## Administrative history / Biographical sketch

---

### Note

Dr. Desmond was born in the Hebrides Islands of Scotland in 1916. Her family immigrated to the United States when she was 7. She attended Smith College on scholarship, graduating in 1938, and obtained her M.D. in 1942 from Temple School of Medicine. Following her internship and six months of pediatric residency, Dr. Desmond joined the U.S. Naval Reserve as a physician and actively served through World War II, including time at Pearl Harbor.

Postwar, she completed her pediatric training and a fellowship in newborn research. In 1948, she moved to Houston, Texas to join the faculty of Baylor College of Medicine in the Pediatric Department which at that time consisted of four faculty members and two residents. In 1950, Baylor became affiliated with the former Jefferson Davis Hospital and a newborn service was established. Dr. Desmond became the first head of the newborn care section in the Pediatric Department.

In 1956, Dr. Desmond and two other physicians were alarmed at the death rate from staphylococcus infections at Jefferson Davis Hospital, the then city-county hospital. The doctors declared the nursery unsafe and closed it to any more admissions. Shortly thereafter, Dr. Desmond began the first neonatal intensive care unit in the nation at the hospital. Dr. Desmond also worked with infants born with drug addictions. She developed the transitional nursery in which at risk infants were under close observation for potential medical problems. Infants who were seriously ill were placed in a separate unit, which became the first newborn intensive care unit in the southwestern states of the United States. Until Jefferson Davis Hospital closed, Dr. Desmond served as director of nurseries and as pediatric coordinator of its Maternal and Infant Care project.

During the outbreak of rubella in 1963-64, Dr. Desmond worked with about 200 affected infants and children. She recognized that many at-risk infants, whom medical care was able to save, developed conditions that required comprehensive evaluation and long-term care. In 1973 she became the director of the Leopold Meyer Center for Developmental Pediatrics at Texas Children's hospital. During this

period she was on the team which cared for David Vetter, the "Bubble Boy." The Desmond Neonatal Developmental Follow-up Clinic, named for Dr. Desmond, was established in 1994 to provide longitudinal follow-up and neurodevelopmental assessments for pre-term babies.

Dr. Desmond received the Apgar Award from the American Academy of Pediatrics; the Stanley Kalinski Award from the Texas Pediatric Society; and awards from Smith College and Temple University among others.

Dr. Desmond married James L. Desmond who she met while serving in the Naval Reserve. They were married after the war and then moved to Houston, Texas, where her husband had a dental practice until his death in 1969. She and her husband had two children. Dr. Desmond passed away in 2003.

## **Custodial history**

Deed-3

---

## **Scope and content**

---

The Murdina MacFarquhar Desmond, MD papers contains photographs of Dr. Desmond as a medical student, Naval officer, and a faculty member of Baylor College of Medicine. The main portion of her papers deal with her work at Jefferson Davis Hospital, including grants she received from the John A. Hartford Foundation, and at Texas Children's Hospital. Some background material and photographs of the illustrations she used in the book, *Newborn Medicine and Society: European Background and American Practice (1750-1975)*, are included. Reprints of her journal articles are available. She donated many books on the newborn and on pediatrics. These books have been cataloged and are available through the HAM-TMC Library's online catalog.

---

## **Notes**

---

### **Physical condition**

No restrictions.

### **Immediate source of acquisition**

Dr. Desmond donated the items in the collection in 1996.

### **Arrangement**

Arrangement Series I - Personal information and material for books and articles. Series II - Professional information. Series III - Reprints.

### **Restrictions on access**

This collection is available for research, with some exceptions.

### **Conditions governing use**

Copyright restrictions may apply. Some materials are restricted. Consult an archivist.

## Finding aids

Online.

## Related material

Books which were donated with the collection were cataloged and placed in the John P. McGovern Historical Collection which is searchable through the HAM-TMC Library's online catalog.

## Accruals

No accruals are expected for this collection.
