### Occupational contact dermatitis among healthcare workers in the COVID-19 Isolation ward

Cita Rosita Sigit Prakoeswa, Damayanti, Sylvia Anggraeni, Menul Ayu Umborowati, Sawitri, Astindi  
1918-1926

Abstract viewed: **51** PDF downloaded: **25**  
[DOI : 10.53730/ijhs.v6nS9.12856](https://doi.org/10.53730/ijhs.v6nS9.12856)

PDF

### Analysis of the ZNT8, GAD65, HLA-DQA1, HLA-DQB1, and C-peptides in Indonesian children with

Nur Rochmah, Muhammad Faizi, Yuni Hisbiyah, Rayi Kurnia Perwitasari, Tyas Maslakhatien Nuzula  
1927-1936

Abstract viewed: **51** PDF downloaded: **32**  
[DOI : 10.53730/ijhs.v6nS9.12857](https://doi.org/10.53730/ijhs.v6nS9.12857)

PDF

### Chemical castration with silver nitrate and potassium permanganate of local male bucks

Dler Muwafaq Shukur, Qayes Taref Ali  
1937-1955

Abstract viewed: **50** PDF downloaded: **29**  
[DOI : 10.53730/ijhs.v6nS9.12836](https://doi.org/10.53730/ijhs.v6nS9.12836)

PDF

### Preparation and identification of green polymers towards the production of sustainable latex from $\beta$ -

Fouad M. Hussein, Ali S. Jemal

[DOI : 10.53730/ijhs.v6nS9.12869](https://doi.org/10.53730/ijhs.v6nS9.12869)

PDF

### Macronutrient intake pattern among type 2 diabetic adults visiting a tertiary care hospital of rural V

A cross sectional study

Chhaya S, Soni N, Patel M

2095-2099

Abstract viewed: **43** PDF downloaded: **20**  
[DOI : 10.53730/ijhs.v6nS9.12871](https://doi.org/10.53730/ijhs.v6nS9.12871)

PDF

### Improving the quality of counseling services for students based on digital applications in line with the Curriculum

B. M. A. S. Anaconda Bangkara, Irma Chmawati Maruf, Abdul Latif, Hasna Hashibah, Ikhsan

2100-2114

Abstract viewed: **72** PDF downloaded: **26**  
[DOI : 10.53730/ijhs.v6nS9.12875](https://doi.org/10.53730/ijhs.v6nS9.12875)

PDF

### Knowledge, attitude and acceptance of amputation among amputee patients admitted in National Or

Justin Agorye Ingwu, Happiness Ogadi Anikwe, Chinenye Anehkhatai, Hope Opara, Patricia Okpala  
2115-2128

Abstract viewed: **50** PDF downloaded: **17**  
[DOI : 10.53730/ijhs.v6nS9.12881](https://doi.org/10.53730/ijhs.v6nS9.12881)

PDF

### Study of endothelial cell loss in small incision cataract surgery (SICS)

Sujata R. Charel, Hetaj K. Sheth, Astha Domadia, Jash Bavishi, Niyant N. Pandya  
2129-2137

Abstract viewed: **73** PDF downloaded: **25**  
[DOI : 10.53730/ijhs.v6nS9.12886](https://doi.org/10.53730/ijhs.v6nS9.12886)

PDF

### Screening of catharanthus roseus stem extract for anti-ulcer potential in wistar rat

Suraj Mandal, Sweta Goel, Monika Saxena, Polly Gupta, Jyoti Kumari, Prashant Kumar, Mukesh Ku  
2138-2170

[DOI : 10.53730/ijhs.v6nS9.12840](https://doi.org/10.53730/ijhs.v6nS9.12840)

PDF

### Unrealistic optimism

Zinah Ali Salih, Hanan Majiad Noor eabd

1998-2011

Abstract viewed: **30** PDF downloaded: **17**  
[DOI : 10.53730/ijhs.v6nS9.12843](https://doi.org/10.53730/ijhs.v6nS9.12843)

PDF

### Neurofinance: the new world of finance based on human psychology and individual investment behav

Budheshwar Prasad Singhraul, Yashasvi Batwe

2012-2024

Abstract viewed: **48** PDF downloaded: **29**  
[DOI : 10.53730/ijhs.v6nS9.12775](https://doi.org/10.53730/ijhs.v6nS9.12775)

PDF

### Genomics in oral cancer

A systematic review

Shrikanth Muralidharan, Swapna Patankar, Yashodhara Shah, Prashant Rao, Prasad Karande

2025-2037

Abstract viewed: **51** PDF downloaded: **47**  
[DOI : 10.53730/ijhs.v6nS9.12776](https://doi.org/10.53730/ijhs.v6nS9.12776)

PDF

### The effect of endorphin massage on reducing the intensity of childbirth pain Kala I in maternity mot

Putu Ayu Ratna Darmayanti, Ni Komang Sri Ariani, Wulan Tertiana Santhi

2038-2045

Abstract viewed: **41** PDF downloaded: **23**  
[DOI : 10.53730/ijhs.v6nS9.12878](https://doi.org/10.53730/ijhs.v6nS9.12878)

PDF

### The impact of family-based nutrition education intervention program on eating habit among obese s

Mahmood Arif Mahmood, Norhan Zeki Shaker, Sherzad Ali Ismael

2059-2071

Abstract viewed: **30** PDF downloaded: **17**  
[DOI : 10.53730/ijhs.v6nS9.12890](https://doi.org/10.53730/ijhs.v6nS9.12890)

PDF

#### Phytochemical evaluation of the marketed drakshasava formulation by spectroscopic & chromatographic methods

Ganesh B. Nigade, Meenakshi N. Deodhar, Rajashree S. Chavan

2969-2981

Abstract viewed: **138** PDF downloaded: **60**

[DOI : 10.53730/ijhs.v6nS9.13187](https://doi.org/10.53730/ijhs.v6nS9.13187)

PDF

#### Nanocomposite based drug delivery for periodontal disease

Kumbhar Amol B., Chaudhari Pravin D., Shaikh Karimunnisa

2982-2995

Abstract viewed: **85** PDF downloaded: **24**

[DOI : 10.53730/ijhs.v6nS9.13188](https://doi.org/10.53730/ijhs.v6nS9.13188)

PDF

#### Buccal drug delivery system

A review

Ramdas T. Dolas, Abhijeet D. Kulkarni, Vishal S. Gulecha, Amar G. Zalte, Swati G. Talele, Gayatri N.

2996-3009

Abstract viewed: **53** PDF downloaded: **30**

[DOI : 10.53730/ijhs.v6nS9.13189](https://doi.org/10.53730/ijhs.v6nS9.13189)

PDF

#### Low level quantification of two potential genotoxic impurities in rilpivirine hydrochloride drug substance

N. G. Dumbre, V. V. Chopade, P. D. Chaudhari

3010-3019

Abstract viewed: **78** PDF downloaded: **29**

[DOI : 10.53730/ijhs.v6nS9.13190](https://doi.org/10.53730/ijhs.v6nS9.13190)

PDF

#### Analysis of clinical profile of malaria patients attending a tertiary care centre in Central India

PDF

#### Assessment of nutritional status and adequacy of fiber intake in a group of obese children and adolescents

Marwa Ahmed Sedkey, Hannah Mohamed Aboulghar, Hend Mehawed Abdel Latif Soliman, Radwan Abdallah

3119-3124

Abstract viewed: **53** PDF downloaded: **26**

[DOI : 10.53730/ijhs.v6nS9.13219](https://doi.org/10.53730/ijhs.v6nS9.13219)

PDF

#### Diagnostic role of fiberoptic bronchoscopy in various respiratory diseases at a medical college hospital

Prabhakar K, Rakesh Gattu, K Surender Reddy, Narayana Mood, B Aruna Kumari

3125-3131

Abstract viewed: **117** PDF downloaded: **35**

[DOI : 10.53730/ijhs.v6nS9.13223](https://doi.org/10.53730/ijhs.v6nS9.13223)

PDF

#### Assessment of impact of fluoride on mechanical properties of NiTi and Cu NiTi orthodontic archwires

Shailesh B Dongre, Varsha Merani, Waseem Khan, Suyog Shendage, Arun Mhaske

3132-3138

Abstract viewed: **60** PDF downloaded: **24**

[DOI : 10.53730/ijhs.v6nS9.13228](https://doi.org/10.53730/ijhs.v6nS9.13228)

PDF

#### Fascin expression in breast cancer

Prathipaa R, Divya J, Ashutosh JHA, Muthukrishnan. R

3139-3143

Abstract viewed: **77** PDF downloaded: **29**

[DOI : 10.53730/ijhs.v6nS9.13229](https://doi.org/10.53730/ijhs.v6nS9.13229)

PDF

#### Effect of asthma on the English-speaking and reading comprehension ability of dusty allergy affected children

A pediatric research

Nawaf Al Anazi, Muhammad Khalid Mehmood Sajid, Ghassan Adnan Hasan, Zafar Iqbal

3144-3154

Abstract viewed: **62** PDF downloaded: **29**

[DOI : 10.53730/ijhs.v6nS9.13230](https://doi.org/10.53730/ijhs.v6nS9.13230)

3037-3043

Abstract viewed: **39** PDF downloaded: **18**

[DOI : 10.53730/ijhs.v6nS9.13193](https://doi.org/10.53730/ijhs.v6nS9.13193)

PDF

#### Comparative evaluation of chemiluminescence immunoassay and immunochromatographic test with ELISA for the detection of dengue fever

Liya K Shaji, Sujatha S R, Deepashree R, Tejashree. A, Satyasai. B

3044-3053

Abstract viewed: **92** PDF downloaded: **27**

[DOI : 10.53730/ijhs.v6nS9.13195](https://doi.org/10.53730/ijhs.v6nS9.13195)

PDF

#### The effect of slow stroke back massage nursing (SSBMN) cutaneous stimulus on pain intensity on swollen low back pain (LBP)

Aulia Asman, An Aulingga Asman, Auzia Asman, An Autika Asman

3054-3061

Abstract viewed: **71** PDF downloaded: **29**

[DOI : 10.53730/ijhs.v6nS9.13197](https://doi.org/10.53730/ijhs.v6nS9.13197)

PDF

#### In-vitro anti-candida activity of ricinus communis leaves extracts

Linda H Al-Ghazali, Nadia N. H. Al Masooodi, Farah A. Al-Marzook

3062-3069

Abstract viewed: **57** PDF downloaded: **17**

[DOI : 10.53730/ijhs.v6nS9.13203](https://doi.org/10.53730/ijhs.v6nS9.13203)

PDF

#### Organization of administrative institutions and notions as a complete factor for the state

Petrit Nimani, Arsim Dragaj, Artan Maloku

3070-3089

Abstract viewed: **195** PDF downloaded: **44**

[DOI : 10.53730/ijhs.v6nS9.13204](https://doi.org/10.53730/ijhs.v6nS9.13204)

PDF

#### Quality of life assessment and its correlation with disease activity in rheumatoid arthritis patients

Mona Shahin, Ali Eldeeb, Hanaa Elbanna, Marwa Aboelhawa

3090-3106

#### Transurethral resection of the prostate (TURP) and laparoscopic inguinal hernioplasty as combined procedures for COVID 19

Hesham Abdelaziz Elmellgy, Emad Esmat, Mahmoud Rady, Khaled Elesialy, Tarek Elleithy, Mohamed Elshorbagy

3179-3190

Abstract viewed: **57** PDF downloaded: **22**

[DOI : 10.53730/ijhs.v6nS9.13243](https://doi.org/10.53730/ijhs.v6nS9.13243)

PDF

#### Assessment measures to determine role of radiology in undergraduate medical education

Ashfaq Ul Hassan, Shomalla Jan, Zeenat Akhtar, Neelofer Jan, Ghulam Mohd Bhat, Asif Yusuf

3191-3198

Abstract viewed: **30** PDF downloaded: **29**

[DOI : 10.53730/ijhs.v6nS9.13249](https://doi.org/10.53730/ijhs.v6nS9.13249)

PDF

#### A prospective study of role of MRI evaluation in knee injuries in a tertiary care hospital

Ravi Kumar Yeli, Suresh Kanamadi, Vishal Nimbale, Siddharoodha Sajjan, Satish D Patil, Raghavendra

3199-3204

Abstract viewed: **48** PDF downloaded: **26**

[DOI : 10.53730/ijhs.v6nS9.13261](https://doi.org/10.53730/ijhs.v6nS9.13261)

PDF

#### Effect of respiratory muscle training on ventilatory function in women post mastectomy

Khulood M. Al-Najar, Maher H. Ibraheem, Raef Mourad Zaki, Dalia Ahmed Mohamed, Azza Abdel Wahab

3205-3213

Abstract viewed: **86** PDF downloaded: **21**

[DOI : 10.53730/ijhs.v6nS9.13268](https://doi.org/10.53730/ijhs.v6nS9.13268)

PDF

#### Effect of lower limb sensory training on postural stability in stroke patients

A randomized control trial

Heba El Saeid, Abdulalim A. Atteya, Sandra M. Ahmed, Reem Alwhaibi, Abdelaziz Abdelaziz Elsher

3214-3224

Abstract viewed: **815** PDF downloaded: **69**

[DOI : 10.53730/ijhs.v6nS9.13272](https://doi.org/10.53730/ijhs.v6nS9.13272)

PDF

Ramyaa Rajendiran, Brethis C.S, Hemalathaa R, Ramamani, Amalnath. A, Dinesh Kumar

3241-3249

Abstract viewed: **75** PDF downloaded: **26**

**Abstract**---*Background:* *Klebsiella pneumoniae* is a Gram-negative bacterium that form biofilm and causes various infections. Biofilms have important role in resistance to antibiotics. Alternative agents that can inhibit biofilms formation with minimal side effects is required. This study show effects of vitamin C and zinc to inhibit *Klebsiella pneumoniae* biofilms formation. *Method:* This experiment used clinically stored *Klebsiella pneumoniae* isolates using controls. Isolates other than control are exposed with vitamin C and zinc oral preparations with various doses invitro then Optical Density and percentage reduction in biofilm is calculated and compared. *Results:* Vitamin C and zinc had invitro-inhibiting effect on biofilms formation of *Klebsiella pneumoniae* at all doses. The differences in decrease of Optical Density biofilm from the doses used after statistical testing was significant ( $P < 0.05$ ). The smallest Optical Density and the largest percentage of Optical Density reduction of biofilms is found in vitamin C 1000 mg and zinc 50 mg. *Conclusion:* There are differences in inhibition of biofilm formation *Klebsiella pneumoniae* in the administration of vitamin C and zinc, with higher dose of vitamin C and zinc, the inhibition of biofilms formation is greater.

**Keywords**---Vitamin C, zinc, biofilms, *Klebsiella pneumoniae*, Optical Density.

## Introduction

*Klebsiella pneumoniae* (*K. pneumoniae*) is a negative Gram bacterium that can cause bacteremia and sepsis, urinary tract infections, pneumonia, and nosocomial infections (Ashurst and Dawson, 2018). *K. pneumoniae* is known to have the ability to form biofilms, which are communities of bacteria attached to the extracellular matrix. Biofilms play an important role in bacterial virulence because they can avoid phagocytosis and bacteria become more resistant to antibiotics (Nirwati, H *et al.*, 2019). Antibiotics are used to inhibit biofilms, but their use can cause Multiple drug resistance organisms (MDRO) and interfere with the normal flora of the body, so alternative agents are needed that have an effect on biofilms with minimal side effects (Llor, C and Bjerrum, L, 2014).

The prevalence of *K. pneumoniae* infection is 13% in America, 5% in Pakistan, 64.2% in Nigeria, 33.9% in India, 17.4% in Denmark, and 14.1% in Singapura (Virawan, Nuryastuti, and Nirwati, 2020). Studies in Klaten in 2017, 148 (85.63%) of 167 isolates of *K. pneumoniae* formed biofilms (Nirwati, H *et al.*, 2019). A 2016 study in Iran showed the majority of *K. pneumoniae* (93.6%) formed biofilms. (Seifi *et al.*, 2016).

Vitamin C and zinc micronutrients that are very important and have many roles in the body (Gombart, A. F *et al.*, 2020). Vitamin C and zinc are useful for immune support, have antimicrobial effects including on *K.pneumoniae* and have the effect of inhibiting the formation of biofilms (Gombart, A. F *et al.* , 2020; McDevitt *et al.*, 2011).

Studies on oral supplementation of vitamin C and zinc and the inhibitory effect on the formation of biofilms invitro are still limited, so this study wants to show and compare the effects of vitamins C and oral zinc in various doses invitro to inhibit the formation of biofilms in isolates stored from *K. pneumoniae* in the Clinical Microbiology Unit of Dr. Soetomo Hospital.

## Methods

### Study design

This type of research is true experimental laboratory. The design of this study is a post testonly control group design, experimental research with a control group, data taken after treatment.

### Study participants

The research population is clinical isolates stored from *K. pneumoniae* at Dr. Soetomo Hospital. The research sample was a clinical isolate stored from *K. pneumoniae* which formed a biofilm in the Clinical Microbiology Unit of Dr. Soetomo Hospital. The magnitude of the sampel used in clinical isolates stored from *K. pneumoniae* was 6 with 4 replications. Research sampling is by *random* sampling.

### Study place and time

This research was conducted at the Clinical Microbiology Unit of Dr. Soetomo Hospital, Surabaya in June 2022.

### **Study material and instruments**

*K. pneumoniae* isolates, vitamin C oral preparations, zinc sulphate oral preparations. Consumables include kristal violet 0.1%, aquedes, nutrient agar, *Tryptic Soy Broth* (TSB), methanol, 95% ethanol, *Phosphate Buffer Saline* (PBS), sucrose 5%, sterile cotton swabs, gloves, masks.

### **Preliminary study**

Preliminary tests were conducted to determine the ability of clinical isolates of *K. pneumoniae* in the formation of biofilms. Clinical isolates of *K. pneumoniae* were isolated and cultured for 24 hours then 0.5 McFarland suspension was made in TSB media and 5% sucrose was added then inserted into the microtiter plate. After incubating for 24 hours, the substrate is removed, washed with PBS (3x), fixed methanol and stained with violet crystals. The formed biofilm is observed its density.

### **Study plot**

Clinical isolates stored of *Klebsiella pneumoniae* planted in NA and incubation of 35±2 °C for 24 hours, take 3 – 5 colonies put in TSB then vortex, with nephelometer adjust concentration to 0.5 McF (1x10<sup>8</sup> CFU/ml), add 5% sucrose. Vitamin C 250, 500, 750, 1000 mg and zinc 10, 20, 40, 50 mg Each dose is dissolved in NS. The microwell plate is filled with 180 µl of TSB and 20 µl of bacterial suspension for control. The microwell plate was filled with 180 µl of TSB and 20 µl of bacterial suspension with plus 20 µl of vitamin C solution of each concentration. The microwell plate was filled with 180 µl of TSB and 20 µl of bacterial suspension with plus 20 µl of zinc solution of each concentration. Incubation 35±2 °C for 24 hours. The contents of the microtiter plate are removed, washed with 300 µl PBS 3x, dried in reverse position. Fixation with 150 µl of methanol in each well, let stand 20 minutes, then the microplate is emptied by tapping and left in an upside-down position. It is stained with 0.1% violet crystals for 15 minutes. The microplate is drained, pour 300 µl of ethanol in each well for destaining for 15 minutes. The biofilm formed was measured by ELISA reader. Collection of measurement results and make graphs.

### **Data collection and analysis approach**

Clinical isolates stored of *K. pneumoniae* observed the formation of its biofilm after being exposed to vitamin C and zinc at various doses. Data collection was carried out by measuring optical density (OD) using an ELISA reader. Data analysis was carried out with SPSS 26 using statistical method one-way ANOVA which aims to determine the significance of the effect of vitamin C and zinc administration at various doses on inhibition of formation biofilm, then created a graph using GraphPad Prism version 8.

### **Discussion**

#### **Data Results**

This study aims to analyze the effect of vitamin C inhibition at a dose of 250 mg, 500 mg, 750 mg, 1000 mg and zinc at a dose of 10 mg, 20 mg, 40 mg, 50 mg on the formation of biofilm *K. pneumoniae* invitro. Clinical isolates of *K. pneumoniae* in subcultures on *nutrient agar* media for 1x24 hours at a temperature of 35±2

°C. Before the study was carried out, a preliminary test was carried out to find out whether the isolates formed a biofilm.

Table 1 Data on the mean OD of *K. pneumoniae* biofilm against the administration of vitamin C and zinc

Isolate	<i>Klebsiella pneumoniae</i> (mean OD)									
	Vitamin C				Zinc				Positive control	Negative control

40 mg	0,004	0,004	-	0,01
50 mg	0,004	0,004	0,01	-

## Results Discussion

The formation of biofilms is an important characteristic of the *Enterobacteriaceae* group including *K. pneumoniae* which is often an important virulence factor (Ramos-Vivas *et al.*, 2019). Antibiotics are used to inhibit biofilms, but their use can cause Multiple drug resistance organisms (MDRO) and interfere with the normal flora of the body, so alternative agents are needed that have an effect on biofilms with minimal side effects (Llor, C., & Bjerrum, L, 2014). Vitamin C and zinc at varying doses have the effect of inhibiting the formation of biofilms (Gombart, A. F, Pierre, A, and Maggini, S, 2020; McDevitt *et al.*, 2011). This study compared the effects of several doses of vitamin C and zinc oral supplements to inhibit the formation of biofilm *K. pneumoniae* invitro.

Administration of vitamin C at a dose of 250 mg, 500 mg, 750 mg, 1000 mg invitro at biofilm 6 clinical isolates *K. pneumoniae*, all showed the presence of a decrease in OD compared to the positive control group and after statistical testing, the difference in the decrease in OD biofilm from the dose used was all significant. The percentage decrease in biofilm in 6 clinical isolates of *K.pneumoniae* compared to positive controls on the administration of vitamin C at doses of 250 mg, 500 mg, 750 mg, 1000 mg invitro all increased along with the increase administered dose.

There are studies that invitro vitamin C has no effect on the growth of opportunistic bacteria such as *K. pneumoniae* but has the effect of inhibiting the formation of biofilms. The results of this study are the same as the study which also shows that the greater the dose of vitamin C given, the inhibitory effect on the biofilm is also greater (Kallio *et al.*, 2012; Khameneh *et al.*, 2016; Helgadóttir *et al.*, 2017; Pandit *et al.*, 2017).

Vitamin C when the dose is increased will be more pro-oxidant. *Vitamin C* increases oxidative stress from increased ROS production and then causes cell viability to be lost and interferes with metabolic activity, cell signaling (quorum sensing), EPS production, leakage of intracellular proteins, sugars, and down regulating biofilm gene expression from bacteria. *Quorum sensing* is the communication of intercellular bacteria where small chemical molecules (called *auto inducers*, for example such as *acyl homoserine lactones* (AHL) for Gram-negative bacteria) produced and in *sense* that causes a cascade of reactions that regulate many genes and are responsible for the expression of virulence factors, he formation of biofilms (Pandit *et al.*, 2017).

Administration of zinc at a dose of 10 mg, 20 mg, 40 mg, 50 mg invitro at biofilm 6 clinical isolates *K.pneumoniae*, all showed the presence of a decrease in OD compared to the positive control group and after statistical testing, the difference in the decrease in OD biofilm from the dose used was all significant. The percentage of biofilm reduction in 6 clinical isolates of *K.pneumoniae* compared to positive controls on zinc administration at doses of 10 mg, 20 mg, 40 mg, 50 mg invitro all increased along with dose increases a given.

There are studies that invitro zinc has the effect of inhibiting the formation of biofilms from *K.pneumoniae*. The results of this study are the same as the study which also shows that the greater the dose of zinc given, the inhibitory effect on the biofilm is also greater as evidenced by the the percentage of reduction in biofilm formation is getting bigger as the dose of zinc administered increases (Sharma *et al.*, 2022).

Zinc can interact with the components of the matrix. eDNA is a component that exists in almost all biofilm matrices and can function as a zinc chelator and such interactions have an impact on the stability of the biofilm. Zinc also interferes with other cellular mechanisms such as signaling and gene regulation (quorum sensing). Zinc can be bound to a ferric uptake regulator and affect iron homeostasis. Zinc also inhibits the cyclic diguanylate phosphodiesterase pathway which plays a role in biofilm regulation so that zinc will interfere with the biofilm formation process (Wu *et al.*, 2013).

Vitamin C at a dose of 1000 mg on average causes a decrease in biofilm OD more and the percentage decrease in biofilm OD is higher than zinc at a dose of 50 mg

## Conclusion

There are differences in inhibition of the formation of biofilm *K. pneumoniae* in the administration of *vitamin C* at doses of 250 mg, 500 mg, 750 mg, 1000 mg and *zinc* at doses of 10 mg, 20 mg, 40 mg, 50 mg *invitro*, where the higher the dose of *vitamin C* and *zinc* inhibition against the formation of biofilm *K. pneumoniae* is getting bigger and bigger. Studies inhibiting the formation of biofilm *K. pneumoniae* are still rare to use oral supplements, so it is necessary to conduct further studies using other vitamins or minerals so that there are more and more alternative agents other than antibiotics to inhibit the formation of biofilms. In this study, *vitamin C* and *zinc* can inhibit the formation of *K. pneumoniae* biofilm *invitro*, further studies are needed to see this effect on *in vivo*.
