CONTENTS

Chapter 1	9
General introduction	
Chapter 2	39
Lack of <i>Tgfb1</i> and <i>Acvr1b</i> synergistically stimulates myofibre hypertrophy and accelerates muscle regeneration	
Chapter 3	87
Skeletal muscle phenotype-specific effects of ACVR1B and TGFBR1 receptor signalling on muscle transcriptome, force generation and metabolism	
Chapter 4	133
Synergistic short-term and long-term effects of TGF- β 1 and 3 on collagen production in differentiating myoblasts	
Chapter 5	149
Reduced myotube diameter induced by combined inhibition of transforming growth factor- β type I receptors <i>Acvr1b</i> and <i>Tgfb1</i> is associated with enhanced β 1-syntrophin expression	
Chapter 6	175
General discussion	
Chapter 7	203
Summary	
Appendices	
Author contributions	209
Curriculum vitae	211
Acknowledgements	212
