## KEYWORDS

stroke, kinematics, kinetics, clinical test, self-evaluation questionnaires

## A corrigendum on

[Correlation between kinetic and kinematic measures, clinical tests and subjective self-evaluation questionnaires of the affected upper limb in people after stroke](#)

by Baer, R., Feingold-Polak, R., Ostrovsky, D., Kurz, I., and Levy-Tzedek, S. (2023). *Front. Neurosci.* 17:1264513. doi: 10.3389/fnins.2023.1264513

In the published article, there was an error in the Funding statement. The statement mistakenly indicated that no financial support was received for the research, authorship, and/or publication of the article. The correct Funding statement appears below.

## Funding

The author(s) declare financial support was received for the research, authorship, and/or publication of this article. The research was partially supported by Ben-Gurion University of the Negev through the Agricultural, Biological, and Cognitive Robotics Initiative, the Marcus Endowment Fund, and the Paul Ivanier Center for Production Management. Financial support was also provided by the Rosetrees Trust, the Borten Family Foundation, the Robert Bergida bequest, and the Consolidated Anti-Aging Foundation. Further support was provided by grant no. 3000017258 from the Chief Scientist Office of the Israeli Ministry of Health, and by the National Insurance Institute of Israel.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
