Dear editorial team

This I sent you my final corrected manuscript entitled "Calcium Carbonate of Blood Cockle (*Anadara granosa*) Shells induced VEGF-A Expression in Dentin Pulp Complex: An In Vivo Study" ID MJMHS-2021-0655

I Have revised the manuscript as reviewer suggestion below

Reviewer: 1

Comments to the Author

Overview and general recommendation:

I would like to congratulate the authors for the revision of the manuscript.

My minor comments are listed as below:

1. Methods

Please explain the methods in determining the VEGF expression using immunohistochemical staining slides. How to measure the VEGF expression? Any formula or calculations? Please state it clearly.

2. Results

Page 2: Please put Figure 2 in the figure title. The author missed the label of Day 1 in the figures. Please describe the figures in the legends or manuscript.

Page 3: Please put Figure 3 in the figure title. Please describe the figures in the legends or manuscript.

3. Discussion

Page 14, line 28: The abbreviation of Alkaline Phosphatase (ALP) already appeared in line 26. Please either use alkaline phosphatase or ALP in line 28.
