Optimized detection, visualization, and quantification of the coronary artery plaque – which pathway?

Magdalena M. Dobrolinska

Optimized detection, visualization, and quantification of the coronary artery plaque

which pathway?

Magdalena M. Dobrolinska

Optimized detection, visualization, and quantification of the coronary artery plaque - which pathway?

The printing of this thesis was financially supported by the Library of the University of Groningen.

Cover design: Martyna A. Dobrolinska
Layout: Roy Sanders
Printed by: Drukomatic

university of groningen

Optimized detection, visualization, and quantification of the coronary artery plaque – which pathway?

PhD thesis

to obtain the degree of PhD of the
University of Groningen
on the authority of the
Rector Magnificus Prof. J.M.A. Scherpen
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Monday 8 January 2024 at 14:30 hours

by

Magdalena Marzena Dobrolinska

born on 20 January 1993

Supervisors
Prof. R.H.J.A. Slart
Prof. W. Wojakowski

Co-supervisors
Dr. M.J.W. Greuter
Dr. N.H.J. Prakken

Assessment Committee
Prof. M. Tendera
Prof. P. van der Meer
Prof. A.W.J.M. Glaudemans

Financial support of this thesis by European Association of Cardiovascular Imaging (EACVI) Research grant 2020 and Club “30” Polish Cardiac Society Research Grant 2019, and Dutch Heart Foundation are greatly appreciated.

If you want to go fast,

Go alone.

If you want to go far,

Go together.

Contents

Chapter 1	General introduction and outline of the thesis	9
	Part I – PRECLINICAL RESEARCH Optimisation and improvement of coronary artery calcium scoring	
Chapter 2	Systematic Assessment of Coronary Calcium Detectability and Quantification on Four Generations of CT Reconstruction Techniques: a Patient and Phantom Study	23
Chapter 3	Classification of moving coronary calcified plaques based on motion artifacts using convolutional neural networks: a robotic simulating study on influential factors	47
Chapter 4	Radiation dose optimization for photon-counting CT coronary artery calcium scoring for different patient sizes: a dynamic phantom study	71
Chapter 5	Feasibility of virtual non-iodine coronary calcium scoring on dual source photon-counting coronary CT angiography: a dynamic phantom study	87
Chapter 6	Vendor independent coronary calcium scoring improves individual risk assessment - the Multi-Ethnic Study of Atherosclerosis (MESA)	109
	Part IIa CLINICAL RESEARCH How to derive valuable clinical information from low dose CT scans?	
Chapter 7	Performance of visual, manual, and automatic coronary calcium scoring of cardiac ^{13}N-ammonia PET/low dose CT	143
Chapter 8	Automated cardiovascular risk categorization through AI-driven coronary calcium quantification in cardiac PET acquired attenuation correction CT	167
Chapter 9	Added value of visual and automatic coronary calcium scoring from low dose CT ^{15}O-water PET scans to identify patients at high risk of cardiac events	193
	Part IIb CLINICAL RESEARCH Invasive coronary artery plaque assessment	
Chapter 10	The influence of HDL-C on maximal lipid core burden indexing TCFA lesions as assessed by Near Infrared Spectroscopy	221
Chapter 11	Performance of integrated near-infrared spectroscopy and intravascular ultrasound (NIRS-IVUS) system against Quantitative Flow Ratio (QFR).	237
	Part IIc CLINICAL RESEARCH The puzzle of aortic stenosis and coronary artery disease	
Chapter 12	Myocardial perfusion and coronary physiology assessment of microvascular dysfunction in patients undergoing transcatheter aortic valve implantation – rationale and design	259
Chapter 13	Summary and Discussion	275
Chapter 14	Dutch Summary	297
	Acknowledgements	307
	Publications	315
	Curriculum vitae	321
