

Correction to “Dynamics of mean and subtidal flow on the New England shelf”

R. Kipp Shearman and Steven J. Lentz

Received 22 December 2006; published 16 February 2007.

Citation: Shearman, R. K., and S. J. Lentz (2007), Correction to “Dynamics of mean and subtidal flow on the New England shelf,” *J. Geophys. Res.*, *112*, C02015, doi:10.1029/2006JC004074.

[1] In the paper “Dynamics of mean and subtidal flow on the New England shelf” by R. K. Shearman and S. J. Lentz (*Journal of Geophysical Research*, *108*(C8), 3281, doi:10.1029/2002JC001417) an error was recently identified. The dates defining fall, winter, and spring are slightly

different from those given in the paper. To correct this, the first sentence of paragraph 24 should read as follows: Seasonal mean currents are computed for the fall (04 August 1996 to 07 December 1996), winter (07 December 1996 to 06 April 1997), and spring (06 April 1997 to 14 June 1997).
