FIU and Florida International University are registered marks. Florida International University believes in equal opportunity practices which conform to all laws against discrimination and is committed to nondiscrimination with respect to race, color, creed, age, handicap, sex, marital status, religion, or national origin. Additionally, the University is committed to the principle of taking the positive steps necessary, to achieve the equalization of educational and employment opportunities.

Note: The programs, policies, requirements, regulations published in this catalog are continually subject to review in order to serve the needs of the University's various constituencies and to respond to the mandates of the State Board of Education and the Florida Legislature. Changes in programs, policies, requirements, and regulations may be made without advance notice. **The ultimate responsibility for knowing degree requirements imposed upon students by State laws rests with students.**

Fees given in this catalog are tentative pending legislative action.

President Mark B. Rosenberg

Dear Graduate Students:

Welcome to FIU!

As one of the largest public research universities in the country, FIU plays a critical role in the future of our community and nation. We recognize the many challenges in our world today and we are committed to doing what is right. Our students, faculty, staff, and alumni have a shared sense of purpose: we want to leave this world a better place than we found it. Never has this mission been more relevant than today, when our FIU family is showing up for our community during the COVID-19 pandemic.

We demonstrate this commitment every single day by standing up to some of society's most pressing concerns – from sea level rise, transportation, and more. We have a special kind of drive and determination that takes our research efforts from the Arctic to Aquarius, the world's only underwater laboratory. We are constantly accelerating our research. In fact, FIU is in the top tier of research universities in the U.S., according to the Carnegie Classification of Institutions of Higher Education.

Today, FIU is a leading U.S. research university (R1), with a focus on student success, innovation, and societal progress. Our university has been ranked 45 times in the top 50 in the nation among public universities, according to *U.S. News and World Report*. We offer nationally and internationally recognized bachelor's, master's, specialist, and doctoral degree programs in business, engineering, nursing, public health, architecture and other disciplines.

For 4 years and counting, BizBash has named the Food Network & Cooking Channel South Beach Wine & Food Festival (SOBEWFF) the #1 food and restaurant industry event in the United States. With this collaboration, FIU graduate and undergraduate students get real-world opportunities to gain hands-on experience in hospitality, including staffing the star-studded events and working alongside the world's best culinary talent and food and beverage industry leaders.

We are committed to supporting the arts and cultural engagement through FIU's three museums: Patricia & Phillip Frost Art Museum, the Wolfsonian-FIU, and the Jewish Museum of Florida-FIU. And our colleges and programs are continuously taking extra steps to be innovative, relevant, and solutions-driven.

We are so honored to welcome you to the FIU family! You are now a part of something very special that will be with you forever. You are on your way to making a tremendous impact in our community for generations to come.

Dean Andrés G. Gil

Dear Graduate Students:

We welcome you to explore the many offerings of our graduate programs at FIU. FIU has the highest Carnegie Research Classification, “Research I: Highest Research Activity.” The reputation of a research university is based in large part on the quality of its graduate faculty. However, our graduate students are also key contributors to FIU’s reputation and active contributors to the university’s intellectual and creative environment. Through its graduate faculty members, FIU offers graduate programs of the highest quality.

The Graduate Catalog provides information and resources to those interested in graduate education programs at FIU, including the full range of programs and courses available. We offer a wide range of graduate programs to satisfy virtually every personal or professional pursuit. We have over 130 graduate degree programs, including an extensive array of doctoral, master’s, specialist, and graduate-level certificate programs. FIU is a young, vibrant and diverse university with a graduate population of more than 9,000 students and an overall enrollment of more than 58,000 students. We have an active Graduate Student Association and other avenues for graduate involvement on campus through the University Graduate School and other student services offices.

At FIU, we take pride in designing graduate programs that prepare our students to be future leaders in their fields and to be knowledge creators. Our graduate faculty are worlds-ahead scholars, producing new discoveries to solve the challenges facing our nation and the world. Our focus on research-integrated graduate curricula, and the rich cultural diversity of our campus and South Florida, provide graduate students with the most exciting and dynamic learning environment at FIU.

FIU also offers excellent infrastructure for cutting-edge graduate work. We have modern, well-equipped laboratories, and ample computer facilities and support. We also boast one of the largest libraries in Florida’s State University System. All of this is available to our graduate students to help them achieve their goals in a timely manner and obtain the postgraduate appointments they desire. We also have excellent professional training and development opportunities designed to prepare the graduate students for success in their chosen careers.

We are glad you have chosen to be a part of our rich academic culture, and we are committed to providing you with the most stimulating learning environment.

Academic Calendar 2021-2022

FALL 2021

August 23 – December 11, 2021

GENERAL DATES AND DEADLINES

April 1 Thursday	Class schedule available to all returning undergraduate and graduate students for Summer & Fall 2021 terms
April 6 – April 26 Tues - Mon	Official registration for degree-seeking students by assigned registration time and day
May 31 Monday	First day to apply for Fall 2021 term graduation
August 19 Thursday	Non-degree seeking student registration begins
August 27 Friday	Last day to submit Non-degree Application for Fall 2021 term
September 3 Friday	Last day to apply for graduation at the end of Fall 2021 term
TBA	Commencement Exercises – Please refer to https://commencement.fiu.edu/
December 23 Thursday	Winter Break 1 (University closed)
December 24 Friday	Christmas Day Observed (University closed)
December 30 Thursday	Winter Break 2 (University closed)
December 31 Friday	New Year's Day Observed (University closed)

MAIN SESSION

August 23 – December 11, 2021

Final Week of Term: December 6 – 11, 2021

April 27 – May 9 Tues - Sun	Open registration for degree-seeking students
August 22 Sunday	Last day to register without incurring a \$100 late registration fee
August 23 Monday	Classes begin
August 30 Monday	Short Term Tuition Loan Applications available
August 31 Tuesday	Last day to add courses; last day to drop courses or withdraw from the University without incurring financial liability for tuition and fees
September 1 Wednesday	Last day to change grading option
September 6 Monday	Fall "C" tuition payment due
September 8 Wednesday	Last day for students to apply for a Short Term Loan
September 9 – 15 Thurs - Wed	\$100 late payment fee assessed for outstanding balances
September 17 Friday	Labor Day (University closed)
October 31 Sunday	Cancellation of enrollment for unpaid tuition and fee balances not covered by payment plan, scholarships or other awards
November 1 Monday	Reinstatement after cancellation for non-payment
November 11 Thursday	Last day to withdraw from the University with a 25% refund of tuition
November 25 Thursday	Fall "C" Return of Title IV deadline for financial aid recipients
November 26 – 27 Fri - Sat	Last day to drop a course with a DR grade
December 4 Saturday	Last day to withdraw from the University with a WI grade
December 6 – 11 Mon - Sat	Veterans Day (University closed)
December 11 Saturday	Thanksgiving Day (University closed)
December 15 Wednesday	Thanksgiving Break (University closed)
December 16 Thursday	Classes end
	Final week of the term - modified class schedule: final exams and other course assessment activities are scheduled during this week
	End of term
	Deadline (by 11:59 p.m.) for faculty to submit grades
	Fall "C" grades available for students

SESSION A

August 23 – October 9, 2021

April 1 Thursday	Class schedule available to all returning undergraduate and graduate students for Summer & Fall 2021 terms
------------------	--

April 6 – April 26 Tues - Mon	Official registration for degree-seeking students by assigned registration time and day
April 27 – May 9 Tues - Sun	Open registration for degree-seeking students
May 31 Monday	First day to apply for Fall 2021 term graduation
August 19 Thursday	Non-degree seeking student registration begins
August 22 Sunday	Last day to register without incurring a \$100 late registration fee
August 23 Monday	Classes begin
	Short Term Tuition Loan Applications available
August 27 Friday	Last day to submit Non-degree Application for Fall 2021 term
August 30 Monday	Last day to add courses; last day to drop courses or withdraw from the University without incurring financial liability for tuition and fees
	Last day to change grading option
August 31 Tuesday	Fall "A" tuition payment due
	Last day for students to apply for a Short Term Loan
September 1 Wednesday	\$100 late payment fee assessed for outstanding balances
September 3 Friday	Last day to withdraw from the University with a 25% refund of tuition
September 6 Monday	Labor Day (University closed)

Calendar dates are subject to change. Please contact appropriate offices for verification and updates.

This calendar includes official University holidays. Faculty are encouraged to make accommodations for students who wish to observe religious holidays. Students should make their requests known to the instructor at the beginning of the term. For a listing of religious holidays, you may visit <http://www.interfaith-calendar.org>.

UNIVERSITY INFORMATION

MISSION

Florida International University is an urban, multi-campus, public research university serving its students and the diverse population of South Florida. We are committed to high-quality teaching, state-of-the-art research and creative activity, and collaborative engagement with our local and global communities.

VISION

Florida International University will achieve exceptional student-centered learning and upward economic mobility, produce meaningful research and creative activities, and lead transformative innovations locally and globally, resulting in recognition as a Top-50 public university.

VALUES

Florida International University (FIU) is committed to the following core values:

- Truth—in the pursuit, generation, dissemination, and application of knowledge
- Freedom—of thought and expression
- Respect—for diversity and the dignity of the individual
- Responsibility—as stewards of the environment and as citizens of the world
- Excellence—in intellectual, personal, and operational endeavors

THE UNIVERSITY

FIU, a member institution of the State University System of Florida, was established by the Florida Legislature in 1965. Classes began in September 1972, with 5,667 students enrolled in upper division and graduate programs – the largest opening-day enrollment in U.S. collegiate history. In 1984, FIU received authority to begin offering degree programs at the doctoral level. The Carnegie Foundation for the Advancement of Teaching designates FIU as an R1 Doctoral University: Highest Research Activity.

The university is a member of Phi Beta Kappa, the nation's oldest and most distinguished academic honors society. FIU offers more than 200 baccalaureate, master's, specialist, and doctoral degree programs in the following colleges and schools: College of Arts, Sciences, and Education (School of Education and Human Development; School of Environment, Arts, and Society; and School of Integrated Science and Humanity); College of Business (School of Accounting, Chapman Graduate School, and Landon Undergraduate School of Business); College of Communication, Architecture and the Arts (School of Communication and Journalism, and School of Music); College of Engineering and Computing (School of Computing and Information Sciences and Moss School of Construction, Infrastructure, and Sustainability); College of Law; Herbert Wertheim College of Medicine; Honors College; Nicole Wertheim College of Nursing and Health Sciences; Robert Stempel College of Public Health and Social Work (School of Social Work); Steven J. Green School of International and Public Affairs; and Chaplin School of Hospitality and Tourism Management.

FIU has more than 58,000 students and more than 1,700 full-time faculty members; it awards more than 9,000 degrees annually, making it the largest university in South Florida and placing it among the nation's ten largest colleges and universities. The university has two campuses – Modesto A. Maidique Campus in western Miami-Dade County and the Biscayne Bay Campus, a branch campus, in northeast Miami-Dade County. A shuttle bus runs continuously between the two campuses throughout the day. FIU offers programs at the FIU at I-75 academic center in adjacent Broward County and the FIU Downtown on Brickell academic center in Miami. Additionally, numerous programs are offered at off-campus locations and online.

MODESTO A. MAIDIQUE CAMPUS

The Modesto A. Maidique Campus is a 344-acre site on the western edge of Miami, the center of a metropolitan area of approximately 450 million people. Apartment-style residence halls, a nationally certified environmental preserve, and athletic facilities all contribute to a pleasant collegiate atmosphere on Modesto A. Maidique Campus, which is also FIU's largest campus. FIU's Modesto A. Maidique Campus has impressive campus architecture, lush tropical landscaping, a Sculpture Park, and the eight-story Green Library. There is also a state-of-the-art Wertheim Performing Arts Center, a recreation center, a health and wellness center, an expanded university center, a 4,500-seat FIU Ocean Bank Convocation Center, and a football stadium. Modesto A. Maidique Campus also has laboratories, auditoriums, music and art studios, an art museum, an international conference theater, and an experimental theater. There is a wide variety of clubs and student organizations on campus to meet the professional, service, athletic, social, and cultural needs of the FIU community.

FIU's libraries at Modesto A. Maidique Campus and Biscayne Bay Campus have more than 2 million volumes and 135,000 serials including journals (5,000 online); electronic databases; numerous resources in other formats; substantial holdings of federal, state, local, and international documents; maps; institutional archives; and curriculum materials. Law and medical libraries are located on the Modesto A. Maidique Campus.

Housing and Residential Life provides a wide variety of living accommodations on campus. Residence halls at Modesto A. Maidique Campus include Panther Hall, Everglades Hall, University Park Towers, University Apartments, Parkview Hall, and Lakeview Housing. Housing staff assist students in selecting accommodations to meet their particular needs. Single-gender and gender-inclusive accommodations are available. There are no family or married housing offerings.

BISCAYNE BAY CAMPUS

FIU's Biscayne Bay Campus is located on 197 acres on the waterfront of Biscayne Bay and has an enrollment of approximately 7,000 students. The campus is headquarters for academic programs in Hospitality and Tourism Management, Communication and Journalism, Marine Science, and Creative Writing. Coursework in Arts, Sciences, and Education; Business Administration;

Communication, Architecture and the Arts; Computer Science; Nursing; and Criminal Justice is also offered (for specific degree programs please refer to Academic Programs in this catalog).

The campus houses the Glenn Hubert Library, Osher Lifelong Learning Institute, and the state-of-the-art Roz and Cal Kovens Conference Center.

A residential complex living accommodation is available on the Biscayne Bay Campus. The Wolfe University Center is the focal point of all student activities, including clubs and entertainment, student life, and dining facilities.

FIU at I-75

FIU has brought higher education closer to home for thousands of South Broward residents through its academic center, FIU at I-75. Located at 1930 SW 145th Avenue in Miramar, classes are held in an 89,000 square-foot LEED-certified facility shared with Broward College. The center includes classrooms, computer labs, study rooms, administrative offices, and student collaborative areas.

Select courses and programs at the bachelor's and master's levels are offered by the College of Arts, Sciences, and Education; College of Business; Steven J. Green School of International and Public Affairs; and the College of Engineering and Computing. Non-Credit programs are also offered.

FIU at I-75 is also home to the Jorge M. Pérez Metropolitan Center, an applied research institute providing policy solutions to public, private, and non-profit organizations in South Florida.

Students attending FIU at I-75 benefit from access to the resources of both the FIU libraries (located on the Modesto A. Maidique and Biscayne Bay campuses) and the Broward County Public libraries. The Student Government Association sponsors social and cultural events that provide students with opportunities to enhance their experiences outside of the classroom. For more information about FIU at I-75 and its offerings, please visit broward.fiu.edu.

FIU DOWNTOWN ON BRICKELL

FIU Downtown on Brickell consists of 60,000 square feet at 1101 Brickell Avenue. FIU Downtown on Brickell includes multi-purpose classrooms, a reception space, and leadership and faculty offices. With its prime location, FIU Downtown on Brickell provides working professionals a convenient place to further their educations. A range of master's-level business programs are offered at the venue.

For more information about FIU Downtown on Brickell programs, please visit dwntwn.fiu.edu.

MIAMI BEACH URBAN STUDIOS

FIU Miami Beach Urban Studios | School of Architecture (MBUS)—a unique, 10,000-square-foot facility located in the 420 Lincoln Road Building—hosts an interdisciplinary array of innovative classes, research, laboratories, exhibitions, events, a regular newsletter, and other opportunities for the FIU School of Architecture and the Department of Art and Art History within the College of Communication, Architecture, the Arts. As part of its

mission, MBUS houses students, faculty, and events affiliated with the Department of Architecture, Department of Interior Architecture, and the Department of Landscape Architecture and Environmental and Urban Design. MBUS also houses Tikkun Olam Makers (TOM): FIU Community, a partner in the TOM Global consortium of makers that create affordable solutions to challenges experienced by people living with disabilities, the elderly, and the poor. It contains the 3,500sf SOA Innovation Lab, which has more than fifty 3D printers and is one of the largest 3D printing laboratories of its kind in Florida. The SOA Innovation Lab was featured in the HP/EDUCAUSE Building the Campus of the Future project. The lab also played a leadership role in producing more than 10,000 face shields for the FIU Face Shield Fabrication project (which involved students, faculty, and staff working in support of Baptist Health South Florida and other health- and business-related institutions in the community). The newest space at the 420 Lincoln Road Building is the FIU Miami Beach Visual Arts Gallery (under the aegis of the Department of Art and Art History); the gallery is a 1,000-square-foot storefront on Washington Avenue dedicated to the promotion of FIU's Master in Fine Arts students and faculty. In the broadest sense, MBUS provides a platform for new ideas and community engagement to find collaborative solutions to local and global needs. For more information about MBUS, please visit carta.fiu.edu/mbus/.

ACCREDITATIONS

Academic programs of Florida International University (FIU) are approved by the FIU Board of Trustees (baccalaureate and master's degrees), the Florida Board of Governors (doctoral degrees). FIU is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award associate, baccalaureate, masters, specialist, and doctoral degrees. Contact the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call (404) 679-4500 for questions about the accreditation of FIU. The university maintains the standards specified by the SACSCOC "Principles of Accreditation" and notifies the SACSCOC of any substantive changes. The SACSCOC reaffirmed FIU's accreditation on December 6, 2010 (next reaffirmation is 2021). General inquiries about FIU, such as admission requirements, financial aid, educational programs, etc., should be addressed directly to the appropriate FIU department and not the SACSCOC office. Professional degree programs at FIU are accredited or approved by the appropriate professional association accreditation agency, or are pursuing full accreditation or approval. To obtain information about the specialized accreditation agencies and their criteria and review process, contact the chairperson/director of the respective degree program. The professional accrediting agencies and the respective FIU colleges/schools and programs are listed below.

College of Communication, Architecture + The Arts

Architecture (MArch) - National Architectural Accrediting Board (NAAB)

Art & Art History (BA) - (*National Association of Schools of Art and Design, Commission on Accreditation (NASAD)

Art Education (BS, MAT) - *National Association of Schools of Art and Design; Commission on Accreditation (NASAD); Council for the Accreditation of Educator Preparation (CAEP)

Art Education (MS) - *National Association of Schools of Art and Design; Commission on Accreditation (NASAD)

Communication (BS) - Accrediting Council on Education in Journalism and Mass Communications (ACEJMC)

Interior Architecture (MIA) - Council for Interior Design Accreditation (CIDA)

Landscape Architecture (MLA) - Landscape Architectural Accreditation Board (LAAB)

Music (BA, BM, MM) - *National Association of Schools of Music (NASM)

Music Education (BM, MS) - Council for the Accreditation of Educator Preparation (CAEP)

Theatre (BA) - *National Association of Schools of Theatre, Commission on Accreditation (NAST)

College of Arts, Sciences & Education

Biology (Education) (BS) - Council for the Accreditation of Educator Preparation (CAEP)

Chemistry (BA) - American Chemical Society (ACS)

Chemistry (Education) (BA) - Council for the Accreditation of Educator Preparation (CAEP)

Counselor Education (MS) School Counseling track - National Council for Accreditation of Teacher Education (NCATE); Council for Accreditation of Counseling and Related Educational Programs (CACREP)

Counselor Education (MS) Clinical Mental Health Counseling and Rehabilitation track - Council for Accreditation of Counseling and Related Educational Programs (CACREP)

GRADUATE CERTIFICATE PROGRAMS

Certificates are offered to students with bachelor's degrees who wish to obtain advanced education in a particular area of concentration, but do not necessarily want to commit to a master's degree. Successful completion of a Graduate Certificate is entered on the student's transcript. Some or all of the courses taken in a Graduate Certificate can often be applied to a master's degree. In addition to the Graduate Certificates offered through the University Graduate School, non-credit Professional Certificates are offered through University College.

UNIVERSITY GRADUATE SCHOOL

Andres Gil

Dean

The University Graduate School has oversight of post baccalaureate programs in all colleges and schools with the exception of the programs in the College of Law and the Doctor of Medicine program in the College of Medicine. Working with the Graduate Faculty and the Graduate Council of the Faculty Senate, the University Graduate School develops and implements the policies and procedures that guide graduate education at the University.

Graduate Admissions is usually the first point of contact entering graduate students have with the University Graduate School. Students should verify dates and registration information with the OneStop Enrollment Services Office, Student Academic Success Center (SASC), Modesto A. Maidique Campus, (305) 348-7000. Students are admitted to the University Graduate School upon recommendation of the graduate program to which they have applied. The University Graduate School oversees the university-wide fellowship programs: Presidential Fellowships, UGS Inclusion Fellowships, Veteran's Fellowships, Doctoral Evidence Acquisition, and Dissertation Year Fellowships. The University Graduate School also works with the graduate programs to provide support to Graduate Assistants. The stipend for Graduate Assistants is provided by the graduate program, within

guidelines set by the University Graduate School, and the accompanying tuition waivers are provided by the University Graduate School.

Students completing thesis master's degrees and all students in doctoral programs have more contact with the University Graduate School as they obtain University Graduate School approval for their thesis or dissertation committee, thesis or dissertation proposal, thesis or dissertation defense announcement, and final thesis or dissertation.

The University Graduate School works with the Graduate Senators and Graduate and Professional Student Committee to help enrich the total graduate student experience: academically, socially, and culturally. Through its Professional Development Program, the University Graduate School delivers professional and career-development training to graduate students. The University Graduate School serves as an ombudsman for graduate students.

All graduate students are encouraged to visit the University Graduate School MARC 240, (305) 348 2455, or log on to the web site, <http://gradschool.fiu.edu> to find answers to questions regarding any phase of their graduate education.

UNIVERSITY LIBRARIES

Uniquely positioned at the intersection of information, technology, and innovation, the University Libraries engage with local and global partners to foster student-centered learning and to support internationally recognized research. The libraries are wonderful gathering places to pursue scholarly research, to learn about and use information technology, to write, to study, and to draw on a rich collection of print and electronic resources. Here you will find just about everything you need to collaborate and create new knowledge for the 21st century: almost 2 million volumes, tens of thousands of movies and songs, maps, rare books, electronic books, microfilms, and approximately 600 online databases containing millions of articles from tens of thousands of online journals, newspapers, government reports, and more. You can access many of these resources right from home by accessing online books, streaming videos, journals, newspapers, historical documents, photographs, and other materials. In addition, as an FIU student you have privileges at most other libraries in south Florida and at the libraries of all other institutions in the State University System of Florida.

To help you with your research needs, our librarians will gladly assist you in person, by phone, by email, and by live chat and SMS/text; in collaboration with subject librarians, we will work with you one-on-one, showing you how to navigate resources, assist with search strategies, and provide research consultations for in-depth projects. Group instruction is provided for classes by request, and in consultation with faculty, and via open workshops on focused topics such as citation and bibliography management. The libraries offer a variety of technology options, including wireless internet access, mobile devices, laptop checkout, free high-quality document scanning, and color photocopying/printing. Drop by and have your computing questions answered at the Division of IT help desk or consult with skilled tutors at the Center for Excellence in Writing. The libraries also house world-renowned digital collections including the Digital Library of the Caribbean (dLOC) and the Everglades Digital Library; state-of-the-art Geographic Information Systems (GIS) labs; the Latin American and Caribbean Information Center; and Special Collections. Through the newly created Digital Scholar Studio, the libraries also offer active-learning spaces as well as digital scholarship services and training on topics such as web publishing, digital exhibit building, and other digital scholarship tools and technologies.

In keeping with FIU's core value – student-centered service – the libraries have study rooms, late and/or overnight hours, group- and quiet-study spaces, collaborative-learning areas, disability access, graduate-research carrels, and cafés. Many areas have been redesigned and renovated to provide state-of-the-art technology hubs, complete with ubiquitous wireless computing, small-group presentation rooms, open-area collaboration zones, HDTV media viewing and listening rooms, flexible modular furniture, and many other features designed to accommodate the way you collaborate, study, and use information.

Visit our locations: the Green Library on the Modesto A. Maidique Campus, the Hubert Library on the Biscayne Bay Campus, the Engineering Library Service Center, and online at library.fiu.edu.

UNIVERSITY MUSEUMS

THE PATRICIA & PHILLIP FROST ART MUSEUM

The Frost Art Museum's vision is to spark curiosity and dialogue through art. We bring great art to our South Florida community. We are a campus resource for our entire FIU community, and we serve as a premier cultural destination for residents and visitors to one of America's most vibrant cities. We complement our exhibitions with a wide range of educational programs tailored for our community.

Admission to the museum is free for everyone, and we welcome you to bring your family and friends for an afternoon visit followed by a cafecito from Vicky's Café on our first floor. We offer free educational programs throughout the month, including drawing in the galleries, lectures, tours with the curator, and zine-making workshops. In addition, the museum presents more than 10 exhibitions every year. Our shows depict diverse cultures, histories, and perspectives.

The museum's permanent collection has grown to more than 6,000 objects, thanks to several notable donations of important works of art. From Pre-Columbian artifacts to twenty-first-century prints and photography, the extensive range of the collection allows the museum to provide in-depth research opportunities and exhibitions. The museum's permanent collection exhibition highlights our gems and rotates works throughout the year. In addition, much of our collection is available to search on our website.

Because the Frost Art Museum is part of one of the nation's largest research universities, education comprises a major component of the museum's mission. Each academic year, our curators and staff provide ongoing curriculum support to faculty across departments in FIU.

The Frost Art Museum continually reaffirms its commitment to promoting the excellence of its collections, exhibitions, and educational programs by striving to discover innovative ways to reach and serve an increasingly larger and more diverse constituency both nationally and internationally. Please visit the museum's website at frost.fiu.edu or call (305) 348-2890.

THE WOLFSONIAN-FIU

Located in the heart of Miami Beach's Art Deco District, the Wolfsonian-FIU is a museum and research center that uses objects to illustrate the persuasive power of art and design; to explore what it means to be modern; and to tell the story of social, political, and technological changes that have transformed our world. It encourages people to see the world in new ways, and to learn from the past as they shape the present and influence the future. The Wolfsonian achieves its mission through exhibitions, publications, educational programs, and individual scholarship.

The Wolfsonian became part of FIU in July 1997 when its founder, Mitchell "Micky" Wolfson Jr., donated his extraordinary collection, as well as the museum building, to the university. The core of the Wolfsonian's holdings consists of decorative arts, fine arts, propaganda,

architectural materials, and industrial and graphic design from the period of 1850 through 1950. The United States, Great Britain, Germany, Italy, and the Netherlands are the countries most extensively represented. There are also smaller but significant collections of materials from other countries, including Austria, Czechoslovakia, France, Hungary, Japan, and the former Soviet Union. The collection of more than 200,000 objects includes works on paper, furniture, paintings, sculpture, glass, textiles, ceramics, lighting and other appliances, as well as a rare books library.

In addition to its permanent collection galleries, the Wolfsonian presents temporary exhibitions that address broad themes of the nineteenth and twentieth centuries, such as nationalism, political persuasion, industrialization, architecture and urbanism, consumerism and advertising, transportation, and world's fairs. Although drawing primarily on its own holdings, the Wolfsonian also features exhibitions and objects on loan from other collections.

Through its public programs, the Wolfsonian offers a range of lectures, films, symposia, tours, and workshops geared to visitors of all ages. It has partnered with Miami-Dade County Public Schools to develop activities and interpretive materials for students and teachers in the arts and social sciences. To inquire about an exhibition, program, or the general calendar, please visit wolfsonian.org or call (305) 531-1001.

The Wolfsonian offers important resources to the FIU community. The museum provides tours of its galleries to student groups and courses, and makes the collection of its rare books library (305-535-2634) available to students and faculty members for research projects. Students interested in learning more should contact the museum's associate director of research, education, and grants at (305) 535-2613 or jon@thewolf.fiu.edu.

THE JEWISH MUSEUM OF FLORIDA-FIU

The Jewish Museum of Florida-FIU (JMOF-FIU) is the only museum dedicated to telling the story of more than 250 years of Florida's Jewish history, arts, and culture; its growing collection features more than 100,000 items. It is located in the trendy SoFi area of South Beach at 301 Washington Avenue. The museum is housed in two restored historic buildings that were once synagogues for Miami Beach's first Jewish congregation. The original synagogue was built in 1929, and the second, built in 1936, was designed by Art Deco architect Henry Hohaus and features 80 stained-glass windows, a copper dome, and a marble *bimah*. The two buildings are joined together by Bessie's Bistro, named after former Miss America, Bess Myerson.

While reflective of the Jewish experience in Florida, JMOF-FIU additionally creates understanding of the shared immigrant experience in our multicultural society. The museum's core exhibition, *MOSAIC: Jewish Life in Florida, 1763 to Present* began as a statewide grassroots collecting effort, which included gathering photographs, artifacts and oral histories from descendants of pioneer families, as well as the state's more recent arrivals. Mosaic traveled to 13 Florida cities from 1990 to 1994 and generated so much interest that, by 1995, it evolved into the Jewish Museum of Florida.

JMOF-FIU became part of FIU in 2012, creating a historic partnership that leverages the resources of the museum and FIU to ignite a new era of interdisciplinary

education and research. Using the lens of the evolving immigration experience of Jews in Florida, JMOF-FIU serves as a forum to promote tolerance; further global understanding; and create connections to Jewish culture, history, arts, and contemporary civic life for diverse audiences. Accredited by the American Association of Museums, JMOF has achieved a standard of excellence in its methodology for researching, collecting, conserving, archiving, storing, and interpreting its holdings.

The museum's extensive collection focuses on the people who have shaped and continue to influence the development of our state. The collection draws crucial links between their contributions; the social, political, economic, cultural, and religious aspects of Jewish life in Florida; and the relationship of Jews to the dominant non-Jewish population. As such, the collection offers a wealth of opportunity for students and faculty for scholarly research across subject matter from the arts and sciences to gender and religious studies, with artifacts, ephemera, documents, photographs, and oral histories from every region of the state.

JMOF-FIU presents a vibrant schedule of thought-provoking history and art exhibits that change periodically, paired with a dynamic array of programs that includes lectures, concerts, workshops, family activities, walking tours, and presentations of contemporary topics of Jewish issues and interests worldwide with international scholars and presenters. Many of the programs are in collaboration with FIU academic units including the Steven J. Green School of International and Public Affairs, Global Jewish Studies, and the School of Music as well as various cultural and community organizations.

For more information, please visit jnof.fiu.edu or call (305) 672-5044.

Continuing Education

FIU's Academic Planning and Accountability–Continuing Education (APA-CE) consists of two major program areas: Credit Programs and Non-Credit Programs. Programs offered through Continuing Education extend the instructional and academic resources of the university by using innovative approaches. These include distance education, flexible class scheduling, customized training and off-campus educational programs. Local, state, national, and international communities are served with cost-effective, high quality and distinctive programs and services.

ACADEMIC CREDIT PROGRAMS

APA-CE implements services and resources tied to academic credit courses and programs offered by schools and colleges. These courses and programs can be delivered online, off-campus, and on weekends. Additional information is available via colleges' and schools' respective websites.

Continuing Education credit programs provide educational opportunities for working professionals and non-traditional students. In addition, these programs can be customized to meet employee-training needs at the work sites.

NON-CREDIT PROGRAMS

APA-CE develops and implements non-credit programs and is the official granting authority at FIU of general Continuing Education Units (CEUs). These non-credit programs maximize opportunities for lifelong learning and professional development to meet the business needs of the local, national, and international communities. APA-CE's Non-Credit programs are customized. Utilizing a variety of formats, these programs can be offered with flexible schedules by experts in the field, adding quantifiable value to organizations and the workforce.

Additional information concerning Continuing Education Non-Credit Programs is available at continue.fiu.edu.

FIU ONLINE

FIU Online offers online academic credit courses and degree programs for traditional students, professionals, and adult learners. Additional information is available at fiuonline.fiu.edu.

Online graduate degree programs are competitive and allow students to choose from a variety of master's degrees in:

- Accounting: Analytics Track
- Accounting: Assurance Track
- Accounting: Taxation Track
- African and African Diaspora Studies
- Business Administration: Professional MBA
- Business Administration: Healthcare MBA
- Computer Engineering: Network Security Concentration
- Construction Management
- Criminal Justice
- Curriculum and Instruction: Curriculum Development Track

- Disaster Management
- Educational Leadership
- Engineering Management: Construction Management Track
- Engineering Management: Engineering Entrepreneurship Track
- Engineering Management: Enterprise Systems Track
- Engineering Management: General Track
- Engineering Management: Logistics Engineering Track
- Engineering Management: Production and Manufacturing Track
- Engineering Management: Systems Engineering Track
- Engineering Management: Operations Management of Orthotics and Prosthetics
- Finance
- Forensic Science
- Global Affairs: International Crime and Justice Track
- Global Affairs: Global Risk and Corporate Responsibility Track
- Health Informatics and Analytics
- Health Services Administration
- Higher Education Administration
- History
- Hospitality Management
- Hospitality Management: Executive Track
- Hospitality Management: Mega Events Specialization
- Hospitality Management: Real Estate Development Specialization
- Hospitality Management: Revenue Management Specialization
- Human Resource Management
- Information Technology: Security Track
- Information Technology: System Administration Track
- International Business
- International Real Estate
- Latin American and Caribbean Studies
- Logistics and Supply Chain Management
- Logistics Engineering
- Marketing
- Mass Communication: Global Strategic Communication
- Mass Communication: Spanish Language Journalism – Latin American and Caribbean Studies
- Mass Communication: Spanish Language Journalism and Media
- Music Education
- Psychology: Professional Counseling Psychology
- Public Administration
- Public Health
- Religious Studies
- Research Design and Analysis
- Special Education
- Urban Education: Community Engagement Track
- Urban Education: TESOL Track

FIU Online's Continuing and Professional Education (CPE) team also offers many courses and programs in a wide variety of disciplines, providing opportunities for professionals to glean the skills necessary for career growth. Additional information is available at cpe.fiu.edu

At the doctoral level, FIU Online offers the following degrees:

- Doctor of Nursing Practice (DNP)

FIU Online also offers graduate professional certificates. Additional details and course requirements are available at fiuonline.fiu.edu

GRADUATE ADMISSIONS

Florida International University (FIU) encourages and accepts applications from qualified applicants without regard to sex; physical handicap; national origin; or cultural, racial, religious, or ethnic background or association.

MINIMUM REQUIREMENTS FOR ADMISSION INTO GRADUATE PROGRAMS

Applicants to a graduate program of the university must meet the minimum standards set forth by the university and the program. Applicants must check the individual program requirements before submitting their applications.

A student seeking admission into a graduate program offered by the university must have a bachelor's degree from an accredited institution or, in the case of foreign students, from a well-established institution of higher learning that is authorized to grant degrees by appropriate authorities in that country. The applicant must submit official transcripts, test scores and other supporting documents to Florida International University, Office of Admissions, PO Box 659004, Miami, FL 33265-9004. All credentials and documents submitted to Office of Admissions become the property of FIU. FIU will not return original documents to the applicant or forward to other institutions.

In the absence of specific program admission requirements, the applicant should have a minimum of a "B" average in the last 60 credits of upper-level work or a graduate degree from an accredited institution.

Degree programs individually determine admission requirements with respect to requiring nationally normed examinations and the required scores.

Admission at the graduate level is competitive and meeting minimum program requirements does not guarantee admission.

An applicant who fails to meet criteria may gain admission via an exception to the admission standards initiated by the specific academic department or program.

APPLICATION PROCESS

Students interested in applying for admission into a graduate degree program or a graduate certificate program must submit their applications online by visiting FIU's website at admissions.fiu.edu/how-to-apply/graduate-applicant for applications and instructions. Applicants are charged a \$30.00 non-refundable fee (U.S. dollars) for each online application.

Application Deadlines for Domestic Students	APPLICATION DEADLINE
SEMESTER	
Fall	June 1/PhD February 15
Spring	October 1
Summer	March 1

Note: Individual programs may have earlier deadlines. Applicants should check with their desired program to determine the application deadline.

INACTIVATION PROCESS

Applications are valid for term of application only. An academic department or program, on behalf of an applicant, may request deferral to a future term. Incomplete applications or applications for which a department or program has not made a decision will be cancelled by the ADD/DROP date of the applicable term. Likewise, No-Shows (i.e., admitted students who do not enroll for the term of admission) will have their admission revoked. Applicants seeking to reactive their admission files must submit new applications and pay application fees.

READMISSION

An admitted degree-seeking student who has not enrolled in any course at the university for three or more consecutive terms, including the summer term, will be required to apply for readmission. (This policy does not apply to students on military withdrawals or approved leaves of absence [LOA].) Students applying for readmission must meet university and program regulations in effect at the time of application for readmission. Applications for readmission and initial admission follow the same process. However, readmission does not require resubmission of previously submitted documentation. If the applicant has completed courses at another institution of higher education since attending FIU, the applicant must also submit transcripts from that institution. Doctoral readmission requires the academic unit to follow the Doctoral Readmissions Procedures outlined on the University Graduate School website.

CONDITIONAL MASTER'S ADMISSION

Master's-level graduate programs may recommend conditional admission to applicants who have undergraduate upper-level coursework grade point averages below 3.00 or who have standardized test scores below program requirements. Students who have already taken nine graduate credits at FIU are not eligible for conditional admission. Graduate credits (fewer than nine) earned will count towards satisfying the conditional admission. Applicants to doctoral or PhD-level programs are not eligible for conditional admission.

A student admitted conditionally is required to achieve a grade point average of 3.00 or higher for the first nine graduate-level credits and to complete these nine credits within the first three consecutive semesters, beginning with the term of admission. International students are not eligible for conditional admission due to Student and Exchange Visitor Program guidelines. Academic departments may petition the University Graduate School to fully admit international students on the basis of a holistic review of all admission documentation submitted.

TRANSFER OF GRADUATE CREDIT FROM OTHER INSTITUTIONS

Subject to approval of the program director, doctoral programs may accept up to 20 percent of the required total coursework of graduate credit earned from another institution beyond a bachelor's degree. An exception is made for courses contained within an earned master's or

doctoral degree. For such courses, the maximum is one fewer than half of the total credits required for the program.

Subject to approval of the program director, education specialist and master's degree programs may accept up to 20 percent of the required total coursework of graduate credit earned from another institution beyond a bachelor's degree.

Acceptance of transfer credits for a course is dependent upon the following provisions:

- The student received a grade of 3.0 or better on a 4.0 scale;
- The course was taken at an accredited institution;
- As judged by the admission committee of the department or program, the course was relevant to the graduate program in which the student is accepted;
- The course is listed on an official transcript received by the Office of Admissions;
- the course will not be older than 6 years at the time of receipt of a master's degree or 9 years at the time of receipt of a doctoral degree (does not apply to credits earned as part of a completed graduate degree program)

Note: Students should verify this information with the appropriate graduate program director.

ACADEMIC RECORDS

The Office of Admissions must receive official transcripts directly from the issuing institution. Transcripts received through other channels are unofficial. Documents in a language other than English require translation by an official translation agency. Notarized translations are not acceptable.

ADMISSION OF INTERNATIONAL STUDENTS

In addition to general university admission requirements, foreign applicants must be academically eligible for graduate-level study in their own country. Applicants from non-English-speaking countries (including internationally educated domestic students) must demonstrate proficiency in the English language by presenting a minimum score of 80 on the iBT Test of English as a Foreign Language (TOEFL) (equivalent to 550 on the paper-based version of the TOEFL), or 6.5 overall on the International English Language Testing System (IELTS). However, some departments or programs may require higher scores. Applicants who hold an undergraduate or graduate degree from an institution within the United States or other English-speaking country are not required to submit English proficiency exam scores. Applicants must check individual departmental or program requirements.

International student applicants must meet all the admission requirements of the university, as described in previous sections, and must comply with the following:

Application Deadlines for International Students

Due to the additional processing time needed, international students should submit their applications and supporting documents much earlier than students who are

U.S. citizens or residents. International student deadlines are as follows:

SEMESTER	APPLICATION DEADLINE
Fall	June 1/PhD February 15
Spring	October 1
Summer	February 1

Note: Individual programs may have earlier deadlines. Applicants should check with their desired program to determine the application deadline.

Tuition for International Students

International students on F-1 or J-1 visas do not qualify for Florida residency and are assessed non-resident fees.

ANNUAL ESTIMATE¹ OF COSTS FOR NEW² INTERNATIONAL GRADUATE STUDENTS

Single Student (18 semester hours)	
Tuition and Fees ³	\$18,428
Living Expenses ⁴	\$17,808
Books and Supplies	\$1,000
Medical Insurance ⁵	\$2,923
Total	\$40,159

¹ Based on 2021-2022 costs.

² Admitted for fall 2006 or thereafter.

³ Tuition and fees are subject to change. Fees include: Student Health Fee (\$187.38 per year), the Athletics Fee (\$20.00 per semester) and Transportation Access Fee (\$181.40). Amounts shown reflect 18 graduate credit hours during fall and spring terms only.

⁴ Living expenses are estimated at \$1,933.00 per month to cover room, board, transportation, and personal expenses. This cost is for 9 months.

⁵ All international students are required to carry medical insurance. This cost is for 12 months.

Declaration and Certification of Finances

The Declaration and Certification of Finances (DCF) must be completed and returned to International Admissions. Only admitted students receive a Certificate of Eligibility (Form I-20) for procurement of an F-1 student visa.

Immigration authorities require the university to certify the financial resources of each applicant prior to issuing the Form I-20. It is important that applicants are aware of the cost of attending the university and have the necessary supporting funds for the period of enrollment. Applicants should refer to the Annual Estimate of Costs chart. Applicants must demonstrate supporting funds equal to the total estimate of costs for 1 academic year by accurately completing the DCF. International Admissions must receive the DCF no less than 2 months prior to the anticipated entry date.

A student with accompanying dependents must show additional financial support on the DCF. An additional \$6,000 is required for a spouse, and \$4,000 is required for each child.

MEDICAL INSURANCE

The State of Florida requires that all international students maintain health insurance coverage to help defray costs in case of catastrophic medical emergencies. The policy must provide specific levels of coverage, established to ensure that the policy is adequate to provide for costs at U.S. hospitals, costs which are usually much higher than those in many other parts of the world. In addition, a policy must have a U.S.-based claims agent accessible to

medical providers to facilitate prompt payment of claims. The university has approved a plan that meets state requirements and the needs of most students; however, a student may select alternate coverage, provided it meets the state requirements for minimal coverage. A copy of these requirements is available from Student Health Services. Students should not purchase insurance policies prior to arrival without verifying that those policies meet FIU and state requirements. Compliance with the insurance regulation is required prior to registration.

FULL-TIME ENROLLMENT

U.S. immigration regulations require F-1 student visa holders to enroll full-time, except for summer terms, and to make satisfactory progress toward their degrees each term; student visa holders who do not make satisfactory progress jeopardize their immigration status. FIU defines full-time graduate enrollment as a minimum of nine semester hours during the fall and spring terms, and six during the summer term. Doctoral students who have reached candidacy must register for three credits per term. Master's students who have completed all requirements except for the thesis and who have an approved thesis on file with the University Graduate School must register for one credit per term.

It is the student's responsibility to comply with all visa requirements as stated under the U.S. laws Section 101(a)(15)(f)(i) of the Immigration and Nationality Act and the provisions of the USA PATRIOT Act.

Note: The university will not grant admission until an international student has met all requirements. Under no circumstances should an international student come to the university without having received the official Letter of Admission and Form I-20, and without having a valid F-1 visa.

All correspondence and document submissions should be directed to: Florida International University, Office of Admissions, Graduate Admissions, PO Box 659004, Miami, FL 33265-9004.

EMPLOYMENT

The legal regulations governing F-1 student employment are complex, and advisors are available in the Office of International Student and Scholar Services (ISSS) to explain these regulations. International students should not rely on employment as a source of income to finance their studies. In general, however, employment is available only to students who maintain their legal status in the U.S. under three categories:

- 1) On-campus employment: F-1 students may be employed on FIU campuses for a maximum of 20 hours per week during fall and spring semesters while school is in session, and full time during holidays, vacations, and summer. On-campus employment includes teaching and research assistantships for graduate students and hourly part-time work.
- 2) Off-campus employment: F-1 students may request off-campus employment under very limited conditions and only after maintaining F-1 status for at least 1 full academic year.
- 3) Practical training: F-1 students may request training employment to accept jobs related to their studies. Students usually pursue practical training employment

after completion of their degrees. In some limited cases, ISSS authorizes students for practical training employment prior to completion of their studies.

CREDIT FOR NON-COLLEGE LEARNING

Graduate credit will not be awarded for life experiences.

In cases where a student's experiences appear sufficient to develop the understanding and skills associated with a course, the student may register for independent study credits. A student may demonstrate competency through the development of an appropriate project under the guidance and approval of a faculty member specialized in the specific area of study.

Not more than 10 semester hours of a 30-semester-hour master's degree, or 15 semester hours of a 60-semester-hour master's degree, may be earned through independent study.

TUITION AND FEES

FEES

Registration and tuition fees are established by the Board of Trustees as required by the Florida Legislature. These fees are subject to change without notice. As of fall 2016, the authorized fees are:

PER CREDIT HOUR TUITION AND FEES FOR CONTINUING GRADUATE STUDENTS

	Florida Resident	Non-Florida Resident
Graduate	\$436.68 ^a	\$982.73 ^b
Per Semester Fees		
Intercollegiate Athletics	\$10.00	\$10.00
Student Health Services	\$93.69	\$93.69
Transportation Access ^c	\$95.13	\$95.13

^a This amount includes \$73.97 per credit fees.

^b This amount includes \$99.97 per credit fees.

^c Transportation Access is \$88.72 in the summer term. Fall/spring = \$95.13; including the sales tax.

PER CREDIT HOUR TUITION AND FEES FOR NEW^a GRADUATE STUDENTS

	Florida Resident	Non-Florida Resident
Graduate	\$455.64 ^b	\$1,001.69 ^c
Per Semester Fees		
Intercollegiate Athletics	\$10.00	\$10.00
Student Health Services	\$93.69	\$93.69
Transportation Access ^d	\$95.13	\$95.13

^a Admitted for Fall 2006 or thereafter.

^b This amount includes \$75.69 per credit fees.

^c This amount includes \$101.69 per credit fees.

^d Transportation Access is \$88.72 in the summer term. Fall/spring = \$95.13, including the sales tax.

FEE WAIVERS

Students using a fee waiver for part of the fee payment must pay their portion **on or before the last day to pay fees**.

State employees using the state employee fee waiver to pay their fees must register on or after the day established in the official university calendar for state employee registration. The state employee fee waiver pays up to six credit hours of tuition and fees per term. Summer sessions A, B, and C are considered one term. State employees who register for more than six hours will be required to pay for the additional credit hours, plus all per-student related fees. A properly completed and approved waiver form must be presented at the Student Financials Office by the date published for the last day to pay fees. Fee waivers will be processed only for those courses shown on the approved fee waiver request form presented at the time of registration. Only one fee waiver form per employee will be accepted each semester. The

state employee fee waiver will not be accepted as payment for course registrations prior to the announced date for state employee registration. State employee fee waivers do not cover thesis, dissertation, internships, directed individual study, non-credit courses, sponsored credit programs, certificate programs, field experience, practica, or courses taken for audit grades.

Fee waivers are available to persons 60 years of age or older who meet the Florida residency requirements as defined in this catalog. The fee waiver allows qualified individuals to attend credit classes on an audit basis. Under the fee waiver policy, qualified individuals must register during the first week of classes. Individuals using the fee waiver must pay the photo ID fee during their first term in attendance and once per academic year thereafter.

Florida law requires that state employee fee waivers and fee waivers for Florida residents 60 years of age or older be granted on a space-available basis only; therefore, individuals using these waivers must comply with the procedures outlined in the schedule of classes for each semester. Refunds will not be given for employees who have registered and paid prior to the state-employee registration day and wish to use the fee waiver.

FEE PAYMENT

Fees may be paid online through the MyFIU portal (my.fiu.edu) or in person at the Student Financials Office located on the Modesto A. Maidique Campus (Student Academic Success Center 101) and on the Biscayne Bay Campus (Academic Center One 140). The online payment system accepts credit card payments of AMEX, DISCOVER, MASTERCARD, and VISA. (Note: There is a 2% non-refundable fee for paying with credit card). Check payments may be processed through the online system without a fee. The university is not responsible for cash sent through the mail. *Please take into consideration delivery and processing time when mailing your payment. The Student Financials Office is not responsible for any delayed or misdirected mail by the U.S. Postal Service or Campus Mail Services.* Failure to pay fees by established deadlines will result in late payment fee and may cause you to be dropped from all courses. See the *Fee Liability* section below.

Payment Plan

The payment plan will allow students to pay the current term's tuition and fees in two installments. The first/initial installment of a student's total tuition and fees must be paid by the Last Day to Pay, and the remaining balance will be due by the established installment due date deadlines. There is a \$15.00 service charge to sign up for the plan. Enrollment in the Payment Plan can be accomplished by going to the MyFIU portal (my.fiu.edu) and selecting "Payment Plan" in the Finances section. Installments not paid on time will be subject to the late payment fee.

Late Registration Fee

Students who register after the established registration deadline will be subject to a \$100 late registration fee.

Late Payment Fee

Students who pay fees after the established payment deadline will be subject to a \$100 late payment fee. If applicable, this fee may be assessed in addition to the late registration fee described in the preceding section.

Financial Aid Recipients

Financial aid is available to those qualifying through the Financial Aid Office. A limited number of short-term loans are available to full-time enrolled students who may experience difficulties in meeting fee payment due dates.

All financial aid recipients must pay the difference between their financial aid or fellowship awards, less Federal Work Study and their final fee assessment. The student's schedule will then be automatically validated. Acceptance of a financial aid package constitutes acceptance of the above validation process.

Fee Liability

Students are liable for all fees associated with all courses in which they are registered at the end of the drop/add period. The fee payment deadline is published in the official university calendar. *If fees are not paid in full by the published dates, registration in all courses may be cancelled.*

Reinstatement of Classes

Appeals for reinstatement of registration for classes dropped for fiscal reasons must be filed in writing on the prescribed form with the Student Financials Office by the time specified on the cancellation notice. Reinstatement will be considered for all classes on the class schedule at the end of the drop/add period. Reinstatement cannot be requested selectively for certain classes. All reinstatement activity, including fee payment, must be completed by the date on the cancellation notice. All students whose registrations have been reinstated will be assessed a late payment fee. If the late registration fee is applicable it will also be assessed.

Application Fee

A non-refundable fee of \$30 will be charged for each online application for admission to the university, unless deferred by the academic unit. Online applications will remain active for one semester.

Orientation Fee

A mandatory Graduate Orientation fee will be assessed of all newly admitted graduate students. The fee will cover administrative costs, materials/publications, and meal(s) associated with Graduate Orientation. New students admitted for fall 2009 and thereafter will have the \$35 fee applied to their accounts automatically upon registering for classes.

CHECKS

The university will accept personal checks for amounts due to the university. These checks must be in the exact amount due only. The Student Financials Office will not accept checks above the amount due, third-party checks, or checks for cash. State law requires that a service fee be assessed on a check returned unpaid by the bank for any reason. Service fees are based on the amount of the unpaid check. Checks for \$0.01-\$50.00 are charged a \$25.00 fee; \$50.01-\$300.00, a \$30.00 fee; \$300.01-

\$800.00, a \$40.00 fee; and a fee of 5% of the amount of the check for all checks greater than \$800.00. Checks returned by the bank can be redeemed only by cash, cashier's checks, or money orders. A personal check will not be accepted to replace a dishonored check. If a check is returned from an online payment, returned check fines will also be charged per the amounts indicated above.

Returned checks will be assigned to an agency for collection if not promptly paid. When an account has been assigned, the collection agency fee will be added to the university charges for collection at the current contract rate. Returned checks on student accounts will result in cancellation of classes and will require petition for reinstatement. See the Reinstatement of Classes section above.

The Student Financials Office will not accept a check on any student's account which has had two previous dishonored checks.

REFUNDS

Refunds will be processed and issued to all students whose fee accounts show overpayment after the last day to pay fees. Refunds will be issued via direct deposit. Direct deposit information can be entered online in the Finances section of the MyFIU portal (my.fiu.edu). If direct deposit information is not provided, the refund will be issued in the form of a check and will be mailed. Students to whom refunds are due will not be required to submit refund applications to receive their refund; it will automatically be calculated. If there is an amount due to the university in the accounts receivable system, the refund will be held until an arrangement to pay the prior balance has been made.

Students who have completed registration, have paid all fees due, and have completely withdrawn from the university prior to the end of the fourth week of classes are eligible for a refund of 25% of total fees paid.

In the following exceptional circumstances, a full refund of total fees paid will be made upon presentation of the proper documentation:

- Death of a student or immediate family member (i.e., parent, spouse, child, or sibling). Death certificate required.
- Involuntary call to military service. Copy of orders required.
- Illness of student of such severity or duration to preclude completion of courses. Confirmation by a physician required.

Processing of refunds will begin after the end of the add/drop period for each semester.

Refunds for tuition and fees are not available due to changes in the mode of education. No appeals are available for requests denied due to mode in education changes.

Appeals for tuition refunds must be submitted in writing to the Office of the Registrar within 6 months after the end of the term for which the refund is requested. There are no exceptions to this policy. Refunds for financial aid recipients will be determined based on the US Department of Education "Return of Title IV Funds Policy (R2T4)."

PAST-DUE ACCOUNTS

Delinquent accounts are sufficient cause to prohibit registration, graduation, release of transcripts, or release of diplomas.

The university reserves the right to assign any past-due account to an agency for collection. When an account has been assigned, the collection agency fee will be added to the university charges for collection at the current contract rate.

Deadlines

Students are reminded that deadlines are strictly enforced. The university is not able to grant credit or to extend the fee payment period beyond the time set in its official calendar. The university does not have the authority to waive late fees unless it has been determined that the university is primarily responsible for the delinquency, or that extraordinary circumstances warrant such waiver. The university has no authority to extend deadlines for individual students beyond those set by the official calendar.

PARKING RULES AND REGULATIONS

All persons who park vehicles on the university's campuses must register their vehicle(s) with the department of Parking and Transportation, obtain a decal or permit, and display the decal or permit, as prescribed by the Parking Rules and Regulations. The university assumes no liability for vehicles parked or operated on university property. The issuance of a decal or permit does not guarantee a place to park.

Transportation Access Fee

All enrolled students will pay a Transportation Access Fee each semester. The fee will appear on the student fee schedule.

Students may request parking decals online at parking.fiu.edu or at the Parking and Transportation offices located in the PG5 Market Station at Modesto A. Maidique Campus, or in Wolfe University Center 353 at the Biscayne Bay Campus. Each student needs to bring a current vehicle registration when obtaining a decal at the office. All decals must be permanently affixed to the outside of the vehicle, either on the left side of the rear bumper or lower left corner, on the outside of the rear window. All decals are valid until the expiration date indicated on the decal. A duplicate decal will be issued, upon request, for an additional charge. This decal is valid only for the vehicle under which it is registered. Duplicate decals are available to persons who have obtained an original decal for the current academic year. The duplicate decals are for additionally owned vehicles and for situations where the original decal must be replaced due to an accident, maintenance, etc.

Housing

All students living in university housing complexes need to obtain a current semester housing sticker from Parking and Transportation. This sticker allows a vehicle to be parked legally in student housing areas. This sticker is valid for the indicated semester(s) only. This housing sticker should be affixed to the left or right side of a current student decal.

Disabled

Any person who has been certified in accordance with Sections 320.084, 320.0848, or 320.0842 of the Florida Statutes, and has been issued a Disabled placard by the Florida Department of Highway Safety and Motor Vehicles Bureau, shall obtain and display a university parking decal in the classification which would otherwise be appropriate.

Towing and Impoundment

The university may tow and impound any vehicle found to be parked illegally or in violation of these rules.

Rules and Regulations Pamphlets

A copy of the University Parking Rules and Regulations is available online at parking.fiu.edu and at the Parking and Transportation offices located in the PG5 Market Station at the Modesto A. Maidique Campus, or in Wolfe University Center 353 at the Biscayne Bay Campus. It is the responsibility of each student to become familiar and comply with the university's parking and traffic rules and regulations.

LIBRARY FINES

Per book per library hour	\$0.25
Maximum fine per book	\$10.00
Lost book fine	\$100.00

Note: All fees are subject to change as permitted by law. Additional fees may be added and special-purpose fees may be assessed in some instances.

FINANCIAL AID

WHAT IS FINANCIAL AID?

Financial aid is a source of financial support provided by federal, state and local governments, universities, community organizations, and private corporations to help students meet the cost of attending college. It includes gift-aid (grants and scholarships) and self-help aid (loans and student employment).

- Grants are awards based on financial need that do not have to be repaid.
- Fellowships are non-repayable awards based on either merit, special talent, and/or financial need.
- Student employment allows students to earn money toward their education by working part-time while attending school.
- *Student loans are available to students at low [interest rates](#) (Federal Direct Loans).

APPLYING FOR ASSISTANCE

The Free Application for Federal Student Aid (FAFSA) is the form used annually to apply for most types of financial assistance. FIU's school code (**009635**) is required when completing the FAFSA. Applications for financial assistance are available annually on October 1st for the following academic year, which begins in August. FIU's annual priority deadline is **March 1st**. Applications completed after this deadline are processed in order of completion.

The FAFSA is available online:

- FAFSA web filers require an FSA ID (Federal Student Aid ID) to be used in lieu of student signature: fsaid.ed.gov/npas.
- The FAFSA can be completed at fafsa.gov.
- Using the Panther ID, students may check the "TO DO LIST" for any documentation required for file completion through my.fiu.edu.

ADMISSIONS

To be eligible for financial aid programs, a student must be admitted to a degree-seeking program. However, students should not wait until they are admitted to apply for assistance.

SUMMER ASSISTANCE

To receive Summer assistance for 2021, the 2020-2021 FAFSA must be on file. Summer awards are automatically posted, as long as there are no pending documents required and the student meets the preliminary review of Satisfactory Academic Progress (SAP) for Summer and the following academic year.

TRANSFER STUDENT PROCEDURES

Financial aid cannot be transferred from one post-secondary institution to another during the academic year. Students planning to transfer in mid-year should complete the FAFSA using both their current institution and Florida International University (**FIU Federal School Code 009635**) to ensure consideration for all applicable financial assistance.

ELIGIBILITY CRITERIA

To qualify for most need-based financial assistance, a student must meet the following basic eligibility requirements:

- demonstrate financial need;
- be a U.S. citizen or eligible non-citizen;
- be registered with Selective Service, if required;
- be enrolled at least half-time in an eligible program of study (i.e., 5 graduate-level credits during the academic year);
- not be in default on a loan, or owe a repayment on Title IV aid received at any institution; and
- maintain satisfactory academic progress.

Additional requirements may apply depending on the aid programs for which a student is applying.

DETERMINING FINANCIAL NEED

Financial need is defined as the difference between the estimated cost of attendance and expected family contribution (EFC), the amount students/spouses can reasonably be expected to contribute toward educational expenses. Need analysis is a federally mandated formula that measures, in an equitable and systematic way, how much students and their families are expected to contribute toward their higher education. Income, assets (excluding a primary residence), family size, number of family members attending college, and other factors are evaluated to give a complete assessment of a family's financial strength.

Cost of attendance minus EFC= Financial need

VIEWING YOUR FINANCIAL AID

Students can view application status and awards using their Panther ID through the student portal, my.fiu.edu.

RETURN OF FINANCIAL AID POLICY

Federal regulations mandate that the Financial Aid Office comply with the Return to Title IV Funds (R2T4) policy. Any student who ceases attendance in a scheduled period of enrollment before completing 60% of the period of enrollment may be liable to repay all or a portion of the Title IV aid disbursed. A student who does not earn at least one credit with a D- or higher may be liable to repay all or a portion of the Title IV aid disbursed. Grades that affect Return to Title IV Funds are F, FO, IN, DR, W, WA, WI. Title IV funds include the following financial aid programs awarded to graduate students: Unsubsidized Stafford Loans, TEACH Grant, and Grad PLUS Loans. The amount of the return is based on formulas established by the U.S. Department of Education. For additional information regarding the Financial Aid Return to Title IV Policy, students may view the complete policy available on the OneStop webpage.

AWARD PROCEDURES

Award decisions for newly admitted students who complete their financial aid applications are issued annually in mid-February with an Early Estimated Financial Aid Notice. A financial aid package may consist

of a combination of grants, loans, and student employment. Other sources of assistance, such as merit awards and private and institutional scholarships, are taken into consideration when preparing the award.

Award decisions for returning students who meet the March 1st priority deadline should expect to receive a financial aid offer by July.

*The Financial Aid Office reviews Spring grades to determine if [Satisfactory Academic Progress](#) has been met before an award determination is made for Summer and the following academic year for all returning students.

SOURCES OF ASSISTANCE

The university participates in all federal- and state-funded programs. Institutional assistance is available for students with academic promise and financial need.

Graduate Assistantships

Graduate students pursuing master's or doctoral degrees may qualify for assistantships, fellowships, or other awards offered through individual graduate academic units. Applicants should contact the Graduate Program Director in the appropriate department.

FINANCIAL AID SERVICES

- **Log On to FIU Panther Mail Today!** FIU does most of its business electronically, including informing students of the Financial Aid Offer Notice that stipulates financial aid for a given academic year. Initial financial aid correspondence may be mailed to a student's local address. Thereafter, communications are sent electronically to FIU Panther Mail. Students are responsible for keeping their email addresses up to date. Students may use the "Self-Service Personal Profile" available via my.fiu.edu to update local information. To update other addresses (e.g. permanent), a student must visit OneStop.
- **Financial Aid Counseling:** OneStop representatives are available on a walk-in basis to assist students with special problems, technical questions, and exceptions.
- **Web Access:** Students may obtain information on the status of their application at my.fiu.edu.
- **LIVE CHAT:** Students can communicate online with Financial Aid representatives through PANTHERCHAT, available via the OneStop webpage: onestop.fiu.edu.
- **Financial Aid e-forms:** Requested financial aid forms can be obtained and e-forms Guides are available at onestop.fiu.edu.

For additional financial aid information, students may contact the OneStop Enrollment Services Office by telephone at (305) 348-7272. Students also may visit the Student Academic Success Center at Modesto A. Maidique Campus, or Enrollment Services (AC1 100) at the Biscayne Bay Campus.

UNIVERSITY GRADUATE SCHOOL RULES AND REGULATIONS

CLASSIFICATION OF STUDENTS

Students are classified as degree-seeking students and non-degree-seeking students.

Degree-Seeking Students

Degree-seeking students are students who have been admitted into a degree program, but have not completed the requirements for the degree.

Non-Degree-Seeking Students

Non-degree-seeking students may be: (1) Graduate Certificate students; (2) Advanced Diploma students; (3) students affiliated with a College or School; or (4) unaffiliated students. Students who are unaffiliated are limited to taking 12 credits at the University. Affiliated students must be approved by a College or School and may take up to 12 hours of coursework or more with departmental approval as a non-degree-seeking student. Higher allowable course hours apply to students accepted in Graduate Certificate or Advanced Diploma programs.

The following regulations apply to non-degree-seeking students:

1. A \$30.00 non-refundable application fee (U.S. dollars) made payable to Florida International University (FIU) must accompany applications submitted.
2. Non-degree-seeking students are not required to meet the usual admission requirements and are not officially admitted as regular students. Enrollment as a non-degree-seeking student does not imply a right to be admitted in the future as a regular, degree-seeking student. Credits earned as a non-degree-seeking student will not be counted toward a degree at the University unless such a student subsequently applies for regular admission and is accepted as a degree-seeking student. Credits must meet time limit and grade of no less than a "B".
3. Registration is permitted only on a space-available basis and is determined at the time of registration.
4. No more than 12 graduate-level semester hours earned as a non-degree-seeking student may be counted toward a degree. The acceptance of such credits must be recommended by the graduate program and approved by the Academic Dean. Graduate Certificate students may count up to 18 graduate-level credits, provided they meet the requirements specified below under Graduate Certificates. Applicants denied admission to the University will not be allowed to register for courses in any program or as non-degree-seeking students for a period of one year.
5. Immigration regulations prevent most foreign nationals from enrolling in courses without being admitted into a formal degree or certificate program, depending on the type of visa that they hold. International students should contact the [Office of International Student and Scholar Services](#) for further information.

Affiliated Students

Students applying for affiliated status as non-degree seeking students must be approved by the appropriate academic department and the University Graduate School in accordance with criteria approved by that College or School's Faculty Curriculum Committee. Non-Degree Seeking student policies apply to Affiliated Students. The form and instructions are available at onestop.fiu.edu/forms.

Graduate Certificate Students

Students seeking admission to a Graduate Certificate program need to apply through the Office of Admissions using the online application form. Students fully admitted and enrolled in other programs may use the paper application available through the Office of Admissions to apply to certificate programs. The normal application fee applies to Graduate Certificate applications.

ACADEMIC DEGREE REQUIREMENTS MASTER'S DEGREE

Course Requirements

Programs leading to a master's degree will normally require at least 30 credit hours of non-thesis course work. Master's programs normally include courses at the 5000 and 6000 levels. No course counted toward a student's undergraduate degree may be included in that student's Masters degree program except in approved 4+1 bachelor's-master's degree programs.

Thesis Requirements

Thesis committees must have a minimum of three members, at least two of whom are from the unit offering the degree. All FIU faculty who are members of the thesis committee must be members of the Graduate Faculty. All committee appointments must be approved by the Dean of the University Graduate School.

A thesis proposal must be approved by the University Graduate School at least one semester prior to the date of graduation.

Once an approved thesis proposal is on file, continuous registration for at least 1 thesis credit hour each semester (including the summer term) is required until the thesis requirement is fulfilled. During the academic year, international students must maintain full-time enrollment.

Time Limits

For the Master of Fine Arts degree, all requirements, including the successful defense of a thesis where required, must be completed within eight years of first enrollment in the master's program. For all other master's degree programs, all requirements, including the successful defense of a thesis where required, must be completed within six years of first enrollment in the master's program. No courses used in a program of study that are beyond these time limits at the time of graduation can be used toward degree completion, with the exception of credits that are part of an earned graduate degree.

Graduation Requirements

The University will confer the master's degree when the student has met the following conditions:

1. Earned an overall average GPA of 3.0 in all courses in the graduate degree program.
2. Recommended by the faculty of the College or the School.
3. If applicable, submission of the final approved thesis via ETD.
4. Certified by the Academic Dean of the College or the School that all requirements for the degree being sought have been completed.

Master's students who have been recommended for the degree by the faculty of the School or College may participate in the commencement ceremonies.

DOCTORAL DEGREE

Course Requirements

Programs leading to a doctoral degree require at least 75 credit hours beyond the bachelor's degree. These shall include a minimum of:

1. 30 credit hours earned in academic courses which are part of the doctoral program. Doctoral programs normally include courses at the 6000 level and above. Courses at the 5000 level may be included in a doctoral degree program in appropriate cases.
2. A student may enroll for dissertation credits after completing all coursework, passing the candidacy examination, and being advanced to candidacy. Dissertation credits may not be taken before advancement to candidacy.

Dissertation Requirements Candidacy

A student is admitted to candidacy upon successfully completing all required coursework, language requirements, and qualifying examinations and passing the candidacy examination. Some programs require students to defend the dissertation proposal as part of candidacy. The student's written request for candidacy must be approved by his or her major professor and forwarded to the program director, the unit dean, and then to the Dean of the University Graduate School.

Each candidacy examination must be prepared and graded by a committee consisting of a minimum of three faculty of the academic unit offering the degree. Admission to candidacy requires that a majority of the committee members agree that the student passed the examination. A candidacy examination may not be passed conditionally. A "Pass" on the examination cannot be made contingent upon other factors, such as the completion of additional coursework or the preparation of extra research projects.

Students must be informed in writing of the results of their performance on the examinations within 30 days of the examination date. If the student fails the candidacy examination the committee, at its discretion, may provide for reexamination at a mutually satisfactory time but no more than one year from the original date of the examination. Passing the candidacy examination is requisite to continuing in the graduate program. Students who fail the candidacy examination twice will be dismissed from the doctoral program.

After a doctoral student is admitted to candidacy, continuous registration for at least 3 dissertation credit hours each semester (including the summer term) is

required until the dissertation requirement is fulfilled. During the academic year, international students must maintain full-time enrollment.

Dissertation Committee

Dissertation committees must have a minimum of four members: at least three of whom are from the unit offering the degree and one of whom is from another academic unit at FIU. All FIU faculty who are members of the dissertation committee must be members of the Graduate Faculty, and the chair of the dissertation committee must hold Dissertation Advisor Status. All committee appointments are made by the Dean of the University Graduate School.

Dissertation Proposal

A dissertation proposal must be approved by the University Graduate School at least three semesters prior to the date of graduation.

Time Limits

All requirements, including the successful defense of a dissertation, must be completed within nine years of first enrollment in the doctoral program. No courses used in a program of study that are beyond these time limits at the time of graduation can be used toward degree completion, with the exception of credits that are part of an earned graduate degree.

Graduation Requirements

The University will confer the doctoral degree when the student has met the following conditions:

1. Earned an overall average GPA of 3.0 in all courses in the graduate degree program.
2. Completed and defended satisfactorily a doctoral dissertation.
3. Recommended by the faculty of the College or the School.
4. Submission of the final approved dissertation via ETD.
5. Certified by the Academic Dean of the College or the School that all requirements of the degree being sought have been completed.

Doctoral students must have completed all requirements for the degree in order to participate in the commencement ceremonies.

GRADUATE CERTIFICATE PROGRAMS

A certificate program is a combination of courses with a common base or interest selected from one or more academic disciplines and so arranged as to form an area of academic concentration. Three types of certificates are awarded: academic, professional, and continuing studies. Students must apply and be admitted into the certificate program through the academic department.

Graduate Certificates require 15 to 18 hours of graduate credit. At least six of the hours must be in core courses taken by all individuals obtaining a given Graduate Certificate.

All the credits earned in a Graduate Certificate Program may be used in a master's degree program, provided the student is admitted to the master's degree program prior to the completion of no more than 12

Graduate Certificate credits. Non-Degree-Seeking student policies apply to Graduate Certificate students.

In all cases, the Graduate Program Director will evaluate whether or not the Graduate Certificate credits are acceptable in that particular graduate program.

CHANGE OF GRADUATE DEGREE PROGRAM

Only fully admitted and enrolled students may apply to change a graduate degree program without paying an additional application fee. All other students must submit a request through the Graduate Admissions process. Change of Graduate Degree Program forms are evaluated as new applications by the department into which the student wishes to transfer. A "Change of Graduate Degree Program" form and instructions are available on the University Graduate School website at: gradschool.fiu.edu/students/#studentforms.

REGISTRATION

Students should verify dates and registration information on the Academic Calendar by visiting the OneStop website: onestop.fiu.edu.

All degree-seeking students registering for more than 15 credits in any given semester must obtain the approval of the Dean of the University Graduate School. Registration for courses is as follows:

Official Registration is held during the preceding semester (check the Academic Calendar for the dates). Degree-seeking students are given an appointment day and time based on their student classification. Students may also add/drop at this time.

Open Registration is held following Official Registration. There is no appointment day and time and registration is on a first-come, first-served basis; for degree-seeking students. Students who have not yet registered are encouraged to do so at this time. Students who have already registered may also add or drop courses during this period.

Registration Access

All students are able to retrieve their grades, registration appointment time and day; classroom assignments; registration holds (if any) and register/drop/add courses using the **MyFIU Self-Service portal** (<http://my.fiu.edu>). Students must use their Panther ID and password in order to utilize the system.

New students must reset their passwords at myaccounts.fiu.edu in order access their FIU accounts. Current students experiencing difficulties with accessing their FIU accounts may reset their password at myaccounts.fiu.edu.

IMMUNIZATION

As a prerequisite to registration, Florida International University (FIU) requires all students to comply with the following immunization policy regulations from the Florida Board of Governors regarding measles, mumps, rubella, meningitis, and hepatitis B immunity. **ALL** students **MUST** submit the Immunization Documentation Form 4 weeks prior to registration to release any holds that may prevent them from registering:

1. **Measles, Mumps, Rubella:**

All students born after December 31, 1956, must present documented proof of immunity to measles (Rubeola) and German measles (Rubella), as described below:

Acceptable Proof of Immunity consists of:

- a. Proof of two (2) vaccinations (doses) of MMR (Measles/Mumps/Rubella) received at least 28 days apart or two doses of measles and one Rubella
 - Vaccinations must have been received after your first birthday
 - Vaccinations must have been received in 1969 or later
- b. Proof of immunity by way of a blood test lab result (Measles and Rubella Titer)
- c. A written statement from physician (M.D. or D.O. **ONLY**) documenting a diagnosis of measles (Rubeola). Must include date of diagnosis, be signed by the healthcare provider and be on his/her official stationery. This is acceptable for measles only and does not apply to Rubella

Exemptions:

Students will be exempt from the pre-registration immunization requirement for measles, mumps, and rubella, only if they meet any one of the following three criteria:

1. Students born before January 1, 1957.
2. Medical Exemption: To claim a medical exemption, the student must submit the Personal Physician Immunization Waiver form signed by their personal physician.
3. Religious Exemption: For details on how to claim religious exemption, please contact the Health Compliance Office at 305-348-2688.

To prevent delays in the ability to register for classes, all documents requesting medical or religious exemptions must be received by the Student Health Services at least four weeks prior to registration.

Temporary Deferments are accepted for the following conditions:

1. Documented pregnancy or fertility treatment
2. Documentation of breastfeeding
3. Documented illness

Deferment status requests must be submitted to the Student Health Services at least four weeks prior to registration, and the request must be signed by a MD/DO physician, nurse practitioner, or registered nurse and be on their official stationery.

2. **Meningitis and Hepatitis B:**

All students must present documented proof of vaccination/immunity to meningococcal meningitis and hepatitis B as described below:

Acceptable Proof of Immunity consists of:

- a. Proof of one dose of meningitis vaccine and a total of three doses of hepatitis B vaccines
- b. Proof of immunity by way of a blood test lab result (applicable to hepatitis B only)
- c. A written statement from a physician (M.D. or D.O. **ONLY**) documenting a diagnosis of hepatitis B. Must include date of diagnosis, be signed by the physician and be on their official stationery. This is acceptable for hepatitis B only and does not apply to meningococcal meningitis

Exemptions:

Students declining to receive vaccination for meningitis and/or hepatitis B must present a signed waiver of liability acknowledging that they have received and read information pertaining to the disease and despite knowledge of the risks have decided to waive receiving the vaccine. These waivers can be signed on my.fiu.edu in the Student Center, under the Immunization Waivers link in the "Student Health Center" tab. The student must be over 18 years of age to sign the waiver. The online waiver is processed immediately. NOTE: A parent or legal guardian must sign the waiver for any minor under the age of 18.

Acceptable Forms of Documentation:

The following documents are acceptable proof of immunity, provided that the dates are acceptable and the documents are signed and stamped by the healthcare provider:

- [FIU Immunization Documentation Form](#)
- Health Department Records
- Childhood Immunization Records
- School Immunization Records
- Military Service Records
- Documentation of having the disease during their lifetime **ONLY** applies to Measles (Rubeola) and Mumps
- Laboratory test results demonstrating immunity to the disease:
 - Measles (Rubeola) positive IgG titer required
 - Rubella positive IgG titer required
 - Hepatitis B positive AB antibody surface titer required
 - Meningitis lab test **NOT valid and WILL NOT be accepted**

Can't Find Your Immunization Documents?

If the student cannot locate their immunization records and is confident they have taken the vaccines, they can submit a **positive** lab test against both the Measles and Rubella and/or Hepatitis B. The student also has the option to take the required vaccines again with their personal physician, at a local health department, or at the [FIU Student Health Clinics](#).

Where can I get immunized?

MMR, meningitis, and hepatitis B vaccines are available for a nominal fee at the FIU Student Health Clinics on both the Modesto A. Maidique Campus and Biscayne Bay Campus. To schedule an appointment for a pre-matriculation vaccine please call 305-348-8385. Any student under the age of 18 must present the Student Clinic [Consent For Treatment of a Minor form](#) signed by their parent/legal guardian with an attached copy of the parent/legal guardian valid photo ID.

LATE REGISTRATION FEE

Any student, degree-seeking or non-degree-seeking, who initiates registration during the Drop/Add period is assessed a \$100.00 late registration fee.

DROPPING AND ADDING COURSES

During the official add/drop period (check the Academic Calendar for specific dates), a student may add and drop courses without financial penalty or initiate registration with financial penalty (i.e., the late registration fee). Students may also drop courses or withdraw from the University with no record of enrollment and without a tuition fee liability. If the tuition fee has already been paid, the student may be eligible for a refund that will be generated by the Student Financials Office and processed accordingly.

Students are responsible for their own enrollment and for adhering to all published deadlines for enrollment activity.

LATE DROPS

Courses officially dropped after the Drop/Add period and through the last day to drop for the term, (check the Academic Calendar for specific dates), are recorded on the student's transcript with a grade of 'DR' (dropped). The student is financially liable for all dropped courses. Before withdrawing from the institution (i.e. dropping all courses with DR grades), financial aid students should refer to the "Return of Financial Aid Policy" section of this catalog. *Non-attendance or non-payment will not constitute a drop.*

PETITION TO DROP/WITHDRAW

A student may submit a petition for an exception to an enrollment deadline for a late drop by submitting a completed student petition form to OneStop. A drop after the deadline will be approved only in the following exceptional circumstances:

1. Death of a student or immediate family member (parent, spouse, child, sibling, or grandparents).. Death Certificate and documentation establishing relationship are required.
2. Call to active military service. Copy of orders required
3. Illness of student of such severity or duration to preclude completion of courses. Confirmation by a physician required.

FIU will consider student petitions and appeals for late drops/withdrawal within six months after the end of the term in which the course was taken. In extraordinary circumstances, FIU can review exceptional requests for late drops beyond the six-month limit. However, in addition to the supporting documentation required for a completed petition, FIU requires documented rationale that warrants an exception to the six-month deadline. Because we may need to seek additional guidance from Student Health Services, Veterans' Affairs administrators, or other departments, we require six to eight weeks to provide students with decisions concerning late drops/withdrawals for courses taken more than six months prior to the submission of the petition.

WITHDRAWAL FROM THE UNIVERSITY

A currently registered student can withdraw from the University only during the first eleven weeks of the semester. In the summer semester, withdrawal deadlines will be adjusted accordingly. A Withdrawal Form must be completed and submitted to the OneStop Enrollment Management & Services. *Non-attendance or non-payment*

will not constitute a withdrawal. (Refer to the Academic Calendar for the deadline dates.)

The transcript of a student who drops all classes before or during the first week of classes will contain no record of enrollment and no tuition fee will be assessed. If the tuition has already been paid, a refund will be generated by the Student Financials Office and mailed to the local address on file. If a student officially withdraws from the University prior to the end of the fourth week of classes, a 25 percent refund, will be issued.

The transcript of a student who officially withdraws after the Drop/Add period and before the end of the last day to drop for the term will reflect a 'WI' for each course.

GRADING SYSTEM

Grade	Points Per Credit Hour
A	4.00
A-	3.67
B+	3.33
B	3.00
B-	2.67
C+	2.33
C	2.00
D	1.00
F Failure	0.00
F0 Failure based on non-attendance	0.00
P Satisfactory (Pass)	N/A
IP Thesis/Dissertation in Progress	N/A
U Unsatisfactory	N/A
EM Credit by Departmental Examination	N/A
IN Incomplete*	N/A
AU Audit	N/A
W Withdrew from Course	N/A
WA Administratively Withdrawn	N/A
WI Withdrew from the University	N/A
+ National/International Student Exchange	N/A
U Unsatisfactory	N/A
S Satisfactory	N/A
DR Dropped Course	N/A
NG No Grade Assigned by Instructor (system generated)	N/A

*An incomplete grade (IN) is a temporary grade. If a student has not met the terms and conditions associated with the incomplete grade within two semesters of the grade's assignment, then the IN will become an F (or failing) grade.

HOW TO CALCULATE GRADE POINT AVERAGE (GPA)

GPA is calculated for all students. GPAs are calculated only for grades earned at FIU.

There are two types of GPAs: Semester and Cumulative. The semester GPA is calculated using the courses taken in that semester. The cumulative GPA is a summary of all FIU courses taken over a student's career. Remember, when a student's career changes (i.e., undergraduate to graduate), the GPA calculation begins anew. Transfer course grades are not included in any GPA calculations. To calculate a GPA, one must know the course grade, the course credits or semester hours associated with that course, and the values associated with each grade assigned. See the **Grading System** list above for "Points Per Credit Hour" values.

To calculate a GPA, first multiply the number of course credits/semester hours for each course by the grade point values associated with the grade received in that course. Then add all of those totals together and divide that sum by the total number of course credits/semester hours. For a semester GPA use all regularly graded courses in that semester (plus P/F courses in which an F or U was earned), and for the cumulative GPA use all courses. Do not average semester GPAs in order to calculate the cumulative GPA.

Note: All GPAs are rounded to two decimal points.

Note: On the Grading System list above, some grades will not affect GPA, such as "P" (Satisfactory), "U" (Unsatisfactory), "IN" (Incomplete) or "DR" (Dropped). Thus, do not include the credits for such graded courses in the calculation.

Here is an example of semester GPA calculation:

Calculating a Semester GPA

Course	Grade	Course Credits Attempted	Points Per Credit Hour	Points Per Course
EDF 5481	B	3.0 x	3.00 =	9.00
EDH 6905	B+	4.0 x	3.33 =	13.32
FIN 6719	A-	3.0 x	3.67 =	11.01
CRW 5934	A	1.0 x	4.00 =	4.00
PAD 6434	C	3.0 x	2.00 =	6.00
PAD 6701	F	3.0 x	0.00 =	0.00
Total		17		43.33
Semester GPA		43.33 divided by 17 = 2.548		

GRADING OPTIONS

The Colleges and the Schools make the determination of the grading option of each course except for thesis and dissertation credits. A course may be offered for a letter grade as listed above or Pass/Fail. The student may choose to audit a course and an 'AU' grade will be recorded on the student's record. The grading option must be indicated at the time of registration. The grading option cannot be changed after the add/drop period. There are no exceptions to this deadline. The grading options for thesis and dissertation credits are Pass, In Progress, Unsatisfactory, and Fail.

To register for an audit, the student must obtain the permission and signature of the instructor of the course audited. Once the student is registered in the course as "Audit," the grading option cannot be changed. Tuition and fees are the same whether the student is taking the course for credit or for audit.

INCOMPLETE GRADE

A grade of incomplete (IN) is a temporary symbol given at the discretion of the instructor for work not completed because of serious interruption not caused by the student's own negligence. An incomplete must be made up as quickly as possible but no later than two consecutive semesters (including Summer semester) after the initial taking of the course, or it will automatically default to an "F" grade. There is no extension of the two-semester deadline. The student must not register again for the course to make up the incomplete.

GRADE FORGIVENESS

Graduate courses are not authorized for grade forgiveness.

CHANGE OR CORRECTION OF GRADES

Once submitted, end-of-semester grades (except Incompletes, which default at the end of two terms) are final. They are subject to change only through a Change of Grade process to correct an error in computation or transcription, or where part of the student's work has been unintentionally overlooked.

FINAL WEEK OF THE SEMESTER

During the last week of the semester, classes meet for an extended period of time for various instructional purposes such as: final exams, lectures, group projects, and/or individual presentations.

FINAL GRADES

Final grades are available through the **MyFIU Self-Service portal** (my.fiu.edu).

TERM COURSES ARE OFFERED

Listed next to certain courses in this catalog are the designations 'F', 'S', and 'SS'. These designations indicate that the academic department normally offers these courses during the Fall ('F'), Spring ('S'), Summer ('SS') terms. Students should be aware that there are circumstances beyond the University's control (low enrollments, financial constraints, or other extenuating situations) which may result in the courses not being offered as indicated. The University is not responsible for failure to offer a course as indicated.

APPLICATION FOR GRADUATION

Students who plan to graduate are required to apply for graduation through the **MyFIU Self-Service portal** (my.fiu.edu) and to be enrolled in graduate-level courses in the graduating term.

Students whose graduation application is denied by their academic department must re-apply for graduation and complete the remaining requirements needed to graduate. A graduate student must be enrolled in at least 1 graduate credit and a doctoral student must be enrolled in at least 3 dissertation credits during the semester they graduate. Students cannot graduate the same semester they are readmitted to the University.

ACADEMIC WARNING, PROBATION, AND DISMISSAL

Academic Warning

A graduate student whose cumulative graduate GPA falls below a 3.0 will be placed on warning, indicating academic difficulty. The designation will be notated on the transcript.

Academic Probation

A graduate student on warning whose cumulative graduate GPA remains below 3.0 in the following

semester will be placed on probation, indicating serious academic difficulty. The designation will be notated on the transcript. The College or School of the student on probation may indicate the conditions which must be met in order to continue enrollment.

Academic Dismissal

A graduate student on probation whose cumulative and semester GPA's fall below a 3.0 will be automatically dismissed from his or her program and the University. The designation will be notated on the transcript. A graduate student will not be dismissed prior to attempting a minimum of 12 hours of coursework as a graduate student. The student has ten working days to appeal the dismissal decision. This appeal must be made in writing to the Dean of the University Graduate School. To appeal, a Petition for Exception to Graduate Requirements must be completed. The petition is an online process which is initiated by the academic unit in which you were pursuing your degree. Should you wish to initiate this appeal, you must contact your academic unit. The dismissal from the University is for a minimum of one year and prohibits students from registering for any courses. After one year, the student may apply for readmission to the University in the same or a different program, or register as a non-degree-seeking student if applicable.

Dismissed students who are readmitted or who register as non-degree-seeking students are placed on academic probation.

STUDENT RECORDS

FIU maintains student education records in a confidential and secure manner in accordance with the Family Educational Rights and Privacy Act (FERPA) codified in 20 U.S.C. section 1232g, and sections 1002.225 and 1006.52, Florida Statutes.

Student academic records are maintained in the Office of the Registrar and in the academic department of the student's major. Students in some degree programs may be subject to background checks and/or drug testing prior to eligibility for internships or practicums. All currently enrolled and former students have the right to review their records to determine their content and accuracy.

RELEASE OF STUDENT INFORMATION FROM EDUCATION RECORDS (FERPA ANNUAL NOTICE)

FIU will not release or permit access to education records or personally identifiable information maintained on a student except as otherwise permitted by law and [FIU Regulation 108 – Access to Student Education Records](#).

A student's consent is required for the disclosure or publication of any information which is a) personally identifiable and b) a part of the educational record. However, certain exceptions to that generality, both in types of information that can be disclosed and in access to that information, are allowed within the regulations of the FERPA. The University may disclose information pertaining to the student to a parent/legal guardian as long as the student submit a FERPA form authorizing the disclosure.

FIU discloses education records without a student's prior written consent under the FERPA exception for disclosure to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic, research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted as its agent to provide a service instead of using University employees or officials (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for the University. Upon request, the University also discloses education records without consent to officials of another school in which a student seeks or intends to enroll.

The University may disclose, without consent, "directory," or public, information, which is information available about a student that is not considered harmful or an invasion of privacy if disclosed. While FERPA and state law protect the privacy of educational records, directory information is not treated as confidential and may be disclosed by the University without student consent unless the student has placed a FERPA block via their MyFIU Self-Service portal.

FIU considers the following to be directory information items:

1. Student's name;
2. student classification and major and minor fields of study;
3. participation in officially recognized activities and sports;
4. weight and height of members of athletic teams;
5. dates of attendance, and degrees and awards received;
6. the most recent previous educational agency or institution attended by the student;
7. photographic image.

In order to prevent access to or release of directory information, students must request non-disclosure through their **MyFIU Self-Service portal**. Access to, or release of directory information will be withheld until further written instruction is received from a student.

Students have a right to challenge the accuracy of their educational records and may file written requests to amend these records. The Office of the Registrar (PC 135) should be contacted for further information regarding the procedure to follow for questions or problems.

For complete information regarding the policies outlined above, please refer to the [Student Privacy and FERPA website](#) or contact:

University Registrar
Florida International University
Modesto A. Maidique Campus - PC 135
Miami, Florida 33199
E-mail: ferpa@fiu.edu

TRANSCRIPTS

The transcript is the complete student record of courses taken at the University, in addition to the number of

transfer credits accepted. The GPA is calculated for all courses taken at the University after Fall 1975. Once a baccalaureate, master's, or doctorate degree is earned, the GPA calculation starts again.

After the completion of an undergraduate degree at FIU and upon admission to a graduate degree the GPA calculation must and will be re-started. The GPA for students who have completed an undergraduate or graduate degree at FIU and return to pursue an additional degree within the same academic level, i.e., undergraduate to undergraduate or graduate to graduate, will be reset. To trigger this reset process, the student's advisors, academic department and/or college must contact the Office of the University Registrar by emailing OneStop@fiu.edu.

Students must request their transcript online. The transcript will not be released if the student has a University financial liability and/or a defaulted student loan. Other holds may prevent the release of official transcripts. Students should contact the department who assigned the hold if clarification is needed. The University charges a \$10.00 per transcript. In accordance with [Florida Statute 1009.26 \(17a\)](#), FIU students who are active-duty military, honorably discharged veterans of the United States Armed Forces, or spouses and/or dependents may be eligible for a transcript fee waiver. Please refer to the [View or Order Transcripts](#) page for further information.

CLASS ATTENDANCE

The University expects students to attend their classes to create an effective learning environment in which to master course content and satisfy performance objectives and learning outcomes as outlined by instructors.

Instructors may establish specific class attendance requirements and may consider attendance and participation in class in evaluating student performance. During the first week of class, instructors must inform students of any special requirements and articulate any penalties, including a failing grade that may result for non-attendance.

In general, instructors must excuse students from classes due to their military obligations, jury duty, religious days, illness, disability accommodations as approved by the Disability Resource Center, serious family emergencies and/or participation in official university activities (i.e., athletic events, artistic performances, curricular activities). Instructors must afford students a reasonable amount of time to complete course work and/or assignments missed during their approved absence.

Only registered students appearing on an official class roster may attend a class at the University.

POLICY STATEMENT WITH REFERENCE TO RELIGIOUS HOLIDAYS

A faculty member who wishes to observe a religious holy day shall make arrangements to have another instructor teach the class in his or her absence, if possible, or shall reschedule the class.

Because there are some classes and other functions where attendance may be considered essential, the following policy is in effect:

1. Each student shall, upon notifying his or her instructor at the beginning of the semester, be excused from class to observe a religious holy day of his or her faith.
2. While the student will be held responsible for the material covered in his or her absence, each student shall be permitted a reasonable amount of time to make up any work missed.
3. No major test, major class event, or major University activity will be scheduled on a major religious holy day.
4. Professors and University administrators shall not arbitrarily penalize students who are absent from academic or social activities because of religious observances.

ENROLLMENT CERTIFICATION

The Office of the Registrar is responsible for certification of students' enrollment. Certifications cannot be processed if the student has a financial liability. Enrollment certifications for a current semester can only be done after the drop/add period ends.

Enrollment certification can be obtained through the **MyFIU Self-Service portal** (my.fiu.edu) or in person at One Stop Enrollment Management & Services (SASC, 1st floor, Modesto A. Maidique Campus), BBC Enrollment Center (ACI-100, Biscayne Bay Campus).

Enrollment Status - Graduate:

Fall and Spring Semesters

Full time: 9 credits or more

Half time: 5 - 8 credits

Less than half time: 4 credits or fewer

Summer Semester

Full time: 6 credits

Note that audited credits do not count toward enrollment status.

Doctoral students who have reached candidacy or master's students who have completed all requirements except for the thesis, and have an approved thesis proposal on file in the University Graduate School, are considered full-time when registered for three credits per term.

Enrollment status is for continuous enrollment for the semester in which the student is in attendance. Reduction of course load may change the student's status.

FLORIDA RESIDENCY INFORMATION - FLORIDA STUDENT DEFINITION

Per Florida Statute 1009.21 and Florida Board of Governors Regulation 7.005, students shall be classified as residents or nonresidents for the purpose of assessing tuition in postsecondary educational programs offered by charter technical career centers or career centers operated by school districts, in Florida College System institutions, and in state universities.

To qualify as a Florida Resident for tuition purposes, the student or the parent/legal guardian of a dependent student, must:

1. Have established a legal residence in this State and have maintained that legal residence for 12 consecutive months immediately prior to the start of the term in which the student is seeking Florida resident classification. The student's residence in Florida must be a bona fide domiciliary rather than for the purpose of maintaining a mere temporary residence or abode, incident to enrollment in an institution of higher education, and should be demonstrated as indicated below (for dependent students as defined by IRS regulations, a parent or guardian must qualify).
2. Students claiming to be independent must meet one of the following:
 - a) The student is 24 years of age or older by the first day of classes of the term for which residency status is sought; if student is under the age of 24, they must demonstrate earned income, through income tax forms, of a minimum of more than half of the cost of attendance for a student not living with parents in the prior year;
 - b) The student is married;
 - c) The student has children who receive more than half their support from the student;
 - d) The student has other dependents who live with and receive more than half of their support from the student;
 - e) The student is a Veteran of the United States Armed Forces or is currently serving on active duty in the United States Armed Forces for purposes other than training;
 - f) Both of the student's parents are deceased or the student is or was (until age 18) a ward/dependent of the court;
 - g) The student is working on a master's or doctoral degree during the term for which residency status is sought;
 - h) The student is classified as an independent by the financial aid office at the institution.
3. Submit (or in the case of a dependent student, the parent must submit) written or electronic verification that includes two or more of the following documents (no single piece of evidence shall be conclusive). Please note that all residency documentation must be submitted by the first day of the semester for which Florida residency is being sought; late documentation will be considered for the following academic term.
 - a) The documents must include at least one of the following:
 - i. A Florida voter's registration card.
 - ii. A Florida driver license.
 - iii. A State of Florida Identification card.
 - iv. A Florida vehicle registration.
 - v. Proof of a permanent home in Florida which is occupied as a primary residency by the student or the student's parent.
 - vi. Proof of a homestead exemption in Florida.
 - vii. A dependent student who attended a Florida high school for a minimum of two (2) academic years immediately preceding the student's initial enrollment in an institution of higher education and graduated from a Florida high school or earned a Florida General Education Development (GED) within the last twelve (12) months may use the high school transcript or GED certificate as evidence of Florida residency. The student must present at least one (1) additional document identified in sections

- 1009.21(3)(c)1. or 1009.21(3)(c)2., evidencing their parent's legal residency in Florida.
- viii. Proof of permanent full-time employment in Florida (at least 30 hours per week for a 12-month period).
- b) The documents may include one or more of the following:
- i. A declaration of domicile in Florida; if a declaration of domicile, pursuant to section 222.17, Florida Statutes, is being used as one of the documents to establish residency for tuition purposes, the date an applicant shall be deemed as establishing residency for tuition purposes shall be twelve (12) months hence from the date that the Clerk of Circuit Court notes the declaration was sworn and subscribed to the Clerk. Nothing in this subsection shall prevent the use of additional documentation as evidence that legal residency was established by other means pursuant to section 1009.21(3)(c), as of a date earlier than that established by the declaration of domicile.
 - ii. A Florida professional or occupational license.
 - iii. Florida incorporation.
 - iv. A document evidencing family ties in Florida.
 - v. Proof of membership in a Florida-based Charitable or professional organization.
 - vi. Any other documentation that supports the student's request for resident status, including, but not limited to, utility bills and proof of 12 consecutive months of payments; a lease agreement and proof of 12 consecutive months of payments; or an official state, federal, or court document evidencing legal ties to Florida.
4. No contrary evidence establishing residency elsewhere.
5. Be a former student at a public institution of higher education who was properly classified as a resident who re-establishes domiciliary status and re-enrolls within a period of twelve (12) months.
6. A non-United States citizen may be eligible to establish residency for tuition purposes if evidence is presented verifying that the student has legal status in the United States, has met the residency requirements of section 1009.21, and the person is one of the following:
- a) A foreign national in a nonimmigrant visa classification that grants the person the legal ability to establish and maintain a bona fide domicile in the United States.
 - i. The following visa categories grant the person the legal ability to establish and maintain a bona fide domicile in the United States: A, E, G, H-1B, H-1C, I, K, L, N, NATO 1-7, O-1, R, S, T, U, and V.
 - ii. The following visa categories do not grant the person the legal ability to establish and maintain a bona fide domicile in the United States: B, C, D, F, H-2, H-3, M, P, Q, and TN. J visa holders are not eligible to

establish residency for tuition purposes except as provided in section 1009.21(10).

- b) A permanent resident, parolee, asylee, Cuban-Haitian entrant, or other person granted an indefinite stay in the United States.
- c) Pursuant to section 1009.21(2)(d), a dependent student who is a U.S. citizen may not be denied classification as a resident for tuition purposes based solely upon the immigration status of the student's parent.

OUT-OF-STATE NON-RESIDENT-FOR-TUITION- PURPOSES RECLASSIFICATION TO IN-STATE RESIDENT FOR TUITION PURPOSES

To qualify as a resident for tuition purposes:

A student who is classified as a nonresident for tuition purposes may become eligible for reclassification as a resident for tuition purposes by presenting a minimum of three (3) documents identified in sections 1009.21(3)(c)1. or 1009.21(3)(c)2., that convincingly demonstrate the establishment of permanent legal residence in Florida other than for the sole purpose of pursuing a postsecondary education. Documentation must demonstrate that the student or, if the student is a dependent, their parent has maintained legal residence in Florida for at least twelve (12) consecutive months immediately prior to the first day of classes for the term for which residency reclassification is sought except as otherwise provided in section 1009.21(6). In addition, an affidavit/statement explaining your move to the state of Florida along with appropriate supporting documentation is required. For more information on the residency reclassification, please visit <https://onestop.fiu.edu/>.

To request reclassification of resident status:

- a) If a person who is a dependent child and his or her parent move to this state while such child is a high school student and the child graduates from a high school in this state, the child may become eligible for reclassification as a resident for tuition purposes when the parent submits evidence that the parent qualifies for permanent residency.
- b) If a person who is a dependent child and his or her parent move to this state after such child graduates from high school, the child may become eligible for reclassification as a resident for tuition purposes after the parent submits evidence that he or she has established legal residence in the state and has maintained legal residence in the state for at least 12 consecutive months.
- c) A person who is classified as a nonresident for tuition purposes and who marries a legal resident of the state or marries a person who becomes a legal resident of the state may, upon becoming a legal resident of the state, become eligible for reclassification as a resident for tuition purposes upon submitting evidence of his or her own legal residency in the state, evidence of his or her marriage to a person who is a legal resident of the state, and evidence of the spouse's legal residence in the state for at least 12 consecutive

months immediately preceding the application for reclassification.

Appealing Your Residency Classification

In accordance with section 1009.21 of the Florida Statutes, Florida Board of Governors, and the Residency Guidelines adopted by the Articulation Coordinating Committee of the Florida Department of Education FIU has an established Florida Residency Appeal Committee. The Residency Appeal Committee provides a mechanism for students to appeal their out-of-state tuition decisions and strives to provide fairness and equity to all students. The Residency Appeal Committee's decision on behalf of the institution is final and may not be appealed further.

A student may appeal the denial of a request to be classified or reclassified from out-of-state to in-state status for tuition purposes only once. Students must submit the request in writing to residency@fiu.edu with accompanying documentation to support reconsideration of the original decision.

The committee meets once a month and will review the submitted appeal(s) and the accompanying documentation. The committee may request additional information from the student to make its decision. Not submitting supporting documentation will delay the review and the petition may be denied. After review, the committee will inform the student of the decision in writing.

Additional information regarding classification and reclassification of Florida Residency for tuition purposes may be found at onestop.fiu.edu/student-records-myfiu/personal-records/declare-residency/.

Please note: All College of Medicine appeals should be sent to comregistrar@fiu.edu.

VETERANS INFORMATION

The Office of Veteran and Military Affairs (VMA) assists all U.S. military service members, veterans, and their dependents. The VMA also provides personal counseling, tuition and fee deferments (in accordance with Florida Statute, Title XLVII, Chapter 1009.27), tutorial assistance, and VA work-study positions. The VMA Office is located in "the Tower" at the center of the Modesto A. Maidique Campus; and in WUC-257, Biscayne Bay Campus.

Students who intend to use VA educational benefits should contact the Office of Veteran and Military Affairs two months prior to the anticipated date of entry. Such time is required to expedite the processing of paperwork for educational allowances from the Veterans Administration.

Training Status	Fall & Spring
<i>Rate of Pursuit</i>	<i>(16-week Term)</i>
Full time	9 Credits
3/4 time	7 Credits
1/2 time	5 Credits

Note that audited credits do not count toward training status definitions.

Rate of Pursuit & VA Payments

For Rate of Pursuit clarification or questions regarding monthly stipends and payments from the VA, please contact the VMA office at (305)348-2838 or by emailing Veterans@fiu.edu. *Rate of pursuit determinations for graduate programs are set by the college and must be applicable to all students in the program. If no policy exists the Rate of Pursuit will align with the guidelines set forth by the University Registrar.

For additional information regarding other Veterans Educational Programs, or for specific information about your benefits and/or payments please contact the VA education Hotline at 1-888-442-4551.

COLLECTION AND USAGE OF SOCIAL SECURITY NUMBERS

In accordance with Florida Statute 119.071(5)(a)(2), the University collects social security numbers for the following reasons:

- For use in processing admission applications for purposes of identification and verification of student records;
- For use in administering federal and state programs/loans, including verification of eligibility. These programs include, but are not limited to:
 - Financial aid and other related loan programs;
 - Scholarship programs, including Bright Futures; and
 - Veterans Administration benefits for qualified students
- For use in complying with IRS Reporting Requirements pertaining to the Hope Scholarship Credit and the Lifetime Learning Credit provided under federal legislation;
- For use in preparing Student Enrollment Reports required to be submitted to the National Student Loan Data System under Federal Law;
- For use in providing official student transcripts to authorized third parties (i.e. educational institutions and employers upon receipt of required releases) for student identification purposes;
- For submitting reports to the Florida Board of Governors as required.

Please note that this is only a listing of the collection and use of social security numbers by the University in the admissions, registration and financial aid areas. All students are advised that social security numbers are confidential and may only be released in accordance with applicable law. For more information on the collection of social security numbers, visit the FIU Compliance and Integrity website at <https://compliance.fiu.edu/privacy/use-and-collection-of-social-security-numbers/>.

GENERAL INFORMATION

ACADEMIC AND STUDENT AFFAIRS

The Division of Academic and Student Affairs seeks to enhance the academic mission of the university by promoting a vast array of educational, social, and cultural opportunities and programs. We believe that a student's education takes place both inside and outside the classroom. We aim to provide an environment that supports the growth and development of our students by catering to their social, intellectual, emotional, and spiritual needs. From volunteer opportunities to multicultural programs, health promotion to residential life, the Division of Academic and Student Affairs is here to help students make the most of their university experience.

CAMPUS LIFE

Campus Life provides a variety of programs and services to students and the university community. Students' academic learning and success are enhanced through their active participation in the co-curricular opportunities offered in areas of leadership development, communication and organizational skills, service, event planning and evaluation techniques. Campus Life collaborates with other units to coordinate programs and events.

Campus Life includes the Student Union, Council for Student Organizations (at the Modesto A. Maidique campus), Student Organizations Council (at the Biscayne Bay campus), Student Programming Council, Homecoming Council, and Panther Power.

Offices are located on the Modesto A. Maidique Campus (Graham Center 240, [305] 348-2138) and on the Biscayne Bay Campus (Wolfe University Center 141, [305] 919-5804).

CAREER AND TALENT DEVELOPMENT

The centralized Career and Talent Development (CTD) office assists degree seeking students at all university locations with career readiness and graduate school educational opportunities. CTD also works closely with the specialized Career Services teams located in the College of Business and Chaplin School of Hospitality and Tourism Management. CTD's high-tech and high-touch philosophy offers specialized career readiness services while providing students with individualized attention through a drop-in program and one-on-one appointments.

CTD encourages students to register with the office immediately after enrolling in classes. The office can help students identify their majors, find internships, or identify the careers that are right for them. Get involved with Career and Talent Development. Programs and services include:

- **CAREER DEVELOPMENT AND MANAGEMENT** - This area offers career assessments, individual student coaching appointments, resume reviews and career development workshops in a variety of topics intended to assist students in identifying their next educational and/or career paths.
- **CAREER FAIRS AND INTERNSHIP FAIR** – CTD organizes and holds one major career and internship fair, as well as a number of other targeted career fairs

and recruiting events throughout the year to connect students to employers.

- **INTERNSHIPS** – CTD also assists students in identifying and securing practical experience in their chosen majors. Internship opportunities can include academic credit, salary and field-related experience. Internships are proven to significantly increase the possibility of gaining employment upon graduation.
- **EMPLOYMENT UPON GRADUATION** - Students are encouraged to become fully registered with CTD at fiu.joinhandshake.com/login, which provides access to the Practice Interview Program, Resume Referral Service, and online job vacancies. Students also receive regular emails about networking opportunities and job fairs.

Location: CTD offices are located on the Modesto A. Maidique Campus (Student Academic Success Center 305, [305] 348-2423); the Engineering Center (EC 2852, [305] 348-1281); and the Biscayne Bay Campus (Wolfe University Center 255, [305] 919-5770).

CTD website: career.fiu.edu.

Career Management website: fiu.joinhandshake.com/login

CHILDREN'S CREATIVE LEARNING CENTER

Established in 1975, the Children's Creative Learning Center is an Educational Research Center for Child Development and an AdvancED-accredited Early Learning School. The center is located on the Modesto A. Maidique Campus and offers an educational preschool program for young children.

The essence of the program at the center is built around verbal communication, enhancing the children's ability to be in touch with their different feelings and to express those feelings verbally. Additionally, the center's objectives for each child include development of: self-concept and self-reliance, independent decision making, the ability to confront and resolve problems, respect and consideration for others, social skills and interpersonal relations.

Children ages of 2½ through 5 years who have achieved bathroom independence are eligible for programs housed in the Children's Creative Learning Center Main building. Children ages 2 to 2½ years who may be working toward achieving bathroom independence are eligible for the Center's Toddler program, housed in the Graham Center.

Center enrollment priority is given to children of FIU students. If you are interested in enrolling your child at the center, it is recommended to place your child on to the waiting list as soon as you are comfortable doing so.

For students seeking financial support for child-care, the center has been awarded the Child Care Access Means Parents in Schools (CCAMPI) grant from the U.S. Department of Education. Additionally, the center participates in the Florida Voluntary Pre-Kindergarten (VPK) program for four-year-old children and Step Up For Students Kindergarten Scholarship, and is a School Readiness Provider.

Information about the center's programs, hours, and tuition can be found online at studentaffairs.fiu.edu/campus-services/childrens-creative-learning-center/ or by calling the center office at (305) 348-2143.

CENTER FOR LEADERSHIP AND SERVICE

The Center for Leadership and Service (CLS) provides students with developmental and experiential opportunities that foster, action, and community engagement. Through leadership education, service-learning, civic engagement, service, and social innovation, students can become active citizens on-campus, in their respective communities, and globally. The vision of the CLS is to develop students for engagement in lifelong learning, service, and learning.

Leadership education is offered through co-curricular (non-credit) programs. Non-credit leadership development programs range from one-hour skill-building workshops, to semester-based programs (e.g., Academy of Leaders), to Program on Demand workshops. All of these programs are interactive and experiential in nature and are offered at a variety of times to accommodate our diverse student population. Programs are developmental in nature, so students can begin with an emerging leader program and progress to more advanced leadership training while at FIU. Consult the department web-site for program descriptions and application details, leadserve.fiu.edu.

CLS is also the central office for community service development, offering a clearinghouse and resource center for volunteer activities, academic service-learning, social innovation, and advocacy. CLS supports several community engagement projects throughout the academic year. Alternative Break (AB) educates students about social issues and encourages them to make a difference by participating in direct service projects in communities throughout the country and abroad. Roarthon is a student-run philanthropy dedicated to raising money for the Children's Miracle Network. Students can serve on the planning committee or participate as dancers in the overnight fundraiser that benefits the Nicklaus Children's Hospital Foundation. Relay for Life is the signature fundraising event for the American Cancer Society: a committee of FIU students organizes the 6-hour walk and thousands participate in the event to celebrate life and provide hope for those affected by this disease. By taking leadership roles in organizing and implementing these projects, students are able to practice and refine their leadership skills. Students may also take on leadership roles by providing peer education. The LEAD Team is a group of student facilitators that promotes and supports leadership development. The LEAD Team participates as program promoters and department ambassadors, group facilitators, classroom presenters, and consultants to student organizations.

The CLS is dedicated to developing the leadership capacity and cultivating active citizens for all FIU students. Offices are located on the Modesto A. Maidique Campus (Student Academic Success Center 230, [305] 348-6995) and the Biscayne Bay Campus (Wolfe University Center 353, [305] 919-5360).

Web-site: leadserve.fiu.edu.

COUNSELING AND PSYCHOLOGICAL SERVICES

As part of Student Health & Wellness, Counseling and Psychological Services (CAPS) provides a variety of services and resources designed to help currently

registered FIU students achieve and maintain optimum mental health. Therapists, utilizing a brief therapy approach, assist students in developing effective coping skills and decision-making abilities; developing effective communication skills; and identifying and managing daily stressors. All therapeutic services are confidential and may be utilized either in person or online, depending on the type of service desired.

CAPS services include:

- Web-based, self-help educational and interactive training modules to assist with stress, emotional distress, development of effective coping skills, and more;
- Web-based screenings for anxiety, depression, eating disorders, mood swings, and trauma
- TAOConnect, a therapy-assisted online program for a wide range of existing conditions;
- Workshops that can help address anxiety, depression, and emotional and interpersonal distress;
- In-person consultations to assess for substance abuse and eating disorders/body image issues;
- Individual, group, and couples therapy for issues such as: anxiety, depression, stress, grief, and interpersonal and relationship problems;
- Psychiatric services (only available in conjunction with CAPS counseling);
- Teletherapy and telepsychiatry appointments;
- Crisis intervention;
- Biofeedback; and
- Educational and neuropsychological testing (additional fees apply).

For more information, visit us at caps.fiu.edu.

DISABILITY RESOURCE CENTER

Title II of the Americans with Disabilities Act (ADA) prohibits discrimination against persons with disabilities. As a publicly funded institution, FIU is required to ensure that students with disabilities are not barred from participation in a service, program, or activity based on their disability. To that end, the Disability Resource Center (DRC) facilitates reasonable accommodations made available so that students with disabilities have an equal opportunity to enjoy the full array of services, programs, and activities offered. The DRC relies on universal design principles and collaboration with our community of stakeholders comprised of students, faculty, staff, and administrators in creating diverse learning environments that are usable, equitable, inclusive, and sustainable.

Additionally, the DRC provides consultation and implementation of individualized accommodations for FIU students with disabilities on a case-by-case basis.

Some of the academic accommodations facilitated by the DRC include: test-taking accommodations such as extended time allotments, the provision of alternative formats for course materials, access to accessible software and adaptive technology equipment including an array of auxiliary aids and equipment loan out program. Other services provided by the DRC include speech-to-text captioning known as Computer Assisted Real Time transcription (CART), and the provision of American Sign Language Interpreter services.

For more information about the array of services offered by the DRC and how to set up a Welcome Appointment with an Access Consultant, visit the DRC website @ drc.fiu.edu.

If you identify as a student with a disability and have received accommodation in the past, have a current disability diagnosis, or complaint and are seeking services due to newly acquired disability and would like to pursue academic accommodations, please contact the DRC's MMC or BBC Office using the following information:
Email: DRC@fiu.edu
Modesto A. Maidique Campus: GC 190, (305) 348-3532;
Biscayne Bay Campus: WUC 131, (305) 919-5345.

Class Attendance

If a qualified student with a disability believes it may not be possible to abide by the attendance policy due to disability-related reasons, the student should contact the DRC at the beginning of the semester, or as soon as possible after the need for an exception arise, to discuss the possibility of initiating that accommodation.

The DRC may determine that a student's disability entitles the student to an adaptation of the usual course attendance policy. Adaptations of course attendance policies will be determined on an individual, case-by-case basis. Adaptations of the course attendance policy does not mean that unlimited absences will be permitted. FIU DRC attempts to make every effort to accommodate students' disability-related academic needs. However, neither the university nor an individual faculty member is required to waive essential or fundamental academic requirements of a course regardless of the nature of a student's disability.

Regardless of the adaptation of the course attendance policy, the student is required to meet all academic course requirements and to complete all assignments and examinations. It is the student's responsibility to obtain the material and notes from missed classes. The student will be graded according to the criteria stated in the class syllabus.

Students should note that absences for non-disability related reasons will not be excused by the DRC and are only vetted through the professor of the course. When an attendance accommodation is determined to be reasonable, a DRC Access Consultant will work with the faculty to define the parameters of the accommodation. This does not mean students may miss class whenever they like.

If a student finds that he or she is not doing well in the class due to extended absences, the student is urged to consider options (e.g., dropping the class, withdrawing from the class, or taking an incomplete grade).

Testing and Exam Proctor Forms

Students with testing accommodations that will be testing with the DRC must work with professors at the beginning of each semester to complete an Exam Proctor form, as it provides the test proctor with information fundamental to the testing process (e.g., testing conditions, allotted time for tests, and the way in which tests are received at the DRC and delivered back to the professor).

In cases where professors do not have their test dates finalized by the first week of class, an Exam Proctor form must still be completed and submitted. Changes or additional exam dates must be provided by the professor to the DRC throughout the semester as long as it is

provided a minimum of **one week before** the scheduled exam date. For more information or to view our forms, visit drc.fiu.edu.

Training

The DRC offers a variety of trainings and workshops throughout the semester, covering a range of topics including Service and Emotional Support Animals on campus, Disability Sensitivity, Universal Design, and accessibility even an interactive Breaking Barriers Escape Room. Trainings can be scheduled for small groups or one-on-one through drc.fiu.edu. You can also visit our website to view any pre-recorded online training at any time.

HEALTH PROMOTION SERVICES

The Healthy Living Program (HLP) focuses on developing Healthy Panthers for Life by educating students and helping them build their personal toolboxes to make healthier lifestyle choices. Students can explore the different dimensions of wellness through a combination of traditional health education and alternative therapies, such as massage, aromatherapy, and acupuncture. Recognizing that everyone is an individual, HLP consultations on topics (e.g., stress management, sleep hygiene) help students develop personalized plans to reach their desired goals. HLP programming and events provide students with interactive ways to learn about topics relevant to personal and academic success. For more information about all the services offered on campus that assist with personal well-being, visit go.fiu.edu/hlp.

Offices are located on the Modesto A. Maidique Campus (Student Health Center 180, [305] 348-4020) and the Biscayne Bay Campus (Student Health Building, [305] 919-5307).

HEALTH COMPLIANCE

As part of student Health and Wellness Health Compliance (HC) services assists students in navigating through the registration process by educating them on pre-matriculation health requirements (e.g., mandatory immunizations, health insurance for international students). For more information about HC, visit studentaffairs.fiu.edu/health-and-fitness/student-health/registration-holds/index.php.

Offices are located on the Modesto A. Maidique Campus (Student Academic Success Center Lobby, [305] 348-2688).

HUMAN RESOURCES

The Division of Human Resources provides human resource management services for all faculty and staff in academic and administrative areas including student employees, research and graduate assistants, college work study and temporary employees on all campuses. The division comprises the following areas: Human Resources (HR) Administration, Talent Acquisition and Management, Compensation and Benefits Administration, Employee and Labor Relations, Payroll, Employee Records, HR Management Systems, Employee Assistance Programs, Human Resources Relations, and Human Resources (Herbert Wertheim College of

Medicine). It is through this office that new employees participate in the New Employee Experience to gain knowledge of FIU's past, present, and future for their individual career success and institutional impact. Additionally, this office partners with the Office of Academic Affairs to host an annual orientation for new faculty. On-campus jobs are provided for students, offering work experience and skill development. Five levels, ranging from entry level to apprenticeship are coordinated through FIU Career Ready. Additionally, full-time entry-level positions are available for recent graduates, supported by the student and alumni employment team.

Offices are located on the Modesto A. Maidique Campus (Primera Casa 224, [305] 348-2181) and the Biscayne Bay Campus (Hubert Library 322, [305] 919-5545). For additional information, visit the Division of Human Resources website at: hr.fiu.edu.

INDIVIDUALS WITH DISABILITIES

FIU is required by Title II of the American Disabilities Act (ADA) and Section 504 to make all programs, activities, and services equally available to persons with disabilities. The Office of Civil Rights Compliance and Accessibility Office (ORCA), administers FIU's accommodation program for employees with disabilities. Students seeking accommodations must register with the Disability Resource Center (DRC) at drc@fiu.edu or by **contacting:**

The Disability Resource Center offices located on Modesto A. Maidique Campus: (Graham Center 190, [305] 348-3532); and on the Biscayne Bay Campus: (Wolfe University Center 131, [305] 919-5345).

FIU is required to provide students with appropriate academic adjustments and auxiliary aids and services that are necessary to afford an individual with a disability an equal opportunity to participate in the school's programs. The university is not required to make adjustments or provide aids or services that would result in a fundamental alteration of a program or impose an undue burden.

Filing a Complaint: It is the policy and practice of FIU to comply fully with the requirements of the Americans with Disabilities Act of 1990 (ADA), Section 504 of the Rehabilitation Act and all other federal and state laws and regulations prohibiting discrimination on the basis of disability. Complaints of disability discrimination, harassment, or retaliation must be filed within 120 calendar days of the incident(s). ORCA is responsible for investigating discrimination and/or harassment complaints/allegations.

If you wish to learn more about your ADA rights, the university's policies against discrimination, and the process for filing a formal complaint, contact the ORCA located on Modesto A. Maidique Campus, Primera Casa 321, (305) 348-2785 or on the ORCA website online at: dei.fiu.edu/connect/disability-and-accessibility/.

INTERCOLLEGIATE ATHLETICS

FIU Athletics has seen tremendous growth since its inception more than 40 years ago. FIU is a member of the National Collegiate Athletic Association (NCAA), and entering the fifth year in Conference USA for 17 men's and women's athletic programs. At this time, the sport of beach volleyball is a member of the Coastal Collegiate Sports

Association Conference as Conference USA currently does not sponsor a championship in the sport of beach volleyball. Conference USA currently does not sponsor a championship in the new sport of beach volleyball. FIU continues to elevate the athletics program and has won twelve Conference USA Championships between 2015 and 2021, including seven-time repeat championships won by the women's Swimming and Diving team. Sports programs and services in Intercollegiate Athletics provide an opportunities for student athletes to develop their athletic skills and leadership abilities in an educational setting. Much emphasis is placed on the student as a student athlete to ensure intellectual, emotional, and social well-being.

Athletics Team Membership

Several FIU Athletic teams have won conference championships in recent seasons (including women's swimming and diving, golf, baseball, and men's soccer and tennis), while many other student athletes have garnered accolades across the sport programs. FIU's intercollegiate sports programs for women include basketball, volleyball, soccer, golf, tennis, track, softball, cross-country, swimming and diving, and beach volleyball. Men's sports include basketball, football, soccer, baseball, track, and cross-country.

Athletic Facilities

The Athletic Department utilizes eight facilities that serve as the sites for athletic, educational, and recreational activities.

Ricardo Silva Stadium opened in fall 2008. The stadium features more than 20,000 permanent seats; 1,400 club seats; an upper concourse and 19 full-service luxury suites. In addition to the suites, the stadium features a 6,500 square-foot. **Stadium Club**, which is a multipurpose banquet hall that can be used for various events. The stadium is the home of our intercollegiate football program.

Located in the west end zone bleachers of Ricardo Silva Stadium is the R. Kirk Landon Field House. The **R. Kirk Landon Field House** is a 55,000 square-foot facility that houses the FIU intercollegiate football team, coaches, and weight training facility and ticket office staff. The **University Credit Union Box Office** is located at the west entrance to the field house and services all FIU sports. It also houses a 12,500 square-foot weight room that accommodates all FIU intercollegiate student athletes.

The **OCEAN BANK CONVOCATION CENTER (OBCC)** is home to our intercollegiate men's and women's basketball teams, as well as our women's volleyball team. It is a multipurpose facility with a seating capacity for 5,150 and is the venue for our convocation and graduation ceremonies. The main floor can hold four volleyball courts and two basketball courts. The two auxiliary gyms can each hold one basketball court or a volleyball court. Also housed in the OBCC are seven classrooms and eight locker rooms. In 2017, new upper-level seating was installed.

The **Baseball Stadium** is home to our intercollegiate baseball team. The stadium has a seating capacity of 2,200 and offers two luxury suites with capacity for 20 and 25, respectively; both suites overlook the field. The Baseball Stadium also houses indoor batting cages (located just outside the left-field fence). In 2017, a new

Musco lighting system was installed. In 2018, the locker room and team lounge were renovated.

The **FIU Soccer Stadium** is the home of our intercollegiate men's and women's soccer programs. This lighted soccer stadium seats 1,500; dimensions of the field span 120 yards in length by 70 yards in width.

The **FIU Tennis Center** has 6 lighted courts and is home to the women's tennis program.

The **FIU Softball Stadium** houses our intercollegiate softball program. Alongside first base is the building which opened in 2018 with a locker room, coaches offices, and team lounge for the student athletes. The elevated grandstands and press box, completed in 2014, seats 500. Adjacent to the Felsberg Field are covered batting cages and three bullpen areas.

The **FIU Beach Volleyball Courts** were completed in 2012 and are home to our nationally ranked beach volleyball program.

FIU students are admitted to all regular season intercollegiate athletic home games free of charge. Presentation of a valid university identification card is required.

For additional information visit fiusports.com or call the University Credit Union Box office at 348-4263 (**FIU-GAME**).

Student Athlete Academic Center

Under the leadership of Division of Academic and Student Affairs, the Student Athlete Academic Center provides a range of academic support services for student athletes—including advising, tutoring, and monitoring of academic progress. The Student Athlete Academic Center is located west of the Ocean Bank Convocation Center on the Modesto A. Maidique Campus, with hours of operation to meet the needs of student athletes. The Student Athlete Academic Center is equipped with computer laboratories, study carrels, and classrooms. It is staffed with advisors, tutors, and learning specialists. The unit works university academic departments and other units to ensure the academic support and success of student athletes. For information call (305) 348-6412.

INTERNATIONAL STUDENT AND SCHOLAR SERVICES

The International Student and Scholar Services (ISSS) office provides comprehensive assistance to international students, faculty, and researchers in non-immigrant status (F or J visas). The ISSS staff provides advising services on immigration, cultural, personal, social, and financial concerns on both the Modesto A. Maidique Campus and Biscayne Bay Campus.

The ISSS team ensures institutional compliance with the federal agency requirements of the Department of Homeland Security for reporting and tracking our international students.

In addition, the department also serves as a liaison to academic and administrative departments throughout the university.

All new and/or international transfer students **MUST** attend a **MANDATORY** welcome session before the start of their first semester and **MUST** complete a virtual immigration check-in process within the first week of the start of classes. The ISSS office also offers social and

cultural programs to assist students in adapting more effectively to the university community and their new lives in the United States. An active International Student Club on each campus collaborates with the ISSS department in organizing various social activities. Club programs enable students to participate in the international dimension of the university and provide opportunities for involvement in the greater Miami community.

ISSS has offices on the Modesto A. Maidique Campus (Student Academic Success Center 230, [305] 348-2421) and on the Biscayne Bay Campus (Wolfe University Center 363 [305] 919-5813).

For additional information, visit: globalaffairs.fiu.edu/iss/.

OFFICE OF EDUCATION ABROAD

The Office of Education Abroad provides students with numerous opportunities to earn academic credit while traveling outside of the United States either led by a faculty member via the FIU Faculty-Led Study Abroad programs, or independently via the International Student Exchange program (ISE) or direct enrollment. Duration varies from a few weeks to a semester or even an academic year abroad. In order to participate in any study abroad program, graduate students must have a grade point average (GPA) above a 3.0 (i.e., must be in good academic standing) and be in good conduct standing.

Students participating in the ISE program will pay FIU tuition and fees and, with pre-approval from their respective departments, will receive transfer credit for the courses taken abroad. Grades earned on the ISE programs will not be averaged into the FIU GPA.

FIU Faculty-Led Study Abroad programs are typically offered during the summer, although some programs are offered during the fall, spring and winter session terms. The programs are designed and led by FIU faculty. Students participating in these programs will pay in-state FIU tuition and fees, in addition to a program fee for the cost of the program abroad. Grades earned on these programs will be averaged into the FIU GPA, as these are FIU credit-bearing courses.

The Office of Education Abroad also assists students in preparing for an academic credit-bearing internship or research abroad, as well as obtaining transfer credit for direct enrollment at accredited foreign institutions and participation in programs through study abroad program providers. In these cases, students may have to pay that entity directly, and with pre-approval from their advisors, receive transfer credit for the courses taken. Grades earned on transfer credit programs are not averaged into the FIU GPA.

Virtual opportunities are also available, including Virtual Study Abroad (VSA), virtual ISE, and virtual international internships. VSA courses are FIU courses infused with virtual international elements, so grades earned in these courses will be averaged into the FIU GPA.

For more information about studying abroad, please contact the Office of Education Abroad, located on the Modesto A. Maidique Campus (Student Academic Success Center 230, [305] 348-1913), visit studyabroad.fiu.edu, or email us at edabroad@fiu.edu.

MULTIFAITH COUNCIL

The Multifaith Council serves student groups involved in a variety of activities. Professional representatives from various faiths are available for personal appointments. Individual denominations sponsor campus-wide programs including worship, study groups, social gatherings, and cultural events. Campus Ministry sponsors programs and activities that are non-denominational.

Location: Graham Center 318, Modesto A. Maidique Campus, (305) 348-3902; Biscayne Bay Campus, (305) 919-5247.

DIVERSITY, EQUITY AND INCLUSION (DEI)

FIU is committed to providing the highest-quality educational and employment experience to its students, faculty, and staff in a nurturing and supportive environment. In doing so, the institution is committed to ensuring that instruction and services are delivered in a manner that is reflective and supportive of diversity as it relates to gender, socioeconomic status, gender identity, race, ethnicity, physical and mental ability, nationality, military status, sexual orientation, spirituality, and cultural identity. We are committed to ensuring our faculty and staff reflect the diversity of our local community and our student body. We commit to engage in an ongoing and thoughtful dialogue about the changing realities of our increasingly interconnected world. Our Division of Diversity, Equity, and Inclusion is responsible for the development, implementation, and monitoring of diversity, equity, inclusion, and affirmative action programs, policies, and procedures to ensure equal employment without regard to age, color, disability, marital status, national or ethnic origin, political affiliation, race, religion, sex (including pregnancy), veteran status, sexual orientation, or gender identity or expression. This is accomplished by various programs, goals, and initiatives:

- The University's Affirmative Action Plan for Women and Minorities, and for Individuals with Disabilities and Veterans and the Florida Equity Accountability plan;
- Diversity initiatives;
- External partnerships;
- Minority scholarships;
- Position vacancy announcements/hiring recruitment; and
- Training.

The office is located on the Modesto A. Maidique Campus (Primera Casa 220, [305] 348-6088). For additional information, visit the Division of Diversity, Equity, and Inclusion website at dei.fiu.edu.

Within the Division of Diversity, Equity, and Inclusion is our Office of Civil Rights Compliance and Accessibility (OCRCA). FIU promotes a culturally diverse and inclusive working and learning environment where current and prospective faculty, staff, and students are treated fairly and valued for their individuality. OCRCA is responsible for:

- Compliance with the ADA;
- Compliance with Titles VI, VII, and IX; and
- Internal and external investigations.

If any applicant, employee, or student has a good faith belief that they have been discriminated against or harassed based on age, color, disability, gender, marital status, ethnic/national origin, race, religion, retaliation, sexual harassment, or any other protected category, (OCRCA) encourages that person to complete the Discrimination Complaint Processing Form and submit it to our office on the Modesto A. Maidique Campus (Primera Casa 220). OCRCA will investigate the complaint in accordance with university policy and procedures.

The office is located on the Modesto A. Maidique Campus (Primera Casa 220, [305] 348-2785). For additional information, visit hr.fiu.edu/employees-affiliates/employee-concerns/.

OFFICE OF THE OMBUDSPERSON

The Ombudsperson office acts as an impartial and confidential forum to assist students who have encountered problems or conflicts at the university, particularly problems or concerns not adequately addressed through normal channels. This may include correcting processes or procedures that hinder resolving the issue or are causing an inordinate delay. The ombudsperson may resolve problems through various methods, including making inquiries to the appropriate university department for review. The ombudsperson should be utilized in situations where all areas of appeal have been exhausted or proven unsuccessful.

The Office of the Ombudsperson is located on the Modesto A. Maidique Campus (Graham Center 219, [305] 348-2797). Email: ombuds@fiu.edu.

OFFICE OF SOCIAL JUSTICE AND INCLUSION

The Office of Social Justice and Inclusion aims to celebrate diversity and promote inclusion by creating a campus community that encourages social responsibility, honors equality, and fosters student success.

The office offers a wide variety of university and community-wide signature events and programs, including a month-long Martin Luther King, Jr. Commemorative Celebration; mentorship programs (i.e., LGBTQA, Male Mentoring Initiative); Women's Center programming; a Social Justice Badge program; the Lavender Graduation ceremony; Excellence Awards program; Strengths Summit; Social Justice Summit; and Pride Center Month activities. In addition, the Office of Social Justice and Inclusion offers and monitors the following scholarships (fiu.academicworks.com): Social Justice and Inclusion Scholars, Golden Drum, MLK Essay Awards, and the Out and Proud.

Offices are located on the Modesto A. Maidique Campus (Graham Center 216, [305] 348-2436) and on the Biscayne Bay Campus (Wolfe University Center, [305] 919-5817). Website: osji.fiu.edu.

Social Justice Badge Program—One way to create positive climate change is to educate and activate individuals to be the difference in their communities. The Social Justice Badge Program enables students to develop self, group and societal values which lead to a commitment of change. Through a series of workshops, discussions, and events, the Office of Social Justice and Inclusion engages the FIU student body to critically think

and act on social justice issues that are affecting them locally, nationally, and globally.

Pride Center Initiatives—The mission of the Pride Center initiatives is to meet the needs of the LGBTQA student population by developing and implementing educational, social, and resource programs and services. These initiatives are aimed at reducing homophobia and heterosexism on both campuses through education, advocacy, and awareness, and by assisting our LGBTQA students in reaching their full potential.

Male Mentoring Initiative—The goal of the Male Mentoring Initiative is to empower our students and foster personal and professional maturity through mentoring and meaningful interactions. We provide various services that address the many needs of our male student population while reaffirming masculinity in a positive way. The Male Mentoring Initiative is open to all FIU students.

SEXUAL AND UNLAWFUL HARASSMENT POLICY

All members of the university community are entitled to study and work in an environment free of discrimination and harassment. FIU's equal opportunity policy prohibits discrimination against students and employees on the basis of race, color, creed, age, disability, sex (including sexual harassment), religion, marital status, national origin, sexual orientation, gender identity, or gender expression.

Sexual harassment is unlawful under Title IX of the 1972 Education Amendments, Title VII of the Civil Rights Act of 1964, and the Florida Civil Rights Act. As a matter of university policy, sexual or other unlawful harassment occurring in the course of any university activity – whether on or off campus – is prohibited.

Harassment on the basis of race, color, age, disability, sex (including sexual harassment), religion, marital status, national origin, sexual orientation, gender identity, gender expression – or any other protected status under federal, state or local law, ordinance or regulation applicable to the university – is a violation of FIU's regulation.

Any such harassment of any individual in the course of any university-administered program, job, or activity is prohibited and shall not be tolerated. The university shall take prompt and effective corrective action to address unlawful harassment, including, where appropriate, dismissal or expulsion. The policy explicitly applies to university students, faculty, staff, administrators, independent contractors, and all other individuals engaged in university activities. Individuals who know of harassment, or who believe that they have been harassed in violation of this policy, are encouraged to utilize the university complaint procedures.

FIU takes all matters of harassment—including sexual harassment, sexual assault, and sexual violence—seriously. In accordance with Title IX regulations, the university has designated Elizabeth Canning, Interim Director of the Office of Civil Rights Compliance and Accessibility (OCRCA) Office Elizabeth Canning, as the university's Title IX coordinator responsible for overseeing FIU's Title IX compliance effort. Julie Berg, senior associate athletic director, is designated as FIU's deputy Title IX coordinator.

Reporting Harassment: Students, faculty, staff, visitors, independent contractors, and all other individuals

engaged in university activities are encouraged to report any conduct of which they have direct knowledge and which they in good faith believe constitutes harassment in violation of this policy. All FIU employees, including student employees who are graduate teaching or graduate research assistants, part of the Athletic Department, or part of Housing and Residential Life, are considered responsible employees. A responsible employee has been given the duty of reporting incidents of sexual harassment or sexual misconduct or any other misconduct by students or employees. These reports should be made to the Title IX coordinator. If you have concerns or need to report an incident of sexual harassment or sexual misconduct, please contact Elizabeth Canning, Interim Title IX Coordinator, Office of Civil Rights Compliance and Accessibility at (305) 348-2785 or idea@fiu.edu.

Retaliation Is Prohibited: An individual's good faith filing of or pursuing a complaint under this policy or otherwise reporting, complaining, assisting, or cooperating in good faith with a complaint of harassment shall not be the basis for any adverse university decision regarding the student, employment, or other status of any student, faculty member, staff member, administrator, independent contractor, or other individual engaged in university activities. Such retaliation is forbidden by this policy.

Confidentiality: Every reasonable effort shall be made to protect the privacy of the complainant, the accused, and witnesses in the investigation and resolution process, subject to the need to conduct a full and impartial investigation, remedy violations, monitor compliance, and administer this policy.

Any employee, applicant, or student who believes that he or she may be a victim of unlawful discrimination may file a complaint with the Office of Civil Rights Compliance and Accessibility, located on the Modesto A. Maidique Campus (Primera Casa 220, [305] 348-2785).

STUDENT ACCESS AND SUCCESS

The Office of Student Access and Success is committed to improving students' learning and achievement by providing engaged academic experiences through meaningful programming and services that facilitate successful transitions between pre-collegiate, undergraduate, and graduate education. The department develops partnerships with community and local educational agencies and corporations to support the academic success of students from underrepresented and special student populations.

Offices are located on the Modesto A. Maidique Campus (Student Academic Success Center 205, [305] 348-3445).

Visit us online at sas.fiu.edu.

Pre-Collegiate Programs

Our pre-collegiate programs provide academic enrichment, career planning, financial aid guidance, and scholarship opportunities to promising underrepresented students at the middle- and high-school levels. The programs also expose students to the university environment through residential and non-residential programs and assist in facilitating the transition to college. In partnership with Miami-Dade County Public Schools, the following programs are offered at FIU: College Reach Out, Educational Talent Search, Partners in Progress, the National Achievers Society (FEF South Florida Center of Excellence), and Upward Bound.

Offices are located on the Modesto A. Maidique Campus (Graham Center 331, [305] 348-1742) and on the Biscayne Bay Campus (Academic Center One 394, [305] 919-4223).

College Access Programs

College Access Programs are designed as pathways for undergraduate education. These programs provide college access to students from historically under-represented groups and special populations. The Office of Student Access and Success connects students with services and tools such as tutoring, career planning, success coaching, professional development workshops, and goal-setting to help them succeed academically, maintain financial aid eligibility, and graduate on time. Current access pathways exist with the following community partners: 5000 Role Models of Excellence Project, Big Brothers Big Sisters, Breakthrough Miami, and Take Stock in Children.

Offices are located on the Modesto A. Maidique Campus (Student Academic Success Center 205, [305] 348-3445).

Fostering Panther Pride

Fostering Panther Pride offers tailored academic and support services to students identified as formerly in foster care or homeless. The primary goal of Fostering Panther Pride is to assist these students in their transition to FIU, their retention and graduation, and their pursuit of employment or graduate studies upon receiving their bachelor's degree.

Offices are located on the Modesto A. Maidique Campus (Student Academic Success Center 205, [305] 348-3445).

Golden Scholars Bridge Program

The Golden Scholars bridge program is an alternative admissions program for under-represented students. Priority is given to first-generation college students who are eligible for Pell grants. Students selected to be Golden Scholars participate in an intensive six-week residential summer bridge program that offers academic enrichment, individualized coaching, and mentoring from faculty and staff. Upon successful completion of the bridge program, students matriculate into the fall term as fully admitted FIU students. Offices are located on the Modesto A. Maidique Campus (Student Academic Success Center 205, [305] 348-3445).

Ronald E. McNair Post Baccalaureate Achievement Program

The TRiO McNair Scholars program is a federally funded project. The purpose of the program is to assist low-income, first-generation college, and/or under-represented minority college students in making the transition from their undergraduate to doctoral studies. Participants have the opportunity to conduct scholarly research under the supervision of a faculty mentor from the sciences, technology, engineering, mathematics, and/or psychology disciplines.

Offices are located on the Modesto A. Maidique Campus (Student Academic Success Center 205, [305] 348-3445).

Student Support Services

Student Support Services is a federal TRiO program funded by the U.S. Department of Education. The program provides opportunities for academic development and assistance with basic college requirements, motivating students toward the successful completion of their bachelor's degree. The goal of Student Support Services is to increase the college retention and graduation rates of its participants who come from low-income backgrounds, are first-generation college students and/or individuals with disabilities.

Offices are located on the Modesto A. Maidique Campus (Student Academic Success Center 220, [305] 348-6424).

STUDENT HEALTH CLINICS

Good health is essential to students' success while at the university and throughout their life. Therefore, Student Health Services (SHS) is committed to providing registered students with free or low-cost quality medical care, which will allow them to thrive both academically and personally. Our healthcare centers are located at both the Biscayne Bay and Modesto A. Maidique campuses to serve our students. The care offered has a strong focus on education.

Clinical Services include:

- Dermatology
- Women's health/gynecology
- Behavioral health/psychiatry
- Care for common illness and injuries
- Women's health services
- Pre-matriculation and preventive vaccines
- Preventive screenings, EKGs, and laboratory testing (blood work, urine test, and cultures)
- After hours, holiday, and weekend nurse answer line. For services offered on the Modesto A. Maidique Campus, call (305) 348-2401, and select option 2; for services offered on the Biscayne Bay Campus, call (305) 919-5620, and select option 2.

Pharmacy services on the Modesto A. Maidique Campus include:

- Over-the-counter products and prescription medications at competitive prices
- Natural and organic products
- Individualized education and counseling on prescription medications and over-the-counter products

Although a full-service pharmacy is not available on the Biscayne Bay Campus, pre-packaged medications are dispensed by practitioners at that location.

Other services

- Assist students with obtaining university-sponsored student health insurance plans to help offset the cost of services not covered under the health fee.

For more information about us and a complete list of services, visit our website at studenthealth.fiu.edu.

Clinics are located on the Modesto A. Maidique Campus near the College of Law Building (Student Health Center 110 and 154, [305] 348-2401, ext. 2) and on the Biscayne Bay Campus near parking lot 1-C (Health Care Center building).

STUDENT CONDUCT AND ACADEMIC INTEGRITY

The Office of Student Conduct and Academic Integrity serves the FIU community by working to protect the intellectual exchange of ideas, knowledge, and experience by preserving the safe and stimulating environment of FIU in which scholarship and personal growth may occur. Such protection occurs through educating community members about the rights and responsibilities enshrined in the Student Conduct and Honor Code ("code"), and investigating and adjudicating such matters referred to

Office of Student Conduct and Academic Integrity under the code. Through the student conduct process, the university holds students accountable for their behavioral choices in a fair and developmental manner, while upholding the rights of the community

The office also:

- Selects and trains the members of the Student Conduct Committee and hearing officers;
- Provides educational programs for faculty, staff, and students regarding the student conduct process, ethics and integrity, conflict resolution, and dealing with disruptive students in the classroom;
- Provides referrals to support resources to community members;
- Provides student conduct record background checks for various agencies (e.g., federal agencies, graduate schools, Florida Bar Examiners); and,
- Manages admissions clearances: the University reserves the right to review the case of any student who has been involved in misconduct prior to admission to determine eligibility for admission.

Please refer to the code regarding the Student Conduct and Academic Integrity processes and procedures, as well as the rights and responsibilities of each FIU student. To report a possible violation of the code, visit studentaffairs.fiu.edu/get-support/student-conduct-and-academic-integrity/. Offices are located on the Modesto A. Maidique Campus (Graham Center 311, [305] 348-3939). Website: studentaffairs.fiu.edu/get-support/student-conduct-and-academic-integrity/.

STUDENT COMPLAINTS

FIU supports the rights of students to file complaints and grievances, and appeal judicial outcomes and other university decisions concerning students in an environment free of fear, retaliation, or other adverse consequences.

Students can request to meet with the student ombudsperson to discuss concerns and/or complaints. The ombudsperson provides a forum for students to discuss and identify options to resolve student issues. Students may contact the ombudsperson at ombuds@fiu.edu.

The Student Handbook directs students to procedures for filing student grievances on academic and non-academic matters, for appealing student misconduct charges, and for lodging specific complaints, including discrimination or harassment, and appealing those decisions. [Student Handbook](#) information concerning the grievance policy and procedures can also be found on the Academic Grievances website at ffai.fiu.edu.

Complaint Procedures to Oversight Agencies

Procedures are available to allow students to file complaints with the Board of Governors (BOG) State University System of Florida, as well as the institutional accrediting agency, the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC).

The Florida BOG has grievance procedures in place for students seeking to file a complaint. However, students are encouraged to resolve university concerns by contacting the campus office responsible for the area relevant to the complaint. Further, if dissatisfied with the response, the student may contact the relevant area

supervisor, director, department chair, or dean at FIU for resolution.

There are a number of venues for making a complaint to the BOG. The [BOG website](#) provides information regarding filing a complaint.

The Southern Association of Colleges and Schools Commission on Colleges complaint procedure states: "SACSCOC expects individuals to attempt to resolve the issues through all means available to the complaint, including following the institution's own published grievance procedures before submitting a complaint to SACSCOC". The SACSCOC website provides information for filing a SACSCOC complaint: [SACSCOC Website](#)

STUDENT FOOD PANTRY

The Student Food Pantries are available to all currently enrolled students located at both the Modesto A. Maidique Campus and the Biscayne Bay Campus. The purpose of the pantries is to serve FIU students in need. No proof of need is required. Students can access the pantry of their choice weekly, taking up to 10 pounds of food each week. Both pantries are overseen by the Center for Leadership and Service. Food donations are supported by students, staff, faculty, student organizations, and community members of the community. Pantries are located on the Modesto A. Maidique Campus (Graham Center 319, [305] 348-3204) and the Biscayne Bay Campus (Wolfe University Center 256, [305] 919-5360). For more information please visit go.fiu.edu/studentfoodpantry.

STUDENT MEDIA

Student media at FIU include PantherNow print, PantherNow, and the Roar radio.

PantherNow Print is an editorially independent publication produced by students and distributed at no cost. PantherNow keeps the university community informed about campus news, events, and activities; serves as a forum for opinion and commentary concerning campus-related topics; and protects the interests of the university community and its component parts. Students can work on the staff in news and features, photography, and/or advertising. No prior experience is required.

The Roar is FIU's radio station located at 88.1, 95.3 (for Modesto A. Maidique Campus), and 96.9 (for Biscayne Bay Campus) FM. The station operates 24 hours, seven days a week. The station provides a means for students to acquire experience in various disciplines related to the broadcast industry, including hands-on experience in a realistic, business-like setting encompassing teamwork and professional standards.

UNIVERSITY CENTERS

The University Center on each campus provides vital services to students and the university community. The Graham University Center (GC) on the Modesto A. Maidique Campus and the Wolfe University Center (WUC) on the Biscayne Bay Campus are the focal points for the university community to meet and interact in an educational and vibrant environment. Centers' staff coordinate scheduling of space and assist with the production of student- and university-sponsored events.

As the hub of university life, these centers house the offices of Student Government Association (SGA); Campus Life; Student Programming through Student Life and Development; and the Office of Fraternity and Sorority Life.

Graham Center

The Graham Center building has offices, retail stores, food venues, academic classrooms, and event spaces. The offices that offer student support services are the Office of the Senior Vice President for Academic and Student Affairs, Ombudsperson Office, Dean of Students, Campus Life, Center for Leadership and Service, Disability Resource Center, Multifaith Council, Office of Social Justice and Inclusion, Office of Orientation and Parent Programs, Student Conduct and Academic Integrity, Upward Bound and Pre-College Programs, and Student Health and Wellness. The Roar student radio station (WRGP) keep offices and production rooms at the Graham Center.

The Graham Center also offers the following services: event planning, audiovisual/multi-media support, state-of-the-art computer labs, lost and found, ATMs, locker rentals, notary public service, vending machines, and Kaplan Test Preparation classes. Additionally, the Graham Center offers event facilities (e.g., meeting rooms, ballrooms, and auditoriums for lectures, banquets, receptions, and weddings). The 23-classroom wing—located on the second floor and connecting to the Barnes and Noble café—has a large lounge ideal for individual and group studying. The university community can enjoy entertainment and the arts by visiting the Student Art Gallery and Piano Lounge, and the Porter Davis Game Room.

The Graham Center mini-mall offers a variety of food locations: The 8th Street Campus Kitchen serves breakfast, lunch, and dinner in an all-you-care-to-eat style. Other offerings include, the Faculty Club, Recharge-U convenience store, Jamba Juice, Pollo Tropical, Subway, Panera Bread, Pincho Factory, Almazar, Sushi Maki, Bustelo Café, La Ventanita and Sergio's Cuban Café & Grill. Other retail venues include the Barnes and Noble Bookstore (with Starbucks Café), Wayki's Hair and Nail Salon, Golden Touch Haircuts & Shaves, Panther TECH store, and Ricoh@FIU (copy center, packing, and shipping). Administrative offices are located on the Modesto A. Maidique Campus (Graham Center 1210, [305] 348-2297). Website: grahamcenter.fiu.edu.

Wolfe University Center

The Wolfe University Center is located at the heart of FIU's Biscayne Bay Campus. It is home to the 300-seat Mary Ann Wolfe Theater, and houses a state-of-the-art computer/collaboration lounge, game room five large meeting rooms, and a multi-purpose ballroom. A multi-purpose dining and catering facility, the Wellness and Recreation Center, and several comfortable study lounges are also provided in the facility. A recent renovation to Panther Square, the center's lobby and student programmatic space, creates a high-tech destination on campus where students can study, connect with others, and host events.

Center tenants include Academic and Student Affairs departments for Disability Resource Center, Orientation and Family Programs, Multicultural Programs and Services, Student Life and Development, Center for Leadership and Services, Women's Center, and Counseling and Psychological Services. University

support offices include the University Credit Union, the FIU One Card Office/Wells Fargo, Ricoh @ FIU (copy center, packing, and shipping), vending machines, ATMs, lost and found, Career and Talent Development, and International Student and Scholar Services. Administrative offices are located on the Biscayne Bay Campus (Wolfe University Center 325, [305] 919-5800). Website: wuc.fiu.edu.

The Barnes and Noble University Bookstore is located on the first floor at both university centers (Modesto A. Maidique Campus, Graham Center 2200, [305] 348-2691); Biscayne Bay Campus, Wolfe University Center 130, [305] 919-5580).

UNIVERSITY POLICE DEPARTMENT

The Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (Clery Act) All postsecondary institutions, both public and private, that participate in federal Title IV student aid programs are required to comply with the *Clery Act* regulations. Although *Clery Act* compliance is an institutional responsibility, full compliance is a campus-wide effort, and concerns all members of the community. Policy statements must be developed and crime reports must be collected from a wide variety of campus security authorities.

These authorities include police, non-police security staff responsible for monitoring campus property, individuals and offices to which crimes should be reported, and officials of the university with significant responsibility for student and campus activities.

- The University Police Department publishes an Annual Campus Security and Fire Safety Report every year by October 1 containing three years of campus crime statistics and specific campus security information including university policy statements.
- Crime statistics for the FIU campuses, areas immediately adjacent to the campus, certain non-campus facilities, and other remote university properties are disclosed. The statistics must be gathered from police or security, local law enforcement, and other university officials (i.e., deans, directors, department heads) who have significant responsibility for student and campus activities. The crime statistics may be found on the University Police website listed below.
- **Timely Warning:** The Clery Act requires the institution to alert the campus community to certain crimes in a manner that is timely and will aid in the prevention of similar crimes. The intent of a warning regarding a criminal incident(s) is to enable people to protect themselves. This means that a warning should be issued as soon as pertinent information is available. The warning will contain information about the type of criminal incident that has occurred, although the institution can provide additional information as it becomes available.
- **Emergency Notification:** Under the Clery Act, every institution is required to immediately notify the campus community upon confirmation of a significant emergency or dangerous situation occurring on the campus that involves an immediate threat to the health or safety of students or employees. An "immediate" threat as used here includes an imminent

or impending threat. The notifications may be sent via email, text, and the university telephone system

- The University Police Department is responsible for preparing and distributing the Annual Security and Fire Safety Report. The University Police Department works with local police departments and all university departments to compile the information contained in the annual report.

The University Police Department encourages the FIU community to pick up a copy of the Annual Security and Fire Safety Report as a guide for safe practices on and off campus. You may obtain a copy at the University Police Department.

The Annual Security and Fire Safety Report is also available electronically on the University Police website (police.fiu.edu).

WELLNESS AND RECREATION CENTERS

The Wellness and Recreation Center (WRC) promotes and supports healthy lifestyles by providing participatory fitness and wellness programs, educational experiences, and related services, to improve the individual's physical health. At our centers at MMC and BBC, participants learn to introduce physical activity into their daily college life, developing lifelong, active lifestyle habits.

The Wellness and Recreation Center at MMC is equipped with state-of-the-art exercise and cardiovascular fitness equipment. The Center provides resistance and selectorized equipment, steppers, upright and recumbent bicycles, treadmills, rowers, and ellipticals in addition to free weights. Two basketball gyms, two indoor racquetball courts and one squash court, locker rooms, a Bike Shop, and a Pro Shop are also available. The WRC is located west of the Student Health Services Complex near Parkview Hall. Numerous PantherFIT group fitness classes are offered per week at the WRC. Free group exercise classes are offered throughout the year including: Hardbodies, Group Cycling, Yoga, and Zumba. Get involved with Sport Programs on both campuses by participating in Intramural (IM) Sports and Sport Clubs. Panthers can play against Panthers by signing up to participate in a variety of IM Sports leagues and tournaments. IM Sports organizes the games, Panthers just need show up and play. Sport Clubs offers both recreational and competitive sports opportunities and the ability to have Panthers represent FIU in state, regional, and national competitions. Sport Programs also now offers the opportunity to get involved with Esports in both the IM Sports and Sport Clubs programs! To get involved, visit wrc.fiu.edu.

The Wellness and Recreation Center at BBC is located on the first floor of the Wolfe University Center (WUC), Room 160 and it includes an aquatic training facility, home to FIU's six-time Conference USA Women Swimming and Diving Champions. The WRC at BBC features state of the art fitness equipment, a Group Exercise aerobics studio, locker rooms and showers. A variety of group exercise classes such as Yoga, Hip Hop Dance, Belly Dancing, etc are also hosted at the center. Additionally, the WRC at BBC offers Kayaking, Nighttime Kayaking, and Stand-up Paddle Board excursions from our Outdoor X program. Make sure to stop in and participate in our complimentary Bike Share program available to all student participants.

New additions to the center includes a newly renovated Outdoor Recreation support building (which include a multipurpose room and new restrooms to support outdoor recreational services) and a Sand Volleyball Court located at Bay View Housing.

Both centers offer other facilities for recreational use such as Tennis Centers with lighted courts. The BBC Aquatic Center and MMC Panther Pool provide on-campus swimming opportunities. Learn To Swim Programs, water polo classes, triathlon training, and Masters Swimming classes are offered weekly at the BBC Aquatic Center. At MMC, students have free access to nearby Tamiami Pool during the week from noon-3:00pm. At MMC, the WRC houses two outdoor basketball courts, one sand volleyball court, three turf fields, a jogging trail and so much more. The WRC at BBC is also host to the Team Ropes Adventure Challenge (TRAC), one of the most complete and professional team-building training programs in South Florida. TRAC is an experiential education program that focuses on human development and group dynamics. Participants learn new skills through a series of adventure-based activities that provide training in leadership, teambuilding development, communication, and problem-solving skills.

WRC also offers a new online platform that provides remote access to fitness and wellness programming. Whether it's live weekly Group Exercise classes, on-demand fitness options or professional development, the WRC has something for you to stay active and involved - no matter where you are! Just go to: go.fiu.edu/virtualwrc.

Both WRCs provide student employment opportunities as Sports Officials, Membership Assistants, Facility Attendants, Building Supervisors, Lifeguards, Group Fitness Instructors, Personal Trainers, etc. A current activated FIU OneCard is required for access to all recreation facilities and programs.

Web site: go.fiu.edu/wrc

WRC at MMC: (305) 348-2575 or 305-348-2951

WRC at BBC: (305) 919-5678

OFFICE OF VETERAN AND MILITARY AFFAIRS

The Office of Veteran and Military Affairs is committed to delivering and facilitating comprehensive "military-friendly" services and programs for FIU Florida International University veteran and military-affiliated learners. Our team is available to ensure each veteran and military-affiliated learner successfully transitions to college life and fulfills their professional goals.

The Office of Veteran and Military Affairs also provides additional support through our Center of Excellence for Veteran Student Success. The staff in this Center work with students and staff to increase persistence, retention, and graduation rates of student Veterans at FIU. This Center was developed to support Veteran student success by coordinating services to address the academic, financial, physical, and social needs of veteran students.

All veterans and military-affiliated students are required to contact the Office of Veteran and Military Affairs to ensure their academic program is approved by the Department of Veteran Affairs. For rate of monthly payment of educational allowances for veterans and dependents, please contact the Office of Veteran and Military Affairs at

veterans@fiu.edu. All veteran and military-affiliated student questions should ensure their personal contact information is updated with the Department of Veterans Affairs prior to the start of each semester. Any veteran and/or military-affiliated students' questions should be emailed to veterans@fiu.edu. Please remember to provide your name and Panther ID in all correspondence with our office.

Location: Tower 100, Modesto A. Maidique Campus and WUC 255, Biscayne Bay Campus. Phone: (305) 348-2838. Website: vma.fiu.edu. Email: veterans@fiu.edu.

Victim Empowerment Program (VEP)

Victim Empowerment Program services are free of charge and confidential.

Services include:

- Crisis support and assistance in accessing community and university resources, and helping students understand the different options available to them during or after experiencing actual or threatened abuse or violence. This information is also available to students who may want resources for someone they know.
- Help with issues related to relationship abuse, sexual assault, stalking, assault and battery, homicide of friend or relative, hate crimes, harassment, and cyber harassment
- Other VEP services available (if desired by student):
 - Safety planning
 - Understanding and navigating the criminal justice system
 - Assistance in making police reports
 - Petitioning the court for an injunction for protection (i.e., "restraining order")
 - Finding legal assistance
 - Finding emergency safe shelter
 - Communicating with professors and/or other parties as requested by the survivor
 - Help with university administrative procedures
 - Support during student conduct proceedings
 - Escort to appointments, hearings, and medical facilities
 - Help with other solutions that may be necessary

Contact or visit us on the Modesto A. Maidique Campus (Student Health Center Suite 270, [305] 348-2277) or, by appointment, on the Biscayne Bay Campus. After-hours urgent help is available at 305-348-2277.

Additional information and resources are available at vep.fiu.edu.

Florida's Statewide Course Numbering System

Courses in this catalog are identified by prefixes and numbers that were assigned by Florida's Statewide Course Numbering System (SCNS). This numbering system is used by all public postsecondary institutions in Florida and by participating nonpublic institutions. The major purpose of this system is to facilitate the transfer of courses between participating institutions. Students and administrators can use the online SCNS database to obtain course descriptions and specific information about course transfer between participating Florida institutions. Visit the SCNS website at <http://scns.fldoe.org>.

Each participating institution controls the title, credit, and content of its own courses and recommends the first digit of the course number to indicate the level at which students normally take the course. Course prefixes and the last three digits of the course numbers are assigned by members of faculty discipline committees appointed for that purpose by the Florida Department of Education in Tallahassee. Individuals nominated to serve on these committees are selected to maintain a representative balance as to type of institution and discipline field or specialization.

The course prefix and each digit in the course number have a meaning in the SCNS. The listing of prefixes and associated courses is referred to as the "SCNS taxonomy." Descriptions of the content of courses are referred to as "statewide course profiles."

THE COURSE PREFIX

The course prefix is a three-letter designator for a major division of an academic discipline, subject matter area, or subcategory of knowledge. The prefix is not intended to identify the department in which a course is offered. Rather, the content of a course determines the assigned prefix to identify the course.

GENERAL RULE FOR COURSE EQUIVALENCIES

Equivalent courses at different institutions are identified by the same prefixes and same last three digits of the course number and are guaranteed to be transferable between participating institutions that offer the course, with a few exceptions, as listed below in *Exceptions to the General Rule for Equivalency*.

For example, a freshman composition skills course is offered by multiple public and nonpublic postsecondary institutions. Each institution uses "ENC_101" to identify its freshman composition skills course. The level code is the first digit and represents the year in which students normally take the course at a specific institution. In the SCNS taxonomy, "ENC" means "English Composition," the century digit "1" represents "Freshman Composition," the decade digit "0" represents "Freshman Composition Skills," and the unit digit "1" represents "Freshman Composition Skills I."

In the sciences and certain other areas, a "C" or "L" after the course number is known as a lab indicator. The "C" represents a combined lecture and laboratory course that meets in the same place at the same time. The "L"

represents a laboratory course or the laboratory part of a course that has the same prefix and course number but meets at a different time or place.

Transfer of any successfully completed course from one participating institution to another is guaranteed in cases where the course to be transferred is equivalent to one offered by the receiving institution. Equivalencies are established by the same prefix and last three digits and comparable faculty credentials at both institutions. For example, ENC 1101 is offered at a state/community college. The same course is offered at a state university as ENC 2101. A student who has successfully completed ENC 1101 at a Florida College System institution is guaranteed to receive transfer credit for ENC 2101 at the state university if the student transfers. The student cannot be required to take ENC 2101 since ENC 1101 is equivalent to ENC 2101. Transfer credit must be awarded for successfully completed equivalent courses and used by the receiving institution to determine satisfaction of requirements by transfer students on the same basis as credit awarded to the native students. It is the prerogative of the receiving institution, however, to offer transfer credit for courses successfully completed that have not been designated as equivalent. **NOTE:** Credit generated at institutions on the quarter-term system may not transfer the equivalent number of credits to institutions on the semester-term system. For example, 4.0 quarter hours transfers as 2.67 semester hours.

AUTHORITY FOR ACCEPTANCE OF EQUIVALENT COURSES

Section 1007.24(7), Florida Statutes, states:

Any student who transfers among accredited postsecondary institutions that participate in the statewide course numbering system shall be awarded credit by the receiving institution for courses satisfactorily completed by the student at the previous institutions. Credit shall be awarded if the courses are judged by the appropriate statewide course numbering system faculty committees representing school districts, public postsecondary educational institutions, and participating nonpublic postsecondary educational institutions to be academically equivalent to courses offered at the receiving institution, including equivalency of faculty credentials, regardless of the public or nonpublic control of the previous institution. The Department of Education shall ensure that credits to be accepted by a receiving institution are generated in courses for which the faculty possess credentials that are comparable to those required by the accrediting association of the receiving institution. The award of credit may be limited to courses that are entered in the statewide course numbering system. Credits awarded pursuant to this subsection shall satisfy institutional requirements on the same basis as credits awarded to native students.

For purposes of clarity, an accredited institution refers to a post-secondary institution whose institutional accreditor is recognized by the U.S. Department of Education, Office of Postsecondary Education.

EXCEPTIONS TO THE GENERAL RULE FOR EQUIVALENCY

Since the initial implementation of the SCNS, specific disciplines or types of courses have been excepted from the guarantee of transfer for equivalent courses. These include courses that must be evaluated individually or courses in which the student must be evaluated for mastery of skill and technique. The following courses are exceptions to the general rule for course equivalencies and may not transfer. Transferability is at the discretion of the receiving institution.

- A. Courses not offered by the receiving institution.
- B. Courses included in the SCNS completed prior to the established transfer date of the course in question.
- C. Courses in the _900-999 series and must be evaluated individually. These include special topics, internships, apprenticeships, practica, study abroad, theses and dissertations.
- D. Applied academics for adult education courses.
- E. Graduate courses.
- F. Internships, apprenticeships, practica, clinical experiences and study abroad courses with numbers other than those ranging from 900-999.

- G. Applied courses in the performing arts (Art, Dance, Interior Design, Music, and Theatre) and skills courses in Criminal Justice (academy certificate courses). These courses need evidence of achievement (e.g., portfolio, audition, interview, etc.).

COURSES AT NONPUBLIC ACCREDITED INSTITUTIONS

The SCNS website <http://scns.fldoe.org> contains a comprehensive listing of all nonpublic institution courses in the SCNS inventory, as well as each course's transfer level and transfer effective date. This report is updated monthly. Questions about the SCNS and appeals regarding course credit transfer decisions should be directed to: Transfer and Transition Services, Enrollment Management and Services; 305-348-3844, transfer@fiu.edu or the Florida Department of Education, Office of Articulation, 325 West Gaines Street, Room 1401 Tallahassee, Florida 32399-0400; 850-245-0427, articulation@fldoe.org.

Special Course Directory

In addition to the regular courses listed in the catalog*, special courses may be offered using the State Wide Course Numbering System. The following table provides an inventory of course numbers by course type.

Course Type	Course Number	Undergraduate			Graduate		
		Lower	Upper	Post Bacc	Masters	Doctoral	
Directed Readings/Independent Study	-900 through -909	1 --- or 2---	3--- or 4---	5---	6---	7---	
Directed Independent Research	-910 through -919	XXXX	3--- or 4---	5---	6---	7---	
Colloquiums/Symposiums/Workshops	-920 through -929	1 --- or 2---	3--- or 4---	5---	6---	7---	
Special Topics/Seminars	-930 through -939	1 --- or 2---	3--- or 4---	5---	6---	7---	
Internships/Practicum/Clinical							
Practice/Cooperative Education	-940 through -949	1 --- or 2---	3--- or 4---	5---	6---	7---	
Activities/Performances/Study Abroad	-950 through -959	1 --- or 2---	3--- or 4---	5---	6---	7---	
Preliminary/Comprehensive Examinations	-960 through -969	XXXX	XXXX	5---	6---	7---	
Thesis/Thesis Defense	-970 through -979	XXXX	XXXX	XXXX	6---	XXXX	
Dissertation/Dissertation Defense	-980 through -989	XXXX	XXXX	XXXX	XXXX	7---	
Experimental Courses/Reserved for Special Institutional Purposes	-990 through -999	1 --- or 2---	3--- or 4---	5---	6---	7---	

* FIU is in the process of re-numbering all special courses to comply with the State Wide Course Numbering sequence above. Therefore, some of the special courses listed in the catalog may change.

College of Arts, Sciences and Education

<i>Dean</i>	Michael R. Heithaus
<i>Senior Associate Dean, School of Education and Human Development</i>	Laura Dinehart
<i>Senior Associate Dean, School of Environment, Arts, and Society</i>	Heather Russell
<i>Senior Associate Dean, School of Integrated Science and Humanity</i>	Walter Van Hamme
<i>Associate Dean, Undergraduate Studies</i>	Maricel Cigales
<i>Associate Dean, Graduate Studies</i>	Brian Raue
<i>Associate Dean, Research</i>	Rita Teutonico
<i>Assistant Dean, Accreditation and Assessment</i>	Deborah J. Hasson
<i>Assistant Dean, College Operations</i>	Hector Junco
<i>Director of Liberal Studies</i>	Wanda Raiford
<i>Associate Director of Liberal Studies</i>	Heather Blatt

The College of Arts, Sciences and Education furthers the study of fundamental intellectual disciplines and serves the University's other colleges and schools. The College grants Bachelor's, Master's, and Ph.D. degrees. In addition, the College serves students who need to complete general education and core curriculum requirements and other requirements in order to enroll in specific disciplines or professional programs.

As the heart of a leading public research university, the College of Arts, Sciences and Education plays a vital role in the intellectual, cultural and civic life of local, national and international communities. The College provides an educational foundation that prepares FIU students to be successful and engaged citizens in a global society. The College generates extensive scholarship that yields new knowledge, shapes how we teach and learn, and contributes to a more complete understanding of the world.

The College is composed of 11 departments and several interdisciplinary programs.

Graduate Programs

The College has academic programs leading to Master's degrees in Biology, Chemistry, Creative Writing, English, Environmental Studies, Environmental and Urban Systems (offered jointly with the College of Engineering and Computing), Environmental Policy and Management, Forensic Science, Geosciences, Linguistics, Mathematical Sciences, Physics, Psychology, and Statistics.

The College offers academic programs leading to the Ph.D. in Biochemistry, Biology, Chemistry, Earth Systems Science, Mathematical Sciences, Physics, and Psychology, Curriculum and Instruction, and Higher Education. The College also offers Ed.D's in Curriculum and Instruction, Education Leadership and Exceptional Student Education.

Graduate Certificate Programs

The College offers academic programs leading to graduate certificates in Applied Behavior Analysis, Applied Social and Cultural Psychology, Biodiversity Conservation and Management, Cognitive Neuroscience, Environmental Studies, Geographic Information Systems, Water Environment and Development Studies, and Women and Gender Studies.

Graduate Admission Requirements

The College's admission requirements as listed below are in addition to the University's graduate admission requirements. These are minimal requirements. Please consult the specific graduate program, which may have different requirements.

1. A 3.0 or higher GPA during the last two years as an upper division student is required for a master's degree. A 3.0 or higher GPA and submission of an official GRE score are required for the Ph.D. degree. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the IBT TOEFL or 6.3 overall on the IELTS is required.
2. The GRE or GPA stated above are only minimum requirements. All applications are reviewed by each program's Graduate Studies Admission Committee, which makes the final admission recommendations. Since admission to the program is competitive, the committee's requirements are normally higher than the minimum aforementioned standards.

Note: The programs, policies, requirements, and regulations listed in this catalog are continually subject to review in order to serve the needs of the University's various publics and to respond to the mandates of the Florida Board of Education, or Board of Governors, and the Florida Legislature. Changes may be made without advance notice. Please refer to the General Information section for the University's policies, requirements, and regulations.

Interdisciplinary Courses

The College of Arts, Sciences and Education has several interdisciplinary programs which are not based in a specific academic department. The courses offered by these programs, therefore, are not found in the departmental listings in the Catalogs, but are included here.

IDS 5176 Experimental Arts (1-3). The study and creation of Experimental Artworks, involving media/sound, movement, visual art, etc. Students from different disciplines in the Arts have the opportunity to collaborate together and create new works. Prerequisite: Permission of the instructor.

ISS 5166 Sustainable Communities Seminar (3). Explores theories and aspects of sustainable communities, and considers the concept in comparative-historical, local-global, and critical perspectives. Prerequisite: Permission of the instructor.

ISS 5237 Latin American and Caribbean Cultural Expressions (3). This interdisciplinary course develops an interdisciplinary approach to the study of national, cultural, and racial identities, as expressed in cultural productions of the Latin America and the Caribbean.

ISS 5238 The Imaged Body: The Case of the Americas (3). With a team-taught interdisciplinary approach this course explores how identity, power and hierarchy are invoked and represented through the human body and body movement in the region of the Americas.

School of Education and Human Development

Senior Associate Dean
Director, Clinical Experiences

Laura Dinehart
Judith Cohen

The School of Education and Human Development (SEHD) at Florida International University is one in which candidates, faculty, and staff embrace the shared experiences of a diverse, international, professional-learning community. The School, therefore, strives to facilitate diverse learning environments where knowledge becomes the means to foster goal attainment for all those involved in the learning process. This process necessitates the highest ethical standards, while emphasizing inquiry as the means-ends connection to enhancing reflective intelligence in a changing social, political, cultural and technological world.

The School of Education and Human Development is charged to prepare professionals who have the knowledge, abilities, and dispositions to facilitate and enhance learning and development within diverse settings. Consequently, the school promotes and facilitates the discovery, development, documentation, assessment, and dissemination of knowledge related to teaching and learning by developing professional partnerships in the larger community that foster significant educational, social, economic and political change. Our mission supports:

- Programs that reflect curricula that reflect sound theory and best practice.
- Highly qualified and diverse students and graduates.
- Highly qualified and diverse faculty active in teaching, research and service.
- Effective and ethical governance and organizational structure within an environment of open communication among faculty, administrators, staff, students and community.
- Collaborative and mutually beneficial partnerships with schools and other organizations.
- Visibility and impact at local, state, national and international levels.
- Continuous improvement of the School.

The School offers instructional programs at the undergraduate and graduate levels, engages in research and program development activities, and provides field services to the educational community. The School, housed in the Sanford and Dolores Ziff Education Building (ZEB) at Florida International University—Modesto A. Maidique Campus, is fully accredited by the National Council for the Accreditation of Teacher Education, the Florida Department of Education, and the State University System.

To support its mission, the School is organized into three separate but related departments:

- Counseling, Recreation and School Psychology
- Educational Policy Studies
- Teaching and Learning

Applicants to the School's programs should carefully examine the choices of major concentrations and program objectives. Because there are occasional revisions to the School of Education and Human Development's

curriculum during the academic year, some curriculum changes may not be reflected in the current catalog. Prospective students are advised to contact appropriate advisors to ask for current information regarding specific programs of interest.

Specific program advisement is available by prearranged personal appointment with advisors at all locations. Additional information is available on the FIU website at www.fiu.edu or at the School of Education and Human Development website at <http://education.fiu.edu>.

Note: The programs, policies, requirements, and regulations listed in this catalog are continually subject to review to serve the needs of the University's various publics and to respond to the mandates of the Florida Legislature and the State University System. Changes may be made without advance notice. Please refer to the General Information section for the University's policies, requirements, and regulations.

All stated admission requirements are to be considered minimum. A student who meets these minimum requirements is not automatically assured admission. Program admission requirements are subject to change. It is the responsibility of the student to assure that the requirements have been met.

It is recommended that students meet with their advisors throughout the program to assure adequate progress.

All students enrolled in graduate initial education certification programs in the School of Education and Human Development will be required to subscribe and maintain a TaskStream account throughout their FIU career so that they can generate and maintain a portfolio of their work in the School. TaskStream is web-based electronic portfolio application that allows students to upload and share selected work via the World Wide Web. TaskStream also has tools which allow students to create standards-based lesson plans, evaluation rubrics, and entire instructional units.

Master's, Specialist, and Doctoral Degrees

The SEHD offers graduate programs at the Master's (MS), Educational Specialist, (Ed.S.) and Doctoral levels, both Doctorates of Philosophy (Ph.D.) and Doctorates of Education (Ed.D.). All graduate programs include courses and may include seminars, field experiences, research projects, theses, and dissertations, depending upon the student's level and area of emphasis.

Master of Science Degree Programs

Master of Science degree programs are offered in the following specialties and tracks:

- Adult Education and Human Resource Development
- Counselor Education
 - School Counseling
 - Clinical Mental Health Counseling
 - Rehabilitation Counseling
- Curriculum and Instruction
 - Curriculum Development
 - Curriculum Development Online
 - Elementary Education
 - English Education
 - Learning Technologies

Mathematics Education
 Modern Language Education
 Physical Education
 Science Education
 Social Studies Education
 Special Education
 Early Childhood Education
 Educational Leadership
 Foreign Language Education
 Teaching in Challenging Contexts (TiCC) Track
 Higher Education Administration
 International and Intercultural Education
 Kinesiology and Exercise Science
 Reading/Literacy Education (K-12)
 Recreation and Sport Management
 Recreation and Sport Management Track
 Recreational Therapy Track
 Research Design and Methodology
 Special Education
 Urban Education
 Bilingual
 Foundations
 Instruction in Urban Settings
 TESOL

Admission to the various Master's programs differs. Applicants for admission to most Master's of Science programs in Education must hold or qualify for Florida teacher certification in the appropriate area (see specific program area in this catalog for details). In some programs, applicants must also satisfy the following minimum requirements: A GPA of 3.0 in the last 60 semester hours of upper division undergraduate study. Some, but not all programs require taking at least the verbal and quantitative parts of the Graduate Record Examination (GRE). Students should check with the department for specific admissions requirements.

Specific programs may have higher standards for admission. Having a minimum GPA and/or GRE score does not assure admission to a program. Admission is subject to the approval of program faculty.

Prior to formal admission to a graduate program, students may be approved to enroll in up to 12 semester hours of 5000 or higher level graduate credit as non-degree seeking students, 12 of which, if applicable to the major field of study and approved by an advisor, may be applied to the degree program if the grade received is "B" or higher.

Graduate students will complete at least 30 semester hours of study beyond the bachelor's degree to earn a Master of Science degree in Education. However, specific programs may require more than the minimum number of hours. Students may transfer a maximum 6 approved semester hours taken at another accredited college or university toward a master's degree program.

Master's program students must maintain an overall GPA of 3.0 to graduate. No grades of 'C-' or less received in courses that are part of a master's degree program of study will be accepted toward graduation.

Admission requirements include those required of any graduate student in a M.S. level degree program. In addition, students applying into initial certification programs (e.g., School Counseling Track, School Psychology, Reading/Literacy Education, and Educational Leadership) must pass all sections of the General

Knowledge Test (GKT). Students may substitute scores of 1000 in the GRE for the GKT.

Note: Students who pass the CLAST prior to July 1, 2002 will be waived from taking the new General Knowledge test. Please see your faculty advisor to be certain all requirements are met.

Educational Specialist Degree Programs

Education Specialist degree programs are offered in the following specialties:

- Teaching and Learning
- Educational Leadership
- School Psychology

The programs require a minimum of 36 semester hours of course work at the University beyond the Master's degree. However, specific programs may require more than the minimum number of hours and may include six semester hours of thesis if that option is chosen.

Admission requirements and transfer of credit are the same as for the master's programs. *Note:* Transfer credit policies for the School Psychology are in the process of being revised. Be sure to check with a program advisor.

Doctoral Programs

The School of Education and Human Development offers four Doctor of Education degree programs and two Doctor of Philosophy degree programs. Several of the programs have specialties or subplans. Specific information about each of the programs and its requirements and areas of specialty can be found in the department's specific program descriptions.

Advisement for these programs may be obtained by calling the appropriate department office/ Contact the Department of Teaching and Learning Office at (305) 348-2003. Contact the Department of Educational Policy Studies office at (305) 348-3418. Detailed admission requirements, program descriptions, and graduation requirements may be obtained from doctoral program advisors in specific areas and by examining program descriptions in this catalog.

Doctor of Education Degree Program Specialties

Doctor of Education degree (Ed.D.) programs are offered in the following specialties and tracks:

- Adult Education and Human Resource Development
 - Entrepreneurship
 - Hospitality and Tourism Management
 - International and Intercultural Education
 - Labor Studies
 - Recreation and Sport Management
 - Urban Education
- Educational Leadership and Policy Studies
 - Higher Education

Doctor of Philosophy Degree Program Specialties

A Doctor of Philosophy degree (Ph.D.) is offered with the following specialties:

Teaching and Learning

Curriculum, Cultural, and Social Studies
 Elementary Education and Early Childhood Education
 Kinesiology
 Language, Literacy, Literature, and Culture
 Science, Technology, Engineering, and Mathematics Education (STEM)
 Special Education
 Higher Education

- No grades of “C” or less received in courses that are part of a Master’s program of study will be accepted toward graduation.
- Must be registered the semester in which degree is to be awarded.

All students graduating from programs that lead to initial certifications (e.g., MS in School Counseling, MS in Reading, Ed.S. in School Psychology, MS in Educational Leadership) must pass all sections of the Florida Teacher Certification Exam (FTCE) or Florida Educational Leadership Exam (FELE) Certification Exam prior to graduation. This includes the Professional Education, Subject Area, and the General Knowledge Exams. All MS in Reading/Literacy Education students must have ESOL Endorsement or have taken TSL 5361C prior to graduation. In addition, students must demonstrate successful completion of the Florida Educator Accomplished Practices. Students should submit evidence of passing all sections of the FTCE or FELE exams prior to the end of the final week of in the semester in which they are applying for graduation.

Student Teaching and Fingerprint Requirements

State of Florida Certification requires all applicants to be fingerprinted and checked by state and local law enforcement agencies. Local public and private schools and systems may also require similar security procedures for field placements, student teaching and/or internships. Students with a CHR (criminal history record) should be prepared to promptly provide documentation of adjudication to facilitate review and determination of eligibility for placement in the district or school requested. Details regarding specific district requirements, deadlines and documentation are available in ZEB 130, Office of Clinical Experiences.

For all Teacher Prep and Counseling Field Experiences

Online information and the student teaching application is available at <http://education.fiu.edu>. Online submission deadline for Fall placement is due February 1; application for Spring placement is due June 1.

TaskStream Requirement

All students enrolled in the School of Education and Human Development will be required to subscribe and maintain a TaskStream account throughout their FIU career so that they can generate and maintain a portfolio of their work in the school. Students should discuss with their major professors as to the semesters they will need to have a TaskStream account, as it varies by program.

TaskStream is a web-based electronic portfolio application that allows students to upload and share selected work via the World Wide Web. TaskStream also has tools which allow students to create standards-based lesson plans, evaluation rubrics, and entire instructional units.

Dissertation Registration Requirements

A doctoral student may enroll for dissertation credits after completing all coursework, passing the candidacy examination and being advanced to candidacy. Dissertation credits taken before advancement to candidacy will not be counted toward the degree. Candidates must comply with the continuous enrollment policy which is the registration of not less than 3 hours of dissertation credits in every semester, including summer semester, once he or she begins candidacy. In addition, the candidate must be enrolled for dissertation credits during the semester in which the doctoral degree is awarded.

Graduation Requirements

- All degree requirements must be met
- Cumulative GPA of 3.0 or higher

General Information

The Department of Counseling, Recreation and School Psychology offers programs and courses for students interested in working in a wide range of organizational, urban/ multicultural/ international contexts of education and training. Academic preparation focuses on such areas as research/evaluation, counselor education, school psychology, recreation therapy and recreation and sport management. In addition, the department provides the core undergraduate and graduate curricula in the psychological

foundations of education and research, measurement, and evaluation. The department offers master's degrees in counselor education and recreation and sport management, the specialist degree in school psychology and an undergraduate degree in Recreation and Sport Management. Department faculty are recognized as national/international scholars, exemplify outstanding teaching practices, and are committed to taking a leadership role in the provision of professional services and the process of community engagement. The faculty are worlds ahead in their commitment to serving and maximizing student learning, engaging in the discovery and dissemination of new knowledge, and encouraging a creative and innovative spirit among students. Community engagement plays a pivotal role in the programs and sponsored-research projects implemented through the department, where critical problems confronting our communities are identified and addressed.

The following pages describe the various graduate offerings in the department and the corresponding requirements. It should be noted that stated admission requirements are to be considered minimal. A student who meets these minimal requirements is not automatically assured admission. Program admission requirements are subject to change. It is the responsibility of the student to assure that he/she has met the requirements.

The Department of Counseling, Recreation and School Psychology offers the following degree programs:

Master's Degrees

Counselor Education

School Counseling Track

Clinical Mental Health Counseling Track

Rehabilitation Counseling Track

Recreation and Sport Management

Recreation and Sport Management Track

Recreational Therapy Track

Research Design and Analysis

Educational Specialist Degree

School Psychology

Master of Science in Counselor Education

Applicants are required to submit an on-line application to the Office of Graduate Admissions. All applicants must submit official transcripts, three letters of recommendation (at least one from academic sources and one from work or volunteer experience), an autobiographical statement and a curriculum vitae (resume). After initial review of application materials, candidates will be invited to participate in interview activities on a day coordinated by the Counselor Education program. Candidates are admitted by recommendation of the Program's Graduate Admissions Committee. Minimum criteria for program acceptance include an undergraduate grade point average of 3.0 for the Rehabilitation Counseling track and 3.2 for the Clinical Mental Health and School Counseling tracks. Applicants with a completed Master's degree or higher, who do not meet the undergraduate GPA, will have their graduate GPA considered, as long as it is a 3.2 or higher. The program operates in a full-time cohort model. As such, candidates are admitted to either a Fall and Spring cohort and complete coursework together within their respective cohort. The

application deadline for Fall admissions takes place in March, while the application deadline for Spring admissions takes place in October.

Students may request to transfer six semester hours earned at another institution that is CACREP accredited into the program provided the course work taken does not exceed a three year time period and meet University's requirements. Students must complete this process with their advisor during the first semester in the program. Students are allowed a maximum of six years from the date of initial enrollment to complete program requirements.

Given the unique nature of the field of counseling requiring mastery of cognitive skills and demonstration of relevant and appropriate interpersonal skills, the faculty retains the right to "counsel out" of the program and/or not recommend for internship placement any student whose level of interpersonal competence is considered incompatible with that required for effective functioning as a practitioner in counseling.

All stated admission requirements are to be considered minimal. A student who meets these minimal requirements is not automatically assured admission. Program admission requirements are subject to change. It is the responsibility of the student to assure that he/she has met the requirements. Allow 6-8 weeks for applications to be processed by the Graduate Admissions Office.

Once admitted, each student is responsible for tracking academic progress throughout the program, and a degree can be revoked if academic dishonesty or fraudulence is discovered.

Counselor Education Degree/Tracks

The **Master of Science in Counselor Education Tracks** prepare individuals for professional counseling positions in schools, community mental health settings, and rehabilitation agencies and institutions. These programs emphasize the blending of research and theory with practical applied experience. They also emphasize and reflect the urban and multicultural nature of our community, as well as general trends within specified fields. All programs involve intensive field work with accompanying seminars.

Individuals interested in majoring in Counselor Education can select one of three tracks; School Counseling (60 credits), Clinical Mental Health Counseling (60 credits), and Rehabilitation Counseling (60 credits). The early part of each program is largely generic in nature and is concerned with the development of knowledge and skills in the areas of individual and group counseling, consultation, preventive mental health, education-vocational development, client appraisal, systems intervention, and program organization and evaluation. The latter part of each program is more differentiated towards the practice of school counseling, mental health counseling, or rehabilitation counseling. The prospective student should be advised that a substantial amount of time is spent in field work to meet practicum and internship requirements. The student should plan for this field work to be during the day, rather than during evening hours. Because internship experiences require full time work in the field, students are advised that full time employment is not compatible with successful completion of the program.

The **Master of Science in Counselor Education, School Counseling Track**, is nationally accredited by the

Council for the Accreditation of Counseling and Related Education Programs (CACREP) and is approved by the State of Florida Department of Education, which allows students completing the program to be eligible for certification in Guidance and Counseling. The **Master of Science in Counselor Education, Clinical Mental Health Counseling Track**, is nationally accredited by the Council for the Accreditation of Counseling and Related Education Programs (CACREP) and meets all requirements as outlined by the Florida Department of Medical Quality Assurance for licensure as a Mental Health Counselor. The **Master of Science in Counselor Education, Rehabilitation Counseling Track**, is nationally accredited Council for the Accreditation of Counseling and Related Education Programs (CACREP) and prepares students for certification in Rehabilitation Counseling (CRC).

Counselor Education: School Counseling Track (60 credits):

All students entering the School Counseling program with an undergraduate degree in an area other than education must enroll for courses in general professional education as required by the Florida State Department of Education in order to meet state certification requirements in Florida. In addition, all students must have passed the CLAST, or the General Knowledge Exam, or the Praxis I. After July 1, 2002, the CLAST exam may be waived for admission purposes if the student has a score of 1000 and higher on the GRE.

Counseling Core: (27)

EDP 6277	Human Development Across Lifespan	3
MHS 5340	Educational/Vocational Counseling	3
MHS 5400	Counseling Skills and Techniques	3
MHS 6200	Measurement and Appraisal in Counseling	3
MHS 6428	Cross Cultural Counseling	3
MHS 6511	Group Counseling	3
MHS 6630	Program Evaluation in Counseling & School Psychology	3
MHS 6700	Ethical, Legal, & Professional Issues in Counseling	3
MHS 6802	Personality Theories	3

Specialization: (21)

EDF 6211	Educational Psychology	3
MHS 6450	Substance Abuse Counseling	3
SDS 5420	Counseling Students with Exceptionalities	3
SDS 5460	Crisis Counseling and Interventions	3
SDS 6411	Counseling Children and Adolescents	3
SDS 6700	Organization and Administration of School Counseling	3
SPS 6199	Family-School Consultation and Collaboration	3

Clinical Experience: (12)

SDS 6800	Advanced Practicum in Counseling and Consultation	3
SDS 6820	Supervised Field Experience in Counselor Education	9

Corequisites: Students who do not hold a Florida Teacher's Certificate (or that have not taken these courses as an undergraduate student) must complete additional credits of professional education courses classroom management, general methods of teaching, TESOL, and

reading. One course in each of the following subject areas must be completed prior to the awarding of the school counseling degree.

Courses that satisfy these requirements include:
Classroom Management & General Methods of Teaching:

EDG 5414 Teaching Environments: Instructional Strategies and Classroom Management

TESOL:

TSL 5361C TESOL for Secondary Teachers

Reading:

RED 4325/5339 Subject Related Reading

Students should seek academic advisement from the School Counseling Coordinator on enrollment in professional education courses.

Note: This program of study is subject to change at any time.

Graduation Requirements

Students entering this program on or after Fall 2001 must:

- Have overall GPA of 3.0
- Successfully demonstrate satisfactorily all Florida Educator Accomplished Practices
- Have a passing score on all sections of the Florida Teacher Certification Exam. Students who hold a Florida certificate received prior to July 1, 2002, are required to pass only the subject area exam. For students who do not hold a valid Florida certificate, are required to pass all sections of the test:
 - Professional Education Exam
 - Subject Area Exam in School Counseling
 - General Knowledge Exam

Clinical Experiences

Application for clinical experiences for school counseling must have faculty advisor approval and be submitted to the School Counseling track coordinator by March 15 for a Fall placement, October 15 for a Spring semester placement.

Counselor Education: Clinical Mental Health Counseling Track (60 credits):

Students seeking admission to the track in Clinical Mental Health Counseling with an "out of field major" are required to successfully complete 9 hours of prerequisite psychology courses prior to acceptance. Out of field majors are students who do not hold a Bachelor's degree in Psychology (or a related field). The student should consult with an advisor with reference to these courses. Required prerequisite courses for "out of field" majors applying for admission to the graduate program in Clinical Mental Health Counseling include:

- An introductory course in Psychology (e.g., PSY 2012 Introduction to Psychology),
- A course in either:
 - Educational Psychology (e.g., EDP 3004 Educational Psychology), or
 - Abnormal Psychology (e.g., CLP 4146 Abnormal Psychology),
 - or Personality Theories (e.g., PPE 3003 Personality Theory), and

- A Research/Statistics course (e.g., STA 2122 Research-Statistics).

NOTE: The course numbers of the above prerequisite courses are those used at FIU. All prerequisite courses must be completed with a minimum grade of a "C" in each course and a cumulative grade point average of 3.0 or higher for all courses taken.

Clinical Experiences

Application for clinical experiences for mental health counseling must have faculty advisor approval and be submitted to the Counselor Education Programs Clinical Director by June 15 for a Fall placement, October 1 for a Spring semester placement, or March 1 for a Summer semester placement.

The students in the Clinical Mental Health Counseling track are required to take and pass all sections of the National Board of Certified Counselors, Counseling Preparation Competency Exam (CPCE). The CPCE is a requirement for graduation and is designed to assess counseling students' knowledge of counseling information viewed as important by counselor preparation programs. In the Clinical Mental Health Counseling Track, it is used by the faculty as a capstone experience to be completed by students prior to completing their practicum and before embarking on the internship experience.

RCS 6245	Psychological/Sociological Aspects of Disability	3
RCS 6625	Service Delivery and Case Management In Rehabilitation Counseling	3

Note: This program of study is subject to change at any time.

Clinical Experiences

Application for clinical experiences for rehabilitation counseling must have faculty advisor approval and be submitted to the Counselor Education Programs Clinical Coordinator by June 15 for a Fall placement, October 1 for a Spring semester placement, or March 1 for a Summer semester placement.

Graduation Requirements

The students in the Rehabilitation Counseling track are required to take and pass the Certified Rehabilitation Counseling examination (CRCE). The CRCE is a requirement for graduation and is designed to assess rehabilitation counseling students' knowledge of information viewed as important by rehabilitation counselor preparation programs. This exam provides a national professional credential for the students as well as helps the Counselor Education program meet accreditation program evaluation needs.

Master of Science in Recreation and Sport Management**Degree Program Hours: 33**

The graduate program in Recreation and Sport Management is planned to provide advanced preparation for management and supervisory level positions within a park, recreation, sport management, healthcare or recreational therapy services delivery system. The program includes electives which give flexibility regarding an individual's specific career goals as a future practitioner in parks, recreation, sport management or recreational therapy services. The Recreational Therapy track is designed to prepare direct service and administrative personnel engaged in recreational therapy service delivery.

Admission Requirements

To enter the program in Recreation and Sport Management, a student must have a 3.0 GPA for the last 60 hours of upper-division courses, a statement of career goals and aspirations, and three letters of professional recommendation, possess a bachelor's degree, and have appropriate* undergraduate preparation in parks, recreation, sport management or recreational therapy.

Letters and any other supporting documents are to be sent to FIU Graduate Admissions Office, 11200 SW 8th Street, BT 201 Miami, FL 33199.

*A student who did not complete a Parks, Recreation, Leisure, Sports, or Recreational Therapy oriented internship/field experience during his or her undergraduate degree curriculum will be required to take the following course during the course of study:

LEI 6922	Supervised Field Experience in Parks and Recreation Administration	3-6
----------	--	-----

Degree Program: (33)**Required Core: (12)**

LEI 5510	Program Administration in Parks, Recreation and Sport	3
LEI 5595	Seminar in Parks, Recreation, and Sports Management	3
LEI 5605	Philosophical and Social bases of Parks and Recreation	3
	or	
PET 5256	Sociology of Sport	3
EDF 5481	Foundations of Ed. Research	3

***RT students are not required to take LEI 5595**

Select from one of the following two tracks:**Recreation and Sport Management Track: (12)**

LEI 5907	Directed Study in Parks and Recreation Management	3
PET 5216	Sports Psychology	3
	Advised Electives	6

Recreational Therapy Track: (12)**

LEI 5716	Program Planning in Recreational Therapy	3
LEI 6815	Advanced Recreational Therapy Facilitation Techniques	3
LEI 6726	Trends, Issues, and Managerial Aspects of Recreational Therapy	3
EDF 6472	Research Methods in Education: Introduction to Data Analysis	3

or approved research elective

Options to complete the degree:**Thesis Option: (3-6)**

LEI 6970	Thesis: Therapeutic Recreation	
----------	--------------------------------	--

Non-Thesis Option: (3-6)****Corequisites for the Recreational Therapy Track:**

Individuals not currently certified at the professional level (CTRS) by the National Council for Therapeutic Recreation Certification will be required to take the following content courses for completion of the Therapeutic Recreation graduate curriculum:

Introduction to Recreational Therapy	
Client Assessment, Documentation, and Evaluation in Recreational Therapy	
Abnormal Psychology	
Human Anatomy & Physiology	
Human Growth and Development	

Master of Science in Recreation and Sport Management (Online)

Degree Program Hours: 33

The graduate program in Recreation and Sport Management is planned to provide advanced preparation for management and supervisory level positions within a park, recreation, sport management, healthcare or recreational therapy services delivery system. The program includes electives which give flexibility regarding an individual's specific career goals as a future practitioner in parks, recreation, sport management or recreational therapy services. The Recreational Therapy track is designed to prepare direct service and administrative personnel engaged in recreational therapy service delivery.

Admission Requirements

To enter the program in Recreation and Sport Management, a student must have a 3.0 GPA for the last 60 hours of upper-division courses, career goals and aspirations, and three letters of professional recommendation, possess a bachelor's degree, and have appropriate* undergraduate preparation in parks, recreation, sport management or recreational therapy. Letters and any other supporting documents are to be sent to FIU Graduate Admissions Office, 11200 SW 8th Street, BT 201 Miami, FL 33199.

*A student who did not complete a Parks, Recreation, Leisure, Sports, or Recreational Therapy oriented internship/field experience during his or her undergraduate degree curriculum will be required to take the following course during the course of study:

LEI 6922	Supervised Field Experience in Parks and Recreation Administration	3-6
----------	--	-----

Degree Program: (33)

Required Core: (12)

LEI 5510	Program Administration in Parks, Recreation and Sport	3

	Advised Elective	3

Options to complete the degree:

Thesis Option: (3-6)

LEI 6970	Thesis: Therapeutic Recreation	3-6
	or	

Non-Thesis Option: (3-6)

LEI 5907	Directed Study in Parks and Recreation Management	3-6
Total Hours:		33

**Corequisites for the Recreational Therapy Track:

Individuals not currently certified at the professional level (CTRS) by the National Council for Therapeutic Recreation Certification will be required to take the following content courses for completion of the Therapeutic Recreation graduate curriculum:

LEI 3703	Introduction to Recreational Therapy
LEI 4711	Client Assessment, Documentation, and Evaluation in Recreational Therapy
DEP 2000	Human Growth and Development: Introductory Developmental Psychology
CLP 4146	Abnormal Psychology
ZOO 3731	Human Anatomy
ZOO 3731L	Human Anatomy Demonstration
PCB 3703	Human Physiology I
	or
APK 3110	Exercise Physiology

*Students may transfer in a lower division section of Human Anatomy & Physiology in place of the above listed Anatomy and Physiology courses.

Combined BS/MS in Recreation and Sports Management: Recreational Therapy (RT) Track Degree Pathway

To be considered for admission to the combined Bachelor's/Master's degree pathway, student must have completed 75 credits in the Bachelor's degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the Bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their Bachelor's degree program. Upon conferral of the Bachelor's degree, students will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog may be applied toward both degrees.

Admission Requirements

1. Current enrollment in the Bachelor's degree program in Recreation and Sports Management, Recreational Therapy Track.
2. Completed at least 75 credits of coursework.
3. Current GPA of 3.2 or higher.
4. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 on the IELTS is required.

General Requirements

Recreational Therapy Track: (27)

The FIU Bachelor's degree in Recreation and Sports Management, Recreational Therapy Track, must be awarded before the Master's degree.

Degree Program: (33)

Required Core: (*12)

LEI 5510	Program Administration in Parks, Recreation and Sport	3
LEI 5605	Philosophical and Social Bases of Parks	

	and Recreation Planning	3
	or	
PET 5256	Sociology of Sport	3
EDF 5481	Foundations of Educational Research	3

***RT Combined Degree Pathway & MS students are not required to take LEI 5595**

Required Courses: (18)

LEI 6726	Trends, Issues, and Managerial Aspects of Recreational Therapy	3
LEI 5716	Program Planning in Recreational Therapy	3
LEI 6815	Advanced Recreational Therapy Facilitation Techniques	3
LEI 6725	Administrative Aspects of Therapeutic Recreation	3
EDF 6472	Research Methods in Education: Introduction to Data Analysis	3
	or	
	An approved graduate level research course	3
	Advised Elective	3

Options to complete the degree:

Thesis Option: (3-6)

LEI 6970	Thesis: Therapeutic Recreation	3-6
----------	--------------------------------	-----

Non-Thesis Option: (3-6)

LEI 5907	Directed Study in Parks and Recreation Management	3-6
----------	---	-----

Overlap

Nine (9) of the credits (LEI 6726, LEI 5716, LEI 6815) taken during their senior year will be graduate level courses in RT and will transfer into the master's degree program. An additional 3 graduate level credits can be transferred from the bachelor's to the master's portion of the program for a total of 12 credits applied to both degree programs.

*Although the BS/MS RT track combined degree, students accepted into this program may discontinue their education upon completion of the B.S. degree.

Educational Specialist in School Psychology

The program in School Psychology requires a minimum of 75 semester hours and leads to State of Florida certification as a specialist in School Psychology as well as educational requirements for private practice licensure. This program leads to the Educational Specialist Degree.

The competencies to be demonstrated by the student completing this program are derived from the following: behavioral/educational assessment and planning; counseling and home-school consultation and collaboration with teacher, parents, and school staff; crisis intervention; classroom interventions; liaison referral, program development and evaluation; in-service education; community outreach, and cultural responsiveness and social justice advocacy.

Admission Requirements

For admission into our program, students will be required to:

1. Submit all transcripts,
2. Have a 3.2 grade-point average in their last 60 semester hours of upper division coursework,

3. Have a minimum of 15 semester hours of credits in psychology, including research methods or statistics'
4. Submit a curriculum vitae/resume,
5. Write an autobiographical sketch (see website for instructions),
6. Submit a minimum of three letters of recommendation, preferably from faculty/professors
7. One of the following:
 - a) Passing scores on all sections of the Florida Teacher Certification General Knowledge Test;
 - b) Submit official Graduate Record Examination (GRE) scores,
8. Submit a writing sample if deemed necessary, and
9. Participate in an interview with the admissions committee.

Not all candidates who meet these minimum criteria are accepted into the program.

Degree Hours: (75)

Psychological Foundations: (13)

SPS 7195	Child Psychopathology: Assessment and Intervention in the Schools	3
EDF 6211	Psychological Foundations of Education	3
EDP 6276	Human Development: Childhood and Adolescence	3
SPS 7176	Consultation and Assessment with Culturally and Linguistically Diverse Populations	3
MHS 6930	Special Topics in Counseling and School Psychology	1

Educational Foundations: (6)

EEX 5259	Literacy in Special Education	3
EDG 5414	Teaching Environments: Instructional Strategies and Classroom Management	3

Professional School Psychology: (3)

SPS 6805	Professional Problems in School Psychology	3
----------	--	---

Assessment: (12)

SPS 6190	Academic Assessment and Intervention in the Schools	3
SPS 6191	Psycho-Educational Assessment I: Intellectual	3
SPS 6192	Psycho-Educational Assessment II: Process	3
SPS 6193	Psycho-Educational Assessment III: Behavior	3

Interventions: (15)

SPS 7407	Behavioral Interventions in the Schools	3
MHS 5400	Counseling Skills and Techniques	3
SDS 6411	Counseling Children and Adolescents	3
SDS 5460	Crisis Counseling and Intervention	3
SPS 6199	Family-School Consultation and Collaboration	3

Research and Measurement Methodology: (12)

EDF 5481	Foundations of Educational Research	3
EDF 6472	Introduction to Data Analysis	3
MHS 6910	Directed Study in Counseling and School Psychology	3
EDP 7058	Behavioral Intervention Research and Evaluation in Education	3

Supervised Field Experience: (14)

SPS 6941	Supervised Practicum in School Psychology	4
SPS 6678	Supervised Field Experience in School Psychology (1200 clock hours)	10

Co-requisites for Non-Education Majors:

Students who have an undergraduate degree in an area other than education must complete an additional 6 credits of professional education courses covering subject area reading competencies and TESOL. These courses are required to meet certification requirements in the state of Florida. Students who completed these certification courses at the undergraduate level will not be required to take them. Listed are the recommended courses:

Reading:

RED 5339	Subject Area in Reading
----------	-------------------------

TESOL

TSL 5361C	TESOL for Secondary Teachers
-----------	------------------------------

The student is required to enter an internship in School Psychology under the supervision of a field based school psychologist for a period of 1200 clock hours. This internship is a full-time, eight hour day, five day week involvement and students entering the program should plan for it during the final stage of their training. At least 600 hours of the internship must be in a setting from kindergarten to grade 12 in a public school. Other approved internship experiences may include private state approved educational programs or other appropriate mental health-related programs or settings for the education of children and youth.

For students entering the program with a Master's degree in School Psychology or a related field, the Ed.S. program may accept a maximum of 27 credits, and must be approved by program faculty on an individual basis.

Graduation Requirements:

1. GPA of at least 3.0
2. Successful demonstration of the Florida Educator Accomplished Practices (FEAPs)
3. Passing the Florida Department of Subject Area Examination in School Psychology
4. Passing all sections of the General Knowledge Test
5. Passing the Professional Education section of the Florida Teacher Certification Exam

Master of Science in Research Design and Analysis**Degree Program Hours: 30**

The fully online M.S. in RDA program requires students to complete 30 credit hours that are sequentially structured over the course of 12 months.

Each semester, students enroll in three or four core research methods courses, each covering research design, data collection, data analysis, graphing, and program analysis.

In the last semester, students will gain hands-on research experience through conducting a research practicum to apply their learned knowledge and skills to specific research projects.

In particular, the analysis project is designed for students to organize the analysis outcomes and communicate with researchers and practitioners in other fields with colloquial language. In this way, RDA graduates will generate both research expertise and pragmatic experience which will serve them well as they transition to future employment.

Note: The following course structure allows students to start the degree in the spring and complete the degree within one year. It also uses the "A" and "B" elements of the semesters so students do not have to take all the courses at once—instead students will have courses in condensed time periods throughout the year.

Admission Requirements

The RDA master's program is designed to provide students with strong research design and analysis training for applied research settings. RDA master's degree will be an attractive graduate degree for students with a bachelor in various education, social sciences, and business fields.

RDA applicants are required to submit:

1. An online application to the Office of Graduate Admissions
2. Three letters of recommendation (at least one from an academic source)
3. An autobiographical statement

Candidates are admitted by the Department's Graduate Admission Committee's decision based on GPA scores in a bachelor's program, quality and source of letters of recommendation, and the candidate's career aspirations and goals.

An applicant must have a bachelor's degree from an accredited institution or international students from an institution comparable to or equivalent to U.S. degrees for further study at the graduate level. An applicant must have a GPA of 3.0 or higher for the last 60 hours of upper division of coursework. An applicant with less than a 3.0 GPA may be granted conditional admittance. These applicants must take 12 graduate credits and earn a 3.25 GPA to be considered for full admittance.

Degree Requirements

The RDA master's program is designed to provide students with strong research design and analysis training for applied research settings. RDA master's degree will be an attractive graduate degree for students with a bachelor in various education, social sciences, and business fields.

The RDA fully online master's program consists of 30 credit hours. Core courses make up 18 credit hours, and electives makes up 12 of the 30 credit hours.

Core RDA Courses (18 credits)

EDF 5481	Introduction to Educational Research	3
EDF 6472	Research Methods in Education: Introduction to Data Analysis	3
EDF 6475	Qualitative Foundations of Educational Research	3
EDF 6486	Advanced Analysis in Educational Research	3
EDF 6419	Application of Statistical Model to Education	3
EDF 6XXX	Research Practicum in Education	3

Elective RDA Courses 12 credits – Each cohort will complete four courses as specified by Program Director/Department Chairperson

EDF 5432	Measurement and Evaluation in Education	3
EDF 6425	Single-Subject Research Design in Education	3
EDF 6414	Introduction to Statistical Software in Education	3
EDF 6482	Application of Measurement and Assessment in Educational Research	3

Other elective courses approved by Program Director or Department Chair

Semester 1 (4 courses: 12 credits): Spring

- Spring A: Introduction to Educational Research (EDF5481): Yuxi Qiu
- Spring B: Research Methods in Education (EDF6472): Yuxi Qiu
- Spring A: Single-Subject Research Design in Education (EDF6425): Martha Pelaez
- Spring B: Measurement and Evaluation in Education (EDF5432): Andy Pham

Semester 2 (3 courses: 9 credits): Summer

- Summer A: Advanced Analysis in Educational Research (EDF6486): Mido Chang
- Summer B: (EDF 6482) Application of Measurement and Assessment in Educational Research: Kevin Coughlin
- Summer C: Qualitative Foundations of Educational Research (EDF 6475): Aaron Kuntz

Semester 3 (3 courses: 9 credits): Fall

- Fall A: Application of Statistical Model to Education (EDF6419): Mido Chang
- Fall B: Introduction to Statistical Software in Education (EDF 6414): Yuxi Qui
- Fall: Research Practicum in Education (EDF6XXX): Mido Chang or Aaron Kuntz

Graduation requirements: The students are expected to complete a minimum of 30 credit hours at the graduate-level while achieving a GPA of at a minimum of 3.0 and completion of all courses required by the program. A student must maintain an overall GPA of 3.0. No grade below "C" will be accepted.

General Information

The Department of Educational Policy Studies offers programs and courses for students interested in working in a wide range of organizational, urban/ multicultural/ international contexts of education and training. Academic preparation focuses on such areas as educational leadership, urban education, management, psychology, policy development and analysis, adult education, human resource development, and higher education administration, recreation therapy and recreation and sport management. In addition, the department provides the core undergraduate and graduate curricula in the historical, cultural, social, and philosophical of education. The department is substantially directed towards granting master's and doctoral level degrees. Department faculty are recognized as national/international scholars, exemplify outstanding teaching practices, and are committed to taking a leadership role in the provision of professional services and the process of community engagement. They are worlds ahead in its commitment to serving and maximizing student learning, engaging in the discovery and dissemination of new knowledge, and encouraging a creative and innovative spirit among our students. Community engagement plays a pivotal role in the programs and sponsored-research projects implemented through the department, where critical problems confronting our communities are identified and addressed.

The following pages describe the various graduate offerings in the department and the corresponding requirements. It should be noted that stated admission requirements are to be considered minimal. A student who meets these minimal requirements is not automatically

assured admission. Program admission requirements are subject to change. It is the responsibility of the student to assure that he/she has met the requirements.

The Department of Educational Policy Studies offers the following degree programs:

Master's Degrees

Adult Education and Human Resource Development
Educational Leadership
Higher Education Administration
International and Intercultural Education
Urban Education

Educational Specialist Degree

Educational Leadership

Doctor of Education Degrees

Adult Education and Human Resource Development
Educational Leadership and Policy Studies

Doctor of Philosophy Degrees

Higher Education

Graduate Certificate Programs

Academic Advising
Educational Leadership

The department offers courses for persons who possess a baccalaureate or higher degree from an accredited institution of higher education and who seek State of Florida Certification in Education Leadership.

Master of Science in Adult Education and Human Resource Development

The M.S. in **Adult Education & Human Resource Development (AE & HRD)** program is designed for individuals who choose to serve as program coordinators, instructors, directors of non-profit agencies, community school administrators, and outreach professionals in workplace development, community and technical colleges. The program also prepares individuals to be trainers, organizational development specialists, instructional designers, human performance consultants, and/or researchers in human resource development.

This degree meets the requirements for the state certified program in Adult Education Administration (<http://www.fldoe.org/edcert/rules/6A-4-008.asp>).

This degree also covers the content for the American Society Training and Development "Certified Learning Professional" program.

Admission Requirements

1. A bachelor's degree from an accredited institution and a minimum GPA of 3.0 or better on a 4.0 scale for the last 60 credits of upper-division undergraduate coursework;
2. A statement of intent, 500 words or less, describing (a) the applicant's personal and professional goals and how the degree program will enable the accomplishment of these goals and (b) the ways in which the applicant will be an asset to the program;

3. Complete and current résumé listing educational and professional preparation and employment background; and
4. Two letters of recommendation from individuals who can knowledgeably assess and describe the applicant's leadership potential and ability to perform graduate-level work. At least one reference must be from an academic source such as a former professor. Official test scores and official transcripts are to be sent to FIU Graduate Admissions Office, 11200 SW 8th Street, BT 201 Miami, FL 33199. Letters and other supporting documents are to be uploaded into the on-line application for admission.

Program of Study

The M.S. in AE & HRD program consists of 36 hours, with 33 hours of professional emphasis courses in the AE & HRD program area and 3 hours of research methods.

Required Program: (36 hours minimum)

ADE 5386	Individual and Adult Education	3
ADE 6186	Comprehensive Program Evaluation in AE&HRD	3
ADE 6195	Perspectives on Adults with Disabilities (cross-listed with LBS 5155)	3
ADE 6260	Management of AE&HRD Programs	3
ADE 6360	Adult Teaching Methods	3
ADE 6945	Internship in AE&HRD	3
EDF 5481	Foundations of Educational Research	3
ADE 6476	Computer Based Training	3
ADE 5383	Instructional Analysis and Design	3
ADE 6286	Instructional Development and Implementation	3
ADE 5387	Organizational Learning and Human Resource Development	3
and		
ADE 7571	Consulting as an AE&HRD Process	3
or		
ADE 6180	Organizational/Community Processes	3

Note: The GRE is not a requirement for admission into the M.S. in Adult Education and Human Resource Development Program.

Master of Science in Educational Leadership

The Master of Science (M.S.) degree program in Educational Leadership comprises courses and experiences designed to develop entry level competencies in the practice of educational leadership. The program incorporates coursework that constitutes the "modified Florida program in educational leadership" at Florida International University and addresses the competencies assessed in the Florida Educational Leadership Examination. The program may be used to satisfy part of the requirements of the Florida Department of Education for state certification in Educational Leadership.

Admission Requirements

Admission to the program is based on the following criteria:

1. A baccalaureate degree and a grade point average of at least 3.25 (on 4.0 scale) in the last 60 semester hours of undergraduate coursework;

2. At least three years of successful full-time teaching experience prior to application for admission to the program;
3. Two letters of recommendation from individuals who can comment on the applicant's leadership potential and qualifications for successfully participating in the program;
4. A current resume (curriculum vitae), including education, professional preparation, and employment history;
5. A brief written statement (approximately 250 words) articulating the applicant's professional career goals and aspirations; and
6. Evidence of having satisfied the ESOL requirements of the State of Florida. (Otherwise, a student will be required to satisfy this requirement prior to completion of the program.
7. Letters and any other supporting documents are to be sent to FIU Graduate Admissions Office, 11200 SW 8th Street, BT 201, FL 33199.

Program of Study

The program of study (13 courses/39 semester hours) is as follows:

EDA 6061	Introduction to Educational Leadership	3
EDA 6192	Leadership in Education	3
EDA 6195	Communication in Educational Leadership	3
EDA 6232	School Law	3
EDA 6242	School Finance	3
EDA 6271	Administering Educational Technology	3
EDA 6930	Seminar in Educational Leadership	3
EDF 5481	Foundations of Educational Research	3
EDA 6222	School Personnel Administration	3
EDF 6608	Social, Philosophical and Historical Foundations of Education	3
EDF 6211	Psychological Foundations of Education	3
EDA 6503	Instructional Leadership	3
EDA 6943	Administrative Internship*	3

*Successful completion of this course requires passing all sub-tests of the Florida Educational Leadership Examination (FELE). Evidence of passing the exam must be provided by the student no later than the last week of the semester in which the student plans to graduate.

In addition to the successful completion of the program's coursework, a student will be required to present evidence of having passed all sub-tests of the FELE and satisfied the ESOL requirements that demonstrate mastery of the four ESOL standards required of school administrators.

Master of Science in Higher Education Administration

The Master of Science in Higher Education Administration prepares graduates to serve in a variety of roles at colleges and universities and related institutions. The academic program operates as a partnership with FIU's Student Affairs division and integrates class-work with assistantships and practicums for a total learning experience. As a majority-minority institution, FIU is the prototype for universities of the 21st century. Students in the program will have the opportunity to work and study in

one of the most diverse higher education environments in the nation.

Admission Requirements

1. A baccalaureate degree and an undergraduate GPA of 3.0 in the last 60 credit hours of upper-division undergraduate study;
2. Work experience in higher education such as community college or student affairs areas is preferred but not required;
3. Two (2) letters of recommendation;
4. Personal statement;
5. Resume.
6. Letters and any other supporting documents are to be sent to FIU Graduate Admissions Office, 11200 SW 8th Street, BT 201 Miami, FL 33199.

Note: The GRE is not a requirement for admission into the M.S. in Higher Education Administration program.

Program Requirements: (36 semester hours)

Professional Studies: (9 hrs)

EDF 5481 Foundations of Educational Research
EDH 6045 College Student Development Theory

Choice of:

EDF 6608 Social, Philosophical and Historical Foundations of Education
or

EDF 6636 Intercultural Studies: A Qualitative and Quantitative Analysis

Required Courses: (15 hrs)

EDH 6633 Introduction to Higher Education Administration
EDH 6061 History of Higher Education
EDH 6404 Legal Issues in Higher Education Administration
EDH 6943 Practicum in Higher Education

Choice of:

EDH 6047 College Student Life and Culture
or
EDH 6055 Access and Choice in US Higher Education

Electives: (12 hrs)

Students will select a set of electives to meet their educational and professional interests. Selection of electives can include a concentration in a particular area of higher education as well as provide a breadth of knowledge about the field.

Required Courses

The required courses reflect the range of basic knowledge common to all higher education professionals. Whatever the job function, it is imperative that university professionals know the law, be aware of current issues, be sensitive to the diversity of student culture and understand the core functions of administration.

Electives

Electives are designed to allow students to choose a path of study that reflects their immediate career goals, while maintaining program coherence. There are opportunities for electives at the student's discretion, as long as they are graduate level courses (5000 level or above).

Practicum Experiences

A professional degree in university administration should allow for some guided practical experience. The practicum sections allow students the opportunity to earn credit while gaining valuable hands-on experience in a variety of administrative areas. Practicum sections will include an academic component designed by the Higher Education faculty and the section supervisor.

The graduation requirements include successful completion of the above required program of study.

Master of Science in International and Intercultural Education

The Master of Science degree in International and Intercultural Education (IIE) at FIU is uniquely designed to provide graduate training to students interested in understanding the processes of globalization, the global environment, and the responsibilities of citizenship in an increasingly interdependent world. The program places emphasis on training in cross-cultural communication and exchange, international development, and educational practice in a global context.

Our program includes face-to-face, hybrid, and fully-online courses. These courses provide research and analytical skills to enable students to define, gather, analyze and evaluate data for project management and decision-making. Applied courses are designed to provide the professional competencies for academic research, teaching and administration, and employment in foundations, non-governmental organizations, governmental institutions, businesses and corporations. Our students have worked in several countries and regions such as Spain, Andorra, South Korea, the Caribbean, Africa, Latin America, Germany, and the U.S. in a range of capacities including: K-12 social science teachers, ESL teachers in the U.S. and abroad, international education credential experts, and international education study abroad program directors. Some of our Master's students hold graduate assistantships in the School of Education as well as undertake internships across campus in various departments.

Admission Requirements

To be admitted into the Master's degree program in International and Intercultural Education (IIE), a student must have (a) a bachelor's degree from an accredited U.S. institution or its equivalent for international students, (b) a 3.0 GPA or higher for the last 60 hours of upper-division coursework, (c) three letters of recommendation, and (d) an autobiographical statement. Letters and other supporting documents should be sent to FIU Graduate Admissions Office, 11200 SW 8th Street, BT 201 Miami, FL 33199.

Note: The GRE is not a requirement for admission into the M.S. in International / Intercultural Education program.

Degree Requirements

The Master's program requires the completion of a minimum of 33 semester hours of course work at the graduate level with a 3.0 GPA. A maximum of six semester hours of graduate work may be transferred to the program from other universities. The 33 semester

hours are to be completed in accordance with the program curriculum.

Required Program: (33 minimum)

The IIE program blends together theoretical foundations and methodological perspectives. Graduate students are exposed to the role of the social, political, economic, scientific and cultural sectors in education worldwide. Research and analytical skills are provided to insure student's ability to define, gather, analyze and evaluate data for project management and decision-making. Applied courses are designed to provide the professional competencies for academic research, teaching and administration, and employment in foundations, non-governmental organizations, governmental institutions, businesses and corporations.

Foundations of International and Intercultural Education: (12)

EDF 5481	Foundations of Educational Research	3
EDF 6850	Comprehensive Internationalization: Practices and Applications	3

One course on teaching and learning (3):

ADE 5386	Individual Learning and Adult Education	3
TSL 5245	Developing ESOL Language and Literacy	3
SSE 5381	Developing a Global Perspective	3

One course on the Social and Psychological Foundations of Education (3):

EDF 6608	Social, Philosophical and Historical Foundations of Education	3
EDF 6211	Psychological Foundations of Education	3

International and Intercultural Education Core: (6)

EDF 6852	Educational Development Issues in Context: A Multidisciplinary Perspective	3
EDF 6658	Selected Topics: International Development Education, Current Policy Issues and Problems	3

GeoCultural Area: (3)

The purpose of this requirement is to give the student a foundation in the culture, politics, and history of an area or region. The student will select one course that relates to his/her geo-cultural interest. Any upper level course (5000 level or above) in an area of the world is eligible. Course must be approved by the student's advisor.

Policy: (3)

This course is selected in consultation with the advisor from the School of Education. Possible courses include:

EDH 7401	Higher Education and Public Policy	3
EDA 7288	Politics of Education (must be taken with EDA 7069 Educational Policy)	3
EDG 7692C	Politics of Curriculum	3
EDF 7656	Comparative and International Education Policy	3

Area of Interest: (9 hours)

Students in IIE go into a number of areas for work and study. Primary among these are Internationalization and Intercultural Studies, International and Comparative Education, and Globalization, Development, and Sustainability. The areas of interest courses are designed to allow students to develop their area of concentration. To complete this requirement, students must choose one area of interest and take three courses selected in

consultation with and approved by the advisor. Examples include:

1. Internationalization and Intercultural Studies

EDF 5851	Socio/Cultural Conflict in Educational Change	3
EDF 5880	Intercultural Education: National and International Perspectives	3
EDF 6636	Intercultural Studies: A Qualitative and Quantitative Analysis	3
EDF 6365	Cultural Identities and Conflict	3
EDG 5707	Cross-Cultural Studies in Education	3
RLG 5106	Religions, Latinos/as and Immigration	3

2. International and Comparative Education

EDF 5812	National Educational Systems: A Comparative Analysis	3
EDF 5820	Latin American Education	3
EDF 7656	Comparative and International Education Policy	3
EDF 6906	Directed Study in International Development Education	3
ANG 6303	Comparative Feminisms	3

3. Globalization, Development, and Sustainability

EVR 5320	Environmental Resource Management	3
INR 5036	Politics of Globalization	3
SYD 6236	International Migration and Refugees	3
EDF 7937	Advanced Topics in Social Foundations of Education	3
EDF 6766	Education, the Environment, and Sustainable Futures	3

Master of Science in Urban Education

The Master of Science in Urban Education is designed for educators and other professionals who are interested in addressing issues in urban settings and schools and who want to clarify their understanding of theoretical foundations, engage in critical dialogue, and broaden their expertise in action research. This degree emphasizes a social justice theoretical foundation and draws on the belief that students become reflective professionals by developing an understanding of formal and informal education within diverse sociocultural, linguistic, political, and economic contexts. The curriculum requires candidates to produce an Action Research or community-based research project related to justice-oriented urban education. Students will cultivate knowledge and skills to advocate for children and communities both locally and globally. The Master's program requires the completion of 30 semester hours of course work at the graduate level with a minimum 3.0 GPA. A maximum of six graduate hours may be transferred from another institution, upon approval from an advisor. The program offers instructional and foundational-areas of concentration from which students can select.

Admission Requirements

A decision on admission to the Master's degree in Urban Education is based on consideration of the following student criteria:

1. Have a 3.0 GPA for the last 60 hours of upper-division coursework;
2. Complete an interview with program faculty;
3. Submit an autobiographical statement;

4. Submit a letter of intent describing why this particular degree is of interest, and;
5. Submit three letters of recommendation from individuals (academic and professional sources) who can assess and describe the applicant's qualifications and ability to perform graduate level work.
6. Letters and any other supporting documents are to be sent to FIU Graduate Admissions Office, 11200 SW 8th Street, BT 201 Miami, FL 33199.

Note: The GRE is not a requirement for admission into the M.S. in Urban Education program.

Program of Studies

Urban Education Studies Core: (9)

Required (6):

EDF 6608	Social, Philosophical, and Historical Foundations of Education	3
EDF 6689	Contemporary Issues in Urban Education	3

Choose one of the following (3):

EDF 6211	Psychological Foundations of Education	3
EDG 5707	Cultural/Cross-Cultural Studies in Education	3
EDF 6684	Building a Home School Community Partnerships in a Context of Justice and Civic Engagement	3

Action Research Core: (6)

EDF 5481	Foundations of Educational Research	3
EDF 6487	Action Research for Educators	3

Areas of Concentration: (15)

The Areas of Concentration within the Urban Education degree allow the candidates the opportunity to critically examine and deepen their understanding of related content. These areas are designed to allow students to choose a path of study that reflects their immediate career goals while maintaining program coherence.

TESOL Concentration

This area of concentration develops the skills of educators to work with linguistically and culturally diverse populations.

EDG 5707	Cultural/Cross-Cultural Studies in Education	3
TSL 5142	Curriculum Development in TESOL	3
TSL 5245	Developing ESOL Language and Literacy	3
TSL 5371	Special Methods of TESOL	3
TSL 5938	Principles of ESOL Testing	3

Bilingual Concentration

This area of concentration equips educators with theoretical background and practical skills to work in teaching environments that promote language development in two or more languages.

Required Courses: (9)

FLE 5895	Bilingual Education Teaching Methodologies	3
FLE 6938	Seminar in Second Language Testing	3
EDG 5707	Cultural/Cross-Cultural Studies in Education	3

Electives: (6)

One (1) of the following:

TSL 6348	Task-Based Language Teaching	3
----------	------------------------------	---

TSL 5142	Curriculum Development in TESOL	3
TSL 6925	Special Topics in Second Language Education (Curriculum Development in the Spanish Language Classroom)	3

and

One (1) of the following:

SPN 5736	Spanish as a Heritage Language: Acquisition and Development	3
LIN 5625	Studies in Bilingualism	3

*For those students interested in the Bilingual Graduate Certificate, course modification may be made with advisor approval.

Instruction Concentration

This area of concentration emphasizes the deeper development of pedagogical practices that encourages candidates to advocate for children in urban settings.

Required Courses: (6)

EDG 5325	Analysis of Teaching	3
EDG 5707	Cultural/Cross-Cultural Studies in Education	3
Advisor approved content area or elective courses		9

Community Engagement

This area of concentration allows candidates to explore urban education from a broader theoretical perspective. Candidates can design their program of study in consultation with their advisor.

EDE 5267	Education of the Child in Urban Society	3
EDF 5851	Socio/Cultural Conflict in Education	3
EDF 6850	Comprehensive Internationalization: Practices and Applications	3
EDF 6852	Educational Development Issues in Context: A Multidisciplinary Perspective	3
EDF 6658	Selected Topics in International Development Education: Current Policy Issues and Problems	3
EDF 6689	Contemporary Issues in Urban Education	3
EDG 6627	Seminar: Issues and Trends in Curriculum and Instruction	3
EME 6405	Computers in the Classroom	3

or

Advisor approved courses for this area of concentration

Educational Specialist in Educational Leadership

The Educational Specialist (Ed.S.) degree program in Educational Leadership is intended to provide professional educators with an opportunity to develop competencies in areas of special needs and interests in the field of Educational Administration/Leadership. Consequently, there are few required courses and each student's program is individually planned in consultation with a faculty advisor. The program may be used to satisfy part of the requirements of the Florida Department of Education for state certification in Educational Leadership.

Admission Requirements

Admission to the program is based on the following criteria:

1. A master's degree (or equivalent) and a grade point average of at least 3.25 (on 4.0 scale);

2. At least three years of successful full-time teaching experience prior to application for admission to the program;
3. Two letters of recommendation from individuals who can comment on the applicant's leadership potential and qualifications for successfully participating in the program;
4. A current resume (curriculum vitae), including education, professional preparation, and employment history;
5. A brief written statement (approximately 250 words) articulating the applicant's professional career goals and aspirations; and
6. Evidence of having satisfied the ESOL requirements of the State of Florida. (Otherwise, a student will be required to satisfy this requirement prior to completion of the program.)
7. Letters and any other supporting documents are to be sent to FIU Graduate Admissions Office, 11200 SW 8th Street, BT 201 Miami, FL 33199.

Program of Study

The program of study comprises a minimum of 39 semester hours and is planned in consultation with and approved by a faculty advisor. The structure of the program is as follows:

EDA 6061	Introduction to Educational Leadership	3
EDF 6608	Social, Philosophical and Historical Foundations of Education	3
EDF 6211	Psychological Foundation of Education	3
	Guided electives in Educational Administration/Leadership	24
	Guided electives in Research/Statistics/Measurement and Evaluation	6

In addition to the successful completion of the program's coursework, a student will be required to present evidence of having passed all sub-tests of the FELE and satisfied the ESOL requirements that demonstrate mastery of the ESOL standards required of school administrators.

Doctor of Education Programs

Common Minimum Admission Requirements

The School of Education has common admission requirements for its doctoral programs regardless of the specialty sought. Applicants to the program must submit the following records and documents to the Office of Graduate Admissions:

1. A completed online application for Graduate Admission with appropriate fees.
2. An official copy of the Graduate Record Exam (GRE) scores.
3. Official transcripts of all higher education institutions attended.
4. Three letters of reference attesting to the applicant's ability to succeed in doctoral study.
5. A current resume/vitae.
6. A statement that sets forth the applicant's career goals and relates these goals to the completion of the doctoral program.
7. Letters and any other supporting documents are to be sent to FIU Graduate Admissions Office, 11200 SW 8th Street, BT 201 Miami, FL 33199.

No action will be taken on incomplete files. A file is considered incomplete if any of the above is missing.

The application and all supporting documentation are reviewed by program faculty. The criteria applied in reviewing the applicant's file are noted below. Exceptions to one or more of the stated criteria may be granted provided the applicant can provide compelling reasons and evidence.

1. A grade point average (GPA) of at least 3.0 (on a 4.0 scale) in upper level undergraduate work.
2. A 3.25 GPA in all graduate work attempted.
3. A master's degree from an accredited institution, A bachelor's degree from an accredited institution may be accepted for Admission.
4. Official GRE scores.
5. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

Upon completion of the review of the file the applicant will be interviewed by program and departmental faculty which comprise a Faculty Admissions Committee. Final decisions are made by the Faculty Admissions Committee and the Dean of the College. As admission to programs is competitive, meeting minimum admission requirements does not assure admission into the program. A candidate for admission to the program will be judged not only on the basis of quantitative criteria (listed elsewhere in this catalog) but also in relation to prior experience, especially as it relates to future career goals. Additional information is available from the individual program faculty.

Professional Education Core

EDF 7937	Advanced Topics in the Social Foundations of Education	3
EDP 7057	Educational Psychology: Advanced Applications	3

All doctoral students must enroll in EDF 7937 within their first year of admission.

Research and Statistics Core (9 hours minimum)

A research requirement of nine semester hours, taken in the order listed, is common to all School of Education doctoral programs.

EDF 6472	Research Methods in Education: Introduction to Data Analysis	3
EDF 6486	Advanced Data Analysis in Quantitative Educational Research ¹	3

¹Prerequisite: EDF 5481 and EDF 6472.

And one of the following:

EDF 7403	Quantitative Foundations of Educational Research	3
	or	
EDF 6475	Qualitative Foundations of Educational Research	3

Candidacy Examinations and Advancement to Candidacy

The student must complete all coursework, successfully pass both written and oral candidacy examinations covering course work and also submit copies of a dissertation proposal, which has been approved by the supervisory committee, to the Dean of the College and to the Dean of the University Graduate School.

Program Core (24-36 hours minimum)**Advised Electives****Dissertation: (15 hours minimum)**

The student is responsible for a minimum of 15 semester hours of dissertation credits. The dissertation must be an original contribution to knowledge. The doctoral dissertation is the final component of the series of academic experiences that culminate in the awarding of the Ed.D. degree. A successful dissertation is a demonstration of the candidate's ability to use the tools and methods of basic and/or applied research in the field, to organize the findings, and to report them in a literate, logical, and compelling fashion.

The student is expected to complete the dissertation within five (5) years from the date of advancement to candidacy (i.e. successful completion of all written and oral examinations, and favorable recommendations of the supervisory and guidance committee). A minimum of six credit hours of dissertation is to be undertaken each semester while the dissertation is being prepared. Continuous enrollment in dissertation study is required (including summer semesters).

Adult Education and Human Resource Development (AE/HRD)

The doctoral program in Adult Education and Human Resource Development (AE/HRD) prepares advanced professionals to facilitate individual, organizational, and career development and advancement of adults in the nation and the world. Two cognate options are available within the doctoral program in Adult Education and Human Resource Development. The first option is an open cognate custom designed for the student's research needs. The second option is a directed cognate in one of six areas: (1) International and Intercultural Education, (2) Labor Studies, (3) Urban Education, (4) Entrepreneurship, (5) Hospitality and Tourism Management, and (6) Recreation and Sport Management.

Graduates are equipped to administer, design and facilitate programs for adult clients, employees, volunteers, students, and associates of profit and not-profit organizations. Graduates are professionals who may be engaged in program development and evaluation, planning, policy development and analysis, leadership, instruction and training, counseling and advisement, consultation, and marketing and recruitment activities designed to further the growth and development of adult learners. They may also be engaged in improving organizational functioning through educationally-related intervention strategies or working with other performance improvement consultants. Graduates are competent researchers and scholars with problem solving and investigative skills in evaluation, qualitative, and quantitative methods.

Participants in the Adult Education and Human Resource Development doctoral program and its affiliated cognates come from diverse backgrounds: business and industry; higher education; public and proprietary schools; health and social services agencies; law enforcement and corrections; the military, government, and non-governmental agencies; religious organizations; libraries and museums; and civic and professional associations.

The Doctor of Education degree is conferred on the basis of high scholarship and skill in the creation and

application of knowledge from theory and research findings to practical problems in adult education and/or human resource development. Applications for admission to the doctoral program are invited from individuals who are highly motivated and intellectually capable of meeting the challenges of a rigorous doctoral degree program.

Additional Admission Requirements

In addition to the University's and the School of Education's common minimum admission requirements, applicants must possess the following qualifications:

1. Evidence of commitment to a career in the broad field of adult education and human resource development;
2. Successful professional experience in one or more of the above fields;
3. Potential for leadership in the above fields; and
4. A master's degree.
5. Applicants must arrange individual interviews with each faculty member in the program to discuss the applicant's research interests and the faculty member's research.

Candidates for admission to the programs will be judged not only on the basis of quantitative criteria (e.g., GPA, as listed elsewhere in this catalog) but also in terms of prior experience and future career goals.

Adult Education and Human Resource Development Program of Study

A typical program will require a minimum of 93 semester hours beyond the baccalaureate degree and will involve the categories of courses noted below.

Adult Education and Human Resource Development Program Core: (minimum 18 - 24 hours)

The adult education and human resource development core includes courses in areas such as comprehensive adult education and human resource development planning, program development, instructional design, adult teaching and learning, trends and issues, strategies, and research in the disciplines. For students with a master's in Adult Education or Human Resource Development, the minimum is 18 semester hours. For students whose master's is not in Adult Education or Human Resource Development, the minimum is 24 hours.

ADE 6074	Writing for Publication in Adult Education and Human Resource Development	3
ADE 6186	Comprehensive Program Evaluation in AE/HRD	3
ADE 6360	Adult Teaching Methods	3
ADE 6674	Trends and Issues in AE/HRD	3
ADE 7920	Colloquium in AE/HRD	1-6
ADE 7772	Review of Research in Adult Education and Human Resource Development	3

Will be required only if master's degree is not in Adult Education and Human Resource Development or related filed:

ADE 5386	Individual Learning and Adult Education	3
ADE 5387	Organizational Learning and Human Resource Development	3

Research and Statistics: (minimum 15 hours)

Although some courses are required for all doctoral participants, others are selected with the guidance of the participant's program of studies supervisory committee.

Required Courses

EDF 5481	Foundations of Educational Research (Required only if not taken in Master's program as prerequisite)	3
EDF 6472	Research Methods in Education: Introduction to Data Analysis	3
EDF 6475	Qualitative Foundations of Educational Research	3
EDF 6481	Educational Research Methodology	3
EDF 6486	Advanced Data Analysis in Quantitative Educational Research	3
And either		
EDF 7403C	Data Analysis in Multivariate Educational Research	3
or		
EDF 7476	Advanced Methods of Qualitative Educational Research	3
or		
EDP 7058	Behavioral Intervention Research and Evaluation in Education	3

Cognate: (9 semester hours minimum; 18 recommended)

Electives, in the cognate area, vary according to the participants' background and professional goals and are selected with the guidance of the participants' program of studies supervisory committee.

Two cognate options are available:

1. The first option is an open cognate custom designed by the committee and the student.
2. The second option is a directed cognate in one of six areas: (1) International and Intercultural Education, (2) Labor Studies, (3) Urban Education, (4) Entrepreneurship, (5) Hospitality and Tourism Management, and (6) Recreation and Sport Management.

International and Intercultural Education Program Cognate (recommended 18-24 credit hours)

Courses include areas such as educational systems, comparative methodology, educational development issues, intercultural & cross-cultural education, conflict theory and resolution, planning in education, educational technology transfer, knowledge and development, education organizational behavior, international organizations and NGOs, and social, psychological and political contexts of international education.

Labor Studies Program Cognate (recommended 18-24 credit hours)

Courses include areas such as conflict resolutions, labor movements, workers' rights, workplace diversity, economic development, and employment law.

Urban Education Program Cognate (recommended 18-24 credit hours)

Courses include areas such as urban adult education activities, economic development, workforce development, and equitable educational, living, and workplace conditions special urban populations, family literacy, and immigration.

Entrepreneurship Cognate (recommended 18 credit hours for certificate)

Courses include areas such as product development and innovation, intuition in management, social and non-profit entrepreneurship, and organization in management.

Hospitality and Tourism Management Cognate (recommended 18-24 credit hours)

Courses include areas such as organizational behavior in the hospitality industry, feasibility studies in the hospitality industry, tourism studies, leadership training for team building, and hospitality management.

Recreation and Sport Management Cognate (recommended 18-24 credit hours)

Courses include recreational therapy (RT) topic areas such as problems, issues and trends; philosophical and social foundations; assessment, documentation, and evaluation; program planning; law and liability, leisure services; and related core courses in recreation and sports management.

Prospectus and Dissertation: (15 semester hours minimum)

Participants are responsible for a minimum of 15 semester hours of dissertation credits. The dissertation must be an original contribution to knowledge in an area of adult education or human resource development. Students are expected to complete the dissertation within nine years from their date of admission to the Adult Education and Human Resource Development doctoral program. A minimum of three credit hours of dissertation are to be undertaken each term the dissertation is being prepared. Continuous enrollment in dissertation study is required, including summer terms.

Educational Leadership and Policy Studies

The Doctor of Education (Ed.D.) program in Educational Leadership and Policy Studies is designed for students who wish to pursue leadership roles in educational institutions. The program of studies prepares students for careers as school superintendents, principals, directors and supervisors; administrators in state, federal, and international agencies; professors of Educational Administration or Leadership; and administrators in institutions of higher education.

The curriculum is designed to enable students to become familiar with and utilize effectively both theoretical and technical knowledge. The program of study is multidisciplinary and integrates broad intellectual perspectives into the study and practice of Educational Leadership and Policy Studies.

For students interested in the Higher Education Administration Track in Educational Leadership and Policy Studies, see "Higher Education Administration Track" in this catalog.

Additional Admission Requirements

In addition to the common admission requirements for doctoral programs in the School of Education, an applicant must:

1. Provide evidence of at least three years of successful and appropriate professional experience.
2. Engage in an interview with a committee of program faculty.
3. Receive a positive endorsement of the program faculty.

Because they differ, for admissions requirements for the Higher Education Administration Track in Educational

Leadership and Policy Studies, see "Higher Education Administration Track" in this catalog.

Program of Study

The program requires the completion of a minimum of 75 semester hours of academic work beyond the baccalaureate degree. Program requirements include the following:

Educational Administration and Leadership Core: (12)

EDA 7069	Educational Policy	3
EDA 7103	Theories of Educational Administration	3
EDA 7233	Ethics and Educational Leadership	3
EDA 7288	Politics of Education	3

Cognate or Minor Area (12)

The cognate area requires a minimum of 12 semester hours of course work. The courses should be chosen with regard to coherence and relevance to the anticipated substantive aspect of the dissertation and in consultation with the student's advisor. The cognate may be used as an extension of expertise in the major and courses may be taken at any academic unit at the university.

Professional Education Core: (6)

EDF 7937	Advanced Topics in the Social Foundations of Education	3
EDP 7057	Educational Psychology: Advanced Applications	3

Research and Statistics Core: (12)

EDF 6472	Research Methods in Education: Introduction to Data Analysis	3
EDF 6486	Advanced Data Analysis in Quantitative Educational Research	3
EDF 6475	Qualitative Foundations of Educational Research	3
And one other advisor approved research course		3

Note: Evidence of completion of a graduate-level research course (e.g., EDF 5481) or equivalent at FIU or at another accredited institution is required before starting the Research Core.

Doctoral Dissertation (EDA 7980): 15 hours minimum

The student is responsible for a minimum of 12 semester hours of dissertation credits. All doctoral students must be continuously enrolled in a minimum of three (3) dissertation credits each term following advancement to candidacy until graduation. A candidate for the doctorate in Educational Leadership and Policy Studies is required to prepare and present for faculty approval a doctoral dissertation that demonstrates a capacity for independent thought and for the application of the tools and methods of research to educational issues and problems.

Higher Education Administration Track

Program Description/Goals

Much like the general Doctor of Education in Educational Leadership and Policy Studies, the program culminating in the Doctor of Education in Educational Leadership and Policy Studies - Higher Education Administration Track is designed to provide the opportunity for students to enhance analytical skills for solving problems in educational institutions. The primary difference from the general doctoral degree is that the Higher Education Administration Track is designed to prepare practitioners

specifically in the field of higher education, both nationally and internationally, who will become important leaders in private and public postsecondary institutions and be able to apply evidence-based practices to improve higher-education outcomes.

The Track's program requirements include a minimum of 75 graduate credits. Students must enter the program with a master's degree and can transfer up to 36 graduate-level credits into the Ed.D. program. Thus, students must complete a minimum of 39 credits at the doctoral level at FIU.

Upon successful completion of the Ed.D., we expect each graduate will be able to:

- Promote the improvement of higher education.
- Apply scholarly research for evidence-based practice.
- Provide leadership by applying advanced theoretical and methodological perspectives problems in higher education.

While the program is designed for the working professional, students will be expected to devote significant time to the required coursework and the research necessary to successfully complete an applied dissertation (see "The Applied Dissertation" below). The program is structured in cohort format, and students are expected to finish in three years (see "Program of Study" below).

Admissions Requirements

Admission to the program is only the Fall term. The deadline for an application to be submitted is February 15. Applicants to the program must submit the following records and documents to the Office of Graduate Admissions:

1. A completed online application for Graduate Admission with appropriate fees;
2. An official copy of the Graduate Record Exam (GRE) scores;
3. Official transcripts of all higher education institutions attended;
4. A Master's Degree in Higher Education or related field;
5. Three letters of reference attesting to the applicant's ability to succeed in doctoral study;
6. A current resume/vitae;
7. A statement setting forth the applicant's career goals and relates these goals to the completion of the doctoral program; and
8. A writing sample illustrating academic writing skills (e.g., paper submitted for academic credit; professional report using research);
9. Statement of support from supervisor (if applicant intends on being employed while in the program).

No action will be taken on incomplete files. A file is considered incomplete if any of the above is missing.

Admission into the program will be based on the criteria noted below. Exceptions to one or more of the stated criteria may be granted on the basis of other compelling evidence that the applicant is likely to be successful in this doctoral program.

1. A grade point average (GPA) of at least 3.0 (on a 4.0 scale) in upper level undergraduate credits;
2. A cumulative 3.25 GPA in completed graduate work.
3. There is no minimum requirement for the GRE. However, candidates are advised that low combined scores can result in denial of the application.
4. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.
5. The evidence from the writing sample that the applicant can perform doctoral-level work. • Professional experience (other than a graduate assistantship) in a college or university is highly preferred.
6. A possible interview with the Program faculty.

Members of the program's graduate faculty will constitute the Doctoral Admissions Committee, which will review the application and all supporting documentation. Upon completion of the review of the applicant's file and the interview, the Doctoral Admissions Committee will make recommendations for acceptance or rejection to the University Graduate School.

As admission to programs is competitive, meeting minimum admission requirements does not assure admission into the program. A candidate for admission to the program will be judged not only on the basis of quantitative criteria (e.g., GRE and GPA), but also in relation to prior experience, especially as it relates to future career goals. Additional information is available from the individual program faculty.

The Applied Dissertation

Doctoral students will enter the program as a cohort and engage in a prolonged study of a critical problem or concern in higher education, selected for each cohort by the program's faculty, culminating in an applied dissertation that offers a solution(s) for this problem. This problem will thus become the underlying focus of all coursework and the dissertation research. The program is designed to be completed in three years.

During the first year in the program, students will examine the articulated problem in order to identify underlying causes and associated factors via a variety of courses intended to approach problems from different theoretical and methodological perspectives. Students will also complete their dissertation proposals by the end of the second year. In the third year, students work on their dissertations, which will entail creating solutions to the identified problems. Unlike many dissertations, which have implications for the larger body of literature and scholarship, applied dissertations have implications for the organization(s) dealing with the problem at hand. Although different from a traditional dissertation in its focus, students are nevertheless expected to excel in written and oral skills associated with reviewing scholarly literature, collecting data, and interpreting the results in light of previous studies.

Students will demonstrate mastery of the oral and written skills needed to complete their applied research through a

candidacy exam/dissertation proposal indicating readiness for conducting their studies offering solutions to their problem of practice. Students will then evaluate the effectiveness of this solution in their dissertation. The candidacy exam, proposal, and dissertation will be submitted to, and presented orally before, the student's Dissertation Committee. Typically, we expect that students will complete coursework and research in two years. It is possible that some students may need more than two years to complete their research, in which case they will be required to enroll in at least three credit hours of dissertation until they have successfully defended their applied dissertation.

Program of Study 75 credits

Master in Higher Education or Related Field (36 transferred from M.S.)

Doctoral Seminar (3 credits):

EDH 7666	Doctoral Seminar	3
----------	------------------	---

Educational Administration and Leadership Core (12 credits)

EDA 7069	Educational Policy	3
EDA 7103	Theories of Educational Administration	3
EDA 7233	Ethics and Educational Leadership	3
EDA 7288	Politics of Education	3

Research Core (6 credits)

Advisor Approved

Milestone Courses (3 credits)

EDH 7964	Doctoral Candidacy Exam	1
EDH 7983	Dissertation Proposal Seminar	1
EDH 7985	Dissertation Defense	1

Dissertation (15 credits)

EDH 7980	Ph.D. Dissertation	
----------	--------------------	--

Candidacy Examination and Advancement to Candidacy

To advance to candidacy, the student must select a dissertation committee and submit a draft of his or her proposal to the dissertation committees. The dissertation committee will review the proposal and determine, by majority votes, whether or not to advance the student to candidacy and to the proposal defense. This process constitutes the candidacy exam. To continue in the program, and barring official approval by the University Graduation School of a leave of absence during this process, the student will have 1 year after completion of all non-dissertation coursework to be admitted to candidacy.

If the dissertation committee advances the student to candidacy, the student will enroll in the following term in EDH 7964 and EDH 7983. In those courses, the student will continue to work on their proposal, complete the IRB approval process, if applicable, and successfully defend his or her dissertation proposal. The student will be required to submit all documents and forms related to the advancement to candidacy and dissertation proposal, including the D-2 and D-3, to the University Graduate School at the same time.

The University Graduate School admits students to candidacy. After advancement to candidacy, students must be continuously enrolled in a minimum of 3 dissertation credits (EDH 7980) each term until graduation.

Dissertation Proposal

A student admitted to candidacy must successfully complete and defend his or her proposal for the applied dissertation, which constitutes the research plan for the dissertation. Because the applied dissertation proposal is part of the candidacy exam process, please refer to the section on "Candidacy Examination and Advancement to Candidacy" in this catalog. More information about the dissertation proposal is available from the student's advisor.

Time to Completion

While this program is designed to be completed in 3 years, the University policy permits only 9 years to complete a doctoral program, counting from admission to graduation. Students must have completed all coursework and program requirements within that time, including a successful defense of the dissertation. Coursework applied toward completion of program requirements cannot be more than nine years old at the time of graduation, unless the coursework was transferred from a previously-earned graduate degree.

Graduation Requirements

The following is required for successful graduation from the program:

Successful completion of all course work and candidacy exam; GPA of 3.00 or better; and

Successful completion, defense, and University approval of the applied dissertation.

Doctor of Philosophy Programs

Higher Education

The program culminating in the Doctor of Philosophy in Higher Education is designed to provide the opportunity for students to enhance analytical and research skills for leadership roles in institutions of higher education. Graduates are prepared for academic and administrative positions, as faculty, or as policy analysts in federal, state, or institutional roles. The program is designed to stimulate research related to higher education, particularly in urban settings.

Admission Requirements

Applicants to the program must submit the following records and documents to the Office of Graduate Admissions:

1. A completed online application for Graduate Admission with appropriate fees;
2. Official transcripts of all higher education institutions attended;
3. Three letters of reference attesting to the applicant's ability to succeed in doctoral study;
4. A current résumé/vitae;
5. A statement that sets forth the applicant's research interests and career goals and relates these goals to the completion of the Ph.D. Program in Higher Education; and
6. A writing sample illustrating research skills (such as a thesis, journal article, paper submitted for academic credit; etc.).
7. Letters and any other supporting documents are to be sent to FIU Graduate Admissions Office.

No action will be taken on incomplete files. A file is considered incomplete if any of the above is missing.

The application and all supporting documentation are reviewed by program faculty using the criteria noted below. Exceptions to one or more of the stated criteria may be granted on the basis of other compelling evidence that the applicant is likely to be successful in this doctoral program.

1. A grade point average (GPA) of at least 3.0 (on a 4.0 scale) in upper level undergraduate credits;
2. A cumulative 3.25 GPA for all graduate work attempted.
3. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.
4. The evidence from the writing sample that the applicant can perform doctoral-level work.
5. A possible interview with the Doctoral Admissions Committee.

Members of the program's graduate faculty will constitute the Doctoral Admissions Committee. Upon completion of the review of the applicant's file and the interview, the Doctoral Admissions Committee will make recommendations to the University Graduate School.

As admission to programs is competitive, meeting minimum admission requirements does not assure admission into the program. A candidate for admission to the program will be judged not only on the basis of quantitative criteria but also in relation to prior experience, especially as it relates to future career goals and faculty expertise.

Admission into the doctoral program takes place once a year for entry in the Fall semester. Applicants should prepare all application materials in time for the program faculty and the Office of Graduate Admissions to receive them no later than December 1 for the following year's fall admissions.

Degree Requirements

Number of Credits Required:

A minimum of 75 credits are required for students entering the Ph.D. program without a Master's Degree, 63 credits for students entering the Ph.D. Program with a Master's Degree from an accredited institution in a nonrelated field, or 54 credits for those entering with a Master's Degree in Higher Education or related field from an accredited institution.

Composition of Coursework

Coursework for students entering the Ph.D. Program with a Master's Degree in Higher Education or related field are as follows:

EDH 7666	Doctoral Seminar	3
EDH 7964	Doctoral Candidacy Exam	1
EDH 7983	Dissertation Proposal Seminar	1
EDH 7985	Dissertation Defense	1

Research Methods/Methodology (12 credits minimum)

Higher Education Core (21 credits minimum)

Dissertation (15 credits minimum)

Coursework for students entering the Ph.D. Program with a Master's Degree in a non-related field are as follows:

EDH 7666	Doctoral Seminar	3
EDH 7964	Doctoral Candidacy Exam	1
EDH 7983	Dissertation Proposal Seminar	1
EDH 7985	Dissertation Defense	1

Research Methods/Methodology (12 credits minimum)
Higher Education Core (30 credits minimum)
Dissertation (15 credits minimum)

Coursework for students entering the Ph.D. Program without a Master's Degree are as follows:

EDH 7666	Doctoral Seminar	3
EDH 7964	Doctoral Candidacy Exam	1
EDH 7983	Dissertation Proposal Seminar	1
EDH 7985	Dissertation Defense	1

Research Methods/Methodology (12 credits minimum)
Higher Education Core (42 credits minimum)
Dissertation (15 credits minimum)

Dissertation (15 hours minimum)

All doctoral students must be continuously enrolled in a minimum of three (3) dissertation credits (EDH 7980) each term following advancement to candidacy until graduation.

Dissertation Committee

Prior to defending a proposal, the students must select a dissertation committee, made up of at least 4 faculty members, one of which will be the director (or chair) of the dissertation. The chair/director of the dissertation must have Dissertation Advisor Status. Further information about the dissertation is available from the student's advisor, and the University Graduate School.

Candidacy Examination and Advancement to Candidacy

To advance to candidacy, the student must select a dissertation committee and submit a draft of his or her proposal to the dissertation committees. The dissertation committee will review the proposal and determine, by majority votes, whether or not to advance the student to candidacy and to the proposal defense. This process constitutes the candidacy exam. To continue in the program and barring official approval by the University Graduation School of a leave of absence during this process, the student will have 1 year after completion of all non-dissertation coursework to be admitted to candidacy.

If the dissertation committee advances the student to candidacy, the student will enroll in the following term in EDH 7964 and EDH 7983. In those courses, the student will continue to work on their proposal, complete the IRB approval process, if applicable, and successfully defend his or her dissertation proposal.

The student will be required to submit all documents and forms related to the advancement to candidacy and dissertation proposal, including the **D-2** and **D-3**, to the University Graduate School at the same time.

The University Graduate School admits students to candidacy. After advancement to candidacy, students must be continuously enrolled in a minimum of 3 dissertation credits (EDH 7980) each term until graduation.

Dissertation Proposal

A student admitted to candidacy must successfully complete and defend a proposal for their dissertation, which constitutes the research plan for the dissertation. Because the dissertation proposal is part of the candidacy exam process, please refer to the section on "Candidacy Examination and Advancement to Candidacy" in this catalog. More information about the dissertation proposal is available from the student's advisor.

Master of Science in Higher Education Administration

Doctoral candidates in Higher Education who have not previously earned a master's degree in the field, who have completed 36 credits deemed appropriate by the program faculty (up to 6 credits can be applied from a previously master's degree), and whose D-2 has been approved by the University Graduate School, can receive a Master of Science in Higher Education Administration en route to the PhD.

The Dissertation

The dissertation must be an original contribution to knowledge. The doctoral dissertation is the final component of the series of academic experiences that culminate in the awarding of the Ph.D. degree. A successful dissertation is a demonstration of the candidate's ability to use the tools and methods of basic and/or applied research in the field, to organize the findings, and to report them in a literate, logical, and compelling fashion. In addition to EDH 7980, students must enroll in EDH 7985 in the term in which they will defend their dissertation.

Time to Completion

The time to completion, from admission to graduation, is nine (9) years. Students must have completed all coursework and program requirements within that time, including a successful defense of the dissertation. Coursework applied toward completion of program requirements cannot be more than nine years old at the time of graduation, unless the coursework was transferred from a previously-earned graduate degree.

Graduation Requirements

The following is required for successful graduation from the program:

1. Successful completion of all course work and candidacy exams;
2. GPA of 3.00 or better; and
3. Successful completion, defense, and University approval of the dissertation.

Graduate Certificate in Academic Advising

The graduate certificate program in academic advising is designed for those wishing to enter the field of academic advising or those working in academic advising with a degree in another discipline. The master's degree is typically the entry-level requirements for an advising position at the university level. For those with a graduate degree in another discipline, the certificate can provide a foundation in the theory and practice of advising. For those interested in the field, a certificate can be a

concentration within a master's degree in higher education. The advising certificate consists of 15 hours or required courses and electives. This certificate program is open to non-degree-seeking students only.

Admission Requirements

1. A baccalaureate degree and an undergraduate GPA of 3.0 in the last 60 credit hours of upper-division undergraduate study;
2. Work experience in higher education such as community college or student affairs areas is preferred but not required;
3. Two (2) letters of recommendation;
4. Personal statement;
5. Resume.
6. Letters and any other supporting documents are to be sent to FIU Graduate Admissions Office, 11200 SW 8th Street, BT 201 Miami, FL 33199.
7. Note: The GRE is not a requirement for admission into the Certificate in Academic Advising program.

Program Requirements: (15 semester hours)

In consultation with their advisor, the certificate student will select a set of courses that align with their career goals and professional development needs.

Required Courses

EDH 6045	College Student Development Theory	3
EDH 6041	Foundations of Academic Advising	3

Choose two of the following courses

EDH 6943*	Practicum in Higher Education Administration	3
MHS 5400	Counseling Skills and Techniques	3
MHS 6428 ¹	Cross Cultural Counseling	3
MHS 5340 ¹	Educational-Vocational Counseling	3
EDH 6047	College Student Life and Culture	3

Choose one advisor approved elective

*EDH 6943 Practicum in Higher Education is required if the student is not employed in academic advising or a related field.

¹MHS 5400 is a prerequisite and must be completed prior to enrollment in MHS 6428 and MHS 5340.

Graduate Certificate in Educational Leadership

The Graduate Certificate Program in Educational Leadership is designed for students who have a master's degree in a subject or field of Education other than Educational Administration/Leadership. The coursework constitutes the "modified Florida program in educational leadership" at Florida International University and addresses the competencies assessed in the Florida Educational Leadership Examination. The program may be used to satisfy part of the requirements of the Florida Department of Education for certification in Educational Leadership. This certificate program is open to non-degree-seeking students only.

Admission Requirements

Admission to the program based on the following criteria:

1. A master's degree from an accredited institution;
2. A grade point average of at least 3.25 (on a 4.0 scale) in master's degree work;

3. A minimum combined score of 800 on the verbal and quantitative portions of the Graduate Record Examination (General Test);
4. At least three years of successful teaching experience and a regular Florida teaching certificate; and
5. Evidence of having satisfied the ESOL requirements of the State of Florida. (Otherwise, a student will be required to satisfy this requirement prior to completion of the program.)

Program of Study

The program of study comprises a minimum of 30 semester hours.

EDA 6192	Leadership in Education	3
EDA 6195	Communication in Educational Leadership	3
EDA 6232	School Law	3
EDA 6242	School Finance	3
EDA 6271C	Administering Educational Technology	3
EDA 6503	Instructional Leadership	3
EDA 6222	School Personnel Administration	3
EDA 6943	Administrative Internship	3
EDA 6061	Introduction to Educational Leadership	3
	Advisor-approved elective in Curriculum and Instruction	3

In addition to the successful completion of the program's coursework, a student will be required to present evidence of having passed all sub-tests of the FELE and satisfied the ESOL requirements that demonstrate mastery of the four ESOL standards required of school administrators.

Course Descriptions

Definition of Prefixes

ADE - Adult Education/Human Resource Development; EDA - Education: Educational Leadership; EDF - Education: Foundations; EDH - Education - Higher; EDS - Education: Supervision; F-Fall semester offering; S-Spring semester offering; SS-Summer semester offering; ALT-alternate years; AR-as required.

ADE 5383 Instructional Analysis and Design (3). This course includes analyzing models for instructional analysis and design. Identifying the target population, instructional needs, job and task analysis. Developing learning objectives and related design. Prerequisites: ADE 5386, or ADE 5387, or permission of the instructor. (F)

ADE 5386 Individual Learning and Adult Education (3). Students differentiate learning theories related to teaching adults, contrast characteristics of adults relative to youth, and evaluate the implications of these relative adult learning situations. (F)

ADE 5387 Organizational Learning and Human Resource Development (3). Developing rationale and philosophy of human resource development and understanding theories of workplace and organizational learning. Understanding and applying models of organizational learning. (S)

ADE 6074 Writing for Publication in Adult Education and Human Resource Development (3). Students develop an understanding of the scholarly writing process and produce scholarly work for submission. Topics include topic selection and manuscript organization, preparation, and review. (SS)

ADE 6180 Organizational and Community Processes in AE/HRD (3). This course analyzes human resource and community development programs, the processes and implemental strategies; needs assessment objectives, curricula, recruitment, implementation, and evaluation. (SS)

ADE 6186 Comprehensive Program Evaluation in AE/HRD (3). This course incorporates development of a comprehensive strategy for evaluating complex educational, training, human resource and organizational development programs. (F)

ADE 6195 Perspectives on Adults with Disabilities (3). In this course the student will distinguish the various perspectives of the employment, inclusion, and education of adults with disabilities; analyze forces that inhibit solutions; and develop programs, curricula, materials, recruitment strategies, and evaluation designs.

ADE 6260 Management of AE/HRD Programs (3). This course is composed of analyzing regulations affecting adult education/human resource development, selecting and training staff; selecting organizational patterns; executing managerial responsibilities; administering supportive services; relating training to organization development. (F)

ADE 6286 Instructional Development and Implementation (3). The course includes the following: 1. a systematic approach to developing instructional materials and strategies appropriate to adult and organizational needs and 2. implementation strategies including instructional delivery skills for adult learning. Prerequisite: ADE 5383 or permission of the instructor. (S)

ADE 6360 Adult Teaching Methods (3). Students explore adult teaching philosophy and methods and prepare to teach in a variety of adult learning environments such as higher education, community education, ABE, TESOL and adult literacy. Prerequisites: ADE 5386 or permission of instructor. (S)

ADE 6476 Computer Based Training (3). This is a basic course in computer based instruction and training which includes the application of instructional design to CBT, and proficiency in an authoring software. Prerequisites: ADE 5383 and working knowledge of personal computers are recommended. (S)

ADE 6674 Trends and Issues in AE/HRD (3). This course is comprised of presentation and analysis of state-of-art trends impacting development of human resources in specific organizations including educational agencies/business & industry/public sector and commerce. Prerequisites: ADE 6180 or equivalent. (F/Odd years)

ADE 6906 Directed Study in Adult Education and Human Resource Development (1-3). This is a course of specialized intensive study in areas of interest to the student. Prerequisite: Permission of the instructor. (AR)

ADE 6925 Workshop in Adult Education and Human Resource Department (1-6). The course includes intensive development of selected competencies related to instructional, curricular and/or administrative skills of special interest to students in adult education/human resource development. (AR)

ADE 6930 Seminar in Adult Education and Human Resource Development (1-3). This course consists of intensive study of instructional, curricular, and/or administrative principles and practices for the solution of problems of special interest to students in adult education and human resource development. (AR)

ADE 6935 Special Topics in Adult Education and Human Resource Development (1-3). These are 'Mini-courses' which provide for an examination of special facets of adult education and human resource development. (AR)

ADE 6945 Internship in Adult Education or Human Resource Development (3 or 6). This course is required in both masters programs. Internship in organizations are according to students' needs & interests. Supervisory visits & conferences are periodically conducted. Prerequisites: ADE 6180, ADE 6260, ADE 6286 or permission of the instructor. (F)

ADE 6946 Teaching Practicum (3). With faculty supervision, students deliver instruction to acquire teaching experience in an adult education environment such as higher education, community education, ABE, TESOL or adult literacy. Prerequisites: Permission of the instructor. (AR)

ADE 7475 Comparative Systems, Strategies and Materials for Adult Education/HRD (3). This course is a review and critique of the prevailing inventory of packaged systems on the market. Examination of assumptions and problems surrounding their actual usage in local and national organizations will be addressed. Prerequisites: ADE 6180, ADE 5383. (SS/Odd years)

ADE 7571 Consulting as an Adult Education/HRD Process (3). This course includes examination of use of internal/external consultation in organizations and strategies for making entry diagnoses interventions achieving internalization of processes outcomes. (SS/Even Years)

ADE 7772 Review of Research in Adult Education and Human Resource Development (3). This course is required in the doctoral program and is composed of a review and synthesis of research & development activities in Adult Education/HRD; Examination of resources/practices/designs & justifications; and assessment of the status of research in this field. Prerequisites: At least six doctoral research credit hours. (S)

ADE 7920 Colloquium in AE/HRD (1-6). Lectures & discussions are given by distinguished educators/social scientists/organizational executives/graduate faculty and students. The colloquia present specific topics related to issues/trends/designs and applications.

ADE 7964 Comprehensive Doctoral Examination, Adult Education/HRD (0). This course is the comprehensive doctoral examination in the Adult Education/Human Resource Development. Prerequisite: Permission of Major Professor. (F,S,SS)

ADE 7980 Ed.D. Dissertation (1-12). This course focuses on research for doctoral dissertation for those students approved for candidacy in the Adult Education/Human Resource Development Program. Prerequisites:

Permission of Major Professor and Doctoral Candidacy. (F,S,SS)

ADE 7985 Dissertation Defense (0). This course is the defense of dissertation. Prerequisites: Permission of Major Professor and ADE 7980. (F,S,SS)

EDA 6061 Introduction to Educational Leadership (3). This course is an Introduction to Educational Administration/Leadership as a field of both study and practice. Emphasis is placed on the social, economic, and political context of contemporary educational administration; the organization, governance, and control of American education; and Educational Administration/Leadership as a profession and career. (F,S,SS)

EDA 6192 Leadership in Education (3). This course includes a review, analysis and application of concepts and theories of leadership with emphasis on organizational and environmental factors, group dynamics, and change processes in education. (F,S,SS)

EDA 6195 Communication in Educational Leadership (3). This course consists of analysis of principles, processes, and techniques of effective communication, public relations in educational leadership, and school-community relations. (F,S,SS)

EDA 6222 School Personnel Administration (3). This course provides the knowledge and skills essential for exercising effective leadership in school personnel recruitment, selection, orientation, assessment, and professional development.

EDA 6232 School Law (3). This is a basic course in school law. (F,S,SS)

EDA 6242 School Finance (3). This course describes and analyzes current and emerging school finance plans; the influence of the courts and federal and state legislation on those plans; the Florida Education Finance Plan; and the budget responsibilities of the school principal. (F,S,SS)

EDA 6271C Administering Educational Technology (3). This course is designed to provide pre-service and in-service administrators with the theoretical and practical knowledge necessary for planning and implementing technology in schools. Students will develop a knowledge base of technology applications essential for educational administrators. (F,S,SS)

EDA 6503 Instructional Leadership (3). This course focuses on the role of instructional leadership in schools and the role of school administrators in promoting and sustaining instructional leadership. (F,S,SS)

EDA 6905 Directed Study in Educational Leadership (1-3). This course is for advanced graduate students wishing to engage in independent study under the direction of a faculty member. Prerequisites: Admission to master's program and permission of instructor. (F, S,SS)

EDA 6925 Workshop in Educational Administration and Supervision (1-6). This course offers an opportunity for experienced school personnel to participate in a problem-solving workshop. (AR)

EDA 6928 Special Topics: School Improvement (1-6). This course offers an opportunity for experienced school personnel to participate in a school improvement workshop. (AR)

EDA 6930 Seminar in Educational Leadership (3). This course is a review of selected concepts and competencies in the field of educational leadership. (AR)

EDA 6941 Practicum in Educational Leadership (3). This course consists of application of theory and research to field-based problems in educational administration/leadership. Prerequisite: Permission of the instructor. (AR)

EDA 6943 Administrative Internship (1-6). This course will provide supervised field experience appropriate to the student's interests and professional goals. Prerequisite: Permission of the instructor. (F,S,SS)

EDA 6945 Colloquium in Educational Administration (3). This course examines selected contemporary policy and practice issues in educational administration and supervision. It is repeatable with permission of the instructor. (AR)

EDA 7069 Educational Policy (3). This course is a review, analysis, and synthesis of various concepts and models of educational policy formation and implementation. It is for doctoral students only.

EDA 7103 Theories of Educational Administration (3). This course is an examination of theoretical constructs and models related to the organization and administration of educational institutions. Prerequisite: Admission to doctoral program. Doctoral students only.

EDA 7233 Ethics and Educational Leadership (3). This course is an exploration of ethical concepts and issues in educational administration and leadership that emphasizes the enhancement of personal and professional skills of ethical reasoning and reflection in decision-making situations. (AR)

EDA 7288 Politics of Education (3). This course is an analysis of the political dynamics of educational governance and the political dimension of educational administration. Doctoral students only. (F)

EDA 7905 Directed Study in Educational Administration and Supervision (1-6). This course is for advanced graduate students wishing to engage in independent study under the direction of a faculty member. Prerequisite: Permission of the instructor. (F,S,SS)

EDA 7930 Seminar in Educational Administration and Supervision (3). This course considers critical issues and problems in the administration of educational institutions. (AR)

EDA 7961 Dissertation Research Seminar (3). This course is designed to provide advanced doctoral students with a knowledge and understanding of the process of dissertation research and writing and of the dissertation defense. Prerequisite: Advanced doctoral standing. (AR)

EDA 7964 Comprehensive Doctoral Examination, Educational Administration and Supervision (0). This is the comprehensive doctoral examination in Educational Administration and Supervision. Prerequisite: permission of major professor. (F,S,SS)

EDA 7979 Dissertation Research Seminar (3). This course is designed to provide advanced doctoral students with a knowledge and understanding of the process of (1) dissertation research and writing, and (2) the dissertation defense. Prerequisite: advanced doctoral standing.

EDA 7980 Ed.D. Dissertation (1-12). This course consists of research for doctoral dissertation. Prerequisite: Permission of major professor and doctoral candidacy. (F,S,SS)

EDA 7985 Dissertation Defense (0). This is the defense of doctoral dissertation. Prerequisite: Permission of the major professor and EDA 7980. (F,S,SS)

EDF 5517 History of Education in the Changing Social and Philosophical Context of the American Republic (3). This course is an historical examination of formal education in the changing social and philosophical context of the American republic. Special focus is on school/society relationship. (F,SS)

EDF 5851 Social/Cultural Conflict in Educational Change (3). This course explores radical interpretations of the relationship of education to development in the Third World. Emphasis will be placed on the problem of values conflict and on the use of appropriate educational technologies. (AR)

EDF 5880 Intercultural Education: National and International Perspectives (3). Analysis of concepts and programs of intercultural and international education. Consideration of the role of education in fostering intercultural understanding both nationally and internationally. (F)

EDF 5905 Directed Study in Education (1-3). The student plans and carries out an independent study project under direction. Topics are to directly relate to content of education courses. Independent study may not substitute for regular course offerings. Prerequisites: Written permission of the chairman of the Division and the approval of the instructor. (F,S,SS)

EDF 5942 Multicultural Seminar and Practicum in Urban Education (3). This course includes effective methods of educating immigrant and other minority children. Prerequisite: Current Florida Teaching Certificate. (AR)

EDF 5955 Field Study Abroad (3-6). Development of international and cross-cultural understandings of educational philosophies and systems through planned travel and study abroad. (SS)

EDF 6365 Cultural Identities and Conflict (3). This course provides students with an opportunity to conduct research on the construction of cultural identities. It emphasizes the analysis of the role played by cultural identity symbols in conflict situations.

EDF 6366 Conflict Resolution: Negotiation-Based Perspectives (3). This course introduces students to negotiation-based perspectives on conflict resolution. It provides opportunities to learn problem-solving strategies to move from confrontation to collaboration.

EDF 6367 Interactive Conflict Resolution: A Third-Party Perspective (3). This is an overview of the field of interactive conflict resolution or third-party perspective. It provides opportunities to conduct research and acquire preliminary skill as third-party facilitators.

EDF 6487 Action Research for Educators (3). The first part of a two semester sequence providing the knowledge and skills necessary for conducting research in schools

and classrooms by teachers and administrators; using the results of this research to inform practice. Prerequisite: EDF 5481.

EDF 6602 Social and Philosophical Foundation of Education: An Urban Perspective (3). Conceptualization and development of education by development of social analysis and ethical decision making. Prerequisite: Admission to Focus/Masters program. (AR)

EDF 6608 Social, Philosophical and Historical Foundations of Education (3). This course is required of students seeking a regular Masters degree in Education. It will assist students in examining and explaining the differing social context of schooling, the diverse value orientation represented in formal and informal education and the major historical forces shaping schooling in America. (F,S,SS)

EDF 6621 Economic Principles of Education (3). This course covers the linkages between education and the economy. Higher education, corporate interest, and privatization are examined in light of market forces. Emerging trends in the knowledge economy, labor/skill demand also discussed.

EDF 6636 Intercultural Studies: A Qualitative and Quantitative Analysis (3). This course is a study of interrelationship between race, class, gender, ethnicity, and national origin and their influence in learning. Prerequisite: EDF 5481. (AR)

EDF 6654 Macro- and Micro-Planning in Education (3). This course is designed to study the theoretical and methodological foundations of educational planning in the U.S. and other countries. (F)

EDF 6658 Selected Topics in International Development Education: Current Policy Issues and Problems (3). This course is dedicated to the study of contemporary problems and issues in the fields of educational policy, planning, management, implementation, and research in developing societies. (AR)

EDF 6684 Building Home School Community Partnerships in a Context of Justice and Civic Engagement (3). Students study communities involved in the education of their children, especially marginalized children and families, exploring why and how these communities partner and the implications for teachers.

EDF 6689 Contemporary Issues in Urban Education (3). This course examines the state of urban education and contemporary urban life in America. Prerequisite: Admission to Masters program. (AR)

EDF 6766 Education, the Environment, and Sustainable Futures (3). This course presents an overview of issues in sustainable development, education and the modern school. Efforts will be made to explore the roles that education and culture play in environmental degradation.

EDF 6812 National Educational Systems: A Comparative Analysis (3). Examination of educational structures and guiding educational objectives in a limited number of both developed and developing countries. Analysis of responses of national educational systems to common educational issues. (S)

EDF 6850 International Development Education: Contemporary Planning Models and Techniques (3). This course is designed to explore the relationship between education and the modernization/development process. Special emphasis on historic/contemporary educational planning models and techniques. Prerequisite: EDF 5481. (S)

EDF 6852 Educational Development Issues in Context: A Multidisciplinary Perspective (3). This course is a critical analysis of educational reforms of the past and the present, drawing on social science research and policy issues in the Third World. Prerequisite: EDF 6850. (S)

EDF 6853 Gender and International Education Development (3). This graduate-level participatory seminar explores gender in international education development in the Latin American and Caribbean region. Prerequisite: Graduate standing.

EDF 6906 Directed Study in International Development Education (3). This course is a specialized intensive study in areas of interest to International Development Education majors. Prerequisite: Approval of program advisor and instructor. (F,S,SS)

EDF 6925 Special Topics in Urban Education (1-5). This is an opportunity for school personnel to develop special competencies in teaching in an urban environment. Prerequisite: Permission of the instructor. (AR)

EDF 6940 International and Intercultural Education Practicum (3). Prepares advanced International and Intercultural Education graduate students to complete a credit-earning practicum experience focused on education in the Latin American and Caribbean region. Prerequisite: Graduate Standing

EDF 6941 Practicum in Action Research (3). This course develops the skills of researchers who engage in the process of action research in areas associated with urban education. Prerequisite: EDF 6487. (AR)

EDF 6972 Thesis in International Development Education (3-9). A thesis is required of students in International Development Education which demonstrates the application of their analytical, conceptual, and technical skills to a specific educational development problem. Prerequisite: Final semester standing in the International Development Education Master's degree program. (F,S,SS)

EDF 7493 Transcultural/Transnational Research and Evaluation Methodology (3). This course is an in-depth examination and discussion of the issues, dilemmas, and specific design requirements in conducting transcultural and transnational research and evaluation. Prerequisites: EDF 7492 and EDP 7504.

EDF 7656 International Development Education: Innovative Approaches in Educational Planning (3). Introduction to educational planning approaches which stress decentralization. It focuses on new and innovative perspectives which emphasize strategic aspects of educational planning. (AR)

EDF 7934 Seminar in the Social Foundations of Education (3). This course provides a social and philosophical frame of reference reflecting the society in which education occurs and the resulting implications for

the functioning of schools. Prerequisites: M.S. or equivalent and at least one graduate course in history, philosophy or sociology, or equivalent. (AR)

EDF 7937 Advanced Topics in the Social Foundations of Education (3). This course is an in-depth, advanced exploration of a specific area, issue, or practice in relation to the evolving social, philosophical and historical context of American schooling. Prerequisite: Doctoral students only. (F,S,SS)

EDH 6041 Foundations of Academic Advising (3). This course provides overview of developmental advising theories and current research on academic advising, cultural issues related to advising, and delivery systems for advising.

EDH 6045 College Student Development Theory (3). This course is an overview of the most commonly used theories of student development in higher education including the research on which they are based and their application to practice with diverse student populations, issues, and settings.

EDH 6047 College Student Life and Culture (3). This course examines college students in the US from a socio-cultural perspective. Compares student life across historical contexts, various student types, and current issues related to student development.

EDH 6050C Women and Higher Education (3). This course focuses on the history of women in higher education and provides a gender analysis of current higher education issues.

EDH 6051C Leadership in Higher Education (3). This course consists of an analysis and comparison of leadership theories, followership, leadership and management, ethics of leadership, and power and gender issues in higher education.

EDH 6055 Access and Choice in US Higher Education (3). This course examines who goes to college, how they choose, how they pay. Issues include college choice models, types of institutions, equality of access to college, financial aid, rankings, and affirmative action.

EDH 6061 History of Higher Education (3). This course examines the history of American higher education.

EDH 6066 Contemporary Issues in Higher Education (3). Study of contemporary issues confronting higher education. Emphasis is on the identification, definition, and study of issues and how they might be addressed by educational leaders and policy makers.

EDH 6085 Diversity and Social Justice in Higher Education (3). An introduction to diversity and social justice, exploring racism, sexism, ableism, classism, and other related topics.

EDH 6401 Counseling Skills for Higher Education Professionals (3). An introduction to some of the mental health issues facing college students that can inhibit their learning process and impact their abilities to persist and graduate.

EDH 6404 Legal Issues in Higher Education Administration (3). This course offers a survey of legal issues of interest to practitioners in the field of higher education, including student rights, employment rights, due process, free speech, tort liability.

EDH 6633 Introduction to Higher Education Administration (3). This course is an overview of higher education administration through a review of its history, theoretical foundations, functional areas, administrative structures, and current and future issues.

EDH 6634 Organization and Administration of Student Affairs (3). This course is an exploration of organizational and administrative issues in Student Affairs including relationship to other executive areas, interrelationship of units, research, leadership and case studies.

EDH 6637 Crisis Management in Higher Education (3). This course studies the theories and practical approaches to managing crises in institutions of higher education. Students learn how institutions plan for crises and respond to crises effectively.

EDH 6905 Directed Study in Higher Education (1-6). Specialized intensive study in higher education and/or community college is in areas of interest to the student and is subject to approval of program advisor. Prerequisite: Permission of the instructor.

EDH 6925 Special Topics in Higher Education (1-3). This course is an intensive development of selected competencies related to staff development and/or administrative skills of special interest to students in higher education.

EDH 6935 Special Topics in Higher Education (3). This course provides for the examination of a particular academic topic of interest to students in higher education.

EDH 6943 Practicum in Higher Education Administration (3-6). Supervised practice in Higher Education offices/agencies to gain understanding of office/agency functions and role(s) of employees. Prerequisites: Fully admitted and completion of one semester.

EDH 6970 Master's Thesis (1-3). An individually supervised research project demonstrating the application of analytical, conceptual and technical skill to a specific higher education problem.

EDH 7040 Advanced Seminar on the College Student (3). This seminar provides a critical understanding of the research on the college student by examining the demographic, psychological, sociological, and interpretive literature.

EDH 7052 Student and Support Services (3). This is a comprehensive introduction and overview of student affairs in higher education including history, evaluation and growth, philosophical underpinnings, educational significance, administrative aspects and understanding of individual student service areas.

EDH 7053 Higher Education: Community College (3). This course examines the structure of the community college including: curriculum; administration and legal aspects; the community college concept; technical and career programs and current issues and problems.

EDH 7058 International Comparative Higher Education (3). The course provides a broad survey of international comparative higher education, including a cross-cultural perspective on historical and contemporary issues related to the structure and governance of higher education systems in various world regions and individual countries.

EDH 7065 Philosophy of Higher Education (3). This doctoral seminar examines philosophical positions in higher education.

EDH 7209 Interpretive Inquiry in Higher Education (3). Examines methods of inquiry in higher education including narrative, life history, phenomenology, hermeneutics, critical, feminist, and poststructural inquiry.

EDH 7225 Higher Education: Developmental Programs (3). This course examines the spectrum of developmental programs in higher education. Special attention is given to program structure, academic support systems and curricula designed to increase student achievement.

EDH 7307 Higher Education: Instructional Methods (3). This course will develop knowledge of and skill in the use of higher education instructional methods, such as lecture, discussion, demonstration, TV instruction, and computer assisted instruction.

EDH 7308 Higher Education: Occupational Programs (3). This is a core course in the doctoral program in higher education: Instruction. It is designed to help students develop an in-depth knowledge of occupational programs in higher education and the students it serves. Prerequisite: Graduate standing.

EDH 7401C Higher Education and Public Policy (3). This course examines the general topic of the relationship between the federal government and higher education is developed. Major attention is given to developments since WWII.

EDH 7402C State Policy and Higher Education (3). The general topic of this course is the relationship developed between the state government and higher education. Major attention is given to developments since WWII.

EDH 7405 Advanced Seminar on Law and Higher Education (3). This course offers students advanced study, research and writing on legal issues, including governance, faculty, and regulation by all levels of governments. Prerequisite: EDH 6404 (or equivalent).

EDH 7505 Higher Education: Finance (3). This is an intermediate course in Higher Education. Presents the economic and financial issues of Higher Education providing base for administrators and practitioners.

EDH 7635 Administration of Higher Education (3). Analysis of colleges and universities as social organizations with special emphasis on issues of administration, organization, and governance in higher education.

EDH 7666 Doctoral Seminar (3). This course offers doctoral students understanding of doctoral study, including skills necessary for successfully completing dissertation. Admission into doctoral program in Higher Education necessary. Prerequisite: Admission into the doctoral program in Higher Education.

EDH 7931 Seminar on Class, Gender, and Race in Higher Education (3). Examines historical and contemporary interrelationships of hegemony, domination, and power undergirding sociocultural viewpoints, institutional forces, and policy discourses in higher education.

EDH 7937 Special Research Topics in Higher Education Administration (3). This doctoral seminar is devoted to the in-depth treatment of selected theories and research topics in the field of higher education.

EDH 7939 Critical Texts in Higher Education (3). Thematic seminar devoted to the in-depth reading of key texts defining the field of higher education. Theme changes every term and may be taken more than once.

EDH 7964 Doctoral Candidacy Examination (1).
Prerequisite: Permission of Major Professor.

EDH 7980 Ph.D. Dissertation (1-12). This course consists of research for doctoral dissertation.
Prerequisites: Permission of Major Professor and Doctoral Candidacy. Course may be repeated as needed.

EDH 7983 Doctoral Proposal Seminar (1). This course is a defense of the dissertation proposal. Instructor consent required. Prerequisite: Major Professor Approval.

EDH 7985 Dissertation Defense (1). This course is the defense of dissertation.

EDS 6050 Supervision and Staff Development (3). This course consists of the study of competencies in supervision and staff development.

Lynn Yribarren, Assistant Teaching Professor, Literacy Education

Mara Zapata, Clinical Assistant Professor, Science Education

General Information

The Department of Teaching and Learning offers graduate degrees leading toward the Master of Science, Education Specialist, Doctor of Education degrees, and Doctor of Philosophy degrees.

The department is committed to the generation and application of knowledge through research and service to the community.

Master of Science Programs

Curriculum and Instruction

Specializations in:

- Curriculum Development
- Elementary Education
- English Education
- Modern Language Education
- Learning Technologies
- Mathematics Education
- Physical Education
- Science Education
- Social Studies Education
- Special Education

Early Childhood Education

Foreign Language Education

- TESOL Track
- Teaching in Challenging Contexts (TiCC)

Kinesiology and Exercise Science

Reading/Literacy Education (K-12)

Special Education

Educational Specialist Program

Teaching and Learning

Specializations in:

- Curriculum, Cultural and Social Studies
- Elementary Education and Early Childhood Education
- Kinesiology
- Language, Literacy, Literature, and Culture
- Science, Technology, Engineering, and Mathematics Education (STEM)
- Special Education

Doctor of Philosophy in Teaching and Learning

Specializations in:

- Curriculum, Cultural, and Social Studies
- Elementary Education and Early Childhood Education
- Kinesiology
- Language, Literacy, Literature, and Culture
- Science, Technology, Engineering, and Mathematics Education (STEM)
- Special Education

Graduate Certificate Programs

Grades K-5 Mathematics Teaching
Grades 6-12 Mathematics Teaching
Professional Spanish/English Bilingual Education
TESOL

All stated admission requirements are to be considered minimum. A student who meets these minimum requirements is not automatically assured admission.

Advanced Master of Science Degree Programs

Applicants for admission to advanced Master's programs in Education must hold or qualify for teacher certification in the appropriate area. Early Childhood Education applicants must hold or qualify for certification or equivalent in elementary, special or early childhood education (including practical teaching experience requirement). All applicants must also satisfy Board of Education admission requirements: a Bachelor's Degree or pass State of Florida Certification Exams, a GPA of 3.0 or higher for the last 60 hours of upper division coursework. Some programs require 3 letters of recommendation, an autobiography, and GRE scores. Applicants admitted with a pending GRE score must submit test score within one semester to be fully admitted or become a candidate for graduation.

NOTE: Several MS programs have different admissions requirements. Review specific degree requirements in this catalog and consult with Program Director for further information.

Master of Science in Curriculum and Instruction

The Master of Science in Curriculum and Instruction program requires 36 semester hours beyond the bachelors degree. Up to 6 semester hours of graduate credit may be transferred into the masters program. The Master of Science in Curriculum and Instruction program includes five required components:

1. Curriculum and Instruction Core (9 semester hours)
2. Curriculum and Instruction Elective (3 semester hours)
3. Research Core (6 semester hours)
4. Content Specializations (18 semester hours)

*The MSCI Program is a non- initial teacher preparation program and does not lead to teaching certification.

Admission Requirements

Applicants for admission into the Master of Science in Curriculum and Instruction program must meet the

minimum University Graduate School admission criteria. Admission to the masters program will be based on the following criteria:

1. A bachelor's degree Education or an appropriate area from an accredited institution.
2. Applicants with a non-Education degree must demonstrate teaching experience.
3. A GPA of 3.0 in the last 60 semester hours of upper division undergraduate study.
4. Two (2) letters of recommendation to support the application. Letters and any other supporting documents are to be sent to Graduate Admissions Office at Florida International University, PO Box 659004, Miami, Florida, 33265 to complete the application for admissions.
5. A statement of personal philosophy/professional goals consistent with the objectives of the master's program.
6. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the IBT TOEFL or 6.5 overall on the IELTS is required. (Exceptions: Students who completed an undergraduate or graduate program from a U.S. institution or accredited higher education institution in other English-speaking countries).

Transfer of Credit

Students may be allowed to apply up to six semester hours of course work taken at accredited institutions to the masters program requirements with the following stipulations:

1. The student received a grade of 3.0 or better on a 4.0 scale.
2. The course was relevant, as judged by the Admissions Committee.
3. The course is listed on an official transcript received by the Graduate Admissions Office.
4. The course will be no older than 6 years at the time of graduation with a master's degree.
5. The course(s) meets all University requirements.

Admission Procedures

In order to begin the masters program, a student must be accepted into the University Graduate School and the program in Curriculum and Instruction. Admission procedures are as follows:

1. Complete the online graduate admission application available at <https://admissions.fiu.edu/how-to-apply/graduate-applicant/index.html>. Official transcripts of all prior college work must be sent to the Graduate Admissions Office at Florida International University, PO Box 659004, Miami, Florida, 33265 to complete the application for admissions. Omission of any one of these items will delay the processing of the application.
2. Two letters of recommendation must be sent. Letters are to be from those who have knowledge of the applicant's prior professional experience (e.g. a supervisor) or of the applicant's ability to perform graduate work (e.g., a professor) and should attest to the applicant's intellectual ability, motivation, maturity, and potential. Letters and any other supporting

documents are to be sent to Graduate Admissions Office at Florida International University, PO Box 659004, Miami, Florida, 33265 to complete the application for admissions.

3. Once the University application procedures are completed, the Graduate Admissions Office forwards the applicant's materials to the Department of Teaching and Learning. The file is then forwarded to the program faculty for review. On the basis of its review, the program faculty will (1) recommend admission, (2) withhold a decision and request additional information from the applicant, or (3) deny admission.
4. Admission to the program is determined by the program faculty on the basis of its evaluation of the applicant's academic and professional credentials.
5. Meeting the minimum admission requirements does not guarantee admission into the program.

Program of Study

Curriculum and Instruction Core: (9 semester hours)

EDG 6250	Curriculum Development	3
EDG 6627	Seminar: Trends and Issues in Curriculum and Instruction	3

Special Methods of Teaching

Choose one of the following:

EDE 5267	Education of the Child in Urban Society (Required for Elementary, Special Education, and Curriculum Development Specializations)	3
EME 6405	Computers in the Classrooms	3
FLE 6336	Methods of Teaching Modern Language	3
LAE 6339	Teaching English in the Secondary School	3
MAE 6336	Teaching Mathematics in the Secondary School	3
PET 5716	Analysis and Observation of Teaching in Phys. Ed.	3
SCE 6366	Teaching Science in the Secondary School	3
SSE 6633	Teaching Social Studies in the Secondary School	3
TSL 6350	Troublesome English: Grammar for ESOL Teachers	3

Curriculum and Instruction Elective (3 semester hours)

Advisor approved elective in Curriculum and Instruction	3
---	---

Research Core: (6 semester hours)

EDF 5481	Foundations of Educational Research	3
EDF 6487	Action Research for Educators	3

Content Specialization (18 semester hours)

Choose from one of the following specializations:

1. Curriculum Development: The MSCI in Curriculum Development track seeks to familiarize graduate students with the knowledge and skills to design, deliver, and assess lessons/units and programs. The MSCI Curriculum Development track will expand students' knowledge in curriculum design theories and frameworks, identifying learning and teaching needs, understanding of current issues impacting our classrooms, and promoting teaching and learning research-based practices. This program is designed to benefit educators and/or administrators.

2. Elementary Education: The MSCI Elementary Education track seeks to expand teachers' knowledge base and enhance teaching methodologies in the K-6 setting.
3. English Education: The MSCI English Education track allows teachers and future teachers to gain knowledge of a more varied English content; implement curriculum theories and pedagogical concepts; and to write for different audiences and purposes which includes conducting research about students, teachers, and the English Language Arts (ELA) profession.
4. Learning Technologies: The MSCI Learning Technologies track seeks to teach teachers how to use technologies to facilitate teaching and learning. Teachers will also learn to create digital artifacts that they can use in their classrooms and how to teach programming and computational thinking to their K-12 students.
5. Mathematics Education: The MSCI Mathematics Education track is designed for current and future K-16 teachers of mathematics, (non-teacher certification track). This track focuses on building the understanding needed to teach mathematics effectively and on developing mathematics content knowledge for teaching. The MSCI in Mathematics Education supports continuous growth and development of K-16 teachers as reflective practitioners for teaching mathematics. Additionally, this track helps K-16 teachers develop knowledge and skills appropriate for mentoring, collaborating with other teachers, and providing professional development for continuous growth in teaching mathematics.
6. Modern Language Education: The MSCI Modern Language track is designed as a second inquiry into language education. It is particularly designed for professionals who have already completed basic academic inquiry into language and linguistics, foreign language instruction, assessment, and cross-cultural study. This track is designed to extend these inquiries with particular emphasis.
7. Science Education: The MSCI Science Education track is suitable for current K-12 teachers and other educators interested in science education. The track seeks to further develop individuals' knowledge of curriculum, theory, and practices related to teaching science.
8. Social Studies Education: The MSCI Social Studies Education track is designed for individuals that teach in the fields of Social Studies (e.g., History, Geography, the Humanities and Social Sciences) at the middle or secondary levels. In addition to the core education courses, students will take content specific areas including interdisciplinary studies across the university. Individuals may also gain the content knowledge applicable to teaching dual enrollment courses in these content areas.
9. Special Education: The MSCI Special Education track provides students the opportunity to learn about special education practices to enhance their classroom teaching experience. As part of the overall degree program, students take a variety of practical special education courses.
10. Physical Education: The MSCI Physical Education track seeks to advance the professional repertoire of

students who presently hold entry-level undergraduate degrees and certifications in the areas of teaching, coaching and other related areas. This program is aligned with the advanced professional standards outlined by the National Association for Sport and Physical Education (NASPE). The courses and activities of this track augment the teaching and coaching practices of practitioners' while improving their capacity to conduct and disseminate best-practice research and, improve professional partnerships locally, nationally, and globally.

Content Specializations

1. Elementary Education (18 semester hours)

Select 4 graduate courses (with Advisor approval) from the following areas in the School of Education and Human Development (no more than 6 semester hours from any one area):

- Art Education
- Early Childhood Education
- Mathematics Education
- Reading
- TESOL
- Science Education
- Social Studies Education
- Special Education

Select 2 graduate courses (with Advisor approval) from the following areas in the College of Arts, Sciences and Education:

- Linguistics
- Psychology
- Sociology

2. English Education (18 semester hours)

Select (with Advisor approval) 6 graduate level courses in English/English Education.

3. Learning Technologies (18 semester hours)

EME 6408	Microcomputers as Teaching Tools	3
EME 5602	Multimedia in the Classroom	3
EME 6412	Educational Courseware Evaluation and Development	3
IDC 5013	Computer Science Education for Middle School Teachers	3
IDC 5014	Computer Science Education for High School Teachers	3
EME 6905	Directed Study: Computer Education	3

4. Mathematics Education (18 semester hours)

Select (with Advisor approval) 6 graduate level courses in Mathematics/Mathematics Education.

5. Modern Language Education (18 semester hours)

Grammar/Composition/Syntax (Specialize in language when possible)	3	
Culture/Civilization (Specialize in culture of target language when possible)	3	
Linguistics (Specialize in language when possible; course in phonology or phonetics preferred)	3	
Literature (in the target language)	3	
Applied Linguistics	3	
TSL 5245	Developing Language and Literacy	3
TSL 6908	Field Component	3
or		
FLE 6925	Special Topics in Second Language Education	3

6. Science Education (18 semester hours)

Select (with Advisor approval) 6 graduate level courses in the Sciences/Science Education.

7. Social Studies Education (18 semester hours)

Select (with Advisor approval) 6 graduate level courses in the Social Sciences/Social Studies Education or Area Studies: African-New World Studies, Asian Studies, Latin American and Caribbean Studies, European Studies. Students are encouraged to take courses with a global/international perspective.

8. Physical Education (18 semester hours)

PET 5216	Sport and Exercise Psychology	3
PET 5052	Motor Learning for Sport Perf.	3
PET 5256	Sociology of Sport	3
PET 5426	Curriculum in Physical Education	3
or		
PET 5436	Physical Education Curriculum: K-8	3
PET 5948	Practicum in Kinesiology	3
PET 6597	Research in Kinesiology	3

9. Special Education (18 semester hours)

EEX 5075	Teaching Students with Disabilities in Inclusive Settings*	3
EEX 5068	Instructional Practices ESE I	3
EEX 5608	Behavioral Approaches to Classroom Learning Management	3
EEX 5766	Instructional and Assistive Technology in Special Education	3
EEX 6225	Assessment of Students with Exceptionalities	3
EEX 6106	Acquisition of Speech and Language Skills	3

*If students have already taken EEX 3070 at the undergraduate level, then they will instead take EEX 6051 Education of Students with Exceptionalities.

10. Curriculum Development (18 semester hours)

EDG 5417	Fundamentals of Learning	3
EDE 6205	Curriculum Design in Childhood Education	3
ESE 6215	Secondary School Curriculum	3
EDG 6286	Curriculum Evaluation	3
EDG 6920	Colloquium in Curriculum and Instruction	3
EDG 7692	Politics of Curriculum	3

Master of Science in Early Childhood Education

Degree Program Hours: (30)

The Master of Science degree in Early Childhood Education provides graduate training in the understanding and teaching of children from birth to eight. The program provides students with a foundation in curriculum and instruction and specialization in learning and development during early childhood.

Admissions Requirements

Applicants must meet the minimum University Graduate School admissions requirements. Specific requirements for admissions into the M.S. degree in Early Childhood Education are as follows:

1. A Bachelor's Degree from an accredited institution in education, psychology, human development, or

related field with a 3.0 GPA on a 4.0 scale in the last 60 hours of undergraduate work.

2. Two (2) letters of recommendation to support the applicant. Letters and any other supporting documents are to be sent to Graduate Admissions Office at Florida International University, PO Box 659004, Miami, Florida, 33265 to complete the application for admissions.
3. A statement of intent describing the applicant's personal and professional goals in relation to (a) how the program will help the applicant reach these goals and (b) how the applicant's goals are consistent with the program's mission.
4. A current resume/curriculum vitae that includes, at a minimum, educational history (with relevant courses listed), employment background, and relevant/related experiences.

Program Requirements

The M.S. in Early Childhood Education program requires all students to take 12 hours of foundation courses in curriculum and instruction and in methods/statistics. Students take an additional 15 hours within early childhood education/development, and 3 hours of education-related electives.

A. General Courses: (12 hours)

1. Foundations (9 hours)

EDF 6211	Psychological Foundations of Education	3
EEC 6261	Education Programs for Younger Children	3

Choose one (1) course in social, philosophical, and/or historical foundations of education, such as EDF 6608 or equivalent special topic (EEC 5926) course.

2. Research Methods & Data Analysis (3 hours)

EDF 5481	Foundations Educational Research	3
----------	----------------------------------	---

B. Early Childhood Education/Development (15 hours)

1. Required Courses (9 hours)

EEC 6678	Research in Early Childhood Education	3
EEC 6705	Typical and Atypical Child Development	3
EEC 6277	Thinking and Learning in the 21st Century	3

2. Early Education Elective Courses (6 hours)

Select two (2) advisor-approved electives in Early Childhood Education, such as

EEC 6932	Seminar in Early Childhood Education	3
LAE 5415	Children's Literature	3
MAE 6305	Instruction in Early Childhood Mathematics	3
SCE 6306	Instruction in Early Childhood Science	3
RED 6305	Instruction in Early Childhood Reading	3

C. Elective Course OR Thesis (3 hours)

Select one (1) advisor approved elective in education, psychology, human development, or related field. Students may opt to complete a thesis instead of taking an elective course.

Graduation Requirements

Students must meet all Department, College, Graduate School, and University graduation requirements. No grades of "C-" or less received in courses that are part of a

masters program of study will be accepted toward graduation.

Master of Science in Foreign Language Education

The Master of Science in Foreign Language is designed to provide specialized training and content knowledge for teachers of all levels of foreign language, K through 12, adult education, and community college education.

Degree Program Hours: (33)

Admission Requirements

To be admitted into the Master's degree program, a student must:

1. Hold a bachelor's degree from an accredited university or college;
2. Have a 'B' (3.0) average or higher in all junior and senior year course work for the bachelor's degree;
3. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.
4. Two (2) letters of recommendation to support the applicant.
5. A statement of intent describing the applicant's personal and professional goals in relation to (a) how the program will help the applicant reach these goals and (b) how the applicant's goals are consistent with the program's mission.
6. A current resume/curriculum vitae that includes, at a minimum, educational history (with relevant courses listed), employment background, and relevant/related experiences.

Prerequisites

One course in general linguistics or the successful completion of LIN 3010 or LIN 3013.

Professional Education: (9)

EDF 5481	Foundations of Educational Research	3
EDF 6211	Psychological Foundations of Education	3
EDF 6608	Social, Philosophical, and Historical Foundations of Education	3

Program Courses: (6)

FLE 6336	Methods of Teaching Modern Language	3
FLE 6938	Seminar in Second Language Testing	3

Teaching Field: Modern Language (15)

Grammar/Composition/Syntax (Specialize in target language when possible)	3
Culture/Civilization (Specialize in culture of target language when possible)	3
Linguistics (Specialize in target language when possible)	3
Literature in the target language	3
Applied Linguistics	3

Field Component: (3)

FLE 5908	Directed Study Foreign Language Education	1-3
	or	
FLE 6925	Special Topics in Second Language Education	3

Graduation Requirements: Students must meet all Department, College, Graduate School, and University graduation requirements. Students must have a 3.0 GPA to graduate from the program. No grades of "C-" or less received in courses that are part of a master's program of study will be accepted toward graduation.

Thesis Option: Students may opt to extend the MS program (3 to 6 additional thesis credit hours) by request.

Master of Science in Foreign Language Education: TESOL Track

The Master of Science in Foreign Language: TESOL Track is designed to provide specialized training and content knowledge for teachers of all levels of foreign language, K through 12, adult education, and community college education. Student who are state certified teachers may include the five courses required for the Add-on ESOL Endorsement as part of the Master's program.

Degree Program Hours: (36)

Admission Requirements

To be admitted into the Master's degree program, a student must:

1. Hold a bachelor's degree from an accredited university or college;
2. Have a 'B' (3.0) average or higher in all junior and senior year course work for the bachelor's degree;
3. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.
4. Two (2) letters of recommendation to support the applicant.
5. A statement of intent describing the applicant's personal and professional goals in relation to (a) how the program will help the applicant reach these goals and (b) how the applicant's goals are consistent with the program's mission.
6. A current resume/curriculum vitae that includes, at a minimum, educational history (with relevant courses listed), employment background, and relevant/related experiences.

Degree Requirements

The Master of Science degree consists of 36 semester hours. A maximum of six semester hours may be transferred into the program from outside the University, subject to the approval of the major advisor. A maximum of six semester hours of graduate level courses taken as an undergraduate may be included in the program provided they have not been used to satisfy degree requirements for an undergraduate program.

Prerequisites

Introduction to Linguistics is the prerequisite for the Linguistics courses in the program. It may be satisfied with LIN 3010, LIN 3013, or LIN 5018.

Professional Education: (9)

EDF 5481	Foundations of Educational Research	3
EDF 6608	Social, Philosophical, and Historical Foundations of Education	3

EDF 6211 Psychological Foundations of Education 3

Program Courses: (18)

TSL 5245	Developing ESOL Language and Literacy	3
TSL 5371	Special Methods of TESOL	3
TSL 5938	Principles of ESOL Testing	3
TSL 6908	Field Component	3
LIN 5211	Applied Phonetics	3
LIN 5501	English Syntax	3

Electives: (9)

Students will choose nine semester hours according to their needs, with the approval of the advisor. To meet state ESOL requirements, certified teachers (K-12) need to include in their electives the following courses:

TSL 5142	Curriculum Development in English as a Second Language	3
EDG 5707	Cultural and Cross-Cultural Studies	3

Graduation Requirements

To receive the Master of Science degree in TESOL, the student must complete the required 36 semester hours of course work with a minimum 'B' or 3.0 grade point average and no grades of "C-" or less received in courses that are part of a master's program of study will be accepted toward graduation.

Master of Science in Foreign Language Education: TiCC Track

The Master of Science in Foreign Language TiCC Track is designed to provide specialized training and content knowledge for teachers of second or additional languages, from primary to tertiary stages of education, in challenging domestic and international contexts.

Degree Program Hours: (30)

Admission Requirements

To be admitted into the Master's degree program, a student must:

1. Hold a bachelor's degree from an accredited university or college;
2. Have a 'B' (3.0) average or higher in all junior and senior year course work for the bachelor's degree;
3. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.
4. Two (2) letters of recommendation to support the applicant.
5. A statement of intent describing the applicant's personal and professional goals in relation to (a) how the program will help the applicant reach these goals and (b) how the applicant's goals are consistent with the program's mission.
6. A current resume/curriculum vitae that includes, at a minimum, educational history (with relevant courses listed), employment background, and relevant/related experiences.

Degree Requirements

The Master of Science degree consists of 30 semester hours. A maximum of six semester hours may be transferred into the program from outside the University, subject to the approval of the major advisor. A maximum

of six semester hours of graduate level courses taken as an undergraduate may be included in the program provided, they have not been used to satisfy degree requirements for an undergraduate program.

Program Courses

FLE 6336	Methods of Teaching Modern Language	3
FLE 6938	Seminar in Second Language Testing	3
TSL 5245	Developing ESOL Language and Literacy	3
TSL 6908	Field Component	
TSL 5142	Curriculum Development	3
TSL 6350	Troublesome English	3
EDG 5707	Cross-cultural Studies	3
TSL 5086	Bilingualism and Multilingualism in Language Education	3
FLE 6376	Teaching in Challenging and Remote Circumstances	3
TSL 5253	Love and Language	3

Graduation Requirements

To receive the Master of Science degree in Foreign Language Education, the student must complete the required 30 semester hours of course work with a minimum 'B' or 3.0 grade point average. Furthermore, no more than 2 grades of C or C+ and no grades of "C-" or less received

Master of Science in Kinesiology and Exercise Science

This degree prepares graduates to pursue the fields of exercise science, movement behavior, coaching elite athletes in team and individual sports, strength and conditioning, and health and wellness. This degree does not provide teacher certification for the degree recipients. Examples of potential student clientele would include all international and domestic college graduates with bachelor's degrees in sports science, education, sport industry, the social sciences, and other areas.

Admission Requirements

Students must hold a bachelor's degree from an accredited university and have a 3.0 GPA for the last 60 hours of upper-division coursework, and include a personal statement addressing career goals and aspirations and three letters of professional recommendation accompanying the application. The published university requirements for admission into the master's degree programs must be met. Students who do not have an undergraduate major in a movement science related area are responsible for meeting the prerequisites for any course listed in the program's curriculum, which are listed below. Advisors must approve pre-requisite course competency substitutions.

APK 3110	Exercise Physiology	3
HUN 2201	Principles of Nutrition	3
PEP 4102	Applied Concepts of Fitness and Health	3
PET 3310	Kinesiology	3
PET 3325/ 3325L	Kinetic Anatomy	4
PET 4622	Athletic Injuries	3

Degree Requirement: (33)

A program advisor must be consulted regarding completion of degree requirements.

EDF 5481	Foundations of Ed. Research	3
PET 5216	Sport and Exercise Psychology	3
PET 5256	Sociology of Sport	3
APK 5111	Advanced Exercise Physiology	3
PET 6944	Supervised Field Experience	3
PET 6597	Research in Kinesiology	3
PET 5206	Youth Sports	3
PET 5368	Exercise, Diet and Weight Management	3
PET 5693	Exercise Testing and Prescription of Special Populations	3

Electives: (6)

Please consult with an advisor for appropriate courses.

Master of Science in Reading/Literacy Education

The Master of Science in Reading/Literacy Education develops competencies in diagnosis and remediation, teaching of reading K to 12, and administration and supervision of remedial, corrective, developmental, and content area reading programs. The graduate is competent to take leadership in improving reading instruction and preventing reading failure in schools or clinics.

Requirements for admission to the Master's program in Reading/Literacy Education are a Bachelor's Degree in Education and possess or be eligible for State of Florida professional teaching certificate, pass State of Florida Certification exams, and a 3.0 GPA or higher for the last 60 hours of upper-division coursework.

This master's track is designed to meet the needs of students interested in reading assessment and instruction. This track leads to state certification.

Degree Program Hours: (36)

Required sequence of courses:

RED 6314	Theory and Instruction in Literacy	3
LAE 6319	Integrated Language Arts	3
LAE 5415	Children's Literature	3
EDF 6211	Psychological Foundations of Education	3
RED 6336	Content Area Reading	3
EDF 5481	Foundations of Educational Research	3
RED 6546	Diagnosis of Reading Difficulties	3
RED 6515	Programs of Remediation in Reading	3
RED 6747	Research in Reading	3
RED 6540	Reading Assessment	3
RED 6805	Practicum in Reading	3
RED 6247	Organization and Supervision in Reading	3

Entry to Program

Students are encouraged to meet all admission requirements prior to beginning the program; however, students may take a maximum of twelve (12) semester hours of course work applicable to the program prior to admission. Only courses with a grade of "B" or better taken prior to admission can be included.

Graduation Requirements

Students must have a 3.0 GPA to graduate from the program. No grades of "C-" or less received in courses that are part of a Master's program of study will be accepted toward graduation. All candidates must pass all

sections of the Florida Teacher Certification Exam (FTCE), which includes the General Knowledge (GK), Professional Education and the Reading Subject Area Exams. All MS in Reading/Literacy Education students must have ESOL Endorsement or have taken TSL 5361C prior to graduation. Also, students must demonstrate successful completion of the Florida Educator Accomplished Practices. Students must submit evidence of passing all sections of the FTCE exam prior to the end of the final week of the semester in which they are applying for graduation.

Thesis Option: Students may opt to extend the MS program (6 additional thesis credit hours) by request.

Master of Science Degree in Special Education

The major competencies in the Master's Degree program in Special Education are an extension and refinement of those developed by the student in the undergraduate special education curriculum.

Program applicants are required to submit an on-line application to the Office of Graduate Admissions, three letters of recommendation (at least one from academic sources and one from work or volunteer experience), and an autobiographical statement. Candidates are admitted by action of the Department's Graduate Admissions Committee. Criteria for program acceptance include undergraduate grade point average of 3.0 or higher for the last 60 hours of upper division coursework, work and volunteer experience, quality and source of letters of recommendation, and the candidate's career aspirations and goals. Applicants with less than a 3.0 GPA may be granted conditional admittance. These applicants must take 12 graduate credits and earn a 3.25 GPA to be considered for full admittance. Applicants who do not hold a valid Florida Teaching Certificate must complete all requirements for certification in addition to degree requirements. There are some variations in entrance requirements for in-field vs. out-of-field majors. See specifics under each description that follows. Letters and any other supporting documents are to be sent to Graduate Admissions Office at Florida International University, PO Box 659004, Miami, Florida, 33265 to complete the application for admissions.

In-Field Majors

The following master's program of study is for the student who holds Florida certification in the field of special education. To qualify for admission to the program, students must have the following:

1. An undergraduate GPA of 3.0 or higher in the last 60 credit hours of undergraduate study.
2. A valid Florida teaching certificate in special education. If the applicant does not hold a valid Florida teaching certificate, all certification requirements must be met.
3. Three letters of recommendation with at least one from an academic source and one from work or volunteer experiences.
4. A well written autobiographical statement.

Degree Program Hours: (36)

Required Core For All Students: (24)

EDF 5481	Foundations of Educational Research	3
EEX 6848	Seminar in Special Education: Issues and Trends	3
EEX 6535	Seminar in Special Education: Supervision and Leadership	3
EEX 6912	Advanced Theory and Research in Special Education	3
EEX 6765	Instructional Technology	3
EEX 6228	Integration of Assessment, Curriculum and Instruction	3
EEX 6796	Culturally and Linguistically Diverse Exceptional Learners	3
EEX 6756	Working with Families of Students with Disabilities through Collaborative Approaches	3

Area of Concentration: (12)

Area of concentration may be selected from an endorsement such as Autism or Early Childhood Special Education, or other areas as planned and approved by student and advisor.

*EEX 6912 is a prerequisite for EEX 6228

Master of Science Degree in Special Education: Autism Endorsement Specialization – Fully Online

The online Master of Science in Special Education is completed in one year and consists of six accelerated eight-week terms. Students enroll in 4 courses (12 credits) each semester and complete two courses each 8-week term in the semester. A total of 36 credit hours (12 courses) is necessary to complete the program. The area of specialization for this degree is Autism Endorsement.

Degree Program Hours: (36)

Required Core Courses: (24)

EEX 6912	Advanced Theory and Research in Special Education	3
EEX 6796	Culturally and Linguistically Diverse Exceptional Learners	3
EDF 5481	Foundations of Educational Research	3
EEX 6765	Instructional Technology	3

EEX 5767	Assistive and Instructional Technology and Alternate/Augmentative Systems for Students with Autism	3
EEX 5619	Behavioral Management and Positive Behavioral Supports for Students with Autism Spectrum Disorders	3
EEX 5095	Nature and Needs of Students with Autism Spectrum Disorders	3

Educational Specialist in Teaching and Learning

Degree Program Hours: (60)

The Educational Specialist Degree (Ed.S.) in Teaching and Learning is offered for teachers and other professional educators who are seeking an advanced graduate degree. The program introduces professional educators to the theoretical basis of curriculum and instruction and provides opportunities for students to connect theory with practice. The following areas of specialization are offered: Curriculum, Cultural and Social Studies; Elementary Education and Early Childhood Education; Kinesiology; Language, Literacy, Literature, and Culture; Science, Technology, Engineering, and Mathematics (STEM) Education; and Special Education. The program requires a minimum of 36 semester hours beyond the masters or 60 semester hours past the bachelors.

Admission Requirements

Minimum admissions requirements for the Ed.S Program in Teaching and Learning are as follows:

1. A Bachelor's Degree from an accredited institution in an appropriate area with a 3.0 GPA on a 4.0 scale on the last 60 hours of undergraduate work or a 3.25 GPA in a completed Master's Degree from an accredited program.
2. Official GRE scores.
3. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.
4. Three letters of recommendation addressing the applicant's academic abilities. Letters and any other supporting documents are to be sent to Graduate Admissions Office at Florida International University, PO Box 659004, Miami, Florida, 33265 to complete the application for admissions.
5. A letter of intent.
6. An admissions interview by the Teaching and Learning Admissions Committee.

The Teaching and Learning Admissions Committee will review, interview, and make admissions recommendation for each applicant. The GPA and GRE scores stated above are minimum requirements. Meeting the minimum requirements does not guarantee admission.

The Ed.S Degree requires 60 semester hours beyond the bachelor's degree. Students with a master's degree directly related to the area of concentration must complete a minimum of 36 semester hours at FIU beyond their master's degree.

A maximum of 24 credits from a completed master's degree in Teaching and Learning or related field from an accredited institution may be applied toward the Ed.S. with advisor's approval.

The Ed.S. program of study includes three required components (to include a maximum of 24 credits from a completed master's degree):

1. Teaching and Learning Core (9 semester hours)
2. Research Inquiry and Analysis (12 semester hours)
3. Major Area of Specialization (39 semester hours)

The Teaching and Learning Core includes a coherent sequence of courses and experiences required of all students.

Teaching and Learning Core: (9 semester hours)

EDG 7923C	Doctoral Seminar in Curriculum Studies	3
EDG 7362	Instruction: Theory and Research	3
EDG 7692	Theory, Organization, and Policy in Teaching and Learning	3

2. Research Inquiry and Analysis: (12 semester hours)

(Select **at least 12** semester hours with approval of Major Professor/Committee on appropriate course selection)

At least 12 semester hours of advanced coursework to include at least one quantitative and one qualitative methods course related to the comprehensive exam component on research.

3. Major Area of Specialization: (No less than 39 semester hours)

(Select **at least 39** semester hours with approval of Major Professor/Committee on appropriate course selection). All courses must be at the 5000 level or higher.

Ph.D. Program in Teaching and Learning

The Department of Teaching and Learning offers the Ph.D. program in Teaching and Learning with concentration in Curriculum, Cultural and Social Studies; Elementary Education and Early Childhood Education; Kinesiology; Language, Literacy, and Culture; Science, Technology, Engineering, and Mathematics (STEM) Education; and Special Education. The program is offered to prospective students who will become scholars engaged in studies within broad historical, social, political, economic, linguistic, and intellectual contexts in the country and abroad. The program seeks to produce research scholars who are well-equipped for empirical and systematic examinations of educational theories, strategies, principles, and practices related to the content and organization of teaching and learning and to the process and outcome of instruction. The Ph.D. program in Teaching and Learning enables highly select students of demonstrated ability, industry, and motivation to serve as apprentices to mentors who are established scholars in their fields of study. Under the supervision of a faculty mentor, the students engage in a period of extensive study and investigation that culminates in the demonstrations of expertise, creativity and originality by means of independent research.

Admission Requirements

Minimum admissions requirements for the Ph.D. Program in Teaching and Learning are as follows:

1. A Bachelor's Degree from an accredited institution in an appropriate area with a 3.0 GPA on a 4.0 scale on the last 60 hours of undergraduate work or a 3.25

- GPA in a completed Master's Degree from an accredited program.
- Official GRE scores.
 - International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.
 - Three letters of recommendation addressing the applicant's academic abilities. Letters and any other supporting documents are to be sent to Graduate Admissions Office at Florida International University, PO Box 659004, Miami, Florida, 33265 to complete the application for admissions.
 - A letter of intent.
 - An admissions interview by the Teaching and Learning Admissions Committee.

The Teaching and Learning Admissions Committee will review, interview, and make admissions recommendation for each applicant. The GPA and GRE scores stated above are minimum requirements. Meeting the minimum requirements does not guarantee admission.

The Ph.D. Degree requires 75 semester hours beyond the bachelor's degree. Students with a master's degree directly related to the area of concentration must complete a minimum of 51 semester hours at FIU beyond their master's degree; this includes 15 hours of Dissertation credits, directed by a qualified graduate faculty dissertation chair in the appropriate area of: Curriculum, Cultural, and Social Studies; Elementary Education and Early Childhood Education; Kinesiology; Language, Literature, Literacy, and Culture, Science, Technology, Engineering, and Mathematics (STEM) Education; or Special Education.

A maximum of 24 credits from a completed Master's degree in Teaching and Learning or related field from an accredited institution may be applied toward the Ph.D. with advisor's approval.

The Ph.D. program of study includes four required components:

- Teaching and Learning Core (9 semester hours)
- Research Inquiry and Analysis (12 semester hours)
- Major Area of Specialization (39 semester hours)
- Independent Research and Dissertation (15 semester hours minimum)

1. The Teaching and Learning Core includes a coherent sequence of courses and experiences required of all students.

Teaching and Learning Core: (9 semester hours)

EDG 7923C	Doctoral Seminar in Curriculum Studies	3
EDG 7362	Instruction: Theory and Research	3
EDG 7692	Theory, Organization, and Policy in Teaching and Learning	3

2. Research Inquiry and Analysis: (12 semester hours)

(Select at least 12 semester hours with approval of Major Professor/Committee on appropriate course selection)

At least 12 semester hours of advanced coursework to include at least one quantitative and one qualitative methods course related to dissertation and the comprehensive exam component on research.

3. Major Area of Specialization: (39 semester hours)

(Select at least 39 semester hours with approval of Major Professor/Committee on appropriate course selection.) All courses must be at the 5000 or higher level.

- Curriculum, Cultural, and Social Studies
- Early Childhood Education and Elementary Education
- Kinesiology
- Language, Literature, Literacy, and Culture
- Science, Technology, Engineering, and Mathematics (STEM) Education
- Special Education

4. Independent Research and Dissertation: (15 Semester Hours)

The dissertation will demonstrate the student's ability to conduct research of substantial rigor and contribute to advancing the knowledge base and scholarship in an area within the field of Teaching and Learning

EDG 7980 Doctoral Dissertation 24

Candidacy Examination and Admission to Candidacy

To be admitted to candidacy, a student must complete all coursework. The student must also successfully pass the candidacy examinations covering course work approved by the Program of Study Committee. Candidates then submit copies of a dissertation proposal, which has been approved by the research committee, to the Dean of the School of Education and Human Development and to the Dean of the University Graduate School.

Add-on Endorsement in ESOL

Individuals who currently hold or are working toward teacher certification in Elementary, English, Foreign Language Education, or Special Education, may be eligible to receive the Add-on Endorsement in ESOL by completing the following set of courses:

Required Courses

EDG 5707	Cultural and Cross-Cultural Studies	3
TSL 5142	Curriculum Development in ESOL	3
TSL 5245	Developing ESOL Language and Literacy	3
TSL 5371	Special Methods of TESOL	3
TSL 5938	Principles of ESOL Testing	3

Students enrolled in the Ph.D. program may receive an Ed.S. degree in Teaching and Learning en route to their Ph.D. Doctoral students who have advanced to candidacy, are currently enrolled, in good academic standing, and have completed all requirements for the specialist degree can be recommended for the specialist degree with prior departmental approval. If students enter without a master's degree and have completed 36 credit hours within their area of concentration, those students can be recommended for the master's degree with prior departmental approval.

Graduate Certificate Program in Grades K-5 Mathematics Teaching

The K-5 Mathematics Teaching Certificate Program enables teachers to extend their competence in teaching mathematics in elementary school. It will enhance their understanding of mathematics content, problem solving

and reasoning and their knowledge of ways of teaching mathematics to students from diverse and minority backgrounds. Completion of the certificate will better prepare individuals for teaching in elementary schools that have departmentalization by subjects in elementary grades. Entrance requirements are Bachelor's degree and a 3.0 GPA in the last two years of college work. This certificate program is open to non-degree-seeking students only.

Required Courses

MAE 5348	Numbers and Operations for Teaching in Grades K-5	3
MAE 6357	Elements of Algebra and Data Analysis for Teaching in Grades K-5	3
MAE 6358	Elements of Geometry and Measurement for Teaching in Grades K-5	3
MAE 6318	Instruction in Elementary Mathematics	3
MAE 5945	Practicum: Mathematics Education	3

With the approval of the Graduate Program Director, up to 12 graduate credits taken in the graduate certificate may be transferred into a master's degree program. If a certificate student is admitted to a master's degree program before the student has completed more than 12 graduate credits, all the credits earned in a graduate certificate program may be used toward fulfilling the requirements of the master's degree program.

Graduate Certificate Program in Grades 6-12 Mathematics Teaching

The 6-12 Mathematics Teaching Certificate Program enables teachers to extend their competence in teaching 6-12 grade mathematics. It will deepen their understanding of mathematics content, problem solving and reasoning and their knowledge of ways of teaching mathematics to 6-12 grade students from diverse and minority backgrounds. Completion of the certificate will better prepare individuals for teaching mathematics in secondary schools. Entrance requirements are Bachelor's degree and a 3.0 GPA in the last two years of college work.

Required Courses

MAE 5382	Number Systems, Rational Numbers, and Operations for Teaching in Secondary School	3
MAE 6337	Algebra, Statistics and Probability for Teaching in Secondary School	3
MAE 6381	Proportional Reasoning, Geometry and Measurement for Teaching in Secondary School	3
MAE 6336	Teaching Mathematics in the Secondary School	3
MAE 5945	Practicum: Mathematics Education	3

With the approval of the Graduate Program Director, up to 12 graduate credits taken in the graduate certificate may be transferred into a graduate degree program (e.g., MS, EdS, EdD or PhD). If a certificate student is admitted to a graduate degree program before the student has completed more than 12 graduate credits, with permission of their program director, all the credits earned in a graduate certificate program may be used toward fulfilling the requirements of the graduate degree program.

Professional Graduate Certificate in Spanish/English Bilingual Education

Entrance requirements are Bachelor's degree and a 3.0 GPA in the 60 credit hours of upper-division coursework or graduate coursework. This certificate program is open to non-degree-seeking students only.

Required Courses (15 credits)

Core Courses (9 credits)

FLE 5895	Bilingual Education Teaching Methodologies	3
FLE 6938	Seminar in Second Language Testing	3
EDG 5707	Cultural and Cross-Cultural Studies	3

Teaching Methods (3 credits)

Students choose one of the following courses:

FLE 6336	Methods of Teaching Modern Language 3	
FOL 5943	Foreign Language Teaching Methodology	3
TSL 5142	Curriculum Development in English as a Second Language	3
TSL 6348	Task-Based Language Teaching	3

Studies in Bilingualism (3 credits)

Students choose one of the following courses:

LIN 5625	Studies in Bilingualism	3
SPN 5736	Spanish as a Heritage Language: Acquisition and Development	3
FLE 6925	Special Topics in Second Language Education	1-3

Graduate Certificate Program in TESOL (Teaching English to Speakers of Other Languages)

The TESOL Certificate Program enables teachers to extend their competence in teaching foreign languages, particularly English. Completion of the TESOL Certificate Program qualifies the candidate to receive a Florida State Endorsement in Teaching English to non-Speakers, grades K-12. The program also assists prospective teachers to receive a professional credential that may assist them in successful employment in other countries. Entrance requirements are Bachelor's degree and a 3.0 GPA in the last two years of college work. This certificate program is open to non-degree-seeking students only.

Required Courses

TSL 5371	Special Methods of TESOL	3
TSL 5245	Developing ESOL Language and Literacy	3
TSL 5142	Curriculum Development in ESOL	3
TSL 5938	Principles of ESOL Testing	3
EDG 5707	Cross-cultural Studies	3

Additionally, one other course may be chosen from the following list:

LIN 5501	English Syntax
LIN 5211	Applied Phonetics
LIN 6085	Research Methods in Experimental Linguistics
LIN 5107	History of English Grammar
LIN 5431	General Morphology/Syntax
LIN 5574	Languages of the World
LIN 5601	Sociolinguistics

LIN 5625	Studies in Bilingualism
LIN 5715	Language Acquisition
LIN 5733	Teaching Accent Reduction
LIN 5825	Pragmatics
LIN 6323	General Phonology
LIN 6562	Discourse Analysis
LIN 6805	Semantics
RED 5925	Instructional Thinking Strategies
EEX 6051	Educational Needs of Students with Exceptionalities
EDF 5255	Secondary Classroom Management
RED 6336	Reading in the Content Area
LAE 5426	Multicultural Perspectives in Teaching Language and Literature for Young Adolescents
TSL 6908	Field Component

Course Descriptions

Definition of Prefixes

ADE - Adult Education/Human Resource Development; AFA - African-New World Studies; CGS - Computer Applications; CHD - Child Development; EAP - English as a Second Language for Academic Purposes; EBD - Education: Emotional/Behavioral Disorders; ECT - Education: Career/Technical; ECW - Education: Career/Workforce; EDA - Education: Educational Leadership; EDE - Education: Elementary; EDF - Education: Foundations; EDG - Education: General; EDH - Education - Higher; EDP - Education: Psychology; EDS - Education: Supervision; EEC - Education: Early Childhood; EEX - Education: Exceptional Child, Core Competencies; EGI - Education: Exceptional Child, Gifted; EIA - Education: Technology; ELD - Education: Specific Learning Disabilities; EME - Education: Technology and Media; EMR - Education: Mental Retardation; ESE - Education Secondary; ETE - Education: Technology Education; EVT - Education: Vocational/Technical; FAD - Family Development; FLE - Foreign Language Education; HEE - Home Economics Education; HHD - Housing; HLP - Health, Leisure, and Physical Education; HME - Home Management Equipment; HOE - Health Occupations Education; HSC - Health Sciences; LAE - Language Arts and English Education; LBS-Labor Studies; LEI - Leisure; MAE - Mathematics Education; MHS - Mental Health Services; MUE - Music Education; PEL - Physical Education; PEM - Physical Education Activities; PEO - Physical Education Activities; PEP - Physical Education Activities; PET - Physical Education Therapy; RED - Reading Education; SCE - Science Education; SDS - Student Development Services; SPM - Sports Management; SPS - School Psychology; SSE - Social Studies Education; TSL - TESOL.

F-Fall semester offering; S-Spring semester offering; SS-Summer semester offering; ALT-alternate years; AR-as required.

AFA 6325 Pedagogy in the African Diaspora: Literacy, Culture, Race and Gender (3). This course explores pedagogy broadly throughout the African Diaspora through critical examinations of race, culture, gender and praxis. The course provides opportunities for research in schooling, teacher preparation and gender/class/race based literacy at home and abroad.

APK 6090 Professional and Ethical Issues in Kinesiology (3). This course provides an understanding of ethics and standards for professional practice in Kinesiology. The course applies various ethical, professional, and legal standards to professional practice.

APK 6713 Applied Sport and Performance Psychology (3). This course examines current research and practice in applied sport psychology settings. The course takes a scientist-practitioner approach linking theory, research, measurement, and applications

APK 5111 Advanced Exercise Physiology (3). This course provides a detailed examination of the acute and chronic responses to exercise and training. Particular attention is given to responses at the systems and cellular levels. Prerequisite: APK 3110.

APK 5931 Special Topics in Exercise Physiology (1-3). This course presents contemporary issues and practices in exercise physiology. Prerequisite: APK 3110. (AR)

APK 6118C Rehabilitation Techniques in Athletic Training with Lab (4). Introduction to basic principles of rehabilitation of athletic injuries, including range of motion, pain control, balance, proprioception, strengthening, and endurance. Prerequisite: PET 4642C. Corequisite: PET 5678.

APK 6411 Exercise Psychophysiology and Neuroscience (3). This course provides an introduction to exercise psychophysiology and neuroscience. Emphasis will be on perceptual, psychological, and psychophysiological responses to exercise and sport tasks.

CHD 5266 Advanced Studies in Child Development (3). Survey of current literature on selected areas, analysis of trends and issues, and investigation of recent research in Child Development. Prerequisites: CHD 3220, CHD 4210 or equivalent. (AR)

CGS 5410 Logo for Educators (3). Aspects of Logo as used by educators. Creative aspects, the language, philosophy, structure, and application. Prerequisites: Computers in Classroom or equivalent. (AR)

CGS 5413 PILOT for Educators (3). Authoring language PILOT for teachers. Designed to develop language and its application to all levels of education. Prerequisites: EME 6405 or equivalent. (AR)

EAP 5835 English Communication and Pedagogy for International Teaching Assistants (3). Course to assist international teaching assistants in developing intelligibility, intercultural competence, and classroom management skills for U.S. university classroom instruction.

EBD 5225 Strategies for Students with Emotional Handicaps (3). Instructional strategies and specialized approaches for teaching students with emotional handicaps. Extensive field work required. Prerequisites: EDG 5414 and Lab, EEX 6051, EEX 6227, EEX 5608. (S)

EBD 6226 Advanced Theory and Practice: Emotional Handicaps (3). Major theories in the area of behavior disorders, and skills in the application of these theories to education. (S,SS)

ECT 5078 Technical Education in American Society (3). This course will provide students with knowledge of the basic role and current status of technical education in an industrial democracy. It is designed for students interested in post-secondary education. (S)

ECT 5386 Vocational Educational Media (3). This course provides students with knowledge and skill in selecting, developing, and utilizing vocational instructional media forms to communicate or demonstrate concepts. (S)

ECT 5769 Evaluation in Vocational and Technical Education (3). This course provides students with knowledge and skill in the development of criteria, tests, measurements, and analysis of data to assess teaching, learning, and objectives. (F)

ECT 5905 Directed Study in Vocational/Technical Education (1-3). This course includes identification,

research, and reporting on a special problem of interest to the student. Subject to approval of program advisor. (F,S,SS)

ECT 5925 Special Topics in Vocational Education (1-6). This course includes selected competencies related to instructional and technical areas. (AR)

ECT 5927 Special Topics in Health Occupations Education (1-3). This course includes selected topics related to instructional and technical areas. (AR)

ECT 6790 Program Evaluation in Vocational Technical Education (3). Competency: Knowledge and skill needed to conduct a systematic evaluation of vocational-technical education programs.

ECT 6925 Special Topics in Vocational Education (1-6). This course consists of selected topics related to professional and program areas. (AR)

ECT 6930 Seminar in Vocational Education (3). This course includes discussion of special instructional, curricular and/or administrative and supervisory problems and issues in vocational education. Prerequisite: Graduate standing. (F)

ECT 6946 Supervised Field Experience (3-6). This course is an application and refinement of competencies in either classroom, laboratory, or administration and supervision, via school-based field experiences. Placement is subject to approval of program leader. (AR)

ECT 6947 Internship in Vocational Education (3). This course provides students with knowledge and skill in a new leadership setting, relative to the student's selected area of emphasis. (AR)

ECT 7964 Comprehensive Doctoral Examination, Vocational and Technical Education Leadership (0). This is the Comprehensive Doctoral Examination in Vocational and Technical Education Leadership. Prerequisite: Permission of major professor. (F,S,SS)

ECT 7980 Ed.D. Dissertation (1-12). This course consists of research for doctoral dissertation for those students approved for candidacy in the Vocational and Technical Education Leadership Program. Prerequisites: Permission of Major Professor and Doctoral Candidacy. (F,S,SS)

ECT 7985 Dissertation Defense (0). This is the defense of Dissertation. Prerequisites: Permission of major professor and ECT 7980. (F,S,SS)

ECW 5008 Cooperative Vocational Education Programs (3). This course will provide students with knowledge and skill in the basic philosophy, principles, processes, and procedures of the cooperative method in vocational and technical education. (F)

ECW 5168 Curriculum Development in Vocational Education (3). This course provides students with knowledge and skill in analyzing, planning, and developing curriculum in an area of specialization. (S)

ECW 5196 International Comparative Vocational Education (3). This course provides students with knowledge in comparison of vocational education in the United States in terms of purposes, systems, and problems with those of selected foreign countries. (S)

ECW 5206 Supervision and Coordination of Vocational Education Programs (3). This course provides students

with knowledge and skill in the supervision of personnel and the coordination of work to achieve institutional goals. (F)

ECW 5315 Improvement of Teaching Strategies in Health Occupations and Nursing Education (3). This course is the first in series of graduate courses designed to prepare qualified health professionals holding bachelor's degrees with professional education skills necessary to become competent teachers. It is approved for "special methods of teaching health occupations education." (AR)

ECW 5665 Trends and Issues in Vocational Education (3). This course provides students with knowledge of the basic philosophical and curricular trends and issues in vocational technical education at the international, national, state, and local levels. (F)

ECW 5695 Community Relations and Resources for Vocational Education (3). This course provides students with knowledge and skill in utilizing community resources and establishing public relations procedures and practices to implement vocational education programs. (SS)

ECW 6007 Theory of Work and Careers in Vocational and Technical Education (3). This course provides students with knowledge of concepts and principles of work, careers, and technology and related individual, social, and economic benefits with implications for vocational and technical education. Prerequisite: Graduate standing. (F)

ECW 6105 Program Planning in Vocational Education (3). Competency: Knowledge and skill necessary to determine vocational program feasibility and implementation of new programs. Prerequisite: Graduate standing.

ECW 6205 Administration of Vocational Education Programs (3). This course provides students with knowledge of the principles, practices, functions, and roles of administration in the operation of vocational education programs. (S)

ECW 6318 Current Issues in Health Occupations and Nursing Education (3). This course is designed to focus qualified health professionals holding a bachelor's degree with professional education skills necessary to identify and conduct research on current issues related to teaching in health occupations education. (AR)

ECW 6596 Vocational Education in a Multicultural Setting (3). This course provides students with knowledge and skill in developing and modifying vocational education programs, materials, and practices for a multicultural setting. (SS)

EDA 6063 Administration of Independent Schools (3). This is a survey course that examines the administration of private schools. (AR)

EDA 6225 Labor Relations in Education (3). This course examines relations between the school board and its employees. (AR)

EDA 7943 Field Projects (1-6). This course includes participation by advanced graduate students in field projects and studies. Prerequisite: Permission of the instructor. The course may be repeated with permission of the instructor (AR)

EDE 5041 Issues in Elementary Education (3). Provides understanding, skills, and dispositions needed to build an initial knowledge base as to issues that impact elementary education from the historical, philosophical, sociological, psychological, international and contemporary perspectives. The course serves as an introduction to the field of elementary education. Corequisite: EDE 5XXX.

EDE 5267 Education of the Child in Urban Society (3). For students desiring advanced study in the schooling of inner-city pupils in K-6. Prerequisites: EDF 3723, EDG 3321, EDG 3322. (AR)

EDE 5905 Directed Study in Elementary Education (1-3). Available to graduate elementary majors. Provides for individual investigation in the area of elementary education. Permission of the instructor required. (F,S,SS)

EDE 5925 Special Topics in Elementary Education (3). Available to undergraduate and graduate elementary majors. Provides opportunities to develop skills and knowledge under the guidance of a specialist in a selected area. Permission of the instructor required. (AR)

EDE 6205 Curriculum Design for Childhood Education (3). Required in masters programs in elementary education. A study of curriculum theory, research, construction and evaluation related to elementary schools. (AR)

EDE 6225 Problems in Curriculum and Instruction: Elementary (3). Investigation of current problems and solutions to essential curricular and instructional issues in elementary education. Prerequisites: EDE 6205 or equivalent. (SS)

EDE 6482 Field Research for Educators (3). The first part of a two semester sequence providing the knowledge and skills necessary for conducting research in schools and classrooms by teachers and administrators; using the results of this research to inform practice. Prerequisite: EDF 5481.

EDE 6488 Research in Elementary Education (3). Elective in masters program in elementary education. Required for students in doctoral program. Research in elementary education and the paradigms associated with this research. Prerequisite: EDF 5481. (AR)

EDE 6930 Seminar in Elementary Education (3). Required in masters program in elementary education. Required for students in doctoral program. Advanced study of critical issues and problems in elementary education. (AR)

EDE 6948 Graduate Internship in Elementary Education (1-6). Field based experiences in elementary education provided. Required in modified masters track. Repeatable.

EDE 6971 Thesis in Elementary Education (6). Elective in masters program in elementary education. Design and preparation of an original scholarly investigation in elementary education. Prerequisites: EDF 5481, EDE 6488, and consent of instructor. Corequisite: EDE 6930. (F,S,SS)

EDE 7935 Doctoral Seminar in Elementary Education (3). Required for students in doctoral program. Advanced doctoral study of current theories and research related to

elementary education. Prerequisites: EDE 6488 and EDE 6930. (AR)

EDF 5216 Effective Learning in the Classroom (3). A behavioral approach to effective teaching techniques, including theoretical background, behavioral definitions, writing effective objectives, and evaluation of effective learning in the classroom. A field experience will be included. (AR)

EDF 5255 Classroom Management (3). Provides teachers' understandings, skills, and dispositions for successful classroom management. Prerequisite: EDP 5053. Corequisite: EDG 5414.

EDF 5432 Measurement and Evaluation in Education (3). Competencies required for the design, construction or selection, and evaluation of measuring instruments. Prerequisite: EDF 5481. (F,S,SS)

EDF 5443 Measurement and Evaluation in the Classroom (3). Basic concept in educational measurement, utilizing measurements in instruction, construction of teacher-made tests and other classroom assessments, portfolio and performance assessment, interpretation of standardized test scores.

EDF 5481 Foundations of Educational Research (3). Competencies required for critical understanding, evaluation, and use of published educational research: Understanding quantitative and qualitative methods; sampling; measurement; data collection and analysis; and inference process. (F,S,SS)

EDF 5820 Latin American Education: An Historic and Contemporary Overview (3). Historical and current development of Latin American education, and analysis of principal forces shaping this development. (AR)

EDF 5821 African Educational Systems: A Comparative Approach (3). Contemporary trends and issues of education in selected independent African countries, with historical analysis of colonial educational policies and practices. (AR)

EDF 5881 Foundations of Bilingual Education (3). Fundamental theories and models of bilingual education, and information about the historical, philosophical, theoretical and legal background for bilingual multicultural programs in the United States. (AR)

EDF 6211 Psychological Foundations of Education (3). An intermediate course designed to apply theories and principles of learning and development to teaching and student learning in career areas related to education. Challenges of diversity and teacher effectiveness are emphasized. Prerequisites: EDP 3004 or equivalent. (F,S,SS)

EDF 6212 Research Problems in Educational Psychology (3). Critical analysis of research trends and topics in educational psychology with specific relevance to counseling, school psychology, or special education. Students prepare a prospectus for thesis. (AR)

EDF 6301 Cognitive Psychology in Education (3). Review of psychological research and theory pertaining to cognitive development and processes. Applications to education including cognitive strategy training and enhancement or attention and memory. Prerequisites: EDP 6211 or equivalent. (AR)

EDF 6414 Introduction to Statistical Software in Education (3). Introduces popular statistical software packages used in education, including SPSS, SAS, and R. Prerequisite: EDF 6472 or Permission of instructor.

EDF 6419 Application of Statistical Models to Education (3). This research course connects foundational knowledge with advanced statistical modeling. The course covers applied regression and basic models of multivariate analysis using empirical data. Prerequisite: EDF 6486

EDF 6425 Single-Subject Research Design in Education (3). This course helps students develop research questions related to individualized interventions to address behavioral challenges in educational settings.

EDF 6427 Instrument Development and Analysis (3). Introduces the process of creating a new instrument and providing reliability and validity evidence. Prerequisite: EDF 6472, or permission of the instructor.

EDF 6432 Introduction to Educational Measurement (3). This course introduces students to educational measurement. Students will learn the foundations of measurement, auxiliary statistical approaches to validation, and the mainstream measurement models. Prerequisite: EDF 6486

EDF 6472 Research Methods in Education: Introduction to Data Analysis (3). This foundational course in research provides a broad overview of statistical concepts and analysis to promote a student's research ability in social science and educational settings.

EDF 6475 Qualitative Foundations of Educational Research (3). Methods and procedures of qualitative research in education: Philosophical issues, conceptualizing research questions, choosing appropriate research designs, collecting data, manual and computerized data analysis, and drawing inferences.

EDF 7476 Advanced Methods of Qualitative Educational Research (3). Advanced design, data collection, and data analysis issues in qualitative research, applied data analysis using text analysis computer programs, making inferences, and effective dissemination of the results. Prerequisite: EDF 6475 or equivalent. Corequisites: EDF 6481 and EDF 6475.

EDF 6481 Educational Research Methodology (3). This course is designed to provide doctoral students with an in-depth analysis of the methods and procedures of research in education. Topics will include conceptualizing educational research, writing research proposals, constructing measurement instruments, collecting and analyzing qualitative and quantitative data, and drawing inferences. Prerequisites: EDF 5481 and EDF 6472.

EDF 6482 Application of Measurement and Assessment in Educational Research (3). The course is to provide key concepts and theories in measurement and guide researchers and practitioners to apply these concepts and theories in their research practice. Prerequisites: EDF 6472, EDF 5481, or permission of the instructor.

EDF 6486 Advanced Data Analysis in Quantitative Educational Research (3). This is the second of a two-semester in quantitative data analysis. It provides the competencies required for data analysis in complex

educational research designs. Prerequisite: EDF 6472 (AR)

EDF 6487 Action Research for Educators (3). The first part of a two semester sequence providing the knowledge and skills necessary for conducting research in schools and classrooms by teachers and administrators; using the results of this research to inform practice. Prerequisite: EDF 5481.

EDF 6492 Introduction to Program Evaluation in Education (3). Introduces basic theories and concepts in program evaluation under educational contexts. Prerequisite: EDF 6472, EDF 5481, or Permission of Instructor.

EDF 6654 Macro- and Micro-Planning in Education (3). This course is designed to study the theoretical and methodological foundations of educational planning in the U.S. and other countries. (F)

EDF 6943 Quantitative Research Practicum in Education (3). The quantitative research practicum in education is designed for graduate students to conduct an original research project. Prerequisite: EDF 6486

EDF 7215 Application of Learning Theory to Instruction (3). Analysis of selected learning theories and application of these theories to an instructional system. Prerequisite: EDF 6211. (AR)

EDF 7403C Data Analysis in Multivariate Educational Research (3). Design of multivariate research projects in education. This course focuses on applications of multivariate data analysis to educational research using a non-matrix approach. Prerequisite: EDF 6486. (AR)

EDF 7404 Qualitative Research Data Analysis (3). Prepares students for a qualitative dissertation or research project in social or educational fields. Helps students develop techniques for analyzing and writing up qualitative research data.

EDF 7412C Structural Equation Modeling for Educational Research (3). The course focuses on conceptual understanding of covariance structure models and practical experiences of conducting a research project using structural equation models in educational fields. Prerequisites: EDF 6472, EDF 6486, or permission of the instructor.

EDF 7419C Applied Regression Analysis for Educational Research (3). It is designed for graduate students who prepare for educational research using applied regression, aiming at hands-on experiences using computer software and practices on research presentation. Prerequisites: EDF 6472, EDF 6486, or permission of the instructor.

EDF 7437 Advanced Measurement (3). This course is designed to introduce measurement theory and advanced applications in educational measurement. Prerequisite: EDF 6432.

EDF 7442 Instrument Construction for Research and Evaluation (3). Course covers data collection procedures such as surveys, interviews, observation, content analysis, and performance assessments. Prerequisites: EDF 5481 or equivalent and an introductory measurement course.

EDF 7480 Qualitative Research Paradigms (3). Examines established and emerging Western/non-

Western paradigms of knowledge construction. Contributes to student development of theoretical frameworks, literature reviews, and methodology.

EDF 7483 Seminar in Mixed Methodology (3). Utilization of mixed (Qualitative + Quantitative) methods in research, including critical evaluation of worldviews, typology, research questions, data collection/analysis, and meta inferences. Prerequisites: EDF 6475, EDF 6481, and EDF 6486.

EDF 7489 Hierarchical Linear Modeling for Educational Research (3). The course is to provide key concepts and knowledge of HLM and guide educational researchers to practically apply HLM for the analysis of grouped or longitudinal data in educational research settings. Prerequisites: EDF 6472, EDF 6486, or permission of the instructor.

EDF 7492 Educational Program Evaluation (3). Design, development and implementation of program evaluation studies in education, interpretation and dissemination of the findings. Prerequisites: EDF 6475, EDF 6481, EDF 6486.

EDF 7931 Special Topics Seminar in Qualitative Research (3). This course is dedicated to the study of contemporary issues in qualitative and interpretive inquires.

EDF 7941 Supervised Practicum in Educational Research and Evaluation (3). Completion of research or program evaluation project under the supervision of a faculty member. The product of this practicum is a publishable research report. Prerequisites: EDF 6481 and EDF 6486.

EDG 5049 Public Diplomacy and Education: Engaging the Arab and Muslim World (3). Examination of education and public diplomacy, from different national perspectives, engagement in dialogue about global issues with virtual classmates, and grant proposal writing.

EDG 5325 Analysis of Teaching (3). Examination of the research on instruction in teaching, and the development of skills in the observation and analysis of teacher behavior. (AR)

EDG 5414 Teaching Environments: Instructional Strategies and Classroom Management (3). Includes instructional decisions, classroom management, assessment, and ethics that are supportive of all students' thinking and individual differences. Prerequisite: Permission of the instructor (F,SS)

EDG 5414L Instructional Strategies Lab (3). Applies basic knowledge and skills necessary for teaching. Required of all in modified masters programs. Corequisite: EDF 5414. (F,SS)

EDG 5417 Fundamentals of Learning (3). Designed to help educators use learning styles information to change instruction and improve student achievement. Prerequisite: Tentative admission to Master's program. (AR)

EDG 5707 Cultural and Cross-Cultural Studies (3). This is an overview of immigration patterns in U.S., discussions of theories of ethnicity, acculturation, intercultural communication. Development of teaching strategies for multicultural classrooms. Multicultural issues in

elementary, secondary, adult, vocational, and special education will also be addressed. (F,S,SS)

EDG 5736 Preparation for International Teaching Internship (3). This course is to prepare students for an international teaching internship. Students will examine educational and cultural issues related to the U.S., their future host placement, and the world.

EDG 5910 Independent Research Study in Education (0-6). Designed to provide an opportunity to enhance their educational research knowledge, to research a specific area, issues and trends, and/or the delivery of education in K-12 settings. Prerequisite: Department consent is required.

EDG 5941 Practicum: Urban Secondary Schools (3). Developing teacher competencies in urban secondary schools. (AR)

EDG 5942 International Educational Internship (3). Students will complete an international internship and be required to teach in international schools, engage in cultural immersion experiences, and conduct service-learning projects. Prerequisite: EDG 5XXX Preparation for International Teaching Internship

EDG 6250 Curriculum Development (3). Development of basic technical constructs of curriculum. Planning of reality-based educational programs at all levels of schooling.

EDG 6286 Curriculum Evaluation and Improvement in Urban School Systems (3). Development of skills in curriculum evaluation and strategies for improvement of on-going curriculum.

EDG 6608 Multicultural Education: Defining the Field (3). Multicultural education and its impact on teaching and the profession. Prerequisite: Admission to Urban masters program. (AR)

EDG 6627 Seminar: Issues and Trends in Curriculum and Instruction (3). A review of current issues and trends in Curriculum and Instruction. Prerequisite: EDG 6250.

EDG 6920 Colloquium in Curriculum and Instruction (1-6). Selected readings, presentations and discussions on topics related to curriculum and instruction. Colloquia considers specific topics related to issues, trends and applications in the broad field of education. Prerequisite: Masters Degree. (SS)

EDG 6925, 6926, 6927, 6928, 6929 Special Topics in General Professional Education (1-3). Offers an opportunity for school personnel to participate in a problem-oriented workshop in one of the fields of general professional education. (AR)

EDG 6943 Supervised Field Experience (1-5). Students are provided an opportunity to perform supervisory duties appropriate to the students' professional goals. Only advanced graduate students are permitted to enroll. (AR)

EDG 6971 Thesis in Curriculum and Instruction (1-3). An individually supervised research project demonstrating the application of analytical, conceptual and technical skill to a specific curriculum and instruction problem. Prerequisites: EDF 5481 and permission of major advisor.

EDG 7222 Curriculum: Theory and Research (3). Theories of curriculum organization and a survey of

curriculum research and historical patterns of curriculum development. Prerequisite: EDG 6250.

EDG 7226 Advanced Research in Teaching and Learning (1-15). This course supports advanced research for doctoral students before their admission to a candidacy. It is designed for students in a Teaching & Learning doctoral program. It is not appropriate for students who have been admitted to candidacy.

EDG 7362 Instruction: Theory and Research (3). Theories of instruction and research in the learning process, creativity, the thought process, human relations and group dynamics and other fields related to the development of instructional theory and practice. Prerequisites: EDG 6250 or Psychology of Learning.

EDG 7391 Seminar in Instructional Leadership (3). Review theories of change and organizational development applicable to education. Discussion of rules and functions of supervisors, curriculum developers and other leaders in the instructional process. Prerequisites: EDA 6222 or EDS 6050.

EDG 7665 Seminar in Curriculum (3). Provides advanced doctoral students the opportunity to participate in a high level seminar focused on identifying the forces which shape curriculum theory and practice. Prerequisite: EDG 7222.

EDG 7667C Advanced Topics in Curriculum Studies (3). Advanced study of current topics and research issues in curriculum studies. May be repeated.

EDG 7692 Theory, Organization, and Policy in Teaching and Learning (3). Contextualizes education policy in broader political, historical, ideological, and power discourses. Examines relevant policy case studies and strategies for policy advocacy.

EDG 7692C Politics of Curriculum (3). Advanced study of theories, research, and processes of curriculum decision-making.

EDG 7923C Doctoral Seminar in Curriculum Studies (3). Advanced study of professional development activities and current research topics in Curriculum Studies.

EDG 7938 Doctoral Seminar in Instructional Leadership (3). Advanced doctoral studies in current theories and research related to instructional leadership. Prerequisite: EDG 7391. (F)

EDG 7964 Comprehensive Doctoral Examination (0). Prerequisite: Permission of Major Professor.

EDG 7980 Ed.D. Dissertation (1-12). Original contribution to knowledge in major field. Prerequisite: Permission of Major Professor and Doctoral Candidacy. (F,S,SS)

EDG 7985 Dissertation Defense (0). Defense of dissertation. Prerequisites: Permission of Major Professor and EDG 7980.

EDH 6925 Special Topics in Higher Education (1-3). This course is an intensive development of selected competencies related to staff development and/or administrative skills of special interest to students in higher education. (F,S,SS)

EDH 6935 Special Topics in Higher Education (3). This course provides for the examination of a particular

academic topic of interest to students in higher education. (F,S,SS)

EDH 7931 Seminar on Class, Gender and Race in Higher Education (3). Examines historical and contemporary interrelationships of hegemony, domination, and power undergirding sociocultural viewpoints, institutional forces, and policy discourses in higher education.

EDH 7937 Special Research Topics in Higher Education Administration (3). This doctoral seminar is devoted to the in-depth treatment of selected theories and research topics in the field of higher education. (AR)

EDH 7939 Critical Texts in Higher Education (3). Thematic seminar devoted to the in-depth reading of key texts defining the field of higher education. Theme changes every term and may be taken more than once

EDM 6256 Problems in Curriculum and Instruction: Middle School (3). Investigation of current problems and solutions to essential curricular and instructional issues in Middle School education. Prerequisites: ESE 6215 or equivalent. (SS)

EDP 5053 Educational Psychology: Principles and Applications (3). Theories, empirical bases and principles of development and individual differences, learning environments, and assessment applied to teaching at all educational levels. Challenges of diversity are emphasized. Required of Modified Masters programs. (SS)

EDP 6276 Human Development: Childhood and Adolescence (3). Advanced survey of principles of human development in biopsychosocial terms; in-depth study of infancy, childhood, adolescence, emphasizes applications to broad range of educational processes. Prerequisites: EDP 3004 and DEP 2000. (F)

EDP 6277 Human Development: Across the Life Span (3). Advanced survey of life span human development. Demographic, physiological, sociological factors contributing to optimal functioning through adulthood and aging. Applications to counseling and education. (S)

EDP 7057 Educational Psychology: Advanced Applications (3). Advanced doctoral level seminar. Reviews and applies educational psychology theories and empirical evidence to educational research, program development and policy making at all educational levels. Prerequisite: School of Education doctorate students. (AR)

EDP 7058 Behavioral Intervention Research and Evaluation in Education (3). Design and analysis of observational and behavioral studies in education. Includes single subject research studies, structured observation systems, and behavioral interventions. Prerequisite: EDF 5481. (S)

EDP 7214 Psychological Problem Solving in Education (3). Discussion of psychological problem solving literature and development of problem solving tasks grounded in the educational psychology literature. Prerequisite: EDP 6301.

EDP 7265 Supervised Teaching of Educational Psychology (3). Independent teaching of an educational psychology or educational research and evaluation course under the supervision of assigned faculty member(s).

Prerequisites: Doctoral candidacy in the related area. Course may be repeated as needed.

EDP 7504 Educational Psychology in Cross-Cultural Contexts (3). Discussion of empirical and theoretical cross-cultural research in intelligence, problem solving, and language that impact teaching, learning, and achievement in the US and around the world. Prerequisite: EDP 7057

EDP 7980 Education Doctoral Dissertation (1-12). Research for doctoral dissertation students approved for candidacy in Educational Research and Measurement and in Educational Psychology. Prerequisite: Advancement to candidacy in doctoral program.

EDS 5051 Supervision and Professional Laboratory Experience (3). The content of this course includes performance standards at the preservice teacher preparation level, Clinical Educator training, mentoring, and classroom strategies that result in improved student performance.

EEC 5906 Directed Study in Early Childhood Education (1-3). Available to undergraduate and graduate students studying early childhood education. Provides for individual investigation in the area of early childhood education. Permission of the instructor required.

EEC 5926 Special Topics in Early Childhood Education (3). Available to undergraduate and graduate students studying early childhood education. Provides opportunities to develop skills and knowledge under the guidance of a specialist in a selected area. Permission of the instructor required.

EEC 6232 Developing Learning Processes in Early Childhood: Research into an Italian Perspective (6). This course focuses on early childhood practices through an Italian perspective. Emphasis on learning processes guiding curriculum and instruction in early childhood settings. No prerequisite

EEC 6261 Education Programs for Younger Children (3). Required in masters program in early childhood education. Programs developed for young children; curriculum trends based on contemporary psychological, educational, and sociological research.

EEC 6273 Programming for Young Handicapped Children: Birth to Five Years (3). Acquaint students with developmentally appropriate curricula, methods, materials, intervention strategies, and teaming approaches for infants, toddlers, preschool, handicapped, and at risk children. Prerequisites: EEX 6017; EEX 3010 or EEX 6051 recommended.

EEC 6277 Thinking and Learning in the 21st Century (3). Explores principles from cognitive science that have important implications for instructional approach and curriculum design for 21st century. It addresses global learning outcomes and habits of mind.

EEC 6678 Research in Early Childhood Education (3). Elective in masters program in early childhood education. Required for students in doctoral program. Research in early childhood education and the paradigms associated with this research. Prerequisite: EDF 5481.

EEC 6705 Typical and Atypical Child Development: Birth to Five Years (3). Explore research on normal and

atypical child development from birth to five years in physical, intellectual, social, and emotional domains. Field observation required. Prerequisites: none; EEX 3010 or EEX 6051 recommended.

EEC 6932 Seminar in Early Childhood Education (3). Elective in masters program in early childhood education. Required for students in doctoral program. Advanced study of critical issues and problems in preschool and early childhood education. Prerequisite: EEC 6678.

EEC 6948 Supervised Experience in Early Childhood Education (3-9). Available to graduate early childhood education majors. Provides field work in educational institutions and organizations involved in childcare and early childhood education. Prerequisite: Permission of the instructor.

EEC 6971 Thesis in Early Childhood Education (6). Design and preparation of an original scholarly investigation in early childhood education. Prerequisites: EDF 5481, EEC 6678, and consent of instructor. Corequisite: EEC 6932.

EEC 7932 Doctoral Seminar in Early Childhood Education (3). Required for students in doctoral program. Advanced doctoral study of current theories and research related to early childhood education. Topics may vary and may include: social, cognitive, affective and language development. Prerequisites: EEC 6678, EEC 6932. (AR)

EEX 5060 Nature and Needs of Students with Mild Disabilities (3). Curriculum models, approaches and significant concepts and skills needed for educational planning and programming for students with mild disabilities. Prerequisites: EEX 5481, EEX 6912. (S)

EEX 5068 Instructional Practice in Exceptional Student Education I (3). This course includes the theoretical basis and principles of appropriate instructional practices and techniques for students with mild disabilities, IEP planning, and curriculum development. Prerequisites: EEX 6051, EEX 6225, EEX 6106.

EEX 5069 Instructional Practices in Exceptional Student Education II (3). This course includes the principles of effective instructional practices and strategies for students with mild disabilities, and requires implementation of these strategies in the field. Prerequisites: EEX 6051, EEX 6225, EEX 6106, EEX 5068.

EEX 5075 Teaching Students with Exceptionalities in Inclusive Settings (3). To develop understandings, skills and dispositions necessary to instruct students with disabilities in inclusive settings, and to collaborate with professionals and parents. 10 field hours required.

EEX 5095 Nature and Needs of Students with Autism Spectrum Disorders (3). Students will develop knowledge and skills related to the nature and needs of students with autism including characteristics, learning goals, teaching approaches, and environmental arrangements.

EEX 5210 Assessment and Strategies for Students with Autism Spectrum Disorders (3). Students will become familiar with current formal and informal assessments used in diagnosis and instructional planning. Students will also become familiar with specific

educational strategies for students with autism spectrum disorders.

EEX 5259 Literacy in Special Education (3). Provides teachers with knowledge of specific developmental, remedial reading and language arts strategies, assessment and implementation models that can be used for students with exceptionalities.

EEX 5282 Introduction to Audiology and Auditory Training for Students Who are Deaf and Hard of Hearing (3). The purpose of this course is to provide the opportunity to study the physical dimensions of sound, the psychoacoustic aspects of sound, and the relationship between these. The etiologies, characteristics, and the diagnostic evaluation, treatment and rehabilitation associated will be discussed. Prerequisites: EHD 5110 and EHD 5344.

EEX 5608 Behavioral Approaches to Learning and Classroom Management (3). Application of behavioral principles to children and youth in educational and community settings. Required for special education modified masters' and out-of-field certification majors. Prerequisite: EEX 6051.

EEX 5612 Methods of Behavior Analysis (3). Covers behavior change procedures, evaluating interventions, staff training and managing behavior treatment teams. Data-based evaluation of teaching procedures, behavior outcomes and team member performance is stressed.

EEX 5618 Advanced Applied Behavior Analysis Change (3). This course provides an advanced study of learning principles and methods of behavior change. Basic behavior analysis principles will be reviewed and studied in great depth.

EEX 5619 Behavioral Management and Positive Behavioral Supports for Students with Autism Spectrum Disorders (3). Students will develop and implement positive behavior plans and design behavior management techniques for students with Autism Spectrum Disorders.

EEX 5666 Best Practices in Applied Behavior Analysis. (3) Covers practical aspects of practicing behavior analysis in education and other employment settings.

EEX 5755 Working with Families and Communities of Young Children with Disabilities (3). This course includes strategies for effective communication and collaboration with families of young children with disabilities and related agencies.

EEX 5766 Instructional and Assistive Technology in Special Education (3). Provides teachers of students with disabilities instructional and assistive technology skills that enhance student learning and increase access to the general education curriculum. Prerequisite: EEX 6051.

EEX 5767 Assistive and Instructional Technology and Alternate/Augmentative Systems for Students with Autism (3). Students will develop skills in strategies used in integrating instructional and assistive technology in the classroom for students with autism and the use of appropriate AAC systems.

EEX 5771 Personal Foundations and Transitional Services for Individuals with Disabilities (3). Explores

personal living skills, employability and transitional skills for adulthood in relation to persons with mental, sensory and physical disabilities. (SS)

EEX 5841 Graduate Practicum in Special Education (1). The Graduate Practicum in Special Education provides opportunities for intensive and integrated teaching experiences in the classroom under the close supervision of master teachers and university supervisors. Prerequisites: Completion of professional studies and core courses. Corequisites: EED 5225, ELD 5145, EMR 5215.

EEX 5869 Behavior Analysis Internship (0-9). This course will provide students the opportunity to practice the principles of behavior analysis in an educational, intervention or applied research setting. Prerequisite: Permission of Instructor

EEX 6019 Autism (3). Presents the nature of autism, personal characteristics, patterns of development, and assessment and intervention strategies. Requires field activity. (AR)

EEX 6017 Typical and Atypical Child Development: Birth to Five Years (3). Explore research on normal and atypical child development from birth to five years in physical, intellectual, social, and emotional domains. Field observation required. Prerequisites: EEX 3010 or EEX 6051. (F)

EEX 6051 Education of Students with Exceptionalities (3). Significant concepts in relation to the educational needs of students with exceptionalities. (AR)

EEX 6065 Educational Programs for Secondary Level Students with Exceptionalities (3). Considers philosophies and models of secondary programs for students with mild disabilities. Emphasis is given to instructional methods in skills and content areas and identification of transition resources. Prerequisites: MAE 6336, RED 6336. (AR)

EEX 6072 Inclusion of Students with Exceptionalities (3). Awareness of issues underlying the movement to include students with disabilities in general education settings. Techniques and procedures for effective mainstreaming of these students. (SS)

EEX 6096 Characteristics of Individuals with Severe Disabilities (3). Characteristics of individuals with physically impaired, health impaired, and profound communication disorders and behavior disorders, including autism. Medical etiology, assessment techniques, program planning for student and family. Prerequisite: Graduate level status. (AR)

EEX 6106 Acquisition of Speech and Language Skills (3). Development of normal speech and language, and knowledge of speech and language delays and disorders. (S)

EEX 6211 Assessment of Learning and Behavior (3). Presents a model for assessing the skills and abilities of students with exceptionalities. Emphasis is on administration, scoring and interpretation of a variety of standardized tests, and communication of results in written reports and oral staffings. Prerequisites: EEX 3221 or EEX 6227 or equivalent. Lab fee required. (AR)

EEX 6213 Assessment and Interventions for Young Children with Disabilities (3). Presents an ecological

approach to assessment of young children. Formal/Informal assessment including naturalistic observations and the development of an IFSP and IEP required. Prerequisites: EEX 6017, EEX 3012 or EEX 6051. Corequisite: EEX 6455. Lab fee required. (S)

EEX 6225 Educational Assessment of Students with Exceptionalities (3). Presents a model for assessing the academic skills of students with exceptionalities. Emphasis is on use of standardized tests and development of curriculum-based assessments. Lab fee required. (F,S)

EEX 6228 Integration of Curriculum, Assessment and Instruction (3). This course constitutes the culminating experience in the Masters Program by establishing the link between curriculum, assessment, and instruction. Prerequisite: Completion of required Masters course work. (S)

EEX 6417 Guidance and Counseling of Gifted Students (3). Affective development, parental involvement, counseling theories, underachieving gifted. (SS)

EEX 6455 Programming for Young Children with Disabilities (3). Acquaint students with developmentally appropriate curricula, methods, materials, intervention strategies, and teaming approaches for infants, toddlers, preschool age children with disabilities as well as children at risk. Prerequisites: EEX 6017, EEX 3010 or EEX 6051. Corequisite: EEX 6213. (S)

EEX 6535 Seminar in Special Ed.: Supervision and Leadership (3). Problems in school administration and pattern of curriculum organization as they relate to people with disabilities. Focus on conceptual framework, change factors and future trends in special education. (F)

EEX 6609 Behavior Analytic Teaching (3). Presents a behavior analytic framework for teaching and skill development. Addresses the scientific basis, rational and context for using behavior analysis in teaching.

EEX 6617 Principles of Applied Behavior Analysis II (3). An intensive study of single-subject experimental methods to evaluate the effects of behavior change procedures. Single case methods are used in a variety of educational and other applied settings. Prerequisite: An EEX 5000- level course

EEX 6664 Applied Behavior Analysis in Education (3). A behavior analytic systems approach to education. Focuses the design, implementation, and supervision of behavior analysis technologies in educational settings.

EEX 6680 Theory and History of Behavior Analysis in Education (3). A critical examination of theory and history of applied behavior analysis, its contribution to educational practice, its broad application and limitations. Covers historical figures and events

EEX 6747 Ethics in Applied Behavior Analysis (3). Ethical Issues relevant to all areas of behavior analysis are examined, with a focus on those that relate to activities teachers and behavior analysts may engage in the classroom and other settings. Prerequisite: Graduate Standing.

EEX 6756 Working with Families of Students with Disabilities through Collaborative Approaches (3). This

course familiarizes students with the skills needed to work in effective partnerships with families of children with disabilities and related school personnel.

EEX 6765 Instructional Technology for Special Education (3). Provides teachers of students with special needs current knowledge in instructional technology, appropriate to enhance student learning. (F,SS)

EEX 6796 Culturally and Linguistically Diverse Exceptional Learners (3). The course will focus on evidence-based practices for working with culturally and linguistically diverse students with disabilities with a particular focus on urban schools and related issues.

EEX 6848 Seminar in Special Education: Issues and Trends (3). A forum to discuss, analyze, and evaluate current issues and trends in special education. Individual issues and trends will be planned and executed by students. (S)

EEX 6862 Student Teaching (6). Culminating field experience in a program for students with Exceptionalities, demonstrating competencies learned throughout the program. Prerequisite: successful completion of all program requirements. (F,S)

EEX 6863 Supervised Field Experience in Special Education (3-9). Demonstration in a field site of the full range of competencies in diagnostic teaching learned throughout the program. Placements include a variety of field settings. (F,S,SS)

EEX 6906 Directed Study in Special Education (1-6). Concepts or competencies contracted for by graduate students with a faculty member. (F,S,SS)

EEX 6912 Advanced Theory and Research in Special Education (3). Required by graduate students in the Masters or Doctoral programs. Investigation of advanced work in social and psychological research applied to persons with handicaps, mental retardation, learning disabilities, and emotional disturbances. Prerequisites: Certificate in Special Education and/or competence in Special Education. (F,S)

EEX 6927 Special Topics in Special Education (1-6). Selected competencies in special education, developed in short-term, intensive workshops. (F,S,SS)

EEX 6942 Capstone & Career Development (0-9). Prepares students to enter the profession through development activities and networking activities. Includes the presentation and defense of a capstone project. Prerequisite: Permission of instructor

EEX 6947 Behavior Analysis Internship Supervision (3). Provides students with small-group supervision of internship experience. Focuses on development of a case conceptualization capstone project.

EEX 6971 Thesis in Special Education (3). Elective in Masters Program in special education. Design and implementation of original scholarly investigation in special education. Prerequisites: EEX 6912, EDF 5481, consent of instructor. (AR)

EEX 7795 Advanced Issues in the Education of Culturally and Linguistically Diverse Students with Exceptionalities (3). The course will focus on highly effective educators, minority students in special education,

critical issues such as inclusion and assessment, and teacher preparation and support in urban districts.

EEX 7930 Professional Seminar in Special Education (1). Required 6 semester seminar for new and continuing doctoral students in leadership and professional development issues facing doctoral professionals. Prerequisite: Doctoral standing. (F,S,SS)

EEX 7933 Advanced Topics in Special Education (3). In-depth study and analysis of topics affecting special education practice. Course can be repeated for credit. Prerequisite: Admission to doctoral program in ESE.

EEX 7937 Dissertation Seminar in Special Education (3, repeatable to 9). Designed to take doctoral students through the steps of completing a dissertation. Requires identification and development of a research problem. Prerequisites: Completion of special education core and research and statistics component. (F,S,SS)

EEX 7977 Candidacy Research and Evaluation in Educational Psychology and Special Education (3). Research activities required for Doctoral students in special education prior to candidacy and dissertation. Serves as a bridge between courses and the comprehensive examination. Prerequisite: Doctoral standing. (F,S,SS)

EEX 7980 Ed.D. Dissertation (1-12). Original contribution to knowledge in major field. Prerequisites: Permission of Major Professor and Doctoral Candidacy. (F,S,SS)

EGI 5051 Nature and Needs of the Gifted (3). Identification and placement procedures, history of the field, and psychological factors affecting development of the gifted-talented. (F)

EGI 5232 Educational Procedures and Curriculum for Gifted (3). Basic curriculum models in education of the gifted. Relation of models to planning, implementation in traditional classrooms, resource rooms, and special classes. (S)

EGI 6305 Theory and Development in Creativity for Gifted (3). Required for graduate students seeking endorsement in Gifted Education. Knowledge and practice in theory and process of creative thinking and production of creative work. Prerequisite: Graduate level only. (F)

EGI 6405 Special Gifted Populations (3). Required for graduate students seeking endorsement in Gifted Education. Knowledge and theory in cultural, psychological, and educational principles applied to gifted minorities, including the handicapped. Prerequisite: Graduate level only. (SS)

EHD 5110 Nature and Needs of Students Who are Deaf and Hard of Hearing (3). Identification and placement procedures, history of the field, and psychological factors affecting the development of students who are deaf and hard of hearing.

EHD 5246 Teaching Reading to Students Who are Deaf and Hard of Hearing (3). Knowledge and skills in teaching reading to students who are deaf or hard of hearing. Techniques and strategies in the primary grades, intermediate grades and content areas will be discussed as well as the exploration, creation and evaluation of basic reading materials. Prerequisites: EHD 5110 and EHD 5247.

EHD 5247 Teaching Language and Speech to Students Who are Deaf and Hard of Hearing (3). Historic approaches and current methods for teaching language and speech; knowledge of language and speech structures and principles needed by students who are deaf and hard of hearing; and an understanding of the development of language and speech in students who are deaf. Prerequisite: EHD 5110.

EHD 5341 Curriculum and Instruction of Students Who are Deaf and Hard of Hearing (3). Students will learn techniques for teaching learners who are deaf or hard of hearing including adaptations for instruction in content areas, multicultural instruction, development and implementation of IEPs. Prerequisites: EHD 5110, EHD 5247, and EHD 5402.

EHD 5344 Anatomy and Physiology for Teachers of Students Who are Deaf and Hard of Hearing (3). Exploration and study of the anatomy and physiology of all aspects of communication process. These aspects include the respiratory, phonatory, articulatory, acoustic, auditory, and neurologic systems. Prerequisite: EHD 5110.

ELD 5145 Strategies in Teaching Students with Learning Disabilities (3). Instructional strategies and approaches for teaching students with learning disabilities. Extensive field work is required. Prerequisites: EDG 5414 and Lab, EEX 6051, EEX 6227, EEX 5608. (AR)

ELD 6323 Advanced Theory and Practice: Specific Learning Disabilities (3). Major concepts in the area of specific learning disability, and skills in the application of these concepts to education. (S,SS)

EME 5315 Instructional Media (3). Development of competencies for effective selection and utilization of instructional media. Consideration of sources, selection, evaluation, and methods of implementing media. (AR)

EME 5403 Introduction to Instructional Delivery Systems (3). A study of the rapidly expanding electronic media technology and its impact on instructional delivery. Prerequisites: EME 3402 or EME 6405. (AR)

EME 5602 Multimedia in the Classroom (3). Use videodisc and compact disc formats; hypermedia; high resolution still images and graphics; audio-program material and text to improve the quality of teaching and student learning. Prerequisites: EME 3402, EME 6405, or equivalent. Corequisite: Basic knowledge of McIntosh environment. (AR)

EME 5623 Digital Video in the Classroom (3). Hands-on digital video techniques and practices for integration into classroom applications. Designed for teachers who wish to use digital video in classroom settings.

EME 5945 Special Topics in Computer Education (1-3). Offers an opportunity for teachers and trainers to participate in activities using specific computer applications. (AR)

EME 6405 Computers in the Classrooms (3). Learning to use microcomputers in a school setting. Emphasis on evaluating and documenting software; creation of classroom materials leading to development of useful software. (F,SS)

EME 6407C Instructional Programming for Teachers (3). An introductory course for teachers to use BASIC to

write educational programs appropriate to the teacher's area of specialization. Prerequisites: EME 3402 or EME 6405 or permission of the instructor. (AR)

EME 6408 Microcomputers as Teaching Tools (3). This course develops ability to use the microcomputer as an object, medium, and manager of instruction in the classroom. Prerequisites: EME 6405 or EME 3402 or permission of the instructor. (F,S)

EME 6412 Educational Courseware Evaluation and Development (3). This course develops ability to select, evaluate, design, and utilize appropriate software for the school curriculum. Prerequisites: EME 6405 or EME 3402 and one computer language or permission of the instructor. (AR)

EME 6433 Learning Technologies in Science Education (3). Application of learning theories and research to learning technologies in science education. Development, testing and evaluation of curriculum materials.

EME 6507 Advanced Interactive Multimedia (3). Research on the use of text, color, sound, graphics and animation in multimedia presentations. Apply theory and research to design, develop, and evaluate educational multimedia materials using advanced technological tools and distribute them in different formats. Prerequisites: EME 6405, EME 5602.

EME 6628 Administrative and Instructional Applications of Technology (3). Topics of this course include data management, instructional management, teleconferencing, scheduling, and productivity software for educational leaders and school managers. (AR)

EME 6905 Directed Study: Computer Education (1-3). The course provides an opportunity for the student to plan and carry out an independent study project under direction. Prerequisite: Permission of the instructor. (F,S,SS)

EME 7457 Teaching and Learning at a Distance (3). The course will cover distance education technologies, history and research, needs of learners, design, development, and evaluation, intellectual property rights, assessing students at a distance. Prerequisites: Admission into doctoral program, permission of instructor.

EME 7936 Special Topics in Learning Technologies (3). Special topics in the area of learning technologies will be addressed in this course. Topics will vary from semester to semester. Prerequisites: Admission into doctoral program, permission of instructor.

EME 7938 Advanced Seminar in Learning Technologies (3). Important emerging topics, issues, problems, and trends in the area learning technologies will be covered in this course. Prerequisites: Admission into doctoral program, permission of instructor.

EMR 5215 Strategies for Teaching Students with Mental Retardation (3). Familiarizes students with instructional strategies and specialized approaches for teaching students with mental retardation. Requires extensive field work. Prerequisites: EDG 5414, EDG 5414L, EEX 6051 and EEX 5608. (AR)

EMR 6012 Advanced Theory and Practice: Mental Retardation (3). Major concepts in the area of mental

retardation and skills in the application of these concepts to education. (S,SS)

ESE 5344C Secondary Classroom Management (3). Provides students with the theoretical and practical approaches for dealing with the problems of classroom management within the goals, materials, and teaching strategies that form secondary classrooms.

ESE 6215 Secondary School Curriculum (3). Examination of programs, trends, and developments in curriculum and instruction in the secondary school. Consideration and evaluation of innovations. (AR)

ESE 6256 Problems in Curriculum and Instruction: High School (3). Investigation of current problems and solutions to essential curricular and instructional issues in high school education. Prerequisites: ESE 6215 or equivalent. (SS)

ESE 6925 Workshop in Secondary Education (1-3). Production and application of materials and techniques in a laboratory or field setting. Prerequisite: Consent of instructor.

ETE 5811C Equipment and Facilities Planning (3). Utilization of research, design, and technical knowledge and skill to plan and update technology education laboratory facilities and equipment. Prerequisite: Graduate standing. (F,S,SS)

ETE 5905 Directed Study in Technology Education (1-3). Identification, research, and reporting on problems of interest to the student in technology education. Subject to approval of program advisor. (F,S,SS)

ETE 5935C Special Topics in Technology Education (3). Selected topics related to instructional and technical areas. (F,S)

ETE 6683 Instructional Projects Development in Technology Education (3). Knowledge and skill in developing new and innovative instructional projects for use in technology education programs, grades 6-12. (F,S,SS)

ETE 6931 Analysis of Technology Education (3). Knowledge of trends, issues, problems in technology education at the national, state, and local levels. (F,S,SS)

EVT 5317 Occupational Analyses in Health Occupations and Nursing Education (3). This course provides opportunity to expand/update the knowledge base of health care system combining experiences in health care delivery system with curriculum updating. Professional licensure and liability insurance required. May be repeated. (AR)

EVT 6760 Research in Vocational Education (3). This course provides students with knowledge and skill in identifying, defining, collecting, analyzing, and synthesizing research-related problems in vocational and adult education. (S)

FAD 5260 Family Development (3). Dynamics of family interaction and structure, including analysis of socioeconomic and cultural influences, crisis-producing situations, and current issues and trends affecting the family unit. (AR)

FAD 5341 Family Development: Adulthood and Aging (3). Extension of the study of developmental patterns with emphasis on physical, intellectual, social, and emotional

influences with particular emphasis on the family and/or family substitute. Graduate students will have additional requirements. (AR)

FAD 5450 Human Sexuality (3). Provides a cognitive overview of human sexuality. Main emphasis is on the affective dimension—an exploration of attitudes and values related to sexuality. (AR)

FLE 5895 Bilingual Education Teaching Methodologies (3). Examination of various approaches to bilingual education, including specific school and classroom organizations. Development of specific instructional strategies for bilingual students. Issues in elementary, secondary, adult, vocational, and special education will also be addressed. (F)

FLE 5908 Directed Study in Foreign Language Education (1-3) (ARR). The student plans and carries out an independent study project under direction. Prerequisite: Consent of instructor. (F,S,SS)

FLE 5945 Supervised Teaching: Modern Languages (6). Supervised teaching in a junior or senior high school. Prerequisites: Admission to the Modified Master's Track Program and completion of prerequisite course work in education and subject matter area. (F,S)

FLE 6336 Methods of Teaching Modern Language (3). A modern study of language learning and teaching from the theoretical and practical points of view, including the evaluation and development of techniques and materials for second language teaching. Prerequisites: LIN 3010 or ENG 3500 or equivalent. (F,S)

FLE 6376 Teaching in Challenging and Remote Circumstances (3). Inquiry into face-to-face and remote modalities for teaching foreign language, including English to non-native speakers, with particular concentration on contexts of displacement, poverty, illness, and war.

FLE 6925 Special Topics in Second Language Education (1-3) (ARR). Production and application of materials and techniques in second language education in a laboratory or field setting. (S)

FLE 6938 Seminar in Second Language Testing (3). Advanced study and research on current topics and issues in the field of second language education. Variety of topics to include language testing. Language proficiency, language and society, bilingual-bicultural education, and error analysis and the language learner. (S,SS)

HEE 5335 Trends and Issues in Home Economics Education (3). This course is an analysis of current social, economic, and educational trends and issues impacting upon home economics education and their implications for current and evolving practices. (F)

HEE 5360 Teaching Child Development (3). This course is designed to upgrade competency in planning, researching, and evaluating experiences that are current in content and educational strategies. (AR)

HEE 5361 Teaching Consumer Education and Family Economics (3). This course is designed to upgrade competency in planning, researching, and evaluating experiences that are current in content and educational strategies. (AR)

HEE 5362 Teaching Clothing and Textiles (3). This course is designed to upgrade competency in planning,

researching, and evaluating experiences that are current in content and educational strategies. (AR)

HEE 5363 Teaching Family Life Education (3). This course is designed to upgrade competency in planning, researching, and evaluating experiences that are current in content and educational strategies. (AR)

HEE 5364 Teaching Housing and Home Furnishings (3). This course is designed to upgrade competency in planning, researching, and evaluating experiences that are current in content and educational strategies. (AR)

HEE 5365 Teaching Food and Nutrition (3). This course is designed to upgrade competency in planning, researching, and evaluating experiences that are current in content and educational strategies. (AR)

HEE 5905 Directed Study in Home Economics Education (1-3). This course is designed for advanced students in home economics education who wish to pursue specialized topics. Requires prior approval of instructor. (F,S)

HEE 5927 Special Topics in Home Economics Education (1-3). This course includes the development, organization, instruction, evaluation, and administration of programs related to selected aspects of home economics education. (S)

HEE 6156 Teaching Home Economics in Diverse Environments (3). This course consists of utilization of current educational developments, evolving strategies, materials, and resources to teach and evaluate home economics programs in diverse settings. (S)

HEE 6915 Research in Home Economics Education (3). This course is an analysis and application of research pertaining to philosophy, curriculum, evaluation, and teacher education in home economics. Subject to approval of program advisor. (F)

HEE 6928 Special Topics in Home Economics Education (1-3). This course includes the development, organization, instruction, evaluation, and administration of programs related to selected aspects of home economics education. (F,S)

HEE 6937 Seminar in Home Economics Education (3). This course is an application of selected instructional, curricular, and/or administrative principles and practices to the solution of problems of special interest to home economics educators. Subject to approval of program advisor. (S,AR)

HES 5319 Teaching Health Education (4). Students will select various modern techniques and tools for teaching health education in elementary and secondary school settings. (AR)

HME 5225 Problems of Home Management in Contemporary Society (3). This course is the study of influence of diversified cultural impact on management life styles, with emphasis on problems of management resources. Discussion of problems related to single-parent homes, retirement, poverty, death, working parents, migrant families, and other human situations. Prerequisites: COA 2410, HME 4230, or permission of the instructor. (AR)

HME 5255 Independent Living for the Handicapped (3). This course explores the home and personal living skills required to empower persons with mental and physical

limitations to achieve their maximum independence. Suitable for students in special education, health, physical education, recreation, social work, home economics or anyone planning to work with elderly or handicapped. Approved for certification for teachers of the mentally retarded. (AR)

HSC 5455 Basic Driver Education (3). Content includes knowledge of the highway transportation system, rules and regulations. For Driver Education Certification endorsement. (AR)

HSC 5456 Advanced Driver Education (3). Content includes advanced skills for the teaching of driver's education. Prerequisite: HSC 5455. (AR)

HSC 5465 Administration and Supervision of Driver Safety Education (3). Content includes competencies for teacher preparation and improvement in driver and traffic safety education. Prerequisites: HSC 5455 and HSC 5456. (AR)

LAE 5336C Special Teaching Lab – English (3). Development of Instructional Skills, Techniques, and Strategies for Teaching English in the Middle and Senior High School. Prerequisite: EDG 5414.

LAE 5355 Literacy Instruction in the Intermediate Grades (3). Provides understandings, skills, and dispositions needed to teach reading and writing to students who have advanced beyond beginning stages. Required for students in VE Modified Masters Program. Prerequisites: RED 5152 or equivalent. Corequisite: EEX 4940.

LAE 5415 Children's Literature (3). Required in Early Childhood, Elementary and Reading Education Master's Programs. Provides knowledge and skill in critical analysis of purposes, strategies for teaching and evaluation of children's literature.

LAE 5426 Multicultural Perspectives in Teaching Language and Literature for Young Adolescents (3). This course is designed to provide students with a theoretical and practical basis for teaching and reading multicultural literature in the secondary school. Prerequisite: Admission into the program. (AR)

LAE 5465 Adolescent Literature in Middle/Secondary Schools (3). This course examines a wide variety of adolescent and young adult literature. Assists students in the development of instructional strategies for organizing literary experiences among young learners. Prerequisite: Admission into program. (AR)

LAE 5908 Directed Study in English Education (1-3) (ARR). The student plans and carries out an independent study project under direction. Prerequisite: Consent of instructor. (AR)

LAE 5927 Special Topics in Language Arts (3). Available to undergraduate and graduate education majors. Provides opportunities to develop skills and knowledge of reading/language arts instruction. Permission of the instructor required. (AR)

LAE 5945 Supervised Teaching: English Education (6). Supervised teaching in a junior or senior high school. Prerequisites: Admission to the Modified Masters Track Program and completion of prerequisite course work in education and subject matter area. (S)

LAE 6305 Instruction in Early Childhood Language Arts (3). Required in Master's program in Early Childhood Education. Refines skills related to program development, methods of teaching, selection of materials, and review of research in preschool, kindergarten and primary grades. Prerequisites: LAE 4314 or permission of the instructor.

LAE 6319 Instruction in Integrated Language Arts (3). Elective in masters program in Elementary Education. Refines skills related to program development, methods of teaching, selection of materials, and review of research in elementary education. Prerequisites: LAE 4314 or permission of the instructor.

LAE 6338 Multidisciplinary Methods of Writing Instruction (3). This course will provide the educator with how to teach writing for all ability levels and to write for different audiences, purposes and discipline including but not limited to a digital environment. Prerequisite: ENC 5703, ENC 5752, ENC 6734, ENC 6736, or ENC 6261

LAE 6339 Teaching English in the Secondary School (3). Analysis of methods, programs, and materials for teaching English in the middle school and senior high school, and development of teaching skills. Prerequisite: Undergraduate course in methods of teaching English. (S)

LAE 6815 Computers in English and the Language Arts (3). Covers the basics needed to integrate computers in teaching language arts. Emphasizes selecting and learning to use software to meet objectives in language, literature, and composition. Corequisites: English major or equivalent. (AR)

LAE 6925-26 Special Topics in English Education (1-3). Production and application of materials and techniques in English education in a laboratory or field setting. (AR)

LAE 6935 Seminar in English Education (3). Designed for advanced students, the readings and discussions will focus on policy issues and recent research in English education. Though primarily for experienced English teachers and supervisors, the course is open to administrators and others, with the consent of the instructor. (F)

LAE 7938 Doctoral Seminar in English Education (3). Advanced doctoral study of current theories and research related to English education. Prerequisites: LAE 6935, EDF 6486. (AR)

LEI 5166C Deviant Leisure (3). This course explores leisure pass times, that are forbidden by law, custom, or belief. Students will examine the negative aspects of leisure. (e.g. substance abuse, harmful sex, gambling and gang activity.)

LEI 5440 Program Development in Parks, Recreation, and Sports (3). This course examines the development of specific programs in parks, recreation, and sports. (S)

LEI 5510 Program Administration in Parks, Recreation and Sport (3). This course is a detailed analysis of administrative procedures and responsibilities in connection with parks, recreation facilities and human resources. (F)

LEI 5595 Seminar in Parks and Recreation Management (3). This course focuses on current problems, issues, and trends in the administration of parks and recreation programs. (F)

LEI 5605 Philosophical and Social Bases of Parks and Recreation Planning (3). This course concentrates on major phases of predesign, design, development, actualization of park and recreation facilities. The course will explore funding, budget, site selection, layout, and maintenance. (F)

LEI 5716 Program Planning in Recreational Therapy (3). Principles and practices in planning and implementing programs in recreational therapy settings. Special emphasis will be placed on a systematic approach through problem solving techniques. Prerequisite: LEI 3703. (S)

LEI 5719 Client Assessment, Evaluation and Documentation in Recreational Therapy (3). The course addresses client assessment, documentation and evaluation from the direct service perspective, administrative requirements, and health care regulatory agency demands. (S)

LEI 5801 Liability and Law in Leisure, Recreation and Sports (3). This course is a detailed analysis of legal issues related to leisure service, delivery and sport management including legal foundations, legal liability, disabled services and current case analysis. (S)

LEI 5907 Directed Study in Parks and Recreation Management (3). This course provides an opportunity for individuals interested in various aspects of park and recreation administration to work on their own under the close supervision of an advisor. Permission of the instructor is required. (F,S,SS)

LEI 6562 Leisure Services Marketing (3). This is an advanced application of service marketing principles and practices to both public and private leisure service industry to improve both effectiveness and efficiency of operations. (S)

LEI 6725 Administrative Aspects of Therapeutic Recreation (3). This is an in-depth examination of issues related to the roles and responsibilities of the Activity Therapies/Therapeutic Recreation Administrator. (S)

LEI 6726 Trends, Issues, and Managerial Aspects of Recreational Therapy (3). An examination of current issues, trends, and professionalization and managerial concerns in recreational therapy. Prerequisite: LEI 3703. (F)

LEI 6727 Disabling Conditions in Therapeutic Activity Services Administration (3). This is an in-depth review of disabling conditions for the development of in-service training in recreational therapy and adapted activity services. (S)

LEI 6815 Advanced Recreational Therapy Facilitation Techniques (3). Designed to provide an in-depth examination of RT facilitation techniques as they are implemented with individuals with various disabling conditions or limitations. (F)

LEI 6922 Supervised Field Experiences in Parks and Recreation Administration (3-6). This course provides a practical experience for individuals interested in administrative responsibilities. Permission of the instructor and Department Chairperson required. (F,S,SS)

LEI 6970 Thesis: Therapeutic Recreation (3-6). This is an elective in the Masters Recreational Therapy Track. It involves the design and preparation of an original

scholarly investigation in recreational therapy. Prerequisite: EDF 5481. Corequisite: STA 6166. (AR)

MAE 5348 Numbers and Operations for Teaching in Grades K-5 (3). Study mathematics education in numbers and operations for teaching grades K-5 to build teachers' knowledge of content, curriculum, teaching methods and student learning. Prerequisites: MAE 4310 or equivalent course.

MAE 5382 Number Systems, Rational Numbers, and Operations for Teaching in Secondary School (3). Study mathematics education in number systems, rational numbers, and operations to build secondary teachers' knowledge of content, curriculum, teaching methods, assessment, and student learning.

MAE 5516 Diagnosis and Remediation in Mathematics (3). Available to undergraduate and graduate education majors. Provides study of symptoms, causes and consequences of children's math difficulties. Supervised case study included. Prerequisites: MAE 4310, or permission of the instructor. (AR)

MAE 5655 Computers in Mathematics Education (3). Examines the use of computers (microcomputers) in secondary school mathematics. Designing, evaluating, and using varied types of programs in mathematics classes. Learning to use computers to design mathematics curriculum. (F)

MAE 5908 Directed Study in Mathematics Education (1-3). The student plans and carries out an independent study project under direction. Prerequisite: Consent of instructor. (F,S,SS)

MAE 5923 Special Topics in Elementary Math Education (3). Available to undergraduate and graduate education majors. Provides opportunities to produce and apply materials and strategies in math ed in elem and middle schools. (AR)

MAE 5945 Practicum: Mathematics Education (3-6). Supervised teaching and other professional development in an elementary, middle, or senior high school. Prerequisite: Permission of the instructor. (S)

MAE 6305 Instruction to Early Childhood Mathematics (3). Required in master's program in early childhood education. Refines skills related to program development, methods of teaching, selection of materials and review of research, in preschool, kindergarten and primary grades. Prerequisites: MAE 4310 or permission of the instructor. (AR)

MAE 6318 Instruction in Elementary Mathematics (3). Required in masters program in elementary education. Refines skills related to program development, methods of teaching, selection of materials, and review of research, in elementary mathematics education. Prerequisites: MAE 4310 or permission of the instructor. (F,S,SS)

MAE 6336 Teaching Mathematics in the Secondary School (3). Analysis of methods, programs, and materials for teaching mathematics in the middle and senior high school, and development of teaching skills. Prerequisites: Undergraduate secondary math methods and permission of the instructor. (S)

MAE 6337 Algebra, Statistics and Probability for Teaching in Secondary School (3). Study mathematics

education in algebra, statistics and probability to build teachers' knowledge of content, curriculum, teaching methods, assessment, and student learning.

MAE 6357 Elements of Algebra and Data Analysis for Teaching in Grades K-5 (3). Study mathematics education in algebraic thinking and data analysis for teaching grades K-5 to build teachers' knowledge of content, curriculum, teaching methods and student learning. Prerequisites: MAE 4310 or equivalent.

MAE 6358 Elements of Geometry and Measurement for Teaching in Grades K-5 (3). Study mathematics education in geometry and measurement for teaching grades K-5 to build teachers' knowledge of content, curriculum, teaching methods and student learning. Prerequisites: MAE 4310 or equivalent.

MAE 6381 Proportional Reasoning, Geometry and Measurement for Teaching in Secondary School (3). Study mathematics education in proportional reasoning, geometry, and measurement to build secondary teachers' knowledge of content, curriculum, teaching methods, assessment, and student learning.

MAE 6745 Current Trends and Issues in Mathematics Education (1-3). Trends and Issues in Math Curriculum, new textbooks, curriculum development projects; curriculum implementations and evaluations. Trends and Issues in Instruction, new techniques. Trends and Issues in Evaluations. "New tests", Research. (AR)

MAE 6899 Seminar in Mathematics Education (3). Designed to provide the advanced student with deeper understanding related to mathematics education. (SS)

MAE 6925 Workshop in Mathematics Education (1-3). Production and application of materials and techniques in math education in a laboratory or field setting.

MAE 7165 Curriculum Development in Mathematics Education (3). This course is required in the Ed.D. degree program in mathematics education. It will examine the history of K-12 mathematics curriculum and the current issues in mathematics education. Prerequisites: MAE 5655, MAE 6336, MAE 6899, and the entire advanced core.

MAE 7938 Doctoral Seminar in Mathematics Education (3). Advanced doctoral study of current theories and research related to mathematics education. Prerequisites: EDF 6486, minimum of 3 doctoral level math courses.

MHS 5340 Educational-Vocational Counseling (3). This course explores concepts and skills pertaining to vocational development, information systems, career education programs, educational-vocational counseling, and socio-psychological influences on career development. Prerequisite: MHS 5400.

MHS 5400 Counseling Skills and Techniques (3). Major theoretical concepts in counseling, competencies in relationship-building, interviewing, role-playing, simulation, and micro-counseling will be explored in this course.

MHS 5460 Crisis Counseling and Intervention (3). Prevention and intervention strategies in crisis situations including child abuse and neglect, suicide, substance abuse, AIDS, and personal loss. (AR)

MHS 6020 Foundations of Mental Health (3). This course provides an examination of the significant events in

the history of mental health care that has contributed to the development of the specialty within the counseling profession. Prerequisite: MHS 5400.

MHS 6200 Measurement and Appraisal in Counseling (3). This course will provide an in depth examination of the concepts and skills related to the use of tests and other appraisal procedures in counseling. Prerequisite: EDF 5481.

MHS 6410 Behavioral and Cognitive Modification Techniques in Counseling and Education (3). In this course, concepts and skills in using behavior modification, contingency contracting, cognitive behavior management, self-instructional training, problem solving skills and parent and/or teacher consultation.

MHS 6411 Counseling and Consultation in Community Settings (3). Extended laboratory experiences stressing the development of behavioral/cognitive intervention skills in short-term counseling and consultation. Prerequisites: MHS 5400 and MHS 6700.

MHS 6427 Adult Psychopathology (3). The study of the causes, treatment, and diagnosis of emotional and behavioral disturbances in adults will be examined in this course. Prerequisite: MHS 5400.

MHS 6428 Cross Cultural Counseling (3). In this course, concepts and skills involved in counseling clients with backgrounds different from the majority culture. Prerequisite: MHS 5400.

MHS 6450C Substance Abuse Counseling (3). This course will educate mental health practitioners in understanding substances and techniques in counseling those who abuse them. Prerequisite: MHS 5400.

MHS 6470 Human Sexuality Counseling (3). This course addresses counseling issues, strategies and resources in human sexuality relative to mental health professionals. Prerequisite: MHS 5400.

MHS 6500 Theories in Group Dynamics (3). A systematic examination of various theories and relevant research used in study of small group phenomena will be addressed. Prerequisites: MHS 5340, MHS 6513. (AR)

MHS 6505 Advanced Group Development Laboratory (3). Development of advanced skills in the analysis and understanding of group process, function, and structures through actual observation of an ongoing group will be addressed in this course. Prerequisites: MHS 6513, MHS 6514. (AR)

MHS 6511 Group Counseling (3). Exploration of roles and function of group counseling in meeting client needs in a variety of settings. Prerequisite: MHS 5400.

MHS 6512 Organization Development in Education (3). An analysis of theory and practice of organization development and planned change in educational systems. Prerequisites: MHS 6513 and MHS 6514. (AR)

MHS 6513 Human Interaction I: Group Process and Social Behavior (3). In this course, concepts, research, and theory relative to small group process. Students will participate in small face-to-face task groups, with an emphasis on developing competencies in diagnosis and intervention in small groups.

MHS 6514 Human Interaction II: Analysis of Group Participation (3). A focus on participation in an on-going group with attention given to examination of processes of small group phenomena such as interpersonal communication, norms, decision-making, leadership, authority, and membership will be provided in this course. Prerequisite: MHS 6513.

MHS 6519C Principles of Design in Group Intervention: Role of the Consultant (3). This course focuses on role of leader or trainer in complex training design in leadership and human relations training. Emphasis on diagnostic and behavioral skills that help groups become more effective. Prerequisites: MHS 6513, MHS 6514, MHS 6500, and MHS 6513. (AR)

MHS 6629 Human Interaction III: Organizational Consultation (3). Theoretical concepts and skills in organizational development and change will be examined as well as competencies in systems diagnosis and assessment, consultation, agenda setting, team building, decision-making, and feedback. Prerequisites: MHS 6513, MHS 6514. (AR)

MHS 6630 Program Evaluation and Research in Counseling & School Psychology (3). Prepares in foundational research skills & evaluates skills in the student's area of specialization, including competencies in designing evaluation proposals and conducting a program evaluation.

MHS 6700 Ethical, Legal and Professional Issues in Counseling (3). This course will provide an introduction to the ethical, legal and professional practices in the field of counseling.

MHS 6800 Advanced Practicum in Counseling (3). In this course, advanced competencies in counseling and consultation will be provided. Prerequisite: Course work completion.

MHS 6802 Personality Theories (3). In this course, a survey of the various cognitive, psychodynamic, behavioral, humanistic, existential and family systems theories of personality development and change will be examined.

MHS 6820 Supervised Field Experience in Counseling (4-9). A demonstration of the full range of competencies learned throughout the program in Counseling will be established through an internship. The internship placements include a variety of field settings. Prerequisites: MHS 6800 and course work completion.

MHS 6910 Directed Study in Counseling and School Psychology (1-6). Competencies contracted for between a student and an instructor in accordance with the student's individual needs will be permitted in this course. Permission of the instructor required.

MHS 6930 Special Topics in Counseling and School Psychology (1, repeatable to 9). In this course, special topics in relation to counseling or school psychology will be examined. Permission of the instructor required.

PEP 5115 Strength and Conditioning Techniques for Human Performance (3). This course provides the knowledge and skills to evaluate and prescribe health and fitness enhancement programs for healthy adults. (F)

PEP 5116 Exercise Prescription (3). This course provides the knowledge to prescribe exercise for persons with medical limitations, particularly cardiovascular disease. Prerequisites: APK 3110 and PET 5521. (S)

PEP 5117 Fitness for Older Adults (3). The course explores the value of physical activity for improving the physical and mental well being of older adults. Emphasis is placed on exercise prescription and supervision of programs for those working with older adults. Prerequisite: APK 3110. (AR)

PET 5052C Motor Learning for Sport Performance (3). The emphasis in this course is on current and advanced topics related to motor skill acquisition. Laboratory practices and applied techniques related to teaching are examined. (F)

PET 5206 Youth Sports (3). This course provides insight into the issues surrounding youth sport programs including: program development and analysis, parental influences, relationship of sport to psycho-socio development. (AR)

PET 5216 Sport and Exercise Psychology (3). This course includes an analysis of psychological variables that influence physical performance. The course is intended for prospective physical educators, coaches, and others interested in motor performance. (S)

PET 5256 Sociology of Sport (3). Students will be introduced to basic principles of the sociological bases of sport and physical activity. (S)

PET 5368 Exercise, Diet and Weight Management (3). The class prepares students to compare the effectiveness of exercise and several popular diets on weight control and body composition. Prerequisites: HUN 2201 and APK 3110.

PET 5391C Comprehensive Conditioning of Elite Athletes (3). The course prepares a student to develop a comprehensive conditioning program including metabolic, speed, flexibility, plyometric and resistance training. Prerequisite: APK 3110.

PET 5426 Curriculum in Physical Education (3). The emphasis is on curriculum design and development for Physical Education. Includes examination of objectives, content, methods of teaching and evaluation.

PET 5436 Physical Education Curriculum: K-8 (3). This course examines objectives, content, methods of teaching, and evaluative techniques in physical education. The emphasis is on curriculum design and development.

PET 5447 Curriculum in Physical Education 6-12 (3). The goal of this course is to understand the theoretical and practical aspects of designing, developing, and implementing curriculum for the secondary school.

PET 5521 Exercise Test Technology (3). This course provides the knowledge and skill required to conduct an EKG monitored graded exercise test. Prerequisite: APK 3110. (F)

PET 5693 Exercise Testing and Prescription of Special Populations (3). The course prepares a student to test and prescribe exercise programs for selected special population groups. Prerequisite: APK 3110.

PET 5906 Directed Independent Study in Kinesiology (1-3). Students will work independently on a topic concerning some phase of physical education or sport under the guidance of a faculty member. Registration is by permission of advisor. (F,S,SS)

PET 5925 Practicum in Physical Education (1-3). This course focuses in the production and/or application of materials and techniques for physical education in a classroom and/or field setting. (F,S)

PET 5936 Special Topics in Kinesiology (1-3). This course presents contemporary issues and practices in physical education and sport. (AR)

PET 5948 Practicum in Kinesiology (3). This course focuses on the production and/or application of materials and techniques for physical education in a classroom and/or field setting.

PET 6405 Health Fitness Director (3). This course prepares the student for ACSM's Health Fitness Director certification. Prerequisites: APK 3110 and PEP 5115. (SS)

PET 6535 Master of Science Research in Exercise and Sports Sciences (1-3). The course is for graduate students performing an independent research project (treatise) or thesis as part of the graduate program of study. Prerequisites: EDF 5481 or equivalent and PET 6597 – Survey of Research.

PET 6558 Human Performance in Extreme Environments (3). Maintaining optimal health, fitness, and performance during physical work in stressful environments including heat, altitude, cold and underwater pressure. Prerequisites: Anatomy, Physiology, Exercise Physiology.

PET 6597 Research in Kinesiology (3). This course covers the methods and techniques used in research in Kinesiology and Physical Education. The emphasis is on effective use of resources and writing techniques. (F)

PET 6785 Exercise Program Director (3). This course prepares the student for ACSM's Exercise Program Director certification examination. Prerequisites: APK 3110, PET 5521, and PEP 5115. (SS)

PET 6925-27 Practicum in Physical Education (1-3). This course focuses on the production and/or application of materials and techniques for physical education in a classroom and or field setting. (F,S)

PET 6932 Seminar in Kinesiology (3). Students will participate in the exploration, examination, and discussion of problems, issues, and trends in physical education and sport. (AR)

PET 6938 Graduate Research Seminar (1). The seminar is designed to introduce the graduate student to basic science concepts and hands on experience with scholarly inquiry in the sport and leisure science. Corequisite: EDF 5481.

PET 6940 Internship in Exercise Physiology: Graduate (3-6). This is a clinical experience, supervised by physician, designed to provide the student with competence in exercise prescription and leadership in preventive and rehabilitative outpatient exercise programs. Prerequisites: PET 5387, PEP 5115, and PEP 5116. (F,S,SS)

PET 6944 Supervised Field Experience (3-9). Students may use this course to become involved in an in-depth study, research project, or any one of a variety of other activities, under the guidance of a faculty member. (AR)

RCS 6031 Rehabilitation Counseling: Principles and Practices (3). A survey course that provides an orientation to the rehabilitation process including the history, principles, philosophy, and legal aspects of rehabilitation counseling and related fields.

RCS 6080 Medical Aspects of Disability (3). Medical etiology and remediation of disability. Includes genetic, biochemical, nutritional, and physical agents in mental retardation, learning disability, and emotional handicaps. Prerequisites: EEX 3202 or equivalent. (F)

RCS 6245 Psychological/Sociological Aspects of Disability (3). Psychological/sociological aspects of disability in relation to socio/political forces, attitudes, and behaviors that impede or facilitate the options of individuals with disabilities in schools and communities. (AR)

RCS 6625 Service Delivery and Case Management in Rehabilitation Counseling (3). This course covers an evaluation of disability and rehabilitation potential in the context of service delivery and case management in the vocational rehabilitation process. Prerequisite: RCS 6031 Rehabilitation Counseling: Principles and Practices.

RCS 6801 Advanced Practicum in Counseling and Consultation (3). Advanced competencies in counseling and consultation.

RCS 6821 Supervised Field Experience in Counseling and Consultation (9). Demonstration of the full range of competences learned throughout the program in counseling. Internship placements include a variety of field settings. Prerequisite: RCS 6801.

RED 5147 Developmental Reading (3). Process of reading. Principles, procedures, organization and current practices in the developmental reading program. Overview of instructional practices.

RED 5304 Literacy Instruction in the Primary Grades (3). Provides understandings, skills and dispositions needed to teach reading and writing to students who are beginning to become literate. Required for students in VE Modified Masters Program. Prerequisites: EDG 5415 and EDG 5415L. Corequisite: EEX 4940.

RED 5339 Subject – Related Reading (3). Skills, techniques and strategies for scaffolding the reading of struggling students and enhancing the comprehension and learning independence of all students using subject area materials.

RED 5447 Analysis and Production Reading Materials (3). Elective in graduate program in Reading Education. Exploration, creation, and evaluation of basic reading materials. Prerequisites: RED 4150 or equivalent. (AR)

RED 5448 Teaching Reading by Computer (3). Elective in graduate program in Reading Education. Exploring literacy development with technology. Evaluation and creation of computer programs for teaching reading in grades 4-12. No prior computer experience is required. (AR)

RED 5911 Directed Study in Reading (1-3). Elective in Reading Education. Directed study in area of reading instruction. Permission of the instructor required. (AR)

RED 5925 Special Topics in Reading (3). Elective in master's program in Reading Education. Study in a specified area of reading education. (AR)

RED 6008 Family Literacy: Research and Practice (3). This course examines early and family literacy practices including how these practices are similar and different from school practices. Family literacy programs are critically examined. Prerequisite: Must be a graduate student.

RED 6247 Organization and Supervision of Reading Program (3). Required in graduate program in Reading Education. Philosophy, history design, and operation of public and private reading programs. Prerequisites: RED 6314 or equivalent. (F,S)

RED 6305 Instruction in Early Childhood Reading (3). Required in graduate program in early childhood education. Program development, methods of teaching, selection of materials, and review of research, in preschool and early childhood reading education. Prerequisites: RED 4150 or equivalent. (AR)

RED 6314 Theory and Instruction in Literacy (3). Required in graduate program in elementary and reading education. Process of reading program development, methods of teaching, selection of materials, and review of research in elementary reading education. Prerequisites: RED 4150 or equivalent. (AR)

RED 6336 Reading in the Content Areas (3). Required in graduate programs in Elementary and Reading Education and in secondary Modified Master's Programs. Strategies for developing the reading abilities of students in specific subject areas. Prerequisite: RED 6314 For Reading Education majors. (AR)

RED 6515 Programs of Remediation in Reading (3). Required in graduate program in Reading Education. Knowledge and strategies necessary to improve students' reading abilities. Prerequisites: RED 6314 or RED 6305, RED 6546, or their equivalents. (SS)

RED 6540 Reading Assessment (3). Formal and informal assessment for evaluating students and planning data-driven instruction in reading. focus on record keeping and tracking progress, PK-college. Required for MS in reading.

RED 6546 Diagnosis of Reading Difficulty (3). Required in graduate program in Reading Education. Knowledge and strategies necessary to assess students' reading abilities. Prerequisites: RED 6155 or RED 6305, or its equivalent. (AR)

RED 6747 Research in Reading (3). Required in doctoral program and thesis track of Reading Education Master's program. Elective in standard Master's track. Includes reading research, critique, methodology and planning. Prerequisite: EDF 5481. (F,S)

RED 6805 Practicum in Reading (3). Elective in graduate program in Reading Education. Supervised experience as reading professional in teaching, assessing, supervising, or research role. Prerequisite: RED 6314. (F,S)

RED 6845 Clinical Procedures in Reading (3). Elective in graduate program in Reading Education. Reading

diagnosis, instruction, and reevaluation in a clinical setting. Prerequisites: RED 6515, RED 6546. (AR)

RED 6931 Seminar in Reading Education (3). Required in doctoral program and thesis track of reading master's program. Elective in standard Master's track. Deals with theory and practice of reading instruction. Prerequisites: Permission of the instructor and RED 6747. (AR)

RED 6932 Critical Issues in Reading Education (3). Elective in Reading Education master's program. Explores topics in specific reading education. (AR)

RED 6971 Thesis in Reading Education (6). Required in thesis track of reading master's program. Design, implementation, and written report of an original research investigation in reading education. Prerequisites: Advanced graduate standing and consent of instructor. (F,S,SS)

RED 7642 Critical Issues in Literacy Research and Practice (3). This course will focus on a variety of critical issues in literacy, including various types of research and practice. Open to all graduate students. Prerequisite: Must be a graduate student.

RED 7912 Doctoral Directed Study in Reading (1-6). An elective course in the reading education doctoral program. Directed research in a specified area of reading education. Repeatable. Prerequisite: Admission to reading education doctoral program. (AR)

RED 7938 Doctoral Seminar in Reading Education (3). Required in Reading Education doctoral track. Advanced study in current theories and research related to reading education. Prerequisites: RED 6747, RED 6931. (AR)

SCE 5314 Teaching and Learning in Elementary Science Education (3). This course focuses on advanced pedagogy and curriculum development for teaching K-6 science, emphasizing high-quality, research-based science instruction to engage a diverse group of learners. Corequisite: Placement or current teaching in a school.

SCE 5337 Secondary Science Lab: Methods and Materials (3). Increase the quantity and quality of laboratory experiences for secondary students by managing the laboratory safely, selecting appropriate activities, and evaluating student performance.

SCE 5905 Directed Study in Science Education (1-3). The student plans and carries out an independent study project under direction. Prerequisite: Consent of instructor. (F,S,SS)

SCE 5930 Special Topics in Elementary Science Education (3). Available to undergraduate and graduate education majors. Provides knowledge and skills, content, strategies and materials for teaching elementary science. Permission of the instructor required. (AR)

SCE 5937 Special Topics in Grades 6-8 Science Education (3). Curriculum and instruction focus is on grades 6-8 inquiry and reformed-based practices in earth/space science. Aligned with a new national K12 Science Education and FL NGSSS. Corequisite: Placement or current teaching in a school.

SCE 5945 Supervised Teaching: Science Education (6). Supervised teaching in a middle or senior high school. Prerequisites: Admission to the Modified Masters Track

Program and completion of prerequisite course work in education and subject matter area. (F,S)

SCE 6306 Instruction in Early Childhood Science (3). Required in masters program in early childhood education. Refines skills related to program development, methods of teaching, selection of materials, and review of research, in preschool, kindergarten and primary grades. Prerequisites: SCE 4310 or permission of the instructor. (AR)

SCE 6315 Instruction in Elementary Science (3). Required in masters program in elementary education. Refines skills related to program development, methods of teaching, selection of materials, and review of research, in elementary science education. Prerequisites: SCE 4310 or permission of the instructor. (AR)

SCE 6317 Teaching and Learning Interdisciplinary Approaches in Elementary Science Education (3). Curriculum and instruction focus is on K-5 inquiry and reformed practices based upon A Framework for K-12 science education: practices, crosscutting concepts, and core ideas: earth and space science. Corequisite: Placement or current teaching in a school.

SCE 6325 Instruction in Middle School Science (3). Refines skills related to program development, methods of teaching, selection of materials, and review of research in middle school science education. Focus is on 6-8 content and methods of teaching. Corequisite: Placement or current teaching in a school.

SCE 6366 Teaching Science in the Secondary School (3). Analysis of methods, programs, and materials for teaching science in the junior and senior high school, and development of teaching skills.

SCE 6545 Science Education and Community Resources (3). This course examines the utilization and cultivation of community resources to meet science education goals for various populations. (AR)

SCE 6925-26 Workshop in Science Education (1-3). Production and application of materials and techniques in science education in a laboratory or field setting. (AR)

SCE 6931 Special Topics in Science Education (3). An individual topic or limited number of topics not otherwise offered in the curriculum that facilitate science teaching in the elementary school will be selected. (AR)

SCE 6933 Seminar in Science Education (3). Analysis of research trends and selected topics in science education. Mainly for graduate students in secondary science education. Individual needs and interests will determine the fine structure of the course content. (S)

SCE 7145 Curriculum Development in Science Education (3). Analysis of theoretical basis of curriculum development in Science Education. Evaluation of currently available material. Development and testing of science curriculum materials. Prerequisites: SCE 6933, EDF 6486. (S)

SCE 7761 Research in Science Education (3). Application of research methodology to Science Education. Analysis of current research. Development of research proposal in Science Education. Conduct field study. Prerequisites: SCE 6933, EDF 6486, SCE 7145. Corequisite: SCE 7938. (SS)

SCE 7938 Doctoral Seminar in Science Education (3). Advanced doctoral seminar in current theories and research related to science education. Prerequisites: SCE 6933, EDF 6486. (SS)

SDS 5420 Counseling Students with Exceptionalities (3). An overview of academic, personal, social and career needs of students with physical and emotional disabilities and counseling implications and strategies for working with special education students.

SDS 5460 Crisis Counseling and Intervention (3). This course addresses prevention and intervention strategies in crisis situations including child abuse and neglect, suicide, substance abuse, AIDS, and personal loss. Prerequisite: MHS 5400. (S,SS)

SDS 6411 Counseling Children and Adolescents (3). Theory and application of counseling elementary age children and adolescents including family issues and interventions, legal and ethical considerations and counseling at-risk and exceptional children. Prerequisite: MHS 5400.

SDS 6700 Organization and Administration of School Counseling (3). This course covers components, elements and interventions of comprehensive, developmental school counseling program models with an emphasis on system organization, administration, and evaluation. (F,SS)

SDS 6784 School Law for Student Service Workers (3). An overview of current legal issues and problems for school counselors, psychologists and social workers are addressed. (SS)

SDS 6800 Advanced Practicum in Counseling (3). A field experience in a school setting that covers advanced competencies and application of individual and group counseling and consultation. Prerequisites: Course work completion, advisor approval. (F,S,SS)

SDS 6820 Supervised Field Experience in Counselor Education (9). This internship course covers a practical demonstration of the full range of competencies learned throughout the school counseling program. Internship placements include a variety of school field settings. Prerequisites: Coursework completion and SDS 6800. (F,S)

SDS 6930 Special Topics in Counseling and School Psychology (3, repeatable to 9). Courses covering special topics in relation to counseling or school psychology. (F,S,SS)

SMT 6055 Research and Teaching for Change in STEM Education (3). Provides an overview of justice, diversity, and inclusion in K-16 STEM education and prepares students to act against the inequities they witness on macro and micro levels.

SMT 6105 Knowing and Learning in STEM Education (3). Students will develop a deep understanding of learning theories and how these help inform research in formal and informal STEM education settings.

SMT 6120 Issues and Perspectives in STEM Education Research (3). Provides an overview of issues and perspectives in STEM education research. Students will explore historical and current trends and consider various approaches to conducting STEM education research.

SPM 5156 Sports Management and Administration (3). Examination of skills and knowledge required in the management and administration of sports-related careers in athletics, recreation, or industry. Prerequisites: Basic management courses: MAN 3025, PAD 4432 or equivalent.

SPS 6190 Academic Assessment and Intervention in the Schools (3). Students will receive supervised practice using norm-referenced and curriculum-based measures to provide academic assessments and monitor academic progress. Emphasis will be placed on linking academic assessment to intervention. Prerequisite: EDF 5481.

SPS 6191 Psycho-Educational Assessment I: Intellectual (3). This course addresses competencies in the assessment of intellectual ability and adaptive behavior in children. Corequisite: SPS 6191L for School Psychology majors. No corequisite for other majors. (F)

SPS 6191L Psycho-Educational Assessment I: Lab (2). Practical skills in the assessment of intellectual ability and adaptive behavior in children are covered in this course. Corequisite: SPS 6191. Lab fee required. (F)

SPS 6192 Psycho-Educational Assessment II: Process (3). This course addresses competencies in the assessment of psycho-educational processes in children and their relationship to intellectual ability. Corequisite SPS 6192L for School Psychology majors. No corequisite for other majors. Prerequisite: SPS 6191. (S)

SPS 6192L Psycho-Educational Assessment II: Lab (2). Practical skills in the assessment of psycho-educational processes in children are covered in this course. Emphasis on assessing disorders in the visual, auditory, haptic, language, and sensory integration areas. Corequisites: SPS 6191, SPS 6191L. Lab fee required. (S)

SPS 6193 Psycho-Educational Assessment III: Behavior (3). Competencies in behavioral and personality assessment of students within the school setting with emphasis on projective testing and behavioral observations are addressed in this course. Corequisite: SPS 6193L. Prerequisites: SPS 6191, SPS 6192. (SS)

SPS 6193L Psycho-Educational Assessment III: Lab (3). Practical skills in projective and behavioral assessment of students within the school setting are covered in this course. Corequisite: SPS 6193. Prerequisites: SPS 6191, SPS 6192. Lab fee required. (SS)

SPS 6199 Family-School Consultation and Collaboration (3). This course is designed to develop essential communicative/interactive interpersonal skills, as well as collaborative problem-solving skills, in special education, counseling, and school psychology graduate students. Corequisite: Graduate standing. (AR)

SPS 6678 Supervised Field Experience in School Psychology (1-10). An internship where students demonstrate of the full range of competencies learned throughout the program in School Psychology. Internship placements include a variety of field settings. (F,S)

SPS 6805 Professional Problems in School Psychology (3). In this course competencies in regard to the development, role and function of school psychologists are covered. General orientation and legal and ethical issues are included. (F)

SPS 6930 Academic and Behavioral Interventions in the Schools (3). An introduction course to effective academic and behavioral school-based interventions including a functional assessment of behavior. (SS)

SPS 6941 Supervised Practicum in School Psychology (1-3). Student engage in supervised clinical experience. This course may be repeated. Prerequisites: SPS 6805 and permission of the instructor.

SPS 7176 Consultation and Assessment with Culturally and Linguistically Diverse Populations (3). Issues in consultation and assessment of individuals with culturally and linguistically diverse backgrounds. (AR)

SPS 7195 Child Psychopathology: Assessment and Intervention in the Schools (3). This course emphasizes the consideration of development issues and processes when conceptualizing psychopathology and is designed to prepare school psychology students to provide assessment, direct intervention, and indirect intervention services in school settings. Prerequisite: SPS 6805.

SPS 7407 Behavioral Intervention in the Schools (3). This course is designed to introduce techniques of behavioral intervention applicable to the school setting. A problem solving approach to prevention and intervention at the individual, class and school level will be emphasized.

SPS 7705 Neuropsychological Issues in School Psychology (3). This course provides a review of neuropsychological theories and research that pertains to children and schooling. The goal of this course is to provide competencies in the application of neuropsychological perspective in school settings. Prerequisite: SPS 6191.

SSE 5381 Developing a Global Perspective (3). Theory, content, and practice. Introduction and utilization of learning materials and teaching strategies in Global Education for K-12.

SSE 5385 Special Teaching Laboratory: Social Studies (3). Development of instructional skills, techniques, and strategies for teaching Social Studies in the Middle School and Senior High School. Prerequisite: EDG 5414.

SSE 5908 Directed Study in Social Studies Education (1-3) (ARR). The student plans and carries out an independent study project under direction. Prerequisite: Consent of instructor. (F,S,SS)

SSE 5929 Workshop in Elementary Social Studies Education (3). Available to undergraduate and graduate education majors. Provides knowledge and skills, content, strategies and materials for teaching social studies. Permission of the instructor required. (AR)

SSE 5945 Supervised Teaching: Social Studies Education (6). Supervised teaching in a middle or senior high school. Prerequisites: Admission to the Modified Masters Track Program and completion of prerequisite course work in education and subject matter area. (S)

SSE 6305 Instruction in Early Childhood Social Studies (3). Required in masters program in early childhood education. Refines skills related to program development, methods of teaching, selection of materials, and review of research, in preschool, kindergarten and primary grades. (AR)

SSE 6355 Instruction in Elementary Social Studies (3). Required in masters program in elementary education. Refines skills related to program development, methods of teaching, selection of materials, and review of research in elementary social studies education. (AR)

SSE 6394 Social Studies in Other Nations (3). The course will examine the concept of social studies as a subject area in elementary and secondary schools found in both developed and developing nations. Comparisons and contrasts will be made. Prerequisites: SSE 6633, SSE 6939. (AR)

SSE 6633 Teaching Social Studies in the Secondary School (3). Analysis of methods, programs, and material for teaching social studies in the middle and senior high school, and development of teaching skills. (S,SS)

SSE 6795 Seminar: Research in Social Studies Education (3). The course will examine research in social studies education. The course will serve as a lab for developing a dissertation research design. Prerequisite: EDF 5481. Corequisites: EDF 6486, EDF 6403 or EDF 6475. (AR)

SSE 6924 Workshop in Content, Method, and Materials of Teaching Social Studies (1-3). Focus on content, methods, and materials needed for teaching social studies in the elementary school, K-6. (AR)

SSE 6925-28 Workshop in Social Studies Education (1-3). Production and application of materials and techniques in social studies education in a laboratory or field setting. (AR)

SSE 6939 Seminar in Social Studies Education (3). Designed for advanced students, the readings and discussions will focus on policy issues and recent research in social studies education. Though primarily for experienced social studies teachers and supervisors, the course is open to administrators and others, with the consent of the instructor. (S)

SSE 7938 Doctoral Seminar in Social Studies Education (3). Advanced doctoral study in current theories and research related to social studies education. Prerequisites: SSE 6939, EDF 6486. (AR)

TSL 5086C TESOL Issues and Methodologies I (3). Initial teacher preparation course which introduces issues, principles, and practices for teaching English to non-English speakers. Fulfills requirements.

TSL 5087C TESOL Issues and Methodologies II (3). Initial teacher preparation course which provides understanding, skills and dispositions needed to select, evaluate, and apply TESOL strategies in classrooms with non-English speakers. Fulfills requirements. Prerequisite: TSL 5086C.

TSL 5142 Curriculum Development in English as a Second Language (3). Description, analysis, planning, design, and evaluation of curriculum in English as a second language (K-adult). (F,S)

TSL 5245 Developing ESOL Language and Literacy (3). This course examines how linguistic theories are applied in the classroom for the development of language and literacy in language minority students. (F,S)

TSL 5253 Love and Language: Peace Building in the Foreign Language Classroom (3). This class explores the relationship between language and emotion, and investigates how this relationship and the field of peace linguistics can inform pedagogy in the language classroom

TSL 5361C TESOL for Secondary Teachers (3). Analysis, application and adaptation of ESOL methods to enhance instruction for linguistically and culturally diverse students. Emphasis on secondary level learners. Fulfills META requirements.

TSL 5371 Special Methods of TESOL (3). Investigation of modern techniques for the teaching of oral and written communication in English to non-native speakers of English, including the evaluation and development of materials for English to speakers of other languages. Issues in elementary, secondary, adult, vocational, and special education will also be addressed. (F,S)

TSL 5806 Bilingualism and Multilingualism in Language Education (3). Examination of foundations of multilingualism and how such supports contextualized language learning through inquiries into dual language development and language policy.

TSL 5938 Principles of ESOL Testing (3). Advanced study and research on current issues in the field of ESOL testing. Topics include principles and practices of ESOL testing for classroom use, communicative language test development, criteria for evaluating testing instruments, and study of standardized ESOL tests. Prerequisites: TSL 5371 or TSL 4340. (S)

TSL 6350 Troublesome English: Grammar for ESOL Teachers (3). Course is designed to enhance ESOL teachers' ability to understand and explain the operation of American English grammar using an inductive approach of exploration and discovery. (AR)

TSL 6375C Teaching ESOL Pronunciation and Accent Reduction (3). A course in the TESOL Master's program investigating the theories and methods of teaching pronunciation skills to ESOL students. Prerequisite: LIN 3010.

TSL 6376C Reading and Writing Strategies for ESOL Students (3). A Master's level course in the TESOL Master's program investigating theories and methods of teaching literacy skills, namely reading and writing, to ESOL students.

TSL 6908 Field Component (3). Provides opportunity to carry out a variety of projects designed to develop critical reflection about teaching beliefs and practices in an ESOL classroom environment. Prerequisites: Admission to MS/TESOL program and completion of required course work. (F,S)

School of Environment, Arts, and Society (SEAS)

The School of Environment, Arts and Society (SEAS) was launched in the Spring of 2010 in response to the growing need for innovative thinkers and leaders to address the complex environmental and societal challenges of the 21st century. SEAS supports the broad traditional disciplinary work within each of its departments while facilitating interdisciplinary approaches to understand the drivers of these pressing challenges, identify solutions, educate current and future leaders, and inform the public.

As an integral part of the College of Arts, Sciences and Education, SEAS unites faculty and students in the natural and social sciences with those in the humanities. SEAS links environmental thinking and action at every level and provides Worlds Ahead research and education at the BA, MS, and PhD levels in the Departments of Biology, Earth and Environment, and English.

Drawing on Miami's unique coastal, inter-American and cosmopolitan locale, SEAS students and faculty are at the forefront of environmental research and are working to ensure a sustainable future for Florida, the country, and the world. To further its global mission SEAS houses a number of premiere centers and programs including the Institute of Water and Environment, the Tropical Conservation Institute, the International Center for Tropical Botany, the Marine Sciences Program, the Creative Writing Program, the Center for the Humanities in an Urban Environment, and the Agroecology Program.

Rolando Santos Corujo, Assistant Professor
Helena Schmidtmayerova, Associate Teaching Professor
 ***Laura Serbus**, Associate Professor
Paul R. Sharp, Associate Teaching Professor
Anna Simonsen, Assistant Professor
 ***Philip K. Stoddard**, Professor
 ***Jamie Theobald**, Associate Professor
Oscar Valverde-Barrantes, Assistant Professor
Maureen Walter, Teaching Professor
 ***Jeffrey D. Wells**, Associate Professor
Elizabeth Whitman, Assistant Teaching Professor
 ***Yuying Zhang**, Associate Professor

*Holds Dissertation Advisor Status

Master of Science in Biology

To be admitted into the Master's degree program in Biology, a student must:

1. Hold a Bachelor's degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 average or higher during the last two years of the undergraduate program and submission of Graduate Record Exam scores.
3. Two letters of recommendation of the student's academic potential.
4. Be accepted by a faculty sponsor.
5. Receive approval from the Departmental Graduate Committee.
6. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

Degree Requirements

The Master of Science in Biology consists of a minimum 36 credits, including a thesis based upon the student's original research. A maximum of six credits of post baccalaureate course work may be transferred from other institutions, subject to the approval of the Graduate Committee.

Required Courses

BSC 6457	Introduction to Biological Research	3
BSC 5931	Thesis Proposal Seminar	1
	Workshops and Laboratories ¹	4
BSC 6971	Master's Thesis ²	6

Electives³ 22
Quantitative Skills Requirement⁴

¹ Following graduate committee approval, students may fulfill this requirement with any combination of graduate workshops, graduate laboratories, and graduate techniques courses (minimum of two separate courses).

² To be taken after qualifying exam is passed.

³ These must include at least 16 credits of courses in the Department of Biological Sciences. No more than six credits can be transferred from another graduate program, subject to the approval of the Graduate Committee. At least six credits must be at the 5000- or 6000-level (excluding thesis credits). Credits taken at the 4000-level beyond six, or at lower levels, will not count towards graduation.

⁴ Two semesters of graduate courses in quantitative skills (e.g., statistics, mathematics, computer programming), or demonstrated equivalence of such, is required for the Master of Science in Biology.

Graduation Requirements

A grade of 'C' or higher must be obtained in all courses with a cumulative average of 3.0 or higher in the 36 credits, and a thesis must be completed and accepted by the University.

Non-Thesis Track: Requirements

Doctoral candidates in the Biological Sciences Major who have filed the D-2 and D-3 forms that are accepted by the University Graduate School can receive a Master of Science in Biology en route to the PhD with "non-thesis track" appearing in the transcript.

Non-Thesis Track: Graduation Requirements:

A minimum GPA of 3.0 in all Graduate course work is required for the Master's degree.

Doctor of Philosophy in Biology

To be admitted into the Ph.D. program in Biology, a student must:

1. Hold a Bachelor's degree in a relevant discipline from an accredited college or university
2. Have a 3.0 grade point average during the last two years of the undergraduate program or a Master's degree in a relevant discipline;
3. Submission of official Graduate Record Exam (GRE) scores.
4. Be sponsored by a Biology faculty member with Dissertation Advisor Status (see list of graduate faculty with DAS).
5. Arrange to have three letters of recommendation sent to the Biology Graduate Program Director evaluating the applicant's potential for graduate work.
6. Receive approval from the Department Graduate Committee.
7. International graduate students applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

Degree Requirements

The Ph.D. in Biology is conferred on individuals in recognition of their demonstrated ability to master a specific field of knowledge and to conduct significant independent, original research. A minimum of 75 semester credits of graduate work beyond the baccalaureate are required, including a dissertation based upon the student's original research. A maximum of 36 credits may be transferred from a completed graduate program with the approval of the Advisory Committee.

Required Courses

BSC 7961	Dissertation Proposal Seminar	1
BSC 7982	Dissertation Defense Seminar	1
BSC 5945	Supervised Teaching in Biology Workshops and Laboratories ¹	2
BSC 7980	Ph.D. Dissertation	4
Electives ²		15
Quantitative Skills Requirements ³		8

Recommended Course

BSC 6457	Introduction to Biological Research	3
----------	-------------------------------------	---

¹Following graduate committee approval, students may fulfill this requirement with any combination of graduate workshops, graduate laboratories, and graduate courses (minimum of two separate courses)

²No more than 36 credits may be transferred from a completed graduate program, subject to the approval of the Graduate Committee.

³Two semesters of graduate courses in quantitative skills (e.g. statistics, mathematics, computer programming), or demonstrated equivalence of such, is required for the Ph.D. in Biology.

Graduation Requirements

A grade of 'C' or higher must be obtained in all courses with a cumulative average of 3.0 or higher in the 75 credits; two semesters of quantitative skills courses must be completed, and a dissertation completed and accepted by the University.

Combined MS in Forensic Science/PhD in Biology Pathway

The MSFS/PhD in Biology pathway combines the Master of Science in Forensic Science with a PhD in Biology. Student who pursue this degree will be enrolled in a continuous program; however, upon completion of all the requirements of the MSFS program (report option), students will be awarded a MSFS degree as they transition towards their PhD.

MSFS/PhD in Biology Pathway Requirements

For admission into the MSFS/PhD pathway, students must meet the admission criteria of a PhD student with the understanding that they will have an increased class load of 2-3 classes, e.g., Forensic Biology, Forensic Chemistry, and Forensic Analysis, when compared to the normal PhD applicant but will graduate with two degrees. The requirements will be as follows:

1. Hold a Bachelor's degree in a natural science from a relevant university.
2. Have a 3.0 GPA during the last two years of the undergraduate program and submission of official GRE scores.

3. Arrange to have three letters of recommendation sent to the Biology graduate program director evaluating the applicant's potential for graduate work.
4. Be sponsored by a Biology faculty member with Dissertation Advisor Status.
5. Receive approval from the Department Graduate program committee.
6. International graduate student applicants whose native language is not English are required to submit a score for Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IETLS). A score of 80 on the iBT TOEFL or 6.5 overall on the IETLS is required.

As these candidates will be dually enrolled in two graduate degree programs, candidates must complete minimum of 32 credit hours towards their MSFS degree with a grade of 'C' or higher and a cumulative GPA of 3.0. The MSFS report option must be completed and accepted by the University before full transition towards the PhD. Candidates must also complete a total of 75 credit hours toward the PhD with the allowance for credits transferred from the completed MSFS degree. The student will be able to earn both degrees in a similar time frame that it would take to obtain either degree if pursued consecutively.

Students will be required to select a Master's defense committee while pursuing the MSFS as well as a PhD dissertation committee. This committee may or may not be comprised of the same members as those selected for the Master's program. The Master's proposal should be presented after the second semester of admission and the PhD dissertation defense should be presented after the fourth semester after admission.

Required Courses

BSC 6457	Introduction to Biological Research	3
BSC 5931	Thesis Proposal Seminar	1
BSC 7961	Dissertation Proposal Seminar	1
BSC 5975	Thesis Defense Seminar	1
BSC 7982	Dissertation Defense Seminar	1
BSC 5406	Forensic Biology	3
CHS 5535	Forensic Analysis	3
CHS 5542	Forensic Chemistry	3
PCB 5665	Human Genetics	3
PCB 5685	Population Genetics	3

Elective Courses

PCB 6025	Molecular and Cellular Biology I	3
MCB 5116	Microbial Diversity	3
BSC 5459	Advanced Bioinformatics for Biologists	3
BOT 5852	Medical Botany	3
BOT 5727	Plant Genetics	3
PCB 5616	Applied Phylogenetics	3
STA 5207	Topics in Design of Experiments	3
STA 5507	Nonparametric Methods	3

Labs and Workshops

BSC 6925	Workshop: Non-Human DNA Profiling and Analysis	1
BSC 6926	Workshop in Biology: DNA Instrumentation	1
BSC 5935	Workshop in Biology: Advanced DNA Typing	1-2

Research

BSC 6971	Master's Thesis	6
----------	-----------------	---

Course Descriptions

Definition of Prefixes

BCH-Biochemistry; BOT-Botany; BSC-Biological Sciences; MCB-Microbiology; OCB-Biological Oceanography; PCB-Process Biology (Cell/Molecular/ Ecology/Genetics/Physiology); ZOO-Zoology

BCH 5040 Introduction to Biochemical Research (3).

Analysis of biochemical data and experimental design. Prerequisite: Graduate standing.

BCH 5134C Workshop in Chromatography Techniques (1).

Workshop covers the theory and practice of chromatographic techniques to separate complex mixtures of biomolecules, including absorption, ion exchange, size exclusion and affinity chromatography. Prerequisite: Graduate status.

BCH 5411C Techniques in Molecular Evolution Research (5).

Ribosomal genes from related organisms are amplified by polymerase chain reaction (PCR) and sequenced. Phylogenetic maps are made by computer from sequence data. Students may use material from their own research. Prerequisites: BCH 3033 and BCH 3033L, PCB 4524 and PCB 4524L or Graduate status.

BCH 6130C Workshop in DNA Synthesis and Amplifications (1).

Workshop in the chemical synthesis of DNA and the amplification of specific genes by the polymerase chain reaction (PCR). Students may synthesize DNA oligonucleotides for use in their own research. Prerequisites: Graduate status and Permission of the instructor.

BCH 6132C Workshop in Electrophoresis (1).

Workshop in the application of electrophoresis to biochemical and genetic experimentation. Students may use material from their own research in the laboratory section. Prerequisites: Graduate status and permission of the instructor.

BCH 6133C Workshop in DNA Sequencing (1).

Workshop in the manual and automated sequencing of DNA. Students may sequence DNA from their own research. Prerequisites: Graduate status and permission of the instructor.

BCH 6507C Workshop in Radiometry and Spectrophotometry (1).

Interaction of light with matter (absorption, fluorescence, light scattering) and emission (chemi-and bio-luminescence); analysis of spectra and enzyme kinetics. Prerequisites: PCB 3043 or permission of the Instructor.

BOT 5186C Advanced Marine Botany (3-4).

Study of the taxonomy, biology, and ecology of seaweeds, seagrasses, and mangroves including a student research project. Prerequisites: BSC 2011 or equivalent.

BOT 5159C Florida Plant Communities (3).

Two-week field trip to many diverse plant communities of the state. Ecological and environmental factors influencing plant distribution will be examined, contrasting vegetation among sites. Prerequisites: Ecology PCB 3043 or Permission of the instructor.

BOT 5304C Workshop in Plant Morphology (2). Techniques to analyze plant form and experience with the diversity plant morphology; field work using the collections at Fairchild Tropical Gardens. Prerequisites: 2 botany courses or permission of the instructor.

BOT 5515 Biochemistry of Plant Natural Products (3). Aspects of primary and secondary plant metabolism will be covered including bio-synthesis and degradation of natural products as well as their biological/pharmacological activity. Prerequisites: BCH 3033 or CHM 4304.

BOT 5575 Photobiology (3). BOT 5575L Photobiology Lab (1). The study of basic photochemical mechanisms as they occur in molecular biological processes such as photosynthesis, plant growth, animal vision, bioluminescence, and radiation damage. Prerequisite: Permission of the instructor.

BOT 5602 The Functional Ecology of Tropical Plants (3). BOT 5602L The Functional Ecology of Tropical Plants Lab (1). The relationship of climate and soils to the distribution and function of the major plant groups of the tropical regions. Prerequisites: Two courses in botany or permission of the instructor.

BOT 5605 Plant Ecology (3) BOT 5605L Plant Ecology Laboratory (1). In-depth study of plant ecology at three levels: individual, population, and community. Laboratory and field exercises will examine lecture topics. Prerequisites: PCB 3043 or permission of the instructor. Corequisite: Concurrent registration in lecture and lab courses.

BOT 5615 Workshop: Seed Conservation (1). Covers practical issues of seed conservation of tropical plants: longevity curves, seed germination protocols and seed conservation procedures. Prerequisites: Graduate students or permission of instructor.

BOT 5647 Ecology of Marine Vascular Plants (3). Biology and ecology of seagrasses and mangroves, with an emphasis on South Florida and Caribbean species. Physiological ecology, population and community ecology, and ecosystem processes. Prerequisite: Permission of the instructor.

BOT 5648 Workshop on Aquatic Plants (1). Biology and identification of aquatic plants. Prerequisites: Graduate status or permission of the instructor.

BOT 5704 Botanical Terminology, Latin and Nomenclature (2). Course is divided into 3 parts: 1) Botanical Latin and its use; 2) Plant description terminology, and current descriptive standards; and 3) Botanical nomenclature, the ICBN, Phylcode, and others. Prerequisites: BOT 5725C or BSC 5606, or approval of the Advisor.

BOT 5725C Plant Systematics (3). Theory and methods of classification of vascular plants using phylogenetic principles. Covers the integration of morphological and molecular characters. Prerequisites: Graduate students or permission of instructor.

BOT 5727 Plant Genetics (3). Topics related to higher plants, including polyploid inheritance, self-incompatibility, cytoplasmic inheritance, mutable alleles, complex loci, genome analysis, recombination and mutagenesis. Prerequisites: BSC 2010 and BSC 2011 and PCB 3063.

BOT 5728 Plant Molecular Systematics (2). DNA markers for phylogenetic analysis of vascular plants, including description of laboratory methods, computerized analytical techniques and evolutionary interpretation. Prerequisites: Graduate status or permission of instructor.

BOT 5728L Plant Molecular Systematics Laboratory (2). DNA markers for phylogenetic analysis of vascular plants, including description of laboratory methods, computerized analytical techniques and evolutionary interpretation. Prerequisites: Graduate status or permission of instructor.

BOT 5816 Ethnobotany (3). Review the use and management of plants by indigenous people. Discuss emerging theories in ethnobotany, examine the role of ethnobotany in conservation and resource utilization. Prerequisites: BOT 3810, BOT 3663, or ANT 3403, or permission of the instructor.

BOT 5816L Ethnobotany Workshop (1). Field methods in the study of plant use by traditional and modern societies. Examines botanical documentation, ethnological description and experimental design. Prerequisite: Permission of the instructor.

BOT 5817 Field Ethnobotany (1-4). A 4-week field course that introduces students to tropical vegetation and its use by traditional cultures. Topics include tropical botany, diversity, ecology, and the relationship between plants and people. Course may be repeated. Prerequisites: BOT 5816 and BOT 5816L or permission of instructor.

BOT 5852 Medical Botany (3). An examination of medicinal plants including the biology, chemistry, and pharmacology of botanical remedies, and their effects on human health. Prerequisites: BOT 3810 or BOT 5816 or permission of instructor.

BOT 5924 Workshop in Tropical Plant Families (3). An introduction to important spermatophyte families, including systematics, ecology, and conservation. Includes laboratory and field experience. Prerequisite: Permission of the instructor.

BOT 5925 Workshop in the Biology of Southern Florida's Native Trees (3). Distribution, floristic relationships, morphology, reproductive biology, taxonomy, and conservation of trees native to southern Florida. Prerequisites: BOT 3154, BOT 3663, or permission of the instructor.

BOT 5928 Workshop on Grasses and Sedges of Southern Florida (1). The systematics, ecology, and identification of South Florida grasses and sedges. Prerequisites: Graduate status or permission of the instructor.

BOT 6275 Plant Breeding Systems (3). Ecology, evolution, genetics and development of plant breeding systems. Prerequisite: Permission of the instructor.

BOT 6585C Plant Structure and Function (4). A quantitative assessment of plant architecture, morphology and anatomy in relationship to physiology, including the measurement of water relations, energy and gas exchange. Prerequisites: Permission of the instructor and graduate status.

BOT 6724 Readings in Pollination Biology (1). Current literature on pollination, including natural history, theory, experimental studies, and reviews. Prerequisites: Graduate status or permission of the instructor.

BOT 6818 Readings in Ethnobotany (1). An examination of 3 or 4 recent books in the ethnobotany or related disciplines, especially those dealing with theoretical issues. Prerequisites: BOT 5816, Graduate Standing, or permission of instructor.

BOT 6901 Readings in Plant Mating Systems (1). Current literature on theory, biology, and evolution of plant mating systems. Prerequisites: Graduate standing or permission of the instructor.

BOT 6920C Workshop in Field Techniques in Natural History of Insect/Plant Interactions (1). A workshop in the techniques for collecting and preserving plants and insects for biological and taxonomic research.

BOT 6921C Workshop in Field Techniques in Pollination Biology (1). Techniques to do a thorough study of the pollination biology of any flowering plant; basic methods and simple instruments for field observations, measurements and manipulations. Prerequisite: Graduate status.

BOT 6923 Workshop: Techniques in Plant Reproductive Biology (1). Workshop in techniques for research on pollination and fertilization in plants. Histological and microscopic examination emphasized. Prerequisites: Graduate status and permission of the instructor.

BOT 6926C Workshop in Plant Nutrient Analysis (1). Field and laboratory methods used in the assessment of nutrient availability for primary producers. Prerequisite: Permission of the instructor.

BOT 6928 Workshop on Plant Gas Exchange and Fluorescence (1). Field and laboratory methods used for measurement of plant photosynthetic production and transportation. Prerequisite: Permission of the instructor.

BOT 6935 Advanced Topics in Botany (3). An intensive study of particular plant topics not otherwise offered in the curriculum. May be repeated for credit with different subject content. Prerequisite: Graduate status.

BOT 6936 Readings in Plant/Animal Interactions (1). Current literature on coevolution of plants and animals, theory, experimental studies, and reviews. Prerequisites: Graduate standing or permission of the instructor.

BSC 5302 Ecosystems of the Past (3). Analysis of local to global change in environments through time using faunal distributions, biodiversity, biogeography, physical and chemical properties of sediments, and stable isotopes.

BSC 5405C Environmental Instrumentation (3). Theory and techniques for measurement of environmental parameters of interest to field biologist. Prerequisite: Permission of the instructor.

BSC 5406 Forensic Biology (3). Forensic applications of molecular biology including PCR, STR techniques and other laboratory methods and data interpretation. Prerequisite: Graduate status.

BSC 5446 Advanced Functional Genomics and Proteomics (3). Analysis of Modern Strategies to understand fundamental biological aspects using advanced genomics and proteomic approaches. Prerequisites: PCB 3063 or equivalent.

BSC 5459 Advanced Bioinformatics for Biologists (3). Introduction to bioinformatic resources/methods for biology graduate students, accessing, searching, retrieving, and analyzing data, including an in-depth research project. Prerequisites: BSC 2010, BSC 2011, PCB 3063.

BSC 5926 Graduate Bioresource Workshop (1). This workshop is designed to introduce Biology graduate students to the various resources available for graduate teaching and research. Prerequisite: Graduate status.

BSC 5927 Workshop: R Programming for Biologists (2). Statistical methods and biological/ecological applications using R programming language. Prerequisites: (Graduate standing in Biology) or (STA 3111 and STA 3112).

BSC 5928 Workshop: Vertebrate Animal Research (1). Reviews the ethical, legal and practical guidelines for conducting research with live vertebrate animals. Required for students capturing, handling or collecting vertebrate animals in the course of research or teaching. Prerequisites: Graduate status or permission of the instructor.

BSC 5929 Workshop: Paleoecology of South Florida (2). Sampling, preparation, and identification of diatoms and foraminifera from a freshwater to marine transect, and application of ecology to interpreting past ecosystems.

BSC 5931 Thesis Proposal Seminar (1). Presentation of thesis proposal seminar. Permission of major professor required.

BSC 5933 Current Topics in Tropical Biology (3). An intensive study of particular tropical biology topics not otherwise offered in the curriculum. Prerequisite: Permission of the instructor.

BSC 5935 Topics in Biology (1-3). An intensive study of a particular topic or limited number of topics not otherwise offered in the curriculum. May be repeated for credit with different subject content. Prerequisites: Senior or graduate status.

BSC 5936 Glaser Seminar: The Biology of Tomorrow (1). A series of lectures by an invited, internationally recognized authority in biological topics of current and future concern.

BSC 5945 Supervised Teaching in Biology (1-2). Teaching in a biological discipline, under the supervision of departmental faculty. Prerequisite: Graduate status.

BSC 5975 Thesis Defense Seminar (1). Presentation of thesis defense seminar. Permission of major professor required. Prerequisite: Thesis proposal seminar.

BSC 6314 Workshop: DNA Instrumentation and Analysis (1). Introduction to instrumentation and analysis software used for DNA profiling. Permission of the instructor required. Prerequisite: Permission of the instructor.

BSC 6415 Animal Cells in Culture (3). Biology of animal cells cultured in semi-synthetic media: cell nutrition

growth, cell cycle analysis, cellular transformation and differentiation, heterokaryons and somatic cell genetics. Prerequisite: Permission of the instructor.

BSC 6456C Microcomputer Use in Biology (1). Introduction to microcomputer operating environments, the utility of microcomputers in biology, and computer interfacing to biological instrumentation. Prerequisite: Permission of the instructor.

BSC 6457 Introduction to Biological Research (3). Analysis of existing biological data and experimental design. Prerequisite: Graduate status.

BSC 6913 Student Research Lab (1-12). Independent laboratory study in a project or projects of the student's choice. Registration by consultation with instructor. May be repeated for additional credit.

BSC 6925C Workshop: Non-Human DNA Profiling and Analysis (1). Current techniques in non-human DNA profiling using molecular markers. Prerequisite: Permission of the instructor.

BSC 6926 Workshop in Biology (1-2). A short intensive treatment of a specialized research topic or technique. Prerequisite: Permission of the instructor.

BSC 6936 Topics in Biology (1-3). An intensive study of a particular topic or limited number of topics not otherwise offered in the curriculum. May be repeated for credit with different subject content. Prerequisites: Senior or graduate status.

BSC 6946 Graduate Biology Internship (1-12). Non-thesis / non-dissertation internship in a laboratory or program outside FIU working under the supervision of a host scientist and an FIU faculty member. Prerequisite: Admission to candidacy.

BSC 6950 Writing, Publishing, and Communicating Peer-Reviewed Papers in Biological Sciences (3). This course trains early career scientists in the skills of mastering Biological Science writing, peer review, and publishing.

BSC 6971 Master's Thesis (1-12). Completion of thesis. Prerequisite: Permission of Major professor.

BSC 7961 Dissertation Proposal Seminar (1). Presentation of doctoral dissertation proposal seminar. Prerequisite: Permission of Major Professor required.

BSC 7980 Ph.D. Dissertation (1-12). Completion of dissertation. Prerequisites: Permission of Major Professor and Doctoral Candidacy.

BSC 7982 Dissertation Defense Seminar (1). Presentation of doctoral dissertation defense seminar. Permission of Major Professor required. Prerequisite: Dissertation Proposal Seminar.

MCB 5116 Microbial Diversity (3). **MCB 5116L Microbial Diversity Laboratory (1).** Analysis of metabolic and morphological diversity in bacteria in the context of bacterial systematics. Prerequisites: MCB 3020 and MCB 3020L and an additional course in microbiology or biochemistry. Corequisite: Concurrent registration of both lecture and lab courses.

MCB 5205 Advanced Microbial Pathogenicity (3). Overview of microbial pathogenicity, including interactions with hosts, evolution of pathogens, virulence factors,

toxins, antibiotics, and case studies of specific pathogens. Prerequisites: MCB 3020 or permission of the instructor.

MCB 5315C Workshop: Prokaryotic Cloning (2). Description of molecular genetic methods for manipulation of prokaryotic DNA. Prerequisites: PCB 3063; BCH 3033 or CHM 4304; or permission of the instructor.

MCB 5405 Biology of Photosynthetic Bacteria (3). Study of the physiology and ecology of photosynthetic bacteria, including blue-green algae (cyanobacteria), purple and green bacteria, and halobacteria.

MCB 5412 Advanced Microbial Physiology (3). Overview of microbial metabolic diversity, including prokaryotic metabolic pathways, stress responses, cell signaling, and metabolic regulation. Prerequisite: Permission of the instructor.

MCB 5453L Workshop: Prokaryotic Cell Signaling (1). Covers chemical signals used by prokaryotes for cell-to-cell communications. Prerequisites: MCB 3020 or permission of instructor.

MCB 5605 Microbial Ecology (3). Principles and applications of microbial interactions with the environment. Current research areas are emphasized. Prerequisite: Graduate level standing.

MCB 6445 Microbial Bioluminescence (3). Molecular mechanisms, physiology, genetics and ecology of bioluminescence in microorganisms, particularly bacteria. Prerequisite: Permission of the instructor.

MCB 6635 Marine Microbiology (3). **MCB 6635L Marine Microbiology Lab (1).** Physiological-ecological study of the distribution and biology of marine bacteria; diseases of marine animals; bacterial role in oceanic mineral cycling. Prerequisites: MCB 3020 and MCB 3020L and BCH 3033 and BCH 3033L or MCB 4404 and MCB 4404L.

MCB 6920 Luminescence Workshop (2). Bioluminescence and chemiluminescent theory and methods applied to luminous bacteria and molecular biology. Prerequisite: Permission of the instructor.

MCB 6935 Advanced Topics in Microbiology (3). An intensive study of particular microbiological topics not otherwise offered in the curriculum. May be repeated for credit with different subject content. Prerequisite: Graduate status.

OCB 5006 Advanced Biological Oceanography at Sea I (3). An in-depth overview and critical discussion of current methods employed in biological oceanography including design of and working on research ships and planning of research cruises. Prerequisite: Permission of the instructor.

OCB 5007C Advanced Biological Oceanography at Sea II (4). A hands-on experience in research at sea involving cruise planning, participation in an offshore cruise on a research vessel, and subsequent sample analysis, data evaluation and research report. Prerequisites: OCB 5006 or permission of the instructor.

OCB 5575L Workshop: Aquatic Flow Cytometry (1). A practical introduction to theories and applications of flow cytometry in the analyses of aquatic microorganisms (bacteria, phytoplankton) and their physiology. Prerequisite: Permission of the instructor.

OCB 5634 Marine Ecology (3). OCB 5634L Marine Ecology Lab (1). Review processes determining species distribution and abundance in marine ecosystems. Energy flow and trophic relationships examined. Prerequisite: PCB 3043. Corequisite: Concurrent registration of lecture with lab course.

OCB 5636 Advanced Marine Microbial Ecology (3). Diversity, ecology and physiology of marine viruses, bacteria and protozoa, their role in marine food webs and the biogeochemical cycling of carbon and nutrients, and the significance of microbial food webs for marine productivity. Prerequisites: BSC 2010, BSC 2011, OCB 3043, or graduate standing.

OCB 5670L Techniques in Biological Oceanography (1). A laboratory course designed to acquaint the student with biological sampling techniques at sea. Shipboard experience will be required as part of the course. Prerequisites: Previous course in marine biology and permission of the instructor.

OCB 5715 Advanced Fisheries Science (3). Theory and techniques of fisheries science comprising recruitment, growth, migration, population dynamics, modeling and measurement techniques. Prerequisite: Graduate standing.

OCB 6716 Fisheries Population Dynamics (3). Application of statistical techniques and the different classes of fisheries population dynamics models used in fish stock assessment. Prerequisites: OCB 4711 or OCB 5715.

OCB 6927C Workshop in Scientific Diving (2). Covers all aspects of conducting safe underwater research, including theoretical and practical aspects of diving, diving equipment, and scientific techniques. Requires original research. Prerequisites: Open water diving certification, permission of the instructor, FIU Diving Medical clearance, pass standardized swim test, at least 18 years old.

PCB 5025L Molecular Biology Techniques Laboratory (3). Covers DNA and RNA extraction, digestion, electrophoresis, Southern analysis, RFLP analysis, PCR amplification, cloning and automated sequencing. Prerequisites: Graduate status or permission of the instructor.

PCB 5046 Advanced Plant Conservation Biology (3). Survey of the causes and consequences of anthropogenic disturbances on plant diversity at different spatial scales, including critical evaluation of strategies to mitigate these impacts. Prerequisites: PCB 3043 or graduate status.

PCB 5184 Workshop in Microtechnique (1). Laboratory techniques required for preparation of tissues for light microscopy/histological study. Prerequisite: Graduate status.

PCB 5215 Workshop in Histo—and Immunocyto—Chemistry (1). Laboratory techniques for preparation of paraffin-embedded and frozen sections; selected procedures to demonstrate the fundamentals of histochemical and immunocytochemical labeling methods. Prerequisite: Graduate status or permission of the instructor.

PCB 5235 Current Topics in Comparative Immunology (1). A weekly seminar/discussion course consisting of research presentations by students, faculty and visiting

scientists in the area of comparative immunology. It is recommended for students with a research interest in the comparative study of mammalian and nonmammalian species or using alternative animal models. Prerequisite: Permission of the instructor.

PCB 5238 Marine Comparative Immunology Workshop (1). A workshop at the Keys Marine Lab to present general and unique research methodologies associated with the immunology of marine animals. Prerequisite: Permission of the instructor.

PCB 5239 Immunophysiology (3). Physiological and endocrine regulation of the vertebrate immune system. Prerequisite: PCB 4233.

PCB 5259 Topics in Developmental Biology (3). Molecular and cellular mechanisms in the development of plants and animals. Prerequisite: Permission of the instructor.

PCB 5307 Limnology (3). PCB 5307L Limnology Lab (1). Chemical and physical properties of standing and flowing freshwater systems; ecophysiology and interactions of the fresh water flora and fauna in relation to abiotic factors; oligotrophic to eutrophic conditions.

PCB 5327 Coastal Ecosystems and Modeling (3). Basics of ecology for coastal and wetland ecosystems. The theory and mechanisms of simulation modeling. Hands-on creation and application of computer models in ecological research. Prerequisites: PCB 3043 and MAC 2311 or permission of the instructor.

PCB 5328 Spatial and Landscape Ecology (3). Ecological processes with spatial components, including neighborhood interactions, foraging, metapopulations, infectious diseases, invasive species, and habitat associations. Prerequisite: PCB 5423. Corequisites: PCB 5443; MAC 2311.

PCB 5356L Tropical Ecology Field Lab (3). Field course in Costa Rica with fieldwork in two or more diverse habitats (rainforest, and dry forest). Emphasis on diversity and interactions between species. Visits to selected sites of deforestation, conservation and restoration.

PCB 5376 Animal Physiological Ecology (3). PCB 5376L Animal Physiological Ecology Laboratory (1). Evolution-oriented approach to physiological adaptations of animals living in diverse environments. Considers the inter relationship between behavior, energetics, and integrative regulation of metabolism. Prerequisites: PCB 3043; BCH 3033 or CHM 4304.

PCB 5405 Biochemical Ecology (3). Principles of chemical communication between diverse organisms and the importance of a variety of allelochemicals in community structure. Prerequisite: Permission of the instructor.

PCB 5407 Workshop: Microelectrodes in Microbial Ecology (1). Use of microelectrodes to measure chemical micro-environments and biological processes in natural samples. Hands-on experience with O₂ and pH electrodes. Prerequisite: Permission of the instructor.

PCB 5415 Advanced Behavioral Ecology (3). In-depth investigation of the adaptive significance of behavior. Synthesis and discussion of literature and theory pertaining to the strategies and tactics organisms use to

survive and reproduce. Prerequisites: Graduate status or permission of the instructor.

PCB 5418C Advanced Marine Protected Areas (4). Study of theory and methods for the design and management of Marine Protected Areas including a research project. Prerequisites: BSC 2010 and BSC 2011.

PCB 5423 Advanced Ecology: Populations and Communities (3). Advanced analysis of population and community ecology. Prerequisites: PCB 3043 or permission of the instructor or graduate status.

PCB 5443 Advanced Ecology: Communities and Ecosystems (3). Advanced analysis of ecological principles pertaining to communities, ecosystems, and landscapes, with special emphasis on the South Florida and Caribbean region. Prerequisites: PCB 3043 or permission of the instructor or graduate status. [A]

PCB 5596 Workshop: In Situ Hybridization (1). Analysis of gene expression by in situ hybridization techniques using whole mount and cryosectioned tissues. Prerequisites: Graduate status or permission of the instructor.

PCB 5615 Molecular and Organismal Evolution (3). The evolutionary relationships among nucleotides and proteins as well as the processes which yield these relationships. The possible molecular events leading to speciation. Prerequisite: PCB 3063.

PCB 5616 Applied Phylogenetics (3). Methods of phylogenetic analysis with a focus on pragmatic applications to ecological and evolutionary studies. Hands-on experience with current computer programs for phylogenetic analysis. Prerequisites: Graduate status or permission of the instructor.

PCB 5665 Human Genetics (3). **PCB 5665L Human Genetics Lab (2).** Principles and techniques in the analysis of humans and primates. Prerequisites: PCB 3063 and PCB 3063L, or permission of the instructor. Corequisite: Concurrent registration of lecture with lab course.

PCB 5677 Evolution and Development (3). The models and evidence for the interaction of development and evolution, using both plant and animal systems. Prerequisite: Permission of the instructor.

PCB 5685 Population Genetics (3). Advanced analysis of gene and genotype frequencies in theoretical populations and analysis of real data. Linkage equilibrium, drift, migration and selection are a few of the topics covered. Prerequisite: PCB 3063.

PCB 5686 Population Biology (3). **PCB 5686L Population Biology Lab (1).** Intrinsic properties of natural and theoretical populations and their dynamics and interactions, and responses to disturbance. Includes field problems and computer exercises. Prerequisites: PCB 3063 and PCB 4674, or permission of the instructor.

PCB 5687 Evolutionary Ecology (3). **PCB 5687L Evolutionary Ecology Lab (1).** Adaptations and interactions of plants and animals in natural and disturbed habitats. Prerequisite: PCB 3043.

PCB 5725 Membrane Signal Transduction (3). Hormones and neurotransmitters as extracellular messengers. Membrane receptors and mechanisms of

signal transduction: membrane channels and enzymes, direct linkage and G-protein linkage. Second messengers. Prerequisites: BCH 3033 or CHM 4304.

PCB 5786 Membrane Physiology (3). Chemical and physical properties of the plasma membrane, its biosynthesis and functions in transport and signal transduction. Prerequisites: PHY 2048, PHY 2049, BCH 3033.

PCB 5835 Neurophysiology (3). **PCB 5835L Neurophysiology (1).** Comparative neurophysiology; physicochemical mechanisms of resting and action potentials; synaptic transmission; neural coding and integration; sensory-motor function and neurophysiological basis of behavior. Prerequisites: BCH 3033 and MAC 2311.

PCB 6025 Molecular and Cellular Biology I (3). Protein structure, catalysis, kinetics, and molecular conformation, intermolecular forces; Prokaryotic recombination, transcription and translation, gene regulation and genome organization. Prerequisite: Graduate status.

PCB 6027 Molecular and Cellular Biology II (3). Eukaryotic recombination, transcription, translation, gene regulation and genome organization; Cellular components, cell structure, cell division, cell signaling, development, immunology and cancer. Prerequisite: Graduate status.

PCB 6176C Biological Electron Microscopy (5). Principles and techniques of transmission and scanning electron microscopy as applied to biological materials. Lecture-laboratory combination, enrollment limited. Prerequisite: Permission of the instructor.

PCB 6236 Comparative Immunology (3). An analysis of the immune systems and mechanisms of invertebrate and vertebrate animals. Prerequisite: Permission of the instructor.

PCB 6237 Immunogenetics (3). The impact of classical and molecular genetic analyses on our understanding of the immune response. Prerequisites: PCB 4233 and PCB 3063; or permission of the instructor.

PCB 6318 Readings in Marine Ecosystems Ecology (1). Analysis of current literature on theory, data and case studies of marine ecosystem ecology. Prerequisites: Graduate status or permission of the instructor.

PCB 6417 Workshop: Modeling in Behavioral Ecology (1). Workshop on modeling techniques used to investigate behavioral ecological questions. Development of models to generate testable predictions in behavioral ecology. Prerequisite: Permission of the instructor.

PCB 6526 Advanced Molecular Biology (3). Molecular genetics, controlling mechanisms, recombinant DNA, gene splicing and gene vector construction of viral, bacterial, plant and animal systems. Prerequisite: Permission of the instructor.

PCB 6617 Advanced Phylogenetics (3). Current issues and methods in phylogenetics for advanced students. Prerequisites: PCB 5616 or permission of the instructor.

PCB 6618C Workshop: Parallel Bayesian Phylogenetics (1). Workshop in the analysis of data to infer evolutionary relationships using Bayesian methods implemented in parallel on a computer cluster. Prerequisite: Permission of the instructor.

PCB 6675 Evolutionary Biology and Ecology in the Antilles (3). Introduction to the main ecological features of the Antilles and to the main evolutionary mechanisms behind the unique biodiversity of these islands. Prerequisite: Graduate status.

PCB 6933 Trends in Neurobiology (2). Critical analyses and discussions of selected research articles of current interests. Seminar format. Prerequisite: Permission of the instructor.

PCB 6935 Advanced Topics in Genetics (3). An intensive study of particular genetical topics not otherwise offered in the curriculum. May be repeated for credit with different subject content. Prerequisite: Graduate status.

PCB 7235 Reproductive Immunology (3). Molecular and cellular interactions in early development, ontogenetics, and mother and fetus. Prerequisite: Permission of the instructor.

PCB 7689 Advanced Topics in Population and Evolutionary Genetics (3). Comparison of the synthetic and mutational drift hypotheses; relationships between molecular and phenotypic evolutionary rates and the phenotypic effects of various forms of mutation. Prerequisite: Permission of the instructor.

ZOO 5265 Biology of Crustaceans (3). **ZOO 5265L Biology of Crustaceans Laboratory (1).** Morphology, physiology, systematics and evolution in crustaceans.

ZOO 5371 Clinical Anatomy of the Trunk and Limbs (3). **ZOO 5371L Clinical Anatomy of the Trunk and Limbs Lab (1).** A detailed analysis of the anatomical foundations of kinesiology and physical rehabilitation. Special emphasis will be placed on the functional anatomy of the trunk, pectoral and pelvic limbs with clinical correlations to the major disorders commonly treated by physical and occupational therapists. Prerequisites: ZOO 3731 or ZOO 4733. Corequisite: ZOO 5371L.

ZOO 5376 Animal Design and Movement (4). Basic biomechanical and behavioral theories of how animals feed and move. Prerequisites: BSC 2010, and BSC 2011, PHY 2053 and PHY 2054. [D]

ZOO 5424 Herpetology (3). **ZOO 5424L Herpetology Laboratory (1).** Biology of amphibians and reptiles from a systematic perspective. The three orders of living amphibians and the six living orders of reptiles are covered in detail. Prerequisites: BSC 2010 and BSC 2011, PCB 3043, or permission of the instructor. Corequisite: Concurrent registration of lecture with lab course.

ZOO 5456 Ichthyology (3). **ZOO 5456L Ichthyology Lab (1).** Systematics, structure, function, ecology, and evolution of fishes. Prerequisites: BSC 2010, BSC 2011 and PCB 3043. Corequisite: Concurrent registration of lecture with lab course.

ZOO 5732 Advanced Anatomy Demonstration (1-4). Dissection and demonstration of the human body with the emphasis on structure and function. May be repeated to a maximum of eight credits. Prerequisites: ZOO 3733 and ZOO 3733L, or permission of the instructor.

ZOO 5745 Advanced Neuroanatomy (3). In-depth knowledge of the embryonic development, structure, and function of the human nervous system with a great deal of

clinical consideration. Prerequisites: ZOO 4743 or permission of the instructor.

ZOO 5746 Comparative Neurobiology (4). Structure and function of neural systems at many levels including biophysical and cellular mechanisms, molecular processes, neural circuits, development, and anatomy. Prerequisites: BSC 2010 and BSC 2011, CHM 1045 and CHM 1046 and PHY 2048; graduate standing or permission of the instructor.

ZOO 5785 Advanced Neurobiology (3). An in depth treatment of the nervous system covering molecular and cellular function, sensory and motor systems, and the neural basis of behavior. Prerequisite: Graduate standing.

ZOO 5895 Zoo Conservation Biology (1). Zoo Conservation Biology is a hands-on workshop that examines of the role of zoos in conservation science, conservation action, and conservation education. Prerequisite: Permission of Instructor

ZOO 6423 Workshop on Reptile and Amphibian Sampling (1). Biology and sampling methods for reptiles and amphibians. Prerequisite: Graduate status.

ZOO 6782 Advanced Sensory Systems in Neurobiology (3). A comparative overview of sensory systems for graduate students, covering environmental stimuli, physical transduction, neural processing, and behavioral responses. Prerequisite: ZOO 5785 or permission of the instructor.

ZOO 6935 Advanced Topics in Zoology (3). An intensive study of particular topics not otherwise offered in the curriculum. May be repeated for credit with different subject content. Prerequisite: Graduate status.

Creative Writing

Ana Menendez, Associate Professor

Julie Wade, Associate Professor

Master of Fine Arts in Creative Writing

The Master of Fine Arts in Creative Writing is the terminal degree for the practicing writer, designed to qualify the recipient to teach creative writing on the collegiate and university level. The program is housed at the Biscayne Bay Campus. Writers enjoy the opportunity for editorial experience with Gulf Stream magazine, the annual FIU literary awards competition, the annual FIU Writers Workshop, the Miami Book Fair, and the Writers on the Bay Series, which has included residencies by such writers as Richard Ford, Robert Pinsky, Isabel Allende, Tim O'Brien, John Wideman, Michael Ondaatje, Pat Conroy, Luisa Valenzuela, Scott Turow, and Amy Tan. Such major writers as Maxine Kumin, James Jones, Pete Hamill and George Garrett have served on the regular faculty.

Admission Requirement

Applicants must have a baccalaureate degree with a 3.0 GPA, must submit official GRE scores, and must have completed a minimum of nine semester hours of undergraduate work in creative writing. However, admission is based primarily on the strength of the applicant's submitted writing sample. Deadline is the second Wednesday in January.

Degree Requirement

Forty eight semester hours are required in studio/academic curriculum, with a minimum in each area as follows:

Literature	15
Writing Workshop (both poetry and fiction required)	18
Form and Theory	3
Thesis	6

There is no foreign language requirement. Graduate workshops include short fiction, the novel, memoir, screenwriting, creative non-fiction, and poetry. The program places emphasis on the preparation and completion of a book-length creative thesis of publishable quality. Candidates must pass a final defense/examination.

Fellowships, teaching assistantships, and tuition remission scholarships are available on a competitive basis.

CRW 5130 Advanced Fiction Workshop (3). Practice in the techniques and analysis of fiction through the reading, discussion, and revision of student manuscripts in a workshop setting. May be repeated. Prerequisite: 9 hours undergraduate CRW course work.

CRW 5331 Advanced Poetry Workshop (3). Practice in the techniques and analysis of poetry through the reading, discussion, and revision of student manuscripts in a workshop setting. May be repeated. Prerequisite: 9 hours undergraduate CRW course work.

CRW 5620 Advanced Screenwriting Workshop (3). Practice in the techniques and analysis of screen-writing through the reading, discussion, and revision of student manuscripts in a workshop setting. May be repeated. Prerequisite: 9 hours undergraduate CRW course work.

CRW 5934 Special Topics in Creative Writing (1-5). A course designed to give students an opportunity to pursue special studies in aspects of creative writing not otherwise offered. May be repeated. Prerequisites: CRW 2001 and three hours of CRW on the 3000/4000 level.

CRW 5935 Special Topics in Creative Writing (1-5). Gives students an opportunity to pursue special studies in aspects of creative writing not otherwise offered. May be repeated. Prerequisites: CRW 2001 and three hours of CRW on the 3000/4000 level.

CRW 5940 Advanced Independent Study in Creative Writing (1-5). Development and completion of a graduate level independent project in creative writing undertaken with the consent of the instructor. Prerequisites: Graduate standing and permission of the instructor.

CRW 6806 Teaching Creative Writing (3). The course will prepare graduate students (and teachers from secondary schools and community colleges) to teach introductory classes and workshops in Creative Writing. Students will observe and participate in the department's CRW 2001 courses. Prerequisites: CRW 3111, 3311, or graduate standing, or permission of the instructor.

CRW 6971 Creative Writing Thesis (3). Research and writing for the creative writing thesis. May be repeated. Prerequisite: 12 hours graduate CRW course work.

CRW 6972 Creative Thesis Continuance (1). Further guidance and direction for creative writing MFA candidates who have completed the two semester intensive sequence in CRW 6971. May be repeated.

ENG 5058 Form and Theory of Contemporary Literature (3). Various approaches and theories of practice in the major genres of imaginative writing, including development and articulation of the creative aesthetic. May be repeated. Prerequisite: Permission of the instructor.

Shimon Wdowinski, *Professor*

Hugh Willoughby, *Distinguished Research Professor*

Ping Zhu, *Professor*

Knowledge of the Earth and its environments is essential for successful stewardship of our home planet. The mission of FIU's Department of Earth and Environment is to be at the forefront of research and education about the dynamic interaction of Earth's systems, the environment, and related societal issues. Programs in the department address understanding and stewardship of the Earth. In addition, the department fosters understanding of the planet's bounty, with topics such as water, mineral, energy and agricultural resources. A third area of emphasis is environmental problems, both natural events such as earthquakes, volcanic eruptions and floods, and human-made problems such as oil spills, ecosystem degradation

and soil erosion. The department offers the Doctor of Philosophy Degree (Ph.D.) in Earth Systems Science, the Master of Science Degree (M.S.) in Geosciences, and the Master of Science (M.S.) in Environmental Studies.

Doctor of Philosophy Degree in Earth Systems Science

The Ph.D. degree program offers concentration in either the geosciences with the Geosciences Major, or in environmental sciences, conservation, policy and management with the Natural Resource Science and Management Major. One of the two majors is chosen at the time of application in consultation with the student's prospective advisor, according to the emphasis of the student's research area. The Geosciences Major includes research on the solid Earth (structural geology, tectonics, igneous petrology, geochemistry, economic geology, and geophysics); Earth history, sedimentary rocks, and paleontology (stratigraphy, sedimentology, paleobiology, and paleoecology); Earth surface processes (hydrogeology, coastal geology, environmental biogeoscience, remote sensing and GIS applications, environmental geology, and geologic hazards); and atmospheric science (meteorology and climatology). The Natural Resource Science and Management Major includes research on the environmental sciences as related to environmental policy, conservation, and natural resource management. Overall, the doctoral program emphasizes a multidisciplinary approach to solving geoscientific and environmental problems, and stresses the importance of field observations complemented by laboratory analysis and numerical modeling.

Application Procedures

Admission decisions to the Doctoral Program in Earth Systems Science will be made by the Department's Graduate Committee. To be considered for admission, applicants must submit the following documents prior to the admission deadlines.

1. FIU On-line Graduate Application Form (available at <https://admissions.fiu.edu/how-to-apply/graduate-applicant/index.html>).
2. Official transcripts of all college level work. When applicable, a certified English translation must accompany the original.
3. Graduate Record Examination and English proficiency (TOEFL and TSE) exam scores taken within the previous five years, sent from the Education Testing Service.
4. A resume with pertinent information regarding applicant's previous experience and achievements.
5. A statement of intent, including a brief discussion (not to exceed 2000 words) of educational goals and career projections, and the name of the prospective advisor. Applicants are urged to contact prospective advisors prior to application. The applicant may also include a copy of previous written scientific work.
6. Three letters of recommendation from former professors or academic advisors.
7. Official transcripts and test scores should be sent directly to the Office of Admissions, Florida International University, P.O. Box 659004, Miami, FL 33265.

Admission Requirements

To be admitted to the Doctoral Program in Earth Systems Science, a student must meet the following minimum requirements:

1. Hold a Bachelor's or Master's degree from an accredited college or university in a relevant discipline.
2. Have a grade point average (GPA) of 3.0 or higher (or equivalent) during the last two years of the undergraduate program, and 3.0 or higher during the Master's degree program.
3. Submit official Graduate Record Examination (GRE) scores.
4. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT (internet-based) TOEFL, 550 on the paper-based TOEFL, or 6.5 overall on the IELTS is required. A score of at least 50 on the Test of Spoken English (TSE) or 26 in the speaking section of the iBT TOEFL is required in order to be eligible for a teaching assistantship.
5. Meet the University's general requirements for admission to graduate programs. All application materials should be submitted by February 1 in order to be considered for Fall term admission and by August 1 for Spring term admission.

Financial Aid

The Earth and Environment Department offers a number of graduate teaching and research assistantships which are awarded on a competitive basis. Teaching assistantships begin only in the fall semester. The assistantships provide a stipend and waiver of tuition. Applicants interested in an assistantship should indicate this in the FIU Graduate Application form and their cover letter. Applicants seeking assistantships should contact individual faculty members in their area of research interest.

Course Requirements

The Doctor of Philosophy in Earth Systems Science is conferred based on satisfactory completion of required course work, a demonstrated mastery of a broad scope of knowledge, and the ability to conduct original and independent research. A minimum of 75 graduate-level credit hours is required. A minimum of 24 credit hours is devoted to research toward the Ph.D. Dissertation. A maximum of 36 graduate credit hours of formal lecture courses earned as part of a graduate degree from another accredited program may be transferred with the approval of the major advisor and Graduate Program Director.

ISC 5150	Introduction to Research in Earth and Environmental Sciences	2
ISC 5151	Earth and Environmental Graduate Seminar	1
ISC 6152	Earth and Environment Advanced Graduate Seminar	1
ISC 6153	Environments of a Changing Planet	3
GLY 6061	Geoscience Systems	3
EVR 6377	Natural Resource Conservation and Policy	3

The remaining credits must include at least 12 credits of non-research, formal coursework. All coursework is selected in consultation with the major advisor. Natural Resource Science and Management majors should complete at least 18 credit hours in formal environmental coursework, so that upon graduation they can be certified as faculty members qualified to teach in that field.

Graduation Requirements

1. A minimum GPA of 3.0 in all coursework is required for the Ph.D. degree.
2. Satisfactory performance on the Qualifying Examination covering general geoscientific and/or environmental knowledge and the field of specialization.
3. Successful presentation of a research proposal and oral examination before the Dissertation Committee, which together constitute the Candidacy Examination.
4. Completion and successful defense of a dissertation.

Master of Science in Geosciences

This degree program offers opportunities for research in the same areas as for the Geosciences Major of the Ph.D. in Earth Systems Science (above). It emphasizes a multidisciplinary approach to solving geoscientific problems, stressing the importance of field observations complemented by laboratory analysis and numerical modeling. The application and admission procedures are also the same. Teaching assistantships are not available for the M.S. in Geosciences.

The Master of Science degree is conferred upon successful completion of the requirements (listed below) of either the Thesis Track or Non-Thesis Track option of the degree program.

Thesis Track: Course Requirements: 30 credits, including:

ISC 5151/ISC6152	Earth and Environment Graduate Seminar	2
	Courses in field of specialization	18
	Electives	4
GLY 6971	Thesis	6

Courses in the field of specialization and electives are chosen by the student in close consultation with a faculty advisor. These courses are selected to fit the student's particular professional goals and to ensure sufficient depth and breadth of geological knowledge.

Thesis Track: Graduation Requirements

1. A minimum GPA of 3.0 in all coursework counted toward the 30 credits is required for the Master's degree.
2. Satisfactory completion and defense of a thesis proposal and an original research thesis is required.

Non-Thesis Track: Course Requirements: 30 credits, including:

	Courses in field of specialization	18
	Electives	12

Electives for the non-thesis track may include at most 3 credits of Supervised Research (GLY 6910) leading to a research paper.

Doctoral candidates in the Geosciences Major who have filed the D-2 and D-3 forms and accepted by the University Graduate School can receive a Master of Science in Geosciences en route to the PhD after completion of 36 credits of graduate coursework with "non-thesis track" appearing in the transcript.

Non-Thesis Track: Graduation Requirements:

A minimum GPA of 3.0 in all course work counted toward the 30 credits is required for the Master's degree.

Combined BS/MS in Geosciences Degree Pathway

The combined BS/MS degree pathway in Geosciences allows qualified students to earn both the BS in Geosciences and a non-thesis MS in Geosciences in a shorter amount of time than typically required for earning degrees sequentially. The accelerated pathway is designed for highly qualified undergraduate students in the Department of Earth and Environment.

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credit hours including all lower division requirements, typically have at least 30 credit hours remaining in the program and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees.

Admission Requirements

1. Current enrollment in the Bachelor of Science program in Geosciences at FIU.
2. Completed at least 75 credits of coursework (including UCC), and typically has 30 credits remaining.
3. Completion of all lower division required courses for the bachelors degree.
4. Minimum GPA of 3.2.
5. Official GRE scores.
6. Three letters of recommendation.
7. Approval by the Earth and Environment Graduate Committee.

General Requirements

1. Meet the requirements of both the BS and non-thesis MS degree in Geosciences.
2. Overlap of programs: Up to 3 courses (9 credits) may be used in satisfying **both** the BS and MS degree requirements, which must be at the 5000-level or higher.

Fields of Concentration in the Geosciences Major of the Ph.D. in the Earth Systems Science and the M.S. Geosciences

Atmospheric Sciences

Researchers focus on hurricane dynamics, hurricane impacts, hurricane boundary layer turbulence structures, atmospheric convection, atmospheric boundary layer and clouds, and cloud-climate feedbacks.

Environmental Biogeoscience

Research in this concentration applies knowledge of biological, geological, physical, and chemical processes to current threats facing the biosphere, including deteriorating water and air quality, loss of biodiversity and ecosystem function, soil degradation, coastal erosion, and other emerging issues at local or global scales.

Geophysics/Paleomagnetism/Remote Sensing

Geophysical investigative techniques using gravity, magnetism, seismic reflection and refraction, earthquake seismology, thermal properties, and satellite imagery. Land-based geophysical studies of the Caribbean and South American seismicity and crustal structure. Environmental geophysical studies in the South Florida and Caribbean regions.

Hydrogeology/Environmental Geology

Field and modeling approaches to groundwater flow and solute fluxes in subsurface and near subsurface environments. Interaction of surface water and groundwater, solute transport, chemical and isotopic tracing techniques, watershed hydrology in Florida and beyond.

Igneous Petrology/Geochemistry/Economic Geology

Research problems in petrology/geochemistry of igneous and metamorphic rocks with reference to their origin, and relationships in time and space. Origin of hydrothermal and other economic deposits. Field occurrence, geochemistry and petrogenesis of crystalline rocks, forming the continental crust and seafloor. Generation of associated (often, economically significant) hydrothermal deposits. Application of trace element and isotope geochemistry to the study of these petrogenetic associations.

Paleontology

Research applied to taxonomy, phylogeny, evolutionary processes, paleoecology, taphonomy, and biostratigraphy of select microfossil groups. Research may address questions about biodiversity, biogeography, paleoecology, paleoenvironments, response to global climatic changes, and paleoceanography.

Stratigraphy/Sedimentology

Sedimentary petrology, sedimentary environments, paleoceanography, sequence stratigraphy, cyclic stratigraphy, microfacies analysis, and basin analysis. Field and laboratory techniques address evolution of sedimentary basins and their relationships to global and regional tectonics and paleoceanographic change.

Structural Geology – Tectonics

Field-oriented research on methods of structural analysis. Analysis of geologic deformation based upon the principles of mechanics and utilizing research data from laboratory and field investigations of folding, fabrics, fracture, and faulting. Structural geology of the Caribbean and South America.

Fields of Concentration in the Natural Resource Science and Management Major of the Ph.D. in Earth Systems Science

Land and Aquatic System Science

Application of multidisciplinary science and research techniques to managing environmental problems and sustainable use of land and aquatic resources; understanding and quantification of fundamental physical, chemical, and biological processes operating on land and in water, soil and other environments.

Natural Resource Management

Study of the interactions between natural systems and human systems. Research and management problems in the fields of natural resource conservation, ecosystem restoration, agroecology, ecotoxicology, forestry, wildlife, fisheries, and coastal and marine resources.

Environmental Economics and Policy

Analysis of policy effectiveness in managing environmental pollution, sustainable development, energy resources, climate change, food and agriculture, community forests, and local, national and international conservation programs. Research methods in ecosystem service valuation, economic modeling, and ethnographic and other behavioral analyses.

Master of Science in Environmental Studies

The Department of Earth and Environment offers the Master of Science (M.S.) in Environmental Studies degree to train students for work in the areas of environmental policy, natural resource science and management, and sustainable development. An emphasis of the program is the cultural and political milieu in which environmental issues of a region are embedded. The program is interdisciplinary in nature, and students are encouraged to take advantage of University-wide resources, programs, and courses in environmental issues, such as those in Public Administration, International Relations, Biology, Chemistry, Geosciences, Political Science, Economics, and Sociology/Anthropology.

The M.S. degree program offers two options: thesis track and non-thesis track. The thesis track involves rigorous, solutions-oriented scientific research into the functioning of environmental systems. This track is highly recommended for students who are coming directly from undergraduate programs and who are interested in doctoral research in the future. The non-thesis track is primarily designed for employed professionals who may want to enhance their careers and skills through additional academic training beyond their bachelor's degree and practical training through internships with agencies, corporations, non-profit organizations or academic institutions. It is not recommended for students who do not have job experience.

Admission Requirements

To be admitted into the Master's Program in Environmental Studies, a student must meet the University's graduate admission requirements and have:

1. Have a "B" average in upper level work and submit official GRE scores, which every candidate must take.

2. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.
3. Submit three letters of recommendation, a one-page statement of research interests, and a copy of all transcripts to University Graduate Admissions on or before February 1 for the Fall admissions and August 1 for the Spring admissions.
4. Receive approval of the departmental Graduate Program Committee.

Degree Requirements

The Master of Science in Environmental Studies requires 36 credits, including the specific requirements (listed below) of either the thesis-track or non-thesis track option of the degree program. A maximum of six credits of post-baccalaureate graduate coursework may be transferred from other institutions, subject to approval of the Graduate Committee. Particular courses will be determined by the student in consultation with the thesis advisory committee, faculty advisor, or the Graduate Program Director.

Thesis Track: Course Requirements

ISC 6153	Environments of a Changing Planet	3
EVR 6377	Natural Resource Conservation and Policy	3
ISC 5150	Introduction to Research in Earth and Environmental Sciences	2
ISC 5151/ ISC 6152	Graduate Seminar/Advanced Graduate Seminar	1
EVR 6971	Master's Thesis	6
	Research Methods or Analysis Course	3
	Electives	18
	Total Credits	36

The research methods course and electives are selected in consultation with student's thesis advisor. Elective courses fit the student's thesis research. Additional Master's Thesis, Thesis Research, or Graduate Independent Study up to a maximum total of 3 credits may also be applied as elective credit. A maximum of six credit hours may be taken at the 4000 level, and a minimum of six credit hours of electives must be taken in Environmental Studies or other departmental courses. Students must demonstrate a competency in Statistics (equivalent to two courses of undergraduate statistics, taken prior to the admission into the program, with a "B" or better grade in both courses, or one course of graduate statistics with a "C" or better grade in both courses). Additional course work may be recommended by the advisory committee.

Thesis Track: Graduation Requirements

A grade of 'B' or higher must be obtained in all core courses. A grade of 'C' or higher must be obtained in all courses, with a cumulative GPA of 3.0 or higher in the 36 credits. A thesis must be completed and successfully defended in consultation with the student's graduate thesis committee.

Non-Thesis Track: Course Requirements

ISC 6153	Environments of a Changing Planet	3
EVR 6377	Natural Resource Conservation and Policy	3
EVR 5907	Research and Independent Study	3

ISC 5151/ Graduate Seminar/Advanced Graduate Seminar	2
ISC 6152 Seminar	2
Quantitative Methods Course	3
Electives	22
Total Credits	36

The quantitative methods course and electives are selected in consultation with faculty advisor. Elective courses are chosen and to fit the student's particular professional interest and to ensure sufficient breadth and depth of environmental studies knowledge. Students carrying out research, internship or independent study for their non-thesis project should sign up for EVR 5907, but may not exceed 6 credits total. EVR 6970 and EVR 6971 will not count toward electives. A maximum of 6 credit hours may be taken at the 4000 level. A minimum of 12 elective credits must be taken in Environmental Studies or other departmental courses. All courses must be taken for letter grades.

Doctoral candidates in the Natural Resource Science and Management Major of the Earth Systems Science degree who have filed the D-2 and D-3 forms and accepted by the University Graduate School can receive a Master of Science in Environmental Studies en route to the PhD after completion of 36 credits of graduate coursework with "non-thesis track" appearing in the transcript.

Non-Thesis Track: Graduation Requirements

A grade of "B" or higher must be obtained in all core courses. A grade of "C" or higher must be obtained in other courses, with a cumulative GPA of 3.0 or higher in the 36 credits. A project (EVR 5907) must be completed under faculty supervision, and the project report must be presented as a part of the Graduate Seminar class. This work may be based on a specific field research, or internship of current occupation. A project is defined as a substantial analysis and proposal for change of real-world environmental problem.

Graduate Concentrations for the Master of Science in Environmental Studies

The Department of Environmental Earth and Environment currently offers graduate-level concentrations in several different areas. A list of electives for each of these concentrations can be obtained from the Department's Office.

Professional Science Master's (PSM) in Environmental Policy and Management

The Professional Science Master's degree in Environmental Policy and Management is an interdisciplinary program designed to prepare students for careers in local, state and national environmental organizations and agencies. This professional degree is meant primarily for working professionals who wish to pursue a Master's on an accelerated basis. Most of the formal coursework is offered on Saturdays, and some courses may be offered as hybrid or fully online sections. The curriculum offers students a wide range of competencies within broader professional areas related to environmental policy and management.

Admission Requirements

To be admitted into the professional science master's program in EPM, a student must meet the University's graduate admission requirements and have:

1. A "B" average in upper level work, which every candidate must take. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.
2. Submitted three letters of recommendation, a one page statement of career interests, and a copy of all transcripts to the Graduate Program Director on or before March 1 for International students and May 1 for Domestic students for the Fall admissions.
3. Received approval of the departmental graduate program committee.

Degree Requirements

The PSM in Environmental Policy and Management consists of a total of 36 credits, including an internship and completion of an independent study. The program is to be completed in four semesters with a course load of 10 credits during the fall and spring semesters and 6 credits in the summer.

Core Courses

EVR 5355	Environmental Resource Policy	3
EVR 5320	Environmental Resource Management	3
EVR 6950	Graduate Seminar (3 semesters @ 1 credit each)	3
STA 6196	Statistics for Environmental Sciences	3

Area Subjects

EVR 5409	Advanced Conservation Biology	3
EVR 5215	Water Resources Assessment	3
GIS 5050	Environmental GIS	3
EVR 7322	Methods in Sustainable Resources Management	3
EVR 7445	Public Lands Management	3
MMC 5655	Mass Communication and the Environment	3
EVR 5907	Research and Independent Study*	6

Course Schedule

Semester 1 (Fall)

EVR 5320	Environmental Resource Management	3
STA 6196	Statistics for Environmental Sciences	3
GIS 5050	Environmental GIS	3
EVR 6950	Graduate Seminar 1	1

Semester 2 (Spring)

EVR 5355	Environmental Resource Policy	3
EVR 5409	Advanced Conservation Biology	3
EVR 5215	Water Resources Assessment	3
EVR 6950	Graduate Seminar 2	1

Semester 3 (Summer)

EVR 5907	Research and Independent Study*	6
----------	---------------------------------	---

Semester 4 (Fall)

EVR 7322	Methods in Sustainable Resource Management	3
EVR 7445	Public Lands Management	3
MMC 5655	Mass Communication and the Environment	3
EVR 6950	Graduate Seminar 3	1

Internship and Study Report

Students are required to complete a minimum of 6 credits as a laboratory or field internship during the summer semester of the program. During this time, they will work on a relevant, management-related project that has been mutually agreed upon by the employer and a faculty advisory committee. Students will be required to write a report on this project and present it orally as part of the final cumulative examination held at FIU. The student's advisory committee shall consist of the faculty sponsor and at least two additional committee members who have expertise in environmental science and/or the natural sciences.

Graduation Requirements

A grade of "B" or higher must be obtained in all core courses. A grade of "C" or higher must be obtained in other courses, with a cumulative GPA of 3.0 or higher in the 36 credits. A project (EVR 5907) must be completed under faculty supervision, and the project report must be presented as part of the Graduate Seminar class (EVR 6950). This work may be used based on a specific field research, or internship of current occupation. A project is defined as a substantial analysis and proposal for change of real-world environmental problem.

Combined BS/MS or BA/MS in Environmental Studies Degree Pathway

The combined BS/MS or BA/MS degree pathway in Environmental Studies allows qualified students to earn both the BS in Environmental Studies or the BA in Sustainability and the Environment and a non-thesis MS in Environmental Studies, in a shorter amount of time than typically required for earning degrees sequentially. The accelerated pathway is designed for highly qualified undergraduate students in the Department of Earth and Environment.

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credit hours including all lower division requirements, typically have at least 30 credit hours remaining in the program, and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees.

Admission Requirements

1. Current enrollment in the Bachelor's Degree Program in Environmental Studies or Sustainability and the Environment at FIU.
2. Completed at least 75 credits of coursework (including UCC), and typically has at least 30 credits remaining.
3. Completion of all lower division required courses for the Bachelor's degree.
4. Current GPA of 3.25 or higher.

5. Official GRE scores.
6. Three letters of recommendation.
7. Approval by the Earth and Environment Graduate Committee.

General Requirements

1. Meet the requirements of both the BS in Environmental Studies or BA in Sustainability and the Environment and the non-thesis MS degree in Environmental Studies.
2. Overlap of programs: Up to 3 courses (9 credits) may be used in satisfying **both** the BA/BS and MS degree requirements, which must be at the 5000-level or higher.

Juris Doctor/Master of Science in Environmental Studies Joint Degree Pathway

The faculties of the College of Law and the College of Arts, Sciences and Education at Florida International University offer a joint degree pathway culminating in both a Juris Doctor (J.D.) degree, awarded by the College of Law, and a Master of Science in Environmental Studies (MS-ES) degree, awarded by the College of Arts, Sciences and Education. Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. Essential criteria relating to the joint degree pathway are as follows:

1. Candidates for the pathway must meet the entrance requirements for and be accepted by both Colleges. Both Colleges must be informed by the student at the time of application to the second program that the student intends to pursue the joint degree.
2. The joint degree pathway is not open to students who have already earned one degree.
3. For law students, enrollment in the MS-ES program is required no later than the completion of 63 credit hours in the J.D. program. For MS-ES students, enrollment in the J.D. program is required no later than the completion of 24 credit hours in MS-ES program.
4. A student must satisfy the curriculum requirements for each degree before either degree is awarded. For the MS-ES degree, students must meet the requirement of the non-thesis track option. The College of Arts, Sciences and Education will allow 6 credit hours of foundation law courses and up to 9 credit hours of upper level environmental law courses to be credited toward both the MS-ES and J.D. degrees. These law classes will count toward the non-EVR Environmental Studies elective credits allowed under the MS-ES non-thesis track program. Reciprocally, law students may receive 9 hours of credit toward the satisfaction of the J.D. degree for courses taken in the MS-ES curriculum upon completion of the MS-ES degree curriculum with a grade point average of 3.0 or higher.
5. The College of Arts, Sciences and Education will recognize any significant, environment-related law review or research project completed with a letter grade of 'B' or better for the J.D. program toward the 3 credit hour course, EVR 5907 Research and Independent Study and the attendant 'Project' required for the MS-ES non-thesis track program. For

the purpose of this program, a Project is defined as a substantial analysis and proposal for change of a real-world environmental problem, and requires preparation of a report and presentation as part of the required Environmental Studies Graduate Seminar class.

6. A student enrolled in the joint degree pathway may begin the student's studies in either College, but full time law students must take the first two semesters of law study consecutively and part-time law students must take the first three semesters of law study consecutively. Students admitted to one College but electing to begin study in the other College under the joint degree pathway may enter the second College thereafter without once again qualifying for admission so long as they have notified the second College before the end of the first week of the first semester in the second College and are in good academic standing when studies commence in the second College.
7. A student enrolled in the joint degree pathway will not receive either degree until the student has satisfied all of the requirements for both degrees, or until the student has satisfied the requirements of one of the degrees as if the student had not been a joint degree candidate.
8. As non-thesis track MS-ES students, students in the joint degree pathway will not normally be eligible for the graduate teaching assistantships in the Environmental Studies Department.

Course Descriptions

Note: Laboratories may not be taken prior to the corresponding lecture course. Laboratories must be taken concurrently where noted, but students must register for the laboratory separately.

Definition of Prefixes

AGR-Agronomy; ESC-Earth Science; EVR-Environmental Studies; EVS-Environmental Science; GIS-Geography; Information Science; GLY-Geology; ISC-Interdisciplinary Science/Natural Science; MET-Meteorology; OCG-Oceanography-Geological; SWS-Soil and Water Sciences F-Fall semester offering; S-Spring semester offering; SS-Summer semester offering.

AGR 5241 Advance Modern Crop Production (3). An advance course in agronomy applying crop, soil, and environmental sciences in understanding agricultural systems in the world. Includes the concepts of plant, seed, water, soil, tillage, pest, post harvest, ecophysiology, and sustainable aspects of crop production.

AGR 6251 Sustainable Farming Systems (3). Analysis of sustainability of modern agricultural farming systems under a variety of ecological economic and cultural settings.

AGR 6255 Ecological Agriculture (3). Application of ecological principles to modern farming systems to achieve goals of long-term food production without depleting Earth's resources.

ESC 5005 Earth Science Enrichment Activities for Teachers (1-2). Workshop presenting Earth Science enrichment activities to high school and middle school science teachers.

EVR 5006 Environmental Science and Sustainability (3). Introductory environmental science course for graduate students in environmental studies and other disciplines. Emphasizes physical sciences and applications to environmental issues.

EVR 5044 Advanced GIS and Environmental Data Analysis (3). Explores project planning, geospatial database design and implementation of analytical and display methods in GIS for organizing, querying, analyzing and presenting spatial data. Prerequisites: One of the following: EVR 5050, CGN 4321, CGN 5320, INR 4931, URS 6930.

EVR 5061 South Florida Ecology: Field Studies (3). Introduction to ecology of South Florida. Series of field trips to unique ecosystems (Everglades, hardwood hammocks, coastal regions). No science background required. Intended for teachers. Not intended for Environmental Studies graduate students.

EVR 5065 Ecology of Costa Rican Rainforest (3). Intensive study of Central American tropical forest ecosystems conducted for two weeks in Costa Rica in sites ranging from lowland to high mountains. Primarily for teachers. Prerequisites: Graduate standing or permission of the instructor.

EVR 5066 Ecology of the Amazon Flooded Forest (3). Study of the ecology of the flooded forest with emphasis on the relationships between plants and animals and the annual flooding cycle. The course includes a two-week field study at river camp in Peru. Prerequisites: Graduate standing or permission of the instructor.

EVR 5069 Wetland Ecology and Management (3). Principles of ecology and management as applied to freshwater and estuarine wetlands. Prerequisites: Undergraduate degree in science, or PCB 3043, or permission of the instructor.

EVR 5122 Natural Disasters and Social Vulnerability (3). Natural Disasters and Social Vulnerability course will introduce basic concepts and analytical tools of societal responses in managing natural disasters.

EVR 5219 Water Resources Assessment (3). Elements of hydrological cycle, hydrological processes and water resources assessment with emphasis on surface and groundwater water quantity and quality evaluation is central to the course.

EVR 5236 Air Pollution Dynamics (3). A course designed to give an understanding of the fates of atmospheric pollutants. Scavenging processes in the atmosphere; radiation, residence times, chemical reactions, global transport process, point source dispersion and modeling calculations. Prerequisites: EVS 3360 or EVR 4231.

EVR 5313 Renewable Energy Sources (3). An analysis of renewable energy sources and energy efficiency including wind, biomass, geothermal, hydroelectric, solid waste, solar heating, solar cooling, and solar electricity. Prerequisite: Permission of the instructor.

EVR 5315 Energy Resources and Systems Analysis (3). Detailed analysis of energy flows in natural and manmade systems. Energy systems analysis. Energy use patterns. Conventional and alternate sources of energy.

EVR 5320 Environmental Resource Management (3). The scientific and philosophical basis for the management of renewable and non-renewable energy, mineral, air, water, and biotic resources. Prerequisites: Graduate standing or permission of the instructor.

EVR 5332 Integrated Solutions for Water in Environment and Development (3). Examines the theory and practice of integrated water resources management, focusing on science, policy, and socioeconomic themes evaluated through case studies from different regions of the world. Emphasis given to environmental elements.

EVR 5353 International Energy Policy (3). Focuses on the distribution of global energy resources and related issues. A comparison of the energy policies of various countries serves as the basis for exploring alternative energy policy approaches. Prerequisites: EVR 5355 or permission of the instructor.

EVR 5355 Environmental Resource Policy (3). A survey of international and national environmental policy and the legal, economic, and administrative dimensions of international accords and selected U.S. law. Prerequisites: EVR 5320 or permission of the instructor.

EVR 5360 Protected Area Management (3). Explores historical, ecological, legal and socioeconomic aspects of the management of natural areas using examples worldwide. Prerequisite: Graduate standing in Environmental Studies or permission of instructor

EVR 5375 Advanced Restoration Ecology (3). Restoration planning, endangered species reintroduction, disturbed land reclamation, ecosystem restoration, challenges of climate change on ecological restoration. Prerequisite: One course or more in ecology.

EVR 5376 Advanced Ecology and Management of Invasive Species (3). An in depth study of the key ecological, social, and management questions surrounding introduced invasive species.

EVR 5406 Endangered Species Policy and Management (3). Exploration of the history of the U.S. Endangered Species Act, and its implementation and effectiveness through the listing and recovery planning processes. Prerequisite: Graduate standing in Environmental Studies or Biology, or permission of instructor.

EVR 5409 Advanced Conservation Biology (3). Exploration of modern applications of ecology, genetics and evolutionary biology in the conservation biology. Policy aspects of biological conservation are also discussed. Prerequisites: BSC 2010 and BSC 2011.

EVR 5907 Research and Independent Study (VAR). The student works with a professor on a research project. Variable credit.

EVR 5935 Special Topics (VAR). A graduate-level course dealing with selected environmental topics. The content will not necessarily be the same each time the course is offered.

EVR 5936 Topics in Environmental Studies (3). An analysis of several current environmental topics. Recommended for primary and secondary school teachers.

EVR 6067 Tropical Forest Conservation and Utilization (3). Distribution and classification of tropical forest ecosystems, their description and the ecological principles governing their function. Factors influencing tropical forest utilization and destruction, and strategies for sustainable use and conservation. Prerequisites: EVR 5355 or permission of the instructor.

EVR 6268 Remote Sensing in Hydrology (3). Sensors, platforms, satellites; image rectification, classification; data assimilation and parameterization; soil moisture, rainfall, discharge, evapotranspiration measurement, modeling and validation. Prerequisites: GLY 5754 or equivalent or permission of the instructor and EVR 5219 or EVR 4211 or equivalent or permission of the instructor.

EVR 6300 Topics in Urban Ecology (3). Topics include urban and suburban ecosystems emphasizing energy relations, ecological functions of urban landscapes, urban wildlife, urban forestry and ecological issues relevant to human health and well-being. Prerequisites: PCB 3043 or permission of the instructor.

EVR 6330 Tropical Ecosystems Management (3). Analyzes the dimensions of tropical ecosystems management. Organizational and institutional dynamics of the management of tropical forests, agriecosystems, and coastal areas are covered. Prerequisite: Permission of the instructor.

EVR 6377 Natural Resource Conservation and Policy (3). Interdisciplinary course focusing on diverse conservation issues and policy aspects of managing and conserving natural resources.

EVR 6405 International Biological Conservation Accords (3). Survey of international biological conservation agreements. Topics include bilateral migratory wildlife agreements, the Berne Convention on Migratory Wildlife, CITES, Ramsar, the UNCED Biodiversity Treaty and the Statement of Principles on Forests. Prerequisites: EVR 5355 or permission of the instructor.

EVR 6950 Graduate Seminar (1). A weekly seminar that features guest speakers, student presentations, and discussions among graduate students and faculty. Environmental Studies graduate students are required to register during three semesters of their program. Prerequisite: Permission of the instructor.

EVR 6970 Supervised Research (1-12). Supervised research toward completion of the student's program of study. Repeatable. Prerequisite: Permission of Major Professor.

EVR 6971 Master's Thesis (1-12). Completion of Master's Thesis. Repeatable. Prerequisite: Permission of Major Professor.

EVR 7056 GIS in Water Resources (3). Spatial analysis of watersheds and modeling of hydrological processes with emphasis on surface runoff, evapotranspiration and sub surface flow. Prerequisite: GIS 5050 or equivalent or permission of the instructor.

EVR 7084 Interdisciplinary Environmental Studies (3). Explores theoretical and practical approaches to interdisciplinary analysis of environmental issues, including sustainability science, ecological economics, and

human-nature interactions. Prerequisites: EVR 5320 and EVR 5355 or equivalent or permission of the instructor.

EVR 7322 Methods of Sustainable Resource Management (3). A study of methods and policies for achieving a sustainable environment. Covers project appraisal, resource modeling and national accounts in the context of resource sustainability. Prerequisites: Graduate standing or permission of the instructor.

EVR 7329 Watershed Analysis and Management (3). An examination of the watershed approach to managing water and land resources. Integrating fundamental physical, chemical, and biological processes with human systems at the landscape scale using GIS.

EVR 7445 Public Land Management (3). Examines the historical, administrative, and legal settings that have predisposed various resource management agencies to succeed or fail in protecting public lands. Explores new and integrated approaches to building consensus on public land management issues. Prerequisites: EVR 5320, EVR 5355, equivalent or permission of the instructor.

EVR 7980 Ph.D. Dissertation (1-15). Research directed towards completion of the doctoral dissertation. To be taken every semester by the candidates if the Ph.D. Prerequisite: Permission of the major professor.

EVS 6145 Ecotoxicology (3). Fate of chemicals and their acute and chronic toxicological effects on aquatic and wildlife systems. Dose-response relationships, bioavailability, bioconcentration, microbial degradation, and biomonitoring. Prerequisites: One year of biology and one year of chemistry and CHM 2200 and lab or permission of the instructor.

EVS 6194 Applied Soil Biology (3). Examines biology of soil organisms and biologically-mediated chemical transformations occurring in soil ecosystems. Prerequisite: BSC 2011.

EVS 6637 Ecological Risk Assessment (3). Evaluation of risks of foreign chemicals to aquatic and terrestrial systems. Concepts and methodology used in the hazard and risk assessment of toxic effluents, chemical/oil spills, and contaminated sediments. Prerequisites: One year of biology and one year of chemistry and CHM 2200 and lab or permission of the instructor.

GIS 5050 Environmental GIS (3). Concepts of GIS, database design and management, advanced spatial analysis and modeling, uncertainty, error, and sensitivity in GIS. Focus on GIS project design, execution and presentation using ArcGIS. Prerequisite: Permission of the instructor.

GLY 5021 Earth Sciences for Teachers (3). Study of geological materials and processes, as covered in Physical Geology, but at a higher level and with additional assignments. Prerequisite: Permission of the instructor. (F,S,SS)

GLY 5060 Planet Earth: Dynamic Earth (1). Essentials of metamorphism, rock rheology, seismology, plate tectonics, plate boundaries, plate movement, continental rifting and evolution of mountain belts.

GLY 5107 Planet Earth: Evolving Earth (1). Essentials of lithostratigraphy, biostratigraphy, geologic time scale, modern sedimentological processes, sedimentary rocks,

evolution and extinction events, paleoenvironments and paleoclimates.

GLY 5108 Paleoenvironments (3). Sedimentary environments, paleoecology of fossils, skeletal mineralogy, marine paleoenvironmental changes, global patterns of change through time. Prerequisite: Permission of the instructor.

GLY 5158 Florida Geology (3). Detailed lithostratigraphic and biostratigraphic analyses of Southeast Florida and their relationship to tectonics, paleoclimates. Prerequisites: GLY 4511 and GLY 4511L.

GLY 5159 Planet Earth: South Florida (1). Geology, water resources and geologic environments of South Florida.

GIS 5190 Advanced geospatial measurement techniques in Earth and Environmental Sciences (3). Students will learn state-of-the-art field measurement techniques used in Earth and Environmental Sciences that will prepare them to conduct advanced graduate research.

GLY 5245 Water-Rock Interaction (3). Survey of geochemical processes at the water-rock interface. Topics include absorption of inorganic and organic ions, colloid stability in groundwater, mineral dissolution and precipitation. Prerequisites: CHM 1046, MAC 3312, GLY 4822 or permission of the instructor.

GLY 5246 Geochemistry (3). **GLY 5246L Geochemistry Lab (1).** Origin of chemical elements and principles affecting their distribution in the solar system, solid earth and hydrosphere. Use of chemical data to solve geologic problems. Prerequisites: Physical Geology and General Chemistry. (S in alternate years)

GLY 5266 Stable Isotope Biogeochemistry (3). Application and theory of stable isotope approaches to biogeochemistry. Topics: Introduction to IRMS machines, C/N/O/H/S (biogeochem. processes), sampling/lab. prep., and recent advances. Prerequisites: One year of chemistry or permission of the instructor.

GLY 5283C Application of ICPES in Geochemistry (3). Determination of elemental abundances in rocks, soils, natural water using inductively coupled plasma emission spectroscopy (ICPES). Instrumental principles, sample selection and preparation methods and application of results to research. Prerequisites: CHM 1045, CHM 1046 or permission of the instructor.

GLY 5286 Research Instrumentation and Techniques in Geology (3). Survey of techniques and instrumentation used in geological research, including computing and data handling. Prerequisites: Graduate standing or permission of the instructor. Corequisite: GLY 5286L.

GLY 5286L Research Instrumentation and Techniques in Geology Lab (1). Introduction to advanced instrumentation and analytical techniques in Geology, including computing and data processing. Prerequisites: Graduate standing or permission of the instructor. Corequisite: GLY 5286.

GLY 5287C Scanning Electron Microscopy with EDS Analysis (3). Imaging and microanalysis of materials using SEM including EDS. Prerequisite: Permission of the instructor.

GLY 5288C Electron Microprobe Microanalysis with EDS Analysis (3). Imaging and analysis of geological and other materials using electron microprobe with EDS analysis. Prerequisite: Permission of the instructor.

GLY 5298 Topics in Geochemistry (3). Seminar covering current research in selected areas of low-temperature geochemistry: oceans and oceanic sediments; continental waters and sediments; hydrothermal systems. Prerequisites: GLY 5246 or permission of the instructor.

GLY 5322 Igneous Petrology and Geochemistry (3). Presentation and discussion of current topics in igneous petrology and geochemistry in a seminar format. Prerequisite: Permission of the instructor.

GLY 5329 Planet Earth: Solid Earth (1). Essentials of the formation and evolution of the crust mantle and core of the earth. Composition and physical properties. Generation of magmas, their geochemistry.

GLY 5335 Metamorphic Geology (3). Metamorphic mineralogy; characteristics of low, medium and high pressure metamorphic rocks; pressure-temperature determinations; metamorphic textures; modeling and determination of P-T-t paths.

GLY 5335L Metamorphic Geology Lab (1). Petrographic examination of metamorphic rocks.

GLY 5346 Sedimentary Petrology (3). Systematic study of sedimentary rocks. Special emphasis on genetical aspects, geochemistry, paleontology, mineralogy, and microfacies. Emphasizes microscopic study. Prerequisite: GLY 4551. Corequisite: GLY 5346L.

GLY 5346L Sedimentary Petrology Lab (1). Laboratory studies of sediments and sedimentary rocks with emphasis on microscopic analyses and geochemical techniques. Prerequisites: GLY 4551 and GLY 4551L. Corequisite: GLY 5346.

GLY 5408 Advanced Structural Geology (3). Advanced treatment of the theory of rock mechanics to solve problems of natural rock deformation. Prerequisites: GLY 4400, MAC 3413, or permission of the instructor. Corequisite: GLY 5408L.

GLY 5408L Advanced Structural Geology Lab (1). Problem solving in theory of rock deformation. Experimental procedures in rock mechanics. Corequisite: GLY 5408.

GLY 5415 Caribbean Geology and Tectonics (3). Integration of geologic and geophysical data to understand the evolution and present tectonic configuration of the Caribbean area. Prerequisite: Permission of the instructor.

GLY 5425 Tectonics (3). Properties of the lithosphere; plate kinematics and continental drift; characteristics of plate boundaries; mountain belts; formation of sedimentary basins. Prerequisites: GLY 1010, 1100, 4400, 4300, 3202 or permission of the instructor.

GLY 5457 Geophysical Data Analysis (3). Computer analysis and modeling of geophysical data and digital images. Statistical description of data, linear inverse theory, digital signal and image processing. Computer exercises with MATLAB. Prerequisites: GLY 4450, MAP 2302, MAS 3105, PHY 2048, PHY 2049 or permission of the instructor.

GLY 5457L Analysis of Geophysical Data Lab (1). Field and laboratory applications of geophysical techniques. Computer aided analysis and three-dimensional modeling of gravity and magnetic data. Prerequisites: GLY 4450, PHY 2048, PHY 2049, MAC 2311, MAC 2312, MAP 2302. Corequisite: GLY 5457.

GLY 5475 Exploration Geophysics (3). New in depth review of geophysical methods used in exploration and environmental geophysics. Digital data processing; Seismic methods; potential fields; electrical and EM methods; ground penetrating radar. Prerequisites: MAC 2312, PHY 2049 or PHY 2054.

GLY 5495 Seminar in Geophysics (3). Detailed investigation of current geophysical techniques, including topics on instrument design. Prerequisites: GLY 5457 or permission of the instructor.

GLY 5497 Topics in Structural Geology and Tectonics (3). Selected advanced topics in structural geology and rock deformation. Latest advances in crustal tectonics. Prerequisite: GLY 5408.

GLY 5518 Advanced Stratigraphy (3). Principles of stratigraphy and the geologic time scale applied to the sedimentary rock record, to determine dynamics of sedimentation, depositional environments and correlation. Prerequisite: Permission of the instructor. Corequisite: GLY 5518L.

GLY 5518L Advanced Stratigraphy Laboratory (1). Training in laboratory techniques to analyze sedimentary rocks for depositional reconstruction and correlation. Prerequisite: Permission of the instructor. Corequisite: GLY 5518.

GLY 5593 Topics in Paleoclimatology (3). Broad concepts in paleoclimatology are reviewed and discussed. Topics include climate models, Quaternary climates, dating and pre-Quaternary climates. Prerequisite: Permission of the instructor.

GLY 5599 Seminar in Stratigraphy (3). Discussion of research projects and/or current literature in stratigraphic correlation as derived from sedimentologic principles and biozonation. Prerequisite: GLY 5346.

GLY 5608 Advanced Paleontology I (3). Discussion of current literature and research projects on evolution, systematics functional morphology, with reports by members of the seminar. Prerequisites: GLY 4603 or permission of the instructor.

GLY 5621 Caribbean Stratigraphic Micropaleontology (3). Microscopic study of biostratigraphic type sections from the Caribbean area. Emphasis on planktonic foraminifera and radiolaria, paleoecologic and paleoclimatic interpretations. Prerequisites: GLY 4603 or permission of the instructor.

GLY 5627 Workshop: Microfossil Paleoenvironments (2). Recent foraminifera and diatoms are sampled, prepared and identified from marine to freshwater facies. Taxon distributions are used to interpret paleoenvironments.

GLY 5628 Radiogenic Isotope Methods (3). Theory and practice of radiogenic isotope ratio measuring techniques. Use of class-100 clean room facilities, and introduction to

thermal ionization mass spectrometry. Prerequisite: General Chemistry.

GLY 5655 Topics in Paleobiology (1-3). Various concepts in paleobiology are reviewed and discussed, based on readings of the literature, including journal articles and books. Course may be repeated for credit with change in content. Prerequisite: Permission of the instructor.

GLY 5710 Watershed Hydrology (3). Hydrologic processes on watershed, water budgets, effects on water quality, field investigative methods using tracers and hydrometric measurements, hydrologic and hydro-chemical models.

GLY 5736 Marine Geology and Geochemistry (3). Examination of ocean floor provinces and the evolution of Earth's ocean basins. Interpretation of the distribution and geophysical and geochemical characteristics of seafloor basalt and sediments. Prerequisite: Permission of the instructor.

GLY 5737 Coastal Processes and Environments (3). Focus on the physical processes that cause erosion and shape our coastlines and the consequences for human development and habitation of this dynamic landscape. Prerequisite: Permission of the instructor.

GLY 5754 Applied Remote Sensing in the Earth Sciences (3). Application of remote sensing and image analysis in the earth sciences; qualitative and quantitative satellite image and air photo interpretation. Emphasis is on use of computer processing packages. Prerequisites: GLY 1010 or permission of the instructor.

GLY 5758 GIS and Spatial Analysis for Earth Scientists (3). Application of GIS technology to spatial problems in the Earth Sciences. Topics include: spatial statistics, sampling theory, surface estimation, map algebra, and suitability modeling.

GLY 5785 Caribbean Shallow-Marine Environments (3). Field study of multiple tropical environments in the Caribbean area. Dynamic processes and coastal evolution in response to natural and human-induced changes.

GLY 5786 Advanced Field Excursion (3). A study of the geology of a selected region of the world followed by 10-12 day field trip in order to study the field relationships of the geologic features. Special emphasis is given to stratigraphic, structural and tectonic relationships of lithic package. Prerequisite: Permission of the instructor.

GLY 5808 Mining Geology (3). Application of theoretical models of ore formation to exploration and the use of geochemical and geophysical techniques in the search for ore deposits. Prerequisites: GLY 4300 and CHM 1046.

GLY 5816 Economic Geology (3). Economically important metal deposits of sedimentary, igneous and hydrothermal origins and their geologic settings and characteristics. Prerequisites: GLY 1010, GLY 4300, CHM 1045, CHM 1046. (S)

GLY 5826 Hydrogeologic Modeling (3). Techniques used in modeling groundwater flow and solute transport in geologic systems. Case studies of significant aquifers. Prerequisites: GLY 5827, MAP 2302, or permission of the instructor.

GLY 5827 Hydrogeology (3). Physics of flow in geological media. Saturated and unsaturated flow, groundwater and the hydrologic cycle, estimating hydraulic parameters of aquifers, introduction to chemical transport. Prerequisites: GLY 1010, MAC 2312, and PHY 2053, or permission of the instructor.

GLY 5827L Hydrogeology Lab (1). Laboratory, field, and computer exercises to complement GLY 5827. (F)

GLY 5828 Chemical Hydrogeology and Solute Transport (3). Quantitative analysis of hydrologic, geologic, and chemical factors controlling water quality and the transport and fate of organic and inorganic solutes in the subsurface. Prerequisite: GLY 5827.

GLY 5834 Field Hydrogeology (3). Field methods in hydrogeology. Drilling, logging, wells, data loggers, hydraulic conductivity/transmissivity measurements, purging, field chemistry parameter measurements, sampling methods. Prerequisites: GLY 4822 or permission of the instructor.

GLY 5835 Introduction to Lattice Boltzmann Methods (3). The course will provide an introduction to Lattice Boltzmann methods for fluid dynamics simulation. Emphasis on multiphase fluids. Prerequisites: Programming skills, graduate standing, permission of the instructor.

GLY 5875 Applications of Transmission Electron Microscopy (3). An introduction to theory and practical use of the JEOL JEM-1200EX II, Transmission Electron Microscope. Students will learn to prepare specimens and use for digital recording of publishable images. Prerequisites: Graduate standing or permission of the instructor.

GLY 5888 Coastal Hazards and Mitigation (3). Focus on the processes responsible for tsunamis, storm surges, coastal erosion, land subsidence, sea level rise, etc. and their mitigation.

GLY 5889 Geology for Environmental Scientists and Engineers (3). Characterization of rocks and rock masses; geological maps; seismic hazards; weathering of rocks; hydrologic cycle; slope stability; coastal processes; geophysical techniques. Course includes field trips in the South Florida region. Prerequisites: CHM 1045, GLY 1010 or permission of the instructor.

GLY 6061 Geoscience Systems (3). Description and history of the deep Earth, shallow Earth, Earth's surface and Earth's atmosphere that form one great dynamic system. Discussion of research, discoveries and debates from classic and current scientific articles.

GLY 6159 Stratigraphy of the Circum Caribbean Region (4). Detailed lithostratigraphic and biostratigraphic analyses of Caribbean islands, Central America, northern South America and Caribbean basin. Prerequisites: GLY 5621 or permission of the instructor. (SS)

GLY 6247 Geochronology and Radioactive Isotope Geochemistry (3). Use of naturally-occurring radioactive and radiogenic isotopes to determine ages of earth events and rates of earth processes at timescales ranging from the recent past through the age of the earth. Prerequisites: GLY 5246 or permission of the instructor.

GLY 6328 Advanced Igneous Petrology (3). Interpretation of igneous rocks; chemistry and physics of magma generation and crystallization; origin of major igneous rock series with emphasis on tectonic controls. Prerequisite: Permission of the instructor. Corequisite: GLY 6328L.

GLY 6328L Advanced Igneous Petrology Lab (1). Identification of rocks using microscopic and microprobe techniques. Prerequisite: Permission of the instructor. Corequisite: GLY 6328.

GLY 6337 Metamorphic Phase Equilibria (3). Theory and methods of calculation of metamorphic phase equilibria and P-T paths using appropriate analysis of composition space, activity models, geothermometry, geobarometry. Origin and interpretation of zoning in metamorphic minerals. Prerequisites: GLY 5335 or permission of the instructor.

GLY 6345 Sedimentary Petrography (3). Comparative study and fundamental observations of sedimentary rocks in hand specimens and under the petrographic microscope; their classification, theoretical and practical implications. Prerequisites: GLY 4551 or permission of the instructor.

GLY 6345L Sedimentary Petrography Laboratory (1). Laboratory studies of sedimentary rocks in thin section. Prerequisites: GLY 4551 or permission of the instructor. Corequisite: GLY 6345.

GLY 6353 Microfacies Analysis (3). **GLY 6353L Microfacies Analysis Laboratory (1).** Identification and interpretation of the fossil and mineralogical constituents of sedimentary rocks in thin section. Emphasis is placed on the paleoecological significance of fossil remains in carbonates. Prerequisites: GLY 4551 or permission of the instructor.

GLY 6392 Topics in Igneous Petrology and Geochemistry (3). Research seminar in contemporary petrology and geochemistry. Student presentation on thesis research. Prerequisites: GLY 5322 or permission of the instructor.

GLY 6427 Quantitative Geotectonics (3). Application of continuum mechanics and heat transfer to problems in geology. Observational constraints on earth properties. Emphasis is on problems relating to the earth's lithosphere. Prerequisites: GLY 4450, GLY 4400, GLY 5425 and MAP 2302 or permission of the instructor.

GLY 6444 Quantitative Analysis of Joints and Faults (3). Application of fracture mechanics to geologic problems, including the analysis of local and regional stress fields, bedrock fracture systems, estimation of fracture related strain, and the influence of mechanical properties on rock failure. Prerequisites: GLY 4400, GLY 4450, GLY 5425 or permission of the instructor.

GLY 6447 Advanced Topics in Structural Geology and Tectonics (3). Detailed exploration of selected research topics in structural geology and tectonics. Prerequisites: GLY 5408 or permission of the instructor.

GLY 6448 Stress in the Earth's Crust (3). The distribution and magnitude of stress in the earth's crust, laboratory derived values for earth stress, in situ stress measurements, regional stress patterns and sources of

stress in the lithosphere. Prerequisites: GLY 4400, GLY 4450, GLY 5425 or permission of the instructor.

GLY 6468 Paleomagnetism (3). Physics of rock and mineral magnetism, geomagnetism and paleomagnetism; field and laboratory methods, geomagnetic field behavior, magnetostratigraphy, apparent polar wander. Prerequisites: GLY 4400, GLY 3202 or permission of the instructor. Corequisite: GLY 6468L.

GLY 6468L Paleomagnetism Laboratory (1). Physics of rock and minerals magnetism, geomagnetism and paleomagnetism; field and laboratory methods, geomagnetic field behavior, magnetostratigraphy, apparent polar wander. Prerequisites: GLY 4400, GLY 3202 or permission of the instructor. Corequisite: GLY 6468.

GLY 6485 Physics of the Earth (3). Properties and dynamics of the Earth's interior studied from a physical perspective. Topics include heat flow, fluid flow, earthquake seismology. Prerequisites: GLY 4450 and MAC 2313.

GLY 6496 Advanced Topics in Geophysics (3). Discussion of research projects and current literature in geophysics. Prerequisite: GLY 5495.

GLY 6517 Basin Analysis (3). Analysis of sedimentary basins based on their origin, paleogeographic evolution and tectonic setting. Emphasis is placed on the tectonic evolution and economic potential of sedimentary basins.

GLY 6517L Basin Analysis Lab (1). Analysis of different types of sedimentary basins using a case history approach. Corequisite: GLY 6517.

GLY 6595 Topics in Sedimentology (3). Oral presentation by students of research projects and survey of relevant literature with reports by members of the seminar. Prerequisite: GLY 5346.

GLY 6626 Stratigraphic Micropaleontology: Foraminifera (3). Nomenclature, taxonomy, and biostratigraphy of Cretaceous and Cenozoic planktonic foraminifera. Studies of stratigraphically important taxa from Caribbean land sections, piston cores, and DSDP/ODP sites. Prerequisites: GLY 5621 or permission of the instructor.

GLY 6627 Stratigraphic Micropaleontology: Radiolaria (3). Nomenclature, taxonomy and biostratigraphy of Cretaceous and Cenozoic radiolaria. Studies of stratigraphically important taxa using Caribbean land sections, piston cores, and DSDP/ODP sites. Prerequisites: GLY 5621 or permission of the instructor.

GLY 6628 Stratigraphic Micropaleontology: Calcareous Nannofossils (3). Nomenclature, taxonomy, and biostratigraphy of triassic to recent nannofossils. Intensive training of identification of marker taxa using land and DSDP/ODP sites. Prerequisites: GLY 5621 or permission of the instructor.

GLY 6690 Topics in Paleontology (3). Oral presentation and discussion of current research projects and relevant literature, with reports by members of the seminar. Prerequisites: GLY 5608 or permission of the instructor.

GLY 6809 Hydrothermal Geochemistry (3). The mineralogy, thermodynamics, chemistry and isotope chemistry of hydrothermal and geothermal systems, with an emphasis on the transport of solutes in hydrothermal

solutions and ore-forming processes. Prerequisites: GLY 5246, CHM 3400 or permission of the instructor.

GLY 6817 Topics in Economic Geology (3). Current research directions in Economic Geology and Geochemistry, including ore formation processes, exploration and remediation.

GLY 6862 Numerical Methods in the Earth Sciences (3). Numerical techniques used by geoscientists, with emphasis on finite-difference and finite-element techniques to solve equations governing fluid flow and mass transport in geological systems. Prerequisites: MAP 2302, GLY 5827 and knowledge of one programming language or permission of the instructor.

GLY 6896 Advanced Topics in Hydrology (1-3). Research-oriented seminar course involving analysis of several contemporary topics chosen from the current literature in hydrology. Specific topics vary. May be repeated. Prerequisites: GLY 5827 and one other graduate level hydrology/hydrogeology course, or permission of the instructor.

GLY 6910 Supervised Research (1-12). Research apprenticeship under the direction of a professor or a thesis advisor. Prerequisites: Full graduate admission and permission of the instructor.

GLY 6941 Supervised Teaching in the Geosciences (1). Teaching a geological discipline under the supervision of departmental faculty. Prerequisite: Graduate standing.

GLY 6945 Proposal Writing (1). A graduate course aimed at introducing students to grant proposal writing.

GLY 6949 Professional Internship in Earth Science (1-3). Semester or summer term of supervised work at an approved government or industry laboratory or field station. Prerequisite: Graduate standing.

GLY 6966 Master's Comprehensive Examination (0). Oral and written examinations on knowledge in general geology and the student's field of concentration. Schedule to be selected in consultation with the Graduate Committee. Prerequisite: Advanced graduate standing.

GLY 6971 Master's Thesis (1-12). Field and/or laboratory research project toward thesis. Selected in consultation with major professor. Prerequisite: Permission of the major professor.

GLY 7980 Ph.D. Dissertation (1-12). Field and/or laboratory research directed towards completion of the doctoral dissertation. Selected in consultation with major professor. Prerequisite: Permission of the Major Professor and Doctoral Candidacy.

ISC 5150 Introduction to Research in Earth and Environmental Sciences (2). Introduction to research in Earth and Environmental Sciences: nature of scientific inquiry, development of research projects, data analysis, publication and presentation of research results.

ISC 5151 Earth and Environmental Graduate Seminar (1). Weekly seminar emphasizing research- and practice-oriented guest speaker series. Critical examination of current research topics by students, faculty, visiting speakers. Brief student reports. Prerequisite: Permission of the instructor.

ISC 6152 Earth and Environment Advanced Graduate Seminar (1). Weekly seminar emphasizing research- and practice-oriented guest speakers. Critical examination of current research topics by students, faculty, visiting speakers. Student research presentations. Prerequisite: ISC 5151.

ISC 6153 Environments of a Changing Planet (3). Interactions of physical, chemical and biological components and processes that have led to recent past and present environmental development, and possible future changes.

ISC 6155 Supervised Teaching in Earth and Environment (1). Instructional methods of teaching a course in an earth and environment discipline under the supervision of departmental faculty. Courses can include undergraduate laboratory courses. Prerequisite: graduate standing.

MET 5016 Physics of Atmospheres I (3). A quantitative examination of atmospheric radiation, thermodynamics and clouds, with a brief introduction to dynamics and applications to weather and climate. Prerequisites: Senior or first-year graduate student in physical science, computer science, or engineering.

MET 5017 Physics of Atmospheres II (3). Continuing examination of atmospheric dynamics, waves and instabilities, with applications to models, weather and climate. Prerequisites: Senior or first-year graduate student in physical science, computer science, or engineering.

MET 5105 Planetary Climate Change: Processes and Impacts (3). Interdisciplinary study of the reasons the Earth's climate is changing, the climates past and expected future variations, impacts on the human and natural environments, and ways to reduce them. Prerequisite: Graduate standing.

MET 5135 Climate Dynamics (3). Global energy cycle, atmospheric radiative transfer, surface energy balance, hydrologic cycle, atmosphere/ocean circulation, climate feedbacks, natural variability, anthropogenic climate change. Prerequisite: Graduate standing.

MET 5305 Boundary Layer Meteorology (3). General survey of boundary meteorology. Topics include atmospheric boundary layer, (ABL), role in exchange and circulation, use in interpreting wind, temperature, and moisture distribution, hurricane boundary layer wind, and turbulent structures. Prerequisites: PHY 2048 and PHY 2049.

MET 5311 Dynamic Meteorology I (3). To study atmospheric phenomena on a rotating planet. It intends to lead towards an understanding of the theories of the atmospheric motion by applying concepts of Math., thermodynamics, and dynamics. Prerequisites: PHY 2048, PHY 2049.

MET 5312 Atmospheric Dynamics II (3). Second graduate-level course in Atmospheric Dynamics. Topics include 2 and 3-dimensional Rossby waves, baroclinic and other instabilities, ageostrophic motions, and general circulation. Prerequisites: Atmospheric Dynamics I and graduate standing in Atmospheric Sciences.

MET 5355 Severe and Hazardous Weather (3). Focuses on introducing thunderstorms, squall lines, mesoscale

convection systems, and their interactions with synoptic scale weather. Prerequisites: MET 3003 or permission of the instructor.

MET 5365 Techniques for Earth System Modeling and Research (3). Model development for meteorology, hydrology, and geophysics using Python and FORTRAN. Includes model formulation, architecture and approximations, and synthesis of results. Prerequisite: Permission of the instructor.

MET 5412 Remote Sensing in Meteorology (3). An overview of satellite and radar remote sensing including the principles of atmospheric radiative transfer, the retrieval of atmospheric variables, and basic principles of interpretation. Prerequisites: PHY 2048 and PHY 2049.

MET 5525 Advanced Weather Forecasting (2). Graduate-level forecasting to guide setting of watches and warnings. Includes map discussions, analysis of current weather, and prediction for aviation, severe weather, and flash floods. Prerequisite: MET 3502 and MET 3502L or MET 5561 and MET 5561L.

MET 5530 Hurricane Meteorology and Impacts (3). Hurricane formation, motion, and impacts on the graduate level. Adds critical reading of the scientific and disaster literatures and quantitative problem sets to the undergraduate experience. Prerequisite: Permission of the instructor.

MET 5533L Weather Discussion and Analysis (1). Focus on analysis and forecasting of middle-latitude and tropical weather systems. Students will be required to give weather forecast discussions and to work on a research project. Prerequisites or Corequisites: MET 3502 or permission of the instructor.

MET 5561 Midlatitude Synoptic Meteorology (3). Focus on analysis and forecasting of middle-latitude weather systems. Examine the structure and dynamic of these systems by integrating weather observation with the current state of dynamic theory. Prerequisites: MET 3003 or permission of the instructor.

MET 5561L Midlatitude Synoptic Meteorology Lab (1). Focus on analysis and forecasting of middle-latitude weather systems. Develop an understanding of the weather forecasting process, and gain experience in communicating weather forecasts. Prerequisites: MET 3003 or permission of the instructor.

MET 5707 Operational Meteorology Research I (3). Training at NOAA's Miami facilities, focusing in upper air observations, in preparation for careers in forecasting. Offered for Pass/Fail only. Prerequisites: Graduate standing in Atmospheric Science and permission of the instructor.

MET 5708 Operational Meteorology Research II (3). Second semester training at NOAA's Miami facilities, focusing on use of AWIPS system and forecasting procedures, in preparation for careers in forecasting. Offered for Pass/Fail only. Prerequisites: MET 5707 and permission of the instructor.

MET 6971 Thesis (1-12). Individual graduate-level research supervised by a professor in the student's field of specialization or interest, leading toward a completed thesis. Prerequisites: Graduate standing in Geosciences and satisfactory progress toward the degree.

MET 7980 Ph.D. Dissertation (1-9). Continuing graduate-level research under the supervision of the student's advisor doctoral committee. Writing, revision, defense, and completion of a doctoral dissertation. Prerequisites: Graduate standing in Geosciences and satisfactory progress toward the doctoral degree.

OCC 6413 Biogeochemistry of Estuaries and Coasts (3). A survey of estuarine and coastal ecosystems with particular emphasis on how physical, geological, chemical, and biological processes act to regulate ecosystem function. Prerequisites: PCB 3043, EVR 3013 or equivalent.

OCG 6105 Advanced Marine Geology (3). OCG 6105L Advanced Marine Geology Lab (1). Application of geophysical and geological data to the interpretation of the earth's crust under the oceans, including the data provided by the Deep-Sea Drilling Project, dredging, piston-coring, gravity magnetism, and seismicity. Special emphasis will be given to the genesis and evolution of the Atlantic and Caribbean margins, and their potential for oil resources. Prerequisites: GLY 4730 or permission of the instructor.

OCG 6664 Paleooceanography (3). Mesozoic/Cenozoic development of the major ocean basins, their circulation and sedimentation history. Use of micropaleontologic and stable isotopic techniques in paleoceanographic analysis. Prerequisites: GLY 4730 or permission of the instructor.

SWS 5305 Advanced Soil Resources Analysis (3). A review of soil science concepts: analysis of physical and chemical properties of soils and nutrient cycling, emphasizing the soils of South Florida. Prerequisites: BSC 2010, BSC 2011, CHM 2210, CHM 2211; or permission of the instructor.

The English Department offers three graduate degree programs: Creative Writing, Linguistics and an English degree which offers a choice of tracks, Literature or Writing or Rhetoric. The descriptions of the Creative Writing and the Linguistics programs can be found under their respective headings in this catalog.

Master of Arts in English

To be admitted into the Master's program in English, a student must meet the University's graduate admission requirements and have:

1. A bachelor's degree in English or a related field;
2. A minimum 3.0 undergraduate grade point average;
3. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.
4. Two letters of recommendation from undergraduate or graduate professors;
5. A personal essay; and
6. Those who might be chosen for teaching assistantships will be interviewed by at least one member of the committee.

Common Degree Requirements

The Master's degree program consists of 30 semester hours of course work at graduate level (course numbers 5000 or above) and a thesis (6 credits). A maximum of six graduate semester hours may be transferred into the program subject to the approval of the graduate committee.

Required Courses

ENG 5048	Literary Theory	3
ENC 5703	Rhetorical Traditions	3

Thesis

LIT 6970	Master's Thesis	6
----------	-----------------	---

The student must complete a research thesis. The topic must be approved by the faculty member who will supervise the research, and then approved by the Thesis Committee. The thesis will be accepted only after being read and approved by a Thesis Committee. An oral defense is required before the Thesis Committee.

Students in the program may choose between two tracks, Literature or Writing and Rhetoric. The track-specific requirements are as follows:

Literature Track

Common Core of Required Courses (6 credits)

Taken by both Literature and Writing and Rhetoric Track students.

ENC 5703	Rhetorical Traditions	3
ENG 5048	Literary Theory	3

Thesis/Capstone (6 credits)

LIT 6930	Master's Thesis	6
----------	-----------------	---

Electives (24 credits)

Students may take a maximum of 24 semester hours (5000 or 6000) as appropriate to their graduate track (Writing and Rhetoric or Literature). Students should consult with a faculty advisor in their track, or with the Graduate Program Director.

Writing and Rhetoric Track

Core Required Course (3 credits)

ENC 6702	Composition Theory and Practice	3
Or		

ENG 6937	Teaching College Composition	3
Writing Program Electives (9-15 credits)		
ENC 5235	Grant Writing	3
ENC 6261	Theories of Professional and Technical Writing	3
ENC 5432	Document and Visual Design for Professional Writers	3
ENC 5752	Women's Rhetorics	3
ENC 6734	Theories of Multilingual Writing	3
ENC 5494	Writing Center Theory & Practice	3
ENC 6736	Writing Across Conventions	3
ENG 6942	College Composition Practicum	1

English Department Electives (6 credits)

Students in the Writing track may take up to 6 elective credits within the English Department:

AML - American Literature; CRW-Creative Writing; ENG-English-General; ENL-English Literature; LIN - Linguistics; LIT-Literature

Electives Outside the English Department (6 credits)

Students have the option to take courses from the following departments, with advisor approval: Communication, Leadership and Professional Studies.

Below is a list of all graduate courses that are offered by the English Department. Graduate standing is required for admission into all graduate courses.

Course Descriptions**Definition of Prefixes**

AML - American Literature; CRW-Creative Writing; ENG-English-General; ENL-English Literature; LIN - Linguistics; LIT-Literature.

AML 5305 Major American Literary Figures (3). Each section will consider the lifework of several authors such as Hawthorne, Melville, Whitman, Twain, James, Faulkner, Mailer, Wright, Baldwin. May be repeated.

AML 5505 Periods in American Literature (3). The literature and criticism of one specified period of American literature, such as Colonial, Federal, Transcendental, Antebellum, and Twentieth Century. May be repeated with change of period.

CRW 6806 Teaching Creative Writing (3). The course will prepare graduate students (and teachers from secondary schools and community colleges) to teach introductory classes and workshops in Creative Writing. Students will observe and participate in the department's CRW 2001 courses. Prerequisites: CRW 3111, 3311, or graduate standing, or permission of instructor.

ENC 5235 Grant Writing (3). Focus on rhetorical context of grant writing and the application of rhetorical concepts to the discourse of grant writing.

ENC 5432 Document and Visual Design for Professional Writers (3). This course examines the fundamental principles of visual design while also attending to the practical skills of implementing those principles in written documents.

ENC 5494 Writing Center Theory and Practice (3). In this course, we will read about writing center theory and the composing process.

ENC 5703 Rhetorical Traditions (3). In this course, we will read foundational texts and theories of the Western rhetorical tradition and beyond, from antiquity to the present day.

ENC 5752 Women's Rhetorics (3). In this class, we will look at primary and secondary texts by historical and contemporary women rhetors in order to define and apply feminist rhetorical practice

ENC 6261 Theories of Professional and Technical Writing (3). This course explores central theories of technical writing and the implications of those theories for professional practice.

ENC 6702 Composition Theory and Practice (3). Studies historical and contemporary trends in the scholarship of rhetoric and composition

ENC 6734 Multilingual Matters: Theories of Multilingual Writing (3). In this course, we will read theories for engaging multilingual writers and multilingual writing in research, teaching, and service in the academy.

ENC 6736 Writing Across Conventions (3). In this course, we will study composers who work within/across multiple languages, modes, genres, and media in ways that are either not accepted or unexpected in "standard" academic writing.

ENG 5009 Literary Criticism and Scholarship (3). Techniques and goals of humanistic research, bibliography, and critical commentary.

ENG 5018 Practical Criticism (3). Applies various critical theories -e.g. the formalistic, historical, structural, archetypal, sociological, etc. -to specific literary productions.

ENG 5026 Advanced Textual Reading (3). The study of selected texts for interpretation from different critical and theoretical perspectives. May be repeated. Prerequisites: Admission to the graduate program in English or by permission of the instructor.

ENG 5048 Literary Theory (3). An introduction to issues in the nature of literature, the philosophy of criticism, and methods of interpretation. The theoretical foundations for literary study. Prerequisites: Admission to the graduate program in English or by permission of the instructor.

ENG 5058 Form and Theory of Contemporary Literature (3). Various approaches and theories of practice in the major genres of imaginative writing, including development and articulation of the creative esthetic. May be repeated. Prerequisite: Permission of the instructor.

ENG 5907 Independent Study (VAR). Individual conferences, assigned readings, reports on independent investigations, with the consent of the chairperson.

ENG 5950 Special Project in English (1-3). Pursuit of projects involving relationship of profession to university and/or community and/or research issues in pedagogy, literature, or other areas. Prerequisites: Consent of Graduate Director or Department Chair. Corequisite: Consent of project supervisor.

ENG 5971 Thesis and Dissertation Workshop (3). A workshop providing practice in the type of writing,

research, and analytical skills required for successful graduate study. Prerequisite: Graduate standing.

ENG 6909 Independent Study (VAR). Individual conferences, assigned readings, reports on independent investigations, with the consent of the Chairperson.

ENG 6935 Special Topics in College Pedagogy (3). The pedagogy of teaching a designated area of college and university English, such as Shakespeare, American literature, film studies, creative writing, or linguistics. Course content and organization to be determined by the individual professor. Course does not meet certification requirements.

ENG 6937 Teaching College Composition (3). A seminar-workshop introducing the pedagogy of academic and professional writing courses at the university and college level, to include traditional rhetoric, writing as process, the modes of discourse, and post-structuralist theory. Course does not meet certification requirements. Prerequisite: Graduate standing. Corequisite: College composition practicum.

ENG 6942 College Composition Practicum (1). Practical experience in the teaching of English at the university and college level through supervised activities to include tutorials, evaluating, and commenting on student essays, supervised classroom discussion and teaching. Course does not meet certification requirements.

ENL 5220 Major British Literary Figures (3). Each section will consider the lifework of an author such as Chaucer, Spenser, Milton, Pope, Wordsworth, Dickens, Browning, Joyce, or others. May be repeated.

ENL 5505 Periods in English Literature (3). The literature and criticism regarding one specified period of English Literature, such as Medieval, Renaissance, Victorian, Twentieth Century, and Contemporary. May be repeated with change of period.

LIN 5019 Metaphor, Language, and Literature (3). Examines nature of metaphor as a cognitive phenomenon; how we use metaphor to conceptualize basic physical and cultural notions; role of cognitive metaphor in literature. Prerequisites: LIN 3013 or LIN 5018.

LIN 5211 Applied Phonetics (3). Study of sounds and suprasegmentals of English. Comparison of phonetic features of English with those of other languages. Universal constraints and markedness in learning second/foreign language pronunciation. Prerequisites: LIN 3010, LIN 3013, or LIN 5018 or the equivalent.

LIN 5626 Language Acquisition and Processing in Bilinguals (3). This course covers language acquisition, interaction, and processing in bilingual children and adults, language and cognition in bilinguals, and issues of assessment of bilinguals. Prerequisites: LIN 5018 or equivalent.

LIN 6084 Research Methods and Research Design in Linguistics (3). Introduction to a range of theoretical issues addressed and practical methods used in linguistic studies. Prerequisite: LIN 5715.

LIN 6165 Field Methods (3). Elicitation, recording and analysis of linguistic data in field research. Prerequisite: LIN 5018.

LIN 6226 Phonetics II (3). Acoustic and auditory phonetics. Cross-language speech perception. Feature systems and place of articulation. Stress and rhythm. Experimental phonetics. Prerequisite: LIN 5206.

LIN 6336 Phonology II (3). Optimality in phonological theory. Syllable structure and prosody. Licensing and underspecification in OT. Phonological acquisition and disorders in OT. Can OT account for phonological opacity? Prerequisite: LIN 6323.

LIN 6709 Research Methods in Psycholinguistics and Bilingualism (3). Analysis of the conduct of research in psycholinguistics and bilingualism and the methods used. Corequisite: LIN 5015 or equivalent.

LIN 6773 Introduction to Computational Linguistics (3). Introduction to basic programming using the R programming language and regular expressions.

LIN 6796 Neurolinguistics (3). Exploration of the neural basis for the production and acquisition of language, including multilingual populations.

LIN 6910 Research Project for Publication I (3). Students carry out a comprehensive research project for publishable standard. For Linguistics MA and PhD students, for the second year Research Paper for Publication. May be repeated. Prerequisite: LIN 6085.

LIN 6911 Doctoral Research Project for Publication (3). Students conduct an in-depth research project as one of the qualifying steps completed in the third year of PhD studies to proceed to the dissertation project for the PhD. May be repeated. Prerequisites: LIN 6085; LIN 6910.

LIN 6946 Practicum (1-2). Pedagogical techniques, syllabus construction, responding to student questions, fostering student participation, collaborative learning, use of technology in the classroom. Prerequisite: A minimum of 18 graduate credit hours completed in Linguistics.

LIT 5358 Black Literature and Literary/Cultural Theory (3). Examines 20C. black literary critical thought. Students interrogate cultural theories and literary texts from African, Caribbean, African-American, Black British and Afro-Brazilian communities. Prerequisite: Graduate standing.

LIT 5359 African Diaspora Women Writers (3). Study of black women writers from throughout the Diaspora from the early 19th century to present. Prerequisite: Graduate standing.

LIT 5363 Literary Movements (3). Individual sections will study the authors, works, and audiences involved in such phenomena as Humanism, Mannerism, Romanticism, Symbolism, the Harlem Renaissance, and others. May be repeated.

LIT 5405 Literature, Society, and Language (3). This seminar explores language's relationship to social formation, specifically as it applies to the relationship between literature and social groups and institutions. Prerequisites: Admission to the graduate program in English or by permission of the instructor.

LIT 5426 Authors in their Times (3). A focus on one or more designated authors and the biographical, political and historical context in which they wrote, using current critical and historical approaches. May be repeated. Prerequisites: Admission to the graduate program in English or by permission of the instructor.

LIT 5486 Literature: Continuity and Change (3).

Explores the development of a particular literary genre, ideological concept, or cultural tradition over a broad period of time. May be repeated. Prerequisites: Admission to the graduate program in English or by permission of the instructor.

LIT 5487 Texts and Culture (3). The study of the relationship between specified texts and a historically, socially, or conceptually defined culture, such as Vietnam War Narratives, Jewish Literature, or Postmodernism. May be repeated. Prerequisites: Admission to the graduate program in English or by permission of the instructor.

LIT 5556 Feminist Theory (3). Course examines central concepts in feminist critical thought from a variety of disciplinary perspectives to address gender oppression at the intersection of sexuality/ race/ class/ ethnicity/ ability.

LIT 5934 Special Topics (3). A course designed to give groups of students an opportunity to pursue special studies not otherwise offered. May be repeated.

LIT 6934 Special Topics (3). A course designed to give groups of students an opportunity to pursue special studies not otherwise offered. May be repeated.

LIT 6935 Master's Colloquium (3). Individual sections study a specific literary topic, selected and presented jointly by several faculty members. May be repeated. Prerequisites: Admission to the graduate program in English or by permission of the instructor.

LIT 6970 Master's Thesis (1-6). A thesis is required of all graduate students of English, to be written in the final semester done under the supervision of a faculty member. Prerequisites: Admission to the graduate program in English and by permission of the supervising faculty.

Liberal Studies

Course Descriptions

Definition of Prefixes

IDS – Interdisciplinary Studies.

F-Fall semester offering; S-Spring semester offering

IDS 6931 Great Ideas Seminar: The Age of Science

(3). Great ideas from the natural sciences. Study of the historical development, the evidential basis, and the broader implications of those ideas. Reflection on the nature and methods of modern science. Prerequisite: Graduate standing.

IDS 6937 Great Ideas Seminar: Special Topics (3).

Intensive interdisciplinary investigation of a single great idea such as natural selection or infinity. Study of that idea's cross-disciplinary development, its impact, and its uses and misuses. Prerequisite: Graduate standing.

IDS 6938 Great Ideas Seminar: Human Nature (3).

Great religious, philosophical, and scientific ideas about human nature. Discussion of the view that human beings have no nature. Study of such thinkers as Confucius, Plato, Darwin, Freud, Skinner, and Sartre. Prerequisite: Graduate standing.

IDS 6939 Great Ideas Seminar: Politics and Society

(3). Great ideas in political and social thought from Plato to the present. Topics include political obligation, the nature of the state, social and economic justice, social contract, liberty, the rule of law, and community. Prerequisite: Graduate standing.

IDS 6972 Master's Essay (1-3). For students working on a master's essay. Oral presentation required. Prerequisite: All other coursework for the Master of Arts in Liberal Studies Degree.

IDS 6973 Master's Thesis (1-6). For students working on a master's thesis. Prerequisites: Graduate standing and permission of the instructor.

Linguistics

Ana Luszczyńska, Interim Program Director, Chairperson
and Associate Professor, English

Melissa Baralt, Associate Professor, Modern Languages

Lynn Berk, Professor Emerita, English

Jean-Robert Cadely, Associate Professor, Modern
Languages

Phillip M. Carter, Associate Professor, English

Tometro Hopkins, Associate Professor, English

John Jensen, Professor Emeritus, Modern Languages

Peter A. Machonis, Professor, Modern Languages

Ana Roca, Professor Emerita, Modern Languages

Mehmet Yavas, Professor, English

Master of Arts in Linguistics

Admission Requirements

Applicants must meet the University's Graduate School general admissions requirements; GPA of minimum 3.0, two letters of recommendation, and a statement of purpose on the reasons for pursuing an M.A. in Linguistics. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL), for the International English Language Testing System (IELTS), or for the Pearson Test of English (PTE). A total score of 100 on the iBT TOEFL (equivalent to 600 on the paper-based version of the TOEFL), or a score of 6.5 on the IELTS, or a minimum score of 53 on the PTE is required.

Degree Requirements

The Master of Arts in Linguistics requires 36 graduate hours in Linguistics. Twenty-one of the 36 hours are in core required courses, the remainder in electives. In addition to maintaining an overall 3.0 average in all courses, students must also obtain a minimum of a 'B' in each of the required courses ('B-' is not acceptable in these courses) and a minimum of a 'C' in each elective course ('C-' is not acceptable). Course work is as follows:

Required Courses: 21 hours, made up of A and B:

A.		
LIN 5018	Introduction to Linguistics*	3
LIN 5206	Phonetics	3
LIN 6085	Research Methods in Experimental Linguistics	3
LIN 6323	Phonology	3
LIN 6510	Syntax I	3
LIN 6805	Semantics	3

B. Linguistic Structure Course: 3 hours

A student must fulfill this requirement by taking a structure course on a non-Indo-European Language:

LIN 5108	Language Universals	3
	or	
LIN 5574	Languages of the World	3
	or	
LIN 6572	Structure of a Non-Indo-European Language	3

Electives

15 hours more of electives (or 18 more if LIN 5018 has been waived)

*LIN 5018 will only be required of those students who have insufficient background in Linguistics. Students with a prior course in linguistics may opt out of this requirement after passing a qualifying exam on the course materials.

Masters Research Project

All students will be required to produce a research paper of publishable standard by the end of their second year. (LIN 6910, Research Project for Publication I, may be taken to facilitate completion of this requirement.) The research project must be presented in an open forum at the end of the year.

Combined BA/MA in Linguistics Degree Pathway

To be considered for admission to the combined Bachelor's/Master's degree pathway, students must have completed at least 75 credits in the Bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the Bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from his/her Bachelor's degree program. Upon conferral of the Bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees.

Admission Requirements

1. Enrollment in undergraduate program in English, Spanish, French, or Portuguese at FIU.
2. Must have completed 75 credits.
3. Must have completed LIN 3013/LIN 3010 General Linguistics, LIN 4680 Modern English Grammar, FRE 3780 French Phonetics, or SPN 3733 General Linguistics with a grade of "A".
4. Current GPA of 3.2 or higher.
5. Two letters of faculty recommendation.
6. A 2-4 page statement of purpose, explaining academic plans and goals.

Recommended Graduate Courses for Undergraduates

The following graduate courses are recommended to BA students. In order to complete their degree requirements, students may double-count up to 12 graduate credits of coursework toward the Bachelor's and M.A. degrees:

A. English

LIN 5018	Introduction to Linguistics*
LIN 5107	History of the English Language
LIN 5108	Language Universals**
LIN 5206	Phonetics***
LIN 5501	English Syntax
LIN 5574	Languages of the World**
LIN 6510	Syntax I***
LIN 5715	Language Acquisition
LIN 6602	Language Contact

LIN 5601	Sociolinguistics
LIN 5825	Pragmatics
LIN 5934	Special Topics in Linguistics

B. Spanish

LIN 5018	Introduction to Linguistics*
SPN 5705	The Structure of Spanish
SPN 5845	History of the Language
LIN 5604	Spanish in the United States
SPN 5736	Spanish as a Heritage Language: Acquisition and Development
LIN 5603	Language Planning: Linguistic Minority Issues
LIN 5601	Sociolinguistics
LIN 5720	Second Language Acquisition
LIN 5825	Pragmatics
LIN 5934	Special Topics in Linguistics

C. French

LIN 5018	Introduction to Linguistics*
FRE 5855	Structure of Modern French
FRE 5845	History of Language I
FRE 5846	History of Language II
FRE 5508	La Francophonie
FRE 5735	Special Topics in Linguistics
HAI 5235	Haitian Creole Seminar
LIN 5601	Sociolinguistics
LIN 5825	Pragmatics
LIN 5720	Second Language Acquisition
LIN 5934	Special Topics in Linguistics

D. Portuguese

LIN 5018	Introduction to Linguistics*
LIN 5601	Sociolinguistics
LIN 5825	Pragmatics
LIN 5720	Second Language Acquisition
LIN 5934	Special Topics in Linguistics

*MA core requirement – prerequisite to all other course requirements

**Fulfills the 'structure course' requirement of MA

***Fulfills one of the core requirements of MA

M.A. Degree Requirements

1. Course Work (36 graduate credit hours)

Core Required Courses: (a minimum of "B" is required in core courses)

LIN 5018	Introduction to Linguistics	3
LIN 5206	Phonetics	3
LIN 6085	Research Methods in Experimental Linguistics	3
LIN 6323	Phonology	3
LIN 6510	Syntax I	3
LIN 6805	Semantics	3

One course about the structure of a non-Indo-European Language:

LIN 5108	Language Universals	3
	or	
LIN 5574	Languages of the World	3
	or	
LIN 6572	Structure of a Non-Indo-European Language	3

Electives: 5 LIN prefixed graduate courses (or 6, if LIN 5018 has been waived)

2. Master's Research Project/Comprehensive Exams

3. Awarding of Degrees

a) The BA will be awarded when all BA requirements of the designated undergraduate program are completed.

b) The MA will be awarded after all MA requirements of the Linguistics Program and the BA requirements are completed.

Course Descriptions**Definition of Prefixes**

LIN – Linguistics; MHF-Mathematics: History and Foundations.

F-Fall semester offering; S-Spring semester offering

LIN 5017 Cognitive Linguistics (3). Explores the nature of human reason and categorization as revealed by language. Examines the role of metaphor, imagination, and bodily experience in human thought processes. Prerequisites: LIN 3010, LIN 3013, LIN 5018 or the equivalent.

LIN 5018 Introduction to Linguistics (3). Introduction to linguistic theory and analysis, with special emphasis on the major components of languages and modern approaches to their analysis. (F)

LIN 5019 Metaphor, Language, and Literature (3). Examines the nature of metaphor as a cognitive phenomenon; how we use metaphor to conceptualize basic physical and cultural notions; role of cognitive metaphor in literature. Prerequisites: LIN 3013 or LIN 5018.

LIN 5107 History of the English Language (3). Study of the development of the grammar and vocabulary represented in samples of the English language from the 8th century to modern times. Prerequisites: LIN 3010, LIN 3013, LIN 5018 or the equivalent. (F)

LIN 5108 Language Universals (3). Universal properties of language from two major perspectives: those of Typologists and of Universal Grammarians. A variety of linguistic structures and theoretical explanations are examined. Prerequisites: LIN 3013, or LIN 3010, or LIN 5018, or the equivalent.

LIN 5146 Historical and Comparative Linguistics (3). The study of linguistic methodology for determining historical and genetic relationships among languages. Diachronic syntax and its methodology will be included. The relevance of historical and comparative linguistics to similar processes found in language acquisition and to socio-linguistics will be studied. Prerequisite: LIN 5206.

LIN 5206 Phonetics (3). The study of the articulatory mechanisms used in producing speech sounds and of their acoustic properties. Ear training in the phonetic transcription of speech sounds used in the world's languages. (F)

LIN 5207 Acoustic Phonetics (3). Introduction to principles of acoustic and instrumental phonetics, including the physics of speech sounds and use of the sound spectrograph and other instruments. Prerequisites: LIN 3010, LIN 3013, LIN 5018 or the equivalent, plus one additional course in phonetics or phonology. Co-requisite: One of the prerequisites may be counted as a co-requisite.

LIN 5211 Applied Phonetics (3). Study of sounds and suprasegmentals of English. Comparison of phonetic

features of English with those of other languages. Universal constraints and markedness in learning second/foreign language pronunciation. Prerequisites: LIN 3010, LIN 3013, or LIN 5018 or the equivalent.

LIN 5431 Morphology (3). The study of linguistic methodology for determining the morphological and syntactic structures of languages. Distinct theoretical approaches to analysis will be emphasized. Recent developments in linguistics that bear on language-universal and language-specific aspects of morphology. Prerequisite: LIN 6323.

LIN 5501 English Syntax (3). This course will focus on syntactic analysis of English. Although the course itself is non-theoretical, it uses a variety of underlying theoretical approaches to train students in syntactic analysis.

LIN 5574 Languages of the World (3). Introduces the student to the richness of human linguistic diversity while demonstrating concurrently the underlying universality of human language. Prerequisites: LIN 3010, LIN 3013, or LIN 5018 or the equivalent.

LIN 5601 Sociolinguistics (3). Principles and theories of linguistic variation with special attention to correspondences between social and linguistic variables. Prerequisites: LIN 3010, LIN 3013, LIN 5018 or the equivalent.

LIN 5603 Language Planning: Linguistic Minority Issues (3). Introduction to the field of language planning. Minority linguistic issues in developing and developed nations: official languages, endangered languages, and language as problem and/or resource. Prerequisites: LIN 3010, LIN 3013, LIN 5018 or the equivalent.

LIN 5604 Spanish in the United States (3). An examination of the sociolinguistic research into Spanish in the U.S.: varieties of Spanish, language attitudes, language contact and change, and aspects of language use. Prerequisites: LIN 3010, LIN 3013, LIN 5018 or the equivalent.

LIN 5613 Dialectology (3). The geography of language variation: linguistic geography, atlases, national and regional studies. Dialectology within a modern sociolinguistic framework; research approaches. Prerequisites: LIN 3010, LIN 3013, LIN 5018 or the equivalent.

LIN 5625 Studies in Bilingualism (3). Readings and analysis of bilingual programs and binational goals. Prerequisites: LIN 3010, LIN 3013, LIN 5018 or the equivalent.

LIN 5626 Language Acquisition and Processing in Bilinguals (3). This course covers language acquisition, interaction, and processing in bilingual children and adults, language and cognition in bilinguals, and issues of assessment of bilinguals. Prerequisites: LIN 5018 or equivalent.

LIN 5689 Seminar in Lexicon Grammar (3). This course introduces students to research in Lexicon Grammar -- syntactic analyses based on a formal classification of large portions of the lexicon. Idioms and NLP applications are also discussed. Prerequisites: LIN 5018 and one structure course (e.g. LIN 5501, SPN 5705, or FRE 5855).

LIN 5715 Language Acquisition (3). The study of the processes underlying normal first-language acquisition. The focus is on the development of the subsystems of language (i.e., the phonological, morphological, syntactic, and semantic subsystems) in the child's growing command of his or her native language.

LIN 5720 Second Language Acquisition (3). Research, theories, and issues in second language acquisition. Topics include the Monitor Model, the role of the first language, motivation, age, individual differences, code-switching, and the environment; affective variables and attitudes.

LIN 5732 Speech Errors and Linguistic Knowledge (3). This course focuses on the nature of linguistic errors produced by speakers in their native languages. Students will read research on errors produced by adult native speakers of a language, on first-language errors of children, and on errors made by persons acquiring a second language.

LIN 5733 Methods of Teaching Accent Reduction (3). Theory and methods regarding the teaching of pronunciation to non-native speakers of a language. Hands-on practice in helping non-native speakers improve their pronunciation. Prerequisites: LIN 3010, LIN 3013, LIN 5018 or the equivalent.

LIN 5734 Teaching Linguistics (1). Introduces graduate students to pedagogical issues and strategies in the teaching of linguistics. Topics include textbook selection, writing syllabi, student assessment, and professional ethics. Prerequisite: Graduate standing.

LIN 5748 Survey of Applied Linguistics (3). Application of linguistics to problems in many fields, such as literature, translation, criminal justice, speech pathology, computer science, communications, public policy, and language instruction. Prerequisites: LIN 3010 or LIN 3013 or LIN 5018 or the equivalent.

LIN 5760 Research Methods in Language Variation (3). Research in sociolinguistics, dialectology, bilingualism: problem definition, instrument design, data collection and analysis, including sampling techniques and statistical procedures. Prerequisites: LIN 5601, LIN 5625, LIN 5613 or other course in variation.

LIN 5825 Pragmatics (3). Study of the relationships between language form, meaning, and use. Special emphasis on speech act theory. Prerequisites: LIN 3010, LIN 3013, LIN 5018 or the equivalent.

LIN 5934 Special Topics in Linguistics (3). Content to be determined by instructor. May be repeated for credit when content changes. Prerequisites: LIN 3010, LIN 3013, or LIN 5018.

LIN 6085 Research Methods in Experimental Linguistics (3). Focus: conducting experimental linguistic research and the range of methods used; formulating a research question, designing a study, collecting pilot data, and carrying out analyses on results. Prerequisites: LIN 3010, LIN 3013, or LIN 5018 or the equivalent.

LIN 6165 Field Methods (3). Elicitation, recording and analysis of linguistic data in field research. Prerequisite: LIN 5018.

LIN 6226 Phonetics II (3). Acoustic and auditory phonetics. Cross-language speech perception. Feature systems and place of articulation. Stress and rhythm. Experimental phonetics. Prerequisite: LIN 5206.

LIN 6323 Phonology (3). The study of phonological processes in languages and linguistic methodology for phonological analysis. Emphasis will be placed on recent theoretical questions concerning such issues as the abstractness of underlying forms, the naturalness of processes, and the relevance of markedness to a phonological description. Prerequisite: LIN 5206, Phonetics. (S)

LIN 6336 Phonology II (3). Optimality in phonological theory. Syllable structure and prosody. Licensing and underspecification in OT. Phonological acquisition and disorders in OT. Can OT account for phonological opacity? Prerequisite: LIN 6323.

LIN 6510 Syntax I (3). This course will expose students to the theoretical models on which much contemporary work in English grammar is based. Students will read works on selected topics such as structural linguistics, transformational grammar, and case grammar. Specific content may change from semester to semester. May be re-taken for credit when content changes. Prerequisites: LIN 3010, LIN 3013, LIN 5018 or the equivalent. (S)

LIN 6520 Syntax II (3). Study of recent developments in syntactic theory within generative grammar. This course builds on Syntax I and provides discussion of major issues in prominent literature in linguistic theory. Prerequisite: LIN 6510. (F)

LIN 6562 Discourse Analysis (3). The study of the organization of language above the sentence level, such as conversational interactions and written texts. Prerequisites: LIN 3010, LIN 3013, LIN 5018 or the equivalent.

LIN 6572 Structure of a Non-Indo-European Language (3). An in-depth study of the structure of a non-Indo-European language. The particular language to be studied will be varied from semester to semester. Course may be repeated. Prerequisites: LIN 5018, LIN 5206, LIN 5222, and a course in syntax.

LIN 6602 Language Contact (3). A study of the language changes that occur when two or more languages come into contact with one another. The course will also examine the characteristics of the individuals and communities involved in such contact.

LIN 6773 Introduction to Computational Linguistics (3). Introduction to basic programming using the R programming language and regular expressions.

LIN 6796 Neurolinguistics (3). Exploration of the neural basis for the production and acquisition of language, including multilingual populations.

LIN 6805 Semantics (3). The study of linguistic semantics. Language-universal and language-specific properties of the semantic structure of words and sentences will be considered. Students will be exposed to a variety of approaches to the study of meaning. Prerequisites: Introductory course in Linguistics or permission of the instructor. (F)

LIN 6905 Independent Study (VAR). This course is designed for students who wish to pursue specialized topics in advanced Linguistics: phonetics, phonology, morphology, syntax, semantics, psycholinguistics, historical linguistics, or language contact. Prerequisites: Introductory course in Linguistics and permission of the instructor.

LIN 6910 Research Project for Publication I (3). Students carry out a comprehensive research project for publishable standard. For Linguistics MA and PhD students, for the second year Research Paper for Publication. May be repeated. Prerequisite: LIN 6085.

LIN 6911 Doctoral Research Project for Publication (3). Students conduct an in-depth research project as one of the qualifying steps completed in the third year of PhD studies to proceed to the dissertation project for the PhD. May be repeated. Prerequisites: LIN 6085; LIN 6910.

LIN 6934 Special Topics in Linguistics (3). Content to be determined by students and instructor. (Approval of the Department required.)

LIN 6937 Seminar in Linguistics (3). Topics vary each semester. Prerequisite: A previous course in the same sub-area of Linguistics.

LIN 6971 Thesis (1-6). Prerequisite: Completion of all other requirements for the M.A. degree in Linguistics.

MHF 5345 Mathematical Logic for Linguistics (3). Formal logical systems and applications. Propositional and predicate calculus, proof systems, completeness and incompleteness theorems, recursion. Chomsky hierarchy, formal grammars. Does not fulfill requirements for Mathematics Degree. Prerequisites: MAD 3512 or permission of the instructor.

School of Integrated Science and Humanity (SISH)

Senior Associate Dean

Walter Van Hamme

The School of Integrated Science and Humanity (SISH) is a unique integration of academic departments, research centers and institutes created to deepen understanding and advance scientific inquiry in the areas addressing human health, well-being and society. SISH explores the critical concerns of our times through knowledge, discussion, and awareness of social and ethical issues in the sciences and humanities. Students and faculty are developing and implementing solutions to prevent disease, advance mental health treatment, and promote diversity and exploration throughout the world.

With an interdisciplinary approach to frontline research in the natural, biomolecular and behavioral sciences, SISH is building programs to advance science for humanity through outstanding scholarship and innovative teaching.

As part of the College of Arts, Sciences and Education, SISH offers academic degrees at all levels in Chemistry and Biochemistry, Mathematics and Statistics, Philosophy, Physics, and Psychology. The school is proud to house many of the university's prominent centers and institutes, including the Biomolecular Sciences Institute, Center for Children and Families, Center for Imaging Science, Center for Women's and Gender Studies, International Forensic Research Institute, and the Stocker AstroScience Center.

The school brings together exceptional faculty who are leaders in education, preparing today's students for the ever-growing opportunities in the fields listed above. See also <http://sish.fiu.edu>.

Chemistry and Biochemistry

Yong Cai, Professor and Chairperson
Irina Agolnik, Associate Professor, College of Medicine

Sonia M. Underwood, Assistant Professor
Xiaotang Wang, Associate Professor
Stephen Winkle, Associate Professor
Stanislaw F. Wnuk, Professor and Associate Dean for Graduate Education, Robert Stempel School of Public

Health Research
Yi Xiao, Associate Professor

Graduate Admission Requirements

1. A minimum undergraduate grade point average (GPA) of 3.0/4.0 in chemistry and cognate science courses and submission of official GRE scores are required. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.
2. Applicants must send a statement of purpose and arrange to have sent transcripts and three letters of recommendation evaluating the applicant's potential for graduate work. Originals of these items must be sent to the FIU Admissions office as specified at <https://admissions.fiu.edu/how-to-apply/graduate-applicant/index.html>. Prospective candidates should refer to both the above website and <http://casgroup.fiu.edu/chemistry/> for details regarding the application procedure, which must be completed on-line.
3. Formal admission to the M.S. and Ph.D. programs is granted by the Admissions Office. Awards of teaching assistantships are granted by the Graduate Program Director. Entrance is possible at the beginning of each semester (fall, spring, summer). For consideration for a graduate assistantship applicants need to apply for the Fall semester and all application materials should be received at least five months prior to the desired starting date.
4. Students whose undergraduate degree is not equivalent to the American Chemical Society certified Bachelor of Science degree in chemistry may be required to make up deficiencies. For example, depending on his or her area of specialization, a student may be required to make up deficiencies in quantum mechanics, instrumental analysis, or biochemistry by successfully completing Graduate Physical Chemistry II (CHM 5426), Graduate Analytical Methods (CHM 5150), or Graduate Biological Chemistry (CHM 5305) respectively.
5. Entering graduate students must pass two proficiency exams. Proficiencies are offered in organic, physical, inorganic, analytical, and biochemistry. One pass must be in either organic or physical chemistry; the other is open. The proficiency exams will be administered to incoming graduate students in the week before the fall and spring semesters. If a student fails to receive a pass in a proficiency exam, he or she must show proficiency by completing the appropriate course with a grade of "B" (3.0/4.0) or better. These courses are Graduate Organic Chemistry (CHM 5225), Graduate Physical Chemistry (CHM 5425), Graduate Analytical Methods (CHM 5150), and Graduate Biological Chemistry (CHM 5305). Students are expected to complete proficiency requirements by the end of their first semester.
6. Graduate students must maintain a GPA of 3.0/4.0. Only courses applicable to the graduate program, excluding those for making up deficiencies or satisfying proficiencies, are counted in the GPA. If the

cumulative GPA drops below 3.0 for one semester, the student will be placed on academic probation. A student who fails to raise his or her GPA to 3.0 or higher within one semester will be dismissed from the program.

7. Full-time graduate students generally serve as Teaching Assistants (TA's) in the Department of Chemistry and Biochemistry for their first semester. Ph.D. candidates must serve as TA's for at least one year except in unusual circumstances. TA's are awarded on a competitive basis, require a minimum cumulative GPA of 3.0, and can be continued for up to four years for Ph.D. students who maintain acceptable academic performance. A limited number of Graduate Research Assistantships (RA's) may be available.

Transfer of Credits and Financial Support

Transfer of credits. Students having an M.S. in chemistry may transfer as many as 36 credits towards their Ph.D. degree. However, no more than six of those credits will count toward fulfillment of the formal course work requirement. More than six credits for formal course work can be transferred only with special permission of the Graduate Committee, in which case the number of additional course work credits required will depend on the student's performance in courses, the date courses were completed, and the area of Ph.D. concentration.

Financial Support. Full-time graduate students in good academic standing are eligible for financial support. Teaching and research assistantships are available on a competitive basis. Inquiries concerning application to the program and availability of financial support should be directed to the Chemistry Graduate Program Director.

Master of Science in Chemistry

Degree Requirements

- A minimum of 32 credits of course work. A grade of "C or higher must be obtained in all courses, and a cumulative grade point average of 3.0 or higher which must be maintained. The course work must include:
 - At least nine credits of chemistry in at least two of the six major areas of chemistry (Analytical, Biochemistry, Environmental, Inorganic, Organic, and Physical) from the core listed below:

Core Courses (three credits each)

Analytical

CHM 5138	Advanced Mass Spectrometry
CHM 5156	Advanced Chromatography
CHM 5165	Chemometrics and Sampling
CHM 6157	Advanced Analytical Chemistry

Biochemistry

BCH 6108	Biochemical Techniques
CHM 6036	Advanced Biochemistry I
CHM 6037	Advanced Biochemistry II (Molecular Genetics)
CHM 5506	Physical Biochemistry

Environmental

CHM 5423	Atmospheric Chemistry
CHM 5765	Aquatic Chemistry
CHM 6281	Environmental Organic Chemistry
CHM 6340	Organic Geochemistry

OCC 5050	Chemical Oceanography
CHM 6088	Environmental Chemistry of Trace Elements

Inorganic

CHM 5251	Organometallic Chemistry
CHM 5440	Kinetics and Catalysis
CHM 5540	Group Theory in Chemistry
CHM 5650	Physical Inorganic Chemistry

Organic

CHM 5236	Spectroscopic Techniques and Structure Elucidation
CHM 5250	Organic Synthesis
CHM 5263	Physical Organic Chemistry

Physical

CHM 5423	Atmospheric Chemistry
CHM 5490	Physical Spectroscopy
CHM 5540	Group Theory in Chemistry
CHM 5586	Computational Chemistry
CHM 6461	Statistical Thermodynamics
CHM 6480	Quantum Mechanics

Courses not listed above may be counted as core course with prior departmental approval.

- At least six credits of additional graduate-level courses approved by the thesis committee in consultation with the Graduate Program Director with the following guidelines:
 - The courses must be 5000 or 6000 level chemistry courses (CHM prefix) or approved cognates (up to a maximum of six credits).
 - The following do not count toward satisfaction of this requirement: proficiency courses and courses taken to make up for undergraduate-level deficiencies in chemistry (including CHM 5150, CHM 5225, CHM 5305, CHM 5425, and CHM 5426); and courses corresponding to research, seminar, colloquium, supervised teaching, and thesis completion (CHM 6910L, CHM 6935, CHM 6936, CHM 6940, CHM 6970, and CHM 6971).
 - Full-time graduate students are required to register for one credit of CHM 6940 (Supervised Teaching) each semester they serve as teaching assistants.
 - Full-time graduate students are required to register for one credit of CHM 6935 (Graduate Seminar) or one credit of CHM 6936 (Chemistry Colloquium) each fall and spring semester.
 - At least one credit of CHM 6936 (Chemistry Colloquium) is required. Each student must present a seminar on their proposed research at the colloquium for a letter grade in their second semester of graduate study.
 - At least eight credits of CHM 6970 (Thesis Research) involving independent thesis research under the direction of a faculty member in the Department.
 - At least two credits of CHM 6971 (Thesis) taken in the semester in which the M.S. thesis is to be defended.
- Satisfactory public presentation and defense of a research thesis, evaluated by the student's Thesis Committee. The Thesis Committee will consist of the research advisor and a randomly-assigned committee

member appointed by the Graduate Program Director, both from the Department's graduate faculty, and one additional member with expertise in the student's research area. At least one committee member must be tenured in the Department. The Committee may include more members, but they will be non-voting.

Master of Science in Chemistry with Report Option Degree Requirements

1. A minimum of 32 credits of course work. A grade of "C or higher must be obtained in all courses, and a cumulative grade point average of 3.0 or higher which must be maintained. The course work must include:
 - a) At least nine credits of graduate-level CHM courses as core courses with the following requirements:
 - i. The courses must be 5000 or 6000 level CHM courses.
 - ii. The following do not count toward satisfaction of this requirement: proficiency courses and courses taken to make up for undergraduate-level deficiencies in chemistry (including CHM 5150, CHM 5225, CHM 5305, CHM 5425, and CHM 5426); and courses corresponding to research, seminar, colloquium, supervised teaching, and thesis completion (CHM 6910L, CHM 6935, CHM 6936, CHM 6940, CHM 6970, and CHM 6971).
 - b) At least nine credits of additional graduate-level courses approved by the student's committee in consultation with the Graduate Program Director with the following guidelines:
 - i. The courses must be 5000 or 6000 level chemistry courses or approved cognates.
 - ii. The following do not count toward satisfaction of this requirement: proficiency courses and courses taken to make up for undergraduate-level deficiencies in chemistry (including CHM 5150, CHM 5225, CHM 5305, CHM 5425, and CHM 5426); and courses corresponding to research seminar, colloquium, supervised teaching, and thesis completion (CHM 6910L, CHM 6935, CHM 6936, BCH 7930, CHM 6940, CHM 6970, and CHM 6971).
 - c) Full-time graduate students are required to register for one credit of CHM 6940 (Supervised Teaching) each semester they serve as teaching assistants.
 - d) Full-time graduate students are required to register for one credit of CHM 6935 (Graduate Seminar) or one credit of CHM 6936 (Chemistry Colloquium) each fall and spring semester.
 - e) At least one credit of CHM 6936 (Chemistry Colloquium) is required. Each student must present a seminar on their proposed research at the colloquium for a letter grade.
 - f) At least eight credits of CHM 6970 (Thesis Research) or CHM 7910 (Dissertation Research) involving independent research under the direction of a faculty member in the Department.
2. Satisfactory completion of a research report approved by the student's thesis/dissertation committee and the department's graduate program director. A submitted manuscript, a report written for the candidacy exam,

or a stand-alone research report could satisfy the report requirement.

Combined BS/MS in Chemistry Degree Pathway

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees.

Admission Requirements

1. Current enrollment in the Bachelor of Science program in chemistry at FIU.
2. Current GPA of 3.2 or higher.
3. Official GRE general test scores.
4. Three letters of recommendation.
5. Approval of the Chemistry Graduate Committee.

Completion Requirements

Completed Bachelor of Science degree in chemistry at FIU Required:

1. 9 credits (3 courses) selected from graduate chemistry core courses. Required courses must be completed with an average of "B" or higher, and only one course may receive a grade less than "B-".
2. Electives: 3 courses selected from the Chemistry Graduate Elective Offerings.
3. 9 credits of Thesis Research and 2 credits of Thesis. 1 credit of Colloquium.
4. Overlap: Up to 3 graduate level courses (9 credits) may be used to satisfy both the Bachelor's and Master's degree requirements.

Combined BS in Chemistry/MS in Forensic Science Degree Pathway

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for

graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees.

Admission Requirements

1. Current enrollment in the Bachelor of Science program in chemistry at FIU.
2. Current GPA of 3.2 or higher.
3. Official GRE general test scores.
4. Three letters of recommendation.
5. Approval of the Chemistry Graduate Committee.

Completion Requirements

Completed Bachelor of Science degree in chemistry at FIU

Coursework

Required Courses:

BSC 5406	Forensic Biology
CHS 5542	Forensic Chemistry
CHS 5535	Forensic Analysis

1. Required courses must be completed with an average of "B" or higher, and only one course may receive a grade of less than "B-".
2. Electives: 5 courses selected from the Forensic Science Graduate Elective Offerings.
3. 6 credits of Thesis Research and 1 credit of Thesis.
4. 1 credit of Colloquium.
5. Overlap: Up to 3 graduate level courses (9 credits) may be used to satisfy both the Bachelor's and Master's degree requirements.

Doctor of Philosophy in Chemistry

Degree Requirements

1. A minimum of 75 credits of course work. A grade of "C" or higher must be obtained in all courses, and a cumulative GPA of 3.0 or higher must be maintained. The course work must include:
 - a. At least nine credits of chemistry courses, including courses from at least two of the six major areas of chemistry (Analytical, Biochemistry, Environmental, Inorganic, Organic, and Physical) selected from the core courses listed above (see M.S. in Chemistry 1a).
 - b. At least nine credits of additional graduate-level chemistry courses approved by the dissertation committee in consultation with the Graduate Program Director. The guidelines listed above in sections 1b(1) and 1b(2) for the M.S. degree also apply to these courses.
 - c. Full-time graduate students, prior to reaching candidacy, are required to register for one credit of CHM 6940 (Supervised Teaching) each semester they serve as teaching assistants.
 - d. Full-time graduate students are required to register for CHM 6935 (Graduate Seminar) or one credit of CHM 6936 (Chemistry Colloquium) each fall and spring semester
 - e. At least one credit of CHM 6936 (Chemistry Colloquium) is required. Each student must present a seminar on their proposed research at

the colloquium for a letter grade by the end of their third semester of graduate study.

- f. At least eight credits of CHM 7910 (Dissertation Research) involving independent dissertation research under the direction of a faculty member in the Department are required.
 - g. At least 15 credits of CHM 7980 (Ph.D. Dissertation) are to be taken after the student has advanced to candidacy.
2. Satisfactory completion of cumulative examinations. The student will begin taking the cumulative examinations after completing the proficiency requirements but no later than the beginning of the student's second semester. Seven examinations, each lasting three hours, will be given per year. The student must pass four out of ten consecutively-offered exams for admission to candidacy.
 3. Satisfactory presentation and defense of an original research proposal (on a topic not related to the student's specific doctoral research project) and a satisfactory completion of a Preliminary Oral examination. The original proposal presentation and preliminary oral examination occur in the fourth and fifth semesters respectively, (excluding summers) and at least three months apart. The examination will be conducted by the Dissertation Committee, be based on the student's dissertation research, and include questions from the student's major field and cognate fields. After fulfilling this requirement, passing the cumulative examinations, and completing all required course work, the student advances to candidacy.
 4. Satisfactory public presentation and defense of a research dissertation, evaluated by the Dissertation Committee. The student's Dissertation Committee will consist of the research advisor (a FIU graduate faculty member who holds dissertation advisor status), a member from outside the Department, or School, but within FIU, a randomly-assigned member appointed by the Graduate Program Director from the Department's graduate faculty, and at least two additional committee members with expertise in the student's research area. At least three members of the Dissertation Committee, including the major research advisor, must be graduate faculty members from the Department of Chemistry and Biochemistry, and at least two of these three members must be tenured. The Committee may include additional members, but they will be non-voting.
 5. Award of an M.S. en route to Ph.D.: Individuals directly admitted into the Ph.D. program may apply to be awarded an M.S. degree in Chemistry. To be eligible students must have completed requirements of the MS in Chemistry with report option track. Upon certification by the student's advisor, dissertation committee, and the departmental graduate committee that these requirements have been met the student will be eligible to receive an M.S. in Chemistry with report option track.

Doctor of Philosophy in Chemistry with a Chemistry Education Track

Degree Requirements:

1. A minimum of 75 credits of coursework. A grade of "C" or higher must be obtained in all courses, and a cumulative GPA of 3.0 or higher must be maintained. The coursework must include:
 - a. A minimum of twelve credits of chemistry courses, with a minimum of nine of these credits being Chemistry core courses. Students must select an area of concentration (Analytical, Biochemistry, Inorganic, Organic, Physical). Six credits of chemistry coursework must come from the area of concentration and six credits from outside the area of concentration.
 - b. At least nine credits of education research courses, including one course from each of the categories of courses listed below.

Foundations of Education Research:

EDF 6481 Educ. Research Methodology
 SCE 7761 Research in Science Education

Quantitative Research Methods:

EDF 6472 Introduction to Data Analysis
 STA 6166 Stat. Methods in Research I
 STA 6167 Stat. Methods in Research II

Qualitative Research Methods:

EDF 6475 Qualitative Foundations in Educational Research

- c. At least three credits of advanced methodology courses, dependent on the focus of the dissertation project. Suggested courses appear in the list below, but others can be approved of by the dissertation committee in consultation with the Graduate Program Director.

Advanced Methodology Courses:

EDF 7476 Advanced Methods of Qualitative Educational Research
 EDF 6486 Advanced Data Analysis in Quantitative Educational Research
 EDF 7489 Hierarchical Linear Modeling in Educational Research
 STA 5507 Nonparametric Methods
 STA 6244 Data Analysis 1
 STA 6247 Data Analysis 2
 STA 6505 Analysis of Categorical Data
 STA 6746 Multivariate Statistical Analysis
 STA 6990 Multivariate Analysis 1

- d. Full-time graduate students, prior to reaching candidacy, are required to register for one credit of CHM 6940 (Supervised Teaching) each semester they serve as teaching assistants.
- e. Full-time graduate students are required to register for CHM 6935 (Graduate Seminar), or one credit of CHM 6936 (Chemistry Colloquium) each fall and spring semester
- f. At least one credit of CHM 6936 (Chemistry Colloquium) is required. Each student must present a seminar on their proposed research at the colloquium for a letter grade by the end of their third semester of graduate study.
- g. At least eight credits of CHM 7910 (Dissertation Research) involving independent dissertation research under the direction of a faculty member in the Department are required.
- h. At least 15 credits of CHM 7980 (Dissertation Research) are to be taken after the student has advanced to candidacy.

2. Satisfactory completion of cumulative examinations. The student will begin taking the cumulative examinations after completing the proficiency requirements but no later than the beginning of the student's second semester. Seven examinations, each lasting three hours, will be given per year. The student must pass four out of ten consecutively offered exams for admission to candidacy. At least three of the exams must be from their area of concentration.
3. Satisfactory presentation and defense of an original research proposal (on a topic not related to the student's specific doctoral research project) and a satisfactory completion of a Preliminary Oral examination. The original proposal presentation and preliminary oral examination occur in the fourth and fifth semesters, respectively (excluding summers), and at least three months apart. The examination will be conducted by the Dissertation Committee, be based on the student's dissertation research and include questions from the student's major field and cognate fields. After fulfilling this requirement, passing the cumulative examinations, and completing all required coursework, the student advances to candidacy.
4. Satisfactory public presentation and defense of a research dissertation, evaluated by the Dissertation Committee. The student's Dissertation Committee will consist of the research advisor (a Fill graduate faculty member who holds dissertation advisor status), a member from outside the Department, or School, but within Fill, a randomly-assigned member appointed by the Graduate Program Director from the Department's graduate faculty, and at least two additional committee members with expertise in the student's research area. At least three members of the Dissertation Committee, including the major research advisor, must be graduate faculty members from the Department of Chemistry and Biochemistry, and at least two of these three members must be tenured. The Committee may include additional members, but they will be non-voting.
5. Award of an M.S. en route to Ph.D.: Individuals directly admitted into the Ph.D. program may apply to be awarded an M.S. degree in Chemistry. To be eligible students must have completed requirements of the MS in Chemistry with report option track. Upon certification by the student's advisor, dissertation committee, and the departmental graduate committee that these requirements have been met the student will be eligible to receive an M.S. in Chemistry with report option track

Doctor of Philosophy in Chemistry with an Environmental Chemistry Track

Degree Requirements

1. A minimum of 75 credit hours. A grade of C or higher must be obtained in all graded courses, and a cumulative GPA of 3.0 or higher must be maintained. The course of study must include:
 - a. 12 credit hours of Environmental Chemistry core courses including four of the following six courses, each of which is worth three credit hours:
 - CHM 5423 Atmospheric Chemistry

CHM 5765	Aquatic Chemistry
CHM 6281	Environmental Organic Chemistry
CHM 6340	Organic Geochemistry
OCC 5050	Chemical Oceanography
CHM 6088	Environmental Chemistry of Trace Elements

b. Two chemistry core courses chosen from the following

CHM 5156	Advanced Chromatography
CHM 5138	Advanced Mass Spectrometry
CHM 5236	Spectroscopic Techniques and Structure Determination
CHM 6157	Advanced Analytical Chemistry
CHM 5165	Chemometrics and Sampling
CHM 5260	Physical Organic Chemistry

c. At least one elective. The elective must be approved by the student's Dissertation Committee, and Environmental Chemistry Graduate Committee. This committee consists of the Environmental Chemistry Graduate Program Director, the Chemistry Graduate Program Director, and two Departmental faculty members active in research in environmental science.

d. Full time graduate students prior to reaching candidacy, are required to register for one credit of CHM 6940 (Supervised Teaching) each semester they serve as a teaching assistant.

e. Full time graduate students are required to register for one credit of CHM 6935 (Graduate Seminar) or one credit of CHM 6936 (Chemistry Colloquium) each Fall and Spring semester.

f. At least one credit of CHM 6936 (Chemistry Colloquium) is required. Each student must present a seminar on their proposed research at the colloquium for a letter grade by the end of their third semester of graduate study.

g. At least eight credit hours of CHM 7910 (Dissertation Research) involving independent dissertation research under the direction of a faculty member in the Department.

h. At least 15 credits of CHM 7980 (Ph.D. Dissertation) to be taken after the student has advanced to candidacy.

i. A maximum of 36 credits may be transferred from a completed Master's degree from another graduate program with the approval of the Graduate Committee. However, only six credit hours can be counted towards the formal academic coursework requirement (1 a-c). Students must elect an appropriate course load in accordance with their research topic, and in agreement with their Graduate Committee and the Departmental Graduate Advisor.

- Satisfactory completion of cumulative exams. The students will begin taking the cumulative examinations after completing the proficiency requirements but no later than the beginning of the student's second semester. Seven exams, each lasting three hours, will be given each year. The student must pass four out of 10 consecutively offered exams for admission to candidacy.
- Satisfactory presentation and defense of an original research proposal (on a topic not related to the student's specific doctoral research project) and a completion of a preliminary oral examination. The original proposal presentation and preliminary oral

examination occur in the fourth and fifth semesters, respectively (excluding summers), and at least three months apart. The examination will be conducted by the Dissertation Committee, be based on the student's dissertation research, and include questions from the student's major field and cognate fields. After fulfilling this requirement, completing all required course work, the student advances to candidacy.

- Satisfactory public presentation and defense of a research dissertation, evaluated by the Dissertation Committee. The student's Dissertation Committee will consist of the research advisor (an FIU graduate faculty member who holds dissertation advisor status), a member from outside the Department or School but within FIU, a randomly selected member appointed by the Graduate Program Director from the Department's graduate faculty, and at least two additional committee members with expertise in the student's research area. At least three members of the Dissertation Committee, including the major research advisor, must be graduate faculty members from the Department of Chemistry and Biochemistry, and at least two of these three members must be tenured. The Committee may include additional members, but they will be non-voting.
- Award of an M.S. en route to Ph.D.: Individuals directly admitted into the Ph.D. program may apply to be awarded an M.S. degree in Chemistry. To be eligible students must have completed requirements of the MS in Chemistry with report option track. Upon certification by the student's advisor, dissertation committee, and the departmental graduate committee that these requirements have been met the student will be eligible to receive an M.S. in Chemistry with report option track.

Doctor of Philosophy in Chemistry with a Forensic Science Track

To be admitted into the Ph.D. program in Chemistry with a Forensic track, a candidate must:

- Hold a Bachelor's degree in chemistry, forensic science or a relevant discipline from an accredited college or university approved by the Chemistry graduate committee. The minimum requirement is a bachelors degree in a natural science with a least 7 semester courses (28 hours including labs) of chemistry courses including physical chemistry, analytical chemistry and biochemistry. Any deficiencies must be completed before being fully accepted to the Ph.D. program;
- Have a 3.0/4.0 average or higher during the last two years of the undergraduate program or a Master's degree in a relevant discipline;
- Official Graduate Record Exam (GRE) scores;
- Arrange to have three letters of recommendation sent to the Graduate Program Director evaluating the applicant's potential for graduate work;
- Pass at least two proficiency exams in either analytical or biochemistry and either organic or physical chemistry – students who have not taken physical chemistry must take one semester of physical chemistry to make up the deficiency;
- International graduate student applicants whose native language is not English are required to submit

a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

All admissions to the Chemistry Ph.D. program must be recommended by the chemistry graduate committee and signed off by the chemistry graduate program director.

Degree Requirements

1. A minimum of 75 credits or course work. A grade of "C" or higher must be obtained in all courses, and a cumulative GPA of 3.0 or higher must be maintained. Students must choose either the Analytical or the Biochemistry concentration. The course of study must include:

a. Twelve credits of required classes that depend on the concentration (each of the following courses is worth three credits):

Analytical Chemistry/Trace Concentration

BSC 5406	Forensic Biology	3
CHS 5542	Forensic Chemistry	3
CHS 5539	Forensic Toxicology	3
CHS 5545	Chem Anl. Explosives	3
or		
CHS 5538	Chem Anl. of Drugs	3

Biochemistry/DNA Analysis Concentration

BSC 5406	Forensic Biology	3
CHS 5542	Forensic Chemistry	3
CHS 5536	Forensic DNA Chemistry	3
PCB 5685	Population Genetics	3

b. Two chemistry core courses chosen from the following: Advanced Chromatography (CHM 5156); Advanced Mass Spectrometry (CHM 5138); Spectroscopic Techniques (CHM 5236); Organic Chemistry of Nucleic Acids (CHM 5302); Physical Biochemistry (CHM 5506); Advanced Analytical Chemistry (CHM 6157); Chemometrics & Sampling (CHM 5165); Advanced Biological Chemistry (CHM 6982).

c. At least one elective. The list of approved electives is maintained by the Chemistry and Forensic Graduate Committees.

d. Full-time graduate students, prior to reaching candidacy, are required to register for one credit of CHM 6940 (Supervised Teaching) each semester they serve as teaching assistants.

e. Full-time graduate students are required to register for CHM 6935 (Graduate Seminar) or one credit of CHM 6936 (Chemistry Colloquium) each fall and spring semester.

f. At least one credit of CHM 6936 (Chemistry Colloquium) is required. Each student must present a seminar on their proposed research at the colloquium for a letter grade by the end of their third semester of graduate study.

g. At least eight credits of CHM 7910 (Dissertation Research) involving independent dissertation research under the direction of a faculty member in the Department.

h. At least 15 credits of CHM 7980 (Ph.D. Dissertation) is to be taken after the student has advanced to candidacy.

2. Satisfactory completion of cumulative exams. The

students will begin taking the cumulative examinations after completing the proficiency requirements but no later than the beginning of the student's second semester. Seven exams, each lasting three hours, will be given each year. The student must pass four out of 10 consecutively offered exams for admission to candidacy

3. Presentation and defense of an original research proposal on a forensic-related topic that is not related to the student's specific doctoral research project, and satisfactory completion of a Preliminary Oral exam. The original proposal presentation and preliminary oral examination occur in the fourth and fifth semesters, respectively (excluding summers), and at least three months apart. The examination will be conducted by the Dissertation Committee, be based on the student's dissertation research, and include questions from the student's major field and cognate fields. After fulfilling this requirement, passing the cumulative examinations, and completing all required course work, the student advances to candidacy.

4. Satisfactory public presentation and defense of a research dissertation, evaluated by the Dissertation Committee. The composition of the Dissertation Committee is as described in section 4 for the Ph.D. in Chemistry (no track) above.

5. Award of an M.S. en route to Ph.D.: Individuals directly admitted into the Ph.D. program may apply to be awarded an MS degree in Forensic Science or an MS degree in Chemistry. To be eligible students must have completed requirements of the relevant Master's program. Upon certification by the student's advisor, dissertation committee, and the Chemistry and Forensic Science graduate committees that these requirements have been met the student will be eligible to receive the relevant M.S. degree.

Doctor of Philosophy in Chemistry with a Radiochemistry Track

Admission Requirements

To be admitted into the Ph.D. program in Chemistry with the Radiochemistry Track, a candidate must:

1. Hold a Bachelor's degree in chemistry or a relevant discipline from an accredited college or university approved by the Chemistry Department Graduate Committee. The minimum requirement is a Bachelor's degree in a natural science with a least 7 semester courses (28 hours including labs) of chemistry courses including: physical chemistry, analytical chemistry and biochemistry. Any deficiencies must be completed before being fully accepted to the Ph.D. program.

2. Have a 3.0/4.0 average or higher during the last two years of the undergraduate program or a Master's degree in a relevant discipline.

3. Submit general GRE scores. There is no minimum requirement for the overall GRE score, but the applicants with an average percentile rank of 60 on the verbal and quantitative parts of the GRE will be preferentially considered.

4. Arrange to have three letters of recommendation sent to the Radiochemistry Graduate Program Director, each evaluating the applicant's potential for graduate work.

5. Pass at least two proficiency exams in either analytical or biochemistry and either organic or physical chemistry.
 6. Receive approval from the Radiochemistry Graduate Committee.
 7. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). Minimum required scores is 550 on the paper-based TOEFL, 80 on the internet-based TOEFL (iBT) or 6.5 overall on the IELTS.
 8. All admissions to the Chemistry Ph.D. program must be approved by the Chemistry Department Graduate Committee and signed off by the Chemistry Graduate Program Director.
- g. At least one credit of CHM 6936 (Chemistry Colloquium) is required. Each student must present a seminar on their original research proposal on a radiochemistry-related topic that is not related to the student's specific doctoral research project at the colloquium for a letter grade by the end of their fourth semester of graduate study. Topic must be approved by the Dissertation Advisor in consultation with the Radiochemistry Graduate Committee.
 - h. At least eight credits of CHM 7910 (Dissertation Research) involving independent dissertation research under the direction of a faculty member in the Department.
 - i. At least 15 credits CHM 7980 (Ph.D. Dissertation) is to be taken after the student has advanced to candidacy.

Degree Requirements

1. A minimum of seventy five (75) credits or course work. A grade of "C" or higher must be obtained in all courses, and a cumulative GPA of 3.0 or higher must be maintained. The course of study must include:
 - a. Six credits of required classes (each of the following courses is worth three credits):

CHS 5110	Topics in Radiochemistry	3
CHS 6111	Advanced Radiochemistry	3
 - b. Two of the following six classes:

CHM 6480	Quantum Mechanics	3
	or	
PHY 6645	Advanced Quantum Mechanics I	3
CHM 6157	Advanced Analytical Chemistry	3
CHM 5156	Advanced Chromatography	3
PHZ 5340	Particle Interactions and Detection	3
CHM 5540	Group Theory In Chemistry	3
CHM 5650	Physical Inorganic Chemistry	3
 - c. Three electives. The list of approved electives include:

CHM 5236	Spectroscopic Techniques and Structures Elucidation	3
CHM 5138	Advanced Mass Spectrometry	3
CHM 6088	Environmental Chemistry of Trace Elements	3
CHM 5165	Chemometrics and Sampling	3
CHM 5490	Physical Spectroscopy	3
CHM 6461	Statistical Thermodynamics	3
CHM 5440	Kinetics and Catalysis	3
CHM 5586	Computational Chemistry	3
CHM 5263	Physical Organic Chemistry	3
CHM 5506	Physical Biochemistry	3
PHZ 5730	Biophysical Effects of Radiation	3
PHZ 5732	Clinical and Medical Dosimetry	3
 - d. Full-time graduate students, prior to reaching candidacy, are required to register for one credit of CHM 6940 (Supervised Teaching) each semester they serve as teaching assistants.
 - e. Full-time graduate students are required to register for CHM 6935 (Graduate Seminar) or one credit of CHM 6936 (Chemistry Colloquium) each fall and spring semester.
 - f. Each student must present a seminar on their proposed research to the dissertation committee by the end of their third semester of graduate study.
2. Satisfactory completion of cumulative exams. The students will begin taking the cumulative examinations after completing the proficiency requirements but no later than the beginning of the student's second semester. Six exams, each lasting three hours, will be given each year. The student must pass four out of 10 consecutively offered exams for admission to candidacy. Cumulative exams in the area of Nuclear and Radiochemistry will be added to existing specialties.
3. Satisfactory presentation and defense of an original research proposal (on a topic not related to the student's specific doctoral research project) and a satisfactory completion of a Preliminary Oral examination. The original proposal presentation and preliminary oral examination occur in the fourth and fifth semesters, respectively (excluding summers), and at least three months apart. The examination will be conducted by the Dissertation Committee, be based on the student's dissertation research, and include questions from the student's major field and cognate fields. After fulfilling this requirement, passing the cumulative examinations, and completing all required course work, the student advances to candidacy.
4. Satisfactory public presentation and defense of a research dissertation, evaluated by the Dissertation Committee. The student's Dissertation Committee will consist of the research advisor (an FIU graduate faculty member who holds dissertation advisor status), a member from outside the Department or School but within FIU, a randomly selected member appointed by the Graduate Program Director from the Department's graduate faculty, and at least two additional committee members with expertise in the student's research area. At least three members of the Dissertation Committee, including the major research advisor, must be graduate faculty members from the Department of Chemistry and Biochemistry, and at least two of these three members must be tenured. The Committee may include additional members, but they will be non-voting.
5. Award of an M.S. en route to Ph.D.; Individuals directly admitted into the Ph.D. program may apply to be awarded an M.S. degree in Chemistry. To be eligible students must have completed requirements of the MS in Chemistry with report option track. Upon certification by the student's advisor, dissertation committee, and the departmental graduate committee

that these requirements have been met the student will be eligible to receive an M.S. in Chemistry with report option track.

PhD Program in Biochemistry

The PhD in Biochemistry is offered by the Biochemistry Ph.D. Program, which is co-sponsored by the Department of Chemistry and Biochemistry, the Department of Biological Sciences, and the Herbert Wertheim College of Medicine. The core of graduate courses will provide a firm foundation in the theory and techniques of biochemistry, and molecular biology (molecular genetics), with full integration of the core disciplines of chemistry, biology and related fields. With this foundation, students will be prepared to specialize in either biochemistry or molecular biology.

Admission Requirements

1. Hold a BS degree in Biology or Chemistry or the equivalent from an accredited college or university. Previous completion of at least 28 credits, including labs, of chemistry or biology courses at the upper division level is required. The following courses are recommended as background regardless of undergraduate major: biochemistry or molecular biology, two semesters of organic chemistry, and two semesters of general biology. Students are expected to have taken either physical chemistry or genetics as an undergraduate. Students not having taken at least one of these courses will be required to make up this deficiency either before or during their first year of graduate study by taking appropriate coursework.
2. A GPA of at least 3.0 (on a four-point scale) during the last 60 credits of the undergraduate program.
3. Official Graduate Record Exam (GRE) scores.
4. Three letters of recommendation evaluating the applicant's potential for graduate and research work.
5. A statement of purpose/research interests.
6. Receive approval from the Biochemistry Graduate Committee.
7. Foreign students whose native language is not English must obtain a score of 80 or higher on the TOEFL iBT or 550 on the paper TOEFL or a 6.5 on the IELTS.

Degree Requirements

The PhD in Biochemistry requires a minimum 75 semester hours beyond the baccalaureate degree. The Dissertation Advisor and Committee will assist the student to choose a curriculum suitable to the student's interests, goals and background. This will include selection of electives as well as suggestions for other courses that may be needed to develop skills critical for the student's research and career goals, especially quantitative skills. A grade of C or higher must be earned in all courses.

Coursework Requirements

Required Core Courses (16 credits)

BCH 6831	Introduction to Biochemical Research	3
BCH 6108	Biochemical Techniques	3
CHM 6036	Advanced Biochemistry I	3
PCB 6025	Molecular and Cellular Biology I	3
CHM 6037	Advanced Biochemistry II (Molecular Genetics)	3

	or	
PCB 6027	Molecular and Cellular Biology II	3
BSC XXXX	Ethics, Publication and Intellectual Property	1

Additional Required Courses (33 credits)

BSC 5945	Supervised Teaching in Biology	2
	or	
CHM 6940	Supervised Teaching	2
BSC 6913	Student Research Laboratory	1
	or	
CHM 6910L	Graduate Research in Chemistry (taken during lab rotations)	1
BSC 7961	Dissertation Proposal Seminar	1
	or	
CHM 6936	Chemistry Colloquium	1
BSC 6936	Topics in Biology	4
	or	
CHM 6935	Graduate Seminar	4
BSC 6913	Student Research Lab	4
	or	
CHM 7910	Dissertation Research	4
BSC 7980/CHM 7980	PhD Dissertation	21
	or	
BSC 7982	Dissertation Defense Seminar	21

Electives (5 -26 credits)

BSC 6415	Animal Cells in Culture	3
BSC 6415L	Animal Cells in Culture Lab	2
CHM 5302	Organic Chemistry of Nucleic Acids	3
CHM 5325	Physical Chemistry of Proteins	3
CHM 5351	Computer Modeling of Biological Molecules	3
CHM 5440	Kinetics and Catalysis	3
CHM 5503	Physical Chemistry of Nucleic Acids	3
CHM 5506	Physical Biochemistry	3
CHS 5536	Forensic DNA Chemistry	3
MCB 6935	Advanced Topics in Microbiology	3
PCB 5665	Human Genetics	3
PCB 5665L	Human Genetics Lab	2
PCB 5725	Membrane Signal Transduction	3
PCB 5786	Membrane Physiology	3
PCB 6236	Comparative Immunology	3
PCB 6526	Advanced Molecular Biology	3
PCB 6566	Chromosome Structure and Function	3
PCB 6786	Membrane Biophysics	3
PCB 6935	Advanced Topics in Genetics	3
BCH 6130C	DNA Synthesis and Amplification	1
BCH 6132C	Electrophoresis	1
BCH 6133C	DNA Sequencing	1
MCB 5315C	Prokaryotic Cloning	2

Rotation and Choosing an Advisor

Students will spend 4-5 weeks in the laboratories of three Biochemistry faculty. Some flexibility in length of rotation is acceptable. In most cases, the rotations will be completed during the first semester of study, but an extension into the second semester is possible. At the end of each rotation, the student and the faculty member will complete an evaluation form. After completing a minimum of three rotations, students will submit an ordered list of three advisors they would like to work with. The Biochemistry Graduate Committee will make the research advisor assignments.

Supervised Teaching

Two semesters of supervised teaching or documentation of the equivalent amount of teaching experience is required. Concurrent enrollment in BSC 5945/CHM 6940 Supervised Teaching is required.

Completion of Candidacy Exam

The Candidacy Exam consists of two parts: 1) a written Qualifying Examination and 2) presentation of an Original Research Proposal followed by a Preliminary Oral Exam. The written Qualifying Exam will be administered at the end of the third semester of study (excluding summers), by which time all core courses should have been completed. The exam will be designed primarily to test material mastered in core courses. After passing the written Qualifying Exam, the student will present and defend an original research proposal (on a topic not related to the student's specific doctoral research project) and undergo an oral exam.

Presentation of Formal Proposal of the Dissertation Topic

Each student must present a public seminar on their proposed research. This is done in the context of a one-credit course (BSC 7961 or CHM 6936) for a letter grade.

Submission and Defense of Dissertation

All students must submit a dissertation based upon original research in biochemistry. After submission of the dissertation and completion of all other prescribed work, the candidate will give a public presentation of the completed research and be given a final oral examination by the Dissertation Committee.

Course Descriptions

Definition of Prefixes

BCH-Biochemistry (Biophysics); CHM-Chemistry; CHS-Chemistry-Specialized; OCC - Chemical Oceanography
F-Fall semester offering; S-Spring semester offering; SS Summer semester offering.

BCH 5045 Survey of Biochemistry (3). For students NOT specializing in biochemistry. Topics will cover the structure, function, biosynthesis and synthesis of biological molecules, biological macromolecules and macromolecular assembles. Prerequisite: CHM 2211.

BCH 6108 Biochemical Techniques (3). Introduction to theories of basic biochemical techniques commonly used in a biochemistry laboratory. Prerequisite: One semester of biochemistry.

BCH 6831 Introduction to Biochemical Research (3). An overview of the analysis of biochemical data and experimental design. Prerequisite: Graduate standing.

BCH 7930 Biochemistry Graduate Seminar (0-1). Presentations and discussions of current topics in the biochemical sciences. Corequisite: Graduate standing.

CHM 5138 Advanced Mass Spectrometry (3). Intensive examination of the processes and techniques involved in creating, controlling and measuring ionic species by mass spectrometry. Theory of mass spectrometry, methods of ionization, instrumental designs, quantitative mass spectrometry, meta-stable ions, and tandem mass spectrometry. Prerequisites: CHM 4130, CHM 4130L or Permission of Instructor.

CHM 5139C Mass Spectrometry Workshop (2). Basic description of processes and techniques involved in creating, controlling and measuring elemental or molecular ionic species by mass spectrometry techniques. WS designed to provide hands on experience. Prerequisite: CHM 4130.

CHM 5150 Graduate Analytical Methods (3). Analysis of analytical data, electrochemistry, spectro-analytical techniques, chromatography, survey of new analytical methods. Prerequisites: Graduate standing or permission of the instructor. (F,S)

CHM 5156 Advanced Chromatography (3). Intensive examination of the contemporary practice of chromatography including available chromatographic techniques, their selection and application. Prerequisites: CHM 4130 or permission of the instructor.

CHM 5165 Chemometrics and Sampling (3). Methods of evaluating analytical chemistry data. Planning sampling design for water, air and solids. Sample preparation and extraction techniques. Prerequisite: CHM 4130.

CHM 5225 Graduate Organic Chemistry (3). Advanced topics in organic chemistry. Structure of organic molecules, reaction mechanisms, organic synthesis, and natural product chemistry. Prerequisites: Graduate standing or permission of the instructor. (F,S)

CHM 5236 Spectroscopic Techniques and Structures Elucidation (3). Advanced techniques for the spectroscopic identification of organic compounds. Interpretation of spectral information for determination of structures of various classes of organic compounds. Prerequisites: CHM 4220 and CHM 4230L.

CHM 5250 Organic Synthesis (3). Use of classical and modern reactions in the design and construction of complex organic molecules including natural products. Some topics covered will be construction reactions, refunctionalization, stereochemistry and conformational analysis. Prerequisites: CHM 4220 or permission of the instructor.

CHM 5251 Organometallic Chemistry (3). Fundamentals and applications of organometallic chemistry. Structures and bonding, ligand types, organometallic reactions, physical methods of characterization. Prerequisites: CHM 4611, CHM 3411.

CHM 5252 Asymmetric Synthesis (3). Recent advances in asymmetric synthesis for the selective design and construction of tetrahedral stereocenters. Focus on principles of configuration in transition state assemblies. Prerequisite: CHM 4220.

CHM 5263 Physical Organic Chemistry (3). A series of topics will be discussed including molecular orbital theory as it pertains to organic molecules, kinetic and thermodynamic approaches to the study of reaction mechanisms, quantitative approaches to conformational analysis, etc. Prerequisites: CHM 4220 and physical chemistry or permission of the instructor.

CHM 5280 Natural Products Chemistry and Biosynthesis (3). Studies of the chemical origins (biosynthesis), properties, and synthesis of the various classes of naturally occurring compounds: terpenes, steroids, alkaloids, acetogenins. Prerequisites: CHM 4220 or permission of the instructor.

CHM 5285 Marine Natural Products: Chemistry and Pharmacology/Toxicology (3). Identification, isolation, and characterization of toxic and other biologically active compounds from marine sources.

CHM 5302 Organic Chemistry of Nucleic Acids (3). Organic chemistry of ribose sugars, nucleotide heterocyclic bases, mechanism-based inhibitors of enzymes involve in nucleic acid metabolism, and chemical synthesis of DNA. Prerequisites: CHM 4220 or permission of the instructor.

CHM 5305 Graduate Biological Chemistry (3). Structures of biological molecules; Biochemical reaction mechanisms; Enzyme kinetics; Biomolecular thermodynamics; Biomolecular spectroscopy. Prerequisites: Graduate standing or permission of instructor.

CHM 5306 Special Topics in Biological Chemistry (3). Investigation of one or more areas of biologically related chemistry. Prerequisites: CHM 4305 or permission of the instructor.

CHM 5325 Physical Chemistry of Proteins (3). Protein structures, dynamics and functions. Use of spectroscopic methods. Thermodynamics of protein folding and ligand binding. Enzyme Kinetics. Prerequisites: Biological Chemistry and Physical Chemistry or permission of instructor.

CHM 5351 Computer Modeling of Biological Molecules (3). Introduces use of computers in studying biological macromolecules. Simulations, visualization methods, software, databases. Prerequisite: CHM 3411, Biochemistry recommended.

CHM 5380 Special Topics in Organic Chemistry (VAR). An intensive examination of one or more areas selected by instructor and students. Prerequisites: CHM 4220 and physical chemistry or permission of the instructor.

CHM 5423 Atmospheric Chemistry (3). Chemical processes in atmospheres. Photochemistry, chemical kinetics, tropospheric and stratospheric chemical reactions, anthropogenic effects on the earth's atmosphere and chemistry of planetary atmospheres. Prerequisites: CHM 3411, or permission of the instructor.

CHM 5425 Graduate Physical Chemistry (4). Prequantum physics, the Schrodinger equation and its solutions, atoms and molecules, rotational, vibrational, and electronic spectroscopy. Prerequisites: Graduate standing or permission of the instructor.

CHM 5426 Graduate Physical Chemistry II (4). Gas laws; thermodynamics and equilibrium, electrochemistry, and chemical kinetics. Prerequisite: Graduate standing or permission of the instructor.

CHM 5440 Kinetics and Catalysis (3). Theory of elementary reactions, activated complex theory, mechanisms of complex reactions. Prerequisites: CHM 3411, MAP 3302.

CHM 5450 Advanced Polymer Chemistry (3). Advanced aspects of polymer chemistry. Properties, synthesis, uses and characterization of various polymeric materials. Prerequisites: CHM 2210 and CHM 2211. Corequisite: Graduate Standing.

CHM 5490 Physical Spectroscopy (3). Introduction to atomic and molecular quantum states, selection rules, and fundamental principles of spectroscopy. Introduction to group theory and to the theory of UV/visible, infrared, Raman, microwave, NMR, photo-electron, and mass spectroscopies, and the applications of these methods to the determination of fundamental physical properties and the structure of organic and inorganic molecules. Prerequisite: Physical Chemistry.

CHM 5490L Physical Spectroscopy Lab (1). The theory of spectroscopy and the use of modern instrumentation to investigate molecular structure. Prerequisites: CHM 2211, 2211L. Corequisites: PHY 4604 or CHM 5490.

CHM 5503 Physical Chemistry of Nucleic Acids (3). Physical chemistry of nucleic acids including spectroscopic determination of structures of DNAs, RNAs, and DNA protein complexes and thermodynamic and kinetic studies of nucleic acid-ligand complexes and nucleic acid structures. Prerequisites: CHM 4305 or permission of the instructor.

CHM 5506 Physical Biochemistry (3). Physical properties of biomolecules, molecular conformation; thermodynamic, kinetic, and spectroscopic properties of biomolecules. Prerequisites: CHM 4305 or permission of the instructor.

CHM 5517 Solid State (3). Crystalline form of solids, lattice dynamics, metals, insulators, semiconductors, and dielectric materials. Prerequisites: CHM 5490 or PHY 4604.

CHM 5540 Group Theory In Chemistry (3). The fundamental theory is developed with emphasis given to representations. Specific applications covered, with emphasis on molecular orbital theory and spectroscopy. Prerequisite: CHM 3411.

CHM 5586 Computational Chemistry (3). Surveys computational methods for studying issues pertinent to organic and biological chemistry. Emphasis on developing an understanding of principles and putting methods to use. Includes methods for studying reaction thermodynamics, reaction mechanisms and NMR spectral properties. Prerequisites: CHM 3410, CHM 3411.

CHM 5620 Graduate Inorganic Chemistry (3). Atomic structure, periodicity, bonding and structure of inorganic compounds, solution chemistry, ligand field theory, organometallic chemistry, and specific chemistry of the elements. Prerequisite: Graduate standing or permission of instructor.

CHM 5650 Physical Inorganic Chemistry (3). Introduction to use of physical methods to determine the structure of inorganic compounds. Prerequisites: CHM 4611 or permission of the instructor.

CHM 5681 Special Topics in Inorganic Chemistry (VAR). An intensive examination of one or more areas selected by instructor and students. Prerequisites: CHM 4611 or permission of the instructor.

CHM 5765 Aquatic Chemistry (3). Redox chemistry, chemistry of sediments, organic biogeochemistry, chemodynamics, and fates of organic pollutants in aqueous environments. Prerequisites: CHM 2211, CHM 4130, or permission of the instructor.

CHM 5812 Learning Theories: Three-Dimensional Learning (3). An investigation of Three-Dimensional Learning and how it can be used to synthesize information learned in their chemistry courses. Also emphasizes assessment of scientific practices and core ideas.

CHM 5932 Special Topics (3). A course covering selected special topics in chemistry.

CHM 5934 Special Topics in Analytical Chemistry (VAR). An intensive examination of one or more areas selected by instructor and students. Core course
Prerequisites: CHM 4130 or permission of the instructor.

CHM 5936 Special Topics in Environmental Chemistry (3). An intensive examination of one or more areas selected by the instructor and students. Prerequisite: Permission of the instructor.

CHM 5938 Special Topics in Physical Chemistry (VAR). An intensive examination of one or more areas selected by instructor and students. Prerequisites: CHM 3411 or permission of the instructor.

CHM 6036 Advanced Biochemistry I (3). Overview of the structure and function of Biomacromolecules, i.e., proteins, enzymes, and nucleic acids emphasizing the current literature. Prerequisites: One semester of biochemistry or consent of the instructor.

CHM 6037 Advanced Biochemistry II (Molecular Genetics) (3). Introduction to biochemical pathways regulation and intra- and extracellular communication on the molecular level. Prerequisite: CHM 6036.

CHM 6088 Environmental Chemistry of Trace Elements (3). Occurrence, transformation, detection, speciation, and other aspects of trace elements in the environment.

CHM 6157 Advanced Analytical Chemistry (3). Modern analytical methods, applications, and instrumentation. Topics include spectroscopy, chromatography, electrochemistry, optimization theory, and computerized instrumentation. Prerequisites: CHM 4130 or permission of the instructor.

CHM 6166 Hyphenated Analytical Techniques (3). Covers hyphenated analytical techniques required for the analysis of trace elements and organic compounds in environmental and biomedical sciences. Prerequisites: CHM 4130 or equivalent.

CHM 6167 Modern Analytical Methods for Surface and Structural Interrogation (3). Beam interactions with surfaces, gas-phase post-ionization separations, analytical instrumentation for biological and structural mass spectrometry. Prerequisite: CHM 4130.

CHM 6176 Macromolecular Biosensors (3). An introduction to the principles of macromolecular biosensors. Bio-recognition elements, immobilization methods, sensor design and integration, and recent advances in sensor technology. Prerequisite: CHM 4130.

CHM 6281 Environmental Organic Chemistry (3). Characteristics, origin, fate and transformation of organic compounds in air, water, sediments and biota. Prerequisites: CHM 2211, CHM 3411, or permission of the instructor.

CHM 6340 Organic Geochemistry (3). Organic geochemistry of recent and ancient environments. Characteristics, origin, and transformation of organic matter in the geosphere, including formation of crude oil. Prerequisites: CHM 2211, CHM 3411, CHM 4130, GLY 1010, or permission of the instructor.

CHM 6382 Advanced Biological Chemistry (3). In depth exploration of one or more biological chemistry areas, for example, use of multinuclear NMR in examining nuclear acids and proteins; biosynthesis of toxins, roles of porphyrins. Topics covered vary with instructor. Prerequisites: Biological Chemistry and Physical Chemistry or permission of instructor.

CHM 6449 Photochemistry (3). Fundamentals of photochemistry. Excited states, energy, and electron transfer processes, photo-oxidation, reactive species, and environmental photochemistry. Prerequisites: CHM 4220 or permission of the instructor.

CHM 6461 Statistical Thermodynamics (3). Principles of statistical thermodynamics. Ensembles, classical and quantum statistics, ideal and nonideal gases, equilibrium, crystals, liquids, and polymers. Prerequisites: CHM 3411 or permission of the instructor.

CHM 6480 Quantum Mechanics (3). Introduction to quantum mechanics. The Schrodinger equation and its solutions, approximation methods, spin, symmetry, structure of atoms and molecules. Prerequisites: CHM 3411 or permission of the instructor.

CHM 6491 Applications of Synchrotron and Electron Based Techniques (3). X-ray and synchrotron techniques, including general theory, X-ray diffraction, small and wide angle scattering, imaging and microscopy, transmission electron microscopy, and EELS spectroscopy. Prerequisite: Graduate Standing in chemistry or related area or permission of instructor.

CHM 6511 Polymer Chemistry (3). A quantitative study of polymers. Mechanism of formation, configuration of polymer chains, and the relationship between physical properties and chemical constitution. Prerequisite: CHM 3411 or permission of the instructor.

CHM 6621 Inorganic Reaction Mechanisms (3). Review of kinetics and determination of mechanism. Study of mechanism of reactions of coordination complexes including electron transfer reactions, ligand substitution reactions, coordinated ligand reactions of importance in homogeneous catalysis. Prerequisite: Physical Chemistry I (Kinetics).

CHM 6802 Research Ethics (1). Ethical issues in biochemical research. Scientific misconduct, professional integrity, intellectual property, authorship and publication. Corequisite: Graduate standing.

CHM 6905 Independent Study in Chemistry (1-6). Independent study and problems in an area of chemistry, under faculty supervision. May be repeated. Prerequisite: Permission of the instructor.

CHM 6910L Graduate Research in Chemistry (VAR). The student works directly with a professor on a research project. Credit is assigned on the basis of four hr/wk per credit hour. Results to be presented as a seminar. Permission of the instructor.

CHM 6935 Graduate Seminar (0-1). An examination of various current research topics in chemistry. Prerequisite: Graduate standing.

CHM 6936 Chemistry Colloquium (1). Analysis of current developments and topics presented by faculty members and registered students. Prerequisite: Admission to graduate program in chemistry.

CHM 6940 Supervised Teaching (1-3). Graduate student serves as lecturer and demonstrator in undergraduate laboratories coordinated and supervised by a faculty member. May be repeated. A maximum of three hours may apply to the Master's degree. Prerequisite: Good graduate standing.

CHM 6949 Industrial Internship (3). A semester of supervised work in an outside laboratory. Prerequisite: Permission of the instructor.

CHM 6970 Thesis Research (1-10). Research toward completion of Master's Thesis. Repeatable. Prerequisite: Permission of the department.

CHM 6971 Master's Thesis (1-6). Completion of thesis. Prerequisite: Permission of major professor.

CHM 7910 Dissertation Research (1-10). Research towards the completion of a doctoral dissertation. Repeatable. Prerequisite: Graduate Standing.

CHM 7980 Ph.D. Dissertation (1-12). Completion of doctoral dissertation. Prerequisite: Permission of Major Professor and Doctoral Candidacy. May be repeated.

CHS 5435 Pharmacology and Toxicology of Drugs (3). Provides an in-depth understanding of basic pharmacological and toxicological principles of drug action from a molecular, mechanistic, and physiochemical viewpoint. Prerequisite: Graduate standing.

CHS 5502 Forensic Chemistry for Teachers (3). Incorporates concepts and techniques from the application of analytical chemistry, molecular biology, biochemistry, toxicology, and microscopy to forensic casework. Exposure to teaching resources in these areas and case study format of presentation. Open to education majors only. Prerequisites: CHM 3120, CHM 3120L, CHM 2211, and CHM 2211L or permission of instructor.

CHS 5535 Forensic Analysis (3). Advanced topics on the role that physical evidence plays in their criminal justice system. Topics include crime scene methods, laboratory management and the legal framework as it relates towards physical evidence. Prerequisites: CHM 3120, CHM 3120L, CHM 2211, CHM 2211L, or permission of the instructor. (Does not count towards chemistry elective requirement).

CHS 5535L Forensic Analysis Lab (1). Laboratory to accompany Forensic Analysis CHS 5535. Prerequisites: CHM 3120, CHM 3120L, CHM 2211, CHM 2211L or permission of the instructor.

CHS 5536 Forensic DNA Chemistry (3). Chemical basis for current methodologies of DNA analysis. DNA sequencing, PCR, STR, AFLP, mass spectrometry. Prerequisites: CHM 4304 or permission of instructor.

CHS 5538C Chemistry and Analysis of Drugs (3). Introduction to the chemistry of drugs of abuse, including reactivity, synthesis and the principles of analysis from solid doses and from body fluids. Laboratory analysis

through the determination of unknown samples. Prerequisites: CHM 4130, CHM 4130L, CHM 4304, CHM 4304L.

CHS 5539 Forensic Toxicology (3). Provides the basic concepts of forensic toxicology as it applies to drug and body fluid analysis. Prerequisites: CHM 2211+L, CHM 3120+L, CHM 4305+L (BCH 3033+L) or permission of instructor.

CHS 5542 Forensic Chemistry (3). Advanced analytical methods in Forensic Chemistry for application to the analysis of controlled substances, materials (ie., paint, glass, and fibers), flammable and explosives residues with an emphasis on new methods and method development.

CHS 5545 Chemistry and Analysis of Explosives (3). Chemistry and reactivity, including thermochemistry, of modern industrial and military explosives' with an emphasis on the analysis of explosives residues from post-blast debris and from samples of environmental interest. Prerequisites: CHM 4130, CHM 4130L.

CHS 5110 Topics in Radiochemistry (3). Principles and applications of radiochemistry. Types of radionuclides, decay modes, radiation detection, counting statistics, dose determination, hazards, and applications. Prerequisites: Graduate student status and CHM 3411 or equivalent.

CHS 6111 Advanced Radiochemistry (3). Radioanalytical techniques, applications of radioisotopes and tracers, nuclear reactor, the chemistry of transuranic elements, the nuclear fuel cycle and advanced solvent extraction processes. Prerequisite: CHS 5110.

CHS 6905 Independent Study in Forensic Science (1-6). Independent study and problems in an area of forensic science under faculty supervision. Prerequisite: Permission of instructor.

CHS 6946 Graduate Forensic Internship (1-6). Internship in an operational forensic laboratory, contributing in a specific manner on an assigned research project. Six hours a week minimum residence time per credit in the lab under the supervision of a host lab scientist and a faculty member is required. A final written report and presentation required. Prerequisite: Core courses in Forensic M.S. Program.

OCC 5050 Chemical Oceanography (3). Interaction of chemical processes in marine systems with biological, geological, and physical processes. Prerequisites: Graduate standing or permission of the instructor.

Forensic Science

DeEtta Mills, Associate Professor, Biological Sciences
Director, International Forensic Research Institute
(IFRI), Forensic DNA Profiling Facility

Jose R. Almirall, Professor, Chemistry and Biochemistry

Bruce McCord, Professor, Chemistry and Biochemistry

Anthony P. (Tony) DeCaprio, Associate Professor,
Chemistry and Biochemistry and Director, Forensic
Science Certificate Program

Kenneth Furton, Provost, Executive VP and Professor,
Chemistry and Biochemistry

Sara Casado Zapico, Graduate Program Director,
Professional Science Master's in Forensic Science

Jeffrey Wells, Associate Professor, Biological Sciences

Juian Mendel, Research Assistant Professor, Assistant
Director, IFRI, MSFS Graduate Program Director

Administered by the International Forensic Research Institute (IFRI), the Master of Science in Forensic Science is an interdisciplinary program designed to prepare students for careers in local, state and national forensic science laboratories. The program may also be suitable preparation for doctoral instruction in several disciplines.

Admission Requirements

To be admitted into the Master's degree program in Forensic Science, a student must:

1. Hold a Bachelor's degree in a relevant discipline from an accredited college or university.*
2. Have a 3.0 GPA in upper-level course work and submit official Graduate Record Exam (GRE) scores.
3. Two letters of recommendation of the student's academic potential.
4. Be accepted by a faculty sponsor.
5. Receive approval from the Graduate Committee.
6. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

*Minimum requirement is the equivalent of a bachelor's degree in biology, chemistry or related science approved by the graduate committee. It is recommended that students have the equivalent of a minor in chemistry before taking the required courses.

Degree Requirements

The Master of Science in Forensic Science consists of a minimum of 32 credits, including a thesis based upon the student's original research or completion of an independent study report option.**

A maximum of six credits of post-baccalaureate coursework may be transferred from other institutions, subject to the approval of the Graduate Committee. The graduate committee will consist of the Graduate Program Director and a member from each of the following departments: Chemistry and Biochemistry, Biological Sciences, Criminology and Criminal Justice and Psychology. The thesis committee shall consist of the research advisor (normally the faculty sponsor), and at least two additional committee members who have some

expertise in the graduate student's research area. All members must hold graduate faculty status.

Required Courses

BSC 5406	Forensic Biology	3
CHS 5542	Forensic Chemistry	3
CHS 5535	Forensic Analysis	3
BSC 5931	Thesis Proposal	1
	or	
CHM 6935	Thesis Proposal	1
	or	
	approved cognate ¹	
BSC 5975	Thesis Defense Seminar	1
	or	
CHM 6971	Thesis Defense Seminar	1
	or	
	approved cognate ¹	
BSC 6971	Thesis	6
	or	
CHM 6970	Thesis	6
	or	
	approved cognate ¹	

Electives² 15

¹Equivalent courses in the student's area(s) of thesis concentration may be substituted upon approval by the student's committee in consultation with the Graduate Program Director (i.e., CCJ, GLY, PHY, PSY). ²At least fifteen credits of additional graduate-level courses, workshops and laboratories (excluding research and seminar) from participating departments approved by the thesis committee in consultation with the Graduate Program Director. [Consult the Director for a selected list of Chemistry, Biology, Earth Sciences, Criminal Justice, and Legal Psychology courses].

**A report option is available for students. Students approved for this option can replace "Thesis" with Independent Study in Forensic Science (CHS 6905) or Student Research Lab (BSC 6913) and the two additional courses such as "Analytical Toxicology (CHS 5539)" and "Advanced Quality Control (STA 5664)".

Graduation Requirement

A grade of "C" or higher must be obtained in all courses with a cumulative average of 3.0/4.0 or higher, and presentation and submission of a satisfactory research thesis to the Thesis Committee.

Professional Science Masters in Forensic Science

The Professional Science Masters (PSM) in Forensic Science program designed to educate students in chemical and biological knowledge related to forensic science, and the necessary administrative skills related to managing (forensic) laboratories.

Admission Requirements

To be admitted into the PSM in Forensic Science, a student must:

1. Hold a Bachelor's degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 GPA in upper-level course work.

3. Two letters of recommendation of the student's academic potential.
4. Be accepted by a faculty sponsor.
5. Receive approval from the Graduate Committee.
6. International graduate students applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). Minimum required scores is 550 on the paper-based TOEFL, 80 on the internet-based TOEFL (iBT) or 6.5 overall on the IELTS.

Degree Requirements

The program consists of 32 credits; 23 credits will focus on technical forensic science content and 9 credits on professional business content. Credits transferred need to be graduate level (> 5000) and earned with a grade of "B" or better, and the course(s) cannot have been taken longer than seven years from the term the student begins as a PMS student. A maximum of six credits of post-baccalaureate coursework may be transferred from other institutions. Student will go through the program as a lock-step cohort.

Graduation Requirements

A grade of "C" or higher must be obtained in all courses with a cumulative average of 3.0/4.0 or higher. If students fail any course, they will have to retake that course the next time it is offered, either during the two-year period or as a part-time student after the two-year period. The later will delay the students' completing the program in two years.

Required Courses

Semester I: Fall (9 credits)

CHS 5535	Forensic Analysis	3
BSC 5406	Forensic Biology	3
MAN 6245	Organizational Behavior	3

Semester II: Spring (9 credits)

CHS 5542	Forensic Chemistry	3
CHS 5536	Forensic DNA Chemistry	3
MAN 6830	Organization Information Systems	3

Semester III: Summer (6 credits)

VME 6766	Laboratory Quality Assurance/Quality Control (UF Course)	3
BSC 6925C	Workshop: Non-Human DNA Profiling and Analysis	3
	or	
BSC 5935	Topics In Biology	3
	or	
CHM 5934	Special Topics in Analytical Chemistry	3

Semester IV: Fall (8 credits)

CGS 5131	Computer Forensics I: Seizure and Examination of Computer Systems (UCF Course)	3
ACG 6026	Accounting for Managers	3
CHS 6946	Graduate Forensic Internship	2

Combined BS in Chemistry/MS in Forensic Science Degree Pathway

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits in the bachelor's degree

program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway, but the application must be submitted to Graduate Admissions before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees.

Admission Requirements

1. Current enrollment in the Bachelor of Science program in chemistry at FIU.
2. Current GPA of 3.2 or higher.
3. Official GRE general test scores.
4. Three letters of recommendation.
5. Approval of the Chemistry Graduate Committee.

Completion Requirements

Completed Bachelor of Science degree in chemistry at FIU

Required:

1. BSC 5406 Forensic Biology
2. CHS 5542 Forensic Chemistry
3. CHS 5535 Forensic Analysis
4. Required courses must be completed with an average of "B" or higher, and only one course may receive a grade of less than "B-".
5. Electives: 5 courses selected from the Forensic Science Graduate Elective Offerings.
6. 6 credits of Thesis Research and 1 credit of Thesis.
7. 1 credit of Colloquium.
8. Overlap: Up to 3 graduate level courses (9 credits) may be used to satisfy both the Bachelor's and Master's degree requirements.

Combined MS in Forensic Science/PhD in Biology Degree Pathway

The MSFS/PhD in Biology Degree Pathway combines the Master of Science in Forensic Science with a PhD in Biology. Student who pursue this degree will be enrolled in a continuous enrollment pathway; however, upon completion of all the requirements of the MSFS program (report option), students will be awarded a MSFS degree as they transition towards their PhD.

MSFS/PhD in Biology Degree Requirements

For admission into the MSFS/PhD program, students must meet the admission criteria of a PhD student with the understanding that they will have an increased class load of 2-3 classes, e.g., Forensic Biology, Forensic Chemistry, and Forensic Analysis, when compared to the normal PhD applicant but will graduate with two degrees. The requirements will be as follows:

1. Hold a Bachelor's degree in a natural science from a relevant university.

2. Have a 3.0 GPA during the last two years of the undergraduate program and submit official GRE scores.
3. Arrange to have three letters of recommendation sent to the Biology graduate program director evaluating the applicant's potential for graduate work.
4. Be sponsored by a Biology faculty member with Dissertation Advisor Status.
5. Receive approval from the Department Graduate program committee.
6. International graduate student applicants whose native language is not English are required to submit a score for Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IETLS). A score of 80 on the iBT TOEFL or 6.5 overall on the IETLS is required.

Research

BSC 6971	Master's Thesis	6
BSC 7980	Ph.D. Dissertation	24

As these candidates will be dually enrolled in two graduate degree programs, candidates must complete minimum of 32 credit hours towards their MSFS degree with a grade of 'C' or higher and a cumulative GPA of 3.0. The MSFS report option must be completed and accepted by the University before full transition towards the PhD. Candidates must also complete a total of 75 credit hours toward the PhD with the allowance for credits transferred from the completed MSFS degree. The student will be able to earn both degrees in a similar time frame that it would take to obtain either degree if pursued consecutively.

Students will be required to select a Master's defense committee while pursuing the MSFS as well as a PhD dissertation committee. This committee may or may not be comprised of the same members as those selected for the Master's program. The Master's proposal should be presented after the second semester of admission and the PhD dissertation defense should be presented after the fourth semester after admission.

Required Courses

BSC 6457	Introduction to Biological Research	3
BSC 5931	Thesis Proposal Seminar	1
BSC 7961	Dissertation Proposal Seminar	1
BSC 5975	Thesis Defense Seminar	1
BSC 7982	Dissertation Defense Seminar	1
BSC 5406	Forensic Biology	3
CHS 5535	Forensic Analysis	3
CHS 5542	Forensic Chemistry	3
PCB 5665	Human Genetics	3
PCB 5685	Population Genetics	3

Elective Courses

PCB 6025	Molecular and Cellular Biology I	3
MCB 5116	Microbial Diversity	3
BSC 5459	Advanced Bioinformatics for Biologists	3
BOT 5852	Medical Botany	3
BOT 5727	Plant Genetics	3
PCB 5616	Applied Phylogenetics	3
STA 5207	Topics in Design of Experiments	3
STA 5507	Nonparametric Methods	3

Labs and Workshops

BSC 6925	Workshop: Non-Human DNA Profiling and Analysis	1
BSC 6926	Workshop in Biology: DNA Instrumentation	1
BSC 5935	Workshop in Biology: Advanced DNA Typing	1-2

Master of Science in Mathematical Sciences

Admission Requirements

The following are in addition to the University's graduate admission requirements:

1. Bachelor's degree in mathematics, applied mathematics or mathematical sciences from an accredited university or college. A bachelor's degree in some other discipline is also acceptable provided the applicant has sufficient mathematics background. The following courses (or equivalent courses) are required for those whose bachelor's degrees are not in mathematics, applied mathematics or mathematical sciences: Advanced Calculus, Linear Algebra, Complex Variables and Algebraic Structures.
2. A 'B' average or higher in upper division mathematics courses.
3. Graduate Record Examination (GRE) taken within the past five years. At least 151 on the quantitative portion of the GRE, or an earned graduate degree from an accredited institution and the approval of the department. Risk Analysis Management Track applicants are allowed to use Graduate Management Admission Test (GMAT) to meet the admission requirement instead of GRE. The minimum required GMAT total score is 500.
4. Three letters of recommendation concerning the candidate's achievement and potential, from persons familiar with the candidate's previous academic performance.
5. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.3 overall on the IELTS is required.
6. Approval of the Graduate Committee.

Option 1

The student must complete a minimum of 24 semester hours of graduate course work. This course work must include 5 courses from the following two lists, with at least 2 from each list.

List A:

MAA 6406	Complex Analysis	3
MAA 6616	Real Analysis	3
MAP 5316	Ordinary Differential Equations	3
MAS 5311	Graduate Algebra	3
MAS 5312	Galois Theory	3
MHF 5107	Graduate Set Theory	3
MHF 5306	Graduate Mathematical Logic	3
MHF 5325	Theory of Recursive Functions	3
MTG 5326	Introduction to Algebraic Topology	3
MAP 5415	Introduction to Fourier Analysis	3

List B:

MAD 5405	Numerical Methods	3
MAP 5236	Mathematical Techniques of Operations Research	3
MAP 6326	Partial Differential Equations	3
MAP 5407	Methods of Applied Analysis	3
MAS 5145	Applied Linear Algebra	3
MAP 5467	Stochastic Differential Equations	3

STA 5446	Probability Theory I	3
STA 5447	Probability Theory II	3

Electives

The remaining 9 hours of course work will be used to enhance a coherent program of study best suited to the student's needs and interest. This requires the prior approval of the Graduate Committee and may be done in one or a combination of the following ways: a) Further work from lists A and B. b) A maximum of 2 courses of independent study, taken with Mathematical Sciences faculty. c) Graduate level course work in Engineering, Physics or Statistics.

Master's Project

The student will complete his or her graduation requirements by writing an expository paper under the direction of a faculty member. The student may earn six credit hours (MAT 5970 Master's Research) in preparing the project. Successful completion of the Master's project requires a grade of 'B' or higher, as well as approval of a committee consisting of three mathematics faculty (including the director).

Remarks: The course work must be completed with a 3.0 or higher Grade Point Average (GPA) and a grade of 'C' or higher in each course. A maximum of six graduate semester hours may be transferred into the program from outside the University, subject to the approval of the Graduate Committee. A total of 30 credit hours is required for graduation.

Option 2

This course work must include 7 courses from List A and List B in Option 1, with at least 3 courses from each list.

Electives

Same as in Option 1.

Option 2 has no Master's Project requirement

Remarks: The course work must be completed with a 3.0 or higher Grade Point Average (GPA) and a grade of 'C' or higher in each course. A maximum of six graduate semester hours may be transferred into the program from outside the University, subject to the approval of the Graduate Committee. A total of 30 credit hours is required for graduation.

Risk Analysis and Management Track

This track will consist of 12 one-semester three credit graduate courses, and one optional elective during the last semester of the program. The degree will be completed in 12 months. Full time students will take four courses per semester to complete the program in three semesters.

Admission Requirements

Admission requires a Bachelor's in Mathematics or related fields. In addition, applicants must satisfy conditions 3 through 5 in the admission requirements for our Master of Science in Mathematical Sciences, and have a GPA of at least 3.0 in undergraduate studies. Admission to the program requires applicants to have a firm grasp of mathematics at a high undergraduate level. This means calculus through multivariable calculus, linear algebra and differential equations. Knowledge in probability, statistics,

computer programming, economics, or finance is recommended but not required. A student with promise but lacking prerequisites may be admitted but required to take one or more preparatory courses during their first semester.

Degree Requirements

The track in Risk Analysis and Management (RAM for short) requires 36 credits. The student must take 12 graduate credits, 3 credits each.

Course Requirements

Fall Term

MAP 6635	Risk Analysis and Management I	3
FIN 6428	Corporate Finance	3
COP 6007	Computer Programming Concepts	3
A course from List I below (to be chosen based on the class' background)		3

Spring Term

MAP 6218	Stochastic Calculus	3
MAP 6636	Risk Analysis and Management II	3
A course from List I below (to be chosen based on the class background)		3
MAD 5405	Numerical Methods	3

Summer Term

MAP 6632	PDE in Risk Analysis and Management	3
MAP 6637	Risk Analysis and Management III	3
ECO 7429	Topics in Econometrics	3
FIN 6515	Security Analysis	3
or		
FIN 6426	Financial Management Policies	3

MAP 5204	Optimization and Linear Algebra	3
MAA 6616	Real Analysis	3
STA 6326	Mathematical Statistics I	3
STA 3033	Introduction to Probability and Statistics for CS	3

Combined BS in Mathematics/MS in Mathematical Sciences Degree Pathway

This pathway will allow strong students in mathematics to complete a bachelor's degree and a master's degree in 5 years rather than the usual six. A minimum of 140 credits are required for graduation with both the bachelor's and the master's degree. In addition to fulfilling the requirements for the Bachelor's degree in mathematics, these 140 credits include 30 graduate credits required for the Master's of Science in Mathematical Sciences. A maximum of ten (10) graduate mathematics credits can be concurrently used toward the bachelor's and master's degrees.

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree

program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees.

Admission Requirements

1. Current enrollment in a Bachelor's degree program in mathematics.
2. Current overall GPA of at least 3.2 and GPA of at least 3.2 in upper division courses.
3. Completion of 75 undergraduate credit-hours.
4. (Verbal and Quantitative) GRE scores with a minimum of 151 in the quantitative portion before entering the MS phase of the program.
5. Approval of the graduate committee.

Completion Requirements

Year 1 and 2:

MAC 2311	Calculus I
MAC 2312	Calculus II
MAC 2313	Calculus III
MAS 3105	Linear Algebra
MAP 2302	Ordinary Differential Equations

Year 3

Fall

MAA 3200	Introduction to Advanced Mathematics
STA 4321	Introduction to Mathematical Sciences I

One course from List 1 or 2

Spring

MAA 4211	Advanced Calculus
MAS 4301	Algebraic Structures

One course from List 1 or 2

Summer

One course from List 1 or 2 and 1 graduate course

Year 4

Fall

MAA 6616	Real Analysis
----------	---------------

One course from List 1 or 2
Senior Seminar (1 credit)

Spring

One graduate course
Two courses from List 1 or 2

Summer

Three graduate credits

Year 5

Fall

Nine graduate credits

Spring

Nine graduate credits

The graduate courses distribution should follow catalog descriptions of the master's program requirements. Students must take at least 3 courses from List 1 and at least 3 courses from List 2. The balance of the 140 semester hours required for graduation may be chosen from any courses in the university, a minimum of six (6) of these should be at the upper division level or higher.

List 1

MAD 4203	Introduction to Combinatorics	3
----------	-------------------------------	---

MAA 4402	Complex Variables	3
MTG 3212	College Geometry	3
MAS 4203	Number Theory	3
MAA 4212	Topics in Advanced Calculus	3
MAS 4302	Topics in Algebraic Structures	3
MTG 4302	Topology	3

List 2

MAP 4401	Advanced Differential Equations	3
MAD 3305	Graph Theory	3
MAP 3103	Mathematical Modeling	3
STA 4322	Mathematical Statistics II	3
MAD 3401	Numerical Analysis	3
MHF 4302	Mathematical Logic	3
MHF 4102	Axiomatic Set Theory	3

Doctor of Philosophy in Applied Mathematical Sciences

Admission Requirements

1. Have either a bachelor's or a graduate degree in Mathematics or another quantitative field
2. Have a GPA of at least 3.0 in the bachelor's or Masters' degree
3. GRE test results
4. Official transcripts and least three letters of recommendation.
5. Have received approval of the departmental graduate committee
6. Foreign student whose native language is not English must obtain a score of 80 or higher on the TOEFL iBT (this corresponds to 550 on the old TOEFL test) or 6.3 overall on the IELTS. The University Graduate School has a list of countries that are exempt from this requirement.

Required Core Courses

MAA 6616	Real Analysis	3
MAA 6406	Complex Analysis	3
MAD 5405	Numerical Methods	3
MAP 5316	Ordinary Differential Equations	3
MAP 6326	Partial Differential Equations	3
MAS 5145	Applied Linear Algebra	3
MAP 5255	Scientific Computations	3
MAT 5921	Training in Mathematical Expositions	0

Required Other Courses

MAT 7981	Ph.D. Dissertation	15
----------	--------------------	----

Thesis Preparatory Courses

MAA 6506	Functional Analysis	3
MAP 6217	Calculus of Variations	3
MAD 6409	Numerical Methods II	3
MAD 7408	Topics in Numerical Analysis	3
MAP 5415	Introduction to Fourier Analysis	3
MAP 6357	Partial Differential Equations II	3
MAP 7359	Topics in Partial Differential Equations	3
MAP 6218	Stochastic Calculus	3
MAP 5467	Stochastic Differential Equations	3
STA 5446	Probability Theory I	3
STA 5447	Probability Theory II	3
STA 6807	Queuing and Statistical Models	3

Thesis Research Courses

MAT 7908	Independent Study	1-3
----------	-------------------	-----

MAT 7917	Research Seminar	3
MAT 7980	Dissertation Research	1-9

Course Requirements

The Doctor in Applied Mathematics degree will be made up of the 8 core courses, a minimum of 15 credit hours must be of Ph.D. dissertation course, at least 4 courses (for a subtotal of at least 12 credits) from the thesis preparatory courses list. The remaining 27 credits of the required 75 may be filled by courses from:

1. Any courses from the thesis preparatory courses which are not counted as the four courses. Above, or thesis research courses, or other 6XXX/7XXX courses from the departmental catalog.
2. Courses of level 5000 or higher from Computer Science, Statistics, Physics, Economics, or Engineering approved by the Graduate Committee.
3. If a student has a co-advisor from another department, then at least 6 credits must be taken from the other department.

Graduation Requirements

1. Completing a total of 75 credit hours of course
2. A grade of 'B' or higher in all required core courses and a cumulative average of 3.0 or higher in the 75 credits of coursework.
3. Successful completion of the written portion of the Qualifying Exam. This examination is designed primarily to make sure the student has suitable background knowledge to conduct research in his/her chosen area. The student must pass the written Qualifying Exam by the end of the fifth semester (excluding summers) in the program. Two attempts are permitted. Any exception needs to be approved by the Graduate Committee. The student chooses any two of the following four areas of the exams: (1) Analysis (including both real analysis and complex analysis); (2) Differential Equations (including both Ordinary Differential Equations and Partial Differential Equations); (3) Numerical Analysis; (4) Mathematical Statistics.
4. Choosing advisor(s). The student will choose a faculty from the Department of Mathematics and Statistics as their dissertation advisor. A co-advisor could be selected from within the department or from outside.
5. Successful completion of the oral portion of the Qualifying Exam. The student will present and defend an oral examination. The purpose of this exam is to verify that the candidate has chosen a suitable topic for dissertation research and to evaluate the candidate's ability to conduct such research. The student will normally take the oral examination after completion of the core requirements and the written portion of the Qualifying Exam. The oral examination will be conducted by a panel of math faculty including the student's advisor(s). During the oral examination, the candidate presents his/her accomplished and proposed research and answers questions from the panel and others in the audience.
6. Upon completion of the required core courses and passing both portions of the Qualifying Exam, the student can advance to Candidacy.

Dissertation Requirements

1. The student will assemble a Dissertation Committee of at least four faculty members [including advisor(s)], three of whom will be from the Department of Mathematics and Statistics.
2. Submission and defense of a dissertation based upon original research in mathematical science. A dissertation is required of all candidates for the PhD degree and must conform to the format outlined in the Regulations for Thesis and Dissertation Preparation Manual available to students online from the FIU Graduate School.
3. After submission of the dissertation and completion of all other required work for the PhD degree, the candidate will be given a final oral thesis defense examination by the Dissertation Committee. Successful completion of all of these steps will culminate in the granting of the PhD degree.

Master of Science in Statistics

The Master of Science in Statistics at Florida International University is primarily an applied statistics program. It offers a balance of statistical theory, statistical methodology, and optionally, an area application concentration. The program offers a thesis option and a non-thesis option. Regardless of the concentration or thesis option, the program requires a total of 36 credit-hours as follows: six core courses (18 hours), four elective courses or an area of concentration (12 hours), and either a thesis (6 hours) or two additional elective courses (6 hours) and a comprehensive examination.

Admission Requirements

To be admitted into the program, applicants must meet the university's graduate admission requirements (see Office of Graduate Admissions in this catalog), GRE scores are required. However, the GRE requirement can be replaced by any nationally and internationally comparable exams that are approved by the Department's Graduate Committee, such as GEE (Graduate Entrance Exam). If an applicant has an earned graduate degree from an accredited US institution, the Department may waive the GRE requirement. All the applicants must also meet the following departmental requirements:

1. Bachelor's degree in statistics, mathematics, or in a related field from an accredited university or college. A bachelor's degree in some other discipline is also acceptable provided the applicant has a suitable mathematics background.
2. A 3.0 or higher (on a 4-point scale) GPA in mathematics and statistics courses.
3. Three letters of recommendation from persons familiar with the applicant's academic qualifications.
4. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.
5. Approval of the departmental graduate committee.

Core Courses: (18)

STA 5206	Design of Experiments
STA 6244	Data Analysis I
STA 6246	Linear Models
STA 6247	Data Analysis II

STA 6326	Mathematical Statistics I
STA 6327	Mathematical Statistics II

Elective Courses: (12)

A student may select four courses from Lists A, B, and C or may opt for an area of concentration (see below).

Concentration Area: (12)

Students interested in a concentration in Biostatistics/ Environmetrics must select two courses from List A and two track-related electives. At least one of these electives must be from outside the department.

Students interested in a concentration in Reliability Analysis/Quality Control must select two courses from List B and two track-related electives. At least one of these electives must be from outside the department.

All electives must be approved by the Graduate Program Director.

List A: Biostatistics/Environmetrics

STA 5826	Stochastic Processes
STA 6176	Biostatistics
STA 6678	Environmental Statistics

List B: Reliability Analysis/Quality Control

STA 5666	Advanced Quality Control
STA 5676	Reliability Engineering
STA 5826	Stochastic Processes

List C: Elective Statistics Courses

STA 5207	Topics in Design of Experiments
STA 5236	Regression Analysis
STA 5507	Nonparametric Methods
STA 5906	Independent Study
STA 6505	Analysis of Categorical Data
STA 6807	Queueing and Statistical Models
STA 6940	Supervised Statistical Consulting
STA 7707	Multivariate Methods I
STA 7708	Multivariate Methods II

Elective Courses from Outside of the Department

Elective courses from outside of the department must be approved by the Graduate Program Director.

Thesis Option: (6)

Students opting to write a thesis must enroll in STA 6971, Thesis Research and STA 6972, Master's Thesis (6 credit-hours total).

Non-Thesis Option: (6)

Students who opt not to write a thesis must take two additional elective courses selected from List C or from outside of the department. These courses must be approved by the Graduate Program Director.

Graduation Requirements

1. Grade and GPA requirements: a) cumulative GPA of 3.0 or higher in all courses, b) an average grade of "B" or higher in all core courses, with a minimum grade of "C" or higher in each core course, and c) a grade of "C" or higher in each concentration or elective course.
2. A candidate who opts to write a thesis must successfully defend the thesis orally and have the written thesis approved by his/her thesis committee.
3. A candidate who chooses the non-thesis option must take and pass a comprehensive examination. Students must follow all regulations of the University Graduate School.

Course Descriptions**Definition of Prefixes**

COT-Computing Theory; MAA-Mathematics: Analysis; MAD-Mathematics: Discrete; MAP-Mathematics: Applied; MAS-Mathematics: Algebraic Structures; MAT-Mathematics; MHF-Mathematics: History and Foundations; MTG-Mathematics: Topology and Geometry; STA-Statistics

F-Fall semester offering; S-Spring semester offering; SS-Summer semester offering

COT 5310 Theory of Computation I (3). Abstract models of computation; halting problem; decidability and undecidability; recursive function theory. Prerequisite: MAD 3512.

COT 6400 Analysis of Algorithms (3). Complexity behavior of algorithms is described for Set Manipulation, Graph Theory, and Matrix Manipulation problems, among others. P and NP classes of problems reveal an inherent difficulty in designing efficient algorithms. Prerequisite: COP 3530.

MAA 6616 Real Analysis (3). Function spaces, Lebesgue Measure and Integral with applications, properties of L_p spaces, differentiation, Radon-Nikodym theorem. Prerequisites: MAS 3105, MAA 4211, MAP 4401 or MAA 4212.

MAA 6506 Functional Analysis (3). Normed vector spaces, linear operators, Baire Category theorem, Banach fixed point theorem, Hahn-Banach theorem and applications, open mapping /closed graph theorem with applications, Hilbert spaces. Prerequisites: MAP 5407 AND MAA 6616.

MAD 5405 Numerical Methods (3). Advanced ideas and techniques of numerical analysis for digital computation. Topics include: linear and non-linear systems, ordinary differential equations, continuous system modeling techniques, and languages. Prerequisites: MAS 3105 and MAP 2302.

MAD 6409 Numerical Methods II (3). This course provides an exposure to numerical techniques used in solving partial differential equations of mathematical physics and engineering. Prerequisite: MAD 5405.

MAA 6406 Complex Analysis (3). Harmonic functions, normal families, Riemann mapping theorem, univalent functions, infinite products and entire functions, elliptic functions, analytic continuation. Prerequisites: MAA 4211 and MAA 4402.

MAD 7408 Topics in Numerical Analysis (3). Topics include numerical linear algebra, special methods, finite element methods, computational fluid dynamics, signal and image processing. Prerequisite: MAD 6xxx Numerical Methods II.

MAP 5117 Mathematical and Statistical Modeling (3). Study of ecological, probabilistic, and various statistical models. Prerequisites: MAC 2313, COP 2210, MAS 3105; and STA 3033 or STA 3164 or STA 4322.

MAP 5204 Optimization and Linear Algebra (3). Vectors, Euclidean spaces, operations on matrices, rank, determinants, linear and quadratic programming, Kuhn,

Tucker techniques for constrained optimization. Prerequisite: MAC 2313.

MAP 5208 Numerical Optimization (3). The generalization of optimization theory and techniques to other formulations comprise a large area of applied mathematics. This course is mainly about convex optimizations. Prerequisites: MAP 2302, MAC 2313, MAS 3105.

MAP 5236 Mathematical Techniques of Operations Research (3). This course surveys the mathematical methods used in operations research. Topics will be chosen from linear programming, dynamic programming, integer programming, network analysis, classical optimization techniques, and applications such as inventory theory. Prerequisites: MAP 5117 and MAS 3105 and either CGS 3420 or COP 2210.

MAP 5255 Mathematical Scientific Computation (3). Programming in Matlab, Graphics in Matlab, Creating GUIs in Matlab, Simulink. Prerequisites: MAC 2313, MAP 2302, MAS 3105.

MAP 5316 Ordinary Differential Equations (3). Existence and uniqueness theorem, matrix formulation, physical applications, regular singular points, autonomous systems, Laplace transform, special topics. Prerequisites: MAA 3200, MAA 4402 and MAS 3105.

MAP 5317 Advanced Differential Equations for Engineers (3). Topics may include Bessel Functions and other special functions arising from classical differential equations, Sturm-Liouville problems, partial differential equations, transform techniques. Credit may not be counted for both MAP 4401 and MAP 5317. Credit for MAP 5317 may not be applied toward the Master's degree in Mathematical Sciences. Prerequisites: MAC 2313 and MAP 2302.

MAP 5318 Dynamical Systems and Introduction to Chaos Theory (3). Important techniques for linear systems of differential equations and nonlinear systems, as well as applications of these systems in a wide variety of fields. Prerequisites: MAS 3105, or equivalent, or permission of the instructor.

MAP 5407 Methods of Applied Analysis (3). Convergence, fixed point theorems, application to finding roots of equations, normed function spaces, linear operators, applications to numerical integration, differential and integral equations. Prerequisites: MAA 4211, MAP 2302, and MAS 3105.

MAP 5415 Introduction to Fourier Analysis (3). Basic real analysis, and measure theory, LP spaces and convolution, the Fourier transform in L^2 , Plancherel theorem, application to differential equations and wavelets. Prerequisites: Advanced Calculus, Linear Algebra.

MAP 5467 Stochastic Differential Equations and Applications (3). Review of measure theory, stochastic processes, Ito Integral and its properties, martingales and their generalizations, stochastic differential equations, diffusions. Applications to boundary value problems and finance. Prerequisites: MAS 3105, MAP 4401, MAA 4211, MAA 6616 or permission of instructor.

MAP 6217 Calculus of Variations (3). Fundamental problems, weak and strong extrema, necessary and

sufficient conditions, direct methods, optimal control problems, Pontryagin Maximum principle. Prerequisites: MAP 4401 and MAA 6616.

MAP 6218 Stochastic Calculus (3). Discrete time models, Brownian motion, stochastic integration, ITO's integral, Ornstein-Uhlenbeck processes, Girsanov theorem, Black-Sholes model. Prerequisites: STA 4321 or equivalent.

MAP 6326 Partial Differential Equations (3). Basic concepts of first and second order PDE's applications to optics and wave fronts, Cauchy problem, Laplace equation, Green's function, Dirichlet problem, heat equation. Prerequisite: MAA 4211.

MAP 6357 Partial Differential Equations II (3). Modern aspects of PDEs. Topics include distribution theory, fundamental solutions, maximum principles, Sobolev spaces, initial and boundary value problems. Prerequisites: MAA 6616 and MAP 6326.

MAP 6630 Numerical Methods in Risk Analysis and Management (3). Quadrature methods, numerical solutions to ODEs and PDEs, Monte Carlo method, applications to asset pricing. Prerequisites: Calculus 3, Matrix Algebra, Diff. Equations.

MAP 6631 Intro to Quantitative Risk Analysis and Management (3). A mathematical introduction to arbitrage-based pricing of derivative securities. Prerequisites: MAC 2313, MAS 3105.

MAP 6632 PDE in Risk Analysis and Management (3). Deterministic and stochastic optimization, dynamic programming, Hamilton-Jacob, equation, forward and backward Kolmogorov equation, Feynman-Kac formula. Prerequisites: Stochastic Calculus, Differential Equations, Calculus 3, Matrix Algebra.

MAP 6635 Risk Analysis and Management I (3). Basic probability, Martingales, Black-Sholes models, Black-Sholes formula, American options. Prerequisites: MAC 2313, MAS 3105, STA 4321. Corequisites: STA 4321 or equivalent.

MAP 6636 Risk Analysis and Management II (3). Discrete and continuous time models, application of stochastic integrals and ITO's Lemma to Finance, Risk of Neutral Valuation. Prerequisite: MAP 6635.

MAP 6637 Risk Analysis and Management III (3). Continuous time Risk Management. Arbitrage pricing theory. Exotic options. Interest rate models. Yield curves and pricing of interest rate derivative. Prerequisite: MAP 6636.

MAP 7359 Topics in Partial Differential Equations (3). Advanced topics in partial differential equations. Topics may include: mathematical fluid mechanics; inverse problems; microlocal analysis of PDE; spectral analysis and scattering theory. Prerequisite: MAP 6357.

MAS 5145 Applied Linear Algebra (3). Vector spaces and linear maps, solutions of linear systems, orthogonal projection and QR factorization, determinant and eigenvalues of a matrix. Prerequisites: MAS 3105 and MAA 3200.

MAS 5311 Graduate Algebra (3). A study of the basic material on groups, rings and vector spaces. Topics include the Jordan-Holder theorem, structure of modules

over Euclidean domains and canonical forms of matrices. Prerequisites: MAS 4301 or equivalent.

MAS 5312 Galois Theory (3). Extension fields, ruler and compass constructions, fundamental theorem of Galois Theory, cyclotomic and cyclic extensions, solutions of equations by radicals, selected topics. Prerequisites: MAS 5311 or permission of the instructor.

MAS 5315 Algebraic Geometry (3). Introduction to the theory of affine and projective schemes, coherent sheaves and sheaf cohomology. Application to studying algebraic varieties. Prerequisites: MAS 4301, MAA 4402.

MAS 5333 Commutative Algebra I (3). Study of regular, Cohen-Macaulay, and Gorenstein rings. Done using "local" and homological methods. Module of Kahler Differentials; integral closure of ideals; Intersection and applications. Prerequisite: MAS 4302.

MAT 5907 Independent Study (VAR). Individual conferences, assigned reading, and reports on independent investigations.

MAT 5921 Training in Mathematical Exposition (0). Students prepare and present supervised lectures on undergraduate mathematical topics to fellow students. Prerequisite: Graduate standing.

MAT 5970 Master's Research (1-6). Research toward preparation of master's project. Prerequisite: Permission of graduate committee.

MAT 6946 Applied Experience Component (1-3). Consists of a one semester (usually summer) internship at private corporation or government agency. Has three parts: i) weekly colloquia in math-science; ii) internship; iii) presentation after internship. Prerequisite: Permission of the department.

MAT 7908 Independent Study (1-3). For senior Ph.D. students to work on topics where standard courses cannot be opened. Could consist of individual conferences, assigned reading, or independent investigations. Prerequisite: Permission of the Math-Stats department.

MAT 7917 Graduate Research Seminar in Mathematics (3). Under supervision of faculty, students will read and present seminal papers a field of mathematics. Course will train students reading and comprehension of research articles, and in preparing talks. Prerequisite: Permission of the department.

MAT 7980 Dissertation Research (1-9). Students conduct dissertation research at the doctoral level in mathematics under faculty supervision. Prerequisite: Permission of Instructor (F,S)

MAT 7981 PhD Dissertation (1-12). Original research work toward completion, presentation and defense of a dissertation. Prerequisite: Permission of Major Professor and Doctoral Candidacy (F,S,SS)

MHF 5107 Graduate Set Theory (3). Zermelo-Frankel axioms, ordinals and cardinals, Godel's constructible universe, large cardinals, forcing and the independence of the Continuum Hypothesis and the Axiom of Choice. Prerequisites: MHF 4102 or MAA 4211 or permission of the instructor.

MHF 5306 Graduate Mathematical Logic (3). First order languages, construction of models from constants, advanced construction of models, non-standard models,

recursion theory, RE sets, Turing degrees, oracle construction. Prerequisites: MHF 4302 or permission of the instructor.

MHF 5325 Theory of Recursive Functions (3). Turing machines, decision problems, coding, s-m-n theorem, Rice's and Myhill's theorems, oracles, degrees, finite and infinite injury constructions. Prerequisite: MHF 4302 or COT 5310.

MHF 5345 Mathematical Logic for Linguistics (3). Formal logical systems and applications. Propositional and predicate calculus, proof systems, completeness and incompleteness theorems, recursion. Chomsky hierarchy, formal grammars. Does not fulfill requirements for Mathematics Degree. Prerequisites: MAD 3512 or permission of the instructor.

MHF 5930 Topics in Modern Mathematics (3). Designed to provide student with the opportunity to pursue topics not otherwise covered in other courses. Prerequisites: MAC 2313, MAS 3105.

MTG 5256 Differential Geometry (3). Curves and surfaces in 3-dimensional Euclidean space, Gauss-Bonnet Theorem, Smooth manifolds. Tensors on manifolds, Connections and curvature, Riemannian metrics. Prerequisite: MAC 2313, MAP 2302, MAS 3105 or equivalent

MTG 5326 Introduction to Algebraic Topology (3). Classification of surfaces, fundamental group, homotopy type, Van Kampen theorem, simplicial complexes, introduction to homology theory. Prerequisites: MAS 4301 and MTG 4302.

MTG 5328 Introduction to Applied Topology (3). Persistence homology and diagrams of families of topological spaces; Stability Theorem; Probability and Statistics on the space of persistence diagrams; Applications to analyzing data. Prerequisite: MAS 3105, MAS 4302, MTG 4302, or equivalent.

STA 5065L SAS Data Analysis Lab (1). Entering data, descriptive statistics, graphing data, crosstabulations, t-tests, correlation and regression, and analysis of variance. Prerequisites: A statistics course and graduate standing or permission of the instructor.

STA 5105L SPSS Data Analysis Lab (1). Topics include: Entering data from various sources, data checking, descriptive statistics, graphing data, crosstabulations, t-tests, correlation and regression, ANOVA, and reliability. Prerequisites: A statistics course or concurrent enrollment in a statistics course, and graduate standing or permission of the instructor.

STA 5106 Intermediate Statistics I (3). Power, measures of assoc., measurement, ANOVA: one-way and factorial, between and within subjects expected mean squares, planned comparisons, apriori contrasts, fixed, random, mixed models. This course may be of particular interest to behavioral sciences. Prerequisites: STA 3111 or STA 3123 or STA 3033; and graduate standing. (F)

STA 5107 Intermediate Statistics II (3). Correlation and regression both simple and multiple, general linear model, analysis of covariance, analysis of nominal data, analysis of categorical data. This course may be of particular interest to behavioral sciences. Prerequisite: Permission of the instructor. (S)

STA 5126/PSY 5206 Fundamentals of Design of Experiments (3). CRD and RCB designs. Latin square designs. Factorial, nested and nested-factorial experiments. Fixed, random and mixed models. Split-plot designs. Covariance analysis. Prerequisites: STA 3112 or STA 3123 or STA 3163 or STA 4322 or equivalent.

STA 5206 Design of Experiments I (3). Design and analysis of completely randomized block, Latin square factorial, nested experiments. Multiple comparisons. Credit for only one of three STA 4202, STA 5126, and STA 5206 courses will be granted. Prerequisites: STA 3033 or STA 3164 or STA 4322 or (STA 3163 and STA 4321).

STA 5207 Topics in Design of Experiments (3). This applied course in design of experiments covers topics such as split-plot design, confounding, fractional replication, incomplete block designs, and response surface designs. Prerequisite: STA 5206.

STA 5236 Regression Analysis (3). Simple, multiple and polynomial regression, analysis of residuals, model building and other related topics. Credit for both STA 4234 and STA 5236 will not be granted. Prerequisites: STA 3112 or STA 3123 or STA 3164, or STA 6167.

STA 5446-STA 5447 Probability Theory I and II (3-3). This course is designed to acquaint the student with the basic fundamentals of probability theory. It reviews the basic foundations of probability theory, covering such topics as discrete probability spaces, random walk, Markov Chains (transition matrix and ergodic properties), strong laws of probability, convergence theorems, and law of iterated logarithm. Prerequisite: MAC 2313.

STA 5507 Nonparametric Methods (3). Distribution-free tests: sign, Mann-Whitney U, Wilcoxon signed rank, Kruskal-Wallis, Friedman, etc. Rank correlation, contingency tables and other related topics. Credit for both STA 4502 and STA 5507 will not be granted. Prerequisite: A course in statistics.

STA 5666 Advanced Statistical Quality Control (3). Review of statistical methods useful in quality improvement. Statistical process control. Taguchi's and Deming's philosophies. Control charts. Process capability analysis. Acceptance sampling plans. Prerequisites: STA 3033 or STA 3163 or STA 4321 or equivalent.

STA 5676 Reliability Engineering (3). The course material is designed to give the student a basic understanding of the statistical and mathematical techniques which are used in engineering reliability analysis. A review will be made of the basic fundamental statistical techniques required. Subjects covered include: distributions used in reliability (exponential, binomial, extreme value, etc.); tests of hypotheses of failure rates; prediction of component reliability; system reliability prediction; and reliability apportionment. Prerequisite: STA 4322.

STA 5800 Stochastic Processes for Engineers (3). Probability and conditional probability distributions of a random variable, bivariate probability distributions, multiple random variables, stationary processes, Poisson and normal processes. Prerequisites: MAC 2313, MAP 2302, STA 3033.

STA 5826 Stochastic Processes (3). This course is intended to provide the student with the basic concepts of

stochastic processes, and the use of such techniques in the analysis of systems. Subjects include: Markov Processes, queueing theory, renewal processes, birth and death processes, Poisson and Normal processes. Applications to system reliability analysis, behavioral science, and natural sciences will be stressed. Prerequisite: STA 5447.

STA 5906 Independent Study (1-6). Individual conferences, assigned reading, and reports on independent investigation.

STA 6166 - STA 6167 Statistical Methods in Research I and II (3-3). For non-mathematical sciences graduate students. A non-calculus exposition of methods and applications of statistical techniques for the analysis of data. Statistical packages will be used. Prerequisite: Graduate standing. (F,S)

STA 6176 Biostatistics (3). Statistical analysis of data encountered in medical sciences. Analysis of count data, Kaplan-Meier survival analysis, Cox proportional hazards model, analysis of covariance, logistic regression, etc. Prerequisites: STA 3163 or equivalent.

STA 6196 Statistics for Environmental Sciences (3). Environmental Quality Data, Binomial, Poisson, Normal, Lognormal, and Extreme value distributions. Prediction and Tolerance Intervals, Hypothesis Testing of Environmental Quality Data, Risk Assessment, Regression, Spatial Statistics. Prerequisites: STA 2122, STA 3145, STA 6166 or the equivalent.

STA 6244 Data Analysis I (3). Exploratory data analysis; testing of distributional assumptions; Chi-square tests, tests for means, variances, and proportions. Prerequisites: STA 3033, STA 4322, or STA 6327.

STA 6246 Linear Models (3). Introduction to the theory of linear models. Distribution of linear and quadratic functions of normal vectors. Development of inferential procedures for simple and other more complex linear models. Prerequisites: MAS 3105, STA 6247, and STA 6327.

STA 6247 Data Analysis II (3). Analysis of variance, regression analysis. Analysis of covariance, quality control, correlation, empirical distributions. Prerequisites: MAS 3105 and STA 6244.

STA 6326 Mathematical Statistics I (3). An introduction to the theories underlying statistical analysis. Basic concepts of probability theory, combinatorial analysis, random variables, and expectation. Prerequisite: MAC 2313.

STA 6327 Mathematical Statistics II (3). Estimation of parameters, tests of hypotheses, regression, non-parametric methods, analysis of variance, and multivariate concepts. Prerequisite: STA 6326.

STA 6505 Analysis of Categorical Data (3). Analysis of contingency tables, measures of association, logit and loglinear models. Prerequisites: STA 5107 or STA 5236 or STA 6167.

STA 6636 High Dimension Data Analysis (3). Statistical techniques used to analyze high dimensional data sets. Topics include machine learning, high dimensional data, discriminant analysis and clustering. Prerequisites: STA 6246 and STA 5236 or equivalent.

STA 6678 Environmental Statistics (3). Review of probability theory and probability processes. Bernoulli, Poisson, and normal processes. Dilution of pollutants. Lognormal processes. Prerequisites: MAC 2312 and STA 3164.

STA 6746 Multivariate Statistical Analysis (3). Multivariate normal, Wishart and Hotelling's distributions. Statistical inferences based on one or two samples. MANOVA. Principal component analysis, factor analysis, and cluster analysis. Prerequisites: STA 3112 or STA 3123 or STA 6167.

STA 6807 Queueing and Statistical Models (3). Review of probability concepts, basic probability distributions, Poisson process, queueing models, statistical models. Prerequisites: Permission of the instructor, MAC 2312 and either STA 3033 or STA 4321.

STA 6930 Special Topics (3). A course designed to give students an opportunity to pursue special studies not otherwise offered in the curriculum. May be repeated. Prerequisite: Permission of the instructor.

STA 6940 Supervised Statistical Consulting (3). Formulation of statistical problems from client information, consulting session management, interpersonal aspects of consulting, problem solving techniques. Prerequisites: Permission of the instructor, STA 4102, STA 6247, and STA 6327.

STA 6971 Thesis Research (1-6). Supervised research on theoretical or applied statistics leading to a thesis. Repeatable. Prerequisite: Permission of student's program committee.

STA 6972 Master's Thesis (1-6). Thesis completion and submission in partial fulfillment of Master's degree requirements. Prerequisite: Permission of student's program committee.

STA 7707 Multivariate Methods I (3). Multivariate normal, Wishart and Hotelling's distributions. Inferences for one and two mean vectors. Profile analysis. One- and two-way MANOVA. Multivariate multiple regression. Prerequisites: STA 3112 or STA 3123. (F)

STA 7708 Multivariate Methods II (3). Principal components analysis. Factor analysis. Canonical correlation analysis. Discriminant analysis. Cluster analysis. Multidimensional scaling. Prerequisite: STA 7707. (S)

Master of Science in Physics

The Master of Science in Physics is a 45 semester hour program consisting of course work at the 5000 and 6000 level and research with one of the departmental research groups culminating in a master's thesis. Students entering the program must have a bachelor's degree or equivalent course work in Physics.

Doctoral candidates who have filed the D-2 and D-3 forms with the University Graduate School can receive a Master of Science in Physics en route to the PhD after completion of 45 hours of graduate coursework.

Graduate Admission Requirements

For admission to the graduate programs, a Bachelor's degree in physics is required with a minimum undergraduate GPA of 3.0. The GRE is required. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

Required Courses

PHY 5115	Mathematical Physics I	3
PHY 5240	Advanced Classical Mechanics	3
PHY 5346	Advanced Electromagnetic Theory I	3
PHY 5347	Advanced Electromagnetic Theory II	3
PHY 6645	Advanced Quantum Mechanics I	3
PHY 6646	Advanced Quantum Mechanics II	3
PHY 6936	Advanced Topics	3
PHY 6524	Statistical Physics	3
PHY 6935	Graduate Research Seminar	
	OR	
PHY 5930	Seminar in Physics	3-6

In addition, three semester hours of specialized course work are required in the student's area of specialization and 12-15 hours of thesis work for a total of 45 hours.

Doctor of Philosophy in Physics

The Doctor of Philosophy in Physics program requires 80 credit hours at the graduate level, including a minimum of 15 credit hours of dissertation research. A maximum of 36 credits may be transferred from a completed graduate program with the approval of the Graduate Committee.

Graduate Admission Requirements

For admission to the graduate programs, a Bachelor's degree in Physics is required with a minimum undergraduate GPA of 3.0. The GRE is required. The GRE advanced is recommended. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

Required Courses

1. All Required Courses for the Master of Science in Physics program listed above.
2. Three additional 3-credit courses at the graduate level (5000 or higher) within Physics or other unit with the approval of the Graduate Program Director.

All doctoral candidates must take a Ph.D. comprehensive exam. This exam is designed to test general knowledge of physics at the advanced undergraduate and first-year graduate level and must be passed not later than the beginning of the third year enrolled in the program. Within two years of entering the program, students must submit to the Graduate Committee their choices of research and advisor. Course work and research programs shall be planned with the advice and approval of the advisor. After passing the comprehensive exam and prior to or during the first semester of the fourth year enrolled in the program, a student must also take a candidacy exam which tests the ability to conduct research in a particular field, as well as the ability to present the results of that research in an organized and coherent manner.

Course Descriptions

Definition of Prefixes

AST-Astronomy; PHY-Physics; PHZ-Physics
 F-Fall semester offering; S-Spring semester offering; SS-Summer semester offering.

AST 5215 Stellar Astrophysics (3). Topics in Stellar Astrophysics, in greater detail and depth than similar

topics in AST 3213. Emphasis on current stellar structure, evolution models and the underlying observational data. Prerequisites: PHY 3107, PHY 3503, PHY 4324, PHY 4222 or equivalent. (F or S)

AST 5405 Extragalactic Astrophysics (3). Topics in extragalactic astrophysics, in greater detail and depth than similar topics in AST 3213. Emphasis on galactic structure and evolution, quasars and cosmology. Prerequisites: PHY 3107, PHY 3503, PHY 4324, PHY 4222 or equivalent. (For S)

AST 5507 Celestial Mechanics (3). Principles of classical Newtonian mechanics applied to the motions of planets, satellites, and interplanetary space probes. Prerequisites: PHY 4222 or equivalent. (F or S)

PHY 5081 Graduate Problem Solving in Physics (3). A comprehensive review of methods and strategies in problem solving targeted at students in a physics graduate program. The course is designed to prepare students for their PhD qualifying exams. Prerequisite: PHY 5240, PHY 5347

PHY 5115 Mathematical Physics I (3). Methods of solution for problems in mathematical physics: Variational principles, complex variables, partial differential equations, integral equations, and transforms. Prerequisites: MAC 2313, MAP 2302. (F)

PHY 5116 Mathematical Physics II (3). Additional solution methods in mathematical physics: Perturbation methods, Laplace's and Poisson's Equations, waves, special functions, vector fields, vector waves. Prerequisite: PHY 5115. (S)

PHY 5141 Intermediate Modern Physics I (3). Prepares advanced undergraduate and beginning graduate student research preparation in atomic, molecular, or optical physics. Topics may be adapted to students' research interests. Prerequisite: Permission of Instructor.

PHY 5142 Intermediate Modern Physics II (3). Continuation of advanced undergraduate and beginning graduate student research preparation in atomic, molecular, optical or nuclear physics. Topics may be adapted to students' research interests. Prerequisite: Intermediate Modern Physics I.

PHY 5156C Physics Modeling II (4). Expanding the modeling guided-inquiry approach in Physics Modeling I to topics beyond mechanics such as electricity, magnetism, light, or modern physics. May be repeated for credit. Prerequisites: PHZ 5155C and permission of the instructor.

PHY 5235 Nonlinear Dynamics and Chaos (3). Introduction to the universal behavior of classical systems described by nonlinear equations. Prerequisites: PHY 4222, MAA 4211. (F or S)

PHY 5240 Advanced Classical Mechanics (3). Advanced formulations of the equations of motion and their applications: the central field problem, rigid body dynamics, oscillations and continuous systems. Prerequisite: PHY 4222. (F)

PHY 5346 Advanced Electromagnetic Theory I (3). Advanced treatment of classical electromagnetism: Electrostatics, Green's function, Laplace's equation,

multipole expansion, magnetostatics, Maxwell's equations, waves. Prerequisite: PHY 4324. (F)

PHY 5347 Advanced Electromagnetic Theory II (3). Additional topics in classical electromagnetism: Wave guides, radiating and diffracting systems, Kirchoff's integral for diffraction, covariant formulation of field equations. Prerequisite: PHY 5346. (S)

PHY 5446 Laser Physics (3). Principles of lasers and laser applications, including atom-field interactions, stimulated emission and dipole oscillators, optical resonators and electromagnetic modes, semi-classical laser theory, and specific laser systems. Prerequisite: PHY 4605. (F or S)

PHY 5466 The Physics of Music (3). Provides music technology majors a physical understanding of sound, sound generation and reproduction. Concentrates mainly on physical principles and less on calculation. Prerequisite: Permission of Instructor.

PHY 5667 Nonperturbative Quantum Field Theory (3). Euclidean QFT, renormalization group, local gauge symmetry, lattice regularization, Wilson action, fermion fields, expansion schemes, numerical algorithms, hadron properties, recent developments. Prerequisite: PHY 4605.

PHY 5930 Seminar in Physics (1-3). A series of specialized lectures/seminars on selected topics in Physics/Astro-Physics. Prerequisite: Permission of the department.

PHY 5936 Special Topics Research (1-10). Participation in an original investigation in theoretical or experimental physics/astro-physics under direct faculty supervision. Prerequisite: Permission of the instructor.

PHY 5937, PHY 5938 Seminar in Special Topics (3). Seminar work under the supervision of a faculty member on subject material of mutual interest.

PHY 5940 Physics Graduate Teaching Workshop (1). The teaching of physics laboratories. Includes practice of lab experiments, use and adjustment of lab equipment and explanation of departmental grading policy. Supplemented by outside lectures on university policies. (F)

PHY 6524 Statistical Physics (3). Fundamental principles of statistical mechanics; fluctuations, noise and irreversible thermodynamics; kinetic methods and transport theory. Prerequisites: PHY 3503 and PHY 4222. (S)

PHY 6645 Advanced Quantum Mechanics I (3). Advanced topics in quantum mechanics: Quantized systems, relativistic quantum mechanics, potential scattering. Prerequisite: PHY 4605. (F)

PHY 6646 Advanced Quantum Mechanics II (3). Additional topics in advanced quantum mechanics: Collision theory, symmetry transformations, conservation laws, group theory. Prerequisite: PHY 6645. (S)

PHY 6651 Quantum Scattering Theory I (3). The investigation of atomic and electronic scattering processes: Potential scattering, long range potentials, electron-atom collisions. Prerequisite: PHY 6645.

PHY 6652 Quantum Scattering Theory II (3). The mathematical investigation of scattering processes: Auto-

ionization, fast vs. slow collisions, Regge poles, S and T matrices. Prerequisite: PHY 6651.

PHY 6668 Relativistic Quantum Field Theory I (3). Introduction to relativistic quantum fields: General formalism, Klein-Gordon field, Dirac field, vector fields, interacting fields, CPT theorem, reduction formulae, gauge theory. Prerequisite: PHY 6646.

PHY 6669 Relativistic Quantum Field II (3). Additional topics in relativistic quantum fields: perturbation theory, U matrix, Wick's theorem, dispersion relations, renormalization, Ward identity, renormalization group, path integral formalism. Prerequisite: PHY 6668.

PHY 6675 Quantum Theory of Many Particle Systems I (3). An introduction to the physics of many particle systems: Second quantization, Fock spaces, Boson and Fermion symmetry, Gell-Mann-Low theorem, diagrammatic expansions, Goldstone theorem. Prerequisite: PHY 6646.

PHY 6676 Quantum Theory of Many Particle Systems II (3). Additional topics in the physics of many particle systems: Fermi gas, Bose condensation, Hartree-Fock approximation, random phase approximation, finite temperature formalism, hadrons. Prerequisite: PHY 6675.

PHY 6716 Advanced Biophysics (3). Thermodynamics, statistical physics, and the non-linear dynamics of self-organization will be used to investigate the molecular origin of life and neural pattern formation leading to consciousness.

PHY 6935 Graduate Research Seminar (1). Seminars presented by students, faculty, and visitors on a variety of topics of current research interest. Repeatable. Required every semester. (F and S)

PHY 6936 Advanced Topics in Physics (3). Advanced applications in the fields of Nuclear and Particle Physics, Astrophysics, Solid State Physics, Biophysics and Atomic Physics. Includes perturbations theory, statistical methods, and simulation methods. Repeatable for credit. Prerequisite: PHY 6646.

PHY 6939 Graduate Research (1-10). Research at the graduate level in theoretical or experimental physics under faculty supervision, repeatable. Prerequisite: Permission from supervising faculty.

PHY 6970 Thesis Research (1-10). Research toward completion of Master's Thesis. Repeatable. Prerequisite: Permission of the department. (F,S)

PHY 6971 Master's Thesis (3). Theoretical and/or experimental research leading to thesis. Prerequisite: Permission of major professor. (F,S)

PHY 7910 Dissertation Research (1-9). Students conduct dissertation research at the doctoral level in theoretical or experimental physics under faculty supervision. Prerequisite: Permission of the instructor. (F, S)

PHY 7981 Ph.D. Dissertation (1-12). Original research work towards completion of dissertation and presentation and defense of dissertation. Prerequisite: Permission of Major Professor and Doctoral Candidacy.

PHZ 5130 Theoretical Treatment of Experimental Data (3). Statistical analysis of physical processes and

statistical tests, with particular emphasis on instrumentation-related problems. Mathematical modeling and computer simulation. Prerequisites: Undergraduate statistics course, or equivalent, or permission of the instructor.

PHZ 5155C Physics Modeling I (4). An inquiry physics-teaching approach incorporating physics education research. Emphasis on basics models in mechanics, scientific discourse, and student learning assessment. May be repeated for credit. Prerequisite: Permission of the instructor.

PHZ 5156 Computational Physics I (3). Physical systems by means of computer simulation. Monte Carlo, molecular dynamics, percolation, random systems, chaos, criticality, gauge fields. Prerequisites: PHY 5115 and PHY 5116.

PHZ 5157C Computational Physics II (3). Advanced computer simulation methods of physical systems. Application in chaos, nonlinear and random systems, criticality, field theory and practices. Prerequisite: PHZ 5156. Corequisites: PHY 5115 and PHY 5116.

PHZ 5234 Atomic and Molecular Collision Phenomena (3). Investigation of atomic and molecular collision phenomena: Kinetic theory, elastic scattering, inelastic scattering, excitation and ionization, heavy particle collisions. Prerequisites: PHY 4605 and PHY 4222. (F or S)

PHZ 5304 Advanced Nuclear Physics (3). The fundamental properties of nuclei, nuclear forces, nuclear models, radioactivity, weak processes, and nuclear reactions. Prerequisite: PHY 4604. Corequisite: PHY 4605. (F or S)

PHZ 5340 Particle Interactions and Detection (3). Subatomic particle detectors and the utilization of physics in practical instrumentation applications in medical physics. The course will include laboratory exercises using various detectors. Prerequisites: PHY 3107 or permission of Instructor.

PHZ 5370 Nanoscience (3). Overview of the nanoscience with emphasis on physical properties, such as electrical, magnetic and optical properties, of nanomaterials. Prerequisites: PHY 3106, PHY 3107.

PHZ 5405 Solid State Physics (3). Crystalline form of solids, lattice dynamics, metals, insulators, semiconductors, crystalline surfaces, and amorphous materials. Prerequisites: PHY 3107 or CHM 3411.

PHZ 5505 Low Energy Plasma Physics (3). The investigation of the kinetics of rarefied gases and thermal plasmas: Phase space, random currents, orbit theory, plasma sheaths, radiation, the pinch effect. Prerequisites: PHY 3503, PHY 4324, and PHY 4222.

PHZ 5506 Plasma Physics (3). An introduction to plasma fundamentals, the Boltzmann equation, the hydrodynamic equations, orbit theory, the interaction of electromagnetic waves with plasmas, the pinch effect and instabilities. Prerequisite: PHY 3049. (F or S)

PHZ 5606 Special Relativity (3). A detailed study of special relativity: Lorentz transformations, relativistic electrodynamics. Prerequisite: PHY 3107.

PHZ 5607 General Relativity (3). General relativity using differential geometry and tensor analysis. Topics include Einstein's field equations and their solutions, applications and observational tests. Black Holes and cosmology are also discussed. Prerequisites: PHY 4222 and PHY 4605.

PHZ 5705 Biomedical Physics (3). Physics principles applied to biology and medicine; transport through cell membranes, biochemical signaling, thermodynamics, neurons, biomechanics, biofluid flow, bioelectrical signals. Prerequisite: PHY 3107.

PHZ 5730 Biophysical Effects of Radiation (3). Biological effects resulting from interactions of radiation and matter for scientifically, technically, and medically oriented students. Prerequisite: PHY 3107.

PHZ 5732 Clinical and Medical Dosimetry (3). Practical patient dosimetry problems in radiation oncology. Irregular field calculations, two- and three-dimensional treatment planning, isodose distribution, dose rate brachytherapy planning. Prerequisite: PHY 3107.

PHZ 5734 Nuclear Medicine Physics (3). The nuclear physics principles of diagnostic and therapeutic applications of radionuclides, radiation beams, with lab activities in facility design, instrumentation essentials, quality assurance. Prerequisite: PHY 3107.

PHZ 5736 Therapeutic Radiological Physics (3). Production, application, and measurement of electromagnetic radiation and particle beams in therapeutic practice. Conceptual, instrumental, and methodological aspects of therapeutic radiology. Prerequisite: PHY 3107.

PHZ 5945 Clinical Experience in Medical Physics (3). Arranged through the Physics Department at local institutions e.g. hospitals, treatment centers, etc., this course places students in clinical medical physics facilities. Prerequisite: PHY 3107.

PHZ 6255 Molecular Biophysics (3). The use of theoretical physics techniques to investigate biological systems: Protein structure and dynamics, electron tunneling, nuclear tunneling, hemoglobin, photosynthesis, vision. Prerequisite: PHY 4605. (F or S)

PHZ 6326 Low Energy Nuclear Physics I (3). Introduction to the physics of nuclei and nuclear processes: Nuclear forces, scattering processes and nuclear models. Prerequisite: PHY 4605.

PHZ 6327 Low Energy Nuclear Physics II (3). Additional topics in nuclear physics: The shell and collective models, nuclear reactions and applications, scattering theory, entrance channel phenomena, rearrangement collision and breakup reactions. Prerequisite: PHZ 6326.

PHZ 6354 Introduction to Particle Physics (3). An introduction to modern particle theory: Elementary field theory, symmetries, quantum electrodynamics, quark-parton model, quantum chromodynamics, Weinberg-Salam model. Prerequisite: PHY 6646.

PHZ 6355 High Energy Hadronic Physics (3). Physics of quark-gluon structure of strongly interacting matter. Introduces the basic methods of high energy hadronic and nuclear physics, the quark model of hadrons, and the partonic model of deep-inelastic scattering. Prerequisite: Graduate standing.

PHZ 6359 Quantum Gauge Field Theories (3). Basics in field quantization, nonabelian symmetries, the standard $SU(3) \times SU(2) \times U(1)$ model, non-perturbative features, lattice regularization and numerical simulation. Prerequisites: PHY 4605, PHY 5346. (F or S)

PHZ 6396 Advanced Nuclear and Particle Physics (3). Nuclear and particle physics, nuclear forces, reactions and kinematics, deep inelastic scattering, partons QCD, nuclear and particle astrophysics, quark gluon plasma. Prerequisite: PHY 4604.

PHZ 6426 Advanced Solid State Physics (3). Electronic structures of solids and surfaces, electron-electron interaction, superconductivity, magnetism in solids, amorphous systems, glasses, polymers, percolation, localization, phase transition, fractals. Prerequisites: PHY 4324 and PHY 4605. (F or S)

PHZ 6437C Surface Physics (3). An introduction to theoretical and experimental techniques AES (Auger Electron Spectroscopy), LEED (Low Energy Electron Diffraction), XPS (X-ray Photoelectron Spectroscopy), AFM (Atomic Force Microscopy) and STM (Scanning Tunneling Microscopy). Prerequisites: PHZ 5405 or permission of the instructor.

PHZ 6706 Physics of Cognitive Neuroimaging Methods I (3). Physical principles of data acquisition methods in cognitive neuroimaging, including techniques from nuclear medicine, electrophysiology, and magnetic resonance imaging.

PHZ 6707 Physics of Cognitive Neuroimaging Methods II (3). Physical principles of data analysis methods in cognitive neuroimaging, including image pre-processing, statistical modeling, brain connectivity techniques, and the visualization, interpretation, and reporting of results. Prerequisite: PHZ 6706.

Master of Science in Cognitive Neuroscience

Admission Requirements*

Students will apply and be admitted directly to the doctoral program in Cognitive Neuroscience based on the following criteria (applications will not be accepted and students will not be admitted for a terminal M.S. degree):

To be admitted into the Cognitive Neuroscience doctoral program, a student must:

1. Hold a Bachelor's degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 average or higher during the last two years of the undergraduate program and submit Graduate Record Exam (GRE) scores.
3. Have completed an undergraduate or graduate research methods course as a prerequisite.
4. Arrange to have three letters of recommendation evaluating the applicant's potential for graduate work sent to the Psychology Graduate Program Director.
5. Send a brief essay stating reasons for interest in the program and career goals to the Psychology Graduate Secretary.
6. Receive approval from the Departmental Graduate Education Committee.
7. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 92 on the iBT TOEFL (equivalent to 580 in the TOEFL) is required.

*These are minimum requirements. Admission is competitive.

Degree Requirements

The M.S. in Cognitive Neuroscience requires a minimum of 36 semester credits of graduate work beyond the baccalaureate, including a master's project based upon the student's original research. A maximum of 6 credits of post-baccalaureate course work may be transferred from another institution with the approval of the program director. M.S. in Cognitive Neuroscience students are required to complete the following minimum requirements. The remaining credits to complete the post-baccalaureate 36-credit requirement can be drawn from supervised

research, directed individual study, electives, or the PSY 5938 Current Topics in Neuroscience Series.

1. **Common core courses in Statistics/Methodology** (Minimum 9 credits)
Students must take all three of the following 3-credit courses or a course approved by the program director:
 - PSY 5939 Special Topics in Psychology (Quantitative Methods I)
 - PSY 5939 Special Topics in Psychology (Quantitative Methods II)
 - PSY 5246C Multivariate Analysis in Applied Psychological Research
2. **Cognitive Neuroscience (CN) Content Courses** (Minimum 6 credits)
Students must take 2 courses drawn from the following 3-credit courses or a course approved by the program director:
 - DEP 5058 Biological Basis of Behavior Development
 - EXP 5667 Cognitive Neuroscience
 - EXP 5508 Applied Cognitive Psychology
 - EXP 5527 Memory and Consciousness
 - PSB 6247 Biological Bases of Behavior
 - PSB 6215 Human Neuroanatomy
 - CBH 5256 Animal Cognition
 - CLP 6426 Neuropsychology
 - PSB 6350 Cognitive Neuroimaging Methods I
 - PSB 6351 Cognitive Neuroimaging Methods II
 - PSB 5115 Introduction to Psychophysiology: Basics of Electroencephalography and Event-Related Potentials
 - PSB 6035 Introduction to Computational Cognitive Neuroscience
 - PSB 5247 Neurobiology of Learning and Memory
3. **Electives** (Minimum 3 credits approved by the program director)
 - Students may choose electives from the list of content courses provided above or identify electives outside of the department based on their research interest.
4. **Current Topics** (Variable Credits)
 - Students must take PSY 5938 Current Topics in Neuroscience Series (0-1) every Fall and Spring while enrolled in the Doctoral Program.
5. **Master's Project** (6 Credits PSY 5918 Supervised Research)

Master of Science in Psychology: Major in Behavior Analysis

The Behavior Analysis area focuses on the experimental, theoretical, methodological, and applied analysis of behaviors of individuals, their antecedents and their consequences, and how the changes are produced that denote different types of learning or learning problems. The processes at issue have become efficient bases for understanding, and for changing, conduct problems and such behavioral disorders as are termed Autism Spectrum Disorder. Students completing the M.S. degree, and

having received the required amount of supervised hands-on experience with clients, may qualify to sit for the Board Certified Behavior Analyst (BCBA) examination.

The Behavior Analysis major consists of core, knowledge-based, courses and a selection of seminars for specialization and practical experience. Student research collaboration and idea sharing are often an intended byproduct of such courses. Activity in individual or partnered research projects is encouraged. Also encouraged are involvements in program events, regional and national conference attendance and presentations, and applied clerkships and internships. There are opportunities for students to gain firsthand experience in practice and internships with organizations providing applications and therapy.

Admission Requirements*

To be admitted into the Master's degree program in Behavior Analysis, a student must:

1. Hold a Bachelor's degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 average or higher during the last two years of the undergraduate program and submit Graduate Record Exam (GRE) scores.
3. Arrange to have three letters of recommendation evaluating the applicant's potential for graduate work sent to the Psychology Graduate Program Director.
4. Send a brief essay stating reasons for interest in the program and career goals to the Psychology Graduate Secretary.
5. Receive approval from the Departmental Graduate Education Committee.

**These are minimum requirements. Admission is competitive.*

Degree Requirements

The Master of Science in Behavior Analysis requires a minimum of 45 semester credits of graduate work beyond the baccalaureate. A maximum of 6 credits of post-baccalaureate course work may be transferred from another institution with the approval of the Advisory Committee.

Required Courses

The Master's requires 45 credit hours beyond the Bachelor's degree. This includes 6 credits of departmental common core requirements for the M.S. degree. Students complete practical experience and an applied research project.

1. Common core (statistics/methodology) courses (6 credits)
2. Behavior analysis content courses (21 credits drawn from the following list of 3 credit courses, and approved by the program director):

EAB 5098	Proseminar in the Experimental Analysis of Behavior
EAB 5701	Functional Behavior Assessment
EAB 5797	Single-Case Research Methods
EAB 6005	Foundations of Applied Behavior Analysis
EAB 6717	Applications of Behavior Analysis to Autism Spectrum Disorder
EAB 5700	Introduction to the Concepts and Principles of Applied Behavior Analysis
EAB 6780	Ethical Code in Behavior Analysis

- PSY 5939 Special Topics
 3. Supervised research (9 credits)
 4. EAB 6941 Practicum in Behavior Analysis (9 credits)

Master of Science in Psychology: Major in Clinical Science in Child and Adolescent Psychology

The clinical science in child and adolescent psychology major is consistent with the clinical science model of clinical psychology training articulated by the Academy of Psychological Clinical Science. Clinical Science is defined as a "psychological science directed at the promotion of adaptive functioning; at the assessment, understanding, amelioration, and prevention of human problems in behavior, affect, cognition or health; and at the application of knowledge in ways consistent with scientific evidence." The emphasis on the term "science" underscores the commitment to evidence based approaches to the assessment and treatment of human problems, as well as the integration of research and theory of other relevant sciences. The emphasis on the term "science" also underscores that training students in clinical science focuses on training students for careers in which they skillfully produce, and/or apply scientific knowledge. The focus of the major is on child, adolescent and family clinical psychology within a multicultural context.

Admission Requirements*

Students will apply and be admitted directly to the doctoral program in Clinical Science in Child and Adolescent Psychology based on the following criteria (applications will not be accepted and students will not be admitted for a terminal M.S. degree).

1. Hold a Bachelor's degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 GPA or higher during the last two years of the undergraduate program and a combined score (verbal and quantitative) of 1120 or higher on the Graduate Record Exam.
3. Arrange to have three letters of recommendation evaluating the applicant's potential for graduate work sent to the Psychology Graduate Program Director.
4. Receive approval from the Department Graduate Education Committee.

**These are minimum requirements. Admission is competitive.*

Degree Requirements

The Master of Science Major in Clinical Science requires a minimum of 36 semester credits of graduate work beyond the baccalaureate, including a non-thesis research project based upon the student's original research. A maximum of 6 credits of post-baccalaureate course work may be transferred from another institution with the approval of the Director of Clinical Training.

Required Courses

In order to obtain their M.S., clinical science doctoral students will be required to complete 6 credits of departmental common core course requirements, along with more specialized content courses and a course involving directed independent effort, as listed below:

1. Common core requirements (6 credits of statistics/methodology courses)
 PSY 5939 Special Topics in Psychology: Quantitative Methods I
 PSY 5939 Special Topics in Psychology: Quantitative Methods II
2. Clinical Science core courses (9 credits)
 CLP 5007 Psychological Clinical Science I: Historical Perspectives and Current Controversies
 CLP 5483 Psychological Clinical Science II: Ecologies of Development and Theories of Psychopathology
 PSY 6219 Research Methods in Clinical Child Psychology
3. Clinical Science content courses (9 credits)
 CLP 6471 Assessment and Treatment I: Internalizing Problems
 CLP 6472 Assessment and Treatment II: Externalizing Problems
 PSY 5246C Multivariate Analysis in Applied Psychological Research
4. PSY 5918 Supervised Research (6 credits)
5. CLP 6945 Clinical Practicum in Psychology (6 credits)
6. Non-thesis Master's Project consisting of an empirical paper based on the student's independent research, approved by the student's mentor and one additional reader, and submitted for publication

Master of Science in Psychology: Major in Counseling Psychology

The Counseling Psychology Masters major area is designed to prepare students for the independent and licensed professional practice of counseling and psychotherapy. The major offers students a solid foundation in counseling psychology that focuses on evidence-based practices in mental health counseling. Opportunities for specializing in a range of clinical problems and diverse populations are offered through faculty guided and clinical training in the FIU Center for Children & Families and supervised clinical experience in community-based clinical settings.

Completion of the major requirements leads to a Master of Science in Psychology and eligibility for a license to practice as a Mental Health Counselor (LMHC) in Florida. The core curriculum is intended to engage students in the advanced study of psychology with a focus on developing applied counseling for working in multicultural environments with populations that range across the life span from childhood to later adulthood.

Admission Requirements*

To be admitted into the Master's degree program in Counseling Psychology, a student must:

1. Hold a Bachelor's degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 average or higher during the last two years of the undergraduate program and submit Graduate Record Exam (GRE) scores.
3. Arrange to have three letters of recommendation evaluating the applicant's potential for graduate work sent to the Psychology Graduate Program Director.

4. Send a brief essay stating reasons for interest in the program and career goals to the Psychology Graduate Secretary.
5. Receive approval from the Departmental Graduate Education Committee.

**These are minimum requirements. Admission is competitive.*

Degree Requirements

The Master of Science in Counseling Psychology requires a minimum of 60 semester credits of graduate work beyond the baccalaureate. A maximum of 6 credits of post-baccalaureate course work may be transferred from another institution with the approval of the Advisory Committee.

Required Courses

The Counseling Psychology curriculum consists of 60 credit hours of graduate study, as required for licensure as a mental health counselor by the Florida Board of Clinical Social Work, Marriage & Family Therapy, and Mental Health Counseling that includes coursework, clinical training, and a passing score on the Counselor Preparation Comprehensive Examination (CPCE).

1. Common core (statistics/methodology/assessment) courses (9 credits)
2. Counseling Psychology content courses (36 credits drawn from the following list of 3 credit courses and approved by the program director):

CLP 5166	Advanced Abnormal Psychology (Advanced Psychopathology)
CLP 5931	Ethical Code in Psychological Practices
CLP 6436	Introduction to Psychological Assessment
CLP 6498	Diagnosis and Treatment of Sexual Disorders
CYP 5534	Groups as Agents of Change
CYP 6526	Psychological Methods of Program Evaluation and Research
CYP 6536	Principles and Methods of Psychological Consultation
CYP 6766	The Psychology of Cross Cultural Sensitization
CYP 6936	Current Issues in Community Psychology
DEP 5069	Applied Life Span Developmental Psychology
PCO 5311	Theory, Research, and Treatment of Addictive Behavior
PCO 6206	Principles and Practices of Counseling and Psychotherapy
PSY 5939	Special Topics
CLP 6449	Career Development in Adolescence & Adulthood
PCO 5251	Couple & Family Systems

3. Supervised clinical practicum/internship courses (15 credits)
4. Passing score on the Counselor Preparation Comprehensive Examination.

Master of Science in Psychology: Major in Developmental Science

Developmental science is concerned with the description and explanation of change over time in humans and other

organisms. The Developmental Science area integrates a life-span orientation toward developmental science in an international and interdisciplinary multicultural urban context. Students majoring in the area complete core course requirements designed to facilitate a thorough grounding in research, theory, and methods across the lifespan, develop an area of specialization within or across the lifespan, and receive training in both basic and applied research in developmental science. Students have the opportunity to specialize in any phase of the lifespan or on any issues or topics that span phases of the lifespan and to focus on basic or applied research.

Admission Requirements*

Students will apply and be admitted directly to the doctoral program in Developmental Science based on the following criteria (applications will not be accepted and students will not be admitted for a terminal MS degree):

1. Hold a Bachelor's degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 average or higher during the last two years of the undergraduate program and submit Graduate Record Exam (GRE) scores.
3. Have completed an undergraduate or graduate research methods course as a prerequisite.
4. Arrange to have three letters of recommendation evaluating the applicant's potential for graduate work sent to the Psychology Graduate Program Director.
5. Send a brief essay stating reasons for interest in the program and career goals to the Psychology Graduate Secretary.
6. Receive approval from the Departmental Graduate Education Committee.
7. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). A total score of 92 on the iBT TOEFL (equivalent to 580 in the TOEFL) is required.

**These are minimum requirements. Admission is competitive.*

Degree Requirements

The Master of Science in Developmental Science requires a minimum of 36 semester credits of graduate work beyond the baccalaureate, including a master's project based upon the student's original research. A maximum of 6 credits of post-baccalaureate course work may be transferred from another institution with the approval of the student's advisor.

Required Courses

Developmental Science MS students would be required to complete the 9 credits of departmental common core course requirements, along with more specialized content and breadth courses and a course involving supervised research, as listed below:

1. Common core courses (9 credits comprised of following Statistics/Methodology courses or other courses approved by the program director)

PSY 5939	Special Topics in Psychology: Quantitative Methods I
PSY 5939	Special Topics in Psychology: Quantitative Methods II

- PSY 5246C Multivariate Analysis in Applied Psychological Research
2. Developmental Science Theory and Methods Requirement (9 credits comprised of the following 3 credit courses):
- DEP 5608 Theoretical Perspectives in Developmental Psychology
- DEP 5796 Developmental Methods
- PSY 5605 History & Systems
3. Developmental Science Breadth Requirement (3 credits drawn from the following list of 3 credit courses, or other courses approved by the program director):
- DEP 5099 Proseminar in Infancy, Childhood and Adolescence
- DEP 5405 Proseminar in the Psychology of Adulthood and Aging
- DEP 5936 Integrating Theory and Research in Developmental Science.
4. Biological Breadth Requirement (3 credits drawn from the following list of 3 credit courses, or other courses approved by the program director):
- DEP 5058 Bio-Behavioral Development
- EXP 5667 Cognitive Neuroscience
5. Cognitive Breadth Requirement (3 credits drawn from the following list of 3 credit courses, or other courses approved by the program director):
- DEP 5065 Cognitive Development
- DEP 6645 Cognition and Language
6. Social Breadth Requirement (3 credits drawn from the following list of 3 credit courses, or other courses approved by the program director)
- DEP 5275 Seminar in Psychosocial Development
- DEP 7096 Seminar in Psychology of Life-Span Social Development
- SOP 5058 Proseminar in Social Psychology
7. Master's Project (6 credits of supervised research)

Master of Science in Psychology: Major in Industrial-Organizational Psychology

The Industrial Organizational (I/O) Psychology major focuses on issues such as the psychology of Human Resource Management, Group Behavior, Cultural Diversity in Organizations, Personality, Team Effectiveness, Personnel Selection, Leadership, Organizational Stress, and Training and Development. The major emphasizes a commitment both to research and application as a part of individual specialty area development. Students master a series of core courses designed to provide a thorough grounding in theory, methodology, and content in applied and basic research in psychology. These courses are taught by faculty who are involved in research and practice in the relevant areas.

In addition, seminars reflecting the specialized foci of the Industrial-Organizational area faculty are offered. There are also opportunities for practice and occasional internships for students to gain firsthand experience in the application of psychological knowledge to real challenges of organizations. Students are also encouraged to participate in professional conferences.

Admission Requirements*

To be admitted into the Master's degree program in I/O Psychology, a student must:

1. Hold a Bachelor's degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 average or higher during the last two years of the undergraduate program and submit Graduate Record Exam (GRE) scores.
3. Arrange to have three letters of recommendation evaluating the applicant's potential for graduate work sent to the Psychology Graduate Program Director.
4. Send a brief essay stating reasons for interest in the program and career goals to the Psychology Graduate Secretary.
5. Receive approval from the Departmental Graduate Education Committee.

**These are minimum requirements. Admission is competitive.*

Degree Requirements

The Master of Science in Industrial and Organizational Psychology requires a minimum of 36 semester credits of graduate work beyond the baccalaureate. A maximum of 6 credits of post-baccalaureate course work may be transferred from another institution with the approval of the Advisory Committee.

Required Courses

The Master's in I/O Psychology requires 36 credit hours beyond the Bachelor's degree. This includes 6 credits of departmental common core requirements for the M.S. degree. Students have the option of following either a thesis or a non-thesis option. Students planning to apply to a doctoral program must elect the thesis option.

1. Common core (statistics/methodology) courses plus an additional statistics/methods course (9 credits)
2. I/O content courses (12 credits drawn from the following 3 credit courses and approved by the program director):
 - INP 5095 Proseminar in Industrial Psychology
 - INP 5136 Psychology of Legal Consultation
 - INP 6090 Applied Psychology and Organizational Consulting
 - INP 6115 Psychology of Culture and Organizations
 - INP 6216 Personnel Selection
 - INP 6235 Applied Psychology of Training and Development
 - INP 6611 Organizational Stress
 - INP 6940 Strategies and Methods of Applied Psychological Research
 - PSY 5939 Special Topics
 - SOP 5058 Proseminar in Social Psychology
 - SOP 5616 Social Psychology of Organizations
3. Supervised research/internship (3 credits)
4. Electives (6 credits)
5. PSY 6971 Masters thesis (thesis option) or additional content courses (non-thesis option) (6 credits)

Master of Science in Psychology: Major in Legal Psychology

Legal psychology is a growing and popular field that sits at the nexus of psychology and law. This program offers students broad training in psychology and in-depth training in legal psychology as well as more traditional concentrations (e.g., social psychology, cognitive psychology). Research, professional, and pedagogical

skills are strongly emphasized. Students may also obtain significant field experience in the legal system by participating in applied research, expert witness cases, providing assistance to trial consultants, and through other formal training experiences, such as collaborations with FIU's law school.

Admission Requirements*

Students will apply to be admitted directly to the doctoral program in Legal Psychology based on the following criteria (applications will not be accepted and students will not be admitted for a terminal degree).

1. Hold a Bachelor's degree in a relevant discipline from an accredited college of university.
2. Have strong GPA during their undergraduate program and strong scores on the Graduate Record Exam.
3. Arrange to have three letters of recommendation evaluating the applicant's potential for graduate work sent to the Psychology Graduate Program Director.
4. Receive approval from the Departmental Graduate Education Committee.

**These are minimum requirements. Admission is competitive.*

Degree Requirements

The Master of Science Major in Legal Psychology requires a minimum of 36 semester credits of graduate work beyond the baccalaureate, including a thesis research project based upon the student's original research. 9 credits of common core requirements are included in these requirements in order to meet the Board of Governors' Policy on degree structures.

Required Courses

In order to obtain their M.S., Legal Psychology doctoral students will be required to complete 36 credit-hours of coursework, as listed below:

1. Common core requirements (9 credits of statistics/methodology courses)
2. Applied Legal Psychology core courses (9 credits from the following)

PSY 5939	Special Topics in Psychology: Eyewitness Psychology
PSY 5939	Special Topics in Psychology: Developmental Psychology and the Law
SOP 6098	Proseminar in Legal Psychology
PSY 5939	Special Topics in Psychology: Interrogation and Deception
PSY 5939	Special Topics in Psychology: Child Witnesses
PSY 5939	Special Topics in Psychology: Investigative Interviewing
PSY 5939	Special Topics in Psychology: Actual Innocence
3. Basic Psychology courses (9 credits from the following)

SOP 5058	Proseminar in Social Psychology
SOP 6441	Seminar in Social Cognition
EXP 5099	Pro-seminar in Experimental Psychology
EXP 5508	Applied Cognitive Psychology

 Dev courses as relevant to students' research interests and approved by legal psychology faculty
4. PSY 5918 Supervised Research (9 credits), culminating in a Master's Project consisting of an

empirical paper based on the student's independent research, approved by the student's mentor and at least two additional readers.

Master of Science in Psychology: Organizational Sciences

Organizational Sciences focus on the cognitive, social and behavioral bases of employee motivation and behavior, and using that knowledge to design effective systems to enhance productivity. By providing a rigorous foundation in theory, research methods, and the practice of I/O psychology, this program prepares students for advanced study in psychology as well as training practitioners and researchers who can function in a wide variety of applied settings. Students are trained to utilize and apply principals of I/O Psychology to issues of critical relevance to organizations including: 1) recruitment, assessment, and personnel selection; 2) training needs assessments and design; 3) performance measurement and talent management; 4) workplace health promotion 5) employee satisfaction, morale, and work-life balance; and 6) team and group dynamics.

Admission Requirements*

Admissions will be based on the following criteria:

1. Hold a Bachelor's degree in a relevant discipline from an accredited college or university
2. Have a 3.0 average or higher during the last two years of the undergraduate program and submit Graduate Record Exam (GRE) scores
3. Arrange to have three letters of recommendation evaluating the applicant's potential for graduate work sent to the Program Director
4. Send a brief essay stating reasons for interest in the program and career goals to the program director
5. International graduate student applicants whose native language is not English are required to submit a score for the Teof English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 92 on the iBT TOEFL (equivalent to 580 in the TOEFL) is required.

**These are minimum requirements. Admission is competitive.*

Degree Requirements

The Master of Science in Organizational Sciences requires 36 semester credits of coursework at the graduate level and includes a terminal project focused on a workplace issue.

Required Courses

Students will complete 6 credits of coursework based on departmental core course requirements:

- | | |
|----------|--------------------------------------|
| PSY 5939 | Quantitative Methods in Psychology I |
| SOP 5058 | Proseminar in Social Psychology |

Students will also complete the following 30 credits of content courses:

- | | |
|----------|--|
| INP 5095 | Pro Seminar in Industrial Psychology |
| SOP 5616 | Social Psychology of Organizations |
| INP 6216 | Personnel Selection |
| INP 6235 | Applied Psychology of Training and Development |

INP 6611	Organizational Stress
INP 6940	Strategies and Methods of Applied Psychological Research
INP 6115	Psychology of Culture and Organizations
INP 6090	Applied Psychology and Organizational Consulting
PSY 5908	Directed Individual Study

Doctor of Philosophy in Cognitive Neuroscience

This program will train students to become experts in the study of the neuroscience of cognition and behavior. The program has a central focus in training of scholars and professors of Cognitive Neuroscience, which is a rapidly growing research area in Psychology. Thus, the primary goal of the program is to equip students with the skills necessary to function as academic and/or research scientists. As such, the program provides a rigorous, broad-based graduate education with an emphasis on topic-specific skills in neuroscience research methodology and data analysis; cognitive, developmental, and behavioral neuroscience; learning and memory; and neuropsychological disorders, combined with broader STEM-related skills.

Students benefit from the diversity of faculty's areas of interest and expertise that converge to provide a well-rounded training program in cognitive neuroscience. Hands-on research experience is an essential part of the training, and students become involved in research at an early point in their graduate training by participating in faculty research projects and by carrying out individual research under the guidance of one or several faculty members. Students will receive guidance in every aspect of conducting research, including developing ideas, designing and conducting studies, and dissemination, presenting papers at national conferences and publishing papers in scientific journals. In addition, we emphasize the students' development in grant writing skills, a necessary component of a successful research career.

Admission Requirements*

To be admitted into the Cognitive Neuroscience doctoral program, a student must:

1. Hold a Bachelor's degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 average or higher during the last two years of the undergraduate program and submit Graduate Record Exam (GRE) scores.
3. Have completed an undergraduate or graduate research methods course as a prerequisite.
4. Arrange to have three letters of recommendation evaluating the applicant's potential for graduate work sent to the Psychology Graduate Program Director.
5. Send a brief essay stating reasons for interest in the program and career goals to the Psychology Graduate Secretary.
6. Receive approval from the Departmental Graduate Education Committee.
7. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System

(IELTS). A total score of 92 on the iBT TOEFL (equivalent to 580 in the TOEFL) is required.

*These are minimum requirements. Admission is competitive.

Degree Requirements

The Ph.D. in Cognitive Neuroscience requires a minimum of 75 semester credits of graduate work beyond the baccalaureate, including a master's project and a dissertation based on the student's original research. A maximum of 36 credits may be transferred from a completed master's degree program with the approval of the program director. Cognitive Neuroscience doctoral students are required to complete the following minimum requirements. The remaining credits to complete the post-baccalaureate 75-credit requirement can be drawn from supervised research, directed individual study, dissertation research, electives, or the PSY 5938 Current Topics in Neuroscience Series.

1. Common core courses in Statistics/Methodology (Minimum 9 credits)

Students must take all three of the following 3-credit courses or a course approved by the program director:

- PSY 5939 Special Topics in Psychology (Quantitative Methods I)
- PSY 5939 Special Topics in Psychology (Quantitative Methods II)
- PSY 5246C Multivariate Analysis in Applied Psychological Research

2. Cognitive Neuroscience Content Courses (Minimum 6 credits)

Students must take 2 courses drawn from the following 3-credit courses or a course approved by the program director:

- DEP 5058 Biological Basis of Behavior Development
- EXP 5667 Cognitive Neuroscience
- EXP 5508 Applied Cognitive Psychology
- EXP 5527 Memory and Consciousness
- PSB 6247 Biological Bases of Behavior
- PSB 6215 Human Neuroanatomy
- CBH 5256 Animal Cognition
- CLP 6426 Neuropsychology
- PSB 6350 Cognitive Neuroimaging Methods I
- PSB 6351 Cognitive Neuroimaging Methods II
- PSB 5115 Introduction to Psychophysiology: Basics of Electroencephalography and Event-Related Potentials
- PSB 6035 Introduction to Computational Cognitive Neuroscience
- PSB 5247 Neurobiology of Learning and Memory

3. Electives (Minimum 3 credits approved by the program director)

- Students may choose electives from the list of content courses provided above or identify electives outside of the department based on their research interest.

4. Current Topics (Variable Credits)

- Students must take PSY 5938 Current Topics in Neuroscience Series (0-1) every

- Fall and Spring while enrolled in the Doctoral Program.
5. **Master's Project** (6 Credits PSY 5918 Supervised Research)
 6. **Supervised research** (Variable Credits)
 - PSY 5918 Supervised Research (VAR)
 7. **Comprehensive exam**
 8. **PSY 7980 Ph.D. Dissertation** (Minimum 15 credits)

Doctor of Philosophy in Psychology: Major in Clinical Science in Child and Adolescent Psychology

The clinical science in child and adolescent psychology major is consistent with the training model articulated by the Academy of Psychological Clinical Science. Clinical Science is defined as a "psychological science directed at the promotion of adaptive functioning; at the assessment, understanding, amelioration, and prevention of human problems in behavior, affect, cognition or health; and at the application of knowledge in ways consistent with scientific evidence." Emphasis on the term "science" underscores the commitment to evidence based approaches to the assessment and treatment of child and adolescent problems, as well as the integration of research and theory of other relevant sciences. Emphasis on the term "science" also underscores that training facilities careers in which scientific knowledge is skillfully produce, applied, or both. The focus of the clinical science major is on child, adolescent and family clinical psychology within a multicultural context.

Students admitted to the major are expected to maintain full-time status and to become involved in research from the onset of their entry into the program by participating in faculty research projects and by carrying out individual research under the guidance of one or several faculty members. Students also are guided and encouraged to publish their individual research projects, to seek their own external funding to help support their research, and to present their work at professional conferences. Students receive clinical and teaching opportunities as part of their graduate training, within the context of continued student advancement as clinical scientists in child and adolescent psychology.

Admission Requirements*

To be admitted into the Clinical Science doctoral program, a student must:

1. Hold a Bachelor's or Master's degree in psychology from an accredited college or university or submit Graduate Record Exam - Psychology Subject Test Score.
2. Have a 3.0 average or higher GPA during the last two years of the undergraduate program, or, for students with a terminal Master's degree in psychology, have a minimum 3.5 average or higher GPA.
3. Have a minimum Total GRE score=300
4. Arrange for their application to the University Graduate School to be accompanied by three letters of recommendation evaluating potential for graduate work.
5. Include with their application to the University Graduate School a brief personal statement outlining their experiences, reasons for interest in doctoral

training in psychological clinical science, and career goals.

6. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 92 on the iBT TOEFL (equivalent to 580 in the TOEFL) is required.

Admission into the Clinical Science Doctoral Program in Child and Adolescent Psychology is competitive. Successful applications have significant research experience and strong letters of recommendation. Enrolled students evidenced interest in psychological clinical science by clear articulation (in personal statement and interviews) of research questions, a desire for a clinical science career, strong record of academic achievement, and professional accomplishment described in personal statement and recommendations from past mentors.

Degree Requirements

The Ph.D. in Psychology requires a minimum of 75 semester credits of graduate work beyond the baccalaureate, including a dissertation based on the student's original research. The Major in Clinical Science in Child and Adolescent Psychology requires an additional 15 credits of clinical practicum (90 credits total) and a year-long internship. We adhere to the UGS policy regarding credit transfer toward a doctoral degree. However, it is policy of the Clinical Science Program to require all students to participate in the core clinical science courses. Students may apply to transfer credits for courses that overlap substantively in learning objectives and content with core analytic courses or breadth requirements. Research and practicum credits may be considered for transfer as well.

Required Courses

Clinical Science students are required to complete the 9 credits of departmental core course requirements established across majors in the Department, along with more specialized content courses, clinical practicum, and courses involving directed independent effort, as listed below, for a total of 90 credits:

1. Common core courses (9 credits comprised of the following Statistics/Methodology courses or other courses approved by the major area director):

PSY 5939	Special Topics in Psychology: Quantitative Methods I
PSY 5939	Special Topics in Psychology: Quantitative Methods II
PSY 5246C	Multivariate Analysis in Applied Psychological Research
2. Clinical science content courses (24 credits comprised of the following 3 credit courses):

CLP 5007	Psychological Clinical Science I: Historical Perspectives and Current Controversies
CLP 5483	Psychological Clinical Science II: Ecologies of Development and Theories of Psychopathology
PSY 6219	Research Methods in Clinical Child Psychology
PSY 5605	Proseminar: History and Systems of Psychology

- CLP 6471 Assessment and Treatment I: Internalizing Problems
- CLP 6472 Assessment and Treatment II: Externalizing Problems
- CLP 6473 Assessment and Treatment III: Developmental, Learning and Pediatric Disorders
- CLP 6530 Dissemination and Implementation of Research
3. Breadth Requirements [9 credits drawn from the following list of 3 credit courses, or other courses approved by the major area director, to fulfill training in Biological Aspects of Behavior (3 credits); Cognitive and Affective Aspects of Behavior (3 credits); and Social Aspects of Behavior (3 credits)]:
- CLP 6426 Neuropsychology
- DEP 5058 Biological Basis of Behavior Development
- DEP 5065 Cognitive Development
- EXP 5667 Cognitive Neuroscience
- SOP 5058 Proseminar in Social Psychology
4. Advanced Analytic Requirement (3 credits drawn from the following list of 3 credit courses or other courses approved by the major area director):
- PSY 5939 Special Topics in Psychology: Structural Equation Modeling
- PSY 5939 Special Topics in Psychology: Categorical Data Analysis
- PHC 6056 Longitudinal Health Data Analysis
- PHC 6062 Systematic Reviews and Meta-Analysis
5. Electives (3 credits drawn from courses within or outside of the department, approved by the major area director, to facilitate depth of independent research)
6. Supervised Clinical Training (minimum 500 hours, 15 credits) comprised of the following:
- CLP 6432 Foundation Practicum I: Assessment
- CLP 6947 Foundations Practicum II: Treatment
- CLP 6943 Advanced Clinical Practicum (9 credits)
7. PSY 5918 Supervised Research (12 credits)
8. Master's Project submitted for publication
9. Comprehensive Examination comprises a dissertation grant application and candidacy manuscript submitted for publication
10. PSY 7980 Ph.D. Dissertation (15 credits)
11. Internship (CLP 6948 Clinical Internship)

Master of Science in Psychology: Major in Cognitive Neuroscience

Admission Requirements

Students will apply and be admitted directly to the doctoral program in Cognitive Neuroscience based on the following criteria (applications will not be accepted and students will not be admitted for a terminal M.S. degree):

1. Hold a Bachelor's degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 average or higher during the last two years of the undergraduate program and submit Graduate Record Exam (GRE) scores.
3. Arrange to have three letters of recommendation evaluating the applicant's potential for graduate work sent to the Psychology Graduate Program Director.

4. Send a brief essay stating reasons for interest in the program and career goals to the Psychology Graduate Secretary.
5. Receive approval from the Departmental Graduate Education Committee.
6. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 92 on the iBT TOEFL (equivalent to 580 in the TOEFL) is required.

*These are minimum requirements. Admission is competitive.

Degree Requirements

The M.S. in Cognitive Neuroscience requires a minimum of 36 semester credits of graduate work beyond the baccalaureate, including a master's project based upon the student's original research. A maximum of 6 credits of post-baccalaureate course work may be transferred from another institution with the approval of the student's advisor.

Required Courses

Cognitive Neuroscience Master's students are required to complete 6 credits of departmental core course requirements established across majors in the Department, along with specialized content courses and courses involving directed independent effort, as listed below:

- (a) Common core courses (6 credits)
Statistics/Methodology courses (6 credits minimum)
- (b) Cognitive Neuroscience Content Courses (15 credits drawn from the following 3 credit courses and approved by the major area director):
 - DEP 5058 Bio-Behavioral Development
 - EXP 5667 Cognitive Neuroscience
 - EXP 5508 Applied Cognitive Psychology
 - EXP 5527 Memory and Consciousness
 - ZOO 5785 Advanced Neurobiology

or

 - PSB 6247 Biological Bases of Behavior
 - PSB 6215 Human Neuroanatomy
 - PSB 5256 Animal Cognition
 - CLP 6426 Neuropsychology
 - PSB 6350/PHZ 6706 Cognitive Neuroimaging Methods
 - PSB6351/PHZ 6707 Cognitive Neuroimaging Methods II
- (c) Supervised research/independent study/field experience/internship courses (6 credits)
- (d) Electives (9 credits approved by the major area director)
- (e) Master's Project (6 credits supervised research)

Doctor of Philosophy in Psychology: Major in Cognitive Neuroscience

This program will train students to become experts in the study of the neuroscience of cognition and behavior. Students will explore the neurobiology of cognition with developmental, cognitive, and clinical neuroscience researchers in the areas of sensorimotor behavior and perception, language, memory, executive function, and substance abuse. The faculty in the program employ

“under-the-skin” electrophysiological and functional imaging methodologies on humans, with a special emphasis on understanding typical and atypical development. The faculty also conduct research on birds and non-human primates. Students complete coursework in basic neuroscience, neuroanatomy, neuropsychology, and cognitive neuroscience, as well as a complement of courses in research methods, history, and systems, and statistics to complete their training as psychologists.

The program has a central focus in training of scholars and professors of cognitive neuroscience, which is a rapidly growing research area in Psychology. Thus, the primary goal of the program is to equip students with the skills necessary to function as academic and/or research psychologists. The program has a strong emphasis on learning basic neuroanatomy and physiology, cognitive neuroscience research methodologies and analytic skills, and neural bases of psychology and psychopathology. Students benefit from the diversity of faculty’s areas of interest and expertise that converge to provide a well-rounded training program in cognitive neuroscience.

Hands-on research experience is an essential part of the training, and students become involved in research at an early point in their graduate training by participating in faculty research projects and by carrying out individual research under the guidance of one or several faculty members. Students will receive guidance in every aspect of conducting research, including developing ideas, designing and conducting studies, and dissemination, presenting papers at national conferences and publishing papers in scientific journals. In addition, we emphasize the students development in grant writing skills, a necessary component of a successful research career.

Admission Requirements*

To be admitted into the Cognitive Neuroscience doctoral program, a student must:

1. Hold a Bachelor’s degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 average or higher during the last two years of the undergraduate program and submit Graduate Record Exam (GRE) scores.
3. Have completed an undergraduate or graduate research methods course as a prerequisite.
4. Arrange to have three letters of recommendation evaluating the applicant’s potential for graduate work sent to the Psychology Graduate Program Director.
5. Send a brief essay stating reasons for interest in the program and career goals to the Psychology Graduate Secretary.
6. Receive approval from the Departmental Graduate Education Committee.
7. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 92 on the iBT TOEFL (equivalent to 580 in the TOEFL) is required.

**These are minimum requirements. Admission is competitive.*

Degree Requirements

The Ph.D. in Psychology requires a minimum of 75 semester credits of graduate work beyond the

baccalaureate, including a master’s project and a dissertation based on the student’s original research. A maximum of 36 credits may be transferred from a completed master’s degree program with the approval of the program director.

Required Courses

Cognitive Neuroscience doctoral students are required to complete 9 credits of departmental core course requirements established across majors in the Department, along with more specialized content courses and courses involving directed independent effort, as listed below:

1. Common core courses (9 credits)
Statistics/Methodology courses (9 credits minimum)
2. Cognitive Neuroscience Content Courses (15 credits drawn from the following 3 credit courses and approved by the major area director):

DEP 5058	Biological Basis of Behavior Development
EXP 5667	Cognitive Neuroscience
EXP 5508	Applied Cognitive Psychology
EXP 5527	Memory and Consciousness
ZOO 5785	Advanced Neurobiology
or	
PSB 6247	Biological Bases of Behavior
PSB 6215	Human Neuroanatomy
CBH 5256	Animal Cognition
CLP 6426	Neuropsychology
PHZ 6706	Physics of Cognitive Neuroimaging Methods I
or	
PSB 6350	Cognitive Neuroimaging Methods I
PHZ 6707	Physics of Cognitive Neuroimaging Methods II
or	
PSB 6351	Cognitive Neuroimaging Methods II
PSB 5115	Introduction to Psychophysiology: Basics of Electroencephalography and Event-Related Potentials
PSB 6035	Introduction to Computational Cognitive Neuroscience
PSB 5247	Neurobiology of Learning and Memory
3. Supervised research/independent study/field experience/internship courses (18 credits)
4. Electives (12 credits approved by the major area director) Students may take PSY 5938 Current Topics in Neuroscience Series to meet elective credits, up to 6 credits.
5. Master’s Project (6 credits supervised research)
6. Comprehensive exam
7. PSY 7980 Ph.D. Dissertation (15 credits)

Doctor of Philosophy in Psychology: Major in Developmental Science

Developmental science is concerned with the description and explanation of change over time in humans and other organisms. The Developmental Science area integrates a life-span orientation toward developmental science in an international and interdisciplinary multicultural urban context. Students are expected to master a series of core course requirements designed to facilitate a thorough grounding in theory, methodology, and content in both basic and applied research in developmental science. A

number of seminars reflecting the specialized foci of the program are also offered. Students have the opportunity to specialize in any phase of the lifespan or on any issues or topics that span phases of the lifespan and to focus on basic or applied research.

Students admitted to the program are expected to maintain full-time status throughout their four years in the doctoral program and to become involved in research at an early point in their graduate training by participating in faculty research projects and by carrying out individual research under the guidance of one or several faculty members. Students are also guided and encouraged to publish their individual research projects and to present their work at professional conferences. They are provided opportunities for teaching as part of their graduate training.

Admission Requirements*

To be admitted into the Developmental Science doctoral program, a student must:

1. Hold a Bachelor's degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 average or higher during the last two years of the undergraduate program and submit Graduate Record Exam (GRE) scores.
3. Have completed an undergraduate or graduate research methods course as a prerequisite.
4. Arrange to have three letters of recommendation evaluating the applicant's potential for graduate work sent to the Psychology Graduate Program Director.
5. Send a brief essay stating reasons for interest in the program and career goals to the Psychology Graduate Secretary.
6. Receive approval from the Departmental Graduate Education Committee.
7. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 92 on the iBT TOEFL (equivalent to 580 in the TOEFL) is required.

*These are minimum requirements. Admission is competitive.

Degree Requirements

The Ph.D. in Psychology requires a minimum of 75 semester credits of graduate work beyond the baccalaureate, including a dissertation based on the student's original research. A maximum of 36 credits may be transferred from a completed masters degree program with the approval of the program director.

Required Courses

Developmental Science doctoral students are required to complete the 9 credits of departmental core course requirements established across majors in the Department, along with more specialized content courses and courses involving directed independent effort, as listed below:

1. Common core courses (9 credits comprised of the following Statistics/Methodology courses or other courses approved by the program director):
 PSY 5939 Special Topics in Psychology:
 Quantitative Methods I
 PSY 5939 Special Topics in Psychology

Quantitative Methods II

PSY 5246C Multivariate Analysis in Applied Psychological Research

2. Developmental science Theory and Methods Requirement (9 credits comprised of the following 3 credit courses):

DEP 5608 Theoretical Perspectives in Developmental Psychology

DEP 5796 Developmental Methods

PSY 5605 History & Systems

3. Development Science Breadth Requirement (3 credits drawn from the following list of 3 credit courses, or other courses approved by the program director):

DEP 5099 Proseminar in Infancy, Childhood, and Adolescence

DEP 5405 Proseminar in the Psychology of Adulthood and Aging

DEP 5936 Integrating theory and Research in Developmental Science

4. Biological Breadth Requirement (3 credits drawn from the following list of 3 credit courses, or other courses approved by the program director):

DEP 5058 Bio-Behavioral Development

EXP 5667 Cognitive Neuroscience

5. Cognitive Breadth Requirement (3 credits drawn from the following list of 3 credit courses, or other courses approved by the program director):

DEP 5065 Cognitive Development

DEP 6645 Cognition and Language

6. Social Breadth Requirement (3 credits drawn from the following list of 3 credit courses, or other courses approved by the program director):

DEP 5725 Seminar in Psychosocial Development

DEP 7096 Seminar in Psychology of Life-Span Social Development

SOP 5058 Proseminar in Social Psychology

7. Supervised research/independent study/field experience/internship courses 18 credits

8. Electives (6 credits approved by the program director)

9. Master's Project (6 credits of supervised research)

10. Comprehensive exam

11. PSY 7980 P.h.D. Dissertation (15 credits)

Doctor of Philosophy in Psychology: Major in Industrial-Organizational Psychology

The Industrial Organizational (I/O) Psychology major focuses on issues such as the psychology of Human Resource Management, Group Behavior, Cultural Diversity in Organizations, Personality, Team Effectiveness, Personnel Selection, Leadership, Organizational Stress, and Training and Development. Program requirements include core courses that provide a strong knowledge base and a selection of optional seminars that allows specialization and applied experience. Idea exchange and research collaboration among students are goals of many of these courses. These courses are taught by faculty who are involved in research and practice in the relevant areas.

In addition to master's and doctoral dissertation projects, activity in a variety of research projects is highly encouraged. Involvement with I/O program events, applied

internships, conference attendance and presentations is also encouraged.

Admission Requirements*

To be admitted into the I/O Psychology doctoral program, a student must:

1. Hold a Bachelor's degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 average or higher during the last two years of the undergraduate program submit Graduate Record Exam (GRE) scores.
3. Have completed an undergraduate or graduate research methods course as a prerequisite.
4. Arrange to have three letters of recommendation evaluating the applicant's potential for graduate work sent to the Psychology Graduate Program Director.
5. Send a brief essay stating reasons for interest in the program and career goals to the Psychology Graduate Secretary.
6. Receive approval from the Departmental Graduate Education Committee.
7. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 92 on the iBT TOEFL (equivalent to 580 in the TOEFL) is required.

**These are minimum requirements. Admission is competitive.*

Degree Requirements

The Ph.D. in Psychology requires a minimum of 75 semester credits of graduate work beyond the baccalaureate, including a dissertation based on the student's original research. A maximum of 36 credits may be transferred from a completed masters degree program with the approval of the Advisory Committee.

Required Courses

Industrial/Organizational Psychology doctoral students are required to complete the 9 credits of departmental core course requirements established across majors in the Department, along with more specialized content courses and courses involving directed independent effort, as listed below:

1. Common core courses (9 credits)
Statistics/Methodology courses (9 credits minimum)
2. Substantive I-O content courses (21 credits drawn from the following 3 credit courses and approved by the program director):

INP 5095	Proseminar in Industrial Psychology
INP 5136	Psychology of Legal Consultation
INP 6090	Applied Psychology and Organizational Consulting
INP 6115	Psychology of Culture and Organizations
INP 6216	Personnel Selection
INP 6235	Applied Psychology of Training and Development
INP 6611	Organizational Stress
INP 6940	Strategies and Methods of Applied Psychological Research
PSY 5939	Special Topics
SOP 5058	Proseminar in Social Psychology

- | | |
|----------|------------------------------------|
| SOP 5616 | Social Psychology of Organizations |
|----------|------------------------------------|
3. Electives (9 credits with approval from I/O program director)
 4. Supervised research/internship (15 credits)
 5. Master's Project (6 credits approved by the program director)
 6. Comprehensive exam
 7. PSY 7980 Ph.D. Dissertation (15 credits)

Doctor of Philosophy in Psychology: Major in Legal Psychology

The Legal Psychology major area is focused on issues related to the overlap between psychology and law, including areas such as: jury decision-making, judicial instructions, eyewitness testimony, and detecting deception. The program is research-oriented, with the goal of training students to conduct research in academic, government, or legal consulting settings. Research in this area revolves mostly around two traditional areas of psychology: cognitive and social psychology. As such, training is provided in these basic areas of psychology, along with training in methodology and statistics, and in related areas of law, and most notably, the overlap between law and psychology.

Program requirements include seminar courses in basic psychological processes (e.g. cognition, social psychology), statistics and methodology, and the law. While taking courses, students conduct independent research and collaborate with other faculty and students. Students who are interested in consulting also have the opportunity to work in a consulting setting. Students are encouraged to work on projects with a variety of colleagues. In addition to taking formal courses, students also have the opportunity to participate in weekly, informal research meetings with other students and faculty.

Admission Requirements*

To be admitted into Legal Psychology doctoral program, a student must:

1. Hold a Bachelor's degree in a relevant discipline from an accredited college or university.
2. Have a 3.0 average or higher during the last two years of the undergraduate program and submit Graduate Record Exam (GRE) scores.
3. Have completed an undergraduate or graduate research methods course as a prerequisite.
4. Arrange to have three letters of recommendation evaluating the applicant's potential for graduate work sent to the Psychology Graduate Program Director.
5. Send a brief essay stating reasons for interest in the program and career goals to the Psychology Graduate Secretary.
6. Receive approval from the Departmental Graduate Education Committee.
7. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 92 on the iBT TOEFL (equivalent to 580 in the TOEFL) is required.

**These are minimum requirements. Admission is competitive.*

Degree Requirements

The Ph.D. in Psychology requires a minimum of 75 semester credits of graduate work beyond the baccalaureate, including a dissertation based on the student's original research. A maximum of 36 credits may be transferred from a completed masters degree program with the approval of the Advisory Committee.

Required Courses

Legal Psychology doctoral students are required to complete the 9 credits of departmental core course requirements established across majors in the Department, along with more specialized content courses and courses involving directed independent effort, as listed below:

- Common core courses (9 credits)
Statistics/Methodology courses (9 credits minimum)
- 6 courses (total of 18 credits) on basic psychology, applied legal psychology approved by the program director):

CJE 5024	Violent Crime
CJL 6418	Law and Social Control
CLP 5185	Current Issues in Mental Health
CLP 6395	Forensic Psychology
CLP 6438	Clinical Psychological Assessment
DEP 5068	Applied Life Span Developmental Psychology
DEP 5099	Proseminar in Infancy, Childhood, and Adolescence
EXP 5099	Proseminar in Experimental Psychology
EXP 5527	Memory and Consciousness
EXP 5508	Applied Cognitive Psychology
INP 5095	Proseminar in Industrial Psychology
INP 5136	Psychology of Legal Consultation
INP 6115	Psychology of Culture and Organizations
INP 6940	Strategies and Methods of Applied Psychological Research
POS 6286	Judicial Research
POS 6612	Seminar US Supreme Court
PSY 5939	Special Topics
SOP 5058	Proseminar in Social Psychology
SOP 6098	Proseminar in Legal Psychology
SOP 6441	Seminar in Social Cognition
SOP 6752	Psychology of Juries
LAW 6310	Alternative Dispute Resolution
LAW 6112	Criminal Procedure
LAW 6114	Advanced Criminal Procedure
LAW 6330	Evidence
LAW 6710	Family Law
LAW 6381	Interviewing and Counseling
LAW 6363	Trail Practice
LAW 7549	Employment Discrimination
LAW 6714	Children and the Law
LAW 6253	Comparative Criminal Law
LAW 7308	Complex Litigation
LAW 6720	Health Law
LAW 6555	Law and Economics
LAW 6313	Negotiation and Mediation
LAW 6234	Race and the Law
LAW 6235	Women and the Law
- Electives (6 credits approved by the student's graduate advisor)
- Supervised research (18 credits)
- Master's Project

- Comprehensive Examination
- PSY 7980 Ph.D. Dissertation (15 credits)

Graduation Requirements

A grade of "B" or higher must be obtained in all courses with a cumulative average of 3.0 or higher in the 90 credits; the program requirements must be completed, and a dissertation must be completed and accepted by the University.

Admissions Procedures for Non-Psychology Majors

Applicants to the program who are not psychology majors may be accepted conditionally until they meet the category requirements, listed below, early in their graduate career. A maximum of nine semester hours credit earned in the non-degree seeking student category exclusive of prerequisite undergraduate courses may be applied to graduate degree requirements. The undergraduate course requirements are designed to make certain that students accepted into the graduate program have a broad base of dependable psychological knowledge and acquaintance with the basic methodologies upon which the discipline is founded.

Category A. Satisfactory completion of one psychology laboratory or research methods course.

Category B. Satisfactory completion of introductory upper division statistics.

Deadline for review of completed applications is December 1 for fall admission.

Juris Doctor/Master of Science in Psychology Joint Degree Pathway

Under the joint degree pathway, a student can obtain both degrees in less time than it would take to obtain each degree if pursued consecutively. Essential criteria relating to the joint degree pathway are as follows:

- Candidates for the pathway must meet the entrance requirements for and be accepted by both Colleges. Both Colleges must be informed by the student at the time of application to the second program that the student intends to pursue the joint degree.
- The joint degree pathway is not open to students who have already earned one degree.
- For law students, enrollment in the M.S. program is required no later than the completion of 63 credit hours in the J.D. program. For M.S. students, enrollment in the J.D. program is required no later than the third semester after beginning the M.S. program. For purposes of this paragraph, a summer session is counted as half a semester.
- A student must satisfy the curriculum requirements for each degree before either degree is awarded. The College of Arts, Sciences and Education will allow 9 credit hours toward the M.S. degree for successful completion of 9 credit hours of upper level law school electives from a list of courses approved by the Chair of the Department of Psychology. These 9 credit hours of law classes will be in lieu of 9 hours of courses required for the M.S. degree with the specialization in Legal Psychology as approved for each student by the Legal Psychology faculty committee, but not to include the required statistics classes of Proseminars. If the student is pursuing a

non-thesis M.S. with the specialization in Legal Psychology, 6 of the 9 credit hours of law classes will be in lieu of the six credit hours normally allotted to the thesis. Reciprocally, law students may receive 9 hours of credit toward the satisfaction of the J.D. degree for courses taken in the M.S. curriculum upon completion of the M.S. degree curriculum with a grade point average of 3.0 or higher.

5. A student enrolled in the joint degree pathway may begin the student's studies in either College, but full-time law students must take the first two semesters of law study consecutively and part-time students must take the first three semesters of law study consecutively. Students admitted to one College but electing to begin study in the other College under the joint degree pathway may enter the second College thereafter without once again qualifying for admission so long as they have notified the second College before the end of the first week of the first semester in the second College and are in good academic standing when studies commence in the second College.
6. A student enrolled in the joint degree pathway will not receive either degree until the student has satisfied all of the requirements for both degrees, or until the student has satisfied the requirements of one of the degrees as if the student had not been a joint degree candidate.
7. Students in the joint degree pathway will be eligible for the graduate teaching assistantships and research assistantships in the College of Arts, Sciences and Education on the same basis as other M.S. students, subject to the guidelines and restrictions set by the College of Arts, Sciences and Education.

Non-Thesis Track with a Specialization in Legal Psychology

The new non-thesis track culminating in the award of a Master of Science in Psychology, with a specialization in Legal Psychology, from the College of Arts, Sciences and Education complements the joint degree pathway that awards a Master of Science from the College of Arts, Sciences and Education and a Juris Doctor degree awarded by the College of Law. Essential criteria relating to this non-thesis option are as follows:

1. The non-thesis track is available only to graduate students who are admitted to the joint J.D./M.S. pathway. Admission requirements to that pathway are outlined above. Students entering the J.D./M.S. pathway will be placed on the non-thesis track.
2. Students on the non-thesis track may change to the thesis track with approval from the Director of the Legal Psychology Program and the Chair of the Psychology Department.
3. Except for the thesis requirement, the requirements for the M.S. degree, as specified by the Legal Psychology Program and the Psychology Department, apply to all students in the non-thesis track. As currently outlined, students must complete 9 hours of statistics classes, 12 hours of core Legal Psychology classes, and 9 hours of electives. Non-thesis track students must complete these requirements, plus 6 hours of additional electives. Unless otherwise specified, any changes made to the

M.S. curriculum in the future will apply equally to thesis and non-thesis track students.

4. As outlined in the joint degree pathway proposal, 9 hours of credit toward the M.S. degree may be allowed for upper level law school electives from a list of courses approved by the Chair of the Department of Psychology. These law school classes will be in lieu of 9 hours of credit as approved for each student by the Legal Psychology Graduate Committee, but not to include the required statistics classes or Proseminars.
5. In lieu of a thesis, students must complete a comprehensive critical review paper that includes both legal and psychological analysis of a chosen topic. Students must complete this paper no later than the last semester of the student's coursework. Students must have taken all required courses by the end of the term during which they complete the critical review paper. At least two faculty members of either the Department of Psychology or the College of Law will review the paper and must agree on satisfactory completion.
6. Students on the non-thesis track are required to take at least 3 credit hours of Supervised Research (PSY 5918).

Courses

List of proposed courses in the College of Law that may be taken for credit toward the M.S. in Psychology (with specialization in Legal Psychology)

Course Descriptions

Definition of Prefixes

CBH-Comparative Psychology and Animal Behavior; CLP-Clinical Psychology; CYP-Community Psychology; DEP-Developmental Psychology; EAB-Experimental Analysis of Behavior; EDP-Educational Psychology; EXP-Experimental Psychology; INP-Industrial and Applied Psychology; LIN-Linguistics; PCO-Psychology for Counseling; PSB-Psychobiology; PSY-Psychology; SOP-Social Psychology

CBH 5256 Animal Cognition (3). Survey of comparative cognition between humans and other animals. Major topics include perception, attention, learning, memory, reasoning, tool use, and language. Prerequisites: Graduate standing or permission of the instructor.

CLP 5007 Psychological Clinical Science I: Historical Perspectives and Current Controversies (3). This

course overviews clinical child psychology, including (a) history and philosophy of psychological clinical science and (b) challenges and controversies related to bridging science and service. Prerequisite: Graduate standing.

CLP 5165 Psychopathology (3). This course will provide a comprehensive introduction to the literature on psychopathology with a focus on understanding its relationship to other areas of psychology. Prerequisite: Graduate standing.

CLP 5166 Advanced Abnormal Psychology (3). Advanced study of the causes, psychopathology manifestations, and social and personal consequences of behavior disturbance. Emphasis is placed on the critical examination of current research on the biological, psychological, and social aspects of these disorders. Clinical approaches to diagnosis, course, and prognosis in the contemporary mental health context (including 'practicum' assignments if feasible) are covered.

CLP 5169 Proseminar in Developmental Psychopathology (3). A comprehensive review of topics in developmental psychopathology including history, scope, methods, individual and contextual influences, developmental course, long-term outcomes, and resilience. Prerequisites: Graduate standing or permission of the instructor.

CLP 5185 Current Issues in Mental Health (3). A critical, intensive examination of selected, important issues in mental health. Emphasis is given to the empirical study of contemporary problems related to the making of mental patients; planning, programming, and administering mental health services; political, ethical, and legal constraints on the operation of mental health facilities; interdisciplinary cooperation among helping and human service professionals; and evaluation of preventive care and treatment services. Prerequisites: Abnormal Psychology or permission of the instructor.

CLP 5483 Psychological Clinical Science II: Ecologies of Development and Theories of Psychopathology (3). This course provides an overview of theories of clinical child psychology, including (a) ecologies of development as related to psychopathology and (b) theories of development psychopathology. Prerequisites: Graduate standing, CLP 5007.

CLP 5931 Ethical Code in Psychological Practice (3). Ethical principles, rules, procedures of Psychologists. Clinical application and incorporation of the principles into professional interactions. Ethical reasoning is emphasized.

CLP 6060 Affective Bases of Behavior (3). A comprehensive introduction to the literature on affective science with a focus on: behavioral, biological, cognitive, and social dimensions, as well as the relevance to clinical science. Prerequisite: Graduate Standing

CLP 6168 Psychopathology Across the Life-Span (3). Exploration of the causes of psychopathology from a life-span developmental orientation and implications for theories of personality. Prerequisites: CLP 5166 and permission of the instructor.

CLP 6375 Clinical Psychology (3). Introduction to the science-profession of clinical psychology, as it is applied to preventing, diagnosing and treating maladaptive or deviant human behavior and relationships. Prerequisites:

Admission to the Graduate Program in Psychology or Education and permission of the instructor.

CLP 6395 Forensic Psychology (3). This course surveys the practical and ethical issues surrounding the interface between clinical psychology and the law. Prerequisites: CLP 4144, CLP 6168, or equivalent of either.

CLP 6426 Neuropsychology (3). Introduces students to basic foundations and some advanced concepts in Neuropsychology, with a focus on clinical applications. Topics covered will include functional neuroanatomy, brain disorders across the lifespan, and assessment of neuropsychological functions. Prerequisite: Permission of the instructor.

CLP 6432 Foundation Practicum I (3). This course provides a comprehensive introduction to the principles of psychological assessment and measurement in children and hands on practice in the administration of selected cognitive tests. Prerequisite: Graduate standing.

CLP 6436 Introduction to Psychological Assessment (3). This course provides instruction in the principles and methods underlying the administration, construction and evaluation of psychological tests and measures. Prerequisite: Graduate standing.

CLP 6437 Behavioral Assessment in Childhood (3). Standardized tests and inventories for the behavior assessment of infants, children, and adolescents will be surveyed. Prerequisites: Proseminar courses and second year graduate standing.

CLP 6438 Clinical Psychological Assessment (3). Supervision and didactic material will facilitate continued growth in psychological assessment for Ph.D. students. The focus is on selection, administration, and interpretation of psychological tests. Prerequisites: CLP 6432, CLP 6947, permission of the instructor.

CLP 6449 Career Development in Adolescence and Adulthood (3). An overview of career development and other life factors relevant to life stages from adolescence and beyond. Issues related to theory, research and application will be reviewed. Prerequisite: Graduate standing.

CLP 6471 Assessment and Treatment I: Internalizing Problems (3). Provides an in-depth examination of the evidenced-based assessments used in the psychological evaluation and treatment for children and adolescents with internalizing problems. Prerequisite: CLP 5007.

CLP 6472 Assessment and Treatment II: Externalizing Problems (3). Provides an in-depth examination of the evidenced-based assessments used in the psychological evaluation and treatment for children and adolescents with externalizing problems. Prerequisite: CLP 5007.

CLP 6473 Assessment and Treatment III: Developmental, Learning and Pediatric Disorders (3). Provides an overview of theory, research, and evidenced-based practices relevant for evidence based assessment and intervention for use with developmental, learning and pediatric disorders. Prerequisite: CLP 5007.

CLP 6498 Diagnosis and Treatment of Sexual Disorders (3). Clinical examination of sexual functioning, emphasizing disorders of gender identity, paraphilias and other dysfunctions and intimacy problems. Prerequisites:

Graduate standing or permission of the instructor.
Corequisites: SOP 3772 or equivalent.

CLP 6530 Dissemination and Implementation of Research (3). Addresses the increasing need to bridge research and practice to inform a new generation of effective services that are accessible to the large numbers of children and families in need.

CLP 6625 Clinical Supervision in Mental Health Counseling (1-20). Supervised experience in clinical supervision techniques and methods. Prerequisite: Master's degree.

CLP 6943 Advanced Clinical Practicum (1-20). Allows students to practice clinical skills through participation in interactive classroom exercises while gaining clinical experience. Prerequisite: Clinical Practicum (CLP 6945).

CLP 6945 Clinical Practicum in Psychology (1-3). Supervised experience in clinical techniques and methods. Prerequisites: Graduate standing and permission of the instructor.

CLP 6947 Foundations Practicum II (Treatment) (3). This course provides a comprehensive introduction to the principles of psychological treatments for children and adolescents, with applied practice and supervision in psychotherapy techniques. Prerequisites: PSY 5939 (Foundation Practicum I: Assessment).

CLP 6948 Clinical Internship (1-3). Clinical Internship in Psychology for Ph.D. candidates who have completed the Clinical Practicum and at least 45 graduate credit hours. Prerequisites: Graduate standing and permission of the instructor, CLP 6945.

CLP 6949 Advanced Clinical Internship (1-20). Advanced clinical internship is the second semester of internship. Students receive supervision in advanced clinical techniques and personal and professional development. Prerequisites: Graduate standing and permission of instructor.

CYP 5534 Groups as Agents of Change (3). Theory and practice in utilizing groups as agents of change or development in communities and organizations. Didactic presentation and structured exercises focus on relevant issues. Students design and implement problem-focused interventions, using class as client system.

CYP 6526 Psychological Methods of Program Evaluation (3). Development of skills for the psychological assessment monitoring and evaluation of human service programs with emphasis on the application of basic principles of behavioral science research in the field, exclusive of public school settings.

CYP 6536 Principles and Methods of Psychological Consultation (3). An analysis of the basic psychological approaches underlying consultation, with special emphasis on the practical application of the processes of learning, cognition, and interpersonal relations to techniques of consulting with various 'target' agencies, individual clients, and other professionals in community settings. Prerequisites: Graduate standing at FIU or permission of the instructor.

CYP 6766 The Psychology of Crosscultural Sensitization in a Multicultural Context (3). A series of weekly seminars to increase student sensitivity to working

with clients from different cultural backgrounds. The objectives of the course are: (1) facilitating student awareness of cultural differences and their impact on social and human services delivery systems, (2) identifying the student's own personal cultural biases and values when interacting with culturally different persons, and (3) teaching students to develop culturally appropriate intervention skills.

CYP 6936 Current Issues in Community Psychology (3). An intensive analysis of contemporary theoretical, practical, and professional aspects of the field of Community Psychology. Topics discussed may lead to the graduate project required of each student. Prerequisites: Admission to graduate study in psychology (other graduate students admitted by permission of the instructor).

DEP 5056 Issues in Life-Span Developmental Psychology: Infancy through Old Age (3). A in-depth survey of theories, issues, methods, and data in life-span developmental psychology through the entire age range. Prerequisites: DEP 3001 or DEP 4464, or their equivalents, are recommended.

DEP 5058 Biological Basis of Behavior Development (3). Introduction to theory and research underlying behavioral development. Covers such pre- and post-natal determinants as evolution, genetics, neuroendocrines, as well as social development, behavioral ecology, and sociobiology. Prerequisites: Graduate standing or permission of the instructor. Corequisite: Proseminar courses.

DEP 5065 Cognitive Development (3). An overview of cognitive development, with a focus on the theories, experimental evidence, and milestones in cognitive development. Topics include the development of attention, perception, memory, problem solving, categorization, concepts, language, reasoning, theory of mind, metacognition, and executive function. Prerequisites: Graduate standing or permission of the instructor.

DEP 5068 Applied Life Span Developmental Psychology (3). This course is designed to acquaint the student with various applications in life-span developmental psychology. An overview of general issues and areas of application is offered, and specific applications are considered. Prerequisites: Graduate standing or permission of the instructor.

DEP 5099 Proseminar in Infancy, Childhood, and Adolescence (3). Provides a comprehensive review of issues in perceptual, cognitive, social, emotional, and personality development from infancy through adolescence. Prerequisites: Graduate standing or permission of the instructor. Corequisite: Proseminars.

DEP 5118 Current Issues in Cognitive and Perceptual Development in Infancy (3). Provides an in-depth analysis of current issues, methods, research and theory of cognitive and perceptual development during the first year of life. Special emphasis on object and event perception, memory, and imitation. Prerequisites: Two courses in developmental psychology -any level recommended.

DEP 5185 Emotional Learning and its Reversal (3). Theoretical analyses and methodological issues in the

study of emotional learning. Prerequisites: Graduate standing or permission of the instructor.

DEP 5325 Proseminar in Identity Development (3). This class uses foundational identity theories and concepts to understand cross cultural development and psychological outcomes at an advanced level. Prerequisite: Graduate standing.

DEP 5344 Psychology of Moral Development (3). An introduction to the literature on moral development. Review and discussion of recent developments in this area. Prerequisites: Graduate standing or permission of the instructor.

DEP 5405 Proseminar in Psychology of Adulthood and Aging (3). A comprehensive review of topics in adulthood and aging including: biological changes, social processes, work, family, cognition, memory, personality, and psychopathology. Prerequisites: Graduate standing or permission of the instructor.

DEP 5608 Theoretical Perspectives in Developmental Psychology (3). The focus of this course is on the major paradigms, models, and theories that have been influential in developmental psychology, both historically and contemporaneously. Meta-theoretical issues, paradigmatic influences, and specific theories are considered. Prerequisites: Graduate standing or permission of the instructor.

DEP 5725 Seminar in Psychosocial Development (1). This course is designed to develop research skills and competencies in the area of psychosocial development. The emphasis of the course is on involvement in original research. Prerequisite: Permission of the instructor. Corequisites: Senior undergraduate or graduate standing.

DEP 5796 Methods of Developmental Research (3). Survey of issues and methods at all stages of life-span developmental research including theory, methods, design, and data reduction. Prerequisites: Graduate standing or permission of the instructor. Corequisite: Proseminars.

DEP 5936 Theory and Research Experience in Developmental Science (3). An advanced seminar that integrates research in the lab with readings and discussion of current issues, theory, and methods in developmental science. May be repeated. Prerequisites: Graduate standing and permission of instructor. Corequisites: Independent research in a developmental lab (PSY 5918 or PSY 6971).

DEP 6117 Psychology of Caregiving (3). An advanced seminar focusing on one or more topics in depth and requiring literature reviews and research design. Topics may include timing of parenthood, adoption, and fatherhood.

DEP 6145 Psychology of Culture and Childhood (3). Extensive cross-cultural readings will serve as the focus for seminar discussion of cultural influences on children's biological, motor, perceptual, cognitive, social, and personality development. Prerequisites: Graduate standing or permission of the instructor.

DEP 6186 Social Development and Learning (3). Theories and facts of socio-emotional development, learning, and the acquisition and maintenance of social

relationships in early life are examined critically. Prerequisites: DEP 2000 or DEP 2001 or equivalent.

DEP 6465 Psychology of Culture and Aging (3). An intensive examination of cultural influences on social and psychological aging processes including minority aging and involving seminar discussion and independent projects. Prerequisite: Graduate standing.

DEP 6466 Cognitive Processes in Aging (3). An intensive analysis of the background and recent developments in the area of age changes and age differences in intellectual functioning and learning memory processes. Prerequisite: DEP 5405.

DEP 6477 Psychology of Social Processes in Aging (3). An intensive analysis of the background and recent developments in theoretical models of social development, personality processes, and social processes in the older adult. Prerequisite: DEP 5405.

DEP 6645 Cognition and Language (3). Course covers the acquisition of cognitive processes and language, and their interdependence. Theory and research focusing on innate vs. learned aspects are discussed. Prerequisites: Graduate standing or permission of the instructor.

DEP 6936 Current Literature in the Psychology of Infancy, Childhood, and Adolescence (3). This seminar will present and evaluate current research articles in the major journals in infant, child, and adolescence psychology. Prerequisite: Second year graduate standing.

DEP 6937 Current Literature in the Psychology of Adulthood and Aging (3). This seminar will present and evaluate current research articles in the major journals in the psychology of adulthood and aging. Prerequisite: Second year graduate standing.

DEP 6945 Life-span Developmental Psychology Practicum (3). This is an individually tailored program where students will work in an agency on a specific problem or project, culminating in a final written report. Prerequisite: Second year graduate standing.

DEP 7069 Seminar in Life-Span Cognitive Developmental (3). This graduate seminar will examine, through intensive reading and seminar discussion, the major theories, issues and empirical research on cognitive growth, change and decline from infancy through old age. Prerequisites: Two courses in Developmental Psychology (any level).

DEP 7096 Seminar in Psychology of Life-Span Social Development (3). This course includes a consideration of general issues and discussion of the application of life-span models to selected topics development. Prerequisites: Graduate standing or permission of the instructor.

EAB 5098 Proseminar in the Experimental Analysis of Behavior (3). An advanced survey of the principles of respondent and operant conditioning and the bases of action in both social and non-social settings. Prerequisites: EAB 3002 or equivalents.

EAB 5655 Advanced Methods of Behavior Change (3). An intensive study of selected methods of modifying human behavior, emphasizing the applications of the principles of respondent and operant conditioning, as well as those derived from modern social learning theories.

Practice and role playing opportunities are provided in behavior therapy, relaxation therapy, behavior modification, biofeedback or similar behavioral approaches. Prerequisites: EAB 3794, CLP 4374, CYP 4144; enrollment in an authorized program; equivalent background; or permission of the instructor.

EAB 5700 introduction to the Concepts and Principles of Applied Behavior Analysis (3). In depth study of learning principles and methods of behavior change and complex learning processes, including Skinner's analysis of verbal behavior. Prerequisite: Graduate Standing.

EAB 5701 Functional Behavior Assessment (3). Behavior analytic assessment including descriptive assessment and functional analysis, identification of behavior function, assessment of skill deficits, and identifying treatment goals. Prerequisite: Graduate standing.

EAB 5797 Single-Case Research Methods (3). Intensive study of designs, strategies, and methods of single-case behavioral research. Prerequisites: Graduate standing or permission of the instructor.

EAB 6005 Foundations of Applied Behavior Analysis (3). A critical examination of the theory, concepts, and principles of applied behavior analysis. The course will cover historical figures and events that led to the development of the field. Prerequisite: Graduate standing.

EAB 6707 Learning and Development (3). A survey of the application of the principles, methods, and applications of experimental behavior analysis to various life-span segments and developmental themes. Prerequisites: Proseminar in Behavioral Analysis or an undergraduate EAB course (EAB 3002 or EAB 3794).

EAB 6717 Applications of Behavior Analysis to Autism Spectrum Disorder (3). Behavior is analyzed by function. Structural and developmental issues as well as implications for language training and ethical application integrated throughout. Prerequisite: Graduate standing.

EAB 6770 Behavioral Technologies (3). Evaluating interventions, staff training, managing treatment teams, as well as, data-based evaluation of teaching procedures, behavior outcomes and team member performance. May be taken twice for credit. Prerequisite: Graduate standing.

EAB 6780 Ethical Code in Behavior Analysis (3). Ethical issues in clinical Behavior Analysis are examined including selecting behavior targets, monitoring intervention success and transferring control to existing environmental contingencies. Prerequisite: Graduate standing.

EAB 6941 Practicum in Applied Behavior Analysis (3). This course provides students with supervised experience in designing and implementing behavior plans. May be repeated once. Prerequisites: EAB 5655, EAB 6707.

EDP 6935 Special Topics in Educational Psychology (VAR). An intensive analysis of a particular topic in educational psychology. Students must have topics approved by the instructor prior to registration. Open only to advanced and graduate students in the College of Education.

EXP 5099 Proseminar in Experimental Psychology (3). Provides a comprehensive review of current research and theory in areas such as learning, memory, cognition,

sensation, and perception. Prerequisites: Graduate standing or permission of the instructor.

EXP 5406 Theories of Learning (3). The major theoretical systems of learning are covered, with the intent of determining how well each accounts for the phenomena of learning. Emphasis is placed on exploring the controversial issues raised by extant theories, and the experimental resolution of these theoretical controversies. The impact of theory on current thinking about learning is considered.

EXP 5508 Applied Cognitive Psychology (3). Covers the basic theories of cognitive psychology perception, attention, memory, learning, knowledge, with emphasis on application to real-world problems. Prerequisite: Graduate standing.

EXP 5527 Memory and Consciousness (3). The relation of memory and consciousness is explored with emphasis on issues of current research and theoretical work from both a cognitive and a neuropsychological perspective. Prerequisite: Graduate standing.

EXP 5667 Cognitive Neuroscience (3). Investigation of the relation between mind and brain. Discuss literature from both patient studies and from the growing research in neuroimaging. Prerequisite: Graduate standing.

EXP 7747 Practicum in Causal Modeling (3). Introduction to linear structural relations models, emphasizing logical and practical problems in inferring causation for experimental and correlational research designs.

INP 5095 Proseminar in Industrial Psychology (3). Provides coverage of industrial and personnel psychology topics such as job analysis, personnel recruitment and selection, legal aspects of employment, performance appraisal, and training design and evaluation. Prerequisites: Acceptance to Master's or Ph.D. program in Psychology.

INP 5136 Psychology of Legal Consultation (3). Practice in basic non-clinical areas in which psychologists assist attorneys, including jury selection, surveys, and simulations. Prerequisites: SOP 6098 or equivalent.

INP 6058 Job Analysis and Criteria (3). Process, sources of data, and methods for analyzing jobs. Use of job analysis in criterion development. Survey of the industrial/organizational theories and practices in performance appraisal.

INP 6090 Applied Psychology and Organizational Consulting (3). An overview of the organizational consulting process, including proposal development, managing projects and client relationships, ensuring information integrity, and understanding ethical issues. Prerequisite: Graduate standing.

INP 6115 Psychology of Culture and Organizations (3). An overview of theory and research examining the psycho-social environment of organizations, including the factors that shape organizational cultures and climate, along with the implications for workplace motivation, morale, and productivity. Prerequisite: Graduate standing.

INP 6216 Personnel Selection (3). Characteristics of Personnel Selection systems used in organizations. Validity generalization, utility, applicant reactions, and

legal cases pertaining to employee selection. Prerequisites: Proseminar in I/O and graduate level statistics course.

INP 6235 Applied Psychology of Training and Development (3). In-depth study of principles of behavior and attitude change in organizations. Topics include organization analysis, program design and implementation, and evaluation of results. Prerequisites: Acceptance to M.S. or Ph.D. program in Psychology and SOP 5616.

INP 6611 Organizational Stress (3). This seminar examines conceptualizations, causes, consequences, and correlates of stress, strain, and coping in the workplace.

INP 6940 Strategies and Methods of Applied Psychological Research (3). A practicum course in the psychological research strategies and the application of computers in the analyses of psychological data.

LIN 5701 Psychology of Language (3). An overview of the psychology of language and the psychological 'reality' of linguistic structure. Behavioristic vs. cognitive views of psycho-linguistics are examined. Consideration is given to the biological bases of language and thought, language acquisition, and language pathology.

PCO 5251 Couples and Family Systems (3). An overview of theory, research, and treatment issues related to couples and family systems. The course covers relevant techniques, training, and professional issues. Prerequisite: Graduate standing.

PCO 5252 Theory and Techniques in Couples and Marital Therapy (3). An overview of the theories and techniques used in couples and marital therapy with an examination of treatment approaches and evidence-based practice. Consideration of clinical issues and problems.

PCO 5253 Theory and Techniques in Family Therapy (3). An examination of the major theories and techniques used in family therapy with an in-depth exploration of the skills and strategies used for treating clinical issues from multiples perspectives.

PCO 5311 Theory, Treatment, and Research of Addictive Behavior (3). An overview of theory, treatment, and research findings pertaining to the process and development of addictive behavior. This course covers treatment issues related to substance abuse disorders. Prerequisite: Graduate standing.

PCO 5750 Contemporary Issues in Family Life and Process (3). An examination of selected issues that are faced during the development and life cycle of the family. Family intergenerational history and sociocultural factors will be explored.

PCO 6206 Principles & Practices of Counseling & Psychotherapy (3). Examination of the principles & practices of counseling and psychotherapy derived chiefly from cognitive behavioral psychology. Prerequisite: Graduate standing.

PCO 6254 Principles and Practices in Couples and Family Therapy (3). An examination of the principles and practices used in couples and family therapy. Counseling skills and practical issues related to couples and family therapy will be examined.

PSB 5115 Introduction to Psychophysiology: Basics of Electroencephalography and Event-Related Potentials (3). This course introduces students to the concepts, theory, and methods of human psychophysiology with a specific focus on electroencephalography (EEG) and event-related potentials (ERPs). Prerequisite: Permission of the instructor.

PSB 5247 Neurobiology of Learning and Memory (3). Seminar focusing on the themes and questions of how the brain supports learning and memory.

PSB 5615 Visual & Visuospatial Cognitive Neuroscience (3). Survey of contemporary visual cognitive neuroscience research; covers visual representation, how cognitive processes operate on such representation via interaction of visual and non-visual brain areas

PSB 6035 Introduction to Computational Cognitive Neuroscience (3). Survey of models and methods from the computational neuroscience literature that are helpful to answer questions about the mechanisms of cognition and behavior. Prerequisite: Permission of instructor.

PSB 6215 Human Neuroanatomy (3). Survey of human spinal, brainstem, subcortical, and cortical neuroanatomy with reference to physiology and disease. Prerequisite: Permission of the instructor.

PSB 6247 Biological Bases of Behavior (3). Advanced survey of biological bases of behavior. Topics include neuroanatomy, functional organization and electro-chemical processes of the nervous system, and neural bases of learning and memory. Prerequisites: Graduate standing or permission of the instructor.

PSB 6350 Cognitive Neuroimaging Methods I (3). Data acquisition methods and their psychological application in cognitive neuroimaging, including techniques from nuclear medicine, electrophysiology, and magnetic resonance imaging.

PSB 6351 Cognitive Neuroimaging Methods II (3). Data analysis methods and psychological applications in cognitive neuroimaging, including image pre-processing, statistical modeling, brain connectivity techniques, and the visualization, interpretation, and reporting of results. Prerequisite: PSB 6350.

PSY 5206C Fundamentals of Design of Experiments (3). CRD and RCB designs. Latin square designs. Factorial, nested and nested-factorial experiments. Fixed, random and mixed models. Split-plot designs. Covariance analysis. Prerequisites: STA 2122 and 3123, or their equivalents.

PSY 5246C Multivariate Analysis in Applied Psychological Research (3). Covers basic techniques of multivariate analysis, emphasizing the rationale and applications to psychological research. Includes multiple regression, Hotellings T, MANOVA, principal component analysis, and factor analysis. Prerequisites: STA 3123 or equivalent; linear algebra recommended.

PSY 5605 Proseminar: History and Systems of Psychology (3). An examination of the historical foundations of modern psychology and survey of current systems and schools of psychology. Prerequisites: Graduate standing or permission of the instructor.

PSY 5908 Directed Individual Study (VAR). Under the supervision of an instructor in the graduate degree program, the graduate student delves individually into a topic of mutual interest which requires intensive and profound analysis and which is not available in a formal offering. May be repeated once. Prerequisite: Permission of the instructor.

PSY 5918 Supervised Research (VAR). Research apprenticeship under the direction of a research professor or a thesis advisor. Prerequisite: Full graduate admission.

PSY 5930 Qualitative Research Methods in Psychology (3). Critical issues, theoretical and practical applications for conducting qualitative research in psychology. The focus will be on key research strategies and principles for research design.

PSY 5938 Current Topics in Neuroscience Series (0-1). This course provides students with the opportunity to present current topics in Neuroscience either from recently published literature or their own research. Course may be repeated for up to six credits.

PSY 5939 Special Topics in Psychology (3). Special topics will be announced in advance.

PSY 6061 Advanced Qualitative Methods Psychology (3). An advanced qualitative research analysis course that focuses on applying theory, and interpretation to hands data analysis practices and presentation. Prerequisite: PSY 5930

PSY 6219 Research Methods in Clinical Child Psychology (3). An in-depth examination of research methods used in clinical child psychology, with an emphasis on intervention research. Prerequisites: CLP 5007; CLP 5483.

PSY 6919 Current Research Topics in Psychology (3). An overview of current theory and research in psychology with a focus on the research process. Case studies illustrate the development of research programs designed to advance theory in psychology. Prerequisite: Graduate standing.

PSY 6945 Teaching of Psychology (1). An introduction to the art of college teaching and specifically the art of teaching psychology. It is designed for first-year graduate students to provide instruction and support for teaching college classes. Prerequisite: Graduate standing.

PSY 6956 Psychology Field Experience (VAR). Placement of students in applied settings for the purpose of developing community-based experience in the application of theoretical and methodological approaches. Prerequisite: Graduate standing.

PSY 6971 Master's Thesis in Psychology (3-6). Supervised research on an original research project submitted in partial fulfillment of Master's degree requirement.

PSY 7940 Supervised Teaching in Psychology (1). Supervised teaching under the guidance of faculty advisor. May be repeated only three times. Prerequisite: Doctoral graduate study.

PSY 7980 Ph.D. Dissertation (1-12). Supervised research on an original research project submitted in partial fulfillment of doctoral degree requirements.

Prerequisites: Permission of Major Professor and Doctoral Candidacy.

SOP 5058 Proseminar in Social Psychology (3). An in-depth examination of the role of social psychology in the social sciences and the major substantive problems as they relate to contemporary societal issues. Minimum Prerequisites: An introductory course in social psychology or its equivalent.

SOP 5081 Psychological Influences on Health and Illness (3). Provides a comprehensive review of theory, research, and interventions in the field of health psychology. Prerequisites: Graduate standing or permission of the instructor.

SOP 5316 Theories and Methods of Cross-Cultural Research (3). An intensive analysis of contemporary theories and methods of cross-cultural research in psychology including topics such as: culture as a research treatment, differential incidence of personality traits, the use of ethnographies, 'etic' vs. 'emic' distinction. Prerequisites: Graduate standing or permission of the instructor.

SOP 5616 Social Psychology of Organizations (3). The application of concepts and theories from social psychology and sociology to the organizational setting. Emphasis will be on role theory, value formation and the operation of norms, including their development and enforcement. Formal and informal organization structure, power and authority concepts, and leadership theories will be covered. Communication processes and networks and their effects on task accomplishment and satisfaction will be included.

SOP 5726 Proseminar on the Psychology of Stereotyping, Prejudice, and Discrimination (3). This class uses social psychology theory and concepts to understand stereotyping, prejudice, discrimination, and minority experience at an advanced level. Prerequisite: Graduate standing.

SOP 6098 Proseminar in Legal Psychology (3). The application of psychological research methods and psychological knowledge to contemporary issues in criminal and civil litigations. Prerequisite: Graduate standing.

SOP 6441 Seminar in Social Cognition (3). Provides a critical review of current theory and research on social cognition and its relationship to stereotyping, persuasion, attribution, and social perception. Prerequisite: Graduate standing.

SOP 6752 Psychology of Juries (3). A review of psychological research on juries and jury decision-making. Emphasis is placed on the critical analysis of jury research and relevant case law. Prerequisite: Graduate standing.

Certificate Programs

Graduate Certificate in Applied Behavior Analysis

Maricel Cigales, *Director, Department of Psychology*

The Graduate Certificate in Applied Behavior Analysis is a distance-learning program that is designed for individuals who wish to become Board Certified Behavior Analysts and who already have or are completing a master's degree in a related discipline. The curriculum consists of seven courses (21 credits) that comprise an approved Verified Course Sequence, under the 5th Edition Task List of the Behavior Analyst Certification Board ©. The program does not include supervised experience. Details regarding the certification process and requirements are available at www.bacb.com. This certificate program is open to degree-seeking and non-degree-seeking students.

Admission Requirements

In addition to the application, prospective students must submit the following:

1. Official academic transcripts confirming the completion of a baccalaureate degree from an accredited institution of higher education (or equivalent) and a minimum 3.0 GPA in the last two years of undergraduate work
2. Current resume or curriculum vitae. Admission to the program is competitive. Therefore, meeting these minimum requirements does not guarantee admission.

Admission to the program is competitive. Therefore, meeting these minimum requirements does not guarantee admission.

Program Requirements

The program will be delivered via a combination of an asynchronous online component with synchronous, digital class meetings. The courses will be offered over three consecutive semesters, in the spring, summer and fall, following the standard University course calendar.

Courses

EAB 6780	Ethical Code in Behavior Analysis	3
EAB 6770	Behavioral Technologies	3
EAB 5655	Advanced Methods of Behavior Change	3
EAB 6707	Learning and Development	3
EAB 6717	Applications of Verbal Behavior for Autism and Asperger Syndrome	3
EAB 5098	Proseminar in the Experimental Analysis of Behavior	3
EAB 5797	Single-Case Research Methods	3

Graduate Certificate in Applied Social and Cultural Psychology

Graduate Certificate in Applied Social and Cultural Psychology (ASCP) is designed to train advanced doctoral psychology students in becoming action scientists prepared to work in a variety of settings in order to understand, transform, and improve the social and cultural contexts and systems in which humans develop across

the lifespan. The curriculum consists of six courses (18 credits). The certificate is open to students already accepted in the Department of Psychology Doctoral program.

Admission Requirements

In addition to acceptance into the Department of Psychology Doctoral program, prospective students must complete:

- An online application
- An interview with two Core ASCP committee members

Program Requirements

Students must take a total of six graduate level classes to earn the ASCP Certificate; this is a total of 18 graduate level credits. The six must be selected from 10 approved classes. These ten courses are as follows:

CLP 5007	Psych & Clinical Science Historical Perspectives & Current Controversies
CLP 6530	Dissemination & Implementation of Research
CYP 6766	The Psychology of Cross-cultural Sensitization in a Multicultural Context
CYP 6936	Current Issues in Community Psychology
DEP 5325	Proseminar in Identity Development
PSY 6919	Current Research Topics in Psychology
PSY 5918	Supervised Research
PSY 5930	Qualitative Methods in Psychology
SOP 5058	Proseminar in Social Psychology
SOP 5316	Theories & Methods in Cross Cultural Research

Additional classes will be approved on a case by case basis; approval memo must be signed by two Core ASCP Committee Members. Additionally, all students will be required to complete specific ASCP Certificate Portfolio requirements.

Graduate Certificate in Biodiversity Conservation and Management

Joel Heinen, *Director, Earth and Environment*

The Graduate Certificate in Biodiversity Conservation and Management draws on areas of strength within the Department of Earth and Environment and the Department of Biological Sciences (College of Arts and Sciences) to provide students with specialized knowledge about managing and conserving the earth's biological resources. It is designed for students who seek careers in agencies that manage and conserve biological resources, for people in the private sector who seek specialized knowledge in this area, for educators seeking advanced training, or for others interested in the topic. The certificate is managed by the Department of Earth and Environment and the Biodiversity and Conservation Certificate Committee. This certificate program is open to degree-seeking students only.

Admission Requirements

Students must have an earned bachelor's degree with a minimum of a 2.75 in the last 60 credits of their upper division coursework. Students must be in good academic standing. Students should have completed a minimum of 2

courses in general biology and one course in ecology as a prerequisite to the program.

Program Requirements

Students are required to take 15 credit hours of graduate level course work outlined below. Other related courses may be approved subject to consideration by the program director and committee on a case by case basis.

1. Foundational

EVR 5409 Advanced Conservation Biology 3

2. Conservation Sciences and Management, 6 credits total

Take two courses from this list:

PCB 5046 Plant Conservation Biology 3

EVR 5069 Wetland Ecology and Management 3

EVR 5376 Advanced Ecology and Management of Invasive Species 3

SWS 5305 Advanced Soil Resources Analysis 3

3. Integrated Biological Resources Management, 6 credits total

Take two courses from this list:

PCB 5418C Advanced Marine Protected Areas 4

BOT 5816 Ethnobotany 3

EVR 6360 Protected Area Management 3

EVR 6406 U.S. Endangered Species Management 3

EVR 6330 Tropical Ecosystems Management 3

Graduate Certificate in Cognitive Neuroscience

Aaron Mattfeld, *Director, Psychology*

Anthony Steven Dick, *Psychology*

Timothy Allen, *Psychology*

George Buzzell, *Psychology*

Sean Allen-Hermanson, *Philosophy*

Prem Chapagain, *Physics*

Raul Gonzalez, *Psychology*

Angela Laird, *Physics*

Robert Licklitter, *Psychology*

Wei-Chiang Lin, *Biomedical Engineering*

Kinsuk Maitra, *Occupational Therapy*

Dana McMakin, *Psychology*

Eliza Nelson, *Psychology*

Elaine Ramos, *Communication Sciences & Disorders*

Bennett Schwartz, *Psychology*

Fabián Soto, *Psychology*

Matthew Sutherland, *Psychology*

Jamie Theobald, *Biological Sciences*

The Graduate Certificate in Cognitive Neuroscience is designed to advance the scientific education and professional development of students through coursework covering a broad range of areas of neuroscience. The 15-credit program specifically will provide students with an interdisciplinary background in cognitive psychology/cognitive science and neuroscience. The curriculum concentrates on teaching theory and methodology for conducting and understanding research in cognitive neuroscience and its potential application to education and clinical practice. This certificate program is open to degree-seeking students only.

Admission Requirements

1. Matriculation into a graduate program or baccalaureate degree from an accredited institution of higher education (or equivalent) with a minimum 3.0 GPA in the last two years of undergraduate work;
2. Current resume or curriculum vitae;
3. Official academic transcript

Program Requirements

There are two Core Course Categories, Cognitive Neuroscience and Neuroscience, from which students must take one course each (6 credits). The remaining 9 credits can be taken from the listed Electives or from the remaining courses in the Core Course categories. Additional courses may be accepted for the certificate with approval of the Program Director.

Core Requirement 1: Cognitive Neuroscience (3 credits)

DEP 5058	Biological Basis of Behavior Development	3
EXP 5667	Cognitive Neuroscience	3
PHI 5931	Advanced Topics in Philosophy of Mind and Cognitive Science	3

Core Requirement 2: Neuroscience (3 credits)

BME 5505C	Engineering Foundation of Medical Imaging Instrument	3
PHY 6716	Advanced Biophysics	3
ZOO 5785	Advanced Neurobiology	3

Electives: (Up to 9 Credits)

CHM 5305	Graduate Biological Chemistry	3
EXP 5508	Applied Cognitive Psychology	3
EXP 5527	Memory and Consciousness	3
OTH 5524	Adaptation of Human Occupation and Environment for Neuromotor Disorders I	3
OTH 5438	Adaptation of Human Occupation and Environment for Neuromotor Disorder II	3
PCB 5835	Neurophysiology	3
PCB 5835L	Neurophysiology Lab	1
SPA 6410	Aphasia and Related Disorders	3
ZOO 5745	Advanced Neuroanatomy	3

Graduation Requirements

The graduate certificate program requires that students maintain a cumulative GPA of 3.0 or higher and earn a "B" or better in all courses counted toward the certificate.

Graduate Certificate in Environmental Studies

Krish Jayachandran, *Director, Earth and Environment*

Coordinating Committee

Mahadev Bhat, *Earth and Environment*

Suzanne Koptur, *Biology*

Rod Neumann, *Global and Sociocultural Studies*

This graduate certificate is an interdisciplinary program focused on various environmental issues that is analogous to the undergraduate Certificate in Environmental Studies. This certificate program is open to degree-seeking students only. It is aimed primarily at graduate students in Politics and International Relations, Economics, and Global and Sociocultural Studies as well as those doing an environmental concentration or track in graduate programs in Tourism, Liberal Studies, Journalism,

Education (particularly Parks and Recreation Management), and Latin American Studies. The Certificate Program provides an analytic basis for understanding local, regional and global environmental problems and their solutions.

Certificate Requirements

The Graduate Certificate in Environmental Studies requires 15 graduate credit hours as follows:

Two Core Courses: (6)

EVR 5006	Environmental Science and Sustainability
RLG 5183	Religion, Nature, and Globalization

Three Environmental Electives from the following: (9)

ANG 5267	Environmental Anthropology
SYD 5045	Population and Society
INR 5352	Environment and Security
EVR 5061	South Florida Ecology: Field Studies
EVR 5320	Environmental Resource Management
EVR 5355	Environmental Resource Policy
EVR 6360	Protected Area Management
EVR 6300	Topics in Urban Ecology
EVR 6406	U.S. Endangered Species Management
EVR 6067	Tropical Forest Conservation/Utilization
EVR 6330	Tropical Ecosystem Management
GIS 5050	Environmental GIS
EVR 5935	Special Topics in Environmental Studies
EVR 5907	Research and Independent Study
LEI 5605	Philosophical and Social Basis of Parks and Recreation
HMG 6706	Environmental Management for Tourism
EDF 6766	Education, Environment and Sustainable Future
SYD 6901	Migration and Environment
INR 6056	Environment and Development
LAA 6551	Sustainable Landscapes
EVR 7322	Methods of Sustainable Resource Management
ECP 6305	Advanced Environmental Economic

Graduate Certificate in Geographic Information Systems

Assefa Melesse, *Director, Earth and Environment*

Coordinating Committee

Zhaohui Jennifer Fu, *Library GIS-RS Center*

Jennifer Gebelein, *Earth and Environment*

Hugh Gladwin, *Global and Sociocultural Studies*

Dean Whitman, *Earth and Environment*

Keqi Zhang, *Earth and Environment*

Xin Jin, *Civil and Environmental Engineering*

A Geographic Information System (GIS) is a set of computer hardware and software used to organize, manipulate, and analyze maps and spatial data. GIS is a rapidly developing technology that can be applied to many areas of the natural sciences, social sciences, engineering, and planning.

The Graduate Certificate in Geographic Information Systems provides students with an interdisciplinary background in GIS. The program consists of graduate level courses in Geographic Information Systems and related subjects offered by the departments of Biology,

Civil and Environmental Engineering, Computer Science, Earth and Environment, Global and Sociocultural Studies, Public Administration, and Statistics. This certificate program is open to degree-seeking students only.

For more information, contact the Program Director, Assefa Melesse: phone: (305) 348-6518; email: melessea@fiu.edu, or visit the GIS Center website: <http://gis.fiu.edu>.

Admission Requirements

Applicants must currently be enrolled in a Graduate Degree program at FIU and must exhibit basic proficiency with computers.

Prescribed Courses and Other Requirements

The certificate program will require 15 graduate level credits (5 courses) distributed as follows:

Required Courses: (One course from each of the following 3 categories)

1. Introduction to GIS

CGN 5320	GIS Applications for Civil and Environmental Engineering
GIS 5050	Environmental GIS

Students who demonstrate prior GIS course work or substantial GIS work experience may substitute this requirement with 3 elective credits from the courses listed below with approval of the Program Director.

2. Intermediate/Advanced GIS

CGN 6325	Advanced GIS for Civil and Environmental Engineering
EVR 5044	Advanced GIS and Environmental Data Analysis
GLY 5758	GIS and Spatial Analysis for Earth Sciences
SYA 6356	GIS and Social Research or equivalent

3. Remote Sensing

GLY 5754	Applied Remote Sensing in Earth Sciences or equivalent
----------	--

Electives: (6 credits out of the following)

CCJ 6079	Geospatial Crime Analysis
COP 6727	Advanced Database Systems
EVR 6268	Remote Sensing in Hydrology
EVR 7056	GIS in Water Resources
EVR 7329	Watershed Analysis and Management
GIS 5620	Surveillance, Intelligence, and International Relations
GIS 5935	Topics in GIS
MET 5412	Remote Sensing in Meteorology
PCB 5328	Spatial Ecology
PAD 6710	IT and E-government
PAD 6717	GIS Applications for Urban Management or equivalent

or

Additional intermediate/advanced GIS courses under Category 2 Required Courses,

or

Other GIS-related courses approved by the Program Director in consultation with the Coordinating Committee. Up to 3 credits of a graduate level statistics or data analysis course may be counted towards the Certificate requirements with approval of the Program Director.

Graduate Certificate in Marriage and Family Therapy

Lisa Arango, Director, Psychology

The Graduate Certificate in Marriage and Family Therapy offered through the Department of Psychology, is a 15-credit program that offers advanced education and specialized training in Marriage and Family Therapy. The curriculum concentrates on teaching theory, skills, and techniques for conducting therapy with couples and families within multicultural populations. Students will also gain knowledge and understanding of the legal and ethical guidelines in couples and family therapy, and socio-cultural issues that impact families.

The curriculum will fulfill partial educational requirements for licensure as a Marriage and Family Therapist by the Florida Board of Clinical Social Work, Marriage and Family Therapy, and Mental Health Counseling. Courses from this program can also be applied as elective courses for students in the Counseling Psychology Masters Program offered through the Department of Psychology. This certificate program is open to both degree- and non-degree seeking students.

Admission Requirements

Students applying for the Graduate Certificate in Marriage and Family Therapy must meet the following requirements for admission in addition to submitting the application:

1. Hold a bachelors degree or equivalent from an accredited college or university;
2. Have a minimum GPA of 3.0 on a 4.0 scale during the last two years of upper division coursework;
3. Statement of intent;
4. Two letters of recommendation;
5. Current resume; and
6. Official academic transcript.

Program Requirements

The graduate certificate program requires that students maintain a GPA of 3.0 or higher for successful completion of the program and earn a "B" or better in all courses of the certificate.

Semester I

PCO 5251 Couples and Family Systems 3

And one of the following:

PCO 5750 Contemporary Issues in Family Life and Process 3

CYP 6766 The Psychology of Crosscultural Sensitization in a Multicultural Context 3

Semester II

PCO 5253 Theory and Techniques in Family Therapy 3

PCO 5252 Theory and Techniques in Couples and Marital Therapy 3

And one of the following:

PCO 6254 Principles and Practices in Couples and Family Therapy 3

LAW 6710 Family Law 2-3

Graduate Certificate in Water, Environment and Development Studies

Assefa M. Melesse, Chair, Earth and Environment

Coordinating Committee

Shlomi Dinar, Politics and International Relations

Janvier Gasana, Environmental and Occupational Health

René Price, Earth and Environment

Mike Sukop, Earth and Environment

The goal of the Graduate Certificate in Water, Environment, and Development Studies is to provide students with a multidisciplinary education in the occurrence, characteristics, and management of water resources in South Florida and internationally. Students will learn about the natural occurrence and dynamics of surface and ground water, the key biological and chemical factors affecting water resource quality, and the fundamental linkages between water and development. The graduate certificate program promotes an integrated understanding of the theoretical and practical elements of water resources management. This certificate program is open to degree-seeking students only.

Certificate Requirements

The Graduate Certificate Program requires the successful completion of 15 credit hours of graduate course work. Students must maintain an average GPA of 3.0 or above and must earn a "C" or above in all courses counting toward the certificate. All students in the program are required to take one foundation course and at least one course from both the natural science and social science lists below. The remaining 6 credits may be satisfied with any combination of approved courses listed below. Additional courses may be considered with the approval of the Certificate Chair.

Required Foundation Course

EVR 5332	Integrated Solutions for Water in Environment and Development	3
----------	---	---

Natural Science, Engineering, and Public Health Courses

(all students must take at least one)

PCB 4301	Freshwater Ecology	3
EVR 5219	Water Resources Assessment	3
EVS 5145	Ecotoxicology	3
GLY 5245	Water-Rock Interaction	3
GLY 5266	Stable Isotope Biogeochemistry	3
PCB 5307	Limnology	3
ISC 6153	Environments of a Changing Planet	3
GLY 5827	Hydrogeology	3
BOT 5406	Algal Physiology	3
ENV 5517*	Design of Wastewater Treatment Plants	3
ENV 5666*	Water Quality Management	3
GLY 5754	Applied Remote Sensing in the Earth Sciences	3
CHM 5765	Aquatic Chemistry	3
GLY 5826	Hydrogeologic Modeling	3
GLY 5827	Hydrogeology	3
GLY 5828	Chemical Hydrogeology and Solute Transport	3
EVR 5905	Independent Study (or any other independent study from other departments)	3
EVR 7056	GIS in Water Resources	3
CWR 5125	Groundwater Hydrology	3
CHM 6340*	Organic Geochemistry	3

CWR 5140C*	Ecohydrology	3
ENV 6615	Environmental Impact Assessment	3
GLY 6896	Advanced Topics in Hydrology	3
EVR 7329	Watershed Analysis and Management	3
EVR 6268	Remote Sensing in Hydrology	3
EVR 5069	Wetland Ecology and Management	3

*Engineering graduate courses are offered for graduate students with a relevant engineering background or other students meeting needed prerequisites and applicable criteria. Students must confirm their eligibility, in advance to any registration, with either the Civil and Environmental Engineering Graduate Program Director and the responsible instructor.

Social Science and Public Health Courses

(all students must take at least one)

CPO 5036	Politics of Development	3
SYD 5045	Population and Society	3
INR 5352	Environment and Security	3
EVR 6377	Nat Resource Conservation & Policy	3
ANG 5267	Environmental Anthropology	3
INR 5409	International Law I	3
SYP 5447	Development and Post-Development	3
INR 5507	International Organizations	3
INR 5607	International Relations and Development	3
INR 6056	Environment and Development	3
SYD 6236	International Migration and Refugees	3
PHC 6315	Introduction to Environmental Health Sciences	3
EVR 7322	Methods of Sustainable Resource Management	3
PHC 6410	Health Behavior and Public Health	3
PHC 6425	Legal and Regulatory Aspects of Environmental Health	3
PHC 6520	Public Health Aspects of Foodborne Diseases	3
PHC 6115	Global Perspectives of Env Health in the Caribbean and Latin America	3

Seminar Requirements

Students are expected to attend at least five seminars during each semester that they are enrolled in the Certificate Program. Early in each semester, students will be provided with a schedule of water-related seminars offered in departments across campus. The departments of Biology, Chemistry and Biochemistry, Civil and Environmental Engineering, Earth and Environment, Environmental and Occupational Health, Global and Sociocultural Studies, and Politics and International Relations each sponsor seminar series that commonly include water-related topics.

Students are also required to give a presentation on a water-related theme in a departmental seminar or professional conference.

Graduate Certificate in Women's and Gender Studies

M. Alexandra Cornelius, *Director, Center for Women's and Gender Studies and Associate Teaching Professor*
Victoria Burns, *Assistant Teaching Professor, Women's and Gender Studies*

R. Gabriel Mayora, *Assistant Teaching Professor, Women's and Gender Studies and English*

Michaela Moura-Koçoğlu, *Assistant Teaching Professor, Women's and Gender Studies*

Jessy Abouarab, *Visiting Assistant Professor, Women's and Gender Studies*

The Women's and Gender Studies Graduate Certificate provides students the opportunity to integrate scholarship about women and gender differences into a coherent program of graduate study, i.e., for a Masters and Ph.D. in a variety of disciplines or as a free standing program of graduate study. This certificate program is open to both degree and non-degree seeking students. For more information, please visit our website at: <http://cwgs.fiu.edu/>

Certificate Requirements

Eligibility

- 1) All graduate students in an M.A. or Ph.D. program at FIU are eligible to apply to this program. The Center for Women's and Gender Studies encourages graduate students from all colleges to participate.
- 2) Students with a Baccalaureate degree from an accredited university may be admitted to the graduate certificate program as a non-degree seeking student.
- 3) Undergraduate students in their senior year may take graduate level courses to complete their graduate certificate as a post-baccalaureate certificate.

Admissions Requirements

Students applying for the Graduate Certificate in Women's and Gender Studies must meet the following requirements for admission in addition to submitting the application:

- 1) Hold a bachelor's degree or equivalent from an accredited college or university;
- 2) Have a minimum GPA of 3.0 on a 4.0 scale during the last two years of upper division coursework;
- 3) Statement of intent;
- 4) Current resume;
- 5) Official academic transcript.

Certificate candidates must complete a total of 15 credit hours at the **5000 level or higher**. Students must maintain an average GPA of 3.0 or above and must earn a "C" or above in all courses counting toward the certificate. **6** credit hours from the core requirements + **9** credit hours from the list of graduate level electives = 15 credit hours:

Core Requirements (6 credits)

Choose two of the following courses or from any other graduate level WST courses:

WST 5116	Gender Violence and the Law: Global Perspectives
WST 5507/ LIT 5556	Feminist Theory
WST 5618	Gender and Genocide
WST 5935	WST Special Topics
WST 5946	Women's Studies Internship
WST 5936	Women and Leadership
WST 5905	Independent Study

Graduate Level Electives (9 credits)

Choose from approved list of graduate level Women's and Gender Studies electives. These include:

EDH 6050C	Women in Higher Ed
EDH 7931	Seminar on Class, Gender, and Race in Higher Ed

INR 5088	Feminism and IR
LBS 5155	Workplace Diversity
LBS 5215	Women in the Workplace
SYD 5708	Advanced Race, Gender, Sexuality: Entanglements Across Time and Space

For more options, please see our current full list of approved courses on our website: <http://cwgs.fiu.edu/>.

Students may apply up to three credit hours of thesis or dissertation research to the certificate if the research has a prominent focus on women and gender.

College of Arts, Sciences and Education

Dean	Michael R. Heithaus
Senior Associate Dean, School of Education and Human Development	Laura Dinehart
Senior Associate Dean, School of Environment, Arts, and Society	Heather Russell
Senior Associate Dean, School of Integrated Science and Humanity	Walter Van Hamme
Associate Dean, Undergraduate Studies	Maricel Cigales
Associate Dean, Graduate Studies	Brian Raue
Associate Dean, Research	Rita Teutonico
Assistant Dean, Accreditation and Assessment	Deborah J. Hasson
Assistant Dean, College Operations	Hector Junco
Director of Liberal Studies	Wanda Raiford
Associate Director of Liberal Studies	Heather Blatt

Chairpersons and Program Directors:

Biological Sciences	De Etta Kay Mills
Chemistry and Biochemistry	Yong Cai
Counseling, Recreation and School Psychology	Aaron Kuntz
Earth and Environment	Leonard Scinto
Educational Leadership and Policy Studies	Daniel Saunders
English	Anna Luszczynska
Forensic Science	De Etta Mills
Liberal Studies	Wanda Raiford
Linguistics	Anna Luszczynska
Mathematics and Statistics	Louis Roder Tcheugoue Tebou
Philosophy	Paul R. Warren
Physics	Werner Boeglin
Psychology	Jeremy Pettit
Teaching and Learning(Interim)	Sara Mathews
Women's and Gender Studies	Marie Alexandra Cornelius

Faculty

Abad, Carla V., Ph.D. (Florida International University), Assistant Teaching Professor, Psychology
Abouarab, Jessy, Ph.D. (Florida International University), Visiting Assistant Professor, Women's and Gender Studies
Abrahamyan, Tigran., Ph.D. (Florida International University), Assistant Teaching Professor, Physics
Acuna-Borrero, Yasbel, Ph.D. (University of Miami), Assistant Teaching Professor, English
Adelman, Andrea, Ph.D. (University of Miami), Clinical Assistant Professor, Early Childhood Education
Allen, Amanda N., Ph.D. , (University of Missouri), Assistant Professor, Counseling, Recreation and School Psychology
Allen, Leila M., Ph.D. (University of California Irvine), Assistant Teaching Professor and Director of Behavioral Neuroscience, Psychology
Allen, Timothy A., Ph.D. (University of California-Irvine), Associate Professor, Psychology
Allen-Hermanson, Sean J., Ph.D. (University of

Toronto), Professor, Philosophy
Almirall, Jose R., Ph.D. (University of Strathclyde, Scotland), Professor, Chemistry and Biochemistry
Amorim, Jacqueline, Ph.D. (University of Florida), Associate Teaching Professor, English
An, Dongmei, M.S. (Mississippi State University), Associate Teaching Professor, Mathematics and Statistics
Anderson, Elizabeth, Ph.D. (University of Georgia), Associate Professor, Earth and Environment
Anderson, Emily, Ph.D. (Pennsylvania State University), Assistant Professor, International/Intercultural Education Educational Policy Studies
Anderson, Matthew, Ph.D. (Oklahoma State University), Assistant Teaching Professor, Biological Sciences
Anderson, Nicholas, M.A. (Florida International University), Assistant Teaching Professor, English
Anderson, William T., Ph.D. (Swiss Federal Institute of Technology, Zurich), Professor, Earth and Environment Associate Vice President, Office of Research and Economic Development
Arango, Lisa L., Ph.D. (Florida International University), Teaching Professor, Psychology
Aylsworth, Timothy, Ph.D. (University of Wisconsin Madison), Assistant Professor, Philosophy
Bagner, Daniel M., Ph.D. (University of Florida), Professor, Psychology
Bahrack, Lorraine, Ph.D. (Cornell University), Distinguished University Professor, Psychology
Bang, Hyejin, Ph.D. (University of Minnesota), Associate Professor, Recreation and Sport Management, Counseling, Recreation and School Psychology
Baraloto, Christopher J., Ph.D. (University of Michigan), Professor, Biological Sciences, Director, International Center for Tropical Botany, and Associate Director of the Institute of Environment
Barbetta, Patricia, Ph.D. (Ohio State University), Associate Professor, Special Education, Teaching and Learning
Barbieri, Manuel A., Ph.D. (Universidad Nacional de San Luis, Argentina), Professor, Biological Sciences
Barnes, Marie, Ph.D. , (Florida International University), Assistant Teaching Professor, Psychology
Barrett, Lynne M., M.F.A. (University of North Carolina-Greensboro), Professor, English
Becker, David A., Ph.D. (Massachusetts Institute of Technology), Associate Professor, Chemistry and Biochemistry
Beer, Michelle C., Ph.D. (University of Pittsburgh), Associate Professor, Philosophy
Bekker, Leonid, M.S. (Florida International University), Teaching Professor, Mathematics
Benaduce, Ana Paula, Ph.D. (Florida International University), Assistant Teaching Professor, Biological Sciences
Bennett, Bradley C., Ph.D. (University of North Carolina-Chapel Hill), Professor, Biological Sciences and Earth and Environment
Bennett, Kyle, Ed.D. (Florida Atlantic University), Assistant Professor, Special Education, Teaching and Learning
Bentley-Baker, Dan B., M.F.A. (Florida International University), Teaching Professor, English
Berk, Lynn, Ph.D. (Purdue University), Professor Emerita,

English

- Berry, John P., Ph.D.** (Cornell University), Associate Professor, Chemistry and Biochemistry
- Bhaskar, Maruthi Sridhar B., Ph.D.** (Mississippi State University), Associate Professor, Earth and Environment
- Bhat, Mahadev G., Ph.D.** (University of Tennessee-Knoxville), Professor, Earth and Environment
- Bickman, Leonard, Ph.D.**, (City University of New York), Research Professor, Psychology
- Bigger, Charles H., Ph.D.** (Florida State University), Professor Emeritus, Biological Sciences
- Bigliassi, Marcelo, Ph.D.** (Brunel University, UK), Assistant Professor, Physical Education, Kinesiology, and Exercise Science, Teaching and Learning
- Blanchard, Jesse, Ph.D.** (Florida International University), Assistant Teaching Professor, Earth and Environment
- Blanco, Richard, M.F.A.** (Florida International University), Associate Professor, English
- Blanton, Linda, Ed.D.** (Indiana University), Professor Emeritus, Special Education, Teaching and Learning
- Blatt, Heather E., Ph.D.** (Fordham University), Associate Professor, English and Associate Director, Liberal Studies
- Bleiker, Charles, Ph.D.** (Stanford University), Associate Professor, Early Childhood Education, Teaching and Learning
- Bliss, Leonard, Ph.D.** (Syracuse University), Professor Emeritus, Statistics and Research Design, Counseling, Recreation and School Psychology
- Bluck, Asa, Ph.D.** (University of Nottingham-UK), Assistant Professor, Physics
- Boeglin, Werner U., Ph.D.** (University of Basel, Switzerland), Professor and Chair, Physics
- Bolson, Jessica, Ph.D.** (University of Miami), Teaching Professor, Earth and Environment
- Bone, Richard A., Ph.D.** (University of West Indies, Jamaica), Professor, Physics
- Boswell, Kevin Mershon, Ph.D.** (Louisiana State University), Associate Professor, Biological Sciences
- Bracken-Grissom, Heather, Ph.D.** (University of Louisiana at Lafayette), Associate Professor, Biological Sciences and Assistant Director of the Coastline and Oceans, Division of the Institute of the Environment
- Bradham-Cousar, Michelle, Ph.D.** (University of South Florida), Clinical Assistant Professor, Counselor Education, Counseling, Recreation and School Psychology
- Bray, David B., Ph.D.** (Brown University), Professor, Earth and Environment
- Brew, Eric, Ph.D.** (Arizona State University), Associate Professor, Science Education, Teaching and Learning
- Brinn, Lisa S., Ph.D.** (University of Sao Paulo), Teaching Professor, Biological Sciences
- Brinn, Richard, Ph.D.** (University of Sao Paulo State), Teaching Professor, Biological Sciences
- Brookes, David T., Ph.D.** (Rutgers University), Assistant Professor, Physics
- Bruk-Lee, Valentina, Ph.D.** (University of South Florida), Associate Professor, Psychology
- Bukhryakov, Kostantin, Ph.D.** (Lomonosov Moscow State University) Assistant Professor, Chemistry and Biochemistry
- Burgman, Robert J., Ph.D.** (George Mason University), Associate Professor, Earth and Environment
- Burkepile, Deron E., Ph.D.** (Georgia Institute of Technology), Assistant Professor, Biological Sciences
- Burns, James, Ed.D.** (George Washington University), Associate Professor, Curriculum and Instruction, Teaching and Learning
- Burns, Victoria, Ph.D.** (University of Miami), Assistant Teaching Professor, Women's and Gender Studies
- Burt, Isaac, Ph.D.** (University of Central Florida), Associate Professor, Counselor Education, Counseling, Recreation and School Psychology
- Butler, Alexander, Ph.D.** (Indiana University-Bloomington), Visiting Clinical Assistant Professor, Social Studies Education, Teaching and Learning
- Butler, Mark J. IV, Ph.D.** (Florida State University), Walter and Rosalie Goldberg Professor of Tropical Ecology and Conservation, Biological Sciences
- Buzzell, George, Ph.D.**, (George Mason University), Assistant Professor, Psychology
- Cadle, Nathaniel E., Ph.D.** (University of North Carolina-Chapel Hill), Associate Professor, English
- Caglar, Umut, Ph.D.** (Case Western Reserve University), Associate Teaching Professor, Mathematics and Statistics
- Cai, Yong, Ph.D.** (Nankai University, China), Professor and Chairperson, Chemistry and Biochemistry and Southeast Environmental Research Center
- Campbell, Justin E., Ph.D.**, (Florida International University), Assistant Professor, Biological Sciences
- Cano, Patricia, M.F.A.**, (Florida International University) Associate Teaching Professor, English
- Cao, Chongsheng, Ph.D.** (University of California-Irvine), Professor, Mathematics and Statistics
- Carmel, Justin, Ph.D.**, (Miami University-Ohio) Assistant Professor, Chemistry and Biochemistry
- Carter, Phillip M., Ph.D.** (Duke University), Associate Professor and Director of the Center for the Humanities in the Urban Environment, English
- Casines, Gisela, Ph.D.**, (Florida International University) Associate Dean Emerita, English
- Castro, Anne-Margaret, Ph.D.**, (Vanderbilt University), Assistant Professor, English
- Castro, Clinton, Ph.D.** (University of Wisconsin Madison), Assistant Professor, Philosophy
- Castro, Juan, M.S.** (Florida International University), Assistant Teaching Professor, Mathematics and Statistics
- Catenazzi, Alessandro, Ph.D.**, (Florida International University), Assistant Professor, Biological Sciences
- Chakraborty, Mrinal, Ph.D.** (Miami University-Ohio) Assistant Teaching Professor, Chemistry and Biochemistry
- Chang, David, M.F.A.** (Shanghai Jiao Tong University), Professor, Art Education, Teaching and Learning
- Chang, Mido, Ph.D.** (Teachers College, Columbia University), Associate Professor, Educational Research, Counseling, Recreation and School Psychology
- Chapagain, Prem P., Ph.D.** (Florida International University), Professor, Physics
- Charman, Stephen D., Ph.D.** (Iowa State University), Associate Professor, Psychology
- Chatfield, David C., Ph.D.** (University of Minnesota), Professor, Chemistry and Biochemistry
- Chen, Zhenmin, Ph.D.** (University of Texas-Dallas), Professor (In Memoriam), Mathematics and Statistics
- Chinelly, Cynthia, Ph.D.**, (University of Arkansas), Teaching Professor and Associate Director, Writing and

- Rhetoric Program, English*
- Christ, Rebecca C., Ph.D.**, (University of Missouri), Assistant Professor, Social Studies Education, Teaching and Learning
- Christian, Shawn, Ph.D.** (University of Michigan), Associate Professor, English
- Chung, Bong Kil, Ph.D.** (Michigan State University), Professor Emeritus, Philosophy
- Chung, Mi Ryoung, Ph.D.** (University of Illinois), Visiting Assistant Teaching Professor, Recreation and Sport Management, Counseling, Recreation and School Psychology
- Cigales, Maricel, Ph.D.** (Florida International University), Teaching Professor, Psychology and Associate Dean, College of Arts, Sciences and Education
- Collado-Vides, Claudia Maria, Ph.D.** (National University of Mexico), Teaching Professor and Associate Chairperson, Biological Sciences
- Collins, Laurel S., Ph.D.** (Yale University), Professor, Earth and Environment and Biological Sciences
- Collins, Timothy M., Ph.D.** (Yale University), Professor and Chairperson, Biological Sciences
- Comer, Jonathan S., Ph.D.** (Temple University), Professor, Psychology
- Cornelius, Marie Alexandra, Ph.D.** (Washington University, St. Louis), Director, Center for Women's and Gender Studies
- Cosyn, Wim, Ph.D.** (Ghent University), Assistant Professor, Physics
- Cox, Christian, Ph.D.** (University of Texas-Arlington), Assistant Professor, Biological Sciences
- Coxe, Stefany, Ph.D.** (Arizona State University), Associate Professor, Psychology
- Cozza, John, Ph.D.** (University of Miami), Associate Teaching Professor, Biological Sciences
- Cramer, Elizabeth, Ph.D.** (University of Miami), Professor, Special Education, Teaching and Learning
- Creeden, Michael K., M.F.A.** (Florida International University), Teaching Professor and Associate Chair, English
- Crowl, Todd A., Ph.D.** (University of Oklahoma), Professor, Biological Sciences and Director, Institute of Environment
- Cumming, Michelle, Ph.D.** (University of Florida), Assistant Professor, Special Education, Teaching and Learning
- Dare, Emily A., Ph.D.** (University of Minnesota), Associate Professor, Science Education, Teaching and Learning
- Dares, Christopher, J., Ph.D.** (York University, Canada), Assistant Professor, Chemistry and Biochemistry
- Darici, Yesim, Ph.D.** (University of Missouri), Professor, Physics
- Daruwala, Maneck H., Ph.D.** (University of Rochester), Associate Professor, English
- De Caprio, Anthony P., Ph.D.** (Albany Medical College), Associate Professor, Chemistry and Biochemistry
- De Carli, Laura, Ph.D.** (University of California-Los Angeles), Professor, Mathematics and Statistics
- Dean, Debra L., M.F.A.** (University of Oregon), Professor, English
- DeFrancesco, Charmaine, Ph.D.** (Florida State University), Associate Professor, Physical Education, Kinesiology and Exercise Science, Teaching and Learning
- DeGennaro, Matthew J., Ph.D.** (New York University), Associate Professor, Biological Sciences
- Delgado, Milagros P., Ph.D.** (University of Miami), Teaching Professor, Coordinator of Laboratories at BBC and Undergraduate Program Director, Chemistry and Biochemistry
- Dewsbury, Bryan M., Ph.D.** (Florida International University), Associate Professor, Biological Sciences
- Dick, Anthony S., Ph.D.** (Temple University), Professor, Psychology
- Dickson, Vernon G., Ph.D.** (Arizona State University), Associate Professor, English
- Dinehart, Laura, Ph.D.** (University of Miami), Senior Associate Dean, School of Education and Human Development, College of Arts, Sciences and Education
- Donnelly, Maureen A., Ph.D.** (University of Miami), Professor, Biological Sciences and Counselor to the Deans, College of Arts, Sciences and Education
- Dorn, Nathan J., Ph.D.** (Michigan State University), Associate Professor, Biological Sciences
- Dou, Remy, Ph.D.** (Florida International University), Assistant Professor, Science Education, Teaching and Learning
- Draghici, Tedi C., Ph.D.** (Michigan State University), Associate Professor, Mathematics and Statistics
- Draper, Grenville, Ph.D.** (University of the West Indies, Jamaica), Professor, Earth and Environment
- Dufresne, John L., M.F.A.** (University of Arkansas), Professor, English
- Duhamel, Denise L., M.F.A.** (Sarah Lawrence College), Professor, English
- Dunn, Marvin, Ph.D.**, (University of Tennessee), Professor Emeritus, Psychology
- Duran, Alain, Ph.D.**, (Florida International University), Assistant Teaching Professor, Biological Sciences
- Duran, Antonio, Ph.D.** (Ohio State University), Assistant Professor, Higher Education, Educational Policy Studies
- Dwyer, Eric, Ph.D.** (The University of Texas at Austin), Associate Professor, TESOL and Modern Language Education, Teaching and Learning
- Eaton, Asia Anna, Ph.D.** (University of Chicago), Associate Professor, Psychology and Women's and Gender Studies
- Eddy, Sarah, Ph.D.** (Oregon State University), Assistant Professor, Biological Sciences
- Edward, Julian K., Ph.D.** (Massachusetts Institute of Technology), Professor, Mathematics and Statistics
- Edwards, Kirsten T., Ph.D.** (Louisiana State University), Associate Professor, Higher Education, Educational Policy Studies
- Ehlen, Jason, M.F.A.** (Florida International University), Assistant Teaching Professor, English
- Eirin-Lopez, Jose M., Ph.D.** (University of A Coruña Spain), Associate Professor, Biological Sciences
- Ellis, Joshua A., Ph.D.** (University of Minnesota), Associate Professor, Science Education, Teaching and Learning
- Elmore, Darrel, Ph.D.** (Arizona State University), Teaching Professor, English
- Erber, Joan T., Ph.D.** (St. Louis University), Professor Emeritus, Psychology
- Evans, Jacqueline R., Ph.D.** (Florida International University), Associate Professor, Psychology
- Evans, Sian, Ph.D.** (University College of Wales), Associate Teaching Professor, Biological Sciences
- Fabiano, Gregory, Ph.D.** (State University of New York at

- Buffalo*), Professor, Psychology
- Fain, Stephen M., Ed.D.** (*Teachers College, Columbia University*), Professor Emeritus, Leadership and Professional Studies
- Fang, Ming, Ph.D.** (*Ohio State University*), Associate Teaching Professor, English
- Feigenbaum, Paul T., Ph.D.** (*University of Michigan*), Associate Professor, English
- Fernandez, Maria, L. Ph.D.** (*The University of Georgia*) co-Director FIUteach, and Associate Professor, Mathematics Education, Teaching and Learning
- Fernandez-Lima, Francisco, Ph.D.** (*Pontificia Universidade Católica do Rio de Janeiro*), Professor, Chemistry and Biochemistry, and Director of the Advanced Mass Spectrometry
- Fiebig, Rudolf, Ph.D.** (*University of Munster, Germany*), Professor, Physics
- Fine, Joyce, Ed.D.** (*Florida International University*), Associate Professor, Literacy Education, Teaching and Learning
- Fisher, Ronald P., Ph.D.** (*The Ohio State University*), Professor, Psychology
- Foerch, Daniela F., Ph.D.** (*Barry University*), Clinical Assistant Professor, Early Childhood Education, Teaching and Learning
- Fournier, Danielle, Ph.D.**, (*Dartmouth College*), Instructor, Psychology
- Fourqurean, James W., Ph.D.** (*University of Virginia*), Distinguished University Professor, Biological Sciences, Director, Division of Coastlines and Oceans and Associate Director of the Institute of Environment
- Fox, Domitila, M.S.** (*University of Miami*), University Teaching Professor, Mathematics and Statistics
- Francisco-Ortega, Javier, Ph.D.** (*University of Birmingham, Great Britain*), Professor, Biological Sciences
- Frazier, Leslie D., Ph.D.** (*Syracuse University*), Associate Professor, Psychology
- Frazier, Stacy, Ph.D.** (*Indiana University*), Associate Professor, Psychology
- Fuller, Edgar J., Ph.D.** (*University of Georgia*) Professor, Mathematics and Statistics and Director, Center for the Transformation of Teaching Mathematics
- Furr, Jami M., Ph.D.** (*Temple University*), Clinical Assistant Professor, Psychology
- Furton, Kenneth G., Ph.D.** (*Wayne State University*), Professor, Chemistry and Biochemistry and Provost, Executive Vice President, and Chief Operating Officer
- Gaiser, Evelyn E., Ph.D.** (*University of Georgia*), Professor, Biological Sciences and George M. Barley, Jr. Endowed Chair of Everglades Research
- Gal, Ciprian G.S., Ph.D.** (*University of Memphis*), Associate Professor, Mathematics and Statistics
- Galvez, Maydelin, M.S.** (*Florida International University*), Assistant Teaching Professor, Mathematics and Statistics
- Gann, Daniel, Ph.D.** (*Florida International University*), Assistant Professor, Biological Sciences
- Gaona-Narvaez, Tatiana, Ph.D.** (*Florida International University*), Assistant Teaching Professor, Earth and Environment
- Garcia, Arlene, Ph.D.** (*Florida International University*), Assistant Teaching Professor, Psychology
- Gardinali, Piero R., Ph.D.** (*Texas A&M University*), Professor, Chemistry and Biochemistry and Director, Southeast Environmental Research Center
- Gavassa, Sat, Ph.D.** (*Florida International University*), Associate Teaching Professor, Biological Sciences
- Geiger, John H., Ph.D.** (*Florida International University*), Associate Teaching Professor, Biological Sciences
- George, Florence, Ph.D.** (*University of South Florida*), Associate Professor and Associate Chairperson, Mathematics and Statistics
- Gerstman, Bernard S., Ph.D.** (*Princeton University*), Professor, Physics
- Ghai, Gauri, Ph.D.** (*Iowa State University*), Associate Professor, Mathematics and Statistics
- Gierczyk, Marta, Ph.D.** (*University of Miami*) Assistant Teaching Professor, English
- Gillespie, Megan, Ph.D.**, (*University of Miami*), Assistant Teaching Professor, Chemistry and Biochemistry
- Gillespie, Michael P., Ph.D.** (*University of Wisconsin*), Professor, English
- Gillespie, Paula, Ph.D.**, (*University of Wisconsin -Madison*), Professor Emerita, English
- Goldberg, Walter M., Ph.D.** (*University of Miami*), Professor Emeritus, Biological Sciences
- Golden, Andrew, M.F.A.**, (*Florida International University*) Teaching Professor, English
- Goldfarb, Deborah A., Ph.D.**, (*University of California*), Assistant Professor, Psychology
- Gonzalez, Liana, Ed.D.** (*Florida International University*), Associate Teaching Professor, Special Education, Teaching and Learning
- González, Raul, Ph.D.** (*San Diego State University*), Professor, Psychology
- Goonen, Norma M., Ed.D.** (*University of Florida*), Clinical Associate Professor, Higher Education, Educational Policy Studies
- Grafals, Michael, Ph.D.**, (*University of California-Santa Barbara*), Assistant Teaching Professor, English
- Grant, Justin, Ph.D.** (*University of Florida*), Associate Teaching Professor and Associate Director of the Writing and Rhetoric Program, English
- Grantcharov, Gueo, Ph.D.** (*Sofia University, Bulgaria*), Professor, Mathematics and Statistics
- Graves, A. Palmer, Ph.D.** (*University of Oklahoma*), Teaching Professor, and Coordinator of General Chemistry Laboratories, Chemistry and Biochemistry
- Granados-Cifuentes, Camila, Ph.D.** (*University of Louisiana-Lafayette*), Assistant Teaching Professor, Biological Sciences
- Graziano, Paulo A., Ph.D.** (*University of North Carolina-Greensboro*), Professor, Psychology
- Gregory, Christine, M.A.** (*Florida International University*) Associate Teaching Professor, English and Director, Digital Writing Studio
- Griffith, Shayl, Ph.D.** (*University of Massachusetts -Amherst*), Assistant Professor, Counseling, Recreation and School Psychology
- Gulati, Sneha, Ph.D.** (*University of South Carolina*), Professor, Mathematics and Statistics
- Guo, Lei, Ph.D.** (*University of Vanderbilt*), Associate Professor, Physics
- Guo, Yanqiu, Ph.D.** (*University of Nebraska*), Assistant Professor, Mathematics and Statistics
- Guess, Jessica, Ph.D.** (*Minnesota State University*), Assistant Teaching Professor, English
- Guy, Kathleen, M.S.** (*University of Miami*) Associate Teaching Professor, Mathematics and Statistics

- Haggerty, Stephen E., Ph.D.** (London University), Distinguished Research Professor
- Harborne, Alastair, Ph.D.** (University of Exeter), Assistant Professor, Biology
- Hardy, Kenneth, Ph.D.** (Tulane University), Professor Emeritus, Physics
- Harris, Kenton S., Ph.D.** (University of Miami), Teaching Professor, Philosophy
- Harrison, Kimberly L., Ph.D.** (Louisiana State University), Professor and Director, of Writing Programs, English
- Hart, Katie C., Ph.D.** (State University of New York at Buffalo), Associate Professor, Psychology
- Harvey, Bruce A., Ph.D.** (Stanford University), Associate Professor, English
- Hauptli, Bruce W., Ph.D.** (Washington University), Professor Emeritus, Philosophy
- Hawes, Samuel, Ph.D.** (Sam Houston State University) Research Assistant Professor, Psychology
- Hayes, Timothy, Ph.D.** (University of Southern California), Assistant Professor, Psychology
- Hazari, Zahra, Ph.D.** (University of Toronto), Associate Professor, Science Education, Teaching and Learning
- He, Jin, Ph.D.** (Arizona State University), Assistant Professor, Physics
- Head, Lyndsay, Ph.D.** (Louisiana State University) Assistant Teaching Professor, English
- Heinen, Joel T., Ph.D.** (University of Michigan), Professor, Earth and Environment
- Heithaus, Michael R., Ph.D.** (Simon Fraser University, Canada), Professor, Biological Sciences and Dean, College of Arts, Sciences and Education
- Herriott, Arthur, Ph.D.** (University of Florida), Professor Emeritus, Chemistry and Biochemistry and Dean Emeritus, College of Arts, Sciences and Education
- Hickey-Vargas, Rosemary L., Ph.D.** (Massachusetts Institute of Technology), Professor Emeritus, Earth and Environment
- Hoder-Salmon, Marilyn, Ph.D.,** (University of New Mexico), Associate Professor Emerita, English
- Hopkins, Tometro, Ph.D.** (Indiana University), Associate Professor, English
- Houle, Patricia A., M.S.** (Florida International University), Associate Teaching Professor, Earth and Environment
- Hower, Jeremy, Ph.D.** (University of Georgia), Associate Teaching Professor, Mathematics and Statistics
- Huang, Kai, Ph.D.** (Michigan State University), Associate Professor, Mathematics and Statistics
- Huseby, Amy, Ph.D.,** (University of Wisconsin-Madison), Assistant Teaching Professor, English
- Hutchinson, Glenn, Ph.D.,** (University of North Carolina-Greensboro), Associate Professor and Director of the Center for Excellence in Writing, English
- Iuspa, Flavia, Ed.D.** (Florida International University), Associate Teaching Professor and Director of International Initiatives, Curriculum and Instruction, Teaching and Learning
- Jaffe, Rudolf, Ph.D.** (Indiana University), Professor Emeritus, Chemistry and Biochemistry
- Jagessar, Shivanni, M.S.** (Florida International University), Associate Teaching Professor, Mathematics and Statistics
- Jayachandran, Krishnaswamy, Ph.D.** (Kansas State University), Professor and Graduate Director for PSM in Environmental Policy and Management
- Jenkins, Clinton, Ph.D.** (University of Tennessee), Associate Professor, Earth and Environment
- Jiang, Haiyan, Ph.D.** (University of Utah), Professor, Earth and Environment
- Joens, Jeffrey A., Ph.D.** (Indiana University), Professor, Chemistry and Biochemistry
- Johnson, Kenneth E., Ph.D.** (Brown University), Associate Professor, English
- Jones, Garland D., Ph.D.,** (Florida International University), Visiting Assistant Teaching Professor, Recreational Therapy, Counseling, Recreation and School Psychology
- Kadel, Kamal., Ph.D.** (Florida International University), Assistant Teaching Professor, Physics
- Kafkoulis, George, Ph.D.** (California Institute of Technology), Associate Professor, Mathematics and Statistics
- Kavallieratos, Konstantinos, Ph.D.** (Yale University), Professor, Chemistry and Biochemistry
- Kelley, Mark, Ph.D.,** (University of San Diego) Assistant Professor, English
- Kenny, Maureen C., Ph.D.** (Nova-Southeastern University), Professor, Psychology
- Khoddamzadeh, Amir A., Ph.D.** (University of Putra, Malaysia), Associate Teaching Professor, and Undergraduate Program, Director, Earth and Environment
- Kibria, Golam M., Ph.D.** (University of Western Ontario), Professor, Mathematics and Statistics
- Kim, Leong, Ph.D.** (Rutgers University), Associate Professor, Biological Sciences
- King, Barbara, Ph.D.** (The University of Texas at Austin), Assistant Professor, Mathematics Education, Teaching and Learning
- Kizka, Jeremy, Ph.D.** (University of La Rochelle), Assistant Professor, Biological Sciences
- Kokozos, Michael, Ph.D.** (University of Pennsylvania) Assistant Teaching Professor, Curriculum and Instruction, Teaching and Learning
- Kolek, Ethan A., Ed.D.,** (University of Massachusetts-Amherst), Clinical Associate, Higher Education Educational Policy Studies
- Kominoski, John S., Ph.D.** (University of Georgia), Assistant Professor, Biological Sciences
- Kos, Lidia, Ph.D.** (University of California-Berkeley), Professor and Associate Dean, University Graduate School and Associate Vice President, Research and Development, Biological Sciences
- Kostrna, Jason R., Ph.D.** (Florida State University), Assistant Professor, Physical Education, Kinesiology and Exercise Science, Teaching and Learning
- Kouemou, Solange P., Ph.D.** (University Louis Pasteur, Strasbourg, France), Teaching Professor, Mathematics and Statistics
- Kovacs, George, Ph.D.** (University of Louvain), Professor Emeritus, Philosophy
- Kramer, Laird H., Ph.D.** (Duke University), Professor, Physics and Director, STEM Transformation Institute
- Kravec, Marcy E., Ph.D.** (Florida International University), Associate Teaching Professor, Biological Sciences and Associate Director for Faculty and Leadership and Success, Office of the Provost
- Kundu, Anindya, Ph.D.** (New York University), Assistant Professor, Higher Education, Educational Policy Studies
- Kuntz, Aaron M., Ph.D.,** (University of Alabama) Clinical Professor and Chairperson, Counseling, Recreation and

- School Psychology*
- Kuntz, Ashley F., Ph.D.**, (University of Alabama) *Clinical Associate Professor, Higher Education, Educational Policy Studies*
- Lainoff, Alexis, Ph.D.** (University of California, San Francisco), *Assistant Teaching Professor, Biological Sciences*
- Laird, Angela R., Ph.D.** (University of Wisconsin), *Professor, Physics*
- Laird, Robert W., Ph.D.** (Florida State University), *Clinical Professor, Physics*
- Landorf, Hilary, Ph.D.** (New York University), *Associate Professor, International/Intercultural Education, Educational Policy Studies*
- Landrum, John T., Ph.D.** (University of Southern California), *Professor Emeritus, Chemistry and Biochemistry*
- Lankar, Veronique, Ph.D.** (Universite Pierre/Marie Curie), *Associate Teaching Professor, Physics*
- Lazarus, Philip J., Ph.D.** (University of Florida), *Associate Professor, School Psychology, Counseling, Recreation and School Psychology*
- Leatherman, Stephen P., Ph.D.** (University of Virginia), *Professor, Earth and Environment*
- Leboeuf, Céline, Ph.D.** (Harvard University), *Assistant Professor, Philosophy*
- Leckband, Mark A., Ph.D.** (Purdue University) *Associate Professor Emeritus, Mathematics and Statistics*
- Lee, David, Ph.D.** (Rutgers University), *Professor Emeritus, Biological Sciences*
- Lees, Watson J., Ph.D.** (Harvard University), *Associate Professor and Biochemistry Undergraduate Program Director, Chemistry and Biochemistry*
- Leger, Shewonda, Ph.D.**, (Michigan State University) *Assistant Professor, English*
- Leness, Thomas G., Ph.D.** (Columbia University), *Professor, Mathematics and Statistics*
- Leng, Fenfei, Ph.D.** (University of Mississippi), *Professor, Chemistry and Biochemistry*
- Levitt, Mary J., Ph.D.** (Syracuse University), *Professor Emerita, Psychology*
- Li, Amy, Ph.D.**, (University of Northern Colorado) *Assistant Professor, Higher Education, Educational Policy Studies*
- Li, Bao Qin, Ph.D.** (University of Maryland), *Professor, Mathematics and Statistics*
- Li, Hebin, Ph.D.** (Texas A&M University), *Associate Professor, Physics*
- Li, Jun, Ph.D.** (Oklahoma State University), *Associate Professor, Biological Sciences*
- Li, Wenzhi, Ph.D.** (Chinese Academy of Sciences), *Professor, Physics*
- Li, Xiaosheng, Ph.D.** (University of California-Los Angeles), *Associate Professor, Mathematics and Statistics*
- Liang, Lu, Ph.D.** (University of Hawaii at Mānoa), *Assistant Teaching Professor, Psychology*
- Liberles, Jessica U., Ph.D.** (University of Bergen, Norway), *Assistant Professor, Biological Sciences*
- Lichter, Joseph, Ph.D.** (Emory University), *Senior Associate Teaching Professor, and Director of Pre-Health Advising, Chemistry and Biochemistry*
- Licklitter, Robert, Ph.D.** (University of California-Davis), *Professor, Psychology*
- Lisenbee, William, M.A.** (Florida International University), *Assistant Teaching Professor, English*
- Liu, Hong, Ph.D.** (Florida International University), *Professor, Earth and Environment*
- Liu, Yaobin, Ph.D.** (Stony Brook University), *Assistant Teaching Professor, English*
- Liu, Yuan, Ph.D.** (University of Rochester), *Associate Professor, Chemistry and Biochemistry*
- Logan-McKibben, Sandra, Ph.D.**, (University of Florida), *Clinical Assistant Professor, Counselor Education, Counseling, Recreation and School Psychology*
- Lopez de la Vega, Ramon, Ph.D.** (University of Miami), *Associate Professor and Associate Chair, Chemistry and Biochemistry*
- Loughrey, Tara, Ph.D.** (Florida Institute of Technology), *Instructor, Psychology*
- Lovett, Maria, Ph.D.** (University of Illinois at Urbana-Champaign), *Clinical Associate Professor, Urban Education and Project Director of the Education Effect, Learning Technologies and Foundations, Educational Policy Studies*
- Lucas, Teresa, Ph.D.** (Florida State University), *Teaching Professor, TESOL and Modern Language Education, Teaching and Learning*
- Lupas, Kellina, Ph.D.** (University at Buffalo-SUNY), *Assistant Professor, School Psychology, Counseling, Recreation and School Psychology*
- Luszczynska, Ana G., Ph.D.** (State University of New York-Buffalo), *Associate Professor, Chairperson, and Interim Program Director for Linguistics, English*
- Lynch, Jacqueline, Ph.D.** (University of British Columbia), *Associate Professor, Literacy Education, Teaching and Learning*
- MacFarlane, Andrew W., Ph.D.** (Harvard University), *Associate Professor, Earth and Environment*
- Malesh, Vytautas, Ph.D.**, (Wayne State University) *Assistant Teaching Professor, English*
- Malone, Sparkle, Ph.D.**, (University of Alabama), *Assistant Professor, Biological Sciences*
- Markowitz, Pete E., Ph.D.** (College of William and Mary), *Professor, Physics*
- Marshall, Jr., Eugene J., Ph.D.** (University of Wisconsin-Madison), *Associate Professor, Philosophy*
- Martorana, Christine, Ph.D.**, (Florida State University) *Assistant Teaching Professor, English*
- Mathews, Sarah, Ph.D.** (Clemson University), *Interim Chair, Associate Professor, Social Studies Education, Teaching and Learning*
- Mattfeld, Aaron T., Ph.D.** (University of California-Irvine), *Associate Professor, Psychology*
- Maurrasse, Florentin, Ph.D.** (Columbia University), *Professor, Earth and Environment*
- Maxwell, Jr., Oren V., Ph.D.** (State University of New York-Stony Brook), *Professor, Physics*
- Mayora, R. Gabriel, Ph.D.** (University of Florida), *Assistant Teaching Professor, Women's and Gender Studies*
- Mayoral, Jaime, Ph.D.** (University of Almeria, Spain), *Assistant Teaching Professor and Laboratory Coordinator, Biological Sciences*
- McCartney, Melissa, Ph.D.** (George Washington University), *Assistant Professor, Biology*
- McCord, Bruce R., Ph.D.** (University of Wisconsin), *Professor, Chemistry and Biochemistry*
- McDowell, Logan, Ph.D.** (Florida International University), *Assistant Teaching Professor, Psychology*
- McEachern, Adriana G., Ph.D.** (University of Florida),

- Emeritus Associate Professor, Counselor Education, Counseling, Recreation and School Psychology*
- McGrath, Campbell, M.F.A.** (Columbia University), Patricia and Phillip Frost Professor in English
- McGrath-Fair, Christina, Ph.D.** (University of Florida), Visiting Clinical Assistant Professor, Counselor Education, Counseling, Recreation and School Psychology
- McGuckian, Dane, M.S.** (Florida International University), Teaching Professor, Mathematics and Statistics
- McIntyre- McCullough, Keisha S., Ph.D.,** (Florida International University), Clinical Assistant Professor, English Education and Curriculum and Instruction, Teaching and Learning
- McMakin, Dana L., Ph.D.** (University of Denver), Associate Professor, Psychology
- Mebel, Alexander M., Ph.D.** (Kurnakov's Institute of General and Inorganic Chemistry, Russian Academy of Science), Professor, Chemistry and Biochemistry
- Melesse, Assefa M., Ph.D.** (University of Florida), Professor and Graduate Program Director, Earth and Environment
- Menendez, Ana, Ph.D.** (New York University) Associate Professor, English
- Menon Narayanankutty, Lakshmy, M.S.** (Florida International University), Associate Teaching Professor, Mathematics and Statistics
- Mercer, Idris, Ph.D.** (Simon Fraser University), Assistant Teaching Professor, Mathematics and Statistics
- Merkin, Roneet, M.S.** (City University of New York), Associate Teaching Professor, Mathematics and Statistics
- Meyer, Martha, Ph.D.** (Florida International University), Teaching Professor, Urban Education, Educational Policy Studies
- Messina, Emily, Ph.D.** (Temple University), Associate Professor, Recreational Therapy, Counseling, Recreation and School Psychology
- Meziani, Abdelhamid, Ph.D.** (Rutgers University), Professor, Mathematics and Statistics
- Mi, Jie, Ph.D.** (University of Pittsburgh), Professor, Mathematics and Statistics
- Miksovská, Jaroslava, Ph.D.** (Charles University, Prague), Associate Professor, Chemistry and Biochemistry
- Milbauer, Asher Z., Ph.D.** (University of Washington-Seattle), Professor, English
- Miles, Kim, M.A.** (University of Arkansas), Associate Teaching Professor, English
- Miller, Robert, Ph.D.** (University of Akron), Assistant Teaching Professor, Chemistry and Biochemistry
- Mills, De Etta Kay, Ph.D.** (George Mason University), Associate Professor and Chairperson, Biological Sciences and Director, International Forensic Research Institute
- Mintz, Stephan, Ph.D.** (The Johns Hopkins University), Professor Emeritus, Physics
- Mirabal, Jennifer M., Ph.D.,** (Barry University), Assistant Teaching Professor, Early Childhood Education, Teaching and Learning
- Monserrat, Ada, M.S.** (Nova Southeastern University), Associate Teaching Professor, Mathematics and Statistics
- Monsalvatge, Laura, Ph.D.** (Barry University), Visiting Assistant Teaching Professor, Early Childhood Education, Teaching and Learning
- Moon, Joong-Ho, Ph.D.** (POSTECH, Pochang, Korea), Professor, Chemistry and Biochemistry
- Morales, Melanie, M.Ed.** (Florida International University), Associate Chair and Assistant Teaching Professor, Special Education, Teaching and Learning
- Morales-Martinez, Zaida C., M.S.** (Pennsylvania State University), Professor Emerita, Chemistry and Biochemistry
- Moura-Koçoğlu, Michaela,** (Goethe University, Germany), Assistant Teaching Professor, Women's and Gender Studies
- Mozumder, Pallab, Ph.D.** (University of New Mexico), Professor, Earth and Environment
- Muniz, Gisela, M.S.** (Florida International University), Assistant Teaching Professor, Mathematics and Statistics
- Musser, Erica D., Ph.D.** (University of Oregon), Associate Professor, Psychology
- Narayanan, Rajamani S., Ph.D.** (University of California-Davis), Professor, Physics
- Nelson, Eliza, Ph.D.** (University of Massachusetts-Amherst), Associate Professor, Psychology
- Ng, Mei Yi, Ph.D.,** (Harvard University) Assistant Professor, Psychology
- Nichols-Lopez, Kristin, Ph.D.** (Florida International University), Associate Teaching Professor and Associate Chair, Psychology
- Noriega, Fernando G., Ph.D.** (Universidad Nacional La Plata, Argentina), Professor, Biological Sciences
- Northup, Lesley, Ph.D.** (Catholic University), Associate Professor, Religious Studies and Dean, Honors College
- Oberbauer, Steven F., Ph.D.** (Duke University), Professor, Biological Sciences
- Oluwo, Akorede Kolapo, M.S.** (Florida International University), Assistant Teaching Professor, Mathematics and Statistics
- Ortega, Lauren, M.S.,** (Florida International University) Assistant Teaching Professor, Counseling, Recreation and School Psychology
- O'Shea, Kevin E., Ph.D.** (University of California-Los Angeles), Professor, Chemistry and Biochemistry
- Papastamatiou, Yannis, Ph.D.** (University of Hawaii), Assistant Professor, Biology
- Parent, Justin, Ph.D.** (University of Vermont), Assistant Professor, Psychology
- Parker, Janat, Ph.D.** (University of California-Berkeley), Professor Emerita, Psychology
- Parker, John, Ph.D.** (University of California-Berkeley), Professor Emeritus, Earth and Environment and Chemistry and Biochemistry
- Parker, Julia, Ph.D.** (Arizona State University), Assistant Teaching Professor, Psychology
- Pearl, Jason H., Ph.D.** (Boston University) Associate Professor, English
- Pedraza, Paloma, Ph.D.** (Florida International University), Assistant Teaching Professor, Psychology
- Pedroso, Maheba, M.S.** (Florida State University), Associate Teaching Professor and Director of the Certificate in Professional and Public Writing, English
- Pelaez, Martha, Ph.D.** (Florida International University), Professor, Educational Psychology, Counseling, Recreation and School Psychology
- Pelham, William E., Jr., Ph.D.** (State University of New

- York-Stony Brook), Distinguished Professor Psychology and Director, Center for Children and Families
- Perez Melo, Sergio, M.S.** (Florida International University), Associate Teaching Professor, Mathematics and Statistics
- Pérez-Prado, Aixa, Ph.D.** (Florida State University), Associate Teaching Professor, TESOL and Modern Language Education, Teaching and Learning
- Perlett, Michael, M.S.**, (Florida International University), Assistant Teaching Professor, Physical Education, Kinesiology and Exercise Science, Teaching and Learning
- Pettit, Jeremy W., Ph.D.** (Florida State University), Professor, Psychology
- Pham, Andy V., Ph.D.** (Michigan State University), Assistant Professor, School Psychology, Counseling, Recreation and School Psychology
- Pinto-McIntire, Carmela, Ph.D.**, (Michigan State University), Associate Professor Emerita, English
- Pitzer, Thomas R., M.S.** (Auburn University), Teaching Professor and Laboratory Coordinator, Biological Sciences
- Pliske, Thomas, Ph.D.** (Cornell University), Emeritus Teaching Professor, Earth and Environment
- Pola, Alicia D., Ph.D.**, (Temple University), Assistant Teaching Professor, Recreational Therapy, Counseling, Recreation and School Psychology
- Pontier, Ryan, Ph.D.**, (University of Miami), Assistant Professor, Bilingual Education and TESOL, Teaching and Learning
- Potvin, Geoffrey D., Ph.D.** (University of Toronto), Assistant Professor, Physics
- Price, René M., Ph.D.** (University of Miami), Professor, Earth and Environment and Southeast Environmental Research Center
- Prikhidko, Alena, Ph.D.**, (University of Florida), Assistant Professor, Counselor Education, Counselor Education, Recreation and School Psychology
- Pruden, Shannon M., Ph.D.** (Temple University), Associate Professor and Director of Graduate Studies, Psychology
- Qiu, Yuxi, Ph.D.**, (University of Florida) Clinical Assistant Professor, Counseling, Recreation and School Psychology
- Quirke, J. Martin, Ph.D.** (University of Liverpool), Professor, Chemistry and Biochemistry
- Raiford, Wanda, Ph.D.**, (University of Iowa), Associate Teaching Professor, English and Director, Liberal Studies
- Raiker, Jr., Joseph S., Ph.D.** (University of Central Florida), Associate Professor, Psychology
- Ramsamujh, Taje I., Ph.D.** (California Institute of Technology), Associate Professor, Mathematics and Statistics
- Rand, Gary M., Ph.D.** (Texas A&M University), Emeritus Professor, Earth and Environment
- Raptis, Raphael G., Ph.D.** (Texas A&M University), Professor, Chemistry and Biochemistry
- Raue, Brian A., Ph.D.** (Indiana University), Professor, Physics and Associate Dean of Graduate Studies, College of Arts, Sciences and Education
- Reaves, Angela C., Ph.D.** (Florida International University) Assistant Teaching Professor, Psychology
- Rego, Rodolfo J., M.S.** (Florida International University), Associate Teaching Professor, Earth and Environment
- Rehage, Jennifer S., Ph.D.** (University of Kentucky), Professor, Earth and Environment and Southeast Environmental Research Center
- Reid, Maria, Ph.D.**, (Florida International University), Assistant Teaching Professor, Psychology
- Rein, Kathleen S., Ph.D.** (University of Miami), Professor and Chemistry Graduate Program Director, Chemistry and Biochemistry
- Reinhold, Jorge, Ph.D.** (Technische Universitaet Munchen), Professor, Physics
- Reio, Jr., Thomas G., Ph.D.** (Virginia Polytechnic Institute and State University), Professor, Adult Education and Human Resource Development, Educational Policy Studies
- Reisert, Laura, M.S.** (University of Florida), Senior Associate Teaching Professor, Mathematics and Statistics
- Riach, James R., Ph.D.** (University of Georgia), Associate Teaching Professor, Earth and Environment
- Ritchie, Rachel A., Ph.D.** (Florida International University), Associate Teaching Professor and Director of Undergraduate Studies, Psychology
- Rivera-Caceres, Karla, Ph.D.** (Centro de Investigaciones Biologicas del Noroeste), Assistant Teaching Professor, Biological Sciences
- Rizzi, Emmanuel, Ph.D.**, (Ohio State University), Assistant Teaching Professor, Psychology
- Robb-Mazzant, Jessica, Ph.D.** (State University of New York at Buffalo), Associate Teaching Professor, Psychology
- Robbins, Helen, Ed.D.** (Florida International University), Teaching Professor, Literacy Education, Teaching and Learning
- Robertson, Douglas L., Ph.D.** (Syracuse University), Professor, Higher Education, Educational Policy Studies
- Rocco, Tonette S., Ph.D.** (Ohio State University), Professor, Adult Education and Human Resource Development, Educational Policy Studies
- Rochelson, Meri-Jane, Ph.D.** (University of Chicago), Professor Emerita, English
- Roddy, Adam, Ph.D.** (University of California, Berkeley), Assistant Professor, Biological Sciences
- Rodriguez, Jorge L., Ph.D.** (University of Florida), Associate Professor, Physics
- Rodriguez, Maria Jose, Ph.D.** (University of Louisiana at Lafayette), Associate Teaching Professor and Director of Undergraduate Studies, Biological Sciences
- Rodriguez-Lanetty, Mauricio, Ph.D.** (University of Queensland, Brisbane, Australia), Associate Professor, Biological Sciences
- Rogerson, Kenneth F., Ph.D.** (University of California-San Diego), Professor Emeritus, Philosophy
- Rose, Suzanna M., Ph.D.** (University of Pittsburgh), Professor, Psychology and Associate Dean, Associate Provost, Office to Advance Women, Equity & Diversity
- Rosenberg, Howard, Ed.D.** (Teachers College, Columbia), Associate Professor Emeritus, Special Education, Teaching and Learning
- Ross, Michael S., Ph.D.** (Virginia Polytechnic Institute and State University), Professor, Earth and Environment and Southeast Environmental Research Center
- Rostamian, Alireza, M.S.** (Florida International University), Teaching Professor, Mathematics and Statistics
- Roudenko, Svetlana, Ph.D.** (Michigan State University) Professor and Graduate Program Director, Mathematics

- and Statistics*
- Roy, Dev K., Ph.D.** (University of Rochester), Associate Professor, Mathematics and Statistics
- Rukimbira, Philippe, Ph.D.** (Pennsylvania State University), Professor, Mathematics and Statistics
- Russell, Heather D., Ph.D.** (Rutgers University), Professor, English and Senior Associate Dean, School of Environment, Arts And Society, College of Arts, Sciences and Education
- Russell, Valerie, Ph.D.** (Southern Illinois University), Clinical Associate Professor, Counselor Education, Counseling, Recreation and School Psychology
- Saba, Robert, M.A.** (University of Southern California), Teaching Professor and Associate Director of the Writing and Rhetoric Program
- Salazar, Diego, Ph.D.** (University of Missouri-St. Louis) Assistant Professor, Biological Sciences
- Salmon, Angela, Ed.D.** (University of Cincinnati), Associate Professor, Early Childhood Education, Teaching and Learning
- San Nicolas, Rosemary, Ph.D.** (Florida International University), Assistant Teaching Professor, Psychology
- Santiago-Perez, Tania, M.S.** (Florida International University), Associate Teaching Professor, Recreational Therapy, Counseling, Recreation and School Psychology
- Santos-Corujo, Rolando, Ph.D.** (University of Miami), Assistant Professor, Biological Sciences
- Sargsian, Misak M., Ph.D.** (Yerevan Physics Institute), Professor, Physics
- Saunders, Daniel, Ed.D.** (University of Massachusetts Amherst), Associate Professor, Higher Education, and Chairperson, Educational Policy Studies
- Scarborough, Elizabeth, Ph.D.** (University of Washington), Assistant Teaching Professor, Philosophy
- Scarffe, Eric, Ph.D.** (Boston University), Assistant Professor, Philosophy
- Schatz, Nicole, Ph.D.** (University of North Carolina – Greensboro), Research Assistant Professor, Psychology
- Schmidtmayerova, Helena, Ph.D.** (Slovak Academy of Science, Bratislava, Slovakia), Associate Teaching Professor, Biological Sciences
- Schoolman, Martha, Ph.D.** (University of Pennsylvania), Associate Professor, and Director of Graduate Program, English
- Schreiber Compo, Nadja, Ph.D.** (Westfaellsche Wilhelms-Universitact, Germany), Associate Professor, Psychology
- Schulze Rebekah, Ed.D.** (Boston University) Clinical Associate Professor, Higher Education, Educational Policy Studies
- Schwartz, Bennett L., Ph.D.** (Dartmouth College), Professor, Psychology
- Schwartz, Richard, Ph.D.** (University of Chicago), Professor Emeritus, English
- Scinto, Leonard J., Ph.D.** (University of Florida), Associate Professor, Earth and Environment
- Serbus, Laura R., Ph.D.** (Indiana University), Associate Professor, Biological Sciences
- Shapiro, Samuel S., Ph.D.** (Rutgers University), Professor Emeritus, Mathematics and Statistics
- Sharp, Paul R., Ph.D.** (Florida International University), Associate Teaching Professor, Biological Sciences
- Sherwin, Jose, Ph.D.** (Nova Southeastern University), Assistant Teaching Professor, Science Education, Teaching and Learning
- Shetty, Kateel, Ph.D.** (Kansas State University), Research Assistant Professor, Earth and Environment
- Shpurik, Maria, Ph.D.** (Florida International University), Associate Teaching Professor, Psychology
- Shrage, Laurie J., Ph.D.** (University of California-San Diego), Professor, Philosophy
- Simonsen, Anna, Ph.D.** (University of Toronto), Assistant Professor, Biological Sciences
- Simpson, Alfred E., Ph.D.** (University of Pittsburgh), Clinical Assistant, Physical Education
- Simpson, Caroline E., Ph.D.** (University of Florida), Professor, Physics
- Smith, Nicholas P., Ph.D.**, (Southeastern Louisiana University), Assistant Teaching Professor, Recreation and Sport Management, Counseling, Recreation and School Psychology
- Smith, Sylvia, Ph.D.** (University of Miami), Professor Emerita, Biological Sciences
- Soares-Quinete, Natalia, Ph.D.** (Pontifica Universidade Catolica do Rio de Janeiro), Assistant Professor, Chemistry and Biochemistry
- Sohan, Michael, M.F.A.** (University of Kentucky), Associate Teaching Professor, English
- Sohan, Vanessa Kraemer, Ph.D.** (University of Louisville), Associate Professor, and Director of Graduate Program, English
- Soto, Fabian A., Ph.D.** (University of Iowa), Associate Professor, Psychology
- Srimal, Neptune, Ph.D.** (University of Rochester), Teaching Professor, Earth and Environment
- Standiford, Lester, Ph.D.** (University of Utah), Professor, English and Director, Creative Writing Program
- Stephens, Dionne P., Ph.D.** (University of Georgia), Professor, Psychology
- Stoddard, Philip K., Ph.D.** (University of Washington), Professor, Biological Sciences
- Stojanovic, Sandra, Ph.D.** (The Ohio State University), Associate Teaching Professor, Chemistry and Biochemistry
- Storfer, Robert B., M.A.** (University of Pittsburgh), Associate Teaching Professor, Mathematics and Statistics
- Strycharski, Andrew T., Ph.D.** (University of Texas), Associate Teaching Professor and Director of the Film Studies Certificate Program, English
- Sukop, Michael C., Ph.D.** (University of Kentucky), Professor, Earth and Environment
- Sun, Yuanchang, Ph.D.** (University of California-Irvine), Associate Professor, Mathematics and Statistics
- Sutherland, Matthew T., Ph.D.** (University of New Mexico), Associate Professor, Psychology
- Sutton, James M., Ph.D.** (Yale University), Associate Professor, English
- Swamy, Uma, Ph.D.** (Arizona State University), University Teaching Professor, Chemistry and Biochemistry
- Tachim Medjo, Theodore, Ph.D.** (University of Paris), Professor, Mathematics and Statistics
- Tebou, Louis Roder Tcheugoue, Ph.D.** (University of Metz, France), Professor and Chairperson, Mathematics and Statistics
- Telan, Paige, Ph.D.** (Florida International University), Teaching Professor, Psychology
- Terenzi, Fiorella, M.S.** (Universita' degli Studi, Milan, Italy), Associate Teaching Professor, Physics

- Theobald, Jamie C., Ph.D.** (University of Washington), Associate Professor, Biological Sciences
- Thirunarayanan, M.O., Ph.D.** (Arizona State University), Associate Professor, Learning Technologies, Teaching and Learning
- Thominet, Luke, Ph.D.** (Wayne State University), Assistant Professor, English
- Thompson, Ellen, Ph.D.** (University of Maryland), Professor, English
- Timmons, Adela, Ph.D.** (University of Southern California) Assistant Professor, Psychology
- Todd, James, Ph.D.**, (University of Toledo) Research Assistant Professor, Psychology
- Trauvitch, Rhona, Ph.D.**, (University of Massachusetts Amherst), Associate Teaching Professor, English
- Troxler, Tiffany, Ph.D.** (Florida International University), Associate Professor, Earth and Environment
- Trucco, Elisa M., Ph.D.** (State University of New York at Buffalo), Associate Professor, Psychology
- Tsalikis, Maria, Ed.D.** (Florida International University), Associate Teaching Professor, Literacy Education, Teaching and Learning
- Tse-Dinh, Yuk-Ching, Ph.D.** (Harvard University), Distinguished University Professor, Chemistry and Biochemistry and Director, Biomolecular Sciences Institute
- Turner, Megan, M.S.**, (Florida International University) Assistant Teaching Professor, Physical Education, Kinesiology and Exercise Science, Teaching and Learning
- Underwood, Sonia M., Ph.D.** (Clemson University), Assistant Professor, Chemistry and Biochemistry
- Vagnoni, Nicholas, M.F.A.** (Florida International University) Associate Teaching Professor, English
- Valente, Matthew, Ph.D.** (Arizona State University) Assistant Professor, Psychology
- Valverde-Barantes, Oscar, Ph.D.** (Kent State University), Assistant Professor, Biological Sciences
- Van Hamme, Walter V., Ph.D.** (University of Ghent, Belgium), Professor, Physics, Senior Associate Dean, School of Integrated Science and Humanity, College of Arts, Sciences and Education
- Villalba, Carolina, Ph.D.**, (University of Miami), Assistant Teaching Professor, English
- Villamor, Enrique, Ph.D.** (Washington University), Professor, Mathematics and Statistics
- Viswesvaran, Chockalingam, Ph.D.** (University of Iowa), Professor, Psychology
- Vos, Robert, Ed.D.** (Rutgers University), Associate Professor Emeritus, Learning Technologies, Teaching and Learning
- Wade, Julie M., Ph.D.** (University of Louisville), Associate Professor, English
- Walter, Maureen S., M.S.** (Florida International University), Teaching Professor, Biological Sciences
- Wang, Wei, Ph.D.** (Brown University), Associate Professor, Mathematics and Statistics
- Wang, Xiaotang, Ph.D.** (University of Iowa), Associate Professor, Chemistry and Biochemistry
- Wang, Xuewen, Ph.D.** (Iowa State University), Associate Professor, Physics
- Wang, Zhongming, Ph.D.** (Iowa State University), Associate Professor, Mathematics and Statistics
- Warren, Paul R., Ph.D.** (University of Wisconsin-Madison), Professor and Chairperson, Philosophy
- Watson, Donald, Ph.D.** (University of Virginia), Professor Emeritus, English
- Wdowinski, Shimon, Ph.D.** (Harvard University) Professor, Earth and Environment
- Webb, James R., Ph.D.** (University of Florida), Professor, Physics
- Wehr, Jeffrey, M.F.A.** (Florida International University), Associate Teaching Professor, English
- Weems, Anthony, Ph.D.** (Texas A&M University), Assistant Professor, Recreation and Sport Management, Counseling, Recreation and School Psychology
- Weir-Soley, Donna M., Ph.D.** (University of California-Berkeley), Associate Professor and HSI Pathways to the Professoriate Coordinator, English
- Wells, Jeffrey D., Ph.D.** (University of Illinois at Chicago), Associate Professor, Biological Sciences and MSFS Graduate Program Director
- Whiddon-Willoughby, Melody, Ph.D.** (Florida International University), Clinical Associate Professor, Educational Psychology, Counseling, Recreation and School Psychology
- Whitman, Elizabeth, Ph.D.** (Florida International University), Assistant Teaching Professor, Biological Sciences
- Wick, Shelley, Ph.D.** (Florida International University), Associate Teaching Professor, English
- Wicks, Cayce, M.A.** (Florida International University), Associate Teaching Professor, English
- Winkle, Stephen A., Ph.D.** (University of California-Berkeley), Associate Professor, Chemistry and Biochemistry
- Winter, Ryan J., Ph.D.** (City University of New York) Associate Teaching Professor, Psychology

Mission Statement

The Chapman Graduate School in the College of Business exists to create enduring educational value for our students, for our alumni, and for the business, professional, and academic communities we serve.

For our students—whom we prepare to succeed in a rapidly changing, technology-driven global business environment;

For our alumni—to whom we provide opportunities for continuing professional development and a legacy that appreciates as our excellence grows;

For the business and professional communities—to whom we offer knowledgeable graduates, educational programs, research, and collaborative projects;

For the academic community—to whom we bring new knowledge through high-quality research and the development of future scholars.

The Alvah H. Chapman Jr., Graduate Business School is a school distinguished among urban public business schools as a center for global business education, technology, and research. Our most noteworthy teaching and research expertise lies in the business arenas linking South Florida, Latin America, and the world economy.

The College itself offers undergraduate, graduate, professional education, customized training, and executive education programs to enterprises around the world. While

continuing to meet the needs of students in the South Florida community, we are intensifying our educational service delivery to international students and enterprises, especially those in Latin America.

In all of our programs, we strive to instill in students a profound understanding of the changing nature of international business in an integrated and digital global economy. We ensure they are well versed in the impact information technology is having on how enterprises are organized and managed and on how products and services are created and marketed. We provide them with a solid grasp of business processes, the ability to think critically and to solve problems ethically, and the sense to conduct themselves with integrity and within the context of social and environmental responsibility. We foster their commitment to life-long learning in a dynamic, complex, and competitive world.

Our faculty engage in basic and applied research and in instructional development to contribute not only to the general knowledge base in the field of business but also to the ways in which this knowledge is created and shared. The College boasts a state-of-the-art information technology infrastructure that enables us to provide leading edge instruction and research, including online course delivery. At the same time, our IT investment supports our ongoing curricular innovation in related fields like enterprise-wide computing and logistics.

Organization

The College is organized into the Alvah H. Chapman, Jr., Graduate School of Business, the School of Accounting, the Tibor and Sheila Hollo School of Real Estate, and the Departments of Finance, Global Leadership and Management, Information Systems and Business Analytics, International Business, as well as Marketing and Logistics.

The College also houses several centers of excellence dedicated to teaching, research, and service. These include the Jerome Bain Real Estate Institute, the Ryder Center for Supply Chain Systems, the Knight Ridder Center for Excellence in Management, the Office of Professional Education, the Office of Executive and Professional Education, and the Global Center for Entrepreneurship and Innovation.

Graduate Programs

The Chapman Graduate School offers a Doctor of Philosophy (Ph.D.) in Business Administration, and a Doctorate in Business Administration (D.B.A.) as a track under the Ph.D. program, Master of Business Administration (MBA), Master of Business Administration in Business Analytics, Master of International Business (MIB), Master of Accounting (MACC), Master of Science in Finance (MSF), Master of Science in International Real Estate (MSIRE), Master of Science in Information Systems (MSIS), Master of Science in Health Informatics and Analytics (MSHIA), Master of Science in Human Resource Management (MSHRM), and Master of Science in Marketing (MSM). In addition, the school offers programs leading to a Certificate in Healthcare Management, Certificate in Business Analytics, Graduate Certificate in Advanced Business Analytics, Graduate Certificate in Cybersecurity Management and a Certificate in Health Informatics and Analytics.

Ph.D. Program

The Chapman School offers a Ph.D. in Business Administration. The objective of this degree program is to prepare students for a career in academia by building their understanding of the substantive domains and literature within their selected areas of concentration. It provides them with the methodological and analytical tools required for executing research and creating knowledge. It develops their skills in formulating, conducting, and communicating quality research. In the process, it also fosters their ability to teach effectively.

The Ph.D. program typically requires a minimum of four years of full-time study. The first two years involve coursework and summer projects. The remaining two years focus on completion of a dissertation. Students will take a minimum of 16 courses (with a minimum of six courses in their chosen area of concentration). Students also will complete summer research projects under faculty supervision.

Areas of Concentration

Accounting, Management Information Systems, Marketing, Finance, and Management, which includes the sub-areas:

- Strategic Management
- Entrepreneurship
- International Business and International Management
- Human Resource Management
- Organizational Behavior
- Hospitality Management

Ph.D. Admission Requirements

All qualified students are encouraged to apply to the program, regardless of their sex, age, race, color, creed, handicap, marital status, or national or ethnic origin. Applications are accepted from prospective students with a broad variety of educational backgrounds, including areas like business, liberal arts, and the sciences. Those students selected for the Ph.D. program must demonstrate strong evidence of ability, scholarly interest, and success.

Applicants should submit the following:

1. A completed application form and processing fee.
2. Three letters of recommendation.
3. Official transcripts from all institutions in which the applicant has completed any undergraduate and graduate course work.
4. All applicants are required to have taken either the GMAT or GRE within five years of their application. A GMAT score (or its GRE equivalent) of 600 or higher and a 3.0 GPA or better in post-secondary education is desired, although some applicants falling short of these desired scores and grades have been accepted into our program. Those with GMAT score below 500 or its GRE equivalent score will NOT be considered for admission. For more information about how to convert a GRE score into its GMAT equivalent, go to: <http://www.ets.org/gre/comparison>.
5. A formal statement of purpose for seeking the doctoral degree and specific reasons for applying to Florida International University.
6. A curriculum vitae.
7. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language

(TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required. Such applicants also should review the "General Admission Requirements for Foreign Students" in the "Admission" section of this catalog.

The College admits a new class of doctoral students every year during the Fall semester.

Complete applications must be received by January 15. Acceptance decisions for fall admission are typically made not later than March.

Applicants are considered once all the required documents have been received.

Degree Requirements

General degree requirements for all candidates for a Ph.D. in Business Administration include:

1. Successful completion of all required coursework.
2. Successful completion of a comprehensive examination at the end of this coursework.
3. Successful completion of a doctoral dissertation.

Financial Aid

Applicants to the doctoral program may request financial aid by completing the appropriate form. Stipends requiring a mixture of research and teaching are also available. These stipends may include both a cash award and a tuition waiver, depending upon the applicant's qualifications. If you wish to apply for a stipend include this request with your application documents.

Note: The programs, policies, requirements, and regulations listed in this catalog are subject to continual review in order to meet the needs of the University's various publics and to respond to the mandates of the State Board of Education and the Florida Legislature. Changes may be made without advance notice. Please refer to the "General Information" section of this catalog for the University's policies, requirements, and regulations.

For more information please refer to our website: <http://business.fiu.edu> or call (305) 348-1746.

Doctorate in Business Administration Track

The Chapman School offers a Doctorate in Business Administration (DBA). This program is offered as a track under the Ph.D. program and is designed for working senior-level professionals who desire to achieve a doctoral degree in business while continuing their work responsibilities and careers. The DBA will prepare students with the advanced knowledge necessary to manage complex organizational environments and solve real-world problems via the conduct of applied research in all areas of business. It provides them with the methodological and analytical tools required for executing applied research as well as the skills in formulating and communicating quality applied research.

The FIU DBA program of study is a 72 hour, three-year curriculum that focuses on every aspect of applied business research including strategic planning, organizational behavior, human resource management, financial management, innovation and entrepreneurship, and quantitative research. The program is taught using a cohort-based approach and a combination of online and

on-campus instruction. A total of 27 residencies are required over the three-year program. The students will take 21 courses and will be required to complete a dissertation project in their third year under faculty supervision. Three credits from a student's previous master's degree will be initially transferred to the DBA so that a total of 75 post-baccalaureate credits will be posted on the transcript upon program completion.

DBA Track Admission Requirements

All qualified students are encouraged to apply to the program, regardless of their sex, age, race, color, creed, handicap, marital status, or national or ethnic origin. Applications are accepted from prospective students with a broad variety of educational backgrounds, including areas like business, liberal arts, and the sciences. Successful applicants must have a minimum of 10 years of work experience with a minimum of seven years of which must have been in a documented managerial role (managing people, budgets, projects), and a Master's degree from an accredited college or university. Those students selected for the DBA program must demonstrate strong evidence of ability, scholarly interest, and success.

Applicants should submit the following:

1. A completed application form and processing fee.
2. Two letters of recommendation.
3. Official transcripts from all institutions in which the applicant has completed any undergraduate and graduate course work.
4. A formal statement of purpose for seeking the DBA degree and specific reasons for applying to Florida International University.
5. A resume detailing chronological professional experience and dates of earned degrees.

The College admits a new class of DBA students every year during the Fall semester. Applications for the DBA program are accepted on a rolling basis. Acceptance decisions for fall admission are typically made up through August 1 of each intake year. Applicants are considered once all the required documents have been received.

Degree Requirements

General degree requirements for all candidates for a Doctorate in Business Administration include:

1. Successful completion of all required coursework.
2. Successful completion of a doctoral dissertation.

The following courses and sequence are required for the DBA:

Fall A Year I

Fall Year III			
GEB 7981	DBA Dissertation		9
Spring Year III			
GEB 7981	DBA Dissertation		6
Summer Year III			
GEB 7981	DBA Dissertation		3

Residencies

Each semester will have four required residencies plus one additional residency at the beginning of each Fall term for a total of 27 required residencies over the three-year program. The initial Fall term residency will be the Thursday before the first residency for orientation (typically during third week of August) with all remaining residencies occurring monthly on a Friday and Saturday (typically toward the end of each month).

Financial Aid

Applicants to the DBA program may request financial aid through external scholarships, and federal student loans by completing the FAFSA application for those who qualify.

Note: The programs, policies, requirements, and regulations listed in this catalog are subject to continual review in order to meet the needs of the University's various publics and to respond to the mandates of the State Board of Education and the Florida Legislature. Changes may be made without advance notice. Please refer to the "General Information" section of this catalog for the University's policies, requirements, and regulations. For more information, please refer to our website: <http://business.fiu.edu> or call (305)348-0148.

Master's Degree Programs

The Chapman Graduate School of Business aims to provide a high-quality graduate educational experience rooted in our Miami location and focused on the unique requirements for doing business in a global and interconnected market.

Application Procedures

To apply for admission to graduate study in the Chapman Graduate School, prospective students must:

1. Submit a Graduate Application for Admission to the Admissions Office. The application form can be accessed online at (<https://admissions.fiu.edu/how-to-apply/graduate-applicant/index.html>). The admission process may take as long as two months after the University receives a student's application, depending upon the time involved in obtaining transcripts and test scores. Students are encouraged to apply early.
2. Have a copy of the official transcripts of all previously earned college or university credits sent from the formerly attended institution(s) to the Chapman's Graduate Admissions Office. Copies submitted directly by student applicants will not be accepted.
3. Submit scores, if applicable, on the Graduate Management Admissions Test (GMAT) or Graduate Record Examination (GRE), administered by the Educational Testing Service (ETS), Box 966, Princeton, New Jersey 08540. Scores must be submitted by the ETS. Registration forms will be mailed upon request. Have the ETS submit TOEFL scores as well, if applicable. For additional requirements, consult individual program offices listed below.
4. Applications are normally accessed on a program by program basis and there is some variation in requirements across programs. Applicants should review the requirements for a specific program.
5. The Associate Dean of the Chapman Graduate School of Business, in consultation with and advisement by program academic directors, retains the right to waive an individual Chapman Graduate School of Business admissions requirement for a specific applicant upon petition. This ability does not include waivers for University Graduate School (UGS) requirements such as those for English proficiency.

Transfer Credit

A student may receive permission to transfer up to a maximum of nine semester hours of graduate credit towards a Master of Science degree program or twelve semester hours of credit for a Master of Business Administration degree program, if:

1. The courses were taken at the graduate level at an accredited college or university;
2. The courses were not introductory or survey in nature;
3. The student earned grades of "B" or higher in the courses;
4. The courses are judged by the Department Chair, College Dean, Graduate School Dean, and program manager to be relevant to the student's graduate program;
5. The credits were completed within six years immediately preceding the College's awarding of the degree. Credits are not transferable until the student has earned 15 semester hours in a Chapman School graduate degree program.

Degree Requirements

To be eligible for a Master's degree, a student must:

1. Satisfy all University requirements for a Master's degree;

2. Satisfy required prerequisites;
3. Meet the requirements of his or her graduate "Course of Study." This "Course of Study" is developed by the student and his or her graduate advisor or degree program director following his or her admission to a program and is approved by the appropriate Department Chair, Academic Advisor, or Program Director.
4. Complete the required courses in the specific graduate program in which he/she is enrolled.
5. Earn a minimum average of "B" (3.0) in all approved courses in the student's approved course of graduate study.

No courses in which a graduate student earns a grade below "C" may be counted towards any Master's degree program in the Chapman School. However, all approved undergraduate and graduate course work a graduate student takes will be counted in computing his or her grade point average, including courses in which he or she has earned a "D" or "F" grade. To improve a grade, please refer to the University Forgiveness Policy under General Information.

Faculty have the discretion to administratively drop students who do not attend the first class of a course.

Time Limit

All work applicable to a Master's degree, including transfer credit, must be completed within six years immediately preceding the awarding of the degree.

Study Abroad Programs

Graduate students in the College may earn a maximum of three (3) credit-hours for study abroad programs unless otherwise prescribed by their degree program.

Dual Degree Programs

The Chapman School has developed a series of dual degree programs with universities in Asia, Europe, and Latin America whereby partial credit is given by both institutions for academic work carried out in each respective program. This leads to the possibility of obtaining two Masters degrees, one from each partner institution, in less time and with fewer credits than if the two degree programs were taken sequentially.

Joint Degree Programs

Approval has been obtained for students in one of the Chapman School's Masters programs to qualify for a joint degree program with other Chapman School programs (e.g., MBA and MS in Finance) as well as with other university graduate programs (e.g., Joint MBA-JD program). See below for more information.

Scholarships

The Chapman Graduate School of Business has set aside funds from operations and donations to the School to support a limited program of scholarships destined to cover tuition and fees for our International MBA, Master of International Business, and other value-added Master's degree programs. These scholarships are limited. Priority will be given to students who are admitted to a program and exhibit extraordinary academic merit in addition to financial hardship. For more information, interested students and candidates should contact the respective Program Manager.

Master of Business Administration (MBA)

The College offers several programs leading to the MBA degree. Programs are designed to meet different student needs and are offered in different locations and delivery modes including online, face-to-face, and blended, hybrid modes. The MBA programs are: the Executive MBA, the Professional MBA, the Professional MBA Healthcare Management Track, and the International MBA.

An overview of each of these programs is provided below. For specific degree requirements in each program, please contact the program office or director.

Executive Master of Business Administration (EMBA)

The Executive Master of Business Administration (EMBA) degree program is designed for working business professionals at the director level and above. FIU's Executive MBA delivers unique graduate level experiences that broaden executives' horizons and prepares them for new and expanding responsibilities.

The curriculum includes 4 eight-hour interdisciplinary courses that synthesize concepts and techniques from a variety of business disciplines to address a variety of complex and ambiguous issues senior managers typically face. It is a rigorous hands-on program where we focus on:

- application rather than theory,
- learning by doing rather than lecturing, and
- critical thinking in addition to quantitative analysis.

It is a distinctive program for a select number of qualified students who see their "body-of-work" as unfinished.

Program participants earn their MBA degree without interrupting their careers. Structured so that all requirements can be completed in twenty-two months, the program is offered on Saturdays at the FIU complex at 1101 Brickell in the heart of Miami's financial district. The EMBA program incorporates these unique features:

- An interdisciplinary curriculum specifically designed for executives and strategic decision-making
- Leadership & Innovation Project teams focus curriculum in each semester on application not theory
- Class meetings every other Saturday focus on discussions not lectures
- Small class of 25 +/- of nominated candidates provides opportunity to learn from a diverse and highly select group of peers
- Access to a professional executive coach
- Interact with top notch experienced faculty and international business executives
- International Research that includes a one-week residency abroad
- Professional staff provides logistical support that caters to the needs of participating executives

Admission Requirements

The Executive Master of Business Administration (EMBA) program considers students' work experience, industry knowledge and management skills as strengths in a candidate's qualifying portfolio. Candidate's professional maturity and managerial experience are highly considered in the admission selection process because the EMBA

program at FIU fosters students' ability to contribute real-world experiences to add value to overall student learning in this competitive degree program.

To be eligible for admission to the EMBA program in the Chapman Graduate School of Business, applicants must meet the following qualifications:

1. Hold a bachelor degree or equivalent from either a U.S. accredited college or university or the equivalent degree from institutions outside the U.S. in addition to being in good standing with all previously attended colleges and universities; and
2. Have eight years of demonstrated professional full time work experience, with five of those in management.

Additional Requirements:

1. Resume describing current and past responsibilities, leadership and management experience highlights and, if any, demonstrated accomplishments in the application of quantitative and analytical skills;
2. Statement of purpose (short essay) describing how the program fits within your personal and career goals. The essay will be evaluated for applicants' effective and succinct writing skills;
3. Two letters of recommendation from employers and/or faculty who can attest to applicants' motivation to succeed in EMBA program at FIU; and
4. International graduate student applicants whose studies were completed outside of the U.S. must demonstrate proficiency of the English language by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on the paper-based version or 213 on the computer based version of the test of English as a Foreign Language) or 6.5 overall on the International English Language Testing System (IETLS).

Applicants are encouraged to provide any additional documentation to strengthen their application portfolio. Examples of documentation include: Master's degree in any discipline other than an MBA, law degree, professional certifications (i.e. CPA, CFA, SHRM, etc.), GMAT or GRE scores, specialized leadership experience or training documentation that the applicant is part of a "fast track" or "high potential" management group at their organization, or any other similar evidence.

Candidates with diverse backgrounds are encouraged to apply. While all applications will be evaluated based on a full review of the application portfolio, we desire students with an undergraduate upper division grade point average (GPA) of 3.0.

An interview, by invitation only, may be required prior to the final selection.

Admissions at the graduate level are competitive and meeting minimum requirements does not guarantee admission.

For additional information about this value-added program, call the EMBA office at (305) 779-7896 or email emba@fiu.edu.

Degree Requirements

In order to complete the EMBA, students must successfully complete:

- 1-week residency at beginning of program, international week residency in the middle of the program, and 1 week residency at end of program,

- 4 eight-credit-hour interdisciplinary courses,
- 4 one-credit-hour leadership courses,
- 3 three-credit-hour experiential courses (International research, Innovation Projects, Corporate Simulation),
- Total of 45 credit hours

The following courses and sequence are required for the EMBA:

Semester I

GEB 6368	Navigating in a Globalizing World	8
MAN 6891	Leadership Development Seminar I	1

Semester II

GEB 6529	Creating Economic and Social Value	8
MAN 6892	Leadership Development Seminar II	1

Semester III

GEB 6528	Organizational Processes that Deliver Economic and Social Value	8
MAN 6893	Leadership Development Seminar III	1

Semester IV

GEB 6896	Strategy Development and Implementation	8
MAN 6898	Leadership Development Seminar IV	1

Semester V

MAN 6675	Special Topics in International Business	3
MAN 6057	Managing Innovation	3
MAR 6816	Corporate Simulation	3

Residencies

- Residency One – August of first year: Teamwork, Curriculum overview, Leadership, Personal Development, and Innovation Project brainstorming
- Residency Two – Fall Semester of second year: International Research Course and Company visits. Students choose to attend one of the 7-day Business Innovation in a Global Economy programs, hosted by the 9 universities around the world who are members of our EMBA Consortium on Business Innovation
- Residency Three – last week in April of last semester intensive interactive corporate simulation

Professional Master of Business Administration (PMBA)

Designed for working professionals, the Professional MBA program offers a fast-paced, intense program in which you can network with your peers and learn from each other in a dynamic environment.

Admission Requirements

The Professional Master of Business Administration (PMBA) program considers students' work experience, industry knowledge, management skills and undergraduate education as strengths in candidate's qualifying portfolio. Candidate's professional maturity, and managerial experience are highly considered in the admission selection process because the PMBA program at FIU fosters students' ability to contribute real-world experiences to add value to the overall student learning in this competitive degree program.

To be eligible for admission to the PMBA program in the Chapman Graduate School of Business, applicants must:

1. Hold a bachelor degree or equivalent from either a U.S. accredited college or university or the equivalent degree from institutions outside the U.S.; Students coming from programs where the primary degree is at the master level or higher will meet this requirement;
2. Show high promise of success in graduate studies as determined by the faculty based upon academic performance, work experience or a combination of academic and work experience.
3. Evidence a minimum score of 500 on the Graduate Management Admission Test (GMAT) or similar Graduate Record Exam (GRE) score. A GMAT waiver at the discretion of the academic director is available for:
 - A. Applicants with two years of demonstrative work experience and success in completing other academic programs;
 - B. Applicants who have an undergraduate business or related degree (economics, hospitality management, etc.) with an upper division grade point average (GPA) of 3.25;
 - C. Applicants without a business or related degree having an upper division GPA of 3.35;
 - D. If the applicant has already completed a graduate degree from an accredited university with a minimum grade point average (GPA) of 3.0, or is entering a business master's program under a special agreement for admissions with specific foreign and domestic universities;
4. Should, in general, have a minimum upper division grade point average (GPA) of 3.0. An applicant with substantial work experience and industry/work related recommendations will be evaluated based on academic qualifications, work experience, and performance;
5. Provide a resume describing current and past responsibilities, leadership and management experience highlights and, if any, demonstrated accomplishments in the application of quantitative and analytical skills;
6. Provide a statement of purpose (short essay) describing how the program fits within your personal and career goals. The essay will be evaluated for applicants' effective and succinct writing skills;
7. When the applicant's studies were completed in non-English speaking countries, demonstrate proficiency of the English language by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on the paper based version or 213 on the computer based version of the test of English as a Foreign Language) or 6.5 overall on the International English Language Testing System (IETLS) or by other university level English proficiency standards as they are approved.

Applicants are encouraged to provide any additional documentation to strengthen their application portfolio. Examples of documentation include: master degree in any

discipline other than an MBA, law degree, professional certifications (i.e. CPA, CFA, SHRM, etc.), GMAT or GRE scores, specialized leadership experience or training documentation that the applicant is part of a “fast track” or “high potential” management group at their organization, or any other similar evidence including letters of reference and recommendations.

Admissions at the graduate level are competitive and meeting minimum requirements does not guarantee admission.

For additional information about this value-added program, please contact the PMBA office at (305) 779-7897 or email pmba@fiu.edu

Degree Requirements

In order to complete the Professional Master in Business Administration (PMBA), students must successfully complete a total of 42 credit hours, 27 credit hours of core and 15 credit hours of electives and three professional development seminars.

The following courses are required:

ACG 6026	Accounting for Managers
ACG 6175	Financial Reporting & Analysis
FIN 6406	Corporate Finance
FIN 6446	Competitive Strategy
MAN 6245	Organizational Behavior
MAN 6726	Strategic Management
ISM 6021	Management of Information Systems
MAR 6805	Marketing Management in the Global Environment
QMB 6357	Business Statistical Analysis
Elective (can be in specialization area)	
Elective (can be in specialization area)	
Elective (in legal, regulatory or related Issues)	
Elective (in an international business area)	
Elective (in analytical and quantitative analysis)	

Professional development seminars I, II, and III

Each of the seminars will focus on soft skills such as leadership, team building, oral presentation, writing skills and career exploration.

Seminars will be mandatory, non-credit.

The MBA academic director in consultation with the Associate Dean for the Chapman Graduate School of Business can substitute up to two required courses.

The MBA academic director can waive a professional development seminar.

Professional Master of Business Administration: Healthcare Management Track (PMBA/HM)

Designed for the early to mid-level working professional with a minimum of two years professional work experience, the Professional MBA in Healthcare Management program offers a fast-paced, intense program in which you gain the necessary skills for a management career in various health services organizations.

The PMBA program incorporates these unique features:

- Complete the MBA in approximately eighteen months;
- Study in convenient locations: FIU Downtown on Brickell, FIU at I-75, or online;
- Study with, learn from and network with a diverse group of peers in lock-step program;
- Strengthen critical thinking, leadership, team building and interpersonal skills;
- Enjoy a high level of customer service, catering to the needs of participating professionals;
- Have access to personalized career services;

Admission Requirements

To be eligible for admission to the Professional MBA Program in the Chapman Graduate School, students must:

1. Hold a Bachelor's degree from an accredited college or university;
2. Have a minimum upper division grade point average (GPA) of 3.0;
3. Demonstrate at least two years of professional work experience;
4. Graduate student applicants whose studies were completed outside of the US must demonstrate proficiency of the English language by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on the paper-based version) or 6.5 overall on the International English Language Testing System (IELTS);
5. Provide two letters of recommendation from professional contacts;
6. Provide a personal statement on the motivation to attend the program, including personal and career goals;
7. Be in good standing with all previously-attended colleges and universities.

Admissions at the graduate level are competitive and meeting minimum requirements does not guarantee admission. For more information about this program, please contact the Healthcare MBA office at (305) 779-7900 or visit <http://healthcaremba.fiu.edu>.

Degree Requirements

Students must successfully complete 14, three-credit hour courses for a total of 42 credit hours and three non-credit Professional Development Seminars.

The following courses are required for the PMBA/HM:

BUL 6810	Legal Environment of Business
MAN 6095	Management of Healthcare Organizations in the 21 st Century
MAN 6501	Operations Management
MAN 6245	Organizational Behavior
MAN 6098	Management of Healthcare Finance and Reimbursement
MAR 6805	Marketing Management in the Global Environment
MAN 6830	Organizational Information Systems
ACG 6026	Accounting for Managers
BUL 6605	Healthcare Fraud and Abuse Law and Regulation
MAN 6726	Strategic Management
FIN 6406	Corporate Finance
MAN 6097	Managerial Decision-Making in Health Economics
MAN 6974	Master's Project in Management

ACG 6175 Financial Reporting & Analysis

Professional Development Seminars I, II, and III

Each of the Professional Development Seminars will focus on soft skills such as leadership, team building, oral presentation, writing skills, health analytics, and career development. There will be team-building activities which include classroom exercises in group decision-making and problem-solving. Students will also work with a presentation and writing skills coach to improve the communication and writing skills that are critical to managerial success.

Seminars will be mandatory, non-credit.

Professional Development Seminars I, II, III

Team Building, Writing Skills, Presentation Skills, Oral Communications, Excel and Statistics Fundamentals, Accounting Boot Camp, Quantitative Methods, Leadership, Lean Enterprise Training and Certification

Flexible Master of Business Administration (Flex-MBA)

Designed for working professionals, the Flex MBA program offers a fast-paced, intense program in which you can network with your peers and learn from each other in a dynamic environment. Core competencies include problem solving on a local and global level; building teamwork and collaboration; analyzing balance sheets and budgeting; and identifying ethical problems.

Admission Requirements

The Flex Master of Business Administration (Flex-MBA) program considers students' work experience, industry knowledge, management skills and undergraduate education as strengths in candidate's qualifying portfolio. Candidate's professional maturity, and managerial experience are highly considered in the admission selection process because the Flex-MBA program at FIU fosters students' ability to contribute real-world experiences to add value to the overall student learning in this competitive degree program.

To be eligible for admission to the Flex-MBA program in the Chapman Graduate School of Business, applicants must:

1. Hold a bachelor degree or equivalent from either a U.S. accredited college or university or the equivalent degree from institutions outside the U.S.; Students coming from programs where the primary degree is at the master level or higher will meet this requirement.
2. Show high promise of success in graduate studies as determined by the faculty based upon academic performance, work experience or a combination of academic and work experience.
3. Evidence a minimum score of 500 on the Graduate Management Admission Test (GMAT) or similar Graduate Record Exam (GRE) score. A GMAT waiver at the discretion of the academic director is available for:
 - a. Applicants with two years of demonstrative work experience and success in completing other academic programs;

- b. Applicants who have an undergraduate business or related degree (economics, hospitality management, etc.) with an upper division grade point average (GPA) of 3.25, or higher;
- c. Applicants without a business or related degree having an upper division grade GPA of 3.35, or higher;
- d. If the applicant has already completed a graduate degree from an accredited university with a minimum grade point average (GPA) of 3.0, or is entering a business master's program under a special agreement for admissions with specific foreign and domestic universities;

4. Should, in general, have a minimum upper division grade point average (GPA) of 3.0. An applicant with substantial work experience and industry/work related recommendations will be evaluated based on academic qualifications, work experience, and performance;
5. Provide a resume describing current and past responsibilities, leadership and management experience highlights and, if any, demonstrated accomplishments in the application of quantitative and analytical skills;
6. Provide a statement of purpose (short essay) describing how the program fits within your personal and career goals. The essay will be evaluated for applicants' effective and succinct writing skills;
7. When the applicant's studies were completed in non-English speaking countries, demonstrate proficiency of the English language by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on the paper-based version or 213 on the computer based version of the test of English as a Foreign Language) or 6.5 overall on the International English Language Testing System (IETLS) or other university level English proficiency standards as they are approved;

Applicants are encouraged to provide any additional documentation to strengthen their application portfolio. Examples of documentation include: master degree in any discipline other than an MBA, law degree, professional certifications (i.e. CPA, CFA, SHRM, etc.), GMAT or GRE scores, specialized leadership experience or training documentation that the applicant is part of a "fast track" or "high potential" management group at their organization, or any other similar evidence including letters of reference and recommendations.

Admissions at the graduate level are competitive and meeting minimum requirements does not guarantee admission.

For additional information about this value-added program, call the Flex-MBA office at (305) 779-7897 or email pmba@fiu.edu.

Degree Requirements

In order to complete the Flex-MBA, students must successfully complete a total of 42 credit hours, 27 credit hours of core and 15 credit hours of electives and three professional development seminars.

The following courses are required:

ACG 6026	Accounting for Managers
ACG 6175	Financial Reporting & Analysis
FIN 6406	Corporate Finance
FIN 6446	Competitive Strategy
MAN 6245	Organizational Behavior
MAN 6726	Strategic Management
ISM 6021	Management of Information Systems
MAR 6805	Marketing Management in the Global Environment

QMB 6357 Business Statistical Analysis
 Elective (can be in specialization area)
 Elective (can be in specialization area)
 Elective (in legal, regulatory or related issues)
 Elective (in an international business area)
 Elective (in analytical and quantitative analysis)

Professional development seminars I, II, and III

Each of the seminars will focus on soft skills such as leadership, team building, oral presentation, writing skills and career exploration.

Seminars will be mandatory, non-credit.

The MBA academic director in consultation with the Associate Dean for the Chapman Graduate School of Business can substitute up to two required courses.

The MBA academic director can waive a professional development seminar.

International Master of Business Administration (IMBA)

The IMBA (International MBA) degree program features an MBA curriculum with an international business focus. This value-added program has been especially designed for students and professionals interested in pursuing a career in international business. For students from outside the U.S., it represents an opportunity for them to prepare for executive positions in the U.S. as well as in other parts of the world. For students in the U.S. who would like to pursue business leadership in international businesses, it provides an integrated perspective of international business issues and the knowledge they need to succeed in a rapidly evolving, global economy.

Given the Chapman School's Miami location and expertise in Latin American and Caribbean business, the program is particularly valuable for those who want to secure executive positions in the Americas.

The IMBA program incorporates these unique features:

- An MBA curriculum that can be completed in 12 months;
- Day-time classes;
- Global and multicultural perspective throughout;
- Have access to personalized career services;
- Opportunity to participate in study abroad programs and attend;
- Professional development seminars focused on leadership, team-building skills, oral and written presentation skills, and career preparation.

Admission Requirements

To be eligible for admission to the International MBA Program in the Chapman Graduate School, students must:

1. Hold a bachelor degree or equivalent from either a U.S. accredited college or university or the equivalent degree from institutions outside the U.S.; Students coming from programs where the primary degree is at the master level or higher will meet this requirement;
2. Show high promise of success in graduate studies as determined by the faculty based upon academic performance, work experience or a combination of academic and work experience.
3. Evidence a minimum score of 500 on the Graduate Management Admission Test (GMAT) or similar Graduate Record Exam (GRE) score. A GMAT waiver at the discretion of the academic director is available for:
 - a) Applicants with two years of demonstrative work experience and success in completing other academic programs;
 - b) Applicants who have an undergraduate business or related degree (economics, hospitality management, etc.) with an upper division grade point average (GPA) of 3.25, or higher;
 - c) Applicants without a business or related degree having an upper division grade GPA of 3.35, or higher;
 - d) If the applicant has already completed a graduate degree from an accredited university with a minimum grade point average (GPA) of 3.0, or is entering a business master's program under a special agreement for admissions with specific foreign and domestic universities;
4. Should, in general, have a minimum upper division grade point average (GPA) of 3.0. An applicant with substantial work experience and industry/work related recommendations will be evaluated based on academic qualifications, work experience, and performance;
5. Provide a resume describing current and past responsibilities, leadership and management experience highlights and, if any, demonstrated accomplishments in the application of quantitative and analytical skills;
6. Provide a statement of purpose (short essay) describing how the program fits within your personal and career goals. The essay will be evaluated for applicants' effective and succinct writing skills;
7. When the applicant's studies were completed in non-English speaking countries, demonstrate proficiency of the English language by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on the paper based version or 213 on the computer based version of the test of English as a Foreign Language) or 6.5 overall on the International English Language Testing System (IETLS) or by other university level English proficiency standards as they are approved.

Applicants are encouraged to provide any additional documentation to strengthen their application portfolio. Examples of documentation include: master degree in any discipline other than an MBA, law degree, professional certifications (i.e. CPA, CFA, SHRM, etc.), GMAT or GRE scores, specialized leadership experience or training documentation that the applicant is part of a "fast track" or "high potential" management group at their organization,

or any other similar evidence including letters of reference and recommendations.

Admissions at the graduate level are competitive and meeting minimum requirements does not guarantee admission.

Students may also be eligible to pursue joint degree programs with the Master of Science in Finance (MBA/MSF), the Master of Science in Information Systems (MBA/MSIS), the Master of International Business (MBA/MIB), the Master of Science in Human Resource Management (MBA/MSHRM), the Master of Science in International Real Estate (MBA/MSIRE), the College of Law (MBA/JD), and the Master of Arts in Latin American and Caribbean Studies (MBA/MALACS).

For more detailed information about the IMBA program, please contact the program manager at (305) 348-6880 or by email imba@fiu.edu.

Degree Requirements

In order to complete the IMBA, students must successfully complete 45 credit hours of course work; including 42 credit hours of core course work; and three-credit hours of elective course work. In addition, Professional Development Seminars are required.

The following courses are required for the IMBA:

Core

QMB 6357	Business Statistical Analysis
ACG 6026	Accounting for Managers
MAN 6608	International Business
MAN 6830	Organizational Information Systems
MAN 6245	Organizational Behavior
FIN 6406	Corporate Finance
MAN 6974	Master's Project in Management
MAN 6501	Operations Management
MAR 6805	Marketing Management in the Global Environment
BUL 6810	Legal Environment of Business
ACG 6175	Financial Reporting & Analysis
FIN 6644	Global Financial Strategy
MAN 6726	Strategic Management
MAR 6816	Corporate Simulation
IMBA Elective	

Elective Options (Choose one)

- MAN 6930 Master's Seminar in Management – Study Abroad
- GEB 6941C Graduate Internship
- Any course offered in the Summer term in any of the business disciplines.

Each of the Professional Development Seminars will focus on soft skills such as leadership, team building, oral presentation, writing skills and career exploration. There will be team-building activities which include classroom exercises in group decision-making and problem-solving. Challenging outdoor exercises will be included to help participants build the skills they will need to work together in the program and to succeed in today's team-based organizations. Students will also work with a presentation and writing skills coach to improve the communication and writing skills that are critical to managerial success.

Professional Development Seminars will be mandatory, non-credit.

Professional Development Seminars include topics such as:

- Team Building
- Career Development
- Presentation Skills
- Writing Skills
- Leadership

The IMBA and MBA academic directors in consultation with the Associate Dean for the Chapman Graduate School of Business can substitute up to six credit hours of required courses.

The IMBA academic director can waive a professional development seminar.

Master of Business Administration in Business Analytics

Graduate business students opting to earn a Master of Business Administration in Business Analytics (MBA-BA) will gain a solid foundation in the application of statistical methods, techniques, and tools to large data sets. The major provides students with the background needed to applying statistical methods and techniques through use of decision support systems (DSS), expert systems (ES), business intelligence (BI) reporting tools, and business analytics (BA) data mining tools. Depending on background and experience, graduates will be prepared for a wide range of positions including entry-level and management business analytics and reporting positions.

Admission Requirements

The Master of Business Administration in Business Analytics (MBABA) program considers students' work experience, industry knowledge, management skills and undergraduate education as strengths in the candidates qualifying portfolio. Candidate's professional maturity and managerial experience are highly considered in the admission selection process because the MBA-BA program at FIU fosters students' ability to contribute real-world experiences to add value to the overall student learning in this competitive degree program.

To be eligible for admission to the MBA-BA program in the Chapman Graduate School of Business, applicants must:

1. Hold a bachelor degree or equivalent from either a U.S. accredited college or university or the equivalent degree from institutions outside the U.S.; Students coming from programs where the primary degree is at the master level or higher will meet this requirement;
2. Show high promise of success in graduate studies as determined by the faculty based upon academic performance, work experience or a combination of academic and work experience.
3. Evidence a minimum score of 500 on the Graduate Management Admission Test (GMAT) or similar Graduate Record Exam (GRE) score. A GMAT waiver at the discretion of the academic director is available for:
 - A. Applicants with two years of demonstrative work experience and success in completing other academic programs;
 - B. Applicants who have an undergraduate business or related

degree (economics, hospitality management, etc.) with an upper division grade point average (GPA) of 3.25;

C. Applicants without a business or related degree having an upper division GPA of 3.35;

D. If the applicant has already completed a graduate degree from an accredited university with a minimum grade point average (GPA) of 3.0, or is entering a business master's program under a special agreement for admissions with specific foreign and domestic universities;

4. Should, in general, have a minimum upper division grade point average (GPA) of 3.0. An applicant with substantial work experience and industry/work related recommendations will be evaluated based on academic qualifications, work experience, and performance;

5. Provide a resume describing current and past responsibilities, leadership and management experience highlights and, if any, demonstrated accomplishments in the application of quantitative and analytical skills;

6. Provide a statement of purpose (short essay) describing how the program fits within your personal and career goals. The essay will be evaluated for applicants' effective and succinct writing skills;

7. When the applicant's studies were completed in non-English speaking countries, demonstrate proficiency of the English language by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on the paper based version or 213 on the computer based version of the test of English as a Foreign Language) or 6.5 overall on the International English Language Testing System (IETLS) or by other university level English proficiency standards as they are approved.

Applicants are encouraged to provide any additional documentation to strengthen their application portfolio. Examples of documentation include: master degree in any discipline other than an MBA, law degree, professional certifications (i.e. CPA, CFA, SHRM, etc.), GMAT or GRE scores, specialized leadership experience or training documentation that the applicant is part of a "fast track" or "high potential" management group at their organization, or any other similar evidence including letters of reference and recommendations.

Admissions at the graduate level are competitive and meeting minimum requirements does not guarantee admission.

For additional information about this value-added program, please contact the MBA-BA office at (305) 779-7897 or email mbaba@fiu.edu

Degree Requirements

Students must successfully complete 15, three-credit hour courses for a total of 45 credit hours, inclusive of the MBA Core*, and three noncredit Professional Development Seminars.

Professional development seminars I, II, and III Each of the seminars will focus on soft skills such as leadership, team building, oral presentation, writing skills and career exploration.

Seminars will be mandatory, non-credit.

Global MBA Programs

The Chapman Graduate School also offers the Professional MBA in Jamaica and Panama. Curriculum and admission requirements are identical to those of the PMBA. For more information about these programs, please contact the Program Manager at (305) 348-3468.

Other Master's Program

The Chapman School offers a variety of Master of Science and professional master's degree programs: Master of Accounting, Executive Master of Science in Taxation, Master of Science in Finance, Master of Science in International Real Estate, Master of Science in Information Systems, Master of Science in Human Resource Management, Master of Science in Marketing, and Master of Science in Logistics and Supply Chain Management. These programs are described in the respective departmental pages of this catalog or at: <http://business.fiu.edu>.

Master of Accounting/Master of Business Administration Joint Degree Pathway

The School of Accounting and the IMBA program in the Alvah H. Chapman Jr. Graduate School of Business at Florida International University offer a joint degree pathway culminating in both a Master of Accounting (MACC) and a Master of Business Administration. Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway will use existing faculty, courses, and resources. Important criteria relating to the joint degree program are as follows:

1. Candidates to the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must indicate on the application their intention to pursue the joint degree pathway.
2. Applications for a joint degree will not be accepted from candidates who have already completed either degree.
3. Domestic undergraduate non-accounting degree holders; and international degree holders, regardless

of major, will take the following courses, for a saving of 15 credits:

- 34 credits at the 6000-level from the IMBA
 - 15 credits at the 5000-level from the MACC
 - 30 credits at the 6000-level from the MACC
4. Domestic undergraduate accounting degree holders from AACSB accredited universities, may petition to waive the 5000-level MACC courses, for a saving of an additional 15 credits.
 5. All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. Directors of the MACC and MBA degree programs may adjust these exact course requirements as a result of future changes to the MACC or MBA curriculums.
 6. Joint degree candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first degree program requirements as if the student had never been a joint degree pathway candidate.

Master of Business Administration/ Master of Arts in Latin American and Caribbean Studies Joint Degree Pathway

The Alvah H. Chapman Jr. Graduate School of Business and the Latin American and Caribbean Center at Florida International University have approved a joint degree pathway culminating in both a Master of Business Administration degree (MBA), awarded by the College of Business, and a Master of Arts in Latin American and Caribbean Studies degree (MALACS), administered by the Latin American and Caribbean Center (LACC) for the College of Arts and Sciences. Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. Essential criteria relating to the joint degree pathway are as follows:

1. Candidates to the joint degree pathway must meet the entrance requirements established by each individual program.
2. Applications for a joint degree will not be accepted from candidates who have already completed either degree. Business Administration students must apply and be admitted by no later than the semester in which they are expected to complete 18 pre-core and core credit hours in the MBA program. MALACS students must apply and be admitted by no later than the semester in which they are expected to complete 18 credit hours in that program.
3. Candidates must satisfy all requirements for each degree. Twelve (12) credit hours from the MBA curriculum pre-core and core requirements may count toward the MALACS degree to satisfy MALACS concentration requirements. Nine (9) credit hours from the MALACS course offerings may be applied to satisfy MBA elective requirements. All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. MALACS courses transferred to meet MBA elective credit must be 6000 or 7000 level courses approved by the University Curriculum Committee and be from the approved MALACS course list in the social science disciplines of anthropology, economics, environmental

studies, history, international relations, Latin American and Caribbean Studies (interdisciplinary), political science, or sociology. The Dean of the Chapman Graduate School of Business (or his/her delegate) has final authority on the approval of which courses may be transferred to meet MBA elective requirements.

4. Based on existing MBA and MALACS curriculums, specifics on the transfer of credits include the following. Participants in the joint degree pathway will obtain a MALACS concentration in International Business. Four MBA pre-core or core courses (12 credits) may be transferred to meet the student's MALACS concentration requirements. Students who have not taken MAN 6910 Research Methods in Management as an MBA elective course will be required to take a MALACS-approved social science research methods course as one of their first MALACS courses. With the 12 credit transfer from the MBA program, to obtain the MALACS degree, the student will be required to take the MALACS gateway interdisciplinary course LAS 6003 Survey of Latin America and the Caribbean (3 credits), the MALACS required data analysis course LAS 6930 Latin American and Caribbean Data Analysis (3 credits), one additional course in the MALACS concentration of International Business (the social science research methods course may meet this requirement) (3 credits), three additional courses in at least two MALACS concentrations other than International Business (9 credits), and a MALACS graduation exit option (6 credits), for a total of 24 MALACS credits. Candidates for the MALACS degree must also meet MALACS language proficiency requirements. With the 9 credit transfer from the MALACS program, to obtain the MBA degree, the student will be required to take all MBA pre-core, core, and professional development seminar courses, plus one MBA elective, for a total of 46 MBA credits. Directors of the MBA and MALACS degree programs may adjust the exact course numbers and titles required for degree completion as a result of future changes to the MBA or MALACS curriculums.
5. If the joint degree candidate chooses the thesis exit option for the MALACS degree, the thesis must address a Latin American or Caribbean business or management issue. The thesis committee must be chaired by a College of Arts and Sciences faculty member. Furthermore, the thesis committee must have at least one member from both the College of Business and College of Arts and Sciences. Thesis committee co-chairs with faculty members from both colleges are recommended. Candidates selecting a MALACS exit option other than the thesis must follow the procedures established by the MALACS program. MALACS will establish the necessary thesis, internship, independent study, or directed research course numbers to allow Graduate School of Business faculty to participate in MALACS exit options for joint degree students.
6. Candidates accepted to the joint degree pathway may begin their studies in either program first. All candidates must register for classes during the regular registration period for the respective program. Additionally, joint degree pathway students must register for a course or courses in their second

degree no later than the semester commencing the second half of their first degree program.

7. Joint degree candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first degree program requirements as if the student had never been a joint degree candidate. Subject to prior approval, graduate students are normally allowed six (6) credit hours from graduate level courses offered by other units of the University as counting toward single degrees.
8. Candidates in the joint degree pathway will be eligible for the graduate teaching assistantships, graduate research assistantships, and scholarships in the Chapman Graduate School of Business and LACC on the same basis as other graduate students, subject to the guidelines and restrictions set by either program.
9. Future changes to the joint MBA/MALACS degree pathway must be endorsed by the College of Business Faculty Curriculum Committee and Associate Dean of the Chapman Graduate School of Business; the College of Arts and Sciences Faculty Curriculum Committee and Dean of the College of Arts and Sciences; and approved by the University Curriculum Committee, Graduate Council, the Faculty Senate, Dean of the University Graduate School, and the Provost.

For additional information, contact the Evening MBA office at (305) 348-3256 or the Latin American and Caribbean Center (LACC) at (305) 348-2894.

Master of Business Administration/Juris Doctor Joint Degree Pathway

Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. Essential criteria relating to the joint degree pathway are as follows:

1. Candidates for the pathway must meet the entrance requirements for and be accepted by both Colleges. The college of Business may accept LSAT scores in lieu of GMAT or GRE scores for candidates from the College of Law as part of the admission requirement in the MBA. Both Colleges must be informed by the student at the time of application to the second program that the student intends to pursue the joint degree.
2. The joint degree pathway is not open to students who have already earned one degree.
3. For law students, enrollment in the MBA program is required no later than the completion of 63 credit hours in the JD program. For MBA students, enrollment in the JD program is required no later than the third semester after beginning the MBA program. For purposes of this paragraph, a summer session is counted as half a semester.
4. A student must satisfy the curriculum requirements for each degree before either degree is awarded. The College of Business will allow 12 credit hours of upper level business and commercial law courses to be credited toward both the M.B.A. and J.D. degrees. These 12 credit hours of law classes will be in lieu of the Legal Environment of Business course (3 credit hours) and three of the elective courses (totaling 9 credit hours) required for the M.B.A. degree. A

student may obtain a concentration in the M.B.A. program in accordance with the College of Business curriculum requirements for concentrations. Reciprocally, law students may receive 9 hours of credit toward the satisfaction of the J.D. degree for courses taken in the M.B.A. curriculum upon completion of the M.B.A. degree curriculum with a grade point average of 3.0 or higher.

5. A student enrolled in the joint degree pathway may begin the student's studies in either College, but full-time law students must take the first two semesters of law study consecutively and part-time law students must take the first three semesters of law study consecutively. Students admitted to one College but electing to begin study in the other College under the joint degree pathway may enter the second College thereafter without once again qualifying for admission so long as they have notified the second College before the end of the first week of the first semester in the second College and are in good academic standing when studies commence in the second College.
6. A student enrolled in the joint degree pathway will not receive either degree until the student has satisfied all of the requirements for both degrees, or until the student has satisfied the requirements of one of the degrees as if the student had not been a joint degree pathway candidate.
7. Students in the joint degree pathway will be eligible for the graduate teaching assistantships and research assistantships in the College of Business on the same basis as other MBA students, subject to the guidelines and restrictions set by the College of Business.

For additional information, contact the Chapman Graduate School of Business at (305) 348-0148 or the Law School Admissions Office at (305) 348-8006.

Master of International Business/Master of Business Administration Joint Degree Pathway

The MIB and MBA programs in the Alvah H. Chapman Jr. Graduate School of Business at Florida International University offer a joint degree pathway culminating in both a Master of Business Administration degree (MBA), and a Master of International Business (MIB). Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway will use existing faculty, courses, and resources. Important criteria relating to the joint degree pathway are as follows:

1. Candidates to the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must indicate on the application their intention to pursue the joint degree option. Candidates deciding to pursue the joint degree option after having been admitted to one program will indicate this intention only on their second application.
2. Applications for a joint degree pathway will not be accepted from candidates who have already completed either degree. MBA or MIB students must apply and be admitted no later than the second to last

semester in which they are expected to complete their original degree requirements.

3. Candidates must satisfy all requirements for each degree. The two degrees will have four common courses. All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. MIB courses transferred to meet MBA elective credit and vice versa must be 6000 level courses approved by the University Curriculum Committee. Directors of the MBA and MIB degree programs may adjust these exact course requirements as a result of future changes to the MBA or MIB curriculums.

3.1 Joint Flex MBA/MIB Degree Pathway

3.1.1 To obtain MIB degree, Flex MBA students must complete the following courses for a total of 63 credit hours as follows:

In the MIB program (36 credits hours):

ACG 6026	International Accounting	3
ACG 6175	Financial Reporting & Analysis	3
BUL 6810	Legal Environment	3
FIN 6406	Corporate Finance	3
FIN 6446	Competitive Strategy	3
MAN 6501	Operations Management	3
MAN 6245	Organizational Behavior	3
MAN 6726	Strategic Management	3
MAN 6830	Organizational Information Systems	3
MAR 6805	Marketing Management in the Global Environment	3
MAR 6816	Corporate Simulation	3
QMB 6357	Business Statistical Analysis	3
	Professional Development Seminars (PDS)	

In the MIB program (24 credit hours):

MAN 6930	Master's Seminar in Management	3
MAN 6635	Global Strategy and Business Models	3
MAN 6601	Global Management Skills	3
MAN 6617	Managing Global Production and Technology	3
MAN 6679	Master's Project in International Business	3
MAN 6158	International Marketing	3
	MIB Elective	3
	MIB Elective	3

Two of the following elective courses are required for the MIB degree:

MAN 6678	Global Start-ups	3
GEB 6941C	Graduate Business Internship	3
MAN 6937	Special Topics in Business Environment	3

3.2.2. To obtain the International MBA (IMBA), MSIS degree students must complete a total of 69 credits as follows:

In the MIB program (36 credit hours):

MAN 6930	Master's Seminar in Management	3
MAN 6606	Fundamentals of International Business	3
ACG 6026	Accounting for Managers	3
BUL 6850	International Business Law	3
FIN 6644	Global Financial Strategy	3
MAN 6635	Global Strategy and Business Models	3

MAN 6601	Global Management Skills	3
MAN 6617	Managing Global Production and Technology	3
MAN 6679	Master's Project in International Business	3
MAR 6158	International Marketing	3
	MIB Elective	3
	MIB Elective	3

Two of the following elective courses are required for the MIB degree:

MAN 6678	Global Start-ups	3
GEB 6941C	Graduate Business Internship	3
MAN 6937	Special Topics in Business Environment	3

In the IMBA program (33 credit hours):

ACG 6175	Financial Reporting & Analysis	3
BUL 6810	Legal Environment	3
FIN 6406	Corporate Finance	3
FIN 6446	Competitive Strategy	3
MAN 6501	Operations Management	3
MAN 6245	Organizational Behavior	3
MAN 6726	Strategic Management	3
MAN 6703	Colloquium in Managing Organizational Ethics	3
MAN 6830	Organizational Information Systems	3
MAR 6805	Marketing Management in the Global Environment	3
MAR 6816	Corporate Simulation	3
QMB 6357	Business Statistical Analysis	3
	Professional Development Seminars (PDS) I, II, III	2

In the MIB program (24 credit hours):

MAN 6930	Master's Seminar in Management	3
MAN 6635	Global Strategy and Business Models	3
MAN 6601	Global Management Skills	3
MAN 6617	Managing Global Production and Technology	3
MAN 6679	Master's Project in International Business	3
MAR 6158	International Marketing	3
	MIB Elective	3
	MIB Elective	3

Two of the following elective courses are required for the MIB degree:

MAN 6678	Global Start-ups	3
GEB 6941C	Graduate Business Internship	3
MAN 6937	Special Topics in Business Environment	3

3.2.2. To obtain the International MBA (IMBA), MSIS degree students must complete a total of 69 credits as follows:

In the MIB program (36 credit hours):

MAN 6930	Master's Seminar in Management	3
MAN 6606	Fundamentals of International Business	3
ACG 6026	Accounting for Managers	3
BUL 6850	International Business Law	3
FIN 6644	Global Financial Strategy	3
MAN 6635	Global Strategy and Business Models	3
MAN 6601	Global Management Skills	3
MAN 6617	Managing Global Production and Technology	3

MAN 6679	Master's Project in International Business	3
MAR 6158	International Marketing	3
	MIB Elective	3
	MIB Elective	3

Two of the following elective courses are required for the MIB degree:

MAN 6678	Global Start-ups	3
GEB 6941C	Graduate Business Internship	3
MAN 6937	Special Topics in Business Environment	3

In the IMBA program (33 credit hours):

ACG 6175	Financial Reporting & Analysis	3
BUL 6810	Legal Environment of Business	3
FIN 6406	Corporate Finance	3
MAN 6501	Operations Management	3
MAN 6245	Organizational Behavior	3
MAN 6726	Strategic Management	3
MAN 6703	Colloquium in Managing Organizational Ethics	1
MAN 6830	Organizational Information Systems	3
MAR 6805	Marketing Management in the Global Environment	3
MAR 6816	Corporate Simulation	3
QMB 6357	Business Statistical Analysis	3
	Professional Development Seminars (PDS) I, II, III	2

3.3. Joint Professional MBA/MIB Degree Pathway

3.3.1. To obtain the MIB degree. Professional MBA (PMBA) students must complete the following courses for a total of 66 credit hours as follows:

In the PMBA program (42 credit hours):

ACG 6026	Accounting for Managers	3
ACG 6175	Financing Reporting & Analysis	3
BUL 6810	Legal Environment of Business	3
FIN 6406	Corporate Finance	3
FIN 6446	Competitive Strategy	3
FIN 6644	Global Financial Strategy	3
MAN 6608	International Business	3
MAN 6501	Operations Management	3
MAN 6245	Organizational Behavior	3
MAN 6726	Strategic Management	3
MAN 6830	Organizational Information Systems	3
MAR 6805	Marketing Management in the Global Environment	3
MAR 6816	Corporate Simulation	3
QMB 6357	Business Statistical Analysis	3
	Professional Development Seminars (PDS)	

In the MIB program (24 credit hours):

MAN 6930	Master's Seminar in Management	3
MAN 6635	Global Strategy and Business Models	3
MAN 6601	Global Management Skills	3
MAN 6617	Managing Global Production and Technology	3
MAN 6679	Master's Project in International Business	3
MAR 6158	International Marketing	3
MAN 6606	Fundamentals of International Business	3
	MIB Elective	3
	MIB Elective	3

Two of the following elective courses are required for the MIB degree:

MAN 6678	Global Start-ups	3
GEB 6941C	Graduate Business Internship	3
MAN 6937	Special Topics in Business Environment	3

3.3.2. To obtain the Professional MBA (PMBA). MIB degree students must complete a total of 66 credits as follows:

In the MIB program (36 credit hours):

	In the MIB program (36 credit hours):	
MAN 6930	Master's Seminar in Management	3
MAN 6606	Fundamentals of International Business	3
ACG 6026	Accounting for Managers	3
BUL 6850	International Business Law	3

MAN 6678	Global Start-ups	3
GEB 6941C	Graduate Business Internship	3
MAN 6937	Special Topics in Business Environment	3

In the PMBA program (30 credit hours):

ACG 6175	Financing Reporting & Analysis	3
FIN 6406	Corporate Finance	3
MAN 6501	Operations Management	3
MAN 6245	Organizational Behavior	3
MAN 6726	Strategic Management	3
MAN 6830	Organizational Information Systems	3
MAR 6805	Marketing Management in the Global Environment	3
MAR 6816	Corporate Simulation	3
QMB 6357	Business Statistical Analysis	3
	Professional Development Seminars (PDS)	

Notes:

¹ Requirements for the CMBA depend on track chosen. If a candidate has elected the option of a specialization, the number of credit hours required and shared for the Flex will be used. Otherwise, the number of credit hours required and shared for the PMBA will be used.

² The Executive MBA and Professional MBA in Healthcare Management programs are not included as an option for the joint degree.

1. Joint degree candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first degree program requirements as if the student had never been a joint degree candidate.

For additional information, contact the MIB office at (305) 348-3279 or the MBA office at (305) 348-0148.

Master of Science in Finance/Master of Business Administration Joint Degree Pathway

The Department of Finance and the MBA program in the Alvah H. Chapman Jr. Graduate School of Business at Florida International University have a joint degree pathway culminating in both a Master of Business Administration degree (MBA), and a Master of Science in Finance degree (Fast Track-MSF). Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway uses existing faculty, courses, and resources. Important criteria relating to the joint degree pathway are as follows:

1. Candidates to the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must indicate on the application their intention to pursue the joint degree option. Candidates deciding to pursue the joint degree option after having been admitted to one program will indicate this intention only on their second application.
2. Applications for a joint degree pathway will not be accepted from candidates who have already completed either degree. MBA or Fast Track-MSF students must apply and be admitted by no later than the second to last semester in which they are expected to complete their original degree requirements.
3. Candidates must satisfy all requirements for each degree. The two degrees will have four-five common courses. Courses transferred between degrees must be completed with a grade point average of 3.0 or higher. MSF courses transferred to meet MBA elective credit must be 6000 level courses approved by the University Curriculum Committee. Directors of the MBA and MSF degree programs may adjust these exact course requirements as a result of future changes to the MBA or MSF curriculums.

3.1 Joint Flex MBA/MSF Degree Pathway

To obtain MSF/MBA through the Flex program, students must complete the following courses for a total of 66 credit hours as follows:

In the Flex MBA program (33 credit hours):

ACG 6175	Financial Reporting & Analysis	3
BUL 6810	Legal Environment	3
FIN 6406	Corporate Finance	3
FIN 6446	Competitive Strategy	3
MAN 6501	Operations Management	3
MAN 6245	Organizational Behavior	3
MAN 6726	Strategic Management	3
MAN 6830	Organizational Information Systems	3
MAR 6805	Marketing Management in the Global Environment	3
MAR 6816	Corporate Simulation	3
QMB 6357	Business Statistical Analysis	3

Professional Development Seminars (PDS) I, II, III

In the MSF program (33 credit hours):

FIN 6456	Quantitative Methods in Financial Analysis	3
FIN 6515	Securities Analysis	3
FIN 6246	Financial Markets and Institutions	3
FIN 6537	Financial Futures and Fixed Income Investments	3
FIN 6487	Financial Risk Management	3
FIN 6644	Global Financial Strategy	3
FIN 6525	Portfolio Management	3

FIN 6465	Financial Planning and Statement Analysis	3
One of the following specialty tracks, in addition to the core MSF courses is required for the MSF degree:		
Financial Management		
FIN 6326	Commercial Banking	3
FIN 6436	Capital Budgeting and Long Term Resource Allocation	3
FIN 6425	Financial Management Policies	3
Investments		
FIN 6425	Financial Management Policies	3
FIN 6489	Advanced Financial Risk Management	3
FIN 6517	Advanced Investments	3
International Banking		
FIN 6326	Commercial Banking	3
FIN 6625	International Bank Management	3
FIN 6346	Credit Analysis	3

3.2. Joint International MBA/MSF Degree Pathway

To obtain MSF/MBA through the International program, students must complete the following courses for a total of 72 credit hours as follows:

In the IMBA program (42 credit hours):

ACG 6026	Accounting for Managers	3
ACG 6175	Financial Reporting & Analysis	3
BUL 6810	Legal Environment	3
FIN 6406	Corporate Finance	3
FIN 6444	Global Financial Strategy	3
MAN 6501	Operations Management	3
MAN 6245	Organizational Behavior	3
MAN 6726	Strategic Management	3
MAN 6608	International Business	3
MAN 6703	Colloquium in Managing Organizational Ethics	3
MAN 6830	Organizational Information Systems	3
MAN 6679	Master's Project in International Business	3
MAR 6805	Marketing Management in the Global Environment	3
QMB 6357	Business Statistical Analysis	3
Professional Development Seminars (PDS) I, II, III		

In the MSF program (30 credit hours):

FIN 6456	Quantitative Methods in Financial Analysis	3
FIN 6515	Securities Analysis	3
FIN 6246	Financial Markets and Institutions	3
FIN 6537	Financial Futures and Fixed Income Investments	3
FIN 6487	Financial Risk Management	3
FIN 6525	Portfolio Management	3
FIN 6465	Financial Planning and Statement Analysis	3

One of the following specialty tracks, in addition to the core MSF courses is required for the MSF degree:

Financial Management		
FIN 6326	Commercial Banking	3
FIN 6436	Capital Budgeting and Long Term Resource Allocation	3
FIN 6425	Financial Management Policies	3

Investments			
FIN 6425	Financial Management Policies	3	
FIN 6489	Advanced Financial Risk Management	3	
FIN 6517	Advanced Investments	3	
International Banking			
FIN 6326	Commercial Banking	3	
FIN 6625	International Bank Management	3	
FIN 6346	Credit Analysis	3	

Notes:

¹ Requirements for the CMBA depend on track chosen. If a candidate has elected the option of a specialization, the number of credit hours required and shared for the Flex will be used. Otherwise, the option for a joint degree is not available with the MSF.

² The Executive MBA, Professional MBA, and Professional MBA in Healthcare Management programs are not included as an option for the joint degree.

³ Joint degree candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first degree program requirements as if the student had never been a joint degree candidate.

For additional information, contact the MBA office at (305) 348-0148 or the Master of Science in Finance office at (305) 348-4198.

Master of Science in Information Systems/Master of Business Administration Joint Degree Pathway

The Master of Science in Information Systems and the MBA program in the Alvah H. Chapman Jr. Graduate School of Business at Florida International University are offering a joint degree pathway culminating in both a Master of Business Administration (MBA), and a Master of Science in Information Systems degree (MSIS). Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway will use existing faculty, courses, and resources. Important criteria relating to the joint degree pathway are as follows:

1. Candidates to the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must indicate on the application their intention to pursue the joint degree option. Candidates deciding to pursue the joint degree option after having been admitted to one program will indicate this intention only on their second application.
2. Applications for a joint degree pathway will not be accepted from candidates who have already completed either degree. MBA or MSIS students must apply and be admitted no later than the second to last semester in which they are expected to complete their original degree requirements.
3. Candidates must satisfy all requirements for each degree. The two degrees will have two – four common courses. All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. MSIS courses transferred to

meet MBA elective credit must be 6000 level courses approved by the University Curriculum Committee. Directors of the MBA and MSIS degree programs may adjust these exact course requirements as a result of future changes to the MBA or MSIS curriculums.

3.1 Joint Flex MBA/MSIS Degree Pathway

To obtain MSIS/MBA through the Flex program, students must complete the following courses for a total of 66 credit hours as follows:

In the Flex MBA Program (33 credit hours)

ACG 6026	Accounting for Managers	3
ACG 6175	Financial Reporting and Analysis	3
BUL 6810	Legal Environment	3
FIN 6406	Corporate Finance	3
FIN 6446	Competitive Strategy	3
MAN 6501	Operations Management	3
MAN 6245	Organizational Behavior	3
MAN 6726	Strategic Management	3
MAN 6830	Organizational Information Systems	3
MAR 6805	Marketing Management in the Global Environment	3
MAR 6816	Corporate Simulation	3
QMB 6357	Business Statistical Analysis	3

In the MSIS program (33 credit hours):

ISM 6106	Systems Analysis	3
ISM 6205	Database Management	3
ISM 6136	Business Analytics Applications	3
ISM 6307	Management of the Information Systems Function	3
ISM 6208	Data Warehousing	3

ISM 6338	Information Systems Strategy and Governance	3
ISM 6316	Project Management	3
	MIS Elective	3
	MIS Elective	3

Professional Development Seminars (PDS) I, II, III

Two of the following courses (selected at the Department's discretion for each cohort) are required for the MSIS Degree:

ISM 6024	Managing Distributed Architecture	3
ISM 6156	Enterprise Information Systems	3
ISM 6251	Emerging Information Technologies	3
ISM 6489	E-business and Blockchain Applications	3
ISM 6138	Managing Unstructured Data	3
ISM 6930	Special Topics in Management Information Systems	3
ISM 6942	MIS Internship	3

Optional Elective

ISM 6942	MIS Internship	1-3
----------	----------------	-----

3.2. Joint International MBA/MSIS Degree Pathway

To obtain MSIS/MBA through the International program, students must complete the following courses for a total of 75 credit hours as follows:

In the IMBA program (42 credit hours):

ACG 6026	Accounting for Managers	3
ACG 6175	Financial Reporting and Analysis	3

BUL 6810	Legal Environment of Business	3	MAR 6816	Corporate Simulation	3
FIN 6406	Corporate Finance	3	QMB 6357	Business Statistical Analysis	3
FIN 6644	Global Financial Strategy	3	Professional Development Seminars (PDS)		
MAN 6501	Operations Management	3	In the MSIS program (33 credit hours):		
MAN 6245	Organizational Behavior	3	ISM 6106	Systems Analysis	3
MAN 6726	Strategic Management	3	ISM 6205	Database Management	3
MAN 6608	International Business	3	ISM 6136	Business Analytics Applications	3
MAN 6703	Colloquium in Managing Organizational Ethics	1	ISM 6307	Management of the Information Systems Function	3
MAN 6679	Master's Project	3	ISM 6208	Data Warehousing	3
MAR 6805	Marketing Management in the Global Environment	3	ISM 6128	Business Process Design	3
MAR 6816	Corporate Simulation	3	ISM 6328	Information Security Management	3
QMB 6357	Business Statistical Analysis	3	ISM 6338	Information Systems Strategy and Governance	3
Professional Development Seminars (PDS) II, III			ISM 6316	Project Management	3
In the MSIS program (33 credit hours):			MIS Elective		3
ISM 6106	Systems Analysis	3	MIS Elective		3
ISM 6205	Database Management	3	Professional Development Seminars (PDS) I, II, III		
ISM 6136	Business Analytics Applications	3	Two of the following courses (selected at the Department's discretion for each cohort) are required for the MSIS degree:		
ISM 6307	Management of the Information Systems Function	3	ISM 6024	Managing Distributed Architecture	3
ISM 6208	Data Warehousing	3	ISM 6156	Enterprise Information Systems	3
ISM 6128	Business Process Design	3	ISM 6251	Emerging Information Technologies	3
ISM 6328	Information Security Management	3	ISM 6489	E-business and Blockchain Applications	3
ISM 6338	Information Systems Strategy and Governance	3	ISM 6138	Managing Unstructured Data	3
ISM 6316	Project Management	3	ISM 6930	Special Topics in Management Information Systems	3
	MIS Elective	3	ISM 6942	MIS Internship	3
	MIS Elective	3	Optional Elective		
Professional Development Seminars (PDS) I, II, III			ISM 6942	MIS Internship	1-3
Two of the following courses (selected at the Department's discretion for each cohort) are required for the MSIS degree:			Notes:		
ISM 6024	Managing Distributed Architecture	3	¹ Requirements for the Corporate MBA depend on track chosen. If a candidate has elected the option of a specialization, the requirements and shared/common courses for the Flex MBA will be used. Otherwise, the requirements and shared/common courses for the PMBA will be used.		
ISM 6156	Enterprise Information Systems	3	² The Executive MBA and Professional MBA in Healthcare Management programs are not included as an option for the joint degree pathway.		
ISM 6251	Emerging Information Technologies	3	³ Joint degree pathway candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first degree program requirements as if the student had never been a joint degree pathway candidate.		
ISM 6489	E-business and Blockchain Applications	3	For additional information, contact the MBA office at (305) 348-6852 or the MSIS Office at (305) 348-0148.

Optional Elective					
ISM 6942	MIS Internship	1-3			

3.3. Joint Professional MBA/MSIS Degree Pathway

To obtain MSIS/MBA through the Professional program students must complete the following courses for a total of 72 credit hours as follows:

In the PMBA program (39 credit hours):

ACG 6026	Accounting for Managers	3
ACG6175	Financial Reporting and Analysis	3
BUL 6810	Legal Environment of Business	3
FIN 6406	Corporate Finance	3
FIN 6446	Competitive Strategy	3
FIN 6644	Global Financial Strategy	3
MAN 6608	International Business	3
MAN 6501	Operations Management	3
MAN 6245	Organizational Behavior	3
MAN 6726	Strategic Management	3
MAR 6805	Marketing Management in the Global Environment	3

Master of Science in International Real Estate/Master of Business Administration Joint Degree Pathway

The Department of Finance and the Master of Business Administration program in the Alvah H. Chapman, Jr. Graduate School of Business at Florida International University have a joint degree pathway culminating in both a Master of Business Administration degree (MBA), and a Master of Science in International Real Estate degree

(MSIRE). Under the joint degree program pathway, a student can obtain both degrees in less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway will use existing faculty, courses, and resources. Important criteria relating to the joint degree pathway are as follows:

1. Candidates to the joint degree pathway must meet the entrance requirements established by each individual program.
2. Applications for a joint degree pathway will not be accepted from candidates who have already completed either degree. MBA or MSIRE students must apply and be admitted prior to or concurrent with the last semester in which they are expected to complete their original degree requirements.
3. Candidates must satisfy all requirements for each degree. To obtain the MSIRE degree, the student will be required to take ten (10) finance courses totaling 30 hours as required by the program. This includes two finance courses, FIN 6428 Corporate Finance and FIN 6644 Global Financial Strategy, included in the MBA (and required by all the individual MBA programs) which are also required by the MSIRE Program, plus five real estate core courses in the MSIRE Program, plus two real estate (REE prefix) electives and an additional graduate course approved by the Program Director.
4. To obtain the MBA degree, the student will have to fulfill all the MBA program requirements for the specific MBA program in which they are also enrolled including the three 3-credit hour prerequisites, ten 3 credit core courses, four 1-credit seminars, and four 3-credit hour electives, for a total of 55 credit hours. Two finance courses are specifically required by both programs. In addition, two of the real estate (REE prefix) courses in the MSIRE may be considered as partially satisfying the elective requirements of the MBA program. The two degrees will have 4 common courses.
5. All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. MSIRE courses transferred to meet MBA elective credit must be 6000 level courses. Directors of the MBA and MSIRE degree programs may adjust these exact course requirements as a result of future changes to the MBA or MSIRE curriculums.
6. Joint degree pathway candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first degree program requirements as if the student had never been a joint degree pathway candidate.
7. With the joint degree pathway students will take a total of 73 credit hours to get both degrees. Without the joint degree pathway students would need to take 85 credit hours to earn both degrees. A maximum of 12 credit hours or four courses will be double counted for both degree programs. This means that a MBA student will be required to take a minimum of six courses or 18 additional credit hours above the requirements for the MBA Program to earn both degrees. Similarly, a student of the MSIRE must satisfy an additional 43 credit hours in order to earn both degrees.

For additional information, contact the Evening MBA office at (305) 348-3256 or the Master of Science in International Real Estate office at (305) 348-4198.

Master of Science in Human Resource Management/Master of Business Administration Joint Degree Pathway

The Department of Global Leadership and Management and the MBA program in the Alvah H. Chapman Jr. Graduate School of Business at Florida International University have a joint degree pathway culminating in both a Master of Business Administration degree (MBA), and a Master of Science in Human Resource Management (MSHRM). Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway will use existing faculty, courses, and resources. Important criteria relating to the joint degree pathway are as follows:

1. Candidates to the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must indicate on the application their intention to pursue the joint degree option. Candidates deciding to pursue the joint degree option after having been admitted to one program will indicate this intention only on their second application.
2. Applications for a joint degree pathway will not be accepted from candidates who have already completed either degree. MBA or MSHRM students must apply and be admitted no later than the second to last semester in which they are expected to complete their original degree requirements.
3. Candidates must satisfy all requirements for each degree. The two degrees will have two - four common courses. All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. MSHRM courses transferred to meet MBA elective credit must be 6000 level courses approved by the University Curriculum Committee. Directors of the MBA and MSHRM degree programs may adjust these exact course requirements as a result of future changes to the MBA or MSHRM curriculums.

3.1 Joint Flex MBA/MSHRM Degree Pathway

- 3.1.1. To obtain the MSHRM degree, Flex MBA students must complete the following courses for a total of 68 credit hours as follows:

In the Flex MBA program (36 credit hours):

ACG 6026	Accounting for Managers	3
ACG 6175	Financial Reporting & Analysis	3
BUL 6810	Legal Environment of Business	3
FIN 6406	Corporate Finance	3
FIN 6446	Competitive Strategy	3
MAN 6501	Operations Management	3
MAN 6245	Organizational Behavior	3
MAN 6726	Strategic Management	3
MAN 6830	Organizational Information	3
MAR 6805	Marketing Management in the Global Environment	3
MAR 6816	Corporate Simulation	3
QMB 6357	Business Statistical Analysis	3
	Professional Development Seminars (PDS)	

In the MSHRM program (32 credit hours):

MAN 6157	Wellness Management	3	FIN 6444	Global Financial Strategy	3

	Professional Development Seminars (PDS)	2

Notes:

¹ Requirements for the Corporate MBA depend on track chosen. If a candidate has elected the option of a specialization, the requirements and shared/common courses for the Flex MBA will be used. Otherwise, the requirements and shared/common courses for the PMBA will be used.

² The Executive MBA and Professional MBA in Healthcare Management programs are not included as an option for the joint degree pathway.

Joint degree pathway candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all degree requirements for the first program as if the student had never been a joint degree pathway candidate.

For additional information, contact the MBA office at (305) 348-0148 or the Master of Science in Human Resource Management office at (305) 348-5945.

Master of Business Administration/ Doctorate of Medicine (MD) Joint Degree Pathway

The Herbert Wertheim College of Medicine (HWCOC) and the MBA in Healthcare Management program in the Alva H. Chapman Jr. Graduate School of Business at Florida International University have a joint degree pathway culminating in both a Doctorate of Medicine (MD) and a Master of Business Administration degree (MBA). Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway will use existing faculty, courses, and resources. Important criteria relating to the joint degree pathway are as follows:

1. HWCOC Medical students in their third year of medical study may apply to the MBA program. Each college (College of Medicine and College of Business) will independently review and admit applicants to their programs. Only students admitted to both programs will enroll in classes in the joint program.
2. Joint degree pathway students will complete the first three years of coursework in the College of Medicine. Then, beginning in the fourth year, students in the joint pathway will interrupt their medical studies and begin classes for the MBA program. Classes in the MBA program will be taken during fall and spring semesters of the fourth year. During this time, students will complete 33 hours of course work in the MBA program. Nine credits taken in the medical school will count toward the 42 credits required for the MBA degree. At the beginning of the fifth year, students will recommence taking courses in the medical program. Students will graduate with both degrees at the end of the 5 years.
3. Students will be expected to complete a minimum of 42 credits for the MBA and 189 credits as well as all requirements for the MD degree. Thirty- three of those credits will be taken in the College of Business, with nine HWCOC credits being accepted toward the MBA degree. There is no change in course requirements for the MD degree.
4. Students will apply for the combined MD/MBA pathway in the following manner: Medical students in the summer or fall of their third year (prior to November first) must be in good academic standing and must get approval from the Medical Student Evaluation and Promotions Committee (MSEPC), the Office of Student Affairs (OSA), and the Office of Academic Affairs (OAA), in order to apply for admission to the MBA program. Applications will be reviewed by the MBA program admission committee. Applicants to the joint MD/MBA pathway will not be required to submit standardized test scores; they must have a minimum GPA of 3.0. However, they are required to have completed two years of experience, which includes volunteering, any internships or clerkships, and any full or part-time employment. All medical students interested in this program should already have at least two years of experience to satisfy this requirement.
5. Students begin taking classes in business in the fourth year. The entire fourth year is devoted to classes in the MBA program. The fall semester consists of five courses divided into two quarters. Three of the courses are face to face, and two courses are online. The spring semester consists of six courses, divided into two quarters. Four courses are face to face and two courses are online. There is also a requirement for program residencies (face to face/online) in August and March.

The curriculum in the MD/MBA pathway follows a prescribed course of study shown below. Structure of new joint MD/MBA degree. The proposed schedule is as follows. (HWCOC does not have semesters. Therefore, we have used Period designations.)

First Year Period 1 (M1) August to end of March:
College of Medicine curriculum
Second Year Period 2 (M2) April to end of March:
College of Medicine curriculum

Third Year Period 3 (M3) April to end of March:
College of Medicine: all required clerkships
Fourth Year Period 4 (M4) April through July only:
medical students start M4 electives, selectives or subinternship Students take USMLE Step I May or June

Medical students must be counseled as to when to take USMLE Step I and USMLE Step 2 CK and CS, and which electives, selective or subinternship to engage in prior to taking a leave to pursue the MBA.
The remainder of Period 4 (M4) then consists of MBA courses. That is, from August through end of April.

Fifth year- Spring semester of the MBA program ends the end of April. Medical students take the remainder of M4 period in the medical school (May through April).

The MBA residency #3 (online) could be taken during the first quarter of Spring term. Therefore, this will allow for the student to have additional time for the M4 year. The Lean Six Sigma Green Belt case offered in May, (listed below) would be optional for the MD/MBA pathway students.

Medical students will be counseled as to which electives, selectives or subinternship to take prior to applying for residency in September of this fifth year.
Below are the courses to be taken for the MBA and their location (Brickell or online).

FALL 2018

Quarter 1

MAN 6245	Organizational Behavior (HCMBA Brickell)	3
ACG 6026	Accounting for Managers (online Corporate MBA)	3

Quarter 2

BUL 6810	Legal Environment of Business (HCMBA Brickell)	3
FIN 6406	Corporate Finance (HCMBA online)	3
MAR 6805	Marketing Management in Global Environment (PMBA Flex)	3

SPRING 2019

Quarter 1

MAN 6098	Management of Healthcare Finance & Reimbursement (HCMBA Brickell)	3
MAN 6830	Organization Information Systems (HCMBA Brickell)	3
ACG 6175	Financial Reporting & Analysis (HCMBA online)	3
MAN 6726	Strategic Management (HCMBA online)	3

Quarter 2

MAN 6501	Operations Management (HCMBA Brickell)	3
MAN 6097	Managerial Decision Making in Health Economics (HMBA Brickell)	3

NOTE: HCMBA Brickell courses meet on Saturdays. PMBA (Flex) Brickell course meets Tuesdays or Thursdays 6:30-9:30 PM.

Courses waived in MBA:

MAN 6095	Management of Healthcare Organizations in the 21 st Century	3
BUL 6605	Healthcare Fraud and Abuse Law & Regulation	3
MAN 6974	Master's Project in Management	3

Credits accepted from HWCOM: 9 credits

MDR 7910	Research Scholarship	4
BMS 6880	Foundations of Clinical Epidemiology & Quantitative Research	2
BMS 6067	US Healthcare Delivery System	2
BMS 6826	Ethical Foundations of Medicine	1

There are, therefore, 11 courses to be taken in the College of Business, for a total of 33 credits.

Purpose

Our mission as a School of Accounting in an internationally-focused public research university is to:

- Foster an environment of intellectual curiosity, diversity of thought, and integrity;
- Provide a diverse student body with excellence in accounting education in order to succeed as business professionals and leaders as well as valued members of society;
- Prepare students for advancement in the accounting profession through specialized masters programs that strengthen professional competencies;
- Serve the academic community through scholarly research, colloquia, and the training of future accounting educators;
- Promote opportunities for professional development, lifelong learning and networking for our alumni and accounting professionals in the local, national and global community.

Master of Accounting (MACC)

The Master of Accounting degree program prepares students for a career in accounting.

Depending on a student's interests, he or she will prepare for a variety of career. Potential careers include, accounting systems, consultant, auditor, corporate officer, or public accountant; corporate management accounting; financial accounting and auditing systems; independent accountant in public accounting; internal auditing; internal auditor, industry or government; and internal accountant or corporate officer.

The School of Accounting offers a Master of Accounting (MACC) with tracks in Analytics, Assurance, Forensic Accounting, and Taxation. The program is designed for students who have completed an undergraduate degree in accounting, or the equivalent, from an accredited college or university. The Director of the School of Accounting will determine the equivalency of students' undergraduate degrees.

Students whose undergraduate degrees are in majors other than accounting will be required to make up for business and/or accounting deficiencies. The Director of the School must approve programs of study for students seeking to correct such deficiencies.

All students taking graduate accounting and tax courses must be fully admitted to the graduate accounting program or have written permission from the Director of the School. Registration for all such course work must be made through the appropriate College advisor.

Admission Requirements

To be eligible for admission to a Master's degree in the School of Accounting in the Chapman Graduate School, students must:

1. Hold a Business Bachelor's degree from an accredited college or university;
2. Show high promise of success in graduate studies as determined by the faculty based upon a minimum score of 500 on the Graduate Management Admission Test (GMAT) or the equivalent on the Graduate Record Exam (GRE). Applicants submitting GRE scores will be considered on an individual basis. The GMAT requirement will be waived if the student has
 - a. A graduate degree from an AACSB accredited university, or;
 - b. passed all parts of the CPA exam or;
 - c. obtained an undergraduate accounting degree from FIU or an AACSB accredited school or university with an upper division GPA of at least 3.25
3. Have a minimum upper division grade point average (GPA) of 3.0;
4. Graduate student applicants whose studies were completed outside of the US must demonstrate English language proficiency by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on the paper-based version) or 6.5 overall on the International English Language Testing System (IETLS);
5. Be in good standing with all previously-attended colleges and universities.

Admissions at the graduate level are competitive and meeting minimum requirements does not guarantee admission.

Special Program Requirements

Consistent with the current Florida CPA credentialing educational requirements, admission to the graduate accounting program requires an applicant with a nonaccounting degree to complete business prerequisite courses and up to eight undergraduate upper-division accounting courses (24 credit hours) from among the following: three credit hours of auditing, three credit hours of cost accounting, six credit hours of financial accounting, three credit hours of accounting information systems, six credit hours of taxation, three credit hours of business law, and three additional credit hours of accounting/business law/taxation coursework

Alternately, students may complete accelerated graduate-level prerequisite coursework equivalent to the undergraduate courses noted.

Florida Certified Public Accountant Requirements

Completing a Bachelor of Business Administration with a concentration in Accounting does not alone meet the Florida State Board of Accountancy educational requirements for CPA licensure. These requirements include earning 30 credit hours beyond an undergraduate degree for a total of 150 credit hours, with a total of 36 semester hours of accounting and 39 hours of general business including three hours of business law. One year of work experience in an accounting-related field is also required for licensure.

FIU's graduate accounting program satisfies the 30 semester hours beyond a Bachelor's degree required for CPA licensure.

Core Courses

All tracks in the MACC are comprised of 18 credits of core courses and 12 credits of specialized track courses.

MACC Core Courses:

ACG 6176	Evaluation of Financial Reports, Business Analysis and Valuation
ACG 6225	Advanced Accounting
ACG 6257	Global Accounting, Auditing and Financial Strategy
ACG 6385	Managerial Control and Controllorship
ACG 6455	AIS Systems Control (Analytics)
ACG 6505	Governmental and Non-profit Accounting

Elective Courses

Elective courses for all tracks are selected from the following listing:

ACG 6135	Seminar in Financial Accounting Theory I
ACG 6295	Financial Accounting IV
ACG 6406	Accounting Data Warehousing and Analysis
ACG 6437	Advanced Accounting Information Systems
ACG 6466	Accounting Enterprise Resource Planning
ACG 6625	Information Technology Auditing
ACG 6657	Environment of Accounting and Auditing
ACG 6675	Internal Auditing
ACG 6676	Advanced Internal Auditing
ACG 6677	Applied Internal Auditing
ACG 6685	Introduction to Forensic Accounting
ACG 6686	Fraud Examination

ACG 6687	Financial Investigation
ACG 6692	Business Analytics for Forensic Accounting
ACG 6696	Current Issues in Auditing
ACG 6838	Fraud Investigation
ACG 6867	Seminar in Medicare Regulation
ACG 6885	Accounting Research and Reporting
ACG 6935	Special Topics in Accounting
ACG 6845	Accounting and Quantitative Methods
ISM 6136	Business Analytics Applications
ISM 6404	Business Data Visualization and Reporting
QMB 6357	Business Analysis for Decision Making
TAX 6026	Value-Added Tax Strategies for Business Decisions
TAX 6065	Tax Research, Practice and Procedure
TAX 6105	Taxation of Corporations I
TAX 6107	Federal Corporate Taxation
TAX 6115	Taxation of Corporations II
TAX 6205	Partnership Taxation
TAX 6206	Taxation of Pass-Through Entities
TAX 6305	State and Local Taxation
TAX 6405	Estate and Gift Taxation
TAX 6415	Fiduciary Accounting and Taxation
TAX 6445	Estate Planning
TAX 6446	Wealth Transfers
TAX 6505	International Taxation I
TAX 6507	Principles of International Taxation
TAX 6515	International Taxation II
TAX 6805	Tax Policy
TAX 6835	Taxation of Deferred Compensation
TAX 6875	Current Developments in Taxation
TAX 6876	Transactions in Property
TAX 6877	Seminar in Taxation
TAX 6905	Independent Study in Taxation
TAX 6935	Special Topics in Taxation

The Director of the School of Accounting determines the schedule and may substitute up to two of these 6000 level courses with other 6000 level accounting courses.

Analytics Track

The Analytics track of the Masters of Accounting (MACC-Analytics) requires students to complete a minimum of 12 credits of statistics and Analytics as part of the 30-credit Masters of Accounting program (MACC). The track provides our students a clear designation of their concentration in the field.

The Analytics track also requires students complete one additional required ACG course (3 credits),
ACG 6456 Accounting Information Systems Technology, Control and Audit II (capstone)

In addition to 9 credits from among the group of elective courses.

The Faculty Director of the Master of Accounting program and Director of the School of Accounting determines the schedule and track specific elective courses for each cohort.

Assurance Track

The Assurance Track of the Masters of Accounting (MACC-Assurance) requires students to complete a minimum of 12 elective credits in the field of assurance

within the 30-credit Masters of Accounting program (MACC). The Assurance Track provides students a clear designation of their concentration in the field.

The Faculty Director of the Master of Accounting program and Director of the School of Accounting determines the schedule and track specific elective courses for each cohort.

Forensic Accounting Track

The Forensic Accounting Track of the Masters of Accounting (MACC-Forensic Accounting) requires students to complete a minimum of 12 elective credits in the field of forensic accounting within the 30-credit Masters of Accounting program (MACC). The track provides our students a clear designation of their concentration field, which is particularly attractive in a metropolitan area where identity theft, money laundering, estate settlements, healthcare fraud, and valuation disputes are prolific.

The Faculty Director of the Master of Accounting program and Director of the School of Accounting determines the schedule and track specific elective courses for each cohort

Taxation Track

The Taxation Track of the Master of Accounting (MACC-Tax) requires students to complete a minimum of 12 elective credits in the field of taxation within the 30-credit Master of Accounting program (MACC). The Taxation Track provides students a clear designation of their concentration in the taxation field.

The Faculty Director of the Master of Accounting program and Director of the School of Accounting determines the schedule and track specific elective courses for each cohort.

Computer Requirements

All MACC students are expected to own a laptop computer with wireless capability. You must have a laptop computer in order to begin your studies. A list of minimum requirements is available at <http://business.fiu.edu> or by contacting the program office.

Combined Bachelor of Accounting/Master of Accounting (BAcc/MAcc)

The Combined Bachelor of Accounting/Master of Accounting (BAcc/MAcc) degree pathway is designed for outstanding undergraduate students interested in continuing studies beyond their baccalaureate degree. The pathway provides a strong base of knowledge and skills in accounting, and at the same time accelerates completion of the Master of Accounting degree. Students may take advantage of the overlap of courses in the Bachelor of Accounting and Master of Accounting programs to receive their Master of Accounting degree in a shorter period than might otherwise be possible.

A student admitted to the combined degree pathway will be considered to have undergraduate status until conferral of their Bachelor of Accounting degree. Upon conferral of their undergraduate degree, the student will be granted graduate status.

Admission Requirements

1. Students must be enrolled in the Bachelor of Accounting (BAcc) degree program.
2. Students must have completed at least 75, but no more than 90, credits of coursework.
3. Students must have completed ACG 4101 or equivalents with a B+ or better.
4. Students must have an overall (transfer and FIU) GPA of 3.34 or higher.
5. Students must have two letters of recommendation, with at least one from a faculty member of the FIU School of Accounting.

General Requirements

1. Students must maintain a GPA of 3.0 or greater to remain in the pathway.
2. Bachelor of Accounting (BAcc) degree must be awarded before the Master of Accounting degree.
3. No grade below "C" will be accepted in any course taken to satisfy graduate program requirements.
4. Grade requirements for the Master of Accounting (MAcc) apply to courses counted toward the MAcc degree.
5. Up to 4 courses (12 credits) may be used in satisfying both the Bachelor of Accounting and Master of Accounting degree requirements.
6. Students must fulfill the degree requirements of both the Bachelor of Accounting and Master of Accounting programs, with all overlapping courses approved by both graduate program director and undergraduate advisors before students enroll in such courses.

Master of Accounting/Master of Business Administration Joint Degree Pathway

The School of Accounting and the IMBA program in the Alvah H. Chapman Jr. Graduate School of Business at Florida International University offer a joint degree pathway culminating in both a Master of Accounting (MACC) and a Master of Business Administration. Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway will use existing faculty, courses, and resources. Important criteria relating to the joint degree pathway are as follows:

1. Candidates to the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must indicate on the application their intention to pursue the joint degree option.
2. Applications for a joint degree will not be accepted from candidates who have already completed either degree.
3. Domestic undergraduate non-accounting degree holders; and international degree holders, regardless of major, will take the following courses, for a saving of 15 credits:
 - 34 credits at the 6000-level from the IMBA
 - 15 credits at the 5000-level from the MACC
 - 30 credits at the 6000-level from the MACC
4. Domestic undergraduate accounting degree holders from AACSB accredited universities, may petition to

waive the 5000-level MACC courses, for a saving of an additional 15 credits.

5. All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. Directors of the MACC and MBA degree programs may adjust these exact course requirements as a result of future changes to the MACC or MBA curriculums.
6. Joint degree pathway candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first degree program requirements as if the student had never been a joint degree pathway candidate.

With prior approval of the Director of the School of Accounting, two courses may be substituted for other 6000 level business courses.

Master of Accounting/Master of Science in Information Systems Joint Degree Pathway

The School of Accounting and the MSIS program in the Alvah H. Chapman Jr. Graduate School of Business at Florida International University are proposing a joint degree program culminating in both a Master in Accounting (MACC) and a Master of Information Systems (MSIS). Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway will use existing faculty, courses, and resources. Important criteria relating to the joint degree pathway are as follows:

1. Candidates to the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must indicate on their initial application their intention to pursue the joint degree option.
2. Applications for a joint degree will not be accepted from candidates who have already completed either degree.
3. Domestic undergraduate non-accounting degree holders; and international degree holders, regardless of major, will take the following courses, for a saving of 15 credits:
 - 24 credits at the 6000-level from the MSIS
 - 15 credits at the 5000-level from the MACC
 - 30 credits at the 6000-level from the MACC
4. Domestic undergraduate accounting degree holders from AACSB accredited universities may petition to waive the 5000-level MACC courses, saving an additional 15 credits.
5. All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. Directors of the MACC and MSIS degree programs may adjust these exact course requirements as a result of future changes to the MACC or MSIS programs.
6. Joint degree pathway candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first-degree program requirements as if the student had never been a joint degree candidate.

Accounting Concentration in the Ph.D. Program

The School of Accounting offers an Accounting concentration in the doctoral program in Business Administration. The Ph.D. program is a 75-credit hour program.

The first two years of the PhD program are typically spent in coursework and the last two years are spent working on the dissertation.

Students will also take courses with other departments (e.g. Finance, Economics, and Statistics) offering courses relevant to individual doctoral student's research needs.

Research tools courses: Specific research tool courses to be taken by Ph.D. students depend on their prior academic background and should be approved by the Accounting Doctoral Director.

ECO Courses

ECO 6112	Fundamentals of Microeconomic Theory
ECO 7405	Mathematical Methods in Economic Analysis I
ECO 7424	Econometric Methods I
ECO 7425	Econometric Methods II

STA Courses

STA 6166	Statistical Methods in Research I
STA 6167	Statistical Methods in Research II
STA 6244	Data Analysis I
STA 6247	Data Analysis II
STA 6505	Analysis of Categorical Data
STA 6746	Multivariate Statistical Analysis

Notes:

1. This Accounting Ph.D. program of study is a sample guideline that can be adjusted depending on the availability of classes and students' needs.
2. Students can take additional seminar courses from other departments with the approval of the Accounting Doctoral Director. For example, the students pursuing financial accounting research may be interested in Investment seminar or Corporate Finance Seminar offered by the Finance Department.
3. All Ph.D. students must register one credit hour for research colloquium in every semester until they have advanced to candidacy.
4. Every Ph.D. student must present at least one summer paper in the SOA research colloquium before their proposal defense.

Graduate Professional Accountancy Certificate

The Graduate Professional Accountancy Certificate provides students; who have completed a 120-credit hour undergraduate degree in accounting, or the equivalent, from an accredited college or university as well as an additional 12 to 15 credit hours; with advanced skills needed to pursue an accounting career.

Completing this graduate certificate allows students to earn 15 to 18 semester hours beyond an undergraduate degree in accounting, or the equivalent, required for CPA licensure, consistent with the Florida State Board of Accountancy educational requirements. Requirements include earning 30 credit hours beyond a 120-credit hour undergraduate degree for a total of 150 credit hours, with a total of 36 semester hours of accounting and 39 hours of general business including three hours of business law. One year of work experience in an accounting-related field is also required for licensure.

Admission Requirements

To be eligible for admission to a Graduate Professional Accountancy Certificate from the School of Accounting in the Chapman Graduate School, students must:

1. Hold a Business Bachelor's degree from an accredited college or university in the field of accounting.
2. Show high promise of success in graduate studies as determined by the faculty based upon a minimum score of 500 on the Graduate Management Admission Test (GMAT) or the equivalent on the Graduate Record Exam (GRE). Applicants submitting GRE scores will be considered on an individual basis. The GMAT requirement will be waived if the student has
 - a) A graduate degree from an AACSB accredited university, or;
 - b) passed all parts of the CPA exam or;
 - c) obtained an undergraduate accounting degree from FIU or an AACSB accredited school or university with an upper division GPA of at least 3.25
3. Have a minimum upper division grade point average (GPA) of 3.0.
4. Graduate student applicants whose studies were completed outside of the US must demonstrate English language proficiency by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on the paper-based version) or 6.5 overall on the International English Language Testing System (IETLS).
5. Be in good standing with all previously attended colleges and universities.

Admissions at the graduate level are competitive and meeting minimum requirements does not guarantee admission.

Prerequisite:

Baccalaureate degree in accounting.

Program of Study (15-18):

ACG 6176	Evaluation of Financial Reports, Business Analysis and Valuation	3
ACG 6225	Value Added Accounting Practices in Strategic Business Decisions	3

ACG 6257	Global Accounting, Auditing and Financial Strategy	3
ACG 6385	Managerial Control and Controllership	3
And one or two of the following:		
ACG 6455	AIS Systems Control (Analytics)	3
ACG 6506	Governmental and Non-profit Accounting	3
TAX 6026	Value-Added Tax Strategies for Business Decisions	3

Tibor and Sheila Hollo School of Real Estate

Eli Beracha, Associate Professor, and School Director
William Hardin, Professor and Interim Dean, College of Business

Suzanne Hollander, Senior Instructor

Zhenguo Lin, Professor and Tibor and Sheila Research Fellow

Mark Thibodeau, Assistant Professor

Zhonghua Wu, Professor and Tibor and Sheila Research Fellow

Purpose

The Tibor and Sheila Hollo School of Real Estate offers a Master of Science in International Real Estate degree that prepares students to analyze and solve complex real estate investment decisions. The curriculum grounds the students in areas such as real estate investments, mortgage related securities, mortgage banking, commercial brokerage, development, asset management, and property management with an international focus.

Master of Science in International Real Estate (MSIRE)

Admission Requirements

To be eligible for admission to the Master of Science in International Real Estate program in the Chapman Graduate School of Business, students:

1. Must hold a Bachelor's degree or equivalent from either a U.S. accredited college or university or the equivalent for institutions outside the U.S. A degree in business is not required;
2. Will show high promise of success in graduate studies as determined by the faculty based upon academic performance, work experience or a combination of academic and work experience. Evidence includes a minimum score of 500 on the Graduate Management Admission Test (GMAT) or similar Graduate Record Exam (GRE) score or demonstrate at least four years of industry (real estate, development, architecture and affiliated industries such as banking, finance, insurance, etc.) work experience. Applicants who have an undergraduate business degree from Florida International University with an upper division grade point average (GPA) of 3.25, or having a business, economics, engineering, construction management or architecture degree from an accredited school with an upper division grade point average (GPA) of 3.25 are eligible for a GMAT or GRE waiver at the discretion of the faculty director. If the applicant has already completed a graduate degree from an accredited university with a minimum grade point average (GPA) of 3.0, or is entering a business master's program under a special agreement for admissions with specific foreign universities, he or she would be eligible for a GMAT or GRE waiver at the discretion of the faculty director;
3. Should, in general, have a minimum upper division grade point average (GPA) of 3.0. An applicant with substantial work experience and industry/work related

recommendations will be evaluated based on academic and industry performance;

4. Must, when the applicant's studies were completed outside of the U.S., demonstrate proficiency of the English language by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on the paper-based version) or 6.5 overall on the International English Language Testing System (IETLS);
5. Can provide any additional documentation to augment and strengthen the application portfolio. For example, a master's degree in any discipline, a degree in Law, professional certifications and specialized industry or leadership experience or training;
6. Who are enrolled in the Certificate of International Business program and have completed the first 12 graduate credits with a GPA of 3.25 or higher, may be eligible for admission to the program;
7. Who have been accepted and are successfully completing other Florida International University graduate degrees in business, architecture, construction management, economics, hospitality management, or engineering will be evaluated on their graduate school performance. A minimum graduate grade point average (GPA) of 3.0 in these programs is required; and
8. Will be in good standing with all previously attended colleges and universities.

Admissions at the graduate level are competitive and meeting minimum requirements does not guarantee admission.

To complete a Master of Science in International Real Estate degree, students must complete a minimum of 30 semester hours (10 courses).

The following courses are required for the MSIRE degree:

Core Courses

REE 6045	Real Estate Markets, Institutions and Practices
REE 6435	Real Estate Law
FIN 6406	Corporate Financial Management
REE 6305	Advanced Real Estate Investments and Valuation
REE 6209	Real Estate Finance
REE 6935	Seminar in International Real Estate

Required Electives: are to be determined under consultation with the Faculty Director of MSIRE Program and the Director of the Hollo School of Real Estate.

Typical electives include REE 6715 Real Estate Development, REE 6932 Special Topics in Real Estate and REE 6306C Corporate Real Estate Management, REE 6147 Real Estate Market Analysis, REE 6327 Global Real Estate Capital Markets, REE 6227 Real Estate Modeling and Data Analytics, FIN 6246 Financial Markets and Institutions, and FIN 6644 Global Financial Strategy. The minimum passing grade for any MSIRE course is "C". MSIRE students must maintain an overall grade point average (GPA) of 3.0.

For more information, contact the program manager (305) 779-7898.

Master of Science in Finance/Master of Science in International Real Estate Joint Degree Pathway

The Department of Finance, Tibor and Sheila Hollo School of Real Estate and the Alvah H. Chapman Jr. Graduate School of Business at Florida International University have a joint degree pathway culminating in both a Master of Science in Finance (MSF), and a Master of Science in International Real Estate (MSIRE) degree. Under the joint degree pathway, a student can obtain both degrees in less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway will use existing faculty, courses, and resources. Important criteria relating to the joint degree pathway are as follows:

1. Candidates to the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must indicate on the application their intention to pursue the joint degree option. Students deciding to pursue the joint degree option after having been admitted to one program will indicate this intention only on their second application.
2. Applications for a joint degree will not be accepted from candidates who have already completed either degree. MSF or MSIRE students must apply and be admitted prior to or concurrent with the last semester in which they are expected to complete their original degree requirements.
3. Candidates must satisfy all requirements for each degree. To obtain the MSIRE degree, the student will be required to take ten (10) courses totaling thirty (30) credit hours. This includes the five real estate courses in the MSIRE core, three finance courses in the MSIRE core, plus one real estate (REE prefix) elective and one finance (FIN prefix) elective for a total of 30 credit hours. The Faculty Director of the MSIRE may substitute other suitable courses for these electives at the request of the student. The eight core REE and FIN courses include REE 6045 Real Estate Markets, Institutions, and Practices, REE 6209 Real Estate Finance, REE 6305 Real Estate Investments, REE 6435 Real Estate Law, REE Seminar in International Real Estate, FIN 6406 Corporate Finance, FIN 6644 Global Financial Strategy, and FIN 6246 Financial Markets and Institutions.
4. To obtain the MSF degree, the student will have to fulfill all MSF program requirements, including eleven finance courses totaling thirty-three (33) credit hours, eight courses of which are considered part of the core curriculum. The eight core MSF courses are FIN 6406 Corporate Finance, FIN 6644 Global Financial Strategy, FIN 6246 Financial Markets and Institutions, FIN 6456 Quantitative Methods in Financial Analysis, FIN 6515 Security Analysis, FIN 6537 Financial Futures and Fixed Income Investment, and FIN 6487 Financial Risk Management. The remaining three courses must be taken in one of three specializations approved by the faculty and which include three courses in Corporate Finance, three in Investments, or three in Commercial and International Banking.
5. The three finance courses in the MSIRE core curriculum correspond to three of the courses in the core MSF program. Therefore, students pursuing the joint degree pathway will be credited for these courses in both programs. In addition, one Real Estate course in the MSIRE curriculum may be counted as one of the three courses required by the MSF specialization. The two degrees then will potentially have 4 common courses.
6. A minimum of seventeen (17) courses will be required to earn the dual degrees: four common courses, six specific to the MSIRE program, and seven specific to the MSF program. All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. The Faculty Directors of the MSIRE and MSF degree programs may adjust these exact course requirements as a result of future changes to the MSIRE or MSF curriculums, subject to the approval of the Dean of the Chapman Graduate School.
7. Joint degree pathway candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first degree program requirements as if the student had never been a joint degree candidate.
8. With the joint degree pathway students will take a total of 51 credit hours to get both degrees. Without the joint degree programs students would need to take 63 credit hours to get both degrees.

Master of Science in International Real Estate/Master of Business Administration Joint Degree Pathway

The Hollo School of Real Estate and the Master of Business Administration program in the Alvah H. Chapman Jr. Graduate School of Business at Florida International University offer a joint degree pathway culminating in both a Master of Business Administration degree (MBA), and a Master of Science in International Real Estate degree (MSIRE). Under the joint degree pathway, a student can obtain both degrees in less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway will use existing faculty, courses, and resources. Important criteria relating to the joint degree pathway are as follows:

1. Candidates to the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must indicate on the application their intention to pursue the joint degree option. Candidates deciding to pursue the joint degree option after having been admitted to one program will indicate this intention only on their second application.
2. Applications for a joint degree will not be accepted from candidates who have already completed either degree. MBA or MSIRE students must apply and be admitted no later than the second to last semester in which they are expected to complete their original degree requirements.
3. Candidates must satisfy all requirements for each degree. The two degrees will have three – four common courses. All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. MSIRE courses transferred to meet MBA elective credit must be 6000 level courses. Directors of the MBA and MSIRE degree programs may adjust these exact course

requirements as a result of future changes to the MBA or MSIRE curriculums.

3.1 Joint Flex MBA/MSIRE Degree

To obtain MSIRE/MBA through the Flex program, students must complete the following courses for a total of 63 credit hours as follows:

In the Flex MBA program (36 credit hours):

ACG 6026	Accounting for Managers	3
ACG 6175	Financial Reporting & Analysis	3
BUL 6810	Legal Environment	3
FIN 6406	Corporate Finance	3
FIN 6446	Competitive Strategy	3
MAN 6501	Operations Management	3
MAN 6245	Organizational Behavior	3
MAN 6726	Strategic Management	3
MAN 6830	Organizational Information Systems	3
MAR 6805	Marketing Management in the Global Environment	3
MAR 6816	Corporate Simulation	3
QMB 6357	Business Analysis for Decision Making	3
Professional Development Seminars (PDS)		

In the MSIRE program (27 credit hours):

REE 6045	Real Estate Markets, Institutions, and Practices	3
REE 6209	Real Estate Finance	3
REE 6305	Advanced Real Estate Investment Valuation	3
REE 6935	Seminar in International Real Estate	3
REE 6435	Real Estate Law	3
REE 6715	Real Estate Development	3
REE 6147	Real Estate Market Analysis	3
REE 6932	Special Topics in Real Estate	3
FIN 6644	Global Financial Strategy	3

3.2. Joint International MBA/MSIRE Degree

To obtain MSIRE/MBA through the International program, students must complete the following courses for a total of 69 credit hours as follows:

In the IMBA program (45 credit hours):

ACG 6026	Accounting for Managers	3
ACG 6175	Financial Reporting & Analysis	3
BUL 6810	Legal Environment of Business	3
FIN 6406	Corporate Finance	3
FIN 6644	Global Financial Strategy	3
MAN 6501	Operations Management	3
MAN 6245	Organizational Behavior	3
MAN 6726	Strategic Management	3
MAN 6608	International Business	3
MAN 6703	Colloquium in Managing Organizational Ethics	3
MAN 6679	Master's Project	3
MAN 6830	Organizational Information Systems	3
MAR 6805	Marketing Management in the Environment	3
MAR 6816	Corporate Simulation	3
QMB 6357	Business Analysis for Decision making	3
Professional Development Seminars (PDS) I, II, III		

In the MSIRE program (24 credit hours):

REE 6045	Real Estate Markets, Institutions, and Practices	3
----------	--	---

REE 6209	Real Estate Finance	3
REE 6305	Advanced Real Estate Investment Valuation	3
REE 6935	Seminar in International Real Estate	3
REE 6435	Real Estate Law	3
REE 6715	Real Estate Development	3
REE 6147	Real Estate Market Analysis	3
REE 6932	Special Topics in Real Estate	3

Notes:

¹ Requirements for the CMBA depend on track chosen. If a candidate has elected the option of a specialization, the number of credit hours required and shared for the Flex will be used. Otherwise, the option for a joint degree is not available with the MSIRE.

² The EMBA, Professional MBA, and Professional MBA in Healthcare Management programs are not included as an option for the joint degree.

³ Joint degree pathway candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first degree program requirements as if the student had never been a joint degree candidate.

For additional information, contact the Evening MBA office at (305) 348-0148 or the Master of Science in International Real Estate office at (305) 348-4198.

Purpose

The Department of Finance graduate program seeks to extend and deepen students' understanding of finance in both its theoretical and practical dimensions.

The Department offers a Master of Science in Finance (MSF) degree that prepares graduates to analyze and solve problems related to obtaining and using real and financial assets and liabilities. The curriculum grounds students in the areas of banking, corporate finance, investment, portfolio management, financial risk management, financial engineering, financial markets, institutions, and international finance. It provides them with concepts and applications framed within the most current developments in these fields.

The Department also offers a Finance Concentration in the EVEMBA program. Contact the Program Manager for details.

Master of Science in Finance (MSF)

Admission Requirements

1. Hold a Bachelor's degree from an accredited college or university;
2. Show high promise of success in graduate studies as determined by the faculty based upon academic performance, work experience or a combination of academic and work experience. Evidence include a minimum score of 500 on the Graduate Management Admission Test (GMAT), or an equivalent score on the Graduate Record Examinations (GRE) test, or demonstration of at least four years of Business (finance-affiliated industries such as banking, investment, accounting, insurance, etc.) related work experience, or have an undergraduate business degree with a finance major from FIU or similar accredited school with a minimum grade point average (GPA) of 3.0. If the applicant already completed a graduate degree from an accredited university with a minimum grade point average (GPA) of 3.0, or is entering a business master's program under a special agreement for admissions with specific foreign universities, he or she would be eligible for a GMAT or GRE waiver at the discretion of the faculty;
3. Should, in general, have a minimum upper division grade point average (GPA) of 3.0. An applicant with substantial work/industry experience and recommendations will be evaluated based on a combination of his or her academic and industry experience;
4. International graduate student applicants whose studies were completed outside of the U.S. must demonstrate proficiency of the English language by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on the paper-based version or 213 on the computer based version of the test of English as a Foreign Language) or 6.5 overall on the International English Language Testing System (IELTS). As alternative forms of showing sufficient English proficiency, students may also present the following:
 - a. FIU English Language Institute ("ELI") Program Level Six completion: successful completion with passing grades for all content areas;
 - b. GRE Verbal Reasoning Score: 151/Analytical Writing Score: 3.5; GMAT Verbal Score: 28/Analytical Writing Score: 4.5;
 - c. Graduate students having completed English Composition: Writing and Rhetoric 1 ("ENC 1101") and English Composition: Writing and Rhetoric 2 ("ENC 1102") with passing scores of C or better from an accredited U.S. institution or as part of a signed articulation agreement.
 - d. Students applying to FIU under agreements for admissions with foreign universities having demonstrated their programs are

taught fully in English and/or that they enforce English proficiency exam requirements for admission considered comparable to FIU English Proficiency requirements are eligible for a TOEFL waiver under terms of the agreement.

- e. International agreements must follow standard approval process through the Office of Academic Planning and Accountability and document applicability of waiver. Undergraduate students meeting the minimum Florida Board of Governors regulation for college readiness scores in the reading and English sections.

5. Be in good standing with all previously-attended colleges and universities.

Admissions at the graduate level are competitive and meeting minimum requirements does not guarantee admission.

To earn a Master of Science in Finance degree, students must complete a minimum of 36 semester hours (12 courses)

The 36 credit-hour requirement may be reduced to 33 hours for students who have an accredited Master's degree in Business Administration (MBA). In addition, students may be allowed to transfer three graduate semester hours from an accredited university even if they did not secure an advanced degree.

The following courses are required for the MSF degree:

Core Courses

FIN 6406	Corporate Finance
FIN 6456	Quantitative Methods in Financial Analysis
FIN 6515	Security Analysis
FIN 6246	Financial Markets and Institutions
FIN 6525	Portfolio Management
FIN 6537	Financial Futures and Fixed Income Investments
FIN 6487	Financial Risk Management
FIN 6644	Global Financial Strategy
FIN 6465	Financial Planning and Statement Analysis

Required Electives: Choose either A, B, or C

A).

FIN 6425	Financial Management Policies
FIN 6436	Capital Budgeting and Long Term Resource Allocation
FIN 6776	Financial Software

or

B).

FIN 6425	Financial Management Policies
FIN 6517	Advanced Investment
FIN 6489	Advanced Financial Risk Management

or

C).

FIN 6625	International Bank Management
FIN 6326	Commercial Banking
FIN 6346	Credit Analysis

*Note: Students are required to have taken a basic accounting course or equivalent by the end of the first semester as prerequisite or co-requisite for the program.

The minimum passing grade for any FIN 6000 level

courses is "C". MSF students must maintain an overall grade point average (GPA) of 3.0.

For more information, contact the program manager (305) 348-4198.

Finance Concentration in the Ph.D. Program

All students are required to complete a minimum of 16 courses. Those concentrating in Finance must take six courses or seminars in Finance (as described below), a two-course sequence in advanced economic theory, and a two-course sequence in either advanced econometrics or an equivalent sequence of courses in advanced statistics. With the advice and consent of the departmental Ph.D. committee, students also select other supporting coursework. The first year of study is regarded as "Tier I" in the Ph.D. program, and successful completion of this year of study is a prerequisite for enrollment in some of the more advanced courses.

Students are expected to maintain a GPA of 3.5 or better in the six departmental courses that comprise the Finance concentration. In addition, students are expected to maintain a GPA of 3.3 or better in all of their coursework. The program is a 75-credit program.

A Sample Course of Study

The sample program of study below describes the schedule for a typical student. Variations may be allowed for some students, and, of course, the requirements may be changed at the discretion of the Ph.D. Committee.

Year I – Fall Semester

FIN 7855	Financial Economics I**	3
FIN 7845	Statistical Methods in Finance I***	3
FIN 7808	Financial Theory I	3

Year I – Spring Semester

FIN 7856	Financial Economics II**	3
FIN 7846	Statistical Methods in Finance II***	3
FIN 7809	Financial Theory II	3

Year I – Summer Semester

MAN 7916	Empirical Project	6
----------	-------------------	---

Year II – Fall Semester

FIN 7819	Financial Theory III	3
Finance Elective		3
Finance Elective		3

Year II – Spring Semester

Finance Elective		3
Finance Elective		3
Finance Elective		3

Year II – Summer Semester

MAN 7916	Empirical Project	6
----------	-------------------	---

Year III – Fall Semester

FIN 7981	Dissertation Preparation Prep	9
----------	-------------------------------	---

Year III – Spring Semester

FIN 7980	Ph.D. Dissertation	3
----------	--------------------	---

Year III – Summer Semester

FIN 7980	Ph.D. Dissertation	3
----------	--------------------	---

Year IV – Fall Semester

FIN 7980	Ph.D. Dissertation	3
----------	--------------------	---

Year IV – Spring Semester

FIN 7980	Ph.D. Dissertation	3
Year IV – Summer Semester		
FIN 7980	Ph.D. Dissertation	6

** The sequence in Micro-Economic Theory, ECO 7115 and ECO 7116, may be substituted for this sequence in Financial Economics.

***The sequence in Econometrics, ECO 7424 and ECO 7425, may be substituted for this sequence in Statistical Methods in Finance.

Summer Research Projects

Students are required to complete research projects during the summer semesters following their first and second years in the program. One faculty member will serve as an advisor for all research projects in a given summer.

For both summer projects, students must submit a written paper and make a presentation to the faculty. Ideally, these papers should be of sufficient quality to merit their submission to a conference or a journal. Students must satisfy all university and college dissertation requirements.

Master of Science in Finance/Master of Business Administration Joint Degree Pathway

The Department of Finance and the MBA program in the Alvah H. Chapman Jr. Graduate School of Business at Florida International University have a joint degree pathway culminating in both a Master of Business Administration degree (MBA), and a Master of Science in Finance degree (Fast Track-MSF). Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway uses existing faculty, courses, and resources. Important criteria relating to the joint degree pathway are as follows:

1. Candidates to the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must indicate on the application their intention to pursue the joint degree pathway. Candidates deciding to pursue the joint degree pathway after having been admitted to one program will indicate this intention only on their second application.
2. Applications for a joint degree will not be accepted from candidates who have already completed either degree. MBA or Fast Track-MSF students must apply and be admitted by no later than the second to last semester in which they are expected to complete their original degree requirements.
3. Candidates must satisfy all requirements for each degree. The two degrees will have four-five common courses. Courses transferred between degrees must be completed with a grade point average of 3.0 or higher. MSF courses transferred to meet MBA elective credit must be 6000 level courses approved by the University Curriculum Committee. Directors of the MBA and MSF degree programs may adjust these exact course requirements as a result of future changes to the MBA or MSF curriculums.

3.1 Joint Flex MBA/MSF Degree Pathway

To obtain MSF/MBA through the Flex program, students must complete the following courses for a total of 66 credit hours as follows:

In the Flex MBA program (33 credit hours):

ACG 6175	Financial Reporting & Analysis	3
BUL 6810	Legal Environment	3
FIN 6406	Corporate Finance	3
FIN 6446	Competitive Strategy	3
MAN 6501	Operations Management	3
MAN 6245	Organizational Behavior	3
MAN 6726	Strategic Management	3
MAN 6830	Organizational Information Systems	3
MAR 6805	Marketing Management in the Global Environment	3
MAR 6816	Corporate Simulation	3
QMB 6357	Business Analysis for Decision Making	3
Professional Development Seminars (PDS) I, II, III		

In the MSF program (33 credit hours):

FIN 6456	Quantitative Methods in Financial Analysis	3
FIN 6515	Securities Analysis	3
FIN 6246	Financial Markets and Institutions	3
FIN 6537	Financial Futures and Fixed Income Investments	3
FIN 6487	Financial Risk Management	3
FIN 6644	Global Financial Strategy	3
FIN 6525	Portfolio Management	3
FIN 6465	Financial Planning and Statement Analysis	3

One of the following specialty tracks, in addition to the core MSF courses is required for the MSF degree:

Financial Management		
FIN 6326	Commercial Banking	3
FIN 6436	Capital Budgeting and Long Term Resource Allocation	3
FIN 6425	Financial Management Policies	3
Investments		
FIN 6425	Financial Management Policies	3
FIN 6489	Advanced Financial Risk Management	3
FIN 6517	Advanced Investments	3
International Banking		
FIN 6326	Commercial Banking	3
FIN 6625	International Bank Management	3
FIN 6346	Credit Analysis	3

3.2. Joint International IMBA/MSF Degree Pathway

To obtain MSF/MBA through the International program, students must complete the following courses for a total of 72 credit hours as follows:

In the IMBA program (42 credit hours):

ACG 6026	Accounting for Managers	3
ACG 6175	Financial Reporting & Analysis	3
BUL 6810	Legal Environment	3
FIN 6406	Corporate Finance	3
FIN 6444	Global Financial Strategy	3
MAN 6501	Operations Management	3
MAN 6245	Organizational Behavior	3
MAN 6726	Strategic Management	3
MAN 6608	International Business	3

MAN 6703	Colloquium in Managing Organizational Ethics	3
MAN 6830	Organizational Information Systems	3
MAN 6679	Master's Project in International Business	3
MAR 6805	Marketing Management in the Global Environment	3
QMB 6357	Business Analysis for Decision Making	3
	Professional Development Seminars (PDS) I, II, III	3
In the MSF program (30 credit hours):		
FIN 6456	Quantitative Methods in Financial Analysis	3
FIN 6515	Securities Analysis	3
FIN 6246	Financial Markets and Institutions	3
FIN 6537	Financial Futures and Fixed Income Investments	3
FIN 6487	Financial Risk Management	3
FIN 6525	Portfolio Management	3
FIN 6465	Financial Planning and Statement Analysis	3
One of the following specialty tracks, in addition to the core MSF courses is required for the MSF degree:		
Financial Management		
FIN 6326	Commercial Banking	3
FIN 6436	Capital Budgeting and Long Term Resource Allocation	3
FIN 6425	Financial Management Policies	3
Investments		
FIN 6425	Financial Management Policies	3
FIN 6489	Advanced Financial Risk Management	3
FIN 6517	Advanced Investments	3
International Banking		
FIN 6326	Commercial Banking	3
FIN 6625	International Bank Management	3
FIN 6346	Credit Analysis	3

Notes:

¹ Requirements for the CMBA depend on track chosen. If a candidate has elected the option of a specialization, the number of credit hours required and shared for the Flex will be used. Otherwise, the pathway for a joint degree is not available with the MSF.

² The Executive MBA, Professional MBA, and Professional MBA in Healthcare Management programs are not included as an option for the joint degree pathway.

³ Joint degree pathway candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first degree program requirements as if the student had never been a joint degree pathway candidate.

For additional information, contact the MBA office at (305) 348-0148 or the Master of Science in Finance office at (305) 348-4198.

Master of Science in Finance/Master of Science in International Real Estate Joint Degree Pathway

The Department of Finance and the Alvah H. Chapman Jr. Graduate School of Business at Florida International University have a joint degree pathway culminating in both a Master of Science in Finance (MSF), and a Master of Science in International Real Estate (MSIRE) degree. Under the joint degree pathway, a student can obtain both degrees in less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway will use existing faculty, courses, and resources. Important criteria relating to the joint degree pathway are as follows:

1. Candidates to the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must indicate on the application their intention to pursue the joint degree option. Students deciding to pursue the joint degree pathway after having been admitted to one program will indicate this intention only on their second application.
2. Applications for a joint degree pathway will not be accepted from candidates who have already completed either degree. MSF or MSIRE students must apply and be admitted prior to or concurrent with the last semester in which they are expected to complete their original degree requirements.
3. Candidates must satisfy all requirements for each degree. To obtain the MSIRE degree, the student will be required to take ten (10) courses totaling thirty (30) credit hours. This includes the five real estate courses in the MSIRE core, three finance courses in the MSIRE core, plus one real estate (REE prefix) elective and one finance (FIN prefix) elective for a total of 30 credit hours. The Faculty Director of the MSIRE may substitute other suitable courses for these electives at the request of the student. The eight core REE and FIN courses include REE 6045 Real Estate Markets, Institutions, and Practices, REE 6209 Real Estate Finance, REE 6305 Real Estate Investments, REE 6435 Real Estate Law, REE Seminar in International Real Estate, FIN 6406 Corporate Finance, FIN 6644 Global Financial Strategy, and FIN 6246 Financial Markets and Institutions.
4. To obtain the MSF degree, the student will have to fulfill all MSF program requirements, including eleven finance courses totaling thirty-three (33) credit hours, eight courses of which are considered part of the core curriculum. The eight core MSF courses are FIN 6406 Corporate Finance, FIN 6644 Global Financial Strategy, FIN 6246 Financial Markets and Institutions, FIN 6456 Quantitative Methods in Financial Analysis, FIN 6515 Security Analysis, FIN 6537 Financial Futures and Fixed Income Investment, and FIN 6487 Financial Risk Management. The remaining three courses must be taken in one of three specializations approved by the faculty and which include three courses in Corporate Finance, three in Investments, or three in Commercial and International Banking.
5. The three finance courses in the MSIRE core curriculum correspond to three of the courses in the core MSF program. Therefore, students pursuing the joint degree program will be credited for these courses in both programs. In addition, one Real Estate course in the MSIRE curriculum may be counted as one of the three courses required by the MSF specialization. The two degrees then will potentially have 4 common courses.

6. A minimum of seventeen (17) courses will be required to earn the dual degrees: four common courses, six specific to the MSIRE program, and seven specific to the MSF program. All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. The Faculty Directors of the MSIRE and MSF degree programs may adjust these exact course requirements as a result of future changes to the MSIRE or MSF curriculums, subject to the approval of the Dean of the Chapman Graduate School.
7. Joint degree pathway candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first degree program requirements as if the student had never been a joint degree pathway candidate.
8. With the joint degree program students will take a total of 51 credit hours to get both degrees. Without the joint degree pathway students would need to take 63 credit hours to get both degrees.

Master of Science in Finance/Master in International Business Joint Degree Pathway

The Department of Finance and the MIB programs in the Alvah H. Chapman Jr. Graduate School of Business at Florida International University are proposing a joint degree pathway culminating in both a Master in International Business (MIB), and a Master of Science in Finance. Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway will use existing faculty, courses, and resources. Important criteria relating to the joint degree pathway are as follows

1. Candidates to the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must indicate on the application their intention to pursue the joint degree pathway. Students deciding to pursue the joint degree pathway after having been admitted to one program will indicate this intention only on their second application.
2. Applications for a joint degree will not be accepted from candidates who have already completed either degree. MIB or MSF students must apply and be admitted no later than the second to last semester in which they are expected to complete their original degree requirements.
3. Candidates must satisfy all requirements for each degree. The two degrees will have four common courses. All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. MSF courses transferred to meet MIB elective credit must be 6000 level courses approved by the University Curriculum Committee. Directors of the MSF and MIB degree programs may adjust these exact course requirements as a result of future changes to the MSF or MIB curriculums.

3.1. **To obtain the MIB degree**, MSF students who have finished their core courses, must complete a total of 36 credit hours as follows:

In the MIB program (24 credits hours):

MAN 6617	Managing Global Production and Technology	3
MAR 6158	International Marketing	3
BUL 6850	International Business Law	3
MAN 6635	Global Strategy and Business Models	3
MAN 6679	Master's Project in International Business	3
MAN 6601	Global Management Skills	3
MAN 6606	Fundamentals of International Business	3
MAN 6930A	Master's Seminar in Management 1	1
MAN 6930B	Master's Seminar in Management 2	1
MAN 6930C	Master's Seminar in Management 3	1
From the MSF program (12 credit hours) will be transferred as follows:		
FIN 6644	Global Financial Strategy	3
FIN 6465	Financial Planning and Statements Analysis	3
MAN 6606	Fundamentals of International Business	3
FIN 6XXX	Elective	3
FIN 6XXX	Elective	3

3.2. **To obtain the MSF degree**, MIB students who have finished their core courses, must complete a total of 33 credits hours as follows:

From the MSF program (21 credit hours):

FIN 6406	Corporate Finance	3
FIN 6456	Quantitative Method in Financial Analysis	3
FIN 6246	Financial Markets and Institution	3
FIN 6515	Securities Analysis	3
FIN 6525	Portfolio Management	3
FIN 6465	Financial Future and Fixed Income Investments	3
FIN 6487	Financial Risk Management	3

From the MIB program (12 credit hours) will be transferred as follows:

FIN 6644	Global Financial Strategy	3
ACG 6255	International Accounting	3
FIN 6XXX	Finance Elective 1	3
FIN 6XXX	Finance Elective 2	3

4. Joint degree pathway candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first degree program requirements as if the student had never been a joint degree pathway candidate.
5. With the joint degree pathway students will take a total of 57 credit hours to get both degrees. Without the joint degree pathway students will need to take 69 credit hours to get both degrees. Thus, MIB students who have taken twelve credits of MSF common courses may obtain an MSF degree with an additional 21 credits. MSF students who have taken twelve credits of the MIB classes, may obtain an MIB degree with an additional 24 credits.

Graduate Certificate in Financial Analytics

The purpose of the certificate is to provide students with an understanding of the application of statistical tools and

methods to large financial data sets in order to make sound financial and investment decisions. It focuses on analytic techniques and select software tools used in decision making and combines domain knowledge of finance with data analysis skills. The certificate will be offered to only degree seeking students.

Program of Study (15):

FIN 6406	Corporate Finance
FIN 6525	Portfolio Management
FIN 6487	Financial Risk Management
FIN 6466	Financial Analytics
ISM 6136	Business Analytics Applications

Global Leadership and Management

- Ravi Gajendran**, Associate Professor, Department Chair, and Alvah Chapman Eminent Scholar Endowment Chair
- Sungu Armagan**, Associate Teaching Professor
- Brooke Buckman**, Assistant Teaching Professor
- Eric Cartaya**, Associate Teaching Professor
- Carolina Gomez**, Professor
- Nathan J. Hiller**, Professor, Executive Director, Center for Leadership, and Ingersoll-Rand Professor
- Kisha S. Jones**, Assistant Professor
- Chaitali Kapadia**, Assistant Professor
- Karl Kroeck**, Professor Emeritus
- Karl O. Magnusen**, Professor Emeritus
- Clifford Perry**, Teaching Professor
- Modesto A. Maidique**, Professor, and FIU President Emeritus
- Juan I. Sanchez**, Professor and Knight Ridder Byron Harless Eminent Scholar Chair in Management
- Hock-Peng Sin, Ph.D.**, Associate Professor, Faculty Director for IMBA Program, and Alvah Chapman Eminent Scholar Endowment Chair
- Marc Weinstein**, Clinical Professor and Faculty Director, MS in Human Resource Management Program

The Global Leadership and Management Department includes an internationally-oriented and dedicated faculty with expertise in global management, leadership, human resource management, and organizational behavior.

Our curriculum is designed to prepare students for successful management careers in the global business arena and in a variety of organizations. Our graduates are armed with an understanding of the management discipline, a broad intellectual framework for managing in an evolving marketplace, and the ability to lead and work in today's global organizations.

Master of Science in Human Resource Management

Admission Requirements

To be eligible for admission to the MSHRM program, applicants must demonstrate academic and professional preparedness. Admissions are based on a portfolio approach:

- GPA in upper divisions course work (3.0 preferred)
- Resume outlining professional experience*
- GMAT or GRE**
- Statement of Purpose
- Two letters of recommendation

Interviews may be conducted upon submission of complete portfolio

*Five years of professional full-time work experience of which three years are in human resources is preferred. If no work experience, a graduate degree from an accredited university with a 3.0 GPA may be considered

**GMAT/GRE may be waived for applicants with strong academic credentials.

Graduate student applicants whose studies were completed in a non-English speaking country must demonstrate proficiency in English by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on paper-based version) or 6.5 overall of the International English Language Testing System (IELTS).

The Master of Science in Human Resource Management is designed for professionals and executives in the field of human resource management, as well as for college graduates interested in a career in the field. The MSHRM is a lock-step program designed to be completed in 12 months. A part-time 24-month option is also available. Students can choose from two delivery formats, online or on campus with classes meeting only on Saturdays. The students will also have extensive interaction with an Advisory Board, which is made up of leading HR professionals from the South Florida area.

To complete the program successfully, students must maintain a "B" average (3.0 GPA). For further information, please contact the program manager at (305) 348-8433, or visit our web site at <http://mshrm.fiu.edu>.

The following courses are required for the MSHRM degree:

Core Courses

MAN 6297	Labor Issues and Conflict Management	3
MAN 6626	International Human Resource Management	3
MAN 6347	Performance and Talent Management	3
MAN 6157	Wellness Management	3
MAN 6316	Human Resource Analytics	3
MAN 6403	Employment Law and Human Resource Management	3
MAN 6385	Human Resource Strategy and Planning	3
MAN 6365	Staffing Organizations	3
MAN 6336	Reward Systems Management	3
MAN 6359	Human Resource Knowledge Management	3
MAN 6327	High Involvement Human Resource Management	3
MAN 6317	Critical Thinking in Human Resource Management	3

Required Professional Development Course:

GEB 6507	Finance for HR Professionals	1
----------	------------------------------	---

Required to select one (1) of the following

Professional Development Seminar courses:

MAN 6356	Professional Development Seminar I	1
MAN 6946	Human Resource Management Internship	1-3

Doctoral Studies Program

The Doctoral Studies Program in Business Administration is a selective one leading to the Ph.D. degree. The program emphasizes the development of research and teaching skills to ensure the graduates acquire the credentials necessary for placement in leading institutions.

Each doctoral student's program of study is individually tailored to mesh faculty and student interests and to maintain a high level of interaction between the students and faculty.

The program generally requires three to four years of full-time study, including approximately one to one-and-

one-half years of dissertation research. A set of core, or "tool area" business courses, geared toward establishing the student's breadth of knowledge, is required of all doctoral candidates during the first year of study. The second year of coursework focuses on a particular area of concentration to develop the student's depth knowledge in a specific discipline. The Department of Global Leadership and Management and the Department of International Business jointly offer a Ph.D. concentration in Management. Students may focus their studies on Strategic Management, Entrepreneurship, International Business and International Management, Human Resource Management, Organizational Behavior, and Hospitality Management.

The Ph.D. program is a 75-credit program.

Required Courses (3 courses, 9 credits)

MAN 7275	Organizational Behavior Management	3
MAN 7895	Seminar in Management	3
and either		
MAN 7616	Multinational Firm Global Strategy	3
or		
MAN 7718	Analysis of Corporate Policy	3

Content Courses: (Minimum of 3 courses, total 9 credits)

MAN 7146	Leadership	3
MAN 7147	Leadership II	3
MAN 7148	Intuition in Management	3
MAN 7206	Organizational Analysis	3
MAN 7207	Theories of Organization	3
MAN 7235	Management Philosophy and Strategy	3
MAN 7305	Human Resource Management	3
MAN 7412	Labor-Management Topics	3
MAN 7609	Comparative Management	3
MAN 7620	International Business Operations I	3
MAN 7621	International Business Operations II	3

Required Research Methods Courses: (4 courses, 12 credits)

MAN 7155	Fundamentals of Behavioral Research	3
MAN 7910	Advanced Management Research	3
MAN 7640	International Business Research Methods	3
and		
QMB 7910	Quantitative Research Methods in Business	3
Or		
GEB 7911	Quantitative Research Methods in Business	3
Or		
MAN 7984	Doctoral Research Seminar: Development and Utilization of Large Scale Datasets	3

Minimum of 4 Statistical Courses, 12 credits (not listed here)

Research Project Courses

MAN 7916	Doctoral Research Project in Business	6
MAN 7981	Ph.D. Dissertation Prep	9
MAN 7980	Ph.D. Dissertation	18

Master of Science in Human Resource Management/Master of Business Administration Joint Degree Pathway

The Department of Global Leadership and Management and the MBA program in the Alvah H. Chapman Jr. Graduate School of Business at Florida International University have a joint degree program culminating in both a Master of Business Administration degree (MBA), and a Master of Science in Human Resource Management (MSHRM). Under the joint degree program, a student can obtain both degrees in less time than it would take to obtain both degrees if pursued consecutively. The joint degree program will use existing faculty, courses, and resources. Important criteria relating to the joint degree program are as follows:

Candidates to the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must submit applications to both programs and notify each Program Manager of desire to pursue the joint degree. Candidates deciding to pursue the joint degree option after having been admitted to one program, must submit a second application to the other program and notify each Program Manager of desire to pursue the joint degree pathway option

1. Applications for a joint degree pathway will not be accepted from candidates who have already completed either degree. MBA or MSHRM students must apply and be admitted no later than the second to last semester in which they are expected to complete their original degree requirements.
2. Candidates must satisfy all requirements for each degree. The two degrees will have two - four common courses. All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. MSHRM courses transferred to meet MBA elective credit must be 6000 level courses approved by the University Curriculum Committee. Directors of the MBA and MSHRM degree programs may adjust these exact course requirements as a result of future changes to the MBA or MSHRM curriculums.

3.1 Joint Flex MBA/MSHRM Degree Pathway

- 3.1.1. To obtain the MSHRM degree, Flex MBA students must complete the following courses for a total of 68 credit hours as follows:

In the Flex MBA program (36 credit hours):

ACG 6026	Accounting for Managers	3
ACG 6175	Financial Reporting & Analysis	3
BUL 6810	Legal Environment of Business	3
FIN 6406	Corporate Finance	3
FIN 6446	Competitive Strategy	3
MAN 6501	Operations Management	3
MAN 6245	Organizational Behavior	3
MAN 6726	Strategic Management	3
MAN 6830	Organizational Information Systems	3
MAR 6805	Marketing Management in the Global Environment	3
MAR 6816	Corporate Simulation	3
QMB 6357	Business Statistical Analysis	3
Professional Development Seminars (PDS)		

In the MSHRM program (32 credit hours):

MAN 6157	Wellness Management	3
MAN 6403	Employment Law and Human Resource Management	3
MAN 6626	International Human Resource Management	3
MAN 6297	Labor Issues and Conflict	3

	Management	3		Organizational Ethics	3

Weidong Xia, *Professor*

Mission

The mission of the Department of Information Systems and Business Analytics (ISBA) is to provide students with the knowledge and ability to design, develop, implement, and use information systems that allow organizations to effectively solve problems within organizations; and to provide students with the knowledge and ability to analyze and use data for decision-making within organizations. The department offers courses in business analytics, business statistics, health informatics management information systems, operations management and project management, at both the graduate and undergraduate levels.

Students in information systems related graduate programs learn the intellectual frameworks and methods

used in areas including business analytics, business process design, database management, data warehousing, global electronic commerce, enterprise-wide information systems, information security management, project management, and systems analysis and design (including object-oriented applications).

The Department offers a Master of Science in Health Informatics and Analytics (MSHIA), Master of Science in Information Systems (MSIS), and Management Information Systems (MIS) concentration within the College of Business' Ph.D. in Business Administration program.

Master of Science in Health Informatics and Analytics (MSHIA)

Our Master of Science in Health Informatics and Analytics is a fifteen month graduate degree program designed for information systems professionals, physicians, nurses, other clinical personnel and healthcare managers who want to increase their knowledge of health information technology and management of the complex social and organizational issues surrounding the increased emphasis on managing healthcare quality, efficiency and outcomes through information systems.

Health Informatics integrates the domains of information systems, such as data analytics, with the organizational domains of healthcare, including, the legal and policy environment, delivery processes, as well as leadership and management principles. The goal of this program is to educate effective developers, users, and managers of health information systems. Students will explore the design and use of the health information systems needed by hospital and system executives, government planners, public health officials, and other healthcare professionals. Courses will have both an academic and practical perspective, exposing students to both theoretical approaches and real-world application.

Admission Requirements

To be eligible for admission to the MSHIA degree program in the Chapman School, prospective students must:

1. Hold a U.S. Bachelor's degree or equivalent from an accredited college or university.
2. Have a minimum of two (2) years professional experience in healthcare and/or information technology fields directly related to the program including:
 - IT professionals
 - Physicians
 - Nurses
 - Pharmacists
 - Healthcare attorneys
 - Healthcare third-party payer professionals
 - Health information managers
 - Other healthcare industry professionals with experience in using health informatics systems

OR has already completed a minimum of nine (9) graduate credit hours in a directly related field (e.g., Health Administration, Health Information Systems, Informatics, Information Systems) from an accredited university with a minimum of a 3.25 grade point average (GPA) or higher. Students may petition for up to six (6) hours of waiver for equivalent classes.

Promising candidates not possessing the above experience or educational background may be directed to pre-requisite courses, particularly in the health informatics or health information systems domain to facilitate program preparation and success.

3. Have a minimum upper division grade point average (GPA) of 3.0.
4. Provide a resume entailing, at minimum, past higher education degrees and work experience
5. Provide a personal statement on the motivation to attend the program, including personal and career goals.
6. Graduate student applicants whose studies were completed outside of the US must demonstrate proficiency in the English language by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on paper-based version), or 213 on the computer-based TOEFL, or 6.5 overall of the International English Language Testing System (IELTS).
7. If applicant is a student in the FIU Graduate Certificate in Healthcare Management or FIU Graduate Certificate in Health Informatics and Analytics programs and has completed the first 12 credits with a GPA of 3.25 or higher, he or she may be eligible for admission to the MSHIA program. Appropriate courses from the Certificate program may be transferred into the MSHIA degree program.
8. Be in good standing with all previously-attended colleges and universities.

Admissions at the graduate level are competitive and meeting minimum program requirements does not guarantee admission.

Graduation Requirements

To graduate with the Master's degree, a student must:

1. Satisfy all University requirements for a Master's degree.
2. Meet the 37 hours required in the M.S. in Health Informatics and Analytics "Program of Study."
3. Earn an overall "B" (3.0) cumulative Grade Point Average.
4. No courses in which a graduate student earns a grade "below C" may be counted towards any Master's degree program in the Chapman School.
5. Complete online residency MSHIA Orientation program requirements offered through the MSHIA Program as an entry point into the program
6. Complete 3 online residencies (noncredit) offered through the College of Business.
 - Residency I –Business Career Management.
 - Residency II –Presentation Skills
 - Residency III –Six Sigma Yellow Belt.

Residencies may be changed at the department's Discretion

Program Format

Students will complete the program in 14 months. Students will complete this program as a cohort. The program will be offered online. Two courses are generally taken each eight-week term within the semester.

The students will be considered full time as within a "semester", if they complete 12 graduate credit hours.

The MSHIA degree consists of 13 courses.

Required Courses

The following eleven courses are required for the MSHIA degree:

HIM 6267	Foundations of Health Informatics & Analytics Administration	1
HIM 6682	Quality and Outcomes Analytics	3
HIM 6865	Healthcare Database Systems	3
HIM 6527	Healthcare Information Security and Privacy	3
HIM 6628	Health Data Visualization	3
HIM 5065	Introduction to Health and Health Informatics	3
QMB 6357	Business Statistical Analysis	3
HIM 6685	Clinical Information Systems	3
HIM 6124	Technical and Data Architectures and Standards for Health Care	3
HIM 6019	Legal and Ethical Aspects of Healthcare	3
HIM 6517	Healthcare Project Management	3

One of the following courses is required for the MSHIA degree:

HIM 6125	Healthcare Informatics and Analytics Capstone	3
HIM 6858	Health Informatics/Analytics Practicum (proposed by student & subject to departmental approval)	3

One of the following courses (selected at the Department's discretion for each cohort) is required for the MSHIA degree:

HIM 6694	Consumer Health Informatics	3
HIM 6937	Special Topics	3

Students must complete mandatory, noncredit residency requirements for graduation – orientation program and 3 online residencies offered through the College of Business.

For more information, please contact the Program Manager at mshia@fiu.edu or (305) 348-0594.

Master of Science in Information System (MSIS)

Our Master of Science in Information Systems (MSIS) is the only program of its kind designed with strategic direction from the top South Florida Chief Information Officers (CIOs) ensuring our program delivers knowledge critical to the success of future CIOs.

To better prepare students for senior managerial and executive roles, we offer an integrated curriculum that combines technical and IS/IT management skills, including information systems strategy and governance, database management, systems analysis and design, project management, information security and business analytics. This approach enables an understanding of the complexities of today's most critical business systems and an ability to manage IT resources to produce the best results for the organization.

1. Students complete the program in 12 to 14 months (with classes held on Saturdays).
2. Students improve soft skills through numerous professional development seminars focused on leadership, team-building skills, oral and written presentation skills, and career preparation, while gaining experience in sought after technology skills. Additionally, students build a future network of highly qualified professionals and peers within the IS/IT field.

Admission Requirements

To be eligible for admission to the MSIS degree program in the Chapman School, prospective students must:

1. Hold a 4-year U.S. equivalent Bachelor’s degree from an accredited college or university.
2. Submit a competitive score on the Graduate Management Admission Test (GMAT) or Graduate Record Exam (GRE). Waiver of the requirement could be considered at the Department's discretion if either a) the applicant has a minimum of four (4) years of professional experience directly related to the program or b) if the applicant already completed a graduate degree in a directly related field from an accredited university with a minimum of a 3.0 cumulative grade point average (GPA), or is entering a business master’s program under a special agreement for admissions with specific foreign universities, or c) if the applicant already completed the BBA in Information Systems or Business Analytics or related undergraduate degree at FIU, or similarly accredited institution, with a minimum upper division grade point average (GPA) of 3.25.
3. Have a minimum upper division grade point average (GPA) of 3.0.
4. Provide a personal statement on the motivation to attend the program, including personal and career goals.
5. Graduate student applicants whose studies were completed outside of the US must demonstrate proficiency in the English language by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on paper-based version) or 6.5 overall of the International English Language Testing System (IELTS).
6. If applicant is a student in the FIU Graduate Certificate in Business Analytics program or in the FIU Graduate Certificate in Business Cybersecurity program, and has completed the first 12 credits with a GPA of 3.25 or higher, he or she may be eligible for admission to the MSIS degree program. Appropriate courses from the Certificate program may be transferred into the MSIS degree program.
7. Be in good standing with all previously attended colleges and universities.

Admissions at the graduate level are competitive. Meeting minimum program requirements does not guarantee admission.

To complete the MSIS degree, students need to successfully complete all 10, three-credit hour courses for a total of 30 credit-hours, maintain a B average (3.0 GPA), complete mandatory Professional Development Seminars, and satisfy all University requirements for a Master’s degree.

Core Courses

The following seven core courses are required for the MSIS degree:

ISM 6205	Database Management	3
ISM 6316	Project Management	3
ISM 6106	Systems Analysis	3
ISM 6128	Business Process Design	3
ISM 6307	Management of the Information Systems Function	3
ISM 6338	Information Systems Strategy and	

	Governance	3
ISM 6328	Information Security Management	3

Elective Courses

To complete the MSIS degree students may take three courses selected at the Department’s discretion for each cohort from the list of elective courses below. One of these electives must have a business application development component.

ISM 6024	Managing Distributed Architecture	3
ISM 6136	Business Analytics Applications	3
ISM 6156	Enterprise Information Systems	3
ISM 6208	Data Warehousing	3
ISM 6251	Emerging Information Technologies	3
ISM 6489	E-business and Blockchain Applications	3
ISM 6930	Special Topics in Management Information Systems	3
ISM 6942	MIS Internship	3
QMB 6357	Business Statistical Analysis	3

Professional Development Seminars I, II, III

Optional Elective

ISM 6942	MIS Internship	1-3
----------	----------------	-----

Students who fail more than one class may be dismissed from the MSIS degree program.

Professional Development Seminars

Seminars will focus on soft skills such as leadership, team building, oral presentation, and career exploration. There will be team-building activities, including classroom exercises in group decision-making and problem-solving. Challenging outdoor exercises help students build the skills they will need to work together in the program and to succeed in today’s team-based organizations. Students will also work with a presentation skills coach to improve the communication skills that are critical to managerial success.

Professional Development Seminars I, II, and III will focus on improving student's soft skills. Seminars will be mandatory, non-credit. Topics of Professional Development Seminars are subject to change based on industry trends and demands.

For additional information, please visit <http://msis.fiu.edu> or contact the Program Manager at (305) 348-0594 or msis@fiu.edu.

Program Format

Students will complete the program in 12 - 14 months with classes on Saturdays. Students will complete this program as a cohort. The program offers almost all classes in 8-week terms, with two to three courses each term. Students will be considered full time during a “semester”, or two terms in the cohort, if they complete at least 12 graduate credit hours.

Master of Science in Information Systems / Business Analytics Track

The Business Analytics Track of the Master of Science in Information Systems degree prepares students for careers such as business analysts, data analysts or business analytics managers. The Business Analytics Track provides students with a clear designation of their concentration in the field. The Business Analytics Track

consists of 11 courses (33 credit hours) within the MSIS degree.

Required Core Courses

Students are required to complete all seven of the following core courses (21 credit hours)

ISM 6205	Database Management	3
ISM 6316	Project Management	3
ISM 6106	Systems Analysis	3
ISM 6128	Business Process Design	3
ISM 6307	Management of the Information Systems Function	3
ISM 6338	Information Systems Strategy and Governance	3
ISM 6328	Information Security Management	3

Required Track Courses

Students are required to complete all four of the following courses in the field of business analytics (12 credit hours)

QMB 6357	Business Statistical Analysis	3
ISM 6208	Data Warehousing	3
ISM 6136	Business Analytics Applications	3
ISM 6404	Business Data Visualization and Reporting	3

To complete the MSIS degree, Business Analytics Track, students need to successfully complete all 11, three credit-hour courses for a total of 33 credit-hours, maintain a B average (3.0 GPA), complete mandatory professional development seminars, and satisfy all University requirements for a Master's degree.

Master of Science in Information Systems/Business Cybersecurity Track

The Business Cybersecurity Track of the Master of Science in Information Systems degree prepares students for careers such as chief security officer, cybersecurity manager, cybersecurity analyst or privacy officer. The Business Cybersecurity Track provides students with a clear designation of their concentration in the field. The Business Cybersecurity Track requires students to complete 11 courses (33 credits) within the MSIS degree.

Required Core Courses

Students are required to complete all seven of the following core courses (21 credit hours).

ISM 6205	Database Management	3
ISM 6316	Project Management	3
ISM 6106	Systems Analysis	3
ISM 6128	Business Process Design	3
ISM 6307	Management of the Information Systems Function	3
ISM 6338	Information Systems Strategy and Governance	3
ISM 6328	Information Security Management	3

Required Track Courses

Students are required to complete all four of the following courses in the field of business cybersecurity (12 credit hours).

ISM 6575	Security Risk Management and Organizational Cyber Resilience	3
ISM 6325	Ethical Hacking for Business	3
ISM 6327	Protecting and Defending Business Digital Assets	3
ISM 6326	Information Security: Ethics, Regulation And Compliance	3

To complete the MSIS degree, Business Cybersecurity Track students need to successfully complete all 11, three-credit hour courses for a total of 33 credit-hours, maintain a B average (3.0 GPA), complete mandatory professional development seminars, and satisfy all University requirements for a Master's degree.

Master of Science in Information Systems/Master of Business Administration Joint Degree Pathway

The Master of Science in Information Systems and the MBA program in the Alvah H. Chapman Jr. Graduate School of Business at Florida International University are offering a joint degree pathway culminating in both a Master of Business Administration (MBA), and a Master of Science in Information Systems degree (MSIS). Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway will use existing faculty, courses, and resources. Important criteria relating to the joint degree pathway are as follows:

1. Candidates to the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must indicate on the application their intention to pursue the joint degree pathway. Candidates deciding to pursue the joint degree pathway after having been admitted to one program will indicate this intention only on their second application.
2. Applications for the joint degree pathway will not be accepted from candidates who have already completed either degree. MBA or MSIS students must apply and be admitted no later than the second to last semester in which they are expected to complete their original degree requirements.
3. Candidates must satisfy all requirements for each degree. The two degrees will have two – four common courses. All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. MSIS courses transferred to meet MBA elective credit must be 6000 level courses approved by the University Curriculum Committee. Directors of the MBA and MSIS degree programs may adjust these exact course requirements as a result of future changes to the MBA or MSIS curriculums.

3.1 Joint Professional MBA/MSIS Degree Pathway

To obtain the MSIS/MBA degree through the Professional MBA program, students must complete the following courses for a total of 63 credit hours if they choose the MSIS degree or 66 credit hours if they choose the MSIS in Business Analytics track degree or the MSIS in Business Cybersecurity track degree:

In the Professional MBA Program (33 credit hours)		
ACG 6026	Accounting for Managers	3
ACG 6175	Financial Reporting and Analysis	3
FIN 6406	Corporate Finance	3
FIN 6446	Competitive Strategy	3
MAN 6245	Organizational Behavior	3
MAN 6726	Strategic Management	3
ISM 6021	Management of Information Systems	3
MAR 6805	Marketing Management in the Global Environment	3

QMB 6357	Business Statistical Analysis	3	In the IMBA program (39 credit hours):		
One elective course in International Business		3	ACG 6026	6026 Accounting for Managers	3
One elective in legal/regulatory issues		3	ACG 6175	Financial Reporting and Analysis	3
In the MSIS program (30 credit hours):			BUL 6810	Legal Environment of Business	3
ISM 6106	Systems Analysis	3	FIN 6406	Corporate Finance	3
ISM 6205	Database Management	3	FIN 6644	Global Financial Strategy	3
ISM 6307	Management of the Information Systems Function	3	MAN 6245	Organizational Behavior	3
ISM 6208	Data Warehousing	3	MAN 6726	Strategic Management	3
ISM 6128	Business Process Design	3	MAN 6608	International Business	3
ISM 6328	Information Security Management	3	MAN 6974	Master's Project in Management	3
ISM 6338	Information Systems Strategy and Governance	3	MAR 6805	Marketing Management in the Global Environment	3
ISM 6316	Project Management	3	MAR 6816	Corporate Simulation	3
ISM 6156	Enterprise Information Systems	3	QMB 6616	Business Process & Operational Analysis	3
ISM 6489	E-business & Blockchain Applications	3	QMB 6357	Business Statistical Analysis	3
Professional Development Seminars (PDS) I, II, III			In the MSIS program (30 credit hours):		
In the MSIS in Business Analytics track program (33 credit hours):			ISM 6106	Systems Analysis	3
ISM 6106	Systems Analysis & Design	3	ISM 6205	Database Management	3
ISM 6205	Database Management	3	ISM 6307	Management of the Information Systems Function	3
ISM 6307	Management of the Information Systems Function	3	ISM 6208	Data Warehousing	3
ISM 6128	Business Process Design	3	ISM 6128	Business Process Design	3
ISM 6328	Information Security Management	3	ISM 6328	Information Security Management	3
ISM 6338	Information Systems Strategy & Governance	3	ISM 6338	Information Systems Strategy and Governance	3
ISM 6316	Project Management	3	ISM 6316	Project Management	3
QMB 6357	Business Statistical Analysis	3	ISM 6156	Enterprise Information Systems	3
ISM 6208	Data Warehousing	3	ISM 6489	E-business & Blockchain Applications	3
ISM 6136	Business Analytics Applications	3	Professional Development Seminars (PDS) I, II, III		
ISM 6404	Business Data Visualization & Reporting	3	In the MSIS in Business Analytics track program (33 credit hours):		
Professional Development Seminars (PDS) I, II, III			ISM 6106	Systems Analysis & Design	3
In the MSIS in Business Cybersecurity track program (33 credit hours):			ISM 6205	Database Management	3
ISM 6106	Systems Analysis & Design	3	ISM 6307	Management of the Information Systems Function	3
ISM 6205	Database Management	3	ISM 6128	Business Process Design	3
ISM 6307	Management of the Information Systems Function	3	ISM 6328	Information Security Management	3
ISM 6128	Business Process Design	3	ISM 6338	Information Systems Strategy & Governance	3
ISM 6328	Information Security Management	3	ISM 6316	Project Management	3
ISM 6338	Information Systems Strategy & Governance	3	QMB 6357	Business Statistical Analysis	3
ISM 6316	Project Management	3	ISM 6208	Data Warehousing	3
ISM 6325	Ethical Hacking for Business	3	ISM 6136	Business Analytics Applications	3
ISM 6326	Information Security: Ethics, Regulation And Compliance	3	ISM 6404	Business Data Visualization & Reporting	3
ISM 6327	Protecting & Defending Business Digital Assets	3	Professional Development Seminars (PDS) I, II, III		
ISM 6575	Security Risk Management & Organizational Cyber Resilience	3	In the MSIS in Business Cybersecurity track program (33 credit hours):		
Professional Development Seminars (PDS) I, II, III			ISM 6106	Systems Analysis & Design	3
3.2. Joint International MBA/MSIS Degree Pathway			ISM 6205	Database Management	3
To obtain the MSIS/MBA degree through the International MBA program, students must complete the following courses for a total of 69 credit hours if they choose the MSIS program or 72 credit hours if they choose the MSIS in Business Analytics track program or the MSIS in Business Cybersecurity track program:			ISM 6307	Management of the Information Systems Function	3
			ISM 6128	Business Process Design	3
			ISM 6328	Information Security Management	3
			ISM 6338	Information Systems Strategy & Governance	3
			ISM 6316	Project Management	3
			ISM 6325	Ethical Hacking for Business	3
			ISM 6326	Information Security: Ethics, Regulation And Compliance	3

ISM 6327	Protecting & Defending Business Digital Assets	3
ISM 6575	Security Risk Management & Organizational Cyber Resilience	3
Professional Development Seminars (PDS) I, II, III		

Notes:

¹ The Professional MBA for Executives and Professional MBA in Healthcare Management programs are not included as an option for the joint degree pathway.

² Joint degree pathway candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first degree program requirements as if the student had never been a joint degree pathway candidate.

For additional information, contact the MBA office at (305) 348-0148 or the MSIS Office at (305) 348-2830.

Master of Accounting/Master of Science in Information Systems Joint Degree Pathway

The School of Accounting and the MSIS program in the Alvah H. Chapman Jr. Graduate School of Business at Florida International University are proposing a joint degree pathway culminating in both a Master in Accounting (MACC) and a Master of Information Systems (MSIS). Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway will use existing faculty, courses, and resources. Important criteria relating to the joint degree pathway are as follows:

1. Candidates to the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must indicate on their initial application their intention to pursue the joint degree pathway.
2. Applications for a joint degree pathway will not be accepted from candidates who have already completed either degree.
3. Domestic undergraduate non-accounting degree holders; and international degree holders, regardless of major, will take the following courses, for a saving of 15 credits:
 - 24 credits at the 6000-level from the MSIS
 - 15 credits at the 5000-level from the MACC
 - 30 credits at the 6000-level from the MACC
4. Domestic undergraduate accounting degree holders from AACSB accredited universities may petition to waive the 5000-level MACC courses, saving an additional 15 credits.
5. All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. Directors of the MACC and MSIS degree programs may adjust these exact course requirements as a result of future changes to the MACC or MSIS programs.
6. Joint degree pathway candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first-degree program requirements as if the student had never been a joint degree pathway candidate.

Master of Science in Health Informatics and Analytics/Master of Business Administration in Healthcare Management (MSHIA/MBA-HM) Joint Degree Pathway

The Master of Science in Health Informatics and Analytics and the Professional MBA in Healthcare Management program in the Alvah H. Chapman Jr. Graduate School of Business at Florida International University are offering a joint degree pathway culminating in both a Master of Business Administration (MBA) in Healthcare Management and a Master of Science in Health Informatics and Analytics degree (MSHIA). Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway will use existing faculty, courses, and resources. Important criteria relating to the joint degree pathway are as follows:

1. Candidates to the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must indicate on the application their intention to pursue the joint degree pathway. Students deciding to pursue the joint degree pathway after having been admitted to one program will indicate this intention only on their second application.
2. Applications for a joint degree pathway will not be accepted from candidates who have already completed either degree. MBA in Healthcare Management or MSHIA students must apply and be admitted no later than the second to last semester in which they are expected to complete their original degree requirements.
3. Candidates must satisfy all requirements for each degree. To obtain the MSHIA degree, the student will have to fulfill all the MSHIA program requirements. To obtain the MBA degree, the student will have to fulfill all the MBA program requirements. The two degrees will have four common, or overlapping, courses. All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. Directors of the MBA and MSHIA degree programs may adjust these exact course requirements as a result of future changes to the MBA or MSHIA curriculums.

3.1. To obtain the MSHIA degree, MBA in Healthcare Management students must complete a total of 24 credits as follows:

HIM 6682	Quality and Outcomes Analytics	3
ISM 6205	Database Management	3
ISM 6326	Information Security and Compliance	3
ISM 6136	Business Analytics Applications	3
HIM 6685	Clinical Information Systems	3
ISM 6305	Information Systems Planning	3
ISM 6316	Project Management	3
ISM 6128	Business Process Design	3
From the MBA in Healthcare Management program the following 12 credit hours will be transferred:		
BUL 6810	Legal Environment of Business	3
MAN 6830	Organizational Information Systems	3
MAN 6245	Organizational Behavior	3
MAN 6097	Managerial Decision-Making in Health Economics	3

3.2. To obtain the MBA in Healthcare Management, MSHIA degree students must complete a total of 24 credits as follows:

MAN 6501	Operations Management	3
MAN 6098	Management of Healthcare Finance and Reimbursement	3
MAR 6805	Marketing Management in the Global Environment	3
ACG 6026	Accounting for Managers	3
BUL 6605	Healthcare Fraud and Abuse Law and Regulation	3
MAN 6726	Strategic Management	3
FIN 6406	Corporate Finance	3
ACG 6175	Financial Reporting and Analysis	3
From the MSHIA program the following 12 credit hours will be transferred:		
HIM 5065	Introduction to Health and Health Informatics	3
HIM 6019	Legal and Ethical Aspects of Healthcare	3
QMB 6357	Business Statistical Analysis	3
MAN 6245	Organizational Behavior	3
OR		
HIM 6694C	Consumer Health Informatics	3

4. Joint degree pathway candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first degree program requirements as if the student had never been a joint degree pathway candidate. With the joint degree pathway students will take a total of 60 credit hours to get both degrees. Without the joint degree pathway students will need to take 78 credit hours to get both degrees. Thus, MBA in Healthcare Management students who have taken twelve credits of MSHIA common courses may obtain an MSHIA degree with an additional 24 credits. MSHIA students who have taken twelve credits of a MBA in Healthcare Management common courses may obtain an MBA in Healthcare Management degree with only 24 credits.

For additional information, contact the MBA office at (305) 348-3256 or the MSHIA Office at (305) 348- 0594.

Combined BBA in Business Analytics/ Master of Science in Information Systems- Business Analytics Track Degree Pathway (BA/MSIS-BA)

The combined Bachelor of Business Administration in Business Analytics/Master of Science in Information Systems- Business Analytics Track Degree Pathway (BA/MSIS-BA) is designed for outstanding undergraduate students interested in continuing studies beyond their baccalaureate degree. The pathway provides a strong base of knowledge and skills in business analytics, and at the same time accelerates completion of the Master of Science in Information Systems degree. Students may take advantage of the overlap of courses in the BA and MSIS – BA programs to receive their MSIS degree in a shorter period than might otherwise be possible.

A student admitted to the Degree Pathway will be considered to have undergraduate status until conferral of their BBA in Business Analytics degree. Upon conferral of

their undergraduate degree, the student will be granted graduate status.

Admission Requirements

1. Students must be enrolled in the BBA in Business Analytics (BA) degree program.
2. Students must have completed at least 75, but no more than 90, credits of coursework.
3. Students must have completed ISM 4400 or equivalent with a B or better.
4. Student must have an overall (transfer and FIU) GPA of 3.34 or higher.
5. Students must have two letters of recommendation, with at least one from a faculty member of the FIU Department of Information Systems and Business Analytics.

General Requirements

1. Students must maintain a GPA of 3.0 or greater to remain in the Degree Pathway.
2. BBA in Business Analytics (BA) degree must be awarded before the Master of Science in Information Systems – Business Analytics Track degree.
3. No grade below “C” will be accepted in any course taken to satisfy graduate program requirements.
4. Grade requirements for the Master of Science Information Systems – Business Analytics Track apply to courses counted toward the Master of Science Information Systems – Business Analytics Track degree.
5. Up to 4 courses (12 credits) may be used in satisfying both the BBA in Business Analytics and Master of Science in Information Systems – Business Analytics Track degree requirements.
6. Students must fulfill the degree requirements of both the BBA in Business Analytics and Master of Science in Information Systems – Business Analytics Track degree programs, with all overlapping courses approved by both graduate program director and undergraduate advisors before students enroll in such courses.

Combined BBA in Information Systems/Business Information Security Track/Master of Science in Information Systems/ Business Cybersecurity Track Degree Pathway (BIS/MSIS-Cybersecurity)

The Combined Bachelor of BBA in Information Systems/Business Information Security Track/Master of Science in Information Systems/Business Cybersecurity Track Degree Pathway (BIS/MSIS-Cybersecurity) is designed for outstanding undergraduate students interested in continuing studies beyond their baccalaureate degree. The Degree Pathway provides a strong base of knowledge and skills in business cybersecurity, and at the same time accelerates completion of the Master of Science in Information Systems/Business Cybersecurity Track degree. Students may take advantage of the overlap of courses in the Bachelor of Business Administration in Information Systems/ Business Information Security Track and

MSIS/Business Cybersecurity Track degree in a shorter period than might otherwise be possible.

A student admitted to the Degree Pathway will be considered to have undergraduate status until conferral of their BBA in IS/Business Information Security Track degree. Upon conferral of their undergraduate degree, the student will be granted graduate status.

Admission Requirements

1. Students must be enrolled in the BBA in Information Systems/ Business Information Security Track degree program.
2. Students must have completed at least 75, but no more than 90, credits of coursework.
3. Students must have completed ISM 4220 and ISM 4323 with a B or better.
4. Students must have an overall (transfer and FIU) GPA of 3.34 or higher.
5. Students must have two letters of recommendation, with at least one from a faculty member of the FIU department of Information Systems and Business Analytics.

General Requirements

1. Students must maintain a GPA of 3.0 or greater to remain in the Degree Pathway.
2. BBA in Information Systems/Business Information Security Track degree must be awarded before the Master of Science in Information Systems/Business Cybersecurity Track Degree.
3. No grade below "C" will be accepted in any course taken to satisfy graduate program requirements.
4. Grade requirements for the Master of Science in Information Systems/Business Cybersecurity Track apply to courses counted toward the Master of Science in Information Systems/Business Cybersecurity Track degree.
5. Up to 4 courses (12 credits) may be used in satisfying both the BBA in Information Systems/Business Information Security Track and Master of Science in Information Systems/Business Cybersecurity Track degree requirements.
6. Students must fulfill the degree requirements of both the BBA in Information Systems/Business Information Security Track and Master of Science in Information Systems/Business Cybersecurity Track degree programs, with all overlapping courses approved by both graduate program director and undergraduate advisors before students enroll in such courses.

Doctorate of Medicine/ Master of Science in Health Informatics and Analytics (MD/MSHIA) Combined Degree Pathway

The Herbert Wertheim College of Medicine (HWCOC) and the Master of Science in Health Informatics and Analytics (MSHIA) program in the Alvah H. Chapman Jr. Graduate School of Business at Florida International University have a combined degree pathway culminating in both a Doctorate of Medicine (MD) and a Master of Science in Health Informatics (MSHIA). Under the combined degree

pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. Important criteria relating to the joint degree pathway are as follows:

1. HWCOC Medical students in their third year of medical study may apply to the MSHIA program. Each college (College of Medicine and College of Business) will independently review and admit applicants to their programs. Only students admitted to both programs will enroll in classes in the combined program.
2. Combined degree pathway students will complete the first three years of coursework in the College of Medicine. Then, beginning in the fourth year, students in the combined pathway will interrupt their medical studies and begin classes for the MSHIA program. Classes in the MSHIA program will be taken during fall, spring and summer semesters of the fourth year. During this time students will complete 27 hours of course work in the MSHIA program. Ten credits taken in the medical school will count toward the 37 credits required for the MSHIA degree. At the beginning of the fifth year, students will recommence taking courses in the medical program. Students will graduate with both degrees at the end of the 5 years.
3. Students will be expected to complete a minimum of 37 credits for the MSHIA and 189 credits as well as all requirements for the MD degree. Twenty-seven of those credits will be taken in the College of Business, with ten HWCOC credits being accepted toward the MSHIA degree. There is no change in course requirements for the MD degree.
4. Students will apply for the combined MD/MSHIA pathway in the following manner: Medical students in the fall of their third year (prior to December 30) must be in good academic standing and must get approval from the Medical Student Evaluation and Promotions Committee (MSEPC), the Office of Student Affairs (OSA), and the Office of Academic Affairs (OAA), in order to apply for admission to the MSHIA program. Applications will be reviewed by the MSHIA program admissions committee. Applicants to the combined MD/MSHIA pathway will not be required to submit standardized test scores; they must have a minimum GPA of 3.0.
5. Students begin taking classes in business in the fourth year. The entire fourth year is devoted to classes in the MSHIA program. There is also a mandatory requirement for MSHIA program virtual (online) residencies.

The curriculum in the MD/MSHIA pathway follows a prescribed course of study shown below. The proposed schedule is as follows. (HWCOC does not have semesters. Therefore, we have used Period designations.)

First Year Period 1 (M1) August to end of March: College of Medicine curriculum

Second Year Period 2 (M2) April to end of March: College of Medicine curriculum

Third Year Period 3 (M3) April to end of March: College of Medicine: all required clerkships

Fourth Year medical students start M4 period in April. Then, in August start the MSHIA courses.

Medical students must be counseled as to when to take USMLE Step 1 and USMLE Step 2 CK and CS, and which

electives, selective or subinternship to engage in prior to taking a leave to pursue the MSHIA program. The remainder of Year 4 then consists of MSHIA courses. That is, from August through end of June.

Fifth year- The MSHIA program ends the end of June. Medical students take the remainder of the 5th year, which is the M4 period in the medical school (July through April).

Medical students will be counseled as to which electives, selectives or subinternship to take prior to applying for residency in September of this fifth year.

The following courses are required for the MSHIA program.

HIM 6628	Healthcare Data Visualization	3
HIM 6865	Healthcare Database Systems	3
HIM 6682	Quality & Outcome Analytics	3
HIM 6685	Clinical Information Systems	3
HIM 6517	Healthcare Project Management	3
HIM 6124	Technical & Data Architectures & Standards for Health Care	3
HIM 6527	Healthcare Information Security & Privacy	3
HIM 6858	Health Informatics / Analytics Practicum	3

(proposed by student & subject to the approval of the department housing the MSHIA program, Information Systems and Business Analytics)

One of the following courses (selected at the Department's discretion for each cohort) is required for the MSHIA degree:

HIM 6694	Consumer Health Informatics	3
HIM 6937	Special Topics	3

MSHIA Virtual Residencies I, II and III.

Residencies are mandatory, professional development non-credit requirements (typically include virtual meetings and independent activities, for example Six Sigma)

Courses waived in MSHIA: 10 credits

HIM 5065	Intro. To Health & Informatics	3
HIM 6019	Legal & Ethical Aspects of Healthcare	3
HIM 6267	Foundations of Health Informatics & Analytics Administration	1
QMB 6357	Business Stat. Analysis	3
Credits accepted from HWCOM: 10 credits		
MDR 7910	Research Scholarship	4
BMS 6880	Foundations of Clinical Epidemiology & Quantitative Research	2
BMS 6067	US Healthcare Delivery System	2
BMS 6820	Humanism and Medical Jurisprudence	1
BMS 6826	Ethical Foundations of Medicine	1

There are, therefore, 9 courses to be taken in the College of Business, for a total of 27 credits.

Students must earn a minimum GPA of 3.0 in the MSHIA program to be conferred with the MSHIA degree.

MIS Concentration in the Ph.D. Program

The Department of Information Systems and Business Analytics (ISBA) offers a Management Information Systems (MIS) concentration in the doctoral program in Business Administration. The Ph.D. Program is a 75-credit program.

Course Study

Year I

Fall		
ISM 7345	Organizational and Strategic Applications of IS research	3

Graduate Certificate in Health Informatics and Analytics

The objective of this graduate certificate is to provide individuals with a basic understanding of health information technology and management of the complex inherent within the healthcare sector.

Admission Requirements

Students must have an earned baccalaureate degree with a GPA of 2.75 or higher. This certificate is open to both degree-seeking students and those who are not currently enrolled at FIU.

Prerequisite:

Computer skills including: Word, Excel and PowerPoint

Program of Study (15 credit hours)

Any five of the following 3 credit courses subject to prerequisite requirements:

HIM 5065	Introduction to Health and Health Informatics	3
HIM 6019	Legal and Ethical Aspects of Healthcare	3
HIM 6124	Technical and Data Architectures and Standards for Healthcare	3
HIM 6517	Healthcare Project Management	3
HIM 6527	Healthcare Information Security and Privacy	3
HIM 6628	Health Data Visualization	3
HIM 6682	Quality and Outcomes Analytics	3
HIM 6685	Clinical Information Systems	3
HIM 6694	Consumer Health Informatics	3
HIM 6858	Health Informatics/Analytics Practicum*	3
HIM 6865	Healthcare Database Systems	3
QMB 6357	Business Statistical Analysis	3

*proposed by student and subject to department approval

Graduate Certificate in Healthcare Management

The objective of this graduate certificate is to provide individuals with a basic understanding of the context, management and reimbursement issues for health services organizations.

Admission Requirements

Students must have an earned baccalaureate degree with a GPA of 2.75 or higher. This certificate is open to both degree-seeking students and those who are not currently enrolled at FIU.

Prerequisite:

Computer skills including: Word, Excel and PowerPoint

Program of Study (15):

MAN 6095	Management of Healthcare Organizations in the 21 st Century	3
HSA 6176	Financing and Reimbursement of Health Systems	3
MAN 6830	Organization Information Systems	3
HSA 6156	Economic and Decision Analysis in Health Services	3
MAN 6501	Operations Management	3

Graduate Certificate in Business Analytics

The objective of this graduate certificate is to provide individuals with a basic understanding of the application of statistical methods, techniques, and tools to large data sets proliferating across organizations, in an effort to address persistent and evolving business problems.

Admission Requirements

Students must have an earned baccalaureate degree with a GPA of 2.75 or higher. This certificate is open to both degree-seeking students and those who are not currently enrolled at FIU.

Prerequisite:

Computer skills including: Word, Excel and PowerPoint

Program of Study (15):

The certificate requires completion of the following courses (6 credit hours):

QMB 6357	Business Statistical Analysis	3
ISM 6208	Data Warehousing	3

The certificate also requires completion of one of the following courses (3 credit hours):

ISM 6205	Database Management	3
HIM 6865	Healthcare Database Systems	3

Additionally, the certificate requires completion of one of the following courses (3 credit hours):

ISM 6136	Business Analytics Applications	3
HIM 6682	Quality and Outcome Analytics	3

Finally, the certificate requires completion of one of the following courses (3 credit hours):

ISM 6404	Business Data Visualization and Reporting	3
HIM 6628	Health Data Visualization	3

Graduate Certificate in Advanced Business Analytics

The objective of this graduate certificate is to provide individuals with an advanced understanding of the application of statistical methods, techniques, and tools to large data sets proliferating across organizations, in an effort to address persistent and evolving business problems. The proposed Graduate Certificate in Advanced Business Analytics focuses on developing the advanced skills required to pursue careers in big data, or as quantitative analysts. As public and private entities accumulate ever-increasing stores of data assets, their ability to efficiently and effectively analyze such assets constitutes a key core competency. Students will gain hands on experience applying statistical methods and techniques through use of decision support systems (DSS), expert systems (ES), business intelligence (BI) reporting tools, in addition to business analytics (BA) data mining tools and data visualization tools.

Admission Requirements

Students must have an earned baccalaureate degree with a GPA of 3.0 or higher. This certificate is open to both degree-seeking students and those who are not currently enrolled at FIU.

Prerequisite:

Graduate certificate in Business Analytics or equivalent course work

Program of Study (15):

ISM 6136	Managing Unstructured Data	3
ISM 6217	Data Management	3
ISM 6316	Project Management	3
QMB 6603	Quantitative Methods for Business	3
ISM 6251	Emerging Technologies	3

Graduate Certificate in Cybersecurity Management

The objective of the Graduate Certificate in Cybersecurity Management is consistent with the university's aim of becoming a hub for cybersecurity research and education.

Admission Requirements

The Graduate Certificate in Cybersecurity Management targets both degree seeking and non-degree seeking students.

1. The applicant must hold a 4-year U.S. equivalent Bachelor's degree from an accredited college or university with a GPA of 2.75 or higher.
2. Applicants who earned the Bachelor's degree outside of the U.S. must demonstrate proficiency in the English language by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on paper-based version) or 6.5 overall of the International English Language Testing System (IELTS)

Program of Study (15):

ISM 6328	Information Security Management	3
ISM 6575	Security Risk Management and Organizational Cyber Resilience	3
ISM 6325	Ethical Hacking for Business	3
ISM 6327	Protecting and Defending Business Digital Assets	3
ISM 6326	Information Security: Ethics, Regulation and Compliance	3

David Wernick, Teaching Professor

Mission

The mission of the Department of International Business is three-fold: 1) to be a world leader in international business research, teaching and academic leadership; 2) to provide impactful entrepreneurship educational programs in line with the needs of the South Florida community, and 3) to be a recognized player in the strategic management field. The department strives to prepare its students by offering a wide variety of academic courses, experiential learning activities and exposure to real-world international business environments, guided by world-renowned faculty members.

Master of International Business (MIB)

The MIB program is a *specialized degree* focused on the key skills, behaviors and techniques required for students to succeed in the international marketplace. It emphasizes the knowledge and abilities that are specific to doing business globally. It is aimed towards those who wish to deepen their understanding of international business practices and opportunities.

MIB students also benefit from studying in South Florida, particularly since Miami is a major center for international trade and finance and a gateway linking the Americas to the world. The MIB faculty is adept at blending theoretical understanding with practical application. A variety of teaching/learning approaches—including case studies, lectures, team projects and presentations, executive guest lectures, and simulations—

keep classes relevant and interesting. The global character of the MIB program is inherent in its curriculum and in the diverse nationalities of the students enrolled in it. Because of the diversity of our student body, students continually share and learn from their multinational perspectives and experiences. In addition to the international business expertise of its faculty, the program features lectures and seminars by multinational, foreign, and U.S.-based corporate business leaders.

Key features of the MIB program include:

- Choose to study in one of two formats –in person or online.
- Emphasis on the global aspect of business;
- Participation in seminars, conferences and field trips conducted by the *Knight Ridder Center for Excellence in Management*, and the Global Entrepreneurship Center;
- Possibility of earning a second degree (MBA) at one of our partner institutions;
- Participation in a series of workshops focused on leadership, and interpersonal and communication skills;
- A high level of personal service and support;
- Access to personalized career services.

Admission Requirements

The MIB program considers students' work experience, industry knowledge and management skills as strengths in their qualifying portfolio. Candidate's professional maturity; and managerial experience earn extra points in the admission selection process because the MIB program at FIU fosters students' ability to contribute real-world experiences to add value to the overall student learning outcome (SLO) in this competitive degree program.

To be eligible for admission to the MIB program in the Chapman Graduate School of Business, applicants must meet the following qualifications:

1. Hold a bachelor's degree or equivalent from either a U.S. regionally accredited college or university or the equivalent degree from institutions outside the U.S. Students coming from programs where the primary degree is at the master level or higher will meet this requirement;
2. Show high promise of success in graduate studies as determined by the faculty based upon academic performance, work experience or a combination of academic and work experience.
3. Evidence a minimum score of 500 on the Graduate Management Admission Test (GMAT) or similar Graduate Record Exam (GRE) score. A GMAT waiver at the discretion of the academic director is available for:
 - a) Applicants with two years of demonstrative work experience and success in completing other academic programs;
 - b) Applicants who have an undergraduate business or related degree (economics, hospitality management, etc.) with an upper division grade point average (GPA) of 3.25 or higher;

- c) Applicants without a business or related degree having an upper division grade GPA of 3.35 or higher;
 - d) If the applicant has already completed a graduate degree from an accredited university with a minimum grade point average (GPA) of 3.0 or is entering a business master's program under a special agreement for admissions with a specific foreign and domestic universities.
4. Should, in general, have a minimum upper division grade point average (GPA) of 3.0. An applicant with substantial work experience and industry/work related recommendations will be evaluated based on academic qualifications, work experience, and performance;

- d. Students applying to FIU under agreements for admissions with foreign universities having demonstrated their programs are taught fully in English and/or that they enforce English proficiency exam requirements for admission considered comparable to FIU English Proficiency requirements are eligible for a TOEFL waiver under terms of the agreement.
- e. International agreements must follow standard approval process through the Office of Academic Planning and Accountability and document applicability of waiver. Undergraduate students meeting the minimum Florida Board of Governors regulation for college readiness scores in the reading and English sections.

In addition, students are required to submit:

1. A CV/resume describing current and past positions responsibilities, and highlights of leadership and management experience.
2. Statement of purpose (short essay) that describes why you want to obtain an advanced international business education, and how the MIB program fits within your personal and career goals. The essay will be evaluated for applicants' effective and succinct writing skills;
3. Two letters of recommendation from employers and/or faculty members who can attest to applicants' skill and motivation to succeed in the MIB program at FIU.
4. Applicants will be required prior to the final selection to either 1) participate in an Interview with the MIB leadership team, or 2) submit a five-minute video where the applicant is physically visible throughout the video. Additional instructions for uploading and content will be provided at the time of selection.

Applicants whose studies were completed in non-English speaking countries must demonstrate proficiency of the English language by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on the paper-based version or 213 on the computer-based version of the Test of English as a Foreign Language) or 6.5 overall on the International English Language Testing System (IELTS) or other university level English proficiency standards as they are approved; As alternative forms of showing sufficient English proficiency, students may also present the following:

- a. FIU English Language Institute ("ELI") Program Level Six completion: successful completion with passing grades for all content areas'
- b. GRE Verbal Reasoning Score: 151/Analytical Writing Score: 3.5; GMAT Verbal Score:28/Analytical Writing Score: 4.5;
- c. Graduate students having completed English Composition: Writing and Rhetoric 1 ("ENC 1101") and English Composition: Writing and Rhetoric 2 ("ENC 1102") with passing scores of C or better from a regionally accredited

Applicants are encouraged to provide any additional documentation to strengthen their application portfolio. Examples of documentation include: Master's degree in any discipline, professional certifications (i.e. CPA, CFA, SHRM, etc.), specialized leadership experience or training, documentation that the applicant is part of a "fast track" or "high potential" management group in their organization, or any other similar evidence.

Admissions at the graduate level are competitive and meeting minimum requirements does not guarantee admission.

For additional information about the MIB program please contact the program manager at (305) 348-3279 or by email to mib@fiu.edu.

Degree Requirements

In order to complete the MIB, students must successfully complete a total of 30 credit hours which include the following:

- six (6), three-credit hour core courses
- three (3), three-credit hour courses in areas of specialization (approved by the program)
- three-credit hour international business immersion (international trip) and local business immersion (local trip)
- non-credit MIB Workshop
- non-credit Professional Development Seminars (PDS)
- non-credit Career services activities
- non-credit Guest speaker series and roundtable discussions

The following courses are required for the MIB:

Core Courses (6 courses, 18 credit hours):

MAN 6679	Master's Project in International Business	3
MAN 6635	Global Strategy and Business Models	3
MAN 6657	Contextual Intelligence in International Business	3
MAN 6606	Fundamentals of International Business	3
MAN 6678	Global Start-ups	3
MAN 6636	Global Megatrends, Geopolitics, and Political Economy	3

Business Immersion Trips (1 course, 3 credit hours):

MAN 6686	Master's Seminar in International Business	3
----------	--	---

Specialization Electives (3 courses, 9 credits hours):

Specialization Elective 1	3
Specialization Elective 2	3
Specialization Elective 3	3

Non-credit Activities (4 activities):

MIB Workshop	0
Professional Development Seminars	0
Career Services Activities	0
Roundtable discussions and guest speaker series	0

Students will be required to select three (3) courses in areas of specialization. One of the three specialization courses can be an internship (GEB 6941C). Elective courses are at the approval of the academic director.

Prior to start of their first semester, students will be required to complete the MIB Workshop. This workshop is designed to provide students valuable hands-on, experimental learning early in the process.

The PDS will include oral and written communications skills. The mandatory international trip will be to various destinations abroad each year and will include visits to prominent companies and cultural experiences. The mandatory local trip will include visits to global organizations located in South Florida.

Students will be required to participate in Career services activities sponsored and hosted by the COB's Business Career Management Office. These activities will assist students to develop knowledge and skills necessary for their careers and the job market.

Finally, students will be required to attend various roundtable discussions and guest speaker events. These activities are designed to provide students important exposure to, and opportunities to network with businesspersons and FIU alumni. Events will be scheduled sporadically throughout the course of the program.

Dual-Degree Students

Students from our international partner schools have the opportunity to earn a dual degree: an MBA from their home institutions and an MIB from Florida International University. Students in this program complete one year towards their MBA degree at their home institutions, and then attend the MIB program during their second year to complete both degrees. Students in the program also have the opportunity to remain in the U.S. for an additional twelve months under the Optional Training Program.

For more information about this program, please contact the program manager at mib@fiu.edu.

Entrepreneurship

The Eugenio Pino and Family Global Entrepreneurship Center, founded in 2003 at Florida International University, facilitates all entrepreneurial activities at FIU. The Center's programs provide campus-wide awareness of entrepreneurship as an approach to life that enhances and transcends traditional academic experiences. It is woven into the fabric of FIU through activities and courses across the university.

The multi-dimensional nature of the program allows it to address the unique entrepreneurial needs of one of the nation's largest ethnically diverse academic institutions, located in one of America's most entrepreneurial and dynamic international cities, Miami.

Whether in the arts, sciences, business, engineering, or humanities, entrepreneurship at FIU adds value to every discipline and enhances the creativity and innovation of students, faculty, staff, and alumni. The Center encourages students from all disciplines to enroll in entrepreneurship courses.

All academic courses in entrepreneurship and other educational activities are offered on a campus-wide basis. The Department of International Business and the Department of Industrial and Systems Engineering are primary partners in the academic endeavors of the Center. As such, both Departments have a range of courses and programs at the Master's and Doctoral level for students focusing on careers in Entrepreneurship.

Doctoral Studies Program

The Doctoral Studies Program in Business Administration is a selective one leading to the Ph.D. degree. The program emphasizes the development of research and teaching skills to ensure the graduates acquire the credentials necessary for placement in leading institutions.

Each doctoral student's program of study is individually tailored to mesh faculty and student interests and to maintain a high level of interaction between the students and faculty.

The program generally requires three to four years of full-time study, including approximately one to one-and-one-half years of dissertation research. A set of core, or "tool area" business courses, geared toward establishing the student's breadth of knowledge, is required of all doctoral candidates during the first year of study. The second year of coursework focuses on a particular area of concentration to develop the student's depth knowledge in a specific discipline. The Department of International Business and the Department of Global Leadership and Management jointly offer a Ph.D. concentration in Management. Students may focus their studies on Strategic Management, Entrepreneurship, International Business, International Management, Human Resource Management, Organizational Behavior, and Hospitality Management.

The Ph.D. Program is a 75-credit program.

Required Courses (3 courses, 9 credits)

MAN 7275	Organizational Behavior Management	3
MAN 7895	Seminar in Management	3
	and either	
MAN 7616	Multinational Firm Global Strategy	3
	or	
MAN 7718	Analysis of Corporate Policy	3

Content Courses: (Minimum of 3 courses, total 9 credits)

MAN 7146	Leadership	3
MAN 7147	Leadership II	3
MAN 7148	Intuition in Management	3
MAN 7206	Organizational Analysis	3
MAN 7207	Theories of Organization	3
MAN 7235	Management Philosophy and Strategy	3
MAN 7305	Human Resource Management	3

MAN 7412	Labor-Management Topics	3
MAN 7609	Comparative Management	3
MAN 7620	International Business Operations I	3
MAN 7621	International Business Operations II	3

Required Research Methods Courses: (4 courses, 12 credits)

MAN 7155	Fundamentals of Behavioral Research	3
MAN 7910	Advanced Management Research	3
MAN 7640	International Business Research Methods	3
	and	
QMB 7910	Quantitative Research Methods in Business	3
	or	
GEB 7911	Quantitative Research Methods in Business	3
	or	
MAN 7984	Doctoral Research Seminar: Development and Utilization of Large Scale Datasets	3

Minimum of 4 Statistical Courses, 12 credits (not listed here)

Research Project Courses

MAN 7916	Doctoral Research Project in Business	6
MAN 7981	Ph.D. Dissertation Prep	9
MAN 7980	Ph.D. Dissertation	18

Master of Science in Finance/Master of International Business Joint Degree Pathway

The Department of Finance and the MIB programs in the Alvah H. Chapman Jr. Graduate School of Business at Florida International University are proposing a joint degree pathway culminating in both a Master in International Business (MIB), and a Master of Science in Finance. Under the joint degree pathway, a student can obtain both degrees in less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway will use existing faculty, courses, and resources. Important criteria relating to the joint degree pathway are as follows:

1. Candidates to the joint degree pathway must meet the entrance requirements established by each individual program.
2. Applications for a joint degree will not be accepted from candidates who have already completed either degree. MIB or MSF students must apply and be admitted no later than the second to last semester in which they are expected to complete their original degree requirements.
3. Candidates must satisfy all requirements for each degree. The two degrees will have four common courses. All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. MSF courses transferred to meet MIB elective credit must be 6000 level courses approved by the University Curriculum Committee. Directors of the MSF and MIB degree programs may adjust these exact course requirements as a result of future changes to the MSF or MIB curriculums.

- 3.1. **To obtain the MIB degree**, MSF students who have finished their core courses, must complete a total of

36 credit hours as follows:

In the MIB program (24 credits hours):

MAN 6617	Managing Global Production and Technology	3
MAR 6158	International Marketing	3
BUL 6850	International Business Law	3
MAN 6635	Global Strategy and Business Models	3
MAN 6679	Master's Project in International Business	3
MAN 6601	Global Management Skills	3
MAN 6606	Fundamentals of International Business	3
MAN 6930A	Master's Seminar in Management 1	1
MAN 6930B	Master's Seminar in Management 2	1
MAN 6930C	Master's Seminar in Management 3	1

From the MSF program (12 credit hours) will be transferred as follows:

FIN 6644	Global Financial Strategy	3
FIN 6465	Financial Planning and Statements Analysis	3
MAN 6606	Fundamentals of International Business	3
FIN 6XXX	Elective	3
FIN 6XXX	Elective	3

- 3.2. **To obtain the MSF degree**, MIB students who have finished their core courses, must complete a total of 33 credits hours as follows:

From the MSF program (21 credit hours):

FIN 6406	Corporate Finance	3
FIN 6456	Quantitative Method in Financial Analysis	3
FIN 6246	Financial Markets and Institution	3
FIN 6515	Securities Analysis	3
FIN 6525	Portfolio Management	3
FIN 6465	Financial Future and Fixed Income Investments	3
FIN 6487	Financial Risk Management	3

From the MIB program (12 credit hours) will be transferred as follows:

FIN 6644	Global Financial Strategy	3
ACG 6255	International Accounting	3
FIN 6XXX	Finance Elective 1	3
FIN 6XXX	Finance Elective 2	3

4. Joint degree pathway candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first degree program requirements as if the student had never been a joint degree pathway candidate.
5. With the joint degree pathway students will take a total of 57 credit hours to get both degrees. Without the joint degree pathway students will need to take 69 credit hours to get both degrees. Thus, MIB students who have taken twelve credits of MSF common courses may obtain an MSF degree with an additional 21 credits. MSF students who have taken twelve credits of the MIB classes, may obtain an MIB degree with an additional 24 credits.

**Master of Business Administration/
Master in International Business Joint
Degree Pathway**

The MIB and MBA programs in the Alvah H. Chapman Jr. Graduate School of Business at Florida International University offer a joint degree pathway culminating in both a Master of Business Administration (MBA), and a Master in International Business (MIB). Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway will use existing faculty, courses, and resources. Important criteria relating to the joint degree pathway are as follows:

1. Candidates to the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must indicate on the application their intention to pursue the joint degree option. Candidates deciding to pursue the joint degree pathway after having been admitted to one program will indicate this intention only on their second application.
2. Applications for a joint degree pathway will not be accepted from candidates who have already completed either degree. MBA or MIB students must apply and be admitted no later than the second to last semester in which they are expected to complete their original degree requirements.
3. Candidates must satisfy all requirements for each degree. The two degrees will have four common courses. All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. MIB courses transferred to meet MBA elective credit and vice versa must be 6000 level courses approved by the University Curriculum Committee. Directors of the MBA and MIB degree programs may adjust these exact course requirements as a result of future changes to the MBA or MIB curriculums.

3.1. Joint Flex MBA/MIB degree

3.1.1 To obtain MIB degree, Flex MBA students must complete the following courses for a total of 63 credit hours as follows:

In the Flex MBA program (36 credits hours):

ACG 6026	Accounting for Managers	3
ACG 6175	Financial Reporting & Analysis	3
BUL 6810	Legal Environment	3
FIN 6406	Corporate Finance	3
FIN 6446	Competitive Strategy	3
MAN 6501	Operations Management	3
MAN 6245	Organizational Behavior	3
MAN 6726	Strategic Management	3
MAN 6830	Organizational Information Systems	3
MAR 6805	Marketing Management in the Global Environment	3
MAR 6816	Corporate Simulation	3
QMB 6357	Business Statistical Analysis	3
	Professional Development Seminars (PDS)	

In the MIB program (27 credit hours):

MAN 6930	Master's Seminar in Management	1
MAN 6606	Fundamentals of International Business	3
FIN 6644	Global Financial Strategy	3

MAN 6601	Global Management Skills	3
MAN 6617	Managing Global Production and Technology	3
MAN 6679	Master's Project in International Business	3
MAR 6158	International Marketing	3
	MIB Elective	3
	MIB Elective	3

Two of the following elective courses are required for the MIB degree:

MAN 6678	Global Start-ups	3
GEB 6941C	Graduate Business Internship	3
MAN 6937	Special Topics in Business Environment	3

3.1.2 To obtain the Flex MBA, MIB degree students must complete a total of 63 credits as follows:

In the MIB program (36 credit hours):

MAN 6930	Master's Seminar in Management	3
MAN 6606	Fundamentals of International Business	3
ACG 6026	Accounting for Managers	3
BUL 6850	International Business Law	3
FIN 6644	Global Financial Strategy	3
MAN 6635	Global Strategy and Business Models	3
MAN 6601	Global Management Skills	3
MAN 6617	Managing Global Production and Technology	3
MAN 6679	Master's Project in International Business	3
MAR 6158	International Marketing	3
	MIB Elective	3
	MIB Elective	3

Two of the following elective courses are required for the MIB degree:

MAN 6678	Global Start-ups	3
GEB 6941C	Graduate Business Internship	3
MAN 6937	Special Topics in Business Environment	3

In the Flex MBA program (27 credits hours):

ACG 6175	Financial Reporting & Analysis	3
FIN 6406	Corporate Finance	3
FIN 6446	Competitive Strategy	3
MAN 6501	Operations Management	3
MAN 6245	Organizational Behavior	3
MAN 6830	Organizational Information Systems	3
MAR 6805	Marketing Management in the Global Environment	3
MAR 6816	Corporate Simulation	3
QMB 6357	Business Statistical Analysis	3
	Professional Development Seminars (PDS)	

3.2. Joint International MBA/MIB Degree

3.2.1 To obtain the MIB degree, International MBA (IMBA) students must complete the following courses for a total of 69 credit hours as follows:

In the IMBA program (45 credit hours):

ACG 6026	Accounting for Managers	3
ACG 6175	Financial Reporting & Analysis	3
BUL 6810	Legal Environment	3
FIN 6406	Corporate Finance	3
FIN 6446	Competitive Strategy	3
MAN 6501	Operations Management	3
MAN 6245	Organizational Behavior	3
MAN 6726	Strategic Management	3
MAN 6703	Colloquium in Managing	

	Organizational Ethics	3
MAN 6830	Organizational Information Systems	3
MAN 6679	Master's Project in International Business	3
MAR 6805	Marketing Management in the Global Environment	3
QMB 6357	Business Statistical Analysis	3
	Professional Development seminars (PDS) I,II, III	2

In the MIB program (24 credit hours):

MAN 6930	Master's Seminar in Management	3
MAN 6635	Global Strategy and Business Models	3
MAN 6601	Global Management Skills	3
MAN 6617	Managing Global Production and Technology	3
MAN 6679	Master's Project in International Business	3
MAN 6158	International Marketing	3
	MIB Elective	3
	MIB Elective	3

Two of the following elective courses are required for the MIB degree:

MAN 6678	Global Start-ups	3
GEB 6941C	Graduate Business Internship	3
MAN 6937	Special Topics in Business Environment	3

3.2.2. To obtain the International MBA (IMBA), MSIS degree students must complete a total of 69 credits as follows:

In the MIB program (36 credit hours):

MAN 6930	Master's Seminar in Management	3
MAN 6606	Fundamentals of International Business	3
ACG 6026	Accounting for Managers	3
BUL 6850	International Business Law	3
FIN 6644	Global Financial Strategy	3
MAN 6635	Global Strategy and Business Models	3
MAN 6601	Global Management Skills	3
MAN 6617	Managing Global Production and Technology	3
MAN 6679	Master's Project in International Business	3
MAR 6158	International Marketing	3
	MIB Elective	3
	MIB Elective	3

Two of the following elective courses are required for the MIB degree:

MAN 6678	Global Start-ups	3
GEB 6941C	Graduate Business Internship	3
MAN 6937	Special Topics in Business Environment	3

In the IMBA program (33 credit hours):

ACG 6175	Financial Reporting & Analysis	3
BUL 6810	Legal Environment	3
FIN 6406	Corporate Finance	3
FIN 6446	Competitive Strategy	3
MAN 6501	Operations Management	3
MAN 6245	Organizational Behavior	3
MAN 6726	Strategic Management	3
MAN 6703	Colloquium in Managing Organizational Ethics	3
MAN 6830	Organizational Information Systems	3
MAR 6805	Marketing Management in the Global Environment	3

MAR 6816	Corporate Simulation	3
QMB 6357	Business Statistical Analysis	3
	Professional Development Seminars (PDS) I, II, III	2
In the MIB program (24 credit hours):		
MAN 6930	Master's Seminar in Management	3
MAN 6635	Global Strategy and Business Models	3
MAN 6601	Global Management Skills	3
MAN 6617	Managing Global Production and Technology	3
MAN 6679	Master's Project in International Business	3
MAR 6158	International Marketing	3
	MIB Elective	3
	MIB Elective	3
Two of the following elective courses are required for the MIB degree:		
MAN 6678	Global Start-ups	3
GEB 6941C	Graduate Business Internship	3
MAN 6937	Special Topics in Business Environment	3

3.3. Joint Professional MBA/MIB Degree

3.3.1. To obtain the MIB degree. Professional MBA (PMBA) students must complete the following courses for a total of 66 credit hours as follows:

In the PMBA program (42 credit hours):

ACG 6026	Accounting for Managers	3
ACG 6175	Financing Reporting & Analysis	3
BUL 6810	Legal Environment of Business	3
FIN 6406	Corporate Finance	3
FIN 6446	Competitive Strategy	3
FIN 6644	Global Financial Strategy	3
MAN 6608	International Business	3
MAN 6501	Operations Management	3
MAN 6245	Organizational Behavior	3
MAN 6726	Strategic Management	3
MAN 6830	Organizational Information Systems	3
MAR 6805	Marketing Management in the Global Environment	3
MAR 6816	Corporate Simulation	3
QMB 6357	Business Statistical Analysis	3
	Professional Development Seminars (PDS)	

In the MIB program (24 credit hours):

MAN 6930	Master's Seminar in Management	3
MAN 6635	Global Strategy and Business Models	3
MAN 6601	Global Management Skills	3
MAN 6617	Managing Global Production and Technology	3
MAN 6679	Master's Project in International Business	3
MAR 6158	International Marketing	3
MAN 6606	Fundamentals of International Business	3
	MIB Elective	3
	MIB Elective	3

Two of the following elective courses are required for the MIB degree:

MAN 6678	Global Start-ups	3
GEB 6941C	Graduate Business Internship	3
MAN 6937	Special Topics in Business Environment	3

3.3.2. To obtain the Professional MBA (PMBA). MIB

degree students must complete a total of 66 credits as follows:

In the MIB program (36 credit hours):

In the MIB program (36 credit hours):		
MAN 6930	Master's Seminar in Management	3
MAN 6606	Fundamentals of International Business	3
ACG 6026	Accounting for Managers	3
BUL 6850	International Business Law	3
FIN 6644	Global Financial Strategy	3
MAN 6635	Global Strategy and Business Models	3
MAN 6601	Global Management Skills	3
MAN 6617	Managing Global Production and Technology	3
MAN 6679	Master's Project in International Business	3
MAR 6158	International Marketing	3
	MIB Elective	3
	MIB Elective	3

Two of the following elective courses are required for the MIB degree:

MAN 6678	Global Start-ups	3
GEB 6941C	Graduate Business Internship	3
MAN 6937	Special Topics in Business Environment	3

In the PMBA program (30 credit hours):

ACG 6175	Financing Reporting & Analysis	3
FIN 6406	Corporate Finance	3
MAN 6501	Operations Management	3
MAN 6245	Organizational Behavior	3
MAN 6726	Strategic Management	3
MAN 6830	Organizational Information Systems	3
MAR 6805	Marketing Management in the Global Environment	3
MAR 6816	Corporate Simulation	3
QMB 6357	Business Statistical Analysis	3
	Professional Development Seminars (PDS)	

Notes:

¹ Requirements for the CMBA depend on track chosen. If a candidate has elected the option of a specialization, the number of credit hours required and shared for the Flex will be used. Otherwise, the number of credit hours required and shared for the PMBA will be used.

² The Executive MBA and Professional MBA in Healthcare Management programs are not included as an option for the joint degree.

³ Joint degree candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first degree program requirements as if the student had never been a joint degree candidate.

For additional information, contact the MIB office at (305) 348-3279 or the MBA office at (305) 348-0148.

Master of International Business/Juris Doctor Joint Degree Pathway

The faculties of the College of Law and the College of Business at Florida International University have approved a joint degree pathway culminating in both a Juris Doctor degree, awarded by the College of Law, and a Master of International Business degree, awarded by the College of Business. Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively.

Essential criteria relating to the joint degree pathway are as follows:

1. Candidates for the pathway must meet the entrance requirements for and be accepted by both Colleges. Both Colleges must be informed by the student at the time of application to the second program that the student intends to pursue the joint degree.
2. The joint degree pathway is not open to students who have already earned one degree.
3. For law students, enrollment in the MIB program is required no later than the completion of 63 credit hours in the JD program. For MIB students, enrollment in the JD program is required no later than the time that the student has completed one-half of the MIB curriculum.
4. A student must satisfy the curriculum requirements for each degree before either degree is awarded. The College of Business will allow 9 credit hours of upper level international and comparative law courses to be credited toward both the MIB and JD degrees. These 9 credit hours of law classes will be in lieu of the International Business Law course (3 credit hours) and any two other courses (totaling 6 credit hours) in the MIB curriculum. Reciprocally, law students may receive 9 hours of credit toward the satisfaction of the JD degree for courses taken in the MIB curriculum upon completion of the MIB degree curriculum with a grade point average of 3.0 or higher.
5. A student enrolled in the joint degree pathway may begin the student's studies in either College, but full-time law students must take the first two semesters of law study consecutively and part-time law students must take the first three semesters of law study consecutively. Students admitted to one College but electing to begin study in the other College under the joint degree pathway may enter the second College thereafter without once again qualifying for admission so long as they have notified the second College before the end of the first week of the first semester in the second College and are in good academic standing when studies commence in the second College.
6. A student enrolled in the joint degree pathway will not receive either degree until the student has satisfied all of the requirements for both degrees, or until the student has satisfied the requirements of one of the degrees as if the student had not been a joint degree candidate.
7. Students in the joint degree pathway will be eligible for the graduate teaching assistantships and research assistantships in the College of Business on the same basis as other MIB students, subject to the guidelines and restrictions set by the College of Business.

For additional information, contact the MIB office at (305) 348-3279 or the Law School Admissions Office at (305) 348-8006.

Master of International Business/Master of Arts in International Studies Joint Degree Pathway

The Department of Politics and International Relations and The Alvah H. Chapman Jr. Graduate School of Business at Florida International University are proposing a joint degree pathway culminating in both a Master in

International Business (MIB), and a Master of Arts in International Studies (MAIS). Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway will use existing faculty, courses, and resources. Important criteria relating to the joint degree pathway are as follows:

1. Candidates to the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must indicate on the application their intention to pursue the joint degree option. Students deciding to pursue the joint degree option after having been admitted to one program will indicate this intention only on their second application.
2. Applications for a joint degree will not be accepted from candidates who have already graduated with either degree. MIB or MAIS students must apply and be admitted no later than the second to last semester in which they are expected to complete their original degree requirements, including the comprehensive examination for the MAIS degree.
3. Candidates must satisfy all requirements for each degree. The two degrees will have four common courses. All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. Courses transferred to meet elective credits must be 5000 or 6000 level courses. Directors of the MAIS and MIB degree programs may adjust these exact course requirements as a result of future changes to the MAIS or MIB curriculums.

3.1. To obtain the MIB degree, MAIS students who have successfully completed the required 36 credits must, additionally, complete 24 credit hours in the MIB program as follows:

MAN 6617	Managing Global Production and Technology	3
MAR 6158	International Marketing	3
MAN 6635	Global Strategy and Business Models	3
MAN 6679	Master's Project in International Business	3
MAN 6601	Global Management Skills	3
FIN 6644	Global Financial Strategy	3
ACG 6255	International Accounting	3
MAN 6930A	Master's Seminar in Management 1	1
MAN 6930B	Master's Seminar in Management 2	1
MAN 6930C	Master's Seminar in Management 3	1

In order to satisfy the 36 credits hours required by the MIB program, 12 credit hours will be transferred from the MAIS program as follows:

INR 6017	Comparative Approaches to Area Studies and Global Issues	3
INR 5409	International Law	3
Elective 1		3
Elective 2		3

3.2. To obtain the MAIS degree, MIB students who have successfully completed the required 36 credits must, additionally, complete 24 credit hours in the MAIS program as follows:

INR 6706	Political Economy of International Relations	3
INR 5615	Research Design and International Relations	3
GEO 6473	Space, Place and Identity	3

INR 5609	Contemporary Dynamics of International Relations	3
INR 6017	Comparative Approaches to Area Studies and Global Issues	3
Field course 1		3
Field course 2		3
Field course 3		3

In order to satisfy the 36 credits hours required by the MAIS program, 12 credit hours will be transferred from the MIB program as follows:

MAN 6606	Fundamentals of International Business	3
BUL 6850	International Business Law	3
Elective 1		3
Elective 2		3

All MAIS students coming into the MIB program will be required, during the first month of classes, to take a 16-hour workshop in Accounting and a 16-hour workshop in Quantitative Methods. The purpose of these workshops is to ascertain that students have the necessary background in both of these fields. Students must pass each workshop with at least a B grade (there is no charge for this workshop). Otherwise, they must register, and pay the corresponding tuition for the Accounting class (ACC 6026) and/or the Quantitative methods class (QMB 6357) in the Evening MBA program, and earn a grade of B or higher.

Joint degree pathway candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first degree program requirements as if the student had never been a joint degree pathway candidate.

Marketing and Logistics

Anthony Miyazaki, Professor and Department Chair

Alexandra Aguirre-Rodriguez, Associate Professor

Nicolo Alaimo, Assistant Teaching Professor and
Co-Director, Global Sales Lab

The Department of Marketing and Logistics offers a Master of Science in Marketing, a Master of Science in Logistics and Supply Chain Management, and a concentration in Marketing for the Ph.D. program.

The Department boasts an internationally diverse, experienced, widely published, and highly involved faculty. Our faculty includes recognized experts in digital marketing, branding, marketing analytics, consumer behavior, social media, marketing management, international marketing, logistics and supply chain management, distribution channels and business ethics.

The study of marketing involves learning about how best to make a host of key decisions and implement them in an organization. Some of these decisions include:

- Selection of profitable product/service offerings
- Market segment selection and targeting strategies
- Product/service positioning
- Digital marketing and social media strategies
- Distribution, logistics, and supply chain management
- Pricing and the management of price perceptions
- Advertising, promotion, and customer relations

You can study topics like marketing management, market research, consumer behavior, export marketing, digital marketing, social media, marketing channels, retailing, international marketing, advertising, promotional strategy, personal selling, sales management, marketing analytics and strategic marketing.

Master of Science in Marketing

The Master of Science in Marketing is a one-year (10-month) program that will provide rigorous graduate education focused on areas of marketing that are relevant to, and demanded by today's business environment, namely, digital marketing, brand development, and marketing analytics.

The program will be taught in a lockstep fashion that allows each course to be integrated into the overall theme of the program such that examples and exercises that are relevant to the three areas of focus will be used to reinforce students' learning. Likewise, the overall focus of digital, branding, and analytics will be incorporated into each course. As a whole, the program will cover digital marketing (from general e-marketing to social media to digital marketing strategies), the psychology and economics of buyer behavior, how to conduct marketing research in today's electronic environment, the development of brand equity and its implications for organizational success, the use of marketing analytics to improve the efficiency of marketing activities, as well as marketing management and overall strategy.

Admission Requirements

To be eligible for admission to the program, students must:

1. Hold a bachelor's degree (or equivalent) from an accredited college of university;
2. Have a minimum GPA of 3.0 (on a 4-point scale) in all of their upper division course work or have earned a graduate degree with a minimum of a 3.0 GPA;
3. Provide three letters of recommendation from professional supervisors and/or former faculty that attest to the applicant's educational background, motivation, and analytical skills;
4. Provide a series of personal statements regarding their motivation to attend the program, personal and career goals, and contributions that they will bring to their colleagues and fellow students;
5. Have at least 3 years of professional work experience or score at least 500 on the Graduate Management Admissions Test (GMAT) or the equivalent on the Graduate Record Exam (GRE);
6. Complete an interview with one of the faculty advisors or the director of the program;
7. Applicants who studies were completed outside of the US must demonstrate proficiency in the English language by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on the paper-based version) or 6.5 overall on the International English Language Testing System (IELTS); and
8. Be in good standing at all previously-attended colleges and universities.

Admissions at the graduate level are competitive and meeting the minimum program requirements does not guarantee admission.

Graduation Requirements

Completion of 10 graduate courses equivalent to 30 graduate credit hours and the completion of a series of Professional Development Seminars and/or an Internship approved by the Faculty Advisor.

To be eligible for a Master's degree, a student must:

1. Satisfy all university requirements for a master's degree;
2. Satisfy any required prerequisites;
3. Complete any required professional development seminars and/or internships;
4. Complete required courses in the enrolled graduate program; and
5. Earn a minimum average of "B" (3.0) in all approved courses in the student's approved course of graduate study.

No courses in which a graduate student earns a grade below "C" may be counted toward any master's degree program in the Chapman School. However, all approved undergraduate and graduate course work a graduate student takes will be counted in computing his or her grade point average, including courses in which he or she earned a "D" or "F" grade.

Required Courses

MAR 6805	Marketing Management in the Global Environment	3
MAR 6722	E-Marketing	3
MAR 6506	Consumer Behavior	3
MAR 6646	Marketing Research	3
MAR 6880	Social Media Marketing	3
MAR 6336	Integrated Marketing Communication	3
MAR 6675	Marketing Analytics	3
MAR 6838	Brand Management	3
MAR 6735	Digital Marketing Strategies	3

And one of:

MAR 6819	Marketing Strategy	3
MAR 6936	Special Topics in Marketing	3
MAR 6075	Current Issues in Marketing I	3

Professional Development Seminars and/or an appropriate internship will be required.

Marketing Concentration in the Ph.D. Program

All students are required to complete a minimum of 15 courses in addition to the College Colloquium series. Students concentrating in Marketing must take all seven of the seminars offered by the Marketing Department; these seminars are listed below. In addition, students are required to take a two-course sequence in research methods and between two to four courses in statistics (the number of required courses in statistics depends upon the student's level of statistical knowledge upon entering the program). Other coursework will be selected by the student with the advice and consent of the Department's Ph.D. Committee. To remain in the program, students are expected to maintain a GPA of 3.5 or better in the seven courses comprising the Marketing concentration. In addition, students are expected to maintain a GPA of 3.3 or better in all of their other coursework. The Ph.D. Program is a 75-credit program.

Major Field Courses (8 courses, 24 credits)

MAR 7622	Marketing Research Methodology I	3
----------	----------------------------------	---

MAN 7155	Fundamentals of Behavioral Research	3
MAR 7507	Seminar in Consumer Behavior	3

----------	---	---

PSY 5939	Special Topics	3
----------	----------------	---

PHC 6062	Systematic Reviews and Meta-Analysis	3
----------	--------------------------------------	---

Research Projects

Students' research skills are further developed through summer projects during their first and second years in the program. These projects are supervised by faculty and are multi-faceted in their intended purpose.

Many students have never been involved with a research project from start to finish. The first year project is intended to familiarize students with the research process. The emphasis is on executing a manageable project during the allotted time rather than the novelty of the thinking behind the research. Much more emphasis is given to the creativity of the research for the second summer project. Ideally, this research would serve as a stepping stone for the student's dissertation, which will be the focus of the last two years of the program. Both summer projects require the submission of a written paper and presentation to the marketing faculty.

Master of Science in Logistics and Supply Chain Management

The MS in Logistics and Supply Chain Management is a one year (10-month) program that will provide rigorous graduate education that focuses on logistics technology, data analytics, and distribution modeling, which are areas relevant to, and demanded by, today's business environment. The program will be taught in a lockstep fashion which will allow the themes of logistics technology, data analytics, and distribution modeling to be incorporated into each course. As a whole, the program will cover all aspects of logistics technology, quantitative and qualitative methodologies for product design, warehousing, procurement and contracting, how to conduct research and data analytics in today's electronic environment, the use of computer algorithms to predict product distribution models, as well as marketing management and overall strategy.

Required Courses:

SCM 6016	Supply Chain Management	3
MAR 6805	Marketing Management in the Global Environment	3
SCM 6136	Purchasing and Inventory Management	3
MAR 6203	Omni-Channel Marketing and Distribution Systems	3
TRA 5245	Transportation Logistics	3
MAR 6860	Customer Relationship Management	3
SCM 6721	Import/Export and	

	International Logistics	3
MAR 6446	Negotiations	3
SCM 6216	Logistics Strategy	3
SCM 6206	Logistics Systems and Analytics	3
	Professional development seminars and/or an appropriate internship, for zero credit, will be required.	

Admission Requirements

To be eligible for admission to the program, students must:

1. Hold a bachelor's degree (or equivalent) from an accredited college or university;
2. Have a minimum GPA of 3.0 (on a 4-point scale) in all of their upper division course work or have earned a graduate degree with a minimum of a 3.0 GPA;
3. Provide three letters of recommendation from professional supervisors and/or former faculty that attest to the applicant's educational background, motivation, and analytical skills;
4. Provide a series of personal statements regarding their motivation to attend the program, personal and career goals, and contributions that they will bring to their colleagues and fellow students;
5. Have at least 3 years of professional work experience or score at least 500 on the Graduate Management Admissions Test (GMAT) or the equivalent on the Graduate Record Exam (GRE);
6. Applicants who studies were completed outside of the US must demonstrate proficiency in the English language by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on the paper-based version) or 6.5 overall on the International English Language Testing System (IELTS); and
7. Be in good standing at all previously attended colleges and universities.

Admissions at the graduate level are competitive and meeting the minimum program requirements does not guarantee admission.

Graduation Requirements

Completion of 10 graduate courses equivalent to 30 graduate credit hours and the completion of a series of Professional Development Seminars and/or an Internship approved by the Faculty Advisor.

To be eligible for a Master's degree, a student must:

1. Satisfy all university requirements for a master's degree;
2. Satisfy any required prerequisites;
3. Complete any required professional development seminars and/or internships;
4. Complete required courses in the enrolled graduate program; and
5. Earn a minimum average of "B" (3.0) in all approved courses in the student's approved course of graduate study.

No courses in which a graduate student earns a grade below "C" may be counted toward any master's degree program in the Chapman School. However, all approved undergraduate and graduate course work a graduate student takes will be counted in computing his or her grade point average, including courses in which he or she earned a "D" or "F" grade.

Course Descriptions

Definition of Prefixes

ACG-Accounting; BUL-Business Law; COP-Computer Programming; ECP-Economic Problems and Policy; ENT-Entrepreneurship; FIN-Finance; GEB-General Business; HIM-Health Information Management; ISM-Information Systems Management; MAN-Management; MAR-Marketing; QMB-Quantitative Methods in Business; REE-Real Estate; SCM- Supply Chain Management; TAX-Taxation; TRA-Transportation.

F-Fall semester offering; S-Spring semester offering; SS-Summer semester offering.

Departmental or School/College Designation:

AC – School of Accounting

BA – College of Business

FI – Finance

GM – Global Leadership and Management

IB – International Business

IS – Information Systems and Business Analytics

ME – Marketing and Logistics

RE – Real Estate

ACG 5137 Standards and Principles of Financial Accounting (AC) (3). A survey of official pronouncements on accounting standards and principles. Prerequisite: Permission of Accounting certificate program advisor.

ACG 5256 International Dimensions of Accounting and Auditing (AC) (3). Review of and reasons for variations in accounting and auditing practices throughout the world; explore initiatives undertaken to promote transparency, harmonization, and standardization to facilitate understanding of financial statements prepared under various conventions. Prerequisite: Permission of Accounting certificate program advisor.

ACG 5307 Advanced Managerial Accounting (AC) (3). In depth study of determination and control of production costs; budgetary control; CVP analysis; and alternative methods of performance measurement and analysis. Prerequisite: Permission of Accounting certificate program advisor.

ACG 5386 Controllership (AC) (3). Study of controllership function; role of controller in planning, accounting for, and evaluating company performance; relationship with internal auditing. Prerequisite: Permission of Accounting certificate program advisor.

ACG 5395 Seminar in Managerial Accounting (AC) (3). An in-depth study of selected areas of managerial accounting. Prerequisites: ACG 4341 or equivalent and permission of Accounting certificate program advisor.

ACG 5507 Issues and Problems in Accounting for Non-Profit Entities (AC) (3). Study and analysis of accounting, reporting, and control standards and practices of non-profit organization -including accounting for governments, hospitals, universities, churches, and others. Prerequisite: Permission of Accounting certificate program advisor.

ACG 5516 The Environment of Government Accounting (AC) (3). Basic public administration emphasizing governmental processes with which governmental accountants and auditors come into contact. Includes legislative and administrative activities and

operating functions having high accounting and auditing involvement. Prerequisite: Permission of accounting certificate program advisor.

ACG 5518 Historical and Comparative Government Accounting (AC) (3). Research and reporting on subjects in the history of, or on comparative aspects of, government accounting. Prerequisite: Permission of Accounting certificate program advisor.

ACG 5519 Contemporary Issues in Government Accounting (AC) (3). Research and reporting on current issues related to government accounting. Prerequisite: Permission of Accounting certificate program advisor.

ACG 5545 Analysis of Governmental Financial Reports (AC) (3). Describes content of government financial reports and analytical methods employed by internal and external users; covers concepts of disclosure, budget/actual analysis, credit evaluations, operational evaluations, measures of fiscal capacity and signs of fiscal stress. Prerequisite: Permission of Accounting certificate program advisor.

ACG 5546 Governmental Planning and Budgetary Accounting with Cases (AC) (3). Budgeting in governments emphasizing formulation based on accounting and auditing input. Budget execution and analysis of deviations of actual from budgets; study of ZBB, PPBS, and MBO systems and their behavioral and accounting bases. Prerequisite: Permission of Accounting certificate program advisor.

ACG 5596 Accounting for Specialized Governmental and Nonprofit Entities (AC) (3). Survey course by guest lecturers covering detailed accounting concepts, procedures, and reporting for enterprise fund entities, educational entities, and unique types of internal service funds. Prerequisite: Permission of Accounting certificate program advisor.

ACG 5627 Systems Auditing (AC) (3). Principles and procedures of auditing systems of information, including the function, approach, and techniques of systems auditing and the evaluation of systems controls. Emphasis on auditing computerized systems. Prerequisite: Permission of Accounting certificate program advisor.

ACG 5696 Seminar in Auditing (AC) (3). An in-depth study of recent developments in auditing. Prerequisites: ACG 4651 or equivalent and permission of Accounting certificate program advisor.

ACG 5806 Seminar in Financial Accounting (AC) (3). An in-depth study of recent developments in financial accounting. Prerequisite: ACG 4111 and permission of Accounting certificate program advisor.

ACG 5846 Statistical Methods in Accounting and Auditing (AC) (3). Formulation, analysis and implementation on a microcomputer of mathematical models in financial and managerial accounting and auditing. Prerequisite: Permission of Accounting certificate advisor.

ACG 5905 Independent Study in Accounting and Auditing (AC) (1-3). Individual conferences, supervised readings, and reports on personal investigations. Prerequisites: Written permission of the instructor, accounting certificate program advisor, School Director, and Dean.

ACG 5936 Special Topics in Accounting and Auditing (AC) (3). For groups of students who wish an intensive study of a particular topic or a limited number of topics not otherwise offered in the curriculum. Prerequisites: Written permission of the instructor, accounting certificate program advisor, School Director, and Dean.

ACG 6026 Accounting for Managers (AC) (3). Presentation of the nature, techniques and uses of accounting from the perspective of people who manage businesses and investments in businesses. Covers both financial and management accounting. Not open to EMST or MACC students.

ACG 6105 Accelerated Financial Accounting I (AC) (4). Underlying concepts and ethical, regulatory and business environment of financial reporting; emphasis on measurement, analysis and interpretation of income, cash flows and financial position. Prerequisites: Admission to a graduate program in the School of Accounting or permission of the School Director. Not open to those with undergraduate accounting degrees.

ACG 6115 Accelerated Financial Accounting II (AC) (4). Underlying concepts and ethical, regulatory and business environment of financial reporting; emphasis on measurement, analysis and interpretation of financial position, accounting partnerships, international corporations. Prerequisites: ACG 6105 and admission to a graduate program in the School of Accounting or permission of the School Director. Not open to those with undergraduate accounting degrees.

ACG 6135 Seminar in Financial Accounting Theory I (AC) (3). A study of the theoretical structure of accounting, with special attention to asset and income definition, recognition, and measurement; and an appraisal of pronouncements of professional accounting organizations. Prerequisites: Baccalaureate in accounting or equivalent and admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

ACG 6145 Seminar in Financial Accounting Theory II (AC) (3). A continuation of ACG 6135, with emphasis on the problems of accounting for price-level changes and other current issues. Prerequisites: ACG 6135 and admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

ACG 6175 Financial Reporting and Analysis (AC) (3). Comprehensive treatment of analysis of financial statements as aid for decision making; looks at current state of financial reporting practices and impact of published statements on economic systems. Prerequisites: ACG 6026, FIN 6406 or equivalent. Not open to EMST or MACC students.

ACG 6176 Evaluation of Financial Reports, Business Analysis and Valuation (AC) (3). Seminar examining quality of financial reports and adjusting for investment decisions. Valuation models are used to value firms given economic and industry characteristics and alternative business strategies. Prerequisites: ACG 4111, ACG 4201, or permission of the Director of the School of Accounting.

ACG 6225 Advanced Accounting (AC) (3). Seminar examining role and inputs of accounting, finance, and taxation in strategic decisions. Mergers, acquisitions, and

corporate restructuring is the frame-work used to bring these issues into focus. Prerequisites: Master of Accounting students only; must be in final semester of program.

ACG 6245 Accounting and Auditing Compliance Issues (AC) (3). Corporate, government and public accounting compliance with response to institutional and political regulation; attention to compliance in specialized industries such as health care, transportation, financial institutions real estate and construction. Prerequisites: ACG 4111 or equivalent, ACG 4651 and admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

ACG 6255 International Accounting (AC) (3). Comparative analysis of accounting concepts and practices in different countries; international accounting standards; problems of accounting for multinational corporations, including transfers of funds and income measurements; the role of accounting in national economic development. Prerequisites: ACG 6026 or equivalent, not open to MACC students.

ACG 6257 Global Accounting, Auditing and Financial Strategy (AC) (3). Evaluation of U.S. GAAP, International Accounting Standards and the international dimensions of auditing. Consideration is given to geopolitical issues, international organizations, and role of regulators. Prerequisites: ACG 4111, ACG 4651, ACG 6176, or permission of the Director of the School of Accounting.

ACG 6295 Financial Accounting IV (AC) (3). The application of accounting principles in the production of information for selected topics in financial statements with extensive examination and evaluation of FASB and international standards of accounting. Prerequisites: Admission to a graduate program in the School of Accounting or the permission of the Director of the School of Accounting.

ACG 6345 Management Accounting and Control (AC) (3). Accounting concepts and techniques useful in evaluation, planning, organization and control of a business enterprise, with attention to methods of accounting for production activities; ethics in management accounting. Prerequisites: ACG 4111 and admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting. Not open to those with undergraduate accounting degrees.

ACG 6346 Seminar in Managerial Accounting I (AC) (3). Analysis of transfer pricing; product pricing; incremental profit analysis; decision models; alternative performance measurement techniques; and other advanced topics. Prerequisites: ACG 4341 or ACG 6026, and admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

ACG 6356 Seminar in Managerial Accounting II (AC) (3). A study of the controllership function in corporate organizations; an appraisal of the controller's role in planning, accounting for, and evaluating company performance; and relationship to internal audit function. Prerequisites: ACG 4341 and admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

ACG 6385 Managerial Control and Controllership (AC) (3). Control methods for management; control structure, planning and forecasting for budgets; the functions of controllership, including cash management, risk management, investments, tax administration and records management. Prerequisites: Admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

ACG 6405 Seminar in Accounting Information Systems I (AC) (3). Accounting information systems security and control and legal and ethical compliance; control of computer failure and abuse and compliance with laws, regulations, and standards. Computer usage required. Prerequisites: Admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

ACG 6415 Seminar in Accounting Information Systems II (AC) (3). Accounting information systems for strategic use in the management of competitive enterprises; budgeting, performance measurement, and cost accounting for generating strategic information. Computer usage required. Prerequisites: Admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

ACG 6437 Advanced Accounting Information Systems (AC) (3). Development and control of information systems for accounting, emphasis on new microcomputer technology, software engineering, methods of data processing and database management systems. Prerequisites: ACG 4401, or permission of the Director of the School of Accounting.

ACG 6445 Accounting Information Systems Analysis and Design (AC) (3). Accounting applications of information systems analysis and design concepts, methods, and tools; requirements, design, control, and prototyping of accounting information systems. Computer usage required. Prerequisites: Admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

ACG 6455 Accounting Information Systems Technology, Control and Audit I (AC) (3). Accounting applications, control, and audit of large computer systems; technology, control concepts and procedures, audit testing and documentation, and control and audit software. Computer usage required. Prerequisites: Admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

ACG 6456 Accounting Information Systems Technology, Control and Audit II (AC) (3). Accounting applications, control, and audit of small computer systems; technology, control concepts and procedures, audit testing and documentation, and control and audit software. Computer usage required.

ACG 6466 Accounting Enterprise Resource Planning (AC) (3). Course intends to provide students with an overview of ERP in accounting including history, concepts of ERP and role of ERP in accounting. It also provides students hands on experience with accounting application of ERP package, SAP/R3. Prerequisites: ACG 6437, or permission of the Director of the School of Accounting.

ACG 6506 Governmental and Non – Profit Accounting (AC) (3). Treats the developing concept of consolidated

financial statements for governments. Also covers advanced areas of accounting, e.g., concepts, investment accounting, grant accounting, and pension accounting. Prerequisites: ACG 6505, ACG 6584, admission to graduate program in School of Accounting or permission of the Director of the School of Accounting.

ACG 6517 Audit of Governmental Entities (AC) (3). Covers methods of audits of governments by independent public accountants, coordination with internal audit staffs; describes audits of governments by internal auditors (audits of fidelity, efficiency and effectiveness); covers current single audit concept. Prerequisites: ACG 6505, admission to the graduate program in the School of Accounting, or permission of the Director of the School of Accounting.

ACG 6625 Information Technology Auditing (AC) (3). Understanding and application of concepts and procedures of auditing computer information systems; analysis, testing, and documentation of computer security and controls for management and financial statement reports. Prerequisites: ACG 4651, ACG 6437, or permission of the Director of the School of Accounting.

ACG 6655 Auditing and Accounting Systems (AC) (4). Standards and procedures of auditing, ethics and responsibilities of auditors, audit evidence, reporting, international standards; design and control of accounting information systems. Prerequisites: ACG 4111 with a grade of 'C' or higher and admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting. Not open to those with undergraduate accounting degrees.

ACG 6657 Environment of Accounting and Auditing (AC) (3). Economics and scope of accounting practice in context of self-regulated profession, public policy constraints, complex business structures and innovative transactions, and rapidly changing information technology with extensive reference to business periodicals and on-line databases. Prerequisites: ACG 4111, ACG 4651, or permission of the Director of the School of Accounting.

ACG 6675 Internal Auditing (AC) (3). This course examines auditing in depth as a professionalized discipline for reviewing testing, and evaluating the financial and the operational activities and controls of an economic entity. Focus will be directed to private sector profit seeking entities as well as governmental and other nonprofit organizations. Prerequisites: Admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

ACG 6676 Advanced Internal Auditing (AC) (3). Special topics in internal auditing such as forensic auditing, analytical auditing, management consulting, work with external auditors, ethics, multinational aspects, evaluation methods, quality control, new technologies and recent research. Prerequisites: Admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

ACG 6677 Applied Internal Auditing (AC) (3). The expansion of the internal audit process into such areas as administrative and support functions; line functions such as research, sales, and production; and special areas such as compliance, budgeting and controls. Course is taught by outside lecturers. Prerequisites: Admission to a

graduate program in the School of Accounting or permission of the Director of the School of Accounting.

ACG 6685 Introduction to Forensic Accounting (AC) (3). The course will define forensic accounting and will identify techniques used in domestic and foreign frauds. It also will define financial fraud and provide mechanisms for its detection. Prerequisite: Entry into the MACC program.

ACG 6686 Fraud Examination (AC) (3). Use of technology for the prevention of financial fraud, examination of emerging practices and regulatory trends as reflected in court decisions. Prerequisites: ACG 4651, ACG 6625, or permission of the Director of the School of Accounting.

ACG 6687 Financial Investigation (AC) (3). The course will present knowledge and skills necessary to specialize in financial investigation, will identify common schemes in financial fraud and how will analyze behavioral, digital, and manual evidence. Prerequisite: Entry into the MACC Program.

ACG 6692 Business Analytics for Forensic Accounting (AC) (3). The course will involve going through a series of exercises that allow students to learn and apply forensic analytic methods and techniques. Students will learn both high-level techniques and detailed, drill-down level analysis. Prerequisite: Entry into the MACC Program.

ACG 6696 Current Issues in Auditing (AC) (3). Professional and technical aspects of auditing practice; introduction to SEC; ethics and legal responsibilities; emergence of non-public practice; public expectations and professional reality; the impact of technology; international auditing; recent auditing developments. Prerequisites: ACG 4651 and admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

ACG 6835 Behavioral Accounting (AC) (3). Study of the effect of the process and products of accounting and of the relation of changes in the process and products to individual and group behavior; consideration of ways in which accounting can aid individuals and organizations to attain their goals. Prerequisites: ACG 4111 and 4341 or equivalents, and admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

ACG 6838 Fraud Investigation (AC) (3). The course will present an in-depth study of corporate crime and fraud using case law and recent major corporate debacles as case studies to explain theories of corporate, managerial, and third party professional criminal liability. Prerequisite: BUL 6890.

ACG 6845 Accounting and Quantitative Methods (AC) (3). Study of statistical and management science techniques that are or may be utilized in financial and managerial accounting. Prerequisites: QMB 3200 and ACG 4401, or equivalents, and admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

ACG 6866 Accounting for Health Care Organizations (AC) (3). Study of financial reporting and analysis applied to for-profit and NFP healthcare organizations emphasizing accounting issues related to strategic

decision-making. Prerequisite: Permission of the Director of the School of Accounting.

ACG 6867 Seminar in Medicare Regulation (AC) (3). Principles of Medicare payment systems emphasizing changing role of Medicare in the American healthcare system and developing technical skills to understand, identify and research problems in Medicare payments. Prerequisite: Permission of the Director of the School of Accounting.

ACG 6875 Evolution of Accounting Thought (AC) (3). The cultural origins of accounting and its traditional controversies, from pre-historic time onward, and in an international context. Prerequisites: Admission to graduate program in School of Accounting or permission of the Director of the School of Accounting.

ACG 6885 Accounting Research and Reporting (AC) (3). Examine the projects relating to historical and current problems in public accounting practice, and preparation of appropriate reports in oral and written formats, under a variety of professional settings. Prerequisites: Admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

ACG 6897 Small Business Accounting and Consulting (AC) (3). Live client clinic providing business and accounting services to low income and minorities seeking to start small businesses or non-profit corporations and weekly seminars on relevant topics. Prerequisite: Fully admitted into any graduate program in the college of business.

ACG 6905 Independent Study in Accounting (AC) (1-3). Individual conferences; supervised readings; reports on personal investigations. Prerequisites: Admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

ACG 6935 Special Topics in Accounting (AC) (1-3). Intensive study for groups of students of a particular topic or a limited number of topics not otherwise offered in the curriculum. Prerequisites: Admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

ACG 6940 Accounting Internship (AC) (3). Practical application in a clinical setting of knowledge acquired in the classroom. Prerequisite: Approval by Director of School of Accounting.

ACG 7157 Seminar: Theory and Contemporary Research in Financial Accounting (AC) (3). An evaluative overview of the classical literature in financial accounting and the contemporary empirical research published in the leading scholarly journals. Examined are income determination theories, normative accounting principles, accounting information and stock prices, and principal-agent relationships. Prerequisite: Permission of Doctoral advisor in Accounting.

ACG 7177 Seminar: Accounting Information and Security Prices (AC) (3). An in-depth examination of accounting information and security prices within capital markets theory, including a thorough examination of the cross-sectional properties and time-series properties of accounting numbers and the importance of research findings and new developments in research methodology.

Prerequisite: Permission of Doctoral advisor in Accounting.

ACG 7436 Seminar: Information Value and Agency Research Accounting (AC) (3). An in-depth examination of the research paradigm and the associated empirical research in accounting and auditing. Examined are the issues of information value, risk aversion, risk sharing contracts, as well as accountability from the standpoint of monitoring contracts. Prerequisite: Permission of Doctoral advisor in Accounting.

ACG 7695 Seminar: Contemporary Research in Management Accounting and Auditing (AC) (3). A broad overview of classical and contemporary empirical research in managerial accounting and auditing including budget and performance review, decision making, information analysis, professional judgment, sampling problems, audit risk, etc. Prerequisite: Permission of Doctoral advisor in Accounting.

ACG 7836 Seminar: Behavioral Research in Accounting-Individual Behavior (AC) (3). An in-depth examination of the relationship of cognitive psychology, cognitive models of human judgment, decision theory and accounting information. Emphasis is placed upon the human processing of accounting information, the decision value of information, and the development of decision aids or heuristics. Prerequisite: Permission of Doctoral advisor in Accounting.

ACG 7837 Seminar: Behavioral Research in Accounting-Human Groups and Systems (AC) (3). The multifarious behavioral relationships of groups within the formal and informal organizational structure are examined with respect to performance measurement (efficiency and effectiveness), accountability, planning and control of the development of decision support systems. Prerequisite: Permission of doctoral advisor in Accounting.

ACG 7886 Seminar: Empirical Research Methodology and Paradigms in Accounting (AC) (3). Study of research design, methods of data collection and analysis and problems of measurement in accounting research. Empirical research studies in accounting are integrated throughout to illustrate and analyze the structural problems of research design as well as the strengths and weaknesses of various acceptable paradigms. Prerequisite: Permission of doctoral advisor in Accounting.

ACG 7887 Research Forum and Workshop (AC) (1). Regularly scheduled workshop at which visiting scholars as well as faculty and doctoral candidates present and evaluate research papers. Candidates are expected to participate in discussions, act as discussants and present their own research for critique. Sessions are held for structuring and brainstorming research projects in the formative stages as well as for presenting completed efforts. Prerequisite: Permission of doctoral advisor in Accounting.

ACG 7888 Seminar: The Philosophy of Science, Theory Construction, and Verification in Accounting (AC) (3). An examination of knowledge, theories, scientific explanation and prediction as related to the social sciences. Various theories of accounting are critically examined from the standpoint of theory construction and verification in the philosophy of science. Prerequisite: Permission of doctoral advisor in Accounting.

ACG 7889 Seminar: Positive Theory Research in Accounting (AC) (3). Construction of theory to explain accounting and auditing practices in an environment of regulation using empirical research findings from a growing body of economic-based research in accounting and finance. Prerequisite: Permission of doctoral advisor in Accounting.

ACG 7896 Accounting Research Methods on Capital Markets (AC) (3). An advanced accounting graduate course in current time series methods used to analyze capital and other time-related financial markets. This course is designed for Ph.D. students in accounting and business who already have advanced statistical and financial training, and serves as an introduction to other doctoral courses. Prerequisite: Permission of doctoral advisor in Accounting.

ACG 7906 Independent Study (AC) (1-12). Supervised accounting research projects determined by professor and student. May involve conferences, supervised reading and reports. Consent of sponsoring professor and admission to the Ph.D. program. (on demand)

ACG 7938 Seminar: Special Topics in Accounting Research (AC) (3). Topics vary according to instructor and student interest in problems and issues on the frontier issues of accounting. Prerequisite: Permission of doctoral advisor in Accounting.

ACG 7980 Ph.D. Dissertation (AC) (1-12). Original research that is supervised by a faculty committee and defended openly before the university committee. Prerequisites: Permission of Major Professor and Doctoral Candidacy.

ACG 7981 Dissertation Preparation (AC) (1-12). Preparatory background research and study to begin development of dissertation proposal. Students should be able to complete proposal by end of the course. Prerequisite: Completion of TIER 1 courses. (on demand)

BUL 5661 Law for Accountants (AC) (3). A survey of select topics of direct interest to accounting students, including contracts, sales, agencies, partnerships, corporations.

BUL 5662 Accountant's Liability (AC) (3). Overview of accountant exposure to private and public sector liability suits, independent in auditor engagements, securities regulations and other state and federal laws of chief concern to accountants.

BUL 6605 Healthcare Fraud and Abuse Law and Regulation (AC) (3). This course is intended to cover the healthcare fraud and abuse laws and management of issues related to the prosecution and defense in federal and state systems. Prerequisite: BUL 6810.

BUL 6810 Legal Environment of Business (AC) (3). Examines current legal, regulatory, ethical, and political issues within the context of public law. Topics include employment, antitrust, administrative, cyberlaw, and contracts and tort.

BUL 6821 Cyber Law (AC) (3). Cutting edge issues of relationship between business/society and legal issues impacting internet usage in e-commerce and topics include intellectual property, business and finance, privacy and social issues. Prerequisites: BUL 4310 or BUL 4320 and graduate standing.

BUL 6830 Survey of Business Law (AC) (3). Overview of substantive and procedural aspects of contract law, U.C.C., partnerships and corporations, accountant's liability, and other aspects of government regulation of business. Prerequisites: Admission to a graduate program in the School of Accounting, or permission of the Director of the School of Accounting. Not open to those with undergraduate accounting degrees.

BUL 6850 International Business Law (AC) (3). Analysis of legal problems facing the U.S. international and multinational businesses. Topics include the transnational research of economic regulation, international trade and investment, antitrust law, technology transfers, and securities law.

BUL 6890 Special Topics in Business Law (AC) (1-6). Intensive study for groups of students of a particular topic, or a limited number of topics, not otherwise offered in the curriculum. Prerequisites: Admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

BUL 6906 Independent Study in Business Law (AC) (1-6). Individual conferences; supervised readings; reports on personal investigations. Prerequisites: Admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

COP 7545 File and Database Management Systems (IS) (3). Fundamentals of database concepts and methodologies, including data representation, data modeling, and file organization. Prerequisite: Graduate standing. (on demand)

ECP 6432 Macroeconomic Forecasting for Management (EC) (3). Basic macroeconomics concepts as they apply to decision making within the firm. Traditional models of income determination and forecasting analysis. Prerequisite: ECP 6705. (F,S,SS)

ECP 6705 Managerial Economics (EC) (3). Basic microeconomic concepts as they apply to decision making within the organization; supply and demand; market structure and market behavior in specific industries. Prerequisites: ECO 3021 and ECO 3011.

ENT 6019 Starting and Growing a Professional Practice (BA) (3). This course is directed at the creation of sustainable and profitable professional practice for those in law, accounting, architecture, nursing, engineering, medicine, or any other profession.

ENT 6116 Advanced Business Plan Development (BA) (3). This course is designed to help the student develop an effective written implementation plan for a new business venture; it deals with the critical decisions and actions that entrepreneurs must make in both planning and executing a new venture. Prerequisites: MAN 6805 or permission of the instructor.

FIN 5307 Financial Markets and Analysis (FI) (3). Financial Institutions, Financial Investments, Financial Planning and Analysis, International Financial Perspectives.

FIN 5495 Leasing and Mergers (FI) (3). Discussion-oriented course will provide an analytical foundation to corporate development, strategies, and resource allocation decisions. Merger activity and leasing decisions will be viewed as strategic decisions by the firm to enable

them to achieve corporate objectives. Prerequisites: FIN 3414 or FIN 6406, or equivalent.

FIN 6246 Financial Markets and Institutions (FI) (3). Analysis of the characteristics and efficiency of the money markets and capital markets. Types of money market and capital market instruments, and the role of financial institutions in these markets. Prerequisite: FIN 6406.

FIN 6325 Current Issues in Commercial Banking (FI) (3). Main policy issues in commercial banking and the role of regulatory authorities. Presentation includes bank mergers and holding companies; national bank branching; and the present structure and prospects of the financial sector. Prerequisites: FIN 6326 or equivalent. (on demand)

FIN 6326 Commercial Banking (FI) (3). The objectives, constraints, and policies applicable to the management of commercial banks. Emphasis will be given to asset and liability management, marketing of services and other banking functions. Prerequisite: FIN 6406.

FIN 6346 Credit Analysis (FI) (3). This course examines how the accounting framework is integrated with tools and techniques for the analysis and interpretation of financial statements. Evaluation of risk in domestic and foreign loans and the pricing of credit facilities. Prerequisite: FIN 6406.

FIN 6406 Corporate Finance (FI) (3). In-depth examination of asset, liability and capital structure management, with emphasis on valuation capital budgeting techniques; risk evaluation; working capital management; and methods of short-term, intermediate and long-term financing. Prerequisites: ACG 6026 or equivalent.

FIN 6418 Working Capital Management (FI) (3). Intermediate theories and techniques of cash, accounts receivable, inventory, and accounts payable management. Prerequisite: FIN 6406.

FIN 6425 Financial Management Policies (FI) (3). Advanced theories and applications underlying financial decision making. Case studies and model building. Topics may include valuation, capital structure, dividend policy, restructuring, mergers and acquisition, corporate bankruptcy, agency theory, and initial public offerings. Prerequisite: FIN 6406.

FIN 6436 Capital Budgeting and Long Term Resource Allocation (FI) (3). The theory of capital allocation at the level of the firm, and empirical findings. Decision models and their application. The pattern of capital expenditure of industries and of the economy as a whole. Investment determinants. Prerequisite: FIN 6406.

FIN 6446 Competitive Strategy (FI) (3). Provision of tools for managerial decision-making in a variety of competitive environments including demand analysis, short- and long-run costs of production, demand for factors, market structure and competitive strategy.

FIN 6455 Financial Modeling and Forecasting (FI) (3). An introduction to Financial Modeling and Forecasting. Emphasis is on computer models and forecasting the financial variables. Prerequisites: Permission of the instructor and FIN 6406.

FIN 6456 Quantitative Methods in Financial Analysis (FI) (3). Introduction to mathematical and statistical methods used in finance. The applications of computer techniques to financial management. Prerequisites: FIN 6406 or equivalent.

FIN 6465 Financial Planning and Statement Analysis (FI) (3). Examination of fundamental analysis of corporate financial planning and financial statements. Identification of reliable estimates of fundamental corporate earning power and earning risks and valuation.

FIN 6466 Financial Analytics (FI) (3). Application of statistical and data analysis techniques and software tools to large financial data sets to help make informed financial and investment decisions. Prerequisite: FIN 6406, FIN 6456 or equivalent

FIN 6477 Entrepreneurial Finance (FI) (3). The course covers how to raise capital for a new venture, maximize the value in a growing venture, and forecast and manage financial performance/cash-flow of a growing enterprise. Prerequisite: FIN 6406.

FIN 6487 Financial Risk Management -Financial Engineering (FI) (3). A survey of financial instruments used for financial risk management, including forwards, futures, options and swaps. Emphasis is on identification of financial risks and designing optimal risk management program. Prerequisites: FIN 6425 or FIN 6515.

FIN 6489 Advanced Financial Risk Management (FI) (3). This course examines advanced issues in options and financial engineering, including quantitative aspects of options models credit risk instruments, and how to develop new securities. Prerequisites: FIN 6487 or equivalent.

FIN 6515 Securities Analysis (FI) (3). An analysis of securities and the organization and operation of their markets. The determination of the risk reward structure of equity and debt securities and their valuation. Special emphasis on common stocks. Other topics include options, mutual funds and technical analysis. Prerequisite: FIN 6406.

FIN 6517 Advanced Investments (FI) (3). This course examines advanced topics in equity and fixed income investments as well as portfolio theory. Emphasis is on theories and applications in the valuation and management of equity and fixed income instruments both locally and globally. Prerequisites: FIN 6516 and FIN 6537 or equivalent.

FIN 6525 Portfolio Management (FI) (3). Practical and theoretical problems associated with the techniques of optimal portfolio selection, construction, and revision. The portfolio objectives of individuals, corporations and funds. Measurement of portfolio performance and related empirical evidence. The role of computers in portfolio management. Prerequisite: FIN 6515.

FIN 6537 Financial Futures and Fixed Income Investments (FI) (3). An examination of the structure, uses, and strategies associated with financial futures markets. Valuation, hedging, speculative activity, and other futures related risk management issues are discussed. The varieties of fixed income securities and their default risk. The valuation of fixed income securities and their use in the investment and risk management. Prerequisites: FIN 6246 or FIN 6515.

FIN 6550 Behavioral Finance and Market Microstructure (FI) (3). Behavioral finance studies how human behavior affects investment and financial decisions by including biases and dependence. Market microstructure examines intraday price, volume and volatility behavior. Prerequisite: FIN 6406.

FIN 6596 Machine Learning Applications in Finance (3). The course covers applications of machine learning (ML) in Finance and provides students with skills for implementing financial models in Python. Prerequisite: FIN 6406, FIN 6456.

FIN 6625 International Bank Management (FI) (3). Management of the international banking function; setting goals and developing strategies, establishing an organizational structure and managing operations. International banking services. Foreign lending, risks, restraints, and portfolio considerations. International banking trends and implications for regulation. Prerequisite: FIN 6406.

FIN 6626 International Bank Lending Policies and Practices (FI) (3). Organization of the lending function and examination of the basic types of international lending: trade financing, loans or placements to foreign banks, loans to governments and official institutions, and loans to businesses. Syndicated bank loans. Documentation and legal considerations in foreign lending. Assessing and managing risk in the international loan portfolio. Prerequisite: FIN 6406.

FIN 6636 International Finance (FI) (3). A comparative study of the institutional characteristics and internal efficiency of developed and underdeveloped capital markets. The relationships between world and capital markets and prospects for integration. The role of multilateral institutions, multinational corporations, states, and the structure of trade in the international short and long term capital flows. The development of financial centers. Prerequisites: FIN 6406 or equivalent.

FIN 6638 International Capital Markets (FI) (3). An exhaustive study of the current institutional aspects of the financial and monetary systems of the developed and emerging markets. Topics will include detailed discussions of capital markets including stock exchanges and the international asset pricing models. Prerequisites: FIN 6406 or permission of the instructor.

FIN 6644 Global Financial Strategy (FI) (3). Aspects of strategic financial environment and management of firms that operate in a global arena; to include recent developments in financial strategy, international trade and economic decision making. Prerequisite: FIN 6406.

FIN 6645 Global Finance for Executives (FI) (3). Deals with the theoretical and empirical aspects of the financial management of firms that operate in an international business environment. Prerequisite: FIN 6406.

FIN 6656 Latin American Financial Markets and Institutions (FI) (3). An evaluative overview of the money and capital markets in Latin America. Topics include review of the most recent literature on regulation and deregulation, globalization, regional markets, privatization, banking innovations, the role of foreign banks, and currency boards in Latin America. Applicable cases will be discussed. Prerequisite: FIN 6406.

FIN 6776 Financial Software (FI) (3). Covers the application of financial software and institutional financial data systems. It includes application in excel, learning model, simulation, option analysis, trading models, and other FS analysis programs. Prerequisite: FIN 6246.

FIN 6779 Big Data and Analytics in Finance (3). The course introduces big data concepts and analytic techniques for finance. Students learn tools to extract information, analyze, translate, and present the findings for enhanced financial valuation. Prerequisite: FIN 6406, FIN 6456

FIN 6804 The Theory of Finance (FI) (3). The study of the development of the theory of finance and its implications for the financial decisions made by the manager of business firms. Topics include: utility theory; capital budgeting; portfolio theory; capital market equilibrium; multi-period valuation; and the cost of capital. Financial decision making is explored under both certainty and uncertainty and within the context of both perfect and imperfect markets. Prerequisites: FIN 6406 or equivalent.

FIN 6906 Independent Study in Finance (FI) (1-6). Individual conferences; supervised readings; reports on personal investigations. Consent of faculty tutor and Department Chairperson required.

FIN 6915 Master's Project in Finance (FI) (1-6). An individualized research project and report, which may include field experience with a firm or agency; library research; computer programming; or project development. The course should be taken during the last half of the student's graduate program. Consent of faculty tutor and Department Chairperson required.

FIN 6936 Special Topics in Finance (FI) (1-3). For groups of students who desire intensive study of a particular topic or a limited number of topics not otherwise offered in the curriculum. Consent of faculty supervisor and Department Chairperson required.

FIN 6943 Finance Internship (FI) (1-3). Student placement within a financial institution, business firm or other organization for the purpose of providing practical experience to supplement theoretical classroom instruction. Periodic reports and conferences required. Permission of the instructor and Department Chairperson.

FIN 7527 Seminar in Investments (FI) (3). Examines analysis and measurement problems of investments. Includes the application of statistical techniques, current theoretical issues and empirical literature. Prerequisite: Permission of the instructor.

FIN 7536 Seminar in Futures Markets (FI) (3). A comprehensive examination of the literature in futures markets. Emphasizes the structure and pricing of futures, and risk-management via hedging and arbitrage. Prerequisite: Permission of the instructor.

FIN 7606 International Corporate Finance (FI) (3). The study of topics of research interest to international financial decisions. Topics include foreign exchange risk, international financial markets, and foreign exchange market efficiency. Prerequisite: Permission of the instructor.

FIN 7807 Seminar in Corporate Finance (FI) (3). Familiarizes students with recent developments in finance theory. Includes such topics as the influence of leverage,

uncertainty and the cost of capital, agency theory and related topics. Prerequisite: Permission of the instructor.

FIN 7808 Financial Theory I (FI) (3). This course focuses on the theory of financial decision-making under certainty and risk. Includes investment under uncertainty, capital structure, dividend, asset valuation, and options pricing. Prerequisite: Permission of the instructor.

FIN 7809 Financial Theory II (FI) (3). This course focuses on the theory of financial decision-making under certainty and risk. Includes investment under uncertainty, capital structure, dividend, asset valuation, and options pricing. Prerequisite: Permission of the instructor.

FIN 7810 Financial Theory III (FI) (3). This sequel to Financial Theory I and II focuses in on microfinance. Discusses issues primarily in corporate finance such as effects of taxation, agency theory, and signaling theory. Prerequisite: Permission of the instructor.

FIN 7811 Seminar in Financial Markets and Institutions (FI) (3). Examines recent developments in economic and financial theories as applied to topics such as the structure of financial markets and the economics of information and financial institutions. Prerequisite: Permission of the instructor.

FIN 7812 Seminar in Options and Contingent Claims (FI) (3). An examination of the theories of option valuation and arbitrage pricing, and their applications to security analysis, portfolio management and financial instrument valuation. Prerequisite: Permission of the instructor.

FIN 7816 Seminar in Portfolio Theory (FI) (3). Examines investment and portfolio theory, with emphasis on the historical development of the literature in this area and the recent analytical and empirical work. Prerequisite: Permission of the instructor.

FIN 7818 Foundations of Financial Models (FI) (3). Introduction to mathematical and economic models underlying the development of modern finance theory. Includes discrete and continuous time models in finance using stochastic calculus. Prerequisite: Permission of the instructor.

FIN 7845 Statistical Methods in Finance I (FI) (3). Estimation, and testing of various economic and financial models. Emphasis on econometric techniques to deal with various problems of single-equation models and introduction to simultaneous equation. Prerequisite: Instructor's permission.

FIN 7846 Statistical Methods in Finance II (FI) (3). Emphasis on econometric techniques and multivariate statistics as applied in finance. Includes simultaneous equation models, multiple discriminant analysis and factor analysis. Prerequisite: Instructor's permission.

FIN 7855 Financial Economics I (FI) (3). An advance doctoral course covering selected advanced topics in microeconomic foundations and other topics related to business. Emphasis will be on economics of uncertainty, agency problems, information and signaling. Prerequisites: ECO 7115 or permission of the instructor.

FIN 7856 Financial Economics II (FI) (3). An advanced doctoral course covering selected advanced topics in the theory of macrofinance. Emphasis will be on financial

intermediation. Prerequisites: ECO 7206 or permission of the instructor.

FIN 7906 Finance Doctoral Independent Study (FI) (1-6). Supervised research projects determined by professor and student. May involve conferences, supervised reading, and reports. Prerequisites: Consent of sponsoring professor and Chairperson required. (on demand)

FIN 7916 Finance Doctoral Research Project (FI) (1-6). Intensive research project conducted during the summer following the student's first and second years of coursework. Each student develops his/her own research project under the supervision of a faculty member. Prerequisite: Graduate standing. (on demand)

FIN 7936 Finance Doctoral Seminar (FI) (3). College colloquium series featuring presenters from various academic disciplines and businesses. Prerequisite: (on demand).

FIN 7980 Ph.D. Dissertation (FI) (1-12). Original research that is supervised by a faculty committee and defended openly before the university committee. Prerequisites: Permission of Major Professor and Doctoral Candidacy.

FIN 7981 Finance Dissertation Preparation (FI) (3). Preparatory background research and study to begin development of dissertation proposal. Students should be able to complete proposal by the end of the course. Prerequisites: Completion of TIER 1 courses. (on demand)

GEB 5895 Strategic Business Planning (BA) (3). This course focuses on clarifying ideas and processes for developing viable strategic plans. Students will develop a venture concept for an existing corporation and write a plan for implementation, including corp culture, task environment, external environment.

GEB 6368 Navigating in a Globalizing World (IB) (8). Concepts and issues from macroeconomics, accounting, international law, political science, finance, and international business give broad but insightful perspectives about complex and ambiguous world.

GEB 6507 Finance for HR Professionals (GM) (1). Provides a broad overview of the key financial terms, tools, and reports used in organizations. For an HR audience, it focuses on the financial knowledge that is most critical for HR professionals.

GEB 6528 Organizational Processes that Deliver Economic and Social Value (BA) (8). This course examines the internal workings of an organization to identify, analyze, correct, and create structures that enable performance.

GEB 6529 Creating Economic and Social Value (BA) (8). This interdisciplinary business course focuses on concepts, techniques, and experiences that result in a better understanding of complex and ambiguous work of delivering customer utility.

GEB 6896 Strategy Development and Implementation (IB) (8). This strategy course integrates strategic planning models and focuses on the implementation of business strategies in various stages of the firm's life-cycle through case study and project work.

GEB 6941C Graduate Business Internship (GM) (3-6). This program allows graduate students to work in jobs significantly related to their major area of study and career

goals. This is supervised work with carefully designed and monitored work assignments. Specific placement must be approved by the faculty advisor prior to enrollment. Work performed on the current job cannot be used for internship credit. Prerequisite: Graduate Students.

GEB 7365 International Business Theory and Practice (IB) (3). This course provides the theoretical foundation needed to understand internationalization of firms from developed and developing countries.

GEB 7366 Financial Issues in the Global Environment (IB) (3). This course provides students a rigorous background in finance and helps them understand international macroeconomic factors and their effects on businesses.

GEB 7876 Marketing and Behavioral Theory (BA) (3). This course investigates the development and evolution of marketing-theory development.

GEB 7892 Theory Development (BA) (3). This course covers the methods and approaches to creating theory, validation and testing, and dissemination of knowledge.

GEB 7910 Advanced Quantitative Research Methods in Business (BA) (3). This course explores advanced methods in quantitative research such as surveys and sample techniques, parametric and nonparametric tests, structured equation modeling, and time series analysis.

GEB 7911 Qualitative Research Methods in Business (BA) (3). This course introduces a structured approach to qualitative research in business. It includes study of methods such as case studies, ethnography, archival studies, and action research.

GEB 7912 Experiments and Survey Design (BA) (3). This course introduces students to methods and practices for developing and using data based on experiments and surveys for research.

GEB 7915 Advanced Qualitative Research Methods in Business (BA) (3). This course compares a variety of qualitative research techniques. Students will review contemporary and classic studies that employ qualitative methods in both theoretical and applied contexts.

GEB 7918 Philosophy and Process of Applied Business Research (BA) (3). This course introduces the fundamental philosophy and development process of managerial business research.

GEB 7927 COB Doctoral Colloquia (BA) (1). This is a required course for all COB doctoral students. Topic range from research-specific issues to career planning and entrance to the Academy. Prerequisite: Admission to COB doctoral program

GEB 7981 DBA Dissertation Preparation (1-12). Preparatory background research and study to begin development of dissertation proposal. Students should be able to complete proposal by end of the course. Prerequisite: Approval of FIU Business Director of Doctoral Programs

GEB 7982 DBA Dissertation (1-12). Original research that is supervised by a faculty committee and defended openly before the university committee. Prerequisites: Permission of Major Professor and Doctoral Candidacy. Completion of all prescribed DBA curriculum and approval of FIU Business Director of Doctoral Programs

HIM 5065 Introduction to Health and Health Informatics (IS) (3). Concepts of health, delivery of health services, role and impact of health informatics. Focus on legislative mandates for health IT, health, health IT standards, and health-related data structures.

HIM 6019 Legal and Ethical Aspects of Healthcare (IS) (3). This course focuses on a board range of legal and ethical issues as they apply to areas of management and use of computer-based technology and info systems in the delivery of healthcare services.

HIM 6124 Technical and Data Architectures and Standards for Health Care (IS) (3). The course integrates key issues and techniques surrounding technical infrastructure and data architecture in health informatics, and the role of information standards and ontologies in health care.

HIM 6125 Healthcare Informatics and Analytics Capstone (IS) (3). The course provides integrative experience for students to apply system and critical thinking skills in mapping, analyzing and redesigning strategy, process and technology in real-world HIA contexts. Prerequisite: All courses in the MC in Healthcare Informatics and Analytics Program.

HIM 6267 Foundations of Health Informatics & Analytics Administration (1). As related to health informatics, provide understanding of the landscape of healthcare. Addresses managerial and administrative aspects and basic skills for producing health informatics work products.

HIM 6517 Healthcare Project Management (IS) (3). Course covers defining characteristics of healthcare information systems projects. Introduces relevant project management techniques to facilitate scope, time, cost, and resource functions.

HIM 6527 Healthcare Information Security and Privacy (3). This course covers the regulatory, technical and organizational aspects of privacy and security in health care settings.

HIM 6627 Health Care Information Management (IS) (3). This course studies IT concepts and techniques that facilitate fact-based decision making through information and management systems in health care organization and introduce students to the use of healthcare informatics in managing quality, safety and outcomes of healthcare.

HIM 6628 Health Data Visualization (IS) (3). Course covers technical and theoretical skills necessary to practice data visualization techniques on healthcare data. Prerequisite: QMB 6357

HIM 6682 Quality and Outcome Analytics (IS) (3). Use of analytical techniques to assess healthcare quality and outcome perspectives, taking into account patients, providers, payors, standard setting organizations, and healthcare policy makers. Prerequisite: QMB 6357

HIM 6685 Clinical Information Systems (IS) (3). Course provides an in-depth study of the clinical information systems concepts and components, including electronic health records and other health information technology (HIT) systems.

HIM 6694 Consumer Health Informatics (CHI) (IS) (3). Analyses of consumers' needs for information; review

methods of making information accessible to consumers; as well as model and integrate consumers' preferences into medical information systems.

HIM 6858 Health Informatics/Analytics Practicum (IS) (0-3). Program enabling masters-level students to work in jobs significantly related to health informatics and/or analytics their major area and career goals.

HIM 6865 Healthcare Database Systems (IS) (3). Course covers database structure, conceptual models, SQL database query language, and implementation processes in support of health information technology (HIT) systems.

HIM 6937 Special Topics (IS) (3). This course focuses on health informatics specialty areas, such as genomics and bioinformatics.

HIM 7118 Seminar on Health Informatics and Healthcare IT Research (IS) (3). This doctoral seminar will concentrate on the field concerned with the acquisition, storage, and use of information in health and biomedicine.

ISM 6021 Management of Information Systems (IS) (3). Review of foundations and methodologies for analysis of existing and proposed systems, to include, feasibility assessment, design, development, and implementation.

ISM 6024 Managing Distributed Architectures (IS) (3). Students will consider the organizational and technical challenges involved in implementing distributed business processes across multiple organizational units.

ISM 6045 Current Economic and Social Implications of Information Systems (IS) (3). Effects and implications of socioeconomic factors in the operation of information systems and interdependence with the legal and international business environment. Privacy and fraud; computer system purchase and lease contracts; economics of system design, selection and operation; electronic fund transfers and mail; international considerations. Prerequisites: MAN 6830 and MAN 3025.

ISM 6057 Web Management (IS) (3). This course provides students with techniques to manage and develop web projects including development environments, linkage between client and database. The course is designed to assist students in understanding how to manage and use web related techniques in an organization.

ISM 6106 Systems Analysis (IS) (3). Study of the systems approach to problem solving as it applies to any area of specialization, including; boundaries and constraints identification, resources requirements, and component analysis.

ISM 6128 Business Process Design (IS) (3). The course covers fundamentals concepts, principles, and techniques that can be used to improve business performance through the analysis, modeling and design of the as-is and the to-be business processes.

ISM 6136 Business Analytics Applications (IS) (3). This course covers business analytics skills required to conduct both pattern discovery (e.g., segmentation and association) and predictive modeling (e.g., decision trees and neural network mining). Prerequisites: QMB 6357

ISM 6138 Managing Unstructured Data (IS) (3). Introduction to fundamental concepts and practical

applications of text mining and analytics; including converting unstructured text to structured data, as well as extracting useful information.

ISM 6155 Information Systems Development (IS) (3). Concepts and methods used in the analysis and design of MIS. Feasibility study, system flow charting, data requirements analysis, data design, user friendly systems design. Systems design project. Prerequisites: MAN 6830 or equivalent.

ISM 6156 Enterprise Information Systems (IS) (3). Introduces concepts of enterprise-wide computing, information architecture, process design, data models, and client/server computing.

ISM 6157 Enterprise System Configuration (IS) (3).

ISM 6158 Enterprise-Wide System Administration (IS) (3). This course will expose students to key aspects involved in the implementation and operation of the R/3 system and will provide the technical and conceptual foundation necessary for developing appropriate strategies and approaches for implementation and maintenance of an enterprise-wide system.

ISM 6159 Global Enterprise Management and Strategy (IS) (3). Global Enterprise Systems consist of 3 major components: Enterprise Resource Planning, Supply Chain Management, and Customer Relationship Management. This course examines each of these systems and explores how they support and overall business strategy.

ISM 6205 Database Management (IS) (3). Review techniques for structuring and managing data in organizations. Discusses data concepts, data modeling, database requirements definition, conceptual, logical, and physical design, and admin.

ISM 6208 Data Warehousing (IS) (3). Data Warehousing and Online Analytical Processing tools will be utilized to organize and analyze large volumes of data in order to explain the past, monitor the present, and anticipate the future.

ISM 6217 Data Management (IS) (3). Use of data management programming to convert, manipulate, and transform business data, as well as integrate disparate data sets from different business organizations. Prerequisite: ISM 6205.

ISM 6222 Telecommunications Network (IS) (3). This course will focus on providing the student with fundamental understanding of the various concepts involved in modern data communication and networking installations, along with its implications in the design of information systems.

ISM 6225 Global Applications of Information Technology (IS) (3). Examines information technology use in the international arena, e.g. for communication within a multinational corporation, or communication with customers, suppliers in another country. Topics include: transborder data flow; global connectivity through telecommunications; IT transfer across national boundaries, management of IT in multinational corporations; case studies or global IT use. Prerequisites: MAN 6830 or equivalent.

ISM 6251 Emerging Information Technologies (IS) (3). This course covers emerging information and

communication technologies that are changing the way the business is being operated in global economy.

ISM 6305 Information Systems Planning (IS) (3). Overview of the technology acquisition process to define business needs, discover requirements, evaluate technology solutions, select vendors, and manage technology solution implementation.

ISM 6307 Management of the Information Systems Function (IS) (3). Develop new CIO competencies: how enterprise competes or provides services, manage the IS organization like a business, and skills to gain support for incentives and maintain momentum in innovation.

ISM 6316 Project Management (IS) (3). Examination of defining characteristics of projects and introduces a variety of relevant techniques. Includes project manager functions like managing scope, time, quality, and cost.

ISM 6325 Ethical Hacking for Business (IS) (3). This course focuses on conducting ethical hacking to proactively secure organizational information assets from cyberattacks and to address the identified security vulnerabilities.

ISM 6326 Information Security and Compliance (IS) (3). Provides knowledge and skills needed to protect enterprise assets by mitigating IS/IT related security risks. An exposure to IS/IT security-related Laws, Regulations, and Compliance is also provided. Corequisite: ISM 6222.

ISM 6327 Protecting and Defending Business Digital Assets (IS) (3). This course covers the technical controls needed to enforce security policy and manage cybersecurity risks to secure information systems and digital assets for business.

ISM 6328 Information Security Management (IS) (3). Provides knowledge and skills needed to protect enterprise assets by mitigating IS/IT related security risks. Includes application of telecommunication technology and concepts.

ISM 6338 Information Systems Strategy and Governance (IS) (3). From the perspective of the CIO, students will develop and understanding of the strategic use of IS and how to define and implement IS governance to support business/IS alignment and value creation.

ISM 6404 Business Data Visualization and Reporting (IS) (3). Introduction to reporting and data visualization principles and techniques to support business decision-making and information reporting needs utilizing operational, accounting and financial data. Prerequisite: QMB 6357

ISM 6423 Knowledge Management (IS) (3). This course explores the basic concepts of managing organizational intellectual capital, including appropriate information technologies ranging from Intranets to Artificial Intelligence.

ISM 6489 E-Business and Blockchain Applications (IS) (3). Students will gain the knowledge needed to manage and develop web and mobile applications for electronic business and blockchain application.

ISM 6507 Electronic Commerce Strategy (IS) (3). This course will teach students strategies for the electronic commerce landscape to help them develop and execute a

business plan for creating an e-business startup. Prerequisites: Technology of EC; ISM 6316.

ISM 6575 Security Risk Management and Organizational Cyber Resilience (IS) (3). This course covers the principles of risk management for cybersecurity, and examines tools and mechanisms for assessing, controlling and transferring cybersecurity risks to ensure business continuity.

ISM 6930 Special Topics in Management Information Systems (IS) (1-6). To study the recent developments in the MIS field not otherwise offered in the curriculum, such as office automation, computer graphics, etc. Prerequisites: Advanced standing and department chairman approval.

ISM 6942 MIS Internship (IS) (1-3). Student placement within a business firm or other organization for the purpose of providing practical experience to supplement theoretical classroom instruction.

ISM 7083 Deterministic Decision Models (IS) (3). This course deals with the optimal decision making and modeling of deterministic systems that originate from real life. These applications, which occur in government, business, engineering, economics, and the natural and social sciences, are largely characterized by the need to allocate limited resources.

ISM 7087 Probabilistic Decision Models (IS) (3). This course deals with the optimal decision making and modeling of probabilistic systems that originate from real life. These applications, which occur in government, business, engineering, economics, and the natural and social sciences, are largely characterized by the need to allocate limited resources.

ISM 7126 Design Science Research (IS) (3). Doctoral seminar surveying of the technical side of the Information Systems (IS) research field, typically referred to as Design Science Research (DSR).

ISM 7152 Seminar on System Acquisition and Implementation (IS) (3). Theory and research on methodologies, tools, and techniques for acquiring, developing, and implementing information systems in organizations.

ISM 7306 Individual and Group Applications of IS Research (IS) (3). Doctoral seminar reviews key issues and challenges associated with the implementation and introduction of information systems at the individual and group levels within an organizational environment.

ISM 7345 Organizational and Strategic Applications of IS Research (IS) (3). Doctoral seminar surveys theory and research specific to organizational and strategic impacts of information systems.

ISM 7406 Business Analytics Research (IS) (3). Theory and research on business analytics. Integrating models and data with a technological delivery systems that support data quality, data integration, unstructured problem-solving, and so on.

ISM 7906 Independent Study for Doctoral Students (IS) (1-12). Supervised research projects determined by professor and student. May involve conferences, supervised reading, and reports. Prerequisites: Consent of sponsoring professor and chairperson. (on demand)

ISM 7931 Organizational Theories in IS Research (IS) (3). Doctoral seminar reviews long standing and newly emerging organizational theoretical perspectives applied within the information systems (IS) field.

ISM 7932 Seminar on Research in Managing Distributed Operations (IS) (3). This seminar examines research issues arising as a consequence of global distribution of operations, as enabled by ICT and globalization of business.

ISM 7933 Seminar on Research in Measurement and Valuation in Knowledge Economy (IS) (3). Examination of research on measurement and valuation of digital, knowledge, and relationship assets in knowledge economy.

ISM 7934 Business as Dynamic Systems (IS) (3). This seminar course provides a systems theoretic framework for understanding and analyzing organizations. Hard and Soft Systems, Systems Dynamics, Complexity Theories are examined.

ISM 7935 Research in Information Systems (IS) (3). The research process in information systems: defining research questions, reviewing the literature, strategies for empirical investigation, methodological alternatives, and presenting research findings. Prerequisite: Permission of the instructor.

ISM 7936 Systems and Software Engineering Research (IS) (3). Doctoral seminar examining research and theory on the acquisition, development, implementation of information systems.

ISM 7937 Seminar on Research in Emerging ICT and their Implications (IS) (3). This seminar will examine research on emerging information technologies, their application, and their implications for organizations and strategy.

ISM 7938 Seminar on Research in Collaborative and Competitive Strategies in Global Economy (IS) (3). This seminar course examines research in emerging strategic transition from competitive to cooperative strategies in the context of internationalization and globalization.

ISM 7980 Ph.D. Dissertation (IS) (1-12). Original research that is supervised by a faculty committee and defended openly before the university committee. Prerequisites: Permission of Major Professor and Doctoral Candidacy.

ISM 7981 Dissertation Preparation (IS) (1-12). Preparatory background research and study to begin development of dissertation proposal. Students should be able to complete proposal by end of the course. Prerequisite: Completion of TIER 1 courses. (on demand)

MAN 5782 Managing in the 21st Century (BA) (3). This course is designed to identify important problems for managers in 21st Century. Includes responding to global issues, such as shift manufacturing trends; workplace ethics and diversity; cultural attitudes; the impact of new technologies.

MAN 5930 Seminar in Personnel Management (GM) (3). Overview and examination of the various aspects of the personnel management function.

MAN 6057 Managing Innovation (IB) (3). This course explores the process of managing innovation. In today's global marketplace, competition from all over the world forces firms to continuously upgrade their product offerings and ways of doing business. This course discusses how to be more creative, how to manage creatively, and how to implement innovation.

MAN 6066 Business Ethics (BA) (3). Practical approaches for addressing ethical conflicts in organizational administration. Emphasis will be placed on developing participants' ability to accurately diagnose organizational ethics problems and determine constructive solutions.

MAN 6086 Product and Service Development (BA) (3). The course presents the systematic process of product and service development in conjunction with the evolution of team projects, culminating (with a business plan class) in a venture capital and funding forum for new high-tech start-ups. Adopts a business and management emphasis to create world class products/internet services.

MAN 6095 Management of Healthcare Organizations in the 21st Century (GM) (3). This course explores the use of evidence-based management for effective planning and decision-making by today's healthcare managers.

MAN 6097 Managerial Decision-Making in Health Economics (BA) (3). Managerial health economics focuses on supply and demand of health resources and the constraints that limit them. Governmental roles in public health also are analyzed. Prerequisite: Admission into HCMBBA.

MAN 6098 Management of Healthcare Finance and Reimbursement (BA) (3). In this course, the history of financing models for health delivery systems are analyzed and evaluated. Reimbursement includes insurance, governmental assistance and the affordable care act. Prerequisite: Admission into HCMBBA.

MAN 6121 Interpersonal Behavior and Analysis (GM) (3). A human interaction/human relations training laboratory, designed to increase both self-awareness and understanding of behavior dynamics in groups. Course is intended to enable students to broaden their conceptual understanding of human interpersonal communications and conflict.

MAN 6145 Intuition in Management (BA) (3). Interdisciplinary study of intuition and its applications in management. Apply learnings in a term project. Prepare Intuitive Experience Logs to discover intuition firsthand. Prerequisite: Computer Competency.

MAN 6157 Wellness Management (GM) (3). This course focuses on the management of employee well-being, broadly defined and including safety, security, mental, attitudinal, and health-related outcomes.

MAN 6167 Leadership in a Global Environment (GM) (3). The course is designed to provide the student with a clear understanding of current thinking in the area of leadership. It focuses on the holistic nature of leadership and the impact leaders have on individuals, groups, and organizations.

MAN 6204 Organization and Management Theory (BA) (3). Analysis and design of the structure and process of complex organizations. Effects of task uncertainty, growth,

power, goals, and information technology on organization structure and control.

MAN 6209 Organization Design and Behavior (GM) (3). Covers how managers interact with organizations to accomplish complex tasks by examining how strategy, structure and systems interact with behavioral variables.

MAN 6245 Organizational Behavior (GM) (3). Individual, interpersonal, and small group behavior in complex organizations. Focus on behavior, its causes, and management interventions to improve organizational effectiveness. Research methods to study organizational behavior.

MAN 6265 Group Processes in Organizations (GM) (3). The social and psychological processes of organizational functioning. The roles played by small groups in organizational settings.

MAN 6295 Conflict in Organizations (GM) (3). A critical examination of the role and impact of interpersonal and intergroup conflict in organizations. Models as approaches to utilizing and resolving conflict toward constructive personal and organization ends will be emphasized.

MAN 6297 Labor Issues and Conflict Management (GM) (3). Covers skills to enhance resolution in union disputes. Teaches students methods to productively manage labor disputes between parties including legal issues in labor law and employee relations.

MAN 6311 Advanced Personnel Management (GM) (3). Attention is focused on the theory and practice of modern personnel management, as related to other management functions. Topics include selection; training; job and performance evaluation; and incentive schemes. Special attention is given to human resources management and development at various organizational levels.

MAN 6316 Human Resource Analytics (GM) (3). This course focuses on the linkage between human resources and the organization's financial plan. This includes budgeting, controlling, and measuring HRM impact.

MAN 6317 Critical Thinking in Human Resource Management (GM) (3). This course focuses on developing critical thinking skills to solve complex and multidimensional human resource management problems. The course will emphasize the analysis and discussion of cases.

MAN 6321 Personnel Selection and Placement (GM) (3). Individual differences and their measurement in personnel selection and job placement. Job design and redesign.

MAN 6327 High Involvement Human Resource Management (GM) (3). This course focuses on human resource practices that motivate and empower employees to excel on their job by fostering their participation and involvement in organizational decision-making.

MAN 6328C Applied Methods in Human Resource Management (GM) (3). This course focuses on the application of research design and measurement theory to solve human resource problems. The emphasis is on applied methodology rather than on statistical issues.

MAN 6331 Compensation Administration (GM) (3). An in-depth analysis of wages and salary administration,

including such topics as job evaluation; wage incentive systems; and work sampling.

MAN 6336 Reward Systems Management (GM) (3). This course covers all aspects of compensation and reward systems such as the strategic alignment of compensation and other HR systems, job evaluation, merit – and skill-based pay, cost-effective benefit programs, and flexible pay.

MAN 6347 Performance and Talent Management (GM) (3). This course focuses on the development and implementation of effective performance management systems. Career development and electronic performance monitoring will be covered.

MAN 6351 Personnel Training and Development (GM) (3). Determining training needs. Training methods. The training staff. Supervisor development. Equal Employment Opportunity management.

MAN 6356 Professional Development Seminar I (BA) (1). Course includes orientation to graduate education, focusing on international business, career development, team building and how to analyze business cases.

MAN 6357 Professional Development Seminar II (BA) (1). Course includes continued orientation to graduate education, focusing on analysis of current events impacting various business areas relating course content in IB, finance, IT and management.

MAN 6358 Professional Development Seminar III (BA) (1). Course includes continued orientation to graduate education, focusing on entrepreneurial activity in business.

MAN 6359 Human Resource Knowledge Management (GM) (3). This course focuses on the development of the organization's human capital. The identification of learning needs, current and future performance problems, and leadership development will be discussed.

MAN 6365 Staffing Organizations (GM) (3). This course focuses on the identification, recruitment, selection and promotion of successful employees.

MAN 6367 Career and Succession Planning (GM) (3). This course is based on an integrated "system thinking" model used to create and manage employee succession planning and leadership development processes. It also focuses on management of employee well-being including safety, security, mental and attitudinal and health-related outcomes.

MAN 6368 Human Resource Deployment (GM) (3). This course focuses on the staffing, organization, training, and management of rapid response operations.

MAN 6385 Human Resource Strategy and Planning (GM) (3). This course discusses the notion of strategic planning in the context of human resource management. Alignment of culture and strategy. HR inventories and forecasting.

MAN 6403 Employment Law and Human Resource Management (GM) (3). This course focuses on the legal and regulatory factors surrounding human resources management. The emphasis will be on creating awareness of legal constraints when making HR business decisions.

MAN 6405 Labor Relations (GM) (3). Examines the collective bargaining system in the United States from the viewpoint of the practitioner. Various aspects of the environment, structure, processes, issues and impact of collective bargaining are considered. Special attention is given to the negotiation and administration of agreements.

MAN 6411 Collective Bargaining Topics (GM) (3). An advanced course in labor relations for students with some background who desire more depth than that provided in introductory courses. Topics of contemporary interest, such as public sector collective negotiations, are treated at length.

MAN 6416 Corporate Negotiations (IB) (3). An examination and analysis of corporate negotiation strategies in such areas as collective bargaining, mergers, joint ventures, and with government regulation agencies. The legal environment affecting the negotiated process will be closely scrutinized, as well as internal and external political processes. Prerequisites: ACG 6026, MAN 6245, FIN 6406, MAR 6805.

MAN 6446 Negotiations (GM) (3). Negotiations are the processes of creating agreements between two or more parties. This course will introduce students to the art of negotiations in business transactions. The class will include a wide variety of negotiation cases.

MAN 6501 Operations Management (IS) (3). This course covers analysis, design, and operations of organizational systems. The systems approach is used to provide a framework or general model of analysis, to which specific concepts, quantitative techniques, and tools can be related. The material presented has application to any organization of people and machines, including hospitals, governmental agencies, service organizations, and industrial concerns. Prerequisites: QMB 6357 or Pass QMB waiver exam.

MAN 6525 Managing for Total Quality (BA) (3). Addresses underlying management assumptions, methods, tools, culture and philosophy of total quality management - TQM.

MAN 6601 Global Management Skills (IB) (3). This course examines the role culture plays in organizations and in conducting business across borders. Various cross cultural frameworks will be compared.

MAN 6603 Problems in Comparative Management (BA) (3). Discussion of literature, readings, and cases, aimed at underscoring the differences and similarities in management behavior in different countries and cultures. General instruction in obtaining and utilizing comparative data on management differences.

MAN 6606 Fundamentals of International Business (IB) (3). This course examines the basic concept and theories of international business, particularly those that make doing business across borders a unique business activity.

MAN 6608 International Business (IB) (3). This course examines the environmental variables affecting international operations, trade and investment theories, international institutions, and regional economic groups. It also focuses on international finance, international accounting, international marketing, and international management problems and issues.

MAN 6615 International Labor-Management Relations (BA) (3). Comparative analysis of selected industrial relations systems and impact on multinational firms and international labor movements. Emphasis on empirical models and management-oriented case studies.

MAN 6616 Managing Security Risks in Emerging Markets (IB) (3). This course will consider the nature of the contemporary risks facing multinational firms in emerging markets and what strategies that they can implement to minimize vulnerabilities and manage risks.

MAN 6617 Managing Global Production and Technology (IS) (3). An exploration of the management of technology and its relationship to the dynamics of globalization of production in both manufacturing and service industries. Prerequisite: MAN 6608.

MAN 6626 International Human Resource Management (GM) (3). Decisions about how to recruit, train, compensate, and manage global employees; cross-cultural differences in values; managing the international assignee.

MAN 6635 Global Strategy and Business Models (IB) (3). This course introduces students to concepts, and tools that will enable them to appreciate, and learn to address the challenges associated with managing a multinational corporation.

MAN 6636 Global Megatrends, Geopolitics, & Political Economy (BA) (3). This course provides the foundation to understand major trends in the global economy and the role of global, regional, and national contemporary political and economic order in international business.

MAN 6657 Contextual Intelligence in International Business (IB) (3). This course will help students develop contextual intelligence specifically for international business issues and obtain tools required to become an effective manager in the global business landscape.

MAN 6675 Special Topics in International Business (IB) (3). For groups of students who wish to study intensively a particular topic, or a limited number of topics, in international business, not offered elsewhere in the curriculum. Prerequisites: Approval of the faculty advisor, Department Chairperson, and Dean.

MAN 6676 Global e-Business Environment (BA) (3). Systematic review of the economic, financial, socio-political and infrastructure environments in which global e-business activity takes place. Introduces methods to evaluate the opportunities and constraints for e-business in a country. Prerequisite: Intro to e-business.

MAN 6677 Emerging Markets (IB) (3). The course focuses on what managers of international firms large and small need to know to succeed in emerging markets, including the factors and forces that shape the competitive environment.

MAN 6678 Global Start-ups (IB) (3). This course will analyze strategies for starting and growing a new global venture. The emphasis is on rapid expansion and matching new business models to various factors.

MAN 6679 Master's Project in International Business (IB) (3). An interdisciplinary research project on an international business problem, which may include field work (including internship), library research, computer

modeling, or the use of an approved research methodology. Prerequisites: Assignment of faculty advisor and permission of Department Chairperson.

MAN 6686 Master's Seminar in International Business (IB) (1-3). An examination of recent research findings in International Business. Emphasis is placed on readings; active discussion; and small, short-term action and research projects. Prerequisites: Consent of faculty sponsor, department Chairperson, and Dean.

MAN 6695 Independent Study in Business (GM) (3). Individual conferences; supervised readings; reports on personal investigations. Prerequisites: Assignment of faculty tutor and written permission of Department Chairperson, and Dean.

MAN 6703 Colloquium in Managing Organizational Ethics (GM) (1). Management issues, responsibilities, and techniques associated with public and private expectations for ethical performance of large-scale organizations.

MAN 6706 Crisis Management (GM) (3). Response to crises such as product recalls, product tampering, industrial accidents, and violence in the workplace.

MAN 6715 Business Environment and Public Policy (BA) (3). An examination of the economic, political, social and moral context in which management decisions are made. The focus is on the public policy environment of business, whereby community direction is transformed into corporate behavior.

MAN 6726 Strategic Management (IB) (3). The use of cases, guest lectures, and gaming to integrate the analysis and measurement tools, the functional areas and public policy issues. The objective is to develop skill in broad areas of rational decision-making in an administrative context of uncertainty. Should be taken in the last semester of master's program.

MAN 6746 Global Environmental Management (IB) (3). An exploration of the national, regional, and global forces emerging and influencing the management of the business firm's impact on the physical environment. A review existing and developing environmental management theories and control systems for business.

MAN 6758 Project Consulting (BA) (3). Introduction to the basic principles, methodologies and tools of modern business consulting and project management as practiced by the large management consulting firms. Prerequisite: MAN 6830.

MAN 6805 Entrepreneurship (IB) (3). A discussion of the general theories, principles, concepts and practices of entrepreneurship. Heavy emphasis is placed on lecture, readings, case studies and group projects.

MAN 6830 Organization Information Systems (IS) (3). Introduction to information systems and their role in organizations from a user's viewpoint. Survey and application of the basic concepts necessary for understanding information systems. Study of the main activities in the development cycle used to acquire information systems capability.

MAN 6830L Organization Information Systems Laboratory (IS) (1). Laboratory applications for MAN 6830.

MAN 6865 Family Owned Businesses (BA) (3). This course addresses the special issues facing family-owned and managed firms and gives an appreciation for the special dynamics in such firms and how to be professional managers in such organizations.

MAN 6891 Leadership Development Seminar I (BA) (1). This leadership seminar focuses on increasing the self-awareness of the student as leader. Students will complete a 360 assessment and develop a personal leadership action plan.

MAN 6892 Leadership Development Seminar II (BA) (1). This leadership seminar focuses on helping a leader make better decisions and build high-performing teams.

MAN 6893 Leadership Development Seminar III (BA) (1). Leadership Development Seminar III focuses on the developing interpersonal competencies and examining how to give timely, specific feedback, and helpful coaching.

MAN 6898 Leadership Development Seminar IV (BA) (1). This leadership seminar focuses on developing leaders by helping them to think strategically, create and convey a vision and direction, learn how to deal with ambiguity and in times of crisis.

MAN 6907 Community Service Learning (GM) (3). The integration of classroom theory with experimental learning in community service participation, development, and management of community service projects, especially those associated with the business community.

MAN 6908 Independent Study in Business Environment (IB) (3). Independent project in the political, economic, social, cultural, ethical, or governmental relations environment of business. Directed study with a business environment faculty member. Prerequisites: MAN 6715, MAN 6606 and permission of the instructor.

MAN 6910 Research Methods in Management (BA) (3). Covers the research methods and analytical techniques most widely used in research in human resources and general management. Emphasis is on helping students to become more aware of current techniques and their applications.

MAN 6930 Master's Seminar in Management (GM) (1-3). Examination of recent research in selected areas. Emphasis on readings, case studies and active discussion on topics that may include IB, entrepreneurship, leadership, and management. Prerequisites: Consent of faculty sponsor, Department Chairperson, and Dean.

MAN 6937 Special Topics in Business Environment (BA) (3). A review of a contemporary dimension of business' environment in a field of faculty specialization. Prerequisites: MAN 6523, MAN 6606 or equivalent.

MAN 6943 Graduate International Business Internship (3-6). Course work involving the placement of graduate students in an International Business-focused organization to conduct practical, supervised assignments to supplement theoretical classroom knowledge. Prerequisite: Graduate student, Department Chair approval

MAN 6946 Human Resource Management Internship (GM) (1-3). Provides students with practical experience to supplement theoretical of knowledge acquired in the

classroom in the Human Resource field. Permission from the Faculty Director is required.

MAN 6974 Master's Project in Management (BA) (1-6). Each student is required to develop and conduct an individual research project or thesis on a topic of interest. The topic will be chosen in consultation with a faculty member in the College.

MAN 7146 Leadership I (GM) (3). Course identifies leadership theories and research bearing on modern management practice. Behavioral, situational and transformational theories of leadership are emphasized, compared and evaluated.

MAN 7147 Leadership II (GM) (3). Draws on research and case studies for understanding of adaptive leadership in turbulent, uncertain environments. Emphasis on effective management of innovation, entrepreneurial activity and new ventures.

MAN 7148 Intuition in Management (BA) (3). In-depth study of the nature and development of the intuitive process emphasizing its role in management decision making and its relationship to rational problem solving. Prerequisite: Permission of the instructor. Corequisite: MAN 7148L.

MAN 7155 Fundamentals of Behavioral Research (GM) (3). Analytical tools to conduct systematic research. Methods of data collection in lab, survey and field research. Emphasis on principles of measurement and statistics to interpret/report behavioral data.

MAN 7206 Organizational Analysis (GM) (3). Develops skills in organizational problem-solving through applications of theory and research to actual problems. Emphasis on needs analysis, process consultation, teambuilding and action research.

MAN 7207 Theories of Organization (GM) (3). Organization functioning from a macro perspective; emphasis on evolution, structure, design and processes of complex systems. Study of communication/information networks, inter-group processes and control strategies.

MAN 7235 Management Philosophy and Strategy (BA) (3). Compares various cross-cultural management philosophies to structure and function of different types of organizations. Emphasis on how to develop and implement a management strategy for maximum productivity in different organizations.

MAN 7275 Organizational Behavior Management (GM) (3). An introduction to the study of human behavior in organizations. Emphasis is given to management of individual and group processes including conflict attitudes, decision making, motivation and stress.

MAN 7305 Human Resource Management (GM) (3). Personnel management topics including personnel selection, performance appraisal, training design, employee development, and compensation administration. Legal and practical issues are emphasized.

MAN 7412 Labor-Management Topics (GM) (3). Presents various aspects of the labor-management relationship to provide a contemporary perspective. Emphasis on structure, processes, strategies and legal issues in collective negotiation and industrial relations.

MAN 7609 Comparative Management (IB) (3). Course focus is cross-cultural management, i.e., how cultural values influence managerial behavior. The problems of cross-cultural communications, leadership, motivation, and decision making are examined. Prerequisites: Admission to Doctoral program and completion of Doctoral core.

MAN 7616 Multinational Firm Global Strategy (IB) (3). Overview of the strategic management and international business concepts that frame strategic activity in MNCs. Competitive business strategies in global and multidomestic industries. Prerequisite: Completion of business Ph.D. core.

MAN 7620 International Business Operations I (IB) (3). Examination of the functional management, operations and concerns of international businesses. Emphasizes analysis of problems in managing joint ventures, licensing, barter, and technology transfer. Prerequisites: Admission to Doctoral program and completion of doctoral core.

MAN 7621 International Business Operations II (IB) (3). Focus on political, economic, and national security issues which influence IB operations or strategies. Examines techniques for political and economic risk, assessment and reactions to such influences. Prerequisites: Admission to Doctoral program and completion of doctoral core.

MAN 7640 International Business Research Methods (IB) (3). Overview of IB academic research, emphasizing topics, literature, methods, information sources, applications, problems, and journal characteristics. Prerequisites: Admission to business Doctoral program and completion of doctoral core.

MAN 7718 Analysis of Corporate Policy Methods (IB) (3). Links functional areas of management to provide integrated view of organization and public policy. Emphasis on measurement, analysis and conceptualization of organization as a totality of operations.

MAN 7895 Seminar in Management (BA) (3). Key concepts in management ranging from individual worker styles to business ethics. Emphasis on topics such as men and women in organization, decision making styles, and attribution management.

MAN 7910 Advanced Management Research (IB) (3). Covers applications of analytical methods in contemporary management research. Emphasis is given to complex research design strategies including multivariate techniques and multidimensional scaling.

MAN 7916 Doctoral Research Project in Business (GM) (1-15). Intensive research project conducted during the summer following the student's first and second years of coursework. Each student develops his/her own research project under the supervision of a faculty member. Prerequisite: Graduate standing. (on demand)

MAN 7936 Doctoral Seminar in Business Administration (GM) (1). College colloquium series featuring presenters from various academic disciplines and businesses. (on demand)

MAN 7980 Ph.D. Dissertation (GM) (1-12). Original research that is supervised by a faculty committee and defended openly before the university committee. Prerequisites: Permission of Major Professor and Doctoral Candidacy.

MAN 7981 Dissertation Preparation (GM) (1-10). Preparatory background research and study to begin development of dissertation proposal. Students should be able to complete proposal by the end of the course. Prerequisite: Completion of TIER 1 courses. (on demand)

MAN 7984 Doctoral Research Seminar: Development and Utilization of Large Scale Datasets (BA) (3). Opportunities and issues associated with complex, multifaceted data set: representative samples and consensuses, multiple levels of analysis, diverse data sources, alternative weighting strategies, index formation and reliability: limits on inferences. Prerequisites: STA 6166, STA 6167, or equivalent.

MAR 5416 Marketing and Sales Strategies (ME) (3). This course discusses the nature and scope of marketing, and explores problems facing firms in developing existing markets and opening new ones. Includes sales skills and strategies and controlling sales operations. Prerequisites: Bachelor degree or equivalent.

MAR 6075 Current Issues in Marketing I (ME) (3). Intensive study of various topic areas in marketing. Course emphasizes student reading and research, with oral and written reports. Students electing to take this seminar may take no more than 3 credit hours of independent study in marketing. Prerequisite: MAR 6805.

MAR 6158 International Marketing (ME) (3). This course discusses the nature and scope of international marketing, and explores problems facing multinational firms and other international marketing organizations, together with strategies for foreign market penetration. Prerequisite: MAR 6805.

MAR 6205 Omni-Channel Marketing and Distribution Systems (ME) (3). Distinction between logistics and channel management focusing on the relationship of distribution in various strategic marketing variables and the role of channel strategy.

MAR 6336 Integrated Marketing Communication (ME) (3). A broad introduction to the field of integrated marketing communications and how it fits into the marketing plan. Discussion of objective setting, budgeting, and media planning, as well as the strategic planning and evaluation of advertising media, sales promotion, public relations, direct marketing, personal selling and marketing communications on the internet. Prerequisite: MAR 6805.

MAR 6406 Sales Management (ME) (3). Analysis of personal selling's roles in marketing strategy using detailed case studies on field sales management, working with channel organization, and planning and controlling sales operations. Prerequisite: MAR 6805.

MAR 6417 Sales Tactics and Strategies (ME) (3). New concepts in selling strategies and techniques, including internationalization and ethical issues in sales. These skills and processes will then be applied to sales management and global selling.

MAR 6446 Negotiations (ME) (3). Negotiations are the processes of creating agreements between two or more parties. This course will introduce students to the art of negotiations in business transaction.

MAR 6506 Buyer Psychology and Behavior (ME) (3). Psychological and behavioral examination of buyer

decision process with an emphasis on the use of marketing analysis. Prerequisite: MAR 6805.

MAR 6508 Consumer Analysis in Emerging Markets (ME) (3). The course will be providing you with a conceptual and analytical toolkit to explore and investigate consumers in emerging world economies.

MAR 6646 Marketing Research (ME) (3). The role of research in providing information for marketing decision-making, including an examination of the research process and the tools available to the researcher. Prerequisites: MAR 6805 or permission of the instructor.

MAR 6675 Marketing Analytics (ME) (3). A practical approach to the use of database information to solve marketing problems. Emphasis is on obtaining, managing and using information about current and potential customers. Topics include data acquisition, data mining, list segmentation and customer modeling, and direct marketing, relationship marketing and customer lifetime value applications.

MAR 6722 E-Marketing (ME) (3). Examines how e-business can transform the traditional marketing mix and how fundamental principles of marketing can be applied to develop e-business marketing plans. Prerequisite: MAN 6085 (Introduction to E-Business).

MAR 6735 Digital Marketing Strategies (ME) (3). Using critical thinking and strategic decision making to combine online technologies such as e-marketing, social media, mobile, SEO, and metrics to enhance brand value and drive marketing exchanges. Prerequisite: A grade of "C" or higher in MAR 6880.

MAR 6805 Marketing Management in the Global Environment (ME) (3). Analysis and application of theory and problem solving for marketing management in the global environment. Emphasis will be on the role of marketing in the organization; planning the marketing effort; management of the marketing organization; control of marketing operations; and evaluation of the marketing contribution.

MAR 6816 Corporate Simulation (ME) (3). Course emphasis is on application and integration of concepts and tools, through participation in the marketing management of a firm in competition with other firms. The course's focal point is a computerized marketing management simulation. Prerequisites: ACG 6175, FIN 6406, and MAN 6501.

MAR 6819 Marketing Strategy (ME) (3). A study of strategic marketing planning through case analysis and selected readings. Emphasis is on planning and problem solving processes, particularly directing, planning, organizing, coordinating, and controlling as applied to a contemporary market-oriented organization. Prerequisites: MAR 6805 or equivalent.

MAR 6826 Customer Relationship Management (ME) (3). The management of customer relationships has become the centerpiece of business strategy; course covers CRM and emphasizes the financial and technical aspects of managing customer relationships.

MAR 6838 Brand Management (ME) (3). The focus of this course is to provide a sound understanding of the function, issues and challenges of the brand or product manager. The scope of the course embraces U.S. and

international situations and emphasis will be placed on analysis, strategy development and practical decision making. The course will draw on the students' prior exposure to marketing management, research advertising and promotion and will provide insights and practice in application of these skills in the context of the product manager's role in the enterprise.

MAR 6880 Social Media Marketing (ME) (3). Intensive study of social media marketing, including best practices, challenges, metrics, and its role in market segmentation, target marketing, branding market expansion, and marketing strategies.

MAR 6915 Independent Study in Marketing (ME) (1-6). Individual conferences; supervised reading; reports on personal investigations. Consent of faculty tutor, Department Chairperson and Dean required.

MAR 6936 Special Topics in Marketing (ME) (1-6). For groups of students desiring intensive study of a particular topic or a limited number of topics, not otherwise offered in the curriculum. Consent of faculty supervisor and Department Chairperson required.

MAR 6944 Marketing Internship (ME) (1-3). Graduate level course consisting of full-time supervised work in a selected organization to apply knowledge learned in the classroom. Prerequisite: A grade of "C" or higher in MAR 6805 or taken concurrently.

MAR 7205 Seminar in Channels of Distribution (ME) (3). Covers readings from the marketing, economics, logistics, organizational behavior, social psychology, and sociology literature's in developing a research perspective on channels of distribution.

MAR 7246 Seminar in International Marketing (ME) (3). Examines major topics and theories in the international marketing literature. Analyzes various perspectives on business activities and strategies in global markets.

MAR 7399 Seminar in Advertising and Persuasion (ME) (3). Covers the major topics and theoretical perspectives within the research literature addressing persuasive communications.

MAR 7507 Seminar in Consumer Behavior (ME) (3). Covers the major topics and theoretical perspectives in consumer behavior research, with emphasis on consumer decision making.

MAR 7622 Marketing Research Methodology I (ME) (3). Philosophy, concepts, methods of marketing research design. Experimental methods, sampling procedures, measurement techniques, other methodological considerations. Prerequisites: Successful completion of first year research methods requirements in a College of Business Ph.D. Program or permission of the instructor.

MAR 7623 Seminar in Marketing Environment (ME) (3). Examines the role of marketing professionals in responding to social, economic, political, technological and ecological changes in the business environment. Addresses issues of marketing ethics, social accountability, and the design of responsible marketing strategies.

MAR 7665 Seminar in Marketing Models (ME) (3). Examines the process of model building and the

assumptions implicit in various modeling decisions. Emphasis is on learning to interpret, classify and critically evaluate models of marketing phenomena. Prerequisites: Calculus, Probability Theory, Statistics, and Matrix Algebra.

MAR 7786 Seminar in Marketing Theory (ME) (3). Intensive analysis of the nature and role of hypotheses, generalizations, and empirical regularities. Critical examination of theories of marketing and interaction of marketing theory and practice.

MAR 7815 Seminar in Foundations of Marketing Thought (ME) (3). Foundations of marketing, interdisciplinary relationships; reviews major research areas: the marketing mix, consumer choice models, segmentation, stochastic, and analytical models.

MAR 7817 Seminar in Marketing Management (ME) (3). Covers programs of research related to the management of marketing organizations and their role in improving organizational performance. Current and potential research topics will be considered from the perspective of leading scholars and marketing executives.

MAR 7849 Seminar in Services Marketing (ME) (3). Analyzes the nexus between services and marketing management. Identifies and appraises alternative corporate strategies within industries such as banking and finance, insurance, hospitality, entertainment and leisure, health care, and education.

MAR 7875 Sectorial Marketing (ME) (3). Course includes retailing, wholesaling, pricing, distribution, advertising, sales promotion and management, personal selling, international services and macromarketing; and marketing and economic development.

MAR 7979 Doctoral Research in Marketing (ME) (1-6). Research while enrolled for a doctoral degree under the direction of faculty members. Prerequisite: Permission of Department.

MAR 7980 Ph.D. Dissertation (ME) (1-12). Original research that is supervised by a faculty committee and defended openly before the university committee. Prerequisites: Permission of Major Professor and Doctoral Candidacy.

MAR 7981 Dissertation Preparation (ME) (1-12). Preparatory background research and study to begin development of dissertation proposal. Students should be able to complete proposal by end of the course. Prerequisite: Completion of TIER 1 courses. (on demand)

QMB 6357 Business Statistical Analysis (IS) (3). Review of quantitative methods and techniques required for business analysis and decision making. Includes decision models, mathematical programming, statistics and forecasting. Excel required.

QMB 6603 Quantitative Methods in Management (IS) (3). Use of quantitative methods and statistical programming to manipulate and describe data, as well as conduct advanced analyses of categorical, longitudinal, and other types of data sets. Prerequisite: QMB 6357.

QMB 6616 Business Process & Operational Analysis (IS) (3). Review of critical business analytical approaches, including linear programming, project scheduling, waiting line theory, and time series analysis, among others.

QMB 6805 Deterministic Models for Management Analysis (IS) (3). Applications of deterministic models such as linear and nonlinear programming, network analysis (PERT), dynamic programming, and branch and bound algorithms) to managerial problems of allocation, planning, scheduling, investment, and control.

QMB 6845 Simulation of Management Systems (IS) (3). Basic concepts of computer simulation of systems; application of these concepts to a variety of management problems. Industrial dynamics, urban dynamics, and large system simulation. Simulation in economic analysis, heuristic methods, and management games are covered. Prerequisites: MAN 6569 and a Computer Programming Language.

QMB 6855 Stochastic Models for Management Analysis (IS) (3). Applications of probabilistic models (such as queuing, inventory, and renewal) to their managerial problems.

QMB 6875 Stochastic Models for Project Management (IS) (3). Review of deterministic models and principles. Introduction to GERT, critical path methods, criticality index, and resource considerations in stochastic networks. Emphasis on operational decision-making, advanced topics, and individual projects. Students use the computer, and existing programs, to analyze hypothetical project networks, and learn to interpret the results in order to facilitate operational decisions. (F)

QMB 6905 Independent Study in Decision Sciences (IS) (1-6). Individual conferences; supervised readings; reports on personal investigations. Consent of instructor, Department Chairperson and Dean required. P/F only.

QMB 6934 Seminar in Decision Sciences (IS) (1-3). An examination of recent research findings in selected areas of current concern. Emphasis is placed on readings; active discussion; and small, short-term action and research projects. Consent of instructor required.

QMB 6974 Project in Decision Sciences (IS) (1-6). Each student is required to develop and conduct an individual research project or thesis on a topic of interest. The topic will be chosen in consultation with a faculty member in the College and approved by the Department Chairperson.

QMB 7910 Quantitative Research Methods in Business (IS) (3). This course introduces a structured approach to quantitative research methods such as surveys, experiments, data analysis, and multi-criteria analysis of judgments.

QMB 7935 Seminar in Decision Sciences (IS) (3). Critical review and analysis of recent and important research developments in the area of decision sciences. Prerequisites: ISM 7083 and ISM 7087.

REE 6045 Real Estate Markets, Institutions and Practices (RE) (3). This course is designed to introduce the student to the nature, principles, and advanced fundamental and analytical practices of the real estate industry.

REE 6147 Real Estate Market Analysis (RE) (3). An overview of basic theories, principles and techniques related to real estate market analysis with introduction to the standard cash flow software (ARGUS) from industry and to relevant databases.

REE 6209 Real Estate Finance (RE) (3). Financial analysis and structuring of real estate projects; traditional and creative concepts and mechanisms for construction financing and permanent financing of residential and income-producing property. Prerequisites: REE 3040 or permission of the instructor.

REE 6227 Real Estate Financial Modeling and Data Analysis (RE) (3). This course exposes the students to practical real estate financial modeling and analysis of real estate related data. Methodologies such as regression analysis and Monte Carlo simulations are used.

REE 6305 Advanced Real Estate Investment Valuation (RE) (3). The course emphasizes measuring risk and rate of return under conditions of uncertainty in real estate investment decision-making. Simulation is used to face the problems of matching investment strategy to the physical property, leverage, income taxation, and organizational alternatives.

REE 6306C Corporate Real Estate Management (RE) (3). This course introduces students to the end-user perspective of non-real estate companies' use of real estate. Focus is on decision-making tools and strategies to optimize performance.

REE 6327 Global Real Estate Capital Markets (RE) (3). This course provides knowledge of global real estate capital markets including the theories, operations and valuation techniques used in global real estate debt and equity markets. Prerequisite: REE 6209 or FIN 6406.

REE 6435 Real Estate Law (RE) (3). Analysis of best practices in real estate law. The course provides a detailed look at the contracts, ownership, structures, and laws impacting domestic and international real estate transactions.

REE 6715 Real Estate Development (RE) (3). Operation of real estate markets related to development; land use and development decision-making; the development process; real estate feasibility studies, applied to specific real estate projects.

REE 6932 Special Topics in Real Estate (RE) (1-20). For groups of students desiring intensive studies of a particular topic or a limited number of topics, not otherwise offered in the curriculum. Consent of faculty tutor and Department Chairperson required.

REE 6935 Seminar in International Real Estate (RE) (3). Current trends and issues affecting industrial real estate on an international level. Topics include: the multinational corporation and its location decisions; foreign taxation; international trade and exchange rates.

SCM 6016 Supply Chain Management (ME) (3). Examines how systems of organizations, personnel, information, analytics, and activities combine to move inventory, products, and services through channels in an efficient and effective manner.

SCM 6136 Purchasing and Inventory Management (ME) (3). A comprehensive view of supply management through the knowledge and application of purchasing, materials management, procurement, and strategic sourcing. Emphasis is on the strategic need to source.

SCM 6206 Logistics Systems and Analytics (ME) (3). Strategic roles, key strategic drivers, and analytics

methodology concepts will be covered providing a solid understanding of the analytical tools necessary to solve complex supply chain problems.

SCM 6216 Logistics Strategy (ME) (3). Capstone course that emphasizes on practical approaches to train future supply chain management leaders on how to stimulate and apply strategic thinking to logistics decisions within an organization.

SCM 6721 Import/Export and International Logistics (ME) (3). International logistics for sustaining global operations. Areas include: role of shipping, air transportation, and their impact on world trade' international distribution channels, and the logistics mix.

SCM 6946 Supply Chain Management Internship/Practicum (3). Supervised experiential learning activities designed to provide students with work experience and opportunities in the field of logistics and supply chain management. Prerequisite/Corequisite: A grade of "C" or higher in SCM 6016 or taken concurrently.

TAX 5066 Tax Research and Reporting (AC) (3). A study of tax planning aspects of a variety of business and other transactions. Emphasis will be placed upon perceiving tax issues and conducting research to resolve them. Prerequisite: Permission of Accounting certificate program advisor.

TAX 5106 Corporate Taxation (AC) (3). Tax implication of corporate formations, distributions, redemptions, liquidations, divisions, reorganizations, collapsibles, attributes, consolidations, S-Corp, AET and PHCs. Prerequisite: Permission of Accounting certificate program advisor.

TAX 5405 Taxation of Estate and Gift (AC) (3). The study of the federal estate tax and federal gift tax provisions. Prerequisite: Permission of Accounting Certificate program advisor.

TAX 5406 Taxation of Estates and Trusts (AC) (3). Study of income tax aspects of decedents, followed by income taxation of estates and trusts (subchapter J). Special emphasis on throw-back rules, grantor trusts, charitable remainder trusts, and foreign trusts. Prerequisite: Permission of Accounting certificate program advisor.

TAX 5506 International Dimensions of Taxation (AC) (3). Tax provisions affecting foreign corporations and non-resident aliens, as well as those tax provisions affecting U.S. person's business and investment activities outside the U.S. Prerequisite: Permission of Accounting certificate program advisor.

TAX 5725 Tax Planning for Managers (AC) (3). An exploration of the concepts of federal income taxation and tax planning, from the point of view of the manager. Prerequisites: ACG 6308 and permission of accounting certificate program advisor.

TAX 5875 Seminar in Taxation (AC) (3). An in-depth study of recent legislative, administrative, and judicial developments in taxation. Prerequisites: TAX 4001 or equivalent, and permission of Accounting certificate program advisor.

TAX 5904 Independent Study in Taxation (AC) (3). Individual conferences, supervised readings, reports on

personal investigations. Prerequisites: Written Permission of the instructor, Accounting certificate program advisor, School director, and dean.

TAX 5936 Special Topics in Taxation (AC) (3). Intensive study for groups of students of a particular topic or topics not otherwise offered in the curriculum. Prerequisites: Written permission from the instructor, Accounting certificate program advisor, School director, and dean.

TAX 6005 Income Tax (AC) (3). A survey of federal income taxation, with emphasis on the taxation of individuals and corporations and the ethics of income tax accounting. Prerequisites: ACG 6115 and admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting. Not open to those with undergraduate accounting degrees.

TAX 6026 Value-Added Tax Strategies for Business Decisions (AC) (3). Development and implementation of a tax-based framework to assist business decision makers and their advisors in the design of sound strategies when considering alternative business transactions. Prerequisite: TAX 6065.

TAX 6065 Tax Research, Practice and Procedure (AC) (3). Study of the tax environment, the tax law and its interpretations, tax research tools, and of relevant practice and procedural mechanisms affecting taxation. Prerequisites: Admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

TAX 6105 Taxation of Corporations I (AC) (3). The study of federal tax consequences of the formation and operation of corporations; distributions and redemption's; elections of Subchapter S status. Prerequisites: Admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

TAX 6107 Federal Corporate Taxation (AC) (3). Study of the federal income taxation provisions affecting the formation, operations, liquidation, acquisition, and reorganization of Subchapter C corporations. Prerequisite: TAX 6065.

TAX 6115 Taxation of Corporations II (AC) (3). The study of federal tax consequences of the liquidation and reorganization of corporations; multiple corporations; advanced topics in corporate taxation. Prerequisite: TAX 6065.

TAX 6205 Partnership Taxation (AC) (3). The intensive study of the formation, operation, and dissolution of partnerships (general and limited). Prerequisites: Admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

TAX 6206 Taxation of Pass-Through Entities (AC) (3). Study of small business entities, emphasis on partnerships, limited liability companies and S corporations; includes choice, formation and operation of above and distributions, sales and exchanges of ownership in interests and transfers by death. Prerequisite: TAX 6065.

TAX 6305 State and Local Taxation (AC) (3). The Constitutional, statutory, regulatory, and judicial principles affecting state and local taxation of business transactions,

with emphasis on Florida taxation. Prerequisite: TAX 6065.

TAX 6405 Estate and Gift Taxation (AC) (3). The study of the federal estate tax and federal gift tax provisions. Prerequisites: Admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

TAX 6415 Fiduciary Accounting and Taxation (AC) (3). The study of the income taxation of estates, trust, and the beneficiaries thereof, including the determination of distributable net income, and throwback rules. The grantor trust and income in respect of a decedent is emphasized. The use of trusts in tax and estate planning is also explored. Prerequisites: Admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

TAX 6445 Estate Planning (AC) (3). An in-depth discussion of the use of estate tax planning tools, such as lifetime gifts, life insurance, the marital deduction, the use of trusts, future interests, annuities, powers of appointment, charitable transfers, and post-mortem planning. Prerequisites: Admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

TAX 6446 Wealth Transfers (AC) (3). Study of gift estate, and generation-skipping transfer taxes and taxation of estates and trusts; use of estate planning tools: lifetime gifts, life insurance trusts, marital bequests, post-mortem estate planning. Prerequisite: TAX 6065.

TAX 6505 International Taxation I (AC) (3). Federal income tax provisions applicable to non-resident aliens and foreign corporations. Prerequisites: Admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

TAX 6507 Principles of International Taxation (AC) (3). Study of the federal income tax provisions applicable to foreign persons' U.S. income and to U.S. persons' foreign income. Prerequisite: TAX 6065.

TAX 6515 International Taxation II (AC) (3). Federal income tax provisions applicable to U.S. persons, business, and investment activities outside the U.S. Prerequisite: TAX 6065.

TAX 6726 Tax Planning for Managers (AC) (3). An exploration of the concepts of federal income taxation and tax planning, from the point of view of the manager. Prerequisites: ACG 6026 or equivalent and permission of Accounting advisor. Not open to EMST or MACC students.

TAX 6805 Tax Policy (AC) (3). A study of the tax accounting concepts and the judicial doctrines inherent in the federal tax law, tax planning, and tax policy. Prerequisite: TAX 6065.

TAX 6835 Taxation of Deferred Compensation (AC) (3). The taxation of qualified and non-qualified pension and profit-sharing plans, stock options, annuities, lump-sum distributions, death benefits, rollovers, self-employment plans, employee stock ownership plans, etc. Prerequisite: TAX 6065.

TAX 6875 Current Developments in Taxation (AC) (3). The study of recent legislative, administrative and judicial developments in taxation. Prerequisite: TAX 6065.

TAX 6876 Transactions in Property (AC) (3). An in-depth investigation into tax problems relating to basis, capital gains and losses, and nonrecognition provisions for transactions in property with special emphasis on personal property transactions and securities investments. Prerequisite: TAX 6065.

TAX 6877 Seminar in Taxation (AC) (3). Intensive study of a particular topic or a limited number of topics. The topics included in this course will depend upon the availability of faculty with expertise in the following special classes of tax problems: advanced corporate taxation; taxation of not-for-profit institutions; interstate, state and local taxation; and others, as current developments demand. Prerequisite: TAX 6065.

TAX 6905 Independent Study in Taxation (AC) (1-3). Individual conferences, supervised readings; reports on personal investigations. Prerequisite: TAX 6065.

TAX 6935 Special Topics in Taxation (AC) (1-3). Intensive study for groups of students of a particular topic(s) not otherwise offered in the curriculum. Prerequisites: Admission to a graduate program in the School of Accounting or permission of the Director of the School of Accounting.

TAX 7067 Seminar: Special Topics in Taxation Research (AC) (3). Topics vary according to instructor and student interest in problems and issues on the frontier issues of taxation. Prerequisite: Permission of Doctoral advisor in Accounting.

TAX 7815 Seminar: Tax Policy: An Analysis of the Issues (AC) (3). An in-depth examination of the horizontal and vertical equity issues in taxation, the effects on income distribution, business decisions, foreign balance of payments, public finance issues, and economic policy. Emphasized are the areas of empirical research vis a vis legal research. Prerequisite: Permission of Doctoral advisor in Accounting.

TRA 5245 Transportation Logistics (ME) (3). Quantitative methods applied to solving problems in business logistics; mathematical and statistical models; optionalization theory and simulation. Problems selected from areas of physical distribution management, inventory control, mode selection, and facility locations.

TRA 5401 Transportation Operations and Carrier Management (ME) (3). Contemporary management techniques as applied to carriers; management-problems peculiar to transportation firms; economic analysis of marketing problems; capital formation; costs; pricing; labor relations; and government regulation.

TRA 6015 Graduate Survey of Transportation Management (ME) (3). Graduate survey of transportation, its elements, and their impact on society. History, economics, and regulatory principles in transportation. Current policies and problems for all the major transportation modes.

TRA 6905 Independent Study in Transportation (ME) (1-6). Individual conferences; supervised readings; reports on personal investigations. Consent of faculty tutor, Department Chairperson, and Dean required.

TRA 6936 Special Topics in Transportation (ME) (1-6). For groups of students desiring intensive study of a particular topic or a limited number of topics, not otherwise

offered in the curriculum. Consent of faculty supervisor and Department Chairperson required.

College of Business

Faculty

Aguirre-Rodriguez, Alexandra, Ph.D. (*University of Illinois at Urbana-Champaign*), Associate Professor, Marketing and Logistics

Agogo, David, Ph.D. (*University of Massachusetts*), Assistant Professor, Information Systems and Business Analytics

Aguirre-Urreta, Miguel, Ph.D. (*University of Kansas*), Associate Professor, Information Systems and Business Analytics

Alaimo, Nicolo, M.B.A. (*University of Miami*), Assistant Teaching Professor, Marketing and Logistics

Aldrich, Jose, J.D. (*University of Miami*), CPA, Clinical Professor, Accounting

Allredge, Dallin, Ph.D. (*University of Tennessee*), Assistant Professor, Finance

Allen, Christopher, D.B.A. (*University of Maryland*), Visiting Assistant Teaching Professor, Marketing and Logistics

Armagan, Sungu, Ph.D. (*The University of Utah*), Associate Teaching Professor, Global Leadership and Management

Austin, Craig L., M.B.A. (*Florida International University*), Assistant Teaching Professor, Marketing and Logistics

Barber, Joel, Ph.D. (*University of Arizona*), Associate Professor, Finance

Barua, Abhijit, Ph.D. (*Louisiana State University*), Professor, Accounting

Barman, David, J.D. (*Florida International University*), Associate Teaching Professor, Accounting

Batra, Dinesh, Ph.D. (*Indiana University*), Professor, Information Systems and Business Analytics

Beracha, Eli, Ph.D. (*University of Kansas*), Professor, Tibor and Sheila Hollo School of Real Estate

Beristain, Elisabeth, M.A. (*University of Michigan*), Associate Teaching Professor, Marketing and Logistics

Bianchi, Pietro, Ph.D. (*IE Business School*), Assistant Professor, Accounting

Birritella, Timothy Dugan, M.B.A. (*Baruch College,*

C.U.N.Y.), Teaching Professor, Marketing and Logistics

Bouayad, Lina, Ph.D. (*University of South Florida*), Associate Professor, Information Systems and Business Analytics

Brunken, Teresita, M.S.T. (*Florida International University*), Clinical Assistant Professor, Accounting

Buckman, Brooke, Ph.D. (*Arizona State University*), Assistant Teaching Professor, Global Leadership and Management

Butchey, Deanne, Ph.D. (*Florida International University*), Teaching Professor, Finance

Caglayan, Mustafa, Ph.D. (*City University of New York*), Associate Professor, Finance

Carmenate, Jimmy, D.B.A. (*Kennesaw State University*) Clinical Assistant Professor, Accounting

Carrillo, Flavio, M.S.F. (*Florida International University*), Instructor, Finance

Cartaya, Eric, Ph.D. (*Florida International University*), Associate Teaching Professor, Global Leadership and Management

Chacar, Aya, Ph.D. (*University of California – Los Angeles*), Professor, International Business

Chang, Chun-Hao, Ph.D. (*Northwestern University*), Professor, Finance

Chen, Min, Ph.D. (*Northwestern University*), Associate Professor, Information Systems and Business Analytics

Chen, Yan, Ph.D. (*University of Wisconsin, Milwaukee*), Associate Professor, Information Systems and Business Analytics

Chen, Yi-Ju (Vivian), D.B.A. (*Argosy University*), Teaching Professor, Marketing and Logistics

Chou, Wen-Hsiu, Ph.D. (*University of Wisconsin – Milwaukee*), Associate Professor, Finance

Chung, Silver, Ph.D. (*University of Rochester*), Assistant Professor, Accounting

Combs, Danielle, Ph.D. (*University of Illinois at Urbana-Champaign*) Assistant Professor, International Business

Cousins, Karlene, Ph.D. (*Georgia State University*), Professor, Information Systems and Business Analytics

Dandapani, Krishnan, Ph.D. (*Pennsylvania State University*), Professor, Finance

Deckard, Gloria, Ph.D. (*University of Missouri*), Associate Professor, Information Systems and Business Analytics

Del Pezzo, Mark, M.B.A. (*Jacksonville University*), Associate Teaching Professor, Finance

Dickson, Peter R., Ph.D. (*University of Florida*), Professor, Marketing and Logistics

D’Lima, Walter, Ph.D. (*The Pennsylvania State University*), Assistant Professor, Tibor and Sheila Hollo School of Real Estate

Docgne Penlap, Sandrine, Ph.D. (*University of Houston*), Assistant Professor, Finance

Duarte, Diogo, Ph.D. (*Boston University*), Assistant Professor, Finance

Dupoyet, Brice, Ph.D. (*University of Washington*), Associate Professor, Finance

Duran, Edward, MS.I.S. (*Florida International University*), Assistant Teaching Professor, Information Systems and Business Analytics

Elias, Desiree, M.Acc. (*Florida International University*), Assistant Teaching Professor, Accounting

<i>Chair, Journalism and Media Department</i>	Teresa L. Ponte
<i>Chair, Landscape Architecture + Environmental and Urban Design Department</i>	Roberto J. Rovira
<i>Director, School of Music</i>	Karen Fuller Veloz
<i>Chair, Theatre Department</i>	Joel Murray

The College of Communication, Architecture + The Arts (CARTA) is comprised of eight departments—Architecture, Art and Art History, Communication, Interior Architecture, Journalism and Media, Landscape Architecture + Environmental and Urban Design, Music, and Theatre. The dynamics among the different disciplines make the college unique with programs that focus on art, design, communication, and performance. The college occupies a unique position in South Florida where students can prepare for a career in architecture, communication or the arts within a major research university. Instruction in the college is enriched by a distinguished faculty of artists, designers, journalists, communicators and performers who add dimensions of applicable experience, current issues, and ongoing research to the traditional concepts related to the disciplines and professions within the college.

The college promotes exploration, discovery, and innovation among its different programs and is strongly committed to interdisciplinary education breaking new ground in art, design and performance. Its diverse programs emphasize urban engagement and are informed by current thinking and new technologies.

Developing connections with a wide range of programs and resources in the university, the college is dedicated to being engaged as a leader in art and design as well as in the performing arts in South Florida, neighboring communities, the nation, and internationally. Collaborations with Fairchild Tropical Botanic Garden, the Metropolitan Center, the Wolfsonian-FIU, the Bauhaus-Dessau, the Coconut Grove Playhouse, Florida Keys Land and Sea Trust at Crane Point, the Concert Association of Florida, and the Università degli Studi di Genova offer students the opportunity to expand their ingenuity with a variety of resources.

The fusion of essential disciplines with applied professions in the college provides both depth and liberty in learning. In the fields of architecture, landscape architecture, interior architecture, and art, the major emphases are on creative processes and studio work with a variety of supportive lectures and seminar programs. In art history, the emphasis is on scholarly study of the arts through time; lectures, seminars, and independent research are conducted on campus and in museums and

libraries throughout the South Florida area. Music emphasizes skills and knowledge that are fundamental to the entire discipline: music theory, music history, performance, aural and keyboard training, orchestration, composition, conducting, and ensemble participation. Communication focuses on developing skills essential for effective leadership, critical decision making, and strategic influence through interpersonal and mediated communication. Our liberal arts and professional degrees prepare students for successful careers in organizational communication, advertising, and public relations in our diverse communities and our global digital ecosystem. Our graduate programs give students a global perspective in strategic communication to help them prepare for advancement in advertising, public relations, and integrated communications careers. Journalism and Media investigate, analyze, chronicle, and explain the complexities of the world around us. Theatre majors study the arts that contribute to theatre production—acting, costuming, directing, designing sets lighting and sound, writing plays, and theatre administration.

Admission to the College of Communication, Architecture + The Arts is selective and competitive. For information on the College of Communication, Architecture + The Arts, see <http://carta.fiu.edu>.

Students seeking to major in any of the college's departments must meet the requirements for admission to the university and the requirements for admission to the major by the respective department. Admission to the above referenced departments' majors is competitive and is not guaranteed. Criteria for selective admission to the departments' majors include indicators of ability, performance, creativity, and/or talent to complete required work within the desired major. Admission to each department's major will be offered based on space availability to those applicants judged by the respective Department Faculty Admissions Committee to have the greatest potential for successful completion of the program. Florida community college transfer students with Associate in Arts degrees are given equal consideration with FIU students.

Hours of Operation / Location / Contact Information

Monday - Friday, 8:30a.m. – 5 p.m.
Paul L. Cejas Architecture Building, PCA 272,
Miami, FL 33199
Phone: (305) 348-7500, Fax: (305) 348-6716

Student Services and Advising Center

Our advisors are here to assist you in the development of a meaningful educational plan that is compatible with your life goals. You can rely upon your academic advisors for information, assistance, and encouragement.

- Provide accurate and customized academic information.
- Educate students on how to plan effectively.
- Help students identify goals and develop education plans to reach them.
- Interpret and assure adherence to CARTA's academic policies and procedures.
- Consult with students experiencing academic difficulty and assist them in identifying reasons for problems and possible solutions.
- Help students understand degree requirements.

- Assist students in the selection and scheduling of courses.

Graduate Programs

The college offers academic programs leading to graduate degrees in Architecture, Interior Architecture, Landscape Architecture, Art Education, Mass Communication, Music, Music Education, and Visual Arts.

Certificate Programs

The college offers academic programs leading to graduate certificates in History, Theory and Criticism of Architecture, Furniture Design, Global Strategic Communications, Landscape Architecture, Cruise Ship and Super Yacht Design, Science Communication, Spanish-language Journalism: Investigative Reporting, and Museum Studies.

School of Communication and Journalism

<i>Dean</i>	Brian D. Schriener
<i>Associate Dean, Cultural and Community Engagement</i>	John A. Stuart
<i>Associate Dean, Faculty and Program Development</i>	Marilys R. Nepomechie
<i>Assistant Dean of Students</i>	Katie Rothfield
<i>Senior Director of Development</i>	Oliver G. Ionita
<i>Chair, Communication Department</i>	Aileen Izquierdo
<i>Chair, Journalism and Media Department</i>	Teresa Ponte

The School of Communication and Journalism offers professional education leading to the M.S. in Mass Communication.

There are four programs that lead to the M.S. Degree in Mass Communication:

- Global Strategic Communications on-campus program
- Global Strategic Communications online program
- Global Strategic Communications/Miami Ad School program
- Spanish Language Journalism program

The Global Strategic Communication online program features specializations in global strategic communication management, conflict resolution and consensus building, and digital media. The orientation of the graduate program is primarily professional, not theoretical. The program is designed to enhance graduates' abilities to work in the mass communication professions.

Graduate Programs

The school offers academic programs leading to graduate degrees in Business Journalism, Global Strategic Communications, Mass Communication, and Spanish-Language Journalism.

Certificate Programs

The school offers academic programs leading to graduate certificates in Global Strategic Communications, Science Communication, and Spanish-language Journalism: Investigative Reporting.

Master of Music

The School of Music offers a Master of Music degree with specialization in the following areas: music composition, music technology, jazz, performing arts production, applied (winds/percussion, strings, voice, piano, piano accompanying, organ), and conducting (choral, orchestral, wind). In addition, the department offers the Master of Science in Music Education. For more information please contact the School of Music.

Admissions Requirements

All students entering the graduate programs in the School of Music must possess an undergraduate Bachelor of Music degree from an accredited institution or the equivalent with a 3.0 GPA in the last 60 credits of study. The only exception to this requirement is found in the Music Management and Production, Music Education, and Music Technology areas, where students with undergraduate degrees in other related areas may be accepted, as long as they can demonstrate a sufficient musical background. In addition to the on-line application and documentation required by the University Graduate School, the School of Music graduate programs require an audition or interview and additional supporting materials. Please visit the Graduate Admissions website for School of Music admission requirements by degree and track.

Applicants who feel the earned GPA is not indicative of their ability to be successful in a graduate degree program may also submit scores on the Graduate Record

Examination, which will be taken into consideration by the admission committee in its evaluation of the application.

- Wind/Percussion Performance: audition on instrument (and interview when feasible) – recordings acceptable
- String/Guitar Performance: audition on instrument (and interview when feasible) – recordings acceptable
- Keyboard/Organ Performance: audition on instrument (and interview when feasible) – recordings acceptable
- Vocal Performance: audition on voice (and interview when feasible) – recordings acceptable
- Conducting (choral, wind, orchestral): conducting audition (and interview when feasible) – video acceptable
- Jazz: audition on instrument (and interview when feasible) – recordings acceptable
- Composition: review of portfolio of scores (and interview when feasible)
- Music Management and Production: interview required
- Music Technology: portfolio of music or software, interview, CV, personal statement

General Requirements

Music Theory (Analytical Techniques course required in all areas except jazz, music technology, music education, and performing arts production) ¹	3
Music History/Literature ¹ (see each area for specific courses)	3
Ensembles/applied/conducting (see each area for specific courses)	2

The above eight credits are included in the 36 credits required for most areas of concentration.

¹A placement exam is required before students are allowed into these courses. Remedial work may be required before these courses are taken. A grade of "B" or better must be earned in order for a course to count towards the MM in Music or the MS in Music Education.

Areas of Concentration

Composition (36 credit hours)

MUC 6251 Graduate Music Composition (3 semesters – 3 credits each)	9
Composers Forum (4 semesters - 1 credit each)	4
Electronic Music 2 semesters (2 credits per semester – beyond MIDI Tech class)	4
MUT 5629 Analytical Techniques	3
Graduate Electives to be selected in consultation with the composition area director	5
MUH 6937 Special Topics in Music History	3
MUS 5711 Music Bibliography	2
Thesis/Recital (includes private lessons and 45 minute recital of student's compositions during last semester)	6

Performance

Applied Piano (36 credit hours)

MVK 5451 Applied Piano (3 semesters - 3 credits each)	9
MUN 5515 Accompanying (2 semesters - 1 credit each)	2
Chamber Music (2 semesters - 1 credit each)	2
MUS 5906 Master's Recital (includes private lessons and recital during last semester)	6
MUT 5629 Analytical Techniques	3
MUL 5405/5406 Keyboard Literature I and II (2 semesters - 3 credits each)	6

Major Ensemble (2 semesters - 1 credit each)	2	(to be chosen in consultation with Director of Vocal Studies)	
MVK 5651 Piano Pedagogy	2	MVV 5651 Graduate Vocal Pedagogy I	2
MUS 5711 Bibliography	2	MUL 5671 Opera Literature	3
MUH 6937 Special Topics in Music History	2	MUL 5609 Survey of Art Song Literature	3
Piano Accompanying (36 credit hours)		MUT 5629 Analytical Techniques	3
Applied Piano (3 semesters - 3 credits each)	9	MUH 6937 Special Topics in Music History	1
Instrumental Accompanying	2	MUS 5711 Music Bibliography	2
Vocal Accompanying	2	MUS 5906 Master's Recital (includes private lessons and recital during last semester)	6
Chamber Music (2 semesters - 1 credit each)	2	Conducting	
MUS 5906 Master's Recital (includes private lessons and recital during last semester)	6	Choral Conducting (36 credit hours)	
Analytical Techniques	3	MUG 5205 Graduate Choral Conducting (3 semesters – 3 credits each)	9
2 music literature courses to be chosen in consultation with advisor	6	Choir Ensemble Electives (4 semesters - 1 credit each)	4
Major Ensemble (2 semesters - 1 credit each)	2	MUS 5906 Master's Recital (includes private conducting lessons and recital during last semester)	6
MUS 5711 Music Bibliography	2	MUT 5629 Analytical Techniques	3
MUH 6937 Special Topics in Music History	2	MUL 5645 Choral Literature	3
Applied Organ (36 credit hours)		MUH 6937 Special Topics in Music History	3
Applied Organ (3 semesters – 3 credits each)	9	MUS 5711 Music Bibliography	2
Accompanying (2 semesters – 1 credit each)	2	MVV 5651 Graduate Vocal Pedagogy I	2
Organ Pedagogy	2	Secondary Applied Lessons	2
Analytical Techniques	3	Graduate Music Electives ¹	2
Organ Literature I and II	6	Instrumental (Wind) Conducting (36 credit hours)	
Choral Conducting or Instrumental Conducting	2	MUG 5307 Graduate Applied Instrumental Conducting (3 semesters – 3 credits each)	9
Major Ensemble (2 semesters – 1 credit each)	2	Ensemble Electives (4 semesters - 1 credit each)	4
MUS 5711 Bibliography	2	MUS 5906 Master's Recital (includes private lessons and recital during last semester)	6
MUH 6937 Special Topics in Music History	2	MUT 5629 Analytical Techniques	3
MUS 5906 Master's Recital (includes private Lessons and recital during last semester)	6	MUL 5456 Wind Instrument Literature	3
Applied Woodwinds, Brass, Percussion (36 credit hours)		MUH 6937 Special Topics in Music History	3
Applied Instruction (3 semesters - 3 credits each)	9	MUS 5711 Music Bibliography	2
Elective Ensembles (from orchestra/wind/brass/percussion ensembles) (6 ensembles - 1 credit each)	6	Graduate Music Electives	6
MUN 5465 Chamber Music (2 semesters - 1 credit each)	2	Orchestral Conducting (36 semester hours)	
MUS 5906 Master's Recital (includes private lessons and recital during last semester)	6	MUG 6309 Graduate Applied Orchestral Conducting (3 semesters -3 credits each)	9
Analytical Techniques	3	Elective Ensembles (4 semesters – 1 credit each)	4
MUL 5505 or MUL 5456 Symphonic Literature or Wind Literature	3	MUS 5906 Master's Recital (includes private conducting lessons and recital during last semester)	6
Graduate Music Electives	2	MUT 5629 Analytical Techniques	3
MUH 6937 Special Topics in Music History	3	MUL 5505 Symphonic Literature	3
MUS 5711 Music Bibliography	2	MUH 6937 Special Topics in Music History	3
Applied Strings (36 credit hours)		MUS 5711 Music Bibliography	2
Applied Strings (3 semesters - 3 credits each)	9	Graduate Music Electives	6
MUN 5215 Orchestra or MUN 5485 Guitar Ensemble (4 semesters - 1 credit each)	4	Jazz Performance (36 credit hours)	
MUN 5465 Chamber Music Elective (4 semesters - 1 credit each)	4	Applied Music (major instrument) (3 semesters - 3 credits each)	9
MUS 5906 Master's Recital (includes private lessons and recital during last semester)	6	Ensembles (from Studio Jazz Band/Combo/Latin Jazz Ensemble) (4 semester - 1 credit each)	4
MUT 5629 Analytical Techniques	3	MVJ 5150 Jazz Piano Techniques (2 semesters - 1 credit each; not required of Jazz Piano principals who take 2 credits of Classical Piano instead)	2
MUL 5505 Symphonic Literature or MUL 5435 Guitar Literature	3	MUS 5711 Music Bibliography	2
MUH 6937 Special Topics in Music History	3		
MUS 5711 Music Bibliography	2		
Graduate Music Electives	2		
Applied Voice (36 credit hours)			
MVV 5451 Applied Voice (3 semesters - 3 credits each)	9		
MUO 5505 Opera Workshop (4 semesters, 1 cr. each)	4		
Elective Ensembles (3 semesters - 1 cr. each)	3		

¹ Must include a vocal diction course if placement test suggests need for further training in this area. Choral conducting candidates must take placement tests in diction. Depending on the results of these tests, two of these elective credits may have to be devoted to the MUS 5206 (Graduate Review Diction) course.

Music Technology Elective (to be chosen in consultation with advisor)	2
MUT 5646, 5647: Advanced Jazz Techniques I and II	6
MUH 6937 Special Topics in Music History ²	2
Graduate Music Electives	3
MUS 5906 Master's Recital (includes private lessons and recital during last semester)	6

Music Management and Production (36 credit hours)

MUM 5725 Live Music Operations I	2
MUM 5795 Music Production Lab	1
MUM 5726 Live Music Operations II	3
MUS 5512 Sound Reinforcement	2
MUM 5809 Music Production Seminar	3
MUM 5705 Advanced Business of Music*	3
MUM 5808 Grant Writing for the Arts	2
MUS 5910 Research	6
MUM 5946 Performing Arts Internship	4
MUS 5711 Music Bibliography	2
MUL 5XXX Music Administration & History	3
MUN Ensemble	2
Graduate Music Electives	3

* prerequisite MUM 4301 or equivalent

Music Technology (36 credit hours)

MUC 6405 Electronic Music Lab III	2
MUC 5406 Electronic Music IV	2
MUC 5635 Computer Music Seminar I	3
MUC 5636 Computer Music Seminar II	3
MUS 5711 Music Bibliography	2
MUS 5512 Sound Reinforcement	2
PHY 5466 Physics of Music	3
MUT 5629 Analytical Techniques ³	3
MUH 6937 Special Topics in Music History	1
MUS 5971 Thesis	6
MUM 5946 Performing Arts Internship	1-9

Master of Science in Music Education Degree hours: (30)

The M.S. in Music Education is a research oriented program designed for practicing music educators.

Admission Requirements

To be admitted into the program, a student must:

1. Hold a bachelor's degree in music from an accredited university or college;
2. Have a 'B' (3.0) average or higher in all junior and senior year course work for the bachelor's degree;
3. Exhibit classroom teaching experience;
4. Submit two (2) letters of recommendation, a writing sample, and a video of classroom teaching;
5. Complete an interview with music education faculty in place of an applied audition.

Music Education: (12)

MUE 6938 Seminar in Music Education	3
MUE 6815 Psychological Foundations of Music Behavior	3
MUE 6785 Research in Music Education	3

MUE 6190 Curriculum and Policy Design in Music Education	3
--	---

Music Courses/Common Core: (6)

MUT 5629 Analytical Techniques	3
or	
MUT 5051 Graduate Theory Survey	3
MUH 5688 Graduate Music History Review IV	3
or	
Graduate Music History Elective	3

Personal Focus Courses: (9)

General Electives/Cognate Area	9
--------------------------------	---

Research: (3)

MUE 6910 Directed Research	3
----------------------------	---

Thesis Option:

Students may opt to extend their program by adding MUE 6971 Thesis in Music Education (2-6 credits) to their MS in Music Education.

Master of Science in Music Education: Certification Track

The M.S. in Music Education: Certification Track is a professional education degree designed for those who have studied music and wish to become a licensed music educator.

Degree hours: (35)

Admission Requirements

To be admitted into the program, a student must:

1. Hold a bachelor's degree in music from an accredited university of college'
2. Have a 'B' (3.0) average or higher in all junior and senior year course work for the bachelor's degree;
3. Show passing scores on all portions of the Florida Department of Education General Knowledge Exam.
4. Submit two (2) letters of recommendation and a writing sample;
5. Complete an interview with music education faculty in place of an applied audition.

Music Education: (12)

MUE 6938 Seminar in Music Education	3
MUE 6815 Psychological Foundations of Music Behavior	3
MUE 6190 Curriculum and Policy Design in Music Education	3

Music Courses/Common Core: (6)

MUT 5629 Analytical Techniques	3
or	
MUT 5051 Graduate Theory Survey	3
MUH 5688 Graduate Music History Review IV	3
or	
Graduate Music History Elective	3

Personal Focus Courses: (14)

MUE 6316 Instruction in Elementary Music	3
MUE 5XXX/ 5XXX Instruction in Secondary Instrumental/Choral Music	2
MUE 6396 Music in Special Education	3
RED 5339 Subject Related Reading	3

² May substitute MUH 5815 Jazz History: The Innovators

³ May substitute MUT 5051 Graduate Theory Survey

TSL 5361 TESOL for Secondary Teachers 3

Capstone Experience: (6)

MUE 5945 Supervised Teaching: Music Education*

*The culminating project for this degree is a full-time teaching internship within MUE5945 Supervised Teaching: Music Education. Completion of the degree and passing the Florida Department of Education Professional Knowledge and Music Subject Area exams will ensure students meet the eligibility requirements to apply to the FLDOE for a Florida Professional Teaching Certificate

Combined BM/MM in Music Composition Degree Pathway

Admission Requirements

1. Current overall GPA of 3.2 or better
2. Completed at least 75 credit hours
3. In good standing as a Music Composition Major at FIU
4. Submission of request in writing for admission into the graduate program with justification and future plans.
5. Approval from the Music Composition Program Director (undergraduate and Graduate)

Senior Year

- In the combined degree pathway students will count up to 12 credits of graduate level courses in both the B.M. and M.M degrees. Students must complete the final oral exit requirement, and Senior Composition Recital (MUS 4910)
- Students must apply for graduation so that they will receive the B.M. at the end of their senior year.

Graduate Program Requirements

All combined degree pathway student graduate credits completed as part of the B.M. will be transferred into the graduate program and counted for completion for the M.M (total 36 credits). No more than 12 credits can be applied to both degrees.

Course Descriptions

Definition of Prefixes

MUC-Music: Composition; MUE-Music: Education; MUG-Music: Conducting; MUH-Music: History/Musicology; MUL-Music: Literature; MUM-Music: Commercial; MUN-Music: Ensembles; MUO- Music: Opera/Musical Theatre; MUR-Music: Church; MUS-Music; MUT-Music: Theory; MVB-Applied Music/Brass; MVJ-Applied Music/Jazz; MVK-Applied Music-Keyboards; MVO-Applied Music/Other; MVP-Applied Music/Percussion; MVS-Applied Music/Strings; MVV-Applied Music/Voice; MVW-Applied Music/Woodwinds.

MUC 5406 Electronic Music IV (2). An advanced course in computer music providing students hands-on experience with recently developed hardware and software for the creation of music. Prerequisite: MUC 4400.

MUC 5407 Electronic Music V (2). Students develop new hardware and/or software for uses related to musical composition. Prerequisite: MUC 5406.

MUC 5614C Documentary Film Scoring (3). The examination of documentary film scores in the 20th and 21st century and scoring techniques used by documentary film composers in both acoustic music and scores created with new technologies. Prerequisites: Graduate standing in the MM in composition and/or permission of the instructor.

MUC 5615 Film Scoring (3). An in-depth analysis of film scores in the 20th and 21st century as well as scoring techniques used by film composers in acoustic music as well as scores created with new technologies. Prerequisites: Graduate standing in the School of Music and successful completion of 4 semesters of undergraduate music theory.

MUC 5635 Computer Music Seminar I (3). Introduces students to the historical contributions of computer music composers and engineers. Prerequisites: MUC 6305, MUC 6306. Corequisite: MUC 6405.

MUC 5636 Computer Music Seminar II (3). Introduces students to the compositional procedures used by computer music composers. Prerequisites: MUC 6305, MUC 6306, MUC 6405. Corequisite: MUC 5406.

MUC 5637 Computer Music Seminar III (3). Introduces students to the research technologies for making interactive sound projects including installations and exhibits. Prerequisites: MUC 6305, MUC 6306, MUC 6405, MUC 5406.

MUC 5935 Composition Forum (1). Student composers present their work for critique by faculty and topics relevant to composition are presented by faculty and guests. Prerequisite: Admission into the graduate composition program.

MUC 6251 Graduate Music Composition (3). The writing of evolved musical compositions with regard to each student's strengths and aesthetic development. Graduate standing in Music Composition and or permission of the instructor.

MUC 6305 Electronic Music Lab I (2). Exploration of the electronic medium including the history of electronic music, digital studio techniques, analog studio techniques, digital synthesis and analog synthesis. Prerequisites: MUC 5345 or permission of the instructor.

MUC 6306 Electronic Music Lab II (2). Continuation of Electronic Music Lab I with an emphasis on advanced MIDI applications including sampling, digital sequencing, digital signal processing and interactive MIDI software. Includes one large composition project. Prerequisite: MUC 6305.

MUC 6405 Electronic Music Lab III (2). Special projects in advanced electronic music programming environments including C-sound, MAX, Interactor, HMSL and CHANT. Includes one large composition project. Can be repeated 4 times. Prerequisite: MUC 6305.

MUE 5336 Secondary Choral Methods (2). Choral/vocal teaching methods to middle and high school students in a large ensemble setting. Field experience is required.

MUE 5338 Secondary Instrumental Methods (2). Wind, percussion, and string teaching methods for middle and high school level students in a large ensemble setting. Field experience is required.

MUE 5485 Marching Band Techniques (3). A study of show design and concepts; marching band management and organizational procedures including booster organizations, inventory, handbooks, grading procedures, rehearsal techniques. Prerequisite: Permission of the instructor.

MUE 5695 Landscape of 21st Century Performing Arts (3). This course examines the ways in which, using critical thinking, creativity and communication proficiency, students will be able to recognize the challenges that face today's performing arts educator, artist and organization. It aims to develop multiple ways to articulate and discuss new ways of teaching, performing and working within the arts. The objective is to guide students to innovative and multiple ways to apply their musical experiences to fit today's challenges and adaptive arts landscape.

MUE 5907 Directed Study in Music Education (1-3). Individual investigation in one or more areas of music education.

MUE 5921 Choral Conducting Workshop (3). The study of various topics related to choral literature, conducting and techniques. Prerequisite: Permission of the instructor.

MUE 5922 String Workshop (3). The study of various topics related to string literature, conducting and techniques. Prerequisite: Permission of the instructor.

MUE 5923 Instrumental Conducting Workshop (3). The study of various topics related to instrumental ensemble literature, conducting and techniques. Prerequisite: Permission of the instructor.

MUE 5924 Jazz Workshop (3). The study of various topics related to jazz literature, conducting and techniques. Prerequisite: Permission of the instructor.

MUE 5928 Workshop in Music (3). Applications of materials and techniques in music in a laboratory or field setting.

MUE 5945 Supervised Teaching: Music Education (6). Supervised teaching. Prerequisites: Admission to the Modified Masters Track Program and completion of prerequisite course work in education and the subject matter area.

MUE 6190 Curriculum and Policy Design in Music Education (3). Examination of the relationship between curriculum theory, policy practice and philosophical ideals within music education. Evaluation of traditional and innovative models and impact on learning.

MUE 6305 Instruction in Early Childhood Music (3). Elective in masters program in early childhood education. Refines skills related to program development, methods of teaching, selection of materials, and review of research, in preschool, kindergarten and primary grades.

MUE 6316 Instruction in Elementary Music (3). This course is designed to provide a balance and make connections between the study of theory and philosophy and the practice of music education and working with elementary-aged children.

MUE 6345 The Methodology and Analysis of Music Teaching (3). A data based analysis of methods and programs in the public schools and the development of music pedagogy skills. Reviews current research findings and applies them where applicable to the field of Music

Education. Required for the Masters Degree. Prerequisite: Undergraduate Degree.

MUE 6396 Music in Special Education (3). The study of musical experiences for students with disabilities in mainstreamed and self-contained special education music classes. Musical adaptations and modifications are emphasized.

MUE 6785 Research in Music Education (3). A survey of current research and past research trends in music education. Applied training in techniques of design and data analysis.

MUE 6815 Psychological Foundations of Music Behavior (3). Overview of acoustical, psychological and physiological foundations of music as it influences human behavior. Covers musical acoustics, anatomy of human hearing, music perception, reactions, personality, mood and powers of music discrimination. Required for the Master of Science in Music Education degree. Prerequisite: Undergraduate degree.

MUE 6910 Directed Research (3). This course is designed to provide an opportunity for students to engage in high-level inquiry focusing on an area of specialization within the music education profession.

MUE 6925-26 Special Topics in Music Education (1-3). Applications of new, innovative or contemporary materials and/or techniques in music education. May be used for elective credit with permission of the program director.

MUE 6938 Seminar in Music Education (3). Seminar topics concerning historic music education programs in the United States and other countries, as well as current issues and problems facing the music educator. Required for the Master of Science in Music Education degree. Prerequisite: Undergraduate degree.

MUE 6971 Thesis in Music Education (1-3). Research and paper for Masters Candidates in Music Education. Prerequisites: MUE 6785 and permission of Graduate Advisor in Music Education.

MUG 5105L Advanced Conducting Techniques (1). An extension of form and analysis, with interpretation both in instrumental and choral conducting. Twentieth century scoring and symbol interpretation will be studied in depth, with actual conducting experience required.

MUG 5205 Graduate Applied Choral Conducting (3). Advanced study of choral conducting, including gesture, rehearsal techniques, and repertoire. Prerequisites: Graduate standing and permission of the instructor.

MUG 5307 Graduate Applied Instrumental Conducting (3). Advanced study of wind conducting, including gesture, rehearsal techniques, and repertoire. Prerequisites: Graduate standing and permission of the instructor.

MUG 5935 Conducting Seminar (1). An examination of the principal issues of conducting, emphasizing score reading and study, rehearsal, interpretation, and contemporary techniques. Prerequisites: Graduate standing and/or permission of the instructor.

MUG 6309 Graduate Applied Orchestral Conducting (3). Advanced study of orchestral conducting, including gesture, rehearsal techniques and repertoire. May be repeated. Prerequisites: Graduate standing or permission of the instructor.

MUH 5025 History of Popular Music in the U.S. (3). Overview of Afro-American and Euro-American popular music and its historical development. Examination of musical style and social context in lecture-discussion format with film and video.

MUH 5057 Music of the World (3). Survey of folk, popular and classical musical traditions from around the world. Examination of musical style and social context with film and performance demonstrations.

MUH 5065 Latino Music in the United States (3). Survey of Latin American musical traditions brought through immigration. Examination of musical style and social context in lecture-discussion format with film and performance demonstrations.

MUH 5066 Music of Mexico and Central America (3). A survey of folk, popular and classical musical traditions in the region. Examination of musical style and social context in lecture-discussion format with film and performance demonstrations.

MUH 5067 Music of the Caribbean (3). Survey of folk, popular and classical musical traditions and their ongoing connection with Caribbean populations in the U.S. Class includes film and performance demonstrations.

MUH 5075 Women in Music (3). Introduces students to women musicians including performers, composers, and researchers from all genres.

MUH 5219 Graduate Music History Survey (1-3). Music history overview for entering graduate students. Prerequisite: Music history placement test.

MUH 5345 Musical Style and Practice in the Baroque Era (3). Detailed treatment of the genres, styles, and composers of the Baroque period within the wider context of Baroque aesthetics and culture. Exploration and application of Baroque performance practice.

MUH 5546 Music of the Americas (3). An exploration of the folk, popular, and art music of Latin America.

MUH 5575 Survey of Asian Music (3). Examines the major Asian musical traditions within the cultural framework of history, arts and traditions.

MUH 5685 Graduate Music History Review I (1-3). Examination of music history achievements from antiquity through the renaissance. Musical structures and composers from these eras are studied through lectures supplemented by recordings and musical analysis. Prerequisites: Graduate standing and permission of the instructor.

MUH 5686 Graduate Music History Review II (1-3). Examination of music history achievements of the Baroque and Classical eras. Musical structures and composers from these eras are studied through lectures supplemented by recordings and musical analysis. Prerequisites: Graduate standing and permission of the instructor.

MUH 5687 Graduate Music History Review III (1-3). Examination of music history achievements from the Romantic era to the present. Musical structures and composers from these eras are studied through lectures supplemented by recordings and musical analysis. Prerequisites: Graduate standing and permission of the instructor.

MUH 5688 Graduate Music History Review IV (1-3). The fourth semester of the music history sequence covers the history of music from 1945 to the present, and includes the detailed study of its literature through critical listening and analysis. Prerequisite: Music majors.

MUH 5815 Jazz History: The Innovators (2). The work of four artists whose innovations have profoundly defined the jazz idiom from its beginning through the present day—Duke Ellington, Charlie Parker, Miles Davis, and John Coltrane.

MUH 6937 Special Topics in Music History (1-3). Graduate seminar with rotating topics, each one focusing on a narrow historical era, geographical area, or subject related to the history of music and its performance. May be repeated. Prerequisites: Pass all sections of Music History Placement Test, MUH 5219, or MUH 5685-88.

MUL 5405 Keyboard Literature I (3). Study of solo works for the keyboard from historical beginnings to 1828. Performance practices and stylistic analysis will be emphasized, with illustrations of representative works.

MUL 5406 Keyboard Literature II (3). Study of solo works for the keyboard from 1828 to the present. Performance practices and stylistic analysis will be emphasized, with illustrations of representative works. Prerequisite: MUL 5405.

MUL 5435 Guitar Literature (3). Survey of solo, chamber, and concerto guitar literature from the 16th century to the present. Repertoires will be examined from historical, analytical, pedagogical, and text-critical perspectives.

MUL 5456 Wind Instrument Literature (3). The history and development of Wind Instrument Literature from ca. 1650 to the present day. Music appropriate for all levels of instruction from middle school through college level is included. Prerequisites: Graduate standing in Music and permission of the instructor.

MUL 5495 Survey of Organ Literature (3). Survey of organ literature, history, performance practice and organ design. Includes historic sound recordings and in-class performance. Prerequisites: Graduate standing in Music and permission of the instructor.

MUL 5496 Organ Literature I (3). Survey of organ literature from antiquity to 1750 in the German, French, Italian schools.

MUL 5497 Organ Literature II (3). Survey of organ literature from 1750 to the present in the German, French, and American schools.

MUL 5505 Symphonic Literature (3). The study of the symphony and the symphonic tone poem from its origin in the Baroque period to the twentieth century. Prerequisites: Graduate standing in Music and permission of the instructor.

MUL 5607 Vocal Literature I (2). A survey of solo vocal literature from the 17th century to the late 18th century. Emphasis will be placed on a discussion of ornamentation and performance-practice and comparisons of editions. Prerequisites: Graduate standing in Music and permission of the instructor.

MUL 5609 Survey of Art Song Literature (3). An historical survey of the literature for solo voice from the

medieval period to the national schools of the contemporary era.

MUL 5624 Vocal Literature II (2). The German Lied and its poetry. Emphasis will be placed on a study of the poets and their poetry, important facts of the composers' lives and times and other musical and cultural developments. Prerequisite: Graduate Standing.

MUL 5625 Vocal Literature III (2). The French Melodie. Emphasis will be placed on a study of the poets and their poetry, their styles and schools, the composers' lives and times and other musical and cultural developments. Prerequisite: Graduate Standing.

MUL 5626 Vocal Literature IV (2). Twentieth-century art song. Emphasis will be placed on the rise of the nationalist schools, the development of atonalism and other modern schools of thought. Prerequisites: Graduate standing in Music and permission of the instructor.

MUL 5645 Choral Literature (3). A survey of sacred and secular choral literature from the Middle Ages to the present. Emphasis on stylistic analysis and performance practice for each style period. Includes score study, aural analysis of recorded performances and in-class performances. Prerequisites: Graduate standing in Music and permission of the instructor.

MUL 5671 Opera Literature (3). A chronological survey of operatic literature from the 17th century to the present day. Emphasis placed on the historical milieu in which the operatic form evolved through the ages. Prerequisites: Graduate standing in Music and permission of the instructor.

MUM 5705 Advanced Business of Music (3). Topics include strategic planning, employee development, and decision making. Also includes a study of publishing, collection agencies, creative unions, and contracts with composers and publishers. Prerequisites: MUM 4301 and permission of the graduate advisor.

MUM 5715 Performing Arts Production I (2). Focus on the various aspects of performing arts production. Students attend performances of every possible genre of performing arts and critique the production and the venue. Prerequisite: Permission of the graduate advisor.

MUM 5725 Live Music Operations I (2). How promoters and producers project a profit margin and the ability to oversee a profit; considering overhead, scheduling, accommodations, concessions, sound and light. Prerequisite: Permission of the graduate advisor.

MUM 5726 Live Music Operations II (3). Continuation of MUM 5725, Live Music Operations I. Emphasis on promoters', producers', and managers' ability to project a profit margin. An on-campus production is required as the final project. Prerequisites: MUM 5725 and permission of the graduate advisor.

MUL 5728C Survey of Cuban Piano Music (2). The course is an in-depth survey of Cuban piano music written during the XIX and XX centuries, accompanied by an examination of Cuba's cultural and political heritage.

MUM 5795 Music Production Laboratory I (1). Students are assigned to work in the production of 10-15 individual concert productions. The productions are varied and provide the students the opportunity to put in practice work

learned in the classroom. Prerequisite: Permission of the graduate advisor.

MUM 5796 Music Production Laboratory II (1). A continuation of Music Production Lab I. Students are assigned to work in the production of 10-15 individual concert productions. Prerequisites: MUM 5795 and permission of the graduate advisor.

MUM 5808 Grant Writing for the Arts (2). Designed to familiarize the student with the tools and techniques in writing a successful grant proposal. Focuses on the perspective of the arts manager/administrator in relations to grant writing and grant management.

MUM 5809 Music Production Seminar (3). Explores issues and practical applications in the management of music centers, arts organizations and arts centers. Includes examination of local arts centers, local arts councils, music venues, performing arts venues, arts organization and arts service organizations. Prerequisites: Graduate standing or permission of instructor.

MUM 5946 Performance Arts Internship (1-9). Interns assist and/or observe in all job functions and duties at an entertainment venue. Areas include: production management; design services; technical production; talent booking and casting; and creative show development. Prerequisite: Permission of the graduate advisor.

MUN 5105L FIU Marching Band (3). A study and performance of pop, jazz, and rock musical selections for the instrumental medium. Students will demonstrate what they have learned by performing and through individualized playing examinations. Prerequisite: Permission of the instructor.

MUN 5125L Symphony Band (1). Concert Band ensemble for music majors on secondary instruments and non-music majors. Various types of concert band literature covered from differing grade levels. Course open to anyone who has previous experience playing a wind or percussion instrument.

MUN 5145L Symphonic Wind Ensemble (1). Readings and performances of wind ensemble music from the 18th century to the present. Open to wind and percussion instrumentalists. Prerequisite: Permission of the conductor.

MUN 5215 Orchestra (1). An instrumental ensemble performing works from the symphonic repertory. Prerequisites: Previous experience and permission of the conductor.

MUN 5245 String Ensemble (1). Performance of orchestra literature for large string ensembles. Prerequisite: Permission of the instructor.

MUN 5315 Concert Choir (1). A choral ensemble performing music written and arranged for mixed voices. Prerequisite: Permission of the instructor.

MUN 5325 Women's Chorus (1). A choral ensemble performing music written or arranged for women's voices. Prerequisite: Permission of the instructor.

MUN 5335 Men's Chorus (1). A choral ensemble performing music written or arranged for men's voices. Prerequisite: Permission of the instructor.

MUN 5345 University Chorale (1). A mixed choir performing repertoire from Renaissance to Modern, as well as multicultural works. Prerequisite: Permission of the conductor.

MUN 5385L University Singers (1). A chorus performing a repertoire primarily from great choral works. Large orchestral accompaniment as well as various instrumental ensembles will be utilized. Prerequisite: Permission of the conductor.

MUN 5396L Gospel Choir (1). This course consists of the study and performance of sacred music in the Gospel Choir style. Voice technique, musicianship, and performance practice elements will be discussed and utilized.

MUN 5435L University Brass Choir (1). A study and performance of literature written for the brass medium (trumpet, horn, trombone, euphonium, and tuba) from the pre-baroque, baroque, classical, romantic and contemporary periods. May be repeated. Prerequisite: Permission of the instructor.

MUN 5445L Percussion Ensemble (1). A study and performance of music literature characteristic of the percussion ensemble. Prerequisite: Permission of the instructor.

MUN 5455L Piano Ensemble (1). The presentation and performance of music literature characteristic of piano and pianos in ensemble.

MUN 5465 Chamber Music (1). Small ensemble in the performing of chamber music literature. Prerequisite: Permission of the conductor.

MUN 5477 Collegium Musicum (1). Collegium musicum provides a forum for the study and performance of the musical literature of the Medieval, Renaissance, and Baroque eras. Participation in the composition of program notes and rehearsal direction are additional components. Prerequisite: Permission of the instructor.

MUN 5485 Guitar Ensemble (1). The presentation and performance of music literature characteristic of the Guitar Ensemble. Prerequisite: Permission of the conductor.

MUN 5496 New Music Ensemble (1). A chamber group of varying instrumentation and size performing art music from the 20th century with emphasis on music from the past 20 years. Explores electronics, multimedia works, etc. Prerequisite: Permission of the instructor.

MUN 5515L Accompanying (1). Accompanying instrumental and vocal students in studio and recital situations.

MUN 5715 Studio Jazz Ensemble (1). An ensemble to provide creative professional-level experience in the contemporary popular idiom. Permission of the conductor.

MUN 5716 Jazz Combo Class (1). Harmonic practice, formal procedures, rhythmic and improvisational practices of jazz performance in the small group. Prerequisite: Permission of the conductor.

MUN 5725 Jazz Vocal Ensemble (1). Students learn to perform both as a soloist and ensemble singer. Expectations are progressive in accordance with student's class level. Ensemble includes a rhythm section to accompany the vocalists.

MUN 5785 Jazz Ensemble Rehearsal Techniques (1). An ensemble that provides its members a creative approach to jazz ensemble rehearsal techniques, literature, improvisation and related materials. Prerequisite: Permission of the instructor.

MUN 5795 Latin Jazz Ensemble (1). An ensemble to provide professional-level experience in the salsa/Latin jazz idiom. May be repeated. Prerequisite: Permission of the instructor.

MUN 5826 Latin American Music Ensemble (1). Study and performance of one or more folk and/or popular musical styles from Latin America.

MUO 5505 Opera Workshop (1). The presentation and performance of music literature indigenous to the opera stage. Prerequisite: Permission of the director.

MUR 5946 Organ Practicum (2). Study of practical aspects of organ performance as it pertains to employment within a sacred chamber music setting. MUS 5205 Graduate Review Diction I (2). To review the rules and methods of correct pronunciation of Italian, French and Latin lyric diction as applied to singing opera, oratorio and art song.

MUS 5205 Graduate Review Diction I (2). To review the rules and methods of correct pronunciation of Italian, French, and Latin lyric diction as applied to singing opera, oratorio, and art song.

MUS 5206 Graduate Review Diction II (2). A review of the rules and skills for proper enunciation of English, German and Spanish language in the performance of classical vocal music.

MUS 5213 English Diction (1). Refine enunciation skills of the English language as used by singers in opera, oratorio, and art song literature. Extensive study of the use of International Phonetic Alphabet and its application. Corequisite: Applied MVV, MVK, MUG

MUS 5226C French Diction (1). Refine enunciation skills of the French language as used by singers in opera, oratorio, and art song literature. Extensive study of the use of International Phonetic Alphabet and its application. Corequisite: Applied MVV, MVK, MUG

MUS 5236C German Diction (1). Refine enunciation skills of the German language as used by singers in opera, oratorio, and art song literature. Extensive study of the use of International Phonetic Alphabet and its application. Corequisites: Applied MVV, MVK, MUG

MUS 5345 MIDI Technology (2). Introduction to MIDI technology including sequencing, notation, patch editing and a variety of other applications. Prerequisites: Graduate standing in Music and permission of the instructor.

MUS 5246C Italian Diction (1). Refine enunciation skills of the Italian language as used by singers in opera, oratorio, and art song literature. Extensive study of the use of International Phonetic Alphabet and its application. Corequisite: Applied MVV, MVK, MUG

MUS 5512 Sound Reinforcement (2). Exploration of live music on location, dealing with commonly encountered acoustical problems and how to overcome them. Prerequisite: Permission of the graduate advisor.

MUS 5527 Laptop and Electronic Arts Ensemble (1). The Laptop and Electronic Arts Ensemble explores new combinations of live electronics with acoustic instruments and other media by performing a diverse repertoire of music and new works. May be repeated. Prerequisites: MUC 2301/MUC 6305.

MUS 5655 Expanding Artistic Expression (2). Focuses on expanding the horizons of the artistic vision of the student. Accomplished through a series of projects. Prerequisite: Permission of the graduate advisor.

MUS 5711 Music Bibliography (2). Library research methods and materials; documentation of research results in bibliographic style. Develops critical thinking and evaluative skills regarding sources of information, print and online. Prerequisites: Graduate standing in Music and permission of the instructor.

MUS 5905 Directed Study (VAR). Designed to provide areas of exploration and specialization beyond the basic selected study programs, such as electronic music, religious music literature, sound techniques, etc. Prerequisite: Permission of the instructor.

MUS 5906 Master's Recital (1-6). For students working on a recital for Master in Music. To be completed under the supervision of a faculty member. Prerequisites: Graduate standing and permission of the instructor.

MUS 5910 Research (VAR). Research composition or performance projects, under the guidance and direction of the music faculty. (May be repeated). Prerequisite: Permission of the instructor.

MUS 5971 Thesis (1-6). Research and/or performances towards completion of master's thesis work. Prerequisites: Graduate standing and permission of the instructor.

MUS 6658 Experimental Music and Arts (3). The course covers the history of interdisciplinary art created in the 20th century while giving students from different areas the opportunity to create interdisciplinary works.

MUT 5051 Graduate Theory Survey (1-3). Analytical, theoretical and aural skills required for successful graduate studies in music. Prerequisites: Graduate standing in Music and permission of the instructor.

MUT 5152 Comprehensive Musical Systems (3). Examination of various comprehensive theoretical systems utilized in the analysis of music. Prerequisites: Graduate standing in Music and permission of the instructor.

MUT 5316 Advanced Orchestration (3). Examination of orchestration techniques utilized by composers from the Baroque era through current times. Prerequisites: Graduate standing in Music and permission of the instructor.

MUT 5355 Advanced Jazz Arranging and Composition (2). Scores and recordings of various sized jazz ensembles are studied for technique and style. Students' compositions and arrangements are performed. Topics include: forms, voicing techniques, instrumentation-live performance vs. recording session. Prerequisites: MUT 4353; MUT 4663; MUT 4664.

MUT 5381 Arranging (3). A course in practical arranging for the public school teacher, including choral, band, and

popular arranging. Prerequisites: MUT 2117 and MUT 2227.

MUT 5411 Modal Counterpoint (3). Develop skills necessary to write in the Renaissance style and to analyze the masterworks of Palestrina, Lassus, Victoria, and others. Prerequisites: Graduate standing in Music and permission of the instructor.

MUT 5486 Advanced Jazz Rehearsal Techniques (2). Study and practical application of complete preparation, programming, and rehearsing of small and large jazz ensembles. Students study scores and recordings of various jazz styles and rehearse school's ensembles. Prerequisites: MUN 4784; MUT 4643; MUT 4663; MUT 4664.

MUT 5585 Musical Styles Through Strict Composition (3). This course is designed to develop basic compositional skills for writing works in all forms. Prerequisites: Graduate standing in Music and permission of the instructor.

MUT 5627 Schenkerian Analysis (3). Advanced studies in Schenkerian analysis of tonal music. Prerequisites: Graduate standing in Music and permission of the instructor.

MUT 5628 Atonal Analysis (3). Advanced studies in set theory and serial techniques of twentieth-century music. Prerequisites: Graduate standing in Music and permission of the instructor.

MUT 5629 Analytical Techniques (3). Examination and practice of various techniques utilized in the analysis of art music from the common practice period through the 20th century. Prerequisites: Graduate standing in Music and permission of the instructor. Placement tests required.

MUT 5646 Advanced Jazz Techniques I (3). A comprehensive, theoretical study of topics related to jazz performance. Includes the nature of improvisation, advanced jazz harmony, theory of jazz improvisation, transcribing and analyzing solos of jazz masters. Prerequisite: MUT 4643.

MUT 5647 Advanced Jazz Techniques II (3). A continuing study of topics related to jazz performance. Includes analyzing solos of jazz masters, development of repertoire, style, and aesthetic concepts. Prerequisite: MUT 5646.

MUT 5746 Jazz Pedagogy (2). Materials, techniques, and philosophies related to teaching jazz. Includes preparation of courses, course outline and syllabi, lesson plans, lectures. Texts and other resources such as videos, recordings, periodicals, are examined. Prerequisites: MUT 4663; MUT 5355.

MUT 5930 Special Topics (3). Examination of composers, compositional schools, or other areas of specialization and/or interest to the theory/composition faculty. Prerequisites: Graduate standing in Music and permission of the instructor.

MVB 5251 Secondary Applied Trumpet (1). Individual instruction in applied music on trumpet as a secondary instrument. Prerequisite: Permission of the instructor.

MVB 5252 Secondary Applied French Horn (1). Individual instruction in applied music on French horn as a

secondary instrument. Prerequisite: Permission of the instructor.

MVB 5253 Secondary Applied Trombone (1). Individual instruction in applied music on trombone as a secondary instrument. Prerequisite: Permission of the instructor.

MVB 5254 Secondary Applied Baritone Horn (1). Individual instruction in applied music on baritone horn as a secondary instrument. Prerequisite: Permission of the instructor.

MVB 5255 Secondary Applied Tuba (1). Individual instruction in applied music on tuba as a secondary instrument. Prerequisite: Permission of the instructor.

MVB 5351 Principal Applied Trumpet (2). Individual instruction in applied music on trumpet as a principal instrument. Music majors only.

MVB 5352 Principal Applied French Horn (2). Individual instruction in applied music on French horn as a principal instrument. Music majors only.

MVB 5353 Principal Applied Trombone (2). Individual instruction in applied music on applied trombone as a principal instrument. Music majors only.

MVB 5354 Principal Applied Baritone Horn (2). Individual instruction in applied music on baritone horn as a principal instrument. Music majors only.

MVB 5355 Principal Applied Tuba (2). Individual instruction in applied music on tuba as a principal instrument. Music majors only.

MVB 5451 Major Applied Trumpet (3). Individual instruction in applied music on trumpet as a major instrument. Music majors only.

MVB 5452 Major Applied French Horn (3). Individual instruction in applied music on French horn as a major instrument. Music majors only.

MVB 5453 Major Applied Trombone (3). Individual instruction in applied music on trombone as a major instrument. Music majors only.

MVB 5454 Major Applied Baritone Horn (3). Individual instruction in applied music on baritone horn as a major instrument. Music majors only.

MVB 5455 Major Applied Tuba (3). Individual instruction in applied music on tuba as a major instrument. Music majors only.

MVJ 5150 Jazz Piano Techniques (1). Performance of basic jazz standards. Includes basic techniques of the instrument, chord voicing, comping, lead sheet realization for non-pianists. Prerequisites: Graduate standing or permission of the instructor.

MVJ 5250 Secondary Jazz Piano (1). Individual instruction in applied jazz music on piano. Prerequisites: Preceding course in sequence or permission of the instructor.

MVJ 5253 Secondary Jazz Guitar (1). Individual instruction in applied jazz music on guitar. Prerequisites: Preceding course in sequence or permission of the instructor.

MVJ 5254 Secondary Jazz Bass (1). Individual instruction in applied jazz music on bass. Prerequisites:

Preceding course in sequence or permission of the instructor.

MVJ 5255 Secondary Jazz Flute (1). Individual instruction in applied jazz music on flute. Prerequisites: Preceding course in sequence or permission of the instructor.

MVJ 5256 Secondary Jazz Saxophone (1). Individual instruction in applied jazz music on saxophone. Prerequisites: Preceding course in sequence or permission of the instructor.

MVJ 5257 Secondary Jazz Trumpet (1). Individual instruction in applied jazz music on trumpet. Prerequisites: Preceding course in sequence or permission of the instructor.

MVJ 5258 Secondary Jazz Trombone (1). Individual instruction in applied jazz music on trombone. Prerequisites: Preceding course in sequence or permission of the instructor.

MVJ 5259 Secondary Latin Jazz Percussion (1). Individual instruction in applied jazz music on percussion. Prerequisites: Preceding course in sequence or permission of the instructor.

MVJ 5350 Principal Applied Jazz: Keyboard (2). Individual advanced instruction on major instrument. An in-depth study of overall instrumental technique, eminent jazz styles, and other performance practices that are particularly relevant to jazz.

MVJ 5351 Principle Applied Jazz Voice (2). Individual instruction in the Jazz Vocal Idiom. Study includes health and vocal technique, advanced development of repertoire, specific and necessary skills for compelling public performance.

MVJ 5353 Principal Applied Jazz Guitar (2). Individual advanced instruction on major instrument. An in-depth study of overall instrumental technique, eminent jazz styles, and other performance practices that are particularly relevant to jazz.

MVJ 5354 Principal Applied Jazz: Bass (2). Individual advanced instruction on major instrument. An in-depth study of overall instrumental technique, eminent jazz styles, and other performance practices that are particularly relevant to jazz. Prerequisite: MVJ 4344.

MVJ 5355 Principal Applied Jazz: Flute (2). Individual advanced instruction on major instrument. An in-depth study of overall instrumental technique, eminent jazz styles, and other performance practices that are particularly relevant to jazz.

MVJ 5356 Principal Applied Jazz: Saxophone (2). Individual advanced instruction on major instrument. An in-depth study of overall instrumental technique, eminent jazz styles, and other performance practices that are particularly relevant to jazz.

MVJ 5357 Principal Applied Jazz: Trumpet (2). Individual advanced instruction on major instrument. An in-depth study of overall instrumental technique, eminent jazz styles, and other performance practices that are particularly relevant to jazz.

MVJ 5358 Principal Applied Jazz: Trombone (2). Individual advanced instruction on major instrument. An in-

depth study of overall instrumental technique, eminent jazz styles, and other performance practices that are particularly relevant to jazz.

MVJ 5359 Principal Applied Jazz: Percussion (2). Individual advanced instruction on major instrument. An in-depth study of overall instrumental technique, eminent jazz styles, and other performance practices that are particularly relevant to jazz.

MVJ 5450 Major Applied Jazz Piano (3). Individual instruction in applied music at the graduate level. Prerequisite: Audition.

MVJ 5451 Major Applied Jazz Voice (3). Individual instruction in the Jazz Vocal Idiom at an advanced graduate level, consistent with the other courses in the MM in Jazz performance degree. Study includes healthy vocal technique, eminent vocal jazz and related musical styles, singing with a microphone, advanced development of repertoire, specific and necessary skills for a strong public and recorded performance.

MVJ 5453 Major Applied Jazz Guitar (3). Individual instruction on major instrument, focusing on the jazz idiom. An in-depth study of overall instrumental technique, eminent styles, and other performance practices that are particularly relevant to jazz and commercial performance. Prerequisite: Music majors only.

MVJ 5454 Major Applied Jazz Bass (3). Individual instruction on major instrument, focusing on the jazz idiom. An in-depth study of overall instrumental technique, eminent styles, and other performance practices that are particularly relevant to jazz and commercial performance. Prerequisite: Music majors only

MVJ 5455 Major Applied Jazz Drums (3). Individual instruction in applied music at the graduate level. Prerequisite: Audition.

MVJ 5456 Major Applied Jazz Saxophone (3). Individual instruction on major instrument. An in-depth study of overall instrumental technique, styles, and other performance practices particularly relevant to jazz. Prerequisite: Audition.

MVJ 5457 Major Applied Jazz Trumpet (3). Individual instruction in applied music on jazz trumpet at a major level. Prerequisite: Music majors only.

MVJ 5458 Major Applied Jazz Trombone (2). Individual instruction in applied music on jazz trombone at a major level. Prerequisite: Music majors only.

MVJ 5459 Major Applied Jazz Latin Percussion (3). Individual instruction in applied music on jazz percussion as a major instrument. Prerequisite: Music majors only.

MVK 5251 Secondary Applied Piano (1). Individual instruction in applied music on piano as a secondary instrument. Prerequisite: Permission of the instructor.

MVK 5253 Secondary Applied Organ (1). Individual instruction in applied music on organ as a secondary instrument. Prerequisite: Permission of the instructor.

MVK 5351 Principal Applied Piano (2). Individual instruction in applied music on piano as a principal instrument. Music majors only.

MVK 5353 Principal Applied Organ (2). Individual instruction in applied music on organ as a principal instrument. Music majors only.

MVK 5451 Major Applied Piano (3). Individual instruction in applied music on piano as a major instrument. Music majors only.

MVK 5453 Major Applied Organ (3). Individual instruction in applied music on organ as a major instrument. Music majors only.

MVK 5605 Organ Pedagogy (2). An overview of historical and modern organ methods, pedagogies and supporting material.

MVK 5651 Piano Pedagogy (2). Survey of current piano teaching methods.

MVK 5712 Survey of Dance Accompaniment (1). Survey of European dance tradition and musical accompaniment. Particular emphasis on the selection, improvisation/composition of musical accompaniment to Classical Ballet. Prerequisite: Graduate piano majors.

MVO 5651 Graduate Pedagogy (1). The development of teaching skills required by graduate assistants, including classroom skills, designing examinations, etc. Prerequisite: Graduate assistants.

MVP 5251 Secondary Applied Percussion (1). Individual instruction in applied music on percussion as a secondary instrument. Prerequisite: Permission of the instructor.

MVP 5351 Principal Applied Percussion (2). Individual instruction in applied music on percussion as a principal instrument. Music majors only.

MVP 5451 Major Applied Percussion (3). Individual instruction in applied music on percussion as a major instrument. Music majors only.

MVS 5251 Secondary Applied Violin (1). Individual instruction in applied music on violin as a secondary instrument. Prerequisite: Permission of the instructor.

MVS 5252 Secondary Applied Viola (1). Individual instruction in applied music on viola as a secondary instrument. Prerequisite: Permission of the instructor.

MVS 5253 Secondary Applied Cello (1). Individual instruction in applied music on cello as a secondary instrument. Prerequisite: Permission of the instructor.

MVS 5254 Secondary Applied Double Bass (1). Individual instruction in applied music on double bass as a secondary instrument. Prerequisite: Permission of the instructor.

MVS 5255 Secondary Applied Harp (1). Individual instruction in applied music on harp as a secondary instrument. Prerequisite: Permission of the instructor.

MVS 5256 Secondary Applied Guitar (1). Individual instruction in applied music on guitar as a secondary instrument. Prerequisite: Permission of the instructor.

MVS 5351 Principal Applied Violin (2). Individual instruction in applied music on violin as a principal instrument. Music majors only.

MVS 5352 Principal Applied Viola (2). Individual instruction in applied music on viola as a principal instrument. Music majors only.

MVS 5353 Principal Applied Cello (2). Individual instruction in applied music on cello as a principal instrument. Music majors only.

MVS 5354 Principal Applied Double Bass (2). Individual instruction in applied music on double brass as a principal instrument. Music majors only.

MVS 5355 Principal Applied Harp (2). Individual instruction in applied music on harp as a principal instrument. Music majors only.

MVS 5356 Principal Applied Guitar (2). Individual instruction in applied music on guitar as a principal instrument. Music majors only.

MVS 5451 Major Applied Violin (3). Individual instruction in applied music on violin as a major instrument. Music majors only.

MVS 5452 Major Applied Viola (3). Individual instruction in applied music on viola as a major instrument. Music majors only.

MVS 5453 Major Applied Cello (3). Individual instruction in applied music on cello as a major instrument. Music majors only.

MVS 5454 Major Applied Double Bass (3). Individual instruction in applied music on double brass as a major instrument. Music majors only.

MVS 5455 Major Applied Harp (3). Individual instruction in applied music on harp as a major instrument. Music majors only.

MVS 5456 Major Applied Guitar (3). Individual instruction in applied music on guitar as a major instrument. Music majors only.

MVS 5545 Orchestral Audition Repertoire (3). This course prepares upper string players, primarily violinists, for professional auditions by coaching them intensively in the standard audition repertoire and by holding mock auditions. Prerequisite: Permission of the instructor.

MVV 5251 Secondary Voice (1). Individual instruction in applied music on voice as a secondary instrument. Prerequisite: Permission of the instructor.

MVV 5351 Principal Applied Voice (2). Individual instruction in applied music on trumpet as a principal instrument. Music majors only.

MVV 5451 Major Applied Voice (3). Individual instruction in applied music on voice as a major instrument. Music majors only.

MVV 5651 Graduate Vocal Pedagogy I (2). An introduction to the history and development of vocal pedagogy for the graduate voice major. Emphasis will be placed on a study of the anatomy and acoustics of the human voice.

MVV 5652 Graduate Vocal Pedagogy II (2). Practical application of the principles of vocal technique in the studio. Emphasis will be placed on the psychological factors which apply to singing and the teaching of singing. Prerequisite: Graduate Vocal Pedagogy I.

MVW 5251 Secondary Applied Flute (1). Individual instruction in applied music on flute as a secondary instrument. Prerequisite: Permission of the instructor.

MVW 5252 Secondary Applied Oboe (1). Individual instruction in applied music on oboe as a secondary instrument. Prerequisite: Permission of the instructor.

MVW 5253 Secondary Applied Clarinet (1). Individual instruction in applied music on clarinet as a secondary instrument. Prerequisite: Permission of the instructor.

MVW 5254 Secondary Applied Bassoon (1). Individual instruction in applied music on bassoon as a secondary instrument. Prerequisite: Permission of the instructor.

MVW 5255 Secondary Applied Saxophone (1). Individual instruction in applied music on saxophone as a secondary instrument. Prerequisite: Permission of the instructor.

MVW 5351 Principal Applied Flute (2). Individual instruction in applied music on flute as a principal instrument. Music majors only.

MVW 5352 Principal Applied Oboe (2). Individual instruction in applied music on oboe as a principal instrument. Music majors only.

MVW 5353 Principal Applied Clarinet (2). Individual instruction in applied music on clarinet as a principal instrument. Music majors only.

MVW 5354 Principal Applied Bassoon (2). Individual instruction in applied music on bassoon as a principal instrument. Music majors only.

MVW 5355 Principal Applied Saxophone (2). Individual instruction in applied music on saxophone as a principal instrument. Music majors only.

MVW 5451 Major Applied Flute (3). Individual instruction in applied music on flute as a major instrument. Music majors only.

MVW 5452 Major Applied Oboe (3). Individual instruction in applied music on oboe as a major instrument. Music majors only.

MVW 5453 Major Applied Clarinet (3). Individual instruction in applied music on clarinet as a major instrument. Music majors only.

MVW 5454 Major Applied Bassoon (3). Individual instruction in applied music on bassoon as a major instrument. Music majors only.

MVW 5455 Major Applied Saxophone (3). Individual instruction in applied music on saxophone as a major instrument. Music majors only.

Shahin Vassigh, *Professor and Director of Technology Research Development*

The Department of Architecture is dedicated to the education of future generation of ethical professionals, creative designers, and informed citizens. We believe architecture to be a conceptually based endeavor and a form of critical inquiry that addresses the physical environment from the scale of the city to the scale of furniture. To realize these objectives, architectural design is taught as a critical and creative enterprise.

The Department offers three graduate degrees: The accredited Master of Architecture (M. Arch), the advanced post-professional Master of Arts in Architecture (MAA) and the post-professional Doctor of Design (DDes).

Applicants to the school should plan for the financial aspects of a design education. These include the cost associated with required access to a laptop computer as well as the costs of software, travel and field trips, tools and equipment, and modeling supplies. Students in the program must have access to a laptop computer through purchase, lease or other arrangements. For further information contact the Department.

A broad interdisciplinary framework characterizes the program, with emphasis placed upon six thematic areas: architectural design, history/theory, building technologies, digital technology, ethics and professional practice, and general education.

The program maintains a commitment to excellence in teaching, creative activity, research and scholarship and seeks to attract a diverse student body with a variety of academic backgrounds, experiences and interests. Our students and faculty members reflect the diverse areas of knowledge that play a critical role in the making of the built environment and in the establishment of successful design practices.

Miami is an urban laboratory for the study of architecture. The region provides limitless possibilities for exploring historic architecture and urbanism, as well as contemporary works by many of the world's leading architects. At the same time, the challenges of rapid growth and urban development in Miami and the region have created an ideal environment for the study of these issues. The program takes advantage of Miami's position as one of the principal academic and commercial gateways to Latin America and Europe.

Professional Degree

The Master of Architecture (M.Arch) is a professional degree accredited by the National Architectural Accrediting Board (NAAB). This degree is available to students with or without pre-professional degrees in architecture. The Department offers the following professional degree tracks:

Master of Architecture (non-pre-professional degree + 105 graduate credits)

Students with any undergraduate degree and no previous experience in architectural study follow the Professional Three-Year M. Arch Plan, consisting of 105 credit hours. It is typically completed in approximately three years.

Master of Architecture (pre-professional degree + 60 graduate credits)

Students who have earned an undergraduate pre-professional four-year degree in architecture follow the Professional Two-Year M. Arch Plan, consisting of 60 credit hours. It is usually completed in two years.

Master of Architecture (72 undergraduate credits + 102 graduate credits)

Students may also earn the M. Arch through the 174 credit hour track which begins freshman year with two years of pre-graduate coursework (72 credit hours) and concludes after an additional 102 credit hours of integrated graduate level credit hours taken over three or four years. Students will transition seamlessly between their pre-graduate and graduate study. The Professional Master of Architecture degree (M. Arch) is conferred at the conclusion of the entire course of study (174 credit hours). No undergraduate degree is awarded at any point in this plan.

Post-Professional Degrees

Applicants who already hold a professional degree in architecture (B. Arch or M. Arch) from a program accredited by the National Architectural Accrediting Board (NAAB) should apply for the One-Year Post-professional Master of Arts in Architecture (MAA) consisting of 36 credit hours, or the four-semester post-professional Doctor of Design (DDes), consisting of 60 credit hours. Students will pursue advanced and focused study and have the opportunity to work with faculty on research projects.

NAAB Statement

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and

the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Florida International University, College of Architecture and The Arts, Department of Architecture offers the following NAAB-accredited degree program tracks:

Master of Architecture (72 undergraduate credits + 102 graduate credits)

Master of Architecture (pre-professional degree + 60 graduate credits)

Master of Architecture (non-pre-professional degree + 105 graduate credits)

Next accreditation visit for all program tracks: 2026

Ownership of Student Work

Student work, submitted to the Department in satisfaction of course or degree requirements, becomes the physical property of the Department. However, students retain all rights to the intellectual property of such work. This work may include papers, drawings, models, and other materials. The Department assumes no responsibility for safeguarding such materials. At its discretion, the Department may retain, return, or discard such materials. The Department will not normally discard the materials of currently enrolled students without giving the student a chance to reclaim them.

Admissions Requirements for all Professional Graduate Degree Tracks in the Department of Architecture

All applicants must meet University graduate admissions requirements. Applicants to the Department of Architecture degree programs must also submit a portfolio of creative work for review.

The portfolio review examines evidence of creative ability, academic success, and professional achievement. It is an important component of the admissions process. Please contact the Department of Architecture for specific portfolio requirements. The deadline for portfolio submission is January 15th of each year. Portfolios submitted after this date will be considered if studio space is available.

Students who have successfully completed the portfolio review process must also meet the minimum requirements of an undergraduate degree from an accredited college or university with undergraduate grade point average (GPA) of 3.0 on a 4.0 scale, or hold a graduate degree from an accredited institution or have completed the entirety of the pre-graduate component of the Department's Accelerated MArch track to be fully admitted in the graduate program.

Progression Requirements

1. No grade below a 'C' will be accepted for graduation in required courses or professional electives.

2. Student must achieve an overall cumulative graduate GPA of 3.0 in order to apply for to graduation. Refer to Graduate Catalog and the University Graduate School Rules and Regulations for information on Academic Warning, Probation, and Dismissal.

Academic Travel

The Architecture Department values academic travel both nationally and abroad. Immersion in other cities and cultures provides our students with critical experiences that enhance learning. The firsthand interaction with exemplary completed buildings and sites, as well as those under construction, enrich learning throughout the curriculum. It is a requirement of the academic program in Architecture that each student participate in at least one of the department's travel options before graduation. The department offers three options for travel: 1-Residence abroad for a full semester through our Genoa, Italy, program; 2- International travel through one of the many study abroad programs offered each summer; and 3-Domestic travel outside Miami as part of a design studio. Students must hold a 3.0 or higher cumulative graduate GPA to participate in Study Abroad programs.

Miami Beach Urban Studios (MBUS)

MBUS offers architecture students a unique opportunity to study in one of the nation's most vibrant and artistic urban centers. While studying at MBUS, students gain valuable professional experience working with local design practitioners, and with innovative public and private organizations in the area. Located in the iconic 420 Lincoln Road building, MBUS provides architecture students expansive gallery/exhibition spaces, design studios, and classroom space, that encourage collaborative explorations with students studying in other areas of study within the College of Architecture and The Arts, including: Music, Art, Art History, Theater, and Communication Arts. MBUS provides students with a base from which they may explore local fine arts, designs, performances, museums and galleries, including FIU's The Wolfsonian-FIU, located only blocks away. Important areas of study for architecture students at MBUS include, but not limited to, Sustainability, Historic Preservation, Urbanism, Hospitality Design, Community Design, and Architecture and Real Estate Development.

Master's Project/Thesis Requirement

Graduate students in all masters degree programs are required to undertake a master's project or a master's thesis as part of their course of study in the Department of Architecture.

Master of Architecture

**Professional Degree Tracks
(Accredited by NAAB)**

THREE-YEAR TRACK – 105 Credits

A professional degree for students with a Bachelor of Arts or a Bachelor of Science, or equivalent, from an accredited institution.

Degree Track (105)

Prerequisites: (11)

PHY 2053	Physics w/o Calculus	4
MAC 1147	Pre-Calculus	4
ARC 4058	Fundamentals of Digital Design	3

First Year (Fall Semester): (15)

ARC 5075	Formative Studio I	6
ARC 5711	History of Design from Antiquity to Middle Ages	3
ARC 5249	Introduction to Design Theories	3
ARC 5612	Environmental Systems in Architecture 1	3

First Year (Spring Semester): (18)

ARC 5076	Formative Studio 2	6
ARC 5733	History of Design Renaissance to 1840	3
ARC 5582	Structures 1	1
ARC 5582L	Structures 1 Lab	2
ARC 5467	Materials and Methods of Construction	3
SPC 5066	Presentation Skills for Architects	3

First Year (Summer Semester): (15)

ARC 5077	Formative Studio 3	6
ARC 5554	Structures 2	1
ARC 5554L	Structures 2 Lab	2
ARC 5176C	Computer Practice II	3
ARC Directed Elective		3

Second Year (Fall Semester): (15)

ARC 5361	Integrated Comprehensive Design	6
ARC 5205	Adv. Design Theories	3
ARC 5483	Integrated Building Systems	3
ARC 5744	History of Design from the XIX Century to Present	2
ARC 5744L	History of Design from the XIX Century to Present Lab	1

Second Year (Spring Semester): (12)

ARC 5362	Architectural Design 9: Sustainable Practices	6
ARC 5555	Structures 3	1
ARC 5555L	Structures 3 Lab	2
ARC 5621	Environmental Systems in Architecture 2	3

Third Year (Fall Semester) (Miami or Genoa Italy): (15)

ARC 6356	Architectural Design 10	6
ARC Directed Elective		3
ARC Directed Elective		3
ARC Directed Elective		3

Third Year (Spring Semester): (15)

ARC 6970	Master's Project	6
ARC 6280	Professional Office Practice	3
ARC Directed Elective		3
ARC 6949	Architect Registration Exam Preparation 3	3

TWO-YEAR TRACK – 60 Credits

A professional track for students who have completed a 4-year pre-professional Bachelor of Arts in Architecture or Bachelor of Architectural Studies degree.

Degree Track (60)**First Year (Fall Semester): (15)**

ARC 5361	Integrated Comprehensive Design	6
ARC 5205	Adv. Design Theories	3
ARC 5483	Integrated Building Systems	3
ARC 5554	Structures 2*	1
ARC 5554L	Structures 2 Lab*	2

First Year (Spring Semester): (15)

ARC 5362	Architectural Design 9: Sustainable Practices	6
ARC 5555	Structures 3*	1
ARC 5555L	Structures 3 Lab*	2
ARC 5621	Environmental Systems in Architecture 2*	3
SPC 5066	Presentation Skills for Architects	3

First Year (Summer Semester): (3)

ARC 5176C	Computer Practice II	3
-----------	----------------------	---

Second Year (Fall Semester) (Miami or Genoa Italy): (12)

ARC 6356	Architectural Design 10	6
ARC 5744	History of Design from the XIX Century to Present*	2
ARC 5744L	History of Design from the XIX Century to Present Lab*	1
ARC Directed Elective		3

Second Year (Spring Semester): (15)

ARC 6970	Master's Project	6
ARC 6280	Professional Practice	3
ARC Directed Elective		3
ARC 6949	Architect Registration Exam Preparation 3	3

*May be replaced with ARC elective if the content of these courses has been satisfied in the pre-professional degree program. A minimum of one of these 3 credit classes is to be satisfied in the pre-professional degree program.

Master of Arts in Architecture - 36 credits**Post-Professional Degree (Not eligible for accreditation by NAAB)**

The Master of Arts in Architecture is a 36-credit post-professional degree program that enables students to pursue advanced studies in three areas: theory, applied research and special topics in practice. Individual areas of concentration are pursued through course work and independent study and may include the philosophy and history of design, digital technologies and visualization, mapping, technology, sustainability, neuroscience and architecture, furniture and industrial design, advanced topics in design and sustainable development. These concentration areas are supported by focus topics in the FIU SOA curriculum and allow students to pursue advanced research combining cross-disciplinary course work with faculty areas of specialization.

Admission Requirements

The following is in addition to the University's graduate admission requirements:

1. Applicants seeking admission to the program must have either an accredited Professional BArch degree with a 3.0 GPA or an accredited Professional March degree.
2. Applicants seeking admission to the program must have either an accredited Professional BArch degree with a 3.0 GPA based on the last 60 hours of undergraduate study or an accredited Professional March degree.
3. Applicants must submit a portfolio of creative work for review. The portfolio review examines evidence of

creative ability, academic success, and professional achievement.

4. Applicants must submit three letters of recommendation.
5. Applicants must submit a Statement of Intent clearly indicating which area of specialization they intend to pursue and why. The statement should include the applicant's qualifications for research and a brief outline of their intent and goal. The statement should demonstrate the applicant's intellectual merit and motivation for pursuing advanced study. Applicants will be evaluated on strength of their statement, personal achievement, and their commitment to making a meaningful contribution to the field through their research.
6. Applicants must submit a writing sample that demonstrates the candidates' written communication skills. The sample should be illustrative of their writing and does not have to be related to the proposed area of specialization.

Graduation Requirements

The degree will be conferred when the following conditions are met:

1. Recommendation of the Primary Advisor and faculty of the Department.
2. Certification provided by the Department Chair, College Dean, and University Graduate School that all degree requirements have been met.
3. Completed undergraduate course deficiencies if specified at admission with no grades below a "C" and a GPA \geq 3.0.
4. No grade below a "C" will be accepted for graduation in required course or professional electives.
5. Completed Research Option.

Areas of Specialization

Students may choose a course of study that is either studio-based or non-studio-based. Any of the following areas of specialization may be chosen for either a studio-based or non-studio-based course of study.

- I. Theoretical Research: Aesthetics and Politics, History and Philosophy of Design
- II. Applied Research: Digital Technologies and Visualization, Mapping with a GIS Certificate Option, Technology and Sustainability, Furniture and Industrial Design, Neuroscience and Architecture, Advanced Design Studies
- III. Advanced Topics in Design

Course Requirements

Students in both studio-based and non studio-based options are assigned a primary faculty advisor upon entering who will work with them to formulate a formal course of 36 credit hours of study that is closely tailored to her or his specific area of specialization and directed by the primary faculty advisor.

All MAA students must take ARC 6947 Research Methods (3) in the first semester and ARC 6948 MAA Capstone in the last semester. The remainder of the courses shall be chosen from the electives in consultation with the student's primary advisor. A total of fifteen hours may be taken from courses offered by other departments.

Research Options

Non Studio-Based Research

Students seeking to conduct non studio-based research have the option to complete either a thesis or a research project.

Students opting to complete a thesis must submit a thesis proposal prior to their final semester. A copy of the proposal signed by the primary advisor must be submitted for approval to the Advanced Studies Committee. Students are permitted to register for the final term once the thesis proposal is approved. The primary advisor must be a full-time faculty member of the Department of Architecture. All Master's Theses must follow FIU University Graduate School Guidelines. Students opting to complete a thesis must enroll in the following course in their final semester:

ARC 6971	Master's Thesis	6
----------	-----------------	---

Students opting to complete a non studio-based master's project must submit a master's project proposal prior to their final semester. The primary advisor will determine guidelines for the master's project. Prior to registering for the final semester a copy of the proposal signed by the primary advisor must be submitted for approval to the Advanced Studies Committee. Students are permitted to register for the final term once the research proposal is approved. The primary advisor must be a full-time faculty member of the Department of Architecture. All students on this track must enroll in the following course in their final semester:

ARC 6906	Independent Study	6
----------	-------------------	---

Studio-Based Research

Students opting to complete a studio-based master project must register for the following course in their final semester of study:

ARC 6970	Master's Project	6
----------	------------------	---

Study Abroad programs may be included in this degree in consultation with the student's primary advisor.

Healthcare Design Track

This track prepares students with a specialized healthcare design expertise. Students will interact with a variety of stakeholders to co-create spatial contexts in partnership with related academic disciplines (nursing, medicine, public health, occupational therapy, computer science and bio-medical engineering), health care professionals (interior architecture firms), and healthcare facilities (hospitals and nursing homes). The program is designed to provide students with research expertise, problem-solving skills, healthcare design thinking and prototyping skills while engaging with a multicultural urban community.

First Year (Fall Semester)

ARC 6947	Research Methods	3
ARC 6246	Design Thinking and. Creative Process	3
ARC 6389	Env. & Behavior Theory	3
NGR/HAS	Directed Elective*	3

First Year (Spring Semester)

ARC 6386	Healthcare Design 1	6
ARC 5695	Environmental Sys. for Healthcare Environments	3
ARC 6257	Health care Theory	3

Second Year (Fall Semester)

ARC 6387	Healthcare Design Studio 2	6
----------	----------------------------	---

ARC 6948 MAA Capstone 6

*NGR 7830, Research in Health Care for Multicultural, Diverse, and Vulnerable Populations or HSA 6205, Hospital and Health Facilities Organization

Doctor of Design – 60 credits

The Doctor of Design Program is a 60-credit, four-semester program.

The admission standards for applicants to the Doctor of Design Program are:

- 1) Hold a Master of Architecture degree from accredited program, or equivalent professional architectural degree, or other advanced degrees subject to program approval.
- 2) Have a GPA of 3.25 in their master's degree program.
- 3) Submit three letters of recommendation to the Architecture Program Chair from faculty members or supervisors qualified to evaluate the applicant's potential for doctoral work.
- 4) Submit a brief letter of interest in the program and future career goals.
- 5) Submit a portfolio and preliminary statement of research interest.
- 6) Receive recommendation for admission from the Departmental Doctoral Education Committee.
- 7) International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL (equivalent to 550 on the TOEFL) is required.

The graduation requirements for the Doctor of Design Program are completion of the 60-credit hour postmaster's curriculum with a 3.0 or higher GPA, with each course having a grade of B- or higher. Additionally, a student must be in compliance with the FIU Graduate School graduation requirements to be eligible for graduation.

Fifteen credits are taken as part of the FIU 174-credit Master of Architecture degree. The course descriptions are included in Section E below for MArch courses to be considered for application to the DDes. Students applying with Master of Architecture degrees from other universities will have 15 credits evaluated for recency/applicability as transferable and applied to the DDes or will be required to enroll in 15 credits at FIU based on the MArch courses identified in Section E.

Core Courses (15 credits)

ARC 6229	Theories of the Digital	3
ARC 6761	Miami Urban Studies	3
ARC 6184	Advanced Studies in Technology	3
ARC 7981	Advanced Research Methods	3
ARC 6204	Architecture Philosophy	3

Research Requirements (30 credits)

ARC 6906	Independent Study	6
ARC 7980	Doctoral Project	21
ARC 7982	Doctoral Defense	3

There are short annual residency periods, which will be held at our Miami Beach Urban Studios (MBUS) that will support all classes.

Certificate in History, Theory and Criticism of Architecture

The Graduate Certificate in History, Theory and Criticism of Architecture offers exceptional students from the School of Architecture and throughout the university community a chance to follow a rigorous course of study in history, theory and criticism, including a required seminar devoted to research methodologies. For architecture students, we offer the further option of a pedagogical apprenticeship, where faculty members mentor students seeking to become teachers. For students outside the School of Architecture, we offer an opportunity to supplement their studies in history, anthropology, environmental science, art history, literature, area studies and other fields with an intense and systematic engagement with cultural production and the visual arts. The certificate program helps students hone their critical skills as they generate new knowledge and embark on self-directed research. Students admitted to a graduate degree program at FIU may apply for admission to the Graduate Certificate in History, Theory and Criticism of Architecture. This certificate program is open to degree-seeking students only.

Certificate Requirements

Participants must fulfill the requirements outlined for the Graduate Certificate in History, Theory and Criticism of Architecture and complete each course with a satisfactory grade.

Program Requirements (18 credits):

Required Courses: (9 credits)

ARC 5205	Advanced Design Theories
ARC 5744	History of Design from the XIX Century to Present
ARC 6947	Graduate Research Methods (offered during fall semester)

Electives: (9 credits)

The nine remaining credits hours may be drawn from a variety of courses. The following list represents examples of elective courses appropriate for the completion of the certificate program. Students should consult with faculty and advisors since new courses are frequently added. Up to six course credits in departments other than architecture may be included, as approved by the graduate advisor.

ARC 5035	Film and the Architecture of Modern Life
ARC 5381	Architecture and the Performing Arts
ARC 5396	Case Studies in Architecture
ARC 5711	History of Design Antiquity to Middle Ages
ARC 5733	History of Design Renaissance to XIX Century
ARC 5935	Special Topics
ARC 5943	Pedagogy Seminar
ARC 5744	History of Design from the XIX Century to Present
ARC 5745	Urban Architecture and the 20th Century
ARC 5786	Urbanism: Social History of the Built

	Form
ARC 5798	Hotels: Miami and La Habana at Mid-Century
ARC 5803	Preservation Architecture: Issues and Practices
ARC 5933	Special Topics in Architecture
ARC 5776	Modern Architecture - Projects and Polemics
ARC 5037	Architecture and Video Media
ARC 5175	Contemporary Digital Strategies
ARC 5745	Urban Architecture and the 20th Century
ARC 6947	Research Methods
IND 5138	History of Modern Interiors
IND 5164	History of 21st Century Furniture Design
LAA 5235	Theory of Landscape Architecture
LAA 5243	Regional Landscape Issues
LAA 5716	History of Landscape Architecture
LAA 6247	Modern Landscape Architecture

Teaching Opportunities

Full-time graduate students have the opportunity to work as Graduate Assistants in courses related to the student's area of focus, including courses in history, theory and criticism, as well as design studios. Students enrolled in the Pedagogy Seminar discuss teaching methods with faculty members from the School of Architecture and from other disciplines across the university.

Course Descriptions

Definition of Prefixes

ARC-Architecture; HUM-Humanities

F-Fall semester offering; S-Spring semester offering; SS-Summer semester offering.

ARC 5035 Film and the Architecture of Modern Life (3). Critical overview of social and spatial implications of film on architecture and design over the course of the 20th century.

ARC 5036 Miami in Film (3). How the natural and built environment of South Florida are portrayed in films.

ARC 5037 Architecture and Video Media (3). This course will examine intersections between architecture and video media from critical historical and contemporary perspectives.

ARC 5075 Formative Studio (6). Introduction to concept development, spatial expression, and representational techniques in architecture. (F)

ARC 5076 Formative Studio 2 (6). A continuation of Architectural Design investigations begun in Formative Studio. Prerequisite: ARC 5075. (S)

ARC 5077 Formative Studio 3 (6). An Architectural Design Studio that builds upon concepts and approaches presented in Formative Studio and Formative Studio 2. Prerequisite: ARC 5076. (SS)

ARC 5165 Graduate Digital Fabrication (3). This course considers digital design and fabrication methodologies and techniques in architecture with an emphasis upon the use of laser cutting, cnc milling and 3d printing at the graduate level. Prerequisite: ARC 4058.

ARC 5175 Contemporary Digital Strategies (3). Study of advanced digital techniques as generative tools for design

and representation. Focus on surface and spatial modeling and parametric relationships. Prerequisites: ARC 4058, ARC 5176.

ARC 5176C Computer Practices in Design II (3). Advanced study in concepts, issues and methods in computer-aided architectural design. Prerequisites: ARC 4058 or equivalent. Corequisite: ARC 5362.

ARC 5177 Topology and Performance (3). Exploration of the relationship between form and performance through the use of animation and scripting techniques. Prerequisite: Program approval.

ARC 5184 Architecture and the Virtual Environment (3). Implementation of virtual reality technology in architectural representations of existing and proposed built environments for presentation and design research. Prerequisites: ARC 4173, ARC 4174.

ARC 5186 Interactive Media (3). Presentation of digital images through an interactive and animated interface online or offline, as well as exploration of ideologies of interactive media.

ARC 5189 Visual Effects (3). Introduction of digital video and audio post-production techniques that add sound, text and visual effects to animations, as well as exploration of ideologies of digital animation.

ARC 5193 Design Presentation Graphics (3). Exploration of design presentation techniques and portfolio design through the use of digital photography, digital illustration, desk top publishing and web page.

ARC 5205 Advanced Design Theories (3). This seminar analyzes western and non-western examples of critical ideology through the investigation of key historical moments and current architectural theory and practice. (F)

ARC 5249 Introduction to Design Theories (3). Introduction to the environmental parameters, morphological concepts and ideological principles that generate form and meaning in architecture. Explorations of related spheres of cultural production will also be explored in lectures, readings, and student assignments. Corequisite: ARC 5075.

ARC 5311 Building Information Modeling (3). This course will familiarize students with numerous foundational concepts such as parametric modeling, assembly modeling, associativity generative and interactive drafting.

ARC 5329 Architectural Design 5 (6). Integration of structure and construction techniques in the production of a small to mid-sized public project that incorporates site considerations, materials and structure. Prerequisites: ARC 2304, ARC 4586 and admission to the major. (F)

ARC 5335 Architectural Design 6 (6). This studio focuses on housing and related components including the repetitive spatial and structural elements, circulation and contextual considerations. Prerequisites: ARC 5329 (S)

ARC 5340 Architectural Design 7 (6). A flexible framework for appropriate investigations of complex spatial, programmatic, contextual, constructional and ethical issues involved in design projects. Course content varies with instructor. Prerequisites: ARC 5335 (F,S,SS)

ARC 5343 Architectural Design 8 (6). Architectural design explorations of site, building codes, community objectives will be undertaken through individual programming, process and design initiatives for a complex building project. Prerequisite: ARC 5340 (F,S)

ARC 5361 Integrated Comprehensive Design (6). Exploration of arch systems; structural, environmental, life-safety, assembly and enclosure on building form, content and expression. Students will assess and integrate systems into the design process. Corequisite: ARC 5483. (F,SS)

ARC 5362 Architectural Design 9: Sustainable Practices (6). Architectural projects of medium scale. Exploration and application of sustainable practices emphasizing relation of site and environmental issues to architectural production and design methodology. Prerequisites: Graduate standing and ARC 5361. (S)

ARC 5370 Urban Development 1 (3). Introduction to the planning and management of urban development projects.

ARC 5371 Urban Development 2 (3). Advanced planning and management of urban development projects. Prerequisite: ARC 5370.

ARC 5381 Architecture and the Performing Arts (3). This seminar will consider what architects might learn from the performing arts, particularly how stagecraft can inform design for social spaces in the city.

ARC 5392 Urban Vertical Surface (3). Analysis of the mechanisms of surfaces: wall section, the bay, frame, grid, and their transformations.

ARC 5396 Case Studies in Architecture (3). The course explores the vast array of decisions that create the architectural experience of outstanding built works.

ARC 5467 Materials and Methods of Construction (3). Study of the types of construction and materials used in institutional, residential, and office building assemblies. How materials are installed and inspected, including the use of special equipment. Explorations of the theories and histories of construction will be explored.

ARC 5483 Integrated Building Systems (3). Exploration of arch systems integration and specifications in design and construction processes; structural, environmental, life-safety, assembly and enclosure systems are included. Corequisite: ARC 5361. (F)

ARC 5486 Architectural Installations (3). This course will examine the traces of history of architectural fabrications and its relations to the visual arts, media, and technology.

ARC 5554 Structures 2 (1). This is the second course in the structures sequence and will introduce fundamentals of structural analysis and design for timber and steel buildings using quantitative process. Prerequisites: ARC 2580 or ARC 5582 or ARC 4586.

ARC 5554L Structures 2 Lab (2). The lab sessions will supplement lectures through additional practice and hands-on exercise problems that are designed to enhance the application of structural concepts. Prerequisites: ARC 2580 or ARC 4586 or ARC 5582. Corequisite: ARC 5554.

ARC 5555 Structures 3 (1). This is the third course in the structures sequence. It is focused on analysis and design

of reinforced concrete structures and lateral resistive systems. Prerequisite: ARC 5554.

ARC 5555L Structures 3 Lab (2). The lab sessions will supplement lectures through additional practice and hands-on problems that are designed to enhance the application of structural concepts. Prerequisite: ARC 5554. Corequisite: ARC 5555.

ARC 5582 Structures 1 (1). Through the study of statics and strength of materials this course provides a scientific basis for understanding structural systems behavior. Prerequisites: PHY 2053 and MAC 2233 or MAC 1114 or MAC 1147.

ARC 5582L Structures 1 Lab (2). The lab sessions will supplement lectures through additional practice and hands-on problems that are designed to enhance the application of structural concepts. Prerequisites: PHY 2053 and MAC 2233 or MAC 1114 or MAC 1147. Corequisite: ARC 5582.

ARC 5612 Environmental Systems in Architecture 1 (3). This course considers thermal, electrical, mechanical and conveyance systems and their integration in the architectural design process. Prerequisite: ARC 2304.

ARC 5621 Environmental Systems in Architecture 2 (3). This course considers the role of acoustic and luminous behaviors in architecture and the architectural design process. Topics including daylighting, artificial lighting, electrical systems and acoustics. Prerequisite: ARC 2304.

ARC 5623 Design Ecology and Technology (3). This course explores the environmental impact of design decisions, their philosophical underpinnings and the role played by technology.

ARC 5695 Environmental Systems for Healthcare Environments (3). Study of building environmental systems and building performance issues that impact the design of Healthcare environments.

ARC 5711 History of Design: Antiquity to Middle-Ages (3). Survey of architectural, interior, and landscape design from antiquity to the middle ages, including Western and non-Western traditions. Explorations of related and causal ideologies will be covered in lectures, readings, and student assignments. Corequisite: ARC 5075.

ARC 5733 History of Design: Renaissance to XIX Century (3). Survey of architectural, interior, and landscape design from the Renaissance to the nineteenth century, including Western and non-Western traditions. Explorations of related and causal ideologies will be covered in lectures, readings, and student assignments. Corequisite: ARC 5076.

ARC 5734 Culture and Art in Italy (3). Course describes the evolution of culture and aesthetics and their immediate relationship with the creation of these works. Consists of site visits and class lectures. Additional readings and project for graduate students.

ARC 5744 History of Design from the XIX Century to Present (2). Survey and advanced analysis of architecture, interior architecture, and landscape architecture from the XIX century to the present, including western and non-western traditions. Explorations of

related and causal ideologies will be covered in lecture. Corequisite: ARC 5744L.

ARC 5744L History of Design from the XIX Century to Present Lab (1). Laboratory section for ARC 5744. Reading and discussion of course texts and writing assignment. Laboratory work in conjunction with set lab. Prerequisites: ARC 2701, ARC 2702. Corequisite: ARC 5744.

ARC 5745 Urban Architecture and the 20th Century (3). The course will examine debates on urban architecture surrounding the rise of Modernism in the 1920s and will follow those lines of thought into current discussions of architectural design in cities.

ARC 5750 Architectural History of the Americas (3). Historical analysis of the development of built forms and styles in tropical and subtropical Americas, investigating its socio-political and artistic context. Prerequisite: Permission of the instructor.

ARC 5756 The Architecture of the City (3). The study of urban architecture in Genoa, Italy, with emphasis on analysis and representation using manual drawing, digital photography, and conceptual model.

ARC 5770 Historiographic Methods in Architecture (3). Seminar course designed to introduce graduate students to historiographic methodologies in architecture through close readings of key texts. Prerequisite: Graduate standing.

ARC 5776 Modern Architecture - Projects and Polemics (3). This seminar focuses on close readings of primary sources drawn from key works of architectural theory. The course also explores key historical text, architectural theory and criticism. Prerequisite: ARC 5744.

ARC 5786 Urbanism: Social History of the Built Form (3). This course introduces students to historical analysis, theories, techniques and aesthetics as they relate to urban design.

ARC 5798 Hotels: Miami and La Habana at Mid-Century (3). A research-based, in-depth study of mid-century modern hotels constructed in Miami/Miami Beach, Florida and La Habana, Cuba just prior to the Cuban revolution.

ARC 5803 Preservation Architecture: Issues and Practices (3). This course explores issues and practices of architectural preservation as an integral concern of architecture.

ARC 5905 Solar Decathlon (1). Research based course to develop the architectural and engineering concepts for the solar decathlon house.

ARC 5933 Special Topics (1-6). Coursework on a particular aspect of architecture under the direction of faculty in a classroom format. Prerequisite: Program approval.

ARC 5935 Special Topics (3). Coursework on a particular aspect of architecture under the direction of faculty in a classroom format.

ARC 5936 Cejas Eminent Scholar Graduate Seminar (1-3). Seminar/workshop course taught by distinguished educators, scholars, and designers. Lectures, critical

readings and discussions of thematic topics make up the course.

ARC 5938 Special Topics Design Studio (6). An architectural design studio based on a particular aspect of architectural design and relevant ideologies under the direction of appropriate faculty.

ARC 5939 GreenN: Designing for Sustainability (3). This course will review established and emerging principles of sustainable design/construction, and test strategies for their implementation in design practice. Prerequisite: Graduate standing.

ARC 5941 Internship Experience (0). Experience in architectural practice learned through work with licensed professionals.

ARC 5943 Pedagogy Seminar (3). Seminar course designed to train graduate teaching assistants, who lead discussion sections and evaluate undergraduate student assignments in the accompanying undergraduate history survey course.

ARC 5945 Architecture Internship (1-3). Advanced issues in architecture practice learned through work experience with licensed professionals.

ARC 6184 Advances Studies in Technology (3). This course explores the role of emerging technologies including robotics, digital fabrication, sensing, and advanced visualization tools for innovation in design and architectural production. Prerequisite: admission to doctoral program

ARC 6204 Architectural Philosophy (3). This course explores how ideas from contemporary continental philosophy and other related fields might inform a discourse about architecture and urbanism. Prerequisite: ARC 6229

ARC 6229 Theories of the Digital (3). This course explores theories of the digital. The aim is to develop a theoretical framework to understand the impact of the digital on architectural design, fabrication and urban life. Prerequisite: Admission to the doctoral program.

ARC 6246 Design Thinking and Creative Process (3). Using literature on design methods, design cognition, cognitive psychology and design protocol studies, students will learn about the various models of creative process in design.

ARC 6257 Health Care Theory (3). Exploration of health care theory, it's manifestation in specific health care models and delivery systems, plus, its implementation in design of healthcare environments.

ARC 6280 Professional Office Practice (3). Study of the ethical, legal, financial, and managerial aspects of professional practice in architecture.

ARC 6296 Professional Development (3). In-depth exploration of current legal, administrative and financial aspects of architectural practice.

ARC 6356 Architectural Design 10 (6). Architectural project emphasizing design development preparation of details and design documents for buildings of intermediate complexity. Prerequisites: ARC 5362. Corequisite: ARC 6910. (F)

ARC 6375 Resilient Urbanism (3). This interdisciplinary course examines concepts of urban resiliency for disaster management. Students will study disaster vulnerability, building resilience, and the role of green infrastructure.

ARC 6386 Healthcare Design 1 (6). Advanced design studio addressing prevailing and future issues in healthcare design.

ARC 6387 Healthcare Design Studio 2 (6). Students explore application of theoretical issues in order to create 'what-if scenarios in health care design that might not be currently addressed in industry.

ARC 6389 Environment and Behavior Theory (3). Students explore, analyze, and interpret various environment and behavior theories appropriate for designing healthcare environments.

ARC 6761 Miami Urban Studies (3). Studies concerning the social, political, economic and environmental of Urbanism in Southern Florida in general and Miami in particular. Prerequisite: Admission into the Doctoral Program.

ARC 6906 Independent Study (1-6). Coursework on a particular aspect of Architecture under the direction of faculty in an individual study format. Prerequisite: Program approval.

ARC 6910 Graduate Seminar (3). Coursework under the direction of faculty in preparation for a master's thesis or master's project in architecture. Prerequisite: ARC 6947. Corequisite: ARC 6356.

ARC 6947 Research Methods (3). Methods of data acquisition, analysis, and interpretation used in architecture research. Corequisite: ARC 5362.

ARC 6948 MAA Capstone (6). Coursework under the direction of faculty for completion of research or design project for the Master of Arts in Architecture degree. Prerequisite: ARC 6947

ARC 6949 Architect Registration Exam Preparation (3). Preparation to take the Architect Registration Exam. Prerequisite: ARC 5361 and ARC 5483

ARC 6970 Master's Project (6). Coursework under the direction of faculty for the completion of project by candidate for the degree of Master of Architecture. Prerequisite: ARC 5361, ARC 6356, ARC 5555, ARC 5621, ARC 5744, ARC 5205, ARC 5176.

ARC 6971 Master's Thesis (1-6). Coursework under the direction of faculty for the completion of a research or design thesis by candidate for the degree of Master of Architecture. Prerequisite: ARC 6910.

ARC 7980 Doctoral Project (3-9). Coursework under the direction of faculty for the completion of the Doctoral Project by a candidate for the degree of Doctorate of Design.

ARC 7981 Advanced Research Methods (3). Advanced methods of data acquisition, analysis, and interpretation used in architectural research.

ARC 7982 Doctoral Defense (3). The formal presentation of the Doctoral Project. Prerequisite: ARC 7980, 12 credits, Corequisite: ARC 7980, 9 credits.

HUM 5258 Ways of Seeing: Modern Perception in Literature and Architecture (3). Interdisciplinary elective on modern definition of perception in literature, architecture and the arts in the first half of the 20th century.

Master of Fine Arts in Visual Arts

The MFA in Visual Arts is an intense, production-oriented studio art program directed toward individual development. The curriculum is designed for maximum flexibility to accommodate both those seeking advanced training in a particular studio area and those whose interests may involve more media cross-over. Graduates of the program will be prepared for careers as professional artists. The MFA is the terminal degree in Studio Art.

Graduate Admission Requirements

Application to the MFA in Visual Arts is a two-step process.

First, please complete and FIU Graduate Application from that can be completed online via the following link: <https://admissions.fiu.edu/how-to-apply/graduate-applicant/index.html>. As part of this application, you will need to provide the following:

1. Successful completion of the bachelor's degree in art or equivalent;
2. Certified transcripts of all college level work;
3. Three (3) letters of recommendation from persons who are in a position to evaluate the applicant's previous professional, academic, and personal performance, and his or her potential for success in the graduate program;
4. For international and foreign graduated domestic applicants whose language of instruction for the undergraduate degree was not English, an IELTS score of 6.5 or TOEFL score of 550 paper-based/80 internet-based is required; and
5. Please note that the Department of Art + Art History does not require GRE test scores.

Secondly, please upload the following to Get Accepted (separate nominal fee charged by Get Accepted):

1. A written statement of intent (no more than 500 words), which should enhance the Graduate Admissions Committee's understanding of the applicant's creative work and outlined plan for its development in the program;
2. A portfolio that includes 20 images (300 dpi, jpeg format); and
3. Your CV.

Degree Requirements

The MFA requires 60 semester hours of course work at the graduate level to be distributed as follows:

Tutorial Instruction in Studio Practice	18
Tutorial Instruction in Studio Electives	17
ART 5938C Studio Pedagogy	1
ART 5939 Graduate Art Seminar I	3
ARH 5805 Critical Studies in the Visual Arts	3
and	
(3) Art History electives	9
ART 6971 Graduate Prospectus & Exhibition Preparation	3
ART 5907C Directed Study	3
Elective(s)	3

Note: The catalog descriptions for the following courses are for MFA students as well as MS Art Education students.

ART 5930C Drawing, ART 5391C Figure Drawing, ART 5408C Printmaking, ART 5580C Painting, ART 5740C Sculpture, ART 5792C Figure Sculpture, PGY 5116C Color Photography, PGY 5425C Photography

A committee will be formed during the second semester of enrollment and will meet periodically to supervise the candidate's progress during the entire period of study.

Upon completion of twenty hours of course work and prior to the completion of thirty hours, the candidate must submit his/her work to the faculty committee, which will determine the student's progress and capability for continued enrollment in the MFA program. This review will focus on issues such as growth of the student's work, the consistency of production at the graduate level, and the demonstrated ability to fulfill the expectations of a graduate degree. All of the student's work completed by this time will be assembled and reviewed and the student will be questioned about specific issues related to his/her work. Successful completion of this examination is prerequisite for continuing as a candidate for the degree.

In the last semester of enrollment, the candidate will present a graduate exhibition to be displayed in the Patricia and Phillip Frost Art Museum at FIU or at an appropriate alternative space. Each student's committee will conduct an oral examination with the candidate. This will take place in the exhibition space during the display of the candidate's graduate exhibition. It will focus on the exhibition and the development of the candidate's work. This examination must be completed successfully in order for the candidate to be awarded his/her degree.

Master of Science in Art Education

Degree Program Hours: (36)

Admission Requirements

Applicants for admission into the Master of Science in Art Education program must meet the minimum University's graduate admission criteria. Admission to the masters program will be based on the following criteria:

1. Applicants for admission to the MS-Art Education program must hold or qualify for the Florida teacher certification in art. All applicants must also satisfy the Board of Education admission requirements. A GPA of 3.0 or higher in the last 60 semester hours of upper division undergraduate study.
2. Application materials must include two (2) letters of recommendation, a résumé, a statement of personal philosophy/professional goals consistent with the objectives of the masters program.
3. After submission of application, applicants must schedule a portfolio interview with the Graduate Program Director. The Portfolio should contain fifteen (15) pieces of artwork including at least three (3) drawings.

Transfer of Credit

Students may be allowed to apply up to six semester hours of course work taken at accredited institutions to the masters program requirements with the following stipulations:

- The student received a grade of 3.0 or better on a 4.0 scale.
- The course was relevant, as judged by the Admissions Committee.
- The course is listed on an official transcript received by the Graduate Admissions Office.
- The course will be no older than 6 years at the time of graduation with a master's degree.
- The course meets all University requirements.

Education, including Art, Professional Studies: (6)

Select 6 credits from the following:

EDF 5481	Foundations of Educational Research	3
EDE 6205	Curriculum Design for Childhood Education	3
ESE 6215	Secondary School Teaching Field	3
EDF 6211	Psychological Foundations of Education	3
Graduate Study Abroad in Art/Art Education 3-6		
Art/Art Education: (30)		
ARE 6140	Curriculum and Instruction in Art	3
ARE 6262	Organization and Coordination of School and Community Art Programs	3
OR		
ART 5853	Visual Arts Marketing	3
ARE 6746	Seminar in Art Education: Contemporary Issues and Research	3
ART 5XXX	Studio Art	6
ARH 5XXX	Art History	3
Studio Art (Select 4 studio art courses)		12

Master of Arts in Teaching

The Master of Arts in Teaching is offered in Art Education and is for candidates without a certification in teaching. This degree is no less rigorous than the advanced master degree program, but includes courses which provide the necessary background in professional education.

Master of Arts in Teaching Art Education (K-12)

Degree Program Hours: (54)

Admission Requirements

1. BFA or a Bachelor's degree or a strong minor (30 hours with a 3.0 GPA or higher) in Fine Arts and a minimum of 3.0 cumulative GPA or higher for the last 60 hours of upper division coursework.
2. Passing scores on all sections of the General Knowledge Exam (GK) or CLAS or GRE (considered on an individual basis). Note: GRE is NOT required, but can be used in place of GK. However, GK is recommended as it is an exit requirement.
3. In addition the applicant must submit two (2) letters of recommendation, a résumé, a statement of personal philosophy/professional goals consistent with the objectives of the masters program. Letters and any other supporting documents are to be sent to Florida International University, Office of Admissions, P.O. Box 659004, Miami, FL. 33265-9004.
4. After submission of application, applicants must schedule a portfolio interview with the Graduate Program Director. The Portfolio should contain fifteen (15) pieces of artwork including at least three (3) drawings.

Required Courses: (54)

EDF 5443	Measurement and Evaluation in the Classroom	3
EDF 5517	Education in American History	3
EDG 5414	Teaching Environments: Instructional Strategies and Classroom Management	3
EDP 5053	Educational Psychology: Principles and Applications	3
EEX 6051	Educational Needs of Students with Exceptionalities	3
ESE 5344C	Secondary Classroom Management	3
RED 5339	Subject Related Reading	3
TSL 5361C	TESOL for Secondary Teachers	3
ARE 4316	Special Teaching Lab: Art K-5	3
ARE 4341	Special Teaching Lab: Art 6-12	3
ARE 5945	Practicum in Art Education	6
ARE 6140	Curriculum and Instruction in Art	3
ARE 6xxx	Art Education Workshop	9
ARE 6262	Organization and Coordination of Art	3
ARE 6746	Seminar in Art Education	3

Applications to student teaching are due in the office of the Director of Student Teaching by July 1 for Spring semester placement and by March 1 for Fall semester placement. Check with the program leader early in program enrollment to determine Fall placement availability.

Graduation Requirements

1. An overall GPA of at least 3.0
2. Successful demonstration of all of the Florida Educator Accomplished Practices at the Preprofessional level
3. Passing score on all three sections of the Florida Teacher Certification Examination and official evidence provided.
4. Upload all required course and program artifacts into Taskstream account.

Note: If CLAST is passed prior to July 1, 2002, the new General Knowledge subtest may be waived.

Master of Science in Art Education Accelerated Degree Pathway

Students from the following undergraduate majors may apply to the Accelerated Master's in Art Education Degree Pathway: BS in Art Education, BA in Art, BFA in Art, BFA in Digital Arts. If accepted, students will be allowed to take up to 12 credits of graduate courses which will apply toward both their undergraduate and their master's degree program.

The admissions requirements:

- Current enrollment in one of the above mentioned bachelor's degree program
- Completed a minimum of 75 undergraduate credits
- Current GPA of 3.2 or higher
- Portfolio review and interview
- Complete the separate Accelerated Bachelors/Master's degree application, including signed approval by the director, coordinator or designee of the graduate program.

Graduate Certificate in Museum Studies

The Graduate Certificate in Museum Studies is an 18-credit program intended to prepare students for professional employment in museums and historic sites. The program offers graduate-level courses appropriate for those interested in museum careers. It is designed to give a broad overview of museum history as well as a solid grounding in museological theory and practice.

Two core courses and an internship are required. This certificate program is open to both degree- and non-degree seeking students.

Program Requirements: (18 credits)

Required Courses: (6 credits)

ARH 5850	Introduction to Museum Studies: History and Philosophy of Museums	3
ARH 5851	Introduction to Museum Ethics, Policies and Procedures	3

Required Internship: (6 credits)

ARH 5940	Internships	3-6
----------	-------------	-----

Electives: (6 credits)

ARH 5797	Museum Education	3
ARH 5837	Exhibition Development	3
ARH 5852	Museum Registration Methods	3
ARH 5855	Curatorial Methods and Practices	3
ART 5079	Grant Writing in the Visual Arts	3
ART 5897	Advanced Art Writing: A Seminar for Artists Curators, and Historians	3

On occasion, the Chair may permit students to include courses from associated departments: History, Environmental Science, Biology, Architecture, and Anthropology.

Graduate Certificate in Portrait and Figurative Art

The Certificate in Portrait and Figurative Art is designed to give interested students the knowledge and skills necessary to have a successful professional career in portrait and figurative art. The Certificate is offered to graduate students in FIU's Department of Art + Art History.

Only students majoring in a graduate degree program at FIU's Department of Art+ Art History may enroll in the Certificate program. The course titled Classical Drawing (ART 5395C) must be taken during the first two semesters of the program. In addition, a grade of B or better in the first two (2) studio courses is a prerequisite for continuing in the Certificate program. Students must receive a grade of a B- or better in all the required courses in order to graduate.

The Certificate in Portrait and Figurative Art requires 18 credits. (15 credits in Academy studio and 3 credits in approved art history)

Fifteen (15) graduate credits in Academy studio (select from the following):

ART 5395C	Graduate Classical Drawing
ART 5396C	Graduate Portrait Drawing
ART 5588C	Graduate Portrait Painting
ART 5584C	Graduate Figure Painting
ART 5582C	Graduate Landscape Painting

*These graduate courses are repeatable.

Three (3) graduate credits in Art History (select from the following):

ARH 5325	Graduate Art in Renaissance Florence
ARH 5362	Baroque Art
ARH 5421	Enlightenment and Romanticism
ARH 5440	Graduate Nineteenth Century European Art
ARH 5465	Modern Art

*Other art history courses may satisfy the requirement with approval from the Academy Director.

Course Descriptions

Definition of Prefixes

ARE - Art Education; ARH-Art History; ART-Art; GRA-Graphic Arts; PGY-Photography.

ARE 5251 Art for Exceptional Children (3). Development of instructional art skills, techniques, and strategies as related to the exceptional child. Observation and field participation required.

ARE 5457C Introduction to Computer Art (3). Exploration of the color computer, peripherals and selected software as tools for creating expressive art. Individual imaging projects, lesson plans, readings and presentations required. (AR)

ARE 5553 Introduction to Art Therapy (3). An overview of art therapy as a verbal and nonverbal means of communication with special emphasis on psychodynamic fundamentals inherent to the process for the purpose of diagnosis, treatment, and intervention for people with special needs. (AR)

ARE 5555C Advanced Art Therapy (3). Examination of strategies, techniques and current theoretical approaches in art therapy. Delineation and application of an individual field experience is required. Prerequisite: ARE 5553. (AR)

ARE 5905 Directed Study in Art Education (1-6). Individual investigation and research in one or more areas of art education. Prerequisite: Consent of professor. (F,S,SS)

ARE 5945 Supervised Teaching: Art Education (6). Supervised teaching in a junior or senior high school. Prerequisites: Admission to the Alternate Track Program and completion of prerequisite course work in education and subject matter area. Supervised teaching in an elementary or secondary school. (S)

ARE 6140 Curriculum and Instruction in Art (3). Examination of theoretical bases of curriculum development in art education. Analysis of objectives, content, methods, and materials for art instruction in the elementary, junior, and senior high school. (S)

ARE 6262 Organization and Coordination of School and Community Art (3). Procedures for the organization, coordination and evaluation of school, community, and inservice art programs, with particular attention to the urban multicultural setting. (F)

ARE 6304 Instruction in Early Childhood Art (3). Elective in masters program in Early Childhood Education. Refines skills related to program development, methods of teaching, selection of materials, and review of research, for preschool, kindergarten and primary grades teachers. Lab fees required. (F,S,SS)

ARE 6315 Instruction in Elementary Art (3). Elective in masters program in elementary education. Refines skills related to program development, methods of teaching, selection of art materials, and review of research, for elementary teachers. (AR) Lab fees required.

ARE 6746 Seminar in Art Education: Contemporary Issues and Research (3). Examination of current issues and review of research in art education literature. Delineation and application of an individual research problem. Prerequisite: EDF 5481. (SS)

ARE 6925-29 Workshop in Art Education (3). Production and application of materials and techniques in art education, in a laboratory or field setting. Lab fee required. (SS)

ARE 7938 Doctoral Seminar in Art Education (3). Advanced doctoral study in current theories and research related to art education. Prerequisites: ARE 6746 and EDF 6486. (F,S,SS)

ARH 5315 Early Italian Renaissance Art (3). Examines Italian art and culture of the fifteenth century. Artists considered include Masaccio, Lorenze Ghiberti, Fra Angelico, Piero dell Francesca, Donatello and Sandro Botticelli. Prerequisite: ARH 2050 and ARH 2051 or equivalent.

ARH 5325 Graduate Art in Renaissance Florence (3). For study in Florence. Course examines art of Renaissance from its beginnings in Florence with on-site classes. Prerequisite: Graduate standing.

ARH 5362 Baroque Art (3). Baroque art and architecture of the seventeenth and eighteenth centuries in Europe.

Slide lectures and discussions, advanced research required.

ARH 5363 Graduate 18th-Century Art in Europe (3). A study of European academies of art, Rococo, Neoclassicism, and early Romanticism. Artists to be considered include Poussin, Watteau, Hogarth, Reynolds, Barry, Fuseli, and David. Prerequisite: Graduate standing.

ARH 5421 Graduate Enlightenment and Romanticism (3). Examines the art of the European Enlightenment and Romantic movement from 1700 to 1848. Artists to be considered include Watteau, David, Goya, Blake, Ingres, Gericault, Delacroix, and Friedrich. Prerequisite: Graduate standing.

ARH 5440 Graduate Nineteenth Century Art (3). An advanced survey of 19th-century art in its social, political, and historical context. Includes French, English, Spanish artists. Prerequisite: Graduate standing.

ARH 5441 Graduate Realism, Impressionism, and Post-Impressionism (3). Examines the widespread engagement with modern life in European art from 1848 to 1900. Artists to be considered include Courbet, Manet, Monet, Renoir, Seurat, Van Gogh, Gauguin, Cezanne, and Munch. Prerequisite: Graduate standing.

ARH 5442 Advanced Modern Art in Europe, 1880-1915 (3). Examines the widespread engagement with modern life in European art from 1880 to 1915. Art movements considered include Post-Impressionism, Symbolism, Expressionism, Fauvism, Cubism, and Futurism.

ARH 5465 Modern Art (3). Offers a history of modern art from ca 1880 to 1940. It concentrates on the study of European and American Avant-garde visual art movements with emphasis on art and modern society.

ARH 5482 Graduate Contemporary Art (3). Course examines the visual arts in Europe and the U.S. from the 1960's to the present with focus on major art movements, artists, and artwork. Prerequisite: Graduate standing.

ARH 5483 Graduate Post 1989 Art (3). Exploring contemporary art practices: 1989 to present. Prerequisite: ARH 4470 or ARH 5482 or permission of the instructor. Graduate standing.

ARH 5532 Beliefs Made Visible (3). This course investigates art, religion and literature in Asia. We will examine the close connections between literary history and art history, and doctrines and visual images.

ARH 5564 Graduate Contemporary Chinese Art and Theory (3). This course is an overview of Chinese contemporary arts, artists, theories, exhibitions and collections in their social, economic, political, philosophical and global contexts.

ARH 5550 Advanced Arts of China and Japan (3). This course is an introduction to and overview of the arts of China and Japan from antiquity to present covering a wide range of media in their historical, philosophical and religious contexts.

ARH 5561 Literati Vision in Chinese Painting (3). In examination of the social history of Chinese painting, this course looks into masters, masterpieces and art patrons of the last 3000 years.

ARH 5663 Graduate Art of Spain and Her Colonies (3). Course explores art of Spain from 1492 through early 19th century, the encounter between Spain and the Americas after the conquest, and the art of the colonies. Graduate level readings.

ARH 5671 Seminar in 20th Century Latin American Art (3). This course will examine the art of the 20th century in Latin America in a seminar focusing on painting and sculpture from the end of the 19th century to the present.

ARH 5675 Graduate History of Cuban Art (3). A study of visual arts of Cuba in the 20th century, within historical, social, and cultural context. Prerequisite: Graduate standing.

ARH 5677 Caribbean Art: Myth and Reality (3). A survey of the contemporary art of the Caribbean with a brief introduction to its early history and a discussion of its complex social structures from country to country.

ARH 5715 History of Photography (3). A chronological examination of the work of the world's most significant photographers from photographic works and ideas from invention to the 1940s.

ARH 5716 History of Photography Since 1945 (3). An examination of the most significant photographic works, critical concepts, and new trends which have arisen since WWII. Prerequisite: ARH 4710.

ARH 5717 History of Photography of Architecture (3). The history of photography from 1839 to now with strong emphasis on the photography of architecture.

ARH 5725 History of Graphic Design (3). This course aims to examine the significant designs from the history of visual communications with a concentration on the 20th century.

ARH 5776C History of Digital Art (3). This course examines major developments in the practice, methods and theories of digital arts in a historical context with focus on art history and visual culture.

ARH 5785 History of Object Design (3). This course aims to examine the significant objects from the history of craft and design with a concentration on the 20th century.

ARH 5797 Museum Education (3). Course examines educational functions of a museum including interpretive principles and techniques, program design and community outreach.

ARH 5805 Critical Studies in the Visual Arts (3). Introduction to the methods and concerns of recent art history. Discussion of students' work in context of the contemporary art world. Prerequisites: ARH 4450 and ARH 4470 or graduate level equivalents. Required for MFA Students.

ARH 5807 Graduate History of Aesthetic Thought in Europe, 1760-1900 (3). A study of the history of aesthetic thought in Europe from 1760 to 1900. Theorists to be considered include Winckelmann, Lessing, Diderot, Kant, Hegel, Baudelaire, and Nietzsche. Prerequisite: Graduate standing.

ARH 5837 Exhibition Development (3). This course will examine the history, theory, and practical aspects of museum exhibitions, including exhibition planning, design, and interpretation.

ARH 5845 Graduate Spanish Art (3). Explores the Art of Spain from 1492 through the early 20th century. Painting, sculpture and architecture covered in slide lectures.

ARH 5850 Introduction to Museum Studies: History and Philosophy of Museums (3). Introduces the wide range of topics and issues associated with different types of American museums. Museums are examined as cultural, political, and educational institutions. Prerequisites: Graduate Standing or permission of Director of Museum Studies.

ARH 5851 Museum Ethics, Policies and Procedures (3). The legal, ethical status of museums and the obligation to the public regarding their governance, policymaking and financial planning. Includes theoretical and practical discussions with attention to museums. Prerequisites: Graduate Standing or permission of Director of Museum Studies.

ARH 5852 Museum Registration Methods (3). A course in Museum Registration is designed to provide Museum Studies students with competency in all areas of object care, registration and information management. Prerequisites: Graduate Standing or permission of Director of Museum Studies.

ARH 5855 Curatorial Methods and Practices (3). This course examines museum history and theory; exhibit planning, design, and interpretation. Emphasis on contemporary art practices with room for the discussion of other disciplines.

ARH 5872 History of Women Artists (3). Surveys the history of women artists with some discussion of the history of images of women.

ARH 5874 Women in Latin American Art (3). Introduces women in Latin American art from its Pre-Columbian beginnings through the twentieth century. Emphasis will be on painting and sculpture of the twentieth century.

ARH 5881 Advanced Art and Politics (3). The course explores the political role of art in Europe and Latin America from ancient Greece to the present. It also traces how the idea of the "political" changed from the ancient to modern periods. Prerequisite: Graduate standing.

ARH 5896 Seminar in the History and Criticism of Art (3). Examines particular periods or subject areas in the history of art. Course content varies from semester to semester, and with a change in theme, the course may be repeated. Prerequisites: Graduate standing or permission of the instructor.

ARH 5897 Special Topics in Art History (3). Rotating special topics on the graduate level in art history. May be repeated with change of topic. Prerequisites: ARH 4450 and ARH 4470 or graduate level equivalents.

ARH 5907 Directed Studies (1-6). A group of students, with the approval of the art faculty, may select a master teacher of theory, research or criticism in selected areas as film, painting, sculpture, architecture, crafts, art history, multimedia art, etc. Arrangements must be made at least a semester before course is offered. May be repeated.

ARH 5913 Research (1-6). Art history, criticism, and theory in areas not covered by the present program and which the student wishes to study. Prerequisite: Permission of the instructor. May be repeated.

ARH 5940 Internship Experience (3-6). Supervised work experience in approved institution. Prerequisite: Permission of Director of Museum Studies. May be repeated.

ART 5017C 2D Animation (3). This course will introduce graduate students to advanced terminology, concepts, and techniques of creating computer generated 2D animation.

ART 5018C 3D Animation (3). This course will introduce graduate students to advanced terminology, concepts, and techniques of creating computer generated 3D animation.

ART 5079 Grant Writing in the Visual Arts (3). This course will address grant writing in the visual arts. The course will focus on government and foundation proposal writing including effective writing techniques and budget procedures.

ART 5135C Graduate Fibers (3). Graduate level studio course, explores issues of the fiber medium and its context in contemporary art practice.

ART 5156 Small Scale Metal Casting (3). This course offers an introduction to the technical and conceptual understanding needed to cast and fabricate small scale metals to create objects. May be repeated.

ART 5167C New Media and Experimental Animation (3). Advanced studies to the basic practices of new media with emphasis on fundamental strategies for making experiments in animation, installation and sound art. May be repeated.

ART 5282C Design Object and Fabrication (3). This course offers graduate students techniques and methods used in the process of designing and fabricating art objects. May be repeated.

ART 5390C Drawing (3). Advanced drawing. May be repeated. Prerequisites: ART 4315C or permission of the instructor.

ART 5391C Figure Drawing (3). Advanced figure drawing. May be repeated. Prerequisites: ART 4333C, or equivalent, or permission of the instructor.

ART 5395C Graduate Classical Drawing (3). Graduate classical drawing focuses on highly developed perceptual and technical drawing skills in various mediums. May be repeated. Prerequisite: ART 4322C or approved course work.

ART 5396C Graduate Portrait Drawing (3). Graduate portrait drawing focuses on highly developed perceptual and technical drawing skills in various aspects of portraiture. May be repeated. Prerequisites: ART 4335C or approved course work.

ART 5408C Printmaking (3). Advanced printmaking. May be repeated. Prerequisite: Permission of the instructor.

ART 5580C Painting (3). Advanced painting. May be repeated. Prerequisite: Permission of the instructor.

ART 5582C Graduate Landscape Painting (3). Graduate landscape painting focuses on highly developed perceptual and technical painting skills in various aspects of landscape painting. May be repeated. Prerequisite: ART 4514C

ART 5583C Graduate Still Life Painting (3). Graduate still life painting focuses on highly developed perceptual

and technical painting skills in various aspects of still life painting. May be repeated. Prerequisite: ART 4516C

ART 5584C Graduate Figure Painting (3). Graduate figure painting focuses on highly developed perceptual and technical painting skills in various aspects of figure study. May be repeated. Prerequisites: ART 4560C or approved course work.

ART 5588C Graduate Portrait Painting (3). Graduate portrait painting focuses on highly developed perceptual and technical painting skills in various aspects of portraiture. May be repeated. Prerequisite: ART 4335C or approved course work.

ART 5655C Digital Art Lab (3). This is an advanced graduate level studio course in the digital arts experimenting with and finding compelling strategies for digital arts production.

ART 5667C Storytelling and Character Development (3). This class explores methods of animation focusing on storytelling and character development at a graduate level. Students will experiment with mixed media, animation, audio and video projects. May be repeated.

ART 5668 3D Digital Sculpture and Experimental Virtual Environments (3). An advanced study of 3D digital sculpture and new media with emphasis on fundamental strategies for making experiments in digital modeling, 3D printing and assemblage of mixed media. May be repeated.

ART 5676C Animation Studio (3). This course is an advanced investigation to the terminology, concepts, and techniques of creating complex computer-generated animation. May be repeated.

ART 5677C Experimental Video Art (3). Graduate level research of digital media with emphasis on fundamental strategies for making video/audio work. May be repeated.

ART 5685C Advanced Time Art (3). Advanced course to refine students' skills in electronic and digital media production. Students are required to produce a multidisciplinary project. Course may be repeated. Prerequisites: ART 3681C or permission of the instructor.

ART 5740C Sculpture (3). Advanced sculpture. May be repeated. Prerequisite: Permission of the instructor.

ART 5746 Methods and Materials of Mold Making and Casting (3). This course offers graduate students techniques and methods used in the process of mold making and casting. May be repeated.

ART 5790C Ceramics (3). The advanced student will explore all aspects of expression in clay and glaze. Students will be expected to be mostly self-directed. Prerequisite: Permission of the instructor. May be repeated.

ART 5792C Figure Sculpture (3). Advanced Figure Sculpture. May be repeated. Prerequisite: Permission of the instructor.

ART 5815C Graduate Seminar: Body and Art (3). Focuses on the relationship between the body, materials and space as used in art and exhibitions and examines the social conventions that order our understanding of these issues. Prerequisite: Graduate standing.

ART 5844C Installation Art (3). Explores the genre of installation art and site-specific art through history and provides a context for collaboration with the Wolfsonian Museum as both site and subject for art specific installation by students. Prerequisite: Permission of the instructor.

ART 5853 Visual Arts Marketing (3). Students seeking a degree in studio art will be able to appraise and present a portfolio to an appropriate organization. Prerequisite: Graduate Standing.

ART 5855 Graduate FIU in New York (3). A study of New York's art world and contemporary artists in New York City.

ART 5897 Advanced Art Writing: A Seminar for Artists, Curators, and Historians (3). Students write professional venues appropriate to artistic and curatorial practices in a dialog between artists, art historians and curators on contexts influencing art's production and reception. Prerequisites: Current standing as an MFA candidate in the Art & Art History Department or permission of the instructor.

ART 5907C Directed Study (VAR). A course of study in a selected area under the supervision of an appropriate faculty member. Mandatory for MFA students in semester of graduation. Advance approval by faculty and graduate advisory required (3cr). May be repeated.

ART 5910C Research (1-6). Students may study or research an individual art project with an art faculty member. Complexity and amount of work will determine the number of credit hours granted. May be repeated.

ART 5930C Special Topics in Studio Art (3). Rotating special topics in Studio Arts. May be repeated with change of content.

ART 5931C New Media Seminar (3). This seminar course examines major developments in the practice, methods and theories of new media in a contemporary context with focus on art history and visual culture. May be repeated.

ART 5938C Studio Art Pedagogy (1). Instruction in the principles and methods of teaching in the area of visual arts; specifically the application of these principles to the studio situation. Required for MFA students. Prerequisite: Graduate standing.

ART 5939C Graduate Art Seminar I (3). Students will locate and discuss their own work within the context of the contemporary art world. Also, issues and practical concerns for the professional artist will be addressed, such as dealing with guidelines, grant writing and business procedures. Required for MFA students. Prerequisite: Graduate standing.

ART 5940 Advanced Art Internship Experience (0), Experience in art practice learned through work with licensed professionals. Prerequisite: Limited to MFA Students in the department of Art and Art History.

ART 6939 Graduate Art Seminar II (3). Discussion of students work within the context of the contemporary art world. Issues and practical concerns for the professional artist will be addressed, such as dealing with galleries, grant writing and business procedures. Mandatory for

MFA students. Prerequisites: Graduate standing and ART 5939C.

ART 6971 Graduate Prospectus and Exhibition Preparation (3). Offers students the opportunity to complete the research and preparation of written components required for graduation, including thesis and artist statement. Prerequisites: Completion of graduate program courses other than ART 5907C.

GRA 5535 Typography (3). This is an advanced course where graduate students will master typographic terms, classical and contemporary fonts and technologies. May be repeated.

GRA 5930 Design Seminar I: Methodologies in Design Practice (3). This seminar course examines major developments in the practice, methods and theories design in contemporary context with focus on art history and visual culture.

GRA 5931 Design Seminar II: Experience Design (3). This seminar course examines major developments in the practice, methods and theories of design in a contemporary context with focus on interactivity, technology and culture.

GRA 5932L Design Studio (3). This is an advanced and graduate level research lab for graphic design and object design students. May be repeated.

GRA 5941 Graduate Internship (3). Students will complete an internship aimed at experiential learning in the context of an art or design related profession. May be repeated.

PGY 5425C Photography (3). Advanced photography. May be repeated. Prerequisites: PGY 4155C, or equivalent, or permission of the instructor. For graduate students.

PGY 5530C Color Photography (3). Advanced color photography. Course may be repeated. Prerequisites: PGY 4154C or permission of the instructor. For graduate students.

PGY 5649C Advanced Digital Photography II (3). Advanced documentary digital photography, requiring highly evolved technical skill and aesthetic direction. May be repeated. For graduate students who have completed prerequisites. Prerequisites: PGY 4823C or permission of the instructor.

Master of Science in Mass Communication

The Department of Communication in the School of Communication and Journalism offers professional graduate education leading to the M.S. degree in Mass Communication.

There are four programs that lead to the M.S. Degree in Mass Communication:

- Global Strategic Communications on-campus program
- Global Strategic Communications online program
- Global Strategic Communications/Miami Ad School program
- Spanish Language Journalism program

The Global Strategic Communications online and on-campus programs allow for specializations in corporate communication management, conflict resolution and consensus building, and digital media management. The orientation of the graduate program is primarily professional, designed to enhance graduates' abilities to work in strategic communication professions. However, students wishing to pursue further graduate study may select courses that will prepare them for academic research.

Admission Requirements

To be eligible for admission to the graduate program, applicants must meet the following requirements:

1. All applicants must have a four-year bachelor's degree from an accredited college or university.
2. All candidates must show promise of success in graduate studies. Applicants must meet the following criteria, in addition to any program-specific requirements:
 - A. Meet minimum GPA: Candidates must have a minimum grade point average (GPA) of 3.0 earned during the last 60 hours of upper-level work.
 - B. Students applying to the Global Strategic Communications program must submit an essay. Topic should reflect professional goals consistent with the objectives of the master's program.

- C. Students must submit a professional and current resume.
- D. Students must submit 2 letters of recommendation from individuals suited to evaluate their potential as a graduate student.

3. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required. A minimum TOEFL score of 550 for the Global Strategic Communications Program is acceptable. Candidates who have passed the TOEFL more than two years before they apply for admission to the program have to repeat the test with the required score.

The following is standardized exam requirement information for the programs leading to an M.S. in Mass Communications:

- a) Students applying to the Global Strategic Communications program are required to take the GRE, GMAT, LSAT or alternative standardized test utilized for graduate school admission. Those who can demonstrate a record or professional accomplishment, hold a master's degree from an accredited college or university and/or demonstrate exceptional academic credentials may petition for a waiver of the standardized exam requirement. There is no minimum score requirement for those who take the standardized exam for the Global Strategic Communications program.
- b) Students applying to the Spanish Language Program are required to take the EXADEP or GRE with no minimum required score.
- c) Students applying to the Global Strategic Communications – Creative Track program will not be required to take the GRE, but will be subject to a rigorous portfolio review of their creative work for admission.

Application Procedures

A student applying for admission to the graduate program must:

1. Complete online graduate admissions application available at <https://admissions.fiu.edu/how-to-apply/graduate-applicant/index.html>.
 - A. Have two official copies of transcripts from all colleges or universities attended sent to the Admissions Office. (Copies submitted by applicants will be rejected.)
 - B. Submit appropriate test scores and documents to the Admissions Office.

Admission Deadline

Students should adhere to the Florida International University graduate admissions deadlines for Fall, Spring and Summer terms. These deadlines are listed in the Graduate Catalog in the Graduate Admission section.

Note that domestic students and international students have different deadlines. Additionally, application deadlines are different for the Global Strategic Communications online program. The current deadlines for the on-campus programs are as follows:

Domestic Students

Fall June 1st
 Spring October 1st
 Summer March 1st

International Students

Fall February 1st
 Spring September 1st
 Summer February 1st

If you have any questions regarding these deadlines, please call the Graduate Admissions office at (305) 348-7000.

Degree Requirements**Plan of Study/Commencement of Program**

Upon admission to the graduate program, each student will be advised on their plan of study by a faculty advisor. In most cases, this will be the director of the appropriate graduate program. The advisor will be responsible for developing the student's plan of study, requesting applicable transfer of credit where appropriate, monitoring the student's academic progress, and ensuring the fulfillment of the requirements for the master's degree. This will also include a timetable for completion of the work. Any changes in the plan must be approved by the faculty advisor and the appropriate chairperson.

Competency in Statistics

Competence in the fundamentals of statistics is required of all graduate students. In order to register for MMC 5440 (Applied Research Methods in Mass Media) students must demonstrate a knowledge of statistics in one of three ways: by having taken a course in statistics within the last three years, passing an examination in the subject, or taking a special seminar, offered simultaneously with the commencement of the graduate research course.

Professional Experience

Professional experience in a field directly related to the specialization is an advantage. Applicants without such professional experience may be required to complete up to 9 credits of additional undergraduate course work and/or to complete an internship with a professional organization. After an interview with the applicant, the student's faculty advisor will determine the amount of undergraduate work and the undergraduate courses to be completed, if necessary.

Transfer Credit

Students may petition the appropriate advisor to transfer up to six hours of graduate credit toward the degree. To be approved for transfer, the courses must have been previously taken at an accredited college or university; the student's advisor must judge the courses relevant to the student's plan of study; the student must not have used the credits toward another degree; the student must have earned a 'B' or higher in the courses, and meet the University requirements. No transfer courses will substitute for skills courses in any area of specialization in the master's program. All transfer credit must have been completed within the six-year period preceding the date the degree is granted.

Time Limit

All work applicable to the degree, including transfer credit, must be completed within six years of first enrollment in the master's program.

Grades

Students must maintain a minimum GPA of 3.0 in all courses required for the degree. No more than two 'C' grades will be allowed.

Professional Project, Thesis

Students complete a professional project in their areas of specialization. Work on the project generally will be completed during the final semester. Students must receive a 'B' or higher on the project for it to be accepted. Students may also opt to do a thesis; GPA requirements are the same.

Required Courses

To earn the M.S. in Mass Communication, students must meet the following requirements:

1. Students must take at least 30 hours of acceptable graduate credit. Of those hours, all courses taken toward graduation must be at the graduate level.
2. At least 27 hours must be taken in the School of Communication and Journalism, unless otherwise approved by the department chair.

Global Strategic Communications (30 credits)

This program is designed to give students a general background in strategic communications and to help them prepare for advancement in advertising, public relations, and integrated communications careers while providing knowledge and understanding for addressing global, national, and local audiences and communication issues. Most students complete the program in 18 to 24 months. ***In addition, this GSC program can be completed fully online in 12 months if taken full time.***

Core Curriculum: (15 credits)

All students must take the following core courses:

PUR 6005	Strategic Communication Theories	3
COM 6318	Applied Research Methods	3
PUR 6607	Global Strategic Communication Management	3
PUR 6206	Ethics and Social Responsibility	3
PUR 6956	Professional Project	3
	<i>(prereq: completion of 24 credit hours)</i>	

GSC Required Electives: (15 credits)

Choose five of the following:

ADV 6805C	Advertising and Public Relations Creative Strategy	3
PUR 6625	Digital Media Management	3
PUR 6117	Storytelling and Digital Content Creation	3
PUR 6508	Social Media Metrics and Evaluation	3
MMC 5268	Communication in a Digital Age	3
COM 6085	Communication in the Digital Age	3
PUR 6115	Applied Media Communication Skills	3
MMC 5932	Special Topics Seminar	3
COM 6435	Global Communications	3
PUR XXXX	Multimedia Production and Design	3
ADV 6305	Media Planning	3
COM 6915	Independent Study (with permission)	3

COM 6945	Graduate Internship (with permission)	3
MMC 6951C	Professional Project II	1
PUR 5406	Multi-Cultural Communications	3
PUR 6610	Global Reputation Management	3
PUR 6690	Strategic Facilitation	3
PUR 6806	Global Account Planning	3
PUR 6935	Advanced Communication Seminar (Crisis and Issues Management)	3
PUR 5476	Communication for Change Management	3

Students may earn a graduate certificate in Conflict Resolution and Consensus Building from the FIU Center for Labor Research and Studies along with the M.S. degree in Global Strategic Communication. To complete this certificate students must take the three LBS electives, and PUR 5690 and PUR 5476, as part of their 30 credits toward the Master's degree.

Global Strategic Communications – Creative Track (39 credits)

The Global Strategic Communications creative program is a rigorous, self-supporting continuing education program that is limited to a select number of qualified students who have shown above average creative potential and wish to combine a theoretical knowledge of communications with a more in depth exposure to creative concepts. A portfolio review is required for admission.

The Global Strategic Communications - Creative Track incorporates these unique features:

- Unique combination of academic and creative courses
- Interaction with top creative professionals
- Access to Miami Ad School guest speakers, courses and facilities
- Five semesters of courses, offered on a lock-step basis
- The option of a semester away and internships at top advertising agencies

Core Curriculum: (21 credits)

Being a lockstep program, all students must take the following core courses: 21 credits

MMC 6402	Theories of Mass Communication	3
MMC 5440	Applied Research Methods in the Mass Media	3
MMC 6950	Professional Project	3
ADV 6805C	Advertising and Public Relations Creative Strategy	3
MMC 6213	Ethics and Social Responsibility	3
MMC 5306	Global Communications	3
VIC 5205	Trends in Graphics & Design	3

In addition, all students must take the following skills courses at partner school, Miami Ad School: 18 credits

PUR 6935	Advanced Communications Seminar	3
ADV 6503	Seminar in Advanced Creativity	15

Mass Communication: Global Strategic Communications 4+1 Degree Pathway

With their advisor's approval, students from undergraduate majors in a variety of fields may apply to the Mass Comm Global Strategic Communications 4 + 1 Degree Pathway. If accepted, students will be allowed to take up to 12

credits of graduate courses which will apply toward both their undergraduate and their master's degree program.

The admissions requirements are:

- Current enrollment in an approved bachelor's degree program at FIU
- Completed a minimum of 75 undergraduate credits
- Current GPA of 3.2 or higher
- Complete the separate 4 + 1 application, including signed approval by the director, coordinator or designee of the graduate program.

Certificate Programs

Global Strategic Communications

The objective of the Global Strategic Communications certificate is to train interested community professionals in up-to-date strategies and methodologies in global strategic communications. This certificate program is open to non-degree-seeking students only.

Required Courses: (9 credits)

PUR 6607	Global Strategic Communication Management	3
PUR 6806	Global Account Planning	3
MMC 5306	Global Communications	3

Plus any two of the following: (6 credits)

MMC 5440	Applied Research Methods in the Mass Media	3
MMC 6213	Ethics and Social Responsibility	3
PUR 5406	Multi-Cultural Communication	3
PUR 6935	Advanced Communications Seminar	3
ADV 6805C	Advertising and Public Relations Creative Strategy	3

For additional information about the Global Strategic Communications program, please call (305) 919-5625 or email gsc@fiu.edu.

Science Communication Certificate

The Graduate Certificate in Science Communication is intended for graduate students, researchers, educators and professionals in Communication or STEM disciplines. The program will be offered to both degree-seeking and non-degree-seeking students.

The Graduate Certificate in Science Communication will require a total of 15 credits, including one foundational required course (6 credits) and three elective courses (9 credits).

Required Courses

Foundational Course		
MMC 5409	Science, Health, Environment and Risk Communication	3
PUR 6117	Strategic Storytelling and Digital Content Creation	3

Elective Courses

Electives in Communication select at least one:		
VIC 6005	Web Design and Data Visualization	3
COM 5606	Environmental Communication	3
COM 6318	Applied Research Methods	3
MMC 5932	Special Topics <i>if approved by advisor</i>	3
PUR 6116	Multimedia Skills for Strategic Communicators	3

PUR 6508	Social Media Metrics and Evaluation	3
Electives in Science select at least one:		
BSC 6936	Writing, publishing and communicating peer reviewed papers in biological sciences	
SOP 5058	Proseminar in Social Psychology	
PHC 6401	Health Behavior and Public Health	
Or		

Any course from the STEM disciplines with approval from student advisor and certificate coordinator.

Other Requirements This certificate is intended for students, researchers, educators and professionals in Communication or STEM disciplines. Other students will need to write an essay and be interviewed by the certificate director before enrolling.

Course Descriptions

Definition of Prefixes

ADV-Advertising; COM-Communications; DIG-Digital Media; JOU-Journalism; MMC-Mass Media Communication; PUR-Public Relations; RTV-Radio: Television; VIC-Visual Communication.

All courses required for the degree will be offered at least once during the term of the student's enrollment.

ADV 6305 Media Planning (3). This course is intended to be a survey of the media planning discipline of advertising.

ADV 6355 Advertising and Society (3). The relationship between advertising, economic, political, moral, and ethical issues.

ADV 6503 Seminar in Advanced Creativity (3). Theoretical and practical application of variable topics including creative problem solving, design, web advertising, pop culture, and IMC tools. Progressive level of difficulty. Prerequisite: Permission of the instructor.

ADV 6805C Advertising and Public Relations Creative Strategy (3). Focuses on the conceptualization of breakthrough strategies and their application to all integrated communication tools. (Offered at least once a year).

COM 5606 Environmental Communication (3). This graduate level course is designed to bring theoretical principles and professional skills associated with mass communication together with environmental issues and themes. Prerequisites: Completion of the six-credit project or internship requirement (EVR 5907) and permission of the instructor or department.

COM 6085 Communication in the Digital Age (3). This course is designed to develop and enhance students' understanding of the foundations for digital communication, including an overview of the historical development of digital communication.

COM 6318 Applied Research Methods (3). An advanced course in the acquisition and use of secondary data, including media data, as well as the design, execution and utilization of research studies.

COM 6435 Global Communication (3). This course explores global markets and intercultural communications while providing advanced study, evaluation and

application of cultural context, theories, stakeholders, and trends.

COM 6915 Independent Studies (3). Specialized intensive study in an area of special interest to the student with a focus on directed, independent research. Prerequisite: Requires prior approval by instructor, graduate standing, and full admittance in the program.

COM 6945 Graduate Internship (3). On-the-job learning in activity at selected and approved organizations. May include advertising and PR agencies, as well as private, governmental or non-profit organizations. Prerequisite: Requires prior approval by instructor.

DIG 5167 Social Media Metrics and Evaluation (3). This course introduces strategic aspects of social media analytics by highlighting metrics for assessing effectiveness of social media strategies for global advertising, public relations and marketing.

DIG 5438 Strategic Storytelling and Digital Content Creation (3). This course offers a view of storytelling paradigms and provides the opportunity to apply digital storytelling for strategic purposes using interactive multimedia tools.

DIG 5569 Digital Media Management (3). This course examines various methods and perspectives of managing digital media platforms and content in a strategic communication setting.

MMC 5207 Ethical and Legal Foundations of the Student Press (3). Examines ethical and legal foundations underlying the operation of the student press on American campuses, stressing both rights and responsibilities and how to organize publications to protect both. (Offered at least once a year).

MMC 5268 Communication in the Digital Age (3). This course is designed to develop and enhance students' understanding of the foundations for digital communication, including an overview of the historical development of digital communication.

MMC 5306 Global Communications (3). This course explores global markets and intercultural communications while providing advanced study, evaluation and application of cultural context, theories, stakeholders, and trends in media, advertising, and public relations. Analysis of ethical, legal, political, and social communications issues around the globe.

MMC 5409 Science, Health Environment and Risk Communication (3). This graduate course is an advanced communication course designed to introduce students to theory, research and contemporary issues in communicating science, health, environment and risk.

MMC 5440 Applied Research Methods in the Mass Media (3). An advanced course in the acquisition and use of secondary data, including media data, as well as the design, execution and utilization of research studies. Students will conduct an original proprietary study. (Offered at least once a year).

MMC 5655 Mass Communication and the Environment (3). The course brings theoretical principles and professional skills associated with media communication together with environmental issues. Prerequisites: Graduate standing or permission of the instructor.

MMC 5932 Special Topics Seminar (3). A variable topic seminar dealing with issues of interest to the community. Examples are rights of high school journalists, cable TV, the use of mini-computers in creative communication. Prerequisite: Permission of the instructor. (Offered at least once a year).

MMC 6108 Theories of Mass Communication and Writing (3). The course examines writing theories and processes and explores media responsibility to society including communication principles and techniques found in contemporary communication theories.

MMC 6135 Multimedia Production and Design (3). The course offers introduction in the theory and practice of multimedia production including digital photography, videography, non-linear video editing and sound design.

MMC 6213 Ethics and Social Responsibility (3). This course familiarizes students with professional ethics and standards in advertising and public relations and examines the regulatory environment in which strategic communication takes place. Prerequisite: Permission of the instructor. (Offered at least once a year).

MMC 6257 Media Management and Entrepreneurship (3). Introduction to the basic functions of media management with an emphasis on television and new media in a global marketplace; provides an understanding of business models and decision-making processes.

MMC 6402 Theories of Mass Communication (3). Examines theories and processes of mass communication as well as media responsibility to society and the social and ethical responsibility of communicators. (Offered at least once a year). Prerequisite: Permission of the instructor.

MMC 6412 Applied Media Communication Skills (3). This advanced skills course covers a broad range of written, interpersonal, social media, presentation, and team communication skills for the advertising, marketing and public relations professions.

MMC 6416 Media Planning (3). This course is intended to be a survey of the media planning discipline of advertising. Prerequisite: Permission of the instructor.

MMC 6900 Independent Study (3). Specialized intensive study in an area of special interest to the student with a focus on directed, independent research. Prerequisites: Requires prior approval by instructor, graduate standing, and full admittance in the program.

MMC 6940 Graduate Internship in Strategic Communication (1-3). On-the-job learning in activity at selected and approved organizations. May include advertising and PR agencies, as well as private, governmental or non-profit organizations. Prerequisite: Graduate standing.

MMC 6950 Mass Communication Professional Project (1-3). Designed to demonstrate student's excellence in an area of communication studies. Prerequisites: Permission of the instructor, 24 credit hours to align with the GSC track requirements; this would not apply to Spanish Language Journalism Program.

MMC 6951C Professional Project II (1). Demonstrates the student's excellence in an area of communication

study. Must be taken if student doesn't complete MMC 6950 in one semester. Prerequisite: MMC 6950.

MMC 6970 Mass Communication Master's Thesis (1-3). This course is designed to demonstrate the student's excellence in an area of communication study. This course provides guidelines and direction to graduate students completing their Master's Thesis. Prerequisites: Completion of 27 credit hours, MMC 5440.

PUR 5406 Multi-Cultural Communications (3). Explores the multicultural dimensions of communications with diverse audiences within the United States.

PUR 5476 Communication for Change Management (3). This course is designed to provide students with the communication strategies necessary to effectively navigate organizational change through case studies, role plays and analytical essays.

PUR 6005 Strategic Communication Theories (3). Examines theories and processes of strategic communication and media responsibility to society and the social and ethical responsibility of communicators.

PUR 6115 Applied Media Skills (3). This advanced skills course covers a broad range of written, interpersonal, social media, presentation, and team communication skills for the advertising, marketing, and public relations professions.

PUR 6116 Multimedia Skills for Strategic Communicators (3). The course offers introduction in the theory and practice of multimedia production.

PUR 6117 Strategic Storytelling and Digital Content Creation (3). This course offers a view of storytelling paradigms and provides the opportunity to apply digital storytelling for strategic purposes.

PUR 6206 Ethics and Social Responsibility (3). This course familiarizes students with professional ethics and standards in advertising and public relations and examines the regulatory environment.

PUR 6477 Strategic Facilitation (3). This course focuses on the theories and techniques to conduct strategic facilitation. Students learn facilitation skills, and enhanced communication skills to successfully facilitate communication.

PUR 6508 Social Media Metrics and Evaluation (3). This course introduces strategic aspects of social media analytics by highlighting metrics for assessing effectiveness of social media strategies.

PUR 6607 Global Strategic Communication Management (3). This course acquaints students with the professions and practice of global advertising and public relations in a multicultural world. Prerequisite: PUR 6806.

PUR 6610 Global Reputation Management (3). This course introduces students to the role and value of strategic communication in developing and sustaining an organization's global reputation.

PUR 6625 Digital Media Management (3). This course examines various methods and perspectives of managing digital media platforms and content in a strategic communication setting.

PUR 6806 Global Account Planning (3). This course introduces students to contemporary account planning and

global strategic communication techniques. Prerequisite: Permission of the instructor. (Offered at least once a year).

PUR 6935 Advanced Communications Seminar (3). The class will consist of a series of readings, discussions and presentations to immerse students in contemporary issues in Advertising and Public Relations. Prerequisite: Permission of the instructor. (Offered at least once a year).

PUR 6956 Professional Project (3). Designed to demonstrate student's competence in the pillars of global strategic communications. Prerequisite: Permission of the instructor, 24 credit hours to align with the GSC track requirements

VIC 5205 Trends in Graphics and Design (3). Design principles and how they relate to trends in student and professional media, including newspapers, magazines and yearbooks. Deals with graphics, packaging, typography and modern design. Prerequisite: Permission of the instructor. (Offered at least once a year). (Supplies fee assessed).

VIC 6005 Web Design and Data Visualization (3). Students will learn how to design, build and publish a news website and a page on social media platforms. This course will also develop the student's skills on data journalism and data visualization.

Interior Architecture

Marie Mihalik, *Adjunct Professor*

Florida International University's Department of Interior Architecture is situated within two very compelling conditions: the diverse international community within South Florida and the rich interdisciplinary environment in the College of Communication, Architecture + The Arts. This unique context inspires our interpretation of the interior design profession as an occupation that exercises many types of knowledge and operates within complex social, cultural, technological, and artistic settings.

FIU's Department of Interior Architecture provides students with a value added education that consists of small student-to-faculty ratios, studio facilities where students have their own workspace, study abroad options, and digital and fabrication labs offering advanced technology. The Department of Interior Architecture is an ideal setting where students are actively involved in learning and exploring the current and future roles of the interior design profession within a global society. More particularly, this context challenges our students to critically investigate the diverse roles of interior design and interior architecture, and inspires us to explore new avenues of thought and attitudes toward why and how we make human environments.

We focus on preparing well-rounded design professionals. Our interdisciplinary foundation coursework and our unique three years of professional graduate curriculum prepare our students to meet the profession head-on. Our graduates work in many different settings in the design of residential, commercial, and institutional projects. This exciting program has a strong emphasis on interior architecture and incorporates the recommendations and standards of national and local professional societies into the development of its curriculum.

The Master of Interior Architecture provides professional degree tracks that are intended for individuals with bachelor degrees from a variety of fields. This course of study has three tracks: a five-year track for students who begin as undergraduates, a two-year track for students with bachelor degrees in architecture or landscape architecture, and a three-year track for students with bachelor degrees in other disciplines.

The Accelerated Master of Interior Architecture (MIA) program provides a seamless course of study leading from undergraduate freshman year to the conferral of the Professional Master of Interior Architecture degree. The five-year Accelerated MIA track is comprised of 157 credit hours of integrated pre-graduate and graduate coursework. The degree consists of 73 credit hours of pre-graduate coursework taken over two years followed by 84 credits hours of graduate coursework. At the conclusion of

73 credit hours of pre-graduate study, students move directly to graduate study. A transition from undergraduate to graduate standing occurs during the fourth year after completion of 120 credits. Students must be in good standing with a 3.0 or higher GPA in graduate level coursework (5000 level or higher). A Bachelor degree is not awarded at any point in the program.

The department maintains close ties with interior design professionals. Our professional advisory board periodically reviews the curriculum to maintain program relevance.

Students applying to the department should plan for the financial aspects of a design education. This includes the costs of computers, software, travel and field trips, tools and equipment, and modeling supplies. All students must have continuing access to a laptop computer through purchase, lease or other arrangements.

Ownership of Student Work

Student work, submitted to the department in satisfaction of course or degree requirements, becomes the physical property of the department. However, students retain all rights to the intellectual property of such work. This work may include papers, drawings, models, and other materials. The department assumes no responsibility for safeguarding such materials. At its discretion, the department may retain, return, or discard such materials. The department will not normally discard the materials of currently enrolled students without giving the student an opportunity to reclaim them.

Admissions Requirements for all Graduate Degrees in the Department of Interior Architecture

All applicants must meet University graduate admissions requirements. Applicants to the Department of Interior Architecture degree programs must also submit a portfolio of creative work for department review. The portfolio review examines evidence of creative ability, academic success, and professional achievement. It is an important component of the admissions process. Please contact the Department of Interior Architecture for specific portfolio requirements. The deadline for portfolio submission is January 15th of each year. Portfolios submitted after this date will be considered if studio space is available.

Students who have successfully completed the portfolio review process must also meet the minimum requirements of an undergraduate degree from an accredited college or university with undergraduate grade point average (GPA) of 3.0 on a 4.0 scale, or hold a graduate degree from an accredited institution to be fully admitted in the graduate program. When the academic record is less than 3.0 GPA, the applicant must submit Graduate Record Examination (GRE) scores.

Thesis Requirement

Interior Architecture graduate students in master degree programs are required to undertake a master's project or a master's thesis as part of their course of study at the Department of Interior Architecture.

Master of Interior Architecture

Professional Degree Tracks

The Graduate Program in Interior Architecture prepares expert interior designers with strong professional and content background, capable of engaging in evidence-based design and able to conduct and apply research. The program is a comprehensive, interdisciplinary degree program designed to engage students in advanced study regarding public interiors. The unique curriculum provides students with firsthand experience of a wide range of interior design issues in specialized areas of study such as hospitality design, healthcare facility design, and workplace design.

The Master of Interior Architecture provides professional degree tracks that are intended for individuals with bachelor degrees from other fields. This course of study has two tracks: a two-year track for students with bachelor degrees in architecture or landscape architecture, and a three-year track for students with bachelors degrees in other disciplines. Both of these tracks begin Summer Semester.

THREE YEAR TRACK – 90 Credits

A professional degree for students with a Bachelor of Arts or a Bachelor of Science, or equivalent, from an accredited institution.

Summer Leveling

Leveling courses may be required for students without a design background. These are in addition to degree requirements.

IND 5319	Visual Notation for Interior Design	3

Master of Arts in Interior Architecture

Post-Professional Degree

Individuals with an undergraduate degree in Interior Design or Interior Architecture from an accredited professional program are eligible for admission to the program provided University requirements are met. This 36 credit hour degree prepares students who wish to conduct research, teach and undertake advanced studies in Interior Design. One year of full-time study in residency is normally required. However, a part-time study option is available subject to the review and approval of the Program. Satisfactory completion of 36 credits in the following course of study is required.

Health Care Design Track

This track prepares students with a specialized healthcare design expertise. Students will interact with a variety of stakeholders to co-create spatial contexts in partnership with related academic disciplines (nursing, medicine, public health, occupational therapy, computer science and

bio-medical engineering), health care design professionals, and healthcare facilities (hospitals and nursing homes). The program is designed to provide students with research expertise, problem-solving skills, health care design thinking and prototyping skills while engaging with a multicultural urban community.

Certificate in Cruise Ship and Super Yacht Design

The Interior Architecture Department has assembled a team of professionals and educators to offer a unique curriculum that will prepare designers for the specific issues associated with designing cruise ship and yacht interiors. The certificate program is offered to students who are enrolled in the FIU's Master of Interior Architecture program and involves international workshops with designers from overseas venues. Enrollment in the certificate program offers FIU students the opportunity to form specialized knowledge in this area of design prior to graduation with their Master of Interior Architecture degree.

Entrance into the program is limited to students entering their fourth year of the MIA curriculum who have earned a 3.0 or better grade point average in the graduate program. All applicants should access the appropriate application through the OneStop website, at: <https://admissions.fiu.edu/how-to-apply/graduate-applicant/applications/index.html>. The application is in paper form and must be completed by the student. At the conclusion of the certificate program, students will be issued a Certificate of Cruise Ship and Super Yacht Design from Florida International University. This certificate program is open to degree-seeking students only.

Program Requirements

The certificate program consists of 15 credit hours of courses currently embedded within the existing Master of Interior Design curriculum: two specialized sixteen-week studio courses; plus an industry specific internship course coordinated through FIU's interior design program.

IND 5418	Design at Sea	3
IND 6257C	Graduate Design 3	6
IND 6258C	Graduate Design 4	6

Certificate in Furniture Design

The Certificate in Furniture Design offers students the ability to explore, design, and create furniture for commercial and residential purposes. This program serves FIU students who wish to extend their design education into this area of specialized study. Focused on creative design process and on bringing products to market, the four courses in this certificate develop students' skills, knowledge, and critical thinking about the design, making, and marketing of furniture products for industry, retail, and gallery markets. This certificate program is open to degree-seeking students only.

Entrance into the program is limited to students enrolled at FIU who have earned a 3.0 or better grade point average. All applicants should access the appropriate application through the OneStop website. <https://admissions.fiu.edu/how-to-apply/graduate-applicant/applications/index.html>. The application is in paper form and must be completed by the student to FIU Graduate Admissions. At the conclusion of the certificate program, students will be issued a Certificate in Furniture Design from Florida International University.

Program Requirements

Studio Courses

IND 5445C	Introduction to Furniture Design	3
IND 5447C	Advanced Furniture Design	6

Subject Area Courses

IND 5164	History of 21st Century Furniture Design	3
IND 5446	Professional Practice and Entrepreneurship in Furniture Design	3

Course Descriptions

Definition of Prefixes

IND-Interior Design

F-Fall semester offering; S-Spring semester offering; SS-Summer semester offering.

IND 5029 Art in Public Interiors (3). Examination of the creative place making and the integration of artwork into the interior architecture of public places.

IND 5138 History of Modern Interiors (3). An analysis of the history of architectural interiors, furniture and decorative arts from the Neo-Classical period to the present time.

IND 5164 History of 21st Century Furniture Design (3). Students will research and analyze the social, political, technical economic and theoretical forces that contribute to new movements in late 20th century and early 21st century furniture design.

IND 5235 Formative Studio 1 (6). Introduction to concept development, spatial expression, and representational techniques in architecture.

IND 5285 Design Foundations (3). The course is a rigorous introduction to design fundamentals. It builds a design language through lectures, practical exercises, exploring techniques, materials, skills, making and critical thinking. Prerequisite: Program approval.

IND 5319 Visual Notation for Interior Design (3). Course will develop drawing skills in multiple media, actively engaging in projects of drawing as a medium of investigation, documentation, memory, observation and

presentation for interior design. Prerequisite: Program approval.

IND 5325 Color Theory and Application for the Built Environment (3). Use of color in the built environment including principal color systems, methods of color harmony, effects of visual phenomena, and various psychological, cultural and historical implications.

IND 5418 Design at Sea (3). Study of Interior Architecture of Cruise Vessels. Students learn spatial material and regulatory issues associated with marine design.

IND 5427 Construction Documents in Interior Architecture (3). Conceptual framework for design of building assemblies, understanding of construction technologies and properties of interior building materials. Construction drawings and specifications are produced. Prerequisite: Graduate standing.

IND 5428 Materials and Methods (3). Research and analysis of building materials and methods. Properties of materials and performance in a variety of light building, interior and environmental assemblies are investigated.

IND 5438 Lighting Design (3). Exploration of theories and applications of lighting design. Emphasis on studying research about interactions between light, people and articulation of interior space.

IND 5445C Furniture Design (3). Providing a general overview of furniture design process, this design/build studio course teaches students about ergonomics, scale, space, structure and materiality related to furniture design.

IND 5446 Professional Practice and Entrepreneurship in Furniture Design (3). Learn about industry standards and entrepreneurial strategies that successful designers and furniture companies use when bringing new designs to different markets.

IND 5447C Advanced Furniture Design (6). Research, analyze and design furniture using wood, metals and plastics. Instruction will include advanced technical skills and emphasis on qualitative and conceptual aspects of design.

IND 5454L Advanced Construction Documents in Interior Architecture Lab (2). Supplement Adv CDs Lectures with hands on exercises in advanced problems associate with production of professional construction documents for interior design practice. Prerequisite: IND 5427

IND 5475 Computer Applications in Design (3). Study of computer software packages applicable to the architecture office environment, with particular emphasis on CAD software, graphics packages and desktop publishing.

IND 5477 Computer Applications in Design II (3). Intermediate study of computer software applicable to the architecture and interior design office environment, with particular emphasis of CADD software, graphics packages and desktop publishing.

IND 5485 Advanced Construction Documents in Interior Architecture (1). Advanced understanding of construction technologies, plus properties and assembly systems of interior building materials. Construction drawings and specifications are produced. Prerequisite: IND 5427.

IND 5486 Materials for Interiors (3). Analysis and research of critical issues affecting selection and application of interior finish materials.

IND 5508 Professional Practice (3). Advanced study office administration, contract negotiation, fee structure, professional ethics, client and public relations. Investigations and analysis of business organizations and project management. Prerequisite: Program approval.

IND 5509 Personal Branding and Career Preparation (3). Learn brand strategy, storytelling, media consistency, brand maintenance, interviews, and personal marketing packages. Covers values of responsibility, accountability and effectiveness.

IND 5513 Managing the Design Project (3). Principles and methods of managing design projects including, buildings, interiors and landscape projects. Content covers planning, scheduling, organizing, and controlling complex design projects.

IND 5602 Healthcare Design 1 (6). Advanced design studio addressing prevailing and future issues in healthcare design.

IND 5603 Healthcare Design Studio 2 (6). Students explore application of theoretical issues in order to create 'what-if' scenarios in health care design that might not be currently addressed in industry.

IND 5612 Environmental Systems for Healthcare Environments (3). Study of building environmental systems and building performance issues that impact the design of Healthcare environments.

IND 5615 Building Systems for Interiors (3). Study of building environmental systems and building performance issues that impact the design of building interiors and affect the health, safety, welfare, and performance of building occupants. Prerequisite: IND 5628.

IND 5616 Environment and Behavior Theory (3). Students explore, analyze, and interpret various environment and behavior theories appropriate for designing healthcare environments.

IND 5617 Health Care Theory (3). Exploration of health care theory, its manifestation in specific health care models and delivery systems, plus, its implementation in design of healthcare environments.

IND 5625 Interior Architecture Theory II (3). Overview of the environmental parameters, morphological concepts and ideological principles that generate form and meaning in interior design, architecture, and landscape architecture.

IND 5626 Project Programming (3). Students perform pre-design research and analysis aimed at programming the design of a specific facility. Students ultimately prepare a program of requirements for their master's project. Prerequisites: IND 5937, IND 6639. Corequisite: IND 6259C.

IND 5628 Sustainable Practices in Interior Architecture (3). Analysis and application of theoretical, practical, and professional issues involved in designing sustainable interior environments.

IND 5629 Computer Applications in Design III (3). Students learn advanced techniques in digital design

through using 3 dimensional modeling and rendering software within the design process.

IND 5637 Design Research Methods (3). Advanced strategies and tactics to gather, organize, assess, analyze, interpret and judge the many forms many forms of information relevant to design.

IND 5645 Structures 1 (1). Through the study of statics and strength of materials this introductory course provides a scientific basis for analysis of how various structural systems work and withstand loading. Prerequisites: PHY 2053 and MAC 2233 or MAC 1114 or MAC 1147.

IND 5645L Structures 1 Lab (2). The lab sessions will supplement lectures through additional practice and hands-on problems that are designed to enhance the application of structural concepts. Prerequisites: PHY 2053 and MAC 2233 or MAC 1114 or MAC 1147. Corequisite: IND 5645.

IND 5937 Special Topics (3). Examination of the conceptual framework supporting the theory, and research applications in specialized area of interior design. Prerequisite: Program approval.

IND 5938 Cejas Eminent Scholar Seminar (1-3). This is a seminar/workshop course taught by distinguished educators, scholars, and designers. Lectures, critical readings, and discussions of thematic topics make up the methodology of the course.

IND 5939 Design Thinking and Creative Process (3). Using literature on design methods, design cognition, cognitive psychology and design protocol studies, students will learn about the various models of creative process in design.

IND 5941 Internship Experience (0). Experience in interior design practice learned through work with licensed professionals.

IND 5948 Interior Architecture Graduate Internship (3). Advanced issues in professional practice learned through work experience with design professionals.

IND 5950 Interior Architecture Travel, Culture, and Design (3). Study of Interior Architecture through travel. Adopting a global view, students learn to weigh design decisions within the parameters of ecological, socio-economic, and cultural contexts.

IND 6255 Graduate Design 1 (6). Exploration of highly articulated projects utilizing innovative research methods to strengthen and clarify design concepts taken to a detailed resolution. Corequisite: IND 5427.

IND 6256 Graduate Design 2 (6). Advanced design topics explored. Focus on student specialization interest. Emphasis on integration of design process from conceptual formulation and programming to design development and reflection. Prerequisite: IND 6255.

IND 6257C Graduate Design 3 (6). Advanced content with focus on developing and applying of design criteria to create highly articulated interior environments for work, retail, and recreation. Prerequisite: IND 6256. Corequisite: IND 5485.

IND 6258C Graduate Design 4 (6). Focus on developing a global approach to designing with awareness and respect for cultural and social differences, and the

implications of conducting the practice of design within a world market. Prerequisite: IND 6257C.

IND 6259C Graduate Design 5 (6). Complex issues associated with the design of institutional environments are used to explore issues of environment and behavior, universal design, plus issues of health, safety, and welfare. Prerequisite: IND 6258C. Corequisite: IND 5626.

IND 6616C Interior Architecture Theory I (3). Students analyze and explore the application of pivotal theories regarding the relationships between human behavior and the design of interior environments.

IND 6639 Research Methods (3). Methods of data acquisition, analysis, and interpretation used in interior design research. Prerequisite: Program approval.

IND 6906 Independent Study (1-3). Coursework on a particular aspect of Architecture under the direction of faculty in an individual study format. Prerequisite: Program approval.

IND 6910 Graduate Seminar (3). Coursework under the direction of faculty in preparation for a master's thesis or master's project in interior design. Prerequisites: IND 6906, program approval.

IND 6970 Master's Project (1-6). The curriculum was reordered and the Master's project is now the terminal studio for all students.

IND 6971 Master's Thesis (1-6). Coursework under the direction of faculty for the completion of thesis by candidate for the degree of Master of Interior Design. Prerequisites: Program approval and IND 6910.

IND 6973 Thesis Seminar (3). Students develop an independent research strategy that will enable them to address their thesis question. Prerequisite: IND 6979.

IND 6979 Thesis Research (1-3). Design, development, and execution of research project for master's thesis in interior design. Prerequisites: IND 5937, IND 6639.

Master of Science in Mass Communication

The Department of Journalism + Media in the School of Communication + Journalism (SCJ) offers professional education leading to the M.S. in Mass Communication with current specializations in Spanish-language journalism. The orientation of the graduate program is primarily professional, not theoretical. The program is designed to enhance graduates' abilities to work in the mass communication professions.

Admission Requirements

To be eligible for admission to the graduate program, applicants must meet the following requirements:

1. All applicants must have a bachelor's degree from an accredited college or university.
2. All candidates must show promise of success in graduate studies. Applicants must meet the following criteria, in addition to any program-specific requirements:
 - A. Meet minimum GPA: Candidates must have a minimum grade point average (GPA) of 3.0 earned during the last 60 hours of upper-level work.
 - B. Students must submit a 500-750 word essay. Topic should reflect why the program is a suitable fit for the applicant's needs.
 - C. Students must submit a professional and current resume.

3. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required. No minimum TOEFL score for the Spanish-Language Program is required, for candidates that chose the Spanish-Language Multimedia Track. For those that chose the Latin America and Caribbean Track, a minimum score of 500 will be required. Candidates who have taken or passed the TOEFL more than two years before they apply for admission to the program must repeat the test with the required score.

Application Procedures

A student applying for admission to the graduate program must:

1. Complete online graduate admissions application available at <https://admissions.fiu.edu/how-to-apply/graduate-applicant/index.html>.
 - A. Have two official copies of transcripts from all colleges or universities attended sent to the Admissions Office. (Copies submitted by applicants will be rejected.)
 - B. Submit appropriate test scores and documents to the Admissions Office.

Admission Deadline

Students should adhere to the Florida International University graduate admissions deadlines for Fall, Spring and Summer terms. These deadlines are listed in the Graduate Catalog in the Graduate Admission section.

Note that domestic students and international students have different deadlines. If you have any questions regarding these deadlines, please call the Graduate Admissions office at (305) 348-7000.

Degree Requirements

Plan of Study/Commencement of Program

Upon admission to the graduate program in mass communication, each student will be assigned a faculty advisor. In most cases, this will be the coordinator of the appropriate graduate program. The advisor will be responsible for developing the student's plan of study, requesting applicable transfer of credit where appropriate, monitoring the student's academic progress, and ensuring the fulfillment of the requirements for the master's degree by completing the student's Program of Studies with the student. This will also include a timetable for completion of the work. Any changes in the plan must be approved by the faculty advisor and the appropriate chairperson. It is also the faculty advisor's responsibility to complete a Graduate GPA Course Inclusion Form for classes that are part of the master's program but were taken prior to the student's full admission and/or are lower division classes.

In addition to the development of a plan of study, the advisor must evaluate any deficiencies including, but not limited to the following areas which may require additional course work.

Competency in Statistics

Competence in the fundamentals of statistics is required of all graduate students. In order to register for MMC 5440 (Applied Research Methods in Mass Media) students must

demonstrate a knowledge of statistics in one of three ways: by having taken a course in statistics within the last three years, passing an examination in the subject, or taking a special seminar, offered simultaneously with the commencement of the graduate research course.

Professional Experience

Professional experience in a field directly related to the specialization is an advantage. Applicants without such professional experience may be required to complete up to 9 credits of additional undergraduate course work and/or to complete an internship with a professional organization. After an interview with the applicant, the student's faculty advisor will determine the amount of undergraduate work and the undergraduate courses to be completed.

Transfer Credit

Students may petition the appropriate advisor to transfer up to six hours of graduate credit toward the degree. To be approved for transfer, the courses must have been previously taken at an accredited college or university; the student's advisor must judge the courses relevant to the student's plan of study; the student must not have used the credits toward another degree; the student must have earned a 'B' or higher in the courses, and meet the University requirements. No transfer courses will substitute for skills courses in any area of specialization in the SCJ master's program. All transfer credit must have been completed within the six-year period preceding the date the degree is granted.

Time Limit

All work applicable to the degree, including transfer credit, must be completed within six years of first enrollment in the master's program.

Grades

Students must maintain a minimum GPA of 3.0 in all courses required for the degree. No more than two 'C' grades will be allowed.

Professional Project, Thesis

Students complete a professional project in their areas of specialization. Work on the project generally will be completed during the final semester. Projects will be graded by the student's graduate committee. Students must receive a 'B' or higher on the project for it to be accepted. Students may also opt to do a thesis; GPA requirements are the same.

Required Courses

To earn the M.S. in Mass Communication, students must meet the following requirements:

1. Students must take at least 30 or 36 hours of acceptable graduate credit, depending on the program. Of those hours, all courses in the SCJ taken toward graduation must be at the graduate level.
2. At least 27 hours must be in School of Communication and Journalism.

Mass Communication: Spanish Language Journalism 4+1 Degree Pathway

With their advisor's approval, students from undergraduate majors in a variety of fields may apply to the Mass Comm Spanish Language Journalism 4 + 1 Degree Pathway. If accepted, students will be allowed to take up to 12 credits of graduate courses which will apply toward both their undergraduate and their master's degree program.

The admissions requirements are:

- Current enrollment in an approved bachelor's degree program at FIU
- Completed a minimum of 75 undergraduate credits
- Current GPA of 3.2 or higher
- Complete the separate 4 + 1 application, including signed approval by the director, coordinator or designee of the graduate program.

Student Media Advising

Designed primarily for journalism teachers and/or student media advisors on all levels, the program trains teachers/advisors or those aspiring to the profession in areas related to everyday work.

Core Curriculum

All students must take the following core courses:

MMC 6402	Theories of Mass Communication	3
MMC 5440	Applied Research Methods in the Mass Media	3
MMC 6950	Professional Project	3

In addition to the core courses, students in the student media advising specialization must take the following courses:

JOU 5806	Student Media Advising	3
MMC 5207	Ethical and Legal Foundations of the Student Press	3
MMC 6213	Ethics and Social Responsibility	3
VIC 5205	Trends in Graphics and Design	3

Students must also take two additional three-credit graduate courses in the School of Communication and Journalism in an appropriate area of emphasis. Courses must be approved by the student's advisor.

Nine hours must be in a field of concentration outside the School of Communication and Journalism. A minimum of three of those credits have to be at the graduate level (5000 or 6000 level).

For additional information about the Student Media Advising program please call (305) 919-5625 or email scj@fiu.edu.

Spanish-Language Journalism

The Spanish-language journalism track is geared toward Spanish-speaking students educated in the United States who wish to expand their professional options in the Spanish-language media market. It is also designed for Latin American students and journalists who need to acquire writing and reporting skills to work for Spanish print or broadcast media.

This a one-of-a-kind program is offered entirely in Spanish, although bilingual students have the option to present their homework and projects in English. The master's specializes in investigative journalism, a concept incorporated in all the skills courses.

The program, designed to start in the fall, may be completed in one year and consists of 36 credits (12

courses of three credits each). One is an elective and can be taken outside SCJ. The courses are only offered once a year in the semester indicated below, except for the Final Professional Project, which is offered in the fall, spring and summer terms.

Course Offerings: (36 credits)

REQUIRED COURSES

Core Courses (taken during semester one)

MMC 6108	Theories of Mass Communication & Writing	3
JOU 6185	Reporting Social and Ethnic Issues	3
RTV 6309	Visual Storytelling and Production	3
MMC 5440	Applied Research Methods	3

Additional Courses

RTV 6603	Visual Storytelling and Production II	3
VIC 6005	Web Design and Data Visualization	3
JOU 6118	Investigative Journalism	3
MMC 6213	Ethics and Social Responsibility	3
MMC 6257	Media Management and Entrepreneurship	3
MMC 6950	Mass Communication Professional Project	3
	Elective (graduate level approved by the coordinator)	6

For additional information about the Spanish-language Journalism program please call (305) 919-4617 or email scj@fiu.edu.

Spanish-Language Journalism with a Track in Latin American and Caribbean Studies

The Spanish-language Master's Program in Journalism with a track in Latin American and Caribbean Studies is designed for graduate students who are new to journalism, and for those who want to further their knowledge in this field. It also offers them the opportunity to specialize in areas of political science that are fundamental for journalists who want to cover Latin American issues. This interdisciplinary program will enable students to delve into the political and historical Latin American context of the stories they will cover as reports. As a result, they have a better understanding of the issues they will be confronted with; they will produce in-depth journalistic work.

The program will consist of 36 credits (12 courses of three credits each). Four courses will be offered through the Latin American and Caribbean Center (LACC) [in English] and eight by the School of Communication + Journalism (SCJ) [in Spanish]. The professional Project must be completed in Spanish, and it will be supervised and graded by faculty members of SCJ's Spanish-Language Master's Program in Journalism.

Course Offerings: (36 credits)

LACC Courses

INR 6008	Colloquium in International Studies	3
LAS 6003	Survey of Latin America and the Caribbean	3
LAH 5935	Topics in Latin American History	3
INR 6107	U.S. Foreign Policy: Process & Institutions	3

SCJ Courses

MMC 6108	Theories of Mass Communication & Writing	3
----------	--	---

MMC 5440	Applied Research Methods	3
RTV 6309	Visual Storytelling and Production	3
MMC 6736	Social Media for Communicators	3
VIC 6005	Web Design and Data Visualization	3
JOU 6118	Investigative Journalism	3
MMC 6213	Ethics and Social Responsibility	3
MMC 6950	Professional Project	3

For additional information about the Spanish-language Journalism program please call (305) 919-4617 or email SCJ@fiu.edu.

Business Journalism Track

Admission Requirements

To be considered for admission to the graduate program in the School of Communication + Journalism (SCJ), the following criteria must be met:

- Degrees**
A student seeking admission into a graduate program of the University must have a bachelor's degree or equivalent from an accredited institution or, in the case of foreign students, an institution recognized as an institution of higher learning.
- Minimum GPA**
A minimum grade point average (GPA) of 3.0 earned during the junior and senior undergraduate years.
- Entrance Examination**
The Graduate Record Examination (GRE) is required for admission into all programs taught in English. In some cases, the Graduate Management Admission Test (GMAT) is accepted upon the approval of the graduate coordinator. GRE scores with a minimum of 153 on the verbal portion. Graduates of non-U.S. institutions must be academically eligible for further study in the country where the degree was earned. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). Applicants must receive a total of 80 on the iBT TOEFL – equivalent to 550 on the paper-based version, or 213 on the computer-based version of the Test of English as a Foreign – or 6.5 overall on the IELTS.
- Resume**
All applicants must submit a professional resume.

Course Offerings: (36 credits)

SCJ

JOU 6358	Business Reporting: Public Affairs	3
JOU 6352	Advanced Business Feature Writing	3
JOU 6931	Special Topics/Economic News Reporting	3
MMC 5932	Special Topics in Journalism/Advanced Economics Reporting	3
JOU 6355	Applied Research Methods in Business Journalism	3

MAN 6606	International Business Environment	3
INR 5007-6936	Seminar on International Politics	3

For additional information about the Business Journalism program please call (305) 919-4617 or email SCJ@fiu.edu.

Course Descriptions**Definition of Prefixes**

ADV-Advertising; COM-Communications; DIG-Digital Media; JOU-Journalism; MMC-Mass Media Communication; PUR-Public Relations; RTV-Radio: Television; VIC-Visual Communication.

All courses required for the degree will be offered at least once during the term of the student's enrollment.

ADV 6355 Advertising and Society (3). The relationship between advertising, economic, political, moral, and ethical issues.

ADV 6503 Seminar in Advanced Creativity (3). Theoretical and practical application of variable topics including creative problem solving, design, web advertising, pop culture, and IMC tools. Progressive level of difficulty. Prerequisite: Permission of the instructor.

ADV 6805C Advertising and Public Relations Creative Strategy (3). Focuses on the conceptualization of breakthrough strategies and their application to all integrated communication tools. (Offered at least once a year).

COM 5606 Environmental Communication (3). This graduate level course is designed to bring theoretical principles and professional skills associated with mass communication together with environmental issues and themes. Prerequisites: Completion of the six-credit project or internship requirement (EVR 5907) and permission of the instructor or department.

DIG 5167 Social Media Metrics and Evaluation (3). This course introduces strategic aspects of social media analytics by highlighting metrics for assessing effectiveness of social media strategies for global advertising, public relations and marketing.

DIG 5438 Strategic Storytelling and Digital Content Creation (3). This course offers a view of storytelling paradigms and provides the opportunity to apply digital storytelling for strategic purposes using interactive multimedia tools.

DIG 5569 Digital Media Management (3). This course examines various methods and perspectives of managing digital media platforms and content in a strategic communication setting.

JOU 5806 Student Media Advising (3). Designed to assist teachers and advisors of journalism at the high school and junior college level, this course emphasizes the technical aspects of producing student newspapers, yearbooks, and magazines, as well as the legal and ethical considerations facing today's advisor. In addition, attention is given to matters pertaining to curriculum and methodology for effective journalistic instruction. (Offered at least once a year).

JOU 6107 New Media Techniques (3). This course will develop skills in news writing for TV, radio, and print platforms and their respective online converged multimedia formats. Prerequisite: Graduate standing.

JOU 6118 Investigative Journalism (3). The emphasis in this class is on the new media and the possibilities of combining basic news reporting and writing skills with new electronic resources and tools available to journalists.

JOU 6119 Advanced News Writing (3). This course will study the various kinds of advanced reporting and writing techniques a master level journalism student is expected to dominate before graduation. Prerequisite: JOU 6193.

JOU 6125 The Cyberjournalist (3). Students progress beyond a simple knowledge of how to use electronic databases into the realm of mining and manipulating vast data pools such as the U.S. Census.

JOU 6183 Judicial System Reporting (3).

JOU 6185 Reporting Social and Ethnic Issues (3). This course is an introduction to basic elements of journalistic storytelling with special emphasis in how to broaden the understanding on social and ethnic issues. Prerequisite: Graduate standing.

JOU 6186 Covering Social and Ethnic Issues (3). Theme coverage on race, gender, and ethnicity. Enterprise reporting with significance and context, and with its legal, social, political, economic, and ethical implications of diversity.

JOU 6187 Covering the City III (3). Students produce the prototype for a city magazine, from start to finish. Readings: a broad sampling of magazines.

JOU 6193 Thinking Like a Writer (3). Principles and techniques that are common to good writing, regardless of the medium. Students learn to read, observe and think as writers.

JOU 6194 Thinking Like a Writer II (3). Continuation of 1st writing course, with emphasis on elegance at sentence level. Also explores interrelationships of storytelling, editing and design. Readings: Poynter anthology.

JOU 6196 Thinking Like a Writer III (3). Continuation of 1st and 2nd semester writing courses, with emphasis on producing the long piece. Direct support of the writing of Professional Project. Readings/viewings: Pulitzer, Emmy winners.

JOU 6352 Advanced Business Feature Writing (3). Advanced study in the development of in-depth business articles, emphasizing the crucial role of bright writing and eye-catching graphics.

JOU 6355 Applied Research Methods in Business Journalism (3). Techniques in locating and understanding financial data of corporations and other entities whose

finances are subject to public disclosure as well as demographic and economic research produced by government, universities, and private research organizations.

JOU 6358 Business Reporting: Public Affairs (3). Advanced study in the use of economic analysis and financial investigation to analyze social and demographic trends for business reporting.

JOU 6931 Seminar on Special Topics (1-3). Instruction in specialized areas of journalism. Prerequisite: Graduate standing.

MMC 5207 Ethical and Legal Foundations of the Student Press (3). Examines ethical and legal foundations underlying the operation of the student press on American campuses, stressing both rights and responsibilities and how to organize publications to protect both. (Offered at least once a year).

MMC 5268 Communication in the Digital Age (3). This course is designed to develop and enhance students' understanding of the foundations for digital communication, including an overview of the historical development of digital communication.

MMC 5306 Global Communications (3). This course explores global markets and intercultural communications while providing advanced study, evaluation and application of cultural context, theories, stakeholders, and trends in media, advertising, and public relations. Analysis of ethical, legal, political, and social communications issues around the globe.

MMC 5440 Applied Research Methods in the Mass Media (3). An advanced course in the acquisition and use of secondary data, including media data, as well as the design, execution and utilization of research studies. Students will conduct an original proprietary study. (Offered at least once a year).

MMC 5655 Mass Communication and the Environment (3). The course brings theoretical principles and professional skills associated with media communication together with environmental issues. Prerequisites: Graduate standing or permission of the instructor.

MMC 5932 Special Topics Seminar (3). A variable topic seminar dealing with issues of interest to the community. Examples are rights of high school journalists, cable TV, the use of mini-computers in creative communication. Prerequisite: Permission of the instructor. (Offered at least once a year).

MMC 5946C Journalism and Media Internship (0-1). This internship is designed to enhance the learning experience of graduate students through intense critical analysis and skills building in a relevant work environment.

MMC 6108 Theories of Mass Communication and Writing (3). The course examines writing theories and processes and explores media responsibility to society including communication principles and techniques found in contemporary communication theories.

MMC 6135 Multimedia Production and Design (3). The course offers introduction in the theory and practice of multimedia production including digital photography, videography, non-linear video editing and sound design.

MMC 6213 Ethics and Social Responsibility (3). This course familiarizes students with professional ethics and standards in advertising and public relations and examines the regulatory environment in which strategic communication takes place. Prerequisite: Permission of the instructor. (Offered at least once a year).

MMC 6257 Media Management and Entrepreneurship (3). Introduction to the basic functions of media management with an emphasis on television and new media in a global marketplace; provides an understanding of business models and decision-making processes.

MMC 6402 Theories of Mass Communication (3). Examines theories and processes of mass communication as well as media responsibility to society and the social and ethical responsibility of communicators. (Offered at least once a year). Prerequisite: Permission of the instructor.

MMC 6412 Applied Media Communication Skills (3). This advanced skills course covers a broad range of written, interpersonal, social media, presentation, and team communication skills for the advertising, marketing and public relations professions.

MMC 6416 Media Planning (3). This course is intended to be a survey of the media planning discipline of advertising. Prerequisite: Permission of the instructor.

MMC 6736 Social Media For Communicators (3). Provide students the tools and strategies needed to find and distribute news on social media, and teach them how to leverage social media attributes to build a brand.

MMC 6900 Independent Study (3). Specialized intensive study in an area of special interest to the student with a focus on directed, independent research. Prerequisites: Requires prior approval by instructor, graduate standing, and full admittance in the program.

MMC 6940 Graduate Internship in Strategic Communication (1-3). On-the-job learning in activity at selected and approved organizations. May include advertising and PR agencies, as well as private, governmental or non-profit organizations. Prerequisite: Graduate standing.

MMC 6950 Mass Communication Professional Project (1-3). Designed to demonstrate student's excellence in an area of communication studies. Prerequisites: Permission of the instructor, 24 credit hours to align with the GSC track requirements; this would not apply to Spanish Language Journalism Program.

MMC 6951C Professional Project II (1). Demonstrates the student's excellence in an area of communication study. Must be taken if student doesn't complete MMC 6950 in one semester. Prerequisite: MMC 6950.

MMC 6970 Mass Communication Master's Thesis (1-3). This course is designed to demonstrate the student's excellence in an area of communication study. This course provides guidelines and direction to graduate students completing their Master's Thesis. Prerequisites: Completion of 27 credit hours, MMC 5440.

PUR 5406 Multi-Cultural Communications (3). Explores the multicultural dimensions of communications with diverse audiences within the United States.

PUR 6607 Global Strategic Communication Management (3). This course acquaints students with the professions and practice of global advertising and public relations in a multicultural world. Prerequisite: PUR 6806.

PUR 6610 Global Reputation Management (3). This course introduces students to the role and value of strategic communication in developing and sustaining an organization's global reputation.

PUR 6806 Global Account Planning (3). This course introduces students to contemporary account planning and global strategic communication techniques. Prerequisite: Permission of the instructor. (Offered at least once a year).

PUR 6935 Advanced Communications Seminar (3). The class will consist of a series of readings, discussions and presentations to immerse students in contemporary issues in Advertising and Public Relations. Prerequisite: Permission of the instructor. (Offered at least once a year).

RTV 5801 Telecommunication Management Structures (3). Intensive study of telecommunication management problems, theory of same, solutions of same through practical application and examination of case studies. Prerequisite: Graduate standing.

RTV 5935 Seminar in International Comparative Broadcasting Systems (3). Introduction to international telecommunication systems with special emphasis on broadcasting. Comparison with other countries. Prerequisite: Graduate standing or permission of the instructor.

RTV 5936 Seminar in New Mass Communication Technologies (3). Discussion of new communication technologies and their influence on the society. Prerequisite: Graduate standing.

RTV 6309 Visual Storytelling and Production (3). The course is designed to teach students the reporting, pre-production and production skills required in multimedia journalism. Prerequisite: MMC 4940.

RTV 6465C Field Production Practicum (3). The student will be responsible for the organization and complete pre-production, production, and post-production of his/her project(s). Prerequisite: Graduate standing.

RTV 6468C Studio Production Practicum (3). The student will be responsible for the organization and complete pre-production, production and post-production of his/her project(s). Will also be required to do directing and I.D. work. Prerequisite: Graduate standing.

RTV 6603 Visual Storytelling and Production II (3). Students will learn broadcast techniques, video editing, newscast and segment production, and on camera reporting. Students will learn to operate studio systems and deliver news on camera. Prerequisite: RTV 6309.

RTV 6937 Decision Making in Broadcast Journalism (3). The roles and ratings, research, visuals, technology and non-news management in choice of news personnel, assignments, content and scheduling. analysis of legal and ethical implications. Prerequisite: Graduate standing.

VIC 5205 Trends in Graphics and Design (3). Design principles and how they relate to trends in student and professional media, including newspapers, magazines and yearbooks. Deals with graphics, packaging, typography and modern design. Prerequisite: Permission of the

instructor. (Offered at least once a year). (Supplies fee assessed).

VIC 6005 Web Design and Data Visualization (3). Students will learn how to design, build and publish a news website and a page on social media platforms. This course will also develop the student's skills on data journalism and data visualization.

Landscape Architecture + Environmental and Urban Design

Roberto J. Rovira, *Professor and Chair*

Juan Antonio Bueno, *Professor*

Ebru Ozer, *Associate Professor*

Linda Chamorro, *Assistant Professor*

Maria Counts, *Adjunct Professor*

Gianno Feoli, *Adjunct Professor*

Hernan Guerrero Applewhite, *Adjunct Professor*

TJ Marston, *Adjunct Professor*

Caleb Melchior, *Adjunct Professor*

Susan Sprunt, *Adjunct Professor*

The Landscape Architecture + Environmental and Urban Design (LAEUD) Department focuses on the development of the basic knowledge, skills, and abilities appropriate to the practice of landscape architecture, with a special emphasis on tropical and sub-tropical environments and urban design. Situated between two of the richest coastal and inland ecosystems in the world, Miami presents unparalleled opportunities as an important design laboratory. The city's multilingual, diverse, and ever-expanding needs reflect what many parts of the world will look like in the coming decades. Our focus on leveraging landscape architecture in urbanized regions and especially in tropical and subtropical environments makes for a program that is profoundly relevant to addressing the issues that will affect the majority of the world's population by 2100.

Our goal is to educate individuals who can serve and lead the community through the aesthetic, meaningful, and sustainable design of the physical environment. Our program focuses on design and draws from art, science and technology via a rich design studio sequence that benefits from small student-to-faculty ratios, cutting edge technology and workspaces, and study abroad options. Students explore environmental, ecological and urban issues, and propose innovative solutions in the design of public spaces, infrastructure, urban planning, industrial reclamation, ecotourism, environmental mitigation, and many other areas at the center of the relationship between human beings and their surroundings.

The **Master of Landscape Architecture (MLA)** provides professional degree tracks within a rigorous academic framework intended for individuals with or without pre-professional degrees in landscape architecture. The MLA is structured into two tracks, the Three-Year Track (MLA3) and the Two-Year Track (MLA2). Both are fully accredited by The Landscape Architectural Accreditation Board (LAAB), an autonomous committee of the American Society of Landscape Architects.

The MLA3, a first-professional Master of Landscape Architecture (MLA) degree, is for persons who hold an undergraduate degree in a field other than landscape architecture, and intend to become landscape architecture practitioners. Applicants to the program need to check with the College Advising Center to obtain prerequisite course information.

The MLA2 is a first professional degree for individuals with an undergraduate degree in landscape architecture or architecture from an accredited program, or with a pre-

professional undergraduate degree landscape architecture or architecture.

The **Master of Arts in Urban Design (MAUD)** is a graduate degree program that enables students to pursue interdisciplinary studies in advanced environmental urban design. The MAUD combines collaborative design instruction, applied research, and knowledge of urban theory, planning, and economics. The MAUD is not eligible for accreditation by LAAB.

The Accelerated Masters Degree

For students seeking to begin their professional design studies as undergraduates, the Landscape Architecture Department offers the **Master of Landscape Architecture (MLA)**, which provides a seamless course of study leading from undergraduate freshman year to the conferral of the professional Master of Landscape Architecture degree, which is fully accredited by LAAB. The accelerated MLA is comprised of 155 credit hours of integrated pre-graduate and graduate coursework. The degree consists of 71 credit hours of pre-graduate coursework taken over two years followed by 84 credit hours of graduate coursework.

The department maintains close ties with architecture, and interior design professionals. Professional advisory boards periodically review the curriculum to maintain program relevance.

Students applying to the Landscape Architecture Department should plan for the financial aspects of a design education. This includes the costs of computers, software, travel and field trips, tools and equipment, and modeling supplies. All students must have continuing access to a laptop computer through purchase, lease or other arrangements. For further information contact the Advising Center.

The first professional Master of Landscape Architecture (MLA) degree is fully accredited by The Landscape Architectural Accreditation Board (LAAB), an autonomous committee of the American Society of Landscape Architects.

Admissions Requirements

All applicants must meet University graduate admissions requirements. Applicants must also submit a portfolio for departmental review that demonstrates the candidate's creative aptitudes. The design portfolio is evaluated based on a candidate's demonstrated sense of composition, attention to detail, graphic communication skills, expressive quality, and sense of space, accuracy, and observation.

Design portfolios may include two-dimensional storyboards (a sequence of still images that show a story), computer printouts, digital images, and photographs of three-dimensional models/projects.

Digital design portfolios should be formatted to fit on 8.5" x 11" pages within a single, multi-page PDF file. Please refer to the departmental website for submission details.

Portfolios submitted after the Application Deadline will be considered if studio space is available. Details on portfolio requirements can be reviewed through the departmental website.

Students who have successfully completed the portfolio review process must also meet the minimum requirements of an undergraduate degree from an accredited college or

university with undergraduate grade point average (GPA) of 3.0 on a 4.0 scale, or hold a graduate degree from an accredited institution to be fully admitted into the graduate program. When the academic record is less than 3.0 GPA, the applicant must submit Graduate Record Examination (GRE) scores. Check the department website for updated application deadlines: <http://carta.fiu.edu/landscape/academics/graduate/admissions/>

Ownership of Student Work

Student work submitted to the department in satisfaction of course or degree requirements becomes the physical property of the department. However, students retain all rights to the intellectual property of such work. This work may include papers, drawings, models, or other materials. The department assumes no responsibility for safeguarding such materials and at its discretion may retain, return, or discard such materials. Students must petition the department in writing for any deviation from these established policies.

Progression Requirements

No grade below a 'C' will be accepted for graduation in required courses or required electives.

Study Abroad

Study abroad is an important component of the Department of Landscape Architecture. Our study abroad center is located in Genoa, Italy. The Genoa center is ideally situated in the historic center of the city in a renovated former convent dating from the 13th century. During the semester abroad option in Italy, students are afforded the opportunity to study those artistic, architectural, landscape and interior spaces and artifacts that have long been acknowledged for their exceptional and enduring value. Other travel options may be available. Departmental approval is required for participation.

Thesis Requirement

Graduate students in the landscape architecture department are required to undertake a Master's Project or a Master's Thesis as part of their course of study at the Department of Landscape Architecture. Selection of Master's Thesis requires departmental approval.

Master of Landscape Architecture

Professional Degree Tracks (Accredited by LAAB)

THREE-YEAR TRACK – 84 Credits

The Three-Year Track (MLA3) is a professional degree for individuals with a Bachelor of Arts or a Bachelor of Science or equivalent, from an accredited institution. Leveling courses are required for students without a design background. These are in addition to degree requirements.

Typical Curriculum

Leveling Courses (Summer B Semester) - 9 Credits

LAA 5605	Design Foundations	3
LAA 5346	Visual Notation in Landscape Architecture I	3
LAA 5371	Computer Practices in Landscape	

Architecture I 3

First Year (Fall Semester)

LAA 5716	History of Landscape Architecture	3
LAA 5374	Computer Practices in Landscape Architecture 2	3
LAA 5653	Landscape Architecture Graduate Design 1	6

First Year (Spring Semester)

LAA 5541	South Florida Landscapes	3
LAA 5381	Computer Practices in Landscape Architecture 3	3
LAA 6654	Landscape Architecture Graduate Design 2	6

First Year (Summer Semester)

LAA 6382	Analysis Methods	3
Elective		3

Second Year (Fall Semester)

LAA 5422	Landscape Development	3
LAA 6521	Tropical Landscapes	3
LAA 6655	Landscape Architecture Graduate Design 3	6

Second Year (Spring Semester)

LAA 5235	Theory of Landscape Architecture	3
LAA 6656	Landscape Architecture Graduate Design 4	6
Elective		3

Second Year (Summer Semester)

LAA 6916	Research Methods	3
LAA 5423	Landscape Construction	3

Third Year (Fall Semester)

Directed Elective		3
LAA 6910	Graduate Seminar	3
LAA 6363	Landscape Architecture Graduate Design 5	6

Third Year (Spring Semester)

LAA 5425	Landscape Documentation	3
LAA 6215	Professional Practice in Landscape Architecture	3
LAA 6970	Master's Project	6
LAA 6971	Master's Thesis (Departmental Approval Required)	6

TWO-YEAR TRACK – 60 Credits

The Two-Year Track (MLA2) is a first professional degree for individuals with an undergraduate degree in landscape architecture or architecture from an accredited program, or with a pre-professional undergraduate degree landscape architecture or architecture. Admission to the two-year track is contingent upon review of applicant's portfolio and transcripts by department faculty to determine that applicants have demonstrated the knowledge and skills equivalent to students who have completed the first year of the MLA3.

Typical Curriculum

Typical for holders of Bachelor of Arts in Architecture or Bachelor of Design in Architectural Studies, if 24 credits of advanced standing are granted.

First Year (Fall Semester)

LAA 5716	History of Landscape Architecture	3
----------	-----------------------------------	---

LAA 5422	Landscape Development	3
LAA 6655	Landscape Architecture Graduate Design 3	6
First Year (Spring Semester)		
LAA 5235	Theory of Landscape Architecture	3
LAA 5541	South Florida Landscapes	3

Master of Landscape Architecture 4+2 Program

The professionally accredited Master of Landscape Architecture (MLA) degree is 84 credits, of which 12 will be taken during the student's final undergraduate year, and will count toward the student's bachelor's degree. Only 5000-level or higher courses are applicable.

Students in all undergraduate programs at FIU are eligible for the 4+2 combined degree program. Students will apply to the MLA program during their third year of undergraduate studies, after successfully completing 60 undergraduate credits.

Applicants must have an undergraduate GPA of 3.0 to be admitted into the 4+2 combined degree program.

Leveling Courses (Summer B Semester) - 9 Credits, to be taken during the summer between the student's Junior and Senior years

LAA 5605	Design Foundations	3
LAA 5346	Visual Notation in Landscape Architecture I	3
LAA 5371	Computer Practices in Landscape Architecture I	3

First Year (Fall Semester) - 6 Credits, to be taken during the student's final undergraduate year

LAA 5653	Landscape Architecture Graduate Design 1	6
----------	--	---

First Year (Spring Semester) - 6 Credits, to be taken during the student's final undergraduate year

LAA 6654	Landscape Architecture Graduate Design 2	6

Master of Arts in Urban Design- 36 credits

(Not eligible for accreditation by LAAB)

A graduate degree for individuals with a Bachelor or Master of Architecture, a Bachelor or Master of Landscape Architecture, a Bachelor or Master of Interior Architecture, a Bachelor or Master of Science or Arts, a Bachelor or Master of Public Administration. The Master of Arts in Urban Design (MAUD) is a 36- credit graduate degree program that enables students to pursue interdisciplinary studies in advanced environmental urban design. As an environmental design based program, the MAUD combines collaborative design instruction, applied research, and knowledge of urban theory, planning, and economics. One year of full-time study in residency is normally required. Satisfactory completion of 36 credits in the following course of study is required.

Prerequisites for non-design degree students (Summer B Semester)

LAA 5605	Design Foundations	3
LAA 5346	Visual Notations in LSCP ARCH	3
LAA 5371	Computer Practices 1	3

First Year (Fall Semester)

LAA 6245	Theory of Urban Design	3
LAA 5331	Site Analysis of Design	3
PAD 6717	GIS Application for Urban Management	3
PAD 5805	Economic Development and Urban Revitalization	3

First Year (Spring Semester)

LAA 6656	Landscape Architecture Graduate Design 4	4
LAA 5249	Catalysts of the Urban Canvas	3
URP 6315	Introduction to Urban Planning and Growth Management	3

First Year (Summer Semester or Second Year Fall Semester)

Directed Elective	3
Directed Elective	3
LAA 6970 Master's Project (Departmental Approval Required)	1-6

Awards and Scholarships

The following scholarships and awards are presented yearly to students fully admitted to the Graduate Program in Landscape Architecture who have demonstrated outstanding achievements in their studies per the criteria noted.

The Ernest and Virginia Makemson Memorial Endowed Scholarship Fund. This fund provides support for students who have demonstrated interest and experience in restoring and preserving Florida's natural and cultural environment through the practice of landscape architecture.

The Latin American and Caribbean Graduate Fellowship Program scholarship which promotes international education and research between FIU and the countries of Latin America and the Caribbean and is overseen by the University Graduate School. Students must be a resident of Latin America or the Caribbean (including Puerto Rico and the U.S. Virgin Islands), fully admitted to a graduate degree, in good academic standing with an overall graduate GPA of 3.0 or better, and enrolled full-time.

American Society of Landscape Architects Student Honor and Merit Awards. On nomination by the Program faculty, the American Society of Landscape Architects awards these to the students who have demonstrated a high degree of academic scholarship and of accomplishments in skills related to the art and technology of landscape architecture.

The Olmsted Scholar Award. On nomination by the Program faculty, the Landscape Architecture Foundation recognizes one student from the program based on their past achievements and their future potential to influence the landscape architecture discipline.

The ARCC King Student Medal. Named in honor of the late Jonathan King, this award is given to one student in the FIU School of Architecture and is based upon criteria established by the Architectural Research Centers Consortium that acknowledge innovation, integrity, and scholarship in architectural and/or environmental design research.

Sigma Lambda Alpha Honor Society. Each year, upon nomination by the Program faculty, the Alpha Chi Chapter of the Sigma Lambda Alpha Honor Society inducts the outstanding students in the Program.

Course Descriptions**Definition of Prefixes**

LAA-Landscape Architecture
F-Fall semester offering; S-Spring semester offering; SS-Summer semester offering.

LAA 5233 Theory of Planting Design (3). Study of principles and methods related to the ecological,

functional, and aesthetic use of vegetation in landscape architecture. Prerequisite: Program approval. (SS)

LAA 5235 Theory of Landscape Architecture (3). Critical review of the environmental parameters, morphological concepts and ideological principles that generate form and meaning in landscape architecture. Prerequisite: LAA 5716. (S)

LAA 5249 Catalysts of the Urban Canvas (3). Seminar-based course exploring the relationship of focused landscape and architectural interventions in the evolution and development of the urban fabric and its physical context.

LAA 5331 Site Analysis and Design (3). Introduction to ecological, functional, and aesthetic considerations in site analysis, planning and design. Prerequisite: Program approval.

LAA 5346 Visual Notation in Landscape Architecture I (3). Course will develop drawing skills in multiple media, actively engaging in projects of drawing as a medium of investigation, documentation, memory, observation and presentation for landscape architecture. Prerequisite: Program approval.

LAA 5371 Computer Practices in Landscape Architecture 1 (3). Computer applications of graphics, modeling, and animation techniques used in landscape architecture. Prerequisite: Program approval. (S)

LAA 5374 Computer Practices in Landscape Architecture 2 (3). Computer application of drafting and design techniques used in landscape architecture. Prerequisites: LAA 5371, Program approval. (F)

LAA 5378 GIS Applications in Landscape Modeling (3). Introduction to modeling capabilities of GIS in the environmental planning process addressing the natural and cultural characteristics of the landscape. Prerequisite: Program Approval. (SS)

LAA 5381 Computer Practices in Landscape Architecture 3 (3). Contemporary methods of digital representation for landscape architecture. Intensive exploration of three dimensional modeling and rendering techniques. Prerequisites: LAA 5371, LAA 5374, program approval.

LAA 5422 Landscape Development (3). Technical aspects of the design and specification of earthwork, including materials, products, and methods of installation used in landscape development. Prerequisite: LAA 5371. (F)

LAA 5423 Landscape Construction (3). Technical aspects of the design and specification of sitework, including materials, products, and methods of installation used in landscape construction. Prerequisite: LAA 5422. (S)

LAA 5425 Landscape Documentation (3). Production of landscape documents including drawings and project manual, bidding documents, contract documents and technical specifications on the computer. Prerequisite: LAA 5423. (S)

LAA 5427 Landscape Structures (3). Production of landscape construction details for structures and systems used in landscape architecture. Prerequisite: LAA 5423. (F)

LAA 5541 South Florida Landscapes (3). Study of structure, function, and change in the natural and cultural landscapes of tropical and subtropical Florida. Prerequisite: Program approval. (S)

LAA 5605 Design Foundations (3). The course is a rigorous introduction to design fundamentals. It builds a design language through lectures, practical experiences, exploring techniques, materials, skills, making and critical thinking. Prerequisite: Program approval. Corequisites: LAA 5346 and LAA 5371.

LAA 5652 Formative Studio (6). Introduction to concept development, spatial expression, and representational techniques in landscape architecture. Prerequisite: LAA 5346 and LAA 5xxx Computer Applications in Landscape Architecture. (F)

LAA 5653 Landscape Architecture Graduate Design 1 (6). Application of landscape architecture principles and methods to site design in tropical and subtropical contexts. Prerequisite: LAA 5652. (S)

LAA 5716 History of Landscape Architecture (3). Historical survey of the principal sites and traditions manifested in the evolution of landscape architecture and urban design from antiquity to the present. Prerequisite: Program approval. (F)

LAA 5905C Special Topics Design Studio (6). A landscape architectural design studio based on a particular aspect of landscape architectural design and relevant ideologies under the direction of appropriate faculty. Prerequisite: Program Approval.

LAA 5938 Cejas Eminent Scholar Seminar (1-3). This is a seminar/workshop course taught by distinguished educators, scholars, and designers. Lectures, critical readings, and discussions of thematic topics make up the methodology of the course.

LAA 5940 Landscape Architecture Internship (3). Advanced issues in professional practice learned through work experience with a licensed professional.

LAA 5945 Internship Experience (0). Experience in landscape architecture practice learned through work with licensed professionals.

LAA 6215 Professional Practice in Landscape Architecture (3). Study of the ethical, legal, financial, and managerial aspects of professional practice in landscape architecture. Prerequisite: Program approval. (S)

LAA 6245 Theory of Urban Design (3). Critical review of the principal theories of urbanism that have influenced the fabric and image of the city in Western history. Prerequisites: LAA 5235 and LAA 5716. (SS)

LAA 6247 Modern Landscape Architecture (3). Critical review of the origins and development of modern and post modern expressions in landscape architecture. Prerequisites: LAA 5235 and LAA 5716. (SS)

LAA 6347 Italian Design and Culture (3). Course describes evolution of culture and aesthetics & their immediate relationship with creation of these works. Consists of site visits & class lectures. Add'l readings & project for grad students. Corequisites: LAA 6348, LAA 6910, LAA 6655 or LAA 6656.

LAA 6348 Landscape Architecture of the City (3). The study of urban design and landscape architecture in Genoa, Italy, with emphasis on analysis and representation using manual drawing, digital photography, and conceptual models. Corequisites: LAA 6347, LAA 6910, LAA 6655 or LAA 6656.

LAA 6363 Landscape Architecture Graduate Design 5 (6). Application of interdisciplinary principles and methods to contemporary landscape architecture issues through the design of projects varying in scale and complexity. Prerequisites: LAA 5653, LAA 6654, LAA 6655, LAA 6656.

LAA 6382 Analysis Methods (3). Theories and methods of the organization, analysis, and interpretation of cartographic data using geographic information systems. Prerequisite: Program approval. (SS)

LAA 6390 Digital Landscapes: Techniques in Landscape Representation (3). Application of 3d modeling methods, basic lighting, graphics post-production and photomontage setup using Maya and other 3d software in order to produce high-quality renderings. Basic knowledge of Maya & Photoshop required. Prerequisites: LAA 5381 or ARC XXX equivalent.

LAA 6521 Tropical Landscapes (3). Study of the structure, function, and change in the natural and cultural landscapes of tropical and subtropical regions. Prerequisite: Program approval. (F)

LAA 6654 Landscape Architecture Graduate Design 2 (6). Application of landscape architecture principles and methods to community planning and design in tropical and subtropical contexts. Prerequisite: LAA 5653. (F)

LAA 6655 Landscape Architecture Graduate Design 3 (6). Application of landscape architecture principles and methods to regional management, planning, and design in tropical and subtropical contexts. Prerequisite: LAA 6654. (S)

LAA 6656 Landscape Architecture Graduate Design 4 (6). Application of interdisciplinary principles and methods to urban planning and design in tropical and subtropical contexts. Prerequisite: LAA 6655. (F)

LAA 6905 Independent Study (1-6). Coursework on a particular aspect of landscape architecture under the direction of faculty in an individual study format. Prerequisite: Program approval. (F,S)

LAA 6910 Graduate Seminar (3). Coursework under the direction of faculty in preparation for a master's thesis or master's project in landscape architecture. Prerequisites: LAA 6382, LAA 6916. (F)

LAA 6916 Research Methods (3). Methods of data acquisition, analysis, and interpretation used in landscape architecture research. Prerequisite: Program approval. (SS)

LAA 6936 Special Topics (1-3). Coursework on a particular aspect of landscape architecture under the direction of faculty in a classroom format. Prerequisite: Program approval. (F,S,SS)

LAA 6970 Master's Project (1-6). Coursework under the direction of faculty for the completion of project by candidate for the degree Master of Landscape Architecture. Prerequisite: LAA 6910.

LAA 6971 Master's Thesis (1-6). Coursework under the direction of faculty for the completion of a research or design thesis by candidate for the degree Master of Landscape Architecture. Prerequisites: Program approval and LAA 6910. (S)

College of Communication, Architecture + The Arts

Dean	Brian D. Schriener
Associate Dean, Cultural and Community Engagement	John A. Stuart
Associate Dean, Faculty and Program Development	Marilys R. Nepomechie
Assistant Dean of Students	Katie Rothfield
Senior Director of Development	Oliver G. Ionita
Chair, Architecture Department	Jason R. Chandler
Chair, Art and Art History Department	David Y. Chang
Chair, Communication Department	Aileen Izquierdo
Chair, Interior Architecture Department	Newton D'Souza
Chair, Journalism and Media Department	Teresa L. Ponte
Chair, Landscape Architecture + Environmental and Urban Design Department	Roberto J. Rovira
Director, School of Music	Karen Fuller Veloz
Chair, Theatre Department	Joel Murray

Faculty

- Abbott, Phillip, MID** (University of Florida), Assistant Teaching Professor, Interior Architecture
- Adorno, Sandra, Ph.D.** (University of Miami), Assistant Professor, Music Education, Music
- Alston, Brenton, DMA, Artist Diploma** (University of Miami), Assistant Teaching Professor, Instrumental Performance, Director of Wind Ensemble, Music
- Alvarado, Alejandro Jose, Ph.D** (University of Miami), Clinical Associate Professor of Professional Practice and Director, Spanish Language Journalism, Journalism and Media
- Andia, Alfredo, MDes, Ph.D.** (University of California-Berkeley), Associate Professor, Architecture
- Arpad-Cotta, Tori, MFA** (University of Arizona), Associate Professor, Ceramics, Art and Art History
- Ashley, Rokeshia Renne, Ph.D.** (University of Missouri-Columbia), Assistant Professor, Communication
- Bellas, Benjamin Zellner, MFA** (School of the Art Institute of Chicago) Associate Professor, Art and Art History
- Berglin, Jacob, Ph.D.** (Northwestern University), Assistant Professor, Music Education, Music
- Berman, Margo, MM** (University of Miami), Professor, Communication
- Bernhardt, Barry, MA** (Truman University), Associate Teaching Professor, Coordinator of Winds, Brass, Percussion, and Director of Marching Band, Music
- Blevens, Frederick R., Ph.D.** (University of Missouri), Emeritus Professor, Journalism and Media
- Bogosian, Biayna, MSAAD** (Columbia University), Assistant Professor, Architecture
- Bonacossa, Federico, DMA** (University of Miami), Assistant Teaching Professor, Music Theory & History, Music
- Bower, Tom,** Courtesy Professor, Theatre
- Brant, Sharon, MFA** (University of Wyoming), Associate Professor, Painting/Drawing, Art and Art History
- Brown, Joann, MA** (University of Miami), Teaching Professor, Communication
- Bueno, Juan Antonio, MLA, ASLA, PE** (Harvard University), Professor, Landscape Architecture + Environmental and Urban Design
- Burke, William, MFA** (State University of New York at New Paltz), Professor, Ceramics, Art and Art History
- Busch, Claudia, MSAAD** (Columbia University), Associate Teaching Professor, Architecture
- Calloway, Jason, MM** (The Julliard School), Associate Teaching Professor, Cello, Amernet String Quartet, Music
- Campbell, Gary, MM** (University of Miami), Professor, Jazz Performance, Music
- Canavés, Jaime, MArch, FAIA, IIDA** (University of Florida), Professor, Architecture
- Carrico, Cynthia, MAR,** (Florida International University), Visiting Assistant Teaching Professor, Communication
- Chamorro, Linda, MLA,** (Harvard University) Assistant Professor, Landscape Architecture + Environmental and Urban Design
- Chandler, Jason R., MArch, AIA** (Harvard University), Associate Professor and Chair, Architecture
- Chang, David Y., MFA** (Shanghai Jiao Tong University) Professor, Chair, Art and Art History
- Church, Phillip, MFA** (University of California-Irvine), Associate Professor, Theatre
- Clarke, Davina, Ph.D.** (Nova Southeastern University), Assistant Teaching Professor, Communication
- Couper, James,** (Florida State University), Professor Emeritus, Art and Art History
- Covey, Rebecca, MFA** (University of Wisconsin), Associate Professor, Theatre
- Cruz, Nilo, Hon. D.Litt.** (Whittier College), Courtesy Professor, Theatre
- Davenport, Candice, Ph.D.** (University of Miami), Assistant Professor, Music
- Davidovici, Robert, Postgraduate Diploma** (The Julliard School), Professor and Artist-in-Residence, Violin, Music
- Del Valle, Eduardo, MFA** (Brooklyn College, CUNY), Professor Emeritus, Art and Art History
- Delgado, Jessica, MS** (Florida International University), Associate Teaching Professor, Communication
- De Los Reyes, Grizelle, MA** (University of Florida), Associate Teaching Professor, and Director, Global Strategic Communication – Miami Ad, Communication
- Desrayaud, Nathalie, Ph.D.** (Purdue University), Assistant Professor, Communication
- Dolata, David, Ph.D.** (Case Western Reserve University), Professor, Music History & Collegium, Music
- D'Souza, Newton, Ph.D.** (University of Wisconsin), Associate Professor and Chair, Interior Architecture
- Dundas, Robert B., MFA** (University of Iowa), Associate Professor, Vocal Performance, Opera, Theater, Music
- Duval-Carrié, Edouard,** (École Nationale Supérieure des Beaux-Arts, Paris) Courtesy Professor, Art and Art History
- Echarri, Maria, MSC** (Minnesota State University), Visiting Assistant Teaching Professor, Communication
- Eckroth, Michael, Ph.D.** (New York University), Assistant Professor, Jazz Performance, Music
- Elias, Albert, MArch** (Florida International University) Assistant Teaching Professor, Architecture
- Evans, Daniel, MS** (Columbia University), Clinical Associate Professor of Professional Practice, Journalism and Media
- Ferreira, Leonardo, Ph.D.,** (Michigan State University), Professor, Journalism and Media
- Fiorato, Guido,** Courtesy Professor, Art and Art History

- Fuller Veloz, Karen S., MFA** (Florida International University), Associate Teaching Professor, Music Business and Director, Music
- Galand, Joel, Ph.D.** (Yale University), Associate Professor, Music Theory and Director, Graduate Studies, Music
- Galaska, Anthony, MFA** (Purdue University), Associate Professor, Theatre
- Gálvez, Jahaira Ríos Campos, MFA** (Barry University), Visiting Assistant Teaching Professor, Art and Art History
- García, Orlando, DMA** (University of Miami), Distinguished University Professor, and Coordinator, Composition, Music
- Gecic, Kemal, MA** (University of Novi Sad, Yugoslavia), Professor and Artist-in-Residence, Piano, Instrumental Performance, Music
- Gelpi, Nicholas, MSAAD, AIA** (Columbia University), Associate Professor, Architecture
- Goldemberg, Eric M., MSAAD** (Columbia University), Associate Professor, Architecture
- Gomez del Valle, Mirta, MFA**, (Brooklyn College, CUNY), Professor Emeritus, Art and Art History
- Goslin, Christopher, MA** (New York University), Associate Teaching Professor, Theatre
- Guernsey, Daniel, Ph.D.** (University of Wisconsin-Madison), Associate Professor, Art History, Art and Art History
- Hacker, James, BA** (University of Miami), Teaching Professor, Trumpet, Instrumental Performance, Music
- Huffnagle, Melvin, MFA** (University of Florida), Assistant Professor, Theatre
- Ivey, Jennifer, MFA** (University of Illinois), Assistant Professor, Theatre
- Izquierdo, Aileen, MS** (Florida International University), Associate Teaching Professor, Chair, and GSC Graduate Director, Communication
- Jacobson, Susan, Ph.D.** (New York University), Associate Professor, Journalism and Media
- Kairalla, Stephen, B.S.** (University of Miami), Clinical Associate Professor of Professional Practice, Journalism and Media
- Kashian, Nicole Carmen, Ph.D.** (Michigan State University), Assistant Professor, Communication
- Kaufman, Fredrick, MM**, (Manhattan School of Music), Professor Emeritus, Music
- Kennedy, Karla, Ph.D.** (University of Florida), Assistant Teaching Professor, Journalism and Media, and CARTA Director of Online Learning
- Khare, Vindhya, DMA** (University of Miami), Associate Teaching Professor and Coordinator of Vocal Performance, Music
- King, Clive**, (Goldsmiths College of Art, University of London), Professor Emeritus, Art and Art History
- Klotz, Michael, MM** (The Julliard School), Teaching Professor, Viola, Instrumental Performance, Artist-in-Residence, Amernet String Quartet, Music
- Kolasinski, Jacek, MFA, Ph.D.** (Academy of Fine Arts, Warsaw), Associate Professor, and Director, Ratcliffe Art + Design Incubator, Art and Art History
- Kopenhaver, Lillian Lodge, Ed.D.** (Nova Southeastern University), Professor, Communication
- Kurland, Nathan Robert, MA**, (Temple University), Visiting Assistant Teaching Professor, Communication
- Kurtzberg, Laura, MFA** (University of Miami), Clinical Assistant Professor of Professional Practice, Journalism and Media
- Leach, D. Neil, MA, Dipl. Arch., Ph.D.** (University of Nottingham), Associate Professor, Architecture and Director, Doctor of Design
- Littley, Marcia, Artist Diploma** (University of Cincinnati), Associate Teaching Professor, Violin, and Coordinator of Strings, Instrumental Performance, Music
- Liu, Yu, Ph.D.** (University of Miami), Associate Professor, Communication
- Lopez, Ivan, MFA** (National Theatre Conservatory), Assistant Teaching Professor, Theatre
- López, José, DMA** (University of Miami), Associate Professor and Coordinator, Piano, Instrumental Performance, Music
- Maguire, William, MS** (Illinois Institute of Technology), Professor, Photography, Art and Art History
- Marine, Mark, MArch**, (University of California at Los Angeles), Assistant Teaching Professor, Architecture, and Director, FIU by Design
- Marino, Maria Ines, Ed.D.** (University of Florida), Associate Teaching Professor, Communication
- Marsh, Elizabeth, MFA** (University of Miami), Assistant Professor, Communication
- Martinez, Tony**, (School of Visual Arts, New York), Courtesy Professor, Theatre
- Martinez-Bustos, Lilliam, MA** (University of Southern California), Clinical Assistant Professor of Professional Practice, Journalism and Media
- Mendoza, Javier Jose, Ph.D.** (Ball State University), Assistant Professor, Conducting, Director of Symphony Orchestra, Music
- Millard, Erynn, Ph.D.**, (Florida State University), Assistant Professor, Choral Studies and Director of Choirs, Music
- Mirolla, Miriam, Ph.D.** (La Sapienza University, Rome), Courtesy Professor, Art and Art History
- Mitan, Daniel, MFA** (University of Florida), Associate Teaching Professor, Theatre
- Murray, Joel, Ph.D.** (Bowling Green State University), Professor and Chair, Theatre
- Nagin, Avi, MM** (Yale University), Visiting Assistant Teaching Professor, Violin, Music
- Namkung, Michael, MFA** (San Francisco State University), Assistant Professor, Art and Art History
- Neal, Stephen, MFA**, (Florida State University), Visiting Assistant Teaching Professor, Theatre
- Nedev, Nikolay, MAUD** (Harvard University), Associate Teaching Professor, Architecture
- Nepomechie, Marilys R., MArch, FAIA, DPACSA** (Massachusetts Institute of Technology), Professor, Architecture, and Associate Dean of Faculty and Program Development
- Ousley, Jamie, DMA** (University of Miami), Associate Professor, Bass, Jazz Performance, Music
- Ottolenghi, Hugo, MA** (University of North Carolina), Assistant Teaching Professor, Communication
- Ozer, Ebru, MLA** (Louisiana State University), Associate Professor, Landscape Architecture + Environmental and Urban Design
- Ozgen, Mesut, MD, MM, DMA** (Arizona State University), Associate Teaching Professor, Guitar and Coordinator, Guitar, Instrumental Performance, Music
- Pareja, Marina, MFA** (Queen Margaret University College, Edinburgh), Assistant Professor, Theatre
- Park, David, Ph.D.** (University of Wisconsin-Madison), Associate Professor, Communication
- Patel, Alpesh Kantial, Ph.D.** (University of Manchester),

- Associate Professor and Director, Graduate Studies, Art and Art History
- Pappano, Darci, MA** (Florida International University), Associate Teaching Professor, Interior Architecture
- Pease, Silvia, BFA, MFA** (University of Miami), Assistant Teaching Professor, Art and Art History
- Perez, Jonathan, MFA**, (Syracuse University) Assistant Teaching Professor, Art and Art History
- Perez, Raquel, Ph.D.** (Nova Southeastern University), Associate Teaching Professor, Communication
- Peterson, Eric, MArch** (University of Florida), Associate Teaching Professor, Architecture
- Plugarasu, Mihaela, MA** (Florida International University), Assistant Teaching Professor, Communication
- Ponte, Teresa, J.D.** (Rutgers University School of Law), Clinical Associate Professor of Professional Practice and Chair, Journalism and Media
- Powell, Paula A., MS**, (Florida International University), Assistant Teaching Professor, Communication
- Printz, Jennifer, MFA**, (University of Georgia), Assistant Professor, Art and Art History
- Radi-Bermudez, Heather, MA** (Florida International University), Assistant Teaching Professor, Communication
- Read, A. Gray, MArch, Ph.D., RA** (University of Pennsylvania), Associate Professor, Architecture
- Reed, Rachel Lynne Ph.D.** (Texas A+M University), Assistant Teaching Professor, Communication
- Reisner, Neil, M.A.** (Columbia University), Associate Professor, Journalism and Media
- Richards, Allan, MA** (Florida International University), Clinical Associate Professor of Professional Practice, Journalism and Media
- Rosales, Camilo, MArch, RA** (Harvard University), Professor, Architecture
- Rothfield, Katie, MFA** (Savannah College of Arts and Design), Associate Teaching Professor, Interior Architecture, Director, CARTA Career Development and Assistant Dean of Students
- Rovira, Roberto J., MLA** (Rhode Island School of Design), Professor and Chair, Landscape Architecture + Environmental and Urban Design
- Rueda, Henry, MSAAD** (Columbia University), Associate Teaching Professor, Architecture
- Scharnagl, Gretchen, MFA**, (Florida International University) Associate Teaching Professor, Art and Art History
- Schriner, Brian D., MA** (University of Miami), Dean, College of Communication, Architecture + The Arts
- Scicluna, Thomas, MFA**, (University of Miami), Assistant Professor, Art and Art History
- Sears, Crystal, Ph.D.** (Wayne State University), Visiting Assistant Teaching Professor, Communication
- Segev, Sigal, Ph.D.** (University of Leicester), Associate Professor, Communication
- Sheerin, Michael, MS** (Florida International University), Clinical Associate Professor of Professional Practice, Journalism and Media
- Silva, Elisa, MArch** (Harvard University), Associate Professor, Architecture and the Wolfsonian Public Humanities Lab
- Siress, Brian, MA** (New York University), Visiting Assistant Teaching Professor, Communication
- Soto, Alfredo, MA** (Florida International University), Visiting Assistant Teaching Professor, Communication
- Spiegelhalter, Thomas, MDes** (Berlin University of the Arts), Professor, Architecture
- Strouse, Charles, MS**, (Florida International University), Assistant Teaching Professor, Journalism and Digital Director of South Florida Media Network
- Stuart, John A., MArch, AIA** (Columbia University), Distinguished University Professor, Architecture, Associate Dean, Cultural and Community Engagement, and Executive Director, Miami Beach Urban Studios
- Sudol, Jacob, Ph.D., ABD** (University of California at San Diego), Associate Professor, Music Technology, Music
- Sullivan, Timothy, MA** (University of Nebraska, Lincoln), Clinical Associate Professor of Professional Practice, Journalism and Media
- Suris, Carlos, M.L.S.** (University of South Florida), Associate Teaching Professor, Communication
- Timlick, Lesley-Ann, MFA** (University of California-Davis), Associate Professor, Theatre
- Toosi, Fereshteh Hamidi, MFA** (Carnegie Mellon University), Assistant Professor, Art and Art History
- Torres, Constantino Manuel, Ph.D.** (University of New Mexico), Professor Emeritus, Art and Art History
- Vassigh, Shahin, MArch** (University of Buffalo), Professor, Architecture and Director of Technology Research Development
- Veraldi, Lorna, J.D.** (New York School of Law), Associate Professor, Journalism and Media
- Vigon, Mercedes, Ph.D.** (University of Miami), Clinical Associate Professor of Professional Practice, Journalism and Media
- Villar, Maria Elena, Ph.D.** (University of Miami), Professor, Communication
- Vitenson, Michael, MM** (The Julliard School), Associate Teaching Professor, Violin, Instrumental Performance, Artist-in-Residence, Amernet String Quartet, Music
- Wallace, Naomi, MFA** (University of Iowa), Courtesy Professor, Theatre
- Wang, Weirui, Ph.D.** (Pennsylvania State University), Associate Professor, Journalism and Media
- Watts, Barbara, Ph.D.** (University of Virginia), Associate Professor, Art History, Art and Art History
- Webb, Lynne, Ph.D.**, (University of Oregon), Emeritus Professor, Communication
- Webber, David, MFA**, (Alfred University), Assistant Teaching Professor, Art and Art History
- Weiss, Michael, BFA** (University of Southern California), Courtesy Professor, Theatre
- Winter, Pioneer, MFA**, (Jacksonville University/White Oak), Assistant Teaching Professor, Theatre and the Honors College
- Yawney, Michael, MFA** (Columbia University), Associate Professor, Theatre
- Yi, Lidu, Ph.D.** (University of Toronto, Canada), Associate Professor, Art and Art History
- Zhou, Chun, Ph.D.** (University of Miami), Assistant Professor, Communication

College of Engineering and Computing

Dean

John L. Volakis

Associate Dean for Academic
Affairs

Anthony J. McGoron
Osama Mohammed

Associate Dean for Research

Associate Dean for Undergraduate
Education

Mark A. Weiss

The College of Engineering and Computing is committed to **educate** professionals who can **serve industry and the community at large** in a wide variety of fields, as well as **conduct innovative basic and applied research** that meets the technical needs of industry and government, improves the quality of life, and contributes to the economic viability of Florida, the Nation, and the world.

The College of Engineering and Computing consists of five schools: School of Biomedical, Mechanical and Materials Engineering, Knight Foundation School of Computing and Information Sciences, School of Electrical, Computer and Enterprise Engineering, School of Universal Computing, Construction and Engineering Education and Moss School of Construction, Infrastructure and Sustainability; and five academic departments: Biomedical Engineering, Civil and Environmental Engineering, Construction Management, Electrical and Computer Engineering, and Mechanical and Materials Engineering. These academic units offer programs leading to the Bachelor of Arts, Bachelor of Science, Master of Science and Doctor of Philosophy degrees. In addition to the academic departments and schools, the College offers a graduate program that houses the Enterprise and Logistics Engineering.

The College has two institutes and thirteen centers supporting its academic and research programs. The institutes are the Advanced Materials Engineering Research Institute (AMERI) and the Telecommunications and Information Technology Institute (IT2). The centers are the Bioinformatics Research Group (BioRG), Center for Advanced Distributed Systems Engineering, Center for Advanced Technology and Education (CATE), Center for Diversity in Engineering and Computing (CDEC), Center for Emerging Technology for Advanced Information Processing and High-Confidence Systems, Center for the Study of Matter at Extreme Conditions (CeSMEC), Engineering Information Center (EIC), Engineering Manufacturing Center (EMC), High Performance Database Research Center and the Lehman Center for Transportation Research (LCTR). Two major university centers, the Applied Research Center (ARC) and International Hurricane Research Center (IHRC), work very closely with the College of Engineering and Computing with many joint appointments at the faculty level.

The College houses an open-access Motorola Nanofabrication Research Facility to conduct research in nanoelectronics, bio/nanosensors and nanomaterials. In addition, the FIU College of Engineering and Computing has developed many collaborations with the industry and hospitals in Florida and across the nation.

The programs of the College are directed towards the practical use of scientific, engineering, and technical principles to meet the objectives of industry, business, government and the public.

The College provides each student with the opportunity to develop a high level of technical skills and to obtain an education, which will prepare him or her for a rewarding career and personal growth. Through the programs and degrees it offers, the College recognizes the growing impact of technology upon the quality of life and that the proper application of technology is critical to meeting current and emerging human needs.

The College faculty is actively engaged with business, industry and government. Faculty members also participate in a variety of basic and applied research projects in areas such as energy, transportation, solid waste disposal, biotechnology, biomedical devices and instrumentation, computer engineering, artificial intelligence, manufacturing, robotics telecommunications, micro-electronics, nano-electronics, nanotechnology, neuro-sciences/engineering, modeling and simulation, construction engineering, materials, structural systems, virtual prototyping, systems modeling, information technology, environmental sciences and engineering, image processing, engineering education, etc.

Doctor of Philosophy

The College offers Doctor of Philosophy degrees in Biomedical Engineering, Civil Engineering, Computer Science, Electrical and Computer Engineering, Engineering and Computing Education, Mechanical Engineering, and Materials Science and Engineering. Areas of study in Biomedical Engineering include:

- Biomechanics, biomaterials, and medical devices
- Bioinstrumentation, and biomedical image/signal processing
- Drug delivery and Bio-nanotechnology
- Medical physics and Biophotonics
- Reparative and Regenerative Tissue Engineering
- Reparative and Therapeutic Neurotechnology

Areas of study in Civil Engineering include:

- Transportation engineering
- Environmental engineering
- Structural engineering
- Water resources engineering
- Geotechnical engineering
- Construction engineering

Areas of study in Computer Science include:

- Networking and distributed systems, wireless networks, mobile and ubiquitous computing, routers, and switches, system modeling.
- Operating systems, distributed computing, storage systems, virtualization, security, and real-time systems.
- Database systems, including distributed databases, information retrieval in heterogeneous databases, multimedia databases, data mining, and digital libraries.
- Software engineering, including formal methods, software testing techniques, software architecture, software security, software design, model-driven software development, and grid computing.
- Theory, including algorithms and data structures, programming languages, program verification, and logic.
- Bioinformatics and computational biology.

- Artificial Intelligence, including machine learning, expert systems, intelligent agents, affective computing, cognitive science, intelligent human-computer interaction, social informatics.

Areas of study in Electrical and Computer Engineering include:

- Biomedical sciences and technologies
- Computing systems and VLSI design
- Cybersecurity
- Digital signal and image processing
- Machine learning
- Microelectronics including all types of analog, digital and mixed-signal electronics and integrated circuit designs
- Nanoscale electronics and photonics
- Power and energy systems
- Power electronics
- Renewable energy
- RF and microwave engineering
- Systems, robotics, and control
- Telecommunications and networking

Areas of study in Engineering and Computing Education include:

- Educational systems and culture (e.g., educational change in those systems, leadership and policy issues, institutional and departmental structures impacting education)
- Engineering and Computing student experiences (e.g., agency, identity development, motivation, transitions, experiences of particular student groups)
- Equity, diversity, and inclusion in engineering and computing education, could be focused on students, staff, educators and/or professionals
- Instructional practices and educator development in K-12, undergraduate and graduate school, could be face-to-face, hybrid, and/or online. This could include formal and information education, the use of educational technology, or a focus on a particular pedagogy.
- Learning in K-12, undergraduate and graduate school, could be face-to-face, hybrid, and/or online. This could include exploring certain skill and content development as well as learning within particular pedagogies, with technology, and/or in informal spaces.
- Particular settings (e.g., K-12, Hispanic-Serving Institutions, Historically Black Colleges and University, Two-year colleges, makers/innovation spaces, professional workplaces)

Areas of study in Mechanical and Materials Engineering include:

- Additive manufacturing
- Applied mechanics
- CAD/CAM
- Ceramics and electronic materials
- Energy materials
- Mechanics of materials
- Metals and advanced composites
- Modeling and simulation
- Nanomaterials and nano devices
- Polymers and biomaterials
- Robotics

- Thermo/Fluids sciences

Master of Science Degree Programs

The College offers Master of Science degrees in:

- Biomedical engineering
- Civil engineering
- Computer engineering
- Computer science
- Construction management
- Cybersecurity
- Data science
- Electrical engineering
- Engineering management
- Environmental engineering
- Information technology
- Logistics engineering
- Materials science and engineering
- Mechanical engineering
- Telecommunications and networking

Distance Learning Programs

The Office of Distance Education (ODE) provides access to graduate and undergraduate level engineering courses and programs to individual students anywhere and anytime, whether it is at home or the workplace. Courses are delivered through streaming video over the internet.

Research Centers and Institutes

Research spans from a single discipline to multidisciplinary areas in the College of Engineering and Computing. Thus, the College, through its research centers and institutes, has established many collaborative and cooperative partnerships with other units in the university as well as with the regional, state and federal governments and industry.

The research units involved in these efforts include:

- Advanced Materials Engineering Research Institute (AMERI)
- Applied Research Center (ARC)
- Bioinformatics Research Center (BioRG)
- Center for Advanced Distributed Systems Engineering
- Center for Advanced Technology and Education (CATE)
- Center for Diversity and Student Success in Engineering and Computing (CD-SSEC)
- Center for the Study of Matters at Extreme Conditions (CeSMEC)
- Distributed Multimedia Information Systems Laboratory (DMIS)
- Division of External Programs (DEP)
- Engineering Information Center (EIC)
- Engineering Manufacturing Center (EMC)
- Florida Center for Cyber Infrastructure Education and Research for Trust and Assurance
- High Performance Database Research Center (HPDRC)
- Industry-University Cooperative Research Center (I/UCRC) Center for Advanced Knowledge Enablement (CAKE)
- Lehman Center for Transportation Research (LCTR)

- Motorola Nanofabrication Research Facility
- Titan America Structures and Construction Testing Laboratory
- Telecommunications and Information Technology Institute (IT2)

Student Access & Success

The Office of Student Access & Success is committed to improving students' learning and success by providing engaged learning experiences through meaningful and strategic programming and services that will facilitate successful transitions between pre-collegiate, undergraduate and graduate education.

Admission Requirements

Prospective students seeking a graduate degree in the College must satisfy all university admission requirements as well as the specific program requirements. Each department evaluates candidates for admission to its programs. Prospective students should refer to the appropriate section of the catalog for specific admission requirements. Contact information of the Graduate Programs Directors can be found at:

cec.fiu.edu/resources/students/advising/graduate-program-directors/

Admitted Student Procedures

A student who has been accepted to a degree program in the College must meet with the department's Graduate Program Director prior to the enrollment in the first class.

Enrolled students must choose an advisor during their first semester in the program.

Continued contact (at least once per semester) with the advisor is required to review progress and select courses for each succeeding semester.

Courses taken without the required prerequisites and co-requisites, or without the consent of the advisor, will be dropped automatically before the end of the term, resulting in a grade of "DR" or "DF".

Scientific Laboratory Fees are assessed for certain courses where laboratory classes are part of the curriculum. Specific information on scientific laboratory fees may be obtained from the University Financial Services.

Fellowships, Assistantships, and Scholarships

The College of Engineering and Computing offers a variety of fellowships, assistantships, and scholarships to qualified students. These awards are highly competitive; hence, prospective students are urged to apply and submit all required records and scores as early as possible so they can be considered for these awards.

The amounts of these awards vary depending on the type of the award, but they may provide full tuition and a monthly stipend. Visit: cec.fiu.edu for additional information.

Policies, Requirements, and Regulations

The University, the University Graduate School, and the College of Engineering and Computing have a set of guidelines to protect the student's rights and to ensure a timely graduation. Students must become familiar with all University, the University Graduate School, and College's graduate procedures. These procedures are described in the University's Student Handbook, this catalog and at

<http://gradschool.fiu.edu>.

The programs, policies, requirements and regulations listed in the catalog are continually subject to review to serve the needs of the University's various stakeholders, including its students, and to respond to the mandates of the FIU Board of Trustees and the Florida Legislature. Changes may be made without advance notice.

Florida International University and the College adhere to opportunity practices, which conform to all laws against discrimination and are committed to non-discrimination with respect to race, color, creed, age, handicap, sex, marital status, or nationality. Additionally, the University is committed to the principle of taking positive steps necessary to achieve the equalization of educational and employment opportunities.

College of Engineering and Computing Dismissal Policy

A student who has been dismissed from the University for the first time may see the Graduate Program Director for that department to begin the appeal procedure. The Director will determine if the student is eligible to appeal the dismissal or if there is a way to lift the dismissal. If the student is eligible, he or she must make an appointment to see the department's chairperson or associate chairperson. The student must bring a letter stating when he or she was dismissed the first time and what he or she is going to do to ensure that he or she is not dismissed a second time. If the chairperson determines that the student is worthy of reinstatement, he or she will prepare and sign a memo for the College Dean's consideration stating the conditions for the student to be reinstated. The student may be readmitted on academic probation upon the approval of the Dean of the University Graduate School. If the student does not meet these conditions, he or she will be dismissed a second and final time from the program. The student must also sign an agreement stating that he or she understands that the department will not allow a second reinstatement if the student is dismissed again.

Any student who is dismissed a second time from FIU will not be readmitted under any circumstances. Only a first dismissal appeal is considered in the College of Engineering and Computing, a second dismissal appeal will not be accepted.

Department-Specific Information

For additional information refer to your selected department in this catalog, or call the graduate program director of each department. As listed above.

Master of Science in Engineering Management

The Master of Science in Engineering Management (MSEM) program develops future leaders of business and industry in an engineering and technological environment. The program blends a carefully chosen mix of graduate courses offered by the College of Engineering and Computing, the College of Business Administration, and the College of Law. The MSEM program is designed to offer a tailored degree for those engineers who would like to advance to managerial positions and wish to acquire the necessary knowledge and skills for success. The MSEM program includes coursework that simulates a business environment where students learn and apply engineering tools, managerial theories, and best practices to design and operate industrial systems. Students in the program are expected to acquire contemporary engineering management theories and techniques, and simultaneously build a solid technical foundation in a chosen engineering track.

Admission Policies

The applicant to the MSEM program must have a bachelor's degree in engineering or a closely related field from an accredited institution with a minimum of "B" average in upper-level undergraduate work, or a graduate degree from an accredited institution.

In addition, International applicants whose native language is not English are required to demonstrate English language proficiency through one of the following:

- 80 on the iBT TOEFL (equivalent to 550 on the paper-based version of the Test of English as a Foreign Language);
- 6.5 overall on the International English Language Testing System (IELTS);
- 53 Pearson Test of English - Academic;
- Cambridge English – Advanced;
- An undergraduate or graduate degree from an accredited institution where the language of instruction is English.

In lieu of the above requirement a student may opt for (a) or (b) below along with an additional method of direct assessment of English language acquisition of an interview or proctored video-taped session

a) Successful completion of University level English courses from an accredited institution (e.g. ENC 1101, ENC 1102 or other equivalent courses with a letter grade of "B" or higher) that prepare applicants to be proficient in English.

OR

b) English Language Institute Level Six: successful completion with passing grades for all content areas;

Plus, one of the following additional methods of assessment:

i) Interview (in person when possible or via videoconference) with admissions committee.

ii) Proctored video-taped responses to questions from the admissions committee.

The applicant whose GPA does not meet the minimum GPA requirement may be considered for conditional admission. For such consideration, the applicant must submit (1) three letters of recommendation; (2) a resume including education, training, and employment history, practical and research experience (such as projects and publications), skills and other pertinent information; and (3) a statement of objective in which the applicant must clearly state his/her intended engineering track, in addition to other information.

Degree Requirements

The MSEM program requires 30 credit hours of course work including 9 credit hours of engineering management core courses, 9 credit hours of business electives and 12 credit hours of approved graduate-level electives from an engineering track.

Engineering Management Core Courses

Students in the Engineering Management program are required to take three courses (9 credit hours) to build an engineering management foundation that includes topics in engineering quality management, systems improvement, engineering project management, intellectual property issues, and business laws. The three core courses are:

EIN 5226C	Total Quality Management For Engineers	3
ESI 6455	Advanced Engineering Project Management	3
LAW 5072	Business Law and Intellectual Property for Engineers and Entrepreneurs	3

Business Electives

Students in the program are required to take three courses (9 credit hours) to gain fundamental knowledge about management functions that includes topics in accounting, finance, organizational behavior, leadership, marketing, and operations management. Additional business electives may be considered subject to the Director's approval. A suggested list of business elective courses is given below:

ACG 6026	Accounting for Managers	3
EIN 5359	Industrial Financial Decisions	3
EIN 6105	Technology Policies and Strategies	3
EIN 6160	Management of Innovation and Technology	3
EIN 6324	Technology Entrepreneurship	3
EIN 6155	Business Plan Development	3
FIN 6406	Corporate Finance	3

FIN 6425	Financial Management Policies	3
FIN 6487	Financial Risk Management- Financial Engineering	3
MAN 6209	Organization Design and Behavior	3
MAR 6805	Marketing Management	3
MAN 6830	Organization Information Systems	3
MAN 6501	Operations Management	3
MAN 6167	Leadership in a Global Environment	3

Engineering Tracks

Students in the Engineering Management program must choose an engineering track from any academic unit in the College of Engineering and Computing. Within a chosen track, students are required to take four courses (12 credit hours) that meet the program's technical requirement. These engineering electives are designed to broaden and deepen the students' understanding of engineering and technology development in a chosen track. Students should have a proper educational background in order to take elective courses. Additional tracks and elective courses may be available, subject to the approval of the Engineering Management program director.

Biomedical Engineering Track

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

BME 5005	Applied Biomedical Engineering Principles	3
BME 5036	Biotransport Processes	3
BME 5105	Intermediate Biomaterials Science	3
BME 5316	Molecular Bioprocess Engineering	3
BME 5340	Introduction to Cardiovascular Engineering	3
BME 5560	Biomedical Engineering Optics	3
BME 5573	Nanomedicine	3
BME 5505C	Engineering Foundations of Medical Imaging Instrument	3

Computer Engineering Track

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

EEL 5718	Computer Communication Network Engineering	3
EEL 5725	Hardware Description Languages (VHDL or Verilog)	3
EEL 5757	Real-Time DSP Implementations	3
EEL 6167	VLSI Design	3
EEL 6253	Computer Analysis of Power Systems	3
EEE 6502	Digital Signal Processing	3
EEL 6575	Data Communications Engineering	3
EEL 6681	Fuzzy System Design	3

Computer Science Track

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

CEN 5011	Advanced Software Engineering	3
COP 5725	Principles of Database Management Systems	3
COP 5614	Operating Systems	3
COT 5310	Theory of Computation I	3
COT 5407	Introduction to Algorithms	3

Construction Management Track

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

BCN 5716	Productivity in Construction	3
BCN 5626	Construction Cost Analysis & Control	3
BCN 5645	Construction Economic Analysis	3
BCN 5728	Principles of Construction Scheduling	3
BCN 5774	Topics in International Construction	3
BCN 6775	Decision & Risk Analysis in Construction	3
BCN 6916	Development in Construction Technology	3
CCE 5505	Computer Integrated Construction	3

Electrical Engineering Track

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

EEE 5425	Introduction to Nanotechnology	3
EEL 5171	Advanced Systems Theory	3
EEL 5500	Digital Communication Systems I	3
EEL 5501	Digital Communication Systems II	3
EEL 6219	Electric Power Quality	3
EEL 6261	Power Systems Engineering	3
EEL 6443	Electro-Optical Devices and Systems	3
EEE 6502	Digital Signal Processing	3

Enterprise Systems Track

This track is designed for students who have a career interest in management of operations at the entire enterprise level. Systems engineering tools and information technology are applied to planning, modeling, analysis, design, and implementation of contemporary enterprise systems in any business sector. Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

EGS 5620	Enterprise Systems Configuration	3
EGS 5621	Enterprise Systems Collaboration	3
EGS 5622	Enterprise Systems Integration	3
EGS 5623	Enterprise Systems Optimization	3
EIN 5346	Logistics Engineering	3
EN 5367	Design of Production Systems	3
EIN 6133	Enterprise Engineering	3
EIN 6336	Advanced Production Planning and Control	3
EIN 6345	Inventory Control Systems	3
ESI 5010C	Forecasting and Demand Management	3

Engineering Entrepreneurship Track

This track is designed for students who have a career interest in becoming an engineering entrepreneur who creates jobs in new business ventures or becoming an engineering manager who manages innovation working within a company. Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

EGN 5550	Risk Analysis in Business Concept Development for Engineers and Entrepreneurs	3
EGN 5644	Commercializing Innovation	3
EGN 6436	Manufacturing Process Design	3
EIN 5367	Design of Production Systems	3
EIN 6105	Technology Policies and Strategies	3
EIN 6160	Management of Innovation and Technology	3

EIN 6324	Technology Entrepreneurship	3	EIN 5346	Logistics Engineering	3
EIN 6155	Business Plan Development	3	EIN 5367	Design of Production Systems	3
EIN 6327	Entrepreneurship and New Venture Initiation	3	EIN 5436	Regulatory Compliance in Logistics and Supply Chain Management	3
EIN 6329	Advanced Engineering Business Plan Development	3	EIN 6133	Enterprise Engineering	3
EIN 6336	Advanced Production Planning and Control	3	EIN 6336	Advanced Production Planning and Control	3
EIN 6392	Product Design for Manufacturability and Automation	3	EIN 6345	Inventory Control Systems	3
			ESI 5522	Simulation Models of Engineering Systems	3

Environmental Engineering Track

Students in this track are required to take four courses from the following list with the approval of the Graduate Program Director and after meeting prerequisite requirements. Additional courses may be selected with approval of the program director.

ENV 5406	Water Treatment Systems and Design	3
ENV 5517	Design of Wastewater Treatment Plants	3
ENV 5666	Water Quality Management	3
CWR 5235	Open Channel Hydraulics	3
CWR 5125	Groundwater Hydrology	3
ENV 5104	Indoor Air Quality	3
ENV 5105	Air Quality Management	3
ENV 5347	Waste Incineration	3
ENV 5126	Particulate Air Pollution Control	3
ENV 5127	Gaseous Air Pollution Control	3
ENV 5356	Solid and Hazardous Waste	3
ENV 5027	Biomediation Processes	3
ENV 5335	Advanced Hazardous Waste Treatment Processes	3
ENV 5008	Appropriate Technologies for Developing Countries	3
ENV5007	Environmental Planning	3
ENV 5519	Chemistry for Environmental Engineers	3
ENV 6045	Environmental Modeling	3
ENV 6070	Green Engineering	3
ENV 6614	Environmental Impact Assessment	3

Information Technology Track

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

CIS 5027	Computer Systems Fundamentals	3
CIS 5372	Fundamentals of Computer Security	3
CEN 5087	Software and Data Modeling	3
COP 5725	Principles of Database Management Systems	3
TCN 5030	Computer Communications and Networking Technology	3
EGS 5620	Enterprise Systems Configuration	3
EGS 5621	Enterprise Systems Collaboration	3
EGS 5622	Enterprise Systems Integration	3
EGS 5623	Enterprise Systems Optimization	3
EIN 6117	Advanced Industrial Information Systems	3
EIN 6133	Enterprise Engineering	3
ESI 5602	Engineering Data Representation and Modeling	3
ESI 6601	Data Warehousing and Mining	3

Logistics Engineering Track

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

EIN 5346	Logistics Engineering	3
EIN 5367	Design of Production Systems	3
EIN 5436	Regulatory Compliance in Logistics and Supply Chain Management	3
EIN 6133	Enterprise Engineering	3
EIN 6336	Advanced Production Planning and Control	3
EIN 6345	Inventory Control Systems	3
ESI 5522	Simulation Models of Engineering Systems	3
ESI 5010C	Forecasting and Demand Management	3
ESI 6316	Applications of OR in Manufacturing	3
ESI 6324	Advances in Logistics Technology	3
ESI 6470	Stochastic Optimization	3
ESI 6546	Network Flow Analysis	3

Mechanical Engineering Track

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

EGM 5346	Computational Engineering Analysis	3
EGM 5354	Finite Element Methods Applications in ME	3
EGM 5615	Synthesis of Engineering Mechanics	3
EGM 6422	Advanced Computational Engineering Analysis	3
EML 5103	Intermediate Thermodynamics	3
EML 5152	Intermediate Heat Transfer	3
EML 5505	Smart Machine Design and Development	3
EML 5509	Optimization Algorithms	3
EML 5530	Intermediate CAD/CAE	3
EML 5606C	Advanced Refrigeration and AC Systems	3
EML 5709	Intermediate Fluid Mechanics	3
EML 6725	Computational Fluid Dynamics	3

Operations Management of Orthotics and Prosthetics Track

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of program director.

BME 5141L	Introduction to Laboratory Skills and Materials in Prosthetics and Orthotics	1
BME 5213L	Modern Clinical Evaluation Tools	3
BME 5214L	Orthotic Mgt. of the Lower Limb I	4
BME 5218L	Orthotic Mgt. of the Spine	3
EGN 5435	Product Modeling	3
EGS 5620	Enterprise Systems Configuration	3
EGN 6436	Manufacturing Process Design	3
EGN 6438	Manufacturing Engineering	3
EGN 6940	Graduate Internship - Orthotics and Prosthetics Clinical Rotation	1-6
EGN 6971	Master's Project	3
EIN 6133	Enterprise Engineering	3
EIN 6160	Management of Innovation and Technology	3
EIN 6324	Technology Entrepreneurship	3
EIN 6336	Advanced Production Planning and Control	3
EIN 6392	Product Design for Manufacturability and Automation	3
EIN 6940	ISE Internship	3

Production and Manufacturing Track

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

EGN 5540	Quality and EH&S Management Systems	3
EGN 6436	Manufacturing Process Design	3
EGS 5620	Enterprise Systems Configuration	3
EGS 5622	Enterprise Systems Integration	3
EIN 5332	Quality Engineering	3
EIN 5346	Logistics Engineering	3
EIN 5367	Design of Production Systems	3
EIN 6336	Advanced Production Planning and Control	3
EIN 6345	Inventory Control Systems	3
EIN 6392	Product Design for Manufacturability and Automation	3
ESI 5010C	Forecasting and Demand Management	3

Quality Engineering and Management

Students in this track are required to take four courses from the following list.

EIN 5332	Quality Engineering	3
EGN 5540	Quality and EH&S Management Systems	3
ESI 6316	Applications of OR in Manufacturing	3
EIN 5367	Design of Production Systems	3
EIN 5106	Regulatory Aspects of Engineering	3
EIN 6133	Enterprise Engineering	3
EIN 6179C	Advanced Total Quality Management for Engineers	3

Risk and Disaster Management Track

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

BCN 5588	Vulnerability Analysis	3
BCN 5589	Hazard Mitigation	3
EGN 5550	Risk Analysis in Business Concept Development for Engineers	3
ENV 6614	Environmental Risk Assessment	3
FIN 6487	Financial Risk Management- Financial Engineering	3
PHC 6251	Disaster and Emergency Epidemiology	3
MAN 6706	Crisis Management	3
MAP 6630	Numerical Analysis in Risk Analysis and Management	3
MAP 6635	Risk Analysis and Management I	3
MAP 6636	Risk Analysis and Management II	3

Structural/Wind/Construction Track

Students in this track are required to take four courses from the following four groups (one per group) with the approval of the Graduate Program Director and after meeting prerequisite requirements. Additional courses may be selected with approval of the program director.

Group 1

CCE 5035	Construction Engineering Management	3
CCE 5036	Advanced Project Planning for Civil Engineers	3

Group 2

CES 5106	Advanced Structural Analysis	3
EGM 5421	Structural Dynamics	3

Group 3

CES 5715	Prestressed Concrete Design	3
----------	-----------------------------	---

CES 5606	Advanced Structural Steel Design	3
CES 6706	Advanced Reinforced Concrete Design	3
EGN 5439	Design of Tall Buildings	3

Group 4

CEG 5065	Geotechnical Dynamics	3
CEG 6105	Advanced Foundations Engineering	3

Systems Engineering Track

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

EGN 5540	Quality and EH&S Management Systems	3
EIN 5332	Quality Engineering	3
EIN 5346	Logistics Engineering	3
EIN 5367	Design of Production Systems	3
EIN 6133	Enterprise Engineering	3
EIN 6336	Advanced Production Planning and Control	3
EIN 6345	Inventory Control Systems	3
EIN 6357	Advanced Engineering Economy	3
EIN 6940	Industrial and Systems Engineering Internship	3
ESI 5010C	Forecasting and Demand Management	3
ESI 5522	Simulation Models of Engineering Systems	3
ESI 6316	Applications of OR in Manufacturing	3
ESI 6440	Integer Programming	3
ESI 6470	Stochastic Optimization	3
ESI 6524	Advanced Industrial Systems Simulation	3
ESI 6546	Network Flow Analysis	3

Telecommunications Track

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

TCN 5010	Telecommunications Technology and Applications	3
TCN 5030	Computer Communications and Networking Technologies	3
TCN 5060	Telecommunications Software and Methodologies	3
TCN 5640	Telecommunications Enterprise Planning and Strategy	3
TCN 6210	Telecommunications Network Analysis and Design	3
TCN 6430	Network Management and Control Standards	3
TCN 6450	Wireless Information Systems	3
TCN 6880	Telecommunications Public Policy Development and Standards	3

Transportation Engineering Track

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

TTE 5205	Advanced Highway Capacity Analysis	3
TTE 5215	Fundamentals of Traffic Engineering	3
TTE 5607	Transportation Demand Analysis	3
TTE 5805	Advanced Geometric Design of Highways	3
TTE 6257	Traffic Control Systems Design	3
TTE 6506	Mass Transit Planning	3
CGN 5320	GIS Applications in Civil and Environmental Engineering	3

Water Resources Engineering Track

Students in this track are required to take four courses from the following list with the approval of the Graduate Program Director and after meeting prerequisite requirements. Additional courses may be selected with approval of the program director.

CWR 5140C	Ecohydrology	3
CWR 5235	Open Channel Hydraulics	3
CWR 5251	Environmental Hydraulics	3
CWR 5535C	Advanced Modeling Applications in Water Resources Engineering	3
CWR 6117	Stochastic Hydrology	3
CWR 5125	Groundwater Hydrology	3
CWR 6126	Advanced Groundwater Hydrology	3
CWR 6236	Engineering Sediment Transport	3
ENV 5666	Water Quality Management	3

Master's Project and Thesis Option

Students in the Engineering Management graduate program may receive permission to conduct a master's project of three credit hours or a thesis of six credit hours within their chosen track to complete the degree program. The master's project (EIN 6916) will replace one graduate elective course. The Master's Thesis (EIN 6971) will replace two technical elective courses.

Grades and Credits

Students are required to maintain a GPA of 3.0. Courses with a grade below 'C' will not be counted toward the Master of Science degree in Engineering Management.

Transfer Credit

Students may receive permission to transfer up to a maximum of six semester credits provided that: (1) the courses were taken at the graduate level at an accredited college or university; (2) with a grade of 'B' or better; (3) the courses were judged relevant by the program director; (4) the credits were not used toward another degree; and (5) the credits will be no older than six years at the time of graduation. Students who already have earned (or are earning) a Master's degree that is closely related to his/her technical track (i.e., MSEM sub-plan) may transfer up to 12 semester hours to meet the track requirement, subject to the Program Director's approval. No more than 12 semester hours taken at FIU as a non-degree seeking student may be counted toward the Engineering Management graduate program.

Time Limit

All works applicable to the Master of Science degree in Engineering Management, including transfer credits, must be completed within six years of conferral of the degree.

Combined BS in Biomedical Engineering/MS in Engineering Management (BSBME/MSEM) Degree Pathway

Students who pursue a BS degree and have completed 75 credits in the undergraduate program of Biomedical Engineering with an overall GPA of 3.2 or higher may, upon recommendation from three faculty members, apply to the department to enroll in the combined BSBME/MSEM pathway. Students must also submit an

online application to the University Graduate School for admission to the MSEM program. In addition to the admission requirements of the MSEM program, students must meet all the admission requirements of the University Graduate School.

Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships.

Students enrolled in the combined degree pathway could count up to three BME graduate courses for both the BSBME electives and the MSEM electives, for a total saving of 9 credit hours. The following is a list of eligible BME graduate courses:

BME 5005	Applied Biomedical Engineering Principles	3
BME 5036	Biotransport Processes	3
BME 5105	Intermediate Biomaterials Science	3
BME 5316	Molecular Bioprocess Engineering	3
BME 5340	Introduction to Cardiovascular Engineering	3
BME 5560	Biomedical Engineering Optics	3
BME 5573	Nanomedicine	3

The combined BSBME/MSEM pathway has been designed to be a continuous pathway enrollment. During this combined BSBME/MSEM pathway, upon completion of all the requirements of the BSBME program, students will receive their BSBME degree. Students may elect to permanently leave the combined pathway and earn only the BSBME degree. Students who elect to leave the combined pathway and earn only the BS degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the 9 credit hours in both the BSBME and MSEM degrees.

For each of the graduate courses counted as credits for both BSBME and MSEM degrees, a minimum grade of "B" is required. Only graduate courses with formal lecture can be counted for both degrees. The students are responsible for confirming the eligibility of each course with their undergraduate advisors.

Students interested in the combined pathway should consult with their undergraduate advisor on their eligibility to the pathway. The student should also meet the MSEM Program Director to learn about the graduate program and available tracks/courses before completing the application form and submitting it to their undergraduate advisor. Final decision for admission to the MSEM program will be made by the University Graduate School upon recommendation by the Engineering Management program director. Applicants will be notified by the Engineering Management Program and the University Graduate School of the decision on their applications.

Combined BS in Computer Engineering/MS in Engineering Management (BSCpE/MSEM) Degree Pathway

Students, who are pursuing a Bachelor of Science degree in Computer Engineering and have completed at least 75 credits with a minimum of a 3.2 overall GPA on both lower and upper division courses may, upon recommendation from three ECE faculty members, apply to enroll in the combined BSCpE/MSEM pathway. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. In addition to the admission requirements of the MSEM program, students must meet all the admission requirements of the University Graduate School.

Students enrolled in the combined degree pathway could count up to two Electrical Engineering graduate courses for both the BSCpE electives and the MSEM electives, for a total saving of 6 credit hours. A minimum grade of "B" is required graduate courses counted as credits for both BSCpE and MSEM degrees. Only 5000-level or higher courses may be applied toward both degrees. Only graduate courses with formal lecture can be counted for both degrees.

The combined BSCpE/MSEM pathway has been designed to be a continuous pathway enrollment. Students will receive their BSCpE degree upon completion of all the requirements of the BSCpE program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from his/her bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships.

Students may elect to permanently leave the combined pathway and earn only the BSCpE degree. Students who elect to leave the combined pathway and earn only the BS degree will have the same access requirements to regular graduate programs as any other student but will not be able to use the 6 credit hours in both the BSCpE and MSEM degrees.

Students interested in the combined pathway should consult with their undergraduate advisor on their eligibility to the pathway. The student should also meet the MSEM Program Director to learn about the graduate program and available tracks/courses before completing the application form and submitting it to their undergraduate advisor. Final decision for admission to the MSEM program will be made by the University Graduate School upon recommendation by the Engineering Management program director. Applicants will be notified by the Engineering Management Program and the University Graduate School of the decision on their applications.

Combined BS in Computer Science/MS in Engineering Management (BSCS/MSEM) Degree Pathway

Students who pursue a BS degree and are in their first semester of the senior year in Computer Science and have earned at least a 3.2 overall GPA may, upon recommendation from three faculty members, apply to the department to enroll in the combined BSCS/MSEM program. Students must also submit an online application to the University Graduate School for admission to the MSEM program. In addition to the admission requirements of the MSEM program, students must meet

all the admission requirements of the University Graduate School.

Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships.

Students enrolled in the combined degree pathway could count up to three Computer Science graduate courses toward satisfying both the BSCS and the MSEM requirements, for a total saving of 9 credit hours. Students are required to take courses from the following list. Additional courses may be selected with approval of the program director.

CEN 5011	Advanced Software Engineering
COP 5725	Principles of Database Management Systems
COP 5614	Operating Systems
COT 5310	Theory of Computation I
COT 5407	Introduction to Algorithms

The combined BSCS/MSEM pathway has been designed to be a continuous enrollment pathway. During this combined BSCS/MSEM pathway, upon completion of all the requirements of the BSCS pathway, students will receive their BSCS degree. Students may elect to permanently leave the combined pathway and earn only the BSCS degree. Students who elect to leave the combined pathway and earn only the BS degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the 9 credit hours in both the BSCS and MSEM degrees.

For each of the graduate courses counted as credits for both BSCS and MSEM degrees, a minimum grade of "B" is required. Only graduate courses with formal lecture can be counted for both degrees. The students are responsible for confirming the eligibility of each course with their undergraduate advisors.

Students interested in the combined pathway should consult with their undergraduate advisor on their eligibility to the pathway, preferably during their junior year, since appropriate planning of coursework is required in order to achieve the full nine-credit benefit. The student should also meet the MSEM Program Director to learn about the graduate program and available tracks/courses before completing the application form and submitting it to their undergraduate advisor. Final decision for admission to the MSEM program will be made by the University Graduate School upon recommendation by the Engineering Management program director. Applicants will be notified by the Engineering Management Program and the University Graduate School of the decision on their applications.

Combined BS in Electrical Engineering/MS in Engineering Management (BSEE/MSEM) Degree Pathway

Students, who are pursuing a Bachelor of Science degree in Electrical Engineering and have completed at least 75

credits with a minimum of a 3.2 overall GPA on both lower and upper division courses, may, upon recommendation from three ECE faculty members, apply to enroll in the combined BSEE/MSEM pathway. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. In addition to the admission requirements of the MSEM program, students must meet all the admission requirements of the University Graduate School.

Students enrolled in the combined degree pathway could count up to two Electrical Engineering graduate courses for both the BSEE electives and the MSEM electives, for a total saving of 6 credit hours. A minimum grade of "B" is required graduate courses counted as credits for both BSEE and MSEM degrees. Only 5000-level or higher courses may be applied toward both degrees. Only graduate courses with formal lecture can be counted for both degrees.

The combined BSEE/MSEM pathway has been designed to be a continuous enrollment pathway. Students will receive their BSEE degree upon completion of all the requirements of the BSEE program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from his/her bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships.

Students may elect to permanently leave the combined pathway and earn only the BSEE degree. Students who elect to leave the combined pathway and earn only the BS degree will have the same access requirements to regular graduate programs as any other student but will not be able to use the 6 credit hours in both the BSEE and MSEM degrees.

Students interested in the combined pathway should consult with their undergraduate advisor on their eligibility to the pathway. The student should also meet the MSEM Program Director to learn about the graduate program and available tracks/courses before completing the application form and submitting it to their undergraduate advisor. Final decision for admission to the MSEM program will be made by the University Graduate School upon recommendation by the Engineering Management program director. Applicants will be notified by the Engineering Management Program and the University Graduate School of the decision on their applications.

Combined BS in Information Technology/MS in Engineering Management (BSIT/MSEM) Degree Pathway

Students who pursue a BS degree and are approaching their first semester of the senior year in Information Technology and have earned at least a 3.2 overall GPA may, upon recommendation from three faculty members, apply to the department to enroll in the combined BSIT/MSEM pathway. Students must also submit an online application to the University Graduate School for admission to the MSEM program. In addition to the admission requirements of the MSEM program, students

must meet all the admission requirements of the University Graduate School.

Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships.

Students enrolled in the combined degree pathway could count up to three Management Electives toward their nine "interdisciplinary credits" in the BSIT degree program, for a total saving of 9 credit hours.

ACG 6026	Accounting for Managers
EIN 5359	Industrial Financial Decisions
FIN 6406	Corporate Finance
MAN 6167	Leadership in a Global Environment
MAN 6209	Organization Design and Behavior
MAN 6501	Operations Management
MAN 6830	Organization Information Systems
MAR 6805	Marketing Management

The combined BSIT/MSEM pathway has been designed to be a continuous enrollment pathway. During this combined BSIT/MSEM pathway, upon completion of all the requirements of the BSIT program, students will receive their BSIT degree. Students may elect to permanently leave the combined pathway and earn only the BSIT degree. Students who elect to leave the combined pathway and earn only the BS degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the 9 credit hours in both the BSIT and MSEM degrees.

For each of the graduate courses counted as credits for both BSIT and MSEM degrees, a minimum grade of "B" is required. Only graduate courses with formal lecture can be counted for both degrees. The students are responsible for confirming the eligibility of each course with their undergraduate advisors.

Students interested in the combined pathway should consult with their undergraduate advisor on their eligibility to the pathway, preferably during their junior year, since appropriate planning of coursework is required in order to achieve the full nine-credit benefit. The student should also meet the MSEM Program Director to learn about the graduate program and available tracks/courses before completing the application form and submitting it to their undergraduate advisor. Final decision for admission to the MSEM program will be made by the University Graduate School upon recommendation by the Engineering Management program director. Applicants will be notified by the Engineering Management Program and the University Graduate School of the decision on their applications.

Combined BS in Interdisciplinary Engineering/MS in Engineering Management (BSIE/MSEM) Degree Pathway

Students who pursue a BS degree and are in their first semester of the senior year in Interdisciplinary

Engineering and have earned at least a 3.2 overall GPA may, upon recommendation from three faculty members, apply to the department to enroll in the combined BSIE/MSEM pathway. Students must also submit an online application to the University Graduate School for admission to the MSEM program. In addition to the admission requirements of the MSEM program, students must meet all the admission requirements of the University Graduate School.

Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships.

Students enrolled in the combined degree pathway could count up to three Management Electives toward their twelve "Engineering Business and Leadership" in the BSIE degree program, for a total saving of 9 credit hours.

ACG 6026	Accounting for Managers
EIN 5359	Industrial Financial Decisions
EIN 6160	Management of Innovation and Technology
EIN 6325	Business Plan Development
FIN 6406	Corporate Finance
FIN 6425	Financial Management Policies
FIN 6487	Financial Risk Management- Financial Engineering
MAN 6167	Leadership in a Global Environment
MAN 6209	Organization Design and Behavior
MAN 6501	Operations Management
MAN 6830	Organization Information Systems
MAR 6805	Marketing Management

The combined BSIE/MSEM pathway has been designed to be a continuous program. During this combined BSIE/MSEM pathway, upon completion of all the requirements of the BSIE program, students will receive their BSIE degree. Students may elect to permanently leave the combined pathway and earn only the BSIE degree. Students who elect to leave the combined pathway and earn only the BS degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the 9 credit hours in both the BSIE and MSEM degrees.

For each of the graduate courses counted as credits for both BSIE and MSEM degrees, a minimum grade of "B" is required. Only graduate courses with formal lecture can be counted for both degrees. The students are responsible for confirming the eligibility of each course with their undergraduate advisors.

Students interested in the combined pathway should consult with their undergraduate advisor on their eligibility to the pathway, preferably during their junior year, since appropriate planning of coursework is required in order to achieve the full nine-credit benefit. The student should also meet the MSEM Program Director to learn about the graduate program and available tracks/courses before completing the application form. Final decision for admission to the MSEM program will be made by the University Graduate School upon recommendation by the Engineering Management program director. Applicants

will be notified by the Engineering Management Program and the University Graduate School of the decision on their applications.

Combined BS in Mechanical Engineering/MS in Engineering Management (BSME/MSEM) Degree Pathway

Students who pursue a BS degree and have completed 75 credits in the undergraduate program of Mechanical Engineering with an overall GPA of 3.2 or higher may, upon recommendation from three faculty members, apply to the department to enroll in the combined BSME/MSEM pathway. Students must also submit an online application to the University Graduate School for admission to the MSEM program. In addition to the admission requirements of the MSEM program, students must meet all the admission requirements of the University Graduate School.

Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships.

Students enrolled in the combined degree pathway could count up to three Mechanical Engineering graduate courses for both the BSME electives and the MSEM electives, for a total saving of 9 credit hours. The following is a list of eligible Mechanical Engineering graduate courses:

EGM 5346	Computational Engineering Analysis
EGM 5354	Finite Element Method Applications in ME
EGM 5615	Synthesis of Engineering Mechanics
EML 5103	Intermediate Thermodynamics
EML 5152	Intermediate Heat Transfer
EML 5505	Smart Machine Design and Development
EML 5509	Optimization Algorithms
EML 5530	Intermediate CAD/CAE
EML 5606C	Advanced Refrigeration and AC Systems
EML 5709	Intermediate Fluid Mechanics

The combined BSME/MSEM pathway has been designed to be a continuous enrollment pathway. During this combined BSME/MSEM pathway, upon completion of all the requirements of the BSME program, students will receive their BSME degree. Students may elect to permanently leave the combined pathway and earn only the BSME degree. Students who elect to leave the combined pathway and earn only the BS degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the 9 credit hours in both the BSME and MSEM degrees.

For each of the graduate courses counted as credits for both BSME and MSEM degrees, a minimum grade of "B" is required. Only graduate courses with formal lecture can be counted for both degrees. The students are

responsible for confirming the eligibility of each course with their undergraduate advisors.

Students interested in the combined pathway should consult with their undergraduate advisor on their eligibility to the pathway. The student should also meet the MSEM Program Director to learn about the graduate program and available tracks/courses before completing the application form and submitting it to their undergraduate advisor. Final decision for admission to the MSEM program will be made by the University Graduate School upon recommendation by the Engineering Management program director. Applicants will be notified by the Engineering Management Program and the University Graduate School of the decision on their applications.

Master of Science in Logistics Engineering

The MS-Logistics Engineering program will include student learning outcomes that address logistics from several complementary perspectives: (1) Students will gain structural technical training dedicated to logistics engineering by teaching contemporary logistics systems, technology, and operations; (2) students will gain the systems engineering tools and techniques that apply to addressing emerging challenges in the industry with respect to design and development of logistics systems and technology; and (3) students will gain deeper knowledge of specific areas in logistics such as warehouse or inventory systems design through selection of elective courses.

Admission Policies

The applicant to the MS program in Logistics Engineering must have a bachelor's degree in industrial engineering, systems engineering, operations research, or a closely related area such as business administration, MIS, SCM, or other engineering disciplines, from an accredited institution with a minimum of "B" average in upper-level undergraduate work, or a graduate degree from an accredited institution.

In addition, International applicants whose native language is not English are required to demonstrate English language proficiency through one of the following:

- 80 on the iBT TOEFL (equivalent to 550 on the paper-based version of the Test of English as a Foreign Language);
- 6.5 overall on the International English Language Testing System (IELTS);
- 53 Pearson Test of English - Academic;
- Cambridge English – Advanced;
- An undergraduate or graduate degree from an accredited institution where the language of instruction is English.

In lieu of the above requirement a student may opt for (a) or (b) below along with an additional method of direct assessment of English language acquisition of an interview or proctored video-taped session

a) Successful completion of University level English courses from an accredited institution (e.g. ENC 1101, ENC 1102 or other equivalent courses with a letter grade of "B" or higher) that prepare applicants to be proficient in English.

OR

b) English Language Institute Level Six:

successful completion with passing grades for all content areas;

Plus one of the following additional methods of assessment:

- i) Interview (in person when possible or via videoconference) with admissions committee.
- ii) Proctored video-taped responses to questions from the admissions committee.

Degree Requirements

The MS program in Logistics Engineering requires 30 credit hours of 10 coursework from three clusters of graduate courses. The first consists of 4 core courses in logistics operations, the second consists of 3 elective courses in systems engineering, and the third consists of 3 elective courses in logistics systems and technology. Additional courses may be considered, subject to approval of the program director.

Logistics Engineering Core Courses: (4 courses, 12 credit hours)

ESI 5010C	Forecasting and Demand Management	3
EIN 5346	Logistics Engineering	3
EIN 5436	Regulatory Compliance in Logistics and Supply Chain Management	3
EIN 6336	Advanced Production Planning and Control	3

Elective Systems Engineering Courses: (3 courses, 9 credit hours)

EIN 5226C	Total Quality Management for Engineers	3
EIN 5332	Quality Engineering	3
EIN 5359	Industrial Financial Decisions	3
ESI 6316	Applications of OR in Manufacturing	3
ESI 6440	Integer Programming	3
ESI 6455	Advanced Engineering Project Management	3
ESI 6470	Stochastic Optimization	3
ESI 6524	Advanced Industrial Systems Simulation	3
ESI 6546	Network Flow Analysis	3
EIN 6133	Enterprise Engineering	3

Elective Logistics Systems and Technology Courses: (3 courses, 9 credit hours)

EGS 5620	Enterprise Systems Configuration	3
EGS 5621	Enterprise Systems Collaboration	3
EGS 5622	Enterprise Systems Integration	3
EGS 5623	Enterprise Systems Optimization	3
EIN 5367	Design of Production Systems	3
ESI 5522	Simulation Models of Engineering Systems	3
EIN 6345	Inventory Control Systems	3
ESI 6324	Advanced in Logistics Technology	3

Master's Project and Thesis Options

Students in the Logistics Engineering graduate program may receive permission to conduct a master's project of three credit hours or a master's thesis of six credit hours within their chosen track to complete the degree program. The master's project (EIN 6971) will replace one graduate elective course. The Master Thesis (EIN 6971) will replace two graduate elective courses.

Grades and Credits

Students are required to maintain a GPA of 3.0. Courses with a grade below “C” will not be counted toward the Master of Science degree in Logistics Engineering.

Transfer Credit

Students may receive permission to transfer up to a maximum of six semester credits provided that:

1. The courses were taken at the graduate level at an accredited college or university;
2. With a grade of ‘B’ or better;
3. The courses were judged relevant by the program director; and
4. The credits will be no older than six years at the time of graduation. No more than 12 semester hours taken at FIU as a non-degree seeking student may be counted toward the Logistics Engineering graduate program.

Time Limit

All works applicable to the Master of Science degree in Logistics Engineering, including transfer credits, must be completed within six years of conferral of the degree.

Graduate Certificate in Engineering Management (GCEM)

This certificate program is designed for practicing engineers and graduate students in all engineering majors, who are interested in acquiring skills for managerial careers in the engineering and technology industries. The GCEM program is especially helpful for those engineers who are seeking to transition into management and wish to acquire the necessary requisite knowledge and skills. More than a sequence of coursework, the certificate program also simulates a business environment where students learn and apply engineering tools, managerial theories, and best practices to design and operate industrial and engineering systems. Students in the program are expected to acquire contemporary engineering management theories and techniques. This certificate program is open to both degree- and non-degree seeking students.

Admission Requirements

A minimum undergraduate GPA of 2.75 is required for admission. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

Certificate Requirements

Students must take at least 5 graduate courses from the list below and receive an average grade of “B” or higher. All the credits earned in this Certificate program with “B” or better may be used in the Master of Science in Engineering Management (MSEM) degree program provided the student is admitted to the MSEM degree program prior to the completion of no more than 12 Graduate Certificate credits. Additional courses may be considered, subject to approval of the program director.

EIN 5226C	Total Quality Management for Engineers	3
EIN 5346	Logistics Engineering	3

EIN 5359	Industrial Financial Decisions	3
EIN 6133	Enterprise Engineering	3
EIN 6160	Management of Innovation and Technology	3
EIN 6336	Advanced Production Planning and Control	3
EIN 6345	Inventory Control Systems	3
EIN 6357	Advanced Engineering Economy	3
ESI 5010C	Forecasting and Demand Management	3
ESI 6455	Advanced Engineering Project Management	3
LAW 5072	Business Law and Intellectual Property for Engineers and Entrepreneurs	3

Graduate Certificate in Enterprise Systems (GCES)

This certificate program is designed for those who are interested in acquiring expertise and skills in the growing discipline of Enterprise Systems (ES). ES software utilizes the computational power with massive data storage and transmission capabilities to support enterprise processes, information flows, reporting, and data analytics within and among complex organizations. Typical Enterprise Systems include Enterprise Resource Planning (ERP), Supply Chain Management (SCM), and Customer Relationship Management (CRM). The software architecture aiming at facilitating the flow of information among all business functions inside the boundaries of the organization and to outside stakeholders. Built on a centralized database and business intelligence, ES aims to consolidate all business operations into a uniform, real-time, and enterprise-wide system environment. This certificate program is open to both degree- and non-degree seeking students.

The Graduate Certificate in Enterprise Systems (GCES) program combines the optimal design of enterprise structures and operations with SAP implementation. The Certificate program consists of five required graduate courses.

Admission Requirements

A minimum undergraduate GPA of 2.75 is required for admission. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

Certificate Requirements

Students must take at least 5 required courses and receive an average grade of “B” or higher. In addition, students who attain “B” or better in at least three courses will also earn a SAP certificate. All the credits earned in this Certificate program may be used in the Master of Science in Engineering Management (MSEM) degree program provided the student is admitted to the MSEM degree program prior to the completion of no more than 12 Graduate Certificate credits. Additional courses may be considered, subject to approval of the program director.

Course Descriptions

Description of Prefixes

EIN-Engineering, General EGS-Engineering Support; EIN-Engineering, Industrial; ESI-Engineering Systems Industrial

F-Fall semester offering; S-Spring semester offering; SS-Summer semester offering.

EGN 5435 Product Modeling (3). Life cycle product data, geometry and form features, product information models and modeling techniques, product modeling systems, and product data standards. Prerequisites: EGN 3124 or equivalent.

EGN 5540 Quality and EH&S Management Systems (3). Design of management control systems for quality, environmental, and occupational health and safety requirements. Principles and process of auditing. Review of related standards. Prerequisite: EIN 5226C.

EGN 5550 Risk Analysis in Business Concept Development for Engineers and Entrepreneurs (3). It integrates assumptions, risk/forecasting with engineering approach to new business development. The course uses exercises, cases and projects to develop practical experience with course theories.

EGN 5644 Commercializing Innovation (3). Product development/process, innovation, commercialization; needs analysis; market segmentation; value proposition; prototyping, packaging and branding; modeling costs and margins; hands-on practice. Prerequisite: Permission of the instructor.

EGN 6436 Manufacturing Process Design (3). Resources modeling, process plan modeling, and planning methodologies for process selection, operations selection, machining parameters selection, setup planning, and inspection planning. Prerequisite: EGN 5842.

EGN 6437 Manufacturing Systems Design (3). System design for production and process planning, resource management, material handling, process control, and quality control. Prerequisite: Permission of the instructor.

EGN 6438 Manufacturing Engineering (3). Manufacturing functions, product and process design, material processing and control, systems design and operations, resource and technology management, and analytical tools for manufacturing. Prerequisites: EIN 3390 or equivalent. (F)

EGN 6940 Graduate Internship - Orthotics and Prosthetics Clinical Rotation (1-6). To provide graduate students with real world clinical experience in Orthotics and Prosthetics, under approved professional supervision. Prerequisite: Permission of the program director.

EGN 6971 Master's Project (1-3). Individual work culminating in a professional practice-oriented report

suitable for the requirements of the Master of Science in Manufacturing Engineering program.

EGS 5620 Enterprise Systems Configuration (3). Enterprise systems overview; major enterprise functions; standard operation procedures; system configuration and parameters; master data; user interfaces and reports; and hands-on experience. Prerequisite: Permission of the instructor.

EGS 5621 Enterprise Systems Collaboration (3). Collaborative engineering and environment; decision processes; changes management; virtual enterprise operation systems; and hands-on experience with a commercial enterprise operation system. Prerequisite: EGS 5622.

EGS 5622 Enterprise Systems Integration (3). Enterprise architectures; work flow modeling and design; systems integration methodology; vertical and horizontal integration; master data analysis and integration; and hands-on experience. Prerequisite: EGS 5620.

EGS 5623 Enterprise Systems Optimization (3). Supply networks overview; interactive supply network planning; optimal systems and process design; optimization techniques and heuristics; master and transaction data transfer; and hands-on experience. Prerequisite: EGS 5622.

EGS 5914 Advanced Research Methods in Engineering and Computing (3). Students will learn to review the literature, develop a research question and hypothesis or objective, design experiments, conduct collaborative research and present results in oral and written form.

EGS 6055 Foundations of Engineering and Computing Teaching and Learning (3). Introduction to learning theory and inclusive, learner-centered, and evidence-based pedagogy and assessment in engineering and computing, using a human-centered design approach to educational design.

EGS 6057 Equity in STEM Education: Research, Policy, and Practice (3). An analysis of diversity and inclusion through research, policy and practice within science, technology, engineering and mathematics (STEM) education for the private and public sectors.

EGS 6080 Essentials of Scientific Proposal Writing (1). This course focuses on scientific proposal writing. Project summary, specific aims, significance, innovation and approaches sections with effective communication and scientific rigor are described. Corequisite: Must be enrolled as a graduate student in a PhD program at FIU.

EIN 5001 Quantitative Foundation for Engineering Managers (3). Topics in operations research, engineering economic analysis and engineering data analysis considered quantitative foundation knowledge for engineering managers.

EIN 5106 Regulatory Aspects of Engineering (3). A survey of the legal and regulatory requirements encountered by engineers. Included will be OSH Act, NIOSH, ADA, EEOC, Worker's Compensation and Product Liability.

EIN 5123 Industrial/Technological Marketing for Engineering (3). Fundamental concepts for industrial

marketing including industrial goods, services, customers, and demands; Industrial procurement and buying behavior; and industrial market segmentation and strategy.

EIN 5226C Total Quality Management for Engineers (3). Study and application of quality management concepts and statistical quality techniques within the framework of continuous improvement methodologies. Prerequisite: EIN 3235 Evaluation of engineering data or equivalent statistics course or permission of instructor (F,S)

EIN 5244 Cognitive Engineering (3). Advanced topics in human factors and cognitive engineering. Theoretical aspects of applied situation awareness and decision making, and applications in a variety of engineering domains. Prerequisite: EIN 4243.

EIN 5249 Occupational Biomechanics (3). Study of the theoretical fundamentals for the mechanics of the body. The link system of the body and kinematic aspects of body movement including applications of biomechanics to work systems. Prerequisites: EIN 4314 Work Design and Industrial Ergonomics or equivalent. (S)

EIN 5256 Usability Engineering (3). The usability aspects of software systems design and testing. The theory of interface design for usability and the methods and techniques for designing and testing technology interfaces. Prerequisite: Permission of Instructor.

EIN 5322 Engineering Management (3). Organization of engineering systems including production and service organizations. Inputs of human skills, capital, technology, and managerial activities to produce useful products and services. (F,S)

EIN 5332 Quality Engineering (3). This course examines quality control from an engineering standpoint. It covers ways to meet the challenge of designing high-quality products and processes at low cost. Prerequisites: EIN 5226C. (S)

EIN 5346 Logistics Engineering (3). Concepts and tools for effective design and management of supply chain systems. Includes logistics strategies, inventory management, customer service, supply chain integration and logistics network design. Prerequisite: Permission of the instructor.

EIN 5359 Industrial Financial Decisions (3). The use of financial techniques and data in planning, controlling and coordinating industrial activities. This course will familiarize the student with accounting concepts and analytical methods. Prerequisite: EGN 3613. (SS)

EIN 5367 Design of Production Systems (3). The design of an industrial enterprise including feasibility, plant layout, equipment specifications, auxiliary services, economics and scheduling. Prerequisite: EIN 3365.

EIN 5436 Regulatory Compliance in Logistics and Supply Chain Management (3). Cargo security compliance; declaration and fiscal compliance; customs warehouse management; transportation regulatory services; industry program support; government solutions and technology solutions. Prerequisites: Senior or Graduate standing.

EIN 5605 Robotic Assembly Cell (3). Concepts of robot manipulation and sensing, part design for robotic assembly, planning manipulator trajectories, machine vision, robot programming language, cell control, and material transfer. Prerequisite: EIN 3600. (S)

EIN 6105 Technology Policies and Strategies (3). Strategies and policies for managing all aspects of technology. Includes value chain integration, intellectual property, and internal processes and systems.

EIN 6117 Advanced Industrial Information Systems (3). Review of the fundamental and theoretical foundation of industrial information systems. Application of the system design process and information system concepts to develop integrated engineering systems. (F,S)

EIN 6131 e-Systems Design (3). The study and application of engineering analysis and design methods for Internet-based systems. The integration of Internet technologies and applications into engineering information systems. Prerequisites: ESI 5602, EIN 6117.

EIN 6132 Collaborative Engineering (3). Product data management, visualization, collaboration, collaborative product commerce, document management, component supplier management, configuration management, enterprise application integration. Prerequisite: Permission of the instructor.

EIN 6133 Enterprise Engineering (3). Enterprise processes and functions, enterprise engineering methodology and techniques, enterprise scalability, systems and vertical integration, systems design and implementation. Prerequisite: Permission of Instructor.

EIN 6160 Management of Innovation and Technology (3). The course provides an integrated view of management of technology. The combination of theory and practice addresses the challenges of globalization, time compression, and technology integration. Prerequisite: Permission of instructor.

EIN 6179C Advanced Total Quality Management for Engineers (3). Advanced concepts in Quality Management including experimental design for scientific management, QFD, Benchmarking, Measurement Systems, regression analysis in quality, and quality loss functions. Prerequisites: EIN 5226C

EIN 6248 Advance Ergonomics (3). Analysis of human factors in the design of engineering systems, with emphasis on the interphase of man-machine-media and human limitations in relation to equipment design and work environments. Prerequisites: EIN 4314, EIN 4243, and PCB 3702 or equivalent. (F)

EIN 6258 Ergonomic Design of Aerospace Systems (3). Application of ergonomic criteria in design of civil and military aircraft cockpits and control systems. Ergonomic consideration in design of outer space vehicles, stations, and systems. Prerequisite: EIN 6248.

EIN 6319 Advanced Work Design (3). Study of the various human physiologic systems and their responses as it relates to occupational work including endurance, fatigue, recovery, and energy cost of work. Prerequisite: EIN 6248. (S)

EIN 6324 Technology Entrepreneurship (3). Entrepreneurial process, evaluation of technology, startup

operations and strategy, business plans and venture capital, intellectual property and rights, growth and technology management.

EIN 6155 Business Plan Development (3). This course deals with the critical decisions and action steps that entrepreneurs must make in both planning and executing a new venture. It also covers how to develop an effective written plan. Prerequisite: Permission of advisor.

EIN 6327 Entrepreneurship and New Venture Initiation (3). It covers critical factors of initiating new ventures: entrepreneurial networks, venture creation, strategies, evaluation, financing, legal considerations, market strategies, and feasibility analysis.

EIN 6329 Advanced Engineering Business Plan Development (3). This course takes students through the process of writing a plan for a new business venture through to implementation. Heavy emphasis placed on research and case analysis. Prerequisites: EIN 6324 or MAN 6805.

EIN 6336 Advanced Production Planning and Control (3). Analytical and algorithmic planning methodologies, planning and scheduling technologies, sequencing rules, control strategies, and line balancing methods. Prerequisite: EIN 4334.

EIN 6345 Inventory Control Systems (3). Design of non-traditional inventory control systems. Development of several inventory system models. Exploration of methods of collecting appropriate demand and cost data for effective systems analysis. Prerequisite: ESI 3314.

EIN 6357 Advanced Engineering Economy (3). Review of engineering economy and the evaluation of advanced manufacturing systems. Evaluation of alternative capital investments considering income taxes, depreciation, inflation, risk and uncertainty. Prerequisite: EGN 3613. (SS)

EIN 6392 Product Design for Manufacturability and Automation (3). Overview and integration of the design-material-manufacture process. Design considerations for manufacturability, assembly, and economical production. Concurrent engineering systems. Prerequisite: EIN 4395. (S)

EIN 6393 Design and Implementation of Discrete Manufacturing Systems (3). Methodology and techniques for design, planning and implementation of discrete production systems including process/machine selections, material handling and inspection technologies, cell control, etc. Prerequisites: Graduate or seniors with EIN 3365, EIN 3390, and ESI 3523 or equivalent.

EIN 6397 Advanced Topics in Manufacturing Automation (3). Overview of manufacturing systems; evolution of controls and AI, material handling, automation clamps, jigs, and fixtures, cutting sensors, machine vision and autonomous manufacturing. Prerequisites: EIN 6392 and EIN 6398.

EIN 6398 Advanced Manufacturing Process Engineering (3). Non-traditional manufacturing processes. Tool selection, jig and fixture design, material handling, tolerance and dimensioning. Product assembly engineering economics, and manufacturing process planning. Prerequisite: EIN 3390. (F)

EIN 6603 Applied AI/Expert Systems in Industrial Engineering (3). Application of artificial intelligence and expert systems as engineering tools. Exploring the use of PCs and symbolic machine with various AI/Expert Systems software. Several projects are required. Prerequisite: CAP 5680.

EIN 6606 Robotic Systems (3). Basic robotic system principles, functional requirements of robotic systems, simulation of system preliminary design, and physical experimentation of robotic systems.

EIN 6908 Independent Study (1-3). Individual supervised study by a faculty. A study plan and a final report are work required. Prerequisite: Departmental approval.

EIN 6910 Supervised Research (1-9). Advanced research credits under the supervision of the dissertation advisor.

EIN 6916 Master's Project (1-3). Individual work culminating in a professional practice-oriented report suitable for the requirements of the MSEM degree project option. Only three credits are applicable towards the degree. Prerequisite: Departmental approval.

EIN 6932 Graduate Seminar (0). An examination of recent technical findings in selected areas of concern. Emphasis is placed on presentations (oral and written), research activities, readings and discussions among participants. (F,S)

EIN 6936 Design of Industrial Engineering Systems (3). Overview of systems theories. Systems design process including: Problem definition, analysis, generation of alternatives, systems evaluation, selection of preferred system, and implementation. Prerequisites: EIN 6345, ESI 6316, and ESI 6524.

EIN 6940 Industrial and Systems Engineering Internship (1-3). To provide graduate students with work experience under approved industrial supervision. Prerequisite: Departmental approval.

EIN 6950 Engineering Management Masters Project (1-3). Individual work culminating in a professional practice-oriented report suitable for the requirements of the Master of Science in Engineering Management program. Prerequisite: Departmental approval.

EIN 6971 Master's Thesis (1-3). The students following the thesis option should work on his/her thesis through this course. (F,S,SS)

EIN 7980 Ph.D. Dissertation (1-12). Doctoral research leading to Ph.D. dissertation in Industrial and Systems Engineering. Prerequisites: Doctoral Candidacy and permission of Graduate Director.

ESI 5010C Forecasting and Demand Management (3). Forecasting overview. Times series methods. Regression methods. Advanced forecasting models. Demand planning. Pricing and revenue optimization with capacity constraints. Case studies. Prerequisite: Permission of the instructor.

ESI 5456 Productivity Management in the Global Organization (3). Analysis of productivity management strategies. Major issues in performance and productivity management, domestic and global outsourcing, international labor standards and trade policies. Prerequisites: EIN 4214 or equivalent.

ESI 5522 Simulation Models of Engineering Systems (3). Simulation Methodology; design and implementation of models of engineering systems using computer software; case studies. Prerequisite: STA 3033 or EIN 3235 or equivalent and COP 3175 or equivalent.

ESI 5602 Engineering Data Representation and Modeling (3). The course will cover the life cycle of designing, developing, and implementing engineering database systems by applying the IDEFx methodology. Prerequisite: Permission of Instructor.

ESI 5603 Advanced Software Tools for ISE (3). Algorithms and principles to integrate heterogeneous tools. Principles of XML, ASP, and other tools. Development of programming projects.

ESI 6316 Applications of OR in Manufacturing (3). Overview of OR techniques. Manufacturing system and product selection. Shop loading, resource allocation, production scheduling, job sequencing, and plant layout problems. System performance evaluation. Prerequisite: ESI 3314. (F)

ESI 6319 Operations Research and Information Technology (3). Principles and paradigms for the design and implementation of OR models, which may be integrated into an organization's existing information system and technologies. Prerequisite: ESI 6316.

ESI 6324 Advances in Logistics Technology (3). Emerging logistics technology in financial transactions, communications, and material handling, scanning, tracking, monitoring, production, transportation, warehousing and distribution. Prerequisites: Permission of the instructor.

ESI 6440 Integer Programming (3). Formulating and solving decision-making problems with discrete decision variables. Methods to solve large-scale integer/mixed-integer models. Prerequisite: ESI 6316.

ESI 6455 Advanced Engineering Project Management (3). This course covers entire phases of project management including selection, planning, budgeting, scheduling, monitoring, and control. It focuses on the management of engineering projects through case studies and independent research assignment. Prerequisite: Permission of the instructor. (S,SS)

ESI 6460 Methods for Algorithm Development for Industrial Engineering Applications (3). Methods for algorithm development for Industrial Engineering applications, with emphasis on powerful optimization techniques and analysis tools. Prerequisites: ESI 3314 or permission of instructor.

ESI 6470 Stochastic Optimization (3). Formulating and solving decision-making models with uncertain data. Exact and approximation techniques for large-scale stochastic models. Prerequisite: ESI 6316.

ESI 6524 Advanced Industrial Systems Simulation (3). Advanced simulation techniques with a focus on practical systems modeling using several user-oriented simulation languages. Projects involving design of high-performance simulation programs are required. Prerequisite: ESI 5522 or equivalent. (S)

ESI 6528 Advanced Topics in Simulation Modeling (3). An examination of the role of artificial intelligence, object

oriented programming, and databases as enabling technologies in the simulation modeling process. Review of the literature and case studies. Prerequisites: ESI 6524 or equivalent.

ESI 6546 Network Flow Analysis (3). Deterministic and stochastic network flow analysis; minimal cost flow, shortest route, max-flow, and out-of-kilter algorithms; constrained network analysis; and stochastic queuing networks. Prerequisite: ESI 3314.

ESI 6547 Stochastic Models of Industrial Systems (3). Applications of models from gaming, decisions analysis, queuing, inventory and scheduling to assess the performance level of industrial systems operating under random conditions. Prerequisite: ESI 6316.

ESI 6601 Data Warehousing and Mining (3). Knowledge discovery for effective design of data storage. Discussion of the difficulties associated with data warehousing and mining. Literature review and case studies.

Research, Development and Training Centers

Advanced Materials Engineering Research Institute (AMERI)

Arvind Agarwal, *Distinguished Professor, Chairperson and Director Mechanical and Materials Engineering*

The Advanced Materials Engineering Research Institute provides an open access equipment infrastructure to support materials research and engineering over a broad range of technology and capabilities. The Institute provides analytical instrumentation, materials characterization, and process development laboratories to support faculty and industry in the development and characterization of new materials over the continuum from the nanoscale to bulk materials.

The Analytical Instrumentation Laboratory contains two field emission scanning electron microscope (FESEM), a 200 keV Transmission Electron Microscope (TEM), Focused Ion Beam (FIB), Atomic Force Microscope (AFM), X-ray diffraction, thermal (DSC, TGA, DMA, dilatometer flush diffusion, and mechanical testing (uniaxial/biaxial Instron). Process Development laboratories for ceramic processing (sol-gel, tape casting, milling), and thermal processing (air, vacuum, hydrogen, controlled atmosphere furnaces) are available to support faculty and student researchers.

The Institute consists of the **Motorola Nanofabrication Facility** which is supported by a class 100 clean room and nanofabrication capabilities including e-beam lithography and optical photolithography. Fabrication of nano/micro electromechanical systems (N/MENS) can be accomplished by a combination of nanolithography, focused ion beam (FIB) micro machining, nano imprinting, reactive ion etching, and thin film deposition by a variety of techniques (e-beam, sputtering, filament evaporation, cvd).

In addition to supporting research within the graduate program in materials science within the Department of Mechanical and Materials Engineering, the Institute supports faculty across all departments (physics, chemistry, geology, biology, electrical and computer

engineering and biomedical engineering) in materials based research.

Research and Support Staff

Arvind Agarwal, *Distinguished, Professor, Chairperson and Director, Mechanical and Materials Engineering*

Chunlei (Peggy) Wang, *Professor and Dissertation Advisor Mechanical and Materials Engineering*

Benjamin Boesl, *Associate Professor, Assistant Director, Graduate Faculty and Dissertation Advisor, Mechanical and Materials Engineering*

Zhe Cheng, *Dissertation Advisor and Graduate Faculty, Mechanical and Materials Engineering*

Jiuhua Chen, *Dissertation Advisor and Graduate Faculty, Mechanical and Materials Engineering*

Alexander Franco, *Research Faculty and Electron Microscopy Specialist*

Jin He, *Associate Professor, Physics*

W. Kinzy Jones, *Professor Emeritus, Mechanical and Materials Engineering*

Wenzhi Li, *Professor, Physics*

Norman Munroe, *Professor and Dissertation Advisor, Mechanical and Materials Engineering*

Daniela Radu, *Associate Professor, Director NASA-CRE2DO, Dissertation Advisor and Graduate Faculty, Mechanical and Materials Engineering*

P.M. Raj, *Associate Professor, Dissertation Advisor and Graduate Faculty, Biomedical Engineering*

Surendra Saxena, *Professor Emeritus, Mechanical and Materials Engineering*

Shekhar Bhansali, *Professor and Chairperson, Electrical and Computer Engineering*

Sakhrat Khizroev, *Courtesy Professor, Electrical and Computer Engineering and College of Medicine*

Nezih Pala, *Associate Professor, Dissertation Advisor and Graduate Faculty Electrical and Computer Engineering*

Patrick Roman, *AMERI Manager*

Applied Research Center (ARC)

Ines R. Triay, Ph.D. *Center Director*

Leonel Lagos, Ph.D., PMP *Director of Research and Workforce Development*

Dwayne McDaniel, Ph.D., *Principal Scientist*

David Roelant, Ph.D. *Principal Scientist, Leads FIU Interdisciplinary Nuclear Research Program*

Himanshu Upadhyay, Ph.D., *Principal Scientist*

Gloria Dingeldein, *Associate Director of Administrative Services*

ARC's **mission** is to be the leading international university-based research institution providing value-driven, real-world solutions, which will enable Florida International University to acquire, manage, and execute educationally relevant and economically sound research programs.

ARC's **vision** is to lead, integrate, and deliver multidisciplinary research and development solutions in environment, energy, and information technology to meet customer commitments on time and at cost. In carrying out this mission, the ARC is committed to providing training opportunities to the University's uniquely diverse student

body under the mentorship of the Center's internationally recognized engineers and scientists.

Environment & Energy – ARC has been performing research and technology development for the environmental cleanup of the U.S. Department of Energy (DOE) nuclear weapons complex sites since 1995. ARC engineers, scientists and students apply specialized knowledge and skills in state-of-the-art research facilities to understand the underlying science and develop and deploy technology solutions to complex environmental challenges while training the environmental workforce of tomorrow. For energy research, ARC collaborates with FIU's College of Arts, Sciences, and Education to develop R&D and support the growth of: the radiochemistry and health physics academic programs; and the FIU Nuclear Scholars and Nuclear Fellows programs for students.

Green & Sustainable Technologies: ARC is researching ways to improve technologies to use less electric energy and natural resources in production and in operations while reducing waste and pollution. ARC is developing green buildings by improving technologies for heating and cooling buildings, a major source of energy usage in buildings. Improvements in heating, cooling and ventilation (HVAC) is one area of research. Another area is sustainable remediation which seeks to lower the greenhouse gas footprint of operations while also reducing electrical energy use and other resources.

Soil & Groundwater Remediation: Increasing concentrations of heavy metals and radionuclides in the global environment require a focus on contaminant fate, transport, and persistence in soils and groundwater. ARC carries out research and development of applications with a focus on soil and groundwater remediation. For the last twenty years ARC has developed programs and trained outstanding engineers and scientists to conduct advanced and applied research in areas that are vital to national and international needs in the areas of environmental engineering and soil and groundwater remediation. ARC's projects incorporate biogeochemical cycling, fate and transport of contaminants, and water and wastewater treatment. Researchers use data for testing, evaluation, and validation for new and innovative technologies to support DOE and industry.

Water Resources: ARC's water resources research is established to address key issues in hydrology at local and regional scales, primarily through the development and implementation of state-of-the-art integrated, data assimilating hydrological/transport models. The aim is to create hydrological models that are scalable to the regional, national and global extents which serve as effective tools for water resources management and monitoring.

Geographic Information Systems: Geographic information systems (GIS) technology is an integral part of many of ARC's research and development activities as an analysis tool, its application spanning various areas of applied research including water resources management; soil and groundwater remediation; environmental assessment; nutrient, chemical and radioactive contaminant fate and transport; assessment of renewable energy resources; assessment and impacts of land use change; and climate change analysis. ARC researchers have extensive experience utilizing GIS for mapping and geospatial analysis; geodatabase development; integrated surface and groundwater modeling; air dispersion modeling; storm water modeling; geospatial data and

metadata development; web-based and mobile application development; conversion of computer-aided design and drafting (CADD) data; and development of waste information management systems applications.

Radiochemistry and Nuclear Power: Nuclear research and education was launched in 1990 at FIU. FIU developed a radiochemistry PhD track which launched in Aug. 2015 and a health physics specialty under the BS in Physics launched in Aug. 2016. Over this period, many new faculty, staff and students have engaged in nuclear related R&D. Presently over 110 faculty and staff and 75 students are active in nuclear research.

Deactivation & Decommissioning: ARC has over 20 years of experience in performing research in the area of D&D of nuclear facilities, having participated in over 300 projects since 1995 in support of the DOE's Office of Environmental Management (DOE EM). As part of this support, ARC has evaluated baseline and innovative technologies for D&D applications; to date, over 150 technologies have been assessed at ARC's facilities in Miami, at DOE sites, and at technology vendors' facilities.

Cyber Security & Data Science

ARC performs applied and advanced research in the areas of enterprise systems, cyber security and data science. The solutions are tailored to deliver critical information to federal, state, and local governments and private sector clients, keeping them well informed, connected and secure. ARC shares the commitment and responsibility to securing information and information networks with integration of people, operations, and technology.

Data Science: ARC performs extensive research in the area of data science to provide analytical solutions in the area of nuclear and cybersecurity to federal / state governments and national research laboratories. Current research is focused on machine learning, data analytics and visualization.

Cyber Security: ARC performs sponsored research in the areas of cyberspace architecture and framework, virtualization, memory forensics, ethical hacking and cyber analytics to support the Department of Defense (DOD) – Test Resource Management Center (TRMC) and the Department of Energy (DOE) – Office of Environmental Management. Cyber research allows for the training of FIU STEM (science, technology, engineering, and math) undergraduate and graduate students with diverse technical background through the Cyber Fellows (Cyberspace Work Force Development) program. ARC also participates as an active member of the core team of *Cybersecurity@FIU*, which has been designated by FIU as an emerging preeminent program with high potential to demonstrate extraordinary success in providing unique learning opportunities, pioneering research and engagement while expanding FIU's financial base.

Enterprise Solutions: ARC has extensive experience in building custom enterprise systems in the areas of waste management, knowledge management, database management, content management and mobile systems, using the latest technologies for various clients like DOE-EM and DOD-TRMC.

Aerospace & Defense

At ARC, both applied and basic research are being conducted in areas of mechanical and materials engineering that provide support and solutions to a number of industries including aerospace and defense. Some of the fundamental efforts that include

computational mechanics and composites can impact other disciplines as well, including energy, biomedical, marine and nuclear.

Robotics: Advancement in computer, material and design technologies has provided an avenue for robotic systems to be utilized in a number of engineering applications that includes manufacturing, inspection, and even simple household functions. At ARC, robotic systems are being developed to provide a means to inspect areas that may be difficult to obtain access to or unsafe for people to enter. These tools are being designed with sensor systems that can provide valuable information including the health of structures or the status of the area's environment.

Composites: Use of composite materials continues to increase in today's engineering applications due to improved strength to weight ratios, its resistance to corrosion and the reductions in repair and maintenance costs. ARC engineers have focused research efforts on understanding how composite structures can be joined using adhesive bonding. In particular, ARC is investigating quality control procedures for bonding, the durability of the bonds and how contamination may affect bonds.

Computational Mechanics: Advances in simulation software will improve the ability for engineers to effectively simulate engineering processes without having to develop and test systems with costly experimental facilities. Engineers at ARC utilize finite element analysis to aid in the design of complex structures, and computational fluid dynamics software to assist in addressing complex challenges related to simulating fluid flow processes that further expand the capability of the simulation software. Some issues currently being addressed include modeling of mixing processes of multi-phase flows and using reduced-order models to efficiently capture the salient features of the flow.

Workforce Development and Training – The DOE-FIU Science and Technology Workforce Development program is an innovative program to create a “pipeline” of FIU STEM underrepresented students specifically trained and mentored to enter the DOE workforce in technical areas of need. The main objective of the program is to provide a unique integration of FIU course work, DOE field work, and “hands on” training and mentoring at ARC. It is envisioned that once the DOE Fellows graduate from this program they will enter DOE-EM's Professional Development Corps Program and/or work for DOE's contractor firms. To date, over 153 FIU underrepresented students have joined the program. The students are officially inducted into the program and vested with the name of DOE Fellows in a special induction ceremony celebrated during the fall semester. DOE Fellows also have internship opportunities at DOE national research laboratories and DOE sites around the country. Since the program's initiation in 2007, DOE Fellows have participated in over 136 research internships at locations such as Oak Ridge National Laboratory, Idaho National Laboratory, Pacific Northwest National Laboratory, and DOE-HQ in Washington DC. In addition, DOE Fellows directly support DOE contractors performing environmental remediation around the DOE Complex. DOE Fellows have presented over 210 technical research posters and oral talks at the Waste Management Symposia and other national/international conferences. Furthermore, this program enables undergraduate

students to pursue M.S. and Ph.D. degrees by providing research assistantships.

ARC has also developed a Cyberspace Workforce Development Program as part of our support to the DOD to perform cyberspace technology research. This program trains FIU STEM undergraduate and graduate students with diverse technical backgrounds to develop and integrate new cyberspace systems for DOD test applications. The Cyberspace Workforce Development Program actively recruits top minority and underrepresented students at FIU to perform research, attend summer internships, and apply for job opportunities at DOD.

ARC is committed to the education and development of FIU students and has developed a Student Steering Committee (SSC) that oversees the academic and research progress of each student. This committee also conducts interviews and evaluates applicants for the workforce development program.

Doing Business with the Applied Research Center –

ARC's employees are drawn from a wide segment of the commercial, government, and academic arenas to collectively utilize their experience and expertise to support the needs of FIU's clients. ARC's operating philosophy recognizes and accommodates the critical performance characteristics of government and commercial activities, while exercising the benefit of its cost structure in a way that serves both client interests and those of the University and its students. Our staff is fully engaged in the project and program activities assigned. The critical difference in the ARC's structure is the project management and administrative processes and structures that have been put in place to serve its clients. The Center has executed work for federal agencies, state and local governments, and commercial entities. For more information on FIU's ARC, please visit www.arc.fiu.edu or call (305) 348-4238.

Bioinformatics Research Center (BioRG)

Giri Narasimhan, *Director and Professor, School of Computing and Information Sciences*

The mission of this research group is to work on problems from the fields of Bioinformatics and Biotechnology. The group's research projects includes Pattern Discovery in sequences and structures, micro-array data analysis, primer design, probe design, phylogenetic analysis, image processing, image analysis, and more. The group builds on tools and techniques from Algorithms, Data Mining, Computational Statistics, Neural Networks, and Image Processing.

Center for Advanced Technology and Education (CATE)

Malek Adjouadi, *Professor and Dissertation Advisor
Director and Electrical and Computer Engineering*

Mission

The mission of the NSF-funded CATE center at FIU is to foster cross-disciplinary research as a catalyst for our students to train and develop their creative thinking by bringing in synergy the fields of image and signal processing with application to neuroscience and assistive technology research. In the merging of these technologies, we see a productive ground for the development of new

methodologies and designs that (1) meet the impending needs in neuroscience as we elicit both the functional mapping of the brain, and the causality of key brain disorders; and (2) design assistive technology tools that address effectively the issue of "Universal Accessibility", focusing on visual impairment and motor disability. The premise is to translate new theoretical findings into the realm of real-world applicability.

Major Research Themes

- Image and signal processing
- Neuroimaging
- Machine learning
- Brain Mapping
- Informatics and big data
- Web interfaces
- Brain Stimulation for Therapeutic/Curative interventions

Major Activities of the CATE Center

Establish a research platform image processing, machine learning and the cohesive study of the human brain, with a focus on epilepsy and Alzheimer's disease, by bringing together several hospitals and academic institutions in a consortium that will consolidate multi-site collaborative studies with a large number of patients in accordance to standardized protocols with the following objectives:

- Create an environment that supports cross-disciplinary initiatives, joint collaborations and programs with access to modern equipment and computing facilities of unprecedented sophistication and integration.
- Extend the scientific reach of these interdisciplinary efforts to overcome the primary barriers in identifying the different factors that influence the functional organization of the brain, as new paradigms and new findings will come to benefit the scientific community as a whole, and to provide critical help to hundreds of patients yearly.
- Provide a consolidated infrastructure for image processing, neuroimaging and machine learn that will come in support of a new cohort of Ph.D. students and to a well-trained and skilled workforce able to bridge engineering and computing know-how to the fields of medicine and the biosciences.

Faculty and Co-Principal Investigators

Mercedes Cabrerizo, *Associate Professor, CATE Co-Director for the epilepsy program, Electrical and Computer Engineering*

Armando Barreto, *Professor, Director of the Digital Signal Processing Lab, Electrical and Computer Engineering*

Angela R Laird, *Professor, Director of the Director, Center for Imaging Science, Physics.*

Naphtali D Rishe, *Eminent Scholar and Professor, School of Computing and Information Sciences. Director of the High Performance Database Research Center at FIU (HPDRC) and of the NSF Industry-University Cooperative Research Ctr. for Adv. Knowledge Enablement (I/UCRC)*

Raul Gonzalez, *Professor, Psychology, Center for Children and Families. director of the Substance Use and HIV Neuropsychology Lab.*

Joseph S. Raiker, *Associate Professor, Psychology,*

Director, Program for Attention, Learning, and Memory
Shanna L. Burke, Assistant Professor, School of Social Work

Laboratory and Infrastructure Manager

Niovi Rojas, Research Specialist and Manager of the Computational Infrastructure

Consultants

Ranjan Duara, Medical Director, Wien Center for Alzheimer's Disease and Memory Disorders, Mount Sinai Medical Center

David Loewenstein, Director of the Center for Cognitive Neuroscience and Aging and Professor of Psychiatry and Behavioral Sciences, University Miami Miller Med School.

Prasanna Jayakar, Founding Chair, Brain Institute, Nicklaus Children Hospital

William D. Gaillard, Children's National Medical Center, George Washington Univ., and Georgetown Univ. Director of the Comprehensive Pediatric Epilepsy Program and the Associate Director of the Children's Research Institute's Center for Neuroscience Research at CNMC

Ilker Yaylali, Associate Professor, Neurology, Oregon Health and Science University.

Alberto Pinzon, Director, Epilepsy Program at Baptist Hospital

Sarah Hug, Program Evaluator, Director at Colorado Evaluation & Research Consulting, Boulder, Colorado.

Center for Diversity and Student Success in Engineering and Computing (CD-SSEC)

Andres Tremante, Director and University Instructor, Mechanical & Materials Engineering

Andrew Green, Associate Director

Francisco Fins, Program Director, ENLACE

Julieta Vallejos, Program Coordinator

Kristian Coscolluela, Program Assistant, ENLACE

South Florida's distinction as a multi-cultured, multi-lingual region has long been a diverse source of talent for FIU, particularly in the College of Engineering and Computing. In response to the challenge of attracting this diverse community to science and engineering, the College of Engineering and Computing has created a special center for Diversity in Engineering and Computing.

The mission of the Center for Diversity and Student Success in Engineering and Computing (CD-SSEC) is to provide prospective and current students of the college with opportunities and services that will enhance their academic experiences and increase their rate of success in the school and their future careers. The Center will support the college through recruitment, retention and enrichment programs, such as mentorship and peer-to-peer tutoring, undergraduate research opportunities, dual enrollment, and pre-college outreach activities. Currently the Center is actively engaged in a number of special programs as a service to the community and the University:

Florida Action for Minorities in Engineering (FLAME) This is a cooperative program between Miami Coral Park Senior High School and Florida International

University aimed at introducing the profession of engineering to high school students, and to identify, select, enroll, and retain minority students in the engineering field. High School students participate in their senior year, and also register for dual enrollment classes at FIU.

Florida/Georgia Louis Stokes Alliance for Minority Participation (FGLSAMP) This is a National Science Foundation funded program in association with Florida Agricultural and Mechanical University (FAMU), the leading institution. This program focuses on engineering, math chemistry, biology, physics, and computer science undergraduate students. Participants receive scholarships, during the entire academic year based on high GPA and being a full time student. Opportunities for summer internships are available.

ENLACE/MIAMI The Children Trust This program is funded by The Children Trust and provide after school and summer programs for 650 children (ages 7-17) residing in the Sweetwater, Doral and West Kendall areas. The after school program will offer literacy support through individualized software-based increasing intervention, social skills development, and health fitness education. The summer program will offer students the unique opportunity to attend classes on a university campus.

Opportunities for Undergraduate Research and Scholarship (OURS) Coordinated and overseen by the Center for Diversity and Student Success within the College of Engineering and Computing, the Opportunities for Undergraduate Research and Scholarship (OURS) program serves as the umbrella organization for all undergraduate research within the college. OURS' mission is to foster a culture of research excellence within the College of Engineering and Computing that is committed to promoting opportunities for all students, especially those from underrepresented populations and disadvantaged backgrounds. A tiered program model with financial incentives encourages curriculum-related work opportunities and greatly reduces the need for students to find off campus jobs that do not align with their long-term career goals.

Engineers on Wheels (EOW) The Engineers on Wheels program is an initiative which brings FIU engineering students to South Florida K-12 schools. EOW provides students with hands-on activities and engineering experiments while exposing them to career opportunities in STEM (science, technology, engineering and math). The program features grade-appropriate, interactive lessons and presentations led by FIU students and overseen by FIU faculty. Subjects include mechanical and materials engineering, computer science and information technology, biomedical engineering, civil and environmental engineering, construction and engineering management, and electrical and computer engineering.

Engineering Expo In its 20th year, the Engineering Expo is the college's premiere community outreach event. In 2020, the college welcomed more than 1,606 K-12 students from Miami-Dade and Broward County schools (elementary, middle, and high schools) to the FIU Engineering Center to engage FIU student organizations, researchers, and staff, and to discover the endless possibilities of pursuing a degree in engineering or computer science. In 2020, 25 labs and 24 student organizations represented each major within the college, and provided K-12 students with tours, demonstrations, and hands-on activities.

Center for the Study of Matters at Extreme Conditions (CeSMEC)

Jiuhua Chen, *Director and Professor, Mechanical and Materials Engineering*

Zhe Cheng, *Associate Professor, Mechanical and Materials Engineering*

Vadym Drozd, *Research Assistant Professor*
Andriy Durygin, *Research Engineer*

Chunlei (Peggy) Wang, *Professor, Mechanical and Materials Engineering*

Mission: The Center for the Study of Matter at Extreme Condition is a multidisciplinary center that integrates physics, chemistry, geosciences with materials engineering. The center is committed to facilitation of fundamental research through convergence related to materials properties at extreme environments, *i.e.* high temperature (thousands of degrees) and high pressure (millions of atmospheres), and to delivery of quality research and education.

All materials are subject to three fundamental variables – chemical composition, temperature and pressure, which alter all states of matter. CeSMEC offers experimental infrastructure enabling research and education of materials by tuning the variables separately or simultaneously. Materials are studied under such conditions with x-ray, spectroscopy as well as different processing techniques.

Areas of research at CeSMEC include, minerals, superhard materials, electronic materials, ceramics, energy storage materials, metals/alloys, etc.

Distributed Multimedia Information Systems Laboratory (DMIS)

Shu-Ching Chen, *Director and Professor, School of Computing and Information Sciences*

The mission of the Distributed Multimedia Information System Laboratory (DMIS) is to conduct leading edge research in multimedia database systems, data mining, networking and wireless, GIS and Intelligent Transportation Systems. Other research areas of this effort include Multimedia Communications and Networking, Digital Library, 3D Animation, and Distributed Computing.

Division of External Programs (DEP)

Natalie Nunez, *Program Director*

Kang K. Yen, *Director of International Programs, Business Development and Professor of Electrical and Computer Engineering*

Khokiat Kengskool, *Director of International Programs, Southeast Asia and Professor of Practice, Civil and Environmental Engineering*

The **Division of External Programs (DEP)** develops, promotes and manages academic programs offered under the rubric of international programs, professional graduate programs, and continuing education all within the **College of Engineering and Computing**.

The program director and staff of DEP work with department chairs and faculty members to identify global partners and institutions interested in providing their

undergraduate and/or graduate students an opportunity to complete their studies at FIU; manage continuing education courses that are taught by experts in their respective fields; develop, promote and manage professional graduate programs; as well as identify any new markets or opportunities that contribute to the overall credit and non-credit enrollment for the College of Engineering and Computing.

International Programs

The international dual-degree program allows undergraduate students from foreign universities to complete approximately 75% of their curriculum at their home institution and the remaining 25% at FIU and receive their undergraduate degree from both institutions. All participants in the program proceed as a cohort through a lock-step curriculum of the selected courses. The local faculty from the host country is also involved in teaching to enrich the program by integrating the economic, cultural, social, political and legal issues of the host country in the curriculum.

Graduates from international partner universities interested in pursuing a graduate degree from FIU may apply to the graduate pipeline program. Students complete anywhere between 30 – 36 credit hours (depending on the program) and upon completion of the degree requirements, receive a master's degree from FIU.

The overseas programs focus on the demonstrated educational needs of selected industrial sector(s) in the host country. These programs are offered in collaboration with a sponsor which is a reputed university or institution that can support the delivery of the program by providing appropriate infrastructure facilities like classrooms, library and computer laboratories. The programs are designed in consultation with the faculty of the sponsor and the industry representatives in the host country. The goal of the overseas programs is to complement the existing academic programs offered by the sponsoring institution.

Continuing Education Courses

Our continuing education courses are designed to meet the licensing and certification needs of individual professionals in the engineering and construction fields. The programs are delivered on-campus and/or at corporate sites. Currently, the College offers the following courses and programs: "Lean Six Sigma", "Six Sigma Green Belt", "Six Sigma Black Belt", "Supply Chain Management", and "Florida General Contractor's Exam (GC) Review Course".

Professional Graduate Programs

DEP offers professionals the ability to complete their master's degrees in the fields of Engineering and Computing. Our programs are offered online and in-person. Our programs are specifically designed for working professionals who aspire to a graduate degree without interrupting their careers.

Engineering Information Center (EIC)

Steven Luis, *Executive Director*

Create a technology that will help save lives or create your own website, simulate an electronic circuit, design a bridge, or just browse the Internet. The possibilities are endless at Engineering Information Center.

EIC helps faculty, scientists, researchers, and students to conduct cutting edge research and work on system

designs, networking, scientific visualization, 3D Modeling, simulations, virtual reality, computer animation, and other computer and software applications.

The Center manages an array of Novell, Windows, and UNIX network servers that provide faculty, staff and students with the capacity to share valuable resources; therefore, fostering an atmosphere where collaboration and instruction grow with a synergy that is unique. Beyond the college community, EIC participates in sponsoring special outreach programs for the Miami-Dade County Public Schools by exposing young minds to latest technologies.

EIC is also home to The Graphic Simulation Laboratory with focus on Scientific Visualization, 3D Computer Modeling, and Virtual Reality, which have helped researchers to develop a wide array of technologies, strategies, and information designs. GSL has collaborated with NASA, The Center for Super Computing Applications, National Science Foundation, Computational Science Institute, Shodor Organization, Macromedia, and Kellogg Foundation, just to mention a few. From hardware to software support to 3D modeling of a heart valve, EIC delivers exceptional services with a personal touch.

Engineering Manufacturing Center (EMC)

Ibrahim Tansel, *Director and Professor, Mechanical and Materials Engineering*

Mario Sanchez, *Senior Engineer and Manager*

Richard Zicarelli, *Senior Engineer II and Coordinator*

The Engineering Manufacturing Center provides technical expertise in manufacturing to anyone in need of assistance. Typically the Center supports researchers, graduate and undergraduate students with projects requiring high-precision quality fabrication and requiring expert technical guidance. Undergraduate engineering students represent the largest group served. Students of all academic departments benefit directly through help with class projects, such as Senior Design (capstone) courses, critical components of all ABET accredited Engineering programs in the College. Other major undergraduate projects supported include the Mini-Baja, Mini-Submarine and Robot Competitions. Graduate students regularly request fabrication assistance with experimental devices, tools and fixtures. The Center's main facility supports the College's academic departments' general fabrication needs, including equipment repair, assembly, fixturing, installation, etc. An auxiliary EMC-supervised machine shop is available for student hands-on project work.

The Center also provides technical services to the outside community such as entrepreneurial consulting in product design and development and sub-contract fabrication work. Companies served by the EMC range from entrepreneurial to the well-established, some of which include aerospace, automotive, marine, medical and consumer product manufacturers. The Center runs state-of-the-art CAD/CAM software and operates a diverse array of rapid prototyping equipment combined with CNC capabilities providing a wide variety of fabrication processes. In addition, the Center can perform inspection, measurement and reverse engineering capabilities through its automated measurement equipment.

For more information, contact the EMC by calling Mr. Richard Zicarelli (305) 348-6557 or Mr. Mario Sanchez (sanchem@fiu.edu), or refer to the center's website at <http://www.eng.fiu.edu/emc/>.

Florida Center for Cyber Infrastructure Education and Research for Trust and Assurance

S. S. Iyengar, *Director and Ryder Distinguished University Professor, School of Computing and Information Sciences*

Cyberspace, the ubiquitous collection of interconnected IP networks and hosts that has proliferated over the last two decades, has become the nervous system of the country. Healthy functioning of Cyberspace is essential for the proper operation of numerous critical infrastructures, such as telecommunication, energy and transportation. It is also necessary to support the ever-expanding business infrastructure, including commerce and banking. The increasing reliance on Cyberspace has been paralleled by a corresponding increase in the variety, frequency and impact of attacks from a range of assailants. Both commercial companies and government agencies face continuous and increasingly more sophisticated cyber-attacks ranging from data exfiltration and spear phishing to sophisticated worms and logic bombs. The targets include not only computer information systems, but also the network communication infrastructure and power grids. Moreover, commercial companies and government agencies are themselves engaging in information gathering whose implications for privacy are disturbing.

Therefore, there is an increasing need of a concerted and cooperative effort on the part of the government and the private sector to address these attacks and threats. Research and education are the main ways to help detect, react, and reduce the impact of cyber threats and attacks. There is a dearth of educational cyber security programs at universities, despite a very strong demand for qualified graduates. Moreover, Miami's status as a gateway for international commerce, tourism, and immigration, especially with Latin America, makes it a particularly appropriate host location for a research and education consortium focusing on cyber infrastructure.

Our goal of this center is two-fold—first, to inspire a new generation of cyber research warriors and cyber savvy intelligence agents to take up the torch, to better understand our need for smart intelligence, and to defend the homeland. Since their work cannot be done alone, our second goal is to advance technology through the concept of subliminal contextual information in the production of subliminal contextual intelligence.

High Performance Database Research Center (HPDRC)

Naphtali Rishe, *Director and Professor, School of Computing and Information Sciences*

One of our research efforts is the High-Performance Database Research Center (HPDRC). HPDRC conducts research on such theoretical and applied issues as Internet-distributed heterogeneous databases, database design methodologies, database design tools, information

analysis, multi-media databases, database languages, data compression, spatial databases, and data visualization. The Center also designs specific database systems for highly complex applications.

Industry-University Cooperative Research Center (I/UCRC) Center for Advanced Knowledge Enablement (CAKE)

Naphtali Rishe, *Director and Professor, School of Computing and Information Sciences*

The National Science Foundation's (NSF) FIU-FAU-Dubna Industry/University Cooperative Research Center for Advanced Knowledge Enablement (CAKE) was established to develop long-term partnerships among industry, academe and government. The Center is supported primarily by industry center members, with NSF taking a supporting role in its development, evolution, and core funding. The Center hosts the NSF "AIR" Ecosystem to Pipeline Research at FIU.

The Center's mission is to conduct industry-relevant studies and deployments in the representation, management, storage, analysis, search and social aspects of large and complex data sets, with particular applications in geospatial location-based data, disaster mitigation, healthcare, transportation, and town planning.

Lehman Center for Transportation Research (LCTR)

Mohammed Hadi, *Director and Professor, Civil and Environmental Engineering*

Albert Gan, *Deputy Director and Professor, Civil and Environmental Engineering*

Fabian Cevallos, *Transit Program Director*

Xia Jin, *Associate Professor, Demand Forecasting and Discrete Choice Analysis*

Priyanka Alluri, *Associate Professor, Traffic Safety*

The Lehman Center for Transportation Research (LCTR) at Florida International University was established in 1993 in honor of Congressman Bill Lehman and his tireless efforts to make South Florida a better place for all of us. The center's vision is to become a 'state-of-the-art' transportation research and training facility. LCTR is committed to serve and benefit our society by conducting research to improve mobility, hence the quality of life issues, develop partnerships in the transportation industry, and educate a multidisciplinary workforce to plan, manage and implement transportation systems.

Faculty, staff and students at LCTR are involved in research related to the planning, design, operation and maintenance of transportation systems, including intelligent transportation systems, transportation system management and operation (TSM&O), multi-resolution modeling and simulation, connected and automated vehicles, decision support systems, signal control, transportation system safety, shared mobility, electric vehicles, micro-mobility, public transportation, freight; as well as public policy, air pollution, and the application of geographic information systems and other advanced technologies such as machine learning/data mining,

statistical analysis, optimization, and scientific visualization in transportation.

Motorola Nanofabrication Research Facility

Arvind Agarwal, *Distinguished Professor, Chairperson and Director, Mechanical and Materials Engineering*
Patrick Roman, *Lab Manager*

The first centralized facility of its kind in Florida, the Motorola Nanofabrication Research Facility is an open-access initiative in support of nano-scale devices, systems and materials research that encompasses a broad range of technologies and capabilities. The facility provides nanofabrication, analytical instrumentation, materials characterization and process-development laboratories for students, faculty and industrial researchers. This \$15 million Research Facility is an integral part of the Advanced Materials Engineering Research Institute (AMERI), FIU's broader materials research program.

Harnessing the synergy inherent in the study and development of nanoscale technologies, the facility boasts:

- Specialized equipment required to develop new and novel fabrication techniques unique to the creation of functional materials and devices that are no greater than 100 nanometers (1,000 times smaller than the diameter of a human hair);
- A full complement of standard semiconductor processing equipment to leverage the capabilities of robust and proven techniques; and
- State-of-the-art analytical tools to study, and characterize these nano-sized devices, as well as the materials and processes used to make them.

The Nanotechnology Faculty Team

Arvind Agarwal, *Distinguished Professor, Chairperson and Director, Mechanical and Materials Engineering*

George Dulikravich, *Professor, Mechanical and Materials Engineering*

Jin He, *Associate Professor, Physics*

W. Kinzy Jones, *Emeritus Professor, Mechanical and Materials Engineering*

Cheng-Yu Lai, *Associate Professor, Mechanical and Materials Engineering*

Grover Larkins, *Professor, Electrical and Computer Engineering*

Chenzhong Li, *Professor, Biomedical Engineering*

Wenzhi Li, *Professor, Physics*

Anthony McGoron, *Associate Dean and Professor, Biomedical Engineering*

Daniela Radu, *Associate Professor, Director NASA-CRE2DO, Mechanical and Materials Engineering*

P.M. Raj, *Associate Professor, Biomedical Engineering*

Surendra Saxena, *Emeritus Professor, Mechanical and Materials Engineering*

Frank Urban, *Associate Professor, Electrical and Computer Engineering*

Yuriy Vlasov, *Instructor*

Chunlei (Peggy) Wang, *Professor, Mechanical and Materials Engineering*

Shekhar Bhansali, *Professor and Chairperson, Electrical and Computer Engineering*

Nezh Pala, Associate Professor, Electrical and Computer Engineering

Science and Technology Center on Real-Time Functional Imaging (STROBE)

Jessica Ramella-Roman, FIU Site Director

Margaret Murnane, PI, University of Colorado Boulder

The STROBE NSF Science and Technology Center on Real-Time Functional Imaging is developing new functional imaging microscopes that enable functional multi-scale characterization of complex samples — from low-dimensional materials, nanostructured systems and devices, to emergent phenomena in quantum materials. These capabilities contrast with current single-mode, mostly static, approaches to imaging, which are too slow and inaccessible to close the loop between design, characterization and optimization of materials science and technology. STROBE is also integrating different photon- and electron-based imaging modalities with underpinning technologies — advanced algorithms, fast detectors, big data manipulation and hybrid/adaptive imaging.

The Vision of STROBE is to transform imaging science and technology of functioning nano-systems. The Mission of STROBE is to create powerful and broadly-applicable real-time nano-to-atomic scale imaging modalities to advance imaging science and increase access, that can be used to address grand challenges in science and technology, while building a diverse STEM workforce.

STROBE is part of the 2016 class of National Science Foundation Science & Technology Centers awarded in October 2016. STROBE brings together scientists and students from the University of Colorado at Boulder, the University of California at Los Angeles, the University of California at Berkeley, Fort Lewis College, Florida International University, and the University of California at Irvine. Several national laboratories, industries and international institutions are also partnering with STROBE.

Andres Tremante, Director of Education and Outreach

Andrew Green, Education and Outreach

The Precise Advanced Technologies and Health Systems for Underserved Populations (PATHS-UP)

Jessica Ramella-Roman, FIU Site Director

Gerry Cote, Texas A&M Director

The goal of all NSF-ERC programs is to integrate engineering research and education with technological innovation to transform national prosperity, health and security.

The specific vision of our PATHS-UP ERC is to change the paradigm for the health of underserved populations by developing revolutionary and cost-effective technologies and systems at the point-of-care. The initial PATHS-UP technologies and systems are designed to help with chronic diseases, such as diabetes and cardiovascular disease, which are leading causes of morbidity and mortality world-wide. Chronic diseases are particularly devastating in underserved communities in the United

States where they are contracted at a higher rate than the national average. In these underserved communities, chronic diseases are increasingly a major cause of disability, even for younger people, and lead to poor quality of life and high health care expenditures. Thus, the burden of chronic disease is a grand challenge that requires cost-effective technologies to reduce mortality rates, emergency room visits and hospitalizations, which disproportionately drive-up healthcare costs. Technologies are also needed to help prevent or delay the disease, reducing the incidence of secondary complications and enhancing life quality.

Thus, to accomplish our vision, the PATHS-UP mission is:

- 1) to engineer transformative, robust, and affordable, technologies and systems to improve healthcare access, enhance the quality of service and life, and reduce the cost of healthcare in underserved populations and
- 2) to recruit and educate a diverse group of scientists and engineers who are ready to lead the future in developing enabling technologies to improve health in underserved communities.

Our PATHS-UP ERC team is led by Texas A&M University, with partners from the University of California at Los Angeles, Rice University, and Florida International University. At Florida International University, the research focus will be concentrated on biochemical marker for cardiovascular disease, novel approach to enabling wearable technologies for individuals experiencing disability within the PATHS-UP communities, as well as novel wearable sensors for diagnosis of cardiovascular disease and diabetes.

Titan America Structures and Construction Testing Laboratory

Atorod Azizinamini, Director, Vasant Surti Professor of Civil Engineering and Director, Moss School of Construction, Infrastructure and Sustainability.,

David Garber, Deputy Director and Associate Professor, Civil and Environmental Engineering,

Armin Mehrabi, Associate Professor, Civil and Environmental Engineering,

The Titan America Structures and Construction Testing Laboratory was established in the Department of Civil and Environmental Engineering to provide hands-on educational experience for students; to research and development of innovative hurricane-resistant and durable construction materials, structural systems and components; to serve the construction industry; to contribute to the engineering community in South Florida, and to advance the safety, durability, and economy of our civil infrastructure.

The Titan America Structures and Construction Testing Laboratory was built through the help of a consortium of 21 industry partners who donated materials, services, and cash in excess of \$250,000. It is one of the largest

facilities in the State of Florida and is equipped with a full-scale structural testing system (FSST). The FSST consists of a 15 ft tall testing frame that stands above a 35 ft x 65 ft strong concrete floor with 4 ft thickness and 100,000 lbs capacity tie-downs on a 3 ft x 6 ft pattern. The steel frame is capable of testing full-scale structural members, such as a 65 ft bridge girder. The applied load is replicated using a fatigue rated tension/compression actuator that is capable of performing cyclic loading. In addition to the FSST, the SCL is also equipped with other material testing systems, including a universal testing machine, compression machine, and small-scale load frames.

Telecommunications and Information Technology Institute (IT²)

Niki Pissinou, *Director and Professor, School of Computing and Information Sciences*

Florida International University (FIU) recognizes the need to nurture highly trained personnel for the nation's industry and business, develop research to support the rapidly expanding high-tech industry and become proactive in technology transfer. Thus, ensuring continued economic growth and prosperity in the region. In order to fully meet today's technological demands, FIU has established the Telecommunications and Information Technology Institute (IT²). IT² promotes advanced multidisciplinary education and research focused on telecommunications and information technologies. IT²'s mission is to:

1. Deliver high quality telecommunications and information technology education and training.
2. Conduct and promote research to enhance Florida's role as a leader in telecommunications and information technology.
3. Offer training that is needed to foster business development and workforce preparedness.
4. Promote technology transfer to enhance the enabling technologies of the telecommunication and information technology industries.

In fulfilling its mission, IT² promotes multidisciplinary collaboration and serves as the catalyst to promote intellectual cross-fertilization among disciplines. This effort results in the synergistic enhancement of teaching and research, so critical in the telecommunications and information technology fields, where disciplinary barriers are falling and lines are blurred. An objective of the Institute is to infuse telecommunications and information technology content into the curriculum at all appropriate levels. To fill the urgent demand of industry, the institute is developing interdisciplinary telecommunication programs that provide certificate programs, Bachelors, Masters and Ph.D. degrees.

IT² constitutes an infrastructure that is viable for cutting edge research activities. Researchers at the institute conduct funded research and development targeted at solving complex problems conducive to the early identification of high impact opportunities. Of particular importance to the institute's research efforts is the emerging global wireless, optical and personal communications infrastructure and the ability to represent, store and access information to perform a variety of information related tasks. To provide an effective forum for original research results and to foster communication among researchers, industry leaders can collaborate on education, training, and re-engineering the

telecommunications workforce of the future. The alliance provides effective ways to educate the workforce of the 21st century. In accordance, the institute provides technical assistance and applied research services to transfer acquired knowledge and technologies to the commercial sector. The IT² team can work with industrial organizations to tap into some technological innovations that drive the industry to its strategic advantage.
