## Natural Resources for Human Health: A New Interdisciplinary Journal Dedicated to Natural Sciences

Bharat B Aggarwal<sup>1</sup>, Onur Bender<sup>2</sup>, Tarun Belwal<sup>3</sup>, Ihosvany Camps<sup>4</sup>, Carlos L Cespedes Acuña<sup>5</sup>, Alessandra Cincinelli<sup>6</sup>, Ricardo Diego DG De Albuquerque<sup>7</sup>, Claudio Ferrante<sup>8</sup>, Mohammad Amjad Kamal<sup>9</sup>, Shafi Ullah Khan<sup>10</sup>, In Ho Kim<sup>11</sup>, Manoj G Kulkarni<sup>12</sup>, Haipeng Lv<sup>13</sup>, Si Mi<sup>14</sup>, Andrei Mocan<sup>15</sup>, Adriano Mollica<sup>8</sup>, Ashwell R Ndhlala<sup>16</sup>, Vince Ördög<sup>17</sup>, Jelena Popović-Djordjević<sup>18</sup>, Jaruporn Rakmai<sup>19</sup>, Visweswara Rao<sup>20</sup>, Satyajit D Sarker<sup>21</sup>, Barbara Sawicka<sup>22</sup>, Gautam Sethi<sup>23</sup>, Ana Sanches Silva<sup>24</sup>, Karel Šmejkal<sup>25</sup>, Hafiz Ansar Rasul Suleria<sup>26</sup>, Michał Tomczyk<sup>27</sup>, Chungpeng Wan<sup>28</sup>, Dongdong Wang<sup>29</sup>, Ren Wang<sup>30</sup>, Zhaojun Wei<sup>31</sup>, Jianbo Xiao<sup>32</sup>, Jialin Xu<sup>33</sup>, Zhiling Yu<sup>34</sup>, Gökhan Zengin<sup>35</sup>, Jesus Simal-Gandara<sup>32\*</sup>

Natural science is a science that deals with the interpretation, prediction and understanding of a natural phenomenon. It is divided into life and physical sciences which are subdivided into physics, chemistry, earth sciences and astronomy. Numerous journals specifically catering to these disciplines are cited in Scopus and Web of Science (WoS). Currently, 26674 journals have been indexed in the Web of Science. Among those, 20932 journals have given authors the option to choose open access of their articles and 4672 journals are published under the DOAJ Gold open access (data retrieved from Web of Sciences on 01.08.2021). The data suggest that the scientific world and the publishing sector are gradually moving towards open access policy, where researchers have free unrestricted access to the scientific content. It is interesting to note that only 56 journals are listed in the multidisciplinary sciences. Keeping this in mind, Natural Resources for Human Health (NRFHH), an interdisciplinary journal dedicated to natural sciences, has been launched.

NRFHH is an international open access journal that deliver high quality scientific articles to readers from various natural sciences domains. The NRFHH covers a wide range of natural science disciplines. Such fields could include almost all aspects of works bearing on natural compounds of plants, algae, microbes and animals. Each manuscript should have a clear hypothesis. In addition, high-quality review articles are also considered for publication based on a policy of integration for the propagation of novel research ideas and initiatives. The NRFHH publishes high-quality manuscripts related (but not limited) to life science research including biology, biological chemistry, medicinal chemistry, pharmaceutical formulations, agricultural and food chemistry, applications

of natural resources and traditional medicine. Examples of topics that fit in to the scope of NRFHH include: taxonomy, conservation, genomics approaches for the conservation of critically endangered species, chemistry of living things, toxicology, pharmacology, pharmacognosy, nutrition and health, therapeutics, bioactive compounds, detoxification, biological activities, formulations from natural products, analysis, quality controls, food technology, agricultural and food safety, food analysis, cosmetics, dietary supplements, nutraceuticals, biopharmaceutical science, waste and co-product valorization, folkloric medicine, ethnobotany and ethnopharmacology.

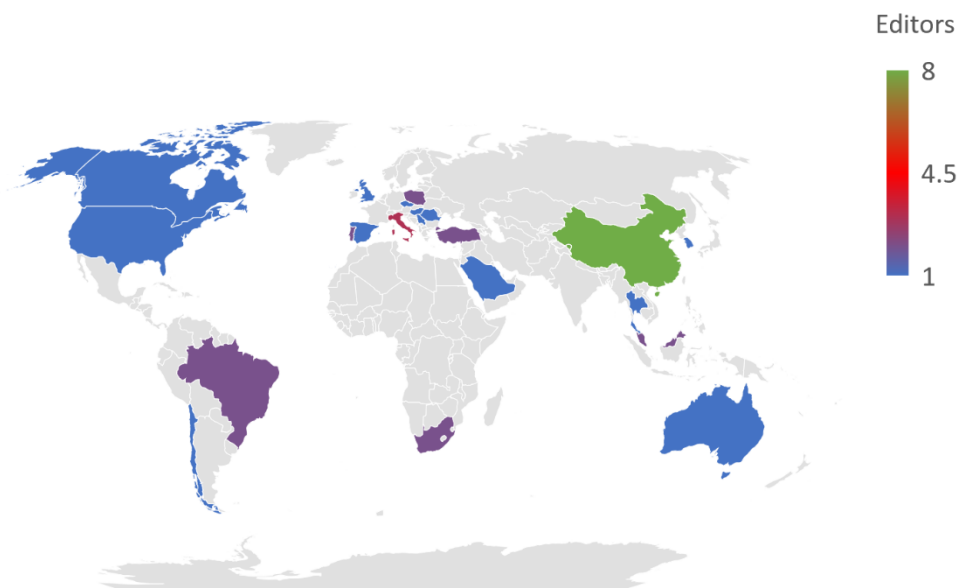

The NRFHH is published by the Visagaa Publishing House. The editorial board is led by highly cited researcher Prof. Jesus Simal-Gandara, together with many other internationally recognised researchers. The editorial board comprises 37 editors from 22 countries (**Figure 1**), which strengthens the academic impact of the journal.

In academic publishing, the role of expert reviewers is vital for safeguarding the merit and scientific quality of each submission and to support rapid publication within a given timeframe. The reviewers will be much appreciated by providing timely and constructive review reports. Without the prominent contributions of authors, reviewers and our valuable readers, the journal will not be successful. We would like to build a deep scientific connection with all of you. The journal is already receiving multiple manuscripts. scientific connections with all of you. The journal is already receiving multiple manuscripts. Our moto is to build NRFHH into a valuable platform for novel discoveries from a host of disciplines in the natural sciences domain as well as to provide rapid publication and availability of high-quality scientific data to the readers.
