Keywords: Agr-imek, abamectin, Pyramite, pyridaben, Apollo, clofentezine, Savey, hexythiazox, Vendex, fenbutatin-oxide, Vydate, oxamyl, Kelthane, dicofol, Acramite, bifentazate, twospotted spider mite, *Tetranychus urticae*, chemical control, acaricides, miticides, pear.

Abstract: Acaricides registered for use on pear to control twospotted spider mites (TSM) were evaluated for their efficacy when used during the foliar season. Single tree replicates were sprayed by air blast sprayer, and pre and post-treatment counts were made to determine the performance of the materials applied. Acramite, registered in 2001 for the first time under a Section 18 in Oregon, provided the best control of TSM in this test.
