

## **Welcome!**

Thank you for joining us at Providence College's 14th Annual Celebration of Student Scholarship and Creativity. More than **170 students (126 projects)** were nominated by faculty from the throughout the college to showcase their exceptional research and creative work.

The Celebration captures so much of what makes the PC academic experience distinctive – from in-depth student research and creativity to faculty mentorship to tangible outcomes. It also aligns with the college's *PC200* Strategic Plan, which calls for us to provide every student opportunities to participate in high-impact educational practices, such as undergraduate research and creative work, under the tutelage of a faculty mentor.

I want to congratulate all the talented students on their achievements and reiterate my gratitude for all the faculty members who have provided their expertise and served as mentors. Our students will benefit from these experiences for years to come.

Sincerely,

Sean F. Reid, Ph.D.

Provost & Senior Vice President for Academic Affairs

The Center for Engaged Learning is honoring the incredible contributions Dr. Steve Mecca made to establishing and growing the culture of undergraduate research on our campus. Over his career, Dr. Mecca mentored hundreds of student researchers from a wide variety of disciplines. Notably, his students presented 73 projects at the Annual Celebration of Student Scholarship and Creativity over the past decade.

Continuing with tradition, projects reflecting one of the four themes that the late Dr. Steve Mecca was passionate about - Education, Health, Sanitation, and/or Technology - have been designated in his honor with a \*.
