The printing of this thesis was financially supported by the Graduate School of Medical Sciences and the University of Groningen.

The research described in this thesis was carried out in the Cardiovascular Regenerative Medicine Research Group (CAVAREM) at the University Medical Center Groningen (UMCG), the University of Groningen, and the Physiology and Biochemistry Research Group (PHYSIS) at the University of Antioquia. Financially support was obtained from the UMCG, University of Groningen, and the Colombian Ministry of Science and Technology (MINCIENCIAS) grant 111577757581.

Extracellular Vesicles as Masters of Endothelial Plasticity

Bridging the Gap Between Health and Disease

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. J.M.A.Scherpen
 and in accordance with
 the decision by the College of Deans

and

to obtain the degree of PhD at the
 University of Antioquia
 on the authority of the
 Rector Prof. John Jairo Arboleda Céspedes
 and in accordance with
 the decision by the degree jury.

Double PhD degree

This thesis will be defended in public on
 Wednesday 10 January 2024 at 12.45 hours

by

Elizabeth Orozco García

born on 14 May 1983
 in Medellín, Colombia.

Supervisors

Prof. M.C. Harmsen

Prof. R. Narvaez Sanchez

Assessment Committee

Prof. R.H. Henning

Prof. P.S. Hiemstra

Prof. C. Saucier

Prof. S. Black

Table of Contents

Chapter 1	General Introduction, Aims & Thesis Outline	9
Chapter 2	Endothelial Plasticity Across PTEN and Hippo Pathways: A complex Hormetic Rheostat Modulated by Extracellular Vesicles. <i>Translational Oncology, 2023 doi: 10.1016/j.tranon.2023.101633</i>	25
Chapter 3	Hypoxia Influences the Cargo and Increases Rigidity of Cervical Cancer Cells-Derived Extracellular Vesicles Promoting Endothelial Uptake. Submitted 2023	63
Chapter 4	Angiogenesis is Promoted by Cervical Carcinoma-Derived Extracellular Vesicles Depending on the Endothelial Cell Environment. Accepted in <i>Vascular Pharmacology</i> , 2023	95
Chapter 5	miRNA Signature in Cervical Carcinoma-Derived Extracellular Vesicles (EV). EV-miR-23b-3p is Necessary but Not Sufficient to Induce the Angiogenic Switch in Endothelial Cells. Submitted 2023	121
Chapter 6	Quantitative Proteomics of Extracellular Vesicles from Hypoxic Cervical Carcinoma Cells Reveals Metabolic Reprogramming Related to the Angio-Metabolic Switch. Manuscript in preparation	149

Chapter 7	Extracellular Vesicles from Adipose tTissue-Derived Stromal Cells Enriched with Pro-Angiogenic microRNA Stimulate Angiogenesis in a Scaffold-Dependent Fashion. <small>Submitted 2023</small>	165
Chapter 8	General Discussion & Future Perspectives	191
Appendices	English Summary	209
	Nederlandse sammevatting	210
	Resumen	212
	Acknowledgments/Agradecimientos	214
	About the Author	216
	List of Publications	223
		224
