

# The VIASM-HANU BMF Class Paper Solved Kingfisher's Food Worry

*Quynh-Yen Thi Nguyen*

April 20, 2024

Following the joint efforts by participants in the VIASM-HANU BMF Class, part of the Conference on Innovations of Mathematics Teaching in Social Sciences co-organized by the Vietnam Institute for Advanced Study in Mathematics (VIASM) and Hanoi University (HANU) in early November 2023, a joint manuscript was submitted to the [VMOST Journal of Social Sciences and Humanities](#).

The peer review process was successfully completed in February, and the paper was officially published today (see the screenshot below).

The screenshot shows the journal's website with a dark navigation bar at the top containing links for SECTIONS, ABOUT, PEER-REVIEW PROCESS, ONLINE JOURNAL SYSTEM, CURRENT PUBLICATIONS, ARCHIVES, and ACCEPTED ARTICLES. The main content area features the article title: "Effects of water scarcity awareness and climate change belief on recycled water usage willingness: Evidence from New Mexico, United States". Below the title is a list of authors: Minh-Hoang Nguyen\*, Duc Manh Doan, Hanh Kim Dong, Van Thi Nguyen, Hanh Hong Dao, Duy Duc Trinh, Nhai Thi Nguyen, Kim Nguyet Kieu, Nhung Quynh Thi Le, Ha Thu Thi Hoang, Van Ngoc Thi Dam, Dung Hoang Do, Thu Thi Vu, Tu That Ton, Nhi Yen Nguyen, Nhi Van Nguyen, Thu Tai Le, Hoa Tuan Pham, and Binh Thi Khuat. To the right of the author list is a blue cover image for the journal, "VMOST Journal of Social Sciences and Humanities", dated April 2024, Volume 06 Number 1, published by the Vietnam Ministry of Science and Technology. Below the cover is a PDF icon. Further right, there are sections for "All submissions screened by" featuring the iThenticate logo, "We are member of" featuring the Crossref logo, and "Indexing and Abstracting" featuring the Google Scholar logo.

The SM3D community wholeheartedly congratulates all the article's authors on their publishing event. The [BMF analytics](#) [2] had been used efficiently and effectively during the preparatory process leading to the desired outcome.

Since the paper deals with the problem of water scarcity and climate change, [Mr. Kingfisher](#) can now be assured that more researchers have been spending time to sort out his long-standing worry about his fishing territory, de facto the food security problem [3].
