Professor Information Services.
Lovell, Ronald P 1972 Emeritus Professor Sch of Wrtg Lit \& Film.
Lowrie, Miriam E 1971 Emeritus Professor Ext Polk County Office.
Lunch, William M 1984 Emeritus Professor Political Science.
Lund, Steve 1975 Emeritus Professor Columbia Basin Exp Sta.
Lundin, Fredrick M 1985 Emeritus Assistant Professor Extension Service Prgram.
Lundy, James R 1990 Emeritus Associate Professor College of Engineering.
Lunner, Marilyn J 1968 Emeritus Associate Professor Extension Service Prgram.

Lyford, John H 1966 Emeritus Associate Professor College of Science Admin.

## M

Macnab, Sandy (Alexander) 1979 Emeritus Professor Crop and Soil Science.
Maddox, Russell W 1998 Emeritus Professor Political Science.
Maddy, Deborah J 1997 Emeritus Professor General Agriculture.
Mahrt, Larry J 1972 Emeritus Professor Earth, Ocean \& Atmo Sci.
Maksud, Michael G 1980 Dean Emeritus Professor Sch of Bio/Pop Hlth Sci.
Males, James R 1998 Emeritus Professor Animal \& Rnglnd Sciences.
Mallory-Smith, Carol A 1994 Emeritus Professor Crop and Soil Science.
Malouf, Robert E 1991 Emeritus Professor Fisheries and Wildlife.
Malueg, Sara E 1966 Emeritus Professor World Languag \& Cultures.
Malueg, Sara E 1966 Emeritus Liberal Arts Admin.
Manlove, Anne K 1982 Emeritus Associate Professor Sch of Bio/Pop Hlth Sci.
Manore, Melinda M 1998 Emeritus Professor Sch of Bio/Pop Hlth Sci.
Mansour, N S (Bill) 1970 Emeritus Professor Horticulture Extension.
Maresh, Thomas J 1967 Dean Emeritus Graduate School Admin.
Maresh, Thomas J 1967 Emeritus Professor Earth, Ocean \& Atmo Sci.
Markle, Douglas F 1985 Emeritus Professor Fisheries and Wildlife.
Martin, Lloyd W 1967 Emeritus Professor North Willamette Exp Sta.
Marvell, Elliot N 1948 Emeritus Professor Chemistry.
Mason, Barbara J 2000 Emeritus Associate Professor Speech Communication.
Massie, John W 1956 Emeritus Professor Extension Service Prgram.
Mast, M JoAnn 1990 Emeritus Professor College of Education.
Mathany, Allan R 1975 Emeritus Associate Professor Budget/Fiscal Planning.
Mathews, Christopher K 1978 Emeritus Professor Biochem/Biophysics.
Matsumoto, Masakazu 1975 Emeritus Professor Veterinary Medicine.
Matzke, Gordon E 1977 Emeritus Professor Earth, Ocean \& Atmo Sci.
Maughan, Laurel S 1972 Emeritus Associate Professor Library.
Mc Caughan, William T 2000 Emeritus Extended Campus.
Mc Clellan, Thomas J 1945 Emeritus Professor Sch of Civil/Constr Engr.
Mc Clintock, Thomas C 1959 Emeritus Professor History.
Mc Clintock, Thomas C 1959 Emeritus Liberal Arts Admin.
Mc Comb, Brenda C 1987 Emeritus Professor Forest Ecosyst \& Society.
Mc Comb, Brenda C 1987 Dean Emeritus Professor Graduate School Admin.
Mc Creight, Keith R 1971 Emeritus Assistant Professor Financial Aid/Scholarshp.
Mc Cubbin, Jeffrey A 1988 Emeritus Professor Sch of Bio/Pop Hlth Sci.

Mc Daniel, Mina R 1983 Emeritus Professor Food Science and Techno.
Mc Farland, Floyd B 1963 Emeritus Associate Professor Economics.
Mc Farlane, Dale D 1965 Emeritus Professor College of Business.
Mc Grath, Edward G 1965 Emeritus Professor Political Science.
Mc Innis, Mike L 1985 Emeritus Professor Animal \& Rnglnd Sciences.
Mc Intire, Charles D 1961 Emeritus Professor Ag Botany/Plant Path.
Mc Lain, Thomas E 1993 Emeritus Professor Wood Science/Engr.
Mc Mahan, Linda R 2000 Emeritus Associate Professor Horticulture.
Mc Mullen, B Starr 1980 Emeritus Professor Economics.
Mc Murray, David A 1994 Emeritus Associate Professor Anthropology.
Mc Neilan, Ray A 1964 Emeritus Professor Horticulture Extension.
Mc Reynolds, Robert B 1982 Emeritus
Associate Professor Horticulture Extension.
McGrath, Daniel M 1983 Emeritus Professor Horticulture.
Mead, Clifford S 1986 Emeritus Professor Library.
Megale, Donald M 1958 Emeritus Associate Professor Sch of Bio/Pop Hlth Sci.
Meints, Russel H 1988 Emeritus Professor Ag Botany/Plant Path.
Mellbye, Mark E 1986 Emeritus Professor Crop and Soil Science.
Menino Jr, Alfred R 1984 Emeritus Professor Animal \& Rnglnd Sciences.
Messersmith, Ann M 1978 Emeritus Professor Public Hlth/HumanSci Adm.
Meyer, Howard H 1983 Emeritus Professor Animal \& Rnglnd Sciences.
Michael, Carol L 1989 Emeritus Associate Professor EXT Fam/CommHlth OnCmps.
Michael, Robert E 1968 Emeritus Associate Professor Sch of Bio/Pop Hlth Sci.
Miles, Stanley D 1966 Emeritus Associate Professor Applied Economics.
Miller, Charles B 1970 Emeritus Professor Earth, Ocean \& Atmo Sci.
Miller, Donald J 1960 Emeritus Associate Professor Wood Science/Engr.
Miller, Jeffrey C 1979 Emeritus Professor Horticulture.
Miller, Richard F 1977 Emeritus Professor Animal \& Rnglnd Sciences.
Miller, Robert N 1987 Emeritus Professor Earth, Ocean \& Atmo Sci.
Miller, Ronald L 1987 Emeritus Professor College of Business.
Miller, Terry L 1970 Emeritus Professor Enviro/ Molecular Toxic.
Mills, Dallice I 1976 Emeritus Professor Ag Botany/Plant Path.
Mills, Randall R 1984 Emeritus Associate Professor Animal \& Rnglnd Sci Extn.
Milota, Michael R 1988 Emeritus Professor Wood Science/Engr.
Mingle Jr, John G 1960 Emeritus Professor Sch of Mech/Ind/Mfg Engr.
Minnick, Miriam S 1957 Emeritus Professor Information Services.
Minoura, Toshimi 1982 Emeritus Associate Professor Sch Elect Engr/Comp Sci.

Mitchell, Gregg F 1979 Emeritus Associate Professor Extension Service Prgram.
Mitchell, Velma R 1966 Emeritus Professor Extension Service Prgram.
Mitchell Jr, Richard G 1979 Emeritus Professor Sociology.
Mix, Michael C 1970 Emeritus Professor Integrative Biology.
Mobley, Ronald T 1968 Emeritus Professor Horticulture.
Mohler, Ronald 1972 Emeritus Assistant Professor Sch Elect Engr/Comp Sci.
Mok, David W 1975 Emeritus Professor Horticulture.
Mok, Machteld C 1975 Emeritus Professor Horticulture.
Moore, Frank L 1975 Emeritus Professor Integrative Biology.
Moore, James A 1979 Emeritus Professor Biol \& Ecol Engineering.
Moore, Mark P 1990 Emeritus Professor Speech Communication.
Moore, Sylvia L 1966 Emeritus Associate Professor Sch of Bio/Pop Hlth Sci.
Moran, Patricia 1989 Emeritus Associate Professor Sch of Soc/Bhav Hlth Sci.
Morita, Richard Y 1962 Emeritus Professor Microbiology (Science).
Morris, John E 1968 Emeritus Professor Integrative Biology.
Morris Jr, Robert J 1965 Emeritus Associate Professor Earth, Ocean \& Atmo Sci.
Morrison, Betty J 1973 Emeritus Associate Professor Extension Service Prgram.
Morrissey, Michael T 1990 Emeritus Professor Food Science and Techno.
Morrow, Alice M 1980 Emeritus Professor EXT Fam/CommHlth OnCmps.
Mosher, Wayne D 1948 Emeritus Professor Extension Service Admin.
Mosley, Alvin R 1977 Emeritus Associate Professor Crop and Soil Science.
Moule, Jean G 1997 Emeritus Associate Professor College of Education.
Muckleston, Keith W 1965 Emeritus Professor Earth, Ocean \& Atmo Sci.
Muir, Patricia S 1987 Emeritus Ag Botany/Plant Path.
Mukatis, W Alfred 1980 Emeritus Associate Professor College of Business.
Mumaw, Catherine R 1987 Emeritus Associate Professor Sch of Soc/Bhav Hlth Sci.
Murphy, Glen E 2001 Emeritus Professor Forest Eng/Resourcs/Mgmt.
Murphy, Lea F 1980 Emeritus Associate Professor Mathematics.
Murphy, Thomas A 1965 Emeritus Associate Professor Sch of Psychological Sci.
Murtaugh, Paul A 1992 Emeritus Professor Statistics (Science).
Musser, Gary L 1972 Emeritus Professor Mathematics.

## $N$

Nakaue, Harry S 1971 Emeritus Professor Animal \& Rnglnd Sciences.
Nelson, David M 1977 Emeritus Professor Earth, Ocean \& Atmo Sci.
Nelson, Peter O 1975 Emeritus Associate Professor Sch of Civil/Constr Engr.
Neumann, Catherine M 1994 Emeritus Associate Professor Sch of Bio/Pop Hlth Sci.

Newberger, Stuart M 1969 Emeritus Associate Professor Mathematics.
Newburgh, R W 1958 Emeritus Professor Biochem/Biophysics.
Newton, Michael 1960 Emeritus Professor Forest Eng/Resourcs/Mgmt.
Neyhart Jr, Charles A 1972 Emeritus Professor College of Business.
Nibler, Joseph W 1967 Emeritus Professor Chemistry.
Nice, Karl J 1969 Emeritus Assistant Professor College of Education.
Nielsen, James F 1974 Emeritus Professor College of Business.
Niem, Alan R 1970 Emeritus Professor Earth, Ocean \& Atmo Sci.
Niess, Margaret L 1978 Emeritus Professor College of Education.
Nolan, Mary L 1973 Emeritus Professor Earth, Ocean \& Atmo Sci.
Norris, Logan A 1962 Emeritus Professor Forest Ecosyst \& Society.
Northcraft, Martin E 1955 Emeritus Associate Professor Sch of Civil/Constr Engr.
Nye, Mary J 1994 Emeritus Professor History.
Nye, Robert A 1994 Emeritus Professor History.

## -

Oester, Paul T 1979 Emeritus Professor Forest Ecosyst \& Society.
Ohvall, Richard A 1976 Emeritus Professor College of Pharmacy-Adm.
Oldfield, James E 1951 Emeritus Professor Animal \& Rnglnd Sciences.
Olsen, Eldon D 1979 Emeritus Associate Professor Forest Eng/Resourcs/Mgmt.
Olson, Geraldine I 1975 Emeritus Professor Sch of Soc/Bhav Hlth Sci.
Olson, Robert E 1968 Emeritus Professor Fisheries and Wildlife.
Oriard, Michael V 1976 Emeritus Professor Sch of Wrtg Lit \& Film.
Orzech, Miriam W 1968 Emeritus Professor The SMILE Program.
Osborne, Judith L 1991 Emeritus Associate Professor College of Education.
Osborne, Owen D 1990 Emeritus Professor Extension Service Admin.
Osis, Vicki J 1968 Emeritus Professor Fisheries and Wildlife.

## P

Pahl, Janet M 1976 Emeritus Assistant Professor EXT Fam/CommHlth OnCmps.
Pancake, Cherri M 1992 Emeritus Professor Sch Elect Engr/Comp Sci.
Parker, Donald F 1991 Emeritus Professor College of Business.
Parks, Harold R 1977 Emeritus Professor Mathematics.
Parnell, Dale 1992 Emeritus Professor College of Education.
Passon, David E 1960 Emeritus Professor Crop/ Soil Sci Extension.
Patterson, Kenneth D 1959 Emeritus Professor Economics.
Patton, Nephi M 1972 Emeritus Professor Lab Animal Resources.
Paulsen, Lenore M 1969 Emeritus Assistant Professor Extension Service Prgram.

Paulson, Clayton A 1971 Emeritus Professor Earth, Ocean \& Atmo Sci.
Pearcy, William G 1960 Emeritus Professor Earth, Ocean \& Atmo Sci.
Pearson, Erwin G 1982 Emeritus Professor Veterinary Medicine.
Pearson, George D 1971 Emeritus Professor Biochem/Biophysics.
Pease, James R 1972 Emeritus Professor Earth, Ocean \& Atmo Sci.
Peckham, Charles W 1965 Emeritus Assistant Professor Printing and Mailing Svc.
Penhallegon, Ross H 1983 Emeritus Associate Professor Horticulture.
Penn, John R 1972 Emeritus Professor Vice Prov/Student Aff.
Perry, David A 1977 Emeritus Professor Forest Ecosyst \& Society.
Perry, Gregory M 1986 Emeritus Professor Applied Economics.
Peters, Amy 1992 Emeritus Professor Animal \& Rnglnd Sciences.
Peters, Jean H 1958 Emeritus Associate Professor Public Hlth/HumanSci Adm.
Peters, Kurt M 1996 Emeritus Professor Ethnic Studies.
Petrie, Steven E 2000 Emeritus Professor Crop and Soil Science.
Petzel, Florence E 1960 Emeritus Professor College of Business.
Phelps, David W 1965 Emeritus Professor Sch of Soc/Bhav Hlth Sci.
Philbrick, David A 1983 Emeritus Associate Professor Public Hlth/HumanSci Adm.
Philipp, Kurt D 1963 Emeritus Associate Professor History.
Phillips, Robert L 1957 Emeritus Professor Liberal Arts Admin.
Phipps, Wanda L 1968 Emeritus Associate Professor Extension Service Prgram.
Pierce, Donald A 1966 Emeritus Professor Statistics (Science).
Pisias, Nicklas G 1981 Emeritus Professor Earth, Ocean \& Atmo Sci.
Plant, Thomas K 1978 Emeritus Associate Professor Sch Elect Engr/Comp Sci.
Plants, Constance P 1960 Emeritus Senior Instructor I Public Hlth/HumanSci Adm.
Poling, Dow P 1963 Emeritus Associate Professor Sch of Bio/Pop Hlth Sci.
Poole, Arthur P 1975 Emeritus Professor Horticulture Extension.
Poppino, Richard R 1995 Emeritus Associate Professor Music.
Powelson, Mary L 1968 Emeritus Professor Ag Botany/Plant Path.
Prahl, Fredrick G 1984 Emeritus Professor Earth, Ocean \& Atmo Sci.
Pratt, Clara C 1978 Emeritus Professor Sch of Soc/Bhav Hlth Sci.
Pritchett, Harold D 1957 Emeritus Professor Sch of Civil/Constr Engr.
Proebsting, William M 1980 Emeritus Professor Horticulture.
Pumphrey, Floyd V 1957 Emeritus Professor Columbia Basin Exp Sta.
Pyles, Marvin R 1981 Emeritus Professor Forest Eng/Resourcs/Mgmt.

## R

Rackham, Robert L 1971 Emeritus Professor Extension Service Prgram.
Radosevich, Steven R 1983 Emeritus Professor Forest Ecosyst \& Society.
Ramsey, Fred L 1966 Emeritus Professor Statistics (Science).
Randhawa, Sabah U 1983 Emeritus Professor Sch of Mech/Ind/Mfg Engr.
Randhawa, Sabah U 1983 Provost \& Exec VP Emeritus Professor Provost/Exec Vice Pres.
Rathja, Roy C 1972 Emeritus Associate Professor Sch Elect Engr/Comp Sci.
Rauen, Paul M 1959 Emeritus Professor Extension Service Prgram.
Reed, Donald J 1962 Emeritus Professor Biochem/Biophysics.
Reed, Gary L 1985 Emeritus Professor College of Ag Admin.
Reed, Marjorie A 1987 Emeritus Associate Professor Sch of Psychological Sci.
Reistad, Gordon M 1970 Emeritus Professor Sch of Mech/Ind/Mfg Engr.
Reno, Paul W 1990 Emeritus Professor Microbiology (Ag).
Rettig, Jack L 1961 Emeritus Professor College of Business.
Rettig, Raymond B 1968 Emeritus Professor Applied Economics.
Rice, Laura P 1980 Emeritus Professor Sch of Wrtg Lit \& Film.
Richardson, Daryl 1973 Emeritus Professor Horticulture.
Rickson, Fred R 1971 Emeritus Professor Ag Botany/Plant Path.
Riedl, Helmut W 1985 Emeritus Professor Enviro/Molecular Toxic.
Rielly, Loretta J 1990 Emeritus Professor Library.
Righetti, Timothy L 1983 Emeritus Professor Horticulture.
Ringle, John C 1966 Emeritus Professor Nuclear Engineering.
Ringle, John C 1966 Emeritus Professor Graduate School Admin.
Rivin, Carol J 1984 Emeritus Associate Professor Ag Botany/Plant Path.
Robbins, William G 1970 Emeritus Professor History.
Roberts, Lani 1989 Emeritus Associate Professor Philosophy.
Roberts, Paul A 1966 Emeritus Professor Integrative Biology.
Robinson, Alan H 1966 Emeritus Professor Nuclear Engineering.
Robinson, David M 1977 Emeritus Professor Sch of Wrtg Lit \& Film.
Robinson, Kay C 1970 Emeritus Associate Professor Admissions.
Rogers, William R 1980 Emeritus Professor Crop and Soil Science.
Rogge, David F 1982 Emeritus Associate Professor Sch of Civil/Constr Engr.
Rohrmann, George F 1979 Emeritus Professor Microbiology (Ag).
Root, Jon R 1969 Emeritus Professor Extended Campus.
Rosenberger, Nancy R 1988 Emeritus Professor Anthropology.
Rosenfeld, Charles L 1974 Emeritus Professor Earth, Ocean \& Atmo Sci.

Rosenkoetter, Sharon E 1999 Emeritus Associate Professor Sch of Soc/Bhav Hlth Sci.
Ross, Jackson W 1951 Emeritus Professor Extension Service Prgram.
Ross, Richard E 1970 Emeritus Professor Anthropology.
Rossignol, Annette M 1988 Emeritus Professor Sch of Soc/Bhav Hlth Sci.
Rowe, Kenneth E 1965 Emeritus Professor Statistics (Science).
Rowley, Marvin L 1973 Emeritus Senior Instructor I College of Forestry Adm.
Ruben, John A 1975 Emeritus Professor Integrative Biology.
Rubert, Steven C 1991 Emeritus Professor History.
Rudd, Oris C 1955 Emeritus Professor Extension Service Prgram.
Rudd, Walter G 1985 Emeritus Professor Sch Elect Engr/Comp Sci.
Russell, Sterling A 1963 Emeritus Senior Instructor I Ag Botany/Plant Path.
Rutledge, James A 1994 Emeritus Professor College of Education.
Rydrych, Donald J 1965 Emeritus Professor Columbia Basin Exp Sta.
Rykbost, Kenneth A 1987 Emeritus Professor Crop and Soil Science.

Zimmerman, Martin J 1960 Emeritus Professor Crop/Soil Sci Extension.
Zinn, Thomas G 1962 Emeritus Professor Extension Service Admin.
Zobel, Donald B 1968 Emeritus Professor Ag Botany/Plant Path.
Zollinger, William A 1985 Emeritus Associate Professor Animal \& Rnglnd Sciences.

## FACULTY

This faculty roster includes the Oregon State University faculty who serve the university, its students, and constituents through one or more of the following activities: instruction, research, extension, and administration. Also listed are a few on-campus staff members with faculty appointments in other state system agencies. The names of courtesy faculty members, individuals who provide voluntary services to the instructional and research programs of the university, appear in the faculty listings of individual departments or colleges.

The following abbreviations are used: Prof-Professor; Assoc Prof-Associate Professor; Asst Prof-Assistant Professor; InstInstructor; Res Assoc-Research Associate; Sr Inst-Senior Instructor; Sr Faculty Res Asst-Senior Faculty Research Assistant; Faculty Res Asst-Faculty Research Assistant; Extn-Oregon State University Extension Service.

## A

Aaron, Wendy R 2012 Assistant Professor College of Education. BA Univ of CaliforniaSanta Cruz 2001; MA Univ of California-Los Angeles 2004; PHD Univ of Michigan-Ann Arbor 2011
Abbott, Mark R 1988 Professor Earth, Ocean \& Atmo Sci. BS Univ of California-Berkeley 1974; PHD Univ of California-Davis 1978
Abney, Landon D 2015 Faculty Research Assistant Sch Elect Engr/Comp Sci. BS Oregon State University 2015
Ackers, Steven H 2000 Senior Faculty Research Asst I Fisheries and Wildlife. PHD Northern Arizona University 1997
Adam, LeAnn J 2011 Advisor-Prestigious Scholars Univ Honors College. BA San Francisco State University 1996
Adams, Dennis B 2016 Instructor College of Business. BS Brigham Young University Main 1999; MBA University of Oregon 2006
Adams, Julie A 2016 Professor Sch Elect Engr/
Comp Sci. BS Siena College 1989; MENG
University of Pennsylvania 1993; PHD University of Pennsylvania 1995
Adams, Ronald L 1998 Sr. Advis-Pres for Strat Init Office of the President. BS Oregon State University 1970; MS Massachusetts Inst of Technolo 1971; PHD Oregon State University 1977
Adams, Terry 1986 Senior Instructor I College of Education. BA University of Oklahoma 1978; BA Oregon State University 1989; JD University of Oklahoma 1981
Adrean, Lindsay 2005 Faculty Research Assistant Forest Ecosyst \& Society. BS James Madison University 2004
Aduviri, Amas 2005 Dir-CAMP Coll Assist Migrant Prgm. BA Foreign Institution 1989; MBA Andrews University 2000
Aduviri, Cheridy L 2006 Instructor College of Education. BA Eastern Washington University 1996; MA Andrews University 2000

Aguilar, Sunddip K 2017 Instructor College of Education. BS Simon Fraser University 2002; MED University of Phoenix 2006; EDD University of Phoenix 2009
Aguilera, Mary 2006 Instructor College of Education. BS Multnomah University 2000; MA Western Conservative Baptist S 2004; PHD Oregon State University 2009

Chastain, Donna L 2007 Director \& Interim
CHRO Human Resources-Central. BS Oregon State University 1984
Chastain, Thomas G 1989 Professor Crop and Soil Science. BA Cal State Univ-Chico 1981;
MS Oregon State University 1985; PHD
Oregon State University 1987
Chavarria-Bechtel, Loren 1996 Senior
Instructor II World Languag \& Cultures. BA
Oregon State University 1992; MA University of Arizona 1996
Chen, Hsiou-Lien 1995 Associate Professor College of Business. BA Fu Jen Catholic University 1982; MS The Ohio State Univ Main 1990; PHD The Ohio State Univ Main 1995
Chen, Jiyao 2011 Assistant Professor Associate Professor College of Business. BS Tongji Medical University 1995; MS Central South Univ of Tech 1998; PHD Stevens Institute of Technolog 2007
Chen, Lizhong 2014 Assistant Professor Sch Elect Engr/Comp Sci. BS Zhejiang University 2009; MS Univ of Southern California 2011; PHD Univ of Southern California 2014
Chen, Yong 2009 Associate Professor Applied Economics. BA Beijing Foreign Studies Univer 1999; MA Peking University 2003; PHD The Ohio State Univ Main 2009
Chen, Yue 1994 Instructor Music. MAIS Oregon State University 1992
Cheng, Li-Jing 2013 Assistant Professor Sch Elect Engr/Comp Sci. PHD Univ of MichiganAnn Arbor 2008
Cheng, Qunkang 2017 Research Associate (Post Doc) Central Oregon Exp Sta. MS Univ of Tennessee-Knoxville 2011; PHD Univ of Tennessee-Knoxville 2017

Cheong, Ha Yeon 2009 Associate Professor Chemistry University Honors College Faculty. PHD Cal State Univ-Los Angeles 2007
Cherian, Deepak A 2017 Research Associate (Post Doc) Earth, Ocean \& Atmo Sci. BS Indian Institute of Technology ; MS Indian Institute of Technology ; PHD Massachusetts Inst of Technolo 2016
Cherian, Gita 1999 Professor Animal \& Rnglnd Sciences. BVSC Kerala Agricultural University 1979; MS University of Alberta 1985; PHD University of Alberta 1993
Chesbro, Jon 2014 Instructor Economics. BS Texas A\&M Univ-College Station 1996; MA University of Montana 2001
Cheseby, Maziet 1998 Senior Faculty Research Asst I Earth, Ocean \& Atmo Sci. BA Univ of Colorado-Boulder 1991
Cheung, Itchung S 2007 Senior Instructor I Hatfield Marine Sci Ctr. BA Univ of California-Santa Cruz 1998; MS Univ of California-Santa Cruz 2007
Cheyney, Melissa J 2003 Associate Professor Anthropology University Honors College Faculty. BA Calvin College 1994; MA Western Michigan University 1997; PHD University of Oregon 2005
Chi, Chunhuei 1990 Professor Sch of Bio/Pop Hlth Sci. BS Foreign Institution 1978; MPH Univ of Texas System Office 1982; D SCI Harvard University 1990
Chiang, Patrick Y 2006 Associate Professor Sch Elect Engr/Comp Sci University Honors College Faculty. BS Univ of CaliforniaBerkeley 1998; MS Stanford University 2001; PHD Stanford University 2006
Cho, Jeewon 2011 Associate Professor College of Business. BBA Duksung Womens University 1995; MBA Seoul National University 1997; PHD SUNY-College at Buffalo 2007
Cho, Sam Y 2014 Assistant Professor College of Business. MA Hitotsubashi University 2003; MBA University of Rochester 2010; PHD Washington State University 2014
Choate, Jeffery B 1999 Assistant Professor (Practice) Ext Lane County Office. BS University of Oregon 1999; MS University of Oregon 2004
Choi, Jaewoo 2012 Research Associate Linus Pauling Institute. BS Foreign Institution 2001; MS Foreign Institution 2003; PHD Case Western Reserve Univ 2010
Chouinard, Adam J 2010 Instructor Integrative Biology. BS Univ of New Hampshire-Durham 2006; MS Univ of New Hampshire-Durham 2010
Choun, Soyoung 2002 Research Associate (Post Doc) Sch of Soc/Bhav Hlth Sci. BA Ewha Womans University 1979; MS Oregon State University 2006; PHD Oregon State University 2012
Chow, Eileen S 2007 Senior Faculty Research Asst I Integrative Biology. BS Oregon State University 2009
Christensen, John M 1979 Professor Pharmacy. BS University of Utah 1975; PHD University of Utah 1980
Christensen, Russell L 2009 Instructor Music. BED University of Oregon 1979; MED Western Oregon University 1984

Chuinard, Andrew W 2015 Instructor Sch of Soc/Bhav Hlth Sci. BA Oregon State University 2006; MPH Oregon State University 2015
Chung, Woodam 1998 Associate Professor Forest Eng/Resourcs/Mgmt. BS Seoul National University 1993; MS Seoul National University 1995; PHD Oregon State University 2002
Ciannelli, Lorenzo 2005 Professor Earth,
Ocean \& Atmo Sci University Honors College
Faculty. BS Foreign Institution 1993; PHD
University of Washington 2002
Ciechanowski, Kathryn 2006 Associate
Professor College of Education. BA Univ of California-Davis 1995; BS Univ of CaliforniaDavis 1995; EDM Harvard University 1997;
PHD Univ of Michigan-Ann Arbor 2006
Cieri, Mike 2006 Instructor College of
Business. BA University of Oregon 1987; MS
University of Oregon 1990
Ciuffetti, Lynda M 1989 Department Head Ag Botany/Plant Path. BS Massachusetts Maritime Academy 1973; MS Michigan Technological Univ 1976; PHD Purdue
University Main Campus 1983
Ciuffetti, Lynda M 1989 Professor Ag Botany/
Plant Path. BS Massachusetts Maritime
Academy 1973; MS Michigan Technological
Univ 1976; PHD Purdue University Main

## Campus 1983

Claassen, Briana J 2014 Faculty Research
Assistant Ag Botany/Plant Path. BS
Northwest Nazarene University 2012
Claremont, Rita M 1997 Senior Faculty
Research Asst I Fisheries and Wildlife. BS Oregon State University 1994
Clark, JaTtik O 2010 Instructor Music. BMUS
Univ of S Carolina-Columbia 1997; MM Univ of Cincinnati Main 1999
Clark, Peter U 1988 Distinguished Professor Earth, Ocean \& Atmo Sci. BS St Lawrence University 1978; MS University of Waterloo 1980; PHD Univ of Colorado System 1984
Clark, Sara E 1997 Instructor Mathematics. BS Pacific Lutheran University 1997; MS Oregon State University 1999
Clark, Steve 2011 Vice President VP Univ
Relations \& Mktg. BS Oregon State University 1975
Clauson, Milo L 1971 Senior Faculty Research Asst I Wood Science/Engr. BA Eastern Oregon University 1969
Claycomb, Doretta A 2000 Senior Faculty Research Asst I Food Innovation Center. BS Oregon State University 1979
Clough, Sharyn 2003 Professor Philosophy University Honors College Faculty. BA University of Calgary 1987; MA University of Calgary 1989; PHD Simon Fraser University 1997
Cluskey, Mary M 1994 Associate Professor Sch of Bio/Pop Hlth Sci. BS Southern Illinois U-Carbondale 1976; MS Illinois State University 1979; PHD Oregon State University 1992
Cluver, Brigitte G 1994 Instructor College of Business. BS Univ of California-Davis 1993; MS Oregon State University 1996; PHD Oregon State University 2008
Coakley, James R 1990 Associate Professor
College of Business. BS Oregon State
University 1970; MBA University of Utah
1976; PHD University of Utah 1982

Coakley, James R 1990 Senior Assoc DeanAcademicProg College of Business. BS Oregon State University 1970; MBA University of Utah 1976; PHD University of Utah 1982
Coblyn, Matthew Y 2005 Research Associate Sch of Chem/Bio/Envr Eng. BS Oregon State University 2008; MS Univ of CaliforniaIrvine 2009; PHD Oregon State University 2015
Coffin, Christopher M 2005 Instructor Physics. BS Oregon State University 1983; MAT Western Oregon University 2002
Cogliati, Karen M 2014 Research Associate Fisheries and Wildlife. BS University of Windsor 2007; MS University of Windsor 2009; PHD Mc Master University 2013
Cohn, Greg M 2016 Faculty Research Assistant Forest Ecosyst \& Society. BS University of Montana 2008
Colantonio, Ernest S 2008 Faculty Research Assistant Earth, Ocean \& Atmo Sci. BS Univ of Illinois at Urbana-Cha 1981; MS Univ of Wisconsin-Madison 1994
Cole, Elizabeth C 1981 Senior Faculty Research Asst I Forest Eng/Resourcs/Mgmt. BS Utah State University 1981; MS Oregon State University 1984
Coleri, Erdem 2014 Assistant Professor Sch of Civil/Constr Engr. BS Middle East Tech University 2005; MS Middle East Tech University 2007; PHD Univ of CaliforniaDavis 2011
Collins, Tess E 2011 Consultant-Academic Advisor Veterinary Medicine. BA Boise State University 2006
Colomer, Soria E 2015 Assistant Professor College of Education. BA Millsaps College 1998; MS Univ of Mississippi-Main Campu 2000; PHD University of Georgia 2012
Colonna, Ann E 2002 Sensory Program Manager Senior Faculty Research AsstII Food Innovation Center. BS University of Arizona 1997
Colwell, Frederick S 2006 Professor Earth, Ocean \& Atmo Sci University Honors College Faculty. BA Whitman College 1977; MS Northern Arizona University 1982; PHD Virginia Polytechnic Institute 1986

College of Business University Honors
College Faculty. BA University of Rochester
1980; MBA Univ of Nebraska-Lincoln 1982;
PHD Univ of Nebraska-Lincoln 1989
Koley, Dipankar 2013 Assistant Professor
Chemistry. BS Foreign Institution 2003; MS
Texas A\&M Univ-Commerce 2005; PHD Univ of Texas-Austin 2011
Kollath, Jeffrey P 1999 Senior Instructor II Statistics (Science). BS Univ of Illinois Central Offic 1986; BS Univ of IllinoisChicago 1986; MS Oregon State University 1995
Kolluri, Siva K 2006 Associate Professor Enviro/ Molecular Toxic. MS Jadavpur University 1990; PHD Univ of Karlsruhe 1999
Kolpak, Scott E 2009 Faculty Research Assistant Forest Ecosyst \& Society. BS University of
Oregon 1999; MS University of Oregon 2002
Kong, Wei 1995 Professor Chemistry
University Honors College Faculty. BS Peking
University 1987; PHD University of Waterloo 1993
Kongraksawech, Teepakorn 2004 Research
Associate (Post Doc) Crop and Soil Science.
MS Oregon State University 2007; PHD
Oregon State University 2012
Konkler, Matthew J 2013 Faculty Research Assistant Wood Science/Engr. BS Muskingum College 2008; MS Wright State University 2011
Konstantinidis, Peter 2016 Instructor/Curator
Fisheries and Wildlife. MS Foreign Institution
2005; PHD Foreign Institution 2011
Kopperman, Paul E 1978 Professor History
University Honors College Faculty. BA
Queens University of Charlotte 1966; MA
Queens University of Charlotte 1969; PHD
Univ of Illinois at Urbana-Cha 1972
Koppers, Antonius A 2007 Professor Earth,
Ocean \& Atmo Sci. PHD Vrije Univ
Amsterdam 1998
Koretsky, Milo D 1992 Professor Sch of Chem/ Bio/Envr Eng University Honors College Faculty. BS Univ of California-San Diego 1984; MS Univ of California-San Diego 1985; PHD Univ of California-Berkeley 1991
Korman, Fred 2008 Instructor Music.
Korthauer, Whitney 2017 Advisor-Academic
Sch of Civil/Constr Engr. BS Texas A\&M Univ-College Station 2010; MA Sam Houston State University 2014
Kosanovic-Brown, Ann 2010 Instructor Music.
BMUS Oberlin College 1979
Koskela, Gina P 1986 Senior Faculty Research
Asst I North Willamette Exp Sta. BS
University of Oregon 1980

Koslicki, David M 2013 Assistant Professor Mathematics University Honors College Faculty. BS Washington State University 2006; DTA Skagit Valley College 2004; PHD Penn State Univ-Main Campus 2012
Kosro, P M 1984 Professor Earth, Ocean \& Atmo Sci. BA Univ of California-Santa Cruz 1973; MS Stanford University 1977; PHD Univ of California-San Diego 1985
Kothari, Brianne H 2014 Assistant Professor Acad Prog/Student Aff. BA Gonzaga University 2003; MA Washington State University 2005; PHD Portland State University 2011
Kothari, Brianne H 2014 Assistant Professor Sch of Soc/Bhav Hlth Sci. BA Gonzaga University 2003; MA Washington State University 2005; PHD Portland State University 2011
Kovacevic, Jovana 2016 Assistant Professor Food Innovation Center. PHD Foreign Institution 2014
Kovchegov, Yevgeniy 2005 Associate Professor Mathematics University Honors College Faculty. BA New York University 1997; MS Stanford University 2000; PHD Stanford University 2002
Kowalewski, Alec R 2012 Assistant Professor Horticulture. BA Michigan State University 2003; MS Michigan State University 2006; PHD Michigan State University 2010
Kraemer, Lauren M 2008 Assistant Professor (Practice) Ext Hood River Co Office. MPH Oregon State University 2010
Krahn, Gloria 2013 Professor-Endowed Chair Public Hlth/HumanSci Adm. BS University of Manitoba 1972; MPH Univ of CaliforniaBerkeley 1994; PHD University of Manitoba 1980
Krause, Joseph T 1988 Professor World Languag \& Cultures University Honors College Faculty. BA Oregon State University 1976; MA Michigan State University 1979; PHD Michigan State University 1981
Krawchuk, Meg 2015 Assistant Professor Forest Ecosyst \& Society. BS University of Guelph 1995; MS Acadia University 2001; PHD University of Alberta 2007
Kretschmer, Kelsy N 2001 Assistant Professor Sociology. BA Oregon State University 2003; PHD Univ of California-Irvine 2010
Kristick, Laurel L 1997 Associate Professor Library. BS University of Arizona 1983; MLS Univ of California-Los Angeles 1987
Kroese, Duncan R 2009 Faculty Research Assistant Columbia Basin Exp Sta. BS Oregon State University 2010; MS Oregon State University 2016
Kronmiller, Brent A 2013 Faculty Research Assistant Ctr Excellnce Genome Res. BS University of Oregon 1997; PHD Iowa State University 2008
Kropp, Susan 2009 Instructor (ESL) INTO OSU Program. BA Oregon State University 1990; MA University of New England 2005; EDM University of Oregon 2009
Kudlacek, Trina L 1999 Instructor Sch of Bio/ Pop Hlth Sci. BS University of Kansas 1989; MS University of Kansas 1993; EDD Temple University 1996
Kunecka, Marta 2007 Instructor Philosophy. MA Jagiellonian Univ Cracow 2005

Kunert, Steven J 1998 Advisor-Academic Sch of Wrtg Lit \& Film University Honors College Faculty. BA Univ of Texas-El Paso 1979; MA Univ of Texas-El Paso 1989
Kurapov, Alexander L 1998 Associate Professor Earth, Ocean \& Atmo Sci. MS Foreign Institution 1991; PHD St Petersburg St Tech Mar Engr 1994
Kurth, Ellie G 2004 Senior Faculty Research Asst I Ag Botany/Plant Path. BS Montana State Univ-Bozeman 1999; MS Univ of Nebraska-Lincoln 2003
Kurth, Nicole 2015 Instructor (PAC) Physical ActivityCourses. BS San Francisco State University 1998
Kurth, Tige 2016 Faculty Research Assistant Earth, Ocean \& Atmo Sci. BS Oregon State University 2007
Kutzler, Michelle A 2002 Associate Professor Animal \& Rnglnd Sciences University Honors College Faculty. BS Washington State University 1990; DVM Washington State University 1993; PHD Cornell UniversityIthaca 2002
Kuusela, Olli-Pekka 2015 Assistant Professor Forest Eng/Resourcs/Mgmt. BS Univ of Helsinki 2008; MA Virginia Polytechnic Institute 2010; PHD Virginia Polytechnic Institute 2013
Kwon, Hyojung 2013 Research Associate Forest Ecosyst \& Society. BS Sejong University 1994; MS Yonsei University 1996; PHD Univ of California-Davis 2005
Kwon, Jung Y 2016 Assistant Professor COMES - Astoria. BS Seoul City University 2004; MS Seoul City University 2006; PHD Purdue University Main Campus 2012
Kyllo, Sarah M 2014 Academic Advisor College of Engineering. BA Univ of MinnesotaDuluth 2000; MS Minnesota State Univ Moorhead 2009

## L

La Du, Jane K 2003 Senior Faculty Research Asst I Enviro/Molecular Toxic. BS Oregon State University 2003
LaBrier, Daniel P 2016 Assistant Professor (Sr Res) Nuclear Engineering. PHD Idaho State University 2013
Labut, Edwin M 2008 Faculty Research Assistant Linus Pauling Institute. BS Eastern Michigan University 1993
Lach, Denise H 1996 Director-SPP Liberal Arts Admin. BS Univ of New Mexico-Gallup 1987; MS University of Oregon 1988; PHD University of Oregon 1992
Lach, Denise H 1996 Professor Sociology. BS Univ of New Mexico-Gallup 1987; MS University of Oregon 1988; PHD University of Oregon 1992
Lachenbruch, Barbara 1992 Professor Forest Ecosyst \& Society University Honors College Faculty. BA Swarthmore College 1979; MS
Univ of Alaska System 1982; PHD Stanford University 1990
Lagerquist, Barbara A 1993 Senior Faculty Research Asst I Marine Mammal Institute. BS University of Western Ontario 1988; MS Oregon State University 1997
Lajtha, Kate J 1995 Professor Crop and Soil Science University Honors College Faculty. BA Harvard University 1979; PHD Duke University 1986

Laleicke, Paul F 2013 Assistant Professor (Sr Res) Wood Science/Engr. BS Universitat Hamburg 2010; MS Universitat Hamburg 2012; PHD Oregon State University 2015
Lambert, Misty D 2010 Associate Professor General Agriculture. BS North Carolina State Univ 2002; MA North Carolina State Univ 2004; PHD Univ of Missouri-Columbia 2010
Lambert, Steven M 2016 Faculty Research Assistant Earth, Ocean \& Atmo Sci. BS Florida State University 2002; MS Florida State University 2012
Lambrinos, John G 2006 Associate Professor Horticulture. BA Univ of California-Berkeley 1992; PHD Univ of California-Los Angeles 2000
Lamerdin, Stewart K 2013 Supt-Marine Ship Operations. BS Lewis and Clark Comm Coll 1992; MS San Francisco State University 1998
Lancaster, Stephen T 1998 Associate Professor Earth, Ocean \& Atmo Sci. BA Harvard University 1990; PHD Massachusetts Inst of Technolo 1998
Lancelin, Rebekah R 2001 Advisor-Academic Univ Honors College. BA Alverno College 1997; MS Oregon State University 2005
Landgren, Chal G 1979 Professor Forest Eng/ Resourcs/Mgmt. BS Univ of CaliforniaBerkeley 1975; MS Utah State University 1977; MBA Portland State University 1989
Landys, Meta M 2005 Instructor Integrative Biology. BS Univ of Michigan-Ann Arbor 1996; PHD University of Washington 2003
Langdon, Christopher J 1985 Professor COMES - Newport Exp Sta. BS University of Edinburgh 1975; MS Univ of Wales Bangor 1977; PHD Univ of Wales Bangor 1981
Langellotto, Gail A 2007 Associate Professor Horticulture Extension. BS Univ of Maryland-College Park 1993; MS Univ of Maryland-College Park 1996; PHD Univ of Maryland-College Park 2002
Langpap, Christian A 2003 Associate Professor Applied Economics. BA Kalamazoo College 1992; PHD Oregon State University 2002
Larison, John J 2005 Senior Instructor I Sch of Wrtg Lit \& Film. BA University of Oregon 2002; MED University of Oregon 2005
Larson, Dan 2000 AssocViceProv-SA, ExcDirUHDS Univ Housing and Dining. BS Western Oregon University 1996; MS Oregon State University 1998
Larson, Dan 2000 Interim Dean of Student Life Dean of Students. BS Western Oregon University 1996; MS Oregon State University 1998
Larson, Mark J 1993 Senior Faculty Research AsstII Crop and Soil Science. BS Oregon State University 1988
Larson, Maureen K 1997 Faculty Research Assistant Vet Clinical Sciences. BS Eastern Washington University 1985; BA Eastern Washington University 1985; MS Oregon State University 1993
Larson, Nicholas 2008 Instructor Music. BS Unknown College 1997; MA Univ of Southern California 2000; MA Univ of Missouri-Kansas City 2007
Later, William 2012 Instructor Speech Communication. MA Oregon State University 2014
Latham, Kerry D 2016 Faculty Research Assistant Earth, Ocean \& Atmo Sci. BS Univ of Michigan-Ann Arbor 2010; MS Foreign Institution 2015

Lauer, Rena N 2014 Assistant Professor History. MA Harvard University 2009; PHD Harvard University 2014
Lavery, Mark R 1994 Senior Instructor II Integrative Biology. BS University of Notre Dame 1991; MS Oregon State University 1998
Law, Beverly E 1995 Professor Forest Ecosyst \& Society. BS University of Florida 1980; PHD Oregon State University 1993
Lawes, Timothy J 2007 Senior Faculty Research Asst 1 Fisheries and Wildlife. BS University of Montana 2003; MS Oregon State University 2010
Lazzati, Davide 2013 Associate Professor Physics. BS Foreign Institution 1996; PHD Foreign Institution 2001
LeBlanc, Nicole 2011 Assistant Professor Vet Clinical Sciences. BA University of Connecticut 2002; DVM Univ of WisconsinMadison 2010
LeBoldus, Jared M 2015 Assistant Professor Ag Botany/Plant Path. BS University of British Columbia 2003; MS University of Alberta 2006; PHD Foreign Institution 2010; PHD University of Alberta 2010
LeRoux, Sharon 2000 Instructor Sch of Mech/ Ind/Mfg Engr. BS Oregon State University 1992; MS Oregon State University 2000
Leach, Richard D 2009 Faculty Research Assistant Fisheries and Wildlife. BS Oregon State University 1994
Leach, Thomas G 1988 Senior Faculty Research AsstII Earth, Ocean \& Atmo Sci. BS Oregon State University 1986
Leavell, Daniel M 2014 Assistant Professor (Practice) Ext Klamath Co Office. MS Oregon State University 1991; PHD University of Montana 2000
Leavengood, Scott A 1992 Associate Professor Wood Science/Engr University Honors College Faculty. BS Colorado State University 1992; MS Oregon State University 1995; PHD Oregon State University 2011
Leavengood, Scott A 1992 Dir-OR Wood Innovation Ctr Wood Science/Engr University Honors College Faculty. BS Colorado State University 1992; MS Oregon State University 1995; PHD Oregon State University 2011
Leavitt, Keith 2011 Associate Professor College of Business University Honors College Faculty. MS Montana State Univ-Bozeman 2001; MBA University of Washington 2007; PHD University of Washington 2009
Leder, Carol B 2001 Head Advisor College of Business. BS Oregon State University 1975
Lee, Ben 1991 Professor Sch Elect Engr/Comp Sci. BEE SUNY-Excelsior College 1984; BEE SUNY-Stony Brook 1984; PHD Penn State Univ-Main Campus 1991
Lee, David S 2011 Assistant Professor Pharmacy. BS Georgia Institute of Technolog 1999; D PHAR Virginia Commonwealth Univ 2009; PHD Virginia Commonwealth Univ 2009
Lee, Janet 1991 Professor Women/Gendr/ Sxlt Studies University Honors College Faculty. BA University of Stirling 1976; MA Washington State University 1982; PHD Washington State University 1985
Lee, Megan D 2013 Instructor (ESL) INTO OSU Program. MA Seattle Pacific University 2007

Lee, Seunghae 2011 Associate Professor College of Business. BS Yonsei University 1990; MS Yonsei University 1992; PHD Michigan State University 2004
Lee, Stacey J 2011 Instructor College of Education University Honors College Faculty. BA Principia College 1993; MA Arizona State University 1999
Lee, Yun-Shik 2001 Professor Physics. BS Seoul National University 1989; MS Seoul National University 1991; PHD Univ of Texas-Austin 1997
Leer, David W 1997 Faculty Research Assistant Forest Eng/Resourcs/Mgmt. BS Oregon State University 2001
Leibowitz, Flora L 1977 Professor Philosophy University Honors College Faculty. BA SUNY-Stony Brook 1973; MA Johns Hopkins University 1975; PHD Johns Hopkins University 1979
Leid, Mark E 1992 Associate Dean for Research Pharmacy. BS Washington State University 1983; PHD Oregon State University 1989
Leid, Mark E 1992 Professor Pharmacy. BS
Washington State University 1983; PHD Oregon State University 1989
Lending, Curtis B 2014 Faculty Research Assistant CIMRS (Inst/Marine Res). BA University of Virginia 1983; BS Oregon State University 2014
Lenhardt, John B 2010 Instructor (ESL) INTO OSU Program. BS University of Oregon 1992; MAT Quinnipiac University 1999
Leonard, Mary E 2010 Research Associate (Post Doc) Enviro/Molecular Toxic. BA New Mexico St Univ-Main 1997; BS New Mexico St Univ-Main 1997; MA Arizona State University 2006; PHD Oregon State University 2017
Leonard, Scott W 1995 Senior Faculty Research Asst I Linus Pauling Institute. BS Bastyr College 1995; MS Oregon State University 1998
Leong, Jonathan R 2001 Instructor College of Business. BS Claremont McKenna College 2005; BS Harvey Mudd College 2005; MS Claremont McKenna College 2010
Leong-Kee, Maureen J 2014 Advisor-Academic Integrative Biology. BA Univ of Texas-Austin 2004; BS Univ of Texas-Austin 2004; MA Florida Atlantic University 2009
Lerczak, James A 2006 Associate Professor Professor Earth, Ocean \& Atmo Sci University Honors College Faculty. BA Williams College 1988; MS University of Washington 1991; PHD Scripps Research Institute 2000
Lerner, Michael M 1990 Professor Chemistry University Honors College Faculty. BA University of Pennsylvania 1983; PHD Univ of California-Berkeley 1988
Leshchinsky, Ben A 2012 Assistant Professor Forest Eng/Resourcs/Mgmt. BS University of Delaware 2007; MS Columbia UniversityNYC 2008; PHD Columbia University-NYC 2012
Lesmeister, Marilyn K 2006 Associate Professor EXT 4 -H YouthDev OnCmps. BS North Dakota St U-Main Campus 1977; MS Univ of Wisconsin-Madison 1987; PHD Univ of Wisconsin System 1996
Lesser, Virginia M 1992 Department Head -Statistics Statistics (Science). BS Lebanon Valley College 1980; MS North Carolina State Univ 1987; PHD Univ of N Carolina Systems 1999

Lesser, Virginia M 1992 Director-Survey Research Cntr Statistics (Science). BS Lebanon Valley College 1980; MS North Carolina State Univ 1987; PHD Univ of N Carolina Systems 1999
Lesser, Virginia M 1992 Professor Statistics (Science). BS Lebanon Valley College 1980; MS North Carolina State Univ 1987; PHD Univ of N Carolina Systems 1999
Letelier, Ricardo M 1994 Professor Earth, Ocean \& Atmo Sci. BS Universidad de Conception 1988; PHD Univ of Hawaii System 1994
Lettero, Carly A 2006 Instructor Liberal Arts Admin. BA University of Nevada-Reno 2004; MA Oregon State University 2008
Lev, Larry S 1984 Ext Marketing Economist Professor Applied Econ Extension. BA Wesleyan University 1975; MS Michigan State University 1981; PHD Michigan State University 1984
Lev, Larry S 1984 Interim Department Head Applied Economics. BA Wesleyan University 1975; MS Michigan State University 1981; PHD Michigan State University 1984
Levi, Taal 2013 Assistant Professor Fisheries and Wildlife University Honors College Faculty. BA Univ of California-Berkeley 2004; PHD Univ of California-Santa Cruz 2012
Levin, Alexander 2016 Assistant Professor Southern Oregon Exp Sta. BA Univ of Michigan-Dearborn 2008; PHD Univ of California-Davis 2016
Lewis, Aaron L 2009 Senior Instructor I College of Business. BA Univ of Michigan-Ann Arbor 1993; MBA San Jose State University 1998
Lewis, David J 2001 Professor Applied Economics. BS Univ of Colorado-Boulder 1997; MS University of Maine 2001; PHD Oregon State University 2005
Lewis, Jan 2014 Dir-Administrative Services Specialized Admin Svcs. BS Southern Illinois U-Carbondale 1981
Lewis, Jan 2014 Executive 3-Fin \& Admin V Pres Finance and Admin. BS Southern Illinois U-Carbondale 1981
Lewis, Jon R 1983 Distinguished Professor Sch of Wrtg Lit \& Film University Honors College Faculty. BA Hobart William Smith Colleges 1977; MA SUNY-College at Buffalo 1979; PHD Univ of California-Los Angeles 1983
Lewis, Karley W 2010 Faculty Research Assistant EXT Fam/CommHlth OnCmps. BA Univ of California-Davis 2007; MA Cal State Univ-Chico 2009
Lewis, Sarah L 2001 Senior Faculty Research Asst I Earth, Ocean \& Atmo Sci. BS Tufts University 1996; MS University of Vermont 1999
Leytem, Alicia B 2004 Faculty Research
Assistant Enviro/Molecular Toxic. BS Oregon
State University 2006; MS Oregon State University 2012
Li, Anlong 2009 Research Associate (Post Doc) Wood Science/Engr. BS Sun Yat-Sen University 2002; PHD Sun Yat-Sen University 2007
Li, Cheng 2011 Research Associate(Post Doc) Earth, Ocean \& Atmo Sci. BS South China Agricultural Univ 2006; MS Mc Neese State University 2010; PHD Oregon State University 2017
Li, Fuxin 2015 Assistant Professor Sch Elect Engr/Comp Sci. PHD Foreign Institution 2009

Li, Hua-yu 1996 Associate Professor Political Science. BA Sophia University 1981; MA Harvard University 1983; PHD Columbia University-NYC 1997
Li, Jun 1999 Research Associate (Post Doc) Chemistry University Honors College Faculty. BS Central South Univ of Tech 1989; MS Univ of Minnesota-Duluth 1999; PHD Oregon State University 2005
Li, Kaichang 1999 Professor Wood Science/ Engr. BS South China Univ of Tech 1984; MS South China Univ of Tech 1987; PHD Virginia Polytechnic Institute 1996
Li, Lixin 2004 Faculty Research Assistant Microbiology (Science). MD Foreign Institution 1988; MS Foreign Institution 1996
Li, Tao 2015 Assistant Professor Sch of Soc/ Bhav Hlth Sci. BS Shanghai Jiaotong University 2005; MD Shanghai Jiaotong University 2009; PHD Univ of NebraskaMedical Cente 2014
Li, Tianxiao 2010 Faculty Research Assistant Hermiston Exp Sta. BS Oregon State University 2015
Li, Zhenglun 2014 Instructor Bioresources Research University Honors College Faculty. BA Tianjin University 2010; PHD Michigan State University 2014
Liburdy, James A 1997 Professor-Endowed Sch of Mech/Ind/Mfg Engr University Honors College Faculty. BS Cornell University 1971; MS Stanford University 1972; PHD Penn State Univ-Central Office 1976
Liegel, Leon 1986 Instructor Crop and Soil Science. BS Univ of Wisconsin-Stevens Pt 1970; MS SUNY Coll-Env Sci \& Forestry 1973; PHD North Carolina State Univ 1981
Lien, Mei-Ching 2004 Professor Sch of Psychological Sci University Honors College Faculty. BA Cleveland State University 1995; MA Cleveland State University 1997; PHD Purdue University Main Campus 2001
Lieuallen, Athena E 2005 Advisor-Academic Earth, Ocean \& Atmo Sci. BA Univ of Nebraska-Lincoln 1997; BS Oregon State University 2007; MS Oregon State University 2010
Lieuallen, Thomas O 1992 Network Research Assist Faculty Research Assistant College of Engineering. BS Oregon State University 1992
Lim, Byungho 2010 Faculty Research Assistant Earth, Ocean \& Atmo Sci. BS Pukyong National University 2004; MS Seoul National University 2008; MS Oregon State University 2015
Lim, Juyun 2007 Associate Professor Food Science and Techno University Honors College Faculty. BS Ewha Womans University 1998; MS Ewha Womans University 2000; PHD Cornell University-Ithaca 2005
Lin, Jenny X 2014 Assistant Professor Economics. BA Univ of California-Berkeley 2007; BS Univ of California-Berkeley 2007; MA Univ of Michigan-Ann Arbor 2010; MA Yale University 2010; PHD Univ of MichiganAnn Arbor 2014
Lin, Kuan-Chen 2012 Assistant Professor College of Business. BA National Taiwan University 2000; MBA National Taiwan University 2006; PHD Arizona State University 2012
Linares, Roberto W 2004 Senior Instructor I Pharmacy. BS Oregon State University 1991

Lindberg, Kreg A 2003 Associate Professor Acad Prog/Student Aff. BA Dartmouth College 1986; MA Johns Hopkins University 1989; PHD Oregon State University 1995
Lindberg, Kreg A 2003 Associate Professor Forest Ecosyst \& Society. BA Dartmouth College 1986; MA Johns Hopkins University 1989; PHD Oregon State University 1995
Lindsley, Adam E 2011 Instructor Crop and Soil Science. BS University of Oregon 2006; MS Oregon State University 2014
Ling, Qingyue 2000 Associate Professor (Sr Res) Food Innovation Center. BSME Nanjing Forestry University 1982; MS Univ of Maine Central Office 1992; PHD Auburn University Main Campus 1997
Link-Perez, Melanie A 2016 Instructor Lecturer Ag Botany/Plant Path. BA Smith College 2003; MS Miami University-Oxford 2005; PHD Miami University-Oxford 2010
Linnell, Jessica D 2016 Assistant Professor (Practice) Ext Tillamook Co Office. BS Univ of California-Davis 2010; PHD Univ of California-Davis 2015
Lipscomb, Shannon T 2010 Associate Professor Acad Prog/Student Aff. BA Whitman College 2000; PHD Univ of California-Davis 2007
Lipscomb, Shannon T 2010 Associate Professor Sch of Soc/Bhav Hlth Sci. BA Whitman College 2000; PHD Univ of California-Davis 2007
Lisenkov, Ivan V 2016 Research Associate (Post Doc) Sch Elect Engr/Comp Sci. BS Moscow State University 2005; MS Moscow State University 2007; PHD Moscow State University 2010
Liston, Aaron I 1990 Dir-Herbarium Professor Ag Botany/Plant Path University Honors College Faculty. BS Hebrew University of Jerusalem 1982; MS Hebrew University of Jerusalem 1984; PHD Claremont Graduate University 1990

Montgomery, Todd 2013 Instructor Acad Prog/ Student Aff. BS University of Nevada-Las Vegas 1997; MBA Foreign Institution 2000
Montoya, Mitzi M 2015 Dean College of Business. BS Michigan State University 1990; PHD Michigan State University 1995
Montoya, Mitzi M 2015 Professor College of Business. BS Michigan State University 1990; PHD Michigan State University 1995
Moon, Un-Ku 1998 Professor Sch Elect Engr/ Comp Sci. MS Cornell University 1989; PHD Univ of Illinois Central Offic 1994
Moore, Dan 2016 Assistant Professor Library. BA George Mason University 2011; MLS Univ of Illinois at Urbana-Cha 2013
Moore, Jared A 2006 Associate Professor College of Business University Honors College Faculty. BS Arizona State University 1993; MS Arizona State University 1999; PHD Arizona State University 2006
Moore, Jared A 2006 Dir-Phd Program Development College of Business University Honors College Faculty. BS Arizona State University 1993; MS Arizona State University 1999; PHD Arizona State University 2006
Moore, Jennie K 2013 Instructor (PAC) Physical ActivityCourses. BS Northwestern College 1994; MS Western Illinois University 2001
Moore, Juliann 2008 Instructor Statistics (Science). BS Oregon State University 2009; MS Oregon State University 2011
Moore, Randall P 2002 Instructor Senior
Instructor I Fisheries and Wildlife. BS
Cornell University 1987; MS George
Mason University 1995; PHD Oregon State

## University 2005

Morales, Kelly J 2013 Instructor Crop and Soil Science. BS Univ of Mass-Amherst 1995; MS Oklahoma State Univ-Main 1997; PHD Oklahoma State Univ-Main 2001
Morales Ortiz, Maralisa 2010 Instructor World Languag \& Cultures. MA Oregon State University 2012
Moretti, Marcelo L 2017 Assistant Professor
Horticulture. BS Universidade de Sao Paulo
2007; MS Cal State Univ-Fresno 2011; PHD
Univ of California-Davis 2016

Moretti, Nathalia 2017 Faculty Research Assistant Crop and Soil Science. BS Foreign Institution 2007; MS Cal State Univ-Fresno 2012
Moretz, Deanna M 2003 Clinical Pharmacy Specialist Pharmacy. BS University at Buffalo, SUNY 1984; D PHAR Univ of N CarolinaChapel Hill 2000
Morgan, Cheryl A 1997 Senior Faculty Research AsstII CIMRS (Inst/Marine Res). BA Whitman College 1988; MS Washington State University 1993
Morgun, Andriy 2011 Assistant Professor Associate Professor Pharmacy. MS Foreign Institution 1998; PHD Foreign Institution 2002
Morre, Jeffrey T 2001 Senior Faculty Research AsstII Chemistry. BS Univ of Texas-Austin 1991
Morre, Susan K 2003 Instructor Graduate School Admin. BA Univ of Texas-Austin 1975; MS Oregon State University 2004; PHD Oregon State University 2014
Morrell, Jeffrey J 1983 Distinguished Professor Wood Science/Engr. BS Syracuse UniversityMain Campu 1977; MS Penn State UnivAllentown 1979; PHD Syracuse UniversityMain Campu 1982
Morris, John 2009 Instructor College of Business. BS University of Kansas 1980; MBA Univ of Nebraska-Omaha 1982
Morris, Lesley R 2013 Assistant Professor Eastern Ore Univ Ag Prg. BA University of New Mexico 1995; MS University of NevadaLas Vegas 2001; PHD Utah State University 2008
Morrissette, Brett A 1999 Senior Faculty
Research Asst I Forest Eng/Resourcs/Mgmt.
BS Oregon State University 1999; MF Oregon State University 2002
Mote, Philip W 2009 Assoc Dean-Strateg
Initiatives Earth, Ocean \& Atmo Sci. BA
Harvard University 1987; PHD University of Washington 1994
Mote, Philip W 2009 Dir-OCCRI Earth, Ocean \& Atmo Sci. BA Harvard University 1987; PHD University of Washington 1994
Mote, Philip W 2009 Professor Earth, Ocean \& Atmo Sci. BA Harvard University 1987; PHD University of Washington 1994
Moulton, Hong 2010 Associate Professor (Sr Res) Vet Biomedical Science. BS Chongqing University 1985; PHD Portland State University 1996
Moum, James N 1984 Professor Earth, Ocean
\& Atmo Sci. BA University of Toronto
1978; MA University of Toronto 1979; PHD University of British Columbia 1984
Mouzong, Christine L 2004 Faculty Research Assistant EXT Fam/CommHlth OnCmps. BA Pacific University 1996; MS Oregon State University 2008
Mueller, Ryan S 2012 Assistant Professor Microbiology (Science). BS Virginia Polytechnic Institute 1999; PHD Univ of California-San Diego 2007
Muglia, Juan 2012 Research Associate (Post Doc) Earth, Ocean \& Atmo Sci. BS National Univ of La Plata 2011
Muldoon, Ariel C 2007 Faculty Research Assistant Forest Ecosyst \& Society. MS New Mexico St Univ-Main 2007; MS Oregon State University 2009

Mull, Jeffrey C 1983 Asoc.Dir-Medical Services Student Health Services. BS Allegheny College 1976; MD Univ of Pittsburgh-Main Campus 1980
Mullet, Kathy K 2004 Associate Professor College of Business University Honors College Faculty. BS Virginia Polytechnic Institute 1980; MS Virginia Polytechnic Institute 1984; PHD Virginia Polytechnic Institute 1992
Mulvey, Erin R 2016 Academic Advisor Public Hlth/HumanSci Adm. BA Trinity University 2007; MS Georgia Southern University 2009
Munanura, Ian 2015 Assistant Professor Forest Ecosyst \& Society. BS Universite Nationale du Rwanda 2000; MS Univ of Kent British Studies C 2005; PHD Clemson University 2013
Munar, Myrna Y 1988 Associate Professor Pharmacy. BA Univ of Southern California 1981; D PHAR Univ of Southern California 1985
Mundt, Christopher C 1985 Professor Ag Botany/Plant Path University Honors College Faculty. BS Cornell College 1979; MS Iowa State University 1981; PHD North Carolina State Univ 1985
Munoz, Ian A 2016 Faculty Research Assistant Ctr Excellnce Genome Res. BA Colorado State University 2011
Muraca, Barbara 2014 Assistant Professor Philosophy University Honors College Faculty. PHD Foreign Institution 2008
Muratli, Jesse M 1995 Senior Faculty Research Asst I Earth, Ocean \& Atmo Sci. BA Lewis \& Clark College 2000; MS Oregon State University 2009
Murnieks, Charles 2013 Assistant Professor College of Business. BS US Air Force Academy 1993; MBA Univ of California-Los Angeles
2001; PHD Univ of Colorado-Boulder 2007
Murphey, John M 2001 Instructor (PAC)
Physical ActivityCourses. BA Texas A\&M Univ-College Station 2001
Murphy, Chad B 2014 Assistant Professor College of Business. BA Brigham Young University Main 2006; MA University of Chicago 2008; PHD Penn State Univ-Main Campus 2014
Murray, Katie 2005 Faculty Research Assistant Integrtd Plant Prot (Ag). BA Univ of Alabama in Huntsville 2000; MA Oregon State University 2007
Murthy, Ganti 2007 Professor Biol \& Ecol
Engineering. BS Foreign Institution 2001; MS Indian Institute of Technology 2003; PHD
Univ of Illinois at Urbana-Cha 2006
Muszynski, Lech 2004 Associate Professor
Wood Science/Engr University Honors
College Faculty. MS Agricultural U of Poznan
1987; PHD Agricultural U of Poznan 1997
Mutschler, Ben M 2000 Associate Professor
History. BA Harvard University 1988; MA
Columbia University-NYC 1992; PHD
Columbia University-NYC 2000
Mutschler, Ben M 2000 Director-HPR Liberal Arts Admin. BA Harvard University 1988; MA Columbia University-NYC 1992; PHD Columbia University-NYC 2000
Myers, Erika 2015 Instructor Acad Prog/
Student Aff. BA Amherst College 1993; MS
Western Carolina University 2007; EDM
Harvard University 1998

Myers, James R 1996 Professor-Endowed Horticulture. BS Kansas State University 1978; MS Univ of Wisconsin-Madison 1981; PHD Univ of Wisconsin-Madison 1984
Myles, Daniel 2007 Senior Instructor II Chemistry. BS University of Waterloo 2000; PHD University of Victoria 2005
Myrold, David D 1984 Professor Crop and Soil Science. BS Michigan Technological Univ 1977; MS Washington State University 1979; PHD Michigan State University 1984

## I

Nabelek, John L 1987 Professor Earth, Ocean \& Atmo Sci. BS Massachusetts Inst of Technolo 1974; MS Massachusetts Inst of Technolo 1975; PHD Massachusetts Inst of Technolo 1984
Nackley, Lloyd L 2016 Assistant Professor North Willamette Exp Sta. BS Cal State Polytechnic - Pomona 2003; PHD University of Washington 2012

Walker, Lindsay J 2015 Assistant Professor
(Practice) Ext Crook County Office. BS Northern Arizona University 2006; MPH University of Arizona 2014

Walker, Shelby E 2014 Director-Sea Grant Sea Grant. BA Wesleyan University 1994; PHD College of William \& Mary 2003
Walkingshaw, Eric T 2007 Assistant Professor Sch Elect Engr/Comp Sci. BA University of Washington 2006; MS Oregon State University 2011; PHD Oregon State University 2013
Wall, Brian M 2001 Asst VP-Res Comm \& Industry VP for Research. BA University of North Texas 1997; BS University of North Texas 1997; MBA Texas State University 2000; MS Univ of Texas-Austin 2001
Walsh, Kenneth C 2000 Senior Instructor I Physics. BS Oregon State University 2003; PHD Oregon State University 2010
Walter, Cara 2006 Faculty Research Assistant Biol \& Ecol Engineering. MS Oregon State University 2009
Walters, Nathan P 1997 Advisor-Academic Sch of Psychological Sci. BS Oregon State University 2000
Walton, Vaughn M 2006 Professor Horticulture Extension. BS Univ of Stellenbosch 1992; MS Univ of Stellenbosch 1998; PHD Univ of Stellenbosch 2003
Wang, Alan 2011 Assistant Professor Associate Professor Sch Elect Engr/Comp Sci. BS Unknown College 10 2000; MS Chinese Academy of Sciences 2003; PHD Univ of Texas-Austin 2006
Wang, Guojie 2015 Assistant Professor Eastern Ore Univ Ag Prg. BS Foreign Institution 2002; MS Foreign Institution 2005; PHD North Dakota St U-Main Campus 2010
Wang, Hailei 2002 Assistant Professor (Sr Res) Sch of Mech/Ind/Mfg Engr. BS Southwest Petroleum Univ 1992; MS Texas Tech University 2002; PHD Oregon State University 2006
Wang, Haizhong 2012 Assistant Professor Sch of Civil/Constr Engr. BS Foreign Institution 2003; MS Foreign Institution 2006; PHD Univ of Mass-Amherst 2010
Wang, Rong 2004 Research Associate Linus Pauling Institute. BS Zhejiang Medical Univ 1983; MS Shanghai Medical University 1989; MD Jinan University 1994; PHD Jinan University 1994
Wang, Rong 2004 Research Associate
Pharmacy. BS Zhejiang Medical Univ 1983; MS Shanghai Medical University 1989; MD Jinan University 1994; PHD Jinan University 1994
Wang, Xisheng 2013 Faculty Research Assistant Vet Biomedical Science. DVM Foreign Institution 1997; PHD Virginia Polytechnic Institute 2006
Wanke, Paul A 1999 Instructor History. BA Western Washington University 1983; MA University of Idaho 1992
Ward, Corrina M 2010 Instructor Speech Communication. MAIS Oregon State University 2014
Ward, Megan 2014 Assistant Professor Sch of Wrtg Lit \& Film. BA Lawrence University 1997; MA Univ of Oxford University Coll 2001; PHD Rutgers University-New Brunswi 2008
Warner, Rebecca L 1990 Professor Sociology. BA Portland State University 1980; MA Washington State University 1982; PHD Washington State University 1985

Warner, Sally J 2012 Research Associate Earth, Ocean \& Atmo Sci. BS Foreign Institution 2004; MS University of Washington 2008; PHD University of Washington 2012
Warnock, Debera L 1997 Associate Professor Ext Wallowa Co Office. BA Oregon State University 1995; MA Concordia College-St Paul 2001
Warnock, Jennifer J 2008 Associate Professor Vet Clinical Sciences. BA Univ of CaliforniaBerkeley 1997; DVM Univ of CaliforniaDavis 2001
Warren, Ana L 2006 Senior Instructor I World Languag \& Cultures. BA University of Oregon 2004; MA University of Oregon 2006
Warren, Dana 2009 Assistant Professor Forest Ecosyst \& Society University Honors College Faculty. BA Skidmore College 1998; MA Cornell University-Ithaca 2002; PHD Cornell University-Ithaca 2008
Warren, Timothy L 2001 Research Associate (Post Doc) Ag Botany/Plant Path. PHD Univ of Cal-San Francisco 2012
Warrick, Douglas R 2004 Associate Professor Professor Integrative Biology University Honors College Faculty. BS Univ of NebraskaLincoln 1982; MS University of Oregon 1992; PHD University of Montana 1997
Watkins, Patti L 1993 Associate Professor Sch of Psychological Sci. BA West Virginia University 1980; MA University of the Pacific 1983; PHD Virginia Polytechnic Institute 1987
Watkins-Brandt, Katie S 2006 Senior Faculty Research Asst I Earth, Ocean \& Atmo Sci. BS Antioch University 2007; MS Oregon State University 2010
Watral, Virginia G 1990 Faculty Research Assistant Microbiology (Ag). BS Oregon State University 1984; BS Oregon State University 1989
Watson, Amy N 2011 Assistant Professor Acad Prog/Student Aff. BS Missouri State Univ 2006; MBA Missouri State Univ 2007; PHD Univ of Arkansas-Fayetteville 2011
Watson, Amy N 2011 Assistant Professor Associate Professor College of Business. BS Missouri State Univ 2006; MBA Missouri State Univ 2007; PHD Univ of ArkansasFayetteville 2011
Waymire, Edward C 1979 Professor
Mathematics. BS Southern Illinois
U-Edwardsvil 1971; MS University of Arizona 1972; PHD University of Arizona 1976
Weaver, Carol A 2015 Instructor (PAC) Physical ActivityCourses. BS Oregon State University 1981; EDM Oregon State University 1987
Webb, Kyle M 2003 Instructor Acad Prog/ Student Aff. BA Dartmouth College 1997; MS Oregon State University 2005; PHD Univ of Colorado-Colorado Spr 2013
Webb, Madison H 2016 Undergrand
Progression Advisor INTO OSU Program. BA
Oregon State University 2013
Webb, Rebecca N 2002 Instructor-Engineering Acad Prog/Student Aff. BS University of Rhode Island 1998; MS Penn State UnivMain Campus 2000; PHD Oregon State University 2005
Weber, Edward P 2012 Professor Political Science University Honors College Faculty. BA Colorado State University 1978; MA Univ of Wisconsin-Madison 1991; PHD Univ of Wisconsin-Madison 1996

Weber, Genevieve L 2011 Instructor Ag Botany/Plant Path University Honors College Faculty. BS Rensselaer Polytechnic Inst 2005; PHD Johns Hopkins University 2011
Wegis, Heidi M 2002 Associate Professor (Clinical) Sch of Bio/Pop Hlth Sci. BS Cal State Univ-Bakersfield 2002; MS Oregon State University 2005; PHD Oregon State University 2008
Weis, Virginia 1996 Department Head - IB Integrative Biology University Honors College Faculty. BS Yale University 1984; PHD Univ of California-Los Angeles 1990
Weis, Virginia 1996 Professor Integrative Biology University Honors College Faculty. BS Yale University 1984; PHD Univ of California-Los Angeles 1990
Weiss, Aaron W 2008 Faculty Research Assistant Nuclear Engineering. BS Oregon State University 2010
Weiss, Paula J 2010 Senior Instructor I Chemistry. BS Radford University 2004; MS Virginia Polytechnic Institute 2007
Weiss, William J 2015 Professor Sch of Civil/ Constr Engr. BA Penn State Univ-Main Campus 1995; MS Northwestern University 1997; PHD Northwestern University 1999
Weiss, William J 2015 School Head Sch of Civil/Constr Engr. BA Penn State Univ-Main Campus 1995; MS Northwestern University 1997; PHD Northwestern University 1999
Weisshaar, Andreas 1986 Professor Sch Elect
Engr/Comp Sci. BS Universitat Stuttgart 1981; MS Oregon State University 1986; MS Universitat Stuttgart 1987; PHD Oregon State University 1991
Weitemier, Kevin A 2010 Faculty Research Assistant Ctr Excellnce Genome Res. BA Colorado College 2005; MS Portland State University 2010; PHD Oregon State University 2016
Welch, Kylie A 2013 Faculty Research Assistant Earth, Ocean \& Atmo Sci. BS Oregon State University 2015
Wells, Elissa E 1993 Associate Professor Ext Coos County Office. BS Oregon State University 1999; MS Oregon State University 2002
Wenell, Paula C 2008 Instructor Sociology. MS George Fox University 1998
Westberry, Toby K 2005 Assistant Professor (Sr Res) Ag Botany/Plant Path. BS Univ of CalSanta Barbara 1996; MS Univ of Cal-Santa Barbara 2001; PHD Univ of Cal-Santa Barbara 2008
Wettstein, Justin J 2012 Assistant Professor Earth, Ocean \& Atmo Sci. BS University of Oklahoma 1997; MS Stanford University 1998; MS University of Washington 2003; MPA University of Washington 2007; PHD University of Washington 2007
Wheatcroft, Robert A 1998 Professor Earth, Ocean \& Atmo Sci University Honors College Faculty. BA The College of Wooster 1981; MS University of Georgia 1984; PHD University of Washington 1990
Wheeler, Caryn 2016 Assistant Professor (Practice) Ext Jackson Co Office. BS Michigan State University 2006; MPH Portland State University 2011
White, Angelicque E 2001 Associate Professor Earth, Ocean \& Atmo Sci University Honors College Faculty. BS Univ of Alabama in Huntsville 1998; MS Univ of Alabama in Huntsville 2001; PHD Oregon State University 2006

White, David J 1998 Associate Professor EXT 4 -H YouthDev OnCmps. BS Oregon State University 1984; MS Oregon State University 1986; PHD Oregon State University 2010
White, Michelle R 2012 Academic Advisor College of Engineering. BA Arcadia University 2008; MED University of Pennsylvania 2012
Whitefield, Jonathan D 2016 Faculty Research Assistant Earth, Ocean \& Atmo Sci. BS Foreign Institution 2003; MS Foreign Institution 2004; MS Univ of Alaska Fairbanks 2016
Whitler, William A 1992 Assistant Professor (Clinical) Vet Clinical Sciences. BS University of Florida 1980; DVM University of Florida 1985
Whitten, John 2015 Instructor Art. BFA
Watkins College of Art 2007; MFA University of Oregon 2014
Wickham, Charlotte 2011 Assistant Professor Statistics (Science). PHD Univ of CaliforniaBerkeley 2011
Wightman, Maxwell G 2015 Faculty Research Assistant Forest Eng/Resourcs/Mgmt. BS SUNY Coll-Env Sci \& Forestry 2009; MS University of Florida 2014
Wildenschild, Dorthe 2002 Assoc DeanGraduate Programs College of Engineering University Honors College Faculty. MS Denmark Technical College 1991; PHD Denmark Technical College 1996
Wildenschild, Dorthe 2002 Professor Sch of Chem/Bio/Envr Eng University Honors College Faculty. MS Denmark Technical College 1991; PHD Denmark Technical College 1996
Wilkinson, Camilla M 2016 Faculty Research Assistant CIMRS (Inst/Marine Res). PHD Open University 2013
Willard Argyres, Peter 1999 Instructor Mathematics. BS Northeastern University 1989; MS Oregon State University 1997
Willi Hooper, Michaela D 2016 Assistant Professor Library. BA Patrick Henry Com College 2005; MS Univ of Michigan-Ann Arbor 2007
Williams, Craig D 2006 Professor (Clinical) Pharmacy. BS Univ of California-Los Angeles 1990; D PHAR Univ of Cal-San Francisco 1994
Williams, David E 1986 Professor Enviro/ Molecular Toxic. BA Reed College 1975; MS Oregon State University 1981; PHD Oregon State University 1982
Williams, Janaleen L 2010 Instructor Ext Clackamas Co Office. BS Western Oregon University 1981
Williams, John 1986 Associate Professor Ext Wallowa Co Office. BS Oregon State University 1975; MS Oregon State University 1987
Williams, Katy M 2013 Instructor
Mathematics. BS Angelo State University ;
MS Oregon State University 2015
Williams, Tara 2004 Associate Dean Univ Honors College University Honors College Faculty. BA University of Florida 1997; PHD Rutgers University-New Brunswi 2004
Williams, Tara 2004 Associate Professor Sch of Wrtg Lit \& Film University Honors College Faculty. BA University of Florida 1997; PHD Rutgers University-New Brunswi 2004

Williamson, Kari A 2011 Faculty Research Assistant Fisheries and Wildlife. BA Evergreen State College 1999
Willis, Patrick C 2008 Associate Professor Ext Washington Co Office. BS Portland State University 1983; MS Portland State University 1993
Wilmes, Sophie-Berenice 2016 Research Associate (Post Doc) Earth, Ocean \& Atmo Sci. BS Bangor University 2009; MS Bern Univ of Applied Science 2011; PHD Bangor University 2016
Wilson, Glenn R 2002 Senior Faculty Research Asst I Enviro/Molecular Toxic. BA Southern Oregon University 1977
Wilson, Gregory W 2006 Assistant Professor Earth, Ocean \& Atmo Sci. BS University of Victoria ; MS Oregon State University 2009; PHD Oregon State University 2013
Wilson, Laurie C 2003 Resident Dir-OUS France OSU Global Opportunities. BA Univ of California-Santa Cruz 1993; MA University of Oregon 1996; PHD University of Oregon 2001
Wilson, Tracy 2015 Assistant Professor Central Oregon Exp Sta. BS Univ of TennesseeKnoxville 2006; MS Oklahoma State UnivMain 2011; PHD Oklahoma State Univ-Main 2014
Wiman, Nik 2012 Assistant Professor North Willamette Exp Sta. BS Montana State Univ-Bozeman 1998; MS Montana State Univ-Bozeman 2001; PHD Washington State University 2011
Wimer, Jeffrey A 2003 Senior Instructor II Forest Eng/Resourcs/Mgmt. BS Oregon State University 1983
Winder, Charles 2016 Instructor Sch of Mech/ Ind/Mfg Engr. BS Texas Tech University 1979; MBA University of Houston 1983; PHD Texas Tech University 2012
Winfield, Tammy 2007 Faculty Research Assistant EXT Fam/CommHlth OnCmps. BS Oregon State University 2009; MS Oregon State University 2013
Wing, David J 2002 Advisor-Academic Mathematics. BS Oregon State University 2002; BS Portland State University 2002; MS Oregon State University 2005; PHD Oregon State University 2011
Wing, David J 2002 Instructor Mathematics. BS Oregon State University 2002; BS Portland State University 2002; MS Oregon State University 2005; PHD Oregon State University 2011
Wing, Michael G 1991 Associate Professor Forest Eng/Resourcs/Mgmt. BA University of Oregon 1988; MS University of Oregon 1991; PHD Oregon State University 1998
Wingard, Christopher E 1997 Senior Faculty Research AsstII Earth, Ocean \& Atmo Sci. BS University of Oregon 1993; MS University of Oregon 1996
Winters, Dylan S 2015 Faculty Research Assistant Earth, Ocean \& Atmo Sci. BS Univ of California-Santa Cruz 2014
Winters, Johna M 2013 Faculty Research Assistant Earth, Ocean \& Atmo Sci. BS Beloit College 2007
Winters, Kirsten M 2006 Instructor Sch Elect Engr/Comp Sci. BA Concordia College-Moorhead 1997; MPP Oregon State University 2011; PHD Oregon State University 2015

Wise, Hua Z 2012 Research Associate
Pharmacy. BS Foreign Institution 1992; MS
Foreign Institution 1995; PHD Univ of TexasAustin 2007
Wiseman, Michele S 2009 Faculty Research Assistant Ag Botany/Plant Path. BS Oregon State University 2011; MS Oregon State University 2013
Withee, Shana C 1986 Associate Professor Ext Harney County Office. BS Utah State University 1982; MS Utah State University 1986
Withrow-Robinson, Bradford A 1991 Associate
Professor Ext Benton County Office. BS Oregon State University 1984; MS Oregon State University 1995; PHD Oregon State University 2000
Witzke, Kara A 1998 Instructor Senior Instructor I Acad Prog/Student Aff. BS Biola University 1990; MS Cal State Univ-Fullerton 1993; PHD Oregon State University 1997
Woekel, Erica 2007 Assistant Professor (Clinical) Sch of Bio/Pop Hlth Sci. BS Trinity Western University 2002; MA University of British Columbia 2005; PHD Oregon State University 2011
Wolf, Aaron T 1998 Professor Earth, Ocean \& Atmo Sci University Honors College Faculty. BA San Francisco State University 1985; MS Univ of Wisconsin-Madison 1990; PHD Univ of Wisconsin-Madison 1992
Wolf, Ariella C 2003 Advisor-Academic Microbiology (Science). BS Univ of Alabama at Birmingham 1996; MBA Univ of Alabama at Birmingham 1998; MS Univ of Alabama at Birmingham 2001
Wolfenbarger, Sierra N 2006 Faculty Research Assistant Ag Botany/Plant Path. BS Oregon State University 2010; MS Oregon State University 2014
Wolford, Justin D 2009 Instructor Sch Elect Engr/Comp Sci. BA Lewis \& Clark College 2006; MS Oregon State University 2012
Wolpert, Thomas J 1989 Professor Ag Botany/ Plant Path. BS Univ of Nebraska-Central Offic 1973; MS Purdue University Main Campus 1979; PHD Purdue University Main Campus 1983
Wolsko, Christopher V 2009 Assistant Professor Associate Professor Acad Prog/ Student Aff. BS Univ of Illinois at UrbanaCha 1994; MA Univ of Colorado-Boulder 1998; PHD Univ of Colorado-Boulder 2001
Wolsko, Christopher V 2009 Assistant Professor Sch of Psychological Sci. BS Univ of Illinois at Urbana-Cha 1994; MA Univ of Colorado-Boulder 1998; PHD Univ of Colorado-Boulder 2001
Wong, Carmen 2006 Research Associate Sch of Bio/Pop Hlth Sci. BS U of Minnesota-Central Offices 1993; PHD Stanford University 1999
Wong, Kylee C 2013 Instructor (PAC) Physical ActivityCourses.
Wong, Siew Sun 2011 Associate Professor EXT Fam/CommHlth OnCmps University Honors College Faculty. BS Utah State University 1996; MS Utah State University 1999; PHD Utah State University 2005
Wong, Weng-Keen 2005 Associate Professor Sch Elect Engr/Comp Sci University Honors College Faculty. BS University of British Columbia 1997; MS Carnegie Mellon University 2001; PHD Carnegie Mellon University 2004

Wong, Weng-Keen 2005 Director- RIC Sch Elect Engr/Comp Sci University Honors College Faculty. BS University of British Columbia 1997; MS Carnegie Mellon University 2001; PHD Carnegie Mellon University 2004
Wood, Brian D 2001 Professor Sch of Chem/ Bio/Envr Eng. BS Washington State University 1988; MS Washington State University 1990; PHD Univ of CaliforniaDavis 1999
Wood, Guy H 1985 Professor World Languag \& Cultures. BS Univ of Minnesota-Duluth 1971; MA New York University 1973; PHD Univ of Colorado-Boulder 1984
Wood, Jeffrey M 2009 Faculty Research Assistant Earth, Ocean \& Atmo Sci. BS Oregon State University 2011
Woods, Brian G 2003 Professor Nuclear Engineering University Honors College Faculty. BS University of Virginia 1988; MS Univ of Maryland-College Park 1999; PHD Univ of Maryland-College Park 2001
Wooster, David E 2001 Riparian Entomologist Associate Professor Hermiston Exp Sta. BS University of Nevada-Reno 1988; MS Kansas State University 1990; PHD University of Kentucky 1997
Worley, Aaron E 2012 Consultant-Academic Advisor College of Engineering. MS Portland State University 2009
Wrathall, David J 2016 Assistant Professor Earth, Ocean \& Atmo Sci. BA Brigham Young University Main 2002; MPA University of Georgia 2005; PHD Foreign Institution 2011
Wright, Maria 2001 Faculty Research Assistant Water/Watershed Institut. BA Carleton College 1993; MS Penn State Univ-Main Campus 1996
Wright, Sara D 2007 Senior Instructor I College of Education. BS Oregon State University 1993; MAT Oregon State University 1994
Wu, Junjie 1997 Professor Applied Economics. BS Henan University 1983; MS Zhengzhou University 1987; PHD University of Connecticut 1992
Wu, Qiao 1998 Professor Nuclear Engineering. BS Tsinghua University 1983; MS Tsinghua University 1985; PHD Purdue University Main Campus 1995
Wu, Zhaohui 2003 Professor College of Business. BA Xian Foreign Language Univ 1990; MBA Bowling Green State University 1997; PHD Arizona State University 2003
Wynn, Mark 2011 Instructor (ESL) INTO OSU Program. BA Northern Arizona University 1999; MA University of Arizona 2007
Wysocki, Donald J 1985 Associate Professor (Practice) Ext Umatilla Co Office. BS Univ of Wisconsin-Stevens Pt 1974; MS Washington State University 1977; PHD Iowa State University 1983

## X

Xu, Donghua 2016 Assistant Professor Sch of Mech/Ind/Mfg Engr. BS Jilin University 1998; MS Cal Institute of Tech 2002; PHD Cal Institute of Tech 2015
Xue, Lan 2005 Associate Professor Statistics (Science). BS Univ of Sci \& Tech of China 2000; PHD Michigan State University 2005

Xue, Lei 2011 Assistant Professor Associate Professor Art. BA Beijing Normal University 1996; MA Columbia University-NYC 2003; PHD Columbia University-NYC 2009

## Y

Yalcin, Kaplan B 2006 Senior Instructor I Earth, Ocean \& Atmo Sci University Honors College Faculty. BS Univ of Missouri-Columbia 1998; MS Univ of New Hampshire-Durham 1999; PHD Univ of New Hampshire-Durham 2005
Yalcin, Rebecca A 2006 Instructor Earth, Ocean \& Atmo Sci. BS Juniata College 1999; MS University of Maine 2001
Yan, Qing 2014 Research Associate Ag Botany/ Plant Path. BS Zhengzhou University 2001; PHD China Agriculture Univ 2008
Yanez, Ricardo 2009 Research Associate (Post Doc) Chemistry. BS Uppsala University 1991; PHD Uppsala University 1996
Yang, Haori 2013 Assistant Professor Nuclear Engineering. MS Tsinghua University 2003; MS Univ of Michigan-Ann Arbor 2006; PHD Univ of Michigan-Ann Arbor 2009
Yang, Jimmy 2003 Professor College of Business University Honors College Faculty. BA National Chung Hsing Univ 1993; MBA Saint Louis University-Main 1997; PHD Univ of Cincinnati Main 2003
Yang, Liping 2007 Faculty Research Assistant Chemistry. MS Nankai University 2002
Yang, Sean 2016 Assistant Professor College of Business. MA University at Buffalo, SUNY 2005; MA University at Buffalo, SUNY 2005; PHD University at Buffalo, SUNY 2016
Yang, Wei Q 2001 Associate Professor Ext No Willamette Co Off. BS Northwestern University 1986; MS Penn State Univ-Main Campus 1995; PHD Penn State Univ-Main Campus 1999
Yang, Zhiqiang 1997 Research Associate Forest Ecosyst \& Society. BS Nankai University 1994; MS Chinese Academy of Sciences 1997; PHD Oregon State University 2004
Yavuz, Attila 2014 Assistant Professor Sch Elect Engr/Comp Sci. BS Yildiz University 2004; PHD North Carolina State Univ 2011
Yax, Kristen N 2004 Instructor Sch of Psychological Sci. PHD University of Houston 2010
Ye, Terrance Z 2003 Research Associate Forest Ecosyst \& Society. BA Nanjing Forestry University 1983; MS Nanjing Forestry University 1986; PHD University of Alberta 2003
Yeh, Harry 2003 Professor Sch of Civil/Constr Engr. BS Washington State University 1975; MS Washington State University 1977; PHD Univ of California-Berkeley 1983
Yilma, Solomon 1995 Senior Faculty Research Asst I Crop and Soil Science. BS Alemaya University of Agricult 1981; MS Alemaya University of Agricult 1984
Yim, Solomon C 1987 Professor Sch of Civil/ Constr Engr. BS Rice University 1976; MS Univ of California-Berkeley 1977; MA Univ of California-Berkeley 1981; PHD Univ of California-Berkeley 1983
Yin, Jinhong 2016 Consultant-Academic Advisor Sch Elect Engr/Comp Sci. BS Univ of Texas-Austin 2005

Yin, Xihou 1997 Assistant Professor (Sr Res) Pharmacy. BS South China Agricultural Univ 1983; MS Universite De Franche-Comte 1992; PHD Foreign Institution 1996
Yokochi, Alexandre F 1997 Professor Sch of Chem/Bio/Envr Eng University Honors College Faculty. BS Southern Illinois U-Carbondale 1990; MS So Illinois U Central Admstn 1991; PHD Texas A\&M Univ-College Station 1997
Yoon, Jangho 2011 Assistant Professor Associate Professor Sch of Soc/Bhav Hlth Sci. BS Yonsei University 2000; MPH Univ of N Carolina-Chapel Hill 2002; PHD Univ of N Carolina-Chapel Hill 2007
You, Won Suk 2017 Research Associate (Post Doc) Sch of Mech/Ind/Mfg Engr. BS Sungkyunkwan University 2009; MS Sungkyunkwan University 2011; PHD Sungkyunkwan University 2016
Young, Eugene 2007 Instructor College of Business. BSEE Penn State Univ-Main Campus 1968; MBA Santa Clara University 1977
Young, George 2017 Research Associate Sch of Mech/Ind/Mfg Engr. BS Rensselaer Polytechnic Inst 1990; MS University of Virginia 1993; PHD University of Virginia 1999
Younger, Kathryn G 2013 Instructor Animal \& Rnglnd Sciences. BA Oregon State University ; MS Oregon State University 2016
Yu, Shiao-Ling L 1987 Associate Professor World Languag \& Cultures. BA Caldwell University 1958; MS Boston College 1961; MA University of Kansas 1977; PHD Univ of Wisconsin-Madison 1983
Yu, Tian W 2002 Research Associate Linus Pauling Institute. BS Wuhan University 1984; PHD Univ of Surrey 1997
Yu, Zhen 1999 Faculty Research Assistant Linus Pauling Institute. BS Nankai University 1994; MS Oregon State University 2002; PHD Oregon State University 2005
Yun, Joonkoo 1999 Professor Sch of Bio/Pop
Hlth Sci. BS Sungkyunkwan University 1987; MS Univ of Wisconsin-La Crosse 1992; PHD
Indiana University-Bloomington 1998
Z
Zabriskie, T Mark 1992 Dean Pharmacy
University Honors College Faculty. BS University of Utah 1985; PHD University of Utah 1989

## B

Baccalaureate Core, 28
Baccalaureate Core Courses, Approved, 28
Baccalaureate Core Requirements, 28
Baccalaureate Experience, 27
BA Degree Requirements, 37
Basic Mathematics Teaching Option, 292
Basic Program, 657
Beaver's Digest, 79
Biochemistry and Biophysics (BS, HBS), 690
Biochemistry and Biophysics Courses, 693
Biochemistry and Biophysics Graduate
Minor, 693
Biochemistry and Biophysics (MA, MS,
PhD, MAIS), 693
Biochemistry and Molecular Biology (BS,
CRED, HBS), 691
Biochemistry Option, 666
Biocultural Option, 526
Bioenergy Minor, 196
Bioenergy Option, 190
Bioengineering (BA, BS, CRED, HBA, HBS), 328
Bioengineering (MEng, MS, PhD), 332
BioHealth Sciences (BS, CRED, HBS), 714
BioHealth Sciences Courses, 719
Biological and Ecological Engineering, 323
Biological and Ecological Engineering Courses, 326
Biological and Ecological Engineering
Graduate Minor, 326
Biological and Ecological Engineering
(MEng, MS, PhD), 325
Biological Data Sciences Graduate Minor, 462
Biological Engineering Courses, 333
Biological Physics Option, 684
Biology (BS, HBS), 696
Biology Courses, 707
Biology Major Field Test, 696
Biology Minor, 706
Biology Teaching Option, 293
Biomedical Sciences, Dept. of, 734
Biomedical Sciences Option, 462
Bioproducts Option, 190
Bioresource Research (BS, CRED, HBS), 189
Bioresource Research Courses, 197
Biostatistics Option, 652
Biotechnology Option, 191

Blanket-Numbered Courses, 444
Botany and Plant Pathology Courses, 137
Botany and Plant Pathology, Dept. of, 135
Botany and Plant Pathology Graduate Minor, 137
Botany and Plant Pathology (MA, MS, PhD), 137
Botany (BS, CRED, HBS), 136
Botany Minor, 136
Bug Zoo, 112
Business Administration and Accountancy (MBAA), 241
Business Administration (BA, BS, CRED, HBA, HBS), 217
Business Administration Courses, 244
Business Administration Graduate Minor, 242
Business Administration (MBA, PhD), 238
Business Analytics Graduate Certificate, 242
Business Analytics Option, 238
Business and Entrepreneurship Minor, 236
Business Engineering Option, 361
Business Information Systems (BA, BS,
CRED, HBA, HBS), 220
Business Option, 666

## C

California Transfer Students, 39
Campus-Based Scholarship Program, 657
Campus Field Trips Program, 111
Career Development Center, 75
Career Opportunities in Agricultural Sciences, 116
Career Opportunities in Veterinary
Medicine, 732

Center for Civic Engagement, 76
Center for Genome Research and Biocomputing, 741
Center for Latino/a Studies and Engagement (CL@SE), 742
Center for Research on Lifelong STEM Learning, 742
Center for Teaching and Learning, 87
Center for the Humanities, 742
Centro Cultural César Chávez (CCCC), 77
Certificate Programs, 525
Certificate Programs, College of Liberal Arts, 473
Certified Health Physicist, 374
Changes in Residence Classification, 67
Chemical, Biological and Environmental
Engineering Courses, 334
Chemical Engineering (BA, BS, CRED, HBA, HBS), 329
Chemical Engineering Courses, 334
Chemical Engineering Graduate Minor, 333
Chemical Engineering (MEng, MS, PhD), 332
Chemical Engineering Option, 666
Chemical Physics Option, 684
Chemistry (BA, BS, CRED, HBA, HBS), 663
Chemistry Courses, 668
Chemistry, Dept. of, 663
Chemistry Education Option, 666
Chemistry Graduate Minor, 668

Chemistry (MA, MS, PhD), 668
Chemistry Minor, 668
Chemistry Teaching Option, 293
Childcare and Family Resources, 81
Child Development Option, 637
Chinese Language Courses, 545
Civil and Construction Engineering
Courses, 340
Civil Engineering (BA, BS, CRED, HBA, HBS), 337
Civil Engineering Courses, 340
Civil Engineering-Forest Engineering, 338
Civil Engineering Graduate Minor, 340
Civil Engineering (MEng, MS, PhD, MAIS), 340
Classes During the School Year, 112

## CLEP, 20

Climate and Biosystems Modeling Option, 191
Climate Science Option, 256
Clinically Based Elementary Option, 308
Clinical Mental Health Counseling Option, 304
Clinical Sciences, Dept. of, 737
Clinical Sciences Option, 462
Close to the Customer Project (C2C), 202
Collaboration, 454
Collaborative Learning Center, 87
College and University Teaching Graduate Certificate, 463
College Assistance Migrant Program (CAMP), 87
College of Agricultural Science Courses, 197
College of Agricultural Sciences, 114, 320, 386
College of Business, 200
College of Business Academic and Professional Standards, 202
College of Business Design Collection, 97
College of Business Programs, 214
College of Earth, Ocean, and Atmospheric Sciences, 254
College of Education, 290
College of Engineering Grading and GPA Requirements, 322
College of Engineering Research and
Economic Development Office, 752
College of Liberal Arts, 472
College of Liberal Arts Requirements, 473
College of Pharmacy, 606
College of Public Health and Human Sciences, 614
College of Science, 662
College of Veterinary Medicine, 732
College Requirements, PHHS, 615
College Student Services Administration Courses, 546
College Student Services Administration
(EDM, MS), 533
College Undergraduate Graduation
Requirements, CEOAS, 255
Commitments, ROTC, 655
Communication Courses, 492
Communication Minor, 485
Communication Option, 484
Community College Leadership Option, 302

Community Development and Leadership Option, 600
Community Health Graduate Minor, 640
Comparative Health Sciences Graduate Minor, 463
Comparative Health Sciences (MS, PhD), 462
Comparative International Agriculture
Minor, 117
Computational Molecular Biology Option, 692
Computational Physics Option, 684
Computer Centers, 87
Computer Science, 346
Computer Science (BA, BS, CRED, HBA, HBS), 346
Computer Science Courses, 350
Computer Science Double Degree Option, 347
Computer Science Graduate Minor, 350
Computer Science (MA, MEng, MS, PhD, MAIS), 349
Computer Science Minor, 349
Computer Systems Option, 347
Concurrent and Subsequent Baccalaureate Degrees, 37
Concurrent Master's Degrees, 441
Conservation and Technology Option, 391
Conservation, Resources, and Sustainability Option, 263
Construction Engineering Management (BA, BS, CRED, HBA, HBS), 339
Construction Engineering Management (BA, BS, HBA, HBS), 339
Construction Engineering Management Courses, 344
Contemporary Hispanic Studies Graduate Minor, 535
Contemporary Hispanic Studies (MA), 534
Continuous Enrollment, 442
Cooperative Institute for Marine Resources Studies, 742
Core Academic Courses, 109
Core Themes, 5
Core Values, 4
Corporate Finance Option, 239
Corvallis Community Relations, 81
Counseling and Psychological Services (CAPS), 76
Counseling Courses, 311
Counseling Graduate Minor, 310
Counseling (MCoun, PhD), 303
Course Description, Reading a, 15
Course Numbering System, 16
Course Numbers, 444
Courses Graded on Nonstandard Basis, 444
Course withdrawal, financial aid, 71
Creative Writing Graduate Minor, 593
Creative Writing (MFA), 593
Credential Classifications, 21
Credit for Military Experience, 23
Crime and Justice Option, 578
Crop and Soil Science (BS, CRED, HBS), 141
Crop and Soil Science Courses, 147
Crop and Soil Science, Dept. of, 140
Crop Science Courses, 145, 182
Crop Science Graduate Minor, 145

Crop Science Minor, 144
Crop Science (MS, PhD, MAIS), 144
Cultural/Linguistic Option, 526
Cultural Resource Centers, 77
Current Student Accounts Office Website, 62
Curricula in Science, 662

## D

Daily Barometer, 79
DAMchic, 79
Data Analytics Graduate Certificate, 724
Data Analytics (MS), 723
Degree Partnership Programs - Dual
Admission and Enrollment at Designated
Community Colleges, 23
Degree Requirements, College of Science, 662
Degree Requirements, Honors, 730
Degree Seeking Postbaccalaureate, 21
Degrees with Distinction, 39
Departmental Awards, 70
Departmental Requirements, Math, 673
Department Deadlines, Graduate School, 439
Department of Biochemistry and Biophysics, 690
Department of Fisheries and Wildlife's Birds,
Mammals, and Fishes Collections, 97
Department of Integrative Biology, 696
Department of Microbiology, 713
Design and Human Environment Courses, 209
Design and Human Environment Graduate Minor, 209
Design and Human Environment (MA, MS, PhD, MAIS), 209
Design and Innovation Management (BS, CRED, HBS), 223
Design Courses, 212
Design Management Option, 225
Design Option, 364
Dietetics Option, 618
Difference, Power, and Discrimination Courses, 32
Difference, Power and Discrimination (DPD) Program, 88
Digital Communication Arts (BA, BFA, BS, CRED, HBA, HBFA, HBS), 481
Diploma Application, 445
Disability Access Services, 82
Discovery Days, 112
Dismissal from Graduate School, 446
Dissertation/Thesis, 39
Diversity and Cultural Engagement, 76
Diversity and Cultural Engagement office, 2
Division of Extended Campus, 105
Doctor of Education Requirements, 452
Double Degrees, 38, 114, 472
Dropping Courses and the Census Date, 71
Drop/Withdraw Refunds, 62
Dual Majors, 441
Dual (or Multiple) Majors, 38
Dual Thesis Requirements, 470
DVM and MPH Dual Degree, 733

## E

Early Assurance Program, Pharmacy, 606
Early Childhood Development and
Education Minor, 639
Early Childhood/Elementary Teaching Option, 294
Earning a Degree at Oregon State
University, 27
Earth Sciences (BS, CRED, HBS), 256
Earth Sciences Minor, 269
Earth Systems Option, 263
Ecampus - Online degrees and courses, 105
Ecampus Research Unit, 106
Ecampus Success Counseling, 88
Ecological and Sustainable Horticultural
Production Option, 174
Ecological Engineering (BS, CRED, HBS), 323
Ecological Landscape and Urban Forestry Option, 175
Ecological Restoration Option, 391
Ecology Option, 699
Economics (BA, BS, CRED, HBA, HBS), 574
Economics Courses, 580
Economics Minor, 578
Educational Opportunities Program, 2, 78
Educational Opportunities Program (EOP), 88
Education (BA, BS, HBA, HBS), 291
Education Courses, 313
Education (EdD, EdM, MS, PhD, MAIS), 305
Education Graduate Minor, 310
Education/K-12 Outreach/Chemistry
Outreach, 112
Education Minor, 301
Electrical and Computer Engineering, 345
Electrical and Computer Engineering (BS, CRED, HBS), 348
Electrical and Computer Engineering Courses, 354
Electrical and Computer Engineering Graduate Minor, 350
Electrical and Computer Engineering
(MEng, MS, PhD), 350
Elementary Option, 308
Eligibility, 443
Eligibility/Application Procedures, 68
Emergency Loans, 64
Emeritus Faculty, 758
Energy Systems Engineering, 359
Energy Systems Engineering (BS, CRED,
HBS), 359
Energy Systems Engineering Courses, 365
Engineering Management Option, 363, 364
Engineering Profession, 320
Engineering Science, 321
Engineering Science Courses, 384
English (BA, CRED, HBA), 590
English Courses, 593
English Graduate Minor, 593
English Language Exceptions, 437
English (MA, MAIS), 593
English Minor, 591
Enology and Viticulture Option, 167
Entomology Courses, 151
Entomology Graduate Minor, 151

Entomology (MA, MS, PhD), 151
Entomology Minor, 150
Entomology Option, 145, 182
Entomology Program, 150
Entrance and Exit Interview, 72
Entrepreneurship for Business Majors Option, 219
Environmental Agriculture Option, 264
Environmental and Energy Politics Option, 576
Environmental and Molecular Toxicology, Dept. of, 152
Environmental and Natural Resource
Sociology Option, 578
Environmental and Occupational Health Minor, 620
Environmental and Occupational Health Option, 652
Environmental Arts and Humanities Courses, 510
Environmental Arts and Humanities Graduate Minor, 604
Environmental Arts and Humanities (MA), 603
Environmental Chemistry Option, 191, 667
Environmental Economics and Policy (BS, HBS), 129
Environmental Engineering (BA, BS, CRED, HBA, HBS), 331
Environmental Engineering Courses, 336
Environmental Engineering Graduate Minor, 333
Environmental Engineering (MEng, MS, PhD, MAIS), 332
Environmental Engineering Minor, 331
Environmental Engineering Option, 339
Environmental Health Sciences Center, 743
Environmental Policy and Economics Option, 264
Environmental Science Education Option, 265
Environmental Sciences, 455
Environmental Sciences (BS, CRED, HBS), 260
Environmental Sciences Courses, 279, 456
Environmental Sciences Graduate Minor, 456
Environmental Sciences (MA, MS, PhD, PSM), 455
Environmental Sciences Minor, 269
Environmental Water Resources Option, 265
Epidemiology Option, 652
Equal Opportunity, 437
Equine Option, 122
Equivalent Courses List, 16
Ethnic Studies, 524
Ethnic Studies (BA, BS, CRED, HBA, HBS), 527
Ethnic Studies Courses, 546
Ethnic Studies Graduate Minor, 535
Ethnic Studies Minor, 530
Ettihad Cultural Center (ECC), 77
Evaluation and Transferability of Credit, 20
Evaluation Process, 17
Evidence of Financial Dependency, 66
Examinations, College of Veterinary Medicine, 734
Exceptions to the English proficiency test requirement, 22
Exemption from Nonresident Tuition, 50

Exercise Physiology Minor, 620
Experience Abroad, 470
Extended Admission (Admission Appeals), 18

## F

Facilities, INTO OSU, 108
Faculty, 758, 767
Fairbanks Art Gallery, 98
Family and Community Health, 90
Family and Consumer Sciences Teacher Training, 637
Family and Consumer Sciences Teaching Option, 295
Family and Medical Leave, 443
Federal Direct Ford Loan Program, 69
Federal Programs (financial aid), 69
Feed the Future Innovation Lab for
Collaborative Research on Aquaculture \&
Fisheries (AquaFish Innovation Lab), 753
Fee Payment Obligation, 62
Fees and Residency Requirements, 74
Fees, Student Health, 84
Fermentation Science Minor, 169
Fermentation Science Option, 168
Field Training, 656
Film Studies Courses, 597
Film Studies Minor, 592
Final Examination, 448, 452
Finance (BA, BS, CRED, HBA, HBS), 225
Finance Courses, 249
Financial Aid, 64
Financial Aid and Scholarships, 68
Financial Aid Eligibility, 447
Financial Aid for Graduate Students, 453
Financial Planning Graduate Certificate, 242
Fine Arts Print Collection, 98
First-Year Experience, 2
Fish and Wildlife Conservation Option, 392
Fisheries and Wildlife Administration
(PSM), 158
Fisheries and Wildlife, Dept. of, 155
Fisheries and Wildlife Sciences (BS, HBS), 156
Fisheries and Wildlife Sciences Minor, 158
Fisheries Management Graduate Certificate, 160
Fisheries Science Graduate Minor, 160
Fisheries Science (MS, PhD, MAIS), 160
Fisheries and Wildlife Courses, 161
Food Economics and Policy Minor, 130
Food in Culture and Social Justice
Certificate, 536
Food in Culture and Social Justice Courses, 549
Food in Culture and Social Justice Graduate Minor, 535
Food Manufacturing Minor, 169
Food Quality Option, 192
Food Science and Technology (BS, CRED, HBS), 166
Food Science and Technology Courses, 170
Food Science and Technology, Dept. of, 166
Food Science and Technology Graduate Minor, 170
Food Science and Technology (MS, PhD), 170

Food Science Minor, 170
Food Science Option, 169
Food Technology Minor, 170
Foreign Languages and Literatures Graduate
Minor, 535
Forensics, 79
Forensic Science Option, 667
Forest Ecosystems and Society Courses, 402
Forest Ecosystems and Society, Dept. of, 387
Forest Ecosystems and Society Graduate Degree Programs, 388
Forest Ecosystems and Society (MF, MS, PhD, MAIS), 399
Forest Ecosystems Option, 392
Forest Engineering, 322
Forest Engineering (BS, CRED, HBS), 408
Forest Engineering - Civil Engineering (BS, CRED, HBS), 410
Forest Engineering Courses, 416
Forest Engineering, Resources and
Management, Dept. of, 407
Forest Engineering Undergraduate Program, 408
Forest Operations Management Option, 414
Forest Research Laboratory Institute for
Working Forest Landscapes, 753
Forest Restoration and Fire Option, 414
Forestry and Natural Resources, 90
Forestry (BS, HBS), 411
Forestry Courses, 418
Forestry Minor, 415
Forestry Undergraduate Program, 407
Forests and Climate Change Graduate
Certificate, 401
Fraternities and Sororities (Greek Life), 82
Free-Choice Learning Option, 306
French (BA, CRED, HBA), 528
French Courses, 550
French Minor, 530
Function (Institutional Research), 96

## G

General Anthropology Option, 527
General Business Option, 219
General Engineering, 322
General English Program, 110
General Horticulture Option, 176
General information, 10
General International Degree Requirements, 469
General Military Course (GMC), 655
General Requirements, 446
General Science Courses, 719
Genetics Option, 700
Genomics/Bioinformatics Option, 192
Geographic Information Science Certificate, 276
Geographic Information Science Graduate Certificate, 276
Geography and Geospatial Science (BS,
CRED, HBS), 258, 265
Geography Courses, 282
Geography Graduate Minor, 273
Geography (MA, MS, PhD), 272
Geography Minor, 270

Geography Option, 256
Geological Collections, 98
Geology Graduate Minor, 273
Geology (MA, MS, PhD, MAIS), 272
Geology Minor, 270
Geology Option, 257
Geophysics Courses, 285
Geophysics Option, 685
Geosciences Courses, 280
German (BA, CRED, HBA), 528
German Courses, 552
German Minor, 530
Gerontology Certificate, 641
Gerontology Graduate Minor, 640
Global Development Studies Minor, 530
Global Diversity Initiatives, 77

administrative-leadership.

## OSU BOARD OF TRUSTEES

The Board of Trustees of Oregon State University governs Oregon's only university with a statewide presence and helps guide OSU's mission to serve the state and the needs of its citizens in a growing global economy.

The board harnesses the talent and energy of education, civic and business leaders to help guide OSU's future as a leader and innovator in excellence in teaching, discovery and service as an internationally recognized public research university. The first 14 members of the board were confirmed by the Oregon Senate in November 2013. OSU President Ed Ray is also a trustee (ex officio and non-voting), for a total of 15 members.
The following list contains the members of the Oregon State University Board of Trustees, as of January 1, 2017:

- Mike Bailey, professor of computer science, OSU Corvallis
- Mark Baldwin, analyst programmer, OSU, Corvallis
- Patricia Bedient, executive vice president/chief financial officer (retired), Sammamish, WA
- Rani Borkar, vice president, OpenPOWER Development, IBM, Beaverton
- Julia Brim-Edwards, senior director, government and public affairs, Nike, Beaverton
- Darald Callahan, president (retired), Chevron Chemical Co., San Rafael, CA
- Michele Longo Eder, attorney (retired), Newport
- Paul Kelly, Jr., attorney (retired), Portland
- Brett Morgan, OSU student
- Laura Naumes, vice president, Naumes Inc., Medford
- Preston Pulliams, president, Gold Hill Associates, Jackson, MS
- Edward Ray, president, Oregon State University, Ex Officio
- Patricia Reser, chairman of the board, Reser's Fine Foods, Inc., Beaverton
- Kirk Schueler, chief executive officer and president, Brooks Resources Corporation, Bend
- Michael Thorne, wheat farmer, Pendleton
For further information, go to http:// leadership.oregonstate.edu/trustees.

\& Atmospheric Sciences, 2019
TBA - Student Member, 2018

## Ex-officios:

Jennifer Dennis - Graduate School
Chong Fang - Graduate Admissions Committee
Dorthe Wildenschild - Graduate School
Graduate Council Representation
(appointed annually):
Online Education Committee - TBA (ExOfficio, Non-voting), 2018
David Bernell - Executive Committee Liaison
Current and past Graduate Council
membership and information can be found at http://senate.oregonstate.edu/ graduate-council

## EQUAL OPPORTUNITY

Oregon State University, in compliance with state and federal laws and regulations, does not discriminate on the basis of age, color, disability, gender identity or expression, genetic information, marital status, national origin, race, religion, sex, sexual orientation, or veteran status in any of its policies, procedures, or practices. This nondiscrimination policy covers admission and access to, and treatment and employment in, university programs and activities, including but not limited to academic admissions, financial aid, educational services, and employment. Inquiries regarding the university's equal opportunity policies may be directed to the Equal Opportunity and Access, 541-737-3556 or visit http://eoa.oregonstate. edu/.
